### Grey Turner's Sign

Bluish or violaceous ecchymosis of the flanks caused by retroperitoneal bleeding tracking through the abdominal wall. It is classically associated with severe haemorrhagic pancreatitis but may occur with other retroperitoneal haemorrhage.

**Synonyms:**

### Grid Implant

A flexible electrode array placed on or near the brain or another tissue surface to record electrical activity or deliver stimulation.

**Synonyms:**

### Grief

Grief concerns grief; its medical significance is established from the defining features, setting, associated findings, and clinical question. following other significant losses such as divorce, job loss, or declining health. It encompasses a range of feelings including sadness, anger, guilt, and numbness, often occurring in waves rather than linear stages.

**Synonyms:**

### Gripping

Cramping or spasmodic abdominal pain, often caused by contractions or obstruction of a hollow organ.

**Synonyms:**

### Grippe

An older name for influenza, a viral respiratory illness that commonly causes fever, cough, body aches, and fatigue.

**Synonyms:**

### Griscelli Syndrome

Three types: Type 1 (MYO5A mutation): primary neurologic impairment, no immunodeficiency; Type 2 (RAB27A mutation): immunodeficiency + partial albinism, HLH risk; Type 3 (MLPH mutation): only partial albinism. Type 2: silvery hair, large melanosomes in melanocytes, defective cytotoxic granule release -> HLH.

**Synonyms:**

---

### Gross Examination

The macroscopic, naked-eye inspection of a specimen in the pathology laboratory, performed before microscopic sectioning and the essential first step in pathologic diagnosis of resected tissues and organs.

**Synonyms:**

### Gross Motor Skills

The ability to use large muscle groups for movement and posture, developing in a predictable sequence in infancy/childhood: head control (3 months), sitting (6 months), crawling (9 months), standing (10-12 months), walking (12-18 months), running/jumping (2-3 years), hopping and balance (3-5 years).

**Synonyms:**

### Ground-Glass Opacity

Hazy lung opacity on CT without obscuring vessels. Non-specific, may represent inflammation, edema, fibrosis, malignancy.

**Synonyms:**

### Group A Strep

Group A Streptococcus (*Streptococcus pyogenes*), a gram-positive coccus in chains, beta-hemolytic. Infections: pharyngitis/tonsillitis, impetigo, erysipelas, cellulitis, scarlet fever, necrotizing fasciitis, streptococcal toxic shock syndrome, pneumonia, and puerperal sepsis.

**Synonyms:**

### Group A streptococcus

*Streptococcus pyogenes*, a bacterium that can cause pharyngitis, skin infections, invasive disease, and immune-mediated complications.

**Synonyms:**

### Group B Strep

Group B Streptococcus (GBS, *Streptococcus agalactiae*): a gram-positive coccus colonizing the GI and genitourinary tract in 10-30 percent of women; major cause of neonatal sepsis and meningitis.

**Synonyms:**

### Group B Streptococcus

A gram-positive bacterium (*Streptococcus agalactiae*) colonizing the genitourinary and gastrointestinal tracts. Asymptomatic vaginal colonization occurs in 20-30% of pregnant women. Screening is performed at 36-37 weeks gestation via rectovaginal swab culture.

**Synonyms:**

### Growing Pains

Recurrent, bilateral leg pain in children ages 3-12, typically occurring in the late afternoon or evening and resolving by morning. Pain is deep, aching in the calves, shins, and thighs (not joints). No limping, fever, swelling, or functional impairment.

**Synonyms:**

### Growth Chart

A graphical representation of growth (weight, height/length, head circumference, BMI) plotted against age, standardized by population (WHO growth standards 0-5 years; CDC growth charts 2-20 years; percentiles/z-scores).

**Synonyms:**

### Growth Factor

Proteins that stimulate cell growth, proliferation, differentiation, and survival. Major families: EGF (epidermal growth factor), FGF (fibroblast growth factor), PDGF (platelet-derived), VEGF (vascular endothelial), TGF-beta (transforming), NGF (nerve), IGF (insulin-like), HGF (hepatocyte).

**Synonyms:**

### Growth Hormone

A hormone released by the anterior pituitary that promotes growth partly through insulin-like growth factor 1 and also affects protein, fat, and carbohydrate metabolism.

**Synonyms:**

### Growth Hormone Deficiency

Insufficient secretion of growth hormone from the anterior pituitary, causing short stature in children and metabolic effects in adults. In children: delayed

---

growth, short stature, delayed bone age, and increased fat mass. In adults: decreased muscle mass, increased fat mass, reduced bone density, fatigue, and dyslipidemia.

**Synonyms:**

### **Growth Hormone Physiology**

Growth hormone is secreted in a pulsatile pattern by pituitary somatotroph cells regulated by hypothalamic GHRH which stimulates release and somatostatin which inhibits release. GH acts directly on tissues and indirectly through IGF-1 produced primarily by the liver.

**Synonyms:**

### **Growth Medium**

A nutrient preparation supporting microbial multiplication in vitro, supplying carbon, nitrogen, minerals, and growth factors in liquid or solid form.

**Synonyms:**

### **Growth Retardation**

Abnormally slow physical growth or failure to reach expected height or weight for age and developmental stage. Causes include inadequate nutrition, chronic systemic disease, endocrine or genetic disorders, malabsorption, psychosocial deprivation, and constitutional variation; assessment uses growth charts and clinical context.

**Synonyms:**

### **Growth Scan**

An ultrasound examination used to assess fetal size, growth pattern, amniotic fluid, and sometimes blood flow. Measurements are compared with gestational-age standards to identify possible growth restriction or excessive growth.

**Synonyms:**

### **Guaifenesin**

An expectorant used to loosen respiratory mucus and make coughing more productive. It provides symptomatic relief in some respiratory illnesses; dosing depends on the formulation and patient.

**Synonyms:**

### **Guided Tissue Regeneration**

Periodontal procedure using barrier membrane to promote regeneration of bone, cementum, periodontal ligament.

**Synonyms:**

### **Guillain-Barre Syndrome**

An acute, immune-mediated polyneuropathy typically presenting with ascending paralysis following an antecedent infection (*Campylobacter jejuni*, CMV, EBV, Zika). Variants: acute inflammatory demyelinating polyneuropathy (AIDP, most common in North America), acute motor axonal neuropathy (AMAN, more common in Asia).

**Synonyms:**

### **Gummy Smile**

Excessive gingival display when smiling. Caused by hypermobile lip, vertical maxillary excess, altered passive eruption. Treatment: surgery, Botox, orthodontics.

**Synonyms:**

### **Gunshot Wound**

An injury produced by a projectile discharged from a firearm; forensic classification by range and direction. Entrance wound: rounded/ovoid defect with an abraded ring and often a zone of soot (close range) or stippling/tattooing (intermediate range); contact wounds show muzzle imprint.

**Synonyms:**

### **Gut Microbiome**

The complex community of trillions of microorganisms, including bacteria, viruses, and fungi, residing in the gastrointestinal tract. The gut microbiome plays a crucial role in digestion, immune function, vitamin synthesis, and protection against pathogens.

**Synonyms:**

### **Guttate Psoriasis**

An acute eruption of numerous small, scaly, drop-like psoriatic papules and plaques, often following streptococcal pharyngitis in children or young adults. Diagnosis is clinical; the eruption may re-

---

solve spontaneously or evolve into chronic plaque psoriasis.

**Synonyms:**

### **Gynaecologist**

A medical doctor who specializes in the health of the female reproductive system (vagina, cervix, uterus, fallopian tubes, ovaries) and breasts.

**Synonyms:**

### **Gynaecomastia**

The benign enlargement of breast tissue in males. Pathophysiology: an imbalance between estrogen (stimulates breast tissue growth) and androgen (suppresses) activity, resulting in increased estrogen-to-testosterone ratio.

**Synonyms:**

### **gynecology**

The medical specialty concerned with the health of the female reproductive system (uterus, ovaries, fallopian tubes, cervix, vagina, and vulva).

**Synonyms:**

### **Gynecomastia**

Enlargement of breast tissue in males, often bilateral, occurring physiologically in neonates, during puberty (40-60% of boys), and in aging men. Pathologic causes include Klinefelter syndrome, testicular tumors, medications (spironolactone, cannabis), and liver disease. Persistent or asymmetric gynecomastia warrants evaluation.

**Synonyms:**

### **Gyrus**

A ridge or convolution on the surface of the cerebral cortex, separated by sulci (grooves). The folded structure triples the surface area of the brain (approximately 2500 cm<sup>2</sup>) while fitting within the cranial vault.

**Synonyms:**

### **Gallbladder Carcinoma**

Cancer arising from the gallbladder.

**Synonyms:**

### **Gallbladder Infection**

Inflammation or infection of the gallbladder, often associated with blockage of bile flow.

**Synonyms:**

### **Giant Cell Tumor**

A usually benign but locally aggressive bone tumor containing numerous giant cells.

**Synonyms:**

### **Glomerulosclerosis**

Scarring of the glomeruli, the kidney structures that filter blood.

**Synonyms:**

### **Gonadoblastoma**

A rare tumor of an abnormal or developmentally disordered gonad that may contain germ cells and sex-cord cells.

**Synonyms:**

### **Gonococcal Urethritis**

Inflammation of the urethra caused by infection with *Neisseria gonorrhoeae*.

**Synonyms:**

### **Granuloma Inguinale**

A chronic sexually transmitted infection that causes ulcerative lesions of the genital region.

**Synonyms:**

### **Granulomatosis**

A disorder characterized by formation of granulomas, which are organized collections of immune cells caused by chronic inflammation.

**Synonyms:**

### **Growth Failure**

Abnormally slow physical growth or inadequate weight gain compared with expected development.

**Synonyms:**

### **Gyrate Atrophy**

An inherited retinal disorder causing progressive

---

loss of peripheral vision and night vision.

**Synonyms:**

### **Gastrointestinal Tract**

The continuous digestive passage from the mouth through the esophagus, stomach, intestines, rectum, and anus.

**Synonyms:**

### **Ganglioglioma**

A usually slow-growing brain or spinal-cord tumor made of nerve cells and supporting glial cells.

**Synonyms:**

### **Gas and Gas Pains**

Gas-related fullness, bloating, or abdominal discomfort caused by swallowed or intestinal gas.

**Synonyms:**

### **Golfer's Elbow**

Painful inflammation or degeneration of tendons on the inner side of the elbow.

**Synonyms:**

### **Group B Streptococcal Disease**

Infection caused by group B Streptococcus bacteria, which can be serious in newborns and vulnerable adults.

**Synonyms:**

### **Gamma Globulin**

The fraction of blood plasma containing most immunoglobulins, or antibodies.

**Synonyms:**

### **Gas Transport**

Movement of oxygen from the lungs to tissues and carbon dioxide from tissues to the lungs through the blood.

**Synonyms:**

### **Gastroduodenostomy**

Surgical creation of an opening between the stomach and duodenum.

**Synonyms:**

### **Gastrojejunostomy**

Surgical creation of an opening between the stomach and jejunum.

**Synonyms:**

### **Genu Varum**

Outward bowing of the legs, commonly called bowlegs.

**Synonyms:** bowlegs.

### **Glomerular Capsule**

The cup-shaped structure surrounding a kidney glomerulus that receives filtered fluid.

**Synonyms:**

### **Glomerular Filtrate**

Fluid filtered from blood into the kidney tubules at the glomerulus.

**Synonyms:**

### **Glucosamine**

A naturally occurring compound used in cartilage formation and sometimes taken as a supplement for joint symptoms.

**Synonyms:**

### **Goniometer**

An instrument used to measure the angle or range of motion of a joint.

**Synonyms:**

### **Graafian Follicle**

A mature ovarian follicle that contains an egg ready for ovulation.

**Synonyms:**

### **Graft-versus-Host Reaction**

An immune reaction in which transplanted donor immune cells attack the recipient's tissues.

**Synonyms:**

---

### Greater Omentum

A fold of fatty peritoneal tissue that hangs from the stomach and partly covers the abdominal organs.

**Synonyms:**

### Gustation

The sense of taste.

**Synonyms:**

### Gowers Sign

A maneuver in which a person uses the hands to push up from the floor or thighs because of proximal muscle weakness, classically seen in muscular dystrophy.

**Synonyms:**

### Ganglion Cyst

A benign, fluid-filled cyst arising near a joint or tendon sheath, most often at the wrist or hand. It may be painless or cause pressure, discomfort, or limitation of movement.

**Synonyms:**

### Gastric Varices

Enlarged veins in the stomach wall caused by portal hypertension, usually related to liver disease or obstruction of the splenic or portal venous circulation. Rupture can cause life-threatening gastrointestinal bleeding.

**Synonyms:**

### Gag Reflex (Pharyngeal Reflex)

A protective reflex in which stimulation of the back of the throat produces contraction of the pharyngeal muscles and may trigger retching. It helps protect the airway from foreign material.

**Synonyms:** Pharyngeal Reflex

### Dry Gangrene

Tissue death caused mainly by loss of arterial blood supply, producing dry, shrunken, dark tissue with a relatively clear boundary from viable tissue.

**Synonyms:**

### Wet Gangrene

Tissue death complicated by bacterial infection and tissue swelling, producing moist, discolored, rapidly spreading necrosis. It requires urgent medical assessment.

**Synonyms:**

### GAG (Glycosaminoglycan)

A long, unbranched carbohydrate chain found in the extracellular matrix and connective tissues. Abnormal breakdown or accumulation of GAGs occurs in mucopolysaccharidoses.

**Synonyms:** Glycosaminoglycan

### Gamete

A mature reproductive cell, such as a sperm or ovum, containing one set of chromosomes and combining with another gamete at fertilization.

**Synonyms:**

### Gastroenterostomy

Surgical creation of an opening between the stomach and a segment of the small intestine, usually the jejunum, to bypass or replace a blocked or diseased gastric outlet.

**Synonyms:**

### Genetics

Genetics concerns genetics, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### Genome

The complete genetic material of an organism, including its genes and noncoding DNA.

**Synonyms:**

### Genu Valgum (Knock-Knee)

An alignment abnormality in which the knees angle inward and may touch while the ankles remain apart. It may be developmental or caused by bone, joint, or metabolic disease.

**Synonyms:** Knock-Knee

---

## Glans Penis

The expanded, sensitive distal end of the penis containing the external urethral opening and covered by the foreskin when present.

**Synonyms:**

## Global Aphasia

A severe language disorder caused by extensive damage to the dominant cerebral hemisphere, impairing speech production, comprehension, reading, and writing.

**Synonyms:**

## Glue Ear (Secretory Otitis Media)

Persistent fluid in the middle ear without acute infection, often causing conductive hearing loss and a feeling of blockage. It is common in children.

**Synonyms:** Secretory Otitis Media

## Groin

The region where the lower abdomen meets the upper thigh, containing the inguinal canal and related muscles, vessels, nerves, and lymph nodes.

**Synonyms:**

## Gestational Pyelonephritis

A kidney infection occurring during pregnancy, usually causing fever, flank pain, nausea, or urinary symptoms. It can lead to sepsis, preterm labor, or respiratory complications and requires prompt clinical assessment.

**Synonyms:** Pyelonephritis in pregnancy; pregnancy-associated kidney infection.

## gaba receptor

gaba receptor denotes gaba receptor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

## gabapentin

gabapentin refers to gabapentin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## gadoleic acid

gadoleic acid denotes gadoleic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

## gadolinium

gadolinium refers to gadolinium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## gadopentetate dimeglumine

gadopentetate dimeglumine refers to gadopentetate dimeglumine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## gaffkya homari

gaffkya homari refers to gaffkya homari, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## gag gene

gag gene denotes gag gene, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

## gag protein

gag protein denotes gag protein, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

## gait apraxia

gait apraxia refers to gait apraxia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**gait ataxia**

gait ataxia refers to gait ataxia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**galactans**

galactans refers to galactans, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**galactolipids**

galactolipids denotes galactolipids, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**galactose**

galactose refers to galactose, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**galactosialidosis**

galactosialidosis refers to galactosialidosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**galactoside**

galactoside refers to galactoside, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**galactosyltransferase**

galactosyltransferase refers to galactosyltransferase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**galanin**

galanin refers to galanin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**galiximab**

galiximab concerns galiximab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**gall bladder disease**

gall bladder disease denotes a clinical condition or finding involving gall bladder disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**gallamine triethiodide**

gallamine triethiodide refers to gallamine triethiodide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gallbladder necrosis**

gallbladder necrosis refers to gallbladder necrosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gallbladder perforation**

gallbladder perforation refers to gallbladder perforation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gallic acid**

gallic acid denotes gallic acid, a biological com-

---

ponent or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **gallium**

gallium refers to gallium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **gallium nitrate**

gallium nitrate refers to gallium nitrate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **gametogenesis**

gametogenesis denotes gametogenesis, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **gamma rays**

gamma rays refers to gamma rays, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **gamma synuclein**

gamma synuclein refers to gamma synuclein, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **gamma-chemokines**

gamma-chemokines refers to gamma-chemokines, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **gammacoronavirus**

gammacoronavirus is a virus or viral group associated with gammacoronavirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **gammaherpesvirina**

gammaherpesvirina is a virus or viral group associated with gammaherpesvirina; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **gammaretrovirus**

gammaretrovirus is a virus or viral group associated with gammaretrovirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **ganciclovir**

ganciclovir concerns ganciclovir, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **ganglia**

ganglia refers to ganglia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **ganglion cell**

ganglion cell denotes ganglion cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **ganglioneuroma**

ganglioneuroma refers to ganglioneuroma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**ganglioneuromatosis**

ganglioneuromatosis refers to ganglioneuromatosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ganglioside**

ganglioside refers to ganglioside, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gangliosidosis**

gangliosidosis refers to gangliosidosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gap junction**

gap junction refers to gap junction, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**Gardner syndrome**

Gardner syndrome denotes a clinical condition or finding involving gardner syndrome; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**gardnerella**

gardnerella identifies gardnerella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**gardnerella vaginalis**

gardnerella vaginalis identifies gardnerella vaginalis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**garlic**

garlic refers to garlic, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gartner duct**

gartner duct refers to gartner duct, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gas**

gas refers to gas, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gas chromatography**

gas chromatography refers to gas chromatography, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gas poisoning**

gas poisoning denotes an infectious or toxic condition involving gas poisoning; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**gas scavenger**

gas scavenger refers to gas scavenger, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gastric balloon**

gastric balloon refers to gastric balloon, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**gastric dysplasia**

gastric dysplasia refers to gastric dysplasia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gastric fistula**

gastric fistula refers to gastric fistula, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gastric fundus**

gastric fundus refers to gastric fundus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gastric hemorrhage**

gastric hemorrhage denotes a clinical condition or finding involving gastric hemorrhage; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**gastric juice**

gastric juice refers to gastric juice, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gastric leiomyosarcoma**

gastric leiomyosarcoma denotes a neoplastic condition involving gastric leiomyosarcoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**gastric mucosa**

gastric mucosa refers to gastric mucosa, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gastric necrosis**

gastric necrosis refers to gastric necrosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gastric obstruction**

gastric obstruction denotes a clinical condition or finding involving gastric obstruction; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**gastric stenosis**

gastric stenosis denotes a clinical condition or finding involving gastric stenosis; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**gastroenteritis bacterial**

gastroenteritis bacterial is a microorganism or microbial group associated with gastroenteritis bacterial; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**gastroenterologist**

gastroenterologist refers to gastroenterologist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gastroepiploic artery**

gastroepiploic artery refers to gastroepiploic artery, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gastrointestinal agents**

gastrointestinal agents is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat gastrointestinal agents.

---

**Synonyms:**

**gastrointestinal disorder**

gastrointestinal disorder is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat gastrointestinal disorder.

**Synonyms:**

**gastrointestinal gas**

gastrointestinal gas is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat gastrointestinal gas.

**Synonyms:**

**gastrointestinal hemorrhage**

gastrointestinal hemorrhage is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat gastrointestinal hemorrhage.

**Synonyms:**

**gastrointestinal hormone**

gastrointestinal hormone denotes gastrointestinal hormone, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gastrointestinal neoplasm**

gastrointestinal neoplasm is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat gastrointestinal neoplasm.

**Synonyms:**

**gastrointestinal system**

gastrointestinal system is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat gastrointestinal system.

**Synonyms:**

**gastroscope**

gastroscope refers to gastroscope, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gastroscopy**

gastroscopy refers to gastroscopy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gastrula**

gastrula refers to gastrula, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gatifloxacin**

gatifloxacin concerns gatifloxacin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**gauss**

gauss refers to gauss, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gefitinib**

gefitinib concerns gefitinib, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**gel electrophoresis**

gel electrophoresis refers to gel electrophoresis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gelatin**

gelatin refers to gelatin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### geldanamycin analogue

geldanamycin analogue refers to geldanamycin analogue, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### gelsolin

gelsolin refers to gelsolin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### gemcitabine

gemcitabine refers to gemcitabine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### gemcitabine hydrochloride

gemcitabine hydrochloride refers to gemcitabine hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### gemella

gemella identifies gemella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### gemella bergeri

gemella bergeri identifies gemella bergeri, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### gemella haemolysans

gemella haemolysans identifies gemella haemolysans, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### gemella morbillorum

gemella morbillorum identifies gemella morbillorum, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### gemella sanguinis

gemella sanguinis identifies gemella sanguinis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### gemifloxacin

gemifloxacin concerns gemifloxacin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### gemtuzumab ozogamicin

gemtuzumab ozogamicin refers to gemtuzumab ozogamicin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### gender

gender refers to gender, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### gender identity

gender identity refers to gender identity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### gene amplification

gene amplification denotes gene amplification, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

---

**Synonyms:**

**gene conversion**

gene conversion denotes gene conversion, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gene deletion**

gene deletion denotes gene deletion, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gene dosage**

gene dosage denotes gene dosage, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gene duplication**

gene duplication denotes gene duplication, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gene frequency**

gene frequency denotes gene frequency, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gene fusion**

gene fusion denotes gene fusion, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gene library**

gene library denotes gene library, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gene modification**

gene modification denotes gene modification, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gene mutation**

gene mutation denotes gene mutation, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gene rearrangement**

gene rearrangement denotes gene rearrangement, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gene silencing**

gene silencing denotes gene silencing, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gene targeting**

gene targeting denotes gene targeting, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gene transfer**

gene transfer denotes gene transfer, a biological component or molecular process interpreted through

---

relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **gene-environment interaction**

gene-environment interaction denotes gene-environment interaction, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **gene-modified**

gene-modified denotes gene-modified, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **generalized**

generalized denotes generalized, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **generalized lipodystrophy**

generalized lipodystrophy denotes generalized lipodystrophy, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **generalized seizure**

generalized seizure denotes generalized seizure, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **genetic anticipation**

genetic anticipation denotes genetic anticipation, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **genetic carrier**

genetic carrier denotes genetic carrier, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **genetic disorder**

genetic disorder denotes genetic disorder, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **genetic drift**

genetic drift denotes genetic drift, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **genetic engineering**

genetic engineering denotes genetic engineering, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **genetic linkage**

genetic linkage denotes genetic linkage, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **genetic marker**

genetic marker denotes genetic marker, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **genetic polymorphism**

genetic polymorphism denotes genetic polymorphism, a biological component or molecular process

---

interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **genetic profile**

genetic profile denotes genetic profile, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **genetic recombination**

genetic recombination denotes genetic recombination, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **genetic susceptibility**

genetic susceptibility denotes genetic susceptibility, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **genetic technique**

genetic technique denotes genetic technique, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **genetic transcription**

genetic transcription denotes genetic transcription, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **geniculate body**

geniculate body refers to geniculate body, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **genital edema**

genital edema denotes a clinical condition or finding involving genital edema; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **genital system**

genital system refers to genital system, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **genitourinary neoplasm**

genitourinary neoplasm denotes a neoplastic condition involving genitourinary neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **genomic instability**

genomic instability refers to genomic instability, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **genomic library**

genomic library refers to genomic library, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **genomic medicine**

genomic medicine refers to genomic medicine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **genomics**

genomics refers to genomics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**genotype determination**

genotype determination refers to genotype determination, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gentamicin**

gentamicin refers to gentamicin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gentamicin sulfate**

gentamicin sulfate refers to gentamicin sulfate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gentian violet**

gentian violet refers to gentian violet, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**genu recurvatum**

genu recurvatum refers to genu recurvatum, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**genus dermatophilus**

genus dermatophilus refers to genus dermatophilus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**genus dickeya**

genus dickeya refers to genus dickeya, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**genus leminorella**

genus leminorella refers to genus leminorella, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**genus saimiri**

genus saimiri refers to genus saimiri, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**geophagia**

geophagia refers to geophagia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**geotrichum**

geotrichum identifies geotrichum, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**geotrichum klebahnii**

geotrichum klebahnii identifies geotrichum klebahnii, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**geriatric nursing**

geriatric nursing refers to geriatric nursing, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**germ cell**

germ cell denotes germ cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

---

**germ layer**

germ layer refers to germ layer, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**germanium**

germanium refers to germanium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**giant cells**

giant cells denotes giant cells, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**giardia**

giardia identifies giardia, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**gigabecquerel**

gigabecquerel refers to gigabecquerel, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gill**

gill identifies gill, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**gimatecan**

gimatecan refers to gimatecan, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gingiva disease**

gingiva disease denotes a clinical condition or finding involving gingiva disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**gingival hemorrhage**

gingival hemorrhage denotes a clinical condition or finding involving gingival hemorrhage; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**gingival infections**

gingival infections denotes an infectious or toxic condition involving gingival infections; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**gingival margin**

gingival margin refers to gingival margin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gingival neoplasm**

gingival neoplasm denotes a neoplastic condition involving gingival neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**gingival overgrowth**

gingival overgrowth refers to gingival overgrowth, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gingival pocket**

gingival pocket refers to gingival pocket, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**ginkgo biloba**

ginkgo biloba refers to ginkgo biloba, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ginseng preparation**

ginseng preparation refers to ginseng preparation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gizzard**

gizzard refers to gizzard, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glanders**

glanders identifies glanders, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**glandular stomach**

glandular stomach refers to glandular stomach, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gliclazide**

gliclazide refers to gliclazide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glioblastoma multiforme**

glioblastoma multiforme denotes a neoplastic condition involving glioblastoma multiforme; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**gliocladium**

gliocladium identifies gliocladium, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**gliosarcoma**

gliosarcoma denotes a neoplastic condition involving gliosarcoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**gliosis**

gliosis refers to gliosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glipizide**

glipizide refers to glipizide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**globicatella**

globicatella identifies globicatella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**globicatella sanguinis**

globicatella sanguinis identifies globicatella sanguinis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**globozoospermia**

globozoospermia refers to globozoospermia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**globule unit**

globule unit refers to globule unit, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**globus pallidus**

globus pallidus refers to globus pallidus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glomerular filtration**

glomerular filtration refers to glomerular filtration, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glomerulomegaly**

glomerulomegaly refers to glomerulomegaly, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glomerulonephritis acute**

glomerulonephritis acute refers to glomerulonephritis acute, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glossalgia**

glossalgia refers to glossalgia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glossectomy**

glossectomy is used in relation to glossectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**glossinidae**

glossinidae refers to glossinidae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glossopharyngeal nerve**

glossopharyngeal nerve refers to glossopharyngeal nerve, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glossoptosis**

glossoptosis refers to glossoptosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glucan**

glucan refers to glucan, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glucarpidase**

glucarpidase refers to glucarpidase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glucocorticoid**

glucocorticoid refers to glucocorticoid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gluconates**

gluconates refers to gluconates, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### glucose transport

glucose transport refers to glucose transport, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glucose transporter

glucose transporter refers to glucose transporter, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glucosinolate

glucosinolate refers to glucosinolate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glucosylceramidase

glucosylceramidase refers to glucosylceramidase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glucuronate

glucuronate refers to glucuronate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glucuronic acid

glucuronic acid denotes glucuronic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### glucuronide

glucuronide refers to glucuronide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glutamate decarboxylase

glutamate decarboxylase refers to glutamate decarboxylase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glutamate receptor

glutamate receptor denotes glutamate receptor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### glutamic acid

glutamic acid denotes glutamic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### glutamine

glutamine refers to glutamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glutaral

glutaral refers to glutaral, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glutathione disulfide

glutathione disulfide refers to glutathione disulfide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glutathione transferase

glutathione transferase refers to glutathione transferase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**gluteal muscle**

gluteal muscle refers to gluteal muscle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glyburide**

glyburide refers to glyburide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glyceraldehyde**

glyceraldehyde refers to glyceraldehyde, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glyceride**

glyceride refers to glyceride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glycerol**

glycerol refers to glycerol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glycerol kinase**

glycerol kinase refers to glycerol kinase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glycerophosphates**

glycerophosphates refers to glycerophosphates, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glycerophospholipids**

glycerophospholipids denotes glycerophospholipids, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**glycerylphosphorylcholine**

glycerylphosphorylcholine refers to glycerylphosphorylcholine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glycine**

glycine refers to glycine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glycine receptor**

glycine receptor denotes glycine receptor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**glycocalyx**

glycocalyx refers to glycocalyx, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glycolates**

glycolates refers to glycolates, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glycolipid**

glycolipid denotes glycolipid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

---

### glycomics

glycomics refers to glycomics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glycopeptide

glycopeptide is a defined chemical or biologic substance involved in glycopeptide and studied in physiology, pharmacology, laboratory medicine, or treatment.

**Synonyms:**

### glycophorin

glycophorin refers to glycophorin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glycoprotein

glycoprotein denotes glycoprotein, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### glycopyrrolate

glycopyrrolate refers to glycopyrrolate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glycosaminoglycans

glycosaminoglycans refers to glycosaminoglycans, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glycoside

glycoside refers to glycoside, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glycosphingolipid

glycosphingolipid denotes glycosphingolipid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### glycosylation

glycosylation refers to glycosylation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glycosylphosphatidylinositol

glycosylphosphatidylinositol refers to glycosylphosphatidylinositol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glycosyltransferase

glycosyltransferase refers to glycosyltransferase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### glycyrrhetic acid

glycyrrhetic acid denotes glycyrrhetic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### glycyrrhizic acid

glycyrrhizic acid denotes glycyrrhizic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### glyoxal

glyoxal refers to glyoxal, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**glyoxysome**

glyoxysome refers to glyoxysome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glyphosate**

glyphosate refers to glyphosate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**glyphosine**

glyphosine refers to glyphosine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gnathostoma**

gnathostoma identifies gnathostoma, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**gnathostoma spinigerum**

gnathostoma spinigerum identifies gnathostoma spinigerum, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**gnathostomiasis**

gnathostomiasis refers to gnathostomiasis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**goblet cell**

goblet cell denotes goblet cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gold**

gold refers to gold, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gold alloys**

gold alloys refers to gold alloys, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**golgi cisternae**

golgi cisternae denotes golgi cisternae, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gonad**

gonad refers to gonad, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gonad disorder**

gonad disorder denotes a clinical condition or finding involving gonad disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**gonadal agenesis**

gonadal agenesis denotes gonadal agenesis, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gonadorelin**

gonadorelin refers to gonadorelin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**gonadotrophs**

gonadotrophs refers to gonadotrophs, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gonadotropin**

gonadotropin concerns gonadotropin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**gondoic acid**

gondoic acid denotes gondoic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**gordonia aichiensis**

gordonia aichiensis identifies gordonia aichiensis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**gordonia bacterium**

gordonia bacterium is a microorganism or microbial group associated with gordonia bacterium; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**gordonia bronchialis**

gordonia bronchialis identifies gordonia bronchialis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**gordonia rubripertincta**

gordonia rubripertincta identifies gordonia rubriper-

tincta, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**gordonia sputi**

gordonia sputi identifies gordonia sputi, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**gordonia terrae**

gordonia terrae identifies gordonia terrae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**goserelin**

goserelin refers to goserelin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gossypol**

gossypol refers to gossypol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gout suppressants**

gout suppressants refers to gout suppressants, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**government**

government refers to government, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**government funding**

government funding refers to government funding, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**g-quadruplexes**

g-quadruplexes refers to g-quadruplexes, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gracilibacillus**

gracilibacillus is a microorganism or microbial group associated with gracilibacillus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**graft versus host**

graft versus host refers to graft versus host, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gramicidin**

gramicidin refers to gramicidin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gram-positive rods**

gram-positive rods refers to gram-positive rods, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**grandchild**

grandchild refers to grandchild, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**grandparent**

grandparent refers to grandparent, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**granisetron**

granisetron concerns granisetron, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**granisetron hydrochloride**

granisetron hydrochloride refers to granisetron hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**granulation tissue**

granulation tissue refers to granulation tissue, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**granules**

granules refers to granules, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**granulicatella**

granulicatella identifies granulicatella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**granulicatella adiacens**

granulicatella adiacens identifies granulicatella adiacens, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

---

**Synonyms:**

**granulicatella elegans**

granulicatella elegans identifies granulicatella elegans, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**granulocyte count**

granulocyte count refers to granulocyte count, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**granulocytic sarcoma**

granulocytic sarcoma denotes a neoplastic condition involving granulocytic sarcoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**granulosa cell**

granulosa cell denotes granulosa cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**granzyme**

granzyme refers to granzyme, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gravity**

gravity refers to gravity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gravitropism**

gravitropism refers to gravitropism, a medical condition or clinical finding defined by its features, causes,

affected system, and patient context.

**Synonyms:**

**greater than**

greater than refers to greater than, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**grimontia hollisae**

grimontia hollisae identifies grimontia hollisae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**grip strength**

grip strength refers to grip strength, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**griseofulvin**

griseofulvin refers to griseofulvin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gross virus**

gross virus is a virus or viral group associated with gross virus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**ground substance**

ground substance refers to ground substance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**groundwater**

groundwater refers to groundwater, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**group therapy**

group therapy is used in relation to group therapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**growth**

growth refers to growth, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**growth cone**

growth cone refers to growth cone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**growth disorder**

growth disorder denotes a clinical condition or finding involving growth disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**growth inhibitor**

growth inhibitor refers to growth inhibitor, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**gtp binding**

gtp binding refers to gtp binding, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**guanazole**

guanazole concerns guanazole, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**guanfacine**

guanfacine refers to guanfacine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**guanine**

guanine refers to guanine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**guanosine**

guanosine refers to guanosine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**guanosine diphosphate**

guanosine diphosphate refers to guanosine diphosphate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**guanosine monophosphate**

guanosine monophosphate refers to guanosine monophosphate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**guanosine triphosphate**

guanosine triphosphate refers to guanosine triphosphate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**guanosinetriphosphatase**

guanosinetriphosphatase refers to guanosinetriphosphatase, a medical condition or clinical finding defined by its features, causes, affected system, and

---

patient context.

**Synonyms:**

### **guanylate cyclase**

guanylate cyclase refers to guanylate cyclase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **guide device**

guide device refers to guide device, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **guided imagery**

guided imagery refers to guided imagery, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **guilt**

guilt refers to guilt, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **gut epithelium**

gut epithelium refers to gut epithelium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **gynatresia**

gynatresia refers to gynatresia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **gynecological examination**

gynecological examination refers to gynecological examination, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **gynecologist**

gynecologist refers to gynecologist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **Green stool**

Stool with a green color that may result from diet, food coloring, rapid intestinal transit, medicines, or infection. **Synonyms:**

### **Groin pain (male)**

Pain in the groin or adjacent lower abdomen, hip, or testicle in a male; causes include muscle strain, hernia, infection, urinary stones, or referred pain.

**Synonyms:**

### **Viral gastroenteritis (stomach flu)**

An infection causing inflammation of the stomach and intestines, commonly resulting in vomiting, watery diarrhea, cramps, and fever. **Synonyms:**

### **Gastrointestinal stromal tumor (GIST)**

A tumor arising from specialized cells in the digestive tract, most often in the stomach or small intestine. **Synonyms:**

### **Germ cell tumors**

Tumors arising from cells that normally develop into eggs or sperm, occurring in the gonads or other parts of the body. **Synonyms:**

### **Giardia infection (giardiasis)**

An intestinal infection caused by Giardia parasites, commonly producing diarrhea, cramps, bloating, gas, and malabsorption. **Synonyms:**

### **Golfer's elbow (Medial epicondylitis)**

Overuse injury involving tendons on the inside of the elbow, causing pain and tenderness with gripping or wrist movement. **Synonyms:**

---

### Group B strep disease

Illness caused by group B *Streptococcus* bacteria, which can cause serious infections in newborns and infections in pregnant people or adults with medical risks. **Synonyms:**

### Galactocerebrosidase Deficiency

An inherited deficiency of the lysosomal enzyme galactocerebrosidase, associated with Krabbe disease and impaired myelin formation. See *Krabbe Disease*. **Synonyms:** Galactocerebrosidase deficiency; galactosylceramidase deficiency.

### GAD

Alternate index label; see *Generalized Anxiety Disorder*. **Synonyms:**

### Gallbladder inflammation

Alternate index label; see *Cholecystitis*. **Synonyms:**

### Gambling, compulsive

Alternate index label; see *Compulsive gambling*. **Synonyms:**

### Gastric emptying, delayed

Alternate index label; see *Gastroparesis*. **Synonyms:**

### Gastric emptying, rapid

Alternate index label; see *Dumping Syndrome*. **Synonyms:**

### Gastroenteritis, viral

Alternate index label; see *Viral gastroenteritis (stomach flu)*. **Synonyms:**

### GBM

Alternate index label; see *Glioblastoma*. **Synonyms:**

### Gender identity disorder

Alternate index label; see *Gender Dysphoria*. **Synonyms:**

### German measles

Alternate index label; see *Rubella*. **Synonyms:**

### Giant lymph node hyperplasia

Alternate index label; see *Castleman Disease*. **Synonyms:**

### Glossodynia

Alternate index label; see *Burning Mouth Syndrome*. **Synonyms:**

### Glucocerebrosidase deficiency

Alternate index label; see *Gaucher Disease*. **Synonyms:**

### Gluten-sensitive enteropathy

Alternate index label; see *Celiac Disease*. **Synonyms:**

### Grade IV astrocytoma

Alternate index label; see *Glioblastoma*. **Synonyms:**

### Gross hematuria

Alternate index label; see *Blood in urine (hematuria)*. **Synonyms:**

### Gum disease, gingivitis

Alternate index label; see *Gingivitis*. **Synonyms:**

### Gum disease, periodontitis

Alternate index label; see *Periodontitis*. **Synonyms:**

### Galactose-1-phosphate uridylyltransferase blood test

Galactose-1-phosphate uridylyltransferase blood test examines galactose-1-phosphate uridylyltransferase blood test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

---

### **Gallbladder radionuclide scan**

Gallbladder radionuclide scan examines gallbladder radionuclide scan; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Gallbladder removal - laparoscopic - discharge**

Gallbladder removal - laparoscopic - discharge is a treatment or care intervention for gallbladder removal - laparoscopic - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Gallbladder removal - open - discharge**

Gallbladder removal - open - discharge is a treatment or care intervention for gallbladder removal - open - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Gallstones - discharge**

Gallstones - discharge is a treatment or care intervention for gallstones - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Gamma-glutamyl transferase (GGT) blood test**

Gamma-glutamyl transferase (GGT) blood test examines gamma-glutamyl transferase (ggt) blood test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Gas – flatulence**

Gas – flatulence concerns gas – flatulence; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Gasoline poisoning**

Gasoline poisoning involves toxic or environmental exposure to gasoline poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Gastric bypass surgery**

Gastric bypass surgery is a treatment or care intervention for gastric bypass surgery; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Gastric bypass surgery - discharge**

Gastric bypass surgery - discharge is a treatment or care intervention for gastric bypass surgery - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Gastric culture**

Gastric culture examines gastric culture; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Gastric suction**

Gastric suction concerns gastric suction; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Gastric tissue biopsy and culture**

Gastric tissue biopsy and culture examines gastric tissue biopsy and culture; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Gastrin blood test**

Gastrin blood test examines gastrin blood test; inter-

---

pretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Gastroesophageal reflux - discharge**

Gastroesophageal reflux - discharge is a treatment or care intervention for gastroesophageal reflux - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Gastroesophageal reflux disease - children**

Gastroesophageal reflux disease - children is a medical condition involving gastroesophageal reflux disease - children; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Gastroesophageal reflux in infants**

Gastroesophageal reflux in infants concerns gastroesophageal reflux in infants, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Gastrointestinal diseases - resources**

Gastrointestinal diseases - resources examines gastrointestinal diseases - resources; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Gastrointestinal fistula**

Gastrointestinal fistula examines gastrointestinal fistula; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Gastroschisis repair**

Gastroschisis repair is a treatment or care intervention for gastroschisis repair; indication, preparation, risks, technical details, and recovery depend on the

patient and goal.

**Synonyms:**

### **Gastrostomy feeding tube - bolus**

Gastrostomy feeding tube - bolus is a treatment or care intervention for gastrostomy feeding tube - bolus; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Gastrostomy feeding tube - pump - child**

Gastrostomy feeding tube - pump - child is a treatment or care intervention for gastrostomy feeding tube - pump - child; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **General paresis**

General paresis is a medical condition involving general paresis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Generalized anxiety disorder - self-care**

Generalized anxiety disorder - self-care is a treatment or care intervention for generalized anxiety disorder - self-care; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Generalized anxiety disorder in children**

Generalized anxiety disorder in children is a medical condition involving generalized anxiety disorder in children; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Genes**

Genes concerns genes, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

---

**Synonyms:**

### **Genetic testing and your cancer risk**

Genetic testing and your cancer risk involves toxic or environmental exposure to genetic testing and your cancer risk; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Genetically modified organisms - GMOs**

Genetically modified organisms - GMOs concerns genetically modified organisms - gmos, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Genital herpes - self-care**

Genital herpes - self-care is a treatment or care intervention for genital herpes - self-care; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Genital sores - female**

Genital sores - female is a medical condition involving genital sores - female; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Genital sores - male**

Genital sores - male is a medical condition involving genital sores - male; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Gestational diabetes - self-care**

Gestational diabetes - self-care is a treatment or care intervention for gestational diabetes - self-care; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Gestational diabetes diet**

Gestational diabetes diet addresses care related to gestational diabetes diet, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Getting a prescription filled**

Getting a prescription filled addresses care related to getting a prescription filled, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Getting out of bed after surgery**

Getting out of bed after surgery is a treatment or care intervention for getting out of bed after surgery; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Getting support when your child has cancer**

Getting support when your child has cancer addresses care related to getting support when your child has cancer, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Getting your home ready - after the hospital**

Getting your home ready - after the hospital addresses care related to getting your home ready - after the hospital, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Getting your home ready - knee or hip surgery**

Getting your home ready - knee or hip surgery is a treatment or care intervention for getting your home ready - knee or hip surgery; indication, preparation, risks, technical details, and recovery depend on the

---

patient and goal.

**Synonyms:**

### **Getting yourself healthy before surgery**

Getting yourself healthy before surgery is a treatment or care intervention for getting yourself healthy before surgery; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Gianotti-Crosti syndrome**

Gianotti-Crosti syndrome is a medical condition involving gianotti-crosti syndrome; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Giant congenital nevus**

Giant congenital nevus concerns giant congenital nevus; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Give your heart a workout**

Give your heart a workout concerns give your heart a workout, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Giving an IM (intramuscular) injection**

Giving an IM (intramuscular) injection is a treatment or care intervention for giving an im (intramuscular) injection; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Giving an insulin injection**

Giving an insulin injection is a treatment or care intervention for giving an insulin injection; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Glaze poisoning**

Glaze poisoning involves toxic or environmental exposure to glaze poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Gleason grading system**

Gleason grading system examines gleason grading system; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Glomus jugulare tumor**

Glomus jugulare tumor is a medical condition involving glomus jugulare tumor; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Glomus tympanicum tumor**

Glomus tympanicum tumor is a medical condition involving glomus tympanicum tumor; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **GLP-1 agonists**

GLP-1 agonists concerns glp-1 agonists; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Glucagon blood test**

Glucagon blood test examines glucagon blood test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Glucose screening tests during pregnancy**

Glucose screening tests during pregnancy examines

---

glucose screening tests during pregnancy; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Glucose tolerance test - non-pregnant**

Glucose tolerance test - non-pregnant examines glucose tolerance test - non-pregnant; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Glucose urine test**

Glucose urine test examines glucose urine test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Glucose-6-phosphate dehydrogenase test**

Glucose-6-phosphate dehydrogenase test examines glucose-6-phosphate dehydrogenase test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Glucuronyl transferase**

Glucuronyl transferase concerns glucuronyl transferase; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Glycemic index and diabetes**

Glycemic index and diabetes concerns glycemic index and diabetes; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Going home after a C-section**

Going home after a C-section addresses care related to going home after a c-section, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Gram stain of skin lesion**

Gram stain of skin lesion examines gram stain of skin lesion; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Gram stain of tissue biopsy**

Gram stain of tissue biopsy examines gram stain of tissue biopsy; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Gram stain of urethral discharge**

Gram stain of urethral discharge examines gram stain of urethral discharge; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Grass allergy**

Grass allergy concerns grass allergy; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Grass and weed killer poisoning**

Grass and weed killer poisoning involves toxic or environmental exposure to grass and weed killer poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Greater trochanteric pain syndrome**

Greater trochanteric pain syndrome is a medical condition involving greater trochanteric pain syndrome; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Groin lump**

Groin lump is a medical condition involving groin lump; causes, affected organs, severity, complications, and treatment are determined by clinical as-

---

assessment.

**Synonyms:**

### **Groin pain**

Groin pain is a medical condition involving groin pain; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Gross motor control**

Gross motor control concerns gross motor control; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Group B streptococcal septicemia of the newborn**

Group B streptococcal septicemia of the newborn is a medical condition involving group b streptococcal septicemia of the newborn; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Group B streptococcus - pregnancy**

Group B streptococcus - pregnancy concerns group b streptococcus - pregnancy; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Growth hormone deficiency - children**

Growth hormone deficiency - children is a medical condition involving growth hormone deficiency - children; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Growth hormone stimulation test**

Growth hormone stimulation test examines growth hormone stimulation test; interpretation depends on the specimen or body region, test method, reference

range, and clinical question.

**Synonyms:**

### **Growth hormone suppression test**

Growth hormone suppression test examines growth hormone suppression test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Growth hormone test**

Growth hormone test examines growth hormone test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Gum biopsy**

Gum biopsy examines gum biopsy; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Gumma**

Gumma concerns gumma; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Gums - swollen**

Gums - swollen is a medical condition involving gums - swollen; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Gunshot wounds - aftercare**

Gunshot wounds - aftercare is a treatment or care intervention for gunshot wounds - aftercare; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

## H

### 21-Hydroxylase deficiency

An inherited defect in CYP21A2 that reduces cortisol and aldosterone synthesis, increases 17-hydroxyprogesterone, and causes congenital adrenal hyperplasia with androgen excess.

**Synonyms:**

### Hair Bulb

The enlarged base of a hair follicle where the hair shaft is produced.

**Synonyms:**

### Hair Shaft

The portion of a hair that projects above the skin surface.

**Synonyms:**

### Hammertoe

A deformity in which a toe bends downward at a middle joint.

**Synonyms:** Hammer toe

### Happiness

A subjective sense of well-being, contentment, or pleasure.

**Synonyms:**

### Happiness Set-Point

An individual's usual baseline level of happiness around which mood tends to fluctuate.

**Synonyms:**

### Harm Reduction Therapy

Treatment that aims to reduce health and social harms from addictive behavior, even when absti-

nence is not immediate.

**Synonyms:** Harm reduction

### Hay Fever

Seasonal or persistent allergic rhinitis caused by inhaled allergens.

**Synonyms:** Allergic rhinitis

### HbA1c

Hemoglobin with glucose attached; its measurement estimates average blood glucose over the previous two to three months.

**Synonyms:** Glycosylated hemoglobin; hemoglobin A1c

### Heberden Nodes

Bony enlargements at the end joints of fingers, commonly associated with osteoarthritis.

**Synonyms:** Heberden's nodes

### Hedonic

Relating to pleasure or the pursuit of pleasure.

**Synonyms:**

### Hedonic Treadmill

The tendency to adapt to life changes so that their emotional effects diminish over time.

**Synonyms:** Hedonic adaptation

### Helper T Cells

CD4-positive immune cells that coordinate responses by activating other immune cells.

**Synonyms:** CD4 T cells

---

### **HEPA Filter**

A high-efficiency particulate air filter that removes a large proportion of airborne particles.

**Synonyms:** High-efficiency particulate air filter

### **Heparin**

An anticoagulant that reduces formation and extension of blood clots.

**Synonyms:**

### **High Blood Pressure**

Persistently elevated pressure of blood against artery walls.

**Synonyms:** Hypertension

### **HLA**

Human leukocyte antigen, a cell-surface protein system involved in immune recognition and tissue compatibility.

**Synonyms:** Human leukocyte antigen

### **Hormones**

Chemical messengers released by glands or tissues that regulate processes throughout the body.

**Synonyms:**

### **Hot Flash**

A sudden episode of heat, flushing, sweating, and sometimes palpitations, commonly occurring during menopause.

**Synonyms:** Hot flush

### **HPA**

The hypothalamic-pituitary-adrenal axis, a hormone system central to the stress response.

**Synonyms:** Hypothalamic-pituitary-adrenal axis

### **Human Leukocyte Antigen**

A protein on cell surfaces that helps the immune system distinguish self from foreign material.

**Synonyms:** HLA

### **Humectant**

A substance that attracts and retains water, com-

monly used to hydrate skin.

**Synonyms:**

### **Hyaluronic Acid**

A naturally occurring carbohydrate polymer that binds water in connective tissue, skin, joints, and the eye.

**Synonyms:** Hyaluronan

### **Hydrogenation**

A chemical process that adds hydrogen to a compound; in foods it can convert liquid oils into more solid fats.

**Synonyms:**

### **Hydroxyapatite**

A calcium-phosphate mineral forming much of the hardness of bones and teeth.

**Synonyms:**

### **Hygiene Hypothesis**

The theory that limited early-life microbial exposure may increase susceptibility to allergies and immune disorders.

**Synonyms:**

### **Hyperalgesia**

An abnormally increased response to a painful stimulus.

**Synonyms:**

### **Hyperinsulinemia**

An abnormally high concentration of insulin in the blood.

**Synonyms:**

### **Hyperplastic Polyp**

A usually benign overgrowth of mucosal cells, often found in the colon or rectum.

**Synonyms:**

### **Hypertensive Cerebellar Hemorrhage**

Bleeding into the cerebellum caused by rupture of a vessel damaged by high blood pressure.

---

**Synonyms:**

### **Hypertensive Intracerebral Hemorrhage**

Bleeding into brain tissue caused by rupture of a blood vessel associated with hypertension.

**Synonyms:**

### **Hypnagogic Hallucinations**

Vivid sensory experiences occurring while a person is falling asleep.

**Synonyms:**

### **Hypnogram**

A chart showing the timing and stages of sleep during a recording.

**Synonyms:** Sleep-stage diagram

### **Hypothalamic-Pituitary-Adrenal Axis**

A network linking the hypothalamus, pituitary gland, and adrenal glands to regulate stress hormones and other functions.

**Synonyms:** HPA axis

### **H Influenzae Meningitis**

Bacterial meningitis caused by *Haemophilus influenzae*, especially type b in unvaccinated children. It may cause fever, headache, neck stiffness, altered consciousness, seizures, and serious neurologic complications.

**Synonyms:**

### **H1N1 Influenza**

Influenza A infection caused by an H1N1 virus strain. It usually produces fever, cough, sore throat, myalgia, and fatigue but can cause viral pneumonia and severe respiratory failure in high-risk patients.

**Synonyms:**

### **Histamine-2 Receptor Antagonist**

A drug that blocks histamine H2 receptors on gastric parietal cells, reducing gastric acid secretion. Agents: cimetidine, ranitidine, famotidine, nizatidine. Used for GERD, peptic ulcer disease, and dyspepsia—less potent than PPIs. Adverse effects: headache, diarrhea, confusion (elderly, cimetidine),

and rare thrombocytopenia.

**Synonyms:**

### **Habenula**

A paired epithalamic structure forming part of the dorsal diencephalon. It integrates limbic and basal-forebrain signals with midbrain monoaminergic systems and contributes to reward, aversion, stress, and motivational behavior.

**Synonyms:**

### **Haem- / Haema- / Haemato- / Haemo- (Prefixes relating to blood)**

Prefixes derived from the Greek word *haima* (blood), used in medical terminology to denote blood-related conditions and procedures.

**Synonyms:** Prefixes relating to blood

### **Haemangioma**

A benign vascular tumor composed of proliferating endothelial cells, the most common soft tissue tumor of infancy.

**Synonyms:**

### **Haemarthrosis**

Bleeding into a joint cavity. Causes: trauma (most common), hemophilia (spontaneous haemarthrosis is characteristic, especially in severe deficiency of factor VIII or IX, common in knees, elbows, ankles), anticoagulant therapy, pigmented villonodular synovitis (PVNS, recurrent haemarthrosis), joint surgery, and vascular malformations.

**Synonyms:**

### **Haematocrit**

The proportion of blood volume occupied by red blood cells, expressed as a percentage or decimal fraction. The reference range varies with age, sex, altitude, pregnancy, and laboratory method.

**Synonyms:**

### **Haematologist**

A medical doctor who specializes in the diagnosis, treatment, and prevention of diseases of the blood and blood-forming organs.

---

**Synonyms:**

### **Haematoma**

A localised collection of blood outside blood vessels, usually clotted, within an organ or tissue. Haematomas form when trauma or disease causes a blood vessel to rupture.

**Synonyms:**

### **Haematuria**

The presence of blood in the urine. Classification: gross (visible to the naked eye, indicates bleeding beyond the nephron) vs microscopic (detected only on urinalysis or microscopy, >3 RBCs per high-power field).

**Synonyms:**

### **Haemodialysis**

A medical procedure that filters waste products, toxins, and excess fluid from the blood when the kidneys are unable to do so (end-stage renal disease, ESRD). Mechanism: blood is pumped through an extracorporeal circuit and passes through a dialyser (artificial kidney) containing thousands of hollow fibers with a semipermeable membrane.

**Synonyms:**

### **Haemolytic Disease of the Newborn**

Destruction of a newborn's red blood cells by maternal antibodies that crossed the placenta, causing anemia and jaundice.

**Synonyms:**

### **Haemophilia**

An X-linked recessive bleeding disorder caused by deficiency of coagulation factor VIII (hemophilia A, 80-85%) or factor IX (hemophilia B, Christmas disease, 15-20%). Incidence: 1 in 5,000 male births (hemophilia A), 1 in 30,000 (hemophilia B).

**Synonyms:**

### **Haemophilus influenzae**

A gram-negative coccobacillus that causes meningitis, epiglottitis, pneumonia, and other infections. The encapsulated type b (Hib) strain was the most

virulent, causing invasive disease in children. The Hib conjugate vaccine has dramatically reduced the incidence of invasive Hib disease.

**Synonyms:**

### **Haemoptysis**

Coughing up blood or blood-stained sputum from the lower respiratory tract.

**Synonyms:**

### **Haemorrhoids**

Enlarged symptomatic vascular cushions of the anal canal that may cause painless bright-red rectal bleeding, prolapse, itching, or discomfort.

**Synonyms:**

### **Hair Cells**

The sensory receptor cells of the inner ear that convert mechanical sound vibrations into electrical neural signals, and they are named for the bundle of stereocilia projecting from their apical surface.

**Synonyms:**

### **Hair Follicle**

Complex dermal/hypodermal mini-organ producing hair. Has infundibulum (surface opening), isthmus (from sebaceous duct to arrector pili insertion), and lower segment (bulb with matrix and dermal papilla). Hair cycle: anagen (active growth, 2-7 years), catagen (regression, 2-3 weeks), telogen (resting, 2-3 months).

**Synonyms:**

### **Hair Loss**

Alopecia: reduction of scalp or body hair. Types: nonscarring (androgenetic—pattern hair loss, telogen effluvium—stress/illness/drugs, anagen effluvium—chemotherapy, alopecia areata—autoimmune patches, tinea capitis, trichotillomania) and scarring (lupus, lichen planopilaris, folliculitis decalvans). Female pattern hair loss is common.

**Synonyms:**

---

## Hair Loss (Alopecia)

The partial or complete loss of hair from areas where it normally grows, most commonly the scalp. Causes include genetic predisposition (androgenetic alopecia), autoimmune conditions (alopecia areata), hormonal changes, medications, stress, and nutritional deficiencies.

**Synonyms:** Alopecia

## Hair Loss Classification

Hair loss (alopecia) is classified as scarring (cicatricial) or non-scarring. Non-scarring alopecias are potentially reversible: androgenetic alopecia (male and female pattern), alopecia areata, telogen effluvium, anagen effluvium, and tinea capitis.

**Synonyms:**

## Hairy Cell Leukemia

A rare, indolent B-cell chronic lymphoproliferative disorder characterized by the accumulation of mature B lymphocytes with characteristic cytoplasmic projections ("hairy cells") in the bone marrow, peripheral blood, and spleen.

**Synonyms:**

## Hairy Tongue

A usually harmless overgrowth and discoloration of the tongue's papillae, often appearing black, brown, or white. It may be associated with smoking, poor oral hygiene, dry mouth, or antibiotics; gentle tongue cleaning and removal of contributing factors usually help.

**Synonyms:**

## Haldane Effect

The decrease in hemoglobin's CO<sub>2</sub> carrying capacity when oxygen binds to it, facilitating CO<sub>2</sub> release at the lungs. Deoxygenated hemoglobin (deoxyhemoglobin) is a better buffer for H<sup>+</sup> ions and forms more carbaminohemoglobin than oxyhemoglobin.

**Synonyms:**

## Half-Life

Elimination half-life is the time required for the plasma concentration of a drug to decrease by 50

percent after reaching equilibrium. It is calculated from the elimination rate constant using the equation  $t_{1/2}$  equals 0.693 divided by the elimination rate constant.

**Synonyms:**

## Half-life (Physical)

Time for radioactive isotope to decay to half its original activity. F-18: 110 min; Tc-99m: 6 hours; I-131: 8 days; Ga-68: 68 min. Affects imaging timing, radiation dose.

**Synonyms:** Physical

## Half-Life ( $t_{1/2}$ )

The time required for plasma drug concentration to decrease by 50%. It determines dosing frequency and time to steady state (4-5 half-lives). Drugs with long half-lives (e.g., amiodarone: 40-55 days, warfarin: 40 hours) can be given once daily but take longer to reach steady state and to be eliminated.

**Synonyms:**  $t_{1/2}$

## Halitosis

An unpleasant odour of the breath that may be socially distressing. The most common cause (85-90%) is poor oral hygiene—accumulation of bacteria on the tongue, dental plaque, periodontitis, and gingivitis.

**Synonyms:**

## Hallucination

A perception in the absence of an external stimulus, experienced as real and occurring in objective space.

**Synonyms:**

## Hallux Valgus

Lateral deviation of the great toe (hallux) with medial prominence of the first metatarsal head (bunion). More common in women, associated with narrow-toed shoes, high heels, and genetic predisposition. Presents with pain over the medial eminence, difficulty with shoe wear, and progressive deformity.

**Synonyms:**

---

### Hallux Valgus (Bunion)

A progressive deformity of the first metatarsophalangeal (MTP) joint, characterized by lateral deviation of the great toe (hallux valgus) and medial deviation of the first metatarsal head (metatarsus primus varus), resulting in a bony prominence on the medial side of the forefoot (the bunion).

**Synonyms:** Bunion

### Halo nevus

A benign melanocytic nevus surrounded by a rim of depigmentation (Sutton nevus), caused by an immune-mediated T-cell response directed against melanocytes in the nevus. It is most common on the trunk of children and young adults and typically resolves by central depigmentation, leaving a white macule.

**Synonyms:**

### Hamartoma

A benign growth composed of a disorganized mixture of tissue elements normally present at that site, e.g., pulmonary hamartoma, Peutz-Jeghers polyps, and PTEN-related (Cowden) lesions.

**Synonyms:**

### Hamate

Wedge-shaped distal row carpal bone on the ulnar side with the hook of the hamate. The hook forms Guyon's canal medial border and serves as flexor retinaculum attachment. Articulates with 4th/5th metacarpals. Hook fractures associated with racquet sports and ulnar nerve compression.

**Synonyms:**

### Hamman's Sign

A crunching or crackling sound heard on auscultation synchronized with the heartbeat, caused by air in the mediastinum (pneumomediastinum). It is a rare but specific finding. It is also described as a mediastinal crunch heard in spontaneous pneumomediastinum.

**Synonyms:**

### Hammer

The common name for the malleus, one of the three small bones of the middle ear.

**Synonyms:**

### Hammer Toe

A deformity of the second, third, or fourth toe characterized by flexion at the PIP joint and extension at the MTP and DIP joints. Caused by muscle imbalance (intrinsic foot muscle weakness) and narrow-toed shoes. Presents with pain over the dorsal PIP joint (corn/callus) and the tip of the toe. Flexible hammer toe: correctable passively.

**Synonyms:**

### Hampton Hump

Wedge-shaped opacification with its base abutting the pleura on chest radiography, representing pulmonary infarction secondary to Pulmonary Embolism. See Pulmonary Embolism (PE).

**Synonyms:**

### Hampton's Hump

Wedge-shaped, pleural-based opacity on CXR representing pulmonary infarction distal to PE.

**Synonyms:**

### Hamstring

One of three muscles forming the posterior compartment of the thigh: semitendinosus, semimembranosus, and biceps femoris (long and short heads). Common origin: ischial tuberosity (except short head of biceps femoris which originates from the linea aspera of the femur).

**Synonyms:**

### Hamstring Muscles

Three posterior thigh muscles: biceps femoris (long/short heads), semitendinosus, semimembranosus, mostly from the ischial tuberosity (short head of biceps from linea aspera). Long head/semimembranosus/semitendinosus innervated by tibial sciatic nerve; short head by common peroneal division. Flex knee, extend hip.

**Synonyms:**

---

## Hand Foot and Mouth Disease

A common viral illness (mostly children <10 years) caused by coxsackievirus A16 (and enterovirus 71), transmitted by fecal-oral/respiratory.

**Synonyms:**

## Hand hygiene

The most effective measure for preventing healthcare-associated infections. Hand hygiene includes handwashing with soap and water and hand rubbing with alcohol-based rubs. Alcohol-based rubs are preferred for routine hand hygiene as they are faster and more effective than soap and water.

**Synonyms:**

## Hand Prolapse

Prolapse of a fetal hand or arm alongside or below the presenting part. May occur spontaneously or after manual rotation. The prolapsed arm may be mistaken for a cord or foot. Management: if the hand is above the presenting part (compound presentation), it may be gently pushed back during contractions.

**Synonyms:**

## Hand, Foot, and Mouth Disease

A contagious viral illness, usually in children, causing fever and vesicles or ulcers on the hands, feet, and mouth. Enteroviruses are common causes.

**Synonyms:**

## Hand-Foot-and-Mouth Syndrome

A usually mild, contagious viral illness, commonly caused by enteroviruses, producing fever, mouth sores, and small spots or blisters on the hands and feet. It mainly affects young children but can occur in adults. Hydration, pain relief, and hygiene are important; severe dehydration, neurologic symptoms, or persistent fever requires care.

**Synonyms:**

## Hand-Foot-Mouth Disease

A common enteroviral infection, usually in young children, causing fever, painful oral ulcers, and a vesicular rash on the hands, feet, and sometimes

buttocks. It is highly contagious and usually self-limited.

**Synonyms:**

## Hanging (Complete vs Incomplete)

Form of violent asphyxial death produced by suspension of the body by a ligature around the neck. Complete Hanging: feet off ground, total body weight exerts pressure. Incomplete Hanging: part of body touches ground. Asphyxia results from occlusion of jugular veins (2 kg force) or carotid arteries (5 kg force).

**Synonyms:** Complete vs Incomplete

## Hanging and Strangulation Signs

Medico-legal findings resulting from mechanical constriction of the neck structures. Hanging: neck constriction by a ligature tightened by the weight of the victim's body. Ligature mark: pale, hard, parchment-like groove running obliquely upward toward the knot, usually situated above the thyroid cartilage.

**Synonyms:**

## Hansen's Disease (Leprosy)

A chronic infection caused mainly by *Mycobacterium leprae* that primarily affects the skin and peripheral nerves. It can cause numb skin patches, nerve thickening, weakness, and eye problems. Transmission usually requires prolonged close contact, and multidrug therapy can cure the infection.

**Synonyms:** Leprosy

## Hantavirus

Hantavirus infection is acquired from exposure to infected rodent excreta and can cause hemorrhagic fever with renal syndrome or severe cardiopulmonary syndrome. to humans primarily through inhalation of aerosolized rodent excreta (urine, feces, saliva).

**Synonyms:**

## Hantavirus Pulmonary Syndrome

A severe respiratory illness caused by hantaviruses, usually acquired by inhaling aerosolized particles

---

from infected rodent urine, droppings, or nesting material. Fever, muscle aches, headache, and gastrointestinal symptoms may rapidly progress to cough, pulmonary edema, and respiratory failure. Immediate hospital care is essential.

**Synonyms:**

### Haplotype

Set of alleles inherited together on same chromosome. Used in linkage analysis, population genetics, disease association studies.

**Synonyms:**

### Haptoglobin

An alpha-2 globulin that binds free hemoglobin, preventing oxidative damage and renal excretion. Low/undetectable: acute hemolysis (intravascular and extravascular), liver disease (decreased production), and hereditary deficiency. Elevated: acute phase reaction (inflammation, infection, malignancy).

**Synonyms:**

### Harlequin color change

A transient, benign skin color change in newborns where one half of the body becomes flushed while the other half remains pale, due to asymmetric vasomotor tone. It occurs in up to 10 percent of healthy neonates, typically when the infant is placed on their side.

**Synonyms:**

### Harm Reduction

Evidence-based strategies that decrease health, social, and legal harms associated with substance use without requiring immediate abstinence. Examples include naloxone access, sterile injecting equipment, drug-checking where available, safer-use education, and linkage to treatment.

**Synonyms:**

### Hartmann Procedure

Surgical resection of the rectosigmoid colon with creation of an end colostomy and rectal stump. Used for emergency resection of complicated diverticulitis

with peritonitis and colorectal cancer with obstruction or perforation. The procedure avoids primary anastomosis in a contaminated field.

**Synonyms:**

### Hartnup Disease

An autosomal-recessive disorder of neutral-amino-acid transport, especially in the intestine and renal tubules. Defective tryptophan handling can cause pellagra-like photosensitive dermatitis, cerebellar ataxia, and neuropsychiatric symptoms, often intermittently.

**Synonyms:**

### Hashimoto Thyroiditis

An autoimmune disorder in which immune-mediated inflammation gradually damages the thyroid gland and may cause hypothyroidism. The gland may be enlarged or atrophic, and thyroid autoantibodies are often present.

**Synonyms:**

### Hay Fever (Allergic Rhinitis)

Inflammation of the nasal lining caused by an allergic response to airborne substances, including pollens, dust mites, animal dander, or mold. It causes sneezing, congestion, nasal itching, and watery discharge.

**Synonyms:** Allergic Rhinitis

### HbA1c (Glycated Hemoglobin)

Hemoglobin containing glucose-derived adducts formed by nonenzymatic glycation. It reflects average glycemic exposure over approximately two to three months, with interpretation affected by altered red-cell survival and some hemoglobin variants.

**Synonyms:** Glycated Hemoglobin

### hCG (Human Chorionic Gonadotropin)

A hormone produced mainly by placental tissue and measured in urine or blood to help detect and monitor pregnancy. Concentrations normally rise early in pregnancy, but the rate and interpretation vary; results must be considered with timing and clinical findings.

---

**Synonyms:** Human Chorionic Gonadotropin

### **HDL**

High-density lipoprotein, a class of particles that transports cholesterol and other lipids in the blood. HDL concentration is one component of cardiovascular risk assessment; it should not be interpreted as a protective or harmful measure by itself.

**Synonyms:**

### **Head and Neck Cancer**

Cancers arising in the oral cavity, pharynx, larynx, sinonasal tract, and salivary glands, most commonly squamous cell carcinoma. Risk factors include tobacco, alcohol, and HPV (oropharyngeal). Treatment involves surgery, radiation, and chemotherapy, often combined to preserve function.

**Synonyms:**

### **Head Circumference**

Measured at the largest circumference above the ears and eyebrows, reflecting brain growth. Plotted on growth charts to detect microcephaly (below 3rd percentile) or macrocephaly (above 98th percentile). Rapid increase may indicate hydrocephalus or intracranial hemorrhage; failure to grow may indicate microcephaly or brain atrophy.

**Synonyms:**

### **Head Injury**

Trauma to scalp, skull, or brain. Scalp lacerations: bleed profusely, require suturing. Skull fracture: basilar (Battle sign, raccoon eyes) or depressed (surgical emergency). Concussion: transient neurological dysfunction, manage with rest, gradual return to activity.

**Synonyms:**

### **Head lice**

Head lice concerns head lice, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context. capitis, a wingless, blood-sucking insect that feeds on human blood, most common in children aged 3-12. It is extremely common, especially in school-aged

children aged 3-11 years, with an estimated 6-12 million infestations annually in the United States.

**Synonyms:**

### **Headache**

Headache is pain in the head or upper neck; onset, pattern, associated neurologic findings, fever, trauma, and systemic symptoms distinguish primary from secondary causes. tension-type, cluster, and trigeminal autonomic cephalalgias) or secondary (attributed to an underlying structural, infectious, vascular, or metabolic cause).

**Synonyms:**

### **Headache and Migraine**

Headaches are pain in the head or upper neck region, classified as primary (tension-type, migraine, cluster) or secondary to underlying conditions. Migraines are a neurological disorder characterized by recurrent episodes of moderate to severe throbbing pain, often accompanied by nausea, photophobia, and aura.

**Synonyms:**

### **Health Behavior**

An action or pattern of action that affects health, such as eating, physical activity, tobacco use, alcohol use, sexual practices, or taking medicines.

**Synonyms:**

### **Health Behavior Change**

Modification of behaviors that affect health, such as tobacco use, diet, physical activity, and adherence to treatment.

**Synonyms:**

### **Health Behavior Motivation**

Factors that influence initiation and maintenance of health-related behaviors, including adherence, physical activity, and smoking cessation.

**Synonyms:**

### **Health Disparities**

Differences in health outcomes or access to care among groups, often associated with social, eco-

---

conomic, environmental, geographic, or structural factors.

**Synonyms:**

### **Health Disparity**

Difference in health outcomes between populations. Examples: racial disparities, socioeconomic disparities, geographic disparities.

**Synonyms:**

### **Health Equity**

The fair opportunity for all people to attain their highest possible level of health, without avoidable differences caused by social or economic disadvantage.

**Synonyms:**

### **Health Inequity**

A systematic, avoidable, and unjust difference in health or access to health resources between social groups. It differs from health variation that is not preventable or not linked to unfair social conditions.

**Synonyms:**

### **Health Information Technology**

Use of technology for health information. Examples: electronic health records, telemedicine, mobile health, decision support.

**Synonyms:**

### **Health Literacy**

Ability to obtain, process, understand health information. Examples: reading labels, following instructions, communicating with providers.

**Synonyms:**

### **Health Promotion**

Activities maintaining/improving health in elderly. Components: vaccination, screening, exercise, nutrition, cognitive stimulation, social engagement, fall prevention. Tailored to individual capacity and preferences.

**Synonyms:**

### **Health Surveillance**

The ongoing collection and analysis of health data to identify patterns, monitor disease, and guide public-health action.

**Synonyms:**

### **Health-Related QoL**

A person's perceived physical, psychological, and social well-being as affected by health and illness.

**Synonyms:**

### **Healthcare Associated Infection**

An infection developing as a consequence of health-care delivery, typically beyond 48 hours after admission or within 30 days of a procedure.

**Synonyms:**

### **Healthcare Provider**

A healthcare professional or organization that provides medical care, such as a physician, nurse, therapist, or clinic.

**Synonyms:**

### **Healthcare Proxy**

A person designated to make healthcare decisions for someone who cannot make or communicate those decisions. The appointment may be recorded in an advance directive or other legal document.

**Synonyms:**

### **Healthcare-Associated Pneumonia**

HCAP concept retired (2016 IDSA/ATS); risk factors for MDR now assessed individually. Risk factors for MDR pathogens (prior antibiotics, structural lung disease, frequent hospitalization) should be assessed individually rather than using the HCAP category.

**Synonyms:**

### **Healthy Aging**

The process of developing and maintaining the functional ability that supports well-being in older age.

**Synonyms:**

---

## Healthy Eating for Diabetes

A dietary approach designed to maintain stable blood glucose levels in individuals with diabetes mellitus. It emphasizes carbohydrate consistency, high fiber intake, lean proteins, and healthy fats while minimizing refined sugars and simple carbohydrates.

**Synonyms:**

## Healthy Years

Years of life lived in good health, without substantial disease, disability, or loss of function.

**Synonyms:**

## Healthy Years Lost

Years of life lost due to premature death or disability. DALYs combine YLL and YLD.

**Synonyms:**

## Hearing Aid

Amplification device for hearing loss. Types: behind-the-ear (BTE), in-the-ear (ITE), receiver-in-canal (RIC). Components: microphone, amplifier, speaker, battery. Fitting: audiogram-based. Adjustments: volume, programs.

**Synonyms:**

## Hearing Aids and Devices

Electronic devices worn in or behind the ear that amplify sound for individuals with hearing loss. Modern hearing aids include digital signal processing, directional microphones, and connectivity to smartphones and other audio sources.

**Synonyms:**

## Hearing Impairment

Partial or complete reduction in the ability to detect or understand sound. It may be conductive, sensorineural, or mixed and can result from congenital disorders, infection, noise, ototoxic injury, trauma, ageing, or disease of the ear or auditory pathways.

**Synonyms:**

## Hearing Loss

Reduced ability to hear, classified as conductive

(outer/middle ear pathology: cerumen impaction, otitis media, otosclerosis, tympanic membrane perforation), sensorineural (inner ear or auditory nerve: presbycusis, noise exposure, ototoxic drugs, Meniere disease, acoustic neuroma), or mixed.

**Synonyms:**

## Hearing Screening

Newborn hearing screening (universal): otoacoustic emissions (OAE) and/or automated auditory brainstem response (AABR) before discharge; referral for comprehensive audiology if failed.

**Synonyms:**

## Heart

A four-chambered muscular pump (two atria, two ventricles) located in the mediastinum, responsible for circulating blood throughout the body.

**Synonyms:**

## Heart Attack

Acute myocardial injury caused most often by blockage of a coronary artery, usually from rupture of an atherosclerotic plaque and thrombosis. It may cause chest pressure, shortness of breath, sweating, nausea, or atypical symptoms and requires emergency treatment.

**Synonyms:**

## Heart Attack (Myocardial Infarction)

The death of heart muscle tissue due to sudden blockage of a coronary artery, typically by a blood clot. It presents with chest pain or pressure, shortness of breath, nausea, and diaphoresis, though symptoms may be atypical in women and diabetics.

**Synonyms:** Myocardial Infarction

## Heart Block

A delay or interruption in the conduction of cardiac impulses from the atria to the ventricles through the atrioventricular (AV) node and His-Purkinje system. Classification: first-degree AV block: PR interval >200 ms, each atrial impulse conducts to the ventricles, typically asymptomatic.

**Synonyms:**

---

## Heart Disease

A broad term encompassing various conditions affecting the heart and blood vessels, most commonly coronary artery disease, heart failure, arrhythmias, and valvular heart disease. Atherosclerosis, the buildup of plaque in the arteries, is the underlying cause of most cardiovascular events.

**Synonyms:**

## Heart Failure

A clinical syndrome in which symptoms or signs result from impaired cardiac structure or function. It may be classified by ejection fraction, including reduced, mildly reduced, or preserved function, and by symptom severity such as NYHA class I-IV.

**Synonyms:**

## Heart Failure Stages

ACC/AHA staging: Stage A (at risk for HF but no structural disease or symptoms); Stage B (structural heart disease but no symptoms); Stage C (structural disease with prior or current symptoms); Stage D (advanced HF requiring specialized interventions). This staging system emphasizes prevention and progression.

**Synonyms:**

## Heart Failure with Preserved Ejection Fraction

A clinical syndrome of heart failure with a relatively preserved left-ventricular ejection fraction, often associated with impaired relaxation or increased stiffness. Diagnosis requires compatible symptoms or signs and objective evidence of cardiac dysfunction or elevated filling pressures.

**Synonyms:**

## Heart Failure with Reduced Ejection Fraction

A clinical syndrome of heart failure with reduced left-ventricular systolic function, commonly associated with ischemic heart disease, cardiomyopathy, hypertension, or valvular disease. The ejection-fraction threshold is defined by the applicable guideline and should be interpreted with the clinical findings.

**Synonyms:**

## Heart Health

The state of cardiovascular well-being, characterized by efficient pumping function, clear arteries, normal blood pressure, and regular heart rhythm. Maintaining heart health involves a heart-healthy diet, regular aerobic and resistance exercise, weight management, stress reduction, and avoidance of tobacco.

**Synonyms:**

## Heart Murmur

An audible extra sound produced by turbulent blood flow within the heart or great vessels, heard on auscultation.

**Synonyms:**

## Heart Palpitations

An awareness of the heartbeat as pounding, racing, fluttering, or irregular. Palpitations may occur with normal rhythm or arrhythmia and can be triggered by stress, exertion, fever, stimulants, endocrine disease, or structural heart disease.

**Synonyms:**

## Heart Rate

The number of cardiac contractions (heartbeats) per minute. Normal resting heart rate (sinus rhythm): 60-100 bpm in adults; higher in children (70-120 at age 1-2 years, 80-130 in neonates).

**Synonyms:**

## Heart Sounds

Audible sounds produced by the heart during the cardiac cycle, normally heard as two sounds (lub-dub). S1 (lub) is caused by closure of the mitral and tricuspid valves at the beginning of systole. S2 (dub) is caused by closure of the aortic and pulmonary valves at the end of systole. Additional sounds (S3, S4) may indicate pathology.

**Synonyms:**

## Heart Surgery

Surgical procedures performed on the heart or great

---

vessels to treat structural or functional cardiac conditions. Common operations include coronary artery bypass grafting (CABG), valve repair or replacement, and repair of congenital heart defects.

**Synonyms:**

### Heart Valve

A flap-like structure that directs one-way blood flow through the heart. The four valves are the tricuspid, pulmonary, mitral, and aortic valves.

**Synonyms:**

### Heart Valve Disorders

Disorders affecting any of the four heart valves, including stenosis (narrowing) and regurgitation (leaking), which impair blood flow through the heart. Causes include congenital malformations, age-related degeneration, rheumatic fever, and endocarditis.

**Synonyms:**

### Heart Valve Prosthesis

Replacement heart valve. Types: mechanical (titanium, carbon, durable, requires lifelong anticoagulation), bioprosthetic (cow/pig tissue, no anticoagulation, degenerates). Mechanical: more durable, higher thrombotic risk. Bioprosthetic: better quality of life, reoperation risk.

**Synonyms:**

### Heart Ventricles

The two lower chambers of the heart. The right ventricle pumps blood to the lungs, and the left ventricle pumps blood to the body.

**Synonyms:**

### Heart-Healthy Eating

A dietary approach emphasizing foods that support cardiovascular function and reduce the risk of heart disease. Key principles include limiting saturated fats, trans fats, sodium, and added sugars while prioritizing fruits, vegetables, whole grains, lean proteins, and healthy fats like those from olive oil and fatty fish.

**Synonyms:**

### Heartburn

Heartburn is a burning retrosternal sensation caused by reflux of gastric contents; frequent or complicated symptoms may indicate gastroesophageal reflux disease. the throat and is often associated with regurgitation of sour or bitter-tasting fluid into the mouth. Despite its name, heartburn is a symptom of gastro-oesophageal reflux disease (GORD), not a cardiac symptom.

**Synonyms:**

### Heat Cramps

Painful, involuntary muscle spasms occurring during or after strenuous activity in heat, often related to fluid and electrolyte loss. Resting in a cool place and replacing fluids and electrolytes may help. Confusion, fainting, or ongoing symptoms may signal heat illness requiring urgent medical attention.

**Synonyms:**

### Heat Exhaustion

A heat-related illness caused by excessive loss of water and salt, producing weakness, dizziness, nausea, headache, sweating, and sometimes fainting without severe central nervous system dysfunction.

**Synonyms:**

### Heat Intolerance

An abnormal inability to tolerate warm environments or increased body heat, often causing excessive sweating, flushing, fatigue, or dizziness. Common causes include hyperthyroidism, menopause, fever, medications, autonomic disorders, and dehydration.

**Synonyms:**

### Heat Pack

A device that applies warmth to the body surface to relieve some muscle pain or stiffness. Excessive heat or prolonged contact can cause burns.

**Synonyms:**

### Heat Rash

An itchy or prickly rash caused by blocked sweat ducts during hot, humid conditions. Small red

---

bumps or clear vesicles often appear in skin folds or areas covered by clothing. Cooling, keeping the skin dry, and avoiding occlusive products usually help; infection or persistent symptoms warrants assessment.

**Synonyms:**

### Heat Stroke

A life-threatening heat-related illness with markedly elevated body temperature and altered mental status. It requires immediate cooling and emergency medical treatment.

**Synonyms:**

### Heavy Metal Poisoning

Lead, mercury, arsenic, cadmium, thallium. Chelation therapy, supportive care, prevention. Sources: paint, water pipes, fish, occupational exposure.

**Synonyms:**

### Heberden Node

A firm bony enlargement of the distal interphalangeal joint, usually caused by hand osteoarthritis. It may be tender during progression and can produce deformity, reduced fine-motor function, or restricted finger movement.

**Synonyms:**

### Heel Pain

Pain beneath or around the heel, commonly caused by plantar fasciitis, Achilles tendinopathy, bursitis, stress fracture, nerve compression, or inflammatory arthritis. Persistent pain, swelling, inability to bear weight, or trauma requires assessment.

**Synonyms:**

### Heel Spur

A bony growth arising from the heel bone, often associated with plantar-fascia strain. The spur itself may cause no symptoms; heel pain is more often related to surrounding soft-tissue inflammation.

**Synonyms:**

### Heimlich Manoeuvre

An emergency procedure for relieving upper airway

obstruction caused by a foreign body (choking). The maneuver is performed on a conscious, choking adult who cannot speak, cough effectively, or breathe.

**Synonyms:**

### Heinz Bodies

Clumps of denatured hemoglobin inside red blood cells caused by oxidative injury. They may occur in glucose-6-phosphate dehydrogenase deficiency after exposure to oxidizing substances and are identified with special stains.

**Synonyms:**

### Helicobacter pylori

A gram-negative, spiral-shaped bacterium adapted to colonize the stomach. It can cause chronic gastritis, peptic ulcer disease, and increase the risk of gastric cancer and gastric MALT lymphoma.

**Synonyms:**

### Helicobacter Pylori Infection

Infection of the stomach by *H. pylori*, a spiral-shaped bacterium associated with chronic gastritis, peptic ulcer disease, gastric adenocarcinoma, and gastric MALT lymphoma. It is diagnosed with noninvasive or endoscopic testing and treated with combination eradication therapy.

**Synonyms:**

### HELLP Syndrome

A serious pregnancy-associated disorder characterized by hemolysis, elevated liver enzymes, and low platelet count. It may occur with or without classic hypertension or proteinuria and requires urgent assessment.

**Synonyms:**

### Helminths

Parasitic worms that cause disease in humans. The major groups are nematodes (roundworms), cestodes (tapeworms), and trematodes (flukes). Helminths have complex life cycles often involving intermediate hosts. Infection occurs through ingestion of eggs or larvae, penetration of skin, or insect vectors.

---

**Synonyms:**

### Helper T Cell

A type of CD4-positive T lymphocyte that coordinates immune responses by releasing cytokines and activating other immune cells.

**Synonyms:**

### HELPERR Mnemonic

A mnemonic for the sequential management of shoulder dystocia: H — Help (call for additional personnel, anesthesia, and pediatrics). E — Evaluate for episiotomy (generous episiotomy to provide more room). L — Legs (McRoberts maneuver: hyperflex maternal legs onto the abdomen).

**Synonyms:**

### Hemangioblastoma

A benign, well-circumscribed vascular tumor of the central nervous system, most commonly the cerebellum, often cystic with a mural nodule. Associated with von Hippel-Lindau disease; treated by surgical resection.

**Synonyms:**

### Hemangioma

Hemangioma concerns hemangioma; its medical significance is established from the defining features, setting, associated findings, and clinical question. Treatment: observation, laser, surgery.

**Synonyms:**

### Hemangiosarcoma

A malignant tumor of vascular endothelial cells, an aggressive sarcoma that may arise in the skin, liver, or bone.

**Synonyms:**

### Hematemesis

Vomiting of blood, indicating upper gastrointestinal bleeding proximal to the ligament of Treitz. Blood may be bright red (acute, brisk bleeding) or resemble coffee grounds (altered blood that has been in contact with gastric acid).

**Synonyms:**

### Hematochezia

The passage of bright red or maroon blood per rectum, usually indicating active lower gastrointestinal (LGI) bleeding distal to the ligament of Treitz (e.g., diverticulosis, arteriovenous malformations/angiodysplasia, colorectal polyps/cancer, inflammatory bowel disease, hemorrhoids).

**Synonyms:**

### Hematocrit

Hematocrit concerns hematocrit; its medical significance is established from the defining features, setting, associated findings, and clinical question. commonly ordered laboratory tests in clinical medicine.

**Synonyms:**

### Hematologic Changes in Pregnancy

Plasma volume increases 40-50% while red cell mass increases 20-30%, resulting in physiologic anemia (Hb 10-11 g/dL). Leukocytosis (WBC up to 15,000-16,000/ $\mu$ L, predominantly neutrophils) is normal.

**Synonyms:**

### hematology

The branch of medicine concerned with the study, diagnosis, treatment, and prevention of disorders of the blood and blood-forming organs (bone marrow, lymph nodes, spleen).

**Synonyms:**

### Hematometrocolpos

Accumulation of blood in the uterine cavity and vagina due to outflow obstruction such as an imperforate hymen or transverse vaginal septum, presenting with cyclic pelvic pain and primary amenorrhea in adolescents.

**Synonyms:**

### Hematopoiesis

The production and maturation of blood cells from multipotent hematopoietic stem cells, principally in the bone marrow after birth. It generates erythrocytes, leukocytes, and platelets through regulated progenitor-cell differentiation.

**Synonyms:**

---

## Hematopoietic Stem Cell Transplantation

Infusion of hematopoietic stem cells after a conditioning regimen to restore marrow function or replace diseased hematopoiesis. Autologous HSCT uses the patient's own cells; allogeneic HSCT uses cells from a donor and carries risks including graft-versus-host disease and graft failure.

**Synonyms:**

## Hematuria

Presence of red blood cells in the urine, categorized as microscopic ( $>3$  RBCs per high-power field on urine microscopy) or gross (macroscopic, visible color change from pink to dark red). Microscopic hematuria is often asymptomatic and detected on routine urinalysis.

**Synonyms:**

## Hemianopia

Loss of vision in half the visual field of one or both eyes. Homonymous hemianopia affects the same side in both eyes and localizes to a contralateral lesion posterior to the optic chiasm, most often stroke or tumor.

**Synonyms:**

## Hemicolectomy

Surgical removal of the right or left portion of the colon, sometimes with nearby lymph nodes and reconnection of the bowel.

**Synonyms:**

## Hemifacial Microsomia

A congenital craniofacial disorder involving asymmetric hypoplasia of the structures derived from the first and second branchial arches, most commonly affecting the mandible, ear, and soft tissues on one side. Also known as craniofacial microsomia or Goldenhar syndrome when epibulbar dermoids and vertebral anomalies are present.

**Synonyms:** craniofacial microsomia or.

## Hemifacial Spasm

Involuntary, unilateral, intermittent twitching of the facial muscles innervated by the facial nerve (CN

VII). Typically begins around the eye (orbicularis oculi) and spreads to the lower face.

**Synonyms:**

## Hemiparesis

Weakness affecting one side of the body, less severe than hemiplegia (paralysis). It results from a lesion of the corticospinal tract anywhere from the motor cortex to the spinal cord, most commonly from stroke, but also from tumors, trauma, or demyelination. The pattern of weakness helps localize the lesion.

**Synonyms:**

## Hemiplegia

Paralysis of one side of the body (the face, arm, and leg on the same side), caused by damage to the corticospinal tract (pyramidal tract) at any level from the cerebral cortex to the spinal cord.

**Synonyms:**

## Hemochromatosis

Hemochromatosis is excessive iron accumulation that can injure the liver, pancreas, heart, joints, skin, and endocrine organs; inherited and acquired forms exist. progressive iron deposition in parenchymal organs. Hereditary hemochromatosis is most commonly caused by homozygous C282Y mutations in the HFE gene affecting approximately one in two hundred individuals of Northern European descent.

**Synonyms:**

## Hemochromatosis Cardiomyopathy

Iron overload cardiomyopathy from hereditary (HFE gene mutations, most common) or secondary causes. Iron deposition in the myocardium causes restrictive then dilated cardiomyopathy. Diagnosis: elevated transferrin saturation ( $>45\%$ ), ferritin, and genetic testing. Cardiac MRI  $T2^* <20$  ms indicates myocardial iron overload.

**Synonyms:**

## Hemodialysis

Extracorporeal blood purification using semipermeable membrane. Three sessions per week for 3 to 4

---

hours. Requires vascular access with AV fistula preferred. Adequacy assessed by Kt/V greater than 1.4. Complications include hypotension, access infection, and dialyzer reactions.

**Synonyms:**

### Hemofiltration

An extracorporeal process that removes plasma water and dissolved solutes by convection across a semipermeable membrane, with replacement fluid used to maintain volume. It is used in continuous and intermittent kidney-replacement modalities.

**Synonyms:**

### Hemoglobin

Hemoglobin is the iron-containing protein in red blood cells that carries oxygen and carbon dioxide; its concentration and structure help evaluate anemia and hemoglobin disorders. heme groups that bind oxygen. Each heme contains iron (Fe<sup>2+</sup>) that reversibly binds O<sub>2</sub>. Cooperative binding produces sigmoidal oxygen dissociation curve. P<sub>50</sub> (pO<sub>2</sub> at 50% saturation) 27 mmHg.

**Synonyms:**

### Hemoglobin A1c

Glycated hemoglobin reflecting average blood glucose concentration over the preceding two to three months corresponding to the red blood cell lifespan. Formed by non-enzymatic glycation of hemoglobin at the N-terminal valine of the beta chain. The percent of glycated hemoglobin is directly proportional to mean glucose levels.

**Synonyms:**

### Hemoglobin A1c Variability

Factors that can make hemoglobin A1c less reliable include altered red-cell survival, hemoglobin variants, anemia, pregnancy, kidney disease, transfusion, and some treatments. An alternative measure of glucose may be needed when A1c does not reflect recent glycemia.

**Synonyms:**

### Hemoglobin C Disease

An inherited hemoglobinopathy caused by a beta-globin variant that produces hemoglobin C. It may cause mild hemolytic anemia, jaundice, splenomegaly, or, when combined with hemoglobin S, clinically significant sickling disease.

**Synonyms:**

### Hemoglobin Electrophoresis

Separation of hemoglobin variants by electrophoresis or HPLC. Normal adult: HbA (95-98%), HbA<sub>2</sub> (2-3%), HbF (<1%). Sickle cell disease (HbSS): HbS only, no HbA. Sickle cell trait (HbAS): HbA > HbS. Thalassemia: elevated HbA<sub>2</sub> or HbF. Beta thalassemia trait: HbA<sub>2</sub> 3.5-7%.

**Synonyms:**

### Hemoglobinopathies: Thalassemias

Thalassemias are inherited disorders of globin chain synthesis imbalance: alpha-thalassemia (HBA1/HBA2 deletions) and beta-thalassemia (HBB mutations).

**Synonyms:**

### Hemoglobinopathy

Hemoglobinopathy is a medical condition involving hemoglobinopathy; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. include sickle-cell disease and thalassemia; manifestations range from asymptomatic microcytosis to haemolytic anaemia, vaso-occlusion, and organ injury.

**Synonyms:**

### hemolysis

The premature destruction of red blood cells, releasing hemoglobin into the plasma. Extravascular hemolysis (most common): RBCs are destroyed by macrophages in the spleen and liver — causes unconjugated hyperbilirubinemia, increased LDH, and decreased haptoglobin.

**Synonyms:**

### Hemolytic Anemia

Anemia due to accelerated destruction of red blood

---

cells (RBCs), classified as intrinsic (RBC defect) or extrinsic (external factors). Intrinsic: hereditary spherocytosis, G6PD deficiency, sickle cell disease, thalassemia.

**Synonyms:**

### **Hemolytic Anemias: Autoimmune**

Autoimmune hemolytic anemia occurs when antibodies or complement cause premature destruction of red blood cells. Warm-antibody and cold-antibody forms differ in their triggers, laboratory findings, and sites of red-cell destruction.

**Synonyms:**

### **Hemolytic Anemias: Hereditary**

Hereditary spherocytosis (HS): cytoskeletal protein defects (ankyrin, band 3, protein 4.2, alpha/beta spectrin) -> spherical RBCs, splenic trapping, hemolysis. AD (75%) or AR. Clinical: anemia, jaundice, splenomegaly, gallstones.

**Synonyms:**

### **hemolytic Disease of the Newborn**

A condition in which maternal antibodies destroy fetal/neonatal red blood cells (RBCs), causing hemolytic anemia, hyperbilirubinaemia, and in severe cases hydrops fetalis.

**Synonyms:**

### **Hemolytic Jaundice**

Jaundice resulting from excessive hemolysis (breakdown of red blood cells) causing overproduction of unconjugated bilirubin that exceeds the liver's capacity for conjugation and excretion. See Jaundice for complete overview.

**Synonyms:**

### **Hemolytic Uremic Syndrome**

A thrombotic microangiopathy characterized by red-cell destruction, low platelets, and acute kidney injury. It may follow Shiga-toxin-producing gastrointestinal infection or result from complement dysregulation and other causes.

**Synonyms:**

### **Hemolytic-Uremic Syndrome**

A potentially life-threatening disorder characterized by microangiopathic hemolytic anemia, thrombocytopenia, and acute kidney injury. It often follows Shiga-toxin-producing bacterial gastroenteritis but may also result from complement dysregulation or other triggers.

**Synonyms:**

### **Hemoperfusion**

Blood passed through adsorbent column (charcoal, resin) to remove toxins. Used for drug overdoses with high protein binding, large volume of distribution.

**Synonyms:**

### **Hemophagocytic Lymphohistiocytosis**

HLH: uncontrolled immune activation with cytokine storm (IFN-gamma, IL-6, IL-10, TNF). Familial HLH (FHL): PRF1 (FHL2), UNC13D (FHL3), STX11 (FHL4), STXBP2 (FHL5), RAB27A (FHL6/GrisCELLI type 2). Secondary HLH: infections (EBV, CMV), malignancy (lymphoma), autoimmune (SJIA/MAS, SLE), immunodeficiency.

**Synonyms:**

### **Hemophagocytosis of sickle cells**

Activation of macrophages that engulf erythrocytes, leukocytes, and platelets within the bone marrow, occurring as a complication of sickle cell disease during severe hemolytic crises or infection.

**Synonyms:**

### **Hemophilia**

Hemophilia is an inherited coagulation-factor deficiency, usually factor VIII or IX, causing prolonged bleeding into joints, muscles, and tissues after injury or spontaneously. VIII, IX, or another coagulation component. It causes prolonged bleeding, particularly into joints and muscles, after injury or procedures.

**Synonyms:**

### **Hemophilia A**

Hemophilia A concerns hemophilia a; its medical

---

significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Hemophilia B**

Hemophilia B concerns hemophilia b; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Hemoptysis**

Expectoration of blood from the lower respiratory tract. Must be differentiated from hematemesis and epistaxis. Causes: bronchitis, pneumonia, TB, bronchiectasis, lung cancer, PE.

**Synonyms:**

### **Hemorrhage**

Extravasation of blood from the cardiovascular system (heart, arteries, veins, capillaries).

**Synonyms:**

### **Hemorrhagic**

Hemorrhagic concerns hemorrhagic; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Hemorrhagic Shock**

Circulatory failure caused by severe blood loss. It may produce rapid pulse, low blood pressure, cool skin, reduced urine output, confusion, or collapse. Treatment requires urgent control of bleeding, restoration of circulating volume, blood products when indicated, and correction of associated injuries or clotting abnormalities.

**Synonyms:**

### **Hemorrhagic Stroke**

A neurological deficit caused by rupture of a cerebral blood vessel, accounting for 13% of all strokes but 40% of stroke mortality. Intracerebral hemorrhage: hypertensive (basal ganglia, thalamus, pons, cerebellum), amyloid angiopathy (lobar, elderly), vascular malformations, anticoagulation. Subarach-

noid hemorrhage: aneurysm rupture.

**Synonyms:**

### **Hemorrhoidectomy**

Surgical excision of symptomatic hemorrhoids. Indications: Grade III-IV internal hemorrhoids (prolapsed, irreducible), external hemorrhoids with uncontrolled bleeding or recurrent thrombosis, mixed hemorrhoids.

**Synonyms:**

### **hemorrhoids (Piles)**

Vascular cushions in the anal canal composed of arteriovenous anastomoses (normal structures present from birth), which become symptomatic when they bleed, prolapse, or thrombose.

**Synonyms:** Piles

### **Hemosiderin**

A golden-brown, granular, iron-containing pigment derived from the degradation of hemoglobin and stored within macrophages as an insoluble complex. It forms when red blood cells are phagocytosed and degraded, typically in conditions of hemorrhage, hemolysis, or excessive red blood cell destruction.

**Synonyms:**

### **hemostasis**

The physiological process that stops bleeding at the site of vascular injury.

**Synonyms:**

### **Hemostat**

A clamp used to compress a blood vessel or tissue and control bleeding.

**Synonyms:**

### **Hemostat (Perineal)**

A clamp used during procedures to compress a blood vessel or hold tissue and control bleeding.

**Synonyms:** Perineal

### **Hemostat (Surgical)**

A clamping surgical instrument used to control

---

bleeding by compressing a blood vessel or tissue.

**Synonyms:** Surgical

### **Hemostat (Vascular)**

A surgical clamp used to temporarily occlude a blood vessel and control bleeding.

**Synonyms:** Vascular

### **Hemothorax**

Hemothorax concerns hemothorax; its medical significance is established from the defining features, setting, associated findings, and clinical question. decreased breath sounds, dullness to percussion. Diagnosis: chest X-ray, ultrasound, CT. Treatment: tube thoracostomy, blood transfusion, surgery if ongoing bleeding.

**Synonyms:**

### **Henoch-Schonlein Purpura**

IgA vasculitis: palpable purpura on buttocks/legs, abdominal pain, arthralgia, renal involvement (IgA nephropathy), most common in children. Self-limited in most cases; corticosteroids for severe GI/renal involvement.

**Synonyms:**

### **Henoch-Schönlein purpura**

An older name for IgA vasculitis, an inflammation of small blood vessels that can cause palpable purpura, usually on the lower limbs and buttocks, with joint pain, abdominal symptoms, and kidney involvement.

**Synonyms:**

### **Heparin-Induced Thrombocytopenia**

An immune-mediated adverse drug reaction caused by IgG antibodies against platelet factor 4 (PF4)-heparin complexes, leading to platelet activation, thrombocytopenia, and a prothrombotic state. HIT typically occurs 5-14 days after heparin exposure (unfractionated heparin > low molecular weight heparin).

**Synonyms:**

### **Hepatectomy**

Surgical removal of part or all of the liver for primary or metastatic tumors, requiring an adequate future liver remnant; portal vein embolization can hypertrophy the remnant before resection.

**Synonyms:**

### **Hepatic Cyst**

Fluid-filled cavity in the liver most commonly congenital and asymptomatic. Simple hepatic cysts are lined by biliary epithelium and contain clear fluid. May cause pain or compressive symptoms if large or complicated by hemorrhage, infection, or rupture. Simple cysts require no treatment.

**Synonyms:**

### **Hepatic Dose Adjustment**

Modification of medication selection or dosing because impaired liver function may reduce metabolism, transport, protein synthesis, or biliary excretion. Standardized liver tests do not always predict drug clearance, so drug-specific guidance is required.

**Synonyms:**

### **Hepatic Drug Metabolism**

The liver chemically modifies medicines through reactions such as oxidation, reduction, hydrolysis, and conjugation. These reactions can inactivate a drug, activate a prodrug, or produce an active or toxic metabolite, and are influenced by genetics, disease, age, and other medicines.

**Synonyms:**

### **Hepatic Encephalopathy**

Neuropsychiatric syndrome occurring in advanced liver disease resulting from accumulation of neurotoxic substances, particularly ammonia. Ammonia crosses the blood-brain barrier and is metabolized by astrocytes into glutamine causing osmotic swelling and impaired neurotransmission.

**Synonyms:**

### **Hepatic Hemangioma**

Most common benign liver tumor composed of di-

---

lated blood-filled vascular spaces lined by endothelial cells. Usually asymptomatic and found incidentally on imaging. Most are small and require no treatment.

**Synonyms:**

### **Hepatic Hydrothorax**

Large pleural effusion occurring in patients with cirrhosis and portal hypertension in the absence of primary cardiac or pulmonary disease. Most commonly right-sided resulting from transit of ascitic fluid through small defects in the diaphragm into the pleural space driven by the pressure gradient between the abdomen and thorax.

**Synonyms:**

### **Hepatic Ischemia**

Liver injury caused by inadequate hepatic blood flow or oxygen delivery, often during shock, severe hypoxemia, cardiac failure, or hepatic vascular occlusion. It can produce a rapid, marked rise in aminotransferases and may progress to acute liver failure.

**Synonyms:**

### **Hepatic Portal System**

The venous network draining blood from the gastrointestinal tract, spleen, and pancreas to the liver before it reaches the systemic circulation. Formed by the union of the superior mesenteric and splenic veins behind the pancreatic neck; receives inferior mesenteric, left gastric, and other tributaries.

**Synonyms:**

### **Hepatic Surgery**

Surgical treatment of liver disease, including partial liver resection, transplantation, and procedures for tumors or biliary disorders. The operation depends on the diagnosis, tumor extent, liver function, and overall health.

**Synonyms:**

### **Hepatic Synthetic Dysfunction**

Impaired hepatic production of proteins and other molecules, including albumin and coagulation fac-

tors. It may cause hypoalbuminemia, edema, prolonged prothrombin time, and increased INR, although INR can also be altered by vitamin K deficiency, anticoagulants, and other conditions.

**Synonyms:**

### **Hepatic Trauma**

Liver injury from trauma. CT staging guides management. Grades I-V based on injury severity.

**Synonyms:**

### **Hepatic Vein**

Veins draining the liver into the inferior vena cava. The right, middle, and left hepatic veins emerge from the posterior surface of the liver at the bare area and drain into the IVC just below the diaphragm. They carry deoxygenated blood leaving the liver (after the hepatic portal system delivers blood for processing).

**Synonyms:**

### **Hepatitis**

Hepatitis is inflammation of the liver caused by viruses, alcohol, medications, toxins, metabolic disease, or autoimmunity and may be acute or chronic.

**Synonyms:**

### **Hepatitis (Viral Hepatitis)**

Inflammation of the liver caused by hepatotropic viruses. Hepatitis A (HAV): fecal-oral, acute self-limited, no chronic carrier state; vaccine-preventable. Hepatitis B (HBV): blood/sexual/perinatal transmission; acute and chronic infection; leading cause of cirrhosis and HCC.

**Synonyms:** Viral Hepatitis

### **Hepatitis A**

Hepatitis A is an acute fecal-oral viral liver infection that usually resolves without chronic disease but can cause severe cholestatic or fulminant hepatitis. fecal-oral route (contaminated food or water). Incubation 15-50 days. Presents with fever, malaise, nausea, jaundice, and elevated transaminases. Self-limited; does not cause chronic infection. Fulminant hepatitis is rare. Diagnosis: IgM anti-HAV.

---

**Synonyms:**

### **Hepatitis A Virus**

Picornavirus transmitted through the fecal-oral route most commonly via contaminated food or water. The incubation period is fifteen to fifty days. Clinical presentation ranges from asymptomatic infection in young children to symptomatic acute hepatitis with jaundice, fatigue, nausea, elevated transaminases, dark urine, and pale stools.

**Synonyms:**

### **Hepatitis A, B, C, D, E**

Five viruses that can cause viral hepatitis. They differ in transmission, risk of chronic infection, prevention, and treatment.

**Synonyms:**

### **Hepatitis B**

Hepatitis B is a blood- and body-fluid-borne viral liver infection that may become chronic and lead to cirrhosis, liver failure, or hepatocellular carcinoma. contact, and perinatally. Can cause acute (self-limited or fulminant) and chronic infection (defined by HBsAg positivity >6 months). Chronic HBV leads to cirrhosis and hepatocellular carcinoma.

**Synonyms:**

### **Hepatitis B Vaccine**

Recombinant vaccine given at birth, 1-2 months, and 6-18 months. Protects against hepatitis B virus, which can cause chronic liver disease, cirrhosis, and hepatocellular carcinoma. Also prevents perinatal transmission when given to infants of HBsAg-positive mothers within 12 hours of birth, plus hepatitis B immune globulin.

**Synonyms:**

### **Hepatitis B Vaccine (Birth Dose)**

The first dose of the hepatitis B vaccine is recommended within 24 hours of birth for all medically stable infants. Administered IM in the vastus lateralis. Prevents perinatal transmission of HBV. For infants born to HBsAg-positive mothers: HBIG (0.5 mL IM) is given within 12 hours of birth along with

the vaccine.

**Synonyms:** Birth Dose

### **Hepatitis B Virus**

Hepadnavirus transmitted through percutaneous exposure, sexual contact, and perinatally causing acute and potentially chronic hepatitis. The virus has a partially double-stranded circular DNA genome.

**Synonyms:**

### **Hepatitis C**

Hepatitis C is a blood-borne viral infection that frequently becomes chronic and can cause progressive fibrosis, cirrhosis, liver failure, or liver cancer. exposure (IV drug use, blood transfusion before 1992). Acute infection is often asymptomatic; 50-80% progress to chronic hepatitis. Chronic HCV can lead to cirrhosis and hepatocellular carcinoma over decades. Diagnosis: anti-HCV antibody, HCV RNA.

**Synonyms:**

### **Hepatitis C Virus**

Flavivirus transmitted primarily through percutaneous exposure with injection drug use being the most common route. Approximately seventy to eighty percent of acute infections progress to chronic hepatitis C, the leading cause of cirrhosis, hepatocellular carcinoma, and liver transplantation in many Western countries.

**Synonyms:**

### **Hepatitis D Virus**

Defective RNA virus requiring co-infection with hepatitis B to replicate, using hepatitis B surface antigen for its envelope. Hepatitis D causes more severe liver disease than hepatitis B alone with accelerated progression to cirrhosis and higher risk of hepatocellular carcinoma.

**Synonyms:**

### **Hepatitis E Virus**

A non-enveloped RNA virus transmitted mainly by the fecal-oral route, often through contaminated

---

water or food. It causes acute hepatitis and, in some people, chronic infection or severe disease. Clinical presentation may resemble hepatitis A, with jaundice and elevated transaminases.

**Synonyms:**

### Hepatitis Serology

Panel of serologic markers for hepatitis A, B, C, and E. HAV: anti-HAV IgM (acute), anti-HAV IgG (past infection/vaccination). HBV: HBsAg (active infection), anti-HBs (immunity/vaccination), anti-HBc IgM (acute), anti-HBc IgG (past), HBeAg (high replication), anti-HBe (low replication). HBV DNA: quantifies viral load.

**Synonyms:**

### Hepatitis Viruses

Hepatitis A: fecal-oral, acute self-limited, vaccine (inactivated). Hepatitis B: blood/sexual/perinatal. Acute: HBsAg, IgM anti-HBc. Chronic: HBsAg >6 months, HBV DNA, HBeAg. Treatment: entecavir, tenofovir (TAF/TDF) - suppress DNA, prevent cirrhosis/HCC. HDV: requires HBV, pegylated interferon. Hepatitis C: blood-borne. Acute: HCV RNA.

**Synonyms:**

### Hepatobiliary Scintigraphy

Liver/gallbladder imaging using Tc-99m mebrofenin or disofenin. Assess biliary patency, gallbladder function, bile leak, acute cholecystitis (non-visualization of gallbladder).

**Synonyms:**

### Hepatoblastoma

A malignant embryonal liver tumor occurring almost exclusively in infants and young children, associated with elevated AFP and prematurity.

**Synonyms:**

### Hepatocellular Carcinoma

Primary liver cancer arising from hepatocytes. Risk factors: cirrhosis, chronic hepatitis B/C, alcohol, and metabolic dysfunction-associated steatotic liver disease. Surveillance with ultrasound and AFP;

treatment includes resection, transplantation, ablation, TACE, and systemic therapy.

**Synonyms:**

### Hepatocellular Jaundice

Jaundice caused by dysfunction of hepatocytes, impairing the liver's ability to take up, conjugate, or excrete bilirubin. See Jaundice for complete overview. Causes: viral hepatitis (A, B, C, D, E), alcoholic hepatitis, drug-induced liver injury (paracetamol, isoniazid), cirrhosis, autoimmune hepatitis, Wilson disease, haemochromatosis.

**Synonyms:**

### Hepatojugular Reflux

Sustained pressure applied over the liver for 15-30 seconds causes a sustained rise in JVP of more than 3 cm above baseline. It indicates right heart failure or fluid overload, reflecting the inability of the right ventricle to accommodate increased venous return.

**Synonyms:**

### Hepatoma

A tumor arising from liver cells, usually referring to hepatocellular carcinoma, the most common primary malignant liver tumor.

**Synonyms:**

### Hepatomegaly

Enlarged liver detected on imaging. Causes: fatty liver, hepatitis, congestion, infiltration, malignancy.

**Synonyms:**

### Hepatopulmonary Syndrome

Triad of liver disease, intrapulmonary vascular dilatation, and impaired oxygenation causing hypoxemia. Presents with platypnea which is dyspnea worsening in the upright position and orthodeoxia which is oxygen desaturation in the upright position.

**Synonyms:**

### Hepatorenal Syndrome

A form of acute or chronic kidney dysfunction associated with advanced liver disease and portal hypertension, without another sufficient cause of renal

---

failure. It reflects altered circulation and renal blood flow and requires prompt assessment and treatment of both the liver disease and kidney dysfunction.

**Synonyms:**

### **Hepatosplenomegaly**

Enlargement of both the liver and spleen. It may result from infection, portal hypertension, storage disease, malignancy, haemolysis, or systemic inflammatory and infiltrative disorders; evaluation depends on associated symptoms and laboratory and imaging findings.

**Synonyms:**

### **Hepatotoxicity**

Liver injury caused by a drug, toxin, chemical, or other exposure. Acetaminophen is an important cause of acute liver failure in some regions. Evaluation may include liver tests, clotting studies, medication review, and clinical assessment.

**Synonyms:**

### **HER2-Positive**

A cancer whose cells have increased expression or amplification of human epidermal growth factor receptor 2 (HER2). Some HER2-targeted medicines may be used according to the cancer type and clinical context.

**Synonyms:**

### **Herd Immunity**

Resistance of population to invasion by infectious agent when sufficient proportion immune. Threshold varies by disease (measles 95%, polio 80%).

**Synonyms:**

### **Hereditary Angioedema**

Recurrent episodes of nonpitting swelling of the skin, gastrointestinal tract, or upper airway caused most often by deficiency or dysfunction of C1 inhibitor. Attacks can cause abdominal pain, vomiting, airway obstruction, or life-threatening laryngeal edema without typical urticaria.

**Synonyms:**

### **Hereditary Cancer**

Cancer caused by inherited genetic mutations. Genetic counseling recommended.

**Synonyms:**

### **Hereditary Hemorrhagic Telangiectasia**

An autosomal dominant vascular disorder (also called Osler-Weber-Rendu syndrome) characterized by telangiectasias on skin and mucous membranes, pulmonary AVMs, hepatic AVMs, and cerebral AVMs. Pulmonary AVMs can cause hypoxemia and paradoxical emboli. Treatment is embolization of pulmonary AVMs.

**Synonyms:** Osler-Weber-Rendu syndrome).

### **Hereditary Hemorrhagic Telangiectasia (Osler-Weber-Rendu Disease)**

An autosomal dominant vascular dysplasia characterized by malformed blood vessels lacking smooth muscle layers. Mutations in ENG (endoglin) or ACVRL1 (ALK1) genes.

**Synonyms:** Osler-Weber-Rendu Disease

### **Hereditary Spherocytosis**

The most common inherited hemolytic anemia in Northern Europeans (autosomal dominant 75%, recessive 25%). Caused by defects in RBC membrane proteins (spectrin, ankyrin, band 3, protein 4.2), leading to loss of membrane surface area, reduced deformability, and premature destruction in the spleen.

**Synonyms:**

### **Hermansky-Pudlak Syndrome**

Autosomal recessive (10+ genes: HPS1-10, BLOC/AP-3 complexes). Oculocutaneous albinism, bleeding disorder (absent dense bodies in platelets -> prolonged bleeding time), pulmonary fibrosis (HPS-1, HPS-4), granulomatous colitis, neutropenia. Diagnosis: electron microscopy of platelets (absent dense bodies), genetic testing.

**Synonyms:**

### **Hernia**

A hernia is protrusion of tissue through a weakness

---

or opening in the surrounding muscle or connective tissue and may become incarcerated or strangulated. cavity that normally contains it. Most hernias occur in the abdominal wall.

**Synonyms:**

### **Hernia Mesh**

Synthetic or biologic material for hernia repair. Polypropylene most common. Complications: infection, recurrence, chronic pain, mesh migration.

**Synonyms:**

### **Hernia Repair (Herniorrhaphy)**

Surgical repair of a hernia (inguinal, femoral, umbilical, incisional, hiatal). Inguinal hernia repair: open (Lichtenstein tension-free mesh, Shouldice, Bassini) or laparoscopic (TEP: totally extraperitoneal, TAPP: transabdominal preperitoneal). Mesh reinforcement reduces recurrence (1-3% for mesh vs. 5-15% for primary tissue repair).

**Synonyms:** Herniorrhaphy

### **Herniated Disc**

Protrusion of the nucleus pulposus through a tear in the annulus fibrosus of the intervertebral disc, causing compression or inflammation of adjacent nerve roots. Most common at L4-L5 and L5-S1 (lumbar) and C5-C6, C6-C7 (cervical). Lumbar: sciatica (radiating leg pain), paresthesias, sensory loss, and motor weakness (foot drop).

**Synonyms:**

### **Herniated disk**

A herniated disk occurs when spinal disk material extends through a fissure and may compress a nerve root, producing back pain, radiating pain, numbness, or weakness. intervertebral disc, most commonly occurring in the lumbar spine (L4-L5 and L5-S1 account for 95 percent of lumbar herniations) and cervical spine (C5-C6 and C6-C7), potentially compressing spinal nerves.

**Synonyms:**

### **Herpangina**

Herpangina concerns herpangina; its medical sig-

nificance is established from the defining features, setting, associated findings, and clinical question. throat, and small vesicles or ulcers on the soft palate and posterior pharynx. It is most common in children and spreads through respiratory and fecal-oral secretions.

**Synonyms:**

### **Herpes**

Infection caused by a herpesvirus. The term commonly refers to herpes simplex infection, which causes oral or genital lesions, but other herpesviruses cause distinct diseases.

**Synonyms:**

### **Herpes gestationis**

An autoimmune blistering skin disease of pregnancy mediated by anti-basement membrane zone antibodies, presenting with pruritic urticarial plaques and vesicles, typically in the second or third trimester.

**Synonyms:**

### **Herpes Simplex**

Infection with herpes simplex virus type 1 or type 2, commonly causing recurrent oral or genital vesicles and ulcers.

**Synonyms:**

### **Herpes Simplex (Cold Sores / Genital Herpes)**

A viral infection caused by herpes simplex virus type 1 (HSV-1, typically orofacial, though increasingly anogenital) and type 2 (HSV-2, predominantly anogenital). HSV is a double-stranded DNA virus of the Herpesviridae family with latency in sensory ganglia and periodic reactivation.

**Synonyms:** Cold Sores / Genital Herpes

### **Herpes Simplex Encephalitis**

The most common cause of sporadic fatal encephalitis, caused by herpes simplex virus type 1 (HSV-1) in over ninety percent of cases. The virus typically infects the temporal lobes, orbitofrontal cortex, and insular cortex, causing hemorrhagic necrosis.

**Synonyms:**

---

## Herpes Simplex Skin Infection

Infection of skin or mucosa by herpes simplex virus, producing grouped vesicles or erosions on an erythematous base. Recurrent disease commonly affects the oral or genital region; widespread infection in patients with eczema is eczema herpeticum and requires urgent medical assessment.

**Synonyms:**

## Herpes simplex virus

A double-stranded DNA virus belonging to the Herpesviridae family that causes oral and genital herpes. HSV has two serotypes: HSV-1, which typically causes oral herpes, and HSV-2, which typically causes genital herpes. The virus establishes latent infections in sensory ganglia and can reactivate periodically.

**Synonyms:**

## Herpes simplex virus infection

Infection with herpes simplex virus type 1 or type 2, commonly causing recurrent oral, genital, skin, eye, or central nervous system disease.

**Synonyms:**

## Herpes vegetans

A rare, chronic, verrucous or vegetative form of herpes simplex virus infection occurring in immunocompromised patients, particularly those with HIV/AIDS. It presents as exophytic, proliferative, ulcerative plaques on the genital or perianal skin, often refractory to standard antiviral therapy.

**Synonyms:**

## Herpes Zoster

A painful, usually one-sided blistering rash caused by reactivation of latent varicella-zoster virus in a sensory nerve ganglion. It typically follows a band-like distribution and may cause persistent nerve pain after the rash resolves.

**Synonyms:**

## Herpes Zoster (Shingles)

A painful, vesicular rash caused by reactivation of latent varicella-zoster virus (VZV, human herpesvirus

3) in the dorsal root ganglia.

**Synonyms:** Shingles

## Herpes zoster ophthalmicus

Reactivation of varicella-zoster virus latency in the trigeminal ganglion, with viral spread along the ophthalmic division (V1) causing painful vesicular skin eruption on the forehead, eyelid, and nose, with potential ocular involvement including keratitis, uveitis, and secondary glaucoma.

**Synonyms:**

## Herpetic glossitis

Inflammation of the tongue caused by herpes simplex virus infection, presenting with painful vesicles and ulceration on the tongue surface, often recurring in immunocompromised patients.

**Synonyms:**

## Herpetic Whitlow

A painful viral infection of the finger caused by the herpes simplex virus (typically HSV-1), characterized by swelling, redness, and painful vesicular lesions on the finger.

**Synonyms:**

## Hesitation Wounds

Multiple superficial, tentative parallel incised cuts surrounding a deeper primary fatal cut wound, classically observed in suicides involving sharp instruments (wrists, neck).

**Synonyms:**

## Heteroplasmy

The presence of more than one mitochondrial DNA sequence in a cell or person, usually because mutant and normal mitochondrial genomes coexist.

**Synonyms:**

## Heterotopic Pregnancy

Simultaneous intrauterine and ectopic pregnancy. Rare in spontaneous conception (1:30,000) but more common with ART (1:100-1:500). Risk factors: ovulation induction, IVF with multiple embryo transfer. The presence of an intrauterine pregnancy does not

---

exclude an ectopic pregnancy.

**Synonyms:**

### Heterozygous

Having two different alleles of a particular gene at a genetic locus. The observable effect depends on the gene and the relationship between the alleles.

**Synonyms:**

### Hexokinase

Phosphorylates glucose to glucose-6-phosphate. Low  $K_m$ , inhibited by product. Glucokinase (liver) has high  $K_m$ , not inhibited.

**Synonyms:**

### Hiatal Hernia

Protrusion of part of the stomach through the esophageal opening in the diaphragm into the chest. It may be sliding or paraesophageal and can be associated with reflux or other symptoms.

**Synonyms:**

### Hiatus Hernia

Another term for hiatal hernia: protrusion of part of the stomach through the esophageal hiatus of the diaphragm into the chest. It may be sliding or paraesophageal.

**Synonyms:**

### Hib

Haemophilus influenzae type b, an encapsulated bacterium that can cause meningitis, epiglottitis, pneumonia, septic arthritis, cellulitis, or sepsis. Routine conjugate vaccination substantially reduces invasive Hib disease.

**Synonyms:**

### Hiccough (Hiccup)

An involuntary, repetitive, spasmodic contraction of the diaphragm followed by sudden closure of the glottis, producing the characteristic 'hic' sound. Hiccups are caused by irritation or stimulation of the phrenic nerve (C3-C5, innervates the diaphragm) or the vagus nerve (CN X).

**Synonyms:** Hiccup

### Hiccups

Hiccups concerns hiccups; its medical significance is established from the defining features, setting, associated findings, and clinical question. producing a characteristic sound. Persistent or intractable hiccups may reflect irritation of the diaphragm or phrenic and vagal pathways, metabolic disease, medication exposure, or central nervous system disease.

**Synonyms:**

### Hiccups (Singultus)

Involuntary, spasmodic contractions of the diaphragm and intercostal muscles followed by sudden glottic closure, producing the characteristic "hic" sound. The reflex arc involves the phrenic nerve (C3-C5), vagus nerve, and brainstem centers.

**Synonyms:** Singultus

### Hidradenitis

Hidradenitis suppurativa is a chronic inflammatory follicular occlusion disease affecting apocrine gland-bearing areas (axillae, groin, inframammary). It presents with recurrent painful nodules, abscesses, sinus tracts, and scarring.

**Synonyms:**

### Hidradenitis Suppurativa

A chronic inflammatory skin disorder involving recurrent painful nodules, abscesses, draining tunnels, and scars, usually in skin folds such as the axillae, groin, buttocks, or breasts. Severity varies and is influenced by genetic, hormonal, and environmental factors.

**Synonyms:**

### High Arch

An abnormally elevated medial longitudinal arch of the foot, also called pes cavus. It may be idiopathic or associated with neuromuscular disease and can cause overload of the heel and forefoot, calluses, pain, instability, or difficulty fitting footwear.

**Synonyms:** pes cavus.

### High-Dependency Unit

A ward or area within a hospital that provides a level

---

of care between a general ward and an intensive care unit, for patients who require intensive observation or treatment but not mechanical ventilation.

**Synonyms:**

### High-Flow Nasal Cannula

A device delivering heated and humidified oxygen at flow rates up to 60 L/min through a nasal cannula. It provides a modest amount of PEEP, reduces dead space ventilation, and improves patient comfort compared to non-invasive ventilation. It is used for acute hypoxemic respiratory failure and post-extubation support.

**Synonyms:**

### High-Intensity Focused Ultrasound

A treatment that concentrates ultrasound energy to heat and destroy a targeted area of tissue. Its uses depend on the device, disease, and clinical setting.

**Synonyms:**

### High-Level Disinfection

Disinfection that inactivates all microorganisms except high numbers of bacterial spores. It is commonly used for heat-sensitive semicritical equipment such as some flexible endoscopes after meticulous cleaning.

**Synonyms:**

### Hill-Sachs Lesion

Impaction fracture of posterolateral humeral head from anterior shoulder dislocation. Associated with Bankart lesion.

**Synonyms:**

### Hip Dislocation

Loss of normal congruence between the femoral head and acetabulum. It is usually traumatic in adults and may damage the sciatic nerve or femoral-head blood supply; congenital or developmental dislocation occurs in developmental dysplasia of the hip.

**Synonyms:**

### Hip Disorders

The hip joints are ball-and-socket joints connecting the femur to the pelvis, providing stability and a wide range of motion for walking, running, and weight-bearing activities. Common hip conditions include osteoarthritis, fractures, bursitis, and labral tears.

**Synonyms:**

### Hip Dysplasia

Developmental dysplasia of the hip (DDH): abnormal development of the acetabulum/femoral head causing instability, subluxation, or dislocation. Risk factors: female, breech presentation, family history, firstborn, and tight swaddling.

**Synonyms:**

### Hip Fracture

Fracture of proximal femur, usually femoral neck or intertrochanteric region. Mechanism: low-energy fall in osteoporotic bone. Symptoms: pain, inability to bear weight, shortened/externally rotated leg. Diagnosis: X-ray, MRI if X-ray negative. Treatment: surgical fixation (internal fixation, arthroplasty).

**Synonyms:**

### Hip Joint

Multiaxial ball-and-socket synovial joint between femoral head and acetabulum. Designed for stability and mobility, bearing entire upper body weight. Acetabular labrum deepens the socket; strong ligaments (iliofemoral, pubofemoral, ischiofemoral) reinforce it. Ligamentum teres contains the femoral head artery.

**Synonyms:**

### Hip Prosthesis

Total hip replacement components: femoral stem (metal), head (metal/ceramic), acetabular cup (polyethylene/metal/ceramic). Fixation: cemented (older patients), cementless (younger, porous coating for bone ingrowth). Materials: cobalt-chrome, titanium, ceramics.

**Synonyms:**

---

## Hip Replacement

A surgical procedure in which the diseased hip joint is replaced with a prosthetic implant (arthroplasty). Total hip replacement (THR) replaces both the femoral head and the acetabulum.

**Synonyms:**

## Hip-Fracture Rehabilitation

Multidisciplinary postoperative management aimed at restoring mobility, preventing complications, and returning the older person to the highest feasible level of independence. It includes early mobilization, pain control, osteoporosis treatment, delirium prevention, nutrition, and discharge planning.

**Synonyms:**

## Hippocampus

Curved medial temporal lobe structure, part of the limbic system, critical for new declarative memory formation (episodic and spatial) and short-to-long-term memory conversion. Has dentate gyrus, hippocampus proper (CA1-CA4), subiculum, and entorhinal cortex. One of few adult neurogenesis sites (dentate gyrus).

**Synonyms:**

## Hippotherapy

Therapeutic horseback riding for neurological, musculoskeletal conditions. Improves balance, posture, coordination.

**Synonyms:**

## Hirschsprung Disease

Congenital condition characterized by the absence of enteric ganglion cells in a segment of the distal colon, resulting from failure of neural crest cell migration during embryonic development.

**Synonyms:**

## Hirschsprung's Disease

A congenital disorder characterized by the absence of parasympathetic ganglion cells (aganglionosis) in the distal colon, resulting in failure of relaxation and functional obstruction. Incidence: 1 in 5,000 live births, male predominance (4:1).

**Synonyms:**

## Hirsutism

Excess terminal hair growth in women in a male-pattern distribution (face—upper lip, chin, sideburns; chest, back, lower abdomen, inner thighs). Hirsutism affects 5-10% of women of reproductive age. Pathophysiology: increased androgen production or increased end-organ sensitivity.

**Synonyms:**

## Histamine

A biogenic amine (imidazolyethylamine) synthesised from L-histidine by histidine decarboxylase, stored in basophils, mast cells, and platelets, and released during allergic and inflammatory responses.

**Synonyms:**

## Histiocytosis

Histiocytosis is a medical condition involving histiocytosis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. proliferation, including Langerhans cell histiocytosis, Erdheim-Chester disease, and hemophagocytic lymphohistiocytosis.

**Synonyms:**

## Histology

The microscopic study of the structure of tissues and cells. Histology involves preparing thin tissue sections (3-10 micrometres) by fixation (formalin, paraffin embedding), sectioning (microtome), staining (haematoxylin and eosin, H&E), and examination under a light or electron microscope.

**Synonyms:**

## Histopathology

The laboratory-based diagnosis of disease through microscopic examination of tissue sections from biopsy, excision, or autopsy, built on fixation, paraffin embedding, sectioning, and hematoxylin and eosin staining.

**Synonyms:**

---

### **Histoplasma capsulatum**

A fungus found in soil contaminated with bird or bat droppings that can cause histoplasmosis when its spores are inhaled.

**Synonyms:**

### **Histoplasmosis**

Histoplasmosis is a medical condition involving histoplasmosis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. in nitrogenrich soil enriched with bat or bird guano, most commonly in the Ohio and Mississippi River valleys of the United States, Central and South America, and parts of Africa and Asia.

**Synonyms:**

### **Histrionic Personality Disorder**

A pattern of excessive emotionality and attention-seeking.

**Synonyms:**

### **HIV**

Human immunodeficiency virus: a retrovirus (HIV-1, HIV-2) causing progressive CD4+ T-cell depletion and AIDS if untreated. Transmitted via sexual contact, blood/blood products, mother-to-child.

**Synonyms:**

### **HIV (Human Immunodeficiency Virus)**

A retrovirus (family Retroviridae, genus Lentivirus) that causes acquired immunodeficiency syndrome (AIDS) by infecting and destroying CD4+ T lymphocytes (helper T cells). Two types: HIV-1 (pandemic, most common worldwide) and HIV-2 (less virulent, West Africa).

**Synonyms:** Human Immunodeficiency Virus

### **HIV infection**

Infection with human immunodeficiency virus, which progressively damages immune function if untreated. Antiretroviral therapy suppresses viral replication and reduces transmission and complications.

**Synonyms:**

### **HIV Test**

Screening and confirmatory testing for HIV. Fourth-generation HIV antigen/antibody combo test (p24 antigen + HIV-1/2 antibodies): window period 2-4 weeks. Positive screening requires confirmatory HIV-1/2 antibody differentiation assay. Rapid point-of-care tests (fingerstick, oral swab): results in 20 minutes.

**Synonyms:**

### **HIV/AIDS**

HIV-1/2: retrovirus, CD4+ T cell depletion. Transmission: sexual, blood, perinatal, breast milk. Acute retroviral syndrome: fever, lymphadenopathy, pharyngitis, rash, high viral load. Clinical latency: CD4 decline over years. AIDS: CD4 <200 or AIDS-defining illness (PJP, toxo, CMV, MAC, crypto, KS, lymphoma, TB).

**Synonyms:**

### **HIV/AIDS Immunopathogenesis**

HIV-1 infects CD4+ T cells, macrophages, dendritic cells via gp120 binding to CD4 + CCR5 (R5-tropic, early) or CXCR4 (X4-tropic, late). Reverse transcription -> integration -> transcription/translation -> budding. Acute retroviral syndrome (2-4 weeks): fever, lymphadenopathy, pharyngitis, rash, high viral load.

**Synonyms:**

### **HIV/AIDS Nutrition**

Malnutrition due to increased need requirement, malabsorption, side effects. Supplementation, opportunistic infection management.

**Synonyms:**

### **Hives**

Hives, or urticaria, are transient raised itchy wheals caused by dermal edema, commonly from allergy, infection, medications, physical triggers, or spontaneous mast-cell activation. or chronic and can result from infection, foods, medications, physical triggers, or autoimmune mechanisms; swelling of the airway is an emergency.

**Synonyms:**

---

## Hives (Urticaria)

A common skin condition characterized by transient, well-circumscribed, intensely pruritic wheals that blanch with pressure and resolve within 24 hours without scarring, caused by mast-cell mediator release in the dermis. Acute urticaria lasts less than 6 weeks; chronic urticaria recurs for 6 weeks or longer and is often spontaneous.

**Synonyms:** Urticaria

## HLA-B27

A class I human-leukocyte-antigen molecule associated with several spondyloarthropathies, including ankylosing spondylitis and reactive arthritis. A positive result supports but does not establish a diagnosis.

**Synonyms:**

## HMG-CoA Reductase

Rate-limiting enzyme of cholesterol synthesis. Target of statin drugs.

**Synonyms:**

## Hoarding Disorder

Persistent difficulty discarding or parting with possessions, regardless of their actual value. The individual perceives a need to save items and experiences distress at the thought of discarding them. This results in accumulation of possessions that congest and clutter active living areas.

**Synonyms:**

## Hoarseness

Hoarseness concerns hoarseness; its medical significance is established from the defining features, setting, associated findings, and clinical question. altered pitch; a subset of dysphonia rather than a diagnosis. Common causes include acute viral laryngitis, voice overuse, smoking, reflux, and vocal cord lesions (nodules, polyps, papillomas, laryngeal carcinoma).

**Synonyms:**

## Hodgkin Lymphoma

A B-cell lymphoma characterized by the presence

of Reed-Sternberg cells (large, binucleate or multinucleate cells with owl-eye nucleoli) in a background of reactive inflammatory cells.

**Synonyms:**

## Hodgkin's Lymphoma

A B-cell lymphoma characterized by the presence of Reed-Sternberg cells (large, binucleate or multinucleate cells with owl-eye nucleoli) in a background of reactive inflammatory cells. See Hodgkin Lymphoma.

**Synonyms:**

## Holoprosencephaly

A structural brain malformation resulting from incomplete or failed division of the forebrain (prosencephalon) into the cerebral hemispheres during the fifth week of gestation.

**Synonyms:**

## Holosystolic Murmur Differential

Pansystolic (holosystolic) murmurs are plateau-shaped and extend from S1 to S2.

**Synonyms:**

## Holt-Oram Syndrome

An autosomal dominant disorder caused by TBX5 gene mutations, characterized by congenital heart disease and upper limb malformations. Cardiac anomalies: atrial septal defect (most common), VSD, and conduction abnormalities (heart block, atrial fibrillation).

**Synonyms:**

## Holter Monitor

Continuous ECG recording for 24-48 hours to detect arrhythmias, quantify burden (atrial fibrillation, PVCs, PACs), and correlate symptoms with rhythm. Patient diary logs symptoms. Indications: palpitations, syncope, presyncope, and assessment of arrhythmia control. Reveals paroxysmal arrhythmias not captured on standard 12-lead ECG.

**Synonyms:**

---

### **Holter Monitoring**

Portable, continuous electrocardiographic recording over an extended period, commonly 24 hours or longer, to detect intermittent rhythm abnormalities and correlate them with symptoms.

**Synonyms:**

### **Home Care**

Medical care provided at home. Includes nursing, therapy, personal care.

**Synonyms:**

### **Home Health**

Healthcare services delivered in a person's home, such as nursing, therapy, monitoring, or assistance with a medical treatment plan.

**Synonyms:**

### **Home Health Rehabilitation**

Physical, occupational, or speech therapy delivered at home when a person cannot safely travel to an outpatient facility.

**Synonyms:**

### **Home Rehabilitation**

Rehabilitation provided in a person's home to improve movement, self-care, communication, or daily functioning.

**Synonyms:**

### **Homeostasis**

The maintenance of stable internal conditions despite external changes. Key regulated variables: temperature, pH, glucose, electrolytes, blood pressure, fluid balance. Mechanisms: negative feedback loops (most common), positive feedback (rare, e.g., labor, blood clotting).

**Synonyms:**

### **Homocystinuria**

Homocystinuria concerns homocystinuria; its medical significance is established from the defining features, setting, associated findings, and clinical question. deficiency of cystathionine beta-synthase (CBS), leading to accumulation of homocysteine

and methionine.

**Synonyms:**

### **Homozygous**

Having two identical alleles of a particular gene (AA or aa). Can be homozygous dominant or homozygous recessive.

**Synonyms:**

### **Hookworm**

Intestinal nematode infection by *Ancylostoma duodenale* or *Necator americanus*, acquired by skin penetration of filariform larvae (walking barefoot on contaminated soil).

**Synonyms:**

### **Hookworm Infection**

Intestinal infection caused by hookworms acquired when larvae in contaminated soil penetrate the skin or are ingested. Chronic infection can cause abdominal symptoms, iron-deficiency anemia, protein loss, and impaired growth in children.

**Synonyms:**

### **Hookworm infestation**

Intestinal infection by hookworm nematodes, which attach to the intestinal wall and may cause iron-deficiency anemia, abdominal symptoms, or poor growth.

**Synonyms:**

### **Hordeolum (Stye)**

A tender, localized infection or inflammation of an eyelid gland that produces a small red lump near the eyelid margin.

**Synonyms:** Stye

### **Horizontal gene transfer**

The transfer of genetic material between bacteria through mechanisms other than parent-to-offspring transmission. The three mechanisms are transformation (uptake of free DNA), transduction (transfer via bacteriophages), and conjugation (direct cell-to-cell transfer).

**Synonyms:**

---

## Hormone

Chemical messenger secreted by endocrine glands into blood, acting on distant target organs with specific receptors. Classes: peptides/proteins (insulin, GH), steroids (cortisol, estrogen), amines (thyroid hormone, catecholamines). Mechanisms: cell surface receptors (GPCRs, RTKs) or intracellular receptors (nuclear receptors).

**Synonyms:**

## Hormone Replacement Therapy

HRT (menopause hormone therapy): estrogen  $\pm$  progestin to relieve menopausal symptoms (vasomotor, vaginal atrophy, sleep, mood) and prevent osteoporosis. Regimens: estrogen-only (post-hysterectomy) or combined (with progestin for endometrial protection in uterus-intact women); routes: oral, transdermal, vaginal.

**Synonyms:**

## Hormone Therapy

Treatment blocking hormone effects in hormone-sensitive cancers. Examples: tamoxifen (breast cancer), leuprolide (prostate cancer), aromatase inhibitors.

**Synonyms:**

## Hormone-Receptor Positive

A cancer whose cells express receptors for hormones such as estrogen or progesterone. Hormone-blocking treatment may be useful for selected cancers with these receptors.

**Synonyms:**

## Hormone-Sensitive Lipase

Breaks down triglycerides in adipose tissue. Activated by glucagon, epinephrine via cAMP.

**Synonyms:**

## Horner Syndrome

A clinical triad caused by disruption of the sympathetic pathway to the eye and face, resulting in ipsilateral miosis (constricted pupil), ptosis (drooping of the upper eyelid due to paralysis of the superior tarsal muscle), and anhidrosis (loss of sweating on

the affected side of the face).

**Synonyms:**

## Horseshoe Kidney

The most common renal fusion anomaly (1 in 400-500), where the lower poles of both kidneys are fused across the midline by an isthmus of renal parenchyma or fibrous tissue.

**Synonyms:**

## Hospice

Palliative care for terminal illness with prognosis  $<6$  months. Focus on comfort, quality of life, support for patient and family. Provided at home, hospice facility, or hospital. Interdisciplinary team: physician, nurse, social worker, chaplain, volunteer.

**Synonyms:**

## Hospice Rehabilitation

Rehabilitation in hospice setting. Symptom management, positioning, caregiver education.

**Synonyms:**

## Hospital-Acquired Infection

Infection acquired during hospitalization. Also: healthcare-associated infection (HAI). Examples: CLABSI, CAUTI, surgical site infection.

**Synonyms:**

## Hospital-acquired infections

Infections that develop during or after hospitalisation. Major types include central line-associated bloodstream infections, catheter-associated urinary tract infections, ventilator-associated pneumonia, and surgical site infections. Risk factors include invasive devices, prolonged hospitalisation, and antimicrobial use.

**Synonyms:**

## Hospital-Acquired Pneumonia

Pneumonia developing  $> 48$  hours after hospital admission. Common pathogens include *Pseudomonas* and MRSA. Empiric treatment covers resistant organisms.

**Synonyms:**

---

## Hospitalization (Geriatric)

Inpatient stay for elderly patients. High risk for adverse outcomes: delirium, functional decline, institutionalization. Precautions: fall prevention, early mobilization, medication reconciliation, delirium prevention, nutrition support. Geriatrician consultation beneficial.

**Synonyms:** Geriatric

## Host

A person or other living organism that can be infected by a virus or other pathogen under natural conditions. The host may be a human, animal, or plant. In medical contexts, the host is the patient in whom an infection or disease develops.

**Synonyms:**

## Host Response

Immunological reaction to implant. Foreign body response, encapsulation, rejection.

**Synonyms:**

## Hot Flashes

Vasomotor symptoms: sudden sensations of intense heat, sweating, flushing, and palpitations, most commonly from estrogen withdrawal around menopause; also in hypogonadism, chemotherapy-induced ovarian failure, and some medications (SERMs, GnRH agonists). Mechanism: hypothalamic thermoregulatory dysfunction.

**Synonyms:**

## Hounsfield Units

CT number scale referencing water (0 HU) and air (-1000 HU). Fat: -50 to -100 HU. Water: 0 HU. Soft tissue: +20 to +50 HU. Bone: +400 to +3000 HU. Blood: +40 to +60 HU (acute), +20 to +40 HU (chronic).

**Synonyms:**

## Howell-Jolly Bodies

Basophilic nuclear remnants (clusters of DNA) normally removed from circulating red blood cells by splenic macrophages (pitting). Presence on peripheral blood smear indicates functional asplenia or

anatomical splenectomy (e.g., trauma, sickle cell auto-splenectomy). Also seen in severe megaloblastic anemia.

**Synonyms:**

## HPLC

High-performance liquid chromatography for radiochemical purity analysis.

**Synonyms:**

## HPV

Human papillomavirus is a group of DNA viruses that infect skin and mucous membranes. Some types cause warts, whereas persistent infection with high-risk types can cause precancerous lesions and cancers of the cervix, anus, penis, vulva, vagina, or oropharynx.

**Synonyms:**

## HPV Vaccine

Human Papillomavirus vaccine given at 11-12 years (can start at 9), with series completion by 15 years. Two-dose series if started before 15; three-dose series if started at 15 or older. Protects against HPV types causing cervical cancer, oropharyngeal cancer, and genital warts. Gardasil 9 covers nine HPV types.

**Synonyms:**

## HRT

Hormone replacement therapy uses estrogen, with a progestogen when needed, to treat selected menopausal symptoms caused by declining ovarian hormone production. It can relieve vasomotor and genitourinary symptoms and help prevent bone loss, but benefits and risks depend on the person's age, medical history, regimen, and duration of use.

**Synonyms:**

## Human Chorionic Gonadotropin

A glycoprotein hormone produced by trophoblast cells after implantation. Detectable in serum 8-11 days post-conception and in urine 12-14 days. Levels double approximately every 48-72 hours in early pregnancy, peaking at 8-11 weeks then plateauing.

**Synonyms:**

---

### Human immunodeficiency virus

A retrovirus belonging to the Lentivirus genus that causes acquired immunodeficiency syndrome (AIDS). HIV has two species: HIV-1 and HIV-2. The virus targets CD4+ T cells, macrophages, and dendritic cells. HIV has a complex genome encoding structural proteins, enzymes (reverse transcriptase, integrase, protease), and regulatory proteins.

**Synonyms:**

### Human microbiome

The collection of microorganisms that live on and in the human body. The microbiome includes bacteria, viruses, fungi, and archaea. The gut microbiome is the most studied and plays a role in digestion, immune function, and disease.

**Synonyms:**

### Human Papillomavirus

The most common STI, with over 100 types. High-risk types (16, 18) cause cervical, oropharyngeal, anal, and genital cancers. Low-risk types (6, 11) cause genital warts. Prevention: HPV vaccine (Gardasil 9) protects against 9 HPV types. Screening: Pap smear and HPV testing for cervical cancer prevention.

**Synonyms:**

### Human Placental Lactogen

A peptide hormone produced by the placenta that contributes to mammary-gland development and shifts maternal metabolism toward increased lipolysis and reduced insulin sensitivity during pregnancy. It supports nutrient availability for the fetus and contributes to physiologic gestational insulin resistance.

**Synonyms:**

### Humeroradial Joint

Between capitulum and radial head, allowing flexion-extension and contributing to pronation-supination via radial head rotation. Radial collateral ligament provides lateral stability. Capitulum has articular cartilage only anteriorly.

**Synonyms:**

### Humeroulnar Joint

Uniaxial hinge between trochlea and trochlear notch of the ulna, allowing only flexion/extension (0 to approximately 145 degrees). Ulnar collateral ligament is the primary valgus restraint. Trochlear notch provides inherent bony stability, making it the most congruent elbow joint.

**Synonyms:**

### Humerus

Single upper arm bone, the longest of the upper limb. Proximal end: head, anatomical/surgical necks, tubercles. Shaft: deltoid tuberosity, radial groove, epicondyles. Distal end: trochlea, capitulum, olecranon fossa. The surgical neck is the common fracture site potentially injuring the axillary nerve.

**Synonyms:**

### Humoral Immunity

The component of adaptive immunity mediated by antibodies produced by B lymphocytes (plasma cells) that neutralize extracellular pathogens and toxins. Humoral responses defend against bacteria, viruses outside cells, and parasites.

**Synonyms:**

### Hunger

Physiological drive to eat. Regulated by ghrelin, blood glucose, stomach distension. Psychological factors also influence.

**Synonyms:**

### Hungry Bone Syndrome

Severe hypocalcemia occurring after parathyroidectomy particularly in patients with severe preoperative hyperparathyroidism and high bone turnover. Rapid bone remineralization after removal of excess PTH sequesters calcium and phosphorus from the serum causing symptomatic hypocalcemia.

**Synonyms:**

### Hunter Syndrome

Mucopolysaccharidosis type II (MPS II), an X-linked recessive lysosomal storage disorder caused by iduronate-2-sulfatase deficiency (IDS gene mu-

---

tations). Accumulation of dermatan sulfate and heparan sulfate (same as Hurler).

**Synonyms:**

### Huntington Disease

Autosomal dominant neurodegenerative disorder caused by CAG trinucleotide repeat expansion in HTT gene. Onset: 30-50 years. Symptoms: chorea, dementia, psychiatric disease. Anticipation: earlier onset in successive generations (paternal transmission). No cure; symptomatic treatment.

**Synonyms:**

### Huntington's Disease

An autosomal dominant neurodegenerative disorder caused by a CAG trinucleotide repeat expansion in the huntingtin gene on chromosome 4p16.3. The disease is characterized by the triad of progressive chorea, cognitive decline, and psychiatric manifestations.

**Synonyms:**

### Huntington's Disease (Chorea)

An autosomal dominant neurodegenerative disorder caused by a CAG trinucleotide repeat expansion (>36 repeats, normally <26) in the HTT gene on chromosome 4 (4p16.3), which encodes the huntingtin protein.

**Synonyms:** Chorea

### Hurler Syndrome

Mucopolysaccharidosis type I (MPS I), the severe form, an autosomal recessive lysosomal storage disorder caused by alpha-L-iduronidase deficiency (IDUA gene mutations). Accumulation of dermatan sulfate and heparan sulfate leads to progressive multisystem involvement.

**Synonyms:**

### Hyaline Cartilage

The most common type of cartilage, containing fine type II collagen fibers in a firm, glassy matrix. It supports airways, covers articular surfaces, and forms much of the fetal skeleton and growth plates.

**Synonyms:**

### Hyaline Casts

Transparent colorless cylindrical structures composed primarily of Tamm-Horsfall protein secreted by the thick ascending limb. Most common type of urine cast. Normal in concentrated urine and after exercise. Increased in dehydration, prerenal states, and volume depletion.

**Synonyms:**

### Hyaline Membrane

A layer of protein-rich material lining damaged alveoli, classically seen in respiratory distress syndrome. It impairs gas exchange.

**Synonyms:**

### Hyaline Membrane Disease

An older name for neonatal respiratory distress syndrome, caused mainly by surfactant deficiency in premature infants. See Respiratory Distress Syndrome.

**Synonyms:**

### Hydatid cyst

A cyst caused by the larval stage of *Echinococcus granulosus*, a tapeworm transmitted from dogs to humans through ingestion of contaminated food. The liver is the most commonly affected organ, followed by the lungs. Cysts grow slowly and may become symptomatic from mass effect or rupture, causing anaphylaxis.

**Synonyms:**

### Hydatidiform Mole

A form of gestational trophoblastic disease in which abnormal trophoblastic tissue grows in the uterus. A complete mole has no viable fetus; a partial mole may contain abnormal fetal tissue. Both require follow-up because persistent disease can occur.

**Synonyms:**

### Hydranencephaly

A rare congenital condition where the cerebral hemispheres are nearly completely absent, replaced by thin-walled, fluid-filled sacs, while the brainstem, basal ganglia, and cerebellum are relatively pre-

---

served. Caused by bilateral internal carotid artery occlusion in utero (vascular insult, infection, or twin-twin transfusion).

**Synonyms:**

### Hydrocele

Hydrocele concerns hydrocele; its medical significance is established from the defining features, setting, associated findings, and clinical question. Congenital hydrocele results from patent processus vaginalis; acquired hydrocele may follow infection, trauma, or tumor. Transilluminates on examination. Ultrasound confirms fluid collection.

**Synonyms:**

### Hydrocephalus

Hydrocephalus concerns hydrocephalus; its medical significance is established from the defining features, setting, associated findings, and clinical question. leading to increased intracranial pressure. Communicating hydrocephalus: impaired CSF absorption (subarachnoid hemorrhage, meningitis, leptomeningeal carcinomatosis).

**Synonyms:**

### Hydrocolpos

Distension of the vagina with fluid due to obstruction of the vaginal outlet, often from an imperforate hymen or transverse septum, presenting as a pelvic mass in neonates or adolescents.

**Synonyms:**

### Hydrofluoric Acid Exposure

Contact with hydrofluoric acid, which can cause deep tissue injury and systemic fluoride toxicity, including dangerous low calcium and cardiac arrhythmias.

**Synonyms:**

### Hydrogen Bond

Weak electrostatic interaction between a hydrogen atom covalently bonded to an electronegative atom (N, O, F) and another electronegative atom. Critical for protein structure (alpha helix, beta sheet), DNA double helix (base pairing), enzyme-substrate

binding, and water properties (high boiling point, solvent properties).

**Synonyms:**

### Hydrogen Breath Test

Non-invasive test for carbohydrate malabsorption (lactose, fructose) and small intestinal bacterial overgrowth (SIBO). Patient ingests a substrate (lactose, glucose, or lactulose). Breath hydrogen is measured at baseline and q15-30 minutes for 2-3 hours. Rise in H<sub>2</sub> >20 ppm from baseline: positive (bacterial fermentation).

**Synonyms:**

### Hydronephrosis

Dilation of renal collecting system proximal to obstruction. Causes include stones, strictures, malignancy, and BPH. Graded on ultrasound from mild to severe. Prolonged obstruction leads to cortical thinning and renal failure. Bilateral more clinically significant. Urgent decompression required for obstructive uropathy with infection.

**Synonyms:**

### Hydrophobia

Painful spasms or fear triggered by attempts to drink, classically occurring in advanced rabies because of inflammation of the brain and nerves involved in swallowing.

**Synonyms:**

### Hydropneumothorax

The simultaneous presence of both fluid and air in the pleural space, causing respiratory distress and dullness to percussion with absent breath sounds, typically requiring chest tube drainage.

**Synonyms:**

### Hydrops Fetalis

Abnormal accumulation of fluid in two or more fetal compartments, including pleural effusion, pericardial effusion, ascites, and subcutaneous edema. Causes include Rh isoimmunization, chromosomal abnormalities, cardiac defects, infections (parvovirus B19), and twin-to-twin transfusion syn-

---

drome.

**Synonyms:**

### Hydrotherapy

Exercise in water using buoyancy, resistance, warmth. Benefits: reduced weight-bearing, improved circulation, pain relief, increased range of motion. Used for arthritis, spinal cord injury, amputation, neurological conditions.

**Synonyms:**

### Hydroxocobalamin

A cobalt-containing form of vitamin B12 used as an antidote for cyanide poisoning. It binds cyanide to form cyanocobalamin, which is excreted in urine; it can cause red discoloration of skin and body fluids and interfere with some laboratory tests.

**Synonyms:**

### Hymen

A thin fold of mucous membrane that partially covers the external opening of the vagina. The hymen is a remnant of fetal development, with no known physiological function in postnatal life.

**Synonyms:**

### Hyoid Bone

U-shaped bone in the anterior neck at C3, unique for not directly articulating with any other bone. Suspended by muscles and the stylohyoid ligament. Provides attachment for suprahyoid (digastric, stylohyoid, mylohyoid, geniohyoid) and infrahyoid (sternohyoid, sternothyroid, thyrohyoid, omohyoid) muscles.

**Synonyms:**

### Hyper-IgM Syndromes

A group of disorders characterized by normal or elevated IgM with low IgG, IgA, and IgE, due to defective class switch recombination (CSR) and somatic hypermutation (SHM).

**Synonyms:**

### Hyperaldosteronism

Hyperaldosteronism, also known as Conn syndrome

when caused by an adrenal adenoma, is characterized by excessive aldosterone production causing hypertension, hypokalemia, and metabolic alkalosis.

**Synonyms:** Conn syndrome when caused by an adrenal adenoma, is.

### Hyperaldosteronism Complications

Beyond hypertension and hypokalemia, primary hyperaldosteronism causes target organ damage including left ventricular hypertrophy, fibrosis, stroke, coronary artery disease, atrial fibrillation, and chronic kidney disease. These complications occur at higher rates than in essential hypertension of similar severity.

**Synonyms:**

### Hyperammonemia

An abnormally elevated concentration of ammonia in the blood. It may result from an inherited urea-cycle or organic-acid disorder, severe liver dysfunction, or other acquired causes and can produce encephalopathy, cerebral oedema, seizures, and coma.

**Synonyms:**

### Hyperbaric Oxygen Therapy

Administration of 100% oxygen at increased atmospheric pressure. Indications: carbon monoxide poisoning, decompression sickness, gas gangrene, necrotizing soft tissue infections, delayed radiation injury, crush injury, compromised grafts. Mechanism: increases dissolved oxygen, vasoconstriction, antimicrobial effect.

**Synonyms:**

### Hypercalcemia

Hypercalcemia is a medical condition involving hypercalcemia; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. mnemonic MALIGNANT: Myeloma, Metastases, Metabolic bone disease, Hyperparathyroidism, Adrenal insufficiency, Paget disease, Immobilization, Thiazide diuretics, Addison disease, Neonatal, Tumor-derived PTHrP.

**Synonyms:**

---

### Hypercalcemia of Malignancy

Elevated serum calcium caused by cancer, a common paraneoplastic and oncologic emergency. Mechanisms: PTHrP secretion (most common—squamous cell lung, breast, renal, ovarian), osteolytic metastases (breast, myeloma), 1,25-dihydroxyvitamin D (lymphoma), and ectopic PTH (rare).

**Synonyms:**

### Hypercapnia

An abnormally elevated arterial partial pressure of carbon dioxide, usually caused by alveolar hypoventilation. It may produce headache, somnolence, confusion, asterixis, respiratory acidosis, and, when severe or rapidly developing, coma.

**Synonyms:**

### Hypercholesterolemia

Elevated serum total cholesterol and LDL cholesterol levels, a major modifiable risk factor for atherosclerotic cardiovascular disease. It may be primary, due to familial hypercholesterolemia from LDL receptor mutations, or secondary to diet, obesity, hypothyroidism, or nephrotic syndrome.

**Synonyms:**

### Hypercoagulable State

Condition increasing thrombosis risk. Inherited: Factor V Leiden, prothrombin mutation, protein C/S deficiency, antithrombin deficiency. Acquired: cancer, pregnancy, oral contraceptives, antiphospholipid syndrome, myeloproliferative disorders.

**Synonyms:**

### Hypercyanotic Tetralogy

A complex congenital heart defect with four features: ventricular septal defect, overriding aorta, right ventricular outflow tract obstruction (pulmonary stenosis), and right ventricular hypertrophy. It causes right-to-left shunting and cyanosis. Treatment is surgical repair, typically in infancy.

**Synonyms:**

### Hyperemesis

Excessive or persistent vomiting that may cause de-

hydration, electrolyte abnormalities, and nutritional deficiency.

**Synonyms:**

### Hyperemesis Gravidarum

Severe, persistent nausea and vomiting during pregnancy resulting in weight loss greater than 5%, dehydration, electrolyte imbalances, and ketosis. Occurs in 0.3-2% of pregnancies, typically presenting in the first trimester. Differentiated from normal morning sickness by severity and metabolic derangement.

**Synonyms:**

### Hyperesthesia

Increased sensitivity to sensory stimulation—touch (tactile), pain (hyperalgesia), or other stimuli—so that normally non-painful or mildly painful stimuli produce exaggerated discomfort.

**Synonyms:**

### Hyperglycemia

Blood glucose above the expected range for the testing conditions. Acute hyperglycemia can cause osmotic diuresis, dehydration, and electrolyte disturbances. Chronic hyperglycemia leads to microvascular (retinopathy, nephropathy, neuropathy) and macrovascular complications.

**Synonyms:**

### Hypergonadotropic Hypogonadism

Primary testicular failure with elevated LH/FSH. Causes: Klinefelter syndrome, cryptorchidism, orchitis, chemotherapy, radiation.

**Synonyms:**

### Hyperhidrosis

Hyperhidrosis is a medical condition involving hyperhidrosis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. palms, soles, axillae, and face without underlying cause. Secondary generalized hyperhidrosis is caused by medications, endocrine disorders, infections, or malignancies.

**Synonyms:**

---

## Hyperkalemia

Serum potassium >5.0 mEq/L. ECG changes: peaked T waves, widened QRS, sine wave. Causes: renal failure, medications (ACE inhibitors, potassium-sparing diuretics), tissue breakdown, acidosis.

**Synonyms:**

## Hyperlipidemia

Elevated levels of lipids in the blood—total cholesterol, LDL, triglycerides, and/or reduced HDL—a major modifiable risk factor for atherosclerosis and cardiovascular disease. Primary (genetic: familial hypercholesterolemia) or secondary (hypothyroidism, diabetes, nephrotic syndrome, obesity, alcohol).

**Synonyms:**

## Hypermobile Ehlers-Danlos Syndrome

A heritable connective-tissue disorder characterized mainly by generalized joint hypermobility, instability, chronic musculoskeletal pain, and other variable features involving skin, autonomic function, or digestion. Diagnosis is clinical and requires assessment for other connective-tissue disorders and related conditions.

**Synonyms:**

## Hypernatremia

A serum sodium concentration above the reference range, usually reflecting too little free water relative to body sodium or, less often, excess sodium. Causes include impaired water intake, diabetes insipidus, osmotic diuresis, gastrointestinal losses, and sodium administration.

**Synonyms:**

## Hyperopia

A refractive error in which light focuses behind the retina when the eye is relaxed. See Farsightedness.

**Synonyms:**

## Hyperosmolar Hyperglycemic State

Hyperglycemic emergency characterized by severe hyperglycemia greater than 600 milligrams per

deciliter, hyperosmolality greater than 320 milliosmoles per kilogram, and profound dehydration without significant ketosis.

**Synonyms:**

## Hyperparathyroidism

Hyperparathyroidism is a medical condition involving hyperparathyroidism; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. parathyroid glands, classified as primary, secondary, or tertiary.

**Synonyms:**

## Hyperphosphatemia

A phosphate concentration above the laboratory reference range, often caused by impaired renal excretion, hypoparathyroidism, tumor lysis, rhabdomyolysis, or excess intake. Consequences may include secondary hyperparathyroidism, vascular/metastatic calcification, and when combined with hypocalcemia, tetany.

**Synonyms:**

## Hyperpigmentation

Darkening of the skin caused by increased melanin production, deposition of pigment in the dermis, or accumulation of other pigments.

**Synonyms:**

## Hyperplasia

Hyperplasia is a medical condition involving hyperplasia; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

## Hyperpolarization

A change in membrane potential to a more negative value, moving it further from threshold and making the cell less excitable. Occurs when potassium leaves the cell (opening of voltage-gated potassium channels, as in the afterhyperpolarization after an action potential) or when chloride enters (GABA-A receptor activation).

**Synonyms:**

---

### Hyperprolactinaemia

An abnormally elevated concentration of prolactin in the blood. Causes include medicines, pregnancy, hypothyroidism, pituitary tumors, and other disorders.

**Synonyms:**

### Hyperprolactinemia

Elevated serum prolactin levels most commonly caused by prolactin-secreting pituitary adenomas termed prolactinomas. Other causes include medications particularly antipsychotics and metoclopramide, hypothyroidism, stalk effect from non-functioning pituitary adenomas, renal failure, and chest wall lesions.

**Synonyms:**

### Hypersensitivity

An exaggerated or inappropriate immune response to an antigen, ranging from a mild reaction to anaphylaxis.

**Synonyms:**

### Hypersensitivity Pneumonitis

An immune-mediated lung disease from environmental antigen inhalation (molds, bird proteins). Acute, subacute, and chronic forms exist. HRCT shows ground-glass opacities, air trapping, and centrilobular nodules. Chronic HP progresses to fibrosis.

**Synonyms:**

### Hypersensitivity Reactions

Inappropriate or excessive immune responses causing tissue damage or disease.

**Synonyms:**

### Hypersensitivity Type I

Type I hypersensitivity, also known as immediate hypersensitivity or allergic reactions, is mediated by IgE antibodies and mast cells, producing symptoms within minutes of allergen re-exposure.

**Synonyms:** immediate hypersensitivity or allergic reactions,.

### Hypersensitivity Type II

Type II hypersensitivity, also known as cytotoxic hypersensitivity, is mediated by IgG or IgM antibodies directed against antigens on cell surfaces or the extracellular matrix, causing tissue damage through complement activation, antibody-dependent cellular cytotoxicity, and phagocytosis.

**Synonyms:** cytotoxic hypersensitivity, is mediated by IgG.

### Hypersensitivity Type III

Type III hypersensitivity is caused by deposition of antigen-antibody immune complexes in tissues and blood vessel walls, activating complement and recruiting neutrophils that release destructive enzymes and reactive oxygen species.

**Synonyms:**

### Hypersensitivity Type IV

Type IV hypersensitivity, also known as delayed-type hypersensitivity, is mediated by T lymphocytes rather than antibodies and takes 48 to 72 hours to develop after antigen exposure.

**Synonyms:** delayed-type hypersensitivity, is mediated by T.

### Hypertelorism

Increased distance between the orbits (the bony eye sockets), measured as an increased interorbital distance on imaging.

**Synonyms:**

### Hypertension

Persistently elevated arterial blood pressure. The diagnostic threshold depends on the guideline and the measurement method; diagnosis generally requires properly obtained readings on more than one occasion or other appropriate confirmation. It increases the risk of cardiovascular, cerebrovascular, and kidney disease.

**Synonyms:**

### Hypertension (High Blood Pressure)

Persistently elevated blood pressure, defined as systolic BP >130 mmHg or diastolic BP >80 mmHg

---

(ACC/AHA guidelines). See Hypertension.

**Synonyms:** High Blood Pressure

### **Hypertension in Anesthesia**

Hypertension during anesthesia causes increased bleeding, myocardial ischemia, and stroke risk. Common causes include light anesthesia, pain, hypercarbia, hypoxia, bladder distension, shivering, and drug withdrawal (beta-blockers, clonidine).

**Synonyms:**

### **Hypertensive**

Having blood pressure that is persistently above the accepted range for the clinical context.

**Synonyms:**

### **Hypertensive Crisis**

Severe elevation in blood pressure (SBP >180 or DBP >120) requiring urgent medical attention. Two types: hypertensive emergency (with end-organ damage) and hypertensive urgency (no acute end-organ damage). Hypertensive urgency: can be managed with oral antihypertensives (captopril, clonidine, labetalol) and careful outpatient follow-up.

**Synonyms:**

### **Hypertensive Emergency**

Severe hypertension (SBP >180 or DBP >120) with acute target organ damage. Organs involved: brain (hypertensive encephalopathy, stroke), heart (acute coronary syndrome, acute pulmonary edema, aortic dissection), kidneys (acute kidney injury), and eyes (papilledema).

**Synonyms:**

### **Hypertensive Heart Disease**

Left ventricular hypertrophy and diastolic/systolic dysfunction resulting from chronic hypertension. LVH is an independent cardiovascular risk factor and precursor to heart failure. Diagnosis by ECG (voltage criteria) or echocardiography (wall thickness >1.1 cm). Treatment of hypertension can regress LVH.

**Synonyms:**

### **Hypertensive Nephropathy**

Kidney damage caused by chronic hypertension, leading to nephrosclerosis (arteriolar hyalinosis and glomerulosclerosis). Presents with slowly progressive proteinuria (usually subnephrotic), hypertension, and gradual decline in kidney function. More common in African American patients. Diagnosis of exclusion.

**Synonyms:**

### **Hypertensive Nephrosclerosis**

Kidney damage from chronic hypertension. Benign form with hyaline arteriolosclerosis. Malignant form with hyperplastic arteriolosclerosis and onion-skinning. Second leading cause of ESRD after diabetes. Tight BP control with ACE inhibitors or ARBs essential to slow progression.

**Synonyms:**

### **Hypertensive Retinopathy**

Retinal changes caused by chronic or acute hypertension. Grading (Keith-Wagener-Barker): Grade I: generalized arteriolar narrowing; Grade II: arteriovenous nicking; Grade III: cotton-wool spots, flame hemorrhages, hard exudates; Grade IV: papilledema (malignant hypertension).

**Synonyms:**

### **Hyperthermia in Anesthesia**

Perioperative hyperthermia (temperature greater than 38 degrees Celsius) has multiple causes. Malignant hyperthermia (discussed separately) is the most urgent. Sepsis, thyroid storm, serotonin syndrome, neuroleptic malignant syndrome, and central fever are other causes.

**Synonyms:**

### **Hyperthermic Intraperitoneal Chemotherapy**

Heated chemotherapy circulated through the peritoneal cavity during surgery, following cytoreductive surgery, for peritoneal carcinomatosis from appendiceal, colorectal, and ovarian cancers and peritoneal mesothelioma.

**Synonyms:**

---

## Hyperthyroidism

Hyperthyroidism is a medical condition involving hyperthyroidism; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. resulting in thyrotoxicosis (elevated serum T4 and T3 concentrations).

**Synonyms:**

## Hyperthyroidism (Thyrotoxicosis)

A state in which excess thyroid hormone effect causes symptoms such as heat intolerance, sweating, tremor, weight loss, or rapid heartbeat. It may result from increased thyroid production or other causes of thyrotoxicosis.

**Synonyms:** Thyrotoxicosis

## Hypertonic Saline

Intravenous saline with a sodium concentration greater than plasma, commonly 3% sodium chloride. It is used selectively for severe symptomatic hyponatremia or other urgent indications, with careful monitoring to avoid overly rapid correction and osmotic demyelination.

**Synonyms:**

## Hypertonic Saline Inhalation

Nebulized 3–7% sodium chloride solution that draws water into the airway surface liquid by osmosis, improving mucociliary clearance. It is used in CF and bronchiectasis. It may cause bronchospasm and should be preceded by a bronchodilator. It reduces exacerbations in CF.

**Synonyms:**

## Hypertrichosis

Excessive hair growth in androgen-independent areas, affecting both sexes, either congenital or acquired. Generalized: genetic syndromes, medications (minoxidil, cyclosporine, phenytoin, glucocorticoids), malnutrition, porphyria, hypothyroidism, and malignancy (paraneoplastic).

**Synonyms:**

## Hypertriglyceridemia

Elevated serum triglyceride levels, classified as mild

at 150 to 499 mg per dL, moderate at 500 to 999, and severe above 1000. Severe hypertriglyceridemia increases the risk of acute pancreatitis. Causes include obesity, diabetes, alcohol use, and genetic disorders of lipoprotein metabolism.

**Synonyms:**

## Hypertrophic Cardiomyopathy

A disease in which the heart muscle, especially the left ventricle, becomes abnormally thick and stiff. It may obstruct blood flow, impair filling, cause chest pain or breathlessness, and increase the risk of arrhythmia and sudden death.

**Synonyms:**

## Hypertrophic Cardiomyopathy Genetics

HCM is caused by mutations in genes encoding sarcomeric proteins, most commonly beta-myosin heavy chain (MYH7) and myosin-binding protein C (MYBPC3). Inheritance is autosomal dominant with variable penetrance. Genetic testing identifies causative mutations in 40-60% of cases.

**Synonyms:**

## Hypertrophic Cardiomyopathy Treatment

Management may include medicines to relieve symptoms, treatment of arrhythmias or obstruction, an implantable defibrillator for selected patients, and surgery or ablation when indicated. Treatment is guided by symptoms, anatomy, risk, and specialist assessment.

**Synonyms:**

## Hypertrophic Pyloric Stenosis

Hypertrophy and hyperplasia of the pyloric muscle causing gastric outlet obstruction, typically in young infants. Progressive nonbilious projectile vomiting, hunger after vomiting, dehydration, and hypochloremic hypokalemic metabolic alkalosis may occur.

**Synonyms:**

## Hypertrophic Scar

Raised scar tissue confined to the original wound margins, caused by excessive collagen production

---

during healing. Unlike keloids, hypertrophic scars regress over time and do not extend beyond wound boundaries. They are common after burns, surgery, and trauma.

**Synonyms:**

### **Hypertrophy**

Increased cell size. Physiological (muscle) or pathological.

**Synonyms:**

### **Hyperventilation**

Hyperventilation is a medical condition involving hyperventilation; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. of arterial carbon dioxide (PaCO<sub>2</sub>) and respiratory alkalosis.

**Synonyms:**

### **Hyperventilation Syndrome**

Recurrent or persistent overbreathing that exceeds metabolic requirements, usually producing reduced arterial carbon dioxide and respiratory alkalosis in the absence of primary pulmonary disease. Symptoms may include breathlessness, chest tightness, dizziness, palpitations, paraesthesia, and carpopedal spasm.

**Synonyms:**

### **Hyphema**

Hyphema concerns hyphema; its medical significance is established from the defining features, setting, associated findings, and clinical question. resulting from blunt ocular trauma that tears the blood vessels of the iris or ciliary body.

**Synonyms:**

### **Hypnosis**

A state of focused attention, reduced peripheral awareness, and heightened suggestibility, resembling a trance-like state but distinct from sleep. Hypnosis is induced by a procedure (hypnotic induction) involving focused concentration, relaxation, and guided imagery.

**Synonyms:**

### **Hypnotic**

A medication that induces, maintains, or improves sleep, used for insomnia.

**Synonyms:**

### **Hypoactive Sexual Desire Disorder**

A sexual dysfunction characterized by persistently or recurrently deficient or absent sexual thoughts, fantasies, and desire for sexual activity, causing marked distress or interpersonal difficulty. In DSM-5, HSDD in women is merged with female sexual arousal disorder into female sexual interest/arousal disorder.

**Synonyms:**

### **Hypocalcemia**

Serum calcium less than 8.5 milligrams per deciliter or ionized calcium less than 4.5 milligrams per deciliter. Causes include hypoparathyroidism, vitamin D deficiency, hypomagnesemia, hyperphosphatemia, and critical illness.

**Synonyms:**

### **Hypocalcemia, hypophosphatemia, and hyperkalemia**

The classic electrolyte triad of acute hypoparathyroidism, most commonly occurring after thyroid or parathyroid surgery from inadvertent removal or devascularization of the parathyroid glands. Hypocalcemia causes tetany, paresthesias, and Chvostek and Trousseau signs.

**Synonyms:**

### **Hypodermis**

Subcutaneous tissue/superficial fascia, the deepest skin layer with loose connective tissue and adipose tissue. Attaches skin to underlying muscles/bones via fibrous septa. Provides thermal insulation, energy storage (fat), mechanical cushioning, and contains blood vessels, lymphatics, and nerves.

**Synonyms:**

### **Hypodontia**

Congenital absence of one or more teeth. Common: third molars, maxillary lateral incisors, second pre-

---

molars.

**Synonyms:**

### **Hypoesthesia**

Reduced sensitivity to touch, temperature, pain, or other sensations. It may result from nerve compression, neuropathy, spinal disease, stroke, injury, or other neurologic conditions; sudden or spreading numbness requires prompt assessment.

**Synonyms:**

### **Hypogammaglobulinemia**

A reduction in circulating immunoglobulins that predisposes to recurrent infections, especially with encapsulated bacteria; it may be inherited or acquired.

**Synonyms:**

### **Hypogastric Region**

Central inferior region below the umbilical region, containing the urinary bladder, sigmoid colon, rectum, and in females the uterus and ovaries. Assessed for bladder distension, uterine enlargement, and pelvic masses. Suprapubic pain may indicate cystitis, calculi, or pelvic pathology.

**Synonyms:**

### **Hypoglossal nerve injury**

Damage to the twelfth cranial nerve (CN XII), which innervates the ipsilateral intrinsic and extrinsic tongue muscles. Causes include skull base fractures, surgical trauma, tumors, or infection.

**Synonyms:**

### **Hypoglossal nerve palsy**

Weakness or paralysis of the hypoglossal nerve (CN XII), leading to ipsilateral tongue weakness, atrophy, and fasciculations. Causes include tumors at the skull base or in the hypoglossal canal, surgical injury, or central lesions. Unilateral palsy causes the tongue to deviate toward the affected side on protrusion.

**Synonyms:**

### **Hypoglycemia**

An abnormally low blood-glucose concentration that

may cause sweating, tremor, palpitations, hunger, confusion, seizures, or loss of consciousness. Causes include glucose-lowering medicines, missed meals, alcohol, and critical illness. Treatment depends on the person's ability to swallow and the cause; severe or recurrent episodes require urgent assessment.

**Synonyms:**

### **Hypoglycemia in Diabetes**

Blood glucose less than 70 milligrams per deciliter in patients with diabetes. Classification by level: level one less than 70, level two less than 54 which is clinically significant hypoglycemia, and level three severe hypoglycemia requiring assistance.

**Synonyms:**

### **Hypoglycemia Unawareness**

Loss of the warning symptoms of hypoglycemia including tremor, sweating, and palpitations occurring in patients with recurrent hypoglycemia particularly type one diabetes. Results from attenuated counter-regulatory hormone responses particularly impaired glucagon and epinephrine responses.

**Synonyms:**

### **Hypogonadism**

Hypogonadism is a medical condition involving hypogonadism; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. production. Male hypogonadism: low testosterone causing decreased libido, erectile dysfunction, infertility, reduced muscle mass, and osteoporosis. Female: estrogen deficiency causing amenorrhea, hot flashes, and osteoporosis.

**Synonyms:**

### **Hypogonadism in Men**

Testosterone deficiency resulting from inadequate testicular function classified as primary testicular failure or secondary hypothalamic-pituitary dysfunction. Primary causes include Klinefelter syndrome, cryptorchidism, orchitis, trauma, and chemotherapy.

**Synonyms:**

---

### **Hypogonadism in Women**

Testosterone deficiency in women causing decreased libido, fatigue, depressed mood, and reduced sense of well-being. Causes include oophorectomy, premature ovarian insufficiency, adrenal insufficiency, hypopituitarism, and medications.

**Synonyms:**

### **Hypogonadotropic Hypogonadism**

Secondary testicular failure with low/normal LH/FSH. Causes: Kallmann syndrome, pituitary tumors, obesity, medications, systemic illness.

**Synonyms:**

### **Hypohidrosis**

Reduced or absent sweating, leading to heat intolerance and risk of hyperthermia. Causes include autonomic neuropathy (diabetes, Parkinson disease), skin diseases (scleroderma, burns), medications (anticholinergics), and genetic disorders (hypohidrotic ectodermal dysplasia).

**Synonyms:**

### **Hypokalemia**

Serum potassium less than 3.5 mEq/L. Causes include gastrointestinal losses from vomiting and diarrhea, renal losses from diuretics, RTA, and hyperaldosteronism, intracellular shift from alkalosis and insulin, and inadequate intake.

**Synonyms:**

### **Hypomagnesemia**

Serum magnesium less than 1.7 milligrams per deciliter. Causes include gastrointestinal losses from diarrhea, renal losses from diuretics and alcohol, malnutrition, and medications including proton pump inhibitors.

**Synonyms:**

### **Hypomania**

Distinct period of abnormally elevated, expansive, or irritable mood with increased energy lasting at least four consecutive days, observable by others but without marked functional impairment, hospitalisation, or psychotic features.

**Synonyms:**

### **Hypomanic Episode**

A distinct period of abnormally elevated, expansive, or irritable mood with increased energy lasting at least four consecutive days. The episode is not severe enough to cause marked impairment in functioning or necessitate hospitalization, and there are no psychotic features. The change in functioning is observable by others.

**Synonyms:**

### **Hyponatremia**

Serum sodium less than 135 mEq/L. Most common electrolyte disorder in hospitalized patients. Causes are classified by volume status: hypovolemic from GI losses and diuretics, euvolemic from SIADH and hypothyroidism, and hypervolemic from heart failure, cirrhosis, and nephrotic syndrome.

**Synonyms:**

### **Hypoparathyroidism**

Hypoparathyroidism is a medical condition involving hypoparathyroidism; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. Most commonly occurs after thyroid or parathyroid surgery from inadvertent removal of parathyroid glands. Autoimmune hypoparathyroidism may occur alone or as part of autoimmune polyendocrine syndrome type one.

**Synonyms:**

### **Hypoparathyroidism Management**

Management aims to correct low calcium and inadequate parathyroid-hormone activity while avoiding complications. It may include calcium and active vitamin D, monitoring of calcium and kidney function, and treatment of the underlying cause; specialist guidance is often required.

**Synonyms:**

### **Hypophosphatemia**

Hypophosphatemia is a medical condition involving hypophosphatemia; causes, affected organs, severity, complications, and treatment are determined by clin-

---

ical assessment. intracellular shifting, or renal phosphate wasting. Severe deficiency can cause muscle weakness, respiratory failure, hemolysis, impaired myocardial function, and neurologic dysfunction.

**Synonyms:**

### **Hypopituitarism**

Hypopituitarism is a medical condition involving hypopituitarism; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. craniopharyngiomas, pituitary surgery or radiation, traumatic brain injury, or infiltrative diseases. Growth hormone deficiency is typically the first hormone lost followed by gonadotropins then TSH and ACTH.

**Synonyms:**

### **Hypoplasia**

Incomplete or underdevelopment of a tissue, organ, or body structure, resulting in reduced size or functional capacity. It may be congenital, developmental, genetic, or acquired and ranges from a mild anatomical variant to severe organ dysfunction.

**Synonyms:**

### **Hypoplastic Left Heart Syndrome**

A severe congenital heart defect where the left heart structures (mitral valve, left ventricle, aortic valve, ascending aorta) are underdeveloped and unable to support systemic circulation. The right ventricle pumps blood to both the pulmonary and systemic circulations via a patent ductus arteriosus.

**Synonyms:**

### **Hypopyon**

A layering of inflammatory cells (purulent exudate/leukocytes) in the anterior chamber of the eye, forming a visible white-to-yellow fluid level in the lower portion of the cornea. Caused by severe anterior uveitis (HLA-B27 spondyloarthropathies, Behçet disease), infectious keratitis (bacterial/fungal corneal ulcers), or endophthalmitis.

**Synonyms:**

### **Hyposmia**

Decreased sensitivity to odors in which olfaction is reduced but not absent, distinct from anosmia and parosmia, and the most common olfactory complaint.

**Synonyms:**

### **Hypospadias**

Hypospadias is a medical condition involving hypospadias; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. associated with a curved penis or an incomplete foreskin, and severity depends on the location of the opening and associated abnormalities.

**Synonyms:**

### **Hypotension**

Abnormally low blood pressure, generally systolic <90 mmHg or mean arterial pressure <65 mmHg. Causes include hypovolemia, cardiac failure, sepsis, anaphylaxis, and medications. Orthostatic hypotension is a drop upon standing. Severe hypotension (shock) requires urgent fluid resuscitation and vasopressors.

**Synonyms:**

### **Hypotension in Anesthesia**

Abnormally low blood pressure occurring during anesthesia. The clinically important threshold depends on the patient, baseline pressure, duration, and surgical context.

**Synonyms:**

### **Hypothalamic-Pituitary-Adrenal Axis (HPA Axis)**

An endocrine regulatory pathway in which hypothalamic corticotropin-releasing hormone stimulates pituitary ACTH secretion, which stimulates adrenal cortisol production. Cortisol exerts negative feedback and coordinates metabolic, immune, and stress responses.

**Synonyms:** HPA Axis

### **Hypothalamic-Pituitary-Adrenal Axis**

---

## Physiology

The hypothalamus releases CRH in a diurnal rhythm peaking in the early morning stimulating pituitary corticotrophs to secrete ACTH which stimulates the adrenal cortex to produce cortisol. Cortisol exerts negative feedback on both the hypothalamus and pituitary suppressing CRH and ACTH release.

**Synonyms:**

## Hypothalamic-Pituitary-Gonadal Axis Physiology

The hypothalamus releases GnRH in a pulsatile fashion stimulating pituitary gonadotrophs to secrete LH and FSH. In males LH stimulates Leydig cells to produce testosterone while FSH stimulates Sertoli cells to support spermatogenesis.

**Synonyms:**

## Hypothalamic-Pituitary-Thyroid Axis Physiology

The hypothalamus secretes TRH stimulating pituitary thyrotrophs to release TSH which stimulates the thyroid gland to produce T4 and T3. T3 the more biologically active form is produced by peripheral conversion of T4 by deiodinase enzymes.

**Synonyms:**

## Hypothalamus

Hypothalamus is a medical condition involving hypothalamus; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. walls, weighing approximately 4 grams, the master homeostasis regulator. Controls autonomic and endocrine systems (via the pituitary through the hypophyseal portal system), temperature, hunger, thirst, sleep-wake cycles, and emotion.

**Synonyms:**

## Hypothermia

Hypothermia is a medical condition involving hypothermia; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. severe (<28). J-wave (Osborn wave) on ECG. Management: passive rewarming (mild), active external rewarming (moderate), active internal rewarming (severe). Avoid rough handling (risk

of VF).

**Synonyms:**

## Hypothermia in Anesthesia

Hypothermia (core temperature less than 36 degrees Celsius) occurs in 50 to 80 percent of surgical patients due to anesthetic-induced thermoregulatory dysfunction and heat redistribution. Initial phase (first 30 to 60 minutes) involves core-to-peripheral heat redistribution causing 0.5 to 1.5 degree Celsius drop.

**Synonyms:**

## Hypothyroidism

Hypothyroidism is a medical condition involving hypothyroidism; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. percent in the general population and up to 20 percent in women over 60 years.

**Synonyms:**

## Hypotonia

Hypotonia is a medical condition involving hypotonia; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. floppy or poorly supported posture. It may result from muscle, peripheral nerve, neuromuscular-junction, spinal-cord, brain, genetic, or metabolic disorders and requires evaluation when persistent or associated with weakness or developmental delay.

**Synonyms:**

## Hypovolemic Shock

Circulatory failure caused by insufficient circulating blood or fluid volume, leading to reduced tissue perfusion. Causes include hemorrhage, severe dehydration, and fluid loss.

**Synonyms:**

## Hypoxemia

Abnormally low oxygen concentration in arterial blood. Causes include hypoventilation, ventilation-perfusion mismatch, shunting, impaired diffusion, and low inspired oxygen.

**Synonyms:**

---

## Hypoxia

Inadequate oxygen availability at the tissue level. It may result from low arterial oxygen, anemia, reduced blood flow, or impaired cellular oxygen use.

**Synonyms:**

## Hypoxic Cell Injury

Cellular injury caused by inadequate oxygen availability, reducing oxidative phosphorylation and ATP production. Causes include ischemia, hypoxemia, anemia, and impaired oxygen utilization; severity and duration determine reversibility.

**Synonyms:**

## Hypoxic Pulmonary Vasoconstriction

The unique response of pulmonary arterioles to low alveolar oxygen tension (PO<sub>2</sub> less than approximately 60 mmHg), causing vasoconstriction.

**Synonyms:**

## Hypoxic-Ischemic Brain Injury

Brain injury caused by inadequate oxygen delivery or cerebral blood flow. It may follow cardiac arrest, asphyxia, shock, respiratory failure, or severe hypoglycemia and can produce coma, seizures, cognitive impairment, or death.

**Synonyms:**

## Hysterectomy

Hysterectomy is surgical removal of the uterus, sometimes with the cervix, tubes, or ovaries, performed for conditions such as cancer, fibroids, bleeding, or prolapse. women after cesarean section in the United States.

**Synonyms:**

## Hysterectomy and Surgical Menopause

Hysterectomy is the surgical removal of the uterus, and when the ovaries are also removed (oophorectomy), it induces surgical menopause regardless of age.

**Synonyms:**

## Hysterosalpingo-Contrast-Sonography

An ultrasound-based technique for evaluating the

uterine cavity and fallopian tube patency. Sterile saline or contrast medium is injected through the cervix while transvaginal ultrasound is performed.

**Synonyms:**

## Hysterosalpingo-Contrast-Sonography (HyCoSy)

Ultrasound evaluation of tubal patency using contrast. Alternative to hysterosalpingography.

**Synonyms:** HyCoSy

## Hysterosalpingogram

An X-ray procedure used to evaluate the uterine cavity and fallopian tube patency. A radiopaque contrast medium is injected through the cervix, and serial X-ray images are taken as the contrast fills the uterine cavity and spills from the fallopian tubes.

**Synonyms:**

## Hysterosalpingography

Hysterosalpingography examines hysterosalpingography; interpretation depends on the specimen or body region, test method, reference range, and clinical question. through a cervical cannula. Used for infertility evaluation: assesses tubal patency (normal: contrast spills freely into peritoneal cavity), uterine cavity shape (fibroids, polyps, synechiae, Mullerian anomalies), and proximal/distal tubal occlusion.

**Synonyms:**

## Hallux Rigidus

Stiffness and painful loss of motion at the joint where the big toe meets the foot.

**Synonyms:**

## Hemarthrosis

Bleeding into a joint space.

**Synonyms:**

## Hemopericardium

Accumulation of blood in the sac surrounding the heart.

**Synonyms:**

---

**Hemoperitoneum**

Accumulation of blood in the abdominal cavity.

**Synonyms:**

**Hemorrhoid**

A swollen vein in the lower rectum or anus.

**Synonyms:**

**Herpes Encephalitis**

Inflammation of the brain caused by herpes simplex virus infection.

**Synonyms:**

**Heterotaxy Syndrome**

A congenital disorder in which internal organs are arranged abnormally and may have associated heart defects.

**Synonyms:**

**Hodgkin's Disease**

A cancer of the lymphatic system characterized by abnormal lymphocytes, including Reed-Sternberg cells.

**Synonyms:**

**Horner's Syndrome**

A group of findings caused by disruption of sympathetic nerves, including a drooping eyelid, a small pupil, and reduced sweating on one side of the face.

**Synonyms:**

**Hydrothorax**

An abnormal collection of clear fluid in the pleural space around a lung.

**Synonyms:**

**Hydroureter**

Abnormal enlargement of a ureter caused by impaired urine drainage.

**Synonyms:**

**Hyperacusis**

Abnormally increased sensitivity to ordinary sounds.

**Synonyms:**

**Hyperphagia**

Excessive hunger or food intake.

**Synonyms:**

**Hyperreflexia**

Exaggerated or overactive deep-tendon reflexes.

**Synonyms:**

**Hypersomnia**

Excessive daytime sleepiness or abnormally prolonged sleep.

**Synonyms:**

**Hyperthermia**

An abnormally high body temperature caused by excess heat production or impaired heat loss.

**Synonyms:**

**Hypophosphatasia**

A rare inherited disorder of bone and tooth mineralization caused by deficient tissue-nonspecific alkaline phosphatase.

**Synonyms:**

**Health Care Proxy**

A legal appointment authorizing another person to make healthcare decisions when a patient cannot make them.

**Synonyms:**

**High-Density Lipoprotein**

A lipoprotein that transports cholesterol in the blood and is commonly called HDL.

**Synonyms:** HDL.

**Hamstring Injury**

A strain or tear of one or more muscles or tendons at the back of the thigh.

**Synonyms:**

**Hand-Foot-and-Mouth Disease**

A contagious viral illness causing sores in the mouth and a rash on the hands and feet, usually in children.

**Synonyms:**

---

### **Heatstroke**

A life-threatening rise in body temperature caused by failure of the body's heat regulation.

**Synonyms:**

### **Heavy Menstrual Bleeding**

Menstrual bleeding that is unusually heavy or prolonged and interferes with daily activities.

**Synonyms:**

### **Hilar Cholangiocarcinoma**

A cancer of the bile ducts where the ducts leave the liver.

**Synonyms:**

### **Hip Labral Tear**

A tear in the ring of cartilage that surrounds the hip socket.

**Synonyms:**

### **Hemopoietic Stem Cell**

A stem cell that can develop into red blood cells, white blood cells, or platelets.

**Synonyms:**

### **Hemorrhagic Anemia**

Anemia caused by loss of blood.

**Synonyms:**

### **Hemosiderosis**

Excessive deposition of the iron-storage pigment hemosiderin in tissues.

**Synonyms:**

### **Hepatic Flexure**

The bend where the ascending colon becomes the transverse colon near the liver.

**Synonyms:**

### **Hepatitis D**

Liver inflammation caused by hepatitis D virus, which occurs only with hepatitis B infection.

**Synonyms:**

### **Hepatitis E**

Liver inflammation caused by hepatitis E virus, usually transmitted through contaminated food or water.

**Synonyms:**

### **Herniorrhaphy**

Surgical repair of a hernia.

**Synonyms:**

### **Hilum**

A depression or opening where blood vessels, nerves, ducts, or other structures enter or leave an organ.

**Synonyms:**

### **Hydrochloric Acid**

The acid in gastric juice that helps digest food and kill microorganisms.

**Synonyms:**

### **Formed Elements of Blood**

The cellular components of blood: red blood cells, white blood cells, and platelets.

**Synonyms:**

### **Hallux**

The great toe.

**Synonyms:**

### **Hematoma**

A localized collection of blood outside blood vessels, usually caused by injury or a bleeding disorder.

**Synonyms:**

### **Hematomyelia**

Bleeding into the spinal cord.

**Synonyms:**

### **Hemiballism**

A movement disorder causing sudden, large-amplitude, flinging movements on one side of the body, usually from a lesion involving the subthalamic region.

**Synonyms:**

---

## Hertz

The SI unit of frequency, equal to one cycle per second.

**Synonyms:**

## HER2 Inhibitor

A targeted cancer treatment that blocks signaling through human epidermal growth factor receptor 2 in cancers with HER2 overexpression or amplification.

**Synonyms:**

## Hypovolemia

A reduced volume of blood or other circulating fluid.

**Synonyms:**

## Homocysteine

An amino acid formed during methionine metabolism. Persistently elevated blood levels may occur with genetic, nutritional, renal, or other disorders.

**Synonyms:**

## Hyperpnea

Breathing that is deeper than normal and may also be faster, increasing overall ventilation.

**Synonyms:**

## Hypolipidemic Agent

A medication that lowers blood lipids such as cholesterol or triglycerides.

**Synonyms:**

## Hypopnea

Abnormally shallow or reduced breathing, especially when it occurs repeatedly during sleep.

**Synonyms:**

## Hypoproteinemia

An abnormally low concentration of proteins in the blood, often involving low albumin levels.

**Synonyms:**

## Hypoventilation

Hypoventilation is a medical condition involving hypoventilation; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

## Hematosi

The exchange of oxygen and carbon dioxide between alveolar air and pulmonary capillary blood, resulting in oxygenation of the blood.

**Synonyms:**

## Hesselbach Triangle

A weak area of the anterior abdominal wall bounded by the lateral border of the rectus abdominis, the inferior epigastric vessels, and the inguinal ligament; direct inguinal hernias pass through it.

**Synonyms:**

## Homans Sign

Calf pain elicited by forced ankle dorsiflexion, historically associated with deep-vein thrombosis but insufficiently accurate for diagnosis and not recommended as a standalone test.

**Synonyms:**

## Hyperlordotic Posture

An exaggerated inward curvature of the lumbar spine, often producing increased anterior pelvic tilt and a prominent lower-back arch.

**Synonyms:**

## Hantavirus Infection

A zoonotic viral infection acquired mainly through inhalation of contaminated rodent excreta. It may cause hemorrhagic fever with renal syndrome or hantavirus pulmonary syndrome, which can progress rapidly to respiratory failure.

**Synonyms:**

## High-Altitude Pulmonary Edema

A potentially fatal accumulation of fluid in the lungs after rapid ascent to high altitude, characterized by breathlessness, cough, reduced exercise tolerance,

---

and sometimes frothy sputum. Immediate descent and oxygen are essential.

**Synonyms:**

### **Hysteroscopy**

Hysteroscopy examines hysteroscopy; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Hyperuricemia**

An abnormally high concentration of uric acid in the blood, which may be asymptomatic or contribute to gout and uric-acid kidney stones.

**Synonyms:**

### **Haemoglobinuria (Hemoglobinuria)**

The presence of free hemoglobin in the urine, often causing red or dark-brown discoloration. It may result from intravascular hemolysis or other blood disorders.

**Synonyms:** Hemoglobinuria

### **Haemorrhagic Disease of the Newborn (Vitamin K Deficiency Bleeding)**

Bleeding in a newborn or young infant caused by inadequate vitamin K-dependent clotting activity. It may occur early, classically, or late and can involve the brain or gastrointestinal tract.

**Synonyms:** Vitamin K Deficiency Bleeding

### **Heart-Lung Machine (Cardiopulmonary Bypass Machine)**

A device that temporarily takes over the pumping and gas-exchange functions of the heart and lungs during selected cardiac operations.

**Synonyms:** Cardiopulmonary Bypass Machine

### **Heart Transplantation**

Surgical replacement of a failing heart with a donor heart, usually for selected patients with advanced heart failure who meet specialist criteria.

**Synonyms:**

### **Heredity**

The transmission of genetic characteristics from parents to offspring through genes and chromosomes.

**Synonyms:**

### **Human Leukocyte Antigen (HLA)**

A group of cell-surface proteins encoded by genes in the major histocompatibility complex. HLA molecules present antigens to T cells and are important in immune responses and tissue matching for transplantation.

**Synonyms:** HLA

### **Hydrosalpinx**

Dilatation of a fallopian tube caused by accumulation of clear fluid, usually after inflammation, infection, endometriosis, or previous pelvic surgery. It may affect fertility.

**Synonyms:**

### **Hypopharynx**

The lower part of the pharynx behind and beside the larynx, extending from the oropharynx to the esophagus. It directs food toward the esophagus during swallowing.

**Synonyms:**

### **Hypophysis (Pituitary Gland)**

An endocrine gland at the base of the brain that regulates growth, thyroid and adrenal function, reproduction, lactation, and water balance through its hormones.

**Synonyms:** Pituitary Gland

### **Hysterotomy**

A surgical incision into the uterus, performed in selected obstetric or gynecologic procedures.

### **habit**

habit refers to habit, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **haemophilus aegyptius**

haemophilus aegyptius identifies haemophilus aegyptius, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **haemophilus haemolyticus**

haemophilus haemolyticus identifies haemophilus haemolyticus, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **haemophilus infections**

haemophilus infections identifies haemophilus infections, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **haemophilus paragallinarum**

haemophilus paragallinarum identifies haemophilus paragallinarum, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **haemophilus parainfluenzae**

haemophilus parainfluenzae is a virus or viral group associated with haemophilus parainfluenzae; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **haemophilus somnus**

haemophilus somnus identifies haemophilus somnus, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **haemophilus vaccine**

haemophilus vaccine identifies haemophilus vaccine, a biological taxon or infectious-disease concept

whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **hafnia**

hafnia identifies hafnia, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **hafnia alvei**

hafnia alvei identifies hafnia alvei, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **hair**

hair refers to hair, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hair disease**

hair disease denotes a clinical condition or finding involving hair disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **halcinonide**

halcinonide refers to halcinonide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **half-brother**

half-brother refers to half-brother, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **half-sibling**

half-sibling refers to half-sibling, a medical condition

---

or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **half-sister**

half-sister refers to half-sister, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **Hallermann's syndrome**

Hallermann's syndrome denotes a clinical condition or finding involving hallermann's syndrome; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **hallucinogen**

hallucinogen refers to hallucinogen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hallux varus**

hallux varus refers to hallux varus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **halobacillus**

halobacillus is a microorganism or microbial group associated with halobacillus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **halobacteriaceae**

halobacteriaceae is a microorganism or microbial group associated with halobacteriaceae; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **halofenate**

halofenate refers to halofenate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **halofuginone hydrobromide**

halofuginone hydrobromide refers to halofuginone hydrobromide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **halogen**

halogen refers to halogen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **halogenation**

halogenation refers to halogenation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **haloperidol**

haloperidol refers to haloperidol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **halothane**

halothane refers to halothane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hamartomatous polyposis**

hamartomatous polyposis refers to hamartomatous polyposis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**hand**

hand refers to hand, an anatomical or physiologic concept used to describe a body structure, process, or function.

**Synonyms:**

**hand deformity**

hand deformity refers to hand deformity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hannaella luteola**

hannaella luteola refers to hannaella luteola, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hanseniaspora**

hanseniaspora identifies hanseniaspora, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**hanseniaspora uvarum**

hanseniaspora uvarum identifies hanseniaspora uvarum, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**hanseniaspora valbyensis**

hanseniaspora valbyensis identifies hanseniaspora valbyensis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**haploidentical donor**

haploidentical donor refers to haploidentical donor, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**haploidy**

haploidy refers to haploidy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**haptén**

haptén refers to haptén, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**haptoglobin analyses**

haptoglobin analyses refers to haptoglobin analyses, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**haptoglobin decreased**

haptoglobin decreased refers to haptoglobin decreased, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hard palate**

hard palate refers to hard palate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**harderian gland**

harderian gland refers to harderian gland, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hardness**

hardness refers to hardness, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **harringtonines**

harringtonines refers to harringtonines, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **Hashimoto disease**

Hashimoto disease denotes a clinical condition or finding involving hashimoto disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **hashitoxicosis**

hashitoxicosis denotes an infectious or toxic condition involving hashitoxicosis; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

### **head**

head refers to head, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **head movement**

head movement refers to head movement, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **health**

health refers to health, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **health care**

health care refers to health care, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **health care facility**

health care facility refers to health care facility, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **health care personnel**

health care personnel refers to health care personnel, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **health education**

health education refers to health education, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **health insurance**

health insurance refers to health insurance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **health service**

health service refers to health service, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **health services research**

health services research refers to health services research, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **health status**

health status refers to health status, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### health survey

health survey refers to health survey, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### health workforce

health workforce refers to health workforce, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### healthy

healthy refers to healthy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hearing

hearing refers to hearing, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hearing disorder

hearing disorder denotes a clinical condition or finding involving hearing disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### hearing test

hearing test is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat hearing test.

**Synonyms:**

### heart aneurysm

heart aneurysm refers to heart aneurysm, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### heart catheterization

heart catheterization refers to heart catheterization, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### heart contraction

heart contraction refers to heart contraction, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### heart injury

heart injury denotes a clinical condition or finding involving heart injury; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### heart neoplasm

heart neoplasm denotes a neoplastic condition involving heart neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### heart rhythm

heart rhythm refers to heart rhythm, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### heart septum

heart septum refers to heart septum, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### heart tamponade

heart tamponade refers to heart tamponade, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### heart valve disorder

heart valve disorder denotes a clinical condition or finding involving heart valve disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### heart ventricle

heart ventricle refers to heart ventricle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### heat shock protein

heat shock protein denotes heat shock protein, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### Heberden's node

Heberden's node refers to heberden's node, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hedgehog proteins

hedgehog proteins denotes hedgehog proteins, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### height

height refers to height, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hela cell

hela cell denotes hela cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### helcococcus

helcococcus is a microorganism or microbial group associated with helcococcus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### helcococcus kunzii

helcococcus kunzii is a microorganism or microbial group associated with helcococcus kunzii; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### helcococcus pyogenes

helcococcus pyogenes is a microorganism or microbial group associated with helcococcus pyogenes; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### helcococcus sueciensis

helcococcus sueciensis is a microorganism or microbial group associated with helcococcus sueciensis; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### helicase

helicase refers to helicase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### helicobacter

helicobacter is a microorganism or microbial group associated with helicobacter; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### helicobacter cinaedi

helicobacter cinaedi is a microorganism or microbial group associated with helicobacter cinaedi; clinical relevance depends on pathogenicity, exposure, site,

---

and antimicrobial susceptibility.

**Synonyms:**

### **helicobacter felis**

helicobacter felis is a microorganism or microbial group associated with helicobacter felis; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **helicobacter fennelliae**

helicobacter fennelliae is a microorganism or microbial group associated with helicobacter fennelliae; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **helicobacter mustelae**

helicobacter mustelae is a microorganism or microbial group associated with helicobacter mustelae; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **helicobacter rappini**

helicobacter rappini is a microorganism or microbial group associated with helicobacter rappini; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **helicobacteraceae**

helicobacteraceae is a microorganism or microbial group associated with helicobacteraceae; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **helium**

helium refers to helium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **heller myotomy**

heller myotomy refers to heller myotomy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **helminth**

helminth refers to helminth, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **helminthiasis**

helminthiasis refers to helminthiasis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **helper virus**

helper virus is a virus or viral group associated with helper virus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **hemagglutination test**

hemagglutination test is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat hemagglutination test.

**Synonyms:**

### **hemagglutinin**

hemagglutinin refers to hemagglutinin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hemangioendothelioma**

hemangioendothelioma refers to hemangioendothelioma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### hemangiopericytoma

hemangiopericytoma refers to hemangiopericytoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hematocolpos

hematocolpos refers to hematocolpos, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hematogenous

hematogenous refers to hematogenous, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hematologic agents

hematologic agents refers to hematologic agents, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hematologic response

hematologic response refers to hematologic response, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### Hematological Disease

Hematological Disease denotes a clinical condition or finding involving hematological disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### hematologist

hematologist refers to hematologist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hematopoietic growth factor

hematopoietic growth factor refers to hematopoietic growth factor, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hematopoietic neoplasm

hematopoietic neoplasm denotes a neoplastic condition involving hematopoietic neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### hematopoietic system

hematopoietic system refers to hematopoietic system, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hematoporphyrin derivative

hematoporphyrin derivative refers to hematoporphyrin derivative, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hematosalpinx

hematosalpinx refers to hematosalpinx, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hematoxylin

hematoxylin denotes an infectious or toxic condition involving hematoxylin; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

### heme

heme refers to heme, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**hemerythrin**

hemerythrin refers to hemerythrin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hemianopsia**

hemianopsia refers to hemianopsia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hemidesmosome**

hemidesmosome refers to hemidesmosome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hemifacial atrophy**

hemifacial atrophy refers to hemifacial atrophy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hemihypertrophy**

hemihypertrophy refers to hemihypertrophy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hemilaryngectomy**

hemilaryngectomy is used in relation to hemilaryngectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**hemimandibulectomy**

hemimandibulectomy is used in relation to hemimandibulectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**hemimegalencephaly**

hemimegalencephaly refers to hemimegalencephaly, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hemimelia**

hemimelia refers to hemimelia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hemipelvectomy**

hemipelvectomy is used in relation to hemipelvectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**hemispherectomy**

hemispherectomy is used in relation to hemispherectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**hemisternebra**

hemisternebra refers to hemisternebra, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hemivertebrae**

hemivertebrae refers to hemivertebrae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hemocyanin**

hemocyanin refers to hemocyanin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### hemocytometer

hemocytometer refers to hemocytometer, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemodialysis clearance

hemodialysis clearance refers to hemodialysis clearance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemodialysis solution

hemodialysis solution refers to hemodialysis solution, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemodynamics

hemodynamics refers to hemodynamics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemoglobin A

hemoglobin A refers to hemoglobin a, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemoglobin C

hemoglobin C refers to hemoglobin c, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemoglobin H

hemoglobin H refers to hemoglobin h, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemoglobin increased

hemoglobin increased refers to hemoglobin increased, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemoglobin M

hemoglobin M refers to hemoglobin m, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemoglobin S

hemoglobin S refers to hemoglobin s, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemoglobin trait

hemoglobin trait refers to hemoglobin trait, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemoglobinuria

hemoglobinuria refers to hemoglobinuria, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemolymph

hemolymph refers to hemolymph, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemolysin

hemolysin refers to hemolysin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### hemolytic index

hemolytic index refers to hemolytic index, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemopexin

hemopexin refers to hemopexin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemophilus

hemophilus refers to hemophilus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemophilus ducreyi

hemophilus ducreyi refers to hemophilus ducreyi, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemopoietic tissue

hemopoietic tissue refers to hemopoietic tissue, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemoprotein

hemoprotein denotes hemoprotein, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### hemorrhagic disorder

hemorrhagic disorder denotes a clinical condition or finding involving hemorrhagic disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### hemorrhoidal hemorrhage

hemorrhoidal hemorrhage denotes a clinical condition or finding involving hemorrhoidal hemorrhage; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### hemospermia

hemospermia refers to hemospermia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemostasis valve

hemostasis valve refers to hemostasis valve, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hemostatic agent

hemostatic agent refers to hemostatic agent, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hempa

hempa refers to hempa, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### henipavirus

henipavirus is a virus or viral group associated with henipavirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### hepadnaviridae

hepadnaviridae identifies hepadnaviridae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

---

### heparan sulfate

heparan sulfate refers to heparan sulfate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### heparin binding

heparin binding refers to heparin binding, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### heparin lyase

heparin lyase refers to heparin lyase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hepatic

hepatic refers to hepatic, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hepatic artery

hepatic artery refers to hepatic artery, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hepatic fissure

hepatic fissure refers to hepatic fissure, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hepatic lamina

hepatic lamina refers to hepatic lamina, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hepatic necrosis

hepatic necrosis refers to hepatic necrosis, a medical

condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hepatitis G virus

hepatitis G virus is a virus or viral group associated with hepatitis g virus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### hepatitis virus

hepatitis virus is a virus or viral group associated with hepatitis virus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### hepatobiliary system

hepatobiliary system refers to hepatobiliary system, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hepatocellular adenoma

hepatocellular adenoma denotes hepatocellular adenoma, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### hepatocyte

hepatocyte refers to hepatocyte, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hepatodiaphragmatic nodule

hepatodiaphragmatic nodule refers to hepatodiaphragmatic nodule, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### hepatolenticular degeneration

hepatolenticular degeneration denotes hepatolenticular degeneration, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### hepatovirus

hepatovirus is a virus or viral group associated with hepatovirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### hepcidin

hepcidin refers to hepcidin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### herbal supplement

herbal supplement refers to herbal supplement, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### herbaspirillum

herbaspirillum identifies herbaspirillum, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### herbaspirillum huttiense

herbaspirillum huttiense identifies herbaspirillum huttiense, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### herbicide

herbicide refers to herbicide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hereditary

hereditary refers to hereditary, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hereditary coproporphyria

hereditary coproporphyria refers to hereditary coproporphyria, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hereditary elliptocytosis

hereditary elliptocytosis refers to hereditary elliptocytosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hereditary hyperbilirubinemia

hereditary hyperbilirubinemia refers to hereditary hyperbilirubinemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### Hermanski-Pudlak syndrome

Hermanski-Pudlak syndrome denotes a clinical condition or finding involving hermannski-pudlak syndrome; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### hermaphroditism

hermaphroditism refers to hermaphroditism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### heroin

heroin refers to heroin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### heroin dependence

heroin dependence refers to heroin dependence, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### herpes labialis

herpes labialis refers to herpes labialis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### herpesviridae

herpesviridae is a virus or viral group associated with herpesviridae; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### herpesviridae infection

herpesviridae infection is a virus or viral group associated with herpesviridae infection; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### herpesvirus saimiri

herpesvirus saimiri is a virus or viral group associated with herpesvirus saimiri; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### hesperidin

hesperidin refers to hesperidin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### heterochromatin

heterochromatin refers to heterochromatin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### heterocyclic amine

heterocyclic amine refers to heterocyclic amine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### heterocyclic compound

heterocyclic compound refers to heterocyclic compound, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### heteroduplex analysis

heteroduplex analysis refers to heteroduplex analysis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### heterogeneity

heterogeneity denotes heterogeneity, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### heterogeneous echotexture

heterogeneous echotexture denotes heterogeneous echotexture, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### heterophile antibody

heterophile antibody concerns heterophile antibody, a biologic or physiologic concept used in research, laboratory medicine, and the explanation of disease.

**Synonyms:**

### heterophyes heterophyes

heterophyes heterophyes refers to heterophyes heterophyes, a medical condition or clinical finding defined by its features, causes, affected system, and

---

patient context.

**Synonyms:**

### **heterosexuality**

heterosexuality refers to heterosexuality, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **heterozygote**

heterozygote refers to heterozygote, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hexachlorobenzene**

hexachlorobenzene refers to hexachlorobenzene, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hexachlorophene**

hexachlorophene refers to hexachlorophene, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hexadecadienoic acid**

hexadecadienoic acid denotes hexadecadienoic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **hexadecatetraenoic acid**

hexadecatetraenoic acid denotes hexadecatetraenoic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **hexadecatrienoic acid**

hexadecatrienoic acid denotes hexadecatrienoic acid,

a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **hexamethonium compounds**

hexamethonium compounds refers to hexamethonium compounds, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hexanoic acid**

hexanoic acid denotes hexanoic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **hexestrol**

hexestrol refers to hexestrol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hexose**

hexose refers to hexose, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hexylresorcinol**

hexylresorcinol refers to hexylresorcinol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hibernation**

hibernation denotes hibernation, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

---

**hibernoma**

hibernoma refers to hibernoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hiccup**

hiccup refers to hiccup, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hidrocystoma**

hidrocystoma refers to hidrocystoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**high-pitched cry**

high-pitched cry refers to high-pitched cry, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hilar**

hilar refers to hilar, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hind**

hind refers to hind, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hip**

hip refers to hip, an anatomical or physiologic concept used to describe a body structure, process, or function.

**Synonyms:**

**hip circumference**

hip circumference refers to hip circumference, a

medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hip injury**

hip injury denotes a clinical condition or finding involving hip injury; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**hirudin**

hirudin refers to hirudin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hirudins**

hirudins refers to hirudins, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hirudo medicinalis**

hirudo medicinalis refers to hirudo medicinalis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**histamine degradation**

histamine degradation refers to histamine degradation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**histamine receptor**

histamine receptor denotes histamine receptor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

---

**histamine release**

histamine release refers to histamine release, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**histidine**

histidine refers to histidine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**histidine decarboxylase**

histidine decarboxylase refers to histidine decarboxylase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**histidinemia**

histidinemia refers to histidinemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**histiocytic sarcoma**

histiocytic sarcoma denotes a neoplastic condition involving histiocytic sarcoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**histiocyoma**

histiocyoma refers to histiocyoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**histocompatibility**

histocompatibility refers to histocompatibility, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**histocompatibility testing**

histocompatibility testing is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat histocompatibility testing.

**Synonyms:**

**histogenesis**

histogenesis denotes histogenesis, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**histological techniques**

histological techniques refers to histological techniques, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**histology cassette**

histology cassette refers to histology cassette, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**histone**

histone refers to histone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**histone acetylation**

histone acetylation refers to histone acetylation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**histone acetyltransferase**

histone acetyltransferase refers to histone acetyltransferase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### histone deacetylases

histone deacetylases refers to histone deacetylases, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### histone deacetylation

histone deacetylation refers to histone deacetylation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### histone modification

histone modification refers to histone modification, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### histopathologic grade

histopathologic grade refers to histopathologic grade, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### histophilus

histophilus identifies histophilus, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### histoplasma

histoplasma identifies histoplasma, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### hiv antibodies

hiv antibodies refers to hiv antibodies, a medical condition or clinical finding defined by its features,

causes, affected system, and patient context.

**Synonyms:**

### hiv seropositivity

hiv seropositivity refers to hiv seropositivity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hla antigen

hla antigen refers to hla antigen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hmgb proteins

hmgb proteins denotes hmgb proteins, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### hmgn proteins

hmgn proteins denotes hmgn proteins, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### holdemia

holdemia identifies holdemia, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### holdemia filiformis

holdemia filiformis identifies holdemia filiformis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

---

### **holography**

holography refers to holography, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **holorachischisis**

holorachischisis refers to holorachischisis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **holter electrocardiography**

holter electrocardiography refers to holter electrocardiography, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **home environment**

home environment refers to home environment, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **home health care**

home health care refers to home health care, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **home hospice**

home hospice refers to home hospice, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **homelessness**

homelessness refers to homelessness, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **homeobox gene**

homeobox gene denotes homeobox gene, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **homeodomain proteins**

homeodomain proteins denotes homeodomain proteins, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **homeopathy**

homeopathy refers to homeopathy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **homicide**

homicide refers to homicide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **Homo sapiens**

Homo sapiens refers to homo sapiens, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **homologous recombination**

homologous recombination refers to homologous recombination, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **homologous transplantation**

homologous transplantation refers to homologous transplantation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **homosexuality**

homosexuality refers to homosexuality, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **homovanillic acid**

homovanillic acid denotes homovanillic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **homozygote**

homozygote refers to homozygote, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hoof wall**

hoof wall refers to hoof wall, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hope**

hope refers to hope, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hordeolum**

hordeolum refers to hordeolum, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hormone inhibitor**

hormone inhibitor denotes hormone inhibitor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **hormone receptor**

hormone receptor denotes hormone receptor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **horseradish peroxidase**

horseradish peroxidase refers to horseradish peroxidase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hospice care**

hospice care refers to hospice care, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hospital**

hospital refers to hospital, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hospital administration**

hospital administration refers to hospital administration, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hospitalization**

hospitalization refers to hospitalization, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **host cell**

host cell denotes host cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

---

**hostility**

hostility refers to hostility, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hounsfield unit**

hounsfield unit refers to hounsfield unit, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hour**

hour refers to hour, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**household**

household refers to household, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**housing humidity**

housing humidity refers to housing humidity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**housing type**

housing type refers to housing type, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**human calcitonin**

human calcitonin refers to human calcitonin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**human embryo**

human embryo refers to human embryo, a medical

condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**human gastrin**

human gastrin refers to human gastrin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**human genome**

human genome refers to human genome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**human herpesvirus 6**

human herpesvirus 6 is a virus or viral group associated with human herpesvirus 6; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**human herpesvirus 8**

human herpesvirus 8 is a virus or viral group associated with human herpesvirus 8; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**human metapneumovirus**

human metapneumovirus is a virus or viral group associated with human metapneumovirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**human nociceptin**

human nociceptin refers to human nociceptin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**humeral epicondyle**

humeral epicondyle refers to humeral epicondyle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**humeral fracture**

humeral fracture denotes a clinical condition or finding involving humeral fracture; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**humidity**

humidity refers to humidity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hurthle cell**

hurthle cell denotes hurthle cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**husband**

husband refers to husband, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hyaline**

hyaline refers to hyaline, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hyaloid canal**

hyaloid canal refers to hyaloid canal, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hyaluronoglucosaminidase**

hyaluronoglucosaminidase refers to hyaluronoglucosaminidase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hybridoma**

hybridoma refers to hybridoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hycanthone**

hycanthone refers to hycanthone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hydralazine**

hydralazine refers to hydralazine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hydrarthrosis**

hydrarthrosis refers to hydrarthrosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hydration**

hydration refers to hydration, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**hydrazine**

hydrazine refers to hydrazine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### hydrazine sulfate

hydrazine sulfate refers to hydrazine sulfate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrazines

hydrazines refers to hydrazines, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrazones

hydrazones refers to hydrazones, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydroa vacciniforme

hydroa vacciniforme refers to hydroa vacciniforme, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrobiology

hydrobiology refers to hydrobiology, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrocarbon

hydrocarbon refers to hydrocarbon, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrocephalus acquired

hydrocephalus acquired refers to hydrocephalus acquired, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrochlorothiazide

hydrochlorothiazide refers to hydrochlorothiazide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrocodone

hydrocodone refers to hydrocodone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrocodone bitartrate

hydrocodone bitartrate refers to hydrocodone bitartrate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydroflumethiazide

hydroflumethiazide refers to hydroflumethiazide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrogen

hydrogen refers to hydrogen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrogen cyanide

hydrogen cyanide refers to hydrogen cyanide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrogen peroxide

hydrogen peroxide refers to hydrogen peroxide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### hydrogen sulfide

hydrogen sulfide refers to hydrogen sulfide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrogenase

hydrogenase refers to hydrogenase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrogen-ion concentration

hydrogen-ion concentration refers to hydrogen-ion concentration, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrolase

hydrolase refers to hydrolase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrolysis

hydrolysis refers to hydrolysis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydrolyzable tannin

hydrolyzable tannin refers to hydrolyzable tannin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydromorphone

hydromorphone refers to hydromorphone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydromyelia

hydromyelia refers to hydromyelia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydroxamic acid

hydroxamic acid denotes hydroxamic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### hydroxybenzoate

hydroxybenzoate refers to hydroxybenzoate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydroxychloroquine

hydroxychloroquine refers to hydroxychloroquine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydroxycholesterols

hydroxycholesterols refers to hydroxycholesterols, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydroxyl group

hydroxyl group refers to hydroxyl group, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydroxyl radical

hydroxyl radical refers to hydroxyl radical, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### hydroxylamines

hydroxylamines refers to hydroxylamines, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydroxylation

hydroxylation refers to hydroxylation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydroxyproline

hydroxyproline refers to hydroxyproline, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydroxyprolinemia

hydroxyprolinemia refers to hydroxyprolinemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydroxysteroid

hydroxysteroid refers to hydroxysteroid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydroxyurea

hydroxyurea refers to hydroxyurea, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hydroxyzine

hydroxyzine refers to hydroxyzine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### Hydrozoa

Hydrozoa identifies hydrozoa, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### hygiene

hygiene refers to hygiene, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hymenolepiasis

hymenolepiasis refers to hymenolepiasis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hymenolepis diminuta

hymenolepis diminuta identifies hymenolepis diminuta, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### hymenolepis nana

hymenolepis nana identifies hymenolepis nana, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### hymenoptera

hymenoptera identifies hymenoptera, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### hyoscyamine

hyoscyamine refers to hyoscyamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### hyperactivity

hyperactivity refers to hyperactivity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperamylasemia

hyperamylasemia refers to hyperamylasemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperargininemia

hyperargininemia refers to hyperargininemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperbaric chamber

hyperbaric chamber refers to hyperbaric chamber, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperbilirubinemia

hyperbilirubinemia refers to hyperbilirubinemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hypercalciuria

hypercalciuria refers to hypercalciuria, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hypercementosis

hypercementosis refers to hypercementosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperemia

hyperemia refers to hyperemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperemia grade

hyperemia grade refers to hyperemia grade, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperextension

hyperextension refers to hyperextension, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperfibrinogenemia

hyperfibrinogenemia denotes hyperfibrinogenemia, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### hyperflexion

hyperflexion refers to hyperflexion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hypergammaglobulinemia

hypergammaglobulinemia refers to hypergammaglobulinemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperglycinemia

hyperglycinemia refers to hyperglycinemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### hyperhomocysteinemia

hyperhomocysteinemia refers to hyperhomocysteinemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hypericum perforatum

hypericum perforatum refers to hypericum perforatum, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperinsulinism

hyperinsulinism refers to hyperinsulinism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperkeratosis

hyperkeratosis refers to hyperkeratosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperkinesia

hyperkinesia refers to hyperkinesia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperlipasaemia

hyperlipasaemia refers to hyperlipasaemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperlipoproteinemia

hyperlipoproteinemia denotes hyperlipoproteinemia, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### hyperlordosis

hyperlordosis refers to hyperlordosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperlysinemia

hyperlysinemia refers to hyperlysinemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hypernatremia result

hypernatremia result denotes hypernatremia result, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### hyperornithinemia

hyperornithinemia refers to hyperornithinemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperostosis

hyperostosis refers to hyperostosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperoxaluria

hyperoxaluria refers to hyperoxaluria, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperoxia

hyperoxia refers to hyperoxia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### hyperparakeratosis

hyperparakeratosis refers to hyperparakeratosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperpituitarism

hyperpituitarism refers to hyperpituitarism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperproteinemia

hyperproteinemia denotes hyperproteinemia, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### hyperpyrexia

hyperpyrexia refers to hyperpyrexia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hypersplenism

hypersplenism refers to hypersplenism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hyperthyroxinemia

hyperthyroxinemia refers to hyperthyroxinemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hypertonia

hypertonia refers to hypertonia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hypertrophic gastritis

hypertrophic gastritis refers to hypertrophic gastritis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hypertrophic cardiomyopathy

hypertrophic cardiomyopathy refers to hypertrophic cardiomyopathy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hypertropia

hypertropia refers to hypertropia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hypervigilance

hypervigilance refers to hypervigilance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hypervolemia

hypervolemia refers to hypervolemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hypha

hypha refers to hypha, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### hypnic headache

hypnic headache refers to hypnic headache, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **hypnotherapy**

hypnotherapy is used in relation to hypnotherapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

### **hypoadrenalism**

hypoadrenalism refers to hypoadrenalism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypoalbuminemia**

hypoalbuminemia refers to hypoalbuminemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypoalphalipoproteinemias**

hypoalphalipoproteinemias denotes hypoalphalipoproteinemias, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **hypoblast**

hypoblast refers to hypoblast, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypocapnia**

hypocapnia refers to hypocapnia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypocholesterolemia**

hypocholesterolemia refers to hypocholesterolemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypochondriasis**

hypochondriasis refers to hypochondriasis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypochromia**

hypochromia refers to hypochromia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypochromic anemia**

hypochromic anemia refers to hypochromic anemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypocitraturia**

hypocitraturia refers to hypocitraturia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypocupremia**

hypocupremia refers to hypocupremia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypodermic needle**

hypodermic needle refers to hypodermic needle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypogalactia**

hypogalactia refers to hypogalactia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **hypoglossal nerve**

hypoglossal nerve refers to hypoglossal nerve, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypoglycemic agent**

hypoglycemic agent refers to hypoglycemic agent, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypokinesia**

hypokinesia refers to hypokinesia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypolipidemic agents**

hypolipidemic agents denotes hypolipidemic agents, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **hypolipoproteinemia**

hypolipoproteinemia denotes hypolipoproteinemia, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **hypomethylation**

hypomethylation refers to hypomethylation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypopharyngeal neoplasm**

hypopharyngeal neoplasm denotes a neoplastic condition involving hypopharyngeal neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **hypophosphatemic ricket**

hypophosphatemic ricket refers to hypophosphatemic ricket, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypophysectomy**

hypophysectomy is used in relation to hypophysectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

### **hypophysitis**

hypophysitis refers to hypophysitis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypoploidy**

hypoploidy refers to hypoploidy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypothalamic hamartoma**

hypothalamic hamartoma refers to hypothalamic hamartoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypothalamic hormone**

hypothalamic hormone denotes hypothalamic hormone, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **hypothalamic neoplasm**

hypothalamic neoplasm denotes a neoplastic condition involving hypothalamic neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

---

### **hypotrichosis**

hypotrichosis refers to hypotrichosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypotropia**

hypotropia refers to hypotropia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hypoxanthine**

hypoxanthine refers to hypoxanthine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hysteria**

hysteria refers to hysteria, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hysteroscope**

hysteroscope refers to hysteroscope, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **hysterotomy abortion**

hysterotomy abortion refers to hysterotomy abortion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **Numbness in hands**

Reduced or absent sensation in one or both hands, commonly caused by nerve compression, neuropathy, injury, circulation problems, or systemic disease.

**Synonyms:**

### **High hemoglobin count**

A hemoglobin level above the expected range, which may reflect dehydration, chronic low oxygen, smoking, medication effects, or a blood disorder. **Synonyms:**

### **Low hemoglobin count**

A hemoglobin level below the expected range, often indicating anemia from blood loss, reduced production, nutritional deficiency, inflammation, or increased destruction of red blood cells. **Synonyms:**

### **High blood protein**

An abnormally increased concentration of proteins in the blood, which may result from dehydration, inflammation, infection, or a plasma-cell disorder. **Synonyms:**

### **High potassium (hyperkalemia)**

An abnormally high potassium level in the blood that can affect muscle and heart function and may result from kidney disease, medicines, tissue injury, or other conditions. **Synonyms:**

### **High uric acid level**

An increased concentration of uric acid in the blood, which may contribute to gout or kidney stones and can result from reduced kidney clearance, diet, medicines, or metabolic disease. **Synonyms:**

### **High white blood cell count**

An increased number of white blood cells, often associated with infection, inflammation, stress, medicines, or a blood or bone marrow disorder. **Synonyms:**

### **Hip pain**

Hip pain is a medical condition involving hip pain; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. **Synonyms:**

### **H. pylori infection**

Alternate index label; see *Helicobacter pylori* (*H. pylori*) infection. **Synonyms:**

---

**H1N1 flu**

Alternate index label; see *H1N1 flu (swine flu)*.  
**Synonyms:**

**H1N1v flu**

Alternate index label; see *H1N1 flu (swine flu)*.  
**Synonyms:**

**H3N2v flu**

Alternate index label; see *H1N1 flu (swine flu)*.  
**Synonyms:**

**Hair-pulling disorder**

Alternate index label; see *Trichotillomania (hair-pulling disorder)*. **Synonyms:**

**Hand fracture**

Alternate index label; see *Broken hand*. **Synonyms:**

**Hardening of the arteries**

Alternate index label; see *Arteriosclerosis / atherosclerosis*. **Synonyms:**

**HAV infection**

Alternate index label; see *Hepatitis A*. **Synonyms:**

**HBV infection**

Alternate index label; see *Hepatitis B*. **Synonyms:**

**HCC**

Alternate index label; see *Hepatocellular carcinoma (HCC)*. **Synonyms:**

**HCV infection**

Alternate index label; see *Hepatitis C*. **Synonyms:**

**Head trauma, coma**

Alternate index label; see *Coma*. **Synonyms:**

**Headache, chronic daily**

Alternate index label; see *Chronic daily headaches*.  
**Synonyms:**

**Headache, cluster**

Alternate index label; see *Cluster headache*. **Synonyms:**

**Headache, exercise**

Alternate index label; see *Exercise headaches*. **Synonyms:**

**Headache, medication overuse**

Alternate index label; see *Medication overuse headaches*. **Synonyms:**

**Headache, migraine**

Alternate index label; see *Migraine*. **Synonyms:**

**Headache, primary cough**

Alternate index label; see *Cough headaches*. **Synonyms:**

**Headache, sex**

Alternate index label; see *Sex headaches*. **Synonyms:**

**Headache, sinus**

Alternate index label; see *Sinus headaches*. **Synonyms:**

**Headache, spinal**

Alternate index label; see *Spinal headaches*. **Synonyms:**

**Headache, tension**

Alternate index label; see *Tension headache*. **Synonyms:**

**Headache, thunderclap**

Alternate index label; see *Thunderclap headaches*.  
**Synonyms:**

**Health anxiety**

Alternate index label; see *Illness anxiety disorder*.  
**Synonyms:**

---

### Heart defects in adults

Alternate index label; see *Congenital heart disease in adults*. **Synonyms:**

### Hemangioma, liver

Alternate index label; see *Liver hemangioma*. **Synonyms:**

### Hematoma, intracranial

Alternate index label; see *Intracranial hematoma*. **Synonyms:**

### Hep A

Alternate index label; see *Hepatitis A*. **Synonyms:**

### Hep B

Alternate index label; see *Hepatitis B*. **Synonyms:**

### Hep C

Alternate index label; see *Hepatitis C*. **Synonyms:**

### Hepatitis A virus infection

Alternate index label; see *Hepatitis A*. **Synonyms:**

### Hepatitis B virus infection

Alternate index label; see *Hepatitis B*. **Synonyms:**

### Hepatitis C virus infection

Alternate index label; see *Hepatitis C*. **Synonyms:**

### Hepatitis, autoimmune

Alternate index label; see *Autoimmune hepatitis*. **Synonyms:**

### Hepatitis, toxic

Alternate index label; see *Toxic hepatitis*. **Synonyms:**

### Hereditary hemochromatosis

Alternate index label; see *Hemochromatosis*. **Synonyms:**

### Hereditary motor and sensory

### neuropathy

Alternate index label; see *Charcot-Marie-Tooth disease*. **Synonyms:**

### Hereditary nonpolyposis colorectal cancer syndrome

Alternate index label; see *Lynch syndrome*. **Synonyms:**

### Hernia, hiatal

Alternate index label; see *Hiatal hernia*. **Synonyms:**

### Hernia, inguinal

Alternate index label; see *Inguinal hernia*. **Synonyms:**

### Hernia, umbilical

Alternate index label; see *Umbilical hernia*. **Synonyms:**

### Herpes zoster oticus

Alternate index label; see *Ramsay Hunt syndrome*. **Synonyms:**

### Herpes, genital

Alternate index label; see *Genital herpes*. **Synonyms:**

### HHT

Alternate index label; see *Hereditary hemorrhagic telangiectasia*. **Synonyms:**

### High blood pressure, secondary

Alternate index label; see *Secondary hypertension*. **Synonyms:**

### High-flow priapism

Alternate index label; see *Priapism*. **Synonyms:**

### Hives, chronic

Alternate index label; see *Chronic hives*. **Synonyms:**

---

## HNPCC

Alternate index label; see *Lynch syndrome*. **Synonyms:**

## Hoarse voice

Alternate index label; see *Laryngitis*. **Synonyms:**

## Hodgkin disease

Alternate index label; see *Hodgkin lymphoma* (*Hodgkin disease*). **Synonyms:**

## Horner-Bernard syndrome

Alternate index label; see *Horner syndrome*. **Synonyms:**

## Human papillomavirus infection

Alternate index label; see *HPV infection*. **Synonyms:**

## Hunchback

Alternate index label; see *Kyphosis*. **Synonyms:**

## Hunt's syndrome

Alternate index label; see *Ramsay Hunt syndrome*. **Synonyms:**

## Hutchinson-Gilford progeria syndrome

Alternate index label; see *Progeria*. **Synonyms:**

## Hypercholesterolemia, familial

Alternate index label; see *Familial hypercholesterolemia*. **Synonyms:**

## Hypercortisolism

Alternate index label; see *Cushing syndrome*. **Synonyms:**

## Hypermenorrhea

Alternate index label; see *Heavy menstrual bleeding*. **Synonyms:**

## Hypersexuality

Alternate index label; see *Compulsive sexual behavior*. **Synonyms:**

## Hypertension, pregnancy-related

Alternate index label; see *Preeclampsia*. **Synonyms:**

## Hypertension, pulmonary

Alternate index label; see *Pulmonary hypertension*. **Synonyms:**

## Hypochondria

Alternate index label; see *Illness anxiety disorder*. **Synonyms:**

## Hypoglycemia, diabetic

Alternate index label; see *Diabetic hypoglycemia*. **Synonyms:**

## Hypohydration

Alternate index label; see *Dehydration*. **Synonyms:**

## H1N1 influenza (Swine flu)

H1N1 influenza is a strain of influenza A virus that causes an acute respiratory illness with fever, cough, myalgia, and variable pulmonary complications.

**Synonyms:**

## H2 blockers

H2 blockers reduce gastric acid secretion by antagonizing histamine H2 receptors on parietal cells and are used for reflux, dyspepsia, ulcers, and selected hypersecretory states.

**Synonyms:**

## H2 receptor antagonists overdose

H2 receptor antagonists overdose involves toxic or environmental exposure to h2 receptor antagonists overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

## Haemophilus influenzae type b (Hib) vaccine - what you need to know

Haemophilus influenzae type b (Hib) vaccine - what you need to know concerns haemophilus influenzae

---

type b (hib) vaccine - what you need to know; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Hair bleach poisoning**

Hair bleach poisoning involves toxic or environmental exposure to hair bleach poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Hair dye poisoning**

Hair dye poisoning involves toxic or environmental exposure to hair dye poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Hair spray poisoning**

Hair spray poisoning involves toxic or environmental exposure to hair spray poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Hair straightener poisoning**

Hair straightener poisoning involves toxic or environmental exposure to hair straightener poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Hair tonic poisoning**

Hair tonic poisoning involves toxic or environmental exposure to hair tonic poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Hair transplant**

Hair transplant is a treatment or care intervention for hair transplant; indication, preparation, risks, technical details, and recovery depend on the patient

and goal.

**Synonyms:**

### **Hallucinations**

Hallucinations are perceptions without an external sensory stimulus and can arise from psychiatric illness, neurologic disease, delirium, substances, medications, sensory loss, or sleep transitions.

**Synonyms:**

### **Halo brace - aftercare**

Halo brace - aftercare is a treatment or care intervention for halo brace - aftercare; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Halo brace - child**

Halo brace - child concerns halo brace - child; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Hammer toe repair**

Hammer toe repair is a treatment or care intervention for hammer toe repair; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Hammer toe repair - discharge**

Hammer toe repair - discharge is a treatment or care intervention for hammer toe repair - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Hamstring strain - aftercare**

Hamstring strain - aftercare is a treatment or care intervention for hamstring strain - aftercare; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

---

### **Hand fracture - aftercare**

Hand fracture - aftercare examines hand fracture - aftercare; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Hand lotion poisoning**

Hand lotion poisoning involves toxic or environmental exposure to hand lotion poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Hand or foot spasms**

Hand or foot spasms concerns hand or foot spasms, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Hand x-ray**

Hand x-ray examines hand x-ray; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Handling sharps and needles**

Handling sharps and needles concerns handling sharps and needles, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Handwashing**

Handwashing concerns handwashing, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Hangover treatment**

Hangover treatment concerns hangover treatment; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Haptoglobin blood test**

Haptoglobin blood test examines haptoglobin blood test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Hardware removal - extremity**

Hardware removal - extremity is a treatment or care intervention for hardware removal - extremity; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Hartnup disorder**

Hartnup disorder is a medical condition involving hartnup disorder; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Hazardous materials**

Hazardous materials concerns hazardous materials; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **HCG blood test - qualitative**

HCG blood test - qualitative examines hcg blood test - qualitative; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **HCG blood test - quantitative**

HCG blood test - quantitative examines hcg blood test - quantitative; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

---

### HCG in urine

HCG in urine examines hcg in urine; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### HDL test

HDL test examines hdl test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Head and face reconstruction

Head and face reconstruction examines head and face reconstruction; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Head CT scan

Head CT scan examines head ct scan; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Head injury - first aid

Head injury - first aid is a medical condition involving head injury - first aid; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### Head MRI

Head MRI examines head mri; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Headache - what to ask your doctor

Headache - what to ask your doctor examines headache - what to ask your doctor; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Headaches - danger signs

Headaches - danger signs concerns headaches - danger signs, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### Health care agents

Health care agents addresses care related to health care agents, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### Health risks of alcohol use

Health risks of alcohol use concerns health risks of alcohol use; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### Health risks of obesity

Health risks of obesity concerns health risks of obesity; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### Health screenings for men age 65 and older

Health screenings for men age 65 and older examines health screenings for men age 65 and older; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Health screenings for men ages 18 to 39

Health screenings for men ages 18 to 39 examines health screenings for men ages 18 to 39; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Health screenings for men ages 40 to 64

Health screenings for men ages 40 to 64 examines

---

health screenings for men ages 40 to 64; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Health screenings for women age 65 and older**

Health screenings for women age 65 and older examines health screenings for women age 65 and older; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Health screenings for women ages 18 to 39**

Health screenings for women ages 18 to 39 examines health screenings for women ages 18 to 39; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Health screenings for women ages 40 to 64**

Health screenings for women ages 40 to 64 examines health screenings for women ages 40 to 64; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Healthy food trends - beans and legumes**

Healthy food trends - beans and legumes addresses care related to healthy food trends - beans and legumes, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Healthy food trends - Brussels sprouts**

Healthy food trends - Brussels sprouts addresses care related to healthy food trends - brussels sprouts, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Healthy food trends - chia seeds**

Healthy food trends - chia seeds addresses care related to healthy food trends - chia seeds, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Healthy food trends - flaxseeds**

Healthy food trends - flaxseeds addresses care related to healthy food trends - flaxseeds, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Healthy food trends - kale**

Healthy food trends - kale addresses care related to healthy food trends - kale, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Healthy food trends - microgreens**

Healthy food trends - microgreens addresses care related to healthy food trends - microgreens, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Healthy food trends - quinoa**

Healthy food trends - quinoa addresses care related to healthy food trends - quinoa, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Healthy grocery shopping**

Healthy grocery shopping addresses care related to healthy grocery shopping, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Healthy habits for weight loss**

Healthy habits for weight loss addresses care related to healthy habits for weight loss, including practical

---

measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Healthy living**

Healthy living addresses care related to healthy living, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Hearing loss - infants**

Hearing loss - infants concerns hearing loss - infants, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Hearing loss and music**

Hearing loss and music concerns hearing loss and music, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Hearing or speech impairment - resources**

Hearing or speech impairment - resources addresses care related to hearing or speech impairment - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Heart and vascular services**

Heart and vascular services concerns heart and vascular services, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Heart attack - discharge**

Heart attack - discharge is a treatment or care intervention for heart attack - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Heart attack - what to ask your provider**

Heart attack - what to ask your provider concerns heart attack - what to ask your provider, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Heart attack first aid**

Heart attack first aid concerns heart attack first aid, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Heart bypass surgery**

Heart bypass surgery is a treatment or care intervention for heart bypass surgery; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Heart bypass surgery - discharge**

Heart bypass surgery - discharge is a treatment or care intervention for heart bypass surgery - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Heart bypass surgery - minimally invasive**

Heart bypass surgery - minimally invasive is a treatment or care intervention for heart bypass surgery - minimally invasive; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Heart bypass surgery - minimally invasive - discharge**

Heart bypass surgery - minimally invasive - discharge is a treatment or care intervention for heart bypass surgery - minimally invasive - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

---

### Heart CT scan

Heart CT scan examines heart ct scan; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Heart disease - resources

Heart disease - resources addresses care related to heart disease - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### Heart disease - risk factors

Heart disease - risk factors examines heart disease - risk factors; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Heart disease and depression

Heart disease and depression is a medical condition involving heart disease and depression; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### Heart disease and diet

Heart disease and diet addresses care related to heart disease and diet, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### Heart disease and intimacy

Heart disease and intimacy is a medical condition involving heart disease and intimacy; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### Heart disease and women

Heart disease and women is a medical condition involving heart disease and women; causes, affected organs, severity, complications, and treatment are

determined by clinical assessment.

**Synonyms:**

### Heart failure - discharge

Heart failure - discharge is a treatment or care intervention for heart failure - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### Heart failure - fluids and diuretics

Heart failure - fluids and diuretics is a medical condition involving heart failure - fluids and diuretics; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### Heart failure - home monitoring

Heart failure - home monitoring examines heart failure - home monitoring; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Heart failure - medicines

Heart failure - medicines is a medical condition involving heart failure - medicines; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### Heart failure - palliative care

Heart failure - palliative care addresses care related to heart failure - palliative care, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### Heart failure - surgeries and devices

Heart failure - surgeries and devices is a medical condition involving heart failure - surgeries and devices; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

---

### Heart failure - tests

Heart failure - tests examines heart failure - tests; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Heart failure - what to ask your doctor

Heart failure - what to ask your doctor examines heart failure - what to ask your doctor; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Heart failure in children

Heart failure in children is a medical condition involving heart failure in children; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### Heart failure in children - home care

Heart failure in children - home care addresses care related to heart failure in children - home care, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### Heart MRI

Heart MRI examines heart mri; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Heart murmurs

Heart murmurs concerns heart murmurs, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### Heart pacemaker

Heart pacemaker concerns heart pacemaker, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient con-

text.

**Synonyms:**

### Heart pacemaker - discharge

Heart pacemaker - discharge is a treatment or care intervention for heart pacemaker - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### Heart PET scan

Heart PET scan examines heart pet scan; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Heart transplant

Heart transplant is a treatment or care intervention for heart transplant; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### Heart valve surgery

Heart valve surgery is a treatment or care intervention for heart valve surgery; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### Heart valve surgery - discharge

Heart valve surgery - discharge is a treatment or care intervention for heart valve surgery - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### Heartburn - what to ask your provider

Heartburn - what to ask your provider concerns heartburn - what to ask your provider, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

---

### **Heat emergencies**

Heat emergencies range from heat cramps and exhaustion to heat stroke, in which dangerous core-temperature elevation causes central nervous system dysfunction and organ injury.

**Synonyms:**

### **Heel pain and Achilles tendonitis - aftercare**

Heel pain and Achilles tendonitis - aftercare is a treatment or care intervention for heel pain and achilles tendonitis - aftercare; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Heimlich maneuver on self**

Heimlich maneuver on self concerns heimlich maneuver on self; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Help prevent hospital errors**

Help prevent hospital errors concerns help prevent hospital errors; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Help your teen cope with stress**

Help your teen cope with stress addresses care related to help your teen cope with stress, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Helping a loved one with a drinking problem**

Helping a loved one with a drinking problem concerns helping a loved one with a drinking problem; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Helping your child understand a cancer diagnosis**

Helping your child understand a cancer diagnosis is a medical condition involving helping your child understand a cancer diagnosis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Helping your teen with depression**

Helping your teen with depression concerns helping your teen with depression; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Hemodialysis access - self care**

Hemodialysis access - self care is a treatment or care intervention for hemodialysis access - self care; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Hemodialysis access procedures**

Hemodialysis access procedures is a treatment or care intervention for hemodialysis access procedures; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Hemoglobinuria test**

Hemoglobinuria test examines hemoglobinuria test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Hemolytic anemia caused by chemicals and toxins**

Hemolytic anemia caused by chemicals and toxins is a medical condition involving hemolytic anemia caused by chemicals and toxins; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

---

### **Hemolytic crisis**

Hemolytic crisis concerns hemolytic crisis; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Hemolytic transfusion reaction**

Hemolytic transfusion reaction examines hemolytic transfusion reaction; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Hemophilia - resources**

Hemophilia - resources addresses care related to hemophilia - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Hemorrhoid removal - discharge**

Hemorrhoid removal - discharge is a treatment or care intervention for hemorrhoid removal - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Hemorrhoid surgery**

Hemorrhoid surgery is a treatment or care intervention for hemorrhoid surgery; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Hemorrhoids**

Hemorrhoids concerns hemorrhoids; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Hemovac drain**

Hemovac drain concerns hemovac drain; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Hepatic vein obstruction (Budd-Chiari)**

Hepatic vein obstruction (Budd-Chiari) examines hepatic vein obstruction (budd-chiari); interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Hepatitis A - children**

Hepatitis A - children is a medical condition involving hepatitis a - children; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Hepatitis A vaccine - what you need to know**

Hepatitis A vaccine - what you need to know is a medical condition involving hepatitis a vaccine - what you need to know; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Hepatitis B - children**

Hepatitis B - children is a medical condition involving hepatitis b - children; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Hepatitis B vaccine - what you need to know**

Hepatitis B vaccine - what you need to know is a medical condition involving hepatitis b vaccine - what you need to know; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Hepatitis C - children**

Hepatitis C - children is a medical condition involving hepatitis c - children; causes, affected organs, severity, complications, and treatment are deter-

---

mined by clinical assessment.

**Synonyms:**

### **Hepatitis D (Delta agent)**

Hepatitis D (Delta agent) is a medical condition involving hepatitis d (delta agent); causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Hepatitis virus panel**

Hepatitis virus panel is a medical condition involving hepatitis virus panel; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Hepatocerebral degeneration**

Hepatocerebral degeneration is a medical condition involving hepatocerebral degeneration; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Herbal remedies and supplements for weight loss**

Herbal remedies and supplements for weight loss concerns herbal remedies and supplements for weight loss; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Hereditary amyloidosis**

Hereditary amyloidosis is a medical condition involving hereditary amyloidosis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Hereditary fructose intolerance**

Hereditary fructose intolerance examines hereditary fructose intolerance; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Hereditary ovalocytosis**

Hereditary ovalocytosis is a medical condition involving hereditary ovalocytosis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Hereditary spherocytic anemia**

Hereditary spherocytic anemia is a medical condition involving hereditary spherocytic anemia; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Hereditary urea cycle abnormality**

Hereditary urea cycle abnormality concerns hereditary urea cycle abnormality; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Heroin overdose**

Heroin overdose involves toxic or environmental exposure to heroin overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Herpes - oral**

Oral herpes is usually caused by herpes simplex virus type 1 and produces recurrent grouped blisters or ulcers around the lips or mouth, with asymptomatic viral shedding.

**Synonyms:**

### **Herpes - resources**

Herpes - resources addresses care related to herpes - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

---

### **Herpes viral culture of lesion**

Herpes viral culture of lesion examines herpes viral culture of lesion; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Herpetic stomatitis**

Herpetic stomatitis is a medical condition involving herpetic stomatitis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Heterochromia**

Heterochromia concerns heterochromia; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **High blood cholesterol levels**

High blood cholesterol levels concerns high blood cholesterol levels; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **High blood pressure - medicine-related**

High blood pressure - medicine-related concerns high blood pressure - medicine-related; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **High blood pressure - what to ask your doctor**

High blood pressure - what to ask your doctor examines high blood pressure - what to ask your doctor; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **High blood pressure and diet**

High blood pressure and diet addresses care related

to high blood pressure and diet, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **High blood pressure and eye disease**

High blood pressure and eye disease is a medical condition involving high blood pressure and eye disease; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **High blood pressure in adults - hypertension**

High blood pressure in adults - hypertension is a medical condition involving high blood pressure in adults - hypertension; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **High blood pressure in children - hypertension**

High blood pressure in children - hypertension is a medical condition involving high blood pressure in children - hypertension; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **High blood pressure in infants - hypertension**

High blood pressure in infants - hypertension is a medical condition involving high blood pressure in infants - hypertension; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **High blood pressure medications**

High blood pressure medications concerns high blood pressure medications; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

---

### High blood sugar - self-care

High blood sugar - self-care is a treatment or care intervention for high blood sugar - self-care; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### High cholesterol - children

High cholesterol - children concerns high cholesterol - children; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### High potassium level

High potassium level concerns high potassium level; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### High-fiber foods

High-fiber foods concerns high-fiber foods; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### Hip arthroscopy

Hip arthroscopy is a treatment or care intervention for hip arthroscopy; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### Hip flexor strain - aftercare

Hip flexor strain - aftercare is a treatment or care intervention for hip flexor strain - aftercare; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### Hip fracture - discharge

Hip fracture - discharge examines hip fracture - discharge; interpretation depends on the specimen

or body region, test method, reference range, and clinical question.

**Synonyms:**

### Hip fracture surgery

Hip fracture surgery examines hip fracture surgery; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Hip joint injection

Hip joint injection examines hip joint injection; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Hip joint replacement

Hip joint replacement is a treatment or care intervention for hip joint replacement; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### Hip or knee replacement - after - what to ask your doctor

Hip or knee replacement - after - what to ask your doctor examines hip or knee replacement - after - what to ask your doctor; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Hip or knee replacement - before - what to ask your doctor

Hip or knee replacement - before - what to ask your doctor examines hip or knee replacement - before - what to ask your doctor; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Hip or knee replacement - in the hospital after

Hip or knee replacement - in the hospital after is

---

a treatment or care intervention for hip or knee replacement - in the hospital after; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Hip replacement - discharge**

Hip replacement - discharge is a treatment or care intervention for hip replacement - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **His bundle electrography**

His bundle electrography examines his bundle electrography; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Histocompatibility antigen test**

Histocompatibility antigen test examines histocompatibility antigen test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Histoplasma complement fixation**

Histoplasma complement fixation concerns histoplasma complement fixation; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Histoplasma skin test**

Histoplasma skin test examines histoplasma skin test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Histoplasmosis - acute (primary) pulmonary**

Histoplasmosis - acute (primary) pulmonary is a medical condition involving histoplasmosis - acute

(primary) pulmonary; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **HIV/AIDS - resources**

HIV/AIDS - resources addresses care related to hiv/aids - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **HIV/AIDS in pregnant women and infants**

HIV/AIDS in pregnant women and infants concerns hiv/aids in pregnant women and infants; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **HLA-B27 antigen**

HLA-B27 antigen concerns hla-b27 antigen; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Hodgkin lymphoma in children**

Hodgkin lymphoma in children is a medical condition involving hodgkin lymphoma in children; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Holter monitor (24h)**

Holter monitor (24h) examines holter monitor (24h); interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Home apnea monitor use - infants**

Home apnea monitor use - infants examines home apnea monitor use - infants; interpretation depends on the specimen or body region, test method, refer-

---

ence range, and clinical question.

**Synonyms:**

### **Home blood sugar testing**

Home blood sugar testing involves toxic or environmental exposure to home blood sugar testing; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Home safety - children**

Home safety - children addresses care related to home safety - children, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Home vision tests**

Home vision tests examines home vision tests; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Hormonal effects in newborns**

Hormonal effects in newborns examines hormonal effects in newborns; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Hormone levels**

Hormone levels examines hormone levels; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Hormone therapy for breast cancer**

Hormone therapy for breast cancer examines hormone therapy for breast cancer; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Hormone therapy for prostate cancer**

Hormone therapy for prostate cancer examines hormone therapy for prostate cancer; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Hospitals as health educators**

Hospitals as health educators concerns hospitals as health educators; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Hot tub folliculitis**

Hot tub folliculitis is a medical condition involving hot tub folliculitis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Household glue poisoning**

Household glue poisoning involves toxic or environmental exposure to household glue poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **How and when to get rid of unused medicines**

How and when to get rid of unused medicines concerns how and when to get rid of unused medicines; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **How childhood cancers are different from adult cancers**

How childhood cancers are different from adult cancers is a medical condition involving how childhood cancers are different from adult cancers; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

---

### How to avoid exercise injuries

How to avoid exercise injuries addresses care related to how to avoid exercise injuries, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### How to avoid overheating during exercise

How to avoid overheating during exercise addresses care related to how to avoid overheating during exercise, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### How to breathe when you are short of breath

How to breathe when you are short of breath concerns how to breathe when you are short of breath; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### How to care for pressure sores

How to care for pressure sores addresses care related to how to care for pressure sores, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### How to choose a health plan

How to choose a health plan concerns how to choose a health plan; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### How to choose a nursing home

How to choose a nursing home addresses care related to how to choose a nursing home, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### How to choose the best hospital for

### surgery

How to choose the best hospital for surgery is a treatment or care intervention for how to choose the best hospital for surgery; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### How to give a heparin shot

How to give a heparin shot concerns how to give a heparin shot; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### How to make a sling

How to make a sling concerns how to make a sling; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### How to make a splint

How to make a splint concerns how to make a splint; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### How to prevent frostbite and hypothermia

How to prevent frostbite and hypothermia involves toxic or environmental exposure to how to prevent frostbite and hypothermia; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### How to protect yourself and others from COVID-19

How to protect yourself and others from COVID-19 examines how to protect yourself and others from covid-19; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

---

**Synonyms:**

### **How to read food labels**

How to read food labels concerns how to read food labels; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **How to research cancer**

How to research cancer is a medical condition involving how to research cancer; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **How to save money on infant formula**

How to save money on infant formula concerns how to save money on infant formula; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **How to save money on medicines**

How to save money on medicines concerns how to save money on medicines; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **How to stop drinking**

How to stop drinking concerns how to stop drinking; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **How to stop smoking: Dealing with a slip up**

How to stop smoking: Dealing with a slip up concerns how to stop smoking: dealing with a slip up; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **How to stop smoking: Dealing with cravings**

How to stop smoking: Dealing with cravings concerns how to stop smoking: dealing with cravings; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **How to take statins**

How to take statins concerns how to take statins; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **How to tell your child that you have cancer**

How to tell your child that you have cancer is a medical condition involving how to tell your child that you have cancer; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **How to treat the common cold at home**

How to treat the common cold at home addresses care related to how to treat the common cold at home, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **How to use a nebulizer**

How to use a nebulizer concerns how to use a nebulizer; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **How to use an inhaler - no spacer**

How to use an inhaler - no spacer concerns how to use an inhaler - no spacer; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

---

### How to use an inhaler - with spacer

How to use an inhaler - with spacer concerns how to use an inhaler - with spacer; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### How to use your peak flow meter

How to use your peak flow meter concerns how to use your peak flow meter; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### How wounds heal

How wounds heal concerns how wounds heal; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### HPV (human papillomavirus) vaccine - what you need to know

HPV (human papillomavirus) vaccine - what you need to know concerns hpv (human papillomavirus) vaccine - what you need to know; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### HPV test

HPV test examines hpv test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### Human bites - self-care

Human bites - self-care involves toxic or environmental exposure to human bites - self-care; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### Human metapneumovirus (hMPV)

Human metapneumovirus (hMPV) concerns human

metapneumovirus (hmpv); its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### Humidifiers and health

Humidifiers and health concerns humidifiers and health; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### Hump on upper back (dorsocervical fat pad)

Hump on upper back (dorsocervical fat pad) concerns hump on upper back (dorsocervical fat pad); its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### Hydramnios

Hydramnios concerns hydramnios; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### Hydrocarbon pneumonia

Hydrocarbon pneumonia is a medical condition involving hydrocarbon pneumonia; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### Hydrocele repair

Hydrocele repair is a treatment or care intervention for hydrocele repair; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### Hydrochloric acid poisoning

Hydrochloric acid poisoning involves toxic or environmental exposure to hydrochloric acid poisoning; dose, route, timing, symptoms, and organ involve-

---

ment determine urgency and treatment.

**Synonyms:**

### **Hydrocodone and acetaminophen overdose**

Hydrocodone and acetaminophen overdose involves toxic or environmental exposure to hydrocodone and acetaminophen overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Hydrocodone/oxycodone overdose**

Hydrocodone/oxycodone overdose involves toxic or environmental exposure to hydrocodone/oxycodone overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Hydrofluoric acid poisoning**

Hydrofluoric acid poisoning involves toxic or environmental exposure to hydrofluoric acid poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Hydrogen peroxide poisoning**

Hydrogen peroxide poisoning involves toxic or environmental exposure to hydrogen peroxide poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Hydromorphone overdose**

Hydromorphone overdose involves toxic or environmental exposure to hydromorphone overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Hydronephrosis of one kidney**

Hydronephrosis of one kidney is a medical condition involving hydronephrosis of one kidney; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Hydroxyzine overdose**

Hydroxyzine overdose involves toxic or environmental exposure to hydroxyzine overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Hyperactivity and children**

Hyperactivity and children examines hyperactivity and children; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Hyperactivity and sugar**

Hyperactivity and sugar examines hyperactivity and sugar; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Hypercalcemia - discharge**

Hypercalcemia - discharge is a treatment or care intervention for hypercalcemia - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Hyperelastic skin**

Hyperelastic skin is a medical condition involving hyperelastic skin; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Hyperglycemia - infants**

Hyperglycemia - infants is a medical condition involving hyperglycemia - infants; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

---

## Hyperimmunization

Hyperimmunization is a medical condition involving hyperimmunization; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

## Hyperimmunoglobulin E syndrome

Hyperimmunoglobulin E syndrome is a medical condition involving hyperimmunoglobulin e syndrome; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

## Hyperkalemic periodic paralysis

Hyperkalemic periodic paralysis is a medical condition involving hyperkalemic periodic paralysis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

## Hypermobility joints

Hypermobility joints is a medical condition involving hypermobility joints; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

## Hypersensitivity vasculitis

Hypersensitivity vasculitis is a medical condition involving hypersensitivity vasculitis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

## Hyperthermia for treating cancer

Hyperthermia for treating cancer is a medical condition involving hyperthermia for treating cancer; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

## Hypervitaminosis A

Hypervitaminosis A is a medical condition involving hypervitaminosis a; causes, affected organs, severity,

complications, and treatment are determined by clinical assessment.

**Synonyms:**

## Hypervitaminosis D

Hypervitaminosis D is a medical condition involving hypervitaminosis d; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

## Hypokalemic periodic paralysis

Hypokalemic periodic paralysis is a medical condition involving hypokalemic periodic paralysis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

## Hypomelanosis of Ito

Hypomelanosis of Ito is a medical condition involving hypomelanosis of ito; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

## Hypospadias repair

Hypospadias repair is a treatment or care intervention for hypospadias repair; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

## Hypospadias repair - discharge

Hypospadias repair - discharge is a treatment or care intervention for hypospadias repair - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

## Hypothalamic dysfunction

Hypothalamic dysfunction examines hypothalamic dysfunction; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

---

## **Hypothalamic tumor**

Hypothalamic tumor is a medical condition involving hypothalamic tumor; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

## **Hysterectomy - abdominal - discharge**

Hysterectomy - abdominal - discharge examines hysterectomy - abdominal - discharge; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

## **Hysterectomy - laparoscopic - discharge**

Hysterectomy - laparoscopic - discharge examines hysterectomy - laparoscopic - discharge; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

## **Hysterectomy - vaginal - discharge**

Hysterectomy - vaginal - discharge examines hysterectomy - vaginal - discharge; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

---

# I

## **Cyclospora Infection**

An intestinal infection caused by the parasite *Cyclospora cayetanensis*, usually acquired from contaminated food or water. It commonly causes prolonged watery diarrhea, abdominal cramps, nausea, fatigue, and weight loss. Diagnosis requires specialized stool testing, and antimicrobial treatment is often effective.

**Synonyms:**

## **IBD**

Inflammatory bowel disease, including Crohn's disease and ulcerative colitis, causing chronic intestinal inflammation.

**Synonyms:** Inflammatory bowel disease

## **ICD**

Implantable cardioverter-defibrillator, a device that detects dangerous heart rhythms and delivers a corrective shock.

**Synonyms:** Implantable cardioverter defibrillator

## **Ice Pick Headache**

A sudden, severe, stabbing headache that usually lasts only seconds.

**Synonyms:** Primary stabbing headache

## **Iliopsoas Muscles**

The psoas major and iliacus muscles, which work together to flex the hip.

**Synonyms:** Iliopsoas

## **Immobilize**

To restrict movement of a body part, often with a splint or cast, to support healing.

**Synonyms:** Immobilization

## **Immunoglobulin E**

An antibody class that plays a central role in many immediate allergic reactions.

**Synonyms:** IgE

## **Immunologically Privileged Site**

A body site where immune responses are limited to reduce risk of tissue damage.

**Synonyms:**

## **Impacted**

Firmly wedged or unable to move from its normal position, as with an impacted tooth.

**Synonyms:**

## **Impaction**

Obstruction caused by material that is firmly lodged, such as hardened stool in the bowel.

**Synonyms:**

## **Impotence**

An older term for erectile dysfunction.

**Synonyms:** Erectile dysfunction

## **In Situ**

In its original place or position.

**Synonyms:** In place

## **Inactivated Vaccines**

Vaccines made from microorganisms that have been killed and cannot reproduce.

**Synonyms:** Inactivated vaccines

---

### **Inferior Myocardial Infarction**

A heart attack affecting the lower or inferior portion of the heart muscle.

**Synonyms:**

### **Infiltrating Cancer**

Cancer that has grown beyond its site of origin into surrounding tissue.

**Synonyms:** Invasive cancer

### **Infusion**

Slow administration of a fluid or medicine into a vein or tissue.

**Synonyms:** Intravenous infusion

### **Inhibitory Neurochemical**

A chemical messenger that reduces signaling between nerve cells.

**Synonyms:** Inhibitory neurotransmitter

### **Injectable Fillers**

Materials injected beneath or into skin to restore volume or soften wrinkles.

**Synonyms:** Dermal fillers

### **Inoperable**

Not suitable for surgical treatment, often because surgery cannot safely remove or correct the condition.

**Synonyms:**

### **Insulin**

A pancreatic hormone that helps cells take up glucose and lowers blood glucose.

**Synonyms:**

### **Insulin-Dependent Diabetes**

Type 1 diabetes, in which the pancreas produces little or no insulin and replacement insulin is required.

**Synonyms:** Type 1 diabetes

### **Intense Pulsed Light**

Broadband light treatment used for selected cosmetic skin conditions and hair reduction.

**Synonyms:** IPL

### **Intensity**

The degree of effort or physiological demand during physical activity.

**Synonyms:**

### **Interferons**

Signaling proteins that help coordinate immune responses, especially against viral infections.

**Synonyms:**

### **Interleukins**

Cytokines that carry signals between immune cells and regulate inflammation.

**Synonyms:** ILs

### **Intermediate-Density Lipoprotein**

A lipoprotein remnant formed as very-low-density lipoprotein is metabolized toward LDL.

**Synonyms:** IDL

### **Intervention Study**

A study in which researchers assign or provide an intervention and compare its outcomes with a control.

**Synonyms:** Clinical trial

### **Intervertebral Disk**

A fibrocartilaginous cushion between spinal vertebrae that absorbs shock and permits movement.

**Synonyms:** Intervertebral disc

### **Intervertebral Foramen**

An opening between adjacent vertebrae through which a spinal nerve exits.

**Synonyms:** Neural foramen

### **Intolerance**

An adverse response to a substance that does not involve the immune mechanism of an allergy.

**Synonyms:** Nonallergic sensitivity

---

### **Intrinsic Sphincter Deficiency**

Weakness of the urinary sphincter that causes stress urinary incontinence.

**Synonyms:** ISD

### **Iodides**

Salts containing iodine, sometimes used in carefully selected thyroid disorders.

**Synonyms:**

### **Irritants**

Substances that provoke inflammation or allergy-like symptoms without necessarily causing an immune allergy.

**Synonyms:**

### **Ischemic Heart Disease**

Heart disease caused by inadequate blood flow through narrowed or blocked coronary arteries.

**Synonyms:** Coronary artery disease; coronary heart disease

### **IADL Training**

Training to improve skills needed for independent living, such as preparing food, shopping, managing medicines, handling finances, and using transportation.

**Synonyms:**

### **Iatrogenic**

An illness or condition caused by medical examination or treatment. Examples: hospital-acquired infections, drug side effects, surgical complications, radiation-induced damage. Prevention: proper technique, informed consent, monitoring, reporting systems.

**Synonyms:**

### **Iatrogenic Injury**

An injury caused unintentionally by a medical examination, treatment, procedure, or medicine.

**Synonyms:**

### **ICD Shock Therapy**

Anti-tachycardia pacing (ATP) for slow VT delivers rapid pacing pulses to terminate the arrhythmia painlessly. Cardioversion shock synchronously terminates VT. Defibrillation shock treats VFib asynchronously. The MADIT-RIT trial showed that higher-rate programming (detection >180-200 bpm) reduced inappropriate shocks and mortality.

**Synonyms:**

### **Ice Pack**

A device that applies cold to a body area to help relieve pain or swelling. It should be wrapped to protect the skin and used for limited periods.

**Synonyms:**

### **ICF Framework**

International Classification of Functioning, Disability and Health. Biopsychosocial model: body functions/structures, activities, participation, environmental factors, personal factors.

**Synonyms:**

### **Ichthyosis**

A group of disorders characterized by dry, scaly skin resembling fish scales. Ichthyosis vulgaris is the most common, autosomal dominant, associated with filaggrin mutation and atopy. X-linked ichthyosis is caused by steroid sulfatase deficiency. Lamellar ichthyosis is a severe congenital form.

**Synonyms:**

### **Ichthyosis Vulgaris**

A common inherited disorder of skin keratinization characterized by dry, scaling skin, especially on the extensor limbs. Symptoms often improve with age and with regular emollient and keratolytic skin care.

**Synonyms:**

### **ICU Psychosis**

A colloquial term for delirium occurring in an intensive-care setting, with acute changes in attention, awareness, and cognition. Causes include severe illness, infection, medicines, sleep disruption, pain, and metabolic abnormalities. It re-

---

quires prompt evaluation and treatment of reversible causes, with supportive measures to orient and calm the patient.

**Synonyms:**

### **Ideas of Reference**

The false belief that unrelated events, objects, or people have a particular and unusual significance specifically for the patient. For example, believing that TV newscasters are sending personal messages or that strangers are conspiring against them.

**Synonyms:**

### **Idiopathic**

Of unknown cause. Examples: idiopathic pulmonary fibrosis, idiopathic thrombocytopenia.

**Synonyms:**

### **Idiopathic Hypersomnia**

A sleep disorder characterized by excessive daytime sleepiness, prolonged or unrefreshing sleep, difficulty awakening, and impaired alertness despite adequate opportunity for sleep. It is diagnosed after excluding other medical, psychiatric, circadian, and substance-related causes.

**Synonyms:**

### **Idiopathic Intracranial Hypertension**

Elevated intracranial pressure without mass lesion. Symptoms: headache, pulsatile tinnitus, visual changes, papilledema. Treatment: acetazolamide, weight loss, surgical options.

**Synonyms:**

### **Idiopathic Pulmonary Fibrosis**

A chronic, progressive fibrosing interstitial pneumonia of unknown cause. Histopathology shows usual interstitial pneumonia (UIP). Features include exertional dyspnea, dry cough, bibasilar crackles, and digital clubbing. Median survival is 3–5 years.

**Synonyms:**

### **Idiosyncratic Reaction**

An uncommon, unexpected, and often genetically determined adverse drug reaction that is unrelated

to the drug's known pharmacology and usually dose-independent (a Type B reaction).

**Synonyms:**

### **Idioventricular Rhythm**

A ventricular rhythm arising from an ectopic focus in the His-Purkinje system or ventricular myocardium, typically at a slow rate with wide QRS complexes. It may occur during escape from higher pacemakers, reperfusion, conduction block, or severe cardiac disease.

**Synonyms:**

### **IgA**

Immunoglobulin A, the predominant antibody in mucosal secretions (saliva, tears, breast milk, gastrointestinal and respiratory tract). Exists mainly as a dimer linked by a J chain and secretory component, which protects it from proteolysis.

**Synonyms:**

### **IgA Nephropathy**

The most common primary glomerulonephritis worldwide, characterized by mesangial IgA deposition. Presents with hematuria (macroscopic with mucosal infections, especially upper respiratory), proteinuria, and hypertension. Most common in young adults, with male predominance.

**Synonyms:**

### **IgA Vasculitis**

An immune-complex small-vessel vasculitis characterized by palpable purpura, joint pain, abdominal symptoms, and kidney involvement. It is common in children and may follow an infection; renal disease determines long-term risk.

**Synonyms:**

### **IgA Vasculitis (Henoch-Schonlein Purpura)**

The most common systemic vasculitis in children (peak age 2–8 years), characterized by IgA1-containing immune complex deposition in small vessels. Often preceded by an upper respiratory tract infection (e.g., group A *Streptococcus*).

---

**Synonyms:** Henoch-Schonlein Purpura

### **IgD**

Immunoglobulin D, a membrane-bound antibody expressed on the surface of mature naive B cells (with IgM) serving as a B-cell receptor. Serum IgD is present in trace amounts and its secreted function is unclear. Its role in B-cell activation and signaling is an area of research.

**Synonyms:**

### **IgE**

Immunoglobulin E, the antibody class mediating immediate (type I) hypersensitivity and defense against parasites. Binds high-affinity Fc-epsilon-RI receptors on mast cells and basophils; allergen cross-linking triggers degranulation and release of histamine and leukotrienes, causing allergic rhinitis, asthma, urticaria, and anaphylaxis.

**Synonyms:**

### **IgG**

Immunoglobulin G, the most abundant antibody class in serum (75-80 percent), produced during secondary immune responses. Functions: neutralization, opsonization, complement activation (classical pathway), and antibody-dependent cellular cytotoxicity.

**Synonyms:**

### **IgG and complement deposition at the dermis-epidermis junction**

An immunofluorescence finding that may occur in the lupus band test, in which immune complexes containing immunoglobulin and complement deposit along the dermoepidermal junction. The pattern and clinical context are needed for interpretation.

**Synonyms:**

### **IgG4-Related Disease**

A fibro-inflammatory disorder that can produce tumefactive lesions and organ enlargement in multiple sites. Histology may show IgG4-positive plasma cells, storiform fibrosis, and obliterative phlebitis; diagnosis requires clinicopathologic correlation be-

cause no single test is sufficient.

**Synonyms:**

### **IgG4-related disease arteritis**

A form of IgG4-related disease affecting large and medium-sized arteries, characterized by transmural inflammation with abundant IgG4-positive plasma cells, storiform fibrosis, and obliterative phlebitis. It may involve the aorta and its branches, causing stenosis or aneurysm formation.

**Synonyms:**

### **IgG4-related ophthalmic disease**

An immune-mediated fibroinflammatory disorder that can affect the lacrimal glands, orbit, eyelids, or extraocular muscles. It may cause swelling, mass lesions, double vision, or visual symptoms and can occur with IgG4-related disease in other organs.

**Synonyms:**

### **IgM**

Immunoglobulin M, the largest antibody (pentamer), produced during the primary immune response (first antibody to appear). Functions: potent complement activation (classical pathway) and agglutination; expressed as a membrane-bound B-cell receptor on naive B cells.

**Synonyms:**

### **IGRA (Interferon-Gamma Release Assay)**

Blood test for *Mycobacterium tuberculosis* infection (latent or active). T-SPOT.TB (ELISPOT) or QuantiFERON-TB Gold Plus (ELISA). Measures IFN-gamma released by T cells after exposure to MTB-specific antigens (ESAT-6, CFP-10, TB7.7).

**Synonyms:** Interferon-Gamma Release Assay

### **Ileal Atresia**

Congenital complete interruption or absence of a segment of the ileal lumen. It causes neonatal intestinal obstruction with abdominal distension, bilious vomiting, and failure to pass meconium and generally requires surgical management.

**Synonyms:**

---

## Ileal Obstruction

Partial or complete blockage of the ileum, the final portion of the small intestine. Causes include adhesions, hernia, inflammatory bowel disease, tumors, and twisting of the bowel. Symptoms may include cramping pain, vomiting, abdominal distension, and inability to pass stool or gas.

**Synonyms:**

## Ileal Pouch-Anal Anastomosis

Surgical creation of a J-pouch from the terminal ileum after proctocolectomy to preserve intestinal continuity for ulcerative colitis. Avoids permanent ileostomy by allowing defecation through the anal route. The procedure involves removal of the entire colon and rectum with construction of a reservoir from distal ileum.

**Synonyms:**

## Ileitis

Inflammation of the ileum, the distal segment of the small intestine. Causes include Crohn disease, infection, ischemia, medication-related injury, and other inflammatory disorders; symptoms may include right-lower-quadrant pain, diarrhea, fever, or bleeding.

**Synonyms:**

## Ileocecal Valve

A sphincter-like fold at the junction of the terminal ileum and caecum. It regulates passage of intestinal contents into the colon and helps limit reflux of colonic contents into the small intestine.

**Synonyms:**

## Ileostomy

An ileostomy brings the ileum through the abdominal wall to divert intestinal contents into an external pouch when the colon or rectum cannot be used normally. after proctocolectomy for ulcerative colitis or familial adenomatous polyposis, or to protect a distal anastomosis. Output is liquid and enzyme-rich, requiring careful fluid and skin management.

**Synonyms:**

## Ileum

Longest distal segment (3.5 m) with thinner walls, shorter villi, and Peyer's patches on the antimesenteric border. Absorbs vitamin B12, bile salts, remaining nutrients. Ileocecal valve prevents colonic backflow. Crohn's disease most commonly affects the terminal ileum; resection may cause B12 deficiency and bile salt malabsorption.

**Synonyms:**

## Ileus

Failure of coordinated intestinal propulsion without a mechanical blockage, usually from postoperative bowel inhibition, inflammation, metabolic disturbance, or medication effect. It causes distension, nausea, vomiting, and reduced passage of flatus or stool.

**Synonyms:**

## Iliotibial Band Syndrome

Lateral knee pain from IT band friction over lateral femoral epicondyle. Common in runners. Treatment: rest, stretching, strengthening, biomechanical correction.

**Synonyms:**

## Ilium

Largest hip bone forming the superior portion. Body contributes to acetabulum; wing has a concave iliac fossa. Iliac crest runs ASIS to PSIS, a palpable landmark for lumbar puncture level. Sacroiliac joint articulates with sacrum. Gluteal muscles originate from its external surface; iliacus fills its fossa.

**Synonyms:**

## Illness Anxiety Disorder

Preoccupation with having or acquiring a serious illness, with minimal or no somatic symptoms present. The individual has a high level of anxiety about health, performs excessive health-related behaviors, and experiences maladaptive avoidance. Symptoms persist for at least six months. The individual is not delusional and insight may vary.

**Synonyms:**

---

### Image Display

The presentation of medical images in views and contrast settings that allow anatomy and abnormalities to be assessed.

**Synonyms:**

### Image Processing

The mathematical or computer-based manipulation of acquired medical-image data to reconstruct, enhance, correct, or display an image.

**Synonyms:**

### Image Quality

The degree to which an image accurately and clearly shows the structures relevant to diagnosis. It is affected by resolution, contrast, noise, and artifacts.

**Synonyms:**

### Image Reconstruction

Mathematical process converting projection data to cross-sectional images. Iterative methods (OSEM) superior to filtered back projection. Corrects for attenuation, scatter, resolution.

**Synonyms:**

### Image-Guided Ablation

Destruction of abnormal tissue using an energy source such as heat, cold, or chemicals while imaging guides placement and monitors the procedure.

**Synonyms:**

### Image-Guided Biopsy

Removal of a tissue sample with the position of the needle or instrument guided by ultrasound, CT, MRI, or fluoroscopy.

**Synonyms:**

### Image-Guided Drainage

Placement of a catheter or needle under imaging guidance to evacuate fluid, pus, blood, or bile from a pathologic collection. Indications include abscess, biloma, urinoma, pleural collection, and symptomatic cysts.

**Synonyms:**

### Image-Guided Therapy

A minimally invasive procedure performed with imaging to guide instruments or treatment to a target tissue.

**Synonyms:**

### Imaging

The production of pictures of internal body structures using methods such as radiography, ultrasound, computed tomography, magnetic resonance imaging, or nuclear medicine.

**Synonyms:**

### Imaging-Guided Biopsy

Tissue acquisition directed by ultrasound, CT, MRI, or fluoroscopy to target a lesion while avoiding critical structures. The procedure requires appropriate specimen handling, informed consent, bleeding-risk assessment, and post-procedure monitoring.

**Synonyms:**

### Iminoacetic Acid Scan

A nuclear-medicine examination using a technetium-labeled iminodiacetic acid compound to evaluate hepatobiliary function and bile flow. It is not primarily a renal scan.

**Synonyms:**

### Immediate Hypersensitivity

A rapid, typically immunoglobulin-E-mediated hypersensitivity reaction in which allergen cross-linking of mast-cell or basophil receptors releases inflammatory mediators. It can cause urticaria, bronchospasm, gastrointestinal symptoms, or anaphylaxis.

**Synonyms:**

### Immune and Infectious Diseases

A medical field encompassing disorders of the immune system and illnesses caused by pathogenic microorganisms. Immune system disorders include autoimmune diseases (e.g., lupus, rheumatoid arthritis), immunodeficiencies, and hypersensitivity reactions.

**Synonyms:**

---

## Immune Checkpoint

An inhibitory or stimulatory receptor-ligand pathway that regulates lymphocyte activation and limits tissue injury. Therapeutic blockade of inhibitory checkpoints such as CTLA-4 or PD-1 can enhance antitumor immunity but may cause immune-related adverse effects.

**Synonyms:**

## Immune Complex

A soluble or tissue-associated aggregate formed by antigen bound to antibody. Persistent or inadequately cleared immune complexes may activate complement and deposit in tissues, producing type III hypersensitivity and vasculitic or renal injury.

**Synonyms:**

## Immune Evasion

The ability of a pathogen, tumor, or other abnormal cell to avoid recognition or destruction by the immune system.

**Synonyms:**

## Immune Hemolytic Anemia

Anemia caused by immune-mediated destruction of red blood cells, either by autoantibodies or antibodies directed against foreign red-cell antigens. It may cause fatigue, jaundice, dark urine, splenomegaly, and laboratory evidence of hemolysis.

**Synonyms:**

## Immune Response

The coordinated reaction of the immune system to foreign substances (antigens), pathogens, or abnormal cells. The innate immune response acts rapidly and non-specifically (physical barriers, phagocytes, complement, NK cells, inflammation).

**Synonyms:**

## Immune Thrombocytopenia

An autoimmune disorder characterized by isolated thrombocytopenia (platelet count  $<100 \times 10^9/L$ ) due to autoantibody-mediated platelet destruction and impaired platelet production. Primary ITP (no identifiable cause) vs secondary (SLE, CLL, HIV,

HCV, drugs).

**Synonyms:**

## Immune Thrombocytopenic Purpura

An autoimmune bleeding disorder characterized by isolated thrombocytopenia (platelet count  $<100,000/L$ ) with normal white blood cell count and hemoglobin. Caused by autoantibodies (primarily IgG) directed against platelet surface glycoproteins (IIb/IIIa or Ib/IX), leading to splenic macrophage phagocytosis of platelets.

**Synonyms:**

## Immune Tolerance

The state of unresponsiveness of the immune system to self-antigens and to specific foreign antigens, preventing autoimmunity while preserving responses to pathogens. Central tolerance: deletion of self-reactive lymphocytes in the thymus (T cells) and bone marrow (B cells).

**Synonyms:**

## Immune-Mediated Necrotizing Myopathy

A subacute severe proximal myopathy with very high CK (often  $>10,000$ ), minimal inflammation on biopsy, necrotic fibers. Two major autoantibodies: anti-HMGCR (3-hydroxy-3-methylglutaryl-CoA reductase, statin-associated or spontaneous) and anti-SRP (signal recognition particle).

**Synonyms:**

## Immune-Related Adverse Event

An inflammatory or autoimmune toxicity caused by immune checkpoint blockade or another immune-activating cancer treatment. It may affect skin, bowel, liver, endocrine organs, lungs, heart, kidneys, or nervous system and often requires treatment-specific immunosuppression.

**Synonyms:**

## Immunization

The process of inducing protection against an infection, usually through vaccination. Recommended vaccines and schedules depend on age, previous doses, pregnancy, immune status, medical condi-

---

tions, travel, exposure risk, and current public-health guidance.

**Synonyms:**

### **Immunocompromised Host**

A person whose immune defenses are impaired by congenital disease, infection, malignancy, immunosuppressive treatment, organ failure, or another condition. Such patients have increased susceptibility to opportunistic infection, severe disease, and atypical presentations.

**Synonyms:**

### **Immunodeficiency**

Impaired development or function of one or more components of the immune system, resulting in increased susceptibility to infection, malignancy, or autoimmunity. It may be primary and genetic or secondary to disease, medication, malnutrition, or another acquired cause.

**Synonyms:**

### **Immunodeficiency and infections**

Immunocompromised individuals are at increased risk for opportunistic infections. Primary immunodeficiencies are genetic disorders affecting immune function. Secondary immunodeficiencies include HIV/AIDS, organ transplantation, chemotherapy, and corticosteroid use.

**Synonyms:**

### **Immunodeficiency Diseases**

Disorders in which one or more components of the immune system are absent, deficient, or dysfunctional. They may be inherited or acquired and can cause recurrent, severe, unusual, or persistent infections, autoimmune disease, and increased malignancy risk.

**Synonyms:**

### **Immunofluorescence**

A technique using fluorescently labeled antibodies to detect specific antigens in tissues, cells, or microorganisms; visualized by fluorescence microscopy.

**Synonyms:**

### **Immunoglobulin (Antibody)**

Y-shaped glycoprotein produced by plasma cells that specifically binds antigens. Composed of two identical heavy chains and two identical light chains linked by disulfide bonds. Variable regions (Fab) bind antigen; constant region (Fc) mediates effector functions (complement activation, Fc receptor binding).

**Synonyms:** Antibody

### **Immunoglobulin Replacement Therapy**

Indications: primary antibody deficiencies (XLA, CVID, hyper-IgM, specific antibody deficiency), secondary hypogammaglobulinemia (CLL, myeloma, post-rituximab, post-transplant) with recurrent infections.

**Synonyms:**

### **Immunohistochemistry**

A technique that uses labeled antibodies to detect specific antigens in tissue sections. It supports tumor classification, identification of lineage, assessment of predictive biomarkers, and detection of infectious or immune-mediated processes.

**Synonyms:**

### **Immunological Memory**

The ability of the adaptive immune system to mount a faster, larger, and more effective response upon re-exposure to an antigen, conferred by long-lived memory B cells and memory T cells generated during the primary response.

**Synonyms:**

### **Immunomodulators in Dermatology**

Topical immunomodulators treat inflammatory skin diseases without corticosteroid side effects. Pimecrolimus 1 percent cream and tacrolimus 0.03 and 0.1 percent ointments are calcineurin inhibitors used for atopic dermatitis, facial eczema, and intertriginous areas. They are steroid-sparing agents.

**Synonyms:**

### **Immunophenotyping**

Identification and characterization of cells according

---

to their surface, cytoplasmic, or nuclear antigens, usually by flow cytometry or immunohistochemistry. It is used to classify leukemias, lymphomas, immune-cell subsets, and some immunodeficiency disorders.

**Synonyms:**

### **Immunosenescence**

Age-related changes in innate and adaptive immunity that alter infection susceptibility, vaccine responses, inflammation, and cancer surveillance. It is influenced by chronic disease, nutrition, medications, and functional status.

**Synonyms:**

### **Immunosuppressant**

A drug that reduces immune system activity, used to prevent organ transplant rejection and to treat autoimmune and inflammatory diseases.

**Synonyms:**

### **Immunosuppression in Transplant**

Medications to prevent rejection. Induction with thymoglobulin or basiliximab. Maintenance with tacrolimus, mycophenolate, and prednisone. Monitor drug levels and renal function. Calcineurin inhibitor nephrotoxicity is major concern requiring dose optimization.

**Synonyms:**

### **Immunosuppression Screening**

Pre-treatment evaluation for latent or active infection, vaccination status, malignancy risk, and organ dysfunction before immunosuppressive therapy. Testing commonly includes tuberculosis, hepatitis B and C, HIV, blood counts, liver and kidney function, and pregnancy when relevant.

**Synonyms:**

### **Immunosuppressive Drug**

A drug that suppresses immune responses, used for organ transplantation, graft-versus-host disease, and autoimmune/inflammatory diseases.

**Synonyms:**

### **Immunotherapy**

Treatment using immune system to fight cancer. Types: checkpoint inhibitors (PD-1, PD-L1, CTLA-4), CAR T-cell therapy, cytokines, cancer vaccines. Examples: pembrolizumab, nivolumab, ipilimumab, axicabtagene ciloleucel.

**Synonyms:**

### **Immunotherapy and Biologic Treatments**

Advanced therapies that harness or modify the immune system to treat diseases, particularly cancer, autoimmune disorders, and inflammatory conditions. Biologics are large-molecule drugs derived from living organisms that target specific immune pathways, such as TNF inhibitors, monoclonal antibodies, and checkpoint inhibitors.

**Synonyms:**

### **Immunotherapy in Dermatology**

Cancer immunotherapy uses medicines that alter immune activity against skin cancers. Checkpoint inhibitors target pathways such as PD-1, PD-L1, or CTLA-4. Their use depends on the tumor type, stage, prior treatment, and the patient's health.

**Synonyms:**

### **Immunotoxicity**

Immune system damage from chemicals. Effects: immunosuppression, hypersensitivity, autoimmunity. Examples: benzene, chemotherapy, biologics.

**Synonyms:**

### **Impacted Tooth**

Tooth unable to erupt into functional position. Most common: mandibular third molars, maxillary canines. May cause pathology: cyst, root resorption, caries. Treatment: monitoring or extraction.

**Synonyms:**

### **Impedance Hearing Testing**

A group of tests, including tympanometry, that measure the movement of the eardrum and middle-ear function.

**Synonyms:**

---

### **Impella Device**

Percutaneous microaxial left ventricular assist device that actively pumps blood from the LV into the aorta, reducing LV workload and increasing cardiac output. Types: Impella 2.5 (up to 2.5 L/min), Impella CP (up to 3.7 L/min), Impella 5.0 (up to 5 L/min, surgically placed).

**Synonyms:**

### **Imperforate Anus**

A congenital anomaly where the anus is completely absent or fails to open at the perineum. Classified as low (distal to the levator ani complex) or high (proximal to the levator ani). Often associated with other anomalies including vertebral, anal, cardiac, tracheoesophageal, renal, and limb defects.

**Synonyms:**

### **Imperforate Hymen**

A congenital obstruction of the vaginal opening by an intact hymen without a normal central opening. After puberty it may cause absent menstruation, cyclic pelvic pain, urinary retention, or a pelvic mass from retained menstrual blood.

**Synonyms:**

### **Impetigo**

Impetigo is a superficial contagious bacterial skin infection producing fragile blisters or honey-colored crusts, commonly caused by *Staphylococcus aureus* or *Streptococcus pyogenes*, affecting children.

**Synonyms:**

### **Implant (Dental)**

A biocompatible fixture placed in the jawbone to support a dental prosthesis. It may be used for one missing tooth or to support a partial or complete denture; complications include infection, bone loss, and mechanical failure.

**Synonyms:** Dental

### **Implant Failure**

Loss of an implant's intended structural, biologic, or functional performance. Causes include infection, fracture, loosening, wear, malposition, thrombosis,

material degradation, and patient or tissue factors.

**Synonyms:**

### **Implant Sterilization**

Validated processing that removes or inactivates all viable microorganisms, including bacterial spores, from an implant. Methods include moist heat, ethylene oxide, radiation, and low-temperature plasma according to material and device requirements.

**Synonyms:**

### **Implant-Associated Infection**

Infection involving an implanted medical device or the tissue surrounding it. Microbial adherence and biofilm formation can impair antimicrobial penetration and often require device-directed therapy, source control, or removal.

**Synonyms:**

### **Implant-Supported Prosthesis**

A fixed or removable dental prosthesis that is supported or retained by one or more dental implants.

**Synonyms:**

### **Implantable Cardioverter Defibrillator**

An implanted device that detects dangerous ventricular rhythms and treats them with antitachycardia pacing or an electrical shock.

**Synonyms:**

### **Implantable Cardioverter-Defibrillator**

An implanted device that monitors heart rhythm and delivers electrical therapy (antitachycardia pacing or defibrillation) for life-threatening ventricular arrhythmias.

**Synonyms:**

### **Implantable Loop Recorder**

Subcutaneous device providing continuous ECG monitoring for up to 3 years. Used for evaluation of unexplained syncope, recurrent palpitations, cryptogenic stroke, and occult atrial fibrillation detection. Small size (coin-sized), inserted under local anesthesia in the chest.

**Synonyms:**

---

### **Implantable Port**

A subcutaneously placed vascular-access device consisting of a reservoir connected to a catheter, used for repeated administration of medication, fluids, blood products, or parenteral nutrition. It requires sterile access and may be complicated by infection, thrombosis, occlusion, or mechanical failure.

**Synonyms:**

### **Implantation**

The embedding of the blastocyst into the endometrium, occurring approximately 6-10 days after ovulation. The blastocyst hatches from the zona pellucida, and the trophoblast invades the decidua. Implantation triggers hCG production, which maintains the corpus luteum. Failure of implantation is a common cause of early pregnancy loss.

**Synonyms:**

### **Impression**

Summary of key findings and recommendations in radiology report.

**Synonyms:**

### **Imprinting**

A pattern of gene expression determined by whether a gene copy was inherited from the mother or father.

**Synonyms:**

### **Impulse Oscillometry**

A pulmonary function testing technique that measures respiratory impedance by applying small pressure oscillations during tidal breathing. It assesses large airway resistance (R5), small airway resistance (R5-R20), and reactance.

**Synonyms:**

### **In Situ Carcinoma**

Abnormal malignant cells confined to the tissue layer in which they arose and not yet invading through the basement membrane.

**Synonyms:**

### **In Vitro Fertilisation**

An assisted reproductive technology in which eggs

are retrieved from the ovaries, fertilized with sperm in a laboratory, and resulting embryos are transferred to the uterus.

**Synonyms:**

### **Inactivated Polio Vaccine**

Salk vaccine, a formalin-inactivated preparation containing all three poliovirus serotypes (1, 2, and 3), administered by intramuscular injection. The only polio vaccine used in the United States since 2000, and the recommended vaccine for immunocompromised individuals and pregnant women worldwide.

**Synonyms:**

### **Inborn Error of Metabolism**

An inherited disorder caused by a defect in a metabolic pathway, often resulting in accumulation of harmful substances or deficiency of essential products.

**Synonyms:**

### **Incentive Spirometry**

A device that provides visual feedback while a person inhales slowly and deeply. It may be used with coughing, mobilization, and other measures to support lung expansion after illness or surgery.

**Synonyms:**

### **Incidence**

Incidence concerns incidence; its medical significance is established from the defining features, setting, associated findings, and clinical question. Measures risk of developing disease. Incidence rate = new cases / population at risk x time unit.

**Synonyms:**

### **Incidental Finding**

An unexpected observation discovered during an examination performed for another reason. Its importance depends on the finding and the clinical context.

**Synonyms:**

### **Incidentaloma**

Incidental imaging finding of uncertain significance.

---

May require further evaluation.

**Synonyms:**

### **Incised Wound**

Clean-cut wound produced by a sharp-edged instrument (scalpel, knife, glass) that is longer on the skin surface than it is deep, featuring clean edges without tissue bridging or marginal abrasion.

**Synonyms:**

### **Incisional Biopsy**

Surgical removal of part of lesion. Diagnosis before definitive treatment.

**Synonyms:**

### **Incisional Hernia**

A hernia through a weakness in a previous surgical incision. It may appear as a bulge that becomes more prominent with standing or straining. Risk factors include wound infection, obesity, smoking, poor nutrition, chronic cough, and repeated surgery.

**Synonyms:**

### **Inclusion Body Myositis**

A slowly progressive inflammatory and degenerative muscle disease, usually causing asymmetric weakness of the finger flexors and quadriceps. Muscle biopsy may show endomysial inflammation and rimmed vacuoles. Response to immunotherapy is often limited.

**Synonyms:**

### **Inclusion-Cell (I-Cell) Disease**

A rare inherited lysosomal-storage disorder caused by impaired tagging and trafficking of lysosomal enzymes, leading to their secretion outside cells. It causes severe developmental delay, skeletal abnormalities, coarse facial features, and progressive multisystem disease. Management is supportive and coordinated by specialists.

**Synonyms:** I-Cell

### **Incontinence**

The involuntary loss of control over urination (urinary incontinence) or defecation (fecal inconti-

nence).

**Synonyms:**

### **Incontinence (Fecal)**

Involuntary fecal leakage. Causes: diarrhea, constipation with overflow, sphincter damage, neurological disease, medications. Assessment: history, examination, anorectal manometry. Treatment: bowel regimen, sphincter exercises, biofeedback, surgery if indicated.

**Synonyms:** Fecal

### **Incontinence (Urinary)**

Involuntary urine leakage. Types: stress (cough/sneeze), urge (overactive bladder), overflow (retention), functional (immobility/cognition), mixed. Assessment: history, bladder diary, urinalysis, post-void residual.

**Synonyms:** Urinary

### **Incontinentia Pigmenti**

An X-linked dominant disorder affecting skin, teeth, eyes, and the nervous system, caused by pathogenic variants in IKBKG. Skin lesions evolve through vesicular, verrucous, hyperpigmented, and atrophic stages and may be associated with retinal disease or seizures.

**Synonyms:**

### **Increased Intracranial Pressure**

Abnormally elevated pressure within the skull caused by brain swelling, hemorrhage, mass lesion, impaired cerebrospinal-fluid circulation, or venous obstruction. It can cause headache, vomiting, visual disturbance, reduced consciousness, and brain herniation.

**Synonyms:**

### **Increased Vascular Permeability**

A fundamental feature of acute inflammation that allows plasma proteins, fluid, and leukocytes to exit the vascular space and enter the extravascular tissue.

**Synonyms:**

---

### **Incubation period**

The time between when a person is exposed to an infection and when symptoms appear.

**Synonyms:**

### **Incubator**

A controlled-environment chamber culturing microorganisms, cells, or tissues at defined temperature, humidity, and atmospheric composition.

**Synonyms:**

### **Incus**

The incus, commonly known as the anvil, is the middle ossicle of the three bones in the middle ear, articulating with the malleus at the incudomalleolar joint and with the stapes at the incudostapedial joint.

**Synonyms:**

### **Independence**

The ability to perform activities and make decisions without assistance, although a person may still use devices, adaptations, or occasional support.

**Synonyms:**

### **India Immunization Schedule**

The Universal Immunization Schedule (UIP) of the Government of India, providing free vaccines to all children, adolescents, and pregnant women through the public health system.

**Synonyms:**

### **Indication**

A clinical condition, symptom, or question that provides the reason for performing a test, procedure, or treatment.

**Synonyms:**

### **Indigestion**

Indigestion concerns indigestion; its medical significance is established from the defining features, setting, associated findings, and clinical question. postprandial fullness, bloating, or nausea. It may result from functional dyspepsia, gastroesophageal reflux, peptic ulcer disease, medications, or other

gastrointestinal disorders.

**Synonyms:**

### **Indirect Antiglobulin Test**

A test that detects free, clinically significant antibodies in a patient's serum or plasma by incubating it with reagent erythrocytes. It is used for antibody screening, compatibility testing, and prenatal red-cell antibody evaluation.

**Synonyms:**

### **Indirect Calorimetry**

Measurement of oxygen consumption and carbon-dioxide production to estimate resting energy expenditure. It is the preferred method for determining energy needs when prediction equations are unreliable, particularly in critically ill or metabolically complex patients.

**Synonyms:**

### **Indirect Veneer**

Ceramic restoration fabricated in lab. Porcelain or composite. Aesthetic enhancement.

**Synonyms:**

### **Indium-111**

SPECT radionuclide, half-life 2.8 days. Used in WBC labeling, octreotide scanning. Emits gamma rays at 171 and 245 keV.

**Synonyms:**

### **Indium-111 Scan**

Nuclear medicine imaging using In-111. Used for WBC labeling, octreotide scanning.

**Synonyms:**

### **Indoor Allergens**

Substances inside buildings that can trigger allergic or asthma symptoms, including dust mites, mold, cockroach particles, and animal dander. Exposure may cause rhinitis, conjunctivitis, wheezing, or eczema. Reduction of exposure and appropriate allergy or asthma treatment depend on the identified trigger.

**Synonyms:**

---

### Induced Sputum Analysis

A method of assessing airway inflammation by examining sputum produced after inhaled saline stimulation. The types and proportions of inflammatory cells may support assessment of asthma, infection, COPD, or bronchiectasis.

**Synonyms:**

### Induction of Labor

The artificial initiation of uterine contractions before the onset of spontaneous labor.

**Synonyms:**

### Induction Therapy

Intensive initial treatment aimed at achieving remission, especially in acute leukemias.

**Synonyms:**

### Infant Botulism

A neuromuscular illness caused by intestinal colonization with *Clostridium botulinum* and production of botulinum neurotoxin in infants. It causes constipation, poor feeding, weak cry, hypotonia, facial weakness, and descending paralysis.

**Synonyms:**

### Infant Feeding

Provision of breast milk, appropriately prepared formula, or both to meet an infant's energy, protein, fluid, and micronutrient requirements. Feeding recommendations depend on age, growth, medical conditions, developmental readiness, and safe preparation practices.

**Synonyms:**

### Infant harlequin syndrome

A transient, benign cutaneous vascular phenomenon in neonates characterized by asymmetric flushing of one half of the body with sharp midline demarcation, caused by transient asymmetric sympathetic tone. The affected side is red and warm while the contralateral side is pale.

**Synonyms:**

### Infant Sleep Position

Placing an infant on the back for every sleep is recommended to reduce the risk of sleep-related death. Infants should sleep on a firm, separate surface without pillows, loose bedding, bumpers, or stuffed toys.

**Synonyms:**

### Infanticide

The killing of a child, in law typically defined as the killing of a newborn or infant (usually within the first year, or specifically within 24 hours of birth in some jurisdictions) by its mother while mentally disturbed by the effects of childbirth or lactation.

**Synonyms:**

### Infantile Colic

A behavioral syndrome in healthy infants characterized by episodes of excessive, inconsolable crying for >3 hours per day, >3 days per week, for >3 weeks (Wessel criteria). Onset typically at 2-3 weeks, peaks at 6-8 weeks, and resolves by 3-4 months of age.

**Synonyms:**

### Infantile hepatic hemangiomas

Benign vascular tumors of the liver occurring in infants, typically presenting within the first six months of life with hepatomegaly, high-output cardiac failure, consumptive hypothyroidism, or cutaneous hemangiomas. Large tumors may cause abdominal compartment syndrome and thrombocytopenia from Kasabach-Merritt phenomenon.

**Synonyms:**

### Infarction

Tissue death from prolonged ischemia. Examples: myocardial infarction, cerebral infarction.

**Synonyms:**

### Infection

Measures to prevent healthcare-associated infections: hand hygiene, personal protective equipment (PPE), isolation precautions (contact, droplet, airborne), sterilization, disinfection. See infection control.

---

**Synonyms:**

### **Infection (Geriatric)**

Infectious diseases in elderly often present atypically: fever may be absent, confusion may be sole symptom. Common infections: UTI, pneumonia, skin/soft tissue, bloodstream. Prevention: vaccination, hand hygiene, aspiration precautions. Treatment: earlier presentation, broader differential, drug interactions, renal dosing.

**Synonyms:** Geriatric

### **Infection Control**

Measures to prevent healthcare-associated infections: hand hygiene, personal protective equipment (PPE), isolation precautions (contact, droplet, airborne), sterilization, disinfection. Multidrug-resistant organisms: MRSA, VRE, *C. difficile*, carbapenem-resistant Enterobacteriaceae.

**Synonyms:**

### **Infection Imaging**

WBC scanning, gallium scanning, FDG PET. Detection of occult infection.

**Synonyms:**

### **Infection Prevention**

Measures that reduce the risk of infection, including hand hygiene, personal protective equipment, environmental cleaning, sterilization, disinfection, vaccination, and appropriate isolation precautions.

**Synonyms:**

### **Infections in Pregnancy**

Listeriosis: *Listeria monocytogenes* (deli meats, soft cheese), meningoenzephalitis, fetal loss, neonatal sepsis. Ampicillin + gentamicin. GBS: vaginal colonization 20-30 percent of pregnant women; universal screening at 35-37 weeks; intrapartum prophylaxis (penicillin G) for GBS-positive women to prevent early-onset neonatal disease.

**Synonyms:**

### **Infectious Arthritis**

Inflammation of a joint caused by infection, usually

bacterial and sometimes viral or fungal. Acute pain, swelling, warmth, fever, and restricted movement require urgent evaluation because joint damage can develop quickly.

**Synonyms:**

### **Infectious Disease**

Disease caused by pathogen. Examples: bacterial, viral, fungal, parasitic.

**Synonyms:**

### **Infectious Dose**

The number of viable organisms required to establish infection in a host under specified conditions. The dose depends on the pathogen, route of exposure, host defenses, and organism viability.

**Synonyms:**

### **Infectious Esophagitis**

Inflammation of the esophagus caused by an infectious organism, most often *Candida*, herpes simplex virus, or cytomegalovirus in immunocompromised patients. It commonly causes painful swallowing, difficulty swallowing, and retrosternal pain.

**Synonyms:**

### **Infectious Meningitis**

Infection and inflammation of the membranes surrounding the brain and spinal cord. Bacterial meningitis is a medical emergency; headache, fever, neck stiffness, vomiting, confusion, or a new rash requires immediate medical attention.

**Synonyms:**

### **Infectious Myringitis**

Inflammation and infection of the tympanic membrane, often associated with viral or bacterial respiratory infection. It can cause severe ear pain, fever, hearing reduction, and small fluid-filled blisters on the eardrum.

**Synonyms:**

### **Infective Endocarditis**

Infection of the endocardial surface of the heart, most commonly affecting the heart valves. It is

---

diagnosed using the Duke criteria, which include major criteria (positive blood cultures, echocardiographic evidence of vegetations) and minor criteria (predisposing heart condition, fever, vascular phenomena, immunologic phenomena).

**Synonyms:**

### Inferior

Positioned lower or closer to the feet.

**Synonyms:**

### Inferior Alveolar Nerve Block

A regional anesthetic injection near the mandibular foramen to anesthetize the inferior alveolar nerve before it enters the mandibular canal. It usually anesthetizes mandibular teeth on that side; the lingual nerve is often anesthetized incidentally.

**Synonyms:**

### Inferior hemifield loss

Loss of vision in the lower half of the visual field in one or both eyes, which localises to lesions of the superior retina or superior optic radiations passing through the parietal lobe. Causes include superior retinal detachment, branch retinal artery occlusion, and parietal lobe stroke.

**Synonyms:**

### Inferior Mesenteric Artery

Third major abdominal aortic branch at L3, the hindgut artery. Supplies distal transverse colon through rectum. Branches: left colic, sigmoid, superior rectal. The marginal artery of Drummond provides SMA-IMA collateral circulation. Occlusion may cause ischemic colitis at the splenic flexure watershed (Griffiths' point).

**Synonyms:**

### Inferior Vena Cava

Body's largest vein, formed by common iliac vein union at L5, returning lower body deoxygenated blood to the right atrium. Ascends right of the aorta, pierces the diaphragm at T8, enters the pericardium. Receives hepatic, renal, gonadal, and lumbar veins. IVC thrombosis/compression causes bilateral lower

extremity edema and DVT.

**Synonyms:**

### Infertility

Infertility is failure to achieve pregnancy after a defined period of regular unprotected intercourse, reflecting factors involving ovulation, sperm, reproductive anatomy, age, or unexplained causes. to conceive or carry a pregnancy. Causes may involve ovulation, reproductive anatomy, sperm, age-related fertility, medical conditions, or unexplained factors.

**Synonyms:**

### Infiltrate

Patchy lung opacity detected on imaging. Non-specific, may represent infection, edema, hemorrhage, inflammation.

**Synonyms:**

### Inflammaging

Persistent, low-grade, age-associated inflammatory activity linked to cellular senescence, immune dysregulation, chronic infection, tissue injury, and comorbidity. It contributes to frailty, atherosclerosis, sarcopenia, and neurodegenerative disease.

**Synonyms:**

### Inflammasomes

Multiprotein complexes activating caspase-1 -> cleavage of pro-IL-1 $\beta$ /pro-IL-18 -> mature IL-1 $\beta$ /IL-18 + pyroptosis (gasdermin D pores). Canonical: NLRP3 (crystals, ATP, K<sup>+</sup> efflux, ROS, lysosomal rupture), NLRC4 (flagellin, T3SS), AIM2 (cytosolic DNA), Pyrin (RhoA inactivation).

**Synonyms:**

### Inflammation

The body's protective response to injury or infection. Cardinal signs: redness (rubor), heat (calor), swelling (tumor), pain (dolor), loss of function (functio laesa). Mediators: histamine, prostaglandins, cytokines, complement. Acute: neutrophil-predominant. Chronic: lymphocyte/macrophage-predominant.

**Synonyms:**

---

### **Inflammation (Dietary)**

Chronic low-grade inflammation linked to diet. Western diet pro-inflammatory (saturated fat, sugar, refined grains). Mediterranean diet anti-inflammatory.

**Synonyms:** Dietary

### **Inflammation Imaging**

FDG PET sensitive for inflammatory processes. Differentiate infection from malignancy challenging.

**Synonyms:**

### **Inflammatory Back Pain**

A pattern of chronic back pain characterized by insidious onset, improvement with exercise, lack of improvement with rest, nocturnal pain, and prolonged morning stiffness. It suggests axial spondyloarthritis but is not diagnostic without supportive clinical, laboratory, and imaging findings.

**Synonyms:**

### **Inflammatory Bowel Disease**

Chronic relapsing inflammatory conditions of the gastrointestinal tract encompassing Crohn disease and ulcerative colitis, resulting from a dysregulated immune response in genetically susceptible individuals triggered by environmental factors and alterations in the gut microbiome.

**Synonyms:**

### **Inflammatory Bowel Disease Diet**

Crohn disease, ulcerative colitis. Nutritional support during flares. Exclusive enteral nutrition for Crohn induction. Individual triggers vary.

**Synonyms:**

### **Inflammatory Myopathies**

A group of autoimmune disorders characterized by chronic muscle inflammation and progressive proximal muscle weakness. The three main types are dermatomyositis, polymyositis, and inclusion body myositis.

**Synonyms:**

### **Influenza**

A contagious respiratory illness caused by influenza A or B viruses, characterized by sudden onset of fever, myalgia, headache, malaise, nonproductive cough, sore throat, and nasal congestion. Seasonal epidemics occur annually. Complications: pneumonia (primary viral or secondary bacterial), exacerbation of underlying conditions.

**Synonyms:**

### **Influenza Test**

A test for influenza A or B using a respiratory specimen. Rapid antigen tests provide quick results but may miss infection. Molecular tests are generally more sensitive and may identify or subtype influenza viruses; results must be interpreted with symptoms, timing, and local laboratory methods.

**Synonyms:**

### **Influenza Vaccination in Pregnancy**

Annual inactivated influenza vaccine recommended for all pregnant women. Pregnancy increases the risk of severe influenza (pneumonia, ICU admission, death) due to changes in immune function and cardiopulmonary physiology.

**Synonyms:**

### **Influenza Vaccine**

Inactivated influenza vaccine given annually starting at 6 months of age. Two doses needed in the first season for children under 9. Live attenuated nasal spray vaccine (FluMist) available for children over 2. Updated annually to match circulating strains. Reduces influenza complications, hospitalizations, and deaths.

**Synonyms:**

### **Influenza virus**

A segmented, negative-sense RNA virus belonging to the Orthomyxoviridae family. Influenza causes seasonal epidemics and occasional pandemics of respiratory illness. The virus has two surface glycoproteins: hemagglutinin (HA), which mediates attachment, and neuraminidase (NA), which facilitates release.

---

**Synonyms:**

### **Informed Consent**

Autonomous voluntary authorization given by a competent patient to undergo a specific medical intervention, procedure, or clinical trial.

**Synonyms:**

### **Informed Consent (Geriatric)**

Process of obtaining voluntary authorization from elderly patient with decision-making capacity. Capacity assessment: understanding, appreciation, reasoning, communication of choice. Impaired capacity may require surrogate decision-maker.

**Synonyms:** Geriatric

### **Infusion Pump**

Device controlling IV fluid delivery rate. Types: syringe pump, volumetric pump, elastomer. Precision: mL/hour. Alarms: occlusion, air embolism, completion.

**Synonyms:**

### **Ingestion**

The act of taking a substance into the digestive tract by swallowing. Ingestion of a toxic substance can cause poisoning.

**Synonyms:**

### **Ingrown Toenail**

Ingrown toenail (onychocryptosis) occurs when the nail edge grows into the surrounding skin, causing pain, redness, and swelling. It is common in adolescents and adults, exacerbated by improper nail trimming, tight shoes, and trauma. Treatment includes partial nail avulsion with matrixectomy (phenol application) for recurrent cases.

**Synonyms:**

### **Inguinal Canal**

An oblique passage (4 cm) through the anterior abdominal wall, from the deep (internal) inguinal ring to the superficial (external) inguinal ring, transmitting the spermatic cord in males and round ligament in females, plus ilioinguinal and genital branch of

genitofemoral nerves.

**Synonyms:**

### **Inguinal Hernia**

Protrusion of abdominal contents through the inguinal canal. Indirect (lateral to inferior epigastric vessels, through deep inguinal ring): congenital, patent processus vaginalis; most common overall (60-70%), male predominance.

**Synonyms:**

### **Inguinal Region**

Area at the thigh-trunk junction traversed by the inguinal ligament (ASIS to pubic tubercle). Clinically significant for inguinal hernias: indirect (through deep inguinal ring, most common) and direct (through Hesselbach's triangle).

**Synonyms:**

### **Inhalation Injury**

Thermal or chemical injury to the airway or lungs caused by smoke, heated gases, or toxic combustion products. It can produce upper-airway edema, bronchospasm, impaired mucociliary clearance, and carbon-monoxide or cyanide toxicity and may worsen after the initial burn.

**Synonyms:**

### **Inhalational Anesthesia**

Anesthetic maintenance or induction using volatile liquids or gases delivered through the respiratory tract. Depth is influenced by inspired concentration, alveolar ventilation, uptake, distribution, and the agent's blood-gas solubility.

**Synonyms:**

### **Inhaled Corticosteroids**

Anti-inflammatory medications delivered directly to the airways, reducing airway inflammation, mucus production, and bronchial hyperresponsiveness. Examples include fluticasone, budesonide, beclomethasone, and mometasone. They are the cornerstone of asthma maintenance therapy. Side effects include oral candidiasis and dysphonia.

**Synonyms:**

---

## Inhaled Nitric Oxide

A selective pulmonary vasodilator used in acute settings (acute respiratory failure, right heart failure, post-cardiac surgery). It reduces pulmonary vascular resistance and improves oxygenation by dilating well-ventilated pulmonary vessels (improving V/Q matching). It has a short half-life and requires continuous delivery.

**Synonyms:**

## Inhaler

Device for administering aerosolized medication. Types: MDI (metered-dose), DPI (dry powder).

**Synonyms:**

## Iniiencephaly

A rare, usually lethal neural-tube defect characterized by occipital bone defect, severe retroflexion of the head, and marked shortening or distortion of the cervical and thoracic spine. It is often identified prenatally and may occur with other congenital anomalies.

**Synonyms:**

## Injury Classification (Abrasion, Laceration, Contusion, Incised Wounds)

Forensic categorization of mechanical wounds. Abrasion: superficial friction injury affecting only the epidermis (e.g., scrape, graze, pattern abrasion).

**Synonyms:** Abrasion, Laceration, Contusion, Incised Wounds

## Injury Dating

Estimation of the age of an injury using clinical appearance, histopathology, imaging, and the history of symptoms. Exact dating is often uncertain, particularly for bruises and soft-tissue injuries, and findings should be reported with appropriate limitations.

**Synonyms:**

## Innate immune evasion

Mechanisms by which pathogens evade the innate immune system. Strategies include capsules that prevent phagocytosis, biofilms that protect against

immune cells, and intracellular survival within macrophages. Some bacteria produce enzymes that degrade complement components. Others modify their surface molecules to avoid recognition.

**Synonyms:**

## Innate Immunity

First line of defense against pathogens, present from birth. Rapid (minutes to hours), germline-encoded, lacks immunological memory.

**Synonyms:**

## Innate Lymphoid Cells

ILCs: lymphoid lineage, no rearranged antigen receptors, mirror Th subsets. ILC1 (T-bet, IFN-gamma): intracellular pathogens, IBD. ILC2 (GATA3, IL-5/13): helminths, allergy, asthma, tissue repair. ILC3 (ROR-gamma, IL-17/22): extracellular bacteria/fungi, lymphoid organogenesis.

**Synonyms:**

## Inner ear

The deepest part of the ear, consisting of the cochlea and the labyrinth.

**Synonyms:**

## Inoculation

The introduction of microorganisms or clinical material into a culture medium, host, or sterile site to initiate growth, infection, or immune response.

**Synonyms:**

## Inotrope

A drug that increases myocardial contractility (positive inotropy), used for cardiogenic shock, decompensated heart failure, and perioperative low-output states. Agents: dobutamine (beta-1 agonist), milrinone (PDE3 inhibitor), dopamine, epinephrine, norepinephrine (also vasopressors), and digoxin (chronic).

**Synonyms:**

## Inotropes in Anesthesia

Inotropes increase myocardial contractility. Dobutamine is a beta-1 and beta-2 agonist increasing

---

cardiac output with minimal effect on heart rate. Dose: 2 to 20 mcg/kg/min infusion. Milrinone is a phosphodiesterase-3 inhibitor increasing contractility and causing vasodilation.

**Synonyms:**

### Inpatient Rehabilitation

Intensive inpatient rehabilitation (3+ hours therapy/day) for acute conditions: stroke, spinal cord injury, traumatic brain injury, major trauma. See acute rehabilitation.

**Synonyms:**

### INR

International normalized ratio: a standardized measure of the prothrombin time (PT), calculated as  $(\text{patient PT} / \text{mean normal PT})^{\text{ISI}}$ , to ensure consistent monitoring of vitamin K antagonist (warfarin) therapy across laboratories. Target INR: 2-3 for most indications (AF, VTE); 2.5-3.5 for mechanical heart valves.

**Synonyms:**

### Insect bite

A cutaneous reaction resulting from the injection of salivary contents from an insect during feeding, causing a localized or systemic hypersensitivity response. Common presentations include a pruritic papule or wheal with surrounding erythema. Severe reactions may include anaphylaxis, particularly with Hymenoptera stings.

**Synonyms:**

### Insect Sting Allergies

Immune reactions to venom from insects such as bees, wasps, hornets, and fire ants. Reactions may be local or systemic; generalized hives, breathing difficulty, dizziness, vomiting, or throat swelling may indicate anaphylaxis and require emergency treatment.

**Synonyms:**

### Insomnia

Insomnia is persistent difficulty initiating or maintaining sleep, or early awakening, with daytime

impairment despite adequate opportunity and circumstances for sleep. too early despite adequate opportunity for sleep, with resulting daytime impairment. It may be acute or chronic and is often triggered by stress, anxiety, depression, or poor sleep habits.

**Synonyms:**

### Insomnia Disorder

Difficulty initiating or maintaining sleep, or early-morning awakening with inability to return to sleep, at least three nights per week for at least three months. The individual experiences clinically significant distress or impairment in functioning.

**Synonyms:**

### Inspection

Inspection examines inspection; interpretation depends on the specimen or body region, test method, reference range, and clinical question. the patient's overall appearance, posture, body habitus, gait, skin color, nutritional status, respiratory effort, and specific anatomical regions. Requires adequate lighting and proper patient exposure.

**Synonyms:**

### Inspiratory Crackles

Fine, discontinuous sounds heard during inspiration, caused by the sudden opening of collapsed airways. They are a hallmark of interstitial lung disease (bibasilar, Velcro-like crackles) and pulmonary fibrosis. They are also heard in pneumonia, atelectasis, and heart failure.

**Synonyms:**

### Instrument Sterilization

A validated process that destroys all forms of microbial life, including bacterial spores, on or within a medical instrument. Common methods include steam under pressure, ethylene oxide, hydrogen-peroxide plasma, and dry heat, selected according to device material and design.

**Synonyms:**

---

## **Instrumental Activities of Daily Living**

More complex activities required for independent community living, including medication management, shopping, cooking, finances, communication, transportation, and household tasks.

**Synonyms:**

## **Instrumental ADL**

A complex activity needed for independent community living, such as shopping, cooking, managing medicines or finances, and using transportation.

**Synonyms:**

## **Insufficient Cervix**

Painless cervical shortening and dilation during the second trimester, also called cervical insufficiency. It can cause recurrent mid-trimester pregnancy loss or spontaneous preterm birth without regular uterine contractions.

**Synonyms:** cervical insufficiency.

## **Insulin Aspart**

A rapid-acting insulin analog (modified amino acid sequence) with onset 10-20 minutes, peak 1-3 hours, duration 3-5 hours. Used to cover prandial glucose (injected at or just after meals) in type 1 and type 2 diabetes; also used in continuous subcutaneous insulin infusion (pump) and IV in acute settings.

**Synonyms:**

## **Insulin Autoantibodies**

Autoantibodies directed against insulin or other pancreatic beta-cell antigens, including GAD, IA-2, and ZnT8 antibodies. Their presence supports autoimmune type 1 diabetes but a negative panel does not exclude it.

**Synonyms:**

## **Insulin Glargine**

A long-acting basal insulin analog with a flat, peakless profile providing near-24-hour coverage, administered once daily (or twice in some patients). Formed by modification of human insulin producing slow, steady absorption from the injection depot. Used for type 1 and type 2 diabetes (basal compo-

nent).

**Synonyms:**

## **Insulin Injection Technique**

Insulin is injected into subcutaneous tissue using the prescribed device, dose, and site. Common sites include the abdomen, thighs, buttocks, and upper arms; rotating sites helps reduce lipohypertrophy and variable absorption. Technique should be individualized to the person and device.

**Synonyms:**

## **Insulin lipohypertrophy**

Thickened fatty tissue at repeated insulin-injection sites. Injecting into these areas can make insulin absorption unpredictable.

**Synonyms:**

## **Insulin Pen Devices**

Pre-filled or reusable insulin pen devices providing convenient and accurate insulin delivery. Benefits include portability precision dosing discrete injection and reduced needle phobia.

**Synonyms:**

## **Insulin Preparations**

Hormone synthesized by pancreatic beta cells that regulates glucose homeostasis by promoting glucose uptake in skeletal muscle and adipose tissue, suppressing hepatic glucose production, and inhibiting lipolysis.

**Synonyms:**

## **Insulin Pump Therapy**

Continuous subcutaneous insulin infusion delivering rapid-acting insulin analog through a catheter placed subcutaneously typically in the abdomen. Provides basal insulin at programmed rates and bolus doses at mealtimes.

**Synonyms:**

## **Insulin Resistance**

Diminished biological response to physiological insulin concentrations resulting in impaired glucose disposal in peripheral tissues and failure to suppress

---

hepatic glucose production. Pathophysiological hallmark of type two diabetes and metabolic syndrome.

**Synonyms:**

### **Insulin Resistance Syndromes**

Rare inherited severe insulin resistance syndromes include Donohue syndrome also known as leprechaunism, Rabson-Mendenhall syndrome, and type A insulin resistance syndrome caused by mutations in the insulin receptor gene. Donohue syndrome is the most severe with death in infancy.

**Synonyms:**

### **Insulin Secretion**

Release of insulin from pancreatic beta cells in response primarily to increased plasma glucose, with amplification by incretin hormones and nutrients. Insulin promotes glucose uptake, glycogen synthesis, lipogenesis, and protein synthesis while suppressing hepatic glucose production.

**Synonyms:**

### **Insulin Signaling**

The cellular process initiated when insulin binds its receptor and activates pathways that regulate glucose uptake, glycogen formation, protein synthesis, and fat metabolism.

**Synonyms:**

### **Insulin-induced lipohypertrophy**

A common complication of subcutaneous insulin therapy characterized by localized accumulation of adipose tissue at injection sites, caused by the lipogenic effect of insulin on subcutaneous fat. It presents as firm, rubbery, non-tender subcutaneous nodules that can cause unpredictable insulin absorption and glycemic variability.

**Synonyms:**

### **Insulin-like Growth Factor**

IGF-1 promotes growth. Produced in liver in response to GH.

**Synonyms:**

### **Insulinoma**

Insulinoma concerns insulinoma; its medical significance is established from the defining features, setting, associated findings, and clinical question. It causes episodes of fasting or exertional hypoglycaemia with autonomic and neuroglycopenic symptoms that improve when blood glucose is raised.

**Synonyms:**

### **Integrative Rehabilitation**

Combination of conventional and complementary therapies: acupuncture, massage, yoga, meditation.

**Synonyms:**

### **Integrans**

Genetic elements that capture and express gene cassettes through site-specific recombination. Integrans contain an integrase gene and a recombination site for gene cassette insertion. They are important vehicles for the spread of antibiotic resistance genes, particularly in gram-negative bacteria.

**Synonyms:**

### **Integumentary System**

The body system comprising the skin and its appendages: hair, nails, sweat glands, and sebaceous glands. It forms a protective barrier, limits fluid loss, contributes to thermoregulation and sensation, supports immune defence, and participates in vitamin D synthesis.

**Synonyms:**

### **Intellectual Disability**

Neurodevelopmental disorder with onset in the developmental period, characterised by deficits in intellectual and adaptive functioning across conceptual, social, and practical domains. DSM-5 grades severity by adaptive functioning: mild, moderate, severe, profound.

**Synonyms:**

### **Intensity-Modulated Radiation Therapy**

A computer-optimized form of three-dimensional radiation therapy that shapes and modulates the radiation dose to conform tightly to the target while

---

sparing adjacent normal tissue.

**Synonyms:**

### **Intensive Care Medicine**

Specialty managing critically ill patients. Components: monitoring, ventilatory support, hemodynamic support, infection control, nutrition, sedation, pain management. Common conditions: sepsis, ARDS, traumatic brain injury, post-cardiac arrest, multiorgan failure.

**Synonyms:**

### **Intensive Care Rehabilitation**

Early rehabilitation in ICU setting. Early mobilization, positioning, passive range of motion. Improves outcomes, reduces complications.

**Synonyms:**

### **Intensive Care Unit**

A specialist hospital unit providing continuous monitoring and life support for critically ill patients. In obstetrics, women may require ICU admission for: severe pre-eclampsia or eclampsia, massive postpartum hemorrhage, amniotic fluid embolism, sepsis, cardiac disease in pregnancy, or complications of anesthesia.

**Synonyms:**

### **Interatrial Septum**

The wall separating the right and left atria. It contains the fossa ovalis, a remnant of the foramen ovale from fetal circulation. The interatrial septum has a thinner area where transseptal puncture can be performed during cardiac catheterization.

**Synonyms:**

### **Intercostal Retraction**

Inward movement of the skin and soft tissues between the ribs during inspiration, indicating increased work of breathing. It is common in infants and children with respiratory distress and may accompany airway obstruction, bronchiolitis, pneumonia, asthma, or other pulmonary disease.

**Synonyms:**

### **Interdental Brush**

Small brush for cleaning between teeth. Used where spaces exist.

**Synonyms:**

### **Interference**

A factor that alters the accuracy or interpretation of a laboratory test, measurement, or drug effect.

**Synonyms:**

### **Interferon Signaling**

Type I IFN (IFN-alpha/beta): all nucleated cells produce; receptor IFNAR (ubiquitous); JAK1/TYK2 -> STAT1/2/IRF9 (ISGF3) -> ISGs (hundreds: antiviral, antiproliferative, immunomodulatory). Type II IFN (IFN-gamma): T/NK cells; receptor IFNGR; JAK1/JAK2 -> STAT1 -> GAS elements. Type III IFN (IFN-lambda): mucosal epithelium; receptor IFNLR.

**Synonyms:**

### **Interferon-Gamma Release Assay**

Blood tests measuring IFN-gamma release in response to M. tuberculosis antigens (ESAT-6, CFP-10). More specific than PPD and unaffected by BCG. Cannot distinguish latent from active TB.

**Synonyms:**

### **Interferonopathies**

A group of rare disorders caused by abnormal activation of type I interferon pathways. They can produce inflammation, neurologic disease, skin lesions, blood-vessel injury, or lung disease, often beginning in childhood.

**Synonyms:**

### **Interleukin**

A family of cytokines (interleukins) produced mainly by leukocytes that regulate immune cell growth, differentiation, activation, and communication. Examples: IL-1 and IL-6 (inflammation, fever), IL-2 (T-cell growth), IL-4/IL-13 (Th2, IgE), IL-5 (eosinophils), IL-10 (anti-inflammatory), IL-12 (Th1), IL-17 (Th17, autoimmunity), IL-23.

**Synonyms:**

---

### **Interleukin-6**

A cytokine involved in immune regulation and inflammation that stimulates production of acute-phase proteins by the liver.

**Synonyms:**

### **Intermediate Cuneiform**

Smallest cuneiform, centrally located between medial and lateral cuneiforms. Articulates with navicular, medial/lateral cuneiforms, and second metatarsal. Forms the transverse arch apex. Relatively fixed, contributing to midfoot stability. Injuries are typically associated with high-energy midfoot trauma.

**Synonyms:**

### **Intermediate Uveitis**

Inflammation primarily affecting the vitreous body, peripheral retina, and ciliary body, with the classic presentation being pars planitis, which is characterized by the presence of snowbanking (a white, inflammatory exudate on the inferior pars plana) and snowballs (vitreous inflammatory aggregates).

**Synonyms:**

### **Intermittent Auscultation**

Periodic assessment of the fetal heart rate with a fetoscope or Doppler device during labor rather than continuous electronic monitoring. The frequency of assessment depends on the stage of labor, risk factors, and local clinical protocol.

**Synonyms:**

### **Intermittent Claudication**

Reproducible muscle discomfort, usually in the calf, thigh, or buttock, induced by walking and relieved by rest, caused by exertional arterial insufficiency. It is distinguished from rest pain and nonvascular musculoskeletal pain by history and vascular testing.

**Synonyms:**

### **Intermittent Explosive Disorder**

A disorder characterized by recurrent, impulsive, problematic outbursts of verbal or physical aggression that are grossly disproportionate to the provocation.

The outbursts are not premeditated and cause marked distress or functional impairment. Age >6 years.

**Synonyms:**

### **Intermittent Fasting**

Cycling between fasting and eating periods. Methods: alternate-day fasting, 5:2 diet, time-restricted eating. Potential benefits: weight loss, metabolic health. Evidence emerging.

**Synonyms:**

### **Internal Hernia**

Herniation of bowel through a mesenteric defect common after Roux-en-Y gastric bypass creating a defect at the jejunojejunostomy. May cause intermittent or acute small bowel obstruction. Presents with episodic abdominal pain, nausea, and vomiting.

**Synonyms:**

### **Internal Iliac Artery**

Smaller common iliac terminal branch (hypogastric), supplying the pelvis, perineum, gluteal region, and medial thigh. Posterior division: iliolumbar, lateral sacral, superior gluteal. Anterior division: inferior gluteal, internal pudendal, obturator, vesical, uterine, vaginal, middle rectal arteries.

**Synonyms:**

### **Internal Jugular Vein**

Descends in the carotid sheath with the internal carotid artery and vagus nerve, draining brain, face, and neck. Begins at the jugular foramen as a sigmoid sinus continuation, joining the subclavian vein to form the brachiocephalic vein. Contains backflow-preventing valves. Used for central venous catheterization.

**Synonyms:**

### **Internal Oblique Muscle**

Middle flat abdominal layer deep to external oblique, from thoracolumbar fascia, iliac crest, and lateral inguinal ligament to lower ribs, linea alba, and pubic crest. Innervated by T7-T12 and L1. Ipsilateral rotation (opposite of external oblique). Contributes

---

to inguinal canal and abdominal wall integrity.

**Synonyms:**

### **Internal Podalic Version**

A maneuver where the operator inserts a hand into the uterus, grasps one or both fetal feet, and converts a transverse lie or cephalic presentation to a breech, then delivers by total breech extraction. Indication: delivery of the second twin (transverse lie) or severe fetal distress in the second stage. Rare in modern obstetrics.

**Synonyms:**

### **Internal Resorption**

Loss of dentin from pulp cavity inward. Pink spot may be visible. Treatment: root canal therapy.

**Synonyms:**

### **Internuclear Ophthalmoplegia**

A conjugate horizontal gaze disorder caused by a lesion of the medial longitudinal fasciculus (MLF), a heavily myelinated fiber tract that connects the abducens nucleus (CN VI) on one side to the oculomotor nucleus (CN III) on the contralateral side, coordinating horizontal gaze.

**Synonyms:**

### **Interpersonal Psychotherapy**

A time-limited, evidence-based psychotherapy for depression that focuses on the interpersonal context of mood symptoms. It identifies four problem areas: grief, role disputes, role transitions, and interpersonal deficits. IPT helps patients improve interpersonal functioning and social support.

**Synonyms:**

### **Interpreter**

A trained person who translates spoken or signed communication between a patient and healthcare professional.

**Synonyms:**

### **Interproximal Caries**

Dental caries occurring on the contact surfaces between adjacent teeth. It may be difficult to detect

clinically and is commonly assessed with bitewing radiographs when imaging is indicated.

**Synonyms:**

### **Interstitial (Cornual) Pregnancy**

An ectopic pregnancy implanted in the part of the fallopian tube that passes through the muscular wall of the uterus. It can enlarge before rupture and cause severe internal bleeding.

**Synonyms:** Cornual

### **Interstitial Cystitis**

Chronic bladder pain syndrome. Symptoms: suprapubic pain, frequency, urgency. Diagnosis: exclusion, cystoscopy with hydrodistension. Treatment: lifestyle modification, medications, bladder instillations, surgery.

**Synonyms:**

### **Interstitial Keratitis**

Inflammation of the corneal stroma without primary involvement of the corneal surface. It may follow infection, autoimmune disease, or trauma and can cause pain, photophobia, redness, and reduced vision.

**Synonyms:**

### **Interstitial Lung Disease**

A heterogeneous group of disorders with inflammation and fibrosis of lung parenchyma, causing restrictive physiology (reduced FVC and TLC with normal or elevated FEV1/FVC ratio).

**Synonyms:**

### **Interstitial Nephritis**

Inflammation of the renal interstitium and tubules, which can be acute or chronic. Acute interstitial nephritis is most commonly caused by medications, particularly NSAIDs, antibiotics including penicillins and cephalosporins, and proton pump inhibitors.

**Synonyms:**

### **Interstitial Pneumonia**

Inflammation centered on the interstitium. Caused

---

by Mycoplasma, Chlamydia, Legionella, and viruses. Presents with dry cough and diffuse crackles.

**Synonyms:**

### Intertrigo

Intertrigo concerns intertrigo; its medical significance is established from the defining features, setting, associated findings, and clinical question. moisture, heat, and lack of air circulation. Affects intertriginous areas: axillae, inframammary, inguinal, abdominal folds, and intergluteal cleft. Presents with erythema, maceration, fissuring, and erosions.

**Synonyms:**

### Interventional Procedures

Image-guided treatments: angioplasty, stenting, embolization, ablation, biopsy, drain placement. Advantages: minimally invasive, faster recovery, lower complication rates.

**Synonyms:**

### Interventional Radiologist

A physician trained to perform minimally invasive diagnostic and therapeutic procedures using medical imaging for guidance.

**Synonyms:**

### Interventional Radiology

Image-guided minimally invasive procedures. Examples: angioplasty, stenting, embolization, biopsy, ablation, drain placement. Reduces need for open surgery.

**Synonyms:**

### Interventricular Septum

The thick muscular wall separating the left and right ventricles. It has two portions: the muscular (inferior, thicker) and membranous (superior, thinner) portions. The septum contains parts of the cardiac conduction system, including the bundle of His.

**Synonyms:**

### Intervertebral Disc

A fibrocartilaginous cushion between adjacent ver-

tebral bodies, composed of a gelatinous nucleus pulposus surrounded by a tough annulus fibrosus. It absorbs shock and permits limited movement of the vertebral column.

**Synonyms:**

### Intestinal Atresia

A congenital obstruction of the small intestine (jejunum or ileum) caused by an intrauterine vascular accident (mesenteric ischemia) leading to aseptic necrosis and resorption of a segment of bowel. In contrast to duodenal atresia, it is not associated with Down syndrome.

**Synonyms:**

### Intestinal Ganglioneuromatosis

Benign proliferation of ganglion cells and nerve fibers in the gastrointestinal tract wall. May be diffuse involving the entire gastrointestinal tract or localized as ganglioneuromas. Associated with multiple endocrine neoplasia type 2B where intestinal ganglioneuromatosis may precede the development of medullary thyroid carcinoma.

**Synonyms:**

### Intestinal lipomatosis

Benign overgrowth of adipose tissue within the intestinal wall, most commonly affecting the ileum and colon. Often asymptomatic and discovered incidentally, but large lipomas can cause intussusception, gastrointestinal bleeding, or bowel obstruction.

**Synonyms:**

### Intestinal Lymphoma

Malignant proliferation of lymphoid cells arising in the small or large intestine. Important types include enteropathy-associated T-cell lymphoma, monomorphic epitheliotropic intestinal T-cell lymphoma, and diffuse large B-cell lymphoma.

**Synonyms:**

### Intestinal Malrotation

Congenital failure of normal midgut rotation and fixation, predisposing to a narrow mesenteric base, volvulus, and duodenal obstruction. Infants may

---

present with bilious vomiting, abdominal distension, or bowel ischemia; sudden symptoms require emergency assessment.

**Synonyms:**

### **Intestinal Obstruction**

A mechanical or functional blockage that prevents normal passage of intestinal contents. Causes include adhesions, hernias, tumors, inflammation, volvulus, and disorders of intestinal motility.

**Synonyms:**

### **Intestinal Perforation**

Full-thickness breach in the bowel wall allowing luminal contents to enter the peritoneal cavity. Causes include diverticulitis, appendicitis, peptic ulcer disease, and trauma. Presents with acute abdomen, peritonitis, and free air on imaging.

**Synonyms:**

### **Intestinal Pseudo-Obstruction**

Acute or chronic dilation of the bowel without mechanical obstruction due to neuromuscular dysfunction. Acute colonic pseudo-obstruction also called Ogilvie syndrome occurs in hospitalized or post-surgical patients.

**Synonyms:** Ogilvie syndrome.

### **Intimal Hyperplasia**

Proliferation and migration of vascular smooth-muscle cells with extracellular-matrix deposition within the intima after vascular injury or graft placement. It can produce restenosis at anastomoses, stents, dialysis access, or bypass grafts.

**Synonyms:**

### **Intimate Partner Violence in Pregnancy**

Physical, sexual, or psychological abuse by a current or former partner during pregnancy. It can harm the pregnant person and fetus and is associated with complications such as injury, preterm birth, and placental abruption.

**Synonyms:**

### **Intoxication**

A state of physical or mental impairment caused by recent exposure to a substance, such as alcohol, a medicine, or another drug.

**Synonyms:**

### **Intra-Abdominal Abscess**

Localized collection of pus within the abdomen commonly in the pelvis, between bowel loops, or beneath the diaphragm. Results from intra-abdominal infection or surgery. Presents with fever, abdominal pain, and leukocytosis. Diagnosed by CT with contrast showing rim-enhancing fluid collection.

**Synonyms:**

### **Intra-Abdominal Hypertension**

Sustained elevation of intra-abdominal pressure above twelve millimeters of mercury measured through the urinary bladder. Graded as grade one twelve to fifteen, grade two sixteen to twenty, grade three twenty-one to twenty-five, and grade four greater than twenty-five millimeters of mercury.

**Synonyms:**

### **Intra-aortic Balloon Pump**

Mechanical circulatory support. Inflatable catheter in descending aorta. Inflates during diastole (increases coronary perfusion), deflates during systole (reduces afterload). Indications: cardiogenic shock, unstable angina, high-risk PCI. Complications: limb ischemia, bleeding, infection.

**Synonyms:**

### **Intraabdominal cancer**

A broad term for malignancies arising within the abdominal cavity, including cancers of the colon, stomach, pancreas, liver, ovaries, and peritoneum. Presentation varies widely depending on the specific organ involved.

**Synonyms:**

### **Intraabdominal hernia**

Herniation of abdominal viscera through a congenital or acquired defect or abnormal mesenteric aperture within the peritoneal cavity, distinct from ven-

---

tral or inguinal hernias. Types include paraduodenal, foramen of Winslow, transmesocolic, and transomental hernias.

**Synonyms:**

### **Intracellular Fluid**

The fluid contained within cells, comprising approximately two thirds of total body water in a typical adult. Its major solutes include potassium, magnesium, phosphate, and intracellular proteins, and its composition is maintained by selective membrane transport.

**Synonyms:**

### **Intracellular pathogens**

Microorganisms that survive and replicate within host cells. Intracellular bacteria include *Mycobacterium*, *Listeria*, and *Chlamydia*. Viruses are obligate intracellular pathogens. Intracellular survival protects pathogens from antibiotics and immune responses.

**Synonyms:**

### **Intracerebral Hemorrhage**

Bleeding directly into the brain parenchyma, accounting for approximately ten to fifteen percent of all strokes and carrying a high mortality rate of approximately forty percent at thirty days.

**Synonyms:**

### **Intracranial Hemorrhage**

Bleeding within the cranial cavity. Epidural hematoma: arterial bleeding (middle meningeal artery), typically from temporal bone fracture; lucid interval then rapid deterioration. Subdural hematoma: venous bleeding from bridging veins; acute (<72h), subacute, or chronic (elderly, alcoholics).

**Synonyms:**

### **Intracranial Pressure**

The pressure within the cranial vault generated by brain tissue, cerebrospinal fluid, and intracranial blood. Sustained elevation can reduce cerebral perfusion and cause headache, vomiting, altered

consciousness, pupillary abnormalities, and brain herniation.

**Synonyms:**

### **Intraductal Papilloma**

A benign papillary tumor arising within a breast duct, often presenting with spontaneous unilateral bloody or clear nipple discharge. It may be solitary near the nipple or multiple in the peripheral breast.

**Synonyms:**

### **Intrahepatic Cholestasis of Pregnancy**

A pregnancy-associated liver disorder characterized mainly by itching without a primary rash and increased bile acids in the blood. It may increase fetal risk and requires clinical evaluation and monitoring.

**Synonyms:**

### **Intramedullary Nail**

A metal implant inserted into the medullary canal of a long bone to align and stabilize a fracture. It shares load along the bone axis and is commonly used for femoral and tibial shaft fractures.

**Synonyms:**

### **Intramural Hematoma**

Collection of blood within the wall of the gastrointestinal tract most commonly the duodenum. Caused by trauma, anticoagulation, or coagulopathy. Presents with abdominal pain, vomiting, and sometimes obstructive symptoms. Diagnosis is by CT showing circumferential wall thickening with high-attenuation hematoma.

**Synonyms:**

### **Intramuscular**

A route of drug administration in which the drug is injected into skeletal muscle (deltoid, vastus lateralis, gluteus maximus).

**Synonyms:**

### **Intraocular Lens**

Artificial lens replacing natural lens after cataract extraction. Types: monofocal (distance vision), multifocal/bifocal (near and distance), toric (astig-

---

matism), extended depth of focus. Implantation via small incision, folds for insertion. Complications: posterior capsule opacification, dysphotopsia, infection, retinal detachment.

**Synonyms:**

### **Intraocular lens dislocation**

Postoperative displacement of an implanted artificial intraocular lens from its intended position within the capsular bag or ciliary sulcus into the vitreous cavity or anterior chamber. It is most commonly caused by progressive zonular dehiscence and may require surgical repositioning or exchange.

**Synonyms:**

### **Intraocular Pressure**

The pressure generated by aqueous humor within the eye, normally maintained by a balance between aqueous production and outflow. Abnormal IOP is an important risk factor for glaucomatous optic neuropathy, but glaucoma can occur at statistically normal pressures.

**Synonyms:**

### **Intraocular tumor**

Any neoplasm arising within the eye, with uveal melanoma being the most common primary malignancy in adults and retinoblastoma the most common in children. Diagnosis requires dilated fundus examination, ultrasound, and MRI; treatment depends on tumour type, size, and location.

**Synonyms:**

### **Intraoperative Blood Transfusion**

Intraoperative blood transfusion replaces lost blood volume and maintains oxygen-carrying capacity during major surgery. Indications include hemoglobin less than 7 g/dL in stable patients, less than 8 g/dL in cardiac disease, or active hemorrhage with hemodynamic instability.

**Synonyms:**

### **Intraoperative Neuromonitoring**

Intraoperative neuromonitoring (IONM) uses electrophysiological techniques to monitor neural path-

way integrity during surgery. Somatosensory evoked potentials (SSEP) monitor sensory pathways. Motor evoked potentials (MEP) monitor motor pathways. Electromyography (EMG) monitors cranial nerves and spinal roots.

**Synonyms:**

### **Intraoperative Temperature Monitoring**

Monitoring body temperature during surgery to detect and manage hypothermia or hyperthermia. Possible sites include the esophagus, nasopharynx, bladder, rectum, skin, or a pulmonary artery catheter; accuracy depends on the site, device, perfusion, and clinical setting.

**Synonyms:**

### **Intraosseous Access**

Placement of a vascular-access needle into the medullary cavity of a suitable bone to permit rapid infusion of fluids, blood products, and medications when intravenous access is delayed or impossible. It is a temporary emergency route and can cause extravasation, infection, or compartment injury.

**Synonyms:**

### **Intraosseous Infusion**

Administration of fluids, blood products, or medications through an intraosseous access device. Infusion should be monitored for resistance, swelling, pain, and extravasation and replaced with definitive vascular access as soon as practical.

**Synonyms:**

### **Intrapartum**

The period during labor and childbirth, from the onset of regular uterine contractions leading to cervical dilation until delivery of the baby and placenta.

**Synonyms:**

### **Intrapulmonary Shunt**

Perfusion of alveoli without ventilation ( $V/Q = 0$ ). Blood passes through the pulmonary circulation without gas exchange, mixing with oxygenated blood and causing hypoxemia. It is seen in ARDS, pneumonia, and atelectasis. It is refractory to sup-

---

plemental oxygen.

**Synonyms:**

### **Intrathecal Chemotherapy**

Administration of chemotherapy directly into the cerebrospinal fluid via lumbar puncture or an Ommaya reservoir, used for leptomeningeal metastasis and central nervous system prophylaxis in leukemias and lymphomas.

**Synonyms:**

### **Intrathoracic localized obstruction**

A focal blockage within the thoracic cavity affecting the airways, esophagus, or great vessels, leading to localized symptoms depending on the structure involved. Causes include endobronchial tumors, foreign bodies, esophageal strictures, or vascular anomalies. Diagnosis is by imaging and endoscopy.

**Synonyms:**

### **Intrauterine Device**

IUD: a long-acting reversible contraceptive (LARC) device placed in the uterus. Types: copper IUD (ParaGard—hormone-free, up to 10-12 years, also emergency contraception) and levonorgestrel-releasing IUS (Mirena/Skyla—progestin, up to 3-8 years, reduces bleeding).

**Synonyms:**

### **Intrauterine Fetal Demise / Stillbirth**

Death of a fetus before complete delivery. The gestational-age definition varies by jurisdiction. Causes may include placental disease, umbilical-cord complications, infection, genetic abnormalities, maternal disease, or unexplained factors.

**Synonyms:**

### **Intrauterine Growth Restriction**

IUGR: a fetus with estimated weight below the 10th percentile (or growth velocity decline), usually with placental insufficiency or maternal/fetal factors.

**Synonyms:**

### **Intrauterine Pressure Catheter**

A fluid-filled catheter inserted into the uterine cavity

alongside the fetus to measure the intensity and frequency of contractions in mm Hg (Montevideo units, MVU).

**Synonyms:**

### **Intrauterine Transfusion**

Ultrasonically guided intravascular or intraperitoneal transfusion of fetal red blood cells to treat severe fetal anemia, most commonly from Rh isoimmunization. Performed through the umbilical vein using a 22-25 gauge needle. Packed red blood cells, CMV-negative and crossmatched, are transfused slowly.

**Synonyms:**

### **Intravascular Catheter Infections**

CLABSI: central line-associated bloodstream infection. Diagnosis: quantitative blood cultures (catheter vs peripheral >5:1), differential time to positivity (>2h), catheter tip culture (>15 CFU). Catheter-related BSIs: coagulase-negative staphylococci (most common), *S. aureus*, enterococci, gram-negatives, *Candida*.

**Synonyms:**

### **Intravascular Filter**

A device placed in a large vein to trap venous clots and reduce pulmonary embolism risk in selected patients who cannot receive or have not responded adequately to anticoagulation.

**Synonyms:**

### **Intravascular lymphoma**

A rare aggressive B-cell non-Hodgkin lymphoma characterized by proliferation of neoplastic lymphocytes within the lumina of small blood vessels, predominantly affecting the skin and central nervous system. Presents with livedo reticularis, skin nodules, neurological deficits, and fever of unknown origin.

**Synonyms:**

### **Intravascular Ultrasound**

Catheter-based imaging using a miniature ultrasound probe inside coronary arteries to visualize

---

vessel wall layers, plaque composition, and stent deployment. Provides more detailed information than angiography alone, including vessel remodeling, plaque burden, and true vessel diameter.

**Synonyms:**

### **Intravenous Anesthesia**

Anesthetic induction or maintenance using drugs delivered into a vein. It permits rapid titration but requires attention to dose, context-sensitive recovery, cardiovascular and respiratory effects, and the availability of a secure airway.

**Synonyms:**

### **Intravenous Lipid Emulsion Therapy**

Administration of a lipid emulsion as a rescue treatment for selected severe lipophilic drug toxicities, especially local-anesthetic systemic toxicity. It may act as a lipid sink and through metabolic and cardiovascular effects and requires critical-care monitoring.

**Synonyms:**

### **Intravenous pyelogram**

Intravenous pyelogram examines intravenous pyelogram; interpretation depends on the specimen or body region, test method, reference range, and clinical question. of iodinated contrast material. The contrast is filtered by the glomeruli and excreted through the collecting system, allowing sequential imaging of the renal parenchyma, calyces, renal pelvis, ureters, and bladder.

**Synonyms:**

### **Intraventricular Hemorrhage**

Bleeding into the germinal matrix and ventricular system, primarily in premature infants less than 32 weeks gestation. Graded I-IV by severity on cranial ultrasound. Grade I (germinal matrix only) and Grade II (intraventricular without dilation) have good prognosis.

**Synonyms:**

### **Intravitreal Injection**

An ophthalmological procedure in which medication

is injected directly into the vitreous cavity of the eye through the pars plana, a safe entry zone located approximately 3.5 to 4 millimeters posterior to the limbus, to deliver therapeutic agents directly to the retina and vitreous for the treatment of various retinal diseases.

**Synonyms:**

### **Intrinsic Renal AKI**

Acute kidney injury caused by damage to renal tissue. Causes include acute tubular injury, acute interstitial nephritis, glomerulonephritis, and vascular disorders. Laboratory findings vary with the cause and should not be interpreted in isolation.

**Synonyms:**

### **Intron**

A non-coding segment of a gene that is transcribed into RNA but spliced out before the messenger RNA is translated into a protein.

**Synonyms:**

### **Intussusception**

Condition in which a segment of intestine telescopes into the adjacent distal segment causing bowel obstruction and compromise of the mesenteric blood supply. It is the most common cause of intestinal obstruction in infants and children between six months and three years of age.

**Synonyms:**

### **Invasive Candidiasis**

A serious *Candida* infection that enters the bloodstream or deep organs, most often in people who are critically ill or immunocompromised. It may cause persistent fever or organ dysfunction and requires prompt medical diagnosis and treatment.

**Synonyms:**

### **Invasive ductal carcinoma**

The most common type of breast cancer, characterized by malignant cells that have broken through the duct wall and invaded surrounding breast tissue. It can metastasize via lymphatic or hematogenous spread.

---

**Synonyms:**

### **Invasive Lobular Carcinoma**

A breast cancer characterized by discohesive cells infiltrating in single-file lines. More frequently bilateral and multifocal than ductal carcinoma and harder to detect on imaging; usually hormone receptor positive.

**Synonyms:**

### **Inverse Agonist**

A type of drug that binds to a cell receptor and actively produces the opposite biological effect of an agonist, effectively turning down the receptor's baseline activity.

**Synonyms:**

### **Inversion**

Chromosomal segment reversed end-to-end. Paracentric: does not include centromere. Pericentric: includes centromere. Usually benign unless breakpoint disrupts gene.

**Synonyms:**

### **Involuntary Psychiatric Treatment**

Assessment, hospitalization, or treatment without the patient's consent under applicable law when serious mental disorder creates a substantial risk of harm or severe inability to meet basic needs. The least restrictive alternative, due process, and ongoing reassessment are required.

**Synonyms:**

### **Involution**

The process by which the uterus returns to its prepregnancy size after delivery. The uterus weighs approximately 1000 grams immediately postpartum and returns to approximately 60 grams by 6 weeks. Fundal height decreases approximately 1 cm per day.

**Synonyms:**

### **Iodide-associated sialadenitis**

Inflammation and swelling of the salivary glands caused by excessive iodide intake, typically

from medications such as amiodarone or iodine-containing contrast, resolving with dose reduction.

**Synonyms:**

### **Iodinated Contrast Media**

Contrast agents containing iodine used primarily for radiography, CT, angiography, and some fluoroscopic procedures. Important risks include immediate hypersensitivity-like reactions, extravasation, thyroid effects, and kidney injury in susceptible patients.

**Synonyms:**

### **Iodine**

Required for thyroid hormones. Deficiency: goiter, hypothyroidism, cretinism. Prevention: iodized salt, seafood. Excess can cause thyroid dysfunction.

**Synonyms:**

### **Iodine Swab**

Antiseptic for skin preparation. Povidone-iodine.

**Synonyms:**

### **Iodine-123**

Pure gamma emitter, half-life 13 hours. Used for thyroid imaging. No beta emission, lower radiation dose than I-131.

**Synonyms:**

### **Iodine-131**

A radioactive iodine isotope used in selected diagnostic and therapeutic procedures, especially for thyroid disease.

**Synonyms:**

### **Iododerma**

A papulopustular or acneiform skin eruption caused by iodine excess, presenting on the face and extensor surfaces, resolving with iodine restriction and symptomatic treatment.

**Synonyms:**

### **Ionizing Radiation**

Radiation with enough energy to remove elec-

---

trons from atoms and create ions, including X-rays, gamma rays, and certain particulate emissions. It can cause deterministic tissue effects at sufficient doses and stochastic cancer risk at lower doses.

**Synonyms:**

### **Ipecac**

Emetic no longer recommended for routine poisoning management. Risk of aspiration, delays charcoal administration.

**Synonyms:**

### **Ipratropium Bromide**

An inhaled anticholinergic (antimuscarinic) bronchodilator that blocks acetylcholine at airway smooth muscle muscarinic receptors. It reduces bronchospasm and mucus secretion. It is used in COPD and acute asthma exacerbations. It is less effective than beta-2 agonists in asthma but more effective in COPD.

**Synonyms:**

### **Ipsilateral**

Located on the same side of the body.

**Synonyms:**

### **Iridocyclitis**

Inflammation involving the iris and ciliary body, a form of anterior uveitis. It may cause eye pain, photophobia, redness, blurred vision, and cells or flare in the anterior chamber and may be associated with autoimmune disease, infection, trauma, or other causes.

**Synonyms:**

### **Iridotomy**

A procedure that creates a small opening in the iris to allow aqueous humor to pass between the posterior and anterior chambers. Laser peripheral iridotomy is used to treat or prevent selected forms of angle-closure glaucoma.

**Synonyms:**

### **Iris**

Iris concerns iris, a body structure, substance, or

clinical concept whose meaning depends on location, function, and patient context. light entry. Two muscles: sphincter pupillae (parasympathetic CN III, constricts in bright light) and dilator pupillae (sympathetic, dilates in darkness). Iris root attaches to the ciliary body.

**Synonyms:**

### **Iris atrophy**

Thinning or loss of iris tissue resulting from trauma, chronic inflammation, ischaemia, or neurodegenerative disease, leading to a translucent or patched iris appearance. It may be sectoral or diffuse and can be associated with decreased pupillary response, photophobia, or secondary glaucoma.

**Synonyms:**

### **Iritis**

Inflammation of the iris, the most common form of anterior uveitis. Presents with acute onset eye pain, photophobia, blurred vision, and redness (ciliary flush). Signs: cells and flare in the anterior chamber, keratic precipitates (KP), synechiae (adhesions between iris and lens).

**Synonyms:**

### **Iron**

Essential for hemoglobin, myoglobin, and electron transport. Heme iron from animal foods is generally more bioavailable than non-heme iron from plant foods. Deficiency is the most common nutritional deficiency worldwide and may result from blood loss, increased requirements, poor intake, or malabsorption.

**Synonyms:**

### **Iron deficiency**

The most common nutritional deficiency worldwide, resulting from inadequate iron intake, impaired absorption, or chronic blood loss, leading to reduced hemoglobin synthesis and microcytic hypochromic anemia. Clinical features include fatigue, pallor, koilonychia, pica, and angular cheilitis.

**Synonyms:**

---

### **Iron Deficiency Anemia**

Anemia caused by insufficient iron for hemoglobin production. It is often microcytic and hypochromic; treatment requires identifying the cause and replacing iron when appropriate.

**Synonyms:**

### **Iron-Deficiency Anemia**

Anemia caused by insufficient iron for normal hemoglobin production. It may cause fatigue, weakness, shortness of breath, paleness, headache, or unusual cravings such as ice; the cause of iron loss or inadequate intake should be identified.

**Synonyms:**

### **Iron-Deficiency Anaemia in Adolescents**

Iron-deficiency anaemia during adolescence, commonly related to rapid growth, inadequate dietary iron, or menstrual blood loss. Assessment should identify the cause and guide dietary advice and clinical treatment.

**Synonyms:**

### **Irregular Sleep-Wake Syndrome**

A circadian rhythm sleep-wake disorder with multiple irregular periods of sleep and wakefulness across the 24-hour day rather than one consolidated nighttime sleep period. It is associated with neurological disease, dementia, aging, and reduced exposure to environmental time cues.

**Synonyms:**

### **Irreversible Cell Injury**

Cell damage beyond the point of recovery, resulting in death by necrosis, apoptosis, or another regulated cell-death pathway. Key features include inability to reverse mitochondrial dysfunction and severe membrane or nuclear damage.

**Synonyms:**

### **Irritable Bowel Syndrome**

A chronic functional gastrointestinal disorder characterized by recurrent abdominal pain and altered bowel habits (diarrhea, constipation, or mixed) without identifiable structural pathology. Pathophysi-

ology involves dysregulation of the gut–brain axis, visceral hypersensitivity, altered motility, and imbalances in the gut microbiome.

**Synonyms:**

### **Irritable Bowel Syndrome Diet**

An individualized eating plan used to reduce irritable bowel syndrome symptoms. A limited trial of a low-FODMAP diet may help some people and should be followed by structured food reintroduction.

**Synonyms:**

### **Isaacs Syndrome**

A rare peripheral nerve hyperexcitability disorder causing continuous muscle-fibre activity, stiffness, cramps, fasciculations, myokymia, and delayed muscle relaxation. It may be autoimmune, paraneoplastic, or associated with inherited or acquired peripheral-nerve disorders.

**Synonyms:**

### **Isavuconazole**

A triazole antifungal agent used in the treatment of invasive aspergillosis and mucormycosis. Isavuconazole inhibits fungal lanosterol 14- $\alpha$  demethylase, disrupting ergosterol synthesis and fungal cell membrane integrity.

**Synonyms:**

### **Ischemia**

Reduced blood flow causing oxygen deprivation. Can lead to tissue damage or death.

**Synonyms:**

### **Ischemia-Reperfusion Injury**

The paradoxical tissue damage that occurs when blood flow is restored to previously ischemic tissue, a phenomenon with major clinical significance in myocardial infarction treatment, stroke management, organ transplantation, and shock resuscitation.

**Synonyms:**

### **Ischemic Cardiomyopathy**

Weakening of the heart muscle caused by coronary

---

artery disease and previous or ongoing myocardial ischemia. Scarred or poorly perfused myocardium can reduce contractile function and increase the risk of heart failure and ventricular arrhythmias.

**Synonyms:**

### Ischemic Colitis

Colonic mucosal ischemia resulting from reduced blood flow through the marginal artery and end-arteries, most commonly occurring at watershed areas between vascular territories, particularly the splenic flexure.

**Synonyms:**

### Ischemic gangrene

Death of tissue due to prolonged severe arterial insufficiency, most commonly in the extremities. Presents as dry, black, mummified tissue with a clear line of demarcation from viable tissue. Requires revascularization when possible and surgical debridement or amputation of necrotic tissue.

**Synonyms:**

### Ischemic Stroke

A neurologic deficit caused by inadequate blood flow to part of the brain, usually from thrombotic or embolic arterial occlusion. Causes include atherosclerotic disease, cardiac embolism, and small-vessel disease.

**Synonyms:**

### Ischium

Inferior-posterior hip bone. Ischial tuberosity bears seated weight and serves as hamstring attachment. Ischial spine is a pudendal nerve block landmark and determines pelvic outlet level. Lesser sciatic notch lies between spine and tuberosity.

**Synonyms:**

### Isocitrate Dehydrogenase

A regulated enzyme of the citric acid cycle that converts isocitrate to alpha-ketoglutarate while producing NADH and releasing carbon dioxide. Mitochondrial isoforms are stimulated by ADP and calcium and inhibited by ATP and NADH. Mutations

in IDH1 or IDH2 can produce the oncometabolite 2-hydroxyglutarate.

**Synonyms:**

### Isokinetic Exercise

Muscle contraction at constant speed throughout range of motion. Uses specialized equipment. Assesses and improves strength.

**Synonyms:**

### Isolation

Separation of sick persons with contagious disease. Examples: tuberculosis isolation, airborne infection isolation rooms.

**Synonyms:**

### Isolation (Social)

Lack of social contacts and interactions. Common in elderly: bereavement, mobility limitation, sensory impairment, retirement. Consequences: depression, cognitive decline, functional impairment, mortality. Interventions: social programs, transportation, technology, volunteer visits.

**Synonyms:** Social

### Isolation Precautions

Measures used with standard precautions to reduce transmission of infection. Additional precautions may be contact, droplet, or airborne, depending on the mode of spread.

**Synonyms:**

### Isoniazid Toxicity

Hepatotoxicity, peripheral neuropathy, seizures. Treatment: pyridoxine (vitamin B6) supplementation, activated charcoal, seizure control.

**Synonyms:**

### Isosorbide Dinitrate

An organic nitrate (and prodrug) that releases nitric oxide, relaxing vascular smooth muscle—predominantly venous (preload reduction) with coronary dilation.

**Synonyms:**

---

### Isosporiasis

Intestinal infection caused by the protozoan *Cystoisospora belli*. It typically causes watery diarrhea, abdominal cramps, nausea, fever, and weight loss and may be prolonged or severe in people with impaired cellular immunity.

**Synonyms:**

### Isotope

One of two or more atoms of the same element with the same number of protons but different numbers of neutrons.

**Synonyms:**

### Isotretinoin

A systemic retinoid used for severe, recalcitrant nodular acne. It reduces sebum production, normalizes follicular keratinization, decreases *Propionibacterium acnes*, and has anti-inflammatory effects. Dose is 0.5 to 1 mg/kg/day for 15 to 20 weeks, targeting cumulative dose of 120 to 150 mg/kg.

**Synonyms:**

### Itching

Itching, or pruritus, is an unpleasant sensation that provokes scratching and may arise from skin disease, allergy, systemic illness, medications, neuropathy, or psychogenic factors. It can be acute or chronic and may arise from skin disease, systemic illness, medication, or neuropathic mechanisms.

**Synonyms:**

### Iterative Reconstruction

Modern reconstruction method. OSEM (Ordered Subsets Expectation Maximization). Better quality, longer computation.

**Synonyms:**

### IV Fluids

Intravenous fluid therapy for volume resuscitation and maintenance. Crystalloids: normal saline (0.9% NaCl, increases chloride, risk of hyperchloremic metabolic acidosis), lactated Ringer (balanced, contains K<sup>+</sup>, Ca<sup>2+</sup>, lactate buffer, safer in large volumes), Plasma-Lyte (balanced, closest to plasma).

**Synonyms:**

### IVC Filter

Device placed in inferior vena cava to prevent pulmonary embolism. Indications: DVT/PE with contraindication to anticoagulation, recurrent PE despite anticoagulation. Complications: filter thrombosis, migration, perforation, IVC occlusion.

**Synonyms:**

### IVF

In vitro fertilization: the assisted reproductive technology in which oocytes are retrieved, fertilized by sperm outside the body (in vitro), and the resulting embryos transferred to the uterus. Indications: tubal factor, male factor (with ICSI), endometriosis, unexplained, ovulation disorders, genetic testing, and same-sex couples or individuals using donor sperm or eggs.

**Synonyms:**

### Immunoglobulin

An antibody protein produced by immune cells to recognize and help neutralize foreign substances.

**Synonyms:**

### Immunosuppressant Drug

A medicine that reduces immune-system activity, often to prevent transplant rejection or treat autoimmune disease.

**Synonyms:**

### Impaired Fasting Glucose

Blood glucose above the normal range after fasting but below the diagnostic threshold for diabetes.

**Synonyms:**

### Impaired Glucose Tolerance

Blood glucose above the normal range after a glucose challenge but below the diagnostic threshold for diabetes.

**Synonyms:**

### Infarct

An area of dead tissue caused by inadequate blood

---

supply.

**Synonyms:**

### **Islets of Langerhans**

Clusters of endocrine cells in the pancreas that produce hormones including insulin and glucagon.

**Synonyms:**

### **Iliac Artery**

An artery that supplies blood to the pelvis and lower limb.

**Synonyms:**

### **Immunoglobulin A**

An antibody found mainly in mucosal secretions, including saliva, tears, and intestinal fluid.

**Synonyms:**

### **Immunoglobulin G**

The most abundant antibody in blood, providing long-lasting protection against many infections.

**Synonyms:**

### **Immunoglobulin M**

The first major antibody produced during an initial immune response.

**Synonyms:**

### **Infectious Encephalitis**

Inflammation of the brain caused by an infectious organism, most often a virus.

**Synonyms:**

### **Intracranial Aneurysm**

A weakened, bulging area in a blood vessel within the skull.

**Synonyms:**

### **Intrahepatic Cholestasis**

Impaired bile flow within the liver, causing bile acids to accumulate in the blood.

**Synonyms:**

### **Impacted Wisdom Teeth**

Wisdom teeth that cannot emerge normally because they are blocked by bone, gum, or another tooth.

**Synonyms:**

### **Incompetent Cervix**

Early painless opening of the cervix during pregnancy, which may lead to pregnancy loss or premature birth.

**Synonyms:**

### **Infant Jaundice**

Yellowing of a newborn's skin or eyes caused by excess bilirubin in the blood.

**Synonyms:**

### **Infant Reflux**

Backflow of stomach contents into an infant's esophagus, often causing spitting up.

**Synonyms:**

### **Inflammatory Breast Cancer**

A rare, rapidly progressing breast cancer that causes redness, swelling, and skin thickening.

**Synonyms:**

### **Ingrown Hair**

A hair that curls back into the skin or grows sideways, causing an inflamed bump.

**Synonyms:**

### **Intestinal Ischemia**

Inadequate blood flow to the intestines, which can damage intestinal tissue.

**Synonyms:**

### **Intracranial Venous Malformations**

Abnormal collections or connections of veins within the skull that may bleed or affect nearby brain tissue.

**Synonyms:**

### **Icterus**

Yellow discoloration of the skin or eyes caused by

---

excess bilirubin; also called jaundice.

**Synonyms:** jaundice.

### **Ictus**

A sudden neurological event, such as a stroke or seizure.

**Synonyms:**

### **Ileal Conduit**

A surgically created passage that diverts urine through a segment of ileum to an opening in the abdominal wall.

**Synonyms:**

### **Infectious Mononucleosis**

A viral illness, usually caused by Epstein-Barr virus, characterized by fatigue, sore throat, and swollen lymph nodes.

**Synonyms:**

### **Insertion**

Movement of a muscle attachment toward its fixed attachment, or placement of one structure into another.

**Synonyms:**

### **Inspiration**

The act of breathing air into the lungs.

**Synonyms:**

### **Intubation**

Placement of a tube into the airway or another body passage to maintain it or deliver treatment.

**Synonyms:**

### **Iontophoresis**

Iontophoresis concerns iontophoresis; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Immunity**

The ability of the body to recognize and resist infectious agents or other foreign substances through

innate or adaptive defenses.

**Synonyms:**

### **Immunology**

The medical and biological study of the immune system, immune responses, and immune disorders.

**Synonyms:**

### **Immunosuppression**

Reduction of immune-system activity, caused by disease or intentionally induced with medications or other treatment.

**Synonyms:**

### **Injection**

Introduction of a medication, fluid, or other substance into the body with a needle or other injection device.

**Synonyms:**

### **Insulin Shock**

Severe hypoglycemia, historically associated with excessive insulin and characterized by confusion, seizures, loss of consciousness, or other neurologic dysfunction.

**Synonyms:**

### **Interneurons**

Neurons within the central nervous system that connect other neurons and help process or coordinate neural signals.

**Synonyms:**

### **Intraaortic Balloon Pump**

A temporary circulatory-support device with a balloon in the descending aorta that inflates and deflates in coordination with the cardiac cycle.

**Synonyms:**

### **Intravenous Pyelography**

An X-ray examination of the urinary tract after intravenous contrast administration; it is now often replaced by CT urography or ultrasound.

**Synonyms:**

---

### **Intrinsic Factor**

A protein secreted by stomach parietal cells that is required for vitamin B12 absorption in the terminal ileum.

**Synonyms:**

### **In Vitro Fertilization**

A fertility treatment in which an egg and sperm are combined in a laboratory and a resulting embryo is transferred to the uterus.

**Synonyms:**

### **Irrigation**

Flushing a wound, body cavity, or organ with fluid to remove blood, debris, microorganisms, or unwanted material.

**Synonyms:**

### **Isometric**

Describing muscle contraction that produces force without a meaningful change in muscle length or joint movement.

**Synonyms:**

### **Isotonic**

Describing muscle contraction in which muscle length changes to move a joint under a relatively constant external load.

**Synonyms:**

### **Impingement Syndrome**

Pain and restricted movement caused when a tendon or other soft tissue is compressed between bones, commonly in the shoulder during elevation of the arm.

**Synonyms:**

### **Incarcerated Hernia**

A hernia whose protruded tissue cannot be returned to the abdominal cavity. It may progress to strangulation and requires urgent clinical assessment.

**Synonyms:**

### **Impacted Fracture**

A fracture in which one broken bone fragment is driven firmly into another, often producing relative stability but sometimes causing shortening or deformity.

**Synonyms:**

### **Infantile Spasms**

A severe seizure disorder of infancy characterized by brief, sudden flexion or extension spasms, often occurring in clusters and associated with developmental impairment.

**Synonyms:**

### **Iodine Deficiency**

Inadequate iodine intake or availability, which can impair thyroid-hormone production and cause goiter, hypothyroidism, or developmental problems in a fetus or child.

**Synonyms:**

### **Intestinal Metaplasia**

Replacement of the normal lining of an intestinal or gastric region by intestinal-type epithelium, usually in response to chronic injury or inflammation and sometimes associated with increased cancer risk.

**Synonyms:**

### **Irritant Contact Dermatitis**

Inflammation of the skin caused by direct chemical or physical injury rather than an immune-mediated allergy. It commonly produces redness, burning, scaling, fissures, or pain at the area of exposure.

**Synonyms:**

### **Isolated Systolic Hypertension**

Elevated systolic blood pressure with normal diastolic pressure, commonly related to arterial stiffness in older adults and associated with increased cardiovascular risk.

**Synonyms:**

### **Immersion Foot (Trench Foot)**

A painful cold injury caused by prolonged exposure of the feet to cold, wet conditions without freezing,

---

leading to numbness, swelling, and skin changes.

**Synonyms:** Trench Foot

### **Incompetence**

Failure of a structure to close or function adequately; examples include valvular incompetence of the heart and cervical incompetence during pregnancy.

**Synonyms:**

### **Incoordination (Ataxia)**

Impaired coordination of voluntary movement, often caused by disease affecting the cerebellum or other parts of the nervous system.

**Synonyms:** Ataxia

### **Incisor**

One of the front teeth, adapted mainly for cutting or biting food.

**Synonyms:**

### **Incision**

A deliberate surgical cut made into the skin or other tissue.

**Synonyms:**

### **Infant Mortality**

The death of an infant before the first birthday; the infant mortality rate is usually expressed per 1,000 live births.

**Synonyms:**

### **Infestation**

The presence or invasion of parasitic organisms, such as lice, mites, or worms, on or in the body.

**Synonyms:**

### **Innervation**

The nerve supply to an organ, muscle, or area of the body, including the functional control provided by those nerves.

**Synonyms:**

### **Internal Capsule**

A compact band of white-matter nerve fibres in

the brain carrying important motor and sensory pathways between the cerebral cortex and lower centres.

**Synonyms:**

### **Intestine**

The part of the digestive tract extending from the stomach to the anus, consisting of the small intestine and large intestine.

**Synonyms:**

### **Introitus**

An entrance or opening, especially the entrance to the vagina.

**Synonyms:**

### **Involuntary Muscle**

Muscle that contracts without conscious control, including smooth muscle in internal organs and cardiac muscle in the heart.

**Synonyms:**

### **Iron-Deficiency Anaemia**

Anaemia caused by insufficient iron for haemoglobin production, commonly due to blood loss, inadequate intake, or impaired absorption.

**Synonyms:**

### **Ischaemia**

Inadequate blood flow and oxygen delivery to a tissue, usually because of narrowed or blocked blood vessels, causing dysfunction or injury.

**Synonyms:**

### **Ischaemic Heart Disease (IHD)**

Heart disease caused by reduced blood supply to the heart muscle, usually as a result of coronary artery disease; it may cause angina or myocardial infarction.

### **iatrogenic disease**

iatrogenic disease denotes a clinical condition or finding involving iatrogenic disease; evaluation identifies mechanism, affected system, severity, complications, and management.

---

**Synonyms:**

**ibandronic acid**

ibandronic acid denotes ibandronic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**ibogaine**

ibogaine refers to ibogaine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ibritumomab tiuxetan**

ibritumomab tiuxetan refers to ibritumomab tiuxetan, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ibuprofen**

ibuprofen concerns ibuprofen, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**icteric index**

icteric index refers to icteric index, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**idarubicin**

idarubicin concerns idarubicin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**idoxuridine**

idoxuridine refers to idoxuridine, a medical condition or clinical finding defined by its features, causes,

affected system, and patient context.

**Synonyms:**

**ifosfamide**

ifosfamide refers to ifosfamide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**igh gene**

igh gene denotes igh gene, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**ikappab kinase**

ikappab kinase refers to ikappab kinase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ileal fistula**

ileal fistula refers to ileal fistula, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ileal hemorrhage**

ileal hemorrhage denotes a clinical condition or finding involving ileal hemorrhage; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**ileal neoplasm**

ileal neoplasm denotes a neoplastic condition involving ileal neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**ileal stenosis**

ileal stenosis denotes a clinical condition or finding involving ileal stenosis; evaluation identifies mechanism, affected system, severity, complications, and

---

management.

**Synonyms:**

### **ileal ulcer**

ileal ulcer refers to ileal ulcer, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **iliac crest**

iliac crest refers to iliac crest, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **iliac vein**

iliac vein refers to iliac vein, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **illusion**

illusion refers to illusion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **iloprost**

iloprost concerns iloprost, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **image view**

image view refers to image view, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **imagination**

imagination refers to imagination, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **imaging technique**

imaging technique is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat imaging technique.

**Synonyms:**

### **imatinib mesylate**

imatinib mesylate refers to imatinib mesylate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **imide**

imide refers to imide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **imines**

imines refers to imines, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **imino acid**

imino acid denotes imino acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **imipenem**

imipenem concerns imipenem, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **imipramine**

imipramine refers to imipramine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**imiquimod**

imiquimod refers to imiquimod, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immature**

immature refers to immature, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immobilization**

immobilization refers to immobilization, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immune status**

immune status refers to immune status, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immune system**

immune system refers to immune system, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immunoblast count**

immunoblast count refers to immunoblast count, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immunoblotting**

immunoblotting refers to immunoblotting, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immunochemistry**

immunochemistry refers to immunochemistry, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immunocompetence**

immunocompetence refers to immunocompetence, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immunoconjugate**

immunoconjugate refers to immunoconjugate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immunocytochemistry**

immunocytochemistry refers to immunocytochemistry, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immunoelectrophoresis**

immunoelectrophoresis refers to immunoelectrophoresis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immunofluorescence technique**

immunofluorescence technique refers to immunofluorescence technique, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immunogenetics**

immunogenetics denotes immunogenetics, a biological component or molecular process interpreted

---

through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **immunoglobulin d**

immunoglobulin d concerns immunoglobulin d, a biologic or physiologic concept used in research, laboratory medicine, and the explanation of disease.

**Synonyms:**

### **immunoglobulin idiotyp**

immunoglobulin idiotyp concerns immunoglobulin idiotyp, a biologic or physiologic concept used in research, laboratory medicine, and the explanation of disease.

**Synonyms:**

### **immunoglobulin isotype**

immunoglobulin isotype concerns immunoglobulin isotype, a biologic or physiologic concept used in research, laboratory medicine, and the explanation of disease.

**Synonyms:**

### **immunologic adjuvant**

immunologic adjuvant refers to immunologic adjuvant, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **immunologic factor**

immunologic factor refers to immunologic factor, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **immunologic memory**

immunologic memory refers to immunologic memory, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **immunologic skin test**

immunologic skin test is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat immunologic skin test.

**Synonyms:**

### **immunologic surveillance**

immunologic surveillance refers to immunologic surveillance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **immunologic technique**

immunologic technique refers to immunologic technique, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **immunologic test**

immunologic test is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat immunologic test.

**Synonyms:**

### **immunological synapse**

immunological synapse refers to immunological synapse, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **immunomodulation**

immunomodulation refers to immunomodulation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **immunoprecipitation**

immunoprecipitation refers to immunoprecipitation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**immunoprotein**

immunoprotein denotes immunoprotein, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**immunoradiometric assay**

immunoradiometric assay is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat immunoradiometric assay.

**Synonyms:**

**immunoregulation**

immunoregulation refers to immunoregulation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immunosuppressive**

immunosuppressive refers to immunosuppressive, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**immunotoxin**

immunotoxin denotes an infectious or toxic condition involving immunotoxin; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**immunoturbidimetry**

immunoturbidimetry refers to immunoturbidimetry, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**imp dehydrogenase**

imp dehydrogenase refers to imp dehydrogenase,

a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**imperforate vagina**

imperforate vagina refers to imperforate vagina, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**implant**

implant refers to implant, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**implantable defibrillator**

implantable defibrillator refers to implantable defibrillator, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**implantation procedure**

implantation procedure is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat implantation procedure.

**Synonyms:**

**importance weight**

importance weight refers to importance weight, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**impulsive behavior**

impulsive behavior refers to impulsive behavior, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**in situ hybridization**

in situ hybridization refers to in situ hybridization, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**in vitro**

in vitro refers to in vitro, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inalimarev**

inalimarev refers to inalimarev, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inamrinone**

inamrinone refers to inamrinone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inbreed**

inbreed refers to inbreed, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inclusion body**

inclusion body refers to inclusion body, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inclusion conjunctivitis**

inclusion conjunctivitis refers to inclusion conjunctivitis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**incomplete ossification**

incomplete ossification refers to incomplete ossification, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**increased libido**

increased libido refers to increased libido, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**increased osteoid**

increased osteoid refers to increased osteoid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**incretins**

incretins refers to incretins, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**incyclinide**

incyclinide refers to incyclinide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**indapamide**

indapamide refers to indapamide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**indel mutation**

indel mutation refers to indel mutation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**indeterminate**

indeterminate refers to indeterminate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**indican**

indican refers to indican, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**indigo carmine**

indigo carmine refers to indigo carmine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**indinavir**

indinavir concerns indinavir, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**indium**

indium refers to indium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**indocyanine green**

indocyanine green refers to indocyanine green, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**indole**

indole refers to indole, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**indole-3-carbinol**

indole-3-carbinol refers to indole-3-carbinol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**indolent**

indolent refers to indolent, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**indoles**

indoles refers to indoles, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**indomethacin**

indomethacin refers to indomethacin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**indoximod**

indoximod refers to indoximod, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**induced abortion**

induced abortion refers to induced abortion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**induced hyperthermia**

induced hyperthermia refers to induced hyperthermia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**induced labor**

induced labor refers to induced labor, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**indwelling catheter**

indwelling catheter refers to indwelling catheter, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infant**

infant refers to infant, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infant formula**

infant formula refers to infant formula, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infant gynecomastia**

infant gynecomastia refers to infant gynecomastia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infant incubators**

infant incubators refers to infant incubators, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infant leukemia**

infant leukemia denotes a neoplastic condition involving infant leukemia; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**infant nutrition**

infant nutrition refers to infant nutrition, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infant reflex**

infant reflex refers to infant reflex, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infantile fibrosarcoma**

infantile fibrosarcoma denotes a neoplastic condition involving infantile fibrosarcoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**infantile spasm**

infantile spasm refers to infantile spasm, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infectious arteritis**

infectious arteritis denotes an infectious or toxic condition involving infectious arteritis; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**infectious conjunctivitis**

infectious conjunctivitis denotes an infectious or toxic condition involving infectious conjunctivitis; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**infectious encephalomyelitis**

infectious encephalomyelitis denotes an infectious or toxic condition involving infectious encephalomyelitis; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

---

**infectious enterocolitis**

infectious enterocolitis denotes an infectious or toxic condition involving infectious enterocolitis; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**infectious mediastinitis**

infectious mediastinitis denotes an infectious or toxic condition involving infectious mediastinitis; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**infective cervicitis**

infective cervicitis refers to infective cervicitis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infective cystitis**

infective cystitis refers to infective cystitis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infective phlebitis**

infective phlebitis refers to infective phlebitis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infective vaginitis**

infective vaginitis refers to infective vaginitis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inferior colliculus**

inferior colliculus refers to inferior colliculus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infiltration**

infiltration refers to infiltration, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inflammatory response**

inflammatory response refers to inflammatory response, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infiximab**

infiximab concerns infiximab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**influenza a virus**

influenza a virus is a virus or viral group associated with influenza a virus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**influenzavirus A**

influenzavirus A is a virus or viral group associated with influenzavirus a; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**influenzavirus b**

influenzavirus b is a virus or viral group associated with influenzavirus b; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**informatics**

informatics refers to informatics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**informative**

informative refers to informative, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infrared rays**

infrared rays refers to infrared rays, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infrared spectrometry**

infrared spectrometry refers to infrared spectrometry, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infrarenal aorta**

infrarenal aorta refers to infrarenal aorta, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**infratentorial neoplasm**

infratentorial neoplasm denotes a neoplastic condition involving infratentorial neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**infrequent**

infrequent refers to infrequent, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ingredient**

ingredient refers to ingredient, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ingrown nail**

ingrown nail refers to ingrown nail, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inguinal orchiectomy**

inguinal orchiectomy is used in relation to inguinal orchiectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**inhalation**

inhalation refers to inhalation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inhibin**

inhibin refers to inhibin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inhibitory synapse**

inhibitory synapse refers to inhibitory synapse, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**iniparib**

iniparib refers to iniparib, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**initial insomnia**

initial insomnia refers to initial insomnia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**injury site**

injury site denotes a clinical condition or finding involving injury site; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**inorganic chemical**

inorganic chemical refers to inorganic chemical, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inosine**

inosine refers to inosine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inosine monophosphate**

inosine monophosphate refers to inosine monophosphate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inosine pranobex**

inosine pranobex refers to inosine pranobex, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inositol**

inositol refers to inositol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inositol phosphates**

inositol phosphates refers to inositol phosphates, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inpatient**

inpatient refers to inpatient, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inquilinus**

inquilinus identifies inquilinus, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**inquilinus limosus**

inquilinus limosus identifies inquilinus limosus, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**insect virus**

insect virus is a virus or viral group associated with insect virus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**insecta**

insecta identifies insecta, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**insemination**

insemination refers to insemination, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**inspiratory capacity**

inspiratory capacity refers to inspiratory capacity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**inspiratory time**

inspiratory time refers to inspiratory time, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**instinct**

instinct refers to instinct, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**insula**

insula refers to insula, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**insulin antagonist**

insulin antagonist refers to insulin antagonist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**insulin coma**

insulin coma refers to insulin coma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**insulin detemir**

insulin detemir refers to insulin detemir, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**insulin isophane**

insulin isophane refers to insulin isophane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**insulin lispro**

insulin lispro refers to insulin lispro, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**insulin receptor**

insulin receptor denotes insulin receptor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**insulinase**

insulinase refers to insulinase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**insurance**

insurance refers to insurance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**integrase**

integrase refers to integrase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**integrin**

integrin refers to integrin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**integrin binding**

integrin binding refers to integrin binding, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**intein**

intein refers to intein, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intelligence**

intelligence refers to intelligence, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intelligence test**

intelligence test is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat intelligence test.

**Synonyms:**

**intensive care**

intensive care refers to intensive care, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intercalated disc**

intercalated disc refers to intercalated disc, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intercalating agent**

intercalating agent refers to intercalating agent, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intercostal muscles**

intercostal muscles refers to intercostal muscles, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**interferometry**

interferometry refers to interferometry, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**interferon**

interferon concerns interferon, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**interferon inducer**

interferon inducer refers to interferon inducer, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**interferon-alpha**

interferon-alpha refers to interferon-alpha, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**interferon-beta**

interferon-beta refers to interferon-beta, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**interim sacrifice**

interim sacrifice refers to interim sacrifice, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**interleukin 1**

interleukin 1 refers to interleukin 1, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **interleukin 13**

interleukin 13 refers to interleukin 13, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **interleukin 2**

interleukin 2 refers to interleukin 2, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **interleukin 7**

interleukin 7 refers to interleukin 7, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **interlocutory**

interlocutory refers to interlocutory, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intermediate**

intermediate refers to intermediate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intermediate filament**

intermediate filament refers to intermediate filament, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intermittent fever**

intermittent fever denotes an infectious or toxic condition involving intermittent fever; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

### **internal**

internal denotes internal, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **internal fixator**

internal fixator denotes internal fixator, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **international cooperation**

international cooperation denotes international cooperation, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **international unit**

international unit denotes international unit, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **interneuron**

interneuron refers to interneuron, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **internist**

internist refers to internist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **interphase**

interphase refers to interphase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **interphase cell**

interphase cell denotes interphase cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **interstitial fluid**

interstitial fluid refers to interstitial fluid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **interval**

interval refers to interval, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **interventional procedure**

interventional procedure is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat interventional procedure.

**Synonyms:**

### **intestinal absorption**

intestinal absorption is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat intestinal absorption.

**Synonyms:**

### **intestinal cancer**

intestinal cancer is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat intestinal cancer.

**Synonyms:**

### **intestinal duplication**

intestinal duplication is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat intestinal duplication.

**Synonyms:**

### **intestinal fistula**

intestinal fistula is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat intestinal fistula.

**Synonyms:**

### **intestinal mucosa**

intestinal mucosa is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat intestinal mucosa.

**Synonyms:**

### **intestinal polyp**

intestinal polyp is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat intestinal polyp.

**Synonyms:**

### **intestinal polyposis**

intestinal polyposis is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat intestinal polyposis.

**Synonyms:**

### **intestinal villi**

intestinal villi is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat intestinal villi.

**Synonyms:**

### **intestine disorder**

intestine disorder is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat intestine disorder.

**Synonyms:**

### **intestine neoplasm**

intestine neoplasm is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat intestine neoplasm.

**Synonyms:**

### **intestine obstruction**

intestine obstruction is a clinical assessment, mea-

---

surement, or procedure used to investigate, monitor, classify, or treat intestine obstruction.

**Synonyms:**

### **intimal dissection**

intimal dissection refers to intimal dissection, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intoplicine**

intoplicine refers to intoplicine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intraabdominal hemorrhage**

intraabdominal hemorrhage denotes a clinical condition or finding involving intraabdominal hemorrhage; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **intraabdominal infection**

intraabdominal infection denotes an infectious or toxic condition involving intraabdominal infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

### **intra-arterial**

intra-arterial refers to intra-arterial, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intraarticular**

intraarticular refers to intraarticular, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intrabronchial**

intrabronchial refers to intrabronchial, a medical

condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intracartilaginous**

intracartilaginous refers to intracartilaginous, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intracavitary**

intracavitary refers to intracavitary, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intracavity radiotherapy**

intracavity radiotherapy is used in relation to intracavity radiotherapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

### **intracellular membrane**

intracellular membrane denotes intracellular membrane, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **intracellular transport**

intracellular transport denotes intracellular transport, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **intracerebral**

intracerebral refers to intracerebral, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intracisternal**

intracisternal denotes intracisternal, a biological

---

component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**intracoronaral**

intracoronaral refers to intracoronaral, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intracoronary**

intracoronary refers to intracoronary, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intraduodenal**

intraduodenal refers to intraduodenal, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intraepidermal**

intraepidermal refers to intraepidermal, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intraesophageal**

intraesophageal refers to intraesophageal, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intralesional**

intralesional refers to intralesional, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intralymphatic**

intralymphatic refers to intralymphatic, a medical condition or clinical finding defined by its features,

causes, affected system, and patient context.

**Synonyms:**

**intramedullary**

intramedullary refers to intramedullary, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intramural plaque**

intramural plaque refers to intramural plaque, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intramuscular injection**

intramuscular injection refers to intramuscular injection, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intramuscular myxoma**

intramuscular myxoma refers to intramuscular myxoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**intraocular infection**

intraocular infection denotes an infectious or toxic condition involving intraocular infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**intraocular lymphoma**

intraocular lymphoma denotes a neoplastic condition involving intraocular lymphoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

---

### **intrapartum fever**

intrapartum fever denotes an infectious or toxic condition involving intrapartum fever; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

### **intrapartum stillbirth**

intrapartum stillbirth refers to intrapartum stillbirth, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intrapericardial**

intrapericardial refers to intrapericardial, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intraperitoneal**

intraperitoneal refers to intraperitoneal, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intraperitonealroute**

intraperitonealroute refers to intraperitonealroute, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intraprostatic**

intraprostatic refers to intraprostatic, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intrapulmonary**

intrapulmonary refers to intrapulmonary, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intrasynovial**

intrasynovial refers to intrasynovial, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intratendinous**

intratendinous refers to intratendinous, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intratesticular**

intratesticular is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat intratesticular.

**Synonyms:**

### **intrathoracic**

intrathoracic refers to intrathoracic, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intratracheal**

intratracheal refers to intratracheal, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intratympanic**

intratympanic refers to intratympanic, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intrauterine**

intrauterine refers to intrauterine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intravascular**

intravascular refers to intravascular, a medical condi-

---

tion or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intravenous catheters**

intravenous catheters refers to intravenous catheters, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intravital microscopy**

intravital microscopy refers to intravital microscopy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **intrusive thought**

intrusive thought refers to intrusive thought, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **inulin**

inulin refers to inulin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **invasive procedure**

invasive procedure is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat invasive procedure.

**Synonyms:**

### **invertebrata**

invertebrata refers to invertebrata, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **invertebrate hormones**

invertebrate hormones denotes invertebrate hor-

mones, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **inverted papilloma**

inverted papilloma refers to inverted papilloma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **investigational**

investigational refers to investigational, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **involuntary movement**

involuntary movement refers to involuntary movement, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **iodamoeba butschlii**

iodamoeba butschlii identifies iodamoeba butschlii, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **iodide**

iodide refers to iodide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **iodipamide**

iodipamide refers to iodipamide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**iodoacetamide**

iodoacetamide refers to iodoacetamide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**iohexol**

iohexol refers to iohexol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ion**

ion refers to ion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ion transport**

ion transport refers to ion transport, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ionic strength**

ionic strength refers to ionic strength, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ionization**

ionization refers to ionization, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ionomycin**

ionomycin concerns ionomycin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**ionophore**

ionophore refers to ionophore, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**iopamidol**

iopamidol refers to iopamidol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**iothalamate clearance**

iothalamate clearance refers to iothalamate clearance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**iothalamate meglumine**

iothalamate meglumine refers to iothalamate meglumine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**iothalamic acid**

iothalamic acid denotes iothalamic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**ioxaglic acid**

ioxaglic acid denotes ioxaglic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**ipilimumab**

ipilimumab concerns ipilimumab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

---

**Synonyms:**

**ipratropium**

ipratropium refers to ipratropium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**iratumumab**

iratumumab concerns iratumumab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**irbesartan**

irbesartan concerns irbesartan, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**iridium**

iridium refers to iridium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**irinotecan**

irinotecan refers to irinotecan, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**irinotecan hydrochloride**

irinotecan hydrochloride refers to irinotecan hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**iris cyst**

iris cyst refers to iris cyst, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**iris disease**

iris disease denotes a clinical condition or finding involving iris disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**iris melanoma**

iris melanoma refers to iris melanoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**iris neoplasm**

iris neoplasm denotes a neoplastic condition involving iris neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**irofulven**

irofulven refers to irofulven, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**iron overload**

iron overload refers to iron overload, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**irregular menstruation**

irregular menstruation refers to irregular menstruation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**irregular respiration**

irregular respiration refers to irregular respiration, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**irrigation solution**

irrigation solution refers to irrigation solution, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**irritable mood**

irritable mood refers to irritable mood, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isazophos**

isazophos refers to isazophos, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ischemic preconditioning**

ischemic preconditioning refers to ischemic preconditioning, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ishak score**

ishak score refers to ishak score, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**islet cell**

islet cell denotes islet cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**isoantibodies**

isoantibodies refers to isoantibodies, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isoantigen**

isoantigen refers to isoantigen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isocarboxazid**

isocarboxazid refers to isocarboxazid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isochromosomes**

isochromosomes denotes isochromosomes, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**isocyanate**

isocyanate refers to isocyanate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isoelectric point**

isoelectric point refers to isoelectric point, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isoetharine**

isoetharine refers to isoetharine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isofenphos**

isofenphos refers to isofenphos, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**isoflavone**

isoflavone refers to isoflavone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isoflurane**

isoflurane refers to isoflurane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isofluorophate**

isofluorophate refers to isofluorophate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isogeneic graft**

isogeneic graft denotes isogeneic graft, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**isolate compound**

isolate compound refers to isolate compound, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isoleucine**

isoleucine refers to isoleucine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isomerase**

isomerase refers to isomerase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isoniazid**

isoniazid refers to isoniazid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isoprenylation**

isoprenylation refers to isoprenylation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isoprocarb**

isoprocarb refers to isoprocarb, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isopropyl alcohol**

isopropyl alcohol refers to isopropyl alcohol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isoprostane**

isoprostane refers to isoprostane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isoproterenol**

isoproterenol refers to isoproterenol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isoquinolines**

isoquinolines refers to isoquinolines, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isosorbide**

isosorbide refers to isosorbide, a medical condition

---

or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isospora**

isospora identifies isospora, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**isospora belli**

isospora belli identifies isospora belli, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**iso-sulfan blue**

iso-sulfan blue refers to iso-sulfan blue, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isothiocyante**

isothiocyante refers to isothiocyante, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isothiocyantes**

isothiocyantes refers to isothiocyantes, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isotonic exercise**

isotonic exercise refers to isotonic exercise, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isotonic solution**

isotonic solution refers to isotonic solution, a medical condition or clinical finding defined by its features,

causes, affected system, and patient context.

**Synonyms:**

**isoxsuprine**

isoxsuprine refers to isoxsuprine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isozyme**

isozyme refers to isozyme, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ispaghula husk**

ispaghula husk refers to ispaghula husk, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ispinesib**

ispinesib refers to ispinesib, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**isradipine**

isradipine concerns isradipine, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**itraconazole**

itraconazole concerns itraconazole, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**ivabradine**

ivabradine refers to ivabradine, a medical condition or clinical finding defined by its features, causes,

---

affected system, and patient context.

**Synonyms:**

### **ivermectin**

ivermectin refers to ivermectin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **ixabepilone**

ixabepilone refers to ixabepilone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**Synonyms:** IHD

### **Numbness**

Reduced or absent sensation in part of the body, often caused by nerve compression or injury, neuropathy, reduced blood flow, or neurologic disease.

**Synonyms:**

### **IBS**

Alternate index label; see *Irritable bowel syndrome*.

**Synonyms:**

### **IDC**

Alternate index label; see *Invasive ductal carcinoma (IDC)*. **Synonyms:**

### **Idiopathic myelofibrosis**

Alternate index label; see *Myelofibrosis*. **Synonyms:**

### **Idiopathic thrombocytopenic purpura**

Alternate index label; see *Immune thrombocytopenia (ITP)*. **Synonyms:**

### **Idiopathic toe walking**

Alternate index label; see *Toe walking in children*.

**Synonyms:**

### **IIH**

Alternate index label; see *Pseudotumor cerebri (id-*

*iopathic intracranial hypertension)*. **Synonyms:**

### **Incontinence, bowel**

Alternate index label; see *Fecal incontinence*. **Synonyms:**

### **Incontinence, fecal**

Alternate index label; see *Fecal incontinence*. **Synonyms:**

### **Incontinence, urinary**

Alternate index label; see *Urinary incontinence*. **Synonyms:**

### **Infantile hemangioma**

Alternate index label; see *Hemangioma*. **Synonyms:**

### **Infectious hepatitis**

Alternate index label; see *Viral hepatitis*. **Synonyms:**

### **Infertility, female**

Alternate index label; see *Female infertility*. **Synonyms:**

### **Infertility, male**

Alternate index label; see *Male infertility*. **Synonyms:**

### **Infiltrating ductal carcinoma**

Alternate index label; see *Invasive ductal carcinoma (IDC)*. **Synonyms:**

### **Inflamed gallbladder**

Alternate index label; see *Cholecystitis*. **Synonyms:**

### **Inflamed pancreas**

Alternate index label; see *Pancreatitis*. **Synonyms:**

### **Inflamed pericardium**

Alternate index label; see *Pericarditis*. **Synonyms:**

---

### Influenza, avian

Alternate index label; see *Bird flu (avian influenza)*.

**Synonyms:**

### Influenza, H1N1

Alternate index label; see *H1N1 flu (swine flu)*.

**Synonyms:**

### Influenza, swine flu

Alternate index label; see *H1N1 flu (swine flu)*.

**Synonyms:**

### Insulin resistance syndrome

Alternate index label; see *Metabolic syndrome*. **Synonyms:**

### Interdigital neuroma

Alternate index label; see *Morton neuroma*. **Synonyms:**

### Intestinal lipodystrophy

Alternate index label; see *Whipple's disease*. **Synonyms:**

### Intraductal carcinoma

Alternate index label; see *Ductal carcinoma in situ (DCIS)*. **Synonyms:**

### Ischemia, intestinal

Alternate index label; see *Intestinal ischemia*. **Synonyms:**

### Ischemic bone necrosis

Alternate index label; see *Avascular necrosis (osteonecrosis)*. **Synonyms:**

### Ischemic priapism

Alternate index label; see *Priapism*. **Synonyms:**

### Islet cell cancer

Alternate index label; see *Pancreatic neuroendocrine tumors*. **Synonyms:**

### ITP

Alternate index label; see *Immune thrombocytopenia (ITP)*. **Synonyms:**

### Ibuprofen dosing for children

Ibuprofen dosing for children concerns ibuprofen dosing for children; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### Ibuprofen overdose

Ibuprofen overdose involves toxic exposure to ibuprofen overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### Idiopathic hypercalciuria

Idiopathic hypercalciuria concerns idiopathic hypercalciuria; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### Ileostomy - caring for your stoma

Ileostomy - caring for your stoma concerns ileostomy - caring for your stoma; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### Ileostomy - changing your pouch

Ileostomy - changing your pouch concerns ileostomy - changing your pouch; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### Ileostomy - discharge

Ileostomy - discharge is a treatment or care intervention for ileostomy - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

---

### **Ileostomy - what to ask your doctor**

Ileostomy - what to ask your doctor concerns ileostomy - what to ask your doctor; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Ileostomy and your child**

Ileostomy and your child concerns ileostomy and your child; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Ileostomy and your diet**

Ileostomy and your diet addresses care related to ileostomy and your diet, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Iliotibial band syndrome - aftercare**

Iliotibial band syndrome - aftercare is a treatment or care intervention for iliotibial band syndrome - aftercare; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Imaging and radiology**

Imaging and radiology examines imaging and radiology; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Imipramine overdose**

Imipramine overdose involves toxic exposure to imipramine overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Immune thrombocytopenic purpura**

### **(ITP)**

Immune thrombocytopenic purpura is immune-mediated platelet destruction causing isolated thrombocytopenia with bruising, petechiae, mucosal bleeding, or no symptoms.

**Synonyms:**

### **Immunizations for people with diabetes**

Immunizations for people with diabetes addresses care related to immunizations for people with diabetes, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Immunoelectrophoresis – blood**

Immunoelectrophoresis – blood examines immunoelectrophoresis – blood; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Immunoelectrophoresis - urine**

Immunoelectrophoresis - urine examines immunoelectrophoresis - urine; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Immunofixation - urine**

Immunofixation - urine examines immunofixation - urine; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Immunofixation blood test**

Immunofixation blood test examines immunofixation blood test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Immunotherapy for cancer**

Immunotherapy for cancer is a treatment or care intervention for immunotherapy for cancer; indication,

---

preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Immunotherapy: questions to ask your doctor**

Immunotherapy: questions to ask your doctor is a treatment or care intervention for immunotherapy: questions to ask your doctor; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Imperforate anus repair**

Imperforate anus repair is a treatment or care intervention for imperforate anus repair; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Implantable cardioverter defibrillator - discharge**

Implantable cardioverter defibrillator - discharge is a treatment or care intervention for implantable cardioverter defibrillator - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **In vitro fertilization (IVF)**

In vitro fertilization fertilizes retrieved eggs in a laboratory and transfers resulting embryos to the uterus, forming part of assisted reproductive treatment.

**Synonyms:**

### **Inborn errors of metabolism**

Inborn errors of metabolism concerns inborn errors of metabolism; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Incontinence - resources**

Incontinence - resources addresses care related to in-

continence - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Increased head circumference**

Increased head circumference concerns increased head circumference; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Indium-labelled WBC scan**

Indium-labelled WBC scan examines indium-labelled wbc scan; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Indomethacin overdose**

Indomethacin overdose involves toxic exposure to indomethacin overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Indoor fitness routine**

Indoor fitness routine concerns indoor fitness routine; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Inducing labor**

Inducing labor is a treatment or care intervention for inducing labor; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Industrial bronchitis**

Industrial bronchitis is a medical condition involving industrial bronchitis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

---

**Synonyms:**

### **Indwelling catheter care**

Indwelling catheter care is a treatment or care intervention for indwelling catheter care; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Infant - newborn development**

Infant - newborn development concerns infant - newborn development, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Infant Formula - buying, preparing, storing, and feeding**

Infant Formula - buying, preparing, storing, and feeding is a treatment or care intervention for infant formula - buying, preparing, storing, and feeding; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Infant formulas**

Infant formulas concerns infant formulas, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Infant of a substance-using mother**

Infant of a substance-using mother concerns infant of a substance-using mother, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Infant of diabetic mother**

Infant of diabetic mother concerns infant of diabetic mother, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Infant reflexes**

Infant reflexes concerns infant reflexes, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Infant test procedure preparation**

Infant test procedure preparation examines infant test procedure preparation; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Infertility - resources**

Infertility - resources addresses care related to infertility - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Influenza (flu) vaccine (inactivated or recombinant) - what you need to know**

Inactivated or recombinant influenza vaccines present nonreplicating viral antigens to reduce risk of influenza and its complications; they cannot cause influenza infection.

**Synonyms:**

### **Influenza (flu) vaccine (live, intranasal) - what you need to know**

Influenza (flu) vaccine (live, intranasal) - what you need to know examines influenza (flu) vaccine (live, intranasal) - what you need to know; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Informed consent - adults**

Informed consent - adults concerns informed consent - adults; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

---

### **Ingrown toenail removal - discharge**

Ingrown toenail removal - discharge is a treatment or care intervention for ingrown toenail removal - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Inguinal hernia repair**

Inguinal hernia repair is a treatment or care intervention for inguinal hernia repair; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Inguinal hernia repair - discharge**

Inguinal hernia repair - discharge is a treatment or care intervention for inguinal hernia repair - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Injury - kidney and ureter**

Injury - kidney and ureter is a medical condition involving injury - kidney and ureter; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Ink poisoning**

Ink poisoning involves toxic exposure to ink poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Ink remover poisoning**

Ink remover poisoning involves toxic exposure to ink remover poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Insect bites and stings**

Insect bites and stings concerns insect bites and stings; its medical significance is established from

the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Insecticide poisoning**

Insecticide poisoning involves toxic exposure to insecticide poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Insidious**

Insidious concerns insidious; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Insulin and syringes - storage and safety**

Insulin and syringes - storage and safety addresses care related to insulin and syringes - storage and safety, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Insulin C-peptide test**

Insulin C-peptide test examines insulin c-peptide test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Insulin pumps**

Insulin pumps deliver rapid-acting insulin continuously and through programmed meal or correction doses, allowing flexible management of diabetes while requiring monitoring and device safety.

**Synonyms:**

### **Integrative medicine for cancer treatment**

Integrative medicine for cancer treatment examines integrative medicine for cancer treatment; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

---

### **Intercostal retractions**

Intercostal retractions addresses care related to intercostal retractions, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Interstitial cystitis - resources**

Interstitial cystitis - resources addresses care related to interstitial cystitis - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Interstitial lung disease - adults - discharge**

Interstitial lung disease - adults - discharge is a treatment or care intervention for interstitial lung disease - adults - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Intestinal leiomyoma**

Intestinal leiomyoma examines intestinal leiomyoma; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Intestinal obstruction and Ileus**

Intestinal obstruction and Ileus examines intestinal obstruction and ileus; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Intestinal obstruction repair**

Intestinal obstruction repair examines intestinal obstruction repair; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Intestinal or bowel obstruction -**

### **discharge**

Intestinal or bowel obstruction - discharge examines intestinal or bowel obstruction - discharge; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Intracardiac electrophysiology study (EPS)**

Intracardiac electrophysiology study (EPS) examines intracardiac electrophysiology study (eps); interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Intracranial pressure monitoring**

Intracranial pressure monitoring examines intracranial pressure monitoring; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Intrauterine devices (IUD)**

Intrauterine devices (IUD) concerns intrauterine devices (iud), a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Intravenous**

Intravenous examines intravenous; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Intraventricular hemorrhage of the newborn**

Intraventricular hemorrhage of the newborn is a medical condition involving intraventricular hemorrhage of the newborn; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

---

### **Intussusception – children**

Intussusception occurs when one segment of intestine telescopes into another, causing intermittent pain, vomiting, obstruction, and possible bowel ischemia in children.

**Synonyms:**

### **Invasive**

Invasive examines invasive; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Iodine in diet**

Iodine in diet addresses care related to iodine in diet, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Iodine poisoning**

Iodine poisoning follows excessive iodine exposure and can irritate the gastrointestinal tract, disrupt thyroid function, and cause systemic toxicity depending on dose and formulation.

**Synonyms:**

### **Ions**

Ions concerns ions; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **IQ testing**

IQ testing examines iq testing; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Iron in diet**

Iron in diet addresses care related to iron in diet, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Iron overdose**

Iron overdose can cause gastrointestinal injury, metabolic acidosis, shock, liver failure, and multiorgan toxicity, particularly after a large ingestion by a child.

**Synonyms:**

### **Irradiated foods**

Irradiated foods concerns irradiated foods; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Irritable bowel syndrome - aftercare**

Irritable bowel syndrome - aftercare is a treatment or care intervention for irritable bowel syndrome - aftercare; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Ischemic ulcers - self-care**

Ischemic ulcers are wounds caused by inadequate arterial blood flow; care emphasizes protecting tissue, controlling vascular risk, and obtaining assessment for revascularization when appropriate.

**Synonyms:**

### **Isopropanol alcohol poisoning**

Isopropanol alcohol poisoning involves toxic exposure to isopropanol alcohol poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **IV treatment at home**

IV treatment at home examines iv treatment at home; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

---

## J

### Jaccoud's arthropathy

A non-erosive, reducible deformity of the metacarpophalangeal joints caused by chronic periarticular fibrosis and tendon laxity, most commonly associated with systemic lupus erythematosus.

**Synonyms:**

### Julienne

To cut food into thin, matchstick-shaped strips.

**Synonyms:**

### Jacksonian Epilepsy (Focal Seizures)

A type of focal (partial) seizure originating in the primary motor cortex, characterized by clonic (rhythmic jerking) or tonic (sustained contraction) movements that spread sequentially to adjacent body parts along the motor homunculus (Jacksonian march). Named after John Hughlings Jackson (1835-1911), who first described the phenomenon.

**Synonyms:** Focal Seizures

### JAK-STAT Pathway

A rapid signaling pathway for cytokines and growth factors (interferons, interleukins, erythropoietin, growth hormone) that lack intrinsic enzymatic activity. Ligand binding to the cytokine receptor causes receptor dimerization and activation of associated Janus kinases (JAK1, JAK2, JAK3, TYK2) by trans-phosphorylation.

**Synonyms:**

### JAK2

Janus kinase 2, an intracellular tyrosine kinase that transmits signals from several cytokine and growth-factor receptors. Activating JAK2 variants occur in some myeloproliferative neoplasms.

**Synonyms:**

### Janeway Lesions

Painless, erythematous or hemorrhagic macules on the palms and soles, caused by septic microemboli in infective endocarditis. They are a minor criterion in the Duke criteria. Unlike Osler nodes, Janeway lesions are painless and represent microabscesses in the dermis. They are transient and may disappear quickly.

**Synonyms:**

### Janus Kinase Inhibitors

JAK inhibitors (tofacitinib, baricitinib, upadacitinib, filgotinib, abrocitinib) block JAK-STAT signaling downstream of cytokine receptors (IL-6, IFN-gamma, IL-2, IL-7, IL-15, IL-21, GM-CSF, erythropoietin, thrombopoietin). Selectivity: JAK1/JAK3 (tofacitinib), JAK1/JAK2 (baricitinib), JAK1 (upadacitinib, filgotinib, abrocitinib).

**Synonyms:**

### Japanese Encephalitis

A mosquito-borne viral infection of the central nervous system caused by Japanese encephalitis virus. Most infections are asymptomatic, but severe disease can cause fever, altered consciousness, seizures, movement disorders, and lasting neurological disability.

**Synonyms:**

### Japanese Encephalitis Vaccine

A vaccine that protects against Japanese encephalitis, a mosquito-borne viral infection of the central nervous system. Vaccine type, schedule, and eligibility depend on age, destination or exposure risk,

---

and local recommendations.

**Synonyms:**

**Jaundice**

Jaundice is yellow discoloration of the skin and eyes caused by elevated bilirubin from increased production, impaired liver processing, or obstructed bile flow. hyperbilirubinemia (serum bilirubin greater than 2-3 mg/dL), resulting from an imbalance between bilirubin production and clearance.

**Synonyms:**

**Jaundice (Icterus)**

Yellow discoloration of the skin, sclerae, or mucous membranes caused by an increased bilirubin concentration in the blood.

**Synonyms:** Icterus

**Jaundice in newborns**

Yellow discoloration of a newborn's skin or eyes caused by elevated bilirubin.

**Synonyms:**

**Jaw Pain**

Pain in the jaw, jaw joint, or chewing muscles caused by temporomandibular disorders, dental disease, infection, injury, or less commonly heart or nerve disease. Pain with chest discomfort, sweating, breathlessness, or exertion requires urgent assessment; persistent pain or restricted jaw movement requires dental or medical review.

**Synonyms:**

**Jejunal Atresia**

Congenital complete interruption or absence of a segment of the jejunal lumen. It presents in a newborn with intestinal obstruction, commonly causing bilious vomiting, abdominal distension, and failure to pass meconium, and generally requires surgery.

**Synonyms:**

**Jejunostomy**

A surgically created opening into the jejunum, often used for placement of a feeding tube when nutrition cannot safely be given through the stomach.

**Synonyms:**

**Jejunum**

Middle segment (2.5 m) with prominent circular folds and tall villi for a velvety appearance. Richer blood supply and thicker walls than the ileum. Primary nutrient absorption site for carbohydrates, amino acids, fatty acids, vitamins, minerals. Fewer Peyer's patches. More commonly affected by Crohn's disease.

**Synonyms:**

**Job Modification**

Changes to work duties, equipment, schedule, or environment that accommodate a health-related limitation and support safe, effective work.

**Synonyms:**

**Job Syndrome**

A primary immunodeficiency, usually caused by pathogenic variants affecting STAT3, characterized by eczema, recurrent staphylococcal skin and lung infections, and markedly elevated immunoglobulin E. Skeletal, dental, and characteristic facial findings may also occur.

**Synonyms:**

**Jock Itch**

A fungal infection of the groin and inner thighs, also called tinea cruris. It causes an itchy, scaly, ring-shaped or spreading rash, often worsened by warmth and moisture. Pain, fever, extensive involvement, or failure to improve with appropriate care requires clinical evaluation.

**Synonyms:** tinea cruris.

**Joint**

Articulation between two or more bones permitting movement. Structural classification: fibrous (sutures, syndesmoses, gomphoses – immovable/slightly movable), cartilaginous (synchondroses, symphyses – slightly movable), synovial (freely movable – plane, hinge, pivot, condyloid, saddle, ball-and-socket).

**Synonyms:**

---

### Joint Contracture

Persistent limitation of passive joint movement caused by shortening or fibrosis of muscle, tendon, capsule, ligament, fascia, skin, or other periarticular tissue. It may follow immobilization, neurological disease, trauma, inflammation, burns, or congenital disorders.

**Synonyms:**

### Joint Diseases

A broad category of pathological conditions affecting the structure and function of joints. Classification by etiology: (1) Degenerative: osteoarthritis (most common, non-inflammatory, affects load-bearing joints—knee, hip, spine).

**Synonyms:**

### Joint Effusion

Excess fluid within a joint space. Common sites: knee (most accessible), ankle, wrist, shoulder. Causes: trauma, infection, inflammatory arthritis, crystal arthropathy. Detected by ballottement or bulge sign.

**Synonyms:**

### Joint Pain

Discomfort arising from articular structures including cartilage, synovium, ligaments, and periarticular soft tissues due to inflammation, degeneration, injury, or infection.

**Synonyms:**

### Joint Prosthesis

An artificial joint or implant designed to replace a damaged or diseased biological joint, restoring mobility and relieving chronic pain.

**Synonyms:**

### Joint Replacement

Surgical replacement of damaged joint surfaces with prosthetic components to reduce pain and improve function.

**Synonyms:**

### Joint Replacement (Arthroplasty)

A surgical procedure in which a damaged or arthritic joint surface is removed and replaced with a prosthetic implant, most commonly performed for the hip (total hip arthroplasty) and knee (total knee arthroplasty).

**Synonyms:** Arthroplasty

### Joint Replacement Rehabilitation

Exercise, education, and functional training after joint replacement to restore safe movement and independence.

**Synonyms:**

### Joint Stiffness

Reduced ease or range of joint movement, often worse after rest. Causes include arthritis, injury, inflammation, prolonged immobility, or muscle and tendon disorders. Sudden swelling, redness, fever, severe pain, or inability to use the joint requires assessment.

**Synonyms:**

### Joint Swelling

Enlargement of a joint caused by excess synovial fluid, blood, inflammation, infection, trauma, or structural disease. It may be accompanied by pain, warmth, stiffness, or restricted movement and can indicate inflammatory or septic arthritis.

**Synonyms:**

### Jugular Vein

One of the major veins draining blood from the head, face, and neck. There are two pairs: internal jugular vein (IJV) and external jugular vein (EJV).

**Synonyms:**

### Juvenile angiofibroma

Juvenile angiofibroma is a benign but highly vascular tumor arising near the nasal cavity in adolescent boys, causing progressive nasal obstruction and recurrent nosebleeds. predominantly in adolescent boys. It may cause recurrent nosebleeds, nasal obstruction, or facial swelling.

**Synonyms:**

---

### Juvenile Arthritis

A general term for inflammatory arthritis beginning in childhood. Persistent joint swelling, pain, stiffness, or limited movement may occur, and causes and subtypes vary.

**Synonyms:**

### Juvenile Astrocytoma

An astrocytic glioma arising in a child or adolescent. Many are low-grade and may cause seizures, headache, visual symptoms, endocrine disturbance, or focal neurological deficits depending on location; diagnosis requires neuroimaging and tumour evaluation.

**Synonyms:**

### Juvenile Dermatomyositis

An inflammatory muscle disease of childhood characterized by proximal weakness and distinctive skin findings such as heliotrope rash and Gottron papules. It may also affect blood vessels, muscles, or other organs.

**Synonyms:**

### Juvenile Hypermobility Syndrome

Excessive joint movement in a child or adolescent associated with pain, instability, fatigue, or recurrent sprains, without another defined connective-tissue disorder. Assessment considers the pattern of hypermobility, skin and systemic features, and functional impact; management may include physiotherapy and joint protection.

**Synonyms:**

### Juvenile Idiopathic Arthritis

A group of inflammatory arthritis disorders that begin before age 16 and persist for at least six weeks without another identified cause. Subtypes differ in the number of joints affected, systemic symptoms, associated eye disease, and laboratory findings.

**Synonyms:**

### Juvenile Osteoporosis

Reduced bone mass or impaired bone strength occurring during childhood or adolescence, increasing

fracture risk. It may be primary or secondary to chronic disease, nutritional deficiency, endocrine disorder, immobility, or medication exposure.

**Synonyms:**

### Juvenile Rheumatoid Arthritis

An older term for juvenile idiopathic arthritis, chronic inflammatory arthritis beginning before adulthood.

**Synonyms:**

### Juvenile Xanthogranuloma

A benign non-Langerhans-cell histiocytic disorder that most often presents in infancy or early childhood as a yellow-red papule or nodule. Skin lesions are usually self-limited, but ocular or visceral involvement can occur and requires appropriate assessment.

**Synonyms:**

### Juxta-articular

Located next to or close to a joint.

**Synonyms:**

### Juxtaglomerular Apparatus

Specialized structure located at the vascular pole of the glomerulus where the distal tubule comes into contact with the afferent arteriole. Composed of macula densa cells in the tubular wall, juxtaglomerular cells in the afferent arteriolar wall that produce renin, and extraglomerular mesangial cells.

**Synonyms:**

### Juxtavesical

Located next to or near the urinary bladder.

**Synonyms:**

### Jet Lag

Temporary sleep and circadian disruption after rapid travel across time zones.

**Synonyms:**

### Jaw Fracture

A break in the upper or lower jawbone.

---

**Synonyms:**

### **Jackknife Position**

A prone position in which the operating table is flexed at the hips, raising the buttocks and lowering the head and legs.

**Synonyms:**

### **Jaw Tumors and Cysts**

Abnormal growths or fluid-filled sacs that develop in the jawbone or nearby tissues.

**Synonyms:**

### **Jellyfish Stings**

Skin injury caused by contact with jellyfish tentacles, which release venom and may cause pain or systemic symptoms.

**Synonyms:**

### **Jet Lag Disorder**

Temporary sleep and circadian disruption after rapid travel across multiple time zones.

**Synonyms:**

### **Jaccoud Arthropathy**

A deforming but usually nonerosive arthropathy, classically associated with previous rheumatic fever or systemic lupus erythematosus, causing reducible ulnar deviation and other hand deformities.

**Synonyms:**

### **Junctional Rhythm**

A cardiac rhythm arising from the atrioventricular junction rather than the sinoatrial node, usually with a narrow QRS complex and a slow or absent preceding atrial impulse.

**Synonyms:**

### **Juvenile Myoclonic Epilepsy**

A generalized epilepsy syndrome that typically begins in adolescence and causes myoclonic jerks, often after awakening, with possible generalized tonic-clonic or absence seizures.

**Synonyms:**

### **Juvenile Polyposis Syndrome**

An inherited disorder characterized by multiple hamartomatous polyps in the gastrointestinal tract and an increased risk of colorectal and other gastrointestinal cancers.

**Synonyms:**

### **Jarisch-Herxheimer Reaction**

A short-lived systemic reaction, with fever, chills, headache, muscle aches, and worsening of existing symptoms, that may occur soon after antibiotic treatment of certain bacterial infections, especially spirochaetal infections.

**Synonyms:**

### **Pre-hepatic Jaundice (Haemolytic Jaundice)**

Jaundice caused by excessive breakdown of red blood cells before bilirubin reaches the liver, producing increased unconjugated bilirubin.

**Synonyms:** Haemolytic Jaundice

### **Hepatic Jaundice (Hepatocellular Jaundice)**

Jaundice caused by impaired processing or excretion of bilirubin by damaged liver cells.

**Synonyms:** Hepatocellular Jaundice

### **Post-hepatic Jaundice (Obstructive Jaundice)**

Jaundice caused by obstruction of bile flow after bilirubin has been processed by the liver, commonly from gallstones, strictures, or tumours.

**Synonyms:** Obstructive Jaundice

### **Kernicterus (Nuclear Jaundice)**

Brain injury caused by deposition of excessive unconjugated bilirubin in the basal ganglia and other brain regions, usually in a severely jaundiced newborn.

**Synonyms:** Nuclear Jaundice

### **Mandible (Lower Jaw)**

The large movable bone forming the lower jaw and carrying the lower teeth.

---

**Synonyms:** Lower Jaw

### **Maxilla (Upper Jaw)**

The paired bones forming the upper jaw, the front part of the hard palate, and parts of the walls of the nose and eye sockets.

**Synonyms:** Upper Jaw

### **Jaw Jerk Reflex**

A stretch reflex of the jaw muscles elicited by tapping the chin while the mouth is slightly open; an exaggerated response may indicate an upper motor-neuron lesion above the pons.

**Synonyms:**

### **Jugular Venous Pressure (JVP)**

The height of the jugular venous column above the right atrium, used clinically as an indirect estimate of right atrial pressure and fluid status.

**Synonyms:** JVP

### **Neuromuscular Junction (Myoneural Junction)**

The specialized synapse where a motor nerve ending communicates with a skeletal-muscle fibre to initiate contraction.

**Synonyms:** Myoneural Junction

### **Janus kinase**

Janus kinase refers to janus kinase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **jaw**

jaw refers to jaw, an anatomical or physiologic concept used to describe a body structure, process, or function.

**Synonyms:**

### **jaw neoplasm**

jaw neoplasm denotes a neoplastic condition involving jaw neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **jeb protocol**

jeb protocol refers to jeb protocol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **jejunal fistula**

jejunal fistula refers to jejunal fistula, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **jejunal hemorrhage**

jejunal hemorrhage denotes a clinical condition or finding involving jejunal hemorrhage; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **jejunal neoplasm**

jejunal neoplasm denotes a neoplastic condition involving jejunal neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **jejunal stenosis**

jejunal stenosis denotes a clinical condition or finding involving jejunal stenosis; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **jejunal ulcer**

jejunal ulcer refers to jejunal ulcer, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **jeotgalibacillus**

jeotgalibacillus is a microorganism or microbial group associated with jeotgalibacillus; clinical relevance depends on pathogenicity, exposure, site, and

---

antimicrobial susceptibility.

**Synonyms:**

### **job satisfaction**

job satisfaction refers to job satisfaction, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **johnsonella**

johnsonella identifies johnsonella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **johnsonella ignava**

johnsonella ignava identifies johnsonella ignava, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **joint capsule**

joint capsule refers to joint capsule, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **judgement impaired**

judgement impaired refers to judgement impaired, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **judgment**

judgment refers to judgment, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **jugular foramen**

jugular foramen refers to jugular foramen, a medical

condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **jumping gene**

jumping gene denotes jumping gene, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **junctional nevus**

junctional nevus refers to junctional nevus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **juvenile delinquency**

juvenile delinquency refers to juvenile delinquency, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **juvenile hormones**

juvenile hormones denotes juvenile hormones, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **Jumper's knee**

Alternate index label; see *Patellar tendinitis*. **Synonyms:**

### **Juvenile schizophrenia**

Alternate index label; see *Childhood schizophrenia*. **Synonyms:**

### **Jack-in-the-pulpit poisoning**

Jack-in-the-pulpit poisoning follows ingestion of calcium oxalate crystals from the plant, causing intense burning and swelling of the mouth, throat, and gastrointestinal tract.

**Synonyms:**

---

### Jaundice and breastfeeding

Jaundice associated with breastfeeding may reflect inadequate milk intake in the early days or persistent breast-milk jaundice after other serious causes have been excluded.

**Synonyms:**

### Jaundice causes

Jaundice causes include hemolysis, inherited bilirubin disorders, hepatitis, medication or toxin injury, and obstruction of bile drainage; evaluation distinguishes unconjugated from conjugated hyperbilirubinemia.

**Synonyms:**

### Jejunostomy feeding tube

A jejunostomy feeding tube delivers nutrition directly into the jejunum when oral or gastric feeding is unsafe or inadequate, with attention to formula, rate, position, and complications.

**Synonyms:**

### Jerusalem cherry poisoning

Jerusalem cherry poisoning follows ingestion of *Solanum pseudocapsicum* berries, which contain toxic compounds that may cause gastrointestinal symptoms, confusion, weakness, or cardiac effects.

**Synonyms:**

### Jet lag prevention

Jet lag prevention uses timed light exposure, sleep adjustment, hydration, and carefully planned activity or melatonin strategies to shift the circadian rhythm across time zones.

**Synonyms:**

### Jewelry cleaner poisoning

Jewelry cleaner poisoning can injure the mouth, esophagus, stomach, lungs, or eyes depending on the product and exposure route; immediate poison-control guidance is appropriate.

**Synonyms:**

### Jimsonweed poisoning

Jimsonweed poisoning causes anticholinergic toxic-

ity, including dilated pupils, dry mouth, rapid heart rate, urinary retention, agitation, delirium, seizures, or coma.

**Synonyms:**

### Joint fluid culture

Joint fluid culture tests synovial fluid for bacterial, fungal, or other organisms when septic arthritis is suspected; results are interpreted with cell count, crystals, and clinical findings.

**Synonyms:**

### Joint fluid Gram stain

Joint fluid Gram stain applies differential staining to synovial fluid to look for bacteria, helping evaluate septic arthritis alongside culture and fluid analysis.

**Synonyms:**

### Joint x-ray

A joint x-ray uses ionizing radiation to assess alignment, fractures, degenerative change, erosions, calcification, and selected soft-tissue or bone abnormalities.

**Synonyms:**

## K

### Kallmann Syndrome

Congenital form of hypogonadotropic hypogonadism caused by failure of GnRH neuron migration from the olfactory placode to the hypothalamus during embryonic development. Characterized by delayed puberty with low LH and FSH and anosmia or hyposmia from olfactory bulb hypoplasia.

**Synonyms:**

### Keratinocytes

The predominant cells of the epidermis that produce keratin and form the skin's protective barrier.

**Synonyms:**

### Kangaroo Care (Skin-to-Skin Contact)

Holding a newborn directly against a caregiver's bare chest while monitoring the infant's condition. It supports thermal regulation, physiologic stability, bonding, and feeding, and is particularly useful for many preterm or low-birth-weight infants.

**Synonyms:** Skin-to-Skin Contact

### Kaposi Sarcoma

A vascular tumor caused by human herpesvirus 8 (HHV-8), presenting as violaceous plaques and nodules on skin and mucous membranes. Four types: classic (elderly Mediterranean men), endemic (African), iatrogenic (immunosuppression post-transplant), and AIDS-associated. Cutaneous lesions are the most common presentation in AIDS.

**Synonyms:**

### Kaposi's sarcoma

A vascular tumor associated with human herpesvirus 8. It may cause purple or reddish skin lesions and can involve internal organs, especially

in people with impaired immunity.

**Synonyms:**

### Karnofsky Performance Status

The Karnofsky Performance Status (KPS) scale is a widely used clinical tool for assessing the functional status of patients, particularly those with cancer, and quantifies the patient's ability to perform activities of daily living and tolerate treatments.

**Synonyms:**

### Kartagener Syndrome

A subset of primary ciliary dyskinesia with situs inversus, chronic sinusitis, and bronchiectasis. Caused by dynein defects impairing both mucociliary clearance and embryonic nodal cilia rotation.

**Synonyms:**

### Kartagener Triad

The combination of situs inversus, chronic sinusitis, and bronchiectasis caused by primary ciliary dyskinesia. The underlying ciliary defect impairs mucociliary clearance and embryonic left-right development.

**Synonyms:**

### Karyotype

Display of chromosomes arranged in pairs, ordered by size and banding pattern. Used to detect chromosomal abnormalities. Resolution: 5-10 Mb.

**Synonyms:**

### Karyotyping

Karyotyping examines the number and structure of chromosomes in cells to identify aneuploidy, large

---

rearrangements, and selected chromosomal causes of disease. set of chromosomes, arranged in pairs by size, centromere position, and banding pattern.

**Synonyms:**

### **Katz Index**

A scale that assesses independence in six basic activities of daily living: bathing, dressing, toileting, transferring, continence, and feeding.

**Synonyms:**

### **Kawasaki Disease**

An acute inflammatory disease of childhood that can affect the coronary arteries. It commonly causes persistent fever, rash, conjunctival redness, mouth or extremity changes, and swollen lymph nodes; diagnosis is clinical and incomplete forms occur.

**Synonyms:**

### **Kawasaki's disease**

An acute, self-limited systemic vasculitis of childhood, also known as mucocutaneous lymph node syndrome, primarily affecting medium-sized arteries with a predilection for the coronary arteries.

**Synonyms:** mucocutaneous.

### **Kayser-Fleischer Rings**

Golden-brown copper deposits in Descemet membrane of the cornea. They strongly support Wilson disease in the appropriate clinical setting, but may occur in other cholestatic disorders and can be absent in isolated hepatic disease. They are identified by slit-lamp examination and present in virtually all patients with neurological manifestations of Wilson disease though they may be absent in isolated hepatic disease.

**Synonyms:**

### **Kearns-Sayre Syndrome**

A mitochondrial cytopathy caused by large-scale mitochondrial DNA deletions or rearrangements. It classically begins before age 20 with progressive external ophthalmoplegia, pigmentary retinopathy, and cardiac-conduction disease, and may involve endocrine or neurological systems.

**Synonyms:**

### **Kegel**

A pelvic-floor muscle contraction exercise used to improve pelvic-floor strength and control of selected types of urinary or fecal incontinence.

**Synonyms:**

### **Kegel Exercise**

Repeated contraction and relaxation of the pelvic-floor muscles to improve their strength and coordination.

**Synonyms:**

### **Keloid**

An overgrowth of scar tissue extending beyond the original wound margins, caused by excessive collagen deposition during wound healing. Keloids are more common in darker skin types (Fitzpatrick IV to VI) and occur at sites of trauma, surgery, piercings, and burns. They are pruritic and painful.

**Synonyms:**

### **Keratinocyte**

The predominant cell of the epidermis, producing keratin and contributing to the skin's barrier and immune functions.

**Synonyms:**

### **Keratitis**

Inflammation of the cornea. Infectious keratitis: bacterial (contact lens wear, trauma: *Pseudomonas*, *Staph aureus*), viral (HSV, VZV, adenovirus), fungal (*Candida*, *Fusarium*, *Aspergillus*), and *Acanthamoeba* (contact lens-related). Presents with eye pain, photophobia, tearing, conjunctival injection, and corneal opacity/ulcer.

**Synonyms:**

### **Keratoacanthoma**

A low-grade or well-differentiated variant of squamous cell carcinoma (SCC) originating from hair follicles. Characterized by rapid growth over 4-6 weeks into a dome-shaped, flesh-colored or erythematous nodular lesion with a central keratin-filled

---

crater. Often resolves spontaneously over months via involution, leaving a depressed scar.

**Synonyms:**

### **Keratoconjunctivitis Sicca**

Chronic dryness and inflammation of the cornea and conjunctiva, commonly called dry-eye syndrome. Symptoms include burning, grittiness, redness, fluctuating vision, and light sensitivity; causes include reduced tear production, excessive evaporation, medicines, and autoimmune disease.

**Synonyms:** dry-eye.

### **Keratoconus**

Keratoconus is progressive thinning and cone-shaped deformation of the cornea, causing irregular astigmatism, blurred vision, glare, and contact-lens intolerance. (percent of cases) thinning and cone-like protrusion of the cornea, leading to irregular astigmatism, myopia, and decreased visual acuity.

**Synonyms:**

### **Keratoderma**

A group of disorders characterised by excessive thickening of the skin of the palms and soles, which may be hereditary or acquired. Acquired forms can be diffuse, focal, or punctate and may be associated with systemic diseases, malignancy, or medications.

**Synonyms:**

### **Keratoderma blennorrhagicum**

A keratoderma associated with reactive arthritis (formerly Reiter syndrome), characterised by waxy, yellowish, vesiculopustular papules and plaques on the palms and soles that may coalesce and extend to the extremities. It mimics pustular psoriasis histologically and clinically.

**Synonyms:**

### **Keratoderma blenorrhagicum**

Alternate spelling of keratoderma blennorrhagicum, a cutaneous manifestation of reactive arthritis with waxy, crusty, vesiculopustular lesions on the palms and soles. It is a reactive phenomenon typically occurring in the context of genitourinary or gas-

trointestinal infection.

**Synonyms:**

### **Keratoplasty**

Surgical transplantation or reshaping of corneal tissue. Penetrating keratoplasty replaces the full corneal thickness, whereas lamellar techniques replace selected layers and may reduce rejection and recovery time.

**Synonyms:**

### **Keratoprosthesis**

Artificial cornea for severe corneal blindness. Boston KPro most common. Indications: chemical burns, limbal stem cell deficiency.

**Synonyms:**

### **Keratosis Pilaris**

A common, benign genetic follicular condition characterized by keratotic follicular papules. Small, rough, flesh-colored or red bumps on the extensor surfaces of proximal arms, thighs, and sometimes buttocks and face. Caused by abnormal keratinization and plugging of hair follicles with retained keratin.

**Synonyms:**

### **Kernicterus**

Bilirubin encephalopathy resulting from severe unconjugated hyperbilirubinemia (typically greater than 25 mg/dL in term infants). Bilirubin deposits in the basal ganglia, hippocampus, and brainstem nuclei. Presents with lethargy, poor feeding, high-pitched cry, opisthotonus, seizures, and choreoathetosis.

**Synonyms:**

### **Kernig Sign**

Sign of meningeal irritation. Patient supine, hip and knee flexed 90 degrees; inability to extend knee indicates positive sign. Seen in meningitis, subarachnoid hemorrhage.

**Synonyms:**

---

### Keshan disease

Heart disease caused by a lack of selenium, an element that the body needs to function properly.

**Synonyms:**

### Ketogenesis

The production of ketone bodies from fatty acids, mainly in the liver during fasting, prolonged exercise, or inadequate insulin activity.

**Synonyms:**

### Ketogenic Diet

High fat, adequate protein, very low carbohydrate diet (<50g/day). Induces ketosis. Medical uses: epilepsy, obesity, metabolic syndrome. Risks: nutrient deficiency, kidney stones, dyslipidemia.

**Synonyms:**

### Ketone Bodies

Water-soluble molecules produced mainly by the liver from fatty-acid-derived acetyl-CoA during fasting, starvation, prolonged exercise, or insulin deficiency. The principal ketone bodies are acetoacetate, beta-hydroxybutyrate, and acetone.

**Synonyms:**

### Ketones

Acidic byproducts produced when the body breaks down fat for energy instead of glucose (ketogenesis). Ketones can be detected in blood and urine.

**Synonyms:**

### Ketosis

Metabolic state with elevated ketone bodies. Physiological: fasting, ketogenic diet. Pathological: diabetic ketoacidosis. Distinguish from ketonemia vs ketonuria.

**Synonyms:**

### Kidney

A paired, bean-shaped retroperitoneal organ responsible for filtering blood, excreting waste products as urine, and regulating fluid and electrolyte balance, acid-base homeostasis, and blood pressure (via the renin-angiotensin-aldosterone system). Each kid-

ney contains approximately 1 million nephrons, the functional filtering units.

**Synonyms:**

### Kidney and Urinary Health

Kidney and urinary health encompasses the function of the kidneys, ureters, bladder, and urethra in filtering waste, regulating fluid/electrolyte balance, and eliminating urine.

**Synonyms:**

### Kidney Cancer

A malignant tumor arising in the kidney. Renal cell carcinoma is the most common type in adults, but other types occur, especially in children.

**Synonyms:**

### Kidney Failure

The inability of the kidneys to maintain fluid, electrolyte, and acid-base homeostasis and to excrete metabolic wastes. Acute kidney injury (AKI): sudden decline in GFR over hours-days—prerenal (hypoperfusion), intrinsic (acute tubular necrosis, glomerulonephritis, interstitial nephritis), postrenal (obstruction).

**Synonyms:**

### Kidney Function Tests

Blood and urine tests used to assess how well the kidneys filter waste and regulate fluid and electrolytes. Common measures include creatinine, estimated glomerular filtration rate, urine albumin, and urinalysis; results are interpreted with the clinical context.

**Synonyms:**

### Kidney Stone

A hard deposit formed from substances in urine that can obstruct the urinary tract and cause severe flank or abdominal pain.

**Synonyms:**

### Kidney stones

Kidney stones are crystalline deposits in the urinary tract that can cause colicky flank pain, hematuria,

---

vomiting, obstruction, or infection depending on size and location. affecting approximately 10 percent of the population over a lifetime, with a male-to-female ratio of 2:1 and peak incidence in the 4th-6th decades.

**Synonyms:**

### **Kidney Stones (Nephrolithiasis / Urolithiasis)**

Crystalline mineral deposits formed within the renal pelvis and calyces due to supersaturation of urine.

**Synonyms:** Nephrolithiasis / Urolithiasis

### **Kidney Transplant Rejection**

Immune-mediated injury to a transplanted kidney caused by recipient antibodies, T cells, or both. Hyperacute, acute, and chronic rejection differ in timing and pathology and require correlation of graft function, imaging, serology, and often biopsy.

**Synonyms:**

### **Kidney Transplantation**

Best treatment for ESRD with improved survival over dialysis. Living donor superior to deceased donor. Lifelong immunosuppression required. Rejection types include hyperacute, acute, and chronic. Complications include rejection, infection, vascular complications, and recurrent disease.

**Synonyms:**

### **Kienbock Disease**

Kienbock disease (lunatomalacia): AVN of lunate. Lichtman classification: I (normal XR, MRI edema), II (lunate sclerosis), IIIA (lunate collapse, no scaphoid rotation), IIIB (lunate collapse, fixed scaphoid rotation, DISI), IV (perilunate arthritis). Etiology: negative ulnar variance, trauma, vascular variation.

**Synonyms:**

### **Kiesselbach Plexus**

A network of small arteries on the front part of the nasal septum and a common source of nosebleeds.

**Synonyms:**

### **Killian's triangle**

An area of potential weakness in the pharyngeal wall between the thyropharyngeus and cricopharyngeus muscles, predisposing to Zenker diverticulum formation.

**Synonyms:**

### **Killip Classification**

A clinical classification system for assessing the severity of myocardial infarction based on physical examination findings. Class I: no heart failure signs. Class II: mild heart failure (crackles, S3 gallop, elevated JVD). Class III: pulmonary edema. Class IV: cardiogenic shock.

**Synonyms:**

### **Kimmelstiel-Wilson Nodules**

Characteristic round eosinophilic nodular mesangial expansions in diabetic nephropathy. Represent advanced mesangial matrix accumulation. Found in peripheral mesangium associated with diffuse mesangial expansion, GBM thickening, and arteriolar hyalinosis.

**Synonyms:**

### **Kimura Disease**

A chronic inflammatory disorder characterized by painless subcutaneous masses, commonly in the head and neck, regional lymphadenopathy, eosinophilia, and elevated immunoglobulin E. It is distinct from angiolymphoid hyperplasia with eosinophilia and may involve the kidneys.

**Synonyms:**

### **Kinesio Taping**

Application of an elastic adhesive tape to the skin to provide support or sensory input while allowing movement. Its clinical benefit varies by condition.

**Synonyms:**

### **Kinesiology**

The study of human movement and the forces that produce or affect it, with applications in health care, rehabilitation, sport, and ergonomics.

**Synonyms:**

---

## Kinetic Modeling

Mathematical modeling of how a tracer or drug moves through and is exchanged among tissues or body compartments.

**Synonyms:**

## Kinetics

The study of how a process changes over time. In pharmacology, it includes the absorption, distribution, metabolism, and elimination of a drug.

**Synonyms:**

## Klebsiella Pneumonia

Severe, necrotizing pneumonia in alcoholic or debilitated patients. Upper lobe involvement with “bulging fissure sign” and “currant jelly” sputum.

**Synonyms:**

## Klebsiella rhinoscleromatis

A gram-negative bacillus causing chronic granulomatous infection of the nasal passages and upper airway, leading to rhinoscleroma with progressive nasal obstruction and tissue destruction.

**Synonyms:**

## Klinefelter Syndrome

Most common sex chromosome aneuploidy in males with a karyotype of 47,XXY occurring in approximately one in six hundred live male births. Characterized by small firm testes, gynecomastia, tall stature with long extremities, and infertility from azoospermia.

**Synonyms:**

## Klippel-Feil Syndrome

A congenital condition characterized by fusion of two or more cervical vertebrae, resulting from failure of normal segmentation of the cervical somites during weeks 3-8 of gestation. Classic triad: short neck, low posterior hairline, and limited cervical range of motion (present in <50% of cases).

**Synonyms:**

## Klippel-Trenaunay Syndrome

A congenital vascular disorder characterized by the

triad: capillary malformations (port-wine stains), venous malformations (varicose veins, persistent embryonic veins), and soft tissue or bone hypertrophy of the affected limb (typically a lower extremity).

**Synonyms:**

## Klippel-Trenaunay-Weber Syndrome

A rare congenital overgrowth disorder involving capillary or venous malformations and enlargement of bone or soft tissue, usually affecting one limb. It may cause limb asymmetry, pain, bleeding, thrombosis, or lymphedema. Care is multidisciplinary and may include compression, vascular treatment, and orthopedic management.

**Synonyms:**

## Klumpke Paralysis

Lower-trunk brachial-plexus injury affecting primarily the C8 and T1 nerve roots. It causes weakness or paralysis of the intrinsic hand muscles, sensory loss along the medial forearm and hand, and occasionally Horner syndrome when sympathetic fibres are involved.

**Synonyms:**

## Knee Disorders

The knee is a complex hinge-type synovial joint connecting the femur, tibia, and patella, stabilized by ligaments (ACL, PCL, MCL, LCL), menisci (medial and lateral), and surrounding muscles/tendons.

**Synonyms:**

## Knee Joint

A synovial joint formed mainly by the femur, tibia, and patella. It permits flexion and extension with limited rotation and is stabilized by ligaments, menisci, muscles, and the joint capsule.

**Synonyms:**

## Knee Pain

Pain felt in or around the knee, commonly caused by injury, osteoarthritis, bursitis, tendinitis, or inflammatory disease. Persistent swelling, instability, inability to bear weight, or fever requires medical assessment.

---

**Synonyms:**

### **Knee Prosthesis**

An artificial joint component used to replace damaged surfaces of the knee, usually including femoral and tibial components and sometimes a patellar component.

**Synonyms:**

### **Kneecap**

The largest sesamoid bone in the human body, embedded within the quadriceps tendon anterior to the knee joint. See Patella (Kneecap).

**Synonyms:**

### **Kniest Dysplasia**

A rare skeletal dysplasia caused most often by pathogenic variants in COL2A1. It produces disproportionate short stature, enlarged joints, progressive joint disease, distinctive facial features, and sometimes severe ocular, auditory, or respiratory complications.

**Synonyms:**

### **Knife-cut ulcers from Crohn's disease**

Deep, linear, serpiginous ulcerations of the intestinal mucosa in Crohn disease, resembling cuts made by a knife. These longitudinal ulcers with heaped-up margins are characteristic of Crohn disease and help distinguish it from ulcerative colitis on endoscopy. They may cause strictures, fistulae, and bleeding.

**Synonyms:**

### **Knock Knees**

Medial angulation of the knees causing the knees to touch while the ankles remain apart, also called genu valgum. It is common during childhood development but may be pathologic when severe, asymmetric, persistent, or associated with pain or growth disturbance.

**Synonyms:** genu valgum.

### **Knotless Anchor**

Suture anchor for soft tissue repair without tying knots. Used in orthopedic surgery.

**Synonyms:**

### **KOH Preparation**

Microscopic examination of skin, hair, or nail scrapings treated with potassium hydroxide to dissolve keratin and reveal fungal hyphae or yeast. A negative preparation does not exclude infection when sampling is inadequate or prior treatment has been given.

**Synonyms:**

### **Koilonychia**

Spoon nails: nails with a concave (spoon-shaped) contour, most commonly associated with iron deficiency anemia; also seen in hemochromatosis, Plummer-Vinson syndrome, malnutrition, and trauma (nail dystrophy). The nail becomes thin, brittle, and turns up at the edges so a drop of water rests in the concavity.

**Synonyms:**

### **Koplik Spots**

A characteristic enanthem of measles. It consists of small, bluish-white spots on an erythematous bluish-white spots on an erythematous background located on the buccal mucosa opposite the lower molars ("grains of salt on a red background"). Appear 1-2 days prior to the onset of the maculopapular rash and disappear 1-2 days after rash onset.

**Synonyms:**

### **Krabbe Disease**

An autosomal-recessive lysosomal storage disorder caused by deficient galactocerebrosidase activity and accumulation of psychosine. Infantile disease causes irritability, stiffness, developmental regression, seizures, and progressive loss of neurological function; later-onset forms are variable.

**Synonyms:**

### **Kt/V**

Dialysis adequacy measure representing the fractional clearance of urea. K is dialyzer clearance, t is treatment time, V is volume of distribution of urea. Target Kt/V greater than 1.4 for thrice-

---

weekly hemodialysis. Urea reduction ratio greater than 70% is alternative adequacy measure.

**Synonyms:**

### **Kussmaul Breathing**

A deep, rapid breathing pattern seen in severe metabolic acidosis (diabetic ketoacidosis, lactic acidosis, uremia). It represents the body's attempt to compensate by blowing off CO<sub>2</sub>. The increased respiratory rate and depth create the characteristic labored breathing.

**Synonyms:**

### **Kussmaul Sign**

Paradoxical increase in jugular venous pressure with inspiration, normally the JVP decreases with inspiration. It indicates impaired right ventricular filling during inspiration. Seen in constrictive pericarditis, restrictive cardiomyopathy, severe right heart failure, cardiac tamponade, and massive pulmonary embolism.

**Synonyms:**

### **Kwashiorkor**

Kwashiorkor is severe protein-energy malnutrition characterized by edema, growth failure, muscle wasting, skin or hair changes, and impaired immune function. deficiency relative to calorie intake (often occurring in children when weaned from breast milk to a high-carbohydrate starch diet).

**Synonyms:**

### **Kyphoplasty**

Kyphoplasty is a treatment or care intervention for kyphoplasty; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Kyphoscoliosis**

An abnormal curvature of the spine in both the coronal (scoliosis) and sagittal (kyphosis) planes. Severe forms cause restrictive lung disease by reducing chest wall compliance and lung volumes. It can lead to chronic respiratory failure and pulmonary

hypertension.

**Synonyms:**

### **Kyphosis**

Kyphosis is excessive forward curvature of the thoracic spine, which may result from posture, vertebral compression, developmental conditions, degeneration, or inflammatory disease. angle on lateral spine x-ray (normal thoracic kyphosis is 20-40 degrees).

**Synonyms:**

### **Keratectomy**

Surgical removal or reshaping of part of the cornea, often to correct vision.

**Synonyms:**

### **Keratoderma Blennorrhagica**

Thickened, scaly skin lesions associated with reactive arthritis.

**Synonyms:**

### **Kaposi's Sarcoma**

A cancer of blood-vessel or lymphatic-vessel lining cells, often associated with human herpesvirus 8.

**Synonyms:**

### **Kidney Calculi**

Solid mineral deposits that form in the kidneys; also called kidney stones.

**Synonyms:** kidney stones.

### **Klinefelter's Syndrome**

A chromosomal condition in which a male has one or more extra X chromosomes, often causing small testes and reduced fertility.

**Synonyms:**

### **Krabbe's Disease**

A rare inherited disorder in which loss of myelin progressively damages the nervous system.

**Synonyms:**

### **Krukenberg Tumor**

An ovarian tumor caused by metastatic cancer, com-

---

monly originating in the stomach or gastrointestinal tract.

**Synonyms:**

### **Kuru**

Kuru is a rare fatal prion disease historically associated with ritual cannibalism, causing progressive ataxia, tremor, and neurologic decline.

**Synonyms:**

### **Kidney Position**

A modified lateral position in which the operating table is flexed at the waist to elevate the flank and improve access to the kidney or retroperitoneum.

**Synonyms:**

### **Knee-Chest Position**

A position in which the patient rests on the knees and chest, with the hips flexed; it may be used for spinal or anorectal procedures.

**Synonyms:**

### **Keloid Scar**

A raised scar caused by excessive growth of scar tissue after skin injury.

**Synonyms:**

### **Kidney Infection**

An infection of one or both kidneys, usually caused by bacteria that spread from the urinary tract.

**Synonyms:**

### **Kleptomania**

A mental health disorder marked by repeated inability to resist urges to steal items that are not needed.

**Synonyms:**

### **Keratin**

A tough structural protein found in skin, hair, nails, and other epithelial tissues.

**Synonyms:**

### **Keratometer**

An instrument that measures the curvature of the cornea.

**Synonyms:**

### **Kinesthesia**

The sense of movement and position of the body's parts.

**Synonyms:**

### **Kussmaul Respiration**

Deep, rapid breathing commonly associated with severe metabolic acidosis, especially diabetic ketoacidosis.

**Synonyms:**

### **Kelly Clamp**

A hinged surgical clamp used to grasp tissue or compress blood vessels and control bleeding.

**Synonyms:**

### **Kocher Clamp**

A toothed surgical clamp used to hold firm tissue or clamp vessels.

**Synonyms:**

### **Kidney Transplant**

Surgical placement of a healthy donor kidney into a person with kidney failure to restore renal function. Lifelong immunosuppressive treatment is generally required to reduce rejection risk.

**Synonyms:**

### **Korsakoff Syndrome**

A chronic amnesic disorder caused most often by severe thiamine deficiency associated with alcohol-use disorder. It causes impaired formation of new memories, loss of past memories, and sometimes confabulation.

**Synonyms:**

### **Kala-Azar (Visceral Leishmaniasis)**

A serious parasitic infection caused by *Leishmania* species and transmitted by sandflies. It may

---

cause prolonged fever, weight loss, enlargement of the spleen and liver, and suppression of blood-cell production.

**Synonyms:** Visceral Leishmaniasis

### **Katayama Fever (Acute Schistosomiasis)**

An acute systemic reaction to schistosome infection, usually occurring weeks after exposure and causing fever, rash, cough, abdominal symptoms, and eosinophilia.

**Synonyms:** Acute Schistosomiasis

### **Keratolysis**

Breakdown or loss of keratinized tissue, especially the superficial layer of the skin; it may occur in some infections and inflammatory skin disorders.

**Synonyms:**

### **Keratomalacia**

Softening and ulceration of the cornea caused most often by severe vitamin A deficiency, potentially leading to blindness.

**Synonyms:**

### **Kerion**

An inflamed, boggy, pus-forming mass caused by a fungal infection of hair-bearing skin, usually a severe form of tinea capitis.

**Synonyms:**

### **Actinic Keratosis (Solar Keratosis)**

A rough, scaly precancerous skin lesion caused by long-term ultraviolet exposure and capable of progressing to squamous cell carcinoma.

**Synonyms:** Solar Keratosis

### **Seborrheic Keratosis**

A common benign, usually pigmented, raised skin growth with a waxy or stuck-on appearance.

**Synonyms:**

### **Ketoacidosis**

A metabolic emergency in which excessive ketone production causes acidosis, most commonly in dia-

betic ketoacidosis.

**Synonyms:**

### **Ketonuria (Acetonuria)**

The presence of ketone bodies in the urine, occurring in conditions such as diabetic ketoacidosis, prolonged fasting, or severe vomiting.

**Synonyms:** Acetonuria

### **Kinase**

An enzyme that transfers a phosphate group, usually from ATP, to another molecule; kinases regulate many cellular processes.

**Synonyms:**

### **Klebsiella**

A genus of Gram-negative bacteria that can cause pneumonia, urinary-tract infection, bloodstream infection, and other healthcare-associated infections.

**Synonyms:**

### **Koch's Bacillus (Mycobacterium Tuberculosis)**

The bacterium that causes tuberculosis, an infection most often affecting the lungs but capable of involving many organs.

**Synonyms:** Mycobacterium Tuberculosis

### **Korotkoff Sounds**

Sounds heard through a stethoscope over an artery as a blood-pressure cuff is deflated; their appearance and disappearance are used to estimate systolic and diastolic pressure.

**Synonyms:**

### **Krebs Cycle (Citric Acid Cycle)**

A series of chemical reactions in mitochondria that oxidizes acetyl-CoA and generates energy-rich molecules used for cellular energy production.

**Synonyms:** Citric Acid Cycle

### **Kulchitsky Cells (Enterochromaffin Cells)**

Specialized neuroendocrine cells, especially in the gastrointestinal and respiratory tracts, that release

---

signalling substances such as serotonin.

**Synonyms:** Enterochromaffin Cells

### **kanamycin**

kanamycin concerns kanamycin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **karyomegaly**

karyomegaly refers to karyomegaly, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **karyometry**

karyometry refers to karyometry, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **karyotype result**

karyotype result refers to karyotype result, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **kava**

kava refers to kava, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **keratan sulfate**

keratan sulfate refers to keratan sulfate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **keratoconjunctivitis**

keratoconjunctivitis refers to keratoconjunctivitis, a medical condition or clinical finding defined by its features, causes, affected system, and patient

context.

**Synonyms:**

### **keratocyte count**

keratocyte count refers to keratocyte count, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **keratosis**

keratosis refers to keratosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **keratosis follicularis**

keratosis follicularis refers to keratosis follicularis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **kerstersia gyiorum**

kerstersia gyiorum identifies kerstersia gyiorum, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **ketamine**

ketamine refers to ketamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **ketamine hydrochloride**

ketamine hydrochloride refers to ketamine hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **ketanserin**

ketanserin refers to ketanserin, a medical condition

---

or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **keto acid**

keto acid denotes keto acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **ketoconazole**

ketoconazole concerns ketoconazole, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **ketone**

ketone refers to ketone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **ketonuria**

ketonuria refers to ketonuria, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **ketoprofen**

ketoprofen concerns ketoprofen, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **ketorolac**

ketorolac refers to ketorolac, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **ketorolac tromethamine**

ketorolac tromethamine refers to ketorolac

tromethamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **ketotic hypoglycemia**

ketotic hypoglycemia refers to ketotic hypoglycemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **ketotifen**

ketotifen refers to ketotifen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **kidney neoplasm**

kidney neoplasm denotes a neoplastic condition involving kidney neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **kilobecquerel**

kilobecquerel refers to kilobecquerel, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **kilocalorie**

kilocalorie refers to kilocalorie, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **kilodalton**

kilodalton refers to kilodalton, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**kilogram**

kilogram refers to kilogram, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**kilointernational unit**

kilointernational unit denotes kilointernational unit, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**kilojoule**

kilojoule refers to kilojoule, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**kilometer**

kilometer refers to kilometer, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**kilovolt peak**

kilovolt peak refers to kilovolt peak, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**kinesin**

kinesin refers to kinesin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**kinesis**

kinesis refers to kinesis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**kinesthesia**

kinesthesia refers to kinesthesia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**kinetochore**

kinetochore refers to kinetochore, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**kinetosome**

kinetosome refers to kinetosome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**kingella**

kingella identifies kingella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**kingella denitrificans**

kingella denitrificans identifies kingella denitrificans, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**kingella kingae**

kingella kingae identifies kingella kingae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**kingella oralis**

kingella oralis identifies kingella oralis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

---

**kingella potus**

kingella potus identifies kingella potus, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**kinin**

kinin refers to kinin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**kininogenase**

kininogenase refers to kininogenase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**kinocilium**

kinocilium refers to kinocilium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**kit device**

kit device refers to kit device, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**klatskin tumor**

klatskin tumor denotes a neoplastic condition involving klatskin tumor; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**klebsiella oxytoca**

klebsiella oxytoca identifies klebsiella oxytoca, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**klebsiella pneumoniae**

klebsiella pneumoniae identifies klebsiella pneumoniae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**klebsiella singaporensis**

klebsiella singaporensis identifies klebsiella singaporensis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**klebsiella variicola**

klebsiella variicola identifies klebsiella variicola, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**kluyvera**

kluyvera identifies kluyvera, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**kluyvera ascorbata**

kluyvera ascorbata identifies kluyvera ascorbata, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**kluyvera cryocrescens**

kluyvera cryocrescens identifies kluyvera cryocrescens, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**kluyvera georgiana**

kluyvera georgiana identifies kluyvera georgiana, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host,

---

and site involved.

**Synonyms:**

### **kluyvera intermedia**

kluyvera intermedia identifies kluyvera intermedia, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **kluyveromyces**

kluyveromyces is a microorganism or microbial group associated with kluyveromyces; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **kluyveromyces lactis**

kluyveromyces lactis is a microorganism or microbial group associated with kluyveromyces lactis; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **kluyveromyces marxianus**

kluyveromyces marxianus is a microorganism or microbial group associated with kluyveromyces marxianus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **knee**

knee refers to knee, an anatomical or physiologic concept used to describe a body structure, process, or function.

**Synonyms:**

### **knoellia**

knoellia identifies knoellia, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **knuckle pad**

knuckle pad refers to knuckle pad, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **kocuria**

kocuria identifies kocuria, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **kocuria rosea**

kocuria rosea identifies kocuria rosea, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **kocuria varians**

kocuria varians identifies kocuria varians, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **kodamaea ohmeri**

kodamaea ohmeri identifies kodamaea ohmeri, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **KRAS gene**

KRAS gene denotes kras gene, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **Krebs' cycle**

Krebs' cycle refers to krebs' cycle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### kringles

kringles refers to kringles, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### Kupffer's cell

Kupffer's cell denotes kupffer's cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### kurthia

kurthia identifies kurthia, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### kynurenine

kynurenine refers to kynurenine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### kytococcus

kytococcus is a microorganism or microbial group associated with kytococcus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### kytococcus sedentarius

kytococcus sedentarius is a microorganism or microbial group associated with kytococcus sedentarius; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### Kidney pain

Pain felt in the side or back below the ribs that may be caused by kidney stones, infection, obstruction, inflammation, or referred pain. **Synonyms:**

### Knee pain: Symptom

Pain in or around the knee caused by injury, overuse, arthritis, inflammation, infection, or other joint or soft-tissue disorders. **Synonyms:**

### Keratosis, actinic

Alternate index label; see *Actinic keratosis*. **Synonyms:**

### Keratosis, seborrheic

Alternate index label; see *Seborrheic keratosis*. **Synonyms:**

### Ketoacidosis, diabetic

Alternate index label; see *Diabetic ketoacidosis*. **Synonyms:**

### Kidney disease, chronic

Alternate index label; see *Chronic kidney disease*. **Synonyms:**

### Kidney failure, chronic

Alternate index label; see *Chronic kidney disease*. **Synonyms:**

### Kissing disease

Alternate index label; see *Mononucleosis*. **Synonyms:**

### KP

Alternate index label; see *Keratosis pilaris*. **Synonyms:**

### Keeping your medicines organized

Keeping your medicines organized is a treatment or care intervention for keeping your medicines organized; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### Kegel exercises - self-care

Kegel exercises - self-care is a treatment or care intervention for kegel exercises - self-care; indication, preparation, risks, technical details, and recovery

---

depend on the patient and goal.

**Synonyms:**

### **Keloids**

Keloids are raised scars that extend beyond the original wound because of excessive collagen deposition and may cause itching, pain, or cosmetic concern.

**Synonyms:**

### **Keratosis obturans**

Keratosis obturans is a medical condition involving keratosis obturans; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Kerosene poisoning**

Kerosene poisoning involves toxic exposure to kerosene poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Ketones blood test**

Ketones blood test examines ketones blood test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Ketones urine test**

Ketones urine test examines ketones urine test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Ketoprofen overdose**

Ketoprofen overdose involves toxic exposure to ketoprofen overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Kidney biopsy**

Kidney biopsy examines kidney biopsy; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Kidney disease - resources**

Kidney disease - resources is a treatment or care intervention for kidney disease - resources; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Kidney removal**

Kidney removal is a treatment or care intervention for kidney removal; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Kidney removal - discharge**

Kidney removal - discharge is a treatment or care intervention for kidney removal - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Kidney stones - self-care**

Kidney stones - self-care is a treatment or care intervention for kidney stones - self-care; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Kidney stones - what to ask your doctor**

Kidney stones - what to ask your doctor is a medical condition involving kidney stones - what to ask your doctor; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Kidney stones and lithotripsy - discharge**

Kidney stones and lithotripsy - discharge is a treatment or care intervention for kidney stones and

---

lithotripsy - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Kinins**

Kinins concerns kinins, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Knee arthroscopy**

Knee arthroscopy is a treatment or care intervention for knee arthroscopy; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Knee arthroscopy - discharge**

Knee arthroscopy - discharge is a treatment or care intervention for knee arthroscopy - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Knee braces - unloading**

Knee braces - unloading is a treatment or care intervention for knee braces - unloading; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Knee CT scan**

Knee CT scan examines knee ct scan; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Knee joint replacement**

Knee joint replacement is a treatment or care intervention for knee joint replacement; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Knee joint replacement - discharge**

Knee joint replacement - discharge is a treatment or care intervention for knee joint replacement - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Knee microfracture surgery**

Knee microfracture surgery is a treatment or care intervention for knee microfracture surgery; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Knee MRI scan**

Knee MRI scan examines knee mri scan; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Kneecap dislocation**

Kneecap dislocation is a medical condition involving kneecap dislocation; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Kneecap dislocation - aftercare**

Kneecap dislocation - aftercare is a treatment or care intervention for kneecap dislocation - aftercare; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

## L

### Labor

The process of uterine contractions leading to progressive cervical dilation and effacement and delivery of the fetus. Stages: first (latent—cervical dilation to 3-4 cm, then active—3-10 cm), second (full dilation to delivery of the infant), third (delivery of the placenta), fourth (first hour postpartum).

**Synonyms:**

### Lamellar Bone

Mature, organized bone tissue arranged in layers.

**Synonyms:** Compact bone

### Lamina

A thin plate of bone forming part of a vertebral arch.

**Synonyms:**

### Laser Assisted Uvula Palatoplasty

A procedure that reshapes or removes selected soft-palate and uvula tissue to reduce snoring.

**Synonyms:** LAUP

### Laser Hair Removal

Hair reduction using laser energy absorbed by pigment in the hair follicle.

**Synonyms:**

### LED Photomodulation

Use of low-energy light-emitting diodes to influence skin cells and improve selected skin concerns.

**Synonyms:** LED light therapy

### Left Anterior Descending Coronary

### Artery

A major coronary artery supplying the front wall and septum of the left ventricle.

**Synonyms:** LAD artery

### Left Circumflex Coronary Artery

A coronary artery that curves around the left side and back of the heart.

**Synonyms:** Circumflex artery

### Lensometer

An instrument used to measure the prescription and optical properties of eyeglass lenses.

**Synonyms:** Lensmeter; focimeter

### Leukotriene Blockers

Medicines that reduce leukotriene effects and help prevent asthma or allergy symptoms.

**Synonyms:** Leukotriene antagonists

### Leukotrienes

Inflammatory signaling molecules that can narrow and swell airways during allergic reactions.

**Synonyms:**

### Levothyroxine Sodium

The sodium salt of synthetic thyroxine used to replace deficient thyroid hormone.

**Synonyms:** Levothyroxine

### LH

Luteinizing hormone, a pituitary hormone involved in ovulation and testosterone production.

**Synonyms:** Luteinizing hormone

---

### **Lignans**

Plant compounds found in seeds, grains, fruits, and vegetables that have antioxidant activity.

**Synonyms:**

### **Limbus**

The border where the cornea meets the white outer coat of the eye.

**Synonyms:** Corneoscleral limbus

### **Lipids**

Fats, oils, and related substances used for energy, cell structure, and signaling.

**Synonyms:** Fats

### **Lipohypertrophy**

Localized thickening or accumulation of fatty tissue, commonly at repeated insulin-injection sites.

**Synonyms:**

### **Lipoprotein Analysis**

A blood test measuring cholesterol, triglycerides, and lipoprotein fractions such as LDL and HDL.

**Synonyms:** Lipid panel; lipid profile

### **Lipoprotein(a)**

An LDL-like lipoprotein whose elevated level is an inherited cardiovascular risk factor.

**Synonyms:** Lp(a)

### **Liposuction**

Liposuction examines liposuction; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:** Lipoplasty

### **Live Attenuated Vaccines**

Vaccines containing weakened organisms that stimulate immunity without usually causing disease.

**Synonyms:** Live vaccines

### **Lobar Hemorrhage**

Bleeding into a lobe of the brain, beneath the cerebral cortex.

**Synonyms:**

### **Lobotomy**

A historical brain operation that severed connections involving the frontal lobes.

**Synonyms:**

### **Lobules**

Small subdivisions of an organ; in the breast, milk-producing glandular units.

**Synonyms:**

### **Localized**

Limited to a particular area or organ, without evidence of distant spread.

**Synonyms:** Localized disease

### **Locus Ceruleus**

A brainstem nucleus involved in alertness, attention, stress responses, and norepinephrine release.

**Synonyms:** Locus coeruleus

### **Long-Term Memory**

Memory that can persist from minutes to many years.

**Synonyms:**

### **Low-Calorie Diet**

A diet that restricts energy intake to support weight loss or another therapeutic goal.

**Synonyms:** Calorie-restricted diet

### **Low-Density Lipoprotein**

A lipoprotein that transports cholesterol and can contribute to artery-wall plaque when elevated.

**Synonyms:** LDL; bad cholesterol

### **Lower Esophageal Sphincter**

A ring of muscle between the esophagus and stomach that helps prevent acid reflux.

**Synonyms:** LES

### **Lumbar Spine**

The five vertebrae forming the lower back.

---

**Synonyms:** Lumbar region

### **Lutein**

A carotenoid pigment found in leafy greens and concentrated in the retina.

**Synonyms:**

### **Luteinizing Hormone-Releasing Hormone Agonist**

A medicine that initially stimulates and then suppresses reproductive-hormone production with continued use.

**Synonyms:** GnRH agonist; LHRH agonist

### **LVAD**

Left-ventricular assist device, an implanted pump that helps the left ventricle circulate blood.

**Synonyms:** Left-ventricular assist device

### **Lymph Nodes**

Small immune organs that filter lymph and help detect infection or abnormal cells.

**Synonyms:** Lymph glands

### **Labor Dystocia**

Abnormally slow or difficult labor caused by inadequate uterine forces, abnormal fetal position or size, or an inadequate maternal pelvis. Assessment considers the powers, passenger, and passage and guides appropriate augmentation or operative delivery.

**Synonyms:**

### **Laboratory Test**

An examination of a body fluid, tissue, or other specimen to obtain information for diagnosis, monitoring, screening, or treatment.

**Synonyms:**

### **Labour**

The process of childbirth, consisting of regular uterine contractions that cause progressive cervical effacement and dilation, leading to delivery of the baby and placenta.

**Synonyms:**

### **Labyrinth**

The inner ear. It contains the cochlea, which is responsible for hearing, as well as structures that are needed for balance.

**Synonyms:**

### **Labyrinthitis**

Labyrinthitis is inflammation of the inner ear balance and hearing structures, causing acute vertigo, imbalance, nausea, and sometimes hearing loss. vestibular apparatus, resulting in both auditory and vestibular symptoms including sudden, severe vertigo, sensorineural hearing loss, tinnitus, nausea, and vomiting.

**Synonyms:**

### **Laceration**

A wound caused by tearing of body tissue, typically caused by trauma from a sharp object (knife, glass, metal) or blunt force that splits the skin. Lacerations involve the skin and may extend into subcutaneous tissue, muscle, tendon, nerve, or blood vessels.

**Synonyms:**

### **Laceration (Forensic)**

Tear or disruption of tissue produced by blunt force trauma exceeding skin elasticity, featuring irregular bruised edges, tissue bridging (intact nerves, vessels across wound floor), and hair crushing.

**Synonyms:** Forensic

### **Lachman Test**

A physical examination in which the knee is slightly flexed while the tibia is moved forward to assess the integrity of the anterior cruciate ligament. Increased laxity suggests injury but is not diagnostic by itself.

**Synonyms:**

### **Lacrimal Apparatus**

Produces, distributes, and drains tears for corneal moisture and protection. Components: lacrimal gland (superolateral orbit, parasympathetic CN V1, produces aqueous tear layer), superior/inferior puncta (medial eyelid openings), canaliculi, lacrimal

---

sac (lacrimal groove), and nasolacrimal duct (drains into inferior meatus).

**Synonyms:**

### Lacrimal Duct

A drainage channel that carries tears from the lacrimal sac into the nasal cavity. Blockage can cause watering of the eye, recurrent infection, swelling near the inner corner, or discharge.

**Synonyms:**

### Lacrimal Gland

The paired almond-shaped exocrine glands that secrete the aqueous layer of the tear film, located in the lacrimal fossa of the superior lateral orbit (orbital part) and the upper eyelid (palpebral part).

**Synonyms:**

### Lactate

A product of cellular metabolism measured in blood. An increased level may occur with strenuous exercise, impaired oxygen delivery, infection, medicines, liver disease, or other conditions and must be interpreted clinically.

**Synonyms:**

### Lactate Dehydrogenase

Non-specific enzyme. Elevated in tissue damage. Isoenzymes differentiate source.

**Synonyms:**

### Lactation

The physiological process of milk production and secretion from the mammary glands, occurring after childbirth (puerperium). See Lactation (Breastfeeding).

**Synonyms:**

### Lactation (Breastfeeding)

The production of milk by the mammary glands stimulated by the hormone prolactin. Colostrum is produced for the first 2-5 days (rich in IgA, proteins, and growth factors). Mature milk appears at day 5-7. The milk ejection reflex (let-down) is mediated by oxytocin.

**Synonyms:** Breastfeeding

### Lactation Nutrition

Nutrition and hydration during breastfeeding sufficient to support maternal health and milk production. Requirements vary with maternal stores, dietary pattern, and the degree of breastfeeding; selected supplements may be required according to local guidance and clinical assessment.

**Synonyms:**

### Lactic Acid

An organic acid produced during normal metabolism, especially when pyruvate is converted to lactate. Blood lactate may rise for many reasons, including impaired oxygen delivery, strenuous exercise, or medicines.

**Synonyms:**

### Lactic Acidosis

Metabolic acidosis associated with increased lactate production or reduced lactate clearance. Causes include impaired tissue oxygen delivery, medicines, liver disease, seizures, and other disorders.

**Synonyms:**

### Lactose

The principal sugar in milk, composed of glucose and galactose. Lactase in the small intestine digests it.

**Synonyms:**

### Lactose Fermentation

The ability of bacteria to ferment lactose to acid (and gas), a key differential characteristic on MacConkey agar. Lactose-fermenting enteric gram-negative bacteria produce pink/red colonies (*E. coli*, *Klebsiella*, *Enterobacter*, *Citrobacter*); non-lactose fermenters form colorless colonies (*Salmonella*, *Shigella*, *Proteus*, *Pseudomonas*).

**Synonyms:**

### Lactose intolerance

Lactose intolerance results from insufficient lactase activity, causing bloating, abdominal pain, gas, or

---

diarrhea after consuming lactose. lactose, the primary disaccharide in milk and dairy products. The lactase enzyme is produced by enterocytes of the small intestinal brush border and hydrolyzes lactose into glucose and galactose for absorption.

**Synonyms:**

### **Lactose Tolerance Test**

Non-invasive test for carbohydrate malabsorption (lactose, fructose) and small intestinal bacterial overgrowth (SIBO). See Hydrogen Breath Test.

**Synonyms:**

### **Lafora Disease**

A progressive autosomal-recessive myoclonic epilepsy caused by pathogenic variants affecting glycogen metabolism. It usually begins in adolescence with generalized seizures, visual symptoms, myoclonus, cognitive decline, and progressive neurological deterioration.

**Synonyms:**

### **Lambert-Eaton Myasthenic Syndrome**

Autoantibodies against presynaptic calcium channels at the neuromuscular junction, associated with SCLC. Proximal weakness, reduced reflexes, facilitation with exercise.

**Synonyms:**

### **Laminectomy**

Laminectomy removes part of a vertebral lamina to decompress the spinal canal or nerve roots, often for stenosis, tumor, or selected disk disease. canal. Indications: spinal stenosis (lumbar and cervical), herniated disc (with central stenosis), and spinal tumor. Decompression of the entire spinal canal. Often combined with discectomy (lumbar) or foraminotomy (nerve root decompression).

**Synonyms:**

### **Lancet**

Small needle for fingerstick. Used for blood glucose testing.

**Synonyms:**

### **Langerhans-cell histiocytosis**

A group of disorders characterized by clonal proliferation of Langerhans cells (antigen-presenting dendritic cells), which can infiltrate bone, skin, and central nervous system. CNS involvement may cause diabetes insipidus, hypothalamic-pituitary dysfunction, or cerebellar degeneration.

**Synonyms:**

### **Language Barrier**

Difficulty communicating because a patient and healthcare professional do not share a language or have limited proficiency in the language used for care.

**Synonyms:**

### **Language Therapy**

Treatment that improves understanding, expression, reading, writing, or other language skills after developmental or acquired impairment.

**Synonyms:**

### **Lanugo**

Fine, soft hair that grows all over the body of a fetus and is typically shed before birth.

**Synonyms:**

### **Laparoscopy**

A minimally invasive surgical technique using a laparoscope (a thin, lighted telescope) inserted through a small incision (typically at the umbilicus) to visualize the abdominal and pelvic organs. Carbon dioxide gas is insufflated to create a working space. Additional small incisions (ports) allow insertion of instruments.

**Synonyms:**

### **Laparotomy**

A surgical incision into the abdominal cavity, typically a midline vertical or transverse (Pfannenstiel) incision, providing wide access to the abdominal and pelvic organs.

**Synonyms:**

---

### Large Airway Obstruction

Obstruction of airways with diameter > 2 mm (trachea and main bronchi). It causes significant symptoms including stridor, dyspnea, and impaired secretion clearance. It may be fixed (stenosis, tumor) or variable (tracheomalacia, vocal cord dysfunction). Flow-volume loops show characteristic patterns.

**Synonyms:**

### Large Bowel Obstruction

Mechanical blockage of the colon most commonly caused by colorectal cancer, volvulus, or diverticular stricture. Clinical presentation includes progressive abdominal distension, constipation, and obstipation. The cecum is at highest risk of perforation with distal obstruction. Diagnosis is by CT scan identifying the site and cause.

**Synonyms:**

### Large for Gestational Age

Birth weight or fetal size above the 90th percentile for gestational age. It is associated with maternal diabetes, excessive maternal weight gain, and genetic or constitutional factors and increases the risk of shoulder dystocia, birth trauma, and neonatal hypoglycemia.

**Synonyms:**

### Large Intestine

Final GI segment (approximately 1.5 meters) from ileocecal valve to rectum. Six segments: cecum, ascending, transverse, descending, sigmoid colon, rectum. Absorbs water, electrolytes, and vitamins (K, biotin) from colonic bacteria. Characterized by haustra, taeniae coli, and epiploic appendages.

**Synonyms:**

### Laron Syndrome

An inherited disorder of growth-hormone signaling, usually caused by growth-hormone-receptor defects. It produces severe postnatal growth failure, characteristic facial features, and very low insulin-like growth factor 1 despite elevated circulating growth hormone.

**Synonyms:**

### Larva currens from Strongyloides

A rapidly moving, itchy skin eruption caused by larvae of *Strongyloides stercoralis*.

**Synonyms:**

### Laryngeal Cancer

Malignant tumor arising in the larynx, most commonly squamous cell carcinoma. Risk factors include tobacco, alcohol, and selected HPV-related disease; persistent hoarseness, dysphagia, odynophagia, stridor, or neck mass requires laryngoscopic evaluation and biopsy.

**Synonyms:**

### Laryngeal candidiasis

Fungal infection of the larynx by *Candida* species, causing hoarseness, dysphagia, and throat pain, most commonly in immunocompromised patients or those using inhaled corticosteroids.

**Synonyms:**

### Laryngeal Nerve Damage

Injury to the recurrent or superior laryngeal nerves causing hoarseness, vocal-cord weakness, swallowing difficulty, or airway compromise. Common causes include thyroid or neck surgery, malignancy, trauma, and compression along the nerve pathway.

**Synonyms:**

### Laryngeal Prosthesis

A device used to help restore speech after removal of the larynx, commonly through a one-way valve placed between the trachea and esophagus.

**Synonyms:**

### Laryngectomy

Laryngectomy examines laryngectomy; interpretation depends on the specimen or body region, test method, reference range, and clinical question. the larynx or hypopharynx and less often for severe trauma or refractory aspiration. Total laryngectomy requires a permanent tracheostomy, so the patient breathes through a neck stoma; partial laryngectomy preserves voice and swallowing.

**Synonyms:**

---

## Laryngectomy Tube

Tube maintaining airway after total laryngectomy. Types: silicone, metal. Indications: laryngeal cancer, trauma. Complications: obstruction, infection, granulation.

**Synonyms:**

## Laryngitis

Laryngitis is inflammation of the larynx causing hoarseness or voice loss, commonly from viral infection, vocal overuse, irritation, reflux, or less often structural disease. sore throat, dry cough, and a sensation of a lump in the throat (globus sensation), and it may be acute or chronic.

**Synonyms:**

## Laryngocele

Abnormal air-filled dilation of the laryngeal saccule that may be internal, external, or combined, presenting with hoarseness, neck swelling, or airway obstruction.

**Synonyms:**

## Laryngomalacia

Dynamic collapse of supraglottic laryngeal tissue during inspiration, causing congenital stridor in infants. Most cases improve with growth, but feeding difficulty, apnea, hypoxemia, or failure to thrive requires specialist assessment and possible intervention.

**Synonyms:**

## Laryngopharyngeal Reflux

Retrograde movement of gastric contents above the upper esophageal sphincter into the larynx and pharynx, producing chronic hoarseness, throat clearing, globus sensation, cough, excessive throat mucus, and laryngospasm, often without heartburn.

**Synonyms:**

## Laryngoscope

Device for visualizing vocal cords during intubation. Blades: Mac (curved), Miller (straight).

**Synonyms:**

## Laryngoscopy

A medical procedure used to visualise the larynx (voice box) and adjacent structures of the throat. Types: (1) Indirect laryngoscopy: the simplest technique, using a laryngeal mirror angled at 120 degrees to reflect the laryngeal image, with a headlight or external light source.

**Synonyms:**

## Laryngospasm

A protective reflex causing involuntary adduction of the vocal cords, producing partial or complete airway obstruction. It is common during light anesthesia, emergence, and in pediatric patients. Triggers include secretions, blood, airway manipulation, and suctioning.

**Synonyms:**

## Larynx

The larynx, commonly known as the voice box, is a complex organ located in the anterior neck between the pharynx and the trachea that serves three primary functions: phonation (voice production), protection of the lower airway from aspiration during swallowing, and regulation of airflow during respiration.

**Synonyms:**

## Laser (Vascular)

A catheter-based laser system used to modify or remove selected vascular lesions or obstructive tissue.

**Synonyms:** Vascular

## Laser Ablation

The use of focused laser energy to heat, destroy, or seal targeted tissue. The technique is used in selected vascular, ophthalmic, dermatologic, and other procedures.

**Synonyms:**

## Laser Dentistry

Use of lasers for various procedures: caries detection, soft tissue surgery, whitening, periodontal therapy.

**Synonyms:**

---

### **Laser Fiber**

Optical fiber for laser delivery in surgery. Used in lithotripsy, tumor ablation.

**Synonyms:**

### **Laser Trabeculoplasty**

A minimally invasive laser procedure used in the treatment of open-angle glaucoma that lowers intraocular pressure by improving the outflow of aqueous humor through the trabecular meshwork.

**Synonyms:**

### **LASIK**

LASIK, or laser-assisted in situ keratomileusis, is a refractive surgical procedure that corrects myopia, hyperopia, and astigmatism by reshaping the corneal stroma using an excimer laser, after creating a thin corneal flap with either a microkeratome (a mechanical blade) or a femtosecond laser.

**Synonyms:**

### **LASIK (Laser-Assisted In Situ Keratomileusis)**

A refractive surgical procedure that reshapes the cornea using an excimer laser to correct myopia, hyperopia, and astigmatism, thereby reducing dependence on glasses or contact lenses.

**Synonyms:** Laser-Assisted In Situ Keratomileusis

### **Lassa Fever**

An acute viral hemorrhagic illness caused by Lassa virus, an arenavirus, endemic in West Africa (Nigeria, Sierra Leone, Guinea, Liberia). Transmission: exposure to excreta (urine, feces) of the multimammate rat (*Mastomys natalensis*), the natural reservoir. Incubation: 6-21 days.

**Synonyms:**

### **Last Menstrual Period**

The first day of the last normal menstrual period, used to estimate gestational age and the due date. Requires regular menstrual cycles and reliable recall. Limitations: irregular cycles, recent oral contraceptive use, early pregnancy bleeding mistaken for menses, and poor recall.

**Synonyms:**

### **Latarjet Procedure**

Surgical procedure for shoulder instability using coracoid process transfer. Provides bony block to prevent recurrent dislocation.

**Synonyms:**

### **Late Decelerations**

A fetal heart rate pattern with a gradual decrease (onset to nadir >30 seconds) that starts at or after the peak of the contraction and returns to baseline after the contraction ends. Associated with uteroplacental insufficiency (reduced oxygen transfer across the placenta).

**Synonyms:**

### **Late Effects**

Health problems occurring months to years after cancer treatment. Cardiac, pulmonary, endocrine, secondary cancers.

**Synonyms:**

### **Late Preterm (34-36 weeks)**

Births occurring from 34 weeks 0 days through 36 weeks 6 days of gestation. These infants have greater risks than term infants of respiratory, temperature, glucose, jaundice, feeding, and readmission problems.

**Synonyms:** 34-36 weeks

### **Latent Infection**

Persistent infection in which an infectious agent remains in a host in a nonreplicating or intermittently replicating state without active clinical disease. Reactivation can occur when immune control is impaired, as in latent tuberculosis.

**Synonyms:**

### **Latent Phase of Labor**

The early part of the first stage of labor, beginning with regular contractions and gradual cervical change before active labor. The transition to active labor is assessed clinically, and the duration varies widely between individuals.

---

**Synonyms:**

### **Latent Tuberculosis Infection**

An immune response to *Mycobacterium tuberculosis* without clinical or microbiologic evidence of active disease. It is usually asymptomatic and not contagious, but it can reactivate; treatment decisions depend on age, immune status, exposure risk, test results, and drug interactions.

**Synonyms:**

### **Lateral**

Lateral concerns lateral, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context. lateral to the little finger in anatomical position.

**Synonyms:**

### **Lateral Collateral Ligament Injury**

Tear of the LCL, less common than MCL injury but more significant. Mechanism: varus stress to the knee (direct blow to medial knee). Presents with lateral knee pain, swelling, and varus laxity. Part of the posterolateral corner (PLC) — when injured, causes significant rotational instability.

**Synonyms:**

### **Lateral Cuneiform**

Located between intermediate cuneiform and cuboid, articulating with navicular, intermediate cuneiform, cuboid, and third metatarsal. Contributes to the transverse arch and lateral foot column. Injuries typically from high-energy midfoot trauma.

**Synonyms:**

### **Lateral Rotation**

Rotation of a limb away from the median plane of the body.

**Synonyms:**

### **Latex Allergy**

An immune-mediated hypersensitivity reaction to natural rubber latex. Contact may cause dermatitis, urticaria, rhinitis, asthma, or anaphylaxis, especially

in healthcare and occupational settings.

**Synonyms:**

### **Latissimus Dorsi Muscle**

Broadest back muscle forming the posterior axillary wall, from T7-L5 spinous processes, thoracolumbar fascia, iliac crest, and lower ribs to the intertubercular groove floor. Innervated by thoracodorsal nerve (C6-C8). Adducts, medially rotates, extends the arm powerfully in swimming/rowing/climbing. Common reconstructive surgery flap.

**Synonyms:**

### **Lawton IADL Scale**

Instrumental ADLs: phone use, shopping, food preparation, housekeeping, laundry, transportation, medication management, finance management.

**Synonyms:**

### **Laxative**

A drug that promotes bowel evacuation, used for constipation and bowel preparation. Classes: bulk-forming (psyllium, methylcellulose), osmotic (polyethylene glycol, lactulose, magnesium salts), stimulant (senna, bisacodyl), stool softener (docusate), and lubricant (mineral oil). Choice depends on constipation type and patient factors.

**Synonyms:**

### **LD50**

Lethal dose for 50% of test population. Measure of acute toxicity. Lower LD50 = more toxic. Measured in mg/kg body weight. Ethical concerns limit animal testing.

**Synonyms:**

### **LDL**

Low-density lipoprotein; the 'bad' cholesterol that transports cholesterol to peripheral tissues and is the principal driver of atherosclerosis. Elevated LDL is a major modifiable cardiovascular risk factor; guidelines target LDL levels based on global risk (statin intensity).

**Synonyms:**

---

### Lead Poisoning

Neurotoxic, hematological, renal effects. Sources: paint, water, gasoline, occupational. Children more vulnerable. Treatment: chelation (succimer, EDTA, dimercaprol), remove exposure. Blood lead level guides treatment.

**Synonyms:**

### Lead-Time Bias

The appearance of improved survival after screening because diagnosis occurs earlier, even when the time of death is unchanged. It can make screening appear beneficial without reducing mortality.

**Synonyms:**

### Leber Congenital Amaurosis

The most severe inherited retinal dystrophy, presenting at birth or within the first few months of life with profound visual impairment, nystagmus, and pupillary light-near dissociation.

**Synonyms:**

### Left Anterior Descending Artery

A major branch of the left coronary artery that travels in the anterior interventricular groove and supplies the anterior left ventricle, much of the interventricular septum, and the apex. Its occlusion can cause extensive anterior myocardial infarction.

**Synonyms:**

### Left Atrial Myxoma

A usually benign primary cardiac tumor, commonly arising from the interatrial septum in the left atrium. It may obstruct mitral inflow or cause embolic and constitutional symptoms such as fever, weight loss, or fatigue.

**Synonyms:**

### Left Atrium

Receives oxygenated blood from 4 pulmonary veins. Most posterior chamber forming the cardiac base on chest radiography. Smooth walls from absorbed pulmonary veins; small auricle with pectinate muscles. Mitral valve separates it from the left ventricle.

**Synonyms:**

### Left Bundle Branch

A continuation of the bundle of His that divides into anterior and posterior fascicles. The anterior fascicle supplies the anterior and superior left ventricular wall; the posterior fascicle supplies the inferior and posterior wall.

**Synonyms:**

### Left hemiparesis, gaze deviated to the right

A clinical finding indicating a right hemisphere lesion, likely a right middle cerebral artery stroke. Gaze deviation toward the right suggests the lesion is in the right frontal eye field, which normally drives gaze to the contralateral (left) side; when damaged, the intact left frontal eye field drives gaze ipsilaterally (to the right).

**Synonyms:**

### Left Hypochondriac Region

Upper left abdomen lateral to the epigastric region, containing the spleen, stomach fundus, splenic flexure, and pancreatic tail. Important for evaluating splenomegaly, gastric pathology, and splenic infarction. The spleen is normally not palpable below the costal margin; enlargement into this region is a significant finding.

**Synonyms:**

### Left Iliac Region

Lower left abdomen containing the descending colon, sigmoid colon, and left ureter. Important for evaluating diverticulosis and diverticulitis, most commonly affecting the sigmoid colon here. Palpation may reveal masses from inflammatory bowel disease or colorectal cancer.

**Synonyms:**

### Left Main Coronary Artery

The short vessel arising from the left aortic sinus and dividing principally into the left anterior descending and circumflex arteries. Significant left-main disease jeopardizes a large proportion of left-ventricular myocardium.

**Synonyms:**

---

### Left testicular torsion

Acute rotation of the left testis on its spermatic cord, obstructing blood flow and causing ischemia. It is a urological emergency presenting with sudden severe left scrotal pain, nausea, vomiting, and a high-riding, horizontally oriented testis with absent cremasteric reflex.

**Synonyms:**

### Left Ventricle

Thickest cardiac chamber (13-15 mm), pumping oxygenated blood into the aorta for systemic distribution. Generates approximately 120 mmHg systolic pressure. Receives blood through the mitral valve; ejects through the aortic valve.

**Synonyms:**

### Left Ventricular Noncompaction

A rare cardiomyopathy characterized by prominent myocardial trabeculations with deep intertrabecular recesses, thought to result from arrested myocardial compaction during embryogenesis. It may present with heart failure, arrhythmias, or thromboembolism.

**Synonyms:**

### Left-sided superior vena cava

A congenital venous anomaly where the left superior vena cava drains into the coronary sinus instead of the right atrium via the right SVC. It is the most common thoracic venous anomaly, present in 0.3–0.5% of the general population. Usually asymptomatic but relevant during central venous catheterization or cardiac surgery.

**Synonyms:**

### Leg Ulcer

An open sore on the leg that fails to heal normally, often caused by poor venous circulation, arterial disease, diabetes, pressure, or inflammation. Pain, spreading redness, fever, or black tissue requires prompt assessment.

**Synonyms:**

### Legg-Calve-Perthes Disease

Idiopathic avascular necrosis of the femoral head in children, typically ages 4-8 years. More common in boys (4:1) and Caucasian children. Presents with limping (antalgic gait), hip/knee pain, and limited hip range of motion (especially abduction and internal rotation). Etiology: temporary disruption of blood supply to the femoral head.

**Synonyms:**

### Legg–Calvé–Perthes disease

Idiopathic avascular necrosis of the femoral head in children, typically between ages two and twelve, resulting from disrupted blood supply to the capital femoral epiphysis. It presents with insidious onset of hip pain, limp, and restricted range of motion.

**Synonyms:**

### Legionella Pneumonia

From *Legionella pneumophila* in water systems. Presents with high fever, diarrhea, confusion, and hyponatremia. Diagnosis by urinary antigen test. Treatment is fluoroquinolones or macrolides.

**Synonyms:**

### Legionella pneumophila

A gram-negative rod that causes Legionnaires' disease, a severe pneumonia, and Pontiac fever, a milder illness. The organism is found in aquatic environments and is transmitted through inhalation of contaminated water droplets. Risk factors include age, smoking, and immunosuppression.

**Synonyms:**

### Legionnaires' Disease

A severe form of pneumonia caused by *Legionella pneumophila*, a Gram-negative aerobic bacillus that is found naturally in freshwater environments (lakes, streams) and artificially in water systems (air conditioning cooling towers, hot tubs, decorative fountains, plumbing systems, showers, humidifiers).

**Synonyms:**

### Leiomyoma

Uterine fibroid: a benign smooth muscle tumor

---

of the uterus (estrogen/progesterone-sensitive), the most common pelvic tumor in women. Locations: subserosal, intramural, submucosal (most symptomatic).

**Synonyms:**

### **Leiomyoma (Fibroid)**

A benign tumor of uterine smooth muscle that may cause heavy menstrual bleeding, pelvic pressure, pain, or no symptoms.

**Synonyms:** Fibroid

### **Leiomyosarcoma**

A malignant tumor of smooth muscle, most often arising in the uterus, retroperitoneum, or gastrointestinal tract.

**Synonyms:**

### **Leishmania donovani**

A protozoan parasite that causes visceral leishmaniasis (kala-azar), transmitted by the bite of infected female phlebotomine sandflies. The organism exists as flagellated promastigotes in the sandfly gut and as non-flagellated amastigotes within human macrophages.

**Synonyms:**

### **Leishmaniasis**

Leishmaniasis is infection by *Leishmania* parasites transmitted by sandflies, producing cutaneous, mucosal, or visceral disease depending on species and host response. of infected female phlebotomine sandflies. Visceral leishmaniasis (kala-azar): caused by *L. donovani*/*L. infantum* – fever, hepatosplenomegaly, pancytopenia, weight loss, hypergammaglobulinaemia; fatal if untreated.

**Synonyms:**

### **Length-Time Bias**

The tendency of screening to preferentially detect slower-growing or less aggressive disease because it remains detectable for a longer preclinical period. It can exaggerate the apparent benefit of screening.

**Synonyms:**

### **Lens**

Transparent biconvex avascular structure behind the iris/pupil, suspended by zonular fibers from the ciliary body. Provides approximately one-third of refractive power and allows accommodation (focusing on near objects by changing shape). Concentric lens fiber layers from surface epithelium, surrounded by a capsule.

**Synonyms:**

### **Lentigo maligna**

A melanoma in situ that occurs on chronically sun-damaged skin, most commonly on the face of elderly individuals. It presents as a large, irregularly pigmented, slow-growing macule with variegated shades of brown and black. The radial growth phase may persist for years before invasion occurs.

**Synonyms:**

### **Leopold Maneuvers**

A systematic abdominal palpation technique used to determine fetal position and presentation. Four maneuvers: (1) fundal grip identifies fetal lie (head vs breech), (2) umbilical grip locates the fetal back, (3) Pawlik grip identifies the presenting part and its position, (4) pelvic grip confirms presentation and attitude.

**Synonyms:**

### **Lepromatous leprosy**

The disseminated, multibacillary pole of the leprosy spectrum characterised by poor cell-mediated immunity to *Mycobacterium leprae*, resulting in widespread skin nodules, plaques, and diffuse infiltration with thickening of the skin and facial features (leonine facies).

**Synonyms:**

### **Leprosy**

Leprosy is chronic infection with *Mycobacterium leprae* or *M. lepromatosis*, affecting skin and peripheral nerves and potentially causing sensory loss, weakness, and deformity. organs.

**Synonyms:**

---

## **Leprosy (Hansen's Disease)**

A chronic infection caused mainly by *Mycobacterium leprae* that primarily affects the skin and peripheral nerves and can cause sensory loss and weakness.

**Synonyms:** Hansen's Disease

## **Leptin**

A hormone produced mainly by adipose tissue that signals stored-energy status to the brain and influences appetite and energy balance.

**Synonyms:**

## **Leptomeningeal Metastasis**

Spread of cancer to the leptomeninges and cerebrospinal fluid (carcinomatous meningitis), causing multifocal neurologic deficits; managed with intrathecal chemotherapy and involved-field radiation.

**Synonyms:**

## **Leptospirosis**

Leptospirosis is zoonotic infection with *Leptospira* bacteria acquired from water or soil contaminated by animal urine, ranging from fever and myalgia to kidney and liver failure. Transmitted through contact with water or soil contaminated with the urine of infected animals (rodents, cattle, dogs). Incubation period 5-14 days. Mild form: fever, headache, myalgia (especially calves), conjunctival suffusion.

**Synonyms:**

## **Leriche Syndrome**

Aortoiliac occlusive disease causing reduced blood flow to the pelvis and lower limbs. The classic presentation includes buttock or thigh claudication, diminished femoral pulses, and erectile dysfunction, although symptoms vary with the extent of collateral circulation.

**Synonyms:**

## **Lesion**

A general term for any abnormal change in tissue structure due to disease or injury.

**Synonyms:**

## **Lesser Curvature**

Concave medial stomach border from gastroesophageal junction to pylorus. Attachment site for the lesser omentum connecting to the liver, containing right/left gastric arteries. Most common gastric ulcer site. The angular incisure marks the body-antrum junction. Cancer here may cause early obstruction from the narrow lumen.

**Synonyms:**

## **Lesser Trochanter**

Small conical posteromedial proximal femoral prominence. Insertion for iliopsoas (primary hip flexor). Isolated fractures in adults may indicate pathologic fracture from metastatic disease; in adolescents may result from iliopsoas avulsion. Visible on lateral hip radiographs.

**Synonyms:**

## **Lethal-Means Counseling**

A preventive intervention that reduces access to firearms, medications, toxic substances, or other methods of self-harm during periods of elevated risk. It is conducted collaboratively and is an important component of suicide prevention.

**Synonyms:**

## **Leucocyte (White Blood Cell)**

A blood cell involved in immune defense against infection, foreign substances, and abnormal cells.

**Synonyms:** White Blood Cell

## **Leucopenia**

A decreased total white blood cell count below the normal reference range ( $< 4.0 \times 10^9/L$ ). Leucopenia is often due to a decrease in neutrophils (neutropenia) or lymphocytes (lymphopenia).

**Synonyms:**

## **Leukemia**

Leukemia is cancer of blood-forming cells that disrupts normal marrow production and may cause anemia, infection, bleeding, abnormal blood counts,

---

and organ infiltration. Leukemias are classified by the cell lineage and by clinical course, including acute and chronic forms.

**Synonyms:**

### **Leukemia cutis**

Infiltration of the skin by leukemic cells, presenting as papules, nodules, or plaques. It is more common in acute myeloid leukemia and indicates a poorer prognosis.

**Synonyms:**

### **Leukemia Genetics**

Acute lymphoblastic leukemia (ALL): Philadelphia chromosome (t9;22), Hyperdiploidy, ETV6-RUNX1 fusion. Acute myeloid leukemia (AML): t8;21, t15;17 (APL), FLT3 mutations. Chronic myeloid leukemia (CML): Philadelphia chromosome (BCR-ABL).

**Synonyms:**

### **Leukemic infiltration of the gingiva**

Gingival enlargement caused by infiltration of leukemic cells, most commonly in acute myeloid leukemia, particularly the monocytic subtype. The gingiva becomes swollen, erythematous, friable, and may bleed spontaneously. It results from leukemic cell proliferation within the gingival connective tissue.

**Synonyms:**

### **Leukemoid Reaction**

A marked reactive increase in the white-cell count, usually with prominent neutrophilia and immature granulocytes, caused by severe infection, inflammation, malignancy, or tissue injury. It resembles leukemia but is not a clonal hematologic malignancy.

**Synonyms:**

### **Leukocyte Adhesion Deficiency**

LAD-I (ITGB2 mutation, CD18 deficiency): absent CD11/CD18 integrins -> impaired neutrophil adhesion/transmigration -> delayed umbilical cord separation (>30 days), recurrent soft tissue infections without pus formation (leukocytosis >20,000),

poor wound healing, periodontitis. Severe: death by age 2 without HSCT.

**Synonyms:**

### **Leukocyte Alkaline Phosphatase**

An enzyme activity measured in mature neutrophils using a cytochemical stain, historically reported as a leukocyte alkaline phosphatase (LAP) score. The score is typically low in chronic myeloid leukaemia and increased in many leukemoid reactions, infections, pregnancy, and other reactive states.

**Synonyms:**

### **Leukocytoclastic Vasculitis**

A histopathologic pattern of small-vessel vasculitis characterized by neutrophilic debris, fibrinoid change, and vessel-wall inflammation. Clinically it often presents with palpable purpura; causes may be cutaneous-limited or associated with systemic disease.

**Synonyms:**

### **Leukocytosis**

An increased total white blood cell count above the normal reference range ( $> 11 \times 10^9/L$  in adults).

**Synonyms:**

### **Leukonychia**

White discoloration of the nails. True leukonychia: involves the nail matrix and moves distally with nail growth (punctate, striate/Mees lines from arsenic poisoning, or total).

**Synonyms:**

### **Leukoplakia**

Leukoplakia is a persistent white patch on mucosa that cannot be scraped away and may reflect irritation, infection, or premalignant epithelial change requiring evaluation. and cannot be characterized clinically as any other definable lesion (WHO). Leukoplakia is a potentially malignant disorder of the oral cavity, with a risk of malignant transformation to squamous cell carcinoma of approximately 1-5% per year.

**Synonyms:**

---

## Leukopoiesis

The production and development of white blood cells (leukocytes) from hematopoietic stem cells in the bone marrow, regulated by colony-stimulating factors and interleukins.

**Synonyms:**

## Leukotomy

A neurosurgical procedure involving the cutting of white matter fibers in the prefrontal cortex, also known as frontal lobotomy or prefrontal leukotomy. Developed by Egas Moniz (Nobel Prize 1949) and Walter Freeman.

**Synonyms:** frontal lobotomy or prefrontal leukotomy.

## Levator Ani

The primary pelvic floor muscle complex supporting the pelvic organs, forming a hammock from the pubic symphysis to the coccyx. Composed of the pubococcygeus, puborectalis, and iliococcygeus muscles. Innervated by the pudendal nerve (S2-S4).

**Synonyms:**

## Lewy Body Dementia

Dementia with visual hallucinations, parkinsonism, fluctuating cognition. Alpha-synuclein pathology. Treatment: cholinesterase inhibitors, avoid antipsychotics.

**Synonyms:**

## Lewy Body Disease

A neurodegenerative disorder associated with abnormal neuronal alpha-synuclein aggregates. Dementia with Lewy bodies commonly features fluctuating cognition, recurrent visual hallucinations, REM sleep behavior disorder, and spontaneous parkinsonism; sensitivity to antipsychotics may occur.

**Synonyms:**

## Leydig Cell Tumor

A testicular sex cord-stromal tumor that secretes testosterone or estrogen, causing precocious puberty or gynecomastia; most are benign and treated by orchidectomy.

**Synonyms:**

## Lfgren Syndrome

Acute sarcoidosis with bilateral hilar lymphadenopathy, erythema nodosum, and ankle polyarthralgia. It often resolves spontaneously and generally has a favorable prognosis, although follow-up is needed. Associated with HLA-DR3.

**Synonyms:**

## Li-Fraumeni Syndrome

An inherited cancer-predisposition syndrome most often caused by a pathogenic TP53 variant. It confers high lifetime risks of sarcomas, breast cancer, brain tumors, adrenocortical carcinoma, leukemia, and other early-onset malignancies.

**Synonyms:**

## LI-RADS

Liver Imaging-Reporting and Data System. Standardizes reporting of liver imaging in patients with cirrhosis. Used for hepatocellular carcinoma diagnosis.

**Synonyms:**

## Libido

Sexual desire or drive, influenced by biological, psychological, and social factors.

**Synonyms:**

## Libido and Sexual Performance

Libido (sexual desire) is modulated by a complex interplay of hormonal (testosterone, estrogen, prolactin), neurologic, psychological, and relational factors.

**Synonyms:**

## Lice

Pediculosis: infestation by blood-sucking lice—head lice (*Pediculus humanus capitis*, common in children, scalp), body lice (*Pediculus humanus corporis*, clothing/seams, associated with poor hygiene and epidemic typhus transmission), and pubic/crab lice (*Phthirus pubis*, sexually transmitted).

**Synonyms:**

---

## Lice Infestations

Pediculosis is infestation by head, body, or pubic lice. Head lice cause scalp pruritus and nits attached to hair shafts; body lice live mainly in clothing; pubic lice affect coarse hair-bearing regions.

**Synonyms:**

## Lichen

A descriptive dermatological term referring to a flat-topped, firm, papular skin lesion resembling the lichen plant (a symbiotic organism of algae and fungi growing on rocks and trees). Lichenoid describes lesions that resemble lichen planus or lichenoid drug eruptions.

**Synonyms:**

## Lichen Planus

A T-cell mediated inflammatory condition affecting skin, mucous membranes, nails, and hair. Classic presentation: the 6 Ps (pruritic, purple, polygonal, planar, papules, plaques), often with Wickham striae (white lacy network on surface). Oral lichen planus affects buccal mucosa and may be erosive.

**Synonyms:**

## Lichen Sclerosus

A chronic inflammatory skin disease most commonly affecting anogenital skin. It presents as ivory-white, atrophic plaques with wrinkled paper-like appearance. In women, it predominantly affects the vulva and perianal region (figure-eight distribution). In men, it affects the glans penis and foreskin (balanitis xerotica obliterans).

**Synonyms:**

## Lichen Simplex Chronicus

A thickened, leathery plaque caused by chronic scratching and rubbing (itch-scratch cycle). It commonly affects the neck, ankles, lower legs, and genital area. It is a form of neurodermatitis associated with stress and anxiety.

**Synonyms:**

## Liddle Syndrome

Autosomal dominant condition caused by gain-of-

function mutations in the ENaC sodium channel subunits leading to constitutive sodium reabsorption and potassium secretion in the collecting duct. Presents with severe hypertension, hypokalemia, and metabolic alkalosis occurring in childhood or young adulthood.

**Synonyms:**

## Liddle Syndrome Treatment

Liddle syndrome is an autosomal dominant cause of early-onset hypertension with hypokalemia and metabolic alkalosis caused by gain-of-function mutations in ENaC sodium channel subunits. Aldosterone levels are suppressed.

**Synonyms:**

## Life Expectancy

The average number of additional years a person of a specified age is expected to live under current mortality conditions.

**Synonyms:**

## Ligament

A dense, fibrous connective tissue band that connects bone to bone, providing passive joint stability and guiding joint motion. Ligaments are composed predominantly of type I collagen fibers (parallel orientation, crimped pattern) and elastin fibers (10-20% in some ligaments), arranged in bundles.

**Synonyms:**

## Ligand

Any molecule that binds specifically to a biological receptor, macromolecule, or active site. In pharmacology and physiology, ligands include hormones, neurotransmitters, drugs, and toxins that bind receptors to initiate (agonist), block (antagonist), or modulate signaling.

**Synonyms:**

## Ligation

The surgical process of tying off a blood vessel or duct using a suture or clip to prevent bleeding or block fluid flow.

**Synonyms:**

---

### Ligation (Vascular)

Surgical tying, clipping, or sealing of a blood vessel to stop or redirect blood flow.

**Synonyms:** Vascular

### Ligature

Any cord, wire, rope, fabric, or flexible object used to constrict the neck, bind limbs, suspend the body, or inflict injury. The resulting pale groove-shaped abrasion may be horizontal with petechiae in homicidal strangulation, or oblique and upward in hanging.

**Synonyms:**

### Light Therapy

Treatment that uses selected wavelengths or intensity of light for conditions such as some skin disorders, seasonal depression, or neonatal jaundice.

**Synonyms:**

### Light's Criteria

An effusion is exudative if any one is met: pleural protein/serum protein  $> 0.5$ , pleural LDH/serum LDH  $> 0.6$ , or pleural LDH  $> 2/3$  upper limit of normal serum LDH.

**Synonyms:**

### Light-near dissociation

A pupillary abnormality in which the pupil does not constrict to light but does constrict during accommodation (near response). Classically seen in Argyll Robertson pupils (neurosyphilis) and also in midbrain lesions, diabetes mellitus, and optic nerve disease. Differentiates from tonic pupil (Adie pupil) by preserved near response.

**Synonyms:**

### Likelihood Ratio

A ratio that describes how much a test result changes the odds of disease. The positive likelihood ratio is sensitivity divided by one minus specificity; the negative likelihood ratio is one minus sensitivity divided by specificity.

**Synonyms:**

### Limbic Encephalitis

Inflammation of the limbic system, often presenting subacutely with memory impairment, seizures, psychiatric or behavioral change, and sleep disturbance. It may be autoimmune, paraneoplastic, infectious, or of unknown cause.

**Synonyms:**

### Limbic System

A set of interconnected brain structures located in the medial temporal lobe and around the corpus callosum, involved in emotion, memory, motivation, behaviour, and autonomic regulation. The term was coined by Paul Broca (1878, le grand lobe limbique) and expanded by Papez (1937, Papez circuit) and MacLean (1952, 'visceral brain').

**Synonyms:**

### Linea Aspera

Prominent longitudinal posterior femoral shaft ridge from converging muscle attachment lines. Insertion for adductor magnus, vastus medialis/lateralis, and short head of biceps femoris. Thickest femoral cortex, resisting bending forces. Diverges distally into supracondylar lines.

**Synonyms:**

### Linea Nigra

A dark brown or black vertical line appearing on the abdomen during pregnancy, extending from the pubic symphysis to the umbilicus or beyond. Caused by hormonal stimulation of melanocytes, resulting in hyperpigmentation. More prominent in darker-skinned women.

**Synonyms:**

### Linear Energy Transfer

Energy deposited per unit path length. High LET (alpha, neutrons) more biologically effective.

**Synonyms:**

### Linear IgA bullous dermatosis

An autoimmune blistering disease caused by linear deposition of IgA at the basement membrane zone. It produces tense blisters, sometimes in annular or

---

"string of pearls" patterns, and may be idiopathic or drug-induced.

**Synonyms:**

### **Lingua villosa nigra**

A benign condition characterized by elongation and dark pigmentation of the filiform papillae of the tongue, often associated with tobacco use, poor oral hygiene, or antimicrobial therapy.

**Synonyms:**

### **Lingual artery**

A branch of the external carotid artery supplying the tongue, floor of mouth, and sublingual structures. It arises anterior to the hypoglossal nerve and courses deep to the hyoglossus muscle. Lingual artery aneurysm or thrombosis is rare but can cause life-threatening hemorrhage or tongue ischemia.

**Synonyms:**

### **Linitis Plastica**

A diffuse infiltrative form of gastric carcinoma in which tumour cells spread through the stomach wall, producing marked thickening and rigidity with loss of normal distensibility. It may cause early satiety, weight loss, nausea, vomiting, or vague upper-abdominal symptoms.

**Synonyms:**

### **Linkage**

Co-inheritance of nearby genetic markers and disease gene. Measured by recombination fraction ( $\theta$ ). LOD score  $>3$  indicates linkage.

**Synonyms:**

### **Lipase**

An enzyme that breaks down fats into smaller molecules. Blood lipase testing is commonly used when pancreatitis is suspected, although an abnormal result is not specific in every case.

**Synonyms:**

### **Lipedema**

A chronic disorder of abnormal, usually symmetrical deposition of painful subcutaneous adipose tissue,

predominantly affecting the legs and sometimes the arms. The feet and hands are typically spared, and easy bruising, tenderness, and progressive functional limitation may occur.

**Synonyms:**

### **Lipemia retinalis**

A creamy, pinkish-white discolouration of the retinal vessels caused by severely elevated serum triglycerides, typically exceeding 2,000 mg/dL. It is a sign of extreme hypertriglyceridaemia and indicates a risk for acute pancreatitis, requiring urgent lipid-lowering therapy and dietary management.

**Synonyms:**

### **Lipid**

Diverse group of hydrophobic molecules including triglycerides (energy storage), phospholipids (membranes), cholesterol (membranes, steroid precursor), fat-soluble vitamins (A, D, E, K). Triglycerides: glycerol + 3 fatty acids. Fatty acids: saturated (no double bonds) vs. unsaturated (one or more double bonds).

**Synonyms:**

### **Lipid Emulsion Therapy**

The antidote for local anesthetic systemic toxicity. The mechanism involves the lipid sink theory (lipid phase sequesters lipophilic local anesthetics from neural and cardiac tissue) and metabolic theory (lipid provides fatty acid substrate to ischemic myocardium).

**Synonyms:**

### **Lipid Panel**

Measurement of total cholesterol, LDL-C, HDL-C, and triglycerides. Fasting (9-12 hours) or non-fasting acceptable for screening. Desirable levels: total cholesterol  $<200$  mg/dL, LDL  $<100$  mg/dL ( $<70$  for very high risk), HDL  $>40$  (men) or  $>50$  (women) mg/dL, triglycerides  $<150$  mg/dL.

**Synonyms:**

### **Lipoatrophy**

Loss of subcutaneous adipose tissue at specific sites,

---

most commonly caused by repeated subcutaneous injections of insulin or other medications, or associated with autoimmune conditions and HIV lipodystrophy.

**Synonyms:**

### **Lipodystrophy**

Abnormal distribution or loss of body fat, which may be inherited or caused by medicines, metabolic disease, or repeated injections.

**Synonyms:**

### **Lipodystrophy Syndromes**

Rare conditions characterized by selective loss of adipose tissue leading to severe insulin resistance, diabetes, and hypertriglyceridemia. Congenital generalized lipodystrophy involves loss of all body fat from birth. Familial partial lipodystrophy involves loss of limb and truncal fat with fat accumulation in face and neck.

**Synonyms:**

### **Lipofuscin**

Lipofuscin concerns lipofuscin; its medical significance is established from the defining features, setting, associated findings, and clinical question. that accumulates progressively within cells with age, particularly in post-mitotic cells such as neurons, cardiac myocytes, and hepatocytes.

**Synonyms:**

### **Lipogenesis**

The synthesis of fatty acids and triglycerides from acetyl-CoA and other carbon sources. It occurs mainly in liver and adipose tissue when energy and carbohydrate are abundant and is stimulated by insulin.

**Synonyms:**

### **Lipoid Nephrosis**

A historical term for minimal change disease, a glomerular disorder causing nephrotic syndrome through increased glomerular permeability to proteins. It is especially common in children and typically shows diffuse podocyte foot-process effacement

on electron microscopy.

**Synonyms:**

### **Lipoid Pneumonia**

Lung inflammation caused by accumulation of lipid-laden macrophages in the alveoli. Exogenous lipoid pneumonia results from aspiration of mineral oil, petroleum jelly, or oil-based nose drops. Endogenous lipoid pneumonia occurs distal to bronchial obstruction. HRCT shows ground-glass opacities with low-attenuation areas (fat density).

**Synonyms:**

### **Lipolysis**

Hydrolysis of stored triglycerides in adipocytes to release non-esterified fatty acids and glycerol. It is stimulated by catecholamines and fasting-related hormonal signals and inhibited by insulin.

**Synonyms:**

### **Lipoma**

The most common benign soft tissue tumor, composed of mature adipocytes. It presents as a soft, mobile, painless subcutaneous nodule, commonly on the trunk, neck, and proximal extremities. Lipomas grow slowly and may be multiple (familial multiple lipomatosis). Diagnosis is clinical; ultrasound or MRI for deep or atypical lesions.

**Synonyms:**

### **Lipomatosis**

A rare condition characterized by the diffuse, symmetric, non-encapsulated proliferation of mature adipose tissue, most commonly affecting the pelvis and lower extremities. Unlike simple lipomas, lipomatosis involves infiltration of fat into surrounding structures without encapsulation, making surgical excision difficult.

**Synonyms:**

### **Lipoprotein**

Complex of lipids and proteins transporting hydrophobic lipids in aqueous blood. Classes: chylomicrons (dietary lipids), VLDL (endogenous triglycerides), LDL (cholesterol delivery), HDL (reverse

---

cholesterol transport). ApoB-100 in LDL; apoA-1 in HDL. Elevated LDL cholesterol is a major risk factor for atherosclerosis.

**Synonyms:**

### **Lipoprotein Lipase**

Hydrolyzes triglycerides in chylomicrons and VLDL. Activated by insulin.

**Synonyms:**

### **Lipoprotein Metabolism**

The production, transport, modification, and clearance of particles that carry lipids through the blood.

**Synonyms:**

### **Liposarcoma**

A malignant tumor of fat cells, usually arising in the deep soft tissues of the thigh or retroperitoneum; well-differentiated, myxoid, and pleomorphic subtypes are recognized.

**Synonyms:**

### **Liposomal amphotericin B**

A liposomal formulation of amphotericin B used in the treatment of severe systemic fungal infections, with reduced nephrotoxicity compared to conventional amphotericin B. The liposomal formulation encapsulates amphotericin B within lipid vesicles, which alters the drug's biodistribution and reduces renal tubular damage.

**Synonyms:**

### **Liquefactive Necrosis**

Characterized by the complete enzymatic digestion of dead cells, resulting in a liquid, viscous mass that eventually liquefies and forms a cystic cavity.

**Synonyms:**

### **Liquid Biopsy**

Analysis of blood or another body fluid for cellular material, DNA, RNA, or other molecules released by a tumor or other disease process.

**Synonyms:**

### **Lisch Nodules**

Benign, dome-shaped melanocytic hamartomas on the iris, commonly seen in neurofibromatosis type 1. They usually do not affect vision and support the diagnosis when interpreted with other clinical findings.

**Synonyms:**

### **Lissencephaly**

A severe brain malformation characterized by a smooth cerebral surface due to absent (agyria) or decreased (pachygyria) sulcation and gyration, caused by impaired neuronal migration during 12-16 weeks of gestation.

**Synonyms:**

### **Listeria monocytogenes**

A gram-positive, facultatively anaerobic rod that causes listeriosis, a foodborne infection. The organism is transmitted through contaminated food, particularly deli meats, soft cheeses, and ready-to-eat foods. It can grow at refrigeration temperatures.

**Synonyms:**

### **Listeriosis**

Listeriosis is infection with *Listeria monocytogenes*, causing febrile gastroenteritis or invasive disease such as meningitis, especially in pregnancy, newborns, older adults, and immunocompromised people. food (deli meats, soft cheeses, unpasteurized dairy, produce). Risk groups: pregnant women (fever, flu-like illness), neonates (sepsis, meningitis), immunocompromised, and elderly.

**Synonyms:**

### **Listeriosis in Pregnancy**

Infection with *Listeria monocytogenes*, a foodborne Gram-positive rod. Pregnant women are 10-20 times more susceptible than the general population. Ingestion of contaminated food (deli meats, soft cheeses, unpasteurized dairy, raw sprouts). Maternal symptoms: fever, myalgias, GI symptoms (nausea, diarrhea).

**Synonyms:**

---

### **Lithiasis**

Stone formation. Nephrolithiasis, ureterolithiasis, cystolithiasis, urethrolithiasis.

**Synonyms:**

### **Lithium Toxicity**

A potentially life-threatening condition caused by lithium levels exceeding the therapeutic range (0.6–1.2 mEq/L). Mild toxicity (1.5–2.0 mEq/L): nausea, vomiting, diarrhea, coarse tremor, muscle weakness. Moderate toxicity (2.0–2.5 mEq/L): confusion, ataxia, blurred vision, dysarthria.

**Synonyms:**

### **Lithotripsy**

Lithotripsy breaks urinary stones into smaller fragments using externally delivered shock waves or an endoscopic energy source so they can pass or be removed. smaller pieces that can pass through the urinary tract. See Shock Wave Lithotripsy.

**Synonyms:**

### **Lithotripsy Probe**

A device that fragments a stone using mechanical, ultrasonic, laser, or shock-wave energy during a stone-removal procedure.

**Synonyms:**

### **Lithotripter Probe**

A probe used to break urinary or biliary stones into smaller fragments for removal.

**Synonyms:**

### **Little Area**

The highly vascular region of the anterior nasal septum where several arteries meet and where most anterior nosebleeds originate.

**Synonyms:**

### **Livedo Reticularis**

A net-like, violaceous discoloration of the skin caused by altered blood flow in small cutaneous vessels. It may be temporary and cold-induced or associated with vascular, autoimmune, infectious, or clotting disorders.

**Synonyms:**

### **Liver**

The largest internal organ, located in the right upper quadrant of the abdomen beneath the diaphragm.

**Synonyms:**

### **Liver Abscess**

Focal collection of pus within the liver parenchyma. Pyogenic abscesses are most commonly from biliary tract infection or hematogenous spread from portal or systemic infection. Amoebic abscesses are caused by *Entamoeba histolytica* predominantly in tropical regions. Presents with fever, right upper quadrant pain, and hepatomegaly.

**Synonyms:**

### **Liver Biopsy**

Percutaneous, transjugular, or laparoscopic sampling of liver tissue for histological evaluation. Indicated for staging fibrosis, diagnosing specific liver diseases, and assessing treatment response. The procedure is guided by ultrasound for accuracy. Complications include bleeding, pain, and pneumothorax.

**Synonyms:**

### **Liver Cancer**

A malignant tumor arising in the liver. Hepatocellular carcinoma is the most common primary type in adults; risk factors include chronic liver disease, viral hepatitis, alcohol-related liver injury, and some toxins.

**Synonyms:**

### **Liver Cirrhosis**

Advanced hepatic fibrosis with regenerative nodules surrounded by dense fibrous septa representing the end result of chronic liver injury. Common etiologies include chronic viral hepatitis, alcoholic liver disease, and nonalcoholic steatohepatitis.

**Synonyms:**

### **Liver Disease Diet**

An individualized eating plan for a person with liver disease. It may address adequate energy and

---

protein, sodium or fluid intake, alcohol avoidance, and nutrient deficiencies according to the condition.

**Synonyms:**

### **Liver Enzymes**

ALT, AST, ALP, GGT. Markers of liver injury. ALT more specific for liver.

**Synonyms:**

### **Liver Failure**

A life-threatening condition resulting from severe impairment of hepatic synthetic, metabolic, and detoxification functions.

**Synonyms:**

### **Liver Function Tests**

Blood tests used to assess liver injury, bile-flow abnormalities, and liver synthetic function. They commonly include aminotransferases, alkaline phosphatase, bilirubin, albumin, and clotting tests; results must be interpreted together with the clinical context.

**Synonyms:**

### **Liver Health**

Essential for metabolism, detoxification, protein synthesis, bile production, and immune function.

**Synonyms:**

### **Liver Lobule**

The functional unit of the liver: a hexagonal structural unit centered on a central (hepatic) venule, with portal triads (portal vein, hepatic artery, bile ductule) at the corners.

**Synonyms:**

### **Liver Mass**

Abnormality in liver detected on imaging. Benign: hemangioma, focal nodular hyperplasia, adenoma. Malignant: hepatocellular carcinoma, metastasis, cholangiocarcinoma.

**Synonyms:**

### **Liver Transplant**

Surgical replacement of a diseased liver with a healthy liver or part of a liver from a donor.

**Synonyms:**

### **Liver Transplantation**

Surgical replacement of a diseased liver with a healthy donor organ indicated for end-stage liver disease, acute liver failure, and select hepatocellular carcinomas within Milan criteria. Requires lifelong immunosuppression with calcineurin inhibitors, antimetabolites, and corticosteroids.

**Synonyms:**

### **Living Will**

A type of advance directive that records a person's preferences for future medical treatment if the person cannot communicate or decide.

**Synonyms:**

### **Living Will (Advance Statements)**

A legally binding written document that specifies a person's preferences for medical treatment if they become unable to make decisions for themselves in the future (loss of capacity). Living wills are a type of advance directive (or advance decision/advance statement in the UK).

**Synonyms:** Advance Statements

### **Livor Mortis (Lividity)**

Post-mortem purplish-red discoloration of dependent body parts resulting from gravitational settling of blood in uncompressed capillaries and small veins following cessation of circulation.

**Synonyms:** Lividity

### **Livor Mortis (Postmortem Lividity)**

Purplish-red discoloration of dependent body parts following death, caused by gravitational pooling of blood in uncompressed capillaries and venules. Starts within 30 min–2 hours, becomes fixed after 6–12 hours.

**Synonyms:** Postmortem Lividity

---

## LLETZ

Large Loop Excision of the Transformation Zone, also called LEEP (Loop Electrosurgical Excision Procedure). A common outpatient procedure used to diagnose and treat cervical intraepithelial neoplasia (CIN).

**Synonyms:** LEEP (Loop Electrosurgical).

## Loa loa

The African eye worm, a filarial nematode transmitted by Chrysops deer flies, endemic to the rainforests of West and Central Africa. Adult worms migrate subcutaneously, causing Calabar swellings, and may cross the subconjunctiva of the eye, causing visible worm migration. Microfilariae are detected in daytime peripheral blood.

**Synonyms:**

## Loading Dose

A higher initial dose of a drug administered to rapidly achieve therapeutic plasma concentrations, followed by lower maintenance doses to sustain the steady state. The loading dose is calculated as:  $\text{Loading dose} = (\text{Vd} \times \text{desired concentration}) / \text{bioavailability}$ .

**Synonyms:**

## Lobar Pneumonia

Consolidation involving an entire lobe. Most commonly caused by *S. pneumoniae*. Classic progression: congestion, red hepatization, gray hepatization, resolution.

**Synonyms:**

## Lobectomy

Surgical removal of a lobe of an organ. Most commonly lung lobectomy (removal of one lobe of the lung, performed for lung cancer, bronchiectasis, abscess, or benign tumor) or temporal lobectomy (removal of the anterior temporal lobe for drug-resistant temporal lobe epilepsy).

**Synonyms:**

## Local Anesthesia

The reversible abolition of sensation in a circum-

scribed area by infiltration or topical application of local anesthetic agents (lidocaine, bupivacaine) without loss of consciousness. Maximum safe dosing must be observed to avoid systemic toxicity. Epinephrine prolongs duration but is avoided in end-arterial territories.

**Synonyms:**

## Local Anesthetic

A medication that causes reversible loss of sensation in a specific, localized area of the body without affecting consciousness. Local anesthetics block voltage-gated sodium channels in nerve cell membranes, preventing action potential generation and propagation.

**Synonyms:**

## Local Anesthetic Systemic Toxicity

A life-threatening complication caused by elevated plasma concentration of local anesthetic, most commonly from inadvertent intravascular injection or rapid absorption.

**Synonyms:**

## Local Anesthetic Toxicity

CNS toxicity: tinnitus, perioral numbness, seizures. Cardiovascular toxicity: arrhythmias, hypotension, cardiac arrest. Treatment: lipid emulsion therapy (Intralipid), seizure control, ACLS.

**Synonyms:**

## Local Invasion

Tumor growth into surrounding tissues. Distinguishes malignant from benign.

**Synonyms:**

## Lochia

Vaginal discharge following delivery that undergoes characteristic changes over the puerperium. Lochia rubra (days 1-4): red, bloody discharge containing blood, decidual tissue, and fetal membranes. Lochia serosa (days 5-10): pinkish-brown discharge with serous fluid, leukocytes, and organisms.

**Synonyms:**

---

### Locked-in Syndrome

A neurological condition in which the patient is fully conscious and aware but cannot move or speak due to complete paralysis of all voluntary muscles except for vertical eye movements and blinking (total locked-in syndrome: loss of all eye movements).

**Synonyms:**

### Lockjaw (Tetanus)

A serious neurologic illness caused by tetanospasmin produced by *Clostridium tetani*. It causes painful muscle stiffness and spasms, often beginning in the jaw.

**Synonyms:** Tetanus

### Locomotor Ataxia (Tabes Dorsalis)

A late manifestation of untreated tertiary syphilis (neurosyphilis) caused by infection with *Treponema pallidum*, involving progressive degeneration of the dorsal columns (fasciculus gracilis and cuneatus) and dorsal roots of the spinal cord.

**Synonyms:** Tabes Dorsalis

### Locus

Specific position of gene on chromosome. Designated by chromosome number, arm (p/q), band, subband. Example: 7q31.2 (CFTR gene).

**Synonyms:**

### Loneliness

Subjective feeling of isolation. Associated with depression, cognitive decline, mortality.

**Synonyms:**

### Long COVID

Long COVID is a condition of persistent or newly developing symptoms after SARS-CoV-2 infection, potentially involving fatigue, exertional intolerance, cognition, breathing, autonomic function, or multiple organs. Several weeks and sometimes months or years. Common manifestations include fatigue, post-exertional malaise, cognitive difficulty, breathlessness, dysautonomia, and altered smell or taste.

**Synonyms:**

### Long QT Syndrome

A disorder of cardiac repolarization that prolongs the QT interval and increases the risk of torsades de pointes and sudden cardiac death. It may be inherited or acquired from medicines, electrolyte abnormalities, or other conditions.

**Synonyms:**

### Long-Acting Beta-2 Agonists

Bronchodilators that provide sustained relaxation of airway smooth muscle for maintenance treatment of asthma or chronic obstructive pulmonary disease. In asthma, they are used with an inhaled corticosteroid rather than alone.

**Synonyms:**

### Long-Term Care

Assistance with ADLs/IADLs for extended period. Settings: home, assisted living, nursing home. Funding: Medicaid, long-term care insurance, out-of-pocket. Planning essential for elderly and families.

**Synonyms:**

### Long-Term Effect

A health effect that develops or persists after prolonged exposure, treatment, or disease. It may be beneficial, harmful, or uncertain.

**Synonyms:**

### Long-Term Rehabilitation

Chronic condition management. Focus on maintaining function, preventing complications.

**Synonyms:**

### Loop Diuretics

A class of potent diuretics that act on the thick ascending limb of the loop of Henle by inhibiting the sodium-potassium-chloride cotransporter, blocking sodium and chloride reabsorption and producing a powerful natriuresis and diuresis. The prototypical loop diuretic is furosemide, with other agents including bumetanide and torsemide.

**Synonyms:**

---

## Loop of Henle

U-shaped tubular segment consisting of a thin descending limb, thin ascending limb, and thick ascending limb. The descending limb is permeable to water but not solutes, allowing water reabsorption into the hypertonic medullary interstitium.

**Synonyms:**

## Loratadine

A second-generation (non-sedating) H1 antihistamine used for allergic rhinitis and chronic urticaria. Peripherally selective—minimal CNS penetration, minimal anticholinergic effects. Once daily; prodrug (desloratadine is active). Adverse effects: headache, dry mouth, and rare sedation. Available OTC.

**Synonyms:**

## Lordosis

The normal inward curvature of the cervical and lumbar spine. Excessive lumbar lordosis (hyperlordosis): increased pelvic tilt, commonly due to hip flexor tightness, weak abdominals, or pregnancy. Presents with low back pain and forward protrusion of the abdomen and buttocks.

**Synonyms:**

## Loss of Appetite

Reduced desire to eat. It may result from illness, medicines, mood disorders, pain, or other causes.

**Synonyms:**

## Loss-of-Function Variant

A genetic variant that reduces or abolishes the normal activity of the encoded gene product. Disease risk depends on the gene, inheritance pattern, residual function, and whether one or both copies are affected.

**Synonyms:**

## Low Back Pain

Pain or discomfort in the lower back, commonly caused by muscle or ligament strain, disc disease, arthritis, or spinal nerve irritation. Weakness, numbness, new bladder or bowel problems, fever, major trauma, or unexplained weight loss are warning

signs requiring prompt medical assessment.

**Synonyms:**

## Low Birth Weight

Birth weight <2500 g, often due to prematurity and/or intrauterine growth restriction; further classified: very low (<1500 g), extremely low (<1000 g), and small for gestational age.

**Synonyms:**

## Low FODMAP Diet

Dietary intervention for irritable bowel syndrome that restricts fermentable oligosaccharides, disaccharides, monosaccharides, and polyols, which are short-chain carbohydrates poorly absorbed in the small intestine and rapidly fermented by colonic bacteria producing gas and drawing water into the intestinal lumen.

**Synonyms:**

## Low Molecular Weight Heparin

A shorter heparin preparation that predominantly inhibits factor Xa through antithrombin and is used to prevent or treat thrombosis.

**Synonyms:**

## Low Testosterone (Hypogonadism)

Low testosterone (male hypogonadism) is a clinical syndrome of deficient testosterone production by the testes (primary) or inadequate stimulation by the pituitary/hypothalamus (secondary), defined as total testosterone <300 ng/dL on two morning measurements with consistent symptoms.

**Synonyms:** Hypogonadism

## Low Vision

Visual impairment that cannot be fully corrected with spectacles, contact lenses, medication, or surgery, impairing daily activities. Managed with low-vision aids (magnifiers, telescopes, adaptive devices), lighting, and occupational therapy.

**Synonyms:**

## Low-Dose CT Scan

CT protocol using reduced radiation for lung can-

---

cer screening. Detects small nodules at earlier stages. False positives require follow-up per Fleischner guidelines.

**Synonyms:**

### **Low-Phosphorus Diet**

A dietary pattern limiting phosphorus intake for selected patients with chronic kidney disease or persistent hyperphosphatemia. It emphasizes avoidance of phosphate additives while maintaining adequate protein and overall nutritional status.

**Synonyms:**

### **Low-Potassium Diet**

A dietary pattern limiting potassium intake when clinically indicated, usually for hyperkalemia or advanced kidney disease. It must be individualized because unnecessary restriction can reduce diet quality and cause inadequate intake of fruits and vegetables.

**Synonyms:**

### **Low-Residue Diet**

A short-term diet limiting dietary fiber and foods that leave substantial undigested material in the bowel. It may be used in selected gastrointestinal conditions or around certain procedures but is not a universal treatment for inflammatory bowel disease.

**Synonyms:**

### **Lower Airway Obstruction**

Narrowing of airways below the carina, causing expiratory wheezing and airflow obstruction on spirometry. Causes include asthma, COPD, bronchiectasis, and foreign body. It is characterized by scooped-out expiratory limb on flow-volume loops and reduced FEV1/FVC ratio.

**Synonyms:**

### **Lower Extremity Venous Doppler**

An ultrasound examination of the leg veins that assesses compressibility and blood flow, commonly to evaluate suspected deep venous thrombosis.

**Synonyms:**

### **Lower Motor Neuron Syndrome**

A pattern caused by injury to an anterior horn cell, motor cranial-nerve nucleus, nerve root, plexus, or peripheral motor nerve. It typically causes weakness, reduced tone and reflexes, muscle atrophy, and fasciculations in affected muscles.

**Synonyms:**

### **Lower Urinary Tract Symptoms**

Urinary symptoms arising from the bladder, bladder outlet, or urethra, classified as storage symptoms, voiding symptoms, and post-micturition symptoms. Causes include benign prostatic obstruction, overactive bladder, infection, neurologic disease, stricture, and malignancy.

**Synonyms:**

### **Ludwig Angina**

A rapidly spreading cellulitis of the floor of the mouth and submandibular spaces, usually arising from an infected lower molar. Tongue elevation, dysphagia, drooling, and airway obstruction can develop rapidly and require emergency management.

**Synonyms:**

### **Ludwig's Angina**

A rapidly progressive, life-threatening cellulitis of the submandibular, sublingual, and submental spaces, typically originating from an odontogenic infection of the lower second or third molars.

**Synonyms:**

### **Lugano Classification**

Staging and response assessment for lymphoma.

**Synonyms:**

### **Lumbago**

A non-specific term for low back pain, typically referring to acute or chronic pain in the lumbar region (between the lower ribs and the gluteal folds). Lumbago is a symptom, not a diagnosis.

**Synonyms:**

### **Lumbar Disc Herniation**

Protrusion or extrusion of lumbar disc material

---

through the annulus fibrosus, which may irritate or compress a nerve root and cause back or leg pain. Symptoms, examination findings, and imaging determine its significance and treatment.

**Synonyms:**

### **Lumbar puncture**

Insertion of a needle into the lower spinal canal to obtain cerebrospinal fluid or administer selected medicines.

**Synonyms:**

### **Lumbar Puncture (Spinal Tap)**

Insertion of a needle into the subarachnoid space at L3-L4 or L4-L5 to obtain CSF. Indications: suspected meningitis/encephalitis, subarachnoid hemorrhage, demyelinating disease, and intrathecal therapy. Contraindications: increased intracranial pressure (papilledema, mass lesion on CT), coagulopathy, and infection at the puncture site.

**Synonyms:** Spinal Tap

### **Lumbar Radiculopathy**

A condition caused by compression, irritation, or inflammation of a spinal nerve root in the lumbar spine, resulting in pain radiating into the lower extremity along the distribution of the affected nerve root (sciatica). The most commonly affected nerve roots are L4, L5, and S1.

**Synonyms:**

### **Lumbar Vertebrae**

Largest and strongest mobile vertebrae for weight-bearing. Large kidney-shaped bodies, short hatchet-shaped spinous processes, sagittally-oriented facets allowing primarily flexion/extension. Lordotic curvature. Most common disc herniation site, particularly L4-L5 and L5-S1 causing sciatica.

**Synonyms:**

### **Lumpectomy**

Breast-conserving surgery excising a malignant lesion with a margin of normal tissue, combined with whole-breast radiation to yield survival equivalent to mastectomy for early-stage cancer. An accept-

able margin is no ink on tumor for invasive cancer and 2 mm for ductal carcinoma in situ.

**Synonyms:**

### **Lunate**

Crescent-shaped proximal row carpal bone between scaphoid and triquetrum. Most commonly dislocated carpal bone from falls on extended wrists. Dislocation may compress the median nerve causing acute carpal tunnel syndrome. Vulnerable to avascular necrosis (Kienbock disease) from its precarious blood supply.

**Synonyms:**

### **Lung**

The paired, cone-shaped respiratory organs located in the thoracic cavity, responsible for gas exchange (oxygen uptake, carbon dioxide elimination). Each lung is divided into lobes: the right lung has three (superior, middle, inferior), the left lung has two (superior, inferior) with a cardiac notch accommodating the heart.

**Synonyms:**

### **Lung Abscess**

Localized necrosis with cavitation containing purulent material. Causes include aspiration and anaerobic bacteria. CXR shows thick-walled cavity with air-fluid level.

**Synonyms:**

### **Lung Cancer**

Leading cancer death worldwide. Types: small cell, non-small cell. Risk factors: smoking, radon, asbestos.

**Synonyms:**

### **Lung Compliance**

The change in lung volume produced by a given change in transpulmonary pressure. Reduced compliance increases the work of breathing, whereas excessive compliance may occur when elastic recoil is lost, as in emphysema.

**Synonyms:**

---

## Lung Disease

Lung disease encompasses disorders affecting the airways, parenchyma, pleura, pulmonary vasculature, and chest wall.

**Synonyms:**

## Lung Function Tests

Physiologic tests that measure aspects of breathing, including airflow, lung volumes, and gas transfer, to assess respiratory function.

**Synonyms:**

## Lung herniation

Protrusion of lung tissue through a defect in the chest wall, most commonly occurring after thoracic trauma, thoracotomy, or in association with rib fractures and chronic obstructive pulmonary disease. Presents with a reducible chest wall mass that increases with coughing or straining and may cause pain and respiratory compromise.

**Synonyms:**

## Lung Protective Ventilation

A ventilation strategy using low tidal volumes (6 mL/kg ideal body weight), plateau pressure < 30 cmH<sub>2</sub>O, appropriate PEEP, and permissive hypercapnia to minimize ventilator-induced lung injury. It is the standard of care for ARDS and is used in all mechanically ventilated patients to reduce barotrauma, volutrauma, and biotrauma.

**Synonyms:**

## Lung Transplant

Surgical replacement of one or both lungs from a donor for end-stage lung disease: COPD (most common), idiopathic pulmonary fibrosis, cystic fibrosis, pulmonary hypertension, and other advanced conditions. Types: single, bilateral, heart-lung.

**Synonyms:**

## Lung Transplantation

Surgical replacement of a diseased lung with a healthy lung from a donor. Indications include IPF, COPD, CF, PAH, and bronchiectasis. Options include single lung transplant, double lung trans-

plant, or heart-lung transplant. Post-transplant immunosuppression is required lifelong. Complications include rejection and infection.

**Synonyms:**

## Lupus

A group of autoimmune diseases in which the immune system attacks the body's own tissues. Systemic lupus erythematosus may affect the skin, joints, kidneys, blood cells, nervous system, and other organs. Also called SLE.

**Synonyms:** SLE.

## Lupus Erythematosus

Systemic lupus erythematosus is a chronic autoimmune disease characterized by production of autoantibodies against nuclear antigens, leading to immune complex-mediated inflammation and tissue damage in multiple organ systems. The disease predominantly affects women of childbearing age, with a striking female predominance of 9 to 1.

**Synonyms:**

## Lupus Erythematosus (Systemic Lupus Erythematosus - SLE)

A chronic multisystem autoimmune disease predominantly affecting women (9:1 female:male) of childbearing age, characterized by autoantibody production (ANA 98%, anti-dsDNA 70%, anti-Sm 30%) and immune complex deposition causing tissue injury.

**Synonyms:** Systemic Lupus Erythematosus - SLE

## Lupus Nephritis

Kidney inflammation caused by systemic lupus erythematosus. It can cause blood or protein in the urine, high blood pressure, and reduced kidney function. Classification is based largely on kidney-biopsy findings, and treatment depends on the class, severity, kidney function, and individual risks.

**Synonyms:**

## Lupus pernio

A chronic, violaceous skin lesion of the face and extremities associated with sarcoidosis, indicating

---

a higher risk of systemic involvement and chronic disease.

**Synonyms:**

### **Lupus Vulgaris**

A chronic, progressive form of cutaneous tuberculosis (TB of the skin) caused by *Mycobacterium tuberculosis*. Once common in Europe, now rare in developed countries but still seen in developing regions.

**Synonyms:**

### **Luteinizing Hormone**

LH: a gonadotropin secreted by the anterior pituitary, regulating gonadal steroidogenesis. In females: stimulates theca cells to produce androgens (aromatized to estradiol); mid-cycle LH surge triggers ovulation (used in ovulation prediction and timing of intercourse/IVF). In males: stimulates Leydig cells to produce testosterone.

**Synonyms:**

### **Lutetium-177**

Beta and gamma emitter, half-life 6.7 days. Used in peptide receptor radionuclide therapy (PRRT) and PSMA therapy. Both therapeutic and imaging capabilities.

**Synonyms:**

### **Lyme Disease**

A tick-borne infection caused by *Borrelia burgdorferi* (*Ixodes scapularis*, deer tick), endemic to the northeastern and upper midwestern US. Early localized: erythema migrans (bullseye rash, >5cm) at tick bite site, fatigue, fever, myalgia.

**Synonyms:**

### **Lymph**

A clear, watery fluid that circulates through the lymphatic system, derived from interstitial fluid that has entered the lymphatic capillaries.

**Synonyms:**

### **Lymph Node / Gland**

Small, bean-shaped organs of the lymphatic system

that filter lymph and serve as sites for immune cell activation. Lymph nodes are distributed throughout the body (approximately 500-600 in total) and are concentrated in regions: cervical, axillary, inguinal, mediastinal, mesenteric, para-aortic, and iliac chains.

**Synonyms:**

### **Lymph Node Dissection**

Removal of lymph nodes for staging or treatment. Sentinel node biopsy less invasive alternative.

**Synonyms:**

### **Lymph Node Structure**

Small bean-shaped lymphoid organs (1-25 mm) distributed along lymphatic vessels, filtering lymph and mounting immune responses. Each has a cortex (outer, containing B-cell follicles with germinal centers), paracortex (deep cortex, containing T-cells and dendritic cells), and medulla (inner, containing medullary cords and sinuses).

**Synonyms:**

### **Lymphadenectomy**

Surgical removal of lymph nodes, either sentinel or regional, for staging or therapeutic purposes; examples include axillary, inguinal, cervical, and retroperitoneal lymph node dissection.

**Synonyms:**

### **Lymphadenitis**

Lymphadenitis is inflammation or infection of lymph nodes, causing localized tenderness and enlargement from bacterial, viral, mycobacterial, cat-scratch, or other disease. infection. Affected nodes may be tender, warm, or fluctuant, and the condition may be localized or generalized.

**Synonyms:**

### **Lymphadenopathy**

Enlargement of lymph nodes (greater than 1 cm in diameter, or >1.5 cm for inguinal nodes). Lymphadenopathy can be localised (single or contiguous region) or generalised (three or more non-contiguous regions).

---

**Synonyms:**

### **Lymphangiectasis**

Abnormal dilatation of lymphatic vessels. It may be congenital or acquired and can cause lymph leakage, oedema, protein-losing enteropathy, chylous effusions, or pulmonary and pleural complications depending on the affected site.

**Synonyms:**

### **Lymphangiography**

Contrast imaging of lymphatic vessels. Evaluates lymphatic obstruction, fistulas. Largely replaced by MRI/CT.

**Synonyms:**

### **Lymphangioleiomyomatosis**

A rare, progressive cystic lung disease caused by proliferation of abnormal smooth muscle-like cells (LAM cells) in the lungs, lymphatics, and kidneys. It occurs almost exclusively in women of childbearing age. HRCT shows thin-walled cysts throughout both lungs. It may be associated with tuberous sclerosis complex.

**Synonyms:**

### **Lymphangioma**

A benign congenital malformation of the lymphatic system, composed of dilated lymphatic channels. Lymphangiomas are typically present at birth (90% diagnosed by age 2) and result from failure of the lymphatic system to develop normal connections with the venous system.

**Synonyms:**

### **Lymphangitis**

Lymphangitis is a medical condition involving lymphangitis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. cellulitis. It may produce tender red streaks and enlarged regional lymph nodes; systemic symptoms require prompt medical assessment and treatment.

**Synonyms:**

### **Lymphatic System**

A network of lymphatic vessels, lymph nodes, and lymphoid organs (tonsils, thymus, spleen, Peyer patches) that returns interstitial fluid (lymph) to the bloodstream, transports dietary fat (chyle), and serves as the conduit for immune surveillance.

**Synonyms:**

### **Lymphedema**

Persistent swelling caused by accumulation of lymphatic fluid in tissues, usually in an arm or leg.

**Synonyms:**

### **Lymphedema (Lymphoedema)**

Chronic swelling of a body part due to impaired lymphatic drainage, leading to accumulation of protein-rich interstitial fluid. Primary lymphedema: caused by congenital or hereditary lymphatic maldevelopment.

**Synonyms:** Lymphoedema

### **Lymphedema Management**

Measures used to reduce swelling and preserve function, including compression, exercise, skin care, and selected forms of manual lymphatic therapy.

**Synonyms:**

### **Lymphocyte**

A type of white blood cell (leukocyte) that is the primary cellular component of the adaptive immune system. Lymphocytes account for 20-40% of circulating white blood cells ( $1.0\text{--}4.8 \times 10^9/\text{L}$ ). Three main types: (1) T lymphocytes (T cells): develop in the thymus, responsible for cell-mediated immunity.

**Synonyms:**

### **Lymphocytic Colitis**

Chronic inflammatory bowel disease characterized by increased intraepithelial lymphocytes exceeding twenty per one hundred surface epithelial cells in the colonic mucosa without significant subepithelial collagen band thickening.

**Synonyms:**

---

### **Lymphocytic Interstitial Pneumonia**

A rare ILD characterized by diffuse polyclonal lymphocytic infiltration of the lung parenchyma. It is strongly associated with Sjgren syndrome and HIV. HRCT shows ground-glass opacities, thin-walled cysts, and lymphadenopathy. Treatment is corticosteroids for symptomatic disease.

**Synonyms:**

### **Lymphocytopenia**

A reduced lymphocyte count ( $< 1.0 \times 10^9/L$ ). Causes: acute (stress, steroids, sepsis, trauma, burns), infections (HIV, viral, tuberculosis, typhoid), immunosuppressive drugs, radiation, marrow failure (aplasia, leukemia, lymphoma), autoimmune (SLE), and congenital immunodeficiencies.

**Synonyms:**

### **Lymphogranuloma venereum**

Lymphogranuloma venereum is a sexually transmitted infection caused by invasive *Chlamydia trachomatis* strains, often producing a small lesion followed by painful regional lymphadenopathy or proctitis. L1–L3, classically producing transient genital lesions and painful inguinal lymphadenopathy.

**Synonyms:**

### **Lymphokine**

A cytokine produced by lymphocytes (a subset of cytokines; the term lymphokine is largely historical, now 'cytokine'). Examples: IL-2, IL-4, IFN-gamma (from T cells), and B-cell growth factors. Mediate lymphocyte communication, activation, and regulation of immune responses.

**Synonyms:**

### **Lymphoma**

A malignancy of lymphocytes, divided into Hodgkin lymphoma (HL—Reed-Sternberg cells, cervical/supraclavicular nodes, B symptoms, younger adults) and non-Hodgkin lymphoma (NHL—heterogeneous, more common, aggressive or indolent).

**Synonyms:**

### **Lymphoma (Hodgkin's and Non-Hodgkin's)**

A group of cancers arising from lymphocytes, including Hodgkin lymphoma and the many types of non-Hodgkin lymphoma.

**Synonyms:** Hodgkin's and Non-Hodgkin's

### **Lymphopoiesis**

The production and maturation of lymphocytes from hematopoietic stem and progenitor cells. It occurs in primary lymphoid organs such as bone marrow and thymus and continues in peripheral lymphoid tissues during immune responses.

**Synonyms:**

### **Lymphoscintigraphy**

Lymphatic system imaging using Tc-99m nanocolloid injected near lesion. Used for sentinel lymph node biopsy (melanoma, breast cancer), lymphedema evaluation.

**Synonyms:**

### **Lynch Syndrome**

Hereditary nonpolyposis colorectal cancer syndrome caused by mismatch repair gene mutations including MLH1, MSH2, MSH6, and PMS2 with autosomal dominant inheritance. It increases the risk of colorectal, endometrial, ovarian, gastric, and urinary tract cancers.

**Synonyms:**

### **Lysergic Acid Diethylamide**

A potent hallucinogenic drug (psychedelic) classified as a Schedule 1 controlled substance (high abuse potential, no accepted medical use). LSD acts as a partial agonist at serotonin 5-HT<sub>2A</sub> receptors in the prefrontal cortex, leading to altered sensory perception, mood, and cognition.

**Synonyms:**

### **Lysogenic Conversion**

The acquisition of new properties (genes) by a bacterium when a temperate bacteriophage integrates its genome as a prophage and expresses phage-encoded genes.

---

**Synonyms:**

### **Lysosome**

Membrane-bound organelles containing hydrolytic enzymes (acid hydrolases: proteases, lipases, nucleases, glycosidases) functioning at low pH ( 4.5-5.0) maintained by V-ATPase proton pump. Degrade macromolecules from endocytosis, phagocytosis, and autophagy.

**Synonyms:**

### **Macroscopic Hematuria**

Visible blood in the urine, which may appear pink, red, or brown. Causes include urinary infection, stones, prostate disease, kidney disease, injury, and cancer; persistent or unexplained bleeding requires medical evaluation.

**Synonyms:**

### **Labile Hypertension**

Blood pressure that fluctuates substantially over short periods.

**Synonyms:**

### **Lactase**

An enzyme that breaks down the milk sugar lactose in the small intestine.

**Synonyms:**

### **Lacunar Stroke**

An ischemic stroke caused by blockage of a small artery deep within the brain.

**Synonyms:**

### **Langerhans Cells**

Immune cells in the epidermis that capture antigens and help initiate immune responses.

**Synonyms:**

### **Laser Photocoagulation**

A laser treatment that seals or destroys abnormal blood vessels, especially in the retina.

**Synonyms:**

### **Laser Prostatectomy**

A procedure that uses laser energy to remove or vaporize enlarged prostate tissue.

**Synonyms:**

### **Learned Insomnia**

Persistent difficulty sleeping that is maintained by anxiety and conditioned behaviors associated with sleep.

**Synonyms:**

### **Left Ventricular Hypertrophy**

Thickening of the muscular wall of the heart's left ventricle.

**Synonyms:**

### **Left-Ventricular Assist Device**

An implanted mechanical pump that helps the left ventricle circulate blood.

**Synonyms:**

### **Leukotriene Modifiers**

Medicines that reduce asthma or allergy symptoms by blocking leukotriene production or action.

**Synonyms:**

### **Liothyronine Sodium**

A synthetic form of the thyroid hormone triiodothyronine used in selected thyroid disorders.

**Synonyms:**

### **Lumbar Stenosis**

Narrowing of the spinal canal or nerve openings in the lower back.

**Synonyms:**

### **Labyrinth Disorder**

A disorder of the inner-ear balance structures that may cause vertigo, nausea, or imbalance.

**Synonyms:**

### **Laryngostenosis**

Narrowing of the larynx that can restrict airflow.

**Synonyms:**

---

### **Latent Tuberculosis**

Infection with *Mycobacterium tuberculosis* in which the bacteria remain inactive and cause no symptoms but may later become active.

**Synonyms:**

### **Lymphangiomatosis**

An uncommon disorder involving excessive or abnormal growth of lymphatic vessels in one or more tissues.

**Synonyms:**

### **Lateral Decubitus Position**

A side-lying position in which the patient rests on the nonoperative side to provide access to the chest, hip, or flank.

**Synonyms:**

### **Lloyd-Davies Position**

A modified lithotomy position in which the hips and knees are flexed and the legs are supported, commonly for pelvic or colorectal surgery.

**Synonyms:**

### **Lithotomy Position**

A supine position in which the hips and knees are flexed and the legs are raised and supported to provide access to the pelvis and perineum.

**Synonyms:**

### **Lazy Eye**

Reduced vision in one eye caused by abnormal visual development during childhood; also called amblyopia.

**Synonyms:** amblyopia.

### **Lip Cancer**

Cancer that develops in the tissues of the upper or lower lip.

**Synonyms:**

### **Listeria Infection**

An infection caused by *Listeria* bacteria, often acquired from contaminated food.

**Synonyms:**

### **Liver Disease**

Any disorder that damages or impairs the structure or function of the liver.

**Synonyms:**

### **Liver Fibrosis**

Excessive formation of scar tissue in the liver after ongoing injury or inflammation.

**Synonyms:**

### **Lobular Carcinoma in Situ**

Abnormal cells confined to the breast lobules that increase the risk of developing invasive breast cancer.

**Synonyms:**

### **Low Sex Drive in Women**

Persistently reduced sexual desire in a woman that causes personal distress.

**Synonyms:**

### **Low Sperm Count**

A semen condition in which the sperm concentration is below the expected reference range.

**Synonyms:**

### **Lacteals**

Lymphatic vessels in intestinal villi that absorb dietary fats.

**Synonyms:**

### **Laryngopharynx**

The lower part of the pharynx that connects the throat with the larynx and esophagus.

**Synonyms:**

### **Laser**

A device that produces a concentrated beam of light used for diagnosis, treatment, or surgery.

**Synonyms:**

---

### **Lavage**

Washing or irrigating a body cavity, organ, or wound with fluid.

**Synonyms:**

### **Leptomeninges**

The arachnoid mater and pia mater, the two delicate inner membranes covering the brain and spinal cord.

**Synonyms:**

### **Leukocytes**

White blood cells that help defend the body against infection and other threats.

**Synonyms:**

### **Leukorrhea**

A whitish vaginal discharge that may be normal or may indicate infection or another disorder.

**Synonyms:**

### **Lichenification**

Thickening and accentuation of skin markings caused by chronic scratching or rubbing.

**Synonyms:**

### **Lingual Tonsils**

Collections of lymphoid tissue at the base of the tongue.

**Synonyms:**

### **Lumen**

The inner space of a hollow organ, vessel, or tube.

**Synonyms:**

### **Langer Lines**

Natural lines of skin tension that reflect the predominant orientation of collagen fibers in the dermis and may influence surgical scar direction.

**Synonyms:**

### **Labiaplasty**

Surgical reshaping or reduction of the labia, usually the labia minora, performed for functional symptoms, reconstruction, or selected cosmetic indica-

tions. Risks include pain, bleeding, infection, scarring, and altered sensation.

**Synonyms:**

### **Lemierre Syndrome**

A potentially severe oropharyngeal infection complicated by septic thrombophlebitis of the internal jugular vein and frequently metastatic infection, classically caused by *Fusobacterium necrophorum*.

**Synonyms:**

### **Legionnaires Disease**

A severe pneumonia caused by *Legionella* bacteria, usually acquired by inhaling contaminated water aerosols. It may also cause gastrointestinal symptoms, confusion, and low serum sodium.

**Synonyms:**

### **Labral Tear**

A tear in the fibrocartilaginous rim of a joint socket, commonly the shoulder or hip, causing pain, clicking, instability, or reduced range of motion.

**Synonyms:**

### **Laryngeal Edema**

Swelling of the tissues of the larynx that can narrow the upper airway and cause hoarseness, stridor, or respiratory distress. It may result from allergy, infection, trauma, or airway instrumentation.

**Synonyms:**

### **Leukopenia**

An abnormally low white-blood-cell count, which may increase susceptibility to infection depending on the cells affected and the severity of the reduction.

**Synonyms:**

### **Lymphocytosis**

An abnormally increased number or proportion of lymphocytes in the blood, often associated with viral infection, some bacterial infections, or lymphoproliferative disorders.

**Synonyms:**

---

### **Lung Nodule**

A rounded, usually well-defined opacity in the lung measuring up to 3 cm on imaging. It may be benign, infectious, inflammatory, or an early manifestation of lung cancer and often requires follow-up assessment.

**Synonyms:**

### **Normal Labour**

Spontaneous labour at term with regular uterine contractions, progressive cervical dilatation, and delivery through the birth canal without major complication.

**Synonyms:**

### **Premature Labour (Preterm Labour)**

Labour that begins before 37 completed weeks of pregnancy and may result in preterm birth.

**Synonyms:** Preterm Labour

### **Obstructed Labour**

Failure of the fetus to pass through the birth canal despite adequate uterine contractions, commonly because of disproportion, abnormal presentation, or an obstructing lesion.

**Synonyms:**

### **Precipitate Labour**

Unusually rapid labour, often defined as delivery within three hours of the onset of regular contractions.

**Synonyms:**

### **Labia**

The folds of skin surrounding the entrance to the vagina and urethra, consisting mainly of the labia majora and labia minora.

**Synonyms:**

### **Lactobacillus**

A genus of bacteria that produces lactic acid and normally forms part of the healthy vaginal and intestinal microbiota; some species are used as probiotics.

**Synonyms:**

### **Larva Migrans**

A condition caused by migrating larval parasites in human tissues, including cutaneous larva migrans in the skin and visceral larva migrans in internal organs.

**Synonyms:**

### **Laryngeal Stridor**

A harsh, high-pitched noise caused by turbulent airflow through a narrowed upper airway, often most noticeable during inspiration.

**Synonyms:**

### **Legg-Calvé-Perthes Disease (Perthes Disease)**

A childhood disorder in which the blood supply to the femoral head is temporarily impaired, causing avascular necrosis, hip pain, stiffness, and possible deformity.

**Synonyms:** Perthes Disease

### **Leptomeningitis**

Inflammation or infection of the leptomeninges, the arachnoid and pia mater covering the brain and spinal cord.

**Synonyms:**

### **Leucoderma (Vitiligo)**

Loss of skin pigment producing sharply defined pale or white patches, usually because melanocytes have been destroyed or have stopped functioning.

**Synonyms:** Vitiligo

### **Leucorrhoea (Leukorrhoea)**

A whitish vaginal discharge that may be physiological or may result from infection, inflammation, or another genital disorder.

**Synonyms:** Leukorrhoea

### **Living Will (Advance Directive)**

A document stating a person's preferences for future medical treatment if they later lose the capacity to make or communicate decisions.

**Synonyms:** Advance Directive

---

### **Lactational Amenorrhea**

Temporary absence of menstrual periods during breastfeeding, caused by suppression of ovulation. It may provide contraceptive protection only when strict criteria for the lactational-amenorrhea method are met.

### **labetalol**

labetalol refers to labetalol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **labium majus**

labium majus refers to labium majus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **labium minus**

labium minus refers to labium minus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **labor complication**

labor complication refers to labor complication, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **labor pain**

labor pain denotes a clinical condition or finding involving labor pain; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **laboratory**

laboratory refers to laboratory, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **laboratory procedure**

laboratory procedure is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat laboratory procedure.

**Synonyms:**

### **labradimil**

labradimil refers to labradimil, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **labyrinthine membrane**

labyrinthine membrane refers to labyrinthine membrane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lac operon**

lac operon refers to lac operon, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lacosamide**

lacosamide refers to lacosamide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lacrimal disease**

lacrimal disease denotes a clinical condition or finding involving lacrimal disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **lactam**

lactam refers to lactam, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **lactation disorder**

lactation disorder denotes a clinical condition or finding involving lactation disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **lactobacillaceae**

lactobacillaceae identifies lactobacillaceae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **lactobacillus acidophilus**

lactobacillus acidophilus is a microorganism or microbial group associated with lactobacillus acidophilus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **lactobacillus brevis**

lactobacillus brevis is a microorganism or microbial group associated with lactobacillus brevis; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **lactobacillus casei**

lactobacillus casei is a microorganism or microbial group associated with lactobacillus casei; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **lactobacillus fermentum**

lactobacillus fermentum is a microorganism or microbial group associated with lactobacillus fermentum; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **lactobacillus gallinarum**

lactobacillus gallinarum is a microorganism or microbial group associated with lactobacillus gallinarum;

clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **lactobacillus gasseri**

lactobacillus gasseri is a microorganism or microbial group associated with lactobacillus gasseri; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **lactobacillus jensenii**

lactobacillus jensenii is a microorganism or microbial group associated with lactobacillus jensenii; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **lactobacillus johnsonii**

lactobacillus johnsonii is a microorganism or microbial group associated with lactobacillus johnsonii; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **lactobacillus oris**

lactobacillus oris is a microorganism or microbial group associated with lactobacillus oris; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **lactobacillus paracasei**

lactobacillus paracasei is a microorganism or microbial group associated with lactobacillus paracasei; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **lactobacillus rhamnosus**

lactobacillus rhamnosus is a microorganism or microbial group associated with lactobacillus rhamnosus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

---

**lactobacillus salivarius**

lactobacillus salivarius is a microorganism or microbial group associated with lactobacillus salivarius; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**lactobacillus vaginalis**

lactobacillus vaginalis is a microorganism or microbial group associated with lactobacillus vaginalis; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**lactococcus**

lactococcus is a microorganism or microbial group associated with lactococcus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**lactococcus garvieae**

lactococcus garvieae is a microorganism or microbial group associated with lactococcus garvieae; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**lactococcus lactis**

lactococcus lactis is a microorganism or microbial group associated with lactococcus lactis; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**lactoferrin**

lactoferrin refers to lactoferrin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lactone**

lactone refers to lactone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lactulose**

lactulose refers to lactulose, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**laetrile**

laetrile refers to laetrile, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lamellar body**

lamellar body refers to lamellar body, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lamellipodium**

lamellipodium refers to lamellipodium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lamin**

lamin refers to lamin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lamina propria**

lamina propria refers to lamina propria, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**laminin**

laminin refers to laminin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**lamivudine**

lamivudine refers to lamivudine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lamotrigine**

lamotrigine refers to lamotrigine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**landolt ring**

landolt ring refers to landolt ring, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**Langerhans' cell**

Langerhans' cell denotes langerhans' cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**language development**

language development refers to language development, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**language disorder**

language disorder denotes a clinical condition or finding involving language disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**laniquidar**

laniquidar refers to laniquidar, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lanolin**

lanolin refers to lanolin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lanosterol**

lanosterol concerns lanosterol, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**lansoprazole**

lansoprazole concerns lansoprazole, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**lanthanum**

lanthanum refers to lanthanum, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**laparoscope**

laparoscope refers to laparoscope, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**laparoscopic colectomy**

laparoscopic colectomy is used in relation to laparoscopic colectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**lapatinib**

lapatinib concerns lapatinib, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

---

**lapatinib ditosylate**

lapatinib ditosylate refers to lapatinib ditosylate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**large colon**

large colon refers to large colon, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**laromustine**

laromustine concerns laromustine, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**larotaxel**

larotaxel concerns larotaxel, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**larva**

larva refers to larva, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**laryngeal carcinoma**

laryngeal carcinoma denotes a neoplastic condition involving laryngeal carcinoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**laryngeal cartilage**

laryngeal cartilage refers to laryngeal cartilage, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**laryngeal cleft**

laryngeal cleft refers to laryngeal cleft, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**laryngeal fistula**

laryngeal fistula refers to laryngeal fistula, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**laryngeal hemorrhage**

laryngeal hemorrhage denotes a clinical condition or finding involving laryngeal hemorrhage; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**laryngeal masks**

laryngeal masks refers to laryngeal masks, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**laryngeal mucositis**

laryngeal mucositis refers to laryngeal mucositis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**laryngeal nerve**

laryngeal nerve refers to laryngeal nerve, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**laryngeal obstruction**

laryngeal obstruction denotes a clinical condition or finding involving laryngeal obstruction; evaluation identifies mechanism, affected system, severity, complications, and management.

---

**Synonyms:**

**laryngeal web**

laryngeal web refers to laryngeal web, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**larynx disease**

larynx disease denotes a clinical condition or finding involving larynx disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**larynx muscle**

larynx muscle refers to larynx muscle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**larynx neoplasm**

larynx neoplasm denotes a neoplastic condition involving larynx neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**laser capture microdissection**

laser capture microdissection refers to laser capture microdissection, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**laser surgery**

laser surgery is used in relation to laser surgery during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**laser therapy**

laser therapy is used in relation to laser therapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**lassa virus**

lassa virus is a virus or viral group associated with lassa virus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**lassitude**

lassitude refers to lassitude, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**latanoprost**

latanoprost concerns latanoprost, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**late endosome**

late endosome refers to late endosome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**latent syphilis**

latent syphilis refers to latent syphilis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lateral meniscus**

lateral meniscus refers to lateral meniscus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lateral sclerosis**

lateral sclerosis refers to lateral sclerosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**lateral ventricle**

lateral ventricle refers to lateral ventricle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lathyrism**

lathyrism refers to lathyrism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lauric acid**

lauric acid denotes lauric acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**lauroleic acid**

lauroleic acid denotes lauroleic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**lavage fluid**

lavage fluid refers to lavage fluid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lead**

lead refers to lead, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leaf senescence**

leaf senescence refers to leaf senescence, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**learning**

learning refers to learning, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**learning disorder**

learning disorder denotes a clinical condition or finding involving learning disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**lecithin**

lecithin refers to lecithin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leclercia**

leclercia identifies leclercia, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**leclercia adecarboxylata**

leclercia adecarboxylata identifies leclercia adecarboxylata, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**lectin**

lectin refers to lectin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**LED therapy**

LED therapy is used in relation to led therapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

---

### leech therapy

leech therapy identifies leech therapy, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### leeche

leeche identifies leeche, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### leflunomide

leflunomide refers to leflunomide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### left kidney

left kidney refers to left kidney, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### left lung

left lung refers to left lung, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### leg

leg refers to leg, an anatomical or physiologic concept used to describe a body structure, process, or function.

**Synonyms:**

### legal guardian

legal guardian refers to legal guardian, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### legionella

legionella identifies legionella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### legionella longbeachae

legionella longbeachae identifies legionella longbeachae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### legionellosis

legionellosis refers to legionellosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### leifsonia

leifsonia identifies leifsonia, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### leifsonia aquatica

leifsonia aquatica identifies leifsonia aquatica, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### Leigh disease

Leigh disease denotes a clinical condition or finding involving leigh disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### leiomyomatosis

leiomyomatosis refers to leiomyomatosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**leishmania**

leishmania identifies leishmania, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**leishmania chagasi**

leishmania chagasi identifies leishmania chagasi, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**leishmania major**

leishmania major identifies leishmania major, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**leishmania mexicana**

leishmania mexicana identifies leishmania mexicana, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**leishmania tropica**

leishmania tropica identifies leishmania tropica, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**lelliottia amnigena**

lelliottia amnigena refers to lelliottia amnigena, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leminorella grimontii**

leminorella grimontii identifies leminorella grimontii, a biological taxon or infectious-disease concept

whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**leminorella richardii**

leminorella richardii identifies leminorella richardii, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**lenalidomide**

lenalidomide refers to lenalidomide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lenograstim**

lenograstim refers to lenograstim, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lens coloboma**

lens coloboma refers to lens coloboma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lens disease**

lens disease denotes a clinical condition or finding involving lens disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**lens dislocation**

lens dislocation refers to lens dislocation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lens subluxation**

lens subluxation refers to lens subluxation, a medical

---

condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lente insulin**

lente insulin refers to lente insulin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lentiform nucleus**

lentiform nucleus refers to lentiform nucleus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lentigo**

lentigo refers to lentigo, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lentinan**

lentinan refers to lentinan, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **LEOPARD syndrome**

LEOPARD syndrome denotes a clinical condition or finding involving leopard syndrome; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **lepidoptera**

lepidoptera refers to lepidoptera, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lepirudin**

lepirudin refers to lepirudin, a medical condition or clinical finding defined by its features, causes,

affected system, and patient context.

**Synonyms:**

### **leptin receptor**

leptin receptor denotes leptin receptor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **leptomeningeal sarcoma**

leptomeningeal sarcoma denotes a neoplastic condition involving leptomeningeal sarcoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **leptospiira**

leptospiira refers to leptospira, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **leptospiraceae**

leptospiraceae refers to leptospiraceae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **leptotrichia**

leptotrichia refers to leptotrichia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **leridistim**

leridistim refers to leridistim, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lerisetron**

lerisetron concerns lerisetron, a pharmacologic or chemical agent; clinical use depends on its mech-

---

anism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **lesion identification**

lesion identification refers to lesion identification, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **less than**

less than refers to less than, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lestaurtinib**

lestaurtinib concerns lestaurtinib, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **lethal injection**

lethal injection refers to lethal injection, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lethargy**

lethargy refers to lethargy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **letrozole**

letrozole refers to letrozole, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **leucine**

leucine refers to leucine, a medical condition or clinical

finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **leucine zipper**

leucine zipper refers to leucine zipper, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **leuconostoc**

leuconostoc identifies leuconostoc, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **leuconostoc citreum**

leuconostoc citreum identifies leuconostoc citreum, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **leuconostoc lactis**

leuconostoc lactis identifies leuconostoc lactis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **leuconostoc mesenteroides**

leuconostoc mesenteroides identifies leuconostoc mesenteroides, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **leuconostocaceae**

leuconostocaceae identifies leuconostocaceae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

---

**leucovorin**

leucovorin refers to leucovorin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leucovorin calcium**

leucovorin calcium refers to leucovorin calcium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leukapheresis**

leukapheresis refers to leukapheresis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leukoaraiosis**

leukoaraiosis refers to leukoaraiosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leukocyte**

leukocyte refers to leukocyte, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leukocyte differentiation**

leukocyte differentiation refers to leukocyte differentiation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leukocyte disorder**

leukocyte disorder denotes a clinical condition or finding involving leukocyte disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**leukocyte elastase**

leukocyte elastase refers to leukocyte elastase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leukocyte trafficking**

leukocyte trafficking refers to leukocyte trafficking, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leukocyte transfusion**

leukocyte transfusion refers to leukocyte transfusion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leukodystrophy**

leukodystrophy refers to leukodystrophy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leukoencephalopathy**

leukoencephalopathy refers to leukoencephalopathy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leukostasis**

leukostasis refers to leukostasis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**leukotriene**

leukotriene refers to leukotriene, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### leukotriene degradation

leukotriene degradation refers to leukotriene degradation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### leukotriene receptor

leukotriene receptor denotes leukotriene receptor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### leuprolide

leuprolide refers to leuprolide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### leuprolide acetate

leuprolide acetate refers to leuprolide acetate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### levalbuterol

levalbuterol concerns levalbuterol, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### levamisole

levamisole refers to levamisole, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### levetiracetam

levetiracetam refers to levetiracetam, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### levobunolol

levobunolol concerns levobunolol, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### levocardia

levocardia refers to levocardia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### levocarnitine

levocarnitine refers to levocarnitine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### levodopa

levodopa refers to levodopa, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### levofloxacin

levofloxacin concerns levofloxacin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### levoleucovorin

levoleucovorin refers to levoleucovorin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### levoleucovorin calcium

levoleucovorin calcium refers to levoleucovorin calcium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### levonorgestrel

levonorgestrel refers to levonorgestrel, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### levorphanol

levorphanol refers to levorphanol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### Lewy body

Lewy body refers to lewy body, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### lexatumumab

lexatumumab concerns lexatumumab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### Leydig cell

Leydig cell denotes leydig cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### liarozole

liarozole refers to liarozole, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### lice infestation

lice infestation identifies lice infestation, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### lidocaine

lidocaine concerns lidocaine, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### ligase

ligase refers to ligase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### light coagulation

light coagulation refers to light coagulation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### light cycle

light cycle refers to light cycle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### light microscope

light microscope refers to light microscope, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### light microscopy

light microscopy refers to light microscopy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### light scattering

light scattering refers to light scattering, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**lignan**

lignan refers to lignan, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lignin**

lignin refers to lignin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lignoceric acid**

lignoceric acid denotes lignoceric acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**limb**

limb refers to limb, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**limb bud**

limb bud refers to limb bud, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**limb development**

limb development refers to limb development, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**limb fracture**

limb fracture denotes a clinical condition or finding involving limb fracture; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**limb girdle**

limb girdle refers to limb girdle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**limb injury**

limb injury denotes a clinical condition or finding involving limb injury; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**limb pain**

limb pain denotes a clinical condition or finding involving limb pain; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**limb prosthesis**

limb prosthesis refers to limb prosthesis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**limbus corneae**

limbus corneae refers to limbus corneae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**linagliptin**

linagliptin concerns linagliptin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**lincomycin**

lincomycin concerns lincomycin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

---

**lindane**

lindane refers to lindane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lined canister**

lined canister refers to lined canister, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**linezolid**

linezolid refers to linezolid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lingual thyroid**

lingual thyroid refers to lingual thyroid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lingual tonsil**

lingual tonsil refers to lingual tonsil, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**liniment**

liniment refers to liniment, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**linkage disequilibrium**

linkage disequilibrium refers to linkage disequilibrium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**linoleic acid**

linoleic acid denotes linoleic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**linolenic acid**

linolenic acid denotes linolenic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**linseed oil**

linseed oil refers to linseed oil, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**linsitinib**

linsitinib concerns linsitinib, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**lintuzumab**

lintuzumab concerns lintuzumab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**lip**

lip refers to lip, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lip disease**

lip disease denotes a clinical condition or finding involving lip disease; evaluation identifies mechanism, affected system, severity, complications, and management.

---

**Synonyms:**

**lip infection**

lip infection denotes an infectious or toxic condition involving lip infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**lip neoplasm**

lip neoplasm denotes a neoplastic condition involving lip neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**lipemic index**

lipemic index refers to lipemic index, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lipid bilayer**

lipid bilayer denotes lipid bilayer, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**lipid binding**

lipid binding denotes lipid binding, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**lipid disorder**

lipid disorder denotes lipid disorder, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**lipid droplet**

lipid droplet denotes lipid droplet, a biological component or molecular process interpreted through

relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**lipid metabolism**

lipid metabolism denotes lipid metabolism, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**lipid peroxidation**

lipid peroxidation denotes lipid peroxidation, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**lipid peroxide**

lipid peroxide denotes lipid peroxide, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**lipid transport**

lipid transport denotes lipid transport, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**lipidomics**

lipidomics denotes lipidomics, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**lipoblastoma**

lipoblastoma denotes a neoplastic condition involving lipoblastoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

---

**lipogranulomatosis**

lipogranulomatosis refers to lipogranulomatosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lipoidosis**

lipoidosis refers to lipoidosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lipomatous neoplasm**

lipomatous neoplasm denotes a neoplastic condition involving lipomatous neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**lipophagy**

lipophagy refers to lipophagy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lipophilicity**

lipophilicity refers to lipophilicity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lipopolysaccharide**

lipopolysaccharide refers to lipopolysaccharide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**liposome**

liposome refers to liposome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**liquid**

liquid refers to liquid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**liquid chromatography**

liquid chromatography refers to liquid chromatography, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**liquid crystal**

liquid crystal refers to liquid crystal, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**liraglutide**

liraglutide concerns liraglutide, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**lisch nodule**

lisch nodule refers to lisch nodule, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lisinopril**

lisinopril concerns lisinopril, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**listeria**

listeria identifies listeria, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

---

**listeria grayi**

*listeria grayi* identifies *listeria grayi*, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**listeria innocua**

*listeria innocua* identifies *listeria innocua*, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**listeria ivanovii**

*listeria ivanovii* identifies *listeria ivanovii*, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**listeria seeligeri**

*listeria seeligeri* identifies *listeria seeligeri*, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**listeria welshimeri**

*listeria welshimeri* identifies *listeria welshimeri*, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**liter**

*liter* refers to *liter*, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**literacy**

*literacy* refers to *literacy*, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lithium**

*lithium* refers to *lithium*, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lithium carbonate**

*lithium carbonate* refers to *lithium carbonate*, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**Little's disease**

*Little's disease* denotes a clinical condition or finding involving *little's disease*; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**live birth**

*live birth* refers to *live birth*, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**livedo racemosa**

*livedo racemosa* refers to *livedo racemosa*, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**liver circulation**

*liver circulation* refers to *liver circulation*, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**liver damage**

*liver damage* refers to *liver damage*, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**liver disorder**

liver disorder denotes a clinical condition or finding involving liver disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**liver dysfunction**

liver dysfunction refers to liver dysfunction, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**liver infection**

liver infection denotes an infectious or toxic condition involving liver infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**liver neoplasm**

liver neoplasm denotes a neoplastic condition involving liver neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**liver pain**

liver pain denotes a clinical condition or finding involving liver pain; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**liver regeneration**

liver regeneration denotes liver regeneration, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**lobaplatin**

lobaplatin concerns lobaplatin, a pharmacologic or chemical agent; clinical use depends on its mech-

anism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**lobe**

lobe refers to lobe, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lobeline**

lobeline refers to lobeline, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lobstein disease**

lobstein disease denotes a clinical condition or finding involving lobstein disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**lobucavir**

lobucavir concerns lobucavir, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**lobular carcinoma**

lobular carcinoma denotes a neoplastic condition involving lobular carcinoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**lobule**

lobule refers to lobule, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**local**

local refers to local, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**local therapy**

local therapy is used in relation to local therapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**localized edema**

localized edema denotes a clinical condition or finding involving localized edema; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**localized scleroderma**

localized scleroderma refers to localized scleroderma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**location**

location refers to location, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**locomotion**

locomotion refers to locomotion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**locus coeruleus**

locus coeruleus refers to locus coeruleus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lod score**

lod score refers to lod score, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**loiasis**

loiasis refers to loiasis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lometrexol**

lometrexol refers to lometrexol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lomustine**

lomustine concerns lomustine, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**lonafarnib**

lonafarnib concerns lonafarnib, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**longevity**

longevity refers to longevity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**longitudinal studies**

longitudinal studies refers to longitudinal studies, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **long-term potentiation**

long-term potentiation refers to long-term potentiation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lontucirev**

lontucirev refers to lontucirev, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **loperamide**

loperamide refers to loperamide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **loperamide hydrochloride**

loperamide hydrochloride refers to loperamide hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lopinavir**

lopinavir concerns lopinavir, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **lorazepam**

lorazepam concerns lorazepam, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **Lorenzo's oil**

Lorenzo's oil refers to lorenzo's oil, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **losartan**

losartan concerns losartan, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **losartan potassium**

losartan potassium refers to losartan potassium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **losoxantrone**

losoxantrone refers to losoxantrone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **loss of heterozygosity**

loss of heterozygosity refers to loss of heterozygosity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **loteprednol etabonate**

loteprednol etabonate refers to loteprednol etabonate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lotion**

lotion refers to lotion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **louse**

louse identifies louse, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

---

**lovastatin**

lovastatin concerns lovastatin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**love**

love refers to love, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**low grade**

low grade refers to low grade, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lower extremity**

lower extremity refers to lower extremity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lubiprostone**

lubiprostone refers to lubiprostone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lubricant**

lubricant refers to lubricant, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lucanthone**

lucanthone refers to lucanthone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**luciferase**

luciferase refers to luciferase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**Lugol's solution**

Lugol's solution refers to lugol's solution, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lumbar plexus**

lumbar plexus refers to lumbar plexus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**Lumbar Region**

Lumbar Region refers to lumbar region, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lumbosacral region**

lumbosacral region refers to lumbosacral region, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**luminescence**

luminescence refers to luminescence, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**luminescence type**

luminescence type refers to luminescence type, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**lung cyst**

lung cyst refers to lung cyst, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lung development**

lung development refers to lung development, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lung fibroma**

lung fibroma refers to lung fibroma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lung injury**

lung injury denotes a clinical condition or finding involving lung injury; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**lung lavage**

lung lavage refers to lung lavage, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lung neoplasm**

lung neoplasm denotes a neoplastic condition involving lung neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**lurtotecan**

lurtotecan refers to lurtotecan, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**luteal cell**

luteal cell denotes luteal cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**luteinization**

luteinization refers to luteinization, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**luteolin**

luteolin refers to luteolin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**luteolysis**

luteolysis refers to luteolysis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**luteoma**

luteoma refers to luteoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lux unit**

lux unit refers to lux unit, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lyase**

lyase refers to lyase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**lycopene**

lycopene refers to lycopene, a medical condition

---

or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lymph leakage**

lymph leakage refers to lymph leakage, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lymph node**

lymph node refers to lymph node, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lymphangiogenesis**

lymphangiogenesis denotes lymphangiogenesis, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **lymphangiomyoma**

lymphangiomyoma refers to lymphangiomyoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lymphangiosarcoma**

lymphangiosarcoma denotes a neoplastic condition involving lymphangiosarcoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **lymphatic basin**

lymphatic basin refers to lymphatic basin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lymphatic disease**

lymphatic disease denotes a clinical condition or finding involving lymphatic disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **lymphatic mapping**

lymphatic mapping refers to lymphatic mapping, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lymphatic tissue**

lymphatic tissue refers to lymphatic tissue, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lymphatic vessel**

lymphatic vessel refers to lymphatic vessel, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lymphoblast**

lymphoblast refers to lymphoblast, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lymphoblast count**

lymphoblast count refers to lymphoblast count, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lymphocele**

lymphocele refers to lymphocele, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **lymphocyte activation**

lymphocyte activation refers to lymphocyte activation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lymphocyte count**

lymphocyte count refers to lymphocyte count, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lymphocyte proliferation**

lymphocyte proliferation refers to lymphocyte proliferation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lymphocytic leukemia**

lymphocytic leukemia denotes a neoplastic condition involving lymphocytic leukemia; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **lymphocytoma cutis**

lymphocytoma cutis refers to lymphocytoma cutis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lymphomatoid papulosis**

lymphomatoid papulosis denotes a neoplastic condition involving lymphomatoid papulosis; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **lymphopenia**

lymphopenia refers to lymphopenia, a medical condition or clinical finding defined by its features, causes,

affected system, and patient context.

**Synonyms:**

### **lymphoproliferative disorder**

lymphoproliferative disorder denotes a clinical condition or finding involving lymphoproliferative disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **lysine**

lysine refers to lysine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lysinibacillus**

lysinibacillus is a microorganism or microbial group associated with lysinibacillus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **lysogeny**

lysogeny refers to lysogeny, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lysophagy**

lysophagy refers to lysophagy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lysophosphatidylcholine**

lysophosphatidylcholine refers to lysophosphatidylcholine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **lysophospholipids**

lysophospholipids denotes lysophospholipids, a bio-

---

logical component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### lysozyme test

lysozyme test is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat lysozyme test.

**Synonyms:**

### lyssavirus

lyssavirus is a virus or viral group associated with lyssavirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### lytic lesion

lytic lesion refers to lytic lesion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### Leg pain

Leg pain is a medical condition involving leg pain; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### Leg swelling

Enlargement or puffiness of one or both legs caused by fluid retention, venous disease, injury, infection, inflammation, or a blood clot. **Synonyms:**

### Low white blood cell count

A reduced number of white blood cells, which can increase susceptibility to infection and may result from medicines, infection, autoimmune disease, nutritional deficiency, or bone marrow disorders. **Synonyms:**

### Loss of smell (anosmia)

Partial or complete inability to detect odors, commonly caused by nasal obstruction, infection, inflammation, head injury, neurologic disease, or certain

medicines. **Synonyms:**

### Low blood oxygen (hypoxemia)

An abnormally low oxygen level in arterial blood, usually related to lung disease, impaired breathing, circulation problems, or reduced oxygen availability.

**Synonyms:**

### Low potassium (hypokalemia)

An abnormally low potassium level in the blood, which can cause weakness, cramps, abnormal heart rhythms, or paralysis and may result from losses, medicines, or hormonal disorders. **Synonyms:**

### Lymphocytosis (high lymphocyte count)

An increased number of lymphocytes in the blood, often associated with infection, inflammation, or a lymphoproliferative disorder. **Synonyms:**

### Lactase deficiency

Alternate index label; see *Lactose intolerance*. **Synonyms:**

### Lactation mastitis

Alternate index label; see *Mastitis*. **Synonyms:**

### Lateral elbow tendinopathy

Alternate index label; see *Tennis elbow*. **Synonyms:**

### Lateral epicondylitis

Alternate index label; see *Tennis elbow*. **Synonyms:**

### Lateral epicondylolysis

Alternate index label; see *Tennis elbow*. **Synonyms:**

### LCIS

Alternate index label; see *Lobular carcinoma in situ (LCIS)*. **Synonyms:**

### Leg fracture

Alternate index label; see *Broken leg*. **Synonyms:**

---

### **Lentigines, solar**

Alternate index label; see *Age spots (liver spots)*.

**Synonyms:**

### **Leukemia, acute lymphocytic**

Alternate index label; see *Acute lymphocytic leukemia*. **Synonyms:**

### **Leukemia, acute myelogenous**

Alternate index label; see *Acute myelogenous leukemia*. **Synonyms:**

### **Leukemia, chronic lymphocytic**

Alternate index label; see *Chronic lymphocytic leukemia*. **Synonyms:**

### **Leukemia, chronic myelogenous**

Alternate index label; see *Chronic myelogenous leukemia*. **Synonyms:**

### **Leukemia, general**

Alternate index label; see *Leukemia*. **Synonyms:**

### **Leukemia, hairy cell**

Alternate index label; see *Hairy cell leukemia*. **Synonyms:**

### **Lice, body**

Alternate index label; see *Body lice*. **Synonyms:**

### **Lichen planus, oral**

Alternate index label; see *Oral lichen planus*. **Synonyms:**

### **Lipodystrophy, intestinal**

Alternate index label; see *Whipple's disease*. **Synonyms:**

### **Liver failure, acute**

Alternate index label; see *Acute liver failure*. **Synonyms:**

### **Liver spots**

Liver spots is a medical condition involving liver

spots; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. **Synonyms:**

### **Liver, enlarged**

Alternate index label; see *Enlarged liver*. **Synonyms:**

### **Lockjaw**

Alternate index label; see *Tetanus*. **Synonyms:**

### **Loss of bladder control**

Alternate index label; see *Urinary incontinence*. **Synonyms:**

### **Lou Gehrig's disease**

Alternate index label; see *Amyotrophic lateral sclerosis (ALS)*. **Synonyms:**

### **Low blood sugar**

Low blood sugar, or hypoglycemia, occurs when circulating glucose is insufficient for normal brain and body function, causing sweating, tremor, confusion, seizures, or loss of consciousness. **Synonyms:**

### **Low body temperature**

Alternate index label; see *Hypothermia*. **Synonyms:**

### **Low platelet count**

Alternate index label; see *Thrombocytopenia*. **Synonyms:**

### **Low testosterone**

Alternate index label; see *Male hypogonadism*. **Synonyms:**

### **Low-flow priapism**

Alternate index label; see *Priapism*. **Synonyms:**

### **Lung collapse**

Alternate index label; see *Atelectasis*; see also *Pneumothorax*. **Synonyms:**

---

### **Lung disease, interstitial**

Alternate index label; see *Interstitial lung disease*.

**Synonyms:**

### **Lymph nodes, swollen**

Alternate index label; see *Swollen lymph nodes*.

**Synonyms:**

### **Lymphadenitis, mesenteric**

Alternate index label; see *Mesenteric lymphadenitis*.

**Synonyms:**

### **Lymphoma, Hodgkin**

Alternate index label; see *Hodgkin lymphoma* (*Hodgkin disease*). **Synonyms:**

### **Lymphoma, non-Hodgkin**

Alternate index label; see *Non-Hodgkin lymphoma*.

**Synonyms:**

### **Lymphoplasmacytic lymphoma**

Alternate index label; see *Waldenstrom macroglobulinemia*. **Synonyms:**

**Synonyms:**

### **Labyrinthitis - aftercare**

Labyrinthitis - aftercare is a treatment or care intervention for labyrinthitis - aftercare; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Laceration - sutures or staples - at home**

Laceration - sutures or staples - at home addresses care related to laceration - sutures or staples - at home, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Lacerations - liquid bandage**

Lacerations - liquid bandage is a treatment or care intervention for lacerations - liquid bandage; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Lacquer poisoning**

Lacquer poisoning involves toxic or environmental exposure to lacquer poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Lacrimal gland tumor**

Lacrimal gland tumor is a medical condition involving lacrimal gland tumor; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Lactate dehydrogenase test**

Lactate dehydrogenase test examines lactate dehydrogenase test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lactic acid test**

Lactic acid test examines lactic acid test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lactose tolerance tests**

Lactose tolerance tests examines lactose tolerance tests; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lamellar ichthyosis**

Lamellar ichthyosis is a medical condition involving lamellar ichthyosis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Language disorders in children**

Language disorders in children is a medical condi-

---

tion involving language disorders in children; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Lanolin poisoning**

Lanolin poisoning involves toxic or environmental exposure to lanolin poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Laparoscopic gallbladder removal**

Laparoscopic gallbladder removal is a treatment or care intervention for laparoscopic gallbladder removal; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Laparoscopic gastric banding**

Laparoscopic gastric banding is a treatment or care intervention for laparoscopic gastric banding; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Laparoscopic gastric banding - discharge**

Laparoscopic gastric banding - discharge is a treatment or care intervention for laparoscopic gastric banding - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Laparoscopic spleen removal in adults - discharge**

Laparoscopic spleen removal in adults - discharge is a treatment or care intervention for laparoscopic spleen removal in adults - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Large bowel resection**

Large bowel resection examines large bowel resection; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Large bowel resection - discharge**

Large bowel resection - discharge examines large bowel resection - discharge; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Large for gestational age (LGA)**

Large for gestational age (LGA) concerns large for gestational age (lga); its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Laryngoscopy and nasolaryngoscopy**

Laryngoscopy and nasolaryngoscopy concerns laryngoscopy and nasolaryngoscopy; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Laser photocoagulation - eye**

Laser photocoagulation - eye is a treatment or care intervention for laser photocoagulation - eye; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Laser surgery for the skin**

Laser surgery for the skin is a treatment or care intervention for laser surgery for the skin; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Laser therapy for cancer**

Laser therapy for cancer is a treatment or care intervention for laser therapy for cancer; indication,

---

preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **LASIK eye surgery**

LASIK eye surgery is a treatment or care intervention for lasik eye surgery; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Lasik eye surgery - discharge**

Lasik eye surgery - discharge is a treatment or care intervention for lasik eye surgery - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Lateral traction**

Lateral traction examines lateral traction; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Latex agglutination test**

Latex agglutination test examines latex agglutination test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Latex allergies - for hospital patients**

Latex allergies - for hospital patients concerns latex allergies - for hospital patients; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Lavender oil**

Lavender oil concerns lavender oil; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Laxative overdose**

Laxative overdose involves toxic or environmental exposure to laxative overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **LDH isoenzyme blood test**

LDH isoenzyme blood test examines ldh isoenzyme blood test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **LDL test**

LDL test examines ldl test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lead - nutritional considerations**

Lead - nutritional considerations involves toxic or environmental exposure to lead - nutritional considerations; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Lead and tap water**

Lead and tap water involves toxic or environmental exposure to lead and tap water; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Lead levels - blood**

Lead levels - blood involves toxic or environmental exposure to lead levels - blood; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Learn about gluten-free diets**

Learn about gluten-free diets addresses care related to learn about gluten-free diets, including practical measures, warning signs, follow-up, and decisions

---

to discuss with a clinician.

**Synonyms:**

### **Learn to love exercise**

Learn to love exercise addresses care related to learn to love exercise, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Learn to manage stress**

Learn to manage stress addresses care related to learn to manage stress, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Learn to manage your anger**

Learn to manage your anger addresses care related to learn to manage your anger, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Learning about depression**

Learning about depression addresses care related to learning about depression, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Learning about ventilators**

Learning about ventilators is a treatment or care intervention for learning about ventilators; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Leaving the hospital - your discharge plan**

Leaving the hospital - your discharge plan is a treatment or care intervention for leaving the hospital - your discharge plan; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Left heart catheterization**

Left heart catheterization is a treatment or care intervention for left heart catheterization; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Left heart ventricular angiography**

Left heart ventricular angiography examines left heart ventricular angiography; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Leg amputation - discharge**

Leg amputation - discharge is a treatment or care intervention for leg amputation - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Leg CT scan**

Leg CT scan examines leg ct scan; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Leg lengthening and shortening**

Leg lengthening and shortening concerns leg lengthening and shortening; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Leg MRI scan**

Leg MRI scan examines leg mri scan; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Leg or foot amputation**

Leg or foot amputation is a treatment or care intervention for leg or foot amputation; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

---

**Synonyms:**

### **Leg or foot amputation - dressing change**

Leg or foot amputation - dressing change is a treatment or care intervention for leg or foot amputation - dressing change; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Lepromin skin test**

Lepromin skin test examines lepromin skin test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lesch-Nyhan syndrome**

Lesch-Nyhan syndrome is a medical condition involving lesch-nyhan syndrome; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Leucine aminopeptidase - urine**

Leucine aminopeptidase - urine concerns leucine aminopeptidase - urine; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Leukemia - resources**

Leukemia - resources addresses care related to leukemia - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Leukocyte esterase urine test**

Leukocyte esterase urine test examines leukocyte esterase urine test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Leydig cell testicular tumor**

Leydig cell testicular tumor examines leydig cell testicular tumor; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **LH response to GnRH blood test**

LH response to GnRH blood test examines lh response to gnrh blood test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lichenified**

Lichenified concerns lichenified; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Life after weight-loss surgery**

Life after weight-loss surgery is a treatment or care intervention for life after weight-loss surgery; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Lifting and bending the right way**

Lifting and bending the right way concerns lifting and bending the right way; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Lighter fluid poisoning**

Lighter fluid poisoning involves toxic or environmental exposure to lighter fluid poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Lily of the valley poisoning**

Lily of the valley poisoning involves toxic or environmental exposure to lily of the valley poisoning; dose, route, timing, symptoms, and organ involvement

---

determine urgency and treatment.

**Synonyms:**

### **Limb plethysmography**

Limb plethysmography examines limb plethysmography; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Limb-girdle muscular dystrophies**

Limb-girdle muscular dystrophies are inherited muscle diseases causing progressive weakness predominantly around the hips and shoulders, with variable cardiac and respiratory involvement.

**Synonyms:**

### **Limited range of motion**

Limited range of motion concerns limited range of motion; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Lip moisturizer poisoning**

Lip moisturizer poisoning involves toxic or environmental exposure to lip moisturizer poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Lipase test**

A lipase test measures a pancreatic digestive enzyme in blood and supports evaluation of acute pancreatitis and selected pancreatic or gastrointestinal disorders.

**Synonyms:**

### **Lipid profile test**

Lipid profile test examines lipid profile test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Liquid Incense**

Liquid Incense involves toxic or environmental exposure to liquid incense; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Liquid medication administration**

Liquid medication administration concerns liquid medication administration; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Liquid nitrogen**

Liquid nitrogen concerns liquid nitrogen; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Liver cancer - hepatocellular carcinoma**

Liver cancer - hepatocellular carcinoma is a medical condition involving liver cancer - hepatocellular carcinoma; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Liver disease - resources**

Liver disease - resources addresses care related to liver disease - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Liver metastases**

Liver metastases is a medical condition involving liver metastases; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Liver scan**

Liver scan examines liver scan; interpretation depends on the specimen or body region, test method,

---

reference range, and clinical question.

**Synonyms:**

### **Living with a chronic illness - dealing with feelings**

Living with a chronic illness - dealing with feelings addresses care related to living with a chronic illness - dealing with feelings, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Living with a chronic illness - reaching out to others**

Living with a chronic illness - reaching out to others addresses care related to living with a chronic illness - reaching out to others, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Living with endometriosis**

Living with endometriosis addresses care related to living with endometriosis, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Living with hearing loss**

Living with hearing loss addresses care related to living with hearing loss, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Living with heart disease and angina**

Living with heart disease and angina addresses care related to living with heart disease and angina, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Living with uterine fibroids**

Living with uterine fibroids addresses care related to living with uterine fibroids, including practical

measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Living with vision loss**

Living with vision loss addresses care related to living with vision loss, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Living with your ileostomy**

Living with your ileostomy addresses care related to living with your ileostomy, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Lomotil overdose**

Lomotil overdose involves toxic or environmental exposure to lomotil overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Long bones**

Long bones concerns long bones, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Long-term complications of diabetes**

Long-term complications of diabetes concerns long-term complications of diabetes; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Lordosis - lumbar**

Lordosis - lumbar is a medical condition involving lordosis - lumbar; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

---

### **Losing weight after pregnancy**

Losing weight after pregnancy concerns losing weight after pregnancy; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Loss of a child - resources**

Loss of a child - resources addresses care related to loss of a child - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Loss of a spouse - resources**

Loss of a spouse - resources addresses care related to loss of a spouse - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Loss of brain function - liver disease**

Loss of brain function - liver disease examines loss of brain function - liver disease; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Low back pain - acute**

Low back pain - acute is a medical condition involving low back pain - acute; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Low back pain - chronic**

Low back pain - chronic is a medical condition involving low back pain - chronic; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Low blood potassium**

Low blood potassium is a medical condition involving low blood potassium; causes, affected organs,

severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Low blood pressure**

Low blood pressure is a medical condition involving low blood pressure; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Low blood sodium**

Low blood sodium is a medical condition involving low blood sodium; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Low blood sugar - newborns**

Low blood sugar - newborns is a medical condition involving low blood sugar - newborns; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Low blood sugar - self-care**

Low blood sugar - self-care is a treatment or care intervention for low blood sugar - self-care; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Low calcium level - infants**

Low calcium level - infants examines low calcium level - infants; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Low nasal bridge**

Low nasal bridge concerns low nasal bridge; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

---

### **Low white blood cell count and cancer**

Low white blood cell count and cancer examines low white blood cell count and cancer; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Low-fiber diet**

Low-fiber diet addresses care related to low-fiber diet, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Low-salt diet**

Low-salt diet addresses care related to low-salt diet, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Low-set ears and pinna abnormalities**

Low-set ears and pinna abnormalities concerns low-set ears and pinna abnormalities, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Lower esophageal ring**

Lower esophageal ring concerns lower esophageal ring, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Lower-calorie choices for alcoholic drinks**

Lower-calorie choices for alcoholic drinks addresses care related to lower-calorie choices for alcoholic drinks, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Lumbar MRI scan**

Lumbar MRI scan examines lumbar mri scan; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lumbar spine CT scan**

Lumbar spine CT scan examines lumbar spine ct scan; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lumbosacral spine CT**

Lumbosacral spine CT examines lumbosacral spine ct; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lumbosacral spine x-ray**

Lumbosacral spine x-ray examines lumbosacral spine x-ray; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lump in the abdomen**

Lump in the abdomen is a medical condition involving lump in the abdomen; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Lung cancer - small cell**

Lung cancer - small cell is a medical condition involving lung cancer - small cell; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Lung diffusion testing**

Lung diffusion testing examines lung diffusion testing; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lung disease - resources**

Lung disease - resources addresses care related to lung disease - resources, including practical mea-

---

tures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Lung gallium scan**

Lung gallium scan examines lung gallium scan; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lung metastases**

Lung metastases is a medical condition involving lung metastases; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Lung needle biopsy**

Lung needle biopsy examines lung needle biopsy; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lung PET scan**

Lung PET scan examines lung pet scan; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lung plethysmography**

Lung plethysmography examines lung plethysmography; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lung problems and volcanic smog**

Lung problems and volcanic smog is a medical condition involving lung problems and volcanic smog; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Lung surgery**

Lung surgery is a treatment or care intervention for lung surgery; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Lung surgery - discharge**

Lung surgery - discharge is a treatment or care intervention for lung surgery - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Lupus - resources**

Lupus - resources addresses care related to lupus - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Luteinizing hormone (LH) blood test**

Luteinizing hormone (LH) blood test examines luteinizing hormone (lh) blood test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lyme disease - what to ask your doctor**

Lyme disease - what to ask your doctor examines lyme disease - what to ask your doctor; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lyme disease blood test**

Lyme disease blood test examines lyme disease blood test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lymph node biopsy**

Lymph node biopsy examines lymph node biopsy; interpretation depends on the specimen or body

---

region, test method, reference range, and clinical question.

**Synonyms:**

### **Lymph node culture**

Lymph node culture examines lymph node culture; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lymph system**

Lymph system is a medical condition involving lymph system; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Lymphangiogram**

Lymphangiogram is a medical condition involving lymphangiogram; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Lymphatic obstruction**

Lymphatic obstruction examines lymphatic obstruction; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Lymphedema - self-care**

Lymphedema self-care focuses on skin protection, exercise, compression when appropriate, limb elevation, infection prevention, and monitoring for worsening swelling or cellulitis.

**Synonyms:**

### **Lymphofollicular hyperplasia**

Lymphofollicular hyperplasia is a medical condition involving lymphofollicular hyperplasia; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Lymphoid hyperplasia**

Lymphoid hyperplasia is a medical condition involving lymphoid hyperplasia; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

## M

### MacConkey Agar

A selective and differential culture medium used mainly for gram-negative bacteria. Bile salts and crystal violet inhibit many gram-positive organisms, while lactose fermentation produces different colony colors and helps distinguish bacterial groups.

**Synonyms:**

### Macrophage

Macrophage concerns macrophage, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### Magenblase Syndrome

Stomach discomfort and bloating caused by swallowing excessive air while eating.

**Synonyms:** Aerophagia; stomach bubble syndrome

### Major Depression

A depressive disorder causing persistent low mood or loss of interest with significant functional impairment.

**Synonyms:** Major depressive disorder

### Major Histocompatibility Complex Molecule

A cell-surface molecule that presents protein fragments to immune cells.

**Synonyms:** MHC molecule

### Maladaptive Stress Response

A persistent or disproportionate stress reaction that harms health or functioning.

**Synonyms:**

### Malignant

Cancerous and capable of invading nearby tissue or spreading to distant sites.

**Synonyms:**

### Mastopexy

Surgery that lifts and reshapes sagging breasts.

**Synonyms:** Breast lift

### Maximizer

A person who seeks the best possible option by comparing many alternatives before deciding.

**Synonyms:**

### Meal Plan

A structured guide to the foods, portions, and timing of meals.

**Synonyms:**

### Medicaid

A public health-insurance program serving eligible people with limited income and resources.

**Synonyms:**

### Medicare

A United States federal health-insurance program primarily serving older adults and some people with disabilities.

**Synonyms:**

### Medigap Insurance

Private supplemental insurance that helps pay certain costs not covered by traditional Medicare.

**Synonyms:** Medicare supplement insurance

---

### **Meglitinides**

Short-acting medicines that stimulate pancreatic insulin release to lower blood glucose.

**Synonyms:**

### **Melanin**

Melanin concerns melanin, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Melatonin**

A hormone produced mainly by the pineal gland that helps regulate sleep-wake timing.

**Synonyms:**

### **Membrane**

A thin tissue layer that surrounds a cell, organ, or body cavity.

**Synonyms:**

### **Memory T Cells and B Cells**

Long-lived immune cells that respond rapidly when they encounter a previously recognized antigen.

**Synonyms:** Memory lymphocytes

### **Ménière's Disease**

An inner-ear disorder associated with episodic vertigo, fluctuating hearing loss, tinnitus, and ear pressure.

**Synonyms:** Meniere disease

### **Metabolic Equivalents**

Units estimating the energy cost of physical activity relative to resting metabolism.

**Synonyms:** METs

### **Methanobrevibacter Smithii**

A methane-producing microorganism commonly found in the human intestine.

**Synonyms:**

### **METs**

Metabolic equivalents, units used to express the

intensity or energy cost of physical activity.

**Synonyms:** Metabolic equivalents

### **MHC Molecule**

A major histocompatibility complex molecule that displays antigens to T cells.

**Synonyms:** Major histocompatibility complex molecule

### **Microbe**

A microorganism, such as a bacterium, fungus, protozoan, or virus.

**Synonyms:** Microorganism

### **Microdermabrasion**

A cosmetic procedure that mechanically removes a superficial layer of skin.

**Synonyms:**

### **Microgram**

A unit of mass equal to one-millionth of a gram.

**Synonyms:** mcg; µg

### **Micronized**

Processed into very small particles to improve dispersion or absorption.

**Synonyms:**

### **Microvasculature**

The network of the body's smallest blood vessels, including arterioles, capillaries, and venules.

**Synonyms:**

### **Migraine Headache**

A recurrent headache disorder often causing moderate-to-severe pain, nausea, and sensitivity to light or sound.

**Synonyms:** Migraine

### **Milligram**

A unit of mass equal to one-thousandth of a gram.

**Synonyms:** mg

---

### **Mindfulness**

Deliberate, nonjudgmental attention to present-moment experience.

**Synonyms:**

### **Mindfulness Meditation**

Meditation practice involving calm, attentive awareness of thoughts, feelings, and bodily sensations.

**Synonyms:** Insight meditation

### **Mindfulness-Based Cognitive Behavioral Therapy**

Therapy combining mindfulness practices with cognitive and behavioral techniques to address distress.

**Synonyms:** Mindfulness-based CBT

### **Mindlessness**

Acting or thinking with limited awareness of present surroundings or internal experience.

**Synonyms:**

### **Miotic**

A substance or medicine that constricts the pupil.

**Synonyms:** Miotic agent

### **Monocytes**

Large circulating white blood cells that can enter tissues and become macrophages or dendritic cells.

**Synonyms:**

### **Morton's Neuroma**

Thickening and irritation of a nerve, usually between the toes, causing burning forefoot pain.

**Synonyms:** Morton neuroma; interdigital neuroma

### **Motilin**

A hormone that helps regulate contractions and movement in the upper gastrointestinal tract.

**Synonyms:**

### **Motility**

The ability of an organ, especially the intestine, to move its contents.

**Synonyms:**

### **Motor Neuron**

A nerve cell that controls skeletal or smooth muscle activity.

**Synonyms:** Motor nerve cell

### **Mucosa**

Mucosa is a medical condition involving mucosa; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:** Mucous membrane

### **Mucous Cysts**

Small fluid-filled cysts near the end joint of a finger, often associated with osteoarthritis.

**Synonyms:** Digital mucous cyst

### **Mucous Membrane**

A moist tissue lining body cavities that open to the outside, including the nose, mouth, and lungs.

**Synonyms:** Mucosa

### **Multi-Infarct Dementia**

Cognitive decline caused by the cumulative effects of multiple small strokes.

**Synonyms:** Vascular dementia

### **Multinodular Goiter**

An enlarged thyroid containing multiple nodules.

**Synonyms:**

### **Muscle Fatigue**

Reduced ability of a muscle to generate force after sustained or repeated activity.

**Synonyms:**

### **Muscle Fibers**

Individual contractile cells that combine to form skeletal muscle.

**Synonyms:** Muscle cells

### **Muscle-Contraction Headache**

A pressure-like headache related to sustained contraction of scalp, neck, or jaw muscles.

**Synonyms:** Tension-type headache

---

### **Muscular Endurance**

The ability of a muscle or muscle group to sustain repeated or prolonged effort.

**Synonyms:**

### **Muscularis**

A smooth-muscle layer in the wall of a hollow organ, especially the intestine.

**Synonyms:** Muscular layer

### **Musculoskeletal**

Relating to muscles, bones, joints, tendons, ligaments, and related tissues.

**Synonyms:**

### **MUSE**

A medicated urethral system that delivers a pellet into the urethra to treat erectile dysfunction.

**Synonyms:** Medicated urethral system for erection

### **Myalgia**

Muscle pain or tenderness.

**Synonyms:** Myodynia

### **Mydriatic**

A substance or medicine that dilates the pupil.

**Synonyms:** Mydriatic agent

### **Myocyte**

A muscle cell.

**Synonyms:** Muscle cell

### **Myofibrils**

Contractile structures inside muscle fibers made of repeating sarcomeres.

**Synonyms:**

### **Myofilaments**

Actin and myosin protein filaments that slide past each other to produce muscle contraction.

**Synonyms:** Contractile filaments

### **Myosin**

A motor protein that interacts with actin to generate muscle force.

**Synonyms:**

### **Macrobiotics**

Diet emphasizing whole grains, vegetables, beans. May be nutritionally inadequate if restrictive. Long-term followers generally healthy but may have deficiencies.

**Synonyms:**

### **Macrodonia**

Abnormally large teeth. Microdonia: abnormally small teeth.

**Synonyms:**

### **Macroglossia**

Macroglossia concerns macroglossia; its medical significance is established from the defining features, setting, associated findings, and clinical question. airway obstruction, drooling, or dental malocclusion. Causes include congenital syndromes, endocrine disease, infiltrative disorders, vascular or lymphatic malformations, and tumors.

**Synonyms:**

### **Macrolides**

A class of bacteriostatic antibiotics that bind to the 50S ribosomal subunit and inhibit translocation of peptidyl-tRNA during protein synthesis. The major macrolides include erythromycin, clarithromycin, and azithromycin.

**Synonyms:**

### **Macronutrients**

Nutrients needed in large amounts: carbohydrates, protein, fat. Provide energy and structural components.

**Synonyms:**

### **Macrophage Activation Syndrome**

A life-threatening complication of rheumatic diseases (especially systemic JIA and SLE) characterized by uncontrolled cytokine release and

---

hemophagocytosis.

**Synonyms:**

### **Macrosomia**

Macrosomia concerns macrosomia; its medical significance is established from the defining features, setting, associated findings, and clinical question. Risk factors include maternal diabetes, obesity, post-term pregnancy, and prior macrosomia. Complications include shoulder dystocia, brachial plexus injury, clavicular fracture, and neonatal hypoglycemia.

**Synonyms:**

### **Macula**

The macula is a specialized region of the central retina approximately five and a half millimeters in diameter that is responsible for high-acuity central vision, color perception, and fine detail discrimination, and it contains the highest density of cone photoreceptors in the eye.

**Synonyms:**

### **Macula Lutea**

Small oval yellowish central retinal area approximately 5.5 mm in diameter for high-acuity vision. Yellow color from xanthophyll pigments (lutein, zeaxanthin) filtering blue light and protecting photoreceptors. The fovea centralis is the central depression (1.5 mm) with highest cone density and no rods.

**Synonyms:**

### **Macular**

Relating to a macule, a flat, circumscribed change in skin color without a change in texture or elevation. Macules may be caused by pigment, inflammation, vascular change, or other processes and are distinguished from raised lesions such as papules.

**Synonyms:**

### **Macular degeneration**

A progressive degenerative disease of the central retina (macula) and the leading cause of irreversible vision loss in individuals over age 50 in developed countries, affecting approximately 10 percent of

those over 65 and 30 percent over 80.

**Synonyms:**

### **Macular Hole**

A full-thickness defect of the fovea usually caused by vitreomacular traction, presenting with central scotoma and distorted or reduced central vision. Staged by OCT; surgical vitrectomy with internal limiting membrane peel restores closure in most cases.

**Synonyms:**

### **Macular Pucker**

An epiretinal membrane of fibrocellular tissue on the inner retinal surface that contracts to distort the macula, causing metamorphopsia and reduced vision. Diagnosed by OCT; vitrectomy with membrane peeling is reserved for visually significant symptoms.

**Synonyms:**

### **Macule**

Macule concerns macule; its medical significance is established from the defining features, setting, associated findings, and clinical question. thickness, conventionally less than 1 cm in diameter. Larger flat lesions are called patches.

**Synonyms:**

### **Maffucci Syndrome**

A rare congenital disorder characterized by multiple enchondromas together with soft-tissue hemangiomas or lymphangiomas. Skeletal deformity, limb shortening, pathological fractures, and increased risk of cartilage or other malignancy may occur.

**Synonyms:**

### **MAG3 Renal Scan**

Nuclear medicine scan evaluating renal function and obstruction. Differential function between kidneys. Non-obstructive dilation does not show delayed excretion. Useful for assessing split renal function and planning surgical interventions.

**Synonyms:**

---

## Magnesium

A predominantly intracellular cation that stabilizes ATP, supports hundreds of enzymes, and contributes to neuromuscular transmission, nucleic-acid synthesis, and bone metabolism. Deficiency may cause weakness, tremor, arrhythmias, hypokalemia, or hypocalcemia.

**Synonyms:**

## Magnesium Deficiency

An abnormally low body magnesium level, often caused by poor intake, gastrointestinal loss, renal wasting, or medications. It may cause weakness, tremor, muscle cramps, seizures, cardiac arrhythmias, hypokalemia, and hypocalcemia.

**Synonyms:**

## Magnesium Sulfate for Neuroprotection

Intravenous magnesium sulfate given in selected cases of imminent very preterm birth to reduce the risk of neurologic injury in the infant. The gestational-age criteria, dose, duration, and monitoring follow local obstetric and neonatal guidance.

**Synonyms:**

## Magnetic Resonance Angiography

MRI techniques used to depict arteries or veins, with or without contrast. It may evaluate stenosis, aneurysm, dissection, thrombosis, and vascular malformation without ionizing radiation.

**Synonyms:**

## Magnetic Resonance Cholangiopancreatography

MRI technique visualizing biliary and pancreatic ducts without contrast. Non-invasive alternative to ERCP. Used for choledocholithiasis, biliary strictures, pancreatic pathology.

**Synonyms:**

## Magnetic Resonance Imaging

Uses strong magnetic field and radiofrequency pulses to generate images from hydrogen protons. Excellent soft tissue contrast. No ionizing radiation. Sequences: T1-weighted (fat bright, fluid dark), T2-

weighted (fluid bright), FLAIR (suppresses CSF), DWI (diffusion restriction). Contrast: gadolinium-based.

**Synonyms:**

## Magnetic Resonance Safety

The practices used to prevent injury from the static magnetic field, gradient fields, radiofrequency energy, and implanted or ferromagnetic objects in the MRI environment. Screening must address implants, foreign bodies, devices, pregnancy, burns, hearing protection, and projectile risk.

**Synonyms:**

## Magnetic Resonance Spectroscopy

MRI technique measuring metabolic compounds. Used for tumor characterization, metabolic disorders.

**Synonyms:**

## Magnetic Seed

Sentinel lymph node localization using magnetic seed. Alternative to radioactive tracer.

**Synonyms:**

## Magnetic Therapy

PEMF for bone healing, pain. Evidence mixed.

**Synonyms:**

## Mahvash Disease

A rare inherited disorder of glucagon signaling caused by inactivating variants in the glucagon receptor. It may cause pancreatic alpha-cell hyperplasia, enlarged pancreas, abnormal glucose regulation, and elevated circulating glucagon.

**Synonyms:**

## Maintenance Dose

The dose of a drug administered at regular intervals to maintain a desired steady-state concentration, balancing the rate of drug administration with the rate of elimination. The maintenance dose is calculated as: Maintenance dose rate = (Clearance x desired concentration) / Bioavailability.

**Synonyms:**

---

## Maintenance Therapy

Long-term treatment to prevent recurrence. Examples: hormonal therapy, targeted therapy.

**Synonyms:**

## Major Depressive Disorder

A mood disorder characterized by at least one major depressive episode consisting of five or more symptoms during the same two-week period. At least one symptom must be either depressed mood or loss of interest or pleasure (anhedonia).

**Synonyms:**

## Major Histocompatibility Complex

A locus of highly polymorphic genes encoding cell-surface glycoproteins that present antigen peptides to T cells. Human Leukocyte Antigen (HLA) in humans. MHC Class I (HLA-A, B, C): expressed on all nucleated cells, presents endogenous antigens (viral/tumor) to CD8<sup>+</sup> cytotoxic T cells.

**Synonyms:**

## Malabsorption

Malabsorption is impaired digestion or absorption of nutrients in the gastrointestinal tract, causing diarrhea, weight loss, anemia, vitamin deficiency, or bone disease. pancreatic insufficiency, bacterial overgrowth, Crohn disease, short bowel syndrome, and infections. Presents with diarrhea, steatorrhea, weight loss, and deficiency of specific nutrients (iron, B12, vitamin D, calcium).

**Synonyms:**

## Malacoplakia

A chronic granulomatous inflammatory reaction characterized by macrophages containing basophilic Michaelis-Gutmann bodies. It most often affects the urinary or gastrointestinal tract and may form mass-like lesions that mimic malignancy.

**Synonyms:**

## Malaise

Malaise concerns malaise; its medical significance is established from the defining features, setting, associated findings, and clinical question. infection,

inflammation, anemia, chronic disease, medication effects, or emotional stress.

**Synonyms:**

## Malakoplakia

Rare chronic inflammatory condition characterized by accumulation of macrophages containing calcified inclusion bodies called Michaelis-Gutmann bodies, most commonly affecting the urinary bladder but also occurring in the gastrointestinal tract.

**Synonyms:**

## Malar Rash

A red or violaceous rash across the cheeks and bridge of the nose, often sparing the folds beside the nose. It is classically associated with systemic lupus erythematosus but can occur with other conditions; appearance alone does not establish a diagnosis.

**Synonyms:**

## Malaria

Malaria is a mosquito-borne infection caused by Plasmodium parasites, producing fever and hemolysis and potentially progressing to cerebral disease, severe anemia, organ failure, or death. and anemia; severe disease may affect the brain, lungs, kidneys, blood glucose, or other organs. Diagnosis and treatment depend on the species, illness severity, and travel or exposure history.

**Synonyms:**

## Malate Dehydrogenase

Converts malate to oxaloacetate in TCA cycle. Produces NADH.

**Synonyms:**

## MALDI-TOF Mass Spectrometry

Matrix-assisted laser desorption/ionization time-of-flight mass spectrometry, a method that identifies microorganisms by comparing their protein spectral fingerprints with a reference database. It provides rapid identification from an isolated colony and does not by itself establish antimicrobial susceptibility.

**Synonyms:**

---

### Male Hypoactive Sexual Desire Disorder

A persistent or recurrent lack of sexual or erotic thoughts and desire in a man that causes personal distress or relationship difficulty. It is distinct from erectile dysfunction, although the conditions may coexist.

**Synonyms:**

### Male Hypogonadism

Reduced production of testosterone, impaired sperm production, or both due to disease of the testes or the hypothalamic-pituitary system. Possible features include low libido, erectile difficulty, infertility, reduced muscle mass, fatigue, and loss of bone density.

**Synonyms:**

### Male Infertility

Reduced ability to achieve a pregnancy because of factors affecting sperm production, sperm transport, ejaculation, sexual function, or other reproductive processes.

**Synonyms:**

### Male Menopause

A nontechnical term sometimes used for age-related decline in testosterone, although it is not equivalent to female menopause. Low testosterone may cause reduced libido, erectile difficulty, fatigue, depressed mood, or loss of muscle mass, but symptoms have many causes and require appropriate hormone testing before treatment.

**Synonyms:**

### Malignancy

Malignancy concerns malignancy; its medical significance is established from the defining features, setting, associated findings, and clinical question. or spread to distant sites.

**Synonyms:**

### Malignant acanthosis nigricans

A paraneoplastic syndrome in which velvety, hyperpigmented, verrucous plaques develop rapidly in flexural and mucosal areas as a marker of an under-

lying internal malignancy, most commonly gastric adenocarcinoma. Unlike benign acanthosis nigricans, the malignant form is extensive, abrupt in onset, and may involve the oral mucosa.

**Synonyms:**

### Malignant Ascites

Intraperitoneal fluid accumulation caused by peritoneal tumor spread, most often ovarian or gastrointestinal cancer. Management includes therapeutic paracentesis and, in selected cases, intraperitoneal chemotherapy or shunt placement.

**Synonyms:**

### Malignant Hypertension

Severely elevated BP greater than 180/120 with end-organ damage. Renal findings include hyperplastic arteriolosclerosis with onion-skinning and fibrinoid necrosis. Treat with IV antihypertensives. Poor prognosis if untreated. May cause AKI, encephalopathy, and retinopathy.

**Synonyms:**

### Malignant Hyperthermia

A rare, life-threatening pharmacogenetic disorder of skeletal muscle triggered by volatile inhalation anesthetics and succinylcholine, with incidence of approximately 1 in 15,000 to 50,000 anesthetics.

**Synonyms:**

### Malignant melanoma

A highly aggressive malignancy arising from melanocytes, characterised by uncontrolled proliferation and potential for early metastasis via lymphatic and haematogenous spread.

**Synonyms:**

### Malignant Mesothelioma

A cancer of the mesothelial lining of the pleura (most common), peritoneum, or pericardium. Strongly associated with asbestos exposure, presenting with effusion, chest pain, and dyspnea; prognosis is generally poor.

**Synonyms:**

---

## **Malignant Neoplasm**

Malignant neoplasms, commonly called cancers, are uncontrolled proliferations of cells that invade surrounding tissues and have the capacity to metastasize to distant sites through lymphatic, hematogenous, or transcoelomic routes.

**Synonyms:** cancers, are uncontrolled proliferations of cells.

## **Malignant Pleural Effusion**

Pleural fluid accumulation from pleural or metastatic disease, causing dyspnea. Managed with thoracentesis, pleurodesis, or an indwelling pleural catheter.

**Synonyms:**

## **Malignant syphilis**

A severe, destructive form of secondary syphilis presenting with necrotic, gummatous, or ulcerative skin lesions, often in immunocompromised patients, particularly those with HIV co-infection. It represents an aberrant immune response to heavy *Treponema pallidum* infection and requires aggressive intravenous penicillin therapy.

**Synonyms:**

## **Malignant Tumor**

A cancerous growth capable of invading nearby tissue or spreading to distant sites. Its behavior and treatment depend on its type, grade, stage, and molecular features.

**Synonyms:**

## **Malingering**

The intentional fabrication or exaggeration of physical or psychological symptoms for external incentives (avoiding work, obtaining financial compensation, evading criminal prosecution, obtaining drugs). Not a psychiatric illness (coded as a V-code/Z-code).

**Synonyms:**

## **Mallampati Classification**

A simple scoring system used to predict the ease of endotracheal intubation based on the anatomical structures visible in the oral cavity when the patient

opens their mouth wide and protrudes their tongue without phonating. Class I: soft palate, fauces, uvula, and tonsillar pillars visible.

**Synonyms:**

## **Malleus**

The largest of the three ossicles in the middle ear. See Hammer.

**Synonyms:**

## **Mallory-Weiss Tear**

Longitudinal mucosal laceration at the gastroesophageal junction caused by forceful vomiting or retching. It typically presents with hematemesis. Most bleeds spontaneously within twenty-four to forty-eight hours. Diagnosis is made by upper endoscopy showing a linear mucosal tear.

**Synonyms:**

## **Malnutrition**

Malnutrition includes inadequate, excessive, or imbalanced nutrient intake and can impair growth, immunity, wound healing, muscle function, and organ reserve. form, and function. Undernutrition: protein-energy malnutrition, micronutrient deficiencies. Overnutrition: overweight, obesity, related comorbidities. Screen with MNA (Mini Nutritional Assessment), MUST (Malnutrition Universal Screening Tool).

**Synonyms:**

## **Malocclusion**

Misalignment of teeth or incorrect relation between dental arches. Types: Class I (normal molar relationship, crowding), Class II (retrognathic mandible), Class III (prognathic mandible).

**Synonyms:**

## **Malpractice**

Professional negligence by healthcare provider. Requires duty, breach, causation, damages.

**Synonyms:**

## **Malpresentation**

A fetal presentation other than the usual vertex

---

presentation, including breech, face, brow, shoulder, or compound presentation. It may complicate labor and influence delivery planning.

**Synonyms:**

### Malrotation

Abnormal rotation or fixation of an organ during development, most often referring to abnormal rotation of the intestine and its risk of volvulus.

**Synonyms:**

### Maltol

A flavoring compound used in some foods and medicines to provide a sweet, caramel-like odor or taste.

**Synonyms:**

### Mammary Gland

Modified sweat (apocrine) gland in the breast, overlying pectoralis major, with 15-20 lactiferous ducts converging on the nipple. Composed of glandular lobules (alveoli), fibrous stroma (Cooper's ligaments), and fat. Development regulated by estrogen, progesterone, prolactin, and oxytocin (milk let-down).

**Synonyms:**

### Mastalgia

Breast pain or tenderness, which may be cyclical with menstruation or noncyclical. Causes include hormonal changes, cysts, infection, trauma, and musculoskeletal pain.

**Synonyms:**

### Mammary Implant

Breast augmentation/reconstruction device. Types: saline (silicone shell, saline fill), silicone gel (cohesive gel). Incisions: inframammary, periareolar, axillary. Placement: subglandular or submuscular. Complications: capsular contracture, rupture, infection, BIA-ALCL (anaplastic large cell lymphoma).

**Synonyms:**

### Mammogram

A mammogram is a low-dose x-ray examination of

breast tissue used for screening and evaluation of masses, asymmetry, calcifications, or other abnormalities.

**Synonyms:**

### Mammography

X-ray imaging of the breast used to screen for or evaluate breast abnormalities. Screening intervals depend on age, risk, symptoms, and the guideline being followed. Standard views include the cranio-caudal and mediolateral-oblique projections.

**Synonyms:**

### Mandible

Largest facial bone forming the lower jaw, with horseshoe-shaped body and two rami ending in condylar (TMJ) and coronoid processes. Mental foramen transmits the mental nerve. Mandibular foramen is the entry point for inferior alveolar nerve blocks. Most commonly fractured facial bone, typically at the condyle, angle, or symphysis.

**Synonyms:**

### Mandibular fracture

A break in the lower jaw bone typically caused by trauma, presenting with pain, swelling, malocclusion, and difficulty opening the mouth; may require surgical fixation.

**Synonyms:**

### Manganese

An essential trace element required in small amounts. Excessive exposure, especially by inhalation, can injure the nervous system and cause manganism, a movement disorder resembling parkinsonism.

**Synonyms:**

### Mania

A distinct period of abnormally elevated, expansive, or irritable mood with increased goal-directed activity or energy, lasting  $\geq 1$  week (or any duration if hospitalization required).

**Synonyms:**

---

## Manic Episode

A distinct period lasting at least seven days (or any duration if hospitalization is required) of abnormally elevated, expansive, or irritable mood with increased energy or activity.

**Synonyms:**

## Manifestation

A sign, symptom, or other observable expression of a disease or condition.

**Synonyms:**

## Manner of Death

Legal classification of the circumstances surrounding a death, categorized into 5 official types: Natural, Accident, Suicide, Homicide, or Undetermined.

**Synonyms:**

## Mannitol

An osmotic diuretic that is freely filtered at the glomerulus but not reabsorbed, increasing tubular osmotic pressure and water excretion. Used to reduce intracranial pressure (cerebral edema) and intraocular pressure (acute glaucoma), and to promote diuresis in rhabdomyolysis/contrast nephropathy prophylaxis.

**Synonyms:**

## Mannose-Binding Lectin Deficiency

An inherited or acquired deficiency of mannose-binding lectin, a protein that activates the lectin pathway of complement. It may increase susceptibility to infection in selected people, especially when other immune defenses are impaired.

**Synonyms:**

## Mantle Cell Lymphoma

An aggressive B-cell lymphoma characterized by t(11;14) translocation leading to cyclin D1 overexpression and CCND1-IGH fusion. Clinical: older males, widespread lymphadenopathy, splenomegaly, GI involvement (lymphomatous polyposis), bone marrow, peripheral blood (leukemic phase).

**Synonyms:**

## Manual Removal of Placenta

A procedure in which a clinician removes a placenta that has not separated or cannot be delivered after birth. The timing and need depend on bleeding, maternal condition, and local clinical protocols.

**Synonyms:**

## MAOIs

Monoamine oxidase inhibitors are a class of antidepressant drugs that inhibit the enzyme monoamine oxidase, which breaks down serotonin, norepinephrine, and dopamine in the brain. By inhibiting this enzyme, MAOIs increase the levels of these neurotransmitters in the synaptic cleft.

**Synonyms:**

## Maple Syrup Urine Disease

An autosomal recessive inborn error of branched-chain amino acid metabolism caused by deficiency of the branched-chain alpha-ketoacid dehydrogenase complex (BCKDC) — mutations in BCKDHA, BCKDHB, DBT, or DLD.

**Synonyms:**

## Marasmus

A severe form of protein-energy malnutrition (PEM) resulting from chronic total calorie and protein deprivation (starvation). Clinical features include severe muscle wasting, loss of subcutaneous fat ("skin and bones" appearance), stunted growth, a "monkey-like" facial appearance, and alertness.

**Synonyms:**

## Maraviroc

A CCR5 antagonist (entry inhibitor) used in combination antiretroviral therapy for HIV-1 infection in patients with CCR5-tropic virus. Maraviroc binds to the human CCR5 coreceptor on CD4+ T cells, preventing HIV-1 gp120 binding and viral entry.

**Synonyms:**

## Marfan Syndrome

An autosomal dominant connective tissue disorder caused by mutations in the FBN1 gene (fibrillin-1). Cardiovascular manifestations include aortic root

---

dilation and dissection, mitral valve prolapse, and aortic regurgitation. Skeletal features include tall stature, arachnodactyly, pectus deformity, and joint hypermobility.

**Synonyms:**

### **Marfanoid Habitus**

A body habitus characterized by tall stature, long limbs, long fingers (arachnodactyly), and joint laxity. Seen in Marfan syndrome, but also in other connective tissue disorders and homocystinuria. Differentiated from Marfan syndrome by absence of aortic root dilation and lens subluxation.

**Synonyms:**

### **Marfan's syndrome**

An autosomal dominant connective tissue disorder caused by mutations in the FBN1 gene encoding fibrillin-1. Neurological manifestations include dural ectasia (widening of the dural sac, causing back pain and headaches), spontaneous intracranial hypotension from CSF leaks, and increased risk of stroke from arterial dissection.

**Synonyms:**

### **Marrow hyperplasia**

Increased cellularity of the bone marrow due to accelerated production of blood cells, typically seen as a compensatory response to chronic hemolysis, hemorrhage, or hypoxia.

**Synonyms:**

### **Mask**

Face covering for infection control. Types: surgical, N95 respirator.

**Synonyms:**

### **Mass**

A discrete area of abnormal tissue that is larger or more substantial than a nodule. A mass may be benign or malignant and can occur in many organs.

**Synonyms:**

### **Mass Casualty Incident**

Event overwhelming available resources, requiring

triage and resource allocation. Triage systems: START (Simple Triage and Rapid Treatment), SALT. Categories: immediate (red), delayed (yellow), minor (green), expectant (black). Incident command system (ICS) coordinates response.

**Synonyms:**

### **Masseter Muscle**

Thick rectangular muscle of mastication on the mandibular ramus, from the zygomatic arch to mandibular angle/ramus. Innervated by the masseteric nerve (V3). Most powerful masticatory muscle, elevating the mandible with up to 70 kg force. Involved in bruxism, TM disorders, and myofascial pain. Hypertrophy can widen facial appearance.

**Synonyms:**

### **Massive Hemoptysis**

Life-threatening coughing of blood that threatens the airway, breathing, or circulation; a fixed volume threshold is not required. It requires urgent airway assessment, stabilization, and definitive treatment of the bleeding source.

**Synonyms:**

### **Massive Transfusion Protocol**

A coordinated protocol for life-threatening hemorrhage that provides rapid, balanced delivery of red cells, plasma, and platelets with monitoring and correction of fibrinogen, calcium, temperature, and acid-base abnormalities.

**Synonyms:**

### **Mast Cell**

A tissue-resident immune cell with large granules containing histamine, heparin, tryptase, and cytokines; bears high-affinity IgE receptors (Fc-epsilon-RI).

**Synonyms:**

### **Mast Cell Activation Syndrome**

A condition involving recurrent symptoms from inappropriate release of mast-cell mediators, such as flushing, itching, hives, abdominal symptoms, wheezing, or low blood pressure. Diagnosis requires

---

compatible episodes, objective evidence of mediator release, and response to appropriate treatment; many similar conditions must be excluded.

**Synonyms:**

### **Mastectomy**

Mastectomy examines mastectomy; interpretation depends on the specimen or body region, test method, reference range, and clinical question. areola, and nipple. Modified radical mastectomy (MRM): total mastectomy + axillary lymph node dissection (levels I-III), for invasive breast cancer.

**Synonyms:**

### **Mastitis**

Inflammation of breast tissue, often occurring during lactation but also possible outside lactation. It may cause localized pain, warmth, swelling, and fever; infection and inflammatory causes must be distinguished clinically.

**Synonyms:**

### **Mastocytosis**

A clonal disorder in which abnormal mast cells accumulate in the skin or internal organs. Cutaneous disease commonly causes urticaria pigmentosa: tan-brown macules or papules that swell and itch after rubbing (Darier sign).

**Synonyms:**

### **Mastoidectomy**

Mastoidectomy examines mastoidectomy; interpretation depends on the specimen or body region, test method, reference range, and clinical question. from the mastoid portion of the temporal bone, performed for chronic otitis media with cholesteatoma, mastoiditis, or as a component of surgery for acoustic neuroma and other skull base tumors.

**Synonyms:**

### **Mastoiditis**

Mastoiditis is a medical condition involving mastoiditis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. media. Presents with postauricular

pain, swelling, erythema, and tenderness, fever, and otorrhea. Diagnosis: CT temporal bone shows mastoid air cell opacification with bony destruction.

**Synonyms:**

### **Masturbation**

Self-stimulation of the genitals for sexual pleasure. It is a common human behavior; it is generally not harmful unless it causes injury, distress, or interferes with daily life.

**Synonyms:**

### **Maternal Physiologic Changes in Pregnancy**

Extensive adaptive changes across all organ systems to support the growing fetus.

**Synonyms:**

### **Maternal Pushing (Second Stage)**

Maternal expulsive efforts during the second stage of labor to facilitate fetal descent. Directed (closed-glottis, Valsalva) pushing: sustained breath-hold for 10 seconds with three pushes per contraction. Spontaneous (open-glottis) pushing: shorter pushes with the mother pushing when she feels an urge.

**Synonyms:** Second Stage

### **Maternal Sepsis**

Organ dysfunction caused by a dysregulated maternal response to infection during pregnancy, childbirth, or the postpartum period. It may arise from uterine, urinary, respiratory, wound, or other infection and requires prompt cultures, antimicrobial therapy, source control, and hemodynamic support.

**Synonyms:**

### **Maturity Onset Diabetes of the Young**

A monogenic form of diabetes with autosomal dominant inheritance, typically presenting before age 25 with non-insulin-dependent hyperglycemia. Caused by mutations in transcription factors or enzymes of beta-cell function.

**Synonyms:**

---

## Maxilla

Paired bone forming the upper jaw, central face, and parts of orbit, nasal cavity, and hard palate. Body contains the maxillary sinus (largest paranasal sinus). Four processes: frontal, zygomatic, alveolar (upper teeth), and palatine (anterior hard palate). Fractures classified using the Le Fort system.

**Synonyms:**

## Maxillofacial Prosthesis

Artificial replacement of maxillofacial structures. Obturator for cleft palate or surgical defect. Ocular, nasal, auricular prostheses.

**Synonyms:**

## Maximum Plasma Concentration (Cmax)

The highest measured plasma concentration after a dose. Cmax and the time to reach it are used to describe absorption rate, peak-related toxicity, and comparative pharmacokinetics.

**Synonyms:** Cmax

## Maximum Tolerated Dose

The highest dose of a drug that produces acceptable, manageable toxicity without causing unacceptable adverse effects, determined through dose-escalation studies, most commonly in Phase I clinical trials. The MTD identifies the dose range for subsequent efficacy studies.

**Synonyms:**

## May-Thurner Syndrome

Compression of left common iliac vein by right common iliac artery. Causes left lower extremity DVT. Diagnosis: CT/MR venography, phlebography. Treatment: angioplasty and stenting.

**Synonyms:**

## MCA Peak Systolic Velocity

Doppler measurement of the peak systolic velocity in the fetal middle cerebral artery. An indicator of fetal anemia: elevated MCA PSV ( $>1.5$  MoM) correlates with moderate-to-severe anemia. The most important application is surveillance of Rh-sensitized pregnancies (detect anemia before hy-

drops develops).

**Synonyms:**

## McCune-Albright Syndrome

Sporadic condition caused by activating mutations in the GNAS1 gene encoding the Gs alpha subunit leading to constitutive activation of adenylyl cyclase.

**Synonyms:**

## McDonald Cerclage

A transvaginal cervical cerclage using a purse-string suture (Mersilene tape or Prolene) placed at the cervicovaginal junction, without bladder dissection. The most common cerclage technique. Indications: cervical insufficiency (history-indicated or ultrasound-indicated short cervix  $<25$  mm before 24 weeks). Placed at 12-14 weeks.

**Synonyms:**

## McMurray Test

A knee examination in which the leg is flexed, rotated, and extended to place stress on the menisci. Pain or a palpable click may suggest a meniscal lesion but is not diagnostic alone.

**Synonyms:**

## McRoberts Maneuver

A positioning maneuver for managing shoulder dystocia where the mother's legs are hyperflexed onto her abdomen, with thighs against the abdomen. This flattens the sacrum, increases the anteroposterior diameter of the pelvis, and rotates the symphysis pubis superiorly. Often combined with suprapubic pressure.

**Synonyms:**

## Mean Arterial Pressure

The average pressure driving systemic blood flow during one cardiac cycle. It is influenced by cardiac output and systemic vascular resistance and is approximated clinically as diastolic pressure plus one-third of pulse pressure at normal heart rates.

**Synonyms:**

## Mean Corpuscular Hemoglobin

---

## Concentration

The mean concentration of hemoglobin within packed erythrocytes, calculated from hemoglobin and hematocrit. A reduced MCHC indicates hypochromia; an increased value may occur with spherocytosis or analytical interference.

**Synonyms:**

## Mean Corpuscular Volume

The average volume of an erythrocyte, reported in femtoliters as part of the CBC. A low MCV indicates microcytosis, whereas a high MCV indicates macrocytosis; interpretation requires correlation with hemoglobin, reticulocytes, and other indices.

**Synonyms:**

## Measles

Measles is a highly contagious measles-virus infection causing fever, cough, conjunctivitis, and a spreading maculopapular rash, with possible pneumonia, encephalitis, or other complications. prodrome of fever, coryza, cough, and conjunctivitis, followed by Koplik spots (white buccal mucosal lesions) and maculopapular rash spreading cephalocaudally. Complications: pneumonia, encephalitis, and subacute sclerosing panencephalitis.

**Synonyms:**

## Measles virus

A negative-sense RNA virus that causes measles, a highly contagious respiratory illness. The virus is transmitted by respiratory droplets and is one of the most infectious pathogens known. Symptoms include fever, cough, coryza, conjunctivitis, and rash.

**Synonyms:**

## Measles-Rubella Vaccine

A combined live attenuated vaccine containing measles and rubella antigens without the mumps component, widely used in countries where mumps is not a significant public health burden, including India's Universal Immunization Schedule.

**Synonyms:**

## Measurable Residual Disease

The burden of cancer remaining after therapy that can be quantified using a validated assay. The term is increasingly preferred to minimal residual disease because residual disease may be clinically important even when not minimal.

**Synonyms:**

## Meatuses

The nasal meatuses are the air passages located beneath each corresponding turbinate on the lateral wall of the nasal cavity, and they serve as the drainage pathways for the paranasal sinuses and the nasolacrimal duct.

**Synonyms:**

## Mebrofenin Scan

Hepatobiliary imaging using Tc-99m mebrofenin. Evaluates liver function, biliary obstruction.

**Synonyms:**

## Mechanical Circulatory Support

Devices that provide temporary or permanent cardiac support. Options include intra-aortic balloon pump (IABP), Impella (percutaneous ventricular assist device), TandemHeart, extracorporeal membrane oxygenation (ECMO), and durable left ventricular assist devices (LVADs).

**Synonyms:**

## Mechanical Insufflation-Exsufflation

A device that delivers positive pressure (insufflation) followed by rapid negative pressure (exsufflation) to simulate a cough. It is used in neuromuscular disease (Duchenne muscular dystrophy, spinal cord injury, ALS) to augment cough effectiveness and clear secretions.

**Synonyms:**

## Mechanical Ventilation

Mechanical ventilation provides respiratory support by delivering controlled or spontaneous breaths through an endotracheal tube or tracheostomy.

**Synonyms:**

---

## Mechanism of Death

The physiologic or biochemical derangement that causes death (the final failure) as opposed to the underlying disease or injury (cause of death) and the circumstances (manner). Examples: ventricular fibrillation, cerebral hemorrhage, sepsis, respiratory failure, exsanguination, cardiac tamponade.

**Synonyms:**

## Mechanism of Toxicity

How substance causes harm. Examples: enzyme inhibition, membrane disruption, receptor binding, oxidative stress, DNA damage.

**Synonyms:**

## Meckel Diverticulum

Congenital remnant of the omphalomesenteric duct located on the antimesenteric border of the distal ileum approximately sixty centimeters from the ileocecal valve.

**Synonyms:**

## Meckel's diverticulum

A congenital pouch of the small intestine caused by persistence of the embryonic vitelline duct. It may bleed, inflame, or cause obstruction.

**Synonyms:**

## Meconium Aspiration

Meconium aspiration syndrome (MAS): aspiration of meconium-stained amniotic fluid into the fetal/neonatal airway causing airway obstruction, chemical pneumonitis, and surfactant dysfunction—respiratory distress in term/post-term infants. Risk: fetal distress/hypoxia (passage of meconium in utero).

**Synonyms:**

## Meconium Aspiration Syndrome

Respiratory distress in newborns born through meconium-stained amniotic fluid, caused by aspiration of meconium into the airways. Presents with respiratory distress, barrel-shaped chest, and coarse crackles. Meconium is thick, greenish-black fetal stool passed in utero. Risk factors include post-term

pregnancy and fetal distress.

**Synonyms:**

## Meconium Ileus

Intestinal obstruction in neonates caused by inspissated meconium most commonly associated with cystic fibrosis. Presents with abdominal distension, bilious vomiting, and failure to pass meconium within forty-eight hours.

**Synonyms:**

## Meconium Peritonitis

Sterile chemical peritonitis resulting from in utero intestinal perforation allowing meconium to spill into the peritoneal cavity. Most commonly associated with cystic fibrosis causing inspissated meconium obstruction, intestinal atresia, and volvulus. May be detected prenatally as fetal ascites with echogenic peritoneal calcifications.

**Synonyms:**

## Meconium-Stained Amniotic Fluid

Greenish or yellowish discoloration of amniotic fluid due to fetal meconium passage in utero. Associated with fetal distress, post-term pregnancy, and fetal growth restriction. Thick meconium increases risk of meconium aspiration syndrome. Management of non-vigorous newborns: tracheal suctioning before positive pressure ventilation.

**Synonyms:**

## Medial

Medial concerns medial, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

## Medial Collateral Ligament Injury

Tear of the MCL, the most common knee ligament injury. Mechanism: valgus stress to the knee (direct blow to lateral knee). Presents with medial knee pain, swelling, and valgus laxity. Grading: I (pain, no laxity), II (partial tear, some laxity), III (complete tear, significant laxity).

**Synonyms:**

---

### Medial Cuneiform

Largest cuneiform, on the medial foot between navicular and first metatarsal. Insertion for tibialis anterior and posterior tendons supporting the medial longitudinal arch. The first tarsometatarsal joint (Lisfranc joint) is an important landmark; Lisfranc injuries involve fracture-dislocation at this level.

**Synonyms:**

### Medial Rotation

Rotation of a limb toward the median plane of the body.

**Synonyms:**

### Median Nerve

From lateral and medial cords (C5-T1), passing through the arm without branching, through the cubital fossa, into the forearm innervating most flexor muscles. In the hand innervates thenar muscles (opponens, abductor brevis, flexor brevis pollicis) and first two lumbricals. Sensation to lateral 3.5 digits.

**Synonyms:**

### Median Plane

A sagittal plane that passes directly through the midline of the body, dividing it into equal right and left halves.

**Synonyms:**

### Median rhomboid glossitis

A smooth, red, diamond-shaped depapillated area on the dorsum of the tongue caused by chronic *Candida* infection, usually asymptomatic and managed with antifungal therapy.

**Synonyms:**

### Median Survival

The time by which half of the people in a study have experienced the specified event, such as death. It is a summary measure of survival in a defined population.

**Synonyms:**

### Mediastinitis

Mediastinitis is a medical condition involving mediastinitis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. may follow surgery, esophageal injury, or infection and can cause severe systemic illness; chronic cases may result from granulomatous or other inflammatory disease.

**Synonyms:**

### Mediastinoscopy

A surgical procedure that accesses the mediastinum through a small incision near the sternum to inspect or biopsy mediastinal lymph nodes or masses. It is one option for staging lung cancer when less-invasive sampling is nondiagnostic or unsuitable.

**Synonyms:**

### Mediastinum

The central compartment of the thoracic cavity between the lungs, containing the heart, major blood vessels, esophagus, and trachea.

**Synonyms:**

### Mediators of Inflammation

Inflammatory mediators are soluble molecules that initiate, amplify, or regulate the inflammatory response.

**Synonyms:**

### Medical Cannabis and Cannabidiol

Cannabis (marijuana) and cannabidiol (CBD) are cannabinoid compounds derived from *Cannabis sativa* that interact with the endocannabinoid system (CB1 and CB2 receptors) to modulate pain, appetite, mood, and inflammation.

**Synonyms:**

### Medical Condition

A state affecting health or bodily function, whether acute, chronic, symptomatic, or asymptomatic.

**Synonyms:**

### Medical Ethics

Moral principles guiding healthcare practice, includ-

---

ing autonomy, beneficence, non-maleficence, and justice.

**Synonyms:**

### **Medical Examiner**

An appointed physician, usually a board-certified forensic pathologist, charged with investigating sudden, unexpected, violent, or suspicious deaths, ordering autopsies, determining cause and manner of death, and certifying the death certificate. Unlike the elected coroner, a medical examiner must meet professional qualifications.

**Synonyms:**

### **Medical Illness**

The subjective experience of being unwell, which may or may not correspond to an identifiable disease.

**Synonyms:**

### **Medical Jargon**

Specialized terminology used by healthcare professionals. Unexplained medical jargon can hinder communication with patients.

**Synonyms:**

### **Medical Jurisprudence**

The branch of law (and its study) that deals with the rights and duties of physicians and the legal aspects of medical practice, distinct from but overlapping with forensic medicine.

**Synonyms:**

### **Medical Negligence (Malpractice)**

Legal tort occurring when a healthcare provider fails to exercise the standard of reasonable care, skill, or diligence expected of a prudent practitioner of similar standing, resulting in injury, harm, or death to a patient.

**Synonyms:** Malpractice

### **Medical Nutrition Therapy**

Individualized nutrition intervention by registered dietitian. Conditions: diabetes, renal disease, GI disorders, cancer, obesity.

**Synonyms:**

### **Medical Physicist**

Expert in radiation physics and safety.

**Synonyms:**

### **Medical Physics**

The application of physics to medicine, including diagnostic imaging, radiation therapy, radiation safety, and physiological measurement.

**Synonyms:**

### **Medical Privacy**

Protection of identifiable patient information and control of its disclosure in healthcare.

**Synonyms:**

### **Medical Records**

A documented account of a patient's clinical history, examination, investigations, treatment, and outcome maintained by providers. In medicolegal practice, records are contemporaneous evidence in malpractice, injury, criminal, and death cases, so accuracy, timeliness, and unaltered amendments are essential.

**Synonyms:**

### **Medical Tattooing**

Medical tattooing (permanent makeup, micropigmentation) covers depigmented skin (vitiligo, vitiligo camouflage), restores areolas after mastectomy, and masks scars. Trichopigmentation simulates hair on bald scalp. Medical tattooing uses specialized pigments and techniques.

**Synonyms:**

### **Medical Tests**

Diagnostic procedures used to screen for, confirm, or monitor disease through analysis of biologic specimens, imaging, physiologic measurements, or genetic material.

**Synonyms:**

### **Medication Adherence**

The extent to which a patient's medication-taking

---

behavior corresponds with the agreed treatment plan. Adherence is influenced by understanding, adverse effects, cost, access, regimen complexity, beliefs, and cognitive or social factors.

**Synonyms:**

### **Medication Adverse-Effect Profile**

The clinically relevant pattern of predictable pharmacologic effects and harmful reactions associated with a medication. It includes common dose-related effects, serious rare events, organ-specific toxicity, interactions, and monitoring requirements.

**Synonyms:**

### **Medication Cascade**

A prescribing sequence in which an adverse drug effect is misinterpreted as a new medical condition and another drug is prescribed to treat it. Recognizing cascades is an important goal of medication reconciliation and deprescribing.

**Synonyms:**

### **Medication Deprescribing**

A planned, supervised process of reducing the dose or stopping a medicine when its current or future harms outweigh its benefits or when treatment goals change. Tapering may be required to prevent withdrawal or rebound disease.

**Synonyms:**

### **Medication Error**

A preventable event that may cause or lead to inappropriate medication use or patient harm while the medication is in the control of a healthcare professional, patient, or consumer. Errors can occur during prescribing, transcribing, dispensing, administration, or monitoring.

**Synonyms:**

### **Medication Management**

The systematic process of optimizing pharmacotherapy to achieve therapeutic goals while minimizing adverse effects, encompassing prescribing, dispensing, administration, monitoring, and deprescribing.

**Synonyms:**

### **Medication Reconciliation**

A structured process of obtaining and comparing the most accurate medication list with current prescriptions at transitions of care. It identifies omissions, duplications, incorrect doses, interactions, and unintended changes.

**Synonyms:**

### **Medication Review**

Systematic examination of all medications for appropriateness. Components: indication, efficacy, safety, adherence, interactions. Tools: Beers Criteria, STOPP/START. Goals: deprescribing, optimizing therapy, reducing adverse effects.

**Synonyms:**

### **Medication Safety**

Practices that reduce medication errors and prevent avoidable harm during prescribing, dispensing, administration, and use.

**Synonyms:**

### **Medication Side Effects**

Unintended harmful responses to medications occurring at standard doses, ranging from mild (nausea, rash, dry mouth) to severe (anaphylaxis, Stevens-Johnson syndrome, QT prolongation, hepatotoxicity).

**Synonyms:**

### **Medications and Treatments**

all pharmacologic and therapeutic interventions used to prevent, manage, or cure disease, classified by mechanism of action, therapeutic class, and route of administration.

**Synonyms:**

### **Medicolegal**

Pertaining to the application of medical knowledge to legal questions and the intersection of medicine and the law. Covers forensic pathology, toxicology, psychiatry, and clinical issues: informed consent, malpractice, medical records, disability, personal injury, occupational disease, and public health law.

**Synonyms:**

---

## **Mediterranean Diet**

Traditional eating pattern of Greece, Southern Italy. Emphasizes: fruits, vegetables, whole grains, legumes, nuts, olive oil, moderate fish/poultry, limited red meat. Associated with reduced cardiovascular disease, diabetes, cognitive decline.

**Synonyms:**

## **Medulla Oblongata**

Most inferior brainstem segment, continuous with the spinal cord at the foramen magnum. Contains vital autonomic centers: cardiovascular center (heart rate, blood pressure), respiratory center (dorsal/ventral respiratory groups), and area postrema (vomiting center).

**Synonyms:**

## **Medullary Sponge Kidney**

Congenital malformation characterized by cystic dilatation of the collecting ducts in the renal papillae predisposing to nephrolithiasis and nephrocalcinosis. Presents with recurrent kidney stones, hematuria, and urinary tract infections.

**Synonyms:**

## **Medullary Thyroid Carcinoma**

Neuroendocrine tumor arising from parafollicular C cells that produce calcitonin. Accounts for approximately five percent of thyroid carcinomas. May be sporadic or hereditary as part of multiple endocrine neoplasia type two A or two B. Serum calcitonin serves as a tumor marker. Diagnosis requires FNA with calcitonin immunohistochemistry.

**Synonyms:**

## **Medulloblastoma**

A fast-growing embryonal tumor of the cerebellum and the most common malignant brain tumor of childhood. Treated with surgical resection, craniospinal radiation, and chemotherapy.

**Synonyms:**

## **Meige Syndrome**

A segmental cranial dystonia characterized by involuntary bilateral blepharospasm with dystonic

contractions of the lower face, jaw, or tongue. Symptoms fluctuate and may be worsened by stress, speech, chewing, or sensory stimuli.

**Synonyms:**

## **Meigs Syndrome**

The triad of benign ovarian fibroma, ascites, and pleural effusion. The effusions typically resolve after removal of the ovarian tumour and should be distinguished from malignant ovarian disease.

**Synonyms:**

## **Meiosis**

A specialized cell division that produces haploid eggs or sperm from a diploid precursor cell and creates genetic variation through recombination and chromosome assortment.

**Synonyms:**

## **Melancholic Features**

A specifier for major depressive episodes characterized by a loss of interest or pleasure in all or almost all activities, a depressed mood that is qualitatively distinct from grief, prominent psychomotor retardation or agitation, significant anorexia or weight loss, excessive guilt, and worsening of mood in the morning.

**Synonyms:**

## **Melanocytes**

Dendritic pigment-producing neural crest-derived cells in the epidermal basal layer and hair follicles, comprising approximately 5-10 percent of basal keratinocytes. Produce melanin (eumelanin, brown-black; pheomelanin, yellow-red) in melanosomes, transferred to keratinocytes via dendritic processes for UV protection.

**Synonyms:**

## **Melanoma**

Melanoma concerns melanoma; its medical significance is established from the defining features, setting, associated findings, and clinical question. the eye or mucous membranes; prognosis depends mainly on its stage and biologic features.

---

**Synonyms:**

### **Melanoma Surveillance**

regular skin examination, patient education on self-examination, and dermoscopic monitoring of atypical nevi. High-risk patients (personal or family history, numerous atypical nevi, immunosuppression) require 6-month follow-up. Standard patients require annual examination. Total body photography establishes baseline for change detection.

**Synonyms:**

### **Melanoma Treatment**

Stage-dependent. Stage 0 to IA: wide local excision. Stage IB to IIA: wide excision with sentinel lymph node biopsy. Stage IIB to IIC: wide excision, SLNB, and adjuvant therapy.

**Synonyms:**

### **Melasma**

Melasma concerns melasma; its medical significance is established from the defining features, setting, associated findings, and clinical question. face, particularly the cheeks, forehead, nose, and upper lip. Also called chloasma or the mask of pregnancy.

**Synonyms:** chloasma or.

### **Melasma (Chloasma)**

An acquired, chronic pigmentary disorder characterized by symmetric, hyperpigmented, light-to-dark brown macules and patches on sun-exposed areas of the face (malar, forehead, upper lip, chin). It primarily affects women of childbearing age and individuals with darker skin types (Fitzpatrick types III-V).

**Synonyms:** Chloasma

### **Melatonin Receptor Agonists**

Medications that act on MT1 and MT2 receptors in the suprachiasmatic nucleus to regulate circadian rhythms. Ramelteon is approved for insomnia with sleep onset difficulty. It has no abuse potential and does not cause dependence. It is a useful alternative to benzodiazepines for sleep initiation problems.

**Synonyms:**

### **MELD Score**

Model for End-Stage Liver Disease predicting three-month mortality in advanced liver disease used for liver transplant allocation. The score is calculated using serum bilirubin, creatinine, and international normalized ratio generating a continuous score from approximately six to forty points.

**Synonyms:**

### **melena**

Passage of black, tarry, foul-smelling stools due to the presence of digested blood, indicating upper gastrointestinal bleeding (usually proximal to the ligament of Treitz). The black color results from oxidation of haemoglobin to haematin by intestinal enzymes and bacteria.

**Synonyms:**

### **Melioidosis**

An infectious disease caused by *Burkholderia pseudomallei*, usually acquired from contaminated soil or water through inoculation or inhalation. It may cause pneumonia, skin infection, abscesses, sepsis, or chronic disease and is more severe in people with diabetes or other risk factors.

**Synonyms:**

### **Melorheostosis**

A rare sclerosing bone dysplasia producing irregular, flowing cortical hyperostosis on imaging. It may cause pain, stiffness, limb deformity, restricted movement, contractures, or soft-tissue fibrosis and can affect one or several contiguous bones.

**Synonyms:**

### **Memantine**

An NMDA receptor antagonist (uncompetitive, low-to-moderate affinity) used for moderate to severe Alzheimer disease, often added to an acetylcholinesterase inhibitor. Blocks excessive glutamate-mediated excitotoxicity while preserving normal synaptic transmission. Once or twice daily oral.

**Synonyms:**

---

## Membrane Potential

The electrical potential difference across a cell membrane, approximately -70 mV in most neurons (resting membrane potential). Established by the unequal distribution of ions (primarily K<sup>+</sup>, Na<sup>+</sup>, Cl<sup>-</sup>) across the membrane and selective permeability.

**Synonyms:**

## Membranoproliferative Glomerulonephritis

Pattern of glomerular injury with mesangial proliferation and capillary wall thickening creating tram-track appearance on silver stain. Hepatitis C is common cause of immune complex MPGN. C3 glomerulopathy represents complement-mediated disease. Associated with monoclonal gammopathies.

**Synonyms:**

## Membranous Nephropathy

A glomerular disease caused by immune-complex deposition along the glomerular basement membrane. It commonly causes proteinuria and nephrotic syndrome and may be primary or secondary to another disease, medication, or infection.

**Synonyms:**

## Memory

The cognitive process of encoding, storing, and retrieving information, mediated by distributed neural networks involving the hippocampus, medial temporal lobe, prefrontal cortex, and limbic system.

**Synonyms:**

## Memory Cell

Long-lived lymphocytes (memory B cells and memory T cells) that survive after an immune response and mount rapid, enhanced responses to re-exposure to the same antigen (immunological memory).

**Synonyms:**

## Memory Loss

Reduced ability to recall or learn information. It may result from normal aging, medical illness, medicines, brain injury, or a neurocognitive disorder.

**Synonyms:**

## Mendelson Syndrome

A chemical pneumonitis caused by inhalation of acidic stomach contents, classically during anesthesia or childbirth. It can cause cough, breathing difficulty, and impaired oxygenation.

**Synonyms:**

## Meniere Disease

An inner ear disorder characterized by recurrent episodes of vertigo lasting 20 minutes to 12 hours, with fluctuating sensorineural hearing loss, tinnitus, and aural fullness. Due to endolymphatic hydrops. Diagnosis: clinical criteria; audiometry shows low-frequency SNHL during attacks.

**Synonyms:**

## Meninges

The three membranes enveloping the brain and spinal cord: dura mater (outermost, tough), arachnoid mater (middle, avascular), and pia mater (innermost, adherent to the CNS surface). The subarachnoid space (between arachnoid and pia) contains cerebrospinal fluid. The epidural and subdural spaces are sites of hemorrhage.

**Synonyms:**

## Myringitis

Inflammation of the tympanic membrane, usually caused by infection or irritation and sometimes associated with painful blisters on the eardrum.

**Synonyms:**

## Motor Vehicle Accident

A collision or other road-traffic event causing injury or property damage. Medical evaluation may be needed for visible or delayed injuries, including head, neck, chest, abdominal, or musculoskeletal trauma.

**Synonyms:**

## Meningioma

A usually slow-growing tumor arising from cells associated with the meninges. Most are benign, but some are atypical or malignant and can cause

---

symptoms by compressing the brain, spinal cord, or cranial nerves.

**Synonyms:**

### **Meningitis**

Meningitis is inflammation of the membranes around the brain and spinal cord, caused by infection or noninfectious inflammation and presenting with headache, fever, neck stiffness, or altered mental status. Infection but also by bacteria, fungi, parasites, medicines, or autoimmune disease. Symptoms may include fever, headache, neck stiffness, light sensitivity, or altered mental status and require urgent assessment.

**Synonyms:**

### **Meningocele**

A congenital defect in which the membranes surrounding the spinal cord or brain protrude through an opening in the skull or spine, forming a fluid-filled sac. It may occur with other neural-tube defects and can cause neurologic problems; evaluation commonly includes imaging and specialist assessment.

**Synonyms:**

### **Meningococcal Disease**

A bacterial infection caused by *Neisseria meningitidis* (serogroups A, B, C, W, Y), transmitted via respiratory droplets. Meningococcemia: sudden onset fever, petechial/purpuric rash, hypotension, and DIC. Meningococcal meningitis: fever, nuchal rigidity, headache, photophobia.

**Synonyms:**

### **Meningococcal infection**

Infection with *Neisseria meningitidis*, which may cause meningitis, bloodstream infection, or localized respiratory disease. Severe illness can progress rapidly.

**Synonyms:**

### **Meningococcal Vaccine**

Conjugate vaccine (MenACWY) and serogroup B vaccine (MenB) given at 11-12 years with booster at 16 years. Protects against *Neisseria meningitidis*,

causing meningitis and septicemia. MenACWY booster at 16 years covers the high-risk period for serogroup C and Y disease.

**Synonyms:**

### **Meningoencephalitis**

Inflammation of both the meninges surrounding the brain and the brain tissue itself, usually caused by infection or autoimmune disease. Fever, headache, neck stiffness, confusion, seizures, or reduced consciousness requires urgent medical assessment.

**Synonyms:**

### **Meniscal Injuries**

Tears or other damage to the knee menisci, which are crescent-shaped pieces of cartilage that help distribute load and stabilize the knee. Symptoms may include joint-line pain, swelling, clicking, or restricted motion. Diagnosis is based on examination and, when needed, imaging.

**Synonyms:**

### **Meniscal Tear**

Tear of the C-shaped fibrocartilage (medial or lateral meniscus) that provides shock absorption and stability in the knee. Medial meniscus tears more common (attached to capsule). Mechanism: twisting injury with weight-bearing. Presents with joint line tenderness, pain with deep squatting, catching, locking, and giving way.

**Synonyms:**

### **Menkes Disease**

An X-linked recessive disorder of copper metabolism caused by ATP7A mutations, resulting in impaired intestinal copper absorption and defective copper transport across the blood-brain barrier. Copper accumulates in intestinal and renal cells but is deficient in the liver and brain.

**Synonyms:**

### **Menkes Kinky Hair Syndrome**

An X-linked disorder of copper transport caused by ATP7A dysfunction. It produces progressive neurodegeneration, seizures, developmental delay,

---

hypopigmented or brittle kinky hair, connective-tissue abnormalities, and failure to thrive.

**Synonyms:**

### Menopausal Hormone Therapy

Menopausal hormone therapy (MHT), formerly called hormone replacement therapy (HRT), is the use of estrogen with or without progestogen to alleviate moderate-to-severe menopausal vasomotor symptoms (hot flashes, night sweats), genitourinary syndrome of menopause (vaginal dryness, dyspareunia, urinary urgency), and prevent osteoporosis.

**Synonyms:**

### Menopause

Menopause is the permanent end of menstrual periods after loss of ovarian follicular activity, accompanied by hormonal changes and possible vasomotor, genitourinary, sleep, and bone effects. woman's final period.

**Synonyms:**

### Menarche

The first menstrual period, marking the onset of menstruation. Its timing varies with genetics, nutrition, health, and pubertal development; markedly early or delayed menarche may require assessment.

**Synonyms:**

### Menopause and Perimenopause

Menopause is the permanent cessation of menstruation for 12 consecutive months, reflecting ovarian follicle depletion and estrogen decline, occurring at a median age of 51–52 years in North America.

**Synonyms:**

### Menorrhagia

Heavy or prolonged menstrual bleeding that interferes with physical, social, emotional, or material quality of life. Causes include fibroids, adenomyosis, endometrial polyps, bleeding disorders, thyroid disease, and ovulatory dysfunction; it may cause iron-deficiency anemia.

**Synonyms:**

### Menstrual Cramps

Cramping pain in the lower abdomen during or around menstruation, medically called dysmenorrhea. Pain may radiate to the back or thighs and may occur with nausea, diarrhea, headache, or fatigue. Severe, worsening, or newly developed pain requires evaluation for causes such as endometriosis or fibroids.

**Synonyms:**

### Menstrual Cycle

The recurring hormonal and uterine changes that prepare the body for possible pregnancy. Cycle length and bleeding pattern vary among individuals and across life stages.

**Synonyms:**

### Menstruation

The periodic shedding of the endometrial lining as part of the menstrual cycle when pregnancy does not occur. The timing, duration, and amount of bleeding vary with age, hormonal state, medicines, and health conditions.

**Synonyms:**

### Mental Health

Mental health encompasses emotional, psychologic, and social well-being, affecting how individuals think, feel, behave, and handle stress, relationships, and decision-making.

**Synonyms:**

### Mental Status Examination

A structured assessment of the patient's current psychological functioning performed during the clinical interview. It evaluates appearance, behaviour, speech, mood, affect, thought process, thought content, perceptions, cognition, insight, and judgment.

**Synonyms:**

### Mercury

Liquid metal combining with other metals to form amalgam. Concerns about toxicity, proper handling essential.

**Synonyms:**

---

## Mercury Poisoning

Three forms: elemental (inhalation, neurological), inorganic (renal, GI), organic (methylmercury, neurological). Minamata disease from methylmercury. Treatment: chelation (dimercaprol, DMSA), remove exposure.

**Synonyms:**

## Merkel Cell Carcinoma

An aggressive neuroendocrine skin cancer arising from Merkel cells. It presents as a rapidly growing, painless, red-violet nodule on sun-exposed skin of elderly patients. Approximately 80 percent are associated with Merkel cell polyomavirus. Risk factors include immunosuppression, UV exposure, and fair skin.

**Synonyms:**

## Meropenem-vaborbactam

A combination of the carbapenem meropenem with the cyclic boronate beta-lactamase inhibitor vaborbactam. Vaborbactam inhibits class A and class C beta-lactamases, including KPC carbapenemases, but does not inhibit class D or metallo-beta-lactamases. This combination has activity against many carbapenem-resistant Enterobacteriaceae.

**Synonyms:**

## MERRF Syndrome

Myoclonic epilepsy with ragged-red fibres, a mitochondrial disorder usually caused by a pathogenic mitochondrial DNA variant. It features myoclonus, generalized epilepsy, ataxia, and skeletal-muscle mitochondrial abnormalities, with variable multisystem involvement.

**Synonyms:**

## Mesenteric Artery Ischemia

Inadequate blood flow through the mesenteric arteries, usually caused by embolism, thrombosis, or severe low-flow states. Acute disease presents with severe abdominal pain out of proportion to examination and can progress to bowel infarction.

**Synonyms:**

## Mesenteric Ischemia

Reduced blood flow to intestines. Acute: embolism, thrombosis. Chronic: atherosclerosis. CT angiography diagnosis.

**Synonyms:**

## Mesentery

The fan-shaped double layer of peritoneum attaching the small intestine (jejunum and ileum) to the posterior abdominal wall, carrying the superior mesenteric artery, vein, lymphatics, and autonomic nerves between its layers. Root extends from duodenojejunal junction to ileocecal junction.

**Synonyms:**

## Mesh

A synthetic or biological implant used to provide structural support in pelvic organ prolapse and stress urinary incontinence surgery. Types: polypropylene (most common, mid-urethral slings for SUI, vaginal mesh for prolapse), biological (porcine, bovine, or cadaveric dermis).

**Synonyms:**

## Mesoderm

The middle germ layer in an embryo, which develops into muscles, bones, cartilage, blood vessels, and the kidneys.

**Synonyms:**

## Messenger RNA

Single-stranded RNA molecule transcribed from DNA template, carrying genetic code from nucleus to ribosomes for protein synthesis. Contains 5' cap (methylguanosine), 5' UTR, coding sequence (codons), 3' UTR, and poly-A tail. Eukaryotic mRNA undergoes processing: splicing (intron removal, exon ligation), capping, polyadenylation.

**Synonyms:**

## Meta-Analysis

A statistical method that combines quantitative results from multiple studies addressing a related question. Its validity depends on the quality and comparability of the studies.

---

**Synonyms:**

### **Metabolic Acidosis**

A primary acid-base disorder characterized by decreased serum bicarbonate ( $<22$  mEq/L) and pH  $<7.35$ . Causes are classified by anion gap (AG). High AG: diabetic ketoacidosis, lactic acidosis, renal failure, starvation, toxins (methanol, ethylene glycol, salicylates).

**Synonyms:**

### **Metabolic Alkalosis**

A primary increase in plasma bicarbonate or loss of hydrogen ions. Causes include vomiting, diuretic use, mineralocorticoid excess, and chloride depletion; respiratory compensation increases carbon dioxide but is limited by hypoxemia and acidosis.

**Synonyms:**

### **Metabolic Rate**

The rate at which the body uses energy to maintain life and perform activity.

**Synonyms:**

### **Metabolic Syndrome**

Cluster of conditions: abdominal obesity, hypertension, hyperglycemia, high triglycerides, low HDL. Increases cardiovascular disease and diabetes risk.

**Synonyms:**

### **Metabolic Tumor Volume**

Total volume of metabolically active tumor on PET. Prognostic in lymphoma.

**Synonyms:**

### **Metabolism**

Metabolism concerns metabolism, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context. anabolism (synthesis, consumes energy). Central pathways: glycolysis, TCA cycle, oxidative phosphorylation, pentose phosphate pathway. Metabolic regulation ensures energy homeostasis.

**Synonyms:**

### **Metacarpals**

Five long bones (I-V) forming the palm framework. Each has base, shaft, and head. The first is shortest and most mobile, articulating with the trapezium at a saddle joint for opposition. Second/third are firmly fixed; fourth/fifth more mobile. Bennett's fracture affects the first metacarpal base; boxer's fracture affects the fifth neck.

**Synonyms:**

### **Metacarpophalangeal Joint**

A condyloid synovial joint between a metacarpal head and the base of a proximal phalanx. It permits flexion, extension, abduction, adduction, and limited circumduction.

**Synonyms:**

### **Metagenomic Sequencing**

Sequencing of nucleic acid recovered directly from a clinical or environmental specimen to identify microbial genetic material without requiring growth in culture. It can detect unusual or polymicrobial infections but is vulnerable to contamination and requires clinical interpretation.

**Synonyms:**

### **Metal Artifact**

Image degradation from metal implants. Reduced by metal artifact reduction sequences (MRI), iterative reconstruction (CT).

**Synonyms:**

### **Metaphyseal Corner Fractures**

Bucket-handle or corner fractures at the metaphysis of long bones, characteristic of child abuse. Caused by twisting or pulling forces on extremities. Most common in the knee, ankle, and elbow. Seen on skeletal survey; may not be visible initially. Highly specific for non-accidental trauma in infants.

**Synonyms:**

### **Metaphysis**

The region of a long bone between the epiphysis (end) and diaphysis (shaft), containing the epiphyseal growth plate (physis) in children—the zone of

---

active cartilage growth (endochondral ossification).

**Synonyms:**

### **Metaplasia**

A reversible adaptive change in which one differentiated adult cell type is replaced by another, representing the body's attempt to better withstand a chronic stress or irritation. The process involves reprogramming of tissue stem cells to differentiate along a different lineage that is more resilient to the new environment.

**Synonyms:**

### **Metastasectomy**

Surgical removal of one or more metastases, which may be curative in selected oligometastatic disease, e.g., colorectal liver and lung metastases and sarcoma pulmonary metastases.

**Synonyms:**

### **Metastasis**

Metastasis is spread of malignant cells from a primary tumor to noncontiguous tissues through lymphatic, blood, or body-cavity routes, forming secondary tumors. hematogenous, direct extension, transcoelomic. Common sites: lungs, liver, bone, brain. Distant metastasis indicates Stage IV disease.

**Synonyms:**

### **Metastasis of colorectal cancer**

Spread of colorectal malignancy to distant organs via lymphatic, hematogenous, or peritoneal routes, most commonly involving the liver, lungs, and peritoneum. The liver is the first site of metastasis due to portal venous drainage, and hepatic metastases may be resectable with curative intent.

**Synonyms:**

### **Metastasis-Free Survival**

The time from treatment until the development of distant metastasis or death; an important endpoint in adjuvant therapy trials.

**Synonyms:**

### **Metastatic adenocarcinoma**

An adenocarcinoma that has spread from its primary site to distant organs, commonly the liver, lungs, bones, or brain. The prognosis and treatment depend on the primary tumor origin and the extent of metastatic disease.

**Synonyms:**

### **Metastatic Calcification**

The deposition of calcium salts in otherwise normal tissues due to systemic hypercalcemia, where elevated serum calcium levels exceed the tissue ability to maintain calcium homeostasis.

**Synonyms:**

### **Metastatic Cascade**

Sequence of events in metastasis: local invasion, intravasation, circulation, extravasation, colonization. Many cells die during process.

**Synonyms:**

### **Metastatic colon cancer**

Advanced colonic malignancy that has spread beyond the bowel to distant sites, most commonly the liver, lungs, and peritoneum, via lymphatic and hematogenous dissemination. Staging uses CT of chest, abdomen, and pelvis, and PET-CT may identify occult metastases.

**Synonyms:**

### **Metastatic inguinal lymphadenopathy**

Enlargement of inguinal lymph nodes due to metastatic cancer cells, often from primary tumors of the lower extremities, pelvis, or anorectal region. It may indicate advanced disease requiring systemic therapy.

**Synonyms:**

### **Metastatic lung cancer**

Lung cancer that has spread beyond the lungs to other organs, such as the brain, bones, liver, or adrenal glands. It represents advanced stage disease with limited treatment options.

**Synonyms:**

---

## Metatarsals

Five long bones (I-V) forming the forefoot. Each has base, shaft, and head. First is shortest/thickest, bearing approximately one-third of forefoot load. Stress fractures commonly affect the second and third (march fractures). Morton's neuroma typically affects the nerve between 3rd/4th metatarsal heads.

**Synonyms:**

## Metered-Dose Inhaler

A pressurized inhaler delivering a metered dose of medication. Requires proper technique for effective delivery. Spacer devices improve drug delivery and reduce oropharyngeal deposition. Most common delivery device for asthma and COPD maintenance.

**Synonyms:**

## Metformin in Prediabetes

Metformin may reduce progression from prediabetes to type 2 diabetes, especially in people at high risk. Its use depends on age, body size, prior gestational diabetes, kidney function, other conditions, and patient preference; lifestyle intervention remains important.

**Synonyms:**

## Methacholine Challenge Test

A bronchoprovocation test used when asthma is suspected but routine spirometry is nondiagnostic. Inhaled methacholine may cause bronchoconstriction, and spirometry is repeated after increasing doses. The result must be interpreted with symptoms, treatment, and other test findings because the test is not specific for asthma.

**Synonyms:**

## Methanol Poisoning

Toxic ingestion or exposure to methanol, whose metabolites cause high-anion-gap metabolic acidosis and visual or neurologic injury. Treatment requires urgent toxicology consultation, antidotal fomepizole or selected ethanol therapy, correction of acidosis, and hemodialysis in severe cases.

**Synonyms:**

## Methemoglobinemia

Methemoglobinemia is a medical condition involving methemoglobinemia; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. delivery and causing functional anemia. Cyanosis, chocolate-brown blood, headache, dyspnea, neurologic symptoms, and cardiovascular compromise may occur depending on level and comorbidity.

**Synonyms:**

## Methicillin-resistant Staphylococcus aureus

Staphylococcus aureus resistant to beta-lactam antibiotics through acquisition of the mecA gene encoding penicillin-binding protein 2a (PBP2a). MRSA is a major cause of healthcare-associated and community-associated infections. Treatment options include vancomycin, daptomycin, linezolid, and trimethoprim-sulfamethoxazole.

**Synonyms:**

## Methotrexate in Dermatology

An immunomodulatory antimetabolite used in selected inflammatory and autoimmune skin diseases, including psoriasis, eczema, and some connective-tissue disorders. Treatment requires attention to liver disease, blood counts, infection risk, drug interactions, and strict pregnancy precautions.

**Synonyms:**

## Methylation

Addition of methyl group to DNA (cytosine) or histones. DNA methylation at CpG islands typically silences genes. Hypomethylation associated with cancer.

**Synonyms:**

## Methylene Blue

An oxidizing-reducing agent used primarily to treat clinically significant methemoglobinemia by facilitating conversion of methemoglobin to functional hemoglobin. It may be ineffective or hazardous in glucose-6-phosphate dehydrogenase deficiency and can interact with serotonergic drugs.

---

**Synonyms:**

### **Methylmalonic Acid Level**

A blood or urine measurement used to assess functional vitamin B12 status. Elevated methylmalonic acid supports vitamin B12 deficiency, particularly when the serum vitamin B12 concentration is borderline. Renal impairment can also increase the level and should be considered during interpretation.

**Synonyms:**

### **Metoclopramide**

A dopamine (D2) receptor antagonist and 5-HT3 antagonist used as a prokinetic antiemetic for gastroparesis, chemotherapy-induced and postoperative nausea, and GERD (facilitates gastric emptying).

**Synonyms:**

### **Metronidazole**

A nitroimidazole antibiotic and antiprotozoal agent that is selectively toxic to anaerobic organisms and certain parasites. The drug is activated by reduction of its nitro group within anaerobic cells, generating toxic free radicals that damage DNA.

**Synonyms:**

### **Metronidazole-associated encephalopathy**

A rare complication of prolonged or high-dose metronidazole therapy, causing cerebellar dysfunction (ataxia, dysarthria, nystagmus) and sometimes confusion or seizures. MRI may show T2-hyperintense lesions in the cerebellar dentate nuclei, corpus callosum splenium, and brainstem. Symptoms typically resolve with drug discontinuation.

**Synonyms:**

### **Metrorrhagia**

Uterine bleeding occurring at irregular times, including between expected menstrual periods. Causes include hormonal disorders, structural lesions, pregnancy-related conditions, medicines, and disease of the cervix or uterus; evaluation depends on age, pregnancy status, symptoms, and risk factors.

**Synonyms:**

### **MIBG Scan**

Nuclear medicine imaging using I-123 or In-111 MIBG. Detects pheochromocytoma, neuroblastoma.

**Synonyms:**

### **Micafungin**

An echinocandin antifungal agent used in the treatment and prophylaxis of invasive candidiasis and esophageal candidiasis. Micafungin inhibits beta-(1,3)-D-glucan synthase, disrupting fungal cell wall synthesis and leading to osmotic instability and cell death.

**Synonyms:**

### **Michaelis-Menten Kinetics**

The mathematical model describing the rate of enzyme-catalyzed reactions as a function of substrate concentration.

**Synonyms:**

### **Microalbuminuria**

Excretion of 30 to 300 mg of albumin daily undetectable by standard dipstick. Earliest marker of diabetic nephropathy and cardiovascular risk predictor. Detected by urine albumin-to-creatinine ratio on spot specimen. Normal less than 30 mg/g creatinine. Signals early glomerular damage in diabetes warranting RAAS blockade initiation.

**Synonyms:**

### **Microangiopathic hemolysis**

Red-cell fragmentation and intravascular hemolysis caused by passage through abnormal small vessels, producing schistocytes, elevated LDH, and reduced haptoglobin.

**Synonyms:**

### **Microarray**

Technology measuring expression of thousands of genes simultaneously or detecting copy number variations. Gene expression microarrays: compare expression patterns. SNP arrays: detect genetic variations. Comparative genomic hybridization (CGH): detect deletions/duplications.

**Synonyms:**

---

## Microbiome

The collection of microorganisms (bacteria, archaea, fungi, viruses—the microbiota) and their genetic material inhabiting a host's body surfaces, particularly the gastrointestinal tract.

**Synonyms:**

## Microcephaly

Microcephaly concerns microcephaly; its medical significance is established from the defining features, setting, associated findings, and clinical question. occipitofrontal circumference below the third percentile or more than two standard deviations below the mean. Causes include genetic disorders, congenital infections, brain injury, malnutrition, and impaired brain development.

**Synonyms:**

## Micrognathia

Micrognathia concerns micrognathia; its medical significance is established from the defining features, setting, associated findings, and clinical question. decreased size of the oral cavity. May be isolated or syndromic (Pierre Robin sequence, Treacher Collins, Nager syndrome, Stickler syndrome). Presents at birth with potential airway obstruction (glossoptosis) and feeding difficulties.

**Synonyms:**

## Micrograms

A unit of mass equal to one millionth of a gram, written as  $\mu\text{g}$ .

**Synonyms:**

## Micrometastasis

A small deposit of cancer cells that has spread from the primary tumor but is not detectable clinically or on standard imaging, e.g., isolated tumor cells in a sentinel lymph node; relevant to staging and prognosis.

**Synonyms:**

## Micromolar

A concentration unit equal to one millionth of a mole per liter, written as  $\mu\text{mol}/L$ .

**Synonyms:**

## Micronutrients

Vitamins and minerals required in small amounts for enzymatic, hormonal, structural, hematologic, neurologic, and immune functions. They include fat-soluble vitamins (A, D, E, and K), water-soluble vitamins, and essential minerals.

**Synonyms:**

## Microphthalmia

A congenitally small eye, ranging from mild (reduced axial length) to severe with structural anomalies. Associated with coloboma, congenital cataract, and genetic syndromes; can cause vision loss and requires optical correction, amblyopia therapy, and sometimes socket rehabilitation.

**Synonyms:**

## MicroRNA

Small non-coding RNA regulating gene expression. Post-transcriptional regulation.

**Synonyms:**

## Microsatellite Instability

A molecular pattern caused by deficient DNA mismatch-repair function, resulting in length changes in short repetitive DNA sequences. MSI-high tumors may have increased mutation burden and can be eligible for particular immunotherapies.

**Synonyms:**

## Microscope

Magnifies small structures. Types: light, electron, fluorescent. Essential for histology, hematology, microbiology.

**Synonyms:**

## Microscopic Colitis

Umbrella term encompassing both collagenous colitis and lymphocytic colitis which share the clinical presentation of chronic watery non-bloody diarrhea and the pathophysiological feature of colonic mucosal inflammation. Endoscopic appearance is typically normal necessitating random biopsies for

---

diagnosis.

**Synonyms:**

### **Microscopic Examination**

The pathologic evaluation of tissue or cells under the light or electron microscope, complementing the gross examination to form the complete morphologic diagnosis. Routine light microscopy uses hematoxylin and eosin sections to assess architecture, cellular morphology, mitotic activity, and relation to margins.

**Synonyms:**

### **Microscopic Polyangiitis**

A necrotizing vasculitis affecting small blood vessels (capillaries, venules, arterioles) with few or no immune deposits (pauci-immune). Part of the ANCA-associated vasculitis group. Strongly associated with MPO-ANCA (p-ANCA, 80%).

**Synonyms:**

### **Microwave Ablation**

A procedure that uses microwave energy to heat and destroy selected tissue, usually under imaging guidance.

**Synonyms:**

### **Micturition**

The process of urination, coordinated by the pontine micturition center, parasympathetic (pelvic nerve, S2-S4) contraction of the detrusor muscle, and relaxation of the internal (involuntary) and external (voluntary, pudendal nerve) urethral sphincters.

**Synonyms:**

### **Mid-Systolic Click**

A sharp, high-pitched sound occurring in mid-to-late systole, associated with mitral valve prolapse. The click represents sudden tensing of the elongated chordae tendineae as the prolapsing leaflet billows into the left atrium. It may be followed by a late systolic murmur of mitral regurgitation.

**Synonyms:**

### **Mid-Upper-Arm Circumference**

The circumference of the upper arm measured at the midpoint between the acromion and olecranon processes. It is a practical anthropometric measure of muscle and fat stores, particularly useful when body weight or height cannot be measured reliably.

**Synonyms:**

### **Midaxillary Line**

An imaginary vertical line on the side of the body passing through the apex of the axilla (armpit).

**Synonyms:**

### **Midbrain**

Most superior brainstem segment connecting pons to diencephalon. Contains cerebral peduncles (corticospinal/corticobulbar tracts), substantia nigra (dopaminergic neurons degenerated in Parkinson's), red nucleus (rubrospinal tract for coordination), and periaqueductal gray (pain modulation).

**Synonyms:**

### **Midclavicular Line**

An imaginary vertical line on the front of the body passing through the midpoint of the clavicle (collarbone).

**Synonyms:**

### **Middle Ear**

An air-filled space between the eardrum and inner ear that contains the malleus, incus, and stapes. These ossicles transmit sound vibrations to the inner ear, and the auditory tube helps equalize middle-ear pressure.

**Synonyms:**

### **Middle East Respiratory Syndrome**

A severe respiratory infection caused by Middle East respiratory syndrome coronavirus, usually acquired through close contact with infected camels or people. It can cause pneumonia, respiratory failure, and renal or multiorgan complications.

**Synonyms:**

---

## Middle Lobe Syndrome

Chronic or recurrent atelectasis and infection of the right middle lobe due to bronchial obstruction. The long, narrow right middle lobe bronchus is susceptible to compression by lymph nodes, tumors, or mucous plugging. It may be caused by bronchiectasis, malignancy, or granulomatous disease. Treatment depends on the underlying cause.

**Synonyms:**

## Midtrimester

The middle third of pregnancy, from 14 to 28 weeks gestation. The midtrimester is when many women feel their best: nausea and fatigue of the first trimester resolve, and the physical discomforts of the third trimester have not yet developed.

**Synonyms:**

## Migraine

Migraine is a neurologic disorder causing recurrent attacks of moderate or severe headache with nausea, light or sound sensitivity, and sometimes aura or focal neurologic symptoms. typically unilateral, pulsating headache lasting 4-72 hours, associated with nausea, vomiting, photophobia, and phonophobia.

**Synonyms:**

## Migraine With Aura

A primary headache disorder characterized by recurrent attacks of fully reversible visual, sensory, or speech symptoms that develop gradually over at least five minutes and last no more than sixty minutes, followed by headache with the characteristics of migraine.

**Synonyms:**

## Migraine Without Aura

A primary headache disorder characterized by recurrent attacks of moderate to severe, pulsating, unilateral headache lasting four to seventy-two hours, associated with nausea, vomiting, photophobia, and phonophobia.

**Synonyms:**

## Migrating Motor Complex

Cyclical patterns of intense gastrointestinal motility occurring during fasting (interdigestive period), sweeping residual food, bacteria, and debris from the stomach through the small intestine to the colon.

**Synonyms:**

## Mild Cognitive Impairment

A transitional cognitive state between normal aging and dementia, characterized by subjective cognitive complaints confirmed by objective cognitive impairment that is not severe enough to significantly interfere with daily activities.

**Synonyms:**

## Milia

Milia concerns milia; its medical significance is established from the defining features, setting, associated findings, and clinical question. They are common in newborns (neonatal milia) and adults (primary milia). Secondary milia occur after blistering injuries, dermabrasion, or laser therapy. Milia are asymptomatic and may resolve spontaneously.

**Synonyms:**

## Miliaria crystallina

A benign, asymptomatic eruption of small, clear, superficial vesicles caused by obstruction of eccrine sweat ducts in the stratum corneum, occurring in hot, humid environments or during high fevers. The vesicles resemble dewdrops on the skin and rupture easily, leaving fine scales.

**Synonyms:**

## Miliary TB

Hematogenous dissemination of *M. tuberculosis* causing innumerable 1-3 mm granulomas throughout lungs and other organs. CXR shows "millet seed" pattern. More common in immunocompromised patients.

**Synonyms:**

## Miliary Tuberculosis

Disseminated tuberculosis caused by hematogenous spread of *Mycobacterium tuberculosis*, producing

---

numerous tiny granulomatous lesions in the lungs and potentially multiple organs. Symptoms may include prolonged fever, weight loss, night sweats, cough, and organ-specific manifestations.

**Synonyms:**

### **Milk-Alkali Syndrome**

Hypercalcemia, metabolic alkalosis, and renal dysfunction caused by excessive intake of calcium and absorbable alkali. It may occur with high-dose calcium supplements or antacid use.

**Synonyms:**

### **Milliequivalent**

A chemical-equivalent unit used to express the amount of charged substances such as electrolytes.

**Synonyms:**

### **Millimolar**

A concentration unit equal to one thousandth of a mole per liter, written as mmol/L.

**Synonyms:**

### **Milrinone**

A phosphodiesterase-3 inhibitor with positive inotropic and vasodilatory (inodilator) actions, increasing cAMP in cardiac and vascular smooth muscle.

**Synonyms:**

### **Milroy Disease**

An inherited primary lymphedema caused most often by pathogenic variants affecting VEGFR3 signaling. It typically presents with chronic swelling of the lower limbs from birth or early infancy and may be associated with papillomatosis, hydrocele, or recurrent skin infection.

**Synonyms:**

### **Mindful Eating**

Paying attention to hunger cues, eating slowly, savoring food. May reduce overeating, improve digestion.

**Synonyms:**

### **Mineralocorticoid Receptor**

An intracellular steroid receptor activated primarily by aldosterone in the kidney, colon, sweat glands, and other tissues. Its activation increases sodium reabsorption and potassium and hydrogen secretion and contributes to blood-pressure regulation and tissue remodeling.

**Synonyms:**

### **Mineralocorticoid Receptor Antagonist**

A drug that blocks aldosterone receptors, promoting natriuresis while limiting potassium loss and adverse cardiac remodeling. Spironolactone and eplerenone improve outcomes in selected heart-failure patients; hyperkalemia and renal dysfunction require monitoring.

**Synonyms:**

### **Mini-Mental State Examination**

A brief structured cognitive screening instrument assessing orientation, registration, attention, calculation, recall, language, and visuospatial ability. Scores are affected by education, language, sensory impairment, culture, and delirium and do not establish a dementia diagnosis alone.

**Synonyms:**

### **Minimal Change Disease**

A cause of nephrotic syndrome, especially in children, in which the glomeruli appear nearly normal by light microscopy but podocyte foot processes are effaced on electron microscopy. It causes marked protein loss in the urine and edema.

**Synonyms:**

### **Minimal Residual Disease**

The small number of malignant cells that remain after treatment and are below detection by conventional clinical examination or routine microscopy. Sensitive flow-cytometric, molecular, or imaging methods may detect MRD and refine relapse-risk assessment.

**Synonyms:**

---

### **Minimum Alveolar Concentration**

The alveolar concentration of an inhaled anesthetic that prevents movement in half of people exposed to a standardized painful surgical stimulus. It is used to compare the potency of volatile anesthetics.

**Synonyms:**

### **Minimum Bactericidal Concentration**

The lowest concentration of an antimicrobial that kills a defined proportion of the original bacterial inoculum, commonly demonstrated by subculture without growth. MBC is distinct from MIC and is not routinely required for every infection.

**Synonyms:**

### **Minimum Effect Concentration**

The lowest concentration of a drug in the blood or at its site of action that produces a defined measurable effect.

**Synonyms:**

### **Minimum inhibitory concentration**

The lowest concentration of an antimicrobial that prevents visible growth of a microorganism under standardized laboratory conditions. It helps characterize susceptibility, but results must be interpreted with the organism, specimen, assay, and clinical context.

**Synonyms:**

### **Minimum Lethal Concentration**

The lowest concentration of a substance associated with death in a defined test population or experimental setting.

**Synonyms:**

### **Minute Ventilation**

The total volume of air breathed in one minute (tidal volume x respiratory rate). Normal is 6–8 L/min. Elevated in increased metabolic demand, pain, anxiety, and sepsis. Reduced in neuromuscular disease and sedation.

**Synonyms:**

### **Miosis**

Constriction of the pupil, produced mainly by parasympathetic activity through the oculomotor nerve and sphincter pupillae muscle. It may be physiologic or caused by medicines, toxins, neurologic disease, or ocular conditions.

**Synonyms:**

### **MIRD Schema**

Medical Internal Radiation Dose. Method for calculating radiation absorbed doses.

**Synonyms:**

### **Mirizzi Syndrome**

Condition where a gallstone impacted in the cystic duct or Hartmann pouch extrinsic compression of the common hepatic duct causing obstructive jaundice. Classified into four types based on the degree of erosion and fistula formation. Type one is extrinsic compression without fistula.

**Synonyms:**

### **Mirror Therapy**

Mirror reflection of unaffected limb movement creates visual illusion of affected limb moving. Reduces phantom limb pain, improves stroke recovery.

**Synonyms:**

### **Miscarriage**

Miscarriage is spontaneous loss of a pregnancy before fetal viability, with symptoms ranging from bleeding and cramping to passage of tissue or no symptoms on ultrasound. percent of clinically recognized pregnancies. The majority (80 percent) occur in the first trimester, with risk decreasing significantly after visualization of fetal cardiac activity.

**Synonyms:**

### **Mismatch Repair Deficiency**

Loss of DNA mismatch-repair function that produces microsatellite instability and a high tumor mutational burden. Seen in Lynch syndrome and some sporadic colorectal, endometrial, and other cancers, and associated with responsiveness to immune checkpoint inhibitors.

---

**Synonyms:**

### **Misoprostol (Cytotec)**

A synthetic prostaglandin analogue used for selected gynecologic and obstetric indications, including cervical ripening, labor induction, and medical management of some pregnancies. It can cause uterine contractions, bleeding, gastrointestinal effects, or uterine tachysystole; use depends on the clinical setting and gestational age.

**Synonyms:** Cytotec

### **Missense Variant**

A single-nucleotide substitution that changes one amino acid in a protein. Its clinical effect ranges from benign to pathogenic and must be assessed using molecular, functional, population, and clinical evidence.

**Synonyms:**

### **Mitochondria**

Double-membrane organelles known as the "powerhouse of the cell," generating ATP through oxidative phosphorylation. Outer membrane is permeable; inner membrane is highly folded (cristae) and contains the electron transport chain and ATP synthase.

**Synonyms:**

### **Mitochondrial Diabetes**

Diabetes caused by mutations in mitochondrial DNA particularly the m.3243A>G mutation in the MT-TL1 gene. Maternally inherited. Often associated with sensorineural hearing loss termed maternally inherited diabetes and deafness. Patients are typically lean with impaired insulin secretion. Diagnosis requires genetic testing.

**Synonyms:**

### **Mitochondrial Disease**

A group of genetic disorders caused by impaired mitochondrial energy production. Symptoms vary and may affect the brain, muscles, nerves, heart, eyes, or multiple organs; onset and severity can differ widely even within one family.

**Synonyms:**

### **Mitochondrial Inheritance**

Inheritance of mitochondrial DNA, which is transmitted predominantly through the egg and therefore usually from the mother. Examples include Leber hereditary optic neuropathy and MELAS. Heteroplasmy means that mutant and normal mitochondrial DNA coexist in a cell.

**Synonyms:**

### **Mitosis**

Cell division that produces two genetically similar daughter cells with the same chromosome number as the parent cell.

**Synonyms:**

### **Mitotic Figure**

A cell undergoing nuclear division that can be identified microscopically. Mitotic count contributes to assessment of proliferative activity and tumor grade, although counting method and area must be standardized.

**Synonyms:**

### **MitraClip**

A transcatheter device that creates a double orifice in the mitral valve by clipping the anterior and posterior leaflets together, reducing mitral regurgitation. It is indicated for patients with significant (3+ or 4+) mitral regurgitation who are at high risk for surgical mitral valve repair.

**Synonyms:**

### **Mitral Regurgitation**

Incomplete closure of the mitral valve allowing blood to flow backward from the left ventricle to the left atrium during systole. Causes include mitral valve prolapse, papillary muscle dysfunction, rheumatic disease, and ischemic heart disease. Murmur: pansystolic (holosystolic) blowing murmur at the apex radiating to the axilla.

**Synonyms:**

### **Mitral Stenosis**

Narrowing of the mitral valve opening, obstructing left atrial to left ventricular blood flow. Most com-

---

monly caused by rheumatic heart disease. Symptoms include dyspnea, fatigue, and atrial fibrillation. Murmur: low-pitched, rumbling mid-diastolic murmur at the apex with opening snap.

**Synonyms:**

### **Mitral Stenosis Murmur**

Low-pitched, rumbling mid-diastolic murmur at the apex, best heard with the bell of the stethoscope in the left lateral decubitus position. Accompanied by an opening snap (early diastolic high-pitched click) and loud S1 in pliable valves. Severe MS may show a diastolic murmur without a preceding S2 gap.

**Synonyms:**

### **Mitral Valve**

Left atrioventricular (bicuspid) valve with anterior and posterior cusps supported by chordae tendineae and papillary muscles. Anterior cusp is larger and proximate to the aortic valve. Mitral valve prolapse is the most common valvular abnormality. Mitral stenosis (most commonly rheumatic) and regurgitation are significant.

**Synonyms:**

### **Mitral Valve Prolapse**

A valvular heart disease where the mitral valve leaflets prolapse into the left atrium during systole. Most patients are asymptomatic; some develop palpitations, atypical chest pain, or dyspnea. Diagnosis by echocardiography. Complications include mitral regurgitation, infective endocarditis, and arrhythmias.

**Synonyms:**

### **Mitral-valve repair**

A surgical or transcatheter procedure to restore mitral valve competence without replacement, typically for regurgitation from prolapse, chordal rupture, or ischemic dysfunction. Repair preserves native valve tissue, maintains left ventricular function, and avoids lifelong anticoagulation required by mechanical prostheses.

**Synonyms:**

### **Mixed Connective Tissue Disease**

An overlap syndrome with features of systemic lupus erythematosus, systemic sclerosis, and polymyositis/dermatomyositis. Highly associated with anti-U1 RNP antibodies. Presents with Raynaud phenomenon (nearly universal), puffy hands, arthritis, myositis, esophageal dysmotility, and serositis. Renal disease is less common than in SLE.

**Synonyms:**

### **Mixed Hearing Loss**

A combination of both conductive and sensorineural hearing loss occurring in the same ear, resulting in a hearing deficit that involves impaired sound transmission through the outer or middle ear in addition to cochlear or neural dysfunction.

**Synonyms:**

### **Mixed Urinary Incontinence**

Involuntary leakage of urine, significantly affecting psychological, social, and physical well-being. See urinary incontinence.

**Synonyms:**

### **MMR Vaccine**

A live attenuated vaccine against measles, mumps, and rubella. It is given according to the immunization schedule and is generally avoided during pregnancy and in people with certain severe immune deficiencies.

**Synonyms:**

### **Mobile genetic elements**

Genetic elements that can move within and between genomes. These include plasmids, transposons, and integrons. Mobile genetic elements can carry antibiotic resistance genes and virulence factors. They facilitate horizontal gene transfer and contribute to the rapid evolution of bacteria.

**Synonyms:**

### **Mobile Health (mHealth)**

Use of mobile devices for health. Examples: health apps, text message reminders, wearable devices.

**Synonyms:** mHealth

---

## Modafinil

A wakefulness-promoting agent (mechanism not fully understood, likely dopaminergic) used for narcolepsy, obstructive sleep apnea residual sleepiness, and shift work sleep disorder; used off-label for fatigue and ADHD. Less abuse potential and fewer sympathomimetic effects than amphetamines.

**Synonyms:**

## Modified Biophysical Profile (Modified BPP)

A simplified antepartum test combining the non-stress test (NST) with the amniotic fluid index (AFI). The NST assesses acute fetal status (heart rate reactivity over 20-40 minutes) and the AFI assesses chronic uteroplacental function (oligohydramnios suggests chronic hypoxia or placental insufficiency).

**Synonyms:** Modified BPP

## Mohs Surgery

A micrographically controlled technique in which skin cancer is excised in thin layers and examined margin-by-margin, achieving high cure rates for basal cell and squamous cell carcinoma while sparing normal tissue.

**Synonyms:**

## Molar Pregnancy

A type of gestational trophoblastic disease characterized by abnormal proliferation of trophoblastic tissue. See Hydatidiform Mole.

**Synonyms:**

## Mole

Nevus: a benign proliferation of melanocytes, the most common skin lesion; also used for other nevi (moles are melanocytic nevi). Types: junctional (flat, brown—childhood), compound (slightly raised), intradermal (dome-shaped, flesh/pigmented).

**Synonyms:**

## Molecular Pathology

The investigation of disease using nucleic-acid, ge-

nomic, epigenomic, or molecular protein alterations in cells and tissues. It may establish diagnosis, estimate prognosis, identify inherited risk, or select targeted therapy.

**Synonyms:**

## Molecular Testing

Analysis of DNA, RNA, or other molecular features to identify variants, fusions, expression patterns, or infectious agents for diagnosis, prognosis, or treatment selection.

**Synonyms:**

## Molecular Weight

Mass of molecule. Important for dosing, toxicity calculations.

**Synonyms:**

## Molluscum Contagiosum

A viral skin infection caused by a poxvirus, presenting as firm, dome-shaped, umbilicated papules with central dimpling, 2 to 5 mm in diameter. It is transmitted by direct skin contact, autoinoculation, and sexual contact in adults. Immunocompetent hosts clear lesions spontaneously within 6 to 12 months.

**Synonyms:**

## Molybdenum-99

Parent isotope of Tc-99m, half-life 66 hours. Produced in nuclear reactors. Generator systems provide Tc-99m for 1 week.

**Synonyms:**

## Mondor's disease

Superficial thrombophlebitis of the anterior chest wall veins, typically the lateral thoracic, thoracoepigastric, or superior epigastric veins. Presents as a tender, cord-like subcutaneous structure with skin retraction. Usually self-limited; associated with breast surgery, trauma, or hypercoagulable states.

**Synonyms:**

## Monitored Anesthesia Care

A distinct service where an anesthesia professional provides premedication, administration of analgesics

---

and/or sedatives, continuous monitoring of the patient's cardiorespiratory status, and intervention for any emergent or unavoidable complications that may arise during a diagnostic or therapeutic procedure.

**Synonyms:**

### Monitoring Test

Test to track disease progression or treatment response.

**Synonyms:**

### Monoamine Oxidase Inhibitors

Antidepressants that inhibit monoamine oxidase, the enzyme responsible for breaking down serotonin, norepinephrine, and dopamine. MAOIs include phenelzine, tranylcypromine, isocarboxazid, and selegiline (transdermal). They are effective for atypical depression and treatment-resistant depression.

**Synonyms:**

### Monoclonal Antibody

An antibody produced by a single cloned B-cell line, specific for one epitope, generated by hybridoma technology or recombinant methods (name suffix -mab).

**Synonyms:**

### Monocyte

A circulating leukocyte (2-8 percent) that differentiates into macrophages and dendritic cells in tissues. Monocytes phagocytose pathogens, present antigens, and secrete cytokines (TNF, IL-1, IL-6); participate in innate immunity, inflammation, and tissue repair. Subsets differ in function (classical, nonclassical, intermediate).

**Synonyms:**

### Mononucleosis

Mononucleosis is a medical condition involving mononucleosis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. adolescents and young adults. Classic triad: fever, pharyngitis/exudative tonsil-

litis, and cervical lymphadenopathy. Associated with splenomegaly, fatigue, and atypical lymphocytosis. Diagnosis: positive heterophile antibody (Monospot) and EBV serology.

**Synonyms:**

### Monosodium urate

The crystalline salt that precipitates in tissues when serum uric acid levels exceed the saturation point, forming needle-shaped, negatively birefringent crystals under polarized light microscopy. It is the pathological hallmark of gout, depositing in joints, soft tissues, and kidneys.

**Synonyms:**

### Monosomy

Presence of one copy of a chromosome instead of the usual two. Complete autosomal monosomies are generally not compatible with life; monosomy X and some mosaic or structural forms can survive and have variable features.

**Synonyms:**

### Monospot (EBV Heterophile Antibody)

A rapid blood test that detects heterophile antibodies associated with infectious mononucleosis. It may be negative early in illness or in young children and does not directly detect Epstein-Barr virus; specific antibody testing may be needed.

**Synonyms:** EBV Heterophile Antibody

### Monounsaturated Fat

A fat whose fatty acids contain one carbon-carbon double bond. It occurs in foods such as olive oil, avocados, nuts, and some seeds.

**Synonyms:**

### Montevideo Units

A quantitative measure of uterine contraction intensity, calculated by summing the peak contraction pressures (in mm Hg) minus the resting tone for each contraction in a 10-minute window. Adequate labor:  $\geq 200$  MVU (spontaneous) or  $\geq 250$  MVU (augmented). Measured with an intrauterine pressure catheter (IUPC).

---

**Synonyms:**

### Montgomery Tubercles

Small, raised sebaceous glands visible on the areola of the breast during pregnancy and lactation. They appear as small bumps surrounding the nipple and secrete an oily substance that lubricates the nipple and areola, protecting against infection. Their prominence increases during pregnancy under hormonal influence.

**Synonyms:**

### Montreal Cognitive Assessment

A brief cognitive screening instrument with greater emphasis on executive function, visuospatial ability, attention, memory, language, and orientation than many shorter screens. Interpretation requires consideration of education, language, sensory deficits, and acute illness.

**Synonyms:**

### Mood Stabilizers

Medications used to treat mood episodes in bipolar disorder and prevent recurrence. The primary mood stabilizers are lithium, valproate, carbamazepine, and lamotrigine. Each has a different mechanism and side effect profile. Lithium is the only agent with demonstrated anti-suicide properties.

**Synonyms:**

### Morbid Obesity

Severe obesity defined clinically as BMI  $\geq 40$  kg/m<sup>2</sup> or BMI  $\geq 35$  kg/m<sup>2</sup> with obesity-related comorbidities (type 2 diabetes, hypertension, obstructive sleep apnoea, non-alcoholic fatty liver disease, osteoarthritis, cardiovascular disease).

**Synonyms:**

### Morbidity

Illness, disease, or disability in an individual or population. Morbidity measures may describe prevalence, incidence, complications, or functional effects.

**Synonyms:**

### Morgagni Hernia

A congenital diaphragmatic hernia occurring through the anterior retrosternal foramen of Morgagni, resulting from incomplete fusion of parts of the diaphragm. Abdominal contents may move into the chest and cause respiratory or gastrointestinal symptoms.

**Synonyms:**

### Morning Sickness

Nausea and vomiting of pregnancy (NVP): nausea (and sometimes vomiting) commonly in the first trimester (6-12 weeks), typically resolving by 14-16 weeks; multifactorial (hCG, estrogen, progesterone, odor sensitivity).

**Synonyms:**

### Moro Reflex

A primitive reflex present from birth to 3-6 months, elicited by suddenly startling the infant (loud noise, head drop). The infant extends both arms outward with fingers spread, then draws arms inward as if embracing. Absence at birth suggests central nervous system injury or brachial plexus palsy.

**Synonyms:**

### Mortality

Death rate in population. Elderly mortality: higher rates, common causes: cardiovascular disease, cancer, dementia, respiratory disease, fall-related injuries. Life expectancy varies by sex, race, socioeconomic status.

**Synonyms:**

### Mortality Rate

Deaths from disease in population. Crude: total deaths / total population. Specific: disease-specific deaths / population at risk.

**Synonyms:**

### Morton Neuroma

A perineural fibrosis of the plantar digital nerve, most commonly between the third and fourth metatarsal heads. It presents as burning pain, numbness, and a feeling of walking on a pebble. It is not

---

a true neuroma but a mechanical entrapment neuropathy.

**Synonyms:**

### **Mosaicism**

Mosaicism concerns mosaicism; its medical significance is established from the defining features, setting, associated findings, and clinical question. somatic (affecting body cells) or germline (affecting gametes). Origin: post-zygotic mutation.

**Synonyms:**

### **Motion Analysis**

Assessment of movement patterns. 3D gait analysis, video analysis. Identifies abnormalities, guides treatment.

**Synonyms:**

### **Motion Artifact**

Image distortion or blurring caused by movement of the patient, organs, or equipment during image acquisition.

**Synonyms:**

### **Motion Correction**

Correction for patient motion during acquisition. Respiratory gating, navigation.

**Synonyms:**

### **Motion Sickness**

Nausea, dizziness, sweating, or vomiting caused by sensory mismatch during travel or other motion. It can occur in cars, boats, aircraft, amusement rides, or virtual-reality environments and usually improves when motion stops. Severe or persistent symptoms require assessment for other causes.

**Synonyms:**

### **Motivational Interviewing**

A client-centered, directive counseling method for enhancing intrinsic motivation to change by exploring and resolving ambivalence. Developed by Miller and Rollnick, it uses the spirit of partnership, acceptance, compassion, and evocation. Core skills include open-ended questions, affirmations, reflec-

tions, and summaries.

**Synonyms:**

### **Motor Cortex**

The frontal-lobe regions that plan and initiate voluntary movement. The primary motor cortex lies in the precentral gyrus and controls the opposite side of the body in an orderly somatotopic map.

**Synonyms:**

### **Motor Learning**

A relatively lasting change in the ability to perform a motor skill resulting from practice, experience, feedback, and adaptation. Rehabilitation uses task-specific repetition and meaningful practice to promote motor learning.

**Synonyms:**

### **Motor Unit**

A single alpha motor neuron and all the skeletal muscle fibers it innervates. The number of muscle fibers per motor unit determines precision of control: small motor units (few fibers, e.g., extraocular and hand muscles) provide fine movement; large motor units (hundreds to thousands of fibers, e.g., gastrocnemius) provide gross power.

**Synonyms:**

### **Mouth**

The oral cavity that serves as the entry point of the digestive tract, used for eating, breathing, and speaking.

**Synonyms:**

### **Mouth Ulcers**

Open sores affecting the oral mucosa, commonly caused by aphthous ulcers, trauma, infection, irritation, or systemic inflammatory disease. Most resolve within two weeks; persistent, recurrent, unusually large, or indurated ulcers require evaluation.

**Synonyms:**

### **Mouthwash**

A liquid rinsed around the mouth and then expelled to freshen breath, deliver an active ingredient, or

---

reduce selected oral microorganisms.

**Synonyms:**

### **Movement Disorder**

A neurologic condition causing excessive, reduced, or otherwise abnormal movement. Hyperkinetic disorders include tremor, dystonia, chorea, myoclonus, tics, and dyskinesia; hypokinetic disorders include bradykinesia and parkinsonism.

**Synonyms:**

### **Moyamoya Disease**

A progressive occlusive arteriopathy of the terminal internal carotid arteries and their proximal branches, with development of fragile collateral vessels at the brain base. It can cause transient ischemic attacks, strokes, seizures, headaches, or cognitive impairment.

**Synonyms:**

### **Mpox**

Mpox is a zoonotic infection caused by monkeypox virus, producing fever, lymph-node enlargement, and a characteristic rash or lesions that can occur on skin, mouth, or genital areas. nodes, and a distinctive rash that may include deep-seated vesicles or pustules.

**Synonyms:**

### **Mpox (monkeypox)**

A zoonotic viral disease caused by the monkeypox virus, an orthopoxvirus in the same genus as smallpox (variola) and vaccinia. The virus has two clades: clade I (formerly Congo Basin, Central African) with higher virulence and mortality (up to 10 percent), and clade II (formerly West African) with lower mortality (less than 1 percent).

**Synonyms:** monkeypox

### **MR Angiography**

Vascular imaging using MRI without ionizing radiation. Time-of-flight (TOF) or contrast-enhanced (CE-MRA). Used for cerebral aneurysms, renal artery stenosis, peripheral arterial disease.

**Synonyms:**

### **MR Enterography**

MRI of the small bowel after oral contrast administration. Superior soft tissue contrast for evaluating Crohn disease activity, fistulas, and abscesses without ionizing radiation. Demonstrates mural thickening, edema, enhancement patterns, and extraintestinal complications. Diffusion-weighted imaging helps assess disease activity.

**Synonyms:**

### **MR Neurography**

Magnetic resonance imaging optimized to show peripheral nerves and abnormalities such as swelling, compression, or injury.

**Synonyms:**

### **MRCP (Magnetic Resonance Cholangiopancreatography)**

Non-invasive MRI of the biliary and pancreatic ducts using heavily T2-weighted sequences that highlight static fluid. Used for: choledocholithiasis (CBD stones), biliary strictures, primary sclerosing cholangitis, pancreatic duct anatomy, and congenital biliary anomalies.

**Synonyms:** Magnetic Resonance Cholangiopancreatography

### **MRI**

MRI examines mri; interpretation depends on the specimen or body region, test method, reference range, and clinical question. images of body tissues.

**Synonyms:**

### **MRI (Magnetic Resonance Imaging)**

Imaging using strong magnetic fields and radiofrequency pulses to generate detailed cross-sectional images. No ionizing radiation. Superior soft-tissue contrast compared to CT.

**Synonyms:** Magnetic Resonance Imaging

### **MRI Brain**

Excellent for brain pathology: tumors, stroke, demyelination, infection, degeneration. Sequences: T1, T2, FLAIR, DWI, SWI, contrast-enhanced. DWI detects acute ischemia within minutes.

---

**Synonyms:**

### **MRI Contrast**

A contrast agent administered during magnetic resonance imaging to improve visibility of selected tissues or abnormalities.

**Synonyms:**

### **MRI Joint**

Evaluation of musculoskeletal structures: cartilage, ligaments, tendons, menisci, labrum. Knee: ACL, meniscus tears. Shoulder: rotator cuff, labrum. Hip: labral tears, FAI.

**Synonyms:**

### **MRI Sequences**

T1-weighted: anatomy, fat bright. T2-weighted: pathology, fluid bright. FLAIR: suppresses CSF, lesions bright. DWI: restricted diffusion bright (acute stroke, abscess). STIR: fat suppression, fluid bright. Post-contrast T1: enhancement bright.

**Synonyms:**

### **mRNA Vaccine**

A vaccine delivering messenger RNA encoding a pathogen antigen that host cells translate into protein, triggering an immune response. Approved for COVID-19 (Pfizer-BioNTech, Moderna) and RSV; under study for influenza, cancer, and other infections.

**Synonyms:**

### **MRSA**

Methicillin-resistant *Staphylococcus aureus*, resistant to beta-lactam antibiotics through acquisition of the *mecA* gene encoding PBP2a. MRSA is a major cause of healthcare-associated and community-associated infections. Treatment options include vancomycin, daptomycin, and linezolid.

**Synonyms:**

### **MRSA decolonization**

Measures intended to reduce MRSA carriage on the skin or in the nose. Protocols may include topical agents and antiseptic bathing, but the indication,

regimen, and duration depend on the person's risk, infection history, setting, and local guidance.

**Synonyms:**

### **MRV (Magnetic Resonance Venography)**

MRI technique to visualize veins, using time-of-flight (TOF) or contrast-enhanced sequences. Indications: cerebral venous sinus thrombosis, dural sinus stenosis, abdominal/pelvic venous thrombosis, portal vein thrombosis, and renal vein thrombosis. Differentiates acute vs. chronic thrombus.

**Synonyms:** Magnetic Resonance Venography

### **mTOR**

Mammalian target of rapamycin. Controls cell growth, proliferation. Inhibited by rapamycin.

**Synonyms:**

### **Mucocele**

Mucus extravasation cyst of minor salivary gland. Lower lip most common. Treatment: excision.

**Synonyms:**

### **Mucolytic Therapy**

Medications that reduce mucus viscosity and elasticity, facilitating clearance. N-acetylcysteine (NAC) breaks disulfide bonds in mucus glycoproteins. Dornase alfa (Pulmozyme) cleaves extracellular DNA in CF sputum. Hypertonic saline aerosol draws water into the airway surface liquid.

**Synonyms:**

### **Mucormycosis**

Mucormycosis is an invasive infection by Mucorales fungi, typically affecting immunocompromised people and causing rapidly destructive sinus, orbital, pulmonary, cutaneous, or disseminated disease. *Mucor*, and *Rhizomucor* species. The infection primarily affects immunocompromised patients, particularly those with uncontrolled diabetes mellitus and hematologic malignancies. The fungi invade blood vessels causing thrombosis and tissue infarction.

**Synonyms:**

---

### **Mucosal Irritation**

Chemical injury to mucous membranes. Eyes, nose, throat, GI tract. Treatment: irrigation, supportive care.

**Synonyms:**

### **Mucositis**

Inflammation and ulceration of the oral or gastrointestinal mucosa caused by chemotherapy or radiation, causing pain, dysphagia, and poor intake and predisposing to local infection.

**Synonyms:**

### **Mucus Plugging**

Accumulation of thick, tenacious mucus within airways causing obstruction. It is common in asthma, CF, bronchiectasis, and chronic bronchitis. It impairs gas exchange, promotes infection, and causes atelectasis. Treatment includes airway clearance techniques, mucolytics, and bronchodilators.

**Synonyms:**

### **Muenke Syndrome**

A craniosynostosis syndrome caused by a pathogenic FGFR3 variant. Premature fusion of one or more skull sutures may produce an abnormal head shape and can be accompanied by developmental, hearing, limb, or neurological findings.

**Synonyms:**

### **MUGA Scan (Multigated Acquisition Scan)**

ECG-gated radionuclide imaging using technetium-labeled red blood cells to measure ventricular ejection fraction and wall motion. It can be used when reproducible ejection-fraction measurement is needed, although echocardiography and cardiac MRI are also important alternatives.

**Synonyms:** Multigated Acquisition Scan

### **Multicystic Dysplastic Kidney**

A congenital renal anomaly where one or both kidneys are replaced by multiple non-communicating cysts of varying sizes, with no functioning renal parenchyma. The most common cause of an ab-

dominal mass in a newborn (unilateral). The ureter is typically atretic. The contralateral kidney may have VUR (20%) or UPJ obstruction (10%).

**Synonyms:**

### **Multidisciplinary Disaster Victim Identification**

The coordinated process of identifying victims of mass-fatality incidents (natural disasters, transport crashes, terrorist attacks) using multiple disciplines: fingerprinting, dental records, DNA profiling, forensic anthropology/radiology, and personal effects, with ante-mortem data collection and comparison.

**Synonyms:**

### **Multidisciplinary Team**

Rehabilitation team includes: physiatrist, physical therapist, occupational therapist, speech-language pathologist, psychologist, social worker, case manager, nursing, recreation therapist.

**Synonyms:**

### **Multidrug-Resistant TB**

TB resistant to at least isoniazid and rifampin. Requires second-line drugs for 18–24 months. Worse outcomes and higher mortality than drug-susceptible TB.

**Synonyms:**

### **Multifocal Atrial Tachycardia**

An atrial tachyarrhythmia with at least three distinct P-wave morphologies, irregular rhythm, and a rate above 100 beats per minute. It is strongly associated with severe pulmonary disease, hypoxia, and metabolic stress.

**Synonyms:**

### **Multimodal Analgesia**

Use of analgesic techniques with different mechanisms to improve pain control while reducing reliance on any single drug, especially opioids. Components may include acetaminophen, nonsteroidal anti-inflammatory drugs, regional anesthesia, local anesthetics, and selected adjuvants.

**Synonyms:**

---

## Multimorbidity

The coexistence of two or more chronic health conditions in the same person, without requiring one to be considered the primary disease. It complicates treatment, increases polypharmacy risk, and requires coordinated patient-centered care.

**Synonyms:**

## Multiparametric MRI of the Prostate

MRI protocol combining T2-weighted, diffusion-weighted, and dynamic contrast-enhanced sequences to detect and characterize clinically significant prostate cancer. Findings are commonly reported using the PI-RADS system.

**Synonyms:**

## Multiple bacterial abscesses

Numerous circumscribed collections of pus within an organ or tissue, caused by hematogenous seeding or direct extension of bacterial infection. They appear as multiple, low-attenuation lesions on imaging, often with peripheral enhancement. Common sites include the liver, brain, and kidneys.

**Synonyms:**

## Multiple biliary hamartomas

Benign, congenital malformations of the intrahepatic bile ducts appearing as multiple, small, well-defined cystic lesions scattered throughout the liver parenchyma on imaging. They are typically asymptomatic and discovered incidentally. They must be distinguished from metastatic disease and Caroli disease.

**Synonyms:**

## Multiple Endocrine Neoplasia Type 1

An autosomal dominant tumor syndrome caused by MEN1 gene mutation (menin).

**Synonyms:**

## Multiple Endocrine Neoplasia Type 2

An inherited tumor syndrome caused by pathogenic variants in the RET gene. Type 2A is associated with medullary thyroid carcinoma, pheochromocytoma, and hyperparathyroidism. Type 2B is associ-

ated with medullary thyroid carcinoma, pheochromocytoma, mucosal neuromas, and a marfanoid habitus.

**Synonyms:**

## Multiple endocrine neoplasia type 2B

An inherited RET-associated syndrome characterized by medullary thyroid carcinoma, pheochromocytoma, mucosal neuromas, and a marfanoid habitus. The thyroid-cancer risk is high and requires early specialist genetic and surgical assessment.

**Synonyms:**

## Multiple Myeloma

A cancer of plasma cells that usually develops in the bone marrow and often produces a monoclonal immunoglobulin. It can cause bone lesions, anemia, kidney dysfunction, high calcium, infection, or other organ damage.

**Synonyms:**

## Multiple Pregnancy

Gestation with more than one fetus: twins (most common), triplets, higher order. Types: dizygotic (two eggs, two placentas—fraternal, more common, familial and increased with IVF) vs. monozygotic (one egg split—identical, sharing determined by timing: dichorionic-diamniotic, monochorionic-diamniotic, monoamniotic, conjoined).

**Synonyms:**

## Multiple Sclerosis

A chronic autoimmune demyelinating disease of the central nervous system, most commonly presenting in young adults. Characterized by relapsing-remitting episodes of neurological dysfunction (optic neuritis, transverse myelitis, brainstem syndromes). Diagnosis: McDonald criteria with MRI dissemination in space and time.

**Synonyms:**

## Multiple System Atrophy

A progressive, fatal neurodegenerative disorder characterized by varying combinations of autonomic failure, cerebellar ataxia, parkinsonism, and pyramidal

---

signs.

**Synonyms:**

### **Multiplex PCR (BioFire, FilmArray)**

A molecular test that detects genetic material from multiple organisms in one clinical sample. Different panels are designed for respiratory, gastrointestinal, bloodstream, or other specimens. Results require interpretation with the symptoms and may detect colonization or nonviable organisms as well as active infection.

**Synonyms:** BioFire, FilmArray

### **Mummification**

Postmortem alteration occurring in hot, dry, arid, ventilated environments where rapid desiccation of tissues occurs before putrefaction can proceed, resulting in dry, leathery, dark brown skin clinging to underlying skeleton.

**Synonyms:**

### **Mumps**

Mumps is a contagious paramyxovirus infection causing painful salivary-gland swelling and fever, with possible meningitis, orchitis, pancreatitis, or hearing complications. include orchitis (rarely causing infertility), meningitis, pancreatitis, and sensorineural hearing loss. Prevention by MMR vaccination. Outbreaks occur in unvaccinated populations. Diagnosis by serology or RT-PCR from saliva.

**Synonyms:**

### **Mumps virus**

A paramyxovirus that causes mumps, a contagious respiratory illness. The virus is transmitted by respiratory droplets. Symptoms include fever, headache, and parotitis. Complications include orchitis, oophoritis, meningitis, and deafness. Diagnosis involves serology and PCR. Treatment is supportive.

**Synonyms:**

### **Mural Thrombus**

A mural thrombus is a blood clot that forms on

the wall of a heart chamber or large blood vessel, typically in areas of damaged endothelium, stasis, or turbulent flow.

**Synonyms:**

### **Murmur**

An extra or unusual heart sound caused by turbulent blood flow. Murmurs are described by timing, location, intensity, quality, radiation, and response to position; their significance ranges from innocent flow sounds to valve or structural disease.

**Synonyms:**

### **Murmur Classification**

Heart murmurs are classified by timing, grade, shape, location, radiation, and pitch. Timing: systolic (between S1 and S2), diastolic (between S2 and S1), or continuous. Grade: I (barely audible) to VI (heard without stethoscope). Shape: crescendo, decrescendo, or plateau.

**Synonyms:**

### **Muscle**

A specialized contractile tissue responsible for movement, posture, and heat production.

**Synonyms:**

### **Muscle Atrophy**

Loss or wasting of muscle tissue caused by disuse, nerve injury, inflammation, malnutrition, or systemic disease. It may lead to weakness and reduced function; treatment focuses on the cause, nutrition, and appropriately supervised rehabilitation.

**Synonyms:**

### **Muscle Contraction**

The shortening or tension generation of muscle produced by the interaction of actin and myosin myofilaments. In skeletal and cardiac muscle, contraction follows excitation-contraction coupling: calcium binds troponin, tropomyosin moves aside, and myosin cross-bridges cycle against actin (sliding filament mechanism) using ATP.

**Synonyms:**

---

### **Muscle Pain (Myalgia)**

Myalgia—muscle pain—is a common symptom arising from skeletal muscle injury, inflammation, overuse, infection, or systemic disease.

**Synonyms:** Myalgia

### **Muscle Tissue**

A highly specialized tissue capable of contracting to produce body movement, posture, and heat.

**Synonyms:**

### **Muscle Weakness**

Reduced ability to generate force with one or more muscles. Causes include nerve or muscle disease, pain, inactivity, medicines, metabolic disorders, and aging.

**Synonyms:**

### **Muscular Dystrophy**

A group of inherited disorders characterized by progressive skeletal-muscle weakness and degeneration. The pattern, age of onset, and complications vary by genetic type; some forms also affect the heart, respiratory muscles, or other organs.

**Synonyms:**

### **Musculocutaneous Nerve**

From lateral cord (C5–C7), piercing coracobrachialis, running between biceps and brachialis to supply these muscles and lateral forearm skin (lateral antebrachial cutaneous nerve). Sole motor supply to the anterior arm compartment. Injury causes weakness of elbow flexion/forearm supination with lateral forearm sensation loss.

**Synonyms:**

### **Musculoskeletal Pain**

Pain arising from muscles, bones, joints, ligaments, tendons, or related soft tissues. Common causes include injury, overuse, arthritis, and inflammation; persistent pain, weakness, swelling, or neurologic symptoms should be assessed.

**Synonyms:**

### **Music Therapy**

Use of music for therapeutic purposes. Pain reduction, emotional expression, cognitive stimulation.

**Synonyms:**

### **Mutagen**

A chemical, physical agent, or biological factor capable of causing a genetic mutation. Mutagenicity does not by itself prove that an agent causes cancer.

**Synonyms:**

### **Mutation**

A heritable or acquired alteration in the DNA sequence. Variants may be single-nucleotide substitutions, insertions, deletions, copy-number changes, or larger rearrangements and may be benign, pathogenic, or of uncertain significance.

**Synonyms:**

### **Mutation Rate**

Frequency of new mutations per generation or per base pair per replication. Varies by gene, genomic region, organism. High mutation rate in repetitive sequences.

**Synonyms:**

### **Myalgic Encephalomyelitis**

A complex illness characterized by substantial reduction in activity, post-exertional malaise, and unrefreshing sleep, often with cognitive or autonomic symptoms.

**Synonyms:**

### **Myalgic Encephalomyelitis/Chronic Fatigue Syndrome**

A complex illness characterized by substantial reduction in activity, post-exertional malaise, unrefreshing sleep, and cognitive or autonomic symptoms. Management is individualized and focuses on pacing, symptom relief, and treatment of coexisting conditions.

**Synonyms:**

### **Myasthenia Gravis**

An autoimmune disorder of neuromuscular transmis-

---

sion causing fluctuating, fatigable muscle weakness. It may affect the eyes, facial and swallowing muscles, limbs, or breathing muscles; antibodies and other tests help classify the disease.

**Synonyms:**

### **Myasthenic (Lambert-Eaton) syndrome**

An autoimmune presynaptic neuromuscular-junction disorder caused by antibodies against voltage-gated calcium channels, producing proximal weakness and autonomic symptoms.

**Synonyms:** Lambert-Eaton

### **Mycobacterium abscessus**

A rapidly growing nontuberculous mycobacterium that can cause pulmonary, skin, and soft-tissue infections and is often difficult to treat because of multidrug resistance.

**Synonyms:**

### **Mycobacterium avium complex**

A group of nontuberculous mycobacteria that can cause chronic pulmonary disease or disseminated infection, particularly in people with impaired immunity. Treatment depends on the species, site, severity, susceptibility, and patient factors.

**Synonyms:**

### **Mycobacterium leprae**

An acid-fast bacillus that causes leprosy (Hansen's disease), a chronic infection affecting the skin and peripheral nerves. The organism is transmitted through respiratory droplets, though the exact mechanism is not fully understood. The incubation period is long (2-5 years).

**Synonyms:**

### **Mycobacterium marinum**

A nontuberculous mycobacterium associated with fish tanks and aquatic exposure that can cause chronic skin and soft-tissue infection.

**Synonyms:**

### **Mycobacterium tuberculosis**

An acid-fast bacillus that causes tuberculosis, a

chronic respiratory infection. The organism is transmitted by respiratory droplets and primarily affects the lungs but can disseminate to other organs. Latent TB infection is asymptomatic and non-transmissible. Active TB presents with cough, haemoptysis, fever, and weight loss.

**Synonyms:**

### **Mycology**

The branch of microbiology that studies fungi, including yeasts, moulds, and mushrooms. Medical mycology focuses on fungal pathogens that cause disease in humans. Fungal infections (mycoses) are classified as superficial, cutaneous, subcutaneous, or systemic.

**Synonyms:**

### **Mycoplasma genitalium**

A sexually transmitted bacterium that can cause urethritis, cervicitis, pelvic inflammatory disease, and, less commonly, proctitis. Many infections are asymptomatic. Diagnosis is usually by a nucleic acid amplification test, and macrolide resistance is common, so treatment should follow current susceptibility-informed guidance.

**Synonyms:**

### **Mycoplasma Pneumonia**

Atypical pneumonia most common in ages 5–35. Dry cough, low-grade fever, headache. Patchy infiltrates on CXR disproportionate to symptoms (“walking pneumonia”).

**Synonyms:**

### **Mycoplasma pneumoniae-associated mucositis**

Inflammatory lesions of the oral, ocular, or genital mucosa occurring as an extrapulmonary manifestation of *Mycoplasma pneumoniae* infection, often presenting with target-like skin lesions.

**Synonyms:**

### **Mycosis Fungoides**

The most common cutaneous T-cell lymphoma, presenting with progressive patches, plaques, and tu-

---

mors on the skin with an indolent course. Staging and therapy depend on skin involvement and extra-cutaneous spread.

**Synonyms:**

### Mydriasis

Dilation of the pupil, produced mainly by sympathetic activity through the dilator pupillae muscle or by reduced parasympathetic activity. Causes include darkness, medicines, toxins, neurologic disease, and ocular injury.

**Synonyms:**

### Myelin

Myelin is a medical condition involving myelin; causes, affected organs, severity, complications, and treatment are determined by clinical assessment. and speeding up electrical signal transmission.

**Synonyms:**

### Myelin Sheath

The lipid-rich insulating layer around axons formed by Schwann cells (peripheral nervous system) and oligodendrocytes (central nervous system), which wrap the axon in concentric membrane layers.

**Synonyms:**

### Myelodysplastic Syndrome

MDS: a group of clonal stem cell disorders characterized by ineffective hematopoiesis, cytopenias, and risk of transformation to acute myeloid leukemia (AML). Features: anemia (most common), neutropenia, thrombocytopenia; dysplasia (abnormal morphology) in marrow and blood; cytogenetic abnormalities (del5q, trisomy 8, del7q).

**Synonyms:**

### Myelofibrosis

Myelofibrosis is a myeloproliferative neoplasm in which abnormal marrow signaling causes fibrosis, disordered blood production, anemia, enlarged spleen, and variable constitutional symptoms. hematopoiesis, and JAK2, CALR, or MPL mutations. Presents with anemia, massive splenomegaly, constitutional symptoms (fever, night sweats, weight

loss), and leukoerythroblastic blood smear.

**Synonyms:**

### Myelography

Contrast injected into subarachnoid space for spinal imaging. Used when MRI contraindicated. CT myelography more common now.

**Synonyms:**

### Myeloma

Multiple myeloma: plasma cell malignancy. Features: bone pain, anemia, renal failure, hypercalcemia.

**Synonyms:**

### Myeloma Cast Nephropathy

Light chain cast formation in tubules causing AKI in multiple myeloma. Friable waxy casts with giant cells. Bence Jones proteinuria. Treat myeloma and consider plasmapheresis to reduce light chain burden.

**Synonyms:**

### Myelomeningocele

Myelomeningocele is an open neural-tube defect in which spinal cord and meninges protrude through a vertebral opening, causing variable paralysis, sensory loss, bladder dysfunction, and hydrocephalus. through a vertebral defect into a sac on the back. Presents with a visible, fluid-filled sac at birth. Associated with hydrocephalus, Arnold-Chiari malformation, and lower extremity paralysis.

**Synonyms:**

### Myelopathy

A general term for any neurological deficit resulting from spinal cord pathology, encompassing a wide range of causes and clinical presentations.

**Synonyms:**

### Myelosuppression

Reduced bone marrow production of red cells, white cells, and platelets, causing anemia, neutropenia, and thrombocytopenia; a common dose-limiting toxicity of chemotherapy and radiation that increases

---

infection and bleeding risk.

**Synonyms:**

### **Myiasis**

Infestation of living tissue by larvae (maggots) of various fly species, which feed on host tissue and can cause pain, secondary infection, and tissue destruction. It may be cutaneous, involving the skin and subcutaneous tissue, or affect other body sites including the nose, ears, and wounds.

**Synonyms:**

### **Myocardial Infarction**

Irreversible death of heart-muscle tissue caused by prolonged inadequate blood flow. See Heart Attack.

**Synonyms:**

### **Myocardial Perfusion Imaging**

Nuclear cardiology technique using radiotracers (Tc-99m sestamibi, Tl-201) to assess blood flow to the myocardium. Performed at rest and during stress (exercise or pharmacological) to detect reversible ischemia (stress defect with rest redistribution) or fixed defects (scar from prior MI).

**Synonyms:**

### **Myocardial Viability**

PET assessment of hibernating myocardium. FDG uptake indicates viable myocardium.

**Synonyms:**

### **Myocarditis**

Myocarditis is inflammation of heart muscle, often infectious or immune-mediated, that can cause chest pain, arrhythmias, heart failure, or sudden cardiac dysfunction. (coxsackievirus, adenovirus, SARS-CoV-2). Presents with chest pain, dyspnea, arrhythmias, and elevated troponin. Diagnosis: ECG, echocardiography, cardiac MRI with Lake Louise criteria, and endomyocardial biopsy.

**Synonyms:**

### **Myocarditis Diagnosis**

Cardiac MRI (Lake Louise criteria) shows myocardial edema (T2-weighted imaging), late gadolinium

enhancement (typically epicardial/mid-wall in non-ischemic distribution), and increased myocardial T1/T2 mapping values.

**Synonyms:**

### **Myocarditis Treatment**

No specific antiviral therapy for most cases. Treatment is supportive: heart failure therapy (diuretics, ACE inhibitors, beta-blockers) for reduced EF, arrhythmia management, and avoidance of exercise during acute phase (risk of sudden death). Immunosuppression may be considered in autoimmune myocarditis or cardiac sarcoidosis.

**Synonyms:**

### **Myocardium**

The thick muscular middle layer of the heart wall composed of cardiac muscle cells (cardiomyocytes). The myocardium is responsible for the contractile function of the heart. It contains intercalated discs with gap junctions that allow electrical coupling between cells.

**Synonyms:**

### **Myopia**

A refractive error in which light focuses in front of the retina, causing blurred distance vision. See Nearsightedness.

**Synonyms:**

### **Myositis**

Myositis is inflammation or immune-mediated injury of skeletal muscle, producing weakness, pain, elevated muscle enzymes, and sometimes swallowing, lung, or skin involvement. myositis, immune-mediated necrotizing myopathy. Diagnosis: CK elevation, EMG, muscle MRI, muscle biopsy. Treatment: immunosuppression with corticosteroids, methotrexate, azathioprine, mycophenolate, IVIG, rituximab.

**Synonyms:**

### **Myotonia Congenita**

An inherited skeletal-muscle channelopathy causing delayed relaxation after voluntary contraction. Stiff-

---

ness often improves with repeated movement and may be accompanied by muscle hypertrophy; onset and severity vary between genetic forms.

**Synonyms:**

### **Myotonic Dystrophy**

The most common adult-onset muscular dystrophy, an autosomal dominant multisystem disorder caused by CTG trinucleotide repeat expansions in the DMPK gene (type 1, DM1) or CCTG tetranucleotide repeat expansions in the CNBP gene (type 2, DM2) on chromosome 19q13.3. DM1 is more common and more severe than DM2.

**Synonyms:**

### **Myringotomy with Tympanostomy Tube**

Incision of the tympanic membrane with placement of a ventilation tube to equalize middle-ear pressure and permit drainage. It is used selectively for persistent middle-ear effusion, recurrent acute otitis media, or associated hearing and developmental problems.

**Synonyms:**

### **Myxedema Coma**

Severe decompensated hypothyroidism characterized by altered mental status, hypothermia, bradycardia, hypoventilation, hyponatremia, and hypoglycemia. Most commonly occurs in elderly patients with long-standing untreated hypothyroidism precipitated by infection, surgery, or sedative medications. Mortality rates exceed fifty percent.

**Synonyms:**

### **Myxoma**

A usually benign primary cardiac tumour composed of myxoid tissue, most often arising in the left atrium from the interatrial septum. It may cause positional obstruction of the mitral valve, constitutional symptoms, or systemic embolism; echocardiography is the usual initial diagnostic test.

**Synonyms:**

### **Ménétrier's disease**

A rare acquired gastropathy characterized by mas-

sive hypertrophy of the gastric mucosal folds, particularly in the body and fundus, with foveolar hyperplasia, cystic dilation of gastric glands, and glandular atrophy. It presents with epigastric pain, nausea, vomiting, weight loss, and protein-losing enteropathy causing hypoalbuminemia.

**Synonyms:**

### **Macrocytic Anemia**

Anemia in which red blood cells are larger than normal, commonly because of vitamin B12 or folate deficiency.

**Synonyms:**

### **Macular Edema**

Swelling of the macula caused by fluid leaking from retinal blood vessels.

**Synonyms:**

### **Maintenance of Wakefulness Test**

A sleep test that measures how long a person can remain awake in a quiet setting during the day.

**Synonyms:**

### **Mastoid Bone**

The portion of the temporal bone located behind the ear.

**Synonyms:**

### **Megaloblastic Anemia**

Anemia caused by impaired DNA synthesis, usually related to vitamin B12 or folate deficiency, with abnormally large red blood cells.

**Synonyms:**

### **Microaneurysm**

A small bulge in the wall of a blood vessel.

**Synonyms:**

### **Microvascular Disease**

Disease affecting small blood vessels, which may reduce blood flow to organs or tissues.

**Synonyms:**

---

### **Mitral Valve Stenosis**

Narrowing of the mitral valve that restricts blood flow from the left atrium to the left ventricle.

**Synonyms:**

### **Morton's Neuroma**

Thickening of tissue around a nerve in the forefoot, causing burning pain or numbness between the toes.

**Synonyms:**

### **Multiple Sleep Latency Test**

A daytime sleep study that measures how quickly a person falls asleep during scheduled naps.

**Synonyms:**

### **Myasthenia**

Abnormal muscle weakness that worsens with use.

**Synonyms:**

### **Myocardial Rupture**

A tear in the heart wall or other heart structure, usually a severe complication of myocardial infarction.

**Synonyms:**

### **Ménière's Disease**

An inner-ear disorder causing episodes of vertigo, fluctuating hearing loss, tinnitus, and ear pressure.

**Synonyms:**

### **Maxillary Sinusitis**

Inflammation or infection of the air-filled sinus cavities behind the cheekbones.

**Synonyms:**

### **Meningomyelocele**

A severe form of spina bifida in which the spinal cord and its membranes protrude through an opening in the spine.

**Synonyms:**

### **Mesothelioma**

A cancer arising from the mesothelium, most often affecting the lining of the lungs.

**Synonyms:**

### **Microcytic Anemia**

Anemia in which red blood cells are smaller than normal, commonly because of iron deficiency or a thalassemia.

**Synonyms:**

### **Mitochondrial Myopathy**

Muscle weakness or dysfunction caused by abnormalities of mitochondria, the energy-producing structures of cells.

**Synonyms:**

### **Mitral Valve Insufficiency**

Leakage of the mitral valve that allows blood to flow back into the left atrium.

**Synonyms:**

### **Mittelschmerz**

Mittelschmerz concerns mittelschmerz; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Mobius Syndrome**

A rare congenital disorder causing facial weakness or paralysis and limited outward eye movement.

**Synonyms:**

### **Mucopolysaccharidosis**

A group of inherited disorders in which glycosaminoglycans accumulate in tissues because of enzyme deficiency.

**Synonyms:**

### **Multiple Endocrine Neoplasia**

An inherited disorder causing tumors or overactivity in two or more endocrine glands.

**Synonyms:**

### **Myoclonus**

Sudden, brief, involuntary muscle jerks.

**Synonyms:**

---

### **Myopathy**

A disease or disorder that primarily affects skeletal muscle.

**Synonyms:**

### **Myxedema**

Severe hypothyroidism causing accumulation of mucin in tissues, with swelling, slowed body functions, and other symptoms.

**Synonyms:**

### **Male Breast Cancer**

Cancer that develops in breast tissue in a man.

**Synonyms:**

### **Malignant Peripheral Nerve Sheath Tumor**

A cancer arising from cells associated with peripheral nerves.

**Synonyms:**

### **Mammary Duct Ectasia**

Widening and inflammation of a milk duct beneath the nipple.

**Synonyms:**

### **Marginal Zone Lymphoma**

A slow-growing non-Hodgkin lymphoma that begins in immune cells in the marginal zone of lymphoid tissue.

**Synonyms:**

### **MCAD Deficiency**

An inherited disorder in which the body cannot properly break down certain medium-chain fats for energy.

**Synonyms:**

### **Metastatic Castration-Resistant Prostate Cancer**

Prostate cancer that has spread and continues to grow despite treatments that lower testosterone.

**Synonyms:**

### **Median Arcuate Ligament Syndrome**

Compression of the celiac artery by a ligament near the diaphragm, sometimes causing abdominal pain.

**Synonyms:**

### **Medication Overuse Headaches**

Frequent headaches caused or worsened by regular overuse of headache medicines.

**Synonyms:**

### **Meralgia Paresthetica**

Numbness, tingling, or burning on the outer thigh caused by pressure on a sensory nerve.

**Synonyms:**

### **Macrocephaly**

An unusually large head size for a person's age and sex, which may be familial or associated with hydrocephalus, brain growth, or other disorders.

**Synonyms:**

### **Macroductyly**

Abnormally large fingers or toes, usually caused by overgrowth of bone and soft tissue.

**Synonyms:**

### **Macropsia**

A visual disturbance in which objects appear larger than they actually are.

**Synonyms:**

### **Madura Foot (Mycetoma)**

A chronic localized infection of the skin and deeper tissues of the foot, caused by fungi or certain bacteria and characterized by swelling, draining sinuses, and granules.

**Synonyms:** Mycetoma

### **Metal Fume Fever**

A short-lived influenza-like illness caused by inhalation of fumes from heated metals, especially zinc; symptoms include fever, chills, headache, muscle aches, and cough.

**Synonyms:**

---

### **Methaemoglobinaemia**

A condition in which haemoglobin is oxidized to methaemoglobin and cannot release oxygen effectively, causing tissue hypoxia and sometimes cyanosis.

**Synonyms:**

### **Microbiology**

The study of microorganisms, including bacteria, viruses, fungi, and parasites, and their relationships with humans and the environment.

**Synonyms:**

### **Microtia**

A congenital abnormality in which the external ear is unusually small or incompletely formed; it may occur with narrowing or absence of the ear canal.

**Synonyms:**

### **Midwife**

A trained healthcare professional who provides care during pregnancy, labour, birth, and the postnatal period, including care of the newborn.

**Synonyms:**

### **Milroy's Disease**

An inherited form of primary lymphoedema, usually present from birth or early life and caused by abnormal development of lymphatic vessels.

**Synonyms:**

### **Molar Pregnancy (Hydatidiform Mole)**

An abnormal pregnancy in which placental tissue proliferates excessively and the embryo is absent or abnormal; it is a form of gestational trophoblastic disease.

**Synonyms:** Hydatidiform Mole

### **Myometrium**

The muscular middle layer of the uterine wall, which contracts during menstruation and labour.

**Synonyms:**

### **Mesenteric Lymphadenitis**

Inflammation of lymph nodes in the membrane that attaches the intestines to the abdominal wall.

**Synonyms:**

### **Metachromatic Leukodystrophy**

An inherited disorder in which fatty substances accumulate and damage myelin in the nervous system.

**Synonyms:**

### **Metastatic Breast Cancer**

Breast cancer that has spread from the breast to distant parts of the body.

**Synonyms:**

### **Metatarsalgia**

Pain and inflammation in the ball of the foot near the metatarsal bones.

**Synonyms:**

### **Manometry**

Measurement of pressure within a body organ or passage, such as the esophagus or rectum.

**Synonyms:**

### **Mastication**

Chewing food to prepare it for swallowing and digestion.

**Synonyms:**

### **Meatus**

A natural body opening or passage, such as the external ear canal.

**Synonyms:**

### **Micropenis**

An unusually small penis caused by inadequate androgen effect or other developmental conditions, defined clinically by a stretched penile length more than 2.5 standard deviations below the mean for age and population. Evaluation may identify endocrine or genetic causes.

**Synonyms:**

---

## Medulla

The inner region of an organ; in the kidney it contains the renal pyramids, and in the brainstem it regulates vital functions.

**Synonyms:**

## Microcalcification

A very small calcium deposit in tissue, sometimes an early sign of breast cancer.

**Synonyms:**

## Myelogram

An imaging study of the spinal canal performed after contrast material is introduced around the spinal cord.

**Synonyms:**

## Myoglobin

An oxygen-binding protein found mainly in skeletal and cardiac muscle.

**Synonyms:**

## Myomectomy

Surgical removal of uterine fibroids while preserving the uterus.

**Synonyms:**

## Myringotomy

A small incision in the eardrum to drain middle-ear fluid or relieve pressure.

**Synonyms:**

## Mallet

A surgical hammer used with instruments such as osteotomes to cut or shape bone.

**Synonyms:**

## Mayo Scissors

Heavy surgical scissors used to cut fascia, muscle, sutures, and other relatively tough material.

**Synonyms:**

## Metzenbaum Scissors

Fine, lightweight surgical scissors used to dissect

and cut delicate soft tissue.

**Synonyms:**

## Mosquito Clamp

A small hemostatic clamp used to compress small blood vessels.

**Synonyms:**

## Mallet Finger

An injury to the extensor tendon at the distal finger joint, causing inability to actively straighten the fingertip. It may result from a forced flexion injury and sometimes includes an avulsion fracture.

**Synonyms:**

## Mediastinal Mass

An abnormal growth or collection of tissue in the mediastinum, the central compartment of the chest. Causes include tumors, enlarged lymph nodes, cysts, and vascular abnormalities.

**Synonyms:**

## Morphea

A localized sclerosing skin disorder that produces areas of thickened, hardened, or discolored skin and differs from systemic sclerosis by usually lacking internal-organ involvement.

**Synonyms:**

## Myofascial Pain Syndrome

A regional pain disorder involving sensitive trigger points in muscle and fascia, with pain that may be referred to other areas and often worsens with pressure or movement.

**Synonyms:**

## Microangiopathic Hemolytic Anemia

An anemia caused by mechanical fragmentation of red blood cells as they pass through damaged or narrowed small blood vessels, producing schistocytes and often elevated hemolysis markers.

**Synonyms:**

## Multisystem Inflammatory Syndrome in

---

## Children

A serious delayed inflammatory illness occurring in some children after infection with SARS-CoV-2, involving fever and two or more organ systems and potentially causing shock or cardiac dysfunction.

**Synonyms:**

## Threatened Miscarriage

Vaginal bleeding during early pregnancy with a closed cervix and no passage of pregnancy tissue; the pregnancy may remain viable. Evaluation commonly includes clinical assessment, serial human chorionic gonadotropin testing when indicated, and ultrasound.

**Synonyms:** Threatened abortion.

## Missed Miscarriage

A nonviable intrauterine pregnancy that has not been expelled and may produce few or no symptoms of miscarriage. Diagnosis requires appropriate ultrasound or other clinical evaluation before management is selected.

**Synonyms:** Missed abortion; delayed miscarriage.

## Incomplete Miscarriage

Partial expulsion of products of conception, with some pregnancy tissue remaining in the uterus.

## M phase

M phase refers to m phase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## machine learning

machine learning refers to machine learning, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## macroautophagy

macroautophagy refers to macroautophagy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## macrococcus

macrococcus is a microorganism or microbial group associated with macrococcus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

## macrococcus caseolyticus

macrococcus caseolyticus is a microorganism or microbial group associated with macrococcus caseolyticus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

## macroglobulin

macroglobulin refers to macroglobulin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## macrolide

macrolide refers to macrolide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## macrolide antibiotic

macrolide antibiotic refers to macrolide antibiotic, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## macronucleus

macronucleus refers to macronucleus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## macrophage activation

macrophage activation refers to macrophage activation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**macrophage count**

macrophage count refers to macrophage count, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**macroscopic hematuria**

macroscopic hematuria refers to macroscopic hematuria, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**macrostomia**

macrostomia refers to macrostomia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**macular drusen**

macular drusen refers to macular drusen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**maculopapular lesion**

maculopapular lesion refers to maculopapular lesion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**madurella**

madurella identifies maturella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**madurella mycetomatis**

madurella mycetomatis is a microorganism or microbial group associated with maturella mycetomatis; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**maf protein**

maf protein denotes maf protein, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**mafosfamide**

mafosfamide refers to mafosfamide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**magnesium chloride**

magnesium chloride refers to magnesium chloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**magnesium hydroxide**

magnesium hydroxide refers to magnesium hydroxide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**magnesium oxide**

magnesium oxide refers to magnesium oxide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**magnesium sulfate**

magnesium sulfate refers to magnesium sulfate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**magnet**

magnet refers to magnet, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **magnetic field**

magnetic field refers to magnetic field, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **magnetoencephalography**

magnetoencephalography refers to magnetoencephalography, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **magnetosomes**

magnetosomes refers to magnetosomes, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **magnusiomyces capitatus**

magnusiomyces capitatus refers to magnusiomyces capitatus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **maintenance**

maintenance refers to maintenance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **Majeed syndrome**

Majeed syndrome denotes a clinical condition or finding involving majeed syndrome; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **Majewski syndrome**

Majewski syndrome denotes a clinical condition or finding involving majewski syndrome; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **malabsorption syndrome**

malabsorption syndrome denotes a clinical condition or finding involving malabsorption syndrome; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **malaria vaccine**

malaria vaccine refers to malaria vaccine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **malassezia**

malassezia identifies malassezia, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **malassezia furfur**

malassezia furfur identifies malassezia furfur, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **malassezia pachydermatis**

malassezia pachydermatis identifies malassezia pachydermatis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **malathion**

malathion refers to malathion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **male**

male refers to male, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**male condom**

male condom refers to male condom, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**male phenotype**

male phenotype refers to male phenotype, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**malignant ameloblastoma**

malignant ameloblastoma denotes a neoplastic condition involving malignant ameloblastoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**malignant bone neoplasm**

malignant bone neoplasm denotes a neoplastic condition involving malignant bone neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**malignant glioma**

malignant glioma refers to malignant glioma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**malignant histiocytosis**

malignant histiocytosis refers to malignant histiocytosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**malignant mastocytosis**

malignant mastocytosis refers to malignant mastocytosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**malignant myoepithelioma**

malignant myoepithelioma refers to malignant myoepithelioma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**malignant thymoma**

malignant thymoma refers to malignant thymoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mallory body**

mallory body refers to mallory body, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**malondialdehyde**

malondialdehyde refers to malondialdehyde, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**malposition**

malposition refers to malposition, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**maltodextrin**

maltodextrin refers to maltodextrin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**maltose**

maltose refers to maltose, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **mammaglobin A**

mammaglobin A refers to mammaglobin a, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mammals**

mammals refers to mammals, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mammaplasty**

mammaplasty is used in relation to mammaplasty during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

### **mammary disease**

mammary disease denotes a clinical condition or finding involving mammary disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **mammary epithelium**

mammary epithelium refers to mammary epithelium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mamillary body**

mamillary body refers to mamillary body, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **managed care**

managed care refers to managed care, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mandatory reporting**

mandatory reporting refers to mandatory reporting, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mandibular condyle**

mandibular condyle refers to mandibular condyle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mandibular prosthesis**

mandibular prosthesis refers to mandibular prosthesis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mandibulofacial dysostosis**

mandibulofacial dysostosis refers to mandibulofacial dysostosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **manic**

manic refers to manic, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **manic disorder**

manic disorder denotes a clinical condition or finding involving manic disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **manic mood**

manic mood refers to manic mood, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**manipulation procedure**

manipulation procedure is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat manipulation procedure.

**Synonyms:**

**mannan**

mannan refers to mannan, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mannheimia**

mannheimia identifies mannhemia, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**mannheimia haemolytica**

mannheimia haemolytica identifies mannhemia haemolytica, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**mannomustine**

mannomustine concerns mannomustine, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**mannose**

mannose refers to mannose, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mannosidosis**

mannosidosis refers to mannosidosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mansonella perstans**

mansonella perstans identifies mansonella perstans, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**mansonella streptocerca**

mansonella streptocerca is a microorganism or microbial group associated with mansonella streptocerca; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mansonelliasis**

mansonelliasis refers to mansonelliasis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mantle field**

mantle field refers to mantle field, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**Mantoux test**

Mantoux test is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat mantoux test.

**Synonyms:**

**manufactured form**

manufactured form refers to manufactured form, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**MAO inhibitor**

MAO inhibitor refers to mao inhibitor, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**mapatumumab**

mapatumumab concerns mapatumumab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**marburgvirus**

marburgvirus is a virus or viral group associated with marburgvirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**Marek's disease**

Marek's disease denotes a clinical condition or finding involving marek's disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**margaric acid**

margaric acid denotes margaric acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**marginal ulcer**

marginal ulcer refers to marginal ulcer, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**maribavir**

maribavir concerns maribavir, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**marijuana**

marijuana refers to marijuana, a medical condition or clinical finding defined by its features, causes,

affected system, and patient context.

**Synonyms:**

**marijuana abuse**

marijuana abuse refers to marijuana abuse, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**marimastat**

marimastat refers to marimastat, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**marine biology**

marine biology refers to marine biology, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**marine toxin**

marine toxin denotes an infectious or toxic condition involving marine toxin; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**marital status**

marital status refers to marital status, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**marital therapy**

marital therapy is used in relation to marital therapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**marked**

marked refers to marked, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**married**

married refers to married, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**Marshall syndrome**

Marshall syndrome denotes a clinical condition or finding involving marshall syndrome; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**masked data**

masked data refers to masked data, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**masoprocol**

masoprocol refers to masoprocol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mass screening**

mass screening is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat mass screening.

**Synonyms:**

**mass spectrometer**

mass spectrometer refers to mass spectrometer, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mass spectrometry**

mass spectrometry refers to mass spectrometry, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**massage**

massage refers to massage, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**massage therapy**

massage therapy is used in relation to massage therapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**mast-cell sarcoma**

mast-cell sarcoma denotes mast-cell sarcoma, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**masticate**

masticate refers to masticate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**masticatory muscle**

masticatory muscle refers to masticatory muscle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mastocytoma**

mastocytoma refers to mastocytoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mastodynia**

mastodynia refers to mastodynia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**mastoid process**

mastoid process refers to mastoid process, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**material**

material refers to material, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**maternal**

maternal denotes maternal, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**maternal age**

maternal age denotes maternal age, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**maternal mortality**

maternal mortality denotes maternal mortality, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**maternal obesity**

maternal obesity denotes maternal obesity, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**mathematics**

mathematics refers to mathematics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mating**

mating refers to mating, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**matrix band**

matrix band refers to matrix band, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**matrix metalloproteinase**

matrix metalloproteinase denotes matrix metalloproteinase, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**mature teratoma**

mature teratoma refers to mature teratoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**matuzumab**

matuzumab concerns matuzumab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**maxillary sinus**

maxillary sinus refers to maxillary sinus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**maximum**

maximum refers to maximum, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**maximum thickness**

maximum thickness refers to maximum thickness, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**maytansine**

maytansine refers to maytansine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mazindol**

mazindol refers to mazindol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mcc gene**

mcc gene denotes mcc gene, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**MCF-7 cell**

MCF-7 cell denotes mcf-7 cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**mead acid**

mead acid denotes mead acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**mean**

mean refers to mean, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mean diameter**

mean diameter refers to mean diameter, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mean thickness**

mean thickness refers to mean thickness, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**measles vaccine**

measles vaccine refers to measles vaccine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**measurement**

measurement refers to measurement, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mebendazole**

mebendazole concerns mebendazole, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**mecamylamine**

mecamylamine refers to mecamylamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mecarzole**

mecarzole refers to mecarzole, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **mechanical ventilator**

mechanical ventilator refers to mechanical ventilator, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mechanoreceptor**

mechanoreceptor denotes mechanoreceptor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **mechlorethamine**

mechlorethamine refers to mechlorethamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **meclizine**

meclizine refers to meclizine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **medial meniscus**

medial meniscus refers to medial meniscus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **median**

median refers to median, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mediastinal cyst**

mediastinal cyst refers to mediastinal cyst, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mediastinal disease**

mediastinal disease denotes a clinical condition or finding involving mediastinal disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **Mediastinal Emphysema**

Mediastinal Emphysema refers to mediastinal emphysema, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mediastinal hemorrhage**

mediastinal hemorrhage denotes a clinical condition or finding involving mediastinal hemorrhage; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **mediastinal neoplasm**

mediastinal neoplasm denotes a neoplastic condition involving mediastinal neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **mediastinal pleura**

mediastinal pleura refers to mediastinal pleura, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mediastinal shift**

mediastinal shift refers to mediastinal shift, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mediastinoscopes**

mediastinoscopes refers to mediastinoscopes, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**medical device**

medical device refers to medical device, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**medical economics**

medical economics refers to medical economics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**medical history**

medical history refers to medical history, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**medical indigency**

medical indigency refers to medical indigency, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**medical pin**

medical pin refers to medical pin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**medical record**

medical record refers to medical record, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**medicine**

medicine refers to medicine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**meditation**

meditation refers to meditation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**medroxyprogesterone**

medroxyprogesterone concerns medroxyprogesterone, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**medroxyprogesterone acetate**

medroxyprogesterone acetate refers to medroxyprogesterone acetate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**medullary carcinoma**

medullary carcinoma denotes a neoplastic condition involving medullary carcinoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**medulloepithelioma**

medulloepithelioma refers to medulloepithelioma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mefenamic acid**

mefenamic acid denotes mefenamic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**mefloquine**

mefloquine refers to mefloquine, a medical condition

---

or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**megabecquerel**

megabecquerel refers to megabecquerel, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**megacalycosis**

megacalycosis refers to megacalycosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**megacolon**

megacolon refers to megacolon, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**megakaryocyte**

megakaryocyte refers to megakaryocyte, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**megakaryocytopoiesis**

megakaryocytopoiesis refers to megakaryocytopoiesis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**megamonas**

megamonas refers to megamonas, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**megamonas funiformis**

megamonas funiformis refers to megamonas funiformis, a medical condition or clinical finding defined

by its features, causes, affected system, and patient context.

**Synonyms:**

**megamonas hypermegale**

megamonas hypermegale refers to megamonas hypermegale, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**megasphaera**

megasphaera refers to megasphaera, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**megasphaera elsdenii**

megasphaera elsdenii refers to megasphaera elsdenii, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mega-trial**

mega-trial refers to mega-trial, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**megestrol**

megestrol refers to megestrol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**megestrol acetate**

megestrol acetate refers to megestrol acetate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**meibomian glands**

meibomian glands refers to meibomian glands, a

---

medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **meiotic recombination**

meiotic recombination refers to meiotic recombination, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **melancholia**

melancholia refers to melancholia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **melanocyte**

melanocyte refers to melanocyte, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **melanocytic nevus**

melanocytic nevus refers to melanocytic nevus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **melanophore**

melanophore refers to melanophore, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **melanosome**

melanosome refers to melanosome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **MELAS syndrome**

MELAS syndrome denotes a clinical condition or finding involving melas syndrome; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **melatonin receptor**

melatonin receptor denotes melatonin receptor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **melengestrol acetate**

melengestrol acetate refers to melengestrol acetate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **melitten**

melitten refers to melitten, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **meloxicam**

meloxicam refers to meloxicam, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **melphalan**

melphalan refers to melphalan, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **memantine hydrochloride**

memantine hydrochloride refers to memantine hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### membrane channel

membrane channel refers to membrane channel, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### membrane fusion

membrane fusion refers to membrane fusion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### membrane lipids

membrane lipids denotes membrane lipids, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### membrane microdomain

membrane microdomain refers to membrane microdomain, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### membrane part

membrane part refers to membrane part, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### membrane protein

membrane protein denotes membrane protein, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### membrane raft

membrane raft refers to membrane raft, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### memory disorder

memory disorder denotes a clinical condition or finding involving memory disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### memory impairment

memory impairment refers to memory impairment, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### memory training

memory training refers to memory training, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### Meniere's disease

Meniere's disease denotes a clinical condition or finding involving meniere's disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### meningeal carcinomatosis

meningeal carcinomatosis denotes a neoplastic condition involving meningeal carcinomatosis; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### meningeal leukemia

meningeal leukemia denotes a neoplastic condition involving meningeal leukemia; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### meningeal lymphoma

meningeal lymphoma denotes a neoplastic condition involving meningeal lymphoma; evaluation establishes tissue of origin, extent, biologic behavior, and

---

treatment.

**Synonyms:**

### **meningeal neoplasm**

meningeal neoplasm denotes a neoplastic condition involving meningeal neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **meningism**

meningism refers to meningism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **meniscus**

meniscus refers to meniscus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **menogaril**

menogaril refers to menogaril, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **menopause status**

menopause status refers to menopause status, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **menotropin**

menotropin concerns menotropin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **menses duration**

menses duration refers to menses duration, a medi-

cal condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **menstruation disturbance**

menstruation disturbance refers to menstruation disturbance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mental disorders**

mental disorders denotes a clinical condition or finding involving mental disorders; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **mental fatigue**

mental fatigue refers to mental fatigue, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mental process**

mental process refers to mental process, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mental recall**

mental recall refers to mental recall, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mental retardation**

mental retardation refers to mental retardation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**menthol**

menthol refers to menthol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**meperidine**

meperidine refers to meperidine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**meperidine hydrochloride**

meperidine hydrochloride refers to meperidine hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mephenytoin**

mephenytoin refers to mephenytoin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mepivacaine**

mepivacaine concerns mepivacaine, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**meprobamate**

meprobamate refers to meprobamate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mercaptopurine**

mercaptopurine refers to mercaptopurine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**meridian**

meridian refers to meridian, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**merkel cells**

merkel cells denotes merkel cells, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**meropenem**

meropenem concerns meropenem, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**mersalyl**

mersalyl refers to mersalyl, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mesalamine**

mesalamine refers to mesalamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mesangiolysis**

mesangiolysis refers to mesangiolysis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mesangium**

mesangium refers to mesangium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**mesencephalon**

mesencephalon refers to mesencephalon, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mesenchymal cell**

mesenchymal cell denotes mesenchymal cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**mesenchymal chondrosarcoma**

mesenchymal chondrosarcoma denotes a neoplastic condition involving mesenchymal chondrosarcoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**mesenchyme**

mesenchyme refers to mesenchyme, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mesenchymoma**

mesenchymoma refers to mesenchymoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mesenteric artery**

mesenteric artery refers to mesenteric artery, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mesenteric cyst**

mesenteric cyst refers to mesenteric cyst, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mesenteric veins**

mesenteric veins refers to mesenteric veins, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mesial surface**

mesial surface refers to mesial surface, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mesna**

mesna refers to mesna, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mesonephric**

mesonephric refers to mesonephric, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mesonephric tumor**

mesonephric tumor denotes a neoplastic condition involving mesonephric tumor; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**mesonephroma**

mesonephroma refers to mesonephroma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mesothelial neoplasm**

mesothelial neoplasm denotes a neoplastic condition involving mesothelial neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

---

**mesothelin**

mesothelin refers to mesothelin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mesothelium**

mesothelium refers to mesothelium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mestranol**

mestranol refers to mestranol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**metabolic disease**

metabolic disease denotes a clinical condition or finding involving metabolic disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**metabolic response**

metabolic response refers to metabolic response, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**metabolite**

metabolite refers to metabolite, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**metabolomics**

metabolomics refers to metabolomics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**metacarpal bone**

metacarpal bone refers to metacarpal bone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**metadata**

metadata refers to metadata, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**metagenome**

metagenome refers to metagenome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**metagenomics**

metagenomics refers to metagenomics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**metagonimus yokogawai**

metagonimus yokogawai refers to metagonimus yokogawai, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**metal**

metal refers to metal, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**metalloendopeptidase**

metalloendopeptidase refers to metalloendopeptidase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **metalloporphyrins**

metalloporphyrins refers to metalloporphyrins, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **metalloprotease**

metalloprotease refers to metalloprotease, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **metalloprotein**

metalloprotein denotes metalloprotein, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **metallothionein**

metallothionein refers to metallothionein, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **metamorphosis**

metamorphosis refers to metamorphosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **metanephrine**

metanephrine refers to metanephrine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **metaphase**

metaphase refers to metaphase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **metaphase plate**

metaphase plate refers to metaphase plate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **metaphyseal widening**

metaphyseal widening refers to metaphyseal widening, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **metaplastic carcinoma**

metaplastic carcinoma denotes a neoplastic condition involving metaplastic carcinoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **metapneumovirus**

metapneumovirus is a virus or viral group associated with metapneumovirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **metastin**

metastin refers to metastin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **metatarsal bone**

metatarsal bone refers to metatarsal bone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **metatarsal valgus**

metatarsal valgus refers to metatarsal valgus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**metatarsus varus**

metatarsus varus refers to metatarsus varus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**metencephalon**

metencephalon refers to metencephalon, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**meter**

meter refers to meter, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**metestrus**

metestrus is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat metestrus.

**Synonyms:**

**metformin**

metformin refers to metformin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**metformin hydrochloride**

metformin hydrochloride refers to metformin hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methacholine chloride**

methacholine chloride refers to methacholine chloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methadone**

methadone refers to methadone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methadone hydrochloride**

methadone hydrochloride refers to methadone hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methamidophos**

methamidophos refers to methamidophos, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methamphetamine**

methamphetamine refers to methamphetamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methane**

methane refers to methane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methane sulfonate**

methane sulfonate refers to methane sulfonate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methanobacteriaceae**

methanobacteriaceae is a microorganism or microbial group associated with methanobacteriaceae; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

---

**methanol**

methanol refers to methanol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methaqualone**

methaqualone refers to methaqualone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methazolamide**

methazolamide refers to methazolamide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methemoglobin**

methemoglobin refers to methemoglobin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methenamine**

methenamine refers to methenamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methicillin**

methicillin concerns methicillin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**methidathion**

methidathion refers to methidathion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methimazole**

methimazole concerns methimazole, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**methiocarb**

methiocarb refers to methiocarb, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methionine**

methionine refers to methionine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methionine enkephalin**

methionine enkephalin refers to methionine enkephalin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methisazone**

methisazone refers to methisazone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methocarbamol**

methocarbamol refers to methocarbamol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methodology**

methodology refers to methodology, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **methohexital**

methohexital refers to methohexital, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methomyl**

methomyl refers to methomyl, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methotrexate**

methotrexate refers to methotrexate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methotrimeprazine**

methotrimeprazine refers to methotrimeprazine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methoxamine**

methoxamine refers to methoxamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methoxsalen**

methoxsalen refers to methoxsalen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methoxyamine hydrochloride**

methoxyamine hydrochloride refers to methoxyamine hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methoxyflurane**

methoxyflurane refers to methoxyflurane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methoxyhydroxyphenylglycol**

methoxyhydroxyphenylglycol refers to methoxyhydroxyphenylglycol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methyclothiazide**

methyclothiazide refers to methyclothiazide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methyl bromide**

methyl bromide refers to methyl bromide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methyl chloride**

methyl chloride refers to methyl chloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methyl green**

methyl green refers to methyl green, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methyl group**

methyl group refers to methyl group, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**methyl isocyanate**

methyl isocyanate refers to methyl isocyanate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methyl methanesulfonate**

methyl methanesulfonate refers to methyl methanesulfonate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methyl parathion**

methyl parathion refers to methyl parathion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methylcellulose**

methylcellulose denotes methylcellulose, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**methylcholanthrene**

methylcholanthrene refers to methylcholanthrene, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methyl dopa**

methyl dopa refers to methyl dopa, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methylene chloride**

methylene chloride refers to methylene chloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methylguanidine**

methylguanidine refers to methylguanidine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methylmalonic aciduria**

methylmalonic aciduria denotes methylmalonic aciduria, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**methylmercury compounds**

methylmercury compounds refers to methylmercury compounds, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methylmethacrylate**

methylmethacrylate refers to methylmethacrylate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methylnaltrexone**

methylnaltrexone refers to methylnaltrexone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methylnaltrexone bromide**

methylnaltrexone bromide refers to methylnaltrexone bromide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**methylnitrosourea**

methylnitrosourea refers to methylnitrosourea, a medical condition or clinical finding defined by its

---

features, causes, affected system, and patient context.

**Synonyms:**

### **methylobacteriaceae**

methylobacteriaceae is a microorganism or microbial group associated with methylobacteriaceae; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **methylobacterium**

methylobacterium is a microorganism or microbial group associated with methylobacterium; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **methylphenidate**

methylphenidate refers to methylphenidate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methyprednisolone**

methyprednisolone refers to methyprednisolone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methyltestosterone**

methyltestosterone concerns methyltestosterone, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **methylthioinosine**

methylthioinosine refers to methylthioinosine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **methyltransferase**

methyltransferase refers to methyltransferase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **metolazone**

metolazone refers to metolazone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **metolcarb**

metolcarb refers to metolcarb, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **metoprolol**

metoprolol concerns metoprolol, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **metric system**

metric system refers to metric system, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **metronomic chemotherapy**

metronomic chemotherapy is used in relation to metronomic chemotherapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

### **metschnikowia**

metschnikowia identifies metschnikowia, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

---

**metyrapone**

metyrapone refers to metyrapone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mevinphos**

mevinphos refers to mevinphos, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mexacarbate**

mexacarbate refers to mexacarbate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mexiletine**

mexiletine refers to mexiletine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**meyerozyma guilliermondii**

meyerozyma guilliermondii refers to meyeromyza guilliermondii, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mezlocillin**

mezlocillin concerns mezlocillin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**micelle**

micelle denotes micelle, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**miconazole**

miconazole concerns miconazole, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**microabscess**

microabscess refers to microabscess, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microarray analysis**

microarray analysis refers to microarray analysis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microbacterium**

microbacterium is a microorganism or microbial group associated with microbacterium; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**microbial biofilms**

microbial biofilms refers to microbial biofilms, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microbicide**

microbicide refers to microbicide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microbody**

microbody refers to microbody, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**microchip site**

microchip site refers to microchip site, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microcirculation**

microcirculation refers to microcirculation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**micrococcaceae**

micrococcaceae refers to micrococcaceae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**micrococcus**

micrococcus refers to micrococcus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**micrococcus luteus**

micrococcus luteus refers to micrococcus luteus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**micrococcus lylae**

micrococcus lylae refers to micrococcus lylae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microcolon**

microcolon refers to microcolon, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microcornea**

microcornea refers to microcornea, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microcurie**

microcurie refers to microcurie, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microdialysis**

microdialysis refers to microdialysis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microdissection**

microdissection refers to microdissection, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microelectrode**

microelectrode refers to microelectrode, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microfibril**

microfibril refers to microfibril, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microfilament**

microfilament refers to microfilament, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microfilament proteins**

microfilament proteins denotes microfilament pro-

---

teins, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **microfluidics**

microfluidics refers to microfluidics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **microglandular adenosis**

microglandular adenosis refers to microglandular adenosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **microglia**

microglia refers to microglia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **microgliosis**

microgliosis refers to microgliosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **micrognathism**

micrognathism refers to micrognathism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **microinjection**

microinjection refers to microinjection, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **micromole**

micromole refers to micromole, a medical condition

or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **microneme**

microneme refers to microneme, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **micronization**

micronization refers to micronization, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **micronutrient**

micronutrient refers to micronutrient, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **microorganism**

microorganism refers to microorganism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **microorganism genetics**

microorganism genetics denotes microorganism genetics, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **micropexophagy**

micropexophagy refers to micropexophagy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **microphthalmos**

microphthalmos refers to microphthalmos, a medical condition or clinical finding defined by its features,

---

causes, affected system, and patient context.

**Synonyms:**

**micropsia**

micropsia refers to micropsia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microradiography**

microradiography refers to microradiography, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microscopic**

microscopic refers to microscopic, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microscopy**

microscopy refers to microscopy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microsome**

microsome refers to microsome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microspectrophotometry**

microspectrophotometry refers to microspectrophotometry, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microsphere**

microsphere refers to microsphere, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microspherophakia**

microspherophakia refers to microspherophakia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microsporidia**

microsporidia identifies microsporidia, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**microsporidiosis**

microsporidiosis identifies microsporidiosis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**microsporum**

microsporum identifies microsporum, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**microsporum audouinii**

microsporum audouinii identifies microsporum audouinii, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**microsporum distortum**

microsporum distortum identifies microsporum distortum, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

---

**microsporium equinum**

microsporium equinum identifies microsporium equinum, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**microsporium ferrugineum**

microsporium ferrugineum identifies microsporium ferrugineum, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**microsporium gypseum**

microsporium gypseum identifies microsporium gypseum, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**microstomia**

microstomia refers to microstomia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microsurgery**

microsurgery is used in relation to microsurgery during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**microtechnology**

microtechnology refers to microtechnology, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microtubule**

microtubule refers to microtubule, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microtubule bundle**

microtubule bundle refers to microtubule bundle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microvillus**

microvillus refers to microvillus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microvolt**

microvolt refers to microvolt, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**microwave therapy**

microwave therapy is used in relation to microwave therapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**microwell plate**

microwell plate refers to microwell plate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**midazolam**

midazolam refers to midazolam, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**midazolam hydrochloride**

midazolam hydrochloride refers to midazolam hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**middle insomnia**

middle insomnia refers to middle insomnia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**midodrine**

midodrine refers to midodrine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**midomafetamine**

midomafetamine refers to midomafetamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**midostaurin**

midostaurin refers to midostaurin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mifepristone**

mifepristone refers to mifepristone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**Mikulicz disease**

Mikulicz disease denotes a clinical condition or finding involving mikulicz disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**milatuzumab**

milatuzumab concerns milatuzumab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**mild**

mild refers to mild, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mile**

mile refers to mile, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**miliaria**

miliaria refers to miliaria, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**milieu therapy**

milieu therapy is used in relation to milieu therapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**military personnel**

military personnel refers to military personnel, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**milk**

milk refers to milk, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**millicurie**

millicurie refers to millicurie, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**milliliter**

milliliter refers to milliliter, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**millimeter**

millimeter refers to millimeter, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**millimole**

millimole refers to millimole, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**milliosmole**

milliosmole refers to milliosmole, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**millisecond**

millisecond refers to millisecond, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**milliunit**

milliunit refers to milliunit, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**millivolt**

millivolt refers to millivolt, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mineral**

mineral refers to mineral, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

ical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mineral oil**

mineral oil refers to mineral oil, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mineralocorticoid**

mineralocorticoid refers to mineralocorticoid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**minisatellite repeat**

minisatellite repeat refers to minisatellite repeat, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**minor response**

minor response refers to minor response, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**minority health**

minority health refers to minority health, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**minoxidil**

minoxidil refers to minoxidil, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**minretumomab**

minretumomab concerns minretumomab, a pharmacologic or chemical agent; clinical use depends on

---

its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **miosis disorder**

miosis disorder denotes a clinical condition or finding involving miosis disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **mirage syndrome**

mirage syndrome denotes a clinical condition or finding involving mirage syndrome; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **mirex**

mirex refers to mirex, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mirtazapine**

mirtazapine refers to mirtazapine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **misalignment**

misalignment refers to misalignment, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **misdiagnosis**

misdiagnosis refers to misdiagnosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mismatch repair**

mismatch repair refers to mismatch repair, a medical

condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **misonidazole**

misonidazole concerns misonidazole, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **misoprostol**

misoprostol refers to misoprostol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **missed dose**

missed dose refers to missed dose, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **missense mutation**

missense mutation refers to missense mutation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mite**

mite refers to mite, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mithramycin**

mithramycin concerns mithramycin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

---

**mitigate**

mitigate refers to mitigate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitobronitol**

mitobronitol refers to mitobronitol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitochondrial cristae**

mitochondrial cristae refers to mitochondrial cristae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitochondrial DNA**

mitochondrial DNA denotes mitochondrial dna, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**mitochondrial fission**

mitochondrial fission refers to mitochondrial fission, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitochondrial fusion**

mitochondrial fusion refers to mitochondrial fusion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitochondrial matrix**

mitochondrial matrix refers to mitochondrial matrix, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitochondrial membrane**

mitochondrial membrane refers to mitochondrial membrane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitochondrial ribosome**

mitochondrial ribosome refers to mitochondrial ribosome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitochondrial swelling**

mitochondrial swelling denotes a clinical condition or finding involving mitochondrial swelling; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**mitochondrion**

mitochondrion refers to mitochondrion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitogen**

mitogen refers to mitogen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitoguazone**

mitoguazone refers to mitoguazone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitolactol**

mitolactol refers to mitolactol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**mitomycin**

mitomycin concerns mitomycin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**mitomycins**

mitomycins refers to mitomycins, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitophagy**

mitophagy refers to mitophagy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitosporic fungi**

mitosporic fungi is a microorganism or microbial group associated with mitosporic fungi; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mitotane**

mitotane refers to mitotane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitotic anaphase**

mitotic anaphase refers to mitotic anaphase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitotic metaphase**

mitotic metaphase refers to mitotic metaphase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitotic prophase**

mitotic prophase refers to mitotic prophase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitotic recombination**

mitotic recombination refers to mitotic recombination, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitotic telophase**

mitotic telophase refers to mitotic telophase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitoxantrone**

mitoxantrone denotes an infectious or toxic condition involving mitoxantrone; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**mitral atresia**

mitral atresia refers to mitral atresia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mitral valvuloplasty**

mitral valvuloplasty is used in relation to mitral valvuloplasty during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**mitsuokella**

mitsuokella identifies mitsuokella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

---

**Synonyms:**

**mitsuokella multacida**

mitsuokella multacida identifies mitsuokella multacida, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**mixed glioma**

mixed glioma refers to mixed glioma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mobile health unit**

mobile health unit refers to mobile health unit, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mobiluncus**

mobiluncus identifies mobiluncus, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**mobiluncus curtisii**

mobiluncus curtisii identifies mobiluncus curtisii, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**mobiluncus mulieris**

mobiluncus mulieris identifies mobiluncus mulieris, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**mocetinostat**

mocetinostat refers to mocetinostat, a medical con-

dition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**modality**

modality refers to modality, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**moderation**

moderation refers to moderation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**moellerella**

moellerella identifies moellerella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**moellerella wisconsensis**

moellerella wisconsensis identifies moellerella wisconsensis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**mogibacterium**

mogibacterium is a microorganism or microbial group associated with mogibacterium; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**molar**

molar refers to molar, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **molecular biology**

molecular biology refers to molecular biology, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **molecular chaperone**

molecular chaperone refers to molecular chaperone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **molecular diagnosis**

molecular diagnosis refers to molecular diagnosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **molecular dynamic**

molecular dynamic refers to molecular dynamic, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **molecular imaging**

molecular imaging is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat molecular imaging.

**Synonyms:**

### **molecular medicine**

molecular medicine refers to molecular medicine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **molecular probe**

molecular probe refers to molecular probe, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **molecular response**

molecular response refers to molecular response, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **molecule**

molecule denotes molecule, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **mollusca**

mollusca identifies mollusca, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **molluscipoxvirus**

molluscipoxvirus is a virus or viral group associated with molluscipoxvirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **molt**

molt refers to molt, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **molybdenum**

molybdenum refers to molybdenum, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mometasone**

mometasone refers to mometasone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**mometasone furoate**

mometasone furoate refers to mometasone furoate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**monascus**

monascus identifies monascus, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**monascus ruber**

monascus ruber identifies monascus ruber, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**monensin**

monensin refers to monensin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mongolian spot**

mongolian spot refers to mongolian spot, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**monilethrix**

monilethrix refers to monilethrix, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**monitoring device**

monitoring device refers to monitoring device, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**monkeypox**

monkeypox refers to monkeypox, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**monobactams**

monobactams refers to monobactams, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**monoblast count**

monoblast count refers to monoblast count, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**monocrotophos**

monocrotophos refers to monocrotophos, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**monocytopenia**

monocytopenia refers to monocytopenia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**monocytosis**

monocytosis refers to monocytosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**monogenic obesity**

monogenic obesity refers to monogenic obesity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **monograph**

monograph refers to monograph, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **monoiodyrosine**

monoiodyrosine refers to monoiodyrosine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **monokines**

monokines refers to monokines, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **monomer**

monomer refers to monomer, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **monomethylhydrazine**

monomethylhydrazine refers to monomethylhydrazine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mononegavirales**

mononegavirales is a virus or viral group associated with mononegavirales; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **mononeuropathy**

mononeuropathy refers to mononeuropathy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mononuclear leukocyte**

mononuclear leukocyte refers to mononuclear leukocyte, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **monosaccharide**

monosaccharide refers to monosaccharide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **monoterpenes**

monoterpenes refers to monoterpenes, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **monozygotic twin**

monozygotic twin refers to monozygotic twin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **montelukast**

montelukast concerns montelukast, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **montelukast sodium**

montelukast sodium refers to montelukast sodium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mood disorder**

mood disorder denotes a clinical condition or finding involving mood disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

---

**Synonyms:**

**mood swing**

mood swing refers to mood swing, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mopidamol**

mopidamol refers to mopidamol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mopp protocol**

mopp protocol refers to mopp protocol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**moral**

moral refers to moral, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**morale**

morale refers to morale, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**moraxella**

moraxella identifies moraxella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**moraxella atlantae**

moraxella atlantae identifies moraxella atlantae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**moraxella bovis**

moraxella bovis identifies moraxella bovis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**moraxella canis**

moraxella canis identifies moraxella canis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**moraxella lacunata**

moraxella lacunata identifies moraxella lacunata, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**moraxella lincolnii**

moraxella lincolnii identifies moraxella lincolnii, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**moraxella nonliquefaciens**

moraxella nonliquefaciens identifies moraxella nonliquefaciens, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**moraxella oblonga**

moraxella oblonga identifies moraxella oblonga, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**moraxella osloensis**

moraxella osloensis identifies moraxella osloensis, a biological taxon or infectious-disease concept whose

---

clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **moraxellaceae**

moraxellaceae identifies moraxellaceae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **morbillivirus**

morbillivirus is a virus or viral group associated with morbillivirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **morcellation**

morcellation denotes morcellation, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **morganella**

morganella identifies morganella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **morganella morganii**

morganella morganii identifies morganella morganii, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **morning**

morning refers to morning, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **morphinans**

morphinans refers to morphinans, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **morphine**

morphine refers to morphine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **morphine sulfate**

morphine sulfate refers to morphine sulfate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **morphogenesis**

morphogenesis denotes morphogenesis, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **morpholino**

morpholino refers to morpholino, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **morphologic response**

morphologic response refers to morphologic response, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **morula**

morula refers to morula, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**motexafin gadolinium**

motexafin gadolinium refers to motexafin gadolinium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**motexafin lutetium**

motexafin lutetium refers to motexafin lutetium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**motion perception**

motion perception refers to motion perception, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**motivation**

motivation refers to motivation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**motor aphasia**

motor aphasia refers to motor aphasia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**motor delay**

motor delay refers to motor delay, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**motor stereotypy**

motor stereotypy refers to motor stereotypy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**motor tic**

motor tic refers to motor tic, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mouth diseases**

mouth diseases denotes a clinical condition or finding involving mouth diseases; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**mouth neoplasm**

mouth neoplasm denotes a neoplastic condition involving mouth neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**Movement**

Movement refers to movement, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**movement disorders**

movement disorders denotes a clinical condition or finding involving movement disorders; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**moxalactam**

moxalactam refers to moxalactam, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**moxibustion**

moxibustion refers to moxibustion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**moxifloxacin**

moxifloxacin concerns moxifloxacin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**mrna precursor**

mrna precursor denotes mrna precursor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**mu-Chain disease**

mu-Chain disease denotes a clinical condition or finding involving mu-chain disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**mucin**

mucin refers to mucin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mucinous**

mucinous refers to mucinous, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mucinous adenocarcinoma**

mucinous adenocarcinoma denotes a neoplastic condition involving mucinous adenocarcinoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**mucinous cystadenoma**

mucinous cystadenoma refers to mucinous cystadenoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mucoepidermoid carcinoma**

mucoepidermoid carcinoma denotes a neoplastic condition involving mucoepidermoid carcinoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**mucolipidoses**

mucolipidoses denotes mucolipidoses, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**mucopolysaccharidosis vii**

mucopolysaccharidosis vii refers to mucopolysaccharidosis vii, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mucor**

mucor identifies mucor, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**mucor ramosissimus**

mucor ramosissimus identifies mucor ramosissimus, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**mucorales**

mucorales identifies mucorales, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**mucosal immunity**

mucosal immunity refers to mucosal immunity, a medical condition or clinical finding defined by its

---

features, causes, affected system, and patient context.

**Synonyms:**

### **mucosal infection**

mucosal infection denotes an infectious or toxic condition involving mucosal infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

### **mucus**

mucus refers to mucus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mulibrey nanism**

mulibrey nanism refers to mulibrey nanism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **muller cells**

muller cells denotes muller cells, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **multicenter study**

multicenter study refers to multicenter study, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **multi-drug resistance**

multi-drug resistance refers to multi-drug resistance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **multienzyme complexes**

multienzyme complexes denotes multienzyme complexes, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **multimodal imaging**

multimodal imaging is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat multimodal imaging.

**Synonyms:**

### **multinucleated hepatocyte**

multinucleated hepatocyte refers to multinucleated hepatocyte, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **multiple exostoses**

multiple exostoses refers to multiple exostoses, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **multiple fibrofolliculomas**

multiple fibrofolliculomas refers to multiple fibrofolliculomas, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **multiple organ failure**

multiple organ failure refers to multiple organ failure, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **multiplicity**

multiplicity refers to multiplicity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**multipolar neuron**

multipolar neuron refers to multipolar neuron, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**multivesicular body**

multivesicular body refers to multivesicular body, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muparfostat**

muparfostat refers to muparfostat, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mupirocin**

mupirocin refers to mupirocin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muramidase**

muramidase refers to muramidase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muromonab-CD3**

muromonab-CD3 refers to muromonab-cd3, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muscarine**

muscarine refers to muscarine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muscarinic antagonist**

muscarinic antagonist refers to muscarinic antagonist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muscidae**

muscidae refers to muscidae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muscimol**

muscimol refers to muscimol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muscle cell**

muscle cell denotes muscle cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**muscle cramp**

muscle cramp refers to muscle cramp, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muscle development**

muscle development refers to muscle development, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muscle fiber**

muscle fiber refers to muscle fiber, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**muscle hypertrophy**

muscle hypertrophy refers to muscle hypertrophy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muscle neoplasm**

muscle neoplasm denotes a neoplastic condition involving muscle neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**muscle protein**

muscle protein denotes muscle protein, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**muscle relaxant**

muscle relaxant refers to muscle relaxant, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muscle rigidity**

muscle rigidity refers to muscle rigidity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muscle spindle**

muscle spindle refers to muscle spindle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muscle strength**

muscle strength refers to muscle strength, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**muscle tonus**

muscle tonus refers to muscle tonus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**musculoskeletal deformity**

musculoskeletal deformity refers to musculoskeletal deformity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**musculoskeletal disease**

musculoskeletal disease denotes a clinical condition or finding involving musculoskeletal disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**musculoskeletal injury**

musculoskeletal injury denotes a clinical condition or finding involving musculoskeletal injury; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**musculoskeletal system**

musculoskeletal system refers to musculoskeletal system, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mustard compounds**

mustard compounds refers to mustard compounds, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mustard gas**

mustard gas refers to mustard gas, a medical condi-

---

tion or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mutagenicity test**

mutagenicity test is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat mutagenicity test.

**Synonyms:**

### **mutant**

mutant refers to mutant, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mutant proteins**

mutant proteins denotes mutant proteins, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **mutate**

mutate refers to mutate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mutation abnormality**

mutation abnormality refers to mutation abnormality, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mutism**

mutism refers to mutism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mycelium**

mycelium refers to mycelium, a medical condition

or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mycetoma**

mycetoma refers to mycetoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **mycobacteriaceae**

mycobacteriaceae is a microorganism or microbial group associated with mycobacteriaceae; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **mycobacterium**

mycobacterium is a microorganism or microbial group associated with mycobacterium; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **mycobacterium avium**

mycobacterium avium is a microorganism or microbial group associated with mycobacterium avium; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **mycobacterium bovis**

mycobacterium bovis is a microorganism or microbial group associated with mycobacterium bovis; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **mycobacterium chelonae**

mycobacterium chelonae is a microorganism or microbial group associated with mycobacterium chelonae; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

---

**mycobacterium flavescens**

mycobacterium flavescens is a microorganism or microbial group associated with mycobacterium flavescens; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycobacterium fortuitum**

mycobacterium fortuitum is a microorganism or microbial group associated with mycobacterium fortuitum; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycobacterium gordonae**

mycobacterium gordonae is a microorganism or microbial group associated with mycobacterium gordonae; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycobacterium haemophilum**

mycobacterium haemophilum is a microorganism or microbial group associated with mycobacterium haemophilum; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycobacterium infection**

mycobacterium infection is a microorganism or microbial group associated with mycobacterium infection; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycobacterium kansasii**

mycobacterium kansasii is a microorganism or microbial group associated with mycobacterium kansasii; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycobacterium scrofulaceum**

mycobacterium scrofulaceum is a microorgan-

ism or microbial group associated with mycobacterium scrofulaceum; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycobacterium smegmatis**

mycobacterium smegmatis is a microorganism or microbial group associated with mycobacterium smegmatis; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycobacterium szulgai**

mycobacterium szulgai is a microorganism or microbial group associated with mycobacterium szulgai; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycobacterium terrae**

mycobacterium terrae is a microorganism or microbial group associated with mycobacterium terrae; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycobacterium ulcerans**

mycobacterium ulcerans is a microorganism or microbial group associated with mycobacterium ulcerans; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycobiome**

mycobiome refers to mycobiome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mycophenolate mofetil**

mycophenolate mofetil refers to mycophenolate mofetil, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**mycophenolic acid**

mycophenolic acid denotes mycophenolic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**mycoplasma**

mycoplasma is a microorganism or microbial group associated with mycoplasma; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycoplasma hominis**

mycoplasma hominis is a microorganism or microbial group associated with mycoplasma hominis; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycoplasma orale**

mycoplasma orale is a microorganism or microbial group associated with mycoplasma orale; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycoplasma pneumoniae**

mycoplasma pneumoniae is a microorganism or microbial group associated with mycoplasma pneumoniae; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycoplasmal pneumonia**

mycoplasmal pneumonia is a microorganism or microbial group associated with mycoplasmal pneumonia; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycoplasmataceae**

mycoplasmataceae is a microorganism or microbial group associated with mycoplasmataceae; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**mycosis**

mycosis refers to mycosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**mycosis fungoides lymphoma**

mycosis fungoides lymphoma denotes a neoplastic condition involving mycosis fungoides lymphoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**mycotoxin**

mycotoxin denotes an infectious or toxic condition involving mycotoxin; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**mydriatics**

mydriatics refers to mydriatics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**myelination**

myelination refers to myelination, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**myelitis**

myelitis refers to myelitis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **myeloablative agonist**

myeloablative agonist refers to myeloablative agonist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myeloablative chemotherapy**

myeloablative chemotherapy is used in relation to myeloablative chemotherapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

### **myeloblast**

myeloblast refers to myeloblast, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myelocyte**

myelocyte refers to myelocyte, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myeloid**

myeloid refers to myeloid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myeloid cell**

myeloid cell denotes myeloid cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **Myeloid Leukemia**

Myeloid Leukemia denotes a neoplastic condition involving myeloid leukemia; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **myeloid sarcoma**

myeloid sarcoma denotes a neoplastic condition involving myeloid sarcoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **myelolipoma**

myelolipoma refers to myelolipoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myelomonocyte**

myelomonocyte refers to myelomonocyte, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myelopoiesis**

myelopoiesis refers to myelopoiesis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myeloproliferative neoplasm**

myeloproliferative neoplasm denotes a neoplastic condition involving myeloproliferative neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **myelosuppressive therapy**

myelosuppressive therapy is used in relation to myelosuppressive therapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

### **myenteric plexus**

myenteric plexus refers to myenteric plexus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **Myhre syndrome**

Myhre syndrome denotes a clinical condition or finding involving myhre syndrome; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **myoblast**

myoblast refers to myoblast, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myoblastoma**

myoblastoma denotes a neoplastic condition involving myoblastoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **myocardial bridging**

myocardial bridging refers to myocardial bridging, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myocardial contusion**

myocardial contusion refers to myocardial contusion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myocardial reperfusion**

myocardial reperfusion refers to myocardial reperfusion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myoclonic epilepsy**

myoclonic epilepsy refers to myoclonic epilepsy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myoepithelial cell**

myoepithelial cell denotes myoepithelial cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **myoepithelioma**

myoepithelioma refers to myoepithelioma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myofibril**

myofibril refers to myofibril, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myofibrillar myopathy**

myofibrillar myopathy refers to myofibrillar myopathy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myofibroblasts**

myofibroblasts refers to myofibroblasts, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myofibromatosis**

myofibromatosis refers to myofibromatosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **myofilament**

myofilament refers to myofilament, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**myogenesis**

myogenesis denotes myogenesis, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**myogenin**

myogenin refers to myogenin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**myoglobinuria**

myoglobinuria refers to myoglobinuria, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**myokymia**

myokymia refers to myokymia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**myoma**

myoma refers to myoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**myopericytoma**

myopericytoma refers to myopericytoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**myosin atpase**

myosin atpase refers to myosin atpase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**myositis ossifican**

myositis ossifican refers to myositis ossifican, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**myotonic disorder**

myotonic disorder denotes a clinical condition or finding involving myotonic disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**myristic acid**

myristic acid denotes myristic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**myroides**

myroides identifies myroides, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**myroides odoratus**

myroides odoratus identifies myroides odoratus, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**myxococcales**

myxococcales identifies myxococcales, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**myxococcus**

myxococcus is a microorganism or microbial group associated with myxococcus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

---

**Synonyms:**

**myxofibroma**

myxofibroma refers to myxofibroma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**myxoid cyst**

myxoid cyst refers to myxoid cyst, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**myxomycete**

myxomycete refers to myxomycete, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**myxopapillary ependymoma**

myxopapillary ependymoma refers to myxopapillary ependymoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**myxosarcoma**

myxosarcoma denotes a neoplastic condition involving myxosarcoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

It may cause vaginal bleeding, cramping, and an open cervix and requires clinical assessment.

**Synonyms:** Incomplete abortion; incomplete pregnancy loss.

**Muscle pain**

Pain, soreness, or aching in one or more muscles caused by exertion, injury, infection, inflammation, medicines, or an underlying medical condition. **Synonyms:**

**Macular degeneration, dry**

Alternate index label; see *Dry macular degeneration*.

**Synonyms:**

**Macular degeneration, wet**

Alternate index label; see *Wet macular degeneration*.

**Synonyms:**

**Mad cow disease**

Alternate index label; see *Creutzfeldt-Jakob disease*.

**Synonyms:**

**Malignant fibrous histiocytoma**

Alternate index label; see *Undifferentiated pleomorphic sarcoma*. **Synonyms:**

**Mallet toe and hammertoe**

Alternate index label; see *Hammertoe and mallet toe*. **Synonyms:**

**MALS**

Alternate index label; see *Median arcuate ligament syndrome (MALS)*. **Synonyms:**

**MALT lymphoma**

Alternate index label; see *Extranodal marginal zone lymphoma of mucosa-associated lymphoid tissue (MALT)*. **Synonyms:**

**Manic-depressive illness**

Alternate index label; see *Bipolar disorder*. **Synonyms:**

**MASH**

Alternate index label; see *Fatty liver disease (MASLD)*. **Synonyms:**

**MASLD**

Alternate index label; see *Fatty liver disease (MASLD)*. **Synonyms:**

**mCRPC**

Alternate index label; see *Metastatic castration-resistant prostate cancer (mCRPC)*. **Synonyms:**

---

## MD

Alternate index label; see *Muscular dystrophy*. **Synonyms:**

## MDS

Alternate index label; see *Myelodysplastic syndromes*. **Synonyms:**

## ME/CFS

Alternate index label; see *Myalgic encephalomyelitis/chronic fatigue syndrome (ME/CFS)*. **Synonyms:**

## Measles, German

Alternate index label; see *Rubella*. **Synonyms:**

## Medial epicondylitis

Alternate index label; see *Golfer's elbow (Medial epicondylitis)*. **Synonyms:**

## Medial tibial stress syndrome

Alternate index label; see *Shin splints*. **Synonyms:**

## Mediterranean anemia

Alternate index label; see *Thalassemia*. **Synonyms:**

## Melanoma of the eye

Melanoma of the eye concerns melanoma of the eye, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context. **Synonyms:**

## MEN 2

Alternate index label; see *Multiple endocrine neoplasia, type 2 (MEN 2)*. **Synonyms:**

## Meniscus tear

Alternate index label; see *Torn meniscus*. **Synonyms:**

## Metabolic dysfunction-associated steatohepatitis

Alternate index label; see *Fatty liver disease (MASLD)*. **Synonyms:**

## Metabolic dysfunction-associated steatotic liver disease

Alternate index label; see *Fatty liver disease (MASLD)*. **Synonyms:**

## Metastatic colorectal cancer

Alternate index label; see *Stage 4 (metastatic) colon cancer*. **Synonyms:**

## Methicillin-resistant staphylococcus aureus infection

Alternate index label; see *MRSA infection*. **Synonyms:**

## MF

Alternate index label; see *Mycosis fungoides*. **Synonyms:**

## MFS

Alternate index label; see *Myxofibrosarcoma*. **Synonyms:**

## MG

Alternate index label; see *Myasthenia gravis*. **Synonyms:**

## MGUS

Alternate index label; see *Monoclonal gammopathy of undetermined significance (MGUS)*. **Synonyms:**

## Microscopic hematuria

Alternate index label; see *Blood in urine (hematuria)*. **Synonyms:**

## Milk intolerance

Alternate index label; see *Lactose intolerance*. **Synonyms:**

## MISME

Alternate index label; see *NF2-related schwannomatosis (neurofibromatosis type 2)*. **Synonyms:**

## Mono

Alternate index label; see *Mononucleosis*. **Syn-**

---

onyms:

### **MOG antibody-associated disorder**

Alternate index label; see *Myelin oligodendrocyte glycoprotein antibody-associated disease (MOGAD)*.

**Synonyms:**

### **MOGAD**

Alternate index label; see *Myelin oligodendrocyte glycoprotein antibody-associated disease (MOGAD)*.

**Synonyms:**

### **Mucocutaneous lymph node syndrome**

Alternate index label; see *Kawasaki disease*. **Synonyms:**

### **Mucosa-assisted lymphoid tissue lymphoma**

Alternate index label; see *Extranodal marginal zone lymphoma of mucosa-associated lymphoid tissue (MALT)*. **Synonyms:**

### **Multiple inherited schwannomas, meningiomas, and ependymomas**

Alternate index label; see *NF2-related schwannomatosis (neurofibromatosis type 2)*. **Synonyms:**

### **Munchausen syndrome**

Alternate index label; see *Factitious disorder*. **Synonyms:**

### **Myelodysplastic neoplasms**

Alternate index label; see *Myelodysplastic syndromes*. **Synonyms:**

### **MZL**

Alternate index label; see *Marginal zone lymphoma*. **Synonyms:**

### **Macroamylasemia**

Macroamylasemia is a medical condition involving macroamylasemia; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Magnesium blood test**

Magnesium blood test examines magnesium blood test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Magnesium in diet**

Magnesium in diet addresses care related to magnesium in diet, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Major depression with psychotic features**

Major depression with psychotic features concerns major depression with psychotic features; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Make peak flow a habit**

Make peak flow a habit concerns make peak flow a habit; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Make the most of your doctor visit**

Make the most of your doctor visit examines make the most of your doctor visit; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Make time to move**

Make time to move concerns make time to move; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Making everyday tasks easier when you**

---

### **have arthritis**

Making everyday tasks easier when you have arthritis is a medical condition involving making everyday tasks easier when you have arthritis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Malathion poisoning**

Malathion poisoning involves toxic or environmental exposure to malathion poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Male pattern baldness**

Male pattern baldness concerns male pattern baldness; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Malignant otitis externa**

Malignant otitis externa is a medical condition involving malignant otitis externa; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Malignant teratoma of the mediastinum**

Malignant teratoma of the mediastinum concerns malignant teratoma of the mediastinum; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Mallet finger - aftercare**

Mallet finger - aftercare is a treatment or care intervention for mallet finger - aftercare; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Malocclusion of teeth**

Malocclusion of teeth concerns malocclusion of teeth;

its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Mammogram - calcifications**

Mammogram - calcifications examines mammogram - calcifications; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Managing latex allergies at home**

Managing latex allergies at home addresses care related to managing latex allergies at home, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Managing menopause at home**

Managing menopause at home addresses care related to managing menopause at home, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Managing migraines at home**

Managing migraines at home addresses care related to managing migraines at home, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Managing pain during labor**

Managing pain during labor is a medical condition involving managing pain during labor; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Managing tension headaches at home**

Managing tension headaches at home addresses care related to managing tension headaches at home, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

---

**Synonyms:**

### **Managing your blood sugar**

Managing your blood sugar is a medical condition involving managing your blood sugar; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Managing your chronic back pain**

Managing your chronic back pain is a medical condition involving managing your chronic back pain; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Managing your depression - teens**

Managing your depression - teens concerns managing your depression - teens; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Managing your weight gain during pregnancy**

Managing your weight gain during pregnancy addresses care related to managing your weight gain during pregnancy, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Managing your weight with healthy eating**

Managing your weight with healthy eating addresses care related to managing your weight with healthy eating, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Marijuana intoxication**

Marijuana intoxication involves toxic or environmental exposure to marijuana intoxication; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Marine animal stings or bites**

Marine animal stings or bites concerns marine animal stings or bites; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Mastectomy - discharge**

Mastectomy - discharge examines mastectomy - discharge; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Mastectomy and breast reconstruction - what to ask your doctor**

Mastectomy and breast reconstruction - what to ask your doctor examines mastectomy and breast reconstruction - what to ask your doctor; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Mathematics disorder**

Mathematics disorder is a medical condition involving mathematics disorder; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Maximizing your teaching moment**

Maximizing your teaching moment concerns maximizing your teaching moment; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Meatal stenosis**

Meatal stenosis is a medical condition involving meatal stenosis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

---

### **Mechanical ventilator - infants**

Mechanical ventilator - infants is a treatment or care intervention for mechanical ventilator - infants; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Meckel diverticulectomy**

Meckel diverticulectomy examines meckel diverticulectomy; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Meclofenamate overdose**

Meclofenamate overdose involves toxic or environmental exposure to meclufenamate overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Medial epicondylitis - golfer's elbow**

Medial epicondylitis - golfer's elbow is a medical condition involving medial epicondylitis - golfer's elbow; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Mediastinal tumor**

Mediastinal tumor is a medical condition involving mediastinal tumor; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Mediastinoscopy with biopsy**

Mediastinoscopy with biopsy examines mediastinoscopy with biopsy; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Medical marijuana**

Medical marijuana involves toxic or environmental exposure to medical marijuana; dose, route, tim-

ing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Medicine safety - Filling your prescription**

Medicine safety - Filling your prescription addresses care related to medicine safety - filling your prescription, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Medicine safety and children**

Medicine safety and children addresses care related to medicine safety and children, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Medicine safety during your hospital stay**

Medicine safety during your hospital stay addresses care related to medicine safety during your hospital stay, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Medicines for ADHD**

Medicines for ADHD addresses care related to medicines for adhd, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Medicines for back pain**

Medicines for back pain addresses care related to medicines for back pain, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Medicines for osteoporosis**

Medicines for osteoporosis addresses care related to medicines for osteoporosis, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

---

**Synonyms:**

### **Medicines for sleep**

Medicines for sleep addresses care related to medicines for sleep, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Medicines, injections, and supplements for arthritis**

Medicines, injections, and supplements for arthritis examines medicines, injections, and supplements for arthritis; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Meibomianitis**

Meibomianitis is a medical condition involving meibomianitis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Meniere disease - self-care**

Meniere disease - self-care is a treatment or care intervention for meniere disease - self-care; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Meningitis - cryptococcal**

Meningitis - cryptococcal is a medical condition involving meningitis - cryptococcal; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Meningitis - tuberculous**

Meningitis - tuberculous is a medical condition involving meningitis - tuberculous; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Meningocele repair**

Meningocele repair is a treatment or care intervention for meningocele repair; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Meningococcal ACWY vaccine - what you need to know**

Meningococcal ACWY vaccine - what you need to know is a treatment or care intervention for meningococcal acwy vaccine - what you need to know; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Meningococcal B vaccine - what you need to know**

Meningococcal B vaccine - what you need to know is a treatment or care intervention for meningococcal b vaccine - what you need to know; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Meningococcal meningitis**

Meningococcal meningitis is a medical condition involving meningococcal meningitis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Meningococcemia**

Meningococcemia is a medical condition involving meningococcemia; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Meniscal allograft transplantation**

Meniscal allograft transplantation is a treatment or care intervention for meniscal allograft transplantation; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

---

### **Meniscus tears - aftercare**

Meniscus tears - aftercare is a treatment or care intervention for meniscus tears - aftercare; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Mental status testing**

Mental status testing examines mental status testing; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Menthol poisoning**

Menthol poisoning involves toxic or environmental exposure to menthol poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Meperidine hydrochloride overdose**

Meperidine hydrochloride overdose involves toxic or environmental exposure to meperidine hydrochloride overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Meprobamate overdose**

Meprobamate overdose involves toxic or environmental exposure to meprobamate overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Merbromin poisoning**

Merbromin poisoning involves toxic or environmental exposure to merbromin poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Mercuric chloride poisoning**

Mercuric chloride poisoning involves toxic or envi-

ronmental exposure to mercuric chloride poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Mercuric oxide poisoning**

Mercuric oxide poisoning involves toxic or environmental exposure to mercuric oxide poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Merthiolate poisoning**

Merthiolate poisoning involves toxic or environmental exposure to merthiolate poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Mesenteric angiography**

Mesenteric angiography examines mesenteric angiography; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Mesenteric venous thrombosis**

Mesenteric venous thrombosis is a medical condition involving mesenteric venous thrombosis; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Metabolic neuropathies**

Metabolic neuropathies concerns metabolic neuropathies, a body structure, substance, or clinical concept whose meaning depends on location, function, and patient context.

**Synonyms:**

### **Metal cleaner poisoning**

Metal cleaner poisoning involves toxic or environmental exposure to metal cleaner poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

---

**Synonyms:**

### **Metal polish poisoning**

Metal polish poisoning involves toxic or environmental exposure to metal polish poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Metastatic brain tumor**

Metastatic brain tumor is a medical condition involving metastatic brain tumor; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Metastatic pleural tumor**

Metastatic pleural tumor is a medical condition involving metastatic pleural tumor; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Metatarsal fracture (acute) - aftercare**

Metatarsal fracture (acute) - aftercare examines metatarsal fracture (acute) - aftercare; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Metatarsal stress fractures - aftercare**

Metatarsal stress fractures - aftercare examines metatarsal stress fractures - aftercare; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Metatarsus adductus**

Metatarsus adductus examines metatarsus adductus; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Methadone overdose**

Methadone overdose involves toxic or environmental exposure to methadone overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Methamphetamine overdose**

Methamphetamine overdose involves toxic or environmental exposure to methamphetamine overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Methanol test**

Methanol test involves toxic or environmental exposure to methanol test; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Methemoglobinemia - acquired**

Methemoglobinemia - acquired is a medical condition involving methemoglobinemia - acquired; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Methicillin-resistant Staphylococcus aureus (MRSA)**

Methicillin-resistant Staphylococcus aureus (MRSA) concerns methicillin-resistant staphylococcus aureus (mrsa); its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Methyl salicylate overdose**

Methyl salicylate overdose involves toxic or environmental exposure to methyl salicylate overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

---

### **Methylene blue test**

Methylene blue test involves toxic or environmental exposure to methylene blue test; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Methylmalonic acid blood test**

Methylmalonic acid blood test involves toxic or environmental exposure to methylmalonic acid blood test; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Methylmalonic acidemia**

Methylmalonic acidemia involves toxic or environmental exposure to methylmalonic acidemia; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Methylmercury poisoning**

Methylmercury poisoning involves toxic or environmental exposure to methylmercury poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Metopic ridge**

Metopic ridge concerns metopic ridge; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **MIBG scintiscan**

MIBG scintiscan examines mibg scintiscan; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Microalbuminuria test**

Microalbuminuria test examines microalbuminuria test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Middle East Respiratory Syndrome (MERS)**

Middle East Respiratory Syndrome (MERS) is a medical condition involving middle east respiratory syndrome (mers); causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Midline venous catheters - infants**

Midline venous catheters - infants is a treatment or care intervention for midline venous catheters - infants; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Migraine - resources**

Migraine - resources addresses care related to migraine - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Mild to moderate COVID-19 - discharge**

Mild to moderate COVID-19 - discharge is a treatment or care intervention for mild to moderate covid-19 - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Mildew remover poisoning**

Mildew remover poisoning involves toxic or environmental exposure to mildew remover poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Millipede toxin**

Millipede toxin involves toxic or environmental exposure to millipede toxin; dose, route, timing, symptoms, and organ involvement determine urgency and

---

treatment.

**Synonyms:**

### **Mineral oil overdose**

Mineral oil overdose involves toxic or environmental exposure to mineral oil overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Mineral spirits poisoning**

Mineral spirits poisoning involves toxic or environmental exposure to mineral spirits poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Minimally invasive hip replacement**

Minimally invasive hip replacement is a treatment or care intervention for minimally invasive hip replacement; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Minor burns - aftercare**

Minor burns - aftercare is a treatment or care intervention for minor burns - aftercare; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Miscarriage - threatened**

Miscarriage - threatened concerns miscarriage - threatened; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Mistletoe poisoning**

Mistletoe poisoning involves toxic or environmental exposure to mistletoe poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Mitral valve regurgitation**

Mitral valve regurgitation concerns mitral valve regurgitation; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Mitral valve surgery - minimally invasive**

Mitral valve surgery - minimally invasive is a treatment or care intervention for mitral valve surgery - minimally invasive; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Mitral valve surgery - open**

Mitral valve surgery - open is a treatment or care intervention for mitral valve surgery - open; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **MMR (measles, mumps, and rubella) vaccine - what you need to know**

MMR (measles, mumps, and rubella) vaccine - what you need to know is a treatment or care intervention for mmr (measles, mumps, and rubella) vaccine - what you need to know; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **MMRV (measles, mumps, rubella, and varicella) vaccine - what you need to know**

MMRV (measles, mumps, rubella, and varicella) vaccine - what you need to know is a treatment or care intervention for mmrv (measles, mumps, rubella, and varicella) vaccine - what you need to know; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Mohs micrographic surgery**

Mohs micrographic surgery is a treatment or care

---

intervention for mohs micrographic surgery; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Monitoring your baby before labor**

Monitoring your baby before labor examines monitoring your baby before labor; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Mononucleosis spot test**

Mononucleosis spot test examines mononucleosis spot test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Morphine overdose**

Morphine overdose involves toxic or environmental exposure to morphine overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Mouth and neck radiation - discharge**

Mouth and neck radiation - discharge is a treatment or care intervention for mouth and neck radiation - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Mouth sores**

Mouth sores is a medical condition involving mouth sores; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Mouthwash overdose**

Mouthwash overdose involves toxic or environmental exposure to mouthwash overdose; dose, route, timing, symptoms, and organ involvement determine

urgency and treatment.

**Synonyms:**

### **Movement - uncontrollable**

Movement - uncontrollable concerns movement - uncontrollable; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Movement - uncontrolled or slow**

Movement - uncontrolled or slow concerns movement - uncontrolled or slow; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Movement - uncoordinated**

Movement - uncoordinated concerns movement - uncoordinated; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Movement - unpredictable or jerky**

Movement - unpredictable or jerky examines movement - unpredictable or jerky; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Moving a patient from bed to a wheelchair**

Moving a patient from bed to a wheelchair concerns moving a patient from bed to a wheelchair; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **MRI and low back pain**

MRI and low back pain examines mri and low back pain; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

---

**Synonyms:**

### **MSG symptom complex**

MSG symptom complex concerns msg symptom complex; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Mucopolysaccharides**

Mucopolysaccharides is a medical condition involving mucopolysaccharides; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Mucopolysaccharidoses**

Mucopolysaccharidoses is a medical condition involving mucopolysaccharidoses; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Mucopolysaccharidosis type I**

Mucopolysaccharidosis type I is a medical condition involving mucopolysaccharidosis type i; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Mucopolysaccharidosis type II**

Mucopolysaccharidosis type II is a medical condition involving mucopolysaccharidosis type ii; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Mucopolysaccharidosis type III**

Mucopolysaccharidosis type III is a medical condition involving mucopolysaccharidosis type iii; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Mucopolysaccharidosis type IV**

Mucopolysaccharidosis type IV is a medical condition involving mucopolysaccharidosis type iv; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Multiple endocrine neoplasia (MEN) I**

Multiple endocrine neoplasia (MEN) I concerns multiple endocrine neoplasia (men) i; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Multiple endocrine neoplasia (MEN) II**

Multiple endocrine neoplasia (MEN) II concerns multiple endocrine neoplasia (men) ii; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Multiple mononeuropathy**

Multiple mononeuropathy is a medical condition involving multiple mononeuropathy; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Multiple sclerosis - discharge**

Multiple sclerosis - discharge is a treatment or care intervention for multiple sclerosis - discharge; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Multiple sclerosis - resources**

Multiple sclerosis - resources addresses care related to multiple sclerosis - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Multiple system atrophy - cerebellar subtype**

Multiple system atrophy - cerebellar subtype con-

---

cerns multiple system atrophy - cerebellar subtype; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Multiple system atrophy - parkinsonian type**

Multiple system atrophy - parkinsonian type concerns multiple system atrophy - parkinsonian type; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

### **Multiple vitamin overdose**

Multiple vitamin overdose involves toxic or environmental exposure to multiple vitamin overdose; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Munchausen syndrome by proxy**

Munchausen syndrome by proxy is a medical condition involving munchausen syndrome by proxy; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Muscle aches**

Muscle aches is a medical condition involving muscle aches; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Muscle biopsy**

Muscle biopsy examines muscle biopsy; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Muscle cramps**

Muscle cramps is a medical condition involving muscle cramps; causes, affected organs, severity, compli-

cations, and treatment are determined by clinical assessment.

**Synonyms:**

### **Muscle disorder**

Muscle disorder is a medical condition involving muscle disorder; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Muscle function loss**

Muscle function loss examines muscle function loss; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Muscle strain treatment**

Muscle strain treatment is a treatment or care intervention for muscle strain treatment; indication, preparation, risks, technical details, and recovery depend on the patient and goal.

**Synonyms:**

### **Muscle twitching**

Muscle twitching is a medical condition involving muscle twitching; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Muscular dystrophy - resources**

Muscular dystrophy - resources addresses care related to muscular dystrophy - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Myalgic encephalomyelitis/chronic fatigue syndrome (ME/CFS)**

Myalgic encephalomyelitis/chronic fatigue syndrome (ME/CFS) is a medical condition involving myalgic encephalomyelitis/chronic fatigue syndrome (me/cfs); causes, affected organs, severity, compli-

---

cations, and treatment are determined by clinical assessment.

**Synonyms:**

### **Myasthenia gravis - resources**

Myasthenia gravis - resources addresses care related to myasthenia gravis - resources, including practical measures, warning signs, follow-up, and decisions to discuss with a clinician.

**Synonyms:**

### **Mycobacterial culture**

Mycobacterial culture examines mycobacterial culture; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Myocardial biopsy**

Myocardial biopsy examines myocardial biopsy; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Myocarditis - pediatric**

Myocarditis - pediatric is a medical condition involving myocarditis - pediatric; causes, affected organs, severity, complications, and treatment are determined by clinical assessment.

**Synonyms:**

### **Myoglobin blood test**

Myoglobin blood test examines myoglobin blood test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Myoglobin urine test**

Myoglobin urine test examines myoglobin urine test; interpretation depends on the specimen or body region, test method, reference range, and clinical question.

**Synonyms:**

### **Myristica oil poisoning**

Myristica oil poisoning involves toxic or environmental exposure to myristica oil poisoning; dose, route, timing, symptoms, and organ involvement determine urgency and treatment.

**Synonyms:**

### **Myths about drinking alcohol**

Myths about drinking alcohol concerns myths about drinking alcohol; its medical significance is established from the defining features, setting, associated findings, and clinical question.

**Synonyms:**

## N

### N-Acetylcysteine

An antidote that replenishes glutathione and enhances detoxification of the toxic metabolite of acetaminophen. It is most effective when started early but may benefit patients with delayed presentation or established liver injury under specialist guidance.

**Synonyms:**

### Nanograms Per Milliliter

A concentration unit equal to one-billionth of a gram per milliliter. **Synonyms:** ng/mL

### Nasolabial Folds

Skin creases running from the sides of the nose toward the corners of the mouth. **Synonyms:** Smile lines

### Natural Killer Cells

Immune cells that destroy infected or abnormal cells without prior exposure to a specific antigen. **Synonyms:** NK cells

### Natural Recoverers

People who overcome an addiction without formal treatment or self-help programs. **Synonyms:**

### Needle Biopsy

Removal of a small tissue sample through a hollow needle for microscopic examination. **Synonyms:**

### Neonatal

Relating to a newborn, especially during the first 28 days after birth. **Synonyms:**

### Nerve Sparing

Surgical preservation of nerves needed for erectile function, especially during prostate surgery. **Synonyms:**

### Neuritic Plaques

Abnormal deposits of beta-amyloid surrounded by damaged nerve processes in Alzheimer disease. **Synonyms:** Amyloid plaques

### Neurofibrillary Tangles

Twisted tau-protein fibers inside damaged neurons, characteristic of Alzheimer disease. **Synonyms:** Tau tangles

### Neuroleptic Agents

Antipsychotic medicines used to treat disorders such as schizophrenia. **Synonyms:** Antipsychotics

### Neurologist

A physician specializing in disorders of the brain, spinal cord, nerves, and muscles. **Synonyms:**

### Neuropeptides

Short chains of amino acids that act as signaling molecules in the nervous system. **Synonyms:**

### Neurotransmitter Receptors

Cell proteins that recognize neurotransmitters and alter cell activity when bound. **Synonyms:**

### Neutral Alignment

A posture in which the body is arranged in a straight, balanced line while preserving normal spinal curves. **Synonyms:**

---

### Nonproliferative Retinopathy

Retinal disease in which small vessels leak or become damaged without abnormal new-vessel growth.

**Synonyms:** Background retinopathy

### Non-REM Sleep

Sleep stages that do not include rapid eye movements, including deep slow-wave sleep. **Synonyms:** NREM sleep

### Noradrenaline

A hormone and neurotransmitter involved in alertness, stress responses, and blood-vessel constriction.

**Synonyms:** Norepinephrine

### Norepinephrine

A hormone and neurotransmitter that supports alertness, heart function, and the stress response.

**Synonyms:** Noradrenaline

### NSAID

A nonsteroidal anti-inflammatory drug used to reduce pain, fever, and inflammation. **Synonyms:** Nonsteroidal anti-inflammatory drug

### Nuclear Tests

Diagnostic tests using small amounts of radioactive material to assess organs or identify disease.

**Synonyms:** Nuclear medicine tests

### Nutraceutical

A concentrated food-derived product marketed for health benefits beyond basic nutrition. **Synonyms:**

### Nutrients

Substances obtained from food that the body needs for energy, growth, repair, and regulation. **Synonyms:**

### Na<sup>+</sup>/K<sup>+</sup> ATPase

The sodium-potassium pump is a P-type ATPase found in the plasma membrane of all animal cells, directly consuming approximately 20-30 percent of cellular ATP. It pumps 3 Na<sup>+</sup> ions out of the cell and 2 K<sup>+</sup> ions in per ATP hydrolyzed, establishing

steep electrochemical gradients: high Na<sup>+</sup> outside, high K<sup>+</sup> inside.

**Synonyms:**

### Nabothian Cyst

A benign mucus-retention cyst of the uterine cervix caused by obstruction of an endocervical gland. It is common, usually asymptomatic, and generally requires no treatment.

**Synonyms:**

### NAD<sup>+</sup>

Nicotinamide adenine dinucleotide in its oxidized form, a coenzyme that carries electrons in cellular energy metabolism.

**Synonyms:**

### NAD<sup>+</sup> (Nicotinamide Adenine Dinucleotide)

Coenzyme involved in redox reactions, existing in oxidized (NAD<sup>+</sup>) and reduced (NADH) forms. Accepts electrons and hydrogen (NAD<sup>+</sup> + 2e<sup>-</sup> + H<sup>+</sup> → NADH). Key roles: glycolysis (glyceraldehyde-3-phosphate dehydrogenase), TCA cycle (isocitrate, alpha-ketoglutarate, malate dehydrogenases), beta-oxidation.

**Synonyms:** Nicotinamide Adenine Dinucleotide

### Nadir

The lowest point, particularly referring to the lowest white blood cell count after chemotherapy. Bone marrow suppression typically reaches nadir 7-14 days post-treatment. Important for infection risk assessment.

**Synonyms:**

### Naegele Rule

A formula for estimating the due date (estimated date of delivery, EDD): add 7 days to the first day of the last menstrual period (LMP), then add 9 months (or subtract 3 months). Example: LMP January 1 yields EDD October 8. Assumes a 28-day cycle with ovulation on day 14. The rule is most accurate with regular cycles and confirmed LMP.

**Synonyms:**

---

## Naegleria Fowleri

A free-living amoeba that can cause primary amoebic meningoencephalitis after contaminated water enters the nose. The infection is rare but rapidly progressive, with fever, severe headache, meningism, altered consciousness, seizures, and high mortality.

**Synonyms:**

## Naegleria Infection

A rare infection caused by the free-living amoeba *Naegleria fowleri*, usually acquired when contaminated warm fresh water enters the nose. It can cause rapidly progressive primary amoebic meningoencephalitis with severe headache, fever, vomiting, confusion, seizures, and coma. It is a medical emergency.

**Synonyms:**

## Nail

A protective plate of hardened keratin covering the dorsal surface of the distal phalanges of the fingers and toes.

**Synonyms:**

## Nail Changes

Alterations in nail color, shape, texture, or attachment that may result from local injury, skin disease, infection, medicines, nutritional deficiency, or systemic illness. Their significance depends on the pattern and other clinical findings.

**Synonyms:**

## Nail Clubbing

Abnormal enlargement of the distal digit with increased nail curvature and loss of the normal nail-fold angle. It may be familial or associated with pulmonary, cardiovascular, gastrointestinal, or malignant disease and should be interpreted with the clinical context.

**Synonyms:**

## Nail Infection

Infection of the nail or surrounding tissue, commonly caused by fungi or bacteria. It may cause thickening, discoloration, separation of the nail, pain, swelling,

or drainage; diabetes and poor circulation increase the risk of complications.

**Synonyms:**

## Nail Pits

Small, sharply circumscribed depressions in the nail plate caused by abnormal focal keratinization of the proximal nail matrix. They are classically associated with psoriasis but may also occur in alopecia areata, eczema, lichen planus, or other nail disorders.

**Synonyms:**

## Nail Psoriasis

Nail psoriasis affects 50 percent of patients with psoriasis and 80 percent with nail involvement having joint disease. Features include pitting (most common), onycholysis (nail separation), oil drop sign (salmon patch), subungual hyperkeratosis, and nail plate crumbling. Nail psoriasis is associated with psoriatic arthritis.

**Synonyms:**

## Nanocolloid

Tc-99m labeled colloidal particles for lymphatic imaging. Particle size 10-100 nm. Used for sentinel node detection.

**Synonyms:**

## Narcissistic Personality Disorder

A pattern of grandiosity, need for admiration, and lack of empathy.

**Synonyms:**

## Narcolepsy

A chronic sleep disorder characterized by excessive daytime sleepiness and irresistible sleep attacks, with or without cataplexy (sudden bilateral loss of muscle tone triggered by strong emotions). Narcolepsy type 1: with cataplexy, caused by loss of hypocretin/orexin neurons in the hypothalamus.

**Synonyms:**

## Narrow angle glaucoma

Anatomical narrowing of the anterior chamber angle due to relative pupillary block or a shallow ante-

---

rior chamber, creating risk for angle closure and acute intraocular pressure elevation. Identified on gonioscopy, it may be managed with laser peripheral iridotomy to equalise pressure between the posterior and anterior chambers.

**Synonyms:**

### **Narrow Therapeutic Index**

A drug characteristic where there is a small difference between the therapeutic dose and the toxic dose, requiring careful dosing and therapeutic drug monitoring to ensure efficacy while avoiding toxicity. Narrow therapeutic index drugs have a therapeutic index <2-3 (the ratio of toxic dose to effective dose).

**Synonyms:**

### **Narrow-Complex Tachycardia**

A rapid cardiac rhythm with QRS complexes of normal or near-normal width, usually arising above the ventricles.

**Synonyms:**

### **Narrowband UVB Phototherapy**

Controlled exposure to ultraviolet B light centered near 311–313 nm for inflammatory or pigmentary skin disease. It is used for psoriasis, vitiligo, eczema, and other selected conditions with eye protection, cumulative-dose monitoring, and skin-cancer risk assessment.

**Synonyms:**

### **Nasal Cannula**

A device with two small prongs placed in the nostrils to deliver supplemental oxygen. The flow rate is adjusted to the patient's needs and the device used.

**Synonyms:**

### **Nasal Cavity**

The paired space inside the nose, extending from the nostrils to the nasopharynx. It warms, humidifies, and filters inspired air and contains the receptors responsible for smell.

**Synonyms:**

### **Nasal Congestion**

A sensation of nasal stuffiness or obstruction from engorgement of the venous sinusoids within the nasal mucosa, especially the inferior turbinates; a symptom shared by many conditions.

**Synonyms:**

### **Nasal Endoscopy**

Direct endoscopic inspection of the nasal passages, turbinates, septum, sinus drainage pathways, and nasopharynx. It is useful for chronic rhinosinusitis, unilateral obstruction, epistaxis, polyps, foreign bodies, and suspected neoplasia.

**Synonyms:**

### **Nasal Flaring**

Widening and outward movement of the nostrils during breathing. It is a visible sign of increased work of breathing, particularly in infants and children, and may accompany airway obstruction, bronchiolitis, pneumonia, asthma, or severe systemic illness.

**Synonyms:**

### **Nasal Implant**

A device placed in or near the nose to support nasal structures or improve airflow. Its purpose depends on the device and condition.

**Synonyms:**

### **Nasal Obstruction**

Blocked airflow through one or both nasal passages. Causes include congestion, allergy, infection, a deviated septum, polyps, trauma, or a mass. Persistent one-sided obstruction or bleeding requires medical evaluation.

**Synonyms:**

### **Nasal Polyps**

Benign, pedunculated, edematous outgrowths of the sinus and nasal mucosa that arise most commonly from the ethmoidal sinuses and protrude into the nasal cavity through the middle meatus, causing nasal obstruction, anosmia (loss of smell), and rhinorrhea.

**Synonyms:**

---

### Nasal Septal Hematoma

A collection of blood between the nasal septal cartilage and its perichondrium, usually after nasal trauma. It causes nasal obstruction and a soft fluctuant septal swelling and requires urgent drainage to prevent cartilage necrosis and saddle-nose deformity.

**Synonyms:**

### Nasal Septum

The wall that divides the nasal cavity into right and left sides. It consists mainly of cartilage in front and bone behind and helps support the nose and direct airflow.

**Synonyms:**

### Nasal Stent

Support for nasal septum/airway. Materials: silicone, metal. Indications: septal hematoma, post-septoplasty support, nasal valve collapse. Complications: crusting, infection, pressure necrosis.

**Synonyms:**

### Nasogastric Tube

A tube passed through the nose into the stomach to remove contents or deliver nutrition, fluids, or medicines when clinically indicated.

**Synonyms:**

### Nasopharyngeal Airway

A soft tube inserted through the nose to maintain a passage between the nares and pharynx. It may be useful in a spontaneously breathing patient with partial upper-airway obstruction but is relatively contraindicated in suspected basal skull fracture or significant nasal trauma.

**Synonyms:**

### Nasopharyngeal Carcinoma

A malignancy arising from the epithelial lining of the nasopharynx, and it has a unique geographical and ethnic distribution, with highest incidence in southern China, Southeast Asia, and North Africa.

**Synonyms:**

### Natal Teeth

Teeth present at birth, most often involving the lower central incisors. They may be loose, interfere with feeding, or injure the infant's tongue and require dental assessment.

**Synonyms:**

### Natural Killer Cell

A type of innate lymphoid cell (lymphocyte) that provides early defense against virus-infected cells and tumor cells without prior sensitization. NK cells recognize stressed or missing-self cells (absent or altered MHC class I) and kill them by releasing perforin and granzymes, or through antibody-dependent cellular cytotoxicity.

**Synonyms:**

### Nausea

An unpleasant sensation of an impending need to vomit, often accompanied by autonomic symptoms such as salivation, sweating, pallor, or dizziness. Common causes include gastrointestinal illness, pregnancy, medication effects, migraine, vestibular disorders, metabolic disease, and serious abdominal or neurologic conditions.

**Synonyms:**

### Navicular

Boat-shaped tarsal bone between talus and three cuneiforms. Navicular tuberosity is a palpable medial prominence serving as posterior tibial tendon insertion, key medial longitudinal arch stabilizer. Central third has a precarious blood supply, susceptible to stress fractures and avascular necrosis (Kohler disease in children).

**Synonyms:**

### NDM-1

New Delhi metallo-beta-lactamase-1, an enzyme that allows certain bacteria to resist many beta-lactam antibiotics, including carbapenems. NDM-1-producing organisms can cause difficult-to-treat urinary, wound, bloodstream, or lung infections. Laboratory susceptibility testing and strict infection-control measures are essential.

---

**Synonyms:**

### Near Miss

A patient-safety event that could have caused harm but did not, either by chance or because it was intercepted. Reporting and analyzing near misses can identify system vulnerabilities before harm occurs.

**Synonyms:**

### Nearsightedness

A refractive error, also called myopia, in which distant objects appear blurred because light focuses in front of the retina. It is corrected with diverging lenses, contact lenses, or refractive surgery.

**Synonyms:** myopia, in which distant objects appear blurred because.

### Nebulizer

A device that converts liquid medications into a mist for inhalation. Used for bronchodilators (albuterol, ipratropium) and corticosteroids in acute exacerbations. More effective than MDI in patients with severe obstruction.

**Synonyms:**

### Neck Cancer

Human papillomavirus, particularly HPV-16, is an increasingly important etiological factor in head and neck squamous cell carcinoma, particularly oropharyngeal cancer, and it is responsible for the rising incidence of oropharyngeal cancer in younger patients without traditional risk factors of tobacco and alcohol use.

**Synonyms:**

### Neck Pain

Pain or stiffness in the cervical region, commonly caused by muscle strain, degenerative disease, poor posture, or injury. Severe pain after trauma or pain with weakness, numbness, fever, or neurologic deficits requires prompt assessment.

**Synonyms:**

### Necrobiosis Lipoidica

A chronic inflammatory skin disorder characterized

by yellow-brown, atrophic plaques, usually on the shins. It is associated with diabetes but can occur without diabetes.

**Synonyms:**

### Necrobiosis lipoidica diabetorum

A chronic granulomatous skin disorder most commonly associated with diabetes mellitus, presenting as well-demarcated, atrophic, yellow-brown plaques with telangiectasia, typically on the pretibial area. The plaques have a waxy, glazed appearance with a violaceous border. Ulceration occurs in approximately 35 percent of cases.

**Synonyms:**

### Necrolytic migratory erythema

A recurrent, erosive, erythematous eruption that often affects periorificial and intertriginous skin. It is classically associated with glucagonoma but may have other causes, so evaluation should consider nutritional, hepatic, pancreatic, and metabolic disease.

**Synonyms:**

### Necropsy

A post-mortem examination of an animal or human body to determine disease or cause of death.

**Synonyms:**

### Necroptosis

A regulated, programmed form of necrosis that shares features of both classical necrosis and apoptosis, serving as a backup cell death mechanism when apoptosis is inhibited. It is particularly important during viral infections, as many viruses encode proteins that block caspase-mediated apoptosis to ensure their own replication.

**Synonyms:**

### Necrosis

Cell death caused by severe injury or disease, often with loss of membrane integrity and release of cellular contents. It commonly provokes inflammation, although the appearance and inflammatory response vary with the cause and tissue.

---

**Synonyms:**

### **Necrotizing anterior scleritis**

A severe, sight-threatening form of scleral inflammation characterised by ischaemic necrosis of the sclera with visible underlying uvea through thinned, grey-white scleral patches.

**Synonyms:**

### **Necrotizing Enterocolitis**

An acquired inflammatory disease that can cause intestinal necrosis, primarily affecting premature infants. Risk factors include prematurity, enteral feeding, and bacterial colonization. It may cause abdominal distension, bloody stools, bilious vomiting, and feeding intolerance. Pneumatosis intestinalis on imaging strongly supports the diagnosis but must be interpreted with the clinical findings.

**Synonyms:**

### **Necrotizing Fasciitis**

A life-threatening soft tissue infection characterized by rapid necrosis of the subcutaneous fascia and subcutaneous tissue, with relative sparing of the overlying skin in early stages. It is a surgical emergency requiring immediate wide surgical debridement and broad-spectrum antibiotics.

**Synonyms:**

### **Necrotizing Soft Tissue Infection**

A rapidly progressive infection of fascia, subcutaneous tissue, or muscle causing severe pain, swelling, systemic toxicity, and tissue necrosis. It is a surgical emergency requiring immediate assessment, broad antimicrobial therapy, and aggressive debridement.

**Synonyms:**

### **Needle**

Hollow metal tube for fluid withdrawal or injection. Gauge: larger number = smaller diameter. Common gauges: 18G (blood draw), 22G (IV), 25-27G (injection).

**Synonyms:**

### **Needle Driver**

Instrument for passing suture needle through tissue.

**Synonyms:**

### **Needle Driver (Perineal)**

A hand instrument used to hold and guide a suture needle during a perineal repair.

**Synonyms:** Perineal

### **Needle Driver (Vascular)**

A hand instrument used to hold and guide a suture needle during vascular repair.

**Synonyms:** Vascular

### **Needle Holder**

A surgical instrument with jaws used to grasp and guide a suture needle during tissue repair.

**Synonyms:**

### **Negative Feedback**

A regulatory mechanism in which the output of a system feeds back to decrease or reverse the initiating stimulus, maintaining homeostasis around a set point.

**Synonyms:**

### **Negative Predictive Value**

The probability that a person with a negative test result truly does not have the target condition. NPV varies with disease prevalence or pretest probability and is not an intrinsic fixed property of a test.

**Synonyms:**

### **Negative Pressure Ventilation**

Ventilation using negative pressure applied around the chest wall to expand the lungs, as opposed to positive pressure applied to the airway. The “iron lung” is a historical example. Modern negative pressure ventilators include the cuirass and wrap. They are rarely used today but may be useful in neuromuscular disease.

**Synonyms:**

---

## Negative Symptoms

Reduced or absent normal emotional, motivational, cognitive, or social functions, including affective flattening, alogia, avolition, anhedonia, and asociality. Persistent negative symptoms can substantially impair functional recovery.

**Synonyms:**

## Neglect

A form of child maltreatment: the failure to provide for a child's basic needs—physical (food, clothing, shelter, medical care), educational, or emotional—causing harm or risk of harm. Features: failure to thrive, poor hygiene, untreated illness/injury, missed healthcare appointments, inadequate supervision, and developmental delay.

**Synonyms:**

## Neglect Syndrome

Hemispatial neglect (unilateral neglect, hemineglect) is a neurological condition characterized by failure to attend to, respond to, or orient toward stimuli on the side of space contralateral to the brain lesion, in the absence of primary sensory or motor deficits sufficient to explain the neglect.

**Synonyms:**

## Neisseria gonorrhoeae

A gram-negative diplococcus that causes gonorrhea, a sexually transmitted infection. The organism has developed resistance to many antibiotics including fluoroquinolones and macrolides.

**Synonyms:**

## Neisseria meningitidis

A gram-negative diplococcus that causes meningitis and meningococcemia. The organism has a polysaccharide capsule that is the target of conjugate vaccines. Serogroups A, B, C, W, X, and Y cause most disease. Meningitis presents with fever, headache, neck stiffness, and altered mental status.

**Synonyms:**

## Nelson Syndrome

Enlargement and hypersecretion of an

adrenocorticotrophic-hormone-producing pituitary tumour after bilateral adrenalectomy, usually for Cushing disease. It may cause rapid skin hyperpigmentation, headache, visual-field loss, and other effects of an expanding sellar mass.

**Synonyms:**

## Neoadjuvant Therapy

Treatment before primary treatment to shrink tumor. Examples: chemotherapy before surgery.

**Synonyms:**

## Neonatal Abstinence Syndrome

A withdrawal syndrome in neonates following in utero exposure to opioids (most common) or other substances (benzodiazepines, SSRIs, alcohol). Onset within 24-72 hours of birth (varies by half-life of substance).

**Synonyms:**

## Neonatal Cephalohematoma

A collection of blood beneath the periosteum of a newborn's skull, usually caused by birth trauma. It is limited by skull sutures and generally resolves over time, although it requires assessment for associated injury or jaundice.

**Synonyms:**

## Neonatal Conjunctivitis

Inflammation of the conjunctiva during the first month of life, caused by chemical irritation, bacteria, or viruses acquired during delivery. Purulent discharge, eyelid swelling, and corneal involvement require urgent evaluation.

**Synonyms:**

## Neonatal Diabetes Mellitus

Diabetes diagnosed within the first six months of life. Can be transient or permanent. Transient neonatal diabetes mellitus is caused by abnormalities at chromosome 6q24 and usually resolves but may relapse in adolescence.

**Synonyms:**

---

### Neonatal Herpes Simplex

Herpes simplex virus infection in the first 28 days of life, usually HSV-2 from maternal genital infection. Three forms: skin, eye, and mouth disease; CNS disease; and disseminated disease. Disseminated form mimics sepsis with high mortality. Diagnosis by viral PCR, culture, or Tzanck smear. Treatment: IV acyclovir for 14-21 days.

**Synonyms:**

### Neonatal herpes simplex virus

A severe neonatal infection caused by herpes simplex virus, typically acquired during passage through the birth canal, presenting within the first month of life as skin, eye, and mouth disease, central nervous system disease, or disseminated disease with multiorgan involvement.

**Synonyms:**

### Neonatal hyperbilirubinemia

Elevated unconjugated bilirubin levels in newborns exceeding 5 mg per deciliter, potentially causing jaundice and, if severe, kernicterus with neurological damage. Phototherapy is the standard treatment.

**Synonyms:**

### Neonatal Hypoglycemia

Blood glucose less than 40-45 mg/dL in term infants or less than 25 mg/dL in preterm infants. Risk factors include prematurity, small for gestational age, large for gestational age, and maternal diabetes. Presents with jitteriness, lethargy, poor feeding, and seizures. Treatment: early feeding, IV dextrose infusion, and monitoring.

**Synonyms:**

### Neonatal Hypocalcemia

Low serum calcium in a newborn, which may cause jitteriness, poor feeding, hypotonia, apnea, or seizures. Causes include prematurity, maternal diabetes, birth asphyxia, and disorders of parathyroid function.

**Synonyms:**

### Neonatal Hypothermia

Core body temperature below 36.5 degrees Celsius in a newborn. Classified as mild (36-36.4), moderate (32-35.9), or severe (below 32). Occurs due to rapid heat loss through evaporation, convection, conduction, and radiation. Prevention: skin-to-skin contact, drying, warm environment, and delayed bathing.

**Synonyms:**

### Neonatal Polycythemia

An abnormally high red-cell concentration in a newborn, often defined by a venous hematocrit of at least 65 percent. It may increase blood viscosity and cause respiratory, neurologic, or metabolic symptoms.

**Synonyms:**

### Neonatal Hypoxic-Ischemic Encephalopathy

Brain dysfunction in a newborn caused by inadequate oxygenation and/or cerebral blood flow around the time of birth. Moderate or severe HIE may produce altered consciousness, abnormal tone, seizures, and multiorgan injury; selected term or near-term infants may benefit from early therapeutic hypothermia.

**Synonyms:**

### Neonatal Infections

Early-onset sepsis (EOS, <72h): GBS, E. coli, Listeria. Risk factors: maternal GBS+, chorioamnionitis, PROM >18h. Kaiser sepsis calculator for management. Late-onset sepsis (LOS, >72h): CoNS, S. aureus, gram-negatives, Candida. NEC: prematurity, formula feeding, ischemic gut. Pneumatosis intestinalis, portal venous gas.

**Synonyms:**

### Neonatal Jaundice

Yellow discoloration of a newborn's skin or eyes caused by elevated bilirubin. It is common but may require treatment or investigation when severe, early, or prolonged.

**Synonyms:**

---

### Neonatal Jaundice (Jaundice of the Newborn)

Yellow discoloration of a newborn's skin or eyes caused by elevated bilirubin. It is often physiologic but requires assessment when severe, early, rapidly increasing, or prolonged.

**Synonyms:** Jaundice of the Newborn

### Neonatal Resuscitation

The systematic approach to stabilizing a newborn after delivery, guided by the Neonatal Resuscitation Program (NRP).

**Synonyms:**

### Neonatal Sepsis

Systemic bacterial infection in the first 28 days of life, classified as early-onset (within 72 hours, usually from vertical transmission) or late-onset (after 72 hours, often nosocomial). Common organisms: Group B Streptococcus, E. coli, Listeria.

**Synonyms:**

### Neonatal Skin Conditions

Common and usually benign. Erythema toxicum neonatorum (red papules and pustules on erythematous base, appears day 2 to 3, resolves by 2 weeks). Milia (tiny white cysts on nose and cheeks). Miliaria crystallina (clear vesicles from sweat duct obstruction). Sebaceous hyperplasia (yellow papules on nose and cheeks).

**Synonyms:**

### Neonatal thyrotoxicosis

Transient hyperthyroidism in newborns caused by transplacental transfer of maternal thyroid-stimulating immunoglobulins, presenting with tachycardia, irritability, and poor weight gain in the first weeks of life.

**Synonyms:**

### Neonatal Transition

The physiologic adaptation from placental gas exchange to pulmonary respiration after birth. It includes lung aeration, falling pulmonary vascular resistance, closure of fetal circulatory shunts, and

changes in cardiac output and thermoregulation.

**Synonyms:**

### Neonatologist

A pediatrician who specializes in the medical care of newborn infants, particularly premature and critically ill neonates.

**Synonyms:**

### Neoplasm

Abnormal growth of tissue, may be benign or malignant. Benign neoplasms: localized, slow-growing, do not metastasize. Malignant neoplasms (cancer): invasive, metastasize, can be fatal. Classification: carcinoma (epithelial origin), sarcoma (mesenchymal origin), leukemia (hematopoietic), lymphoma (lymphoid).

**Synonyms:**

### Nephrectomy

Surgical removal of a kidney. Radical nephrectomy: kidney + Gerota fascia + adrenal gland (for renal cell carcinoma). Partial nephrectomy (nephron-sparing): for small renal tumors (<7 cm, renal function preservation). Simple nephrectomy: for benign disease (non-functioning kidney, chronic infection, massive hydronephrosis).

**Synonyms:**

### Nephritic Syndrome

Characterized by hematuria with dysmorphic RBCs and RBC casts, oliguria, hypertension, and mild proteinuria less than 3.5 g/day. Results from glomerular inflammation increasing permeability to cells and reducing GFR. Hypertension from sodium and water retention.

**Synonyms:**

### Nephroblastoma

Wilms tumor, a malignant embryonal renal tumor of childhood that commonly presents as an asymptomatic abdominal mass.

**Synonyms:**

---

## Nephrocalcinosis

Deposition of calcium salts within the renal parenchyma, often caused by hypercalcemia, hypercalciuria, distal renal tubular acidosis, prematurity, or inherited disorders. It may impair renal concentrating ability and progress to chronic kidney disease.

**Synonyms:**

## Nephrogenic Diabetes Insipidus

Inability of the renal collecting ducts to respond adequately to antidiuretic hormone, causing excessive dilute urine production and intense thirst. Causes include inherited defects, chronic kidney disease, electrolyte disorders, and medication exposure.

**Synonyms:**

## Nephrogenic fibrosing dermopathy

A rare fibrosing disorder of the skin causing thickening and hardening, primarily of the extremities and trunk, associated with kidney failure and gadolinium-based contrast exposure.

**Synonyms:**

## Nephrogenic Systemic Fibrosis

A rare fibrosing disorder associated mainly with exposure to certain gadolinium contrast agents in people with severe kidney impairment.

**Synonyms:**

## Nephrolithiasis

Formation of stones in the urinary tract. Calcium-containing stones are common, but stone composition varies and may include uric acid, struvite, or cystine. Risk factors include dehydration, hypercalciuria, hyperoxaluria, hypocitraturia, and low urine volume. Evaluation includes 24-hour urine analysis.

**Synonyms:**

## Nephron

Functional unit of the kidney comprising the glomerulus, proximal tubule, loop of Henle, distal tubule, and collecting duct. Each kidney contains approximately one million nephrons responsible for filtering blood, reabsorbing solutes and water, and

excreting waste to form urine.

**Synonyms:**

## Nephron Function

The nephron is the functional unit of the kidney, with approximately 1 million per kidney. Each nephron consists of a renal corpuscle (glomerulus and Bowman's capsule) and a renal tubule (proximal convoluted tubule, loop of Henle, distal convoluted tubule, and collecting duct).

**Synonyms:**

## Nephronophthisis

An autosomal-recessive tubulointerstitial kidney disease causing progressive loss of concentrating ability, polyuria, polydipsia, anemia, and chronic kidney failure. It may be isolated or part of a ciliopathy with retinal, skeletal, hepatic, or neurological manifestations.

**Synonyms:**

## Nephropathy

Disease or damage of the kidneys, which may impair filtration, fluid balance, or other kidney functions.

**Synonyms:**

## Nephrostomy

An artificial opening created between the kidney and the skin to drain urine directly when the normal pathway is blocked. See urology.

**Synonyms:**

## Nephrostomy Tube

A percutaneously placed catheter in the renal pelvis to drain urine, bypassing a ureteral obstruction. Indications: ureteral obstruction (calculus, tumor, stricture) causing hydronephrosis, pyonephrosis (infected, obstructed kidney — emergency drainage), and as a temporary measure before definitive surgery.

**Synonyms:**

## Nephrotic Range Proteinuria

Protein excretion greater than 3.5 g/day or urine protein-to-creatinine ratio greater than 3.5 g/g. Re-

---

flects severe glomerular damage with significant protein loss. Degree correlates with severity of injury and risk of complications including thromboembolism, infection, and progression to ESRD.

**Synonyms:**

### **Nephrotic Syndrome**

Clinical constellation of heavy proteinuria greater than 3.5 g/day, hypoalbuminemia less than 3.0 g/dL, generalized edema, hyperlipidemia, and lipiduria. Results from increased glomerular permeability to albumin. Reduced oncotic pressure causes fluid extravasation. Hepatic lipoprotein synthesis increases causing hyperlipidemia.

**Synonyms:**

### **Nephrotoxicity**

Kidney damage from toxins, drugs, contrast. Amino-glycosides, cisplatin, contrast media, ethylene glycol. Monitoring: creatinine, urine output. Prevention: hydration, dose adjustment.

**Synonyms:**

### **Nerve**

A bundle of axons (nerve fibers) surrounded by connective tissue sheaths that transmits electrical impulses between the central nervous system and the periphery. Structure: epineurium (outer layer), perineurium (surrounds fascicles), endoneurium (surrounds individual axons).

**Synonyms:**

### **Nerve Conduction Studies**

Measurement of the speed and amplitude of electrical impulses along peripheral nerves. Sensory NCS: stimulate at one point, record distally. Motor NCS: stimulate at two or more points along the nerve, record from muscle. Parameters: conduction velocity (m/s), amplitude (microvolts/millivolts), and distal latency.

**Synonyms:**

### **Nerve Conduction Study**

A diagnostic test that measures the speed and strength of electrical signals traveling through a

nerve to detect nerve damage or dysfunction.

**Synonyms:**

### **Nervous Tissue**

The tissue of the nervous system, composed of neurons and supporting cells, that detects stimuli and transmits electrical signals.

**Synonyms:**

### **Nettle Rash**

Urticaria, an itchy eruption of transient raised wheals caused by release of inflammatory mediators in the skin.

**Synonyms:**

### **Neural Tube Defects**

Congenital malformations resulting from failure of the neural tube to close during the third to fourth week of gestation. Include anencephaly (incomplete cranial closure), encephalocele (herniation through skull defect), and spina bifida (incomplete spinal closure).

**Synonyms:**

### **Neuralgia**

Pain caused by irritation or damage to a peripheral or cranial nerve, typically described as sharp, burning, stabbing, or electric-shock-like and occurring along the nerve's distribution. It may be triggered by light touch or movement and can result from compression, trauma, infection, metabolic disease, or demyelination.

**Synonyms:**

### **Neuraminidase Inhibitors**

A class of antiviral drugs that inhibit the neuraminidase enzyme on the surface of influenza viruses, preventing the release of newly formed viral particles from infected cells and thereby limiting viral spread. The two available agents are oseltamivir, administered orally, and zanamivir, administered by inhalation.

**Synonyms:**

---

## Neuroblastoma

Childhood sympathetic nervous system tumor. MYCN amplification poor prognosis. Presents as abdominal mass, opsoclonus-myoclonus syndrome. Spontaneous regression possible in infants.

**Synonyms:**

## Neurocognitive Disorder

A condition involving acquired decline in one or more cognitive abilities that affects daily function. Causes include neurodegenerative disease, vascular disease, injury, infection, and medicines.

**Synonyms:**

## Neurocysticercosis

The most common parasitic infection of the central nervous system worldwide and is caused by the larval stage (cysticercus) of the pork tapeworm *Taenia solium*. It is endemic in Latin America, Asia, and Africa, and is an important cause of epilepsy in endemic regions.

**Synonyms:**

## Neurodegeneration

The progressive loss of structure and function of neurons, culminating in their death, and represents the underlying mechanism of many devastating neurological disorders.

**Synonyms:**

## Neuroendocrine Tumor

A tumor arising from cells with both neural and hormone-producing features. These tumors can occur throughout the body and may produce hormones or be nonfunctioning.

**Synonyms:**

## Neuroendocrine Tumors Grading

Classification of neuroendocrine tumors by proliferative rate using Ki-67 index and mitotic count. Well-differentiated low-grade tumors have Ki-67 less than three percent and fewer than two mitoses per ten high-power fields. Intermediate-grade tumors have Ki-67 of three to twenty percent.

**Synonyms:**

## Neurofibroma

A benign peripheral nerve sheath tumor. Solitary neurofibromas are common and present as soft, flesh-colored papules or nodules. Multiple neurofibromas are characteristic of neurofibromatosis type 1 (NF1).

**Synonyms:**

## Neurofibromatosis

A group of autosomal dominant genetic disorders causing tumor growth along nerves. Type 1 (NF1, chromosome 17) causes café-au-lait spots, neurofibromas, optic gliomas, and learning disabilities. Type 2 (NF2, chromosome 22) causes bilateral vestibular schwannomas, meningiomas, and ependymomas.

**Synonyms:**

## Neurofibromatosis Type 1

Autosomal dominant disorder caused by mutations in the NF1 gene encoding neurofibromin on chromosome seventeen.

**Synonyms:**

## Neurofibromatosis Type 2

An autosomal dominant disorder caused by NF2 gene mutation on chromosome 22. Characterized by bilateral vestibular schwannomas (acoustic neuromas), meningiomas, and ependymomas. Features: hearing loss, tinnitus, and balance problems. Diagnosis: MRI showing bilateral vestibular schwannomas.

**Synonyms:**

## Neurogenic Bladder

Lower urinary-tract dysfunction caused by a neurologic lesion affecting central or peripheral control of storage and voiding. It may produce urgency, retention, incontinence, high bladder pressures, recurrent infection, and upper-tract damage.

**Synonyms:**

## Neurogenic megacolon

Massive dilation of the colon due to loss of autonomic innervation, most commonly from Chagas disease, Hirschsprung disease, or diabetic autonomic

---

neuropathy. It presents with chronic constipation, abdominal distension, fecal impaction, and risk of toxic megacolon.

**Synonyms:**

### Neurogenic Shock

Distributive shock caused by loss of sympathetic vascular tone, usually after acute spinal-cord injury above T6. It is characterized by hypotension with relative bradycardia and warm skin, distinguishing it from hemorrhagic shock when the clinical findings are complete.

**Synonyms:**

### Neurography

MRI technique visualizing peripheral nerves. Used for nerve tumors, entrapment, trauma.

**Synonyms:**

### Neuroleptic

An older term for antipsychotic medications, derived from their ability to produce a state of mental indifference and motor slowing. The term is now largely replaced by “antipsychotic,” though it is still used in specific contexts such as neuroleptic malignant syndrome. Typical neuroleptics are first-generation antipsychotics.

**Synonyms:**

### Neuroleptic Malignant Syndrome

A rare but life-threatening idiosyncratic reaction to dopamine receptor-blocking agents, typically antipsychotics, characterized by hyperthermia, severe muscle rigidity, altered mental status, and autonomic dysfunction.

**Synonyms:**

### Neurologic Localization

The process of using the pattern of deficits in strength, sensation, reflexes, coordination, cranial-nerve function, and cognition to identify the anatomic site of nervous-system dysfunction. Localization guides differential diagnosis and selection of investigations.

**Synonyms:**

### Neurological Examination

A clinical assessment of mental status, cranial nerves, motor function, reflexes, coordination, sensation, and gait. It helps localize nervous-system dysfunction and determine the need for further testing.

**Synonyms:**

### Neurological Rehabilitation

Rehabilitation for stroke, spinal cord injury, traumatic brain injury, Parkinson disease, multiple sclerosis. Goals: maximize function, independence, quality of life. Multidisciplinary team: physiatrist, PT, OT, speech therapy, psychology.

**Synonyms:**

### Neurology PET

PET imaging used in selected neurologic disorders to assess brain metabolism or receptor activity, such as in some dementias, epilepsy evaluations, and movement disorders.

**Synonyms:**

### Neuromuscular Blocking Agents

Medications administered intraoperatively to induce skeletal muscle relaxation and facilitate endotracheal intubation and surgical exposure.

**Synonyms:**

### Neuromuscular Junction

The neuromuscular junction is the synapse between motor neuron and skeletal muscle fiber, where acetylcholine released from presynaptic terminals binds to nicotinic acetylcholine receptors on the postsynaptic motor end plate, causing depolarization and muscle contraction.

**Synonyms:**

### Neuromyelitis Optica

Neuromyelitis optica spectrum disorder (NMOSD), formerly known as Devic disease, is an autoimmune, inflammatory demyelinating disorder of the central nervous system that preferentially targets the optic nerves and spinal cord.

**Synonyms:**

---

## Neuron

The fundamental excitable cell of the nervous system specialized for receiving, integrating, and transmitting electrical and chemical signals. Structural components: cell body (soma), dendrites (receptive), axon (conducting), and synaptic terminals (releasing neurotransmitters).

**Synonyms:**

## Neuropathic Pain

Chronic pain caused by damage or disease affecting the somatosensory nervous system, including the peripheral nerves, dorsal root ganglia, spinal cord, or brain.

**Synonyms:**

## Neuropathic Ulcer

A chronic wound of the foot in a patient with diabetes, resulting from peripheral neuropathy, peripheral artery disease, and impaired wound healing. See diabetic foot ulcer.

**Synonyms:**

## Neuropathy

Disease or dysfunction of peripheral nerves causing pain, numbness, tingling, weakness, or altered reflexes. Common causes include diabetes, alcohol, nutritional deficiency, toxins, compression, autoimmune disease, and inherited disorders.

**Synonyms:**

## Neuropathy (Peripheral Neuropathy)

Damage to peripheral nerves causing sensory, motor, or autonomic dysfunction. Common causes: diabetes mellitus, alcohol use disorder, vitamin B12 deficiency, chemotherapy, autoimmune diseases, and hereditary conditions (Charcot-Marie-Tooth disease). Presents with numbness, tingling, burning pain, weakness, and gait instability.

**Synonyms:** Peripheral Neuropathy

## Neuroplasticity

The brain's ability to reorganize its structure, function, and connections in response to experience, learning, and injury. It is relevant to psychiatric

treatment because antidepressants, psychotherapy, and ECT are thought to promote neuroplastic changes including neurogenesis in the hippocampus and synaptic remodeling.

**Synonyms:**

## Neurosarcoidosis

Neurological involvement by sarcoidosis, caused by non-caseating granulomatous inflammation of the brain, meninges, cranial nerves, spinal cord, peripheral nerves, or muscles. Presentations include cranial neuropathies, aseptic meningitis, seizures, hypothalamic or pituitary dysfunction, myelopathy, and peripheral neuropathy.

**Synonyms:**

## Neurosyphilis

Infection of the central or peripheral nervous system by *Treponema pallidum*. It may occur at any stage of syphilis and cause meningitis, stroke, cranial-nerve dysfunction, sensory ataxia, cognitive decline, or tabes dorsalis.

**Synonyms:**

## Neurotransmitter

Neurotransmitters are endogenous chemical messengers that transmit signals across synapses from one neuron to another or to target cells such as muscle or gland cells.

**Synonyms:**

## Neurovascular Examination

Assessment of distal motor function, sensation, pulses, capillary refill, skin temperature, and color in an injured limb. Serial examination is essential for detecting nerve injury, vascular compromise, compartment syndrome, and evolving ischemia.

**Synonyms:**

## Neutropenia

A reduced neutrophil count ( $< 1.5 \times 10^9/L$ ; severe  $< 0.5$ ), increasing risk of bacterial and fungal infection, especially febrile neutropenia.

**Synonyms:**

---

### Neutrophil Extracellular Traps

NETs: web-like structures of chromatin + granular proteins (MPO, NE, histone) released by neutrophils (NETosis: suicidal vs vital).

**Synonyms:**

### Neutrophil Recruitment

A multistep process essential for acute inflammation and host defense, involving sequential adhesive interactions between neutrophils and endothelial cells. The process begins with the rolling phase, where neutrophils loosely attach to endothelial cells through selectin-mediated interactions.

**Synonyms:**

### Neutrophilic dermatosis

A group of inflammatory skin conditions characterised by dense neutrophilic infiltrate in the dermis without evidence of infection, which includes Sweet syndrome (acute febrile neutrophilic dermatosis), pyoderma gangrenosum, and Behçet disease.

**Synonyms:**

### Neutrophilic eccrine hidradenitis

A neutrophilic dermatosis characterized by neutrophilic infiltration of the eccrine glands and surrounding dermis, typically occurring in patients receiving chemotherapy, particularly cytarabine. It presents with painful, erythematous plaques or nodules, most commonly on the trunk and extremities.

**Synonyms:**

### Nevus

A benign hamartoma of the skin; most commonly melanocytic nevus (mole). Other nevi: congenital, dysplastic/atypical, Spitz, blue nevus, halo nevus; non-melanocytic: epidermal, sebaceous, vascular (strawberry hemangioma, port-wine stain).

**Synonyms:**

### Nevus comedonicus

A congenital hamartoma of the pilosebaceous unit presenting as a localised cluster of dilated follicular ostia filled with keratinous plugs, resembling closely grouped open comedones. It typically ap-

pears at birth or in early childhood on the face, neck, or trunk, and may be associated with other developmental anomalies.

**Synonyms:**

### New Daily Persistent Headache

A headache that begins on a clearly remembered day and becomes continuous within 24 hours, persisting for at least three months. It may resemble migraine or tension-type headache; a new persistent headache requires medical evaluation to exclude secondary causes such as infection, pressure disorders, or vascular disease.

**Synonyms:**

### Newborn Circumcision

Surgical removal of the foreskin from the penis, typically performed within the first few days of life. Medical benefits include reduced risk of urinary tract infections, sexually transmitted infections, and penile cancer. Complications include bleeding, infection, and meatal stenosis.

**Synonyms:**

### Newborn Hearing Screen

Universal screening for congenital hearing loss, performed before hospital discharge. Two-step protocol: otoacoustic emissions (OAE: measures cochlear outer hair cell response to click stimulus) and automated auditory brainstem response (AABR: measures neural response from the cochlea to the brainstem). Pass/refer.

**Synonyms:**

### Newborn Metabolic Screen

A dried blood spot test (heel stick) collected 24-48 hours after birth to screen for congenital disorders before symptoms develop.

**Synonyms:**

### Newborn Screening

A public health program testing newborns for treatable genetic, metabolic, and endocrine disorders 24-48 hours after birth. Blood spot (heel stick) on filter paper (Guthrie card). Conditions vary by

---

state (Recommended Uniform Screening Panel: 35 core conditions).

**Synonyms:**

### Next-Generation Sequencing

Massively parallel sequencing technology that analyzes many DNA molecules simultaneously. It supports gene panels, whole-exome sequencing, whole-genome sequencing, and tumor sequencing, with limitations involving coverage, structural variants, mosaicism, and interpretation.

**Synonyms:**

### Niacin (Vitamin B3)

A water-soluble vitamin that forms NAD<sup>+</sup> and NADP<sup>+</sup>, essential electron carriers in oxidation-reduction reactions and biosynthetic pathways. Severe deficiency causes pellagra, characterized by dermatitis, diarrhea, and dementia.

**Synonyms:** Vitamin B3

### Nickel-Chromium

Base metal alloy for crowns. Less expensive than noble metals. Nickel allergy concern.

**Synonyms:**

### Nicotine

An addictive stimulant found in tobacco and some vaping products that acts on neuronal nicotinic receptors.

**Synonyms:**

### Niemann-Pick Disease

A group of autosomal recessive lysosomal storage disorders caused by sphingomyelinase deficiency (ASM, types A and B, SMPD1 mutations) or NPC1/NPC2 cholesterol transport defects (type C).

**Synonyms:**

### Night Blindness

Impaired vision in dim light (nyctalopia). Causes: vitamin A deficiency (most common cause worldwide, leading to retinol deficiency and rod dysfunction), retinitis pigmentosa (progressive rod-cone degeneration, genetic), congenital stationary night

blindness, advanced glaucoma, and cataract.

**Synonyms:**

### Night Eating Syndrome

Delayed circadian pattern of eating. Evening hyperphagia, morning anorexia, insomnia. Associated with obesity, depression.

**Synonyms:**

### Night Sweats

Episodes of excessive sweating during sleep that soak clothing or bedding. They may occur with infection, hormonal changes, cancer, medication effects, or other systemic illness; persistent unexplained night sweats warrant assessment.

**Synonyms:**

### NIH Stroke Scale

The National Institutes of Health Stroke Scale (NIHSS) is a standardized, validated clinical assessment tool used to quantify the severity of acute ischemic stroke.

**Synonyms:**

### Nikolsky Sign

A clinical dermatological sign in which light lateral pressure applied to normal-appearing skin causes epidermal detachment or sloughing. Positive sign indicates intraepidermal loss of cell-cell cohesion (acantholysis).

**Synonyms:**

### Nipah Virus Infection

A zoonotic viral infection that may cause fever, respiratory illness, encephalitis, seizures, and coma. It can spread from infected animals or people through close contact. There is no widely available licensed vaccine or specific antiviral treatment; suspected infection requires urgent isolation and specialist care.

**Synonyms:**

### Nitrates

Vasodilator drugs that release nitric oxide, causing relaxation of vascular smooth muscle through activation of guanylyl cyclase and increased cyclic GMP.

---

They primarily cause venodilation at low doses, reducing preload and myocardial oxygen demand, and arterial dilation at higher doses, reducing afterload.

**Synonyms:**

### **Nitrogen Balance**

The difference between dietary nitrogen intake, estimated mainly from protein intake, and nitrogen loss, primarily in urine. Positive balance supports growth or tissue repair; negative balance occurs with inadequate intake, inflammation, trauma, or catabolic disease.

**Synonyms:**

### **Nitrous Oxide**

An inhaled anesthetic gas with analgesic and anesthetic-sparing properties. It has rapid onset and offset but relatively low potency, expands closed gas spaces, and may contribute to diffusion hypoxia or postoperative nausea.

**Synonyms:**

### **Nitrous Oxide for Labor**

A 50:50 mixture of nitrous oxide and oxygen (Entonox) inhaled by the mother during labor for analgesia. Self-administered via a mask or mouthpiece; the woman controls her own dosing, taking a breath 30 seconds before a contraction.

**Synonyms:**

### **Nocardia asteroides infection**

Infection by *Nocardia asteroides*, an environmental bacterium that can cause lung, skin, or brain infection, especially in immunocompromised people.

**Synonyms:**

### **Nocardiosis**

A bacterial infection caused by *Nocardia* species (*N. asteroides*, *N. brasiliensis*), found in soil. Most common in immunocompromised patients (transplant, HIV, chronic steroid use). Pulmonary nocardiosis (most common): cough, fever, necrotizing pneumonia, cavitary lesions.

**Synonyms:**

### **Nocebo**

A harmful or unpleasant symptom or treatment effect caused or amplified by negative expectations rather than by the treatment's specific pharmacologic action.

**Synonyms:**

### **Nociception**

Neural processing of noxious thermal, mechanical, or chemical stimuli that may result in the perception of pain. It includes transduction, transmission, modulation, and projection; nociception and pain are related but not identical concepts.

**Synonyms:**

### **Nocturia**

Complaint of waking one or more times during the night to void, with each void preceded and followed by sleep. Highly prevalent in older adults and significantly impairs sleep quality and quality of life.

**Synonyms:**

### **Nodular lymphoid hyperplasia**

Benign aggregates of lymphoid tissue occurring in the gastrointestinal tract, most commonly in the small intestine, presenting as multiple small nodules on endoscopy or imaging. It may be associated with immunodeficiency states, particularly common variable immunodeficiency, and *Giardia lamblia* infection.

**Synonyms:**

### **Nodule**

Small, palpable mass <2 cm. Can be solid or cystic. Examples: thyroid nodule, rheumatoid nodule, pulmonary nodule. Evaluation depends on location.

**Synonyms:**

### **Nomogram**

A graphical tool that estimates a quantity or risk from related measurements. The Rumack–Matthew nomogram is used in selected cases of acute acetaminophen ingestion.

**Synonyms:**

---

### **Non communicating Hydrocephalus**

Non-communicating (obstructive) hydrocephalus is a type of hydrocephalus in which there is obstruction to the flow of cerebrospinal fluid (CSF) within the ventricular system, preventing CSF from reaching the arachnoid granulations for absorption.

**Synonyms:**

### **Non-Accidental Trauma**

Injuries inflicted on a child, suspected when history and examination findings are inconsistent with the reported mechanism. Red flags: multiple fractures at different stages of healing, posterior rib fractures, metaphyseal corner fractures, and retinal hemorrhages.

**Synonyms:**

### **Non-Adherence**

Failure to follow an agreed treatment plan, which may result from access barriers, side effects, beliefs, misunderstanding, or other circumstances.

**Synonyms:**

### **Non-Alcoholic Fatty Liver Disease**

Hepatic steatosis in the absence of significant alcohol consumption, strongly associated with metabolic syndrome, obesity, and type 2 diabetes. NAFLD includes simple steatosis and non-alcoholic steatohepatitis (NASH) with inflammation and fibrosis. NASH can progress to cirrhosis and hepatocellular carcinoma.

**Synonyms:**

### **Non-Allergic Rhinitis**

Nasal congestion, discharge, or sneezing not caused by an allergic immune response. Triggers may include changes in temperature or humidity, smoke, odors, medicines, or hormonal changes.

**Synonyms:**

### **Non-Asthmatic Eosinophilic Bronchitis**

A cause of chronic cough characterized by airway eosinophilia without the variable airflow obstruction or bronchial hyperresponsiveness typical of asthma. Symptoms often improve with inhaled

corticosteroids, whereas bronchodilators alone may provide little benefit.

**Synonyms:**

### **Non-Celiac Gluten Sensitivity**

Symptom improvement with gluten-free diet without celiac disease or wheat allergy. Diagnosis of exclusion.

**Synonyms:**

### **Non-Communicable Disease**

Disease not transmitted between persons. Examples: cancer, heart disease, diabetes.

**Synonyms:**

### **Non-Contact Tonometry**

A method of estimating intraocular pressure with a brief puff of air directed at the cornea. It does not touch the eye and is useful for screening, although abnormal or uncertain results may require confirmation with another method.

**Synonyms:**

### **Non-Distensible Balloon (Vascular)**

A catheter balloon designed to maintain its shape during high-pressure dilation of a narrowed vessel.

**Synonyms:** Vascular

### **Non-Functioning Pituitary Adenoma**

Pituitary adenomas that do not secrete clinically significant hormones. The most common pituitary adenomas to present with mass effects.

**Synonyms:**

### **Non-Hodgkin Lymphoma**

A group of malignant lymphoid tumors arising from B cells, T cells, or natural-killer cells. Subtypes differ in biology, clinical behavior, affected organs, and treatment.

**Synonyms:**

### **Non-Invasive Prenatal Testing**

Screening of cell-free placental DNA in maternal blood for selected fetal chromosomal abnormalities,

---

especially trisomies 21, 18, and 13. It is highly sensitive screening, not a definitive diagnosis; positive results require confirmatory invasive testing.

**Synonyms:**

### **Non-Invasive Ventilation**

Positive pressure ventilation delivered via a face mask or nasal mask without endotracheal intubation. BiPAP (bilevel positive airway pressure) is most commonly used for acute hypercapnic respiratory failure (COPD exacerbation) and cardiogenic pulmonary edema. It reduces the need for intubation and improves outcomes in selected patients.

**Synonyms:**

### **Non-Proliferative Diabetic Retinopathy**

The early stage of diabetic retinopathy, characterized by structural abnormalities of the retinal vasculature resulting from chronic hyperglycemia-induced damage to the endothelial cells and pericytes of retinal capillaries, without neovascularization.

**Synonyms:**

### **Non-Radiographic Axial Spondyloarthritis**

Inflammatory arthritis affecting the spine and sacroiliac region without definite structural changes on plain X-ray. It may cause chronic inflammatory back pain, morning stiffness, enthesitis, uveitis, psoriasis, or inflammatory bowel disease. MRI, laboratory findings, and clinical assessment help establish the diagnosis.

**Synonyms:**

### **Non-Rebreather Mask**

A face mask with a reservoir bag and one-way valves that can deliver a high concentration of supplemental oxygen when fitted and used correctly.

**Synonyms:**

### **Non-Small Cell Lung Cancer**

Most common lung cancer type. Includes adenocarcinoma, squamous cell, large cell.

**Synonyms:**

### **Non-Stress Test**

Antepartum fetal monitoring assessing fetal heart rate reactivity. Reactive NST:  $\geq 2$  accelerations of 15 bpm for 15 seconds ( $\geq 32$  weeks) or 10 bpm for 10 seconds ( $<32$  weeks) within 20 minutes. Non-reactive: insufficient accelerations after 40 minutes (may indicate fetal sleep, acidosis, or CNS depression). False positive rate high.

**Synonyms:**

### **Non-Tuberculous Mycobacteria**

NTM: environmental mycobacteria (*M. avium* complex - MAC, *M. kansasii*, *M. abscessus*). Pulmonary NTM: ATS/IDSA criteria (clinical + radiographic + microbiologic: 2+ sputum or 1 BAL + nodules/cavities/bronchiectasis on CT). MAC: nodular bronchiectatic (middle-aged women, "Lady Windermere syndrome") or fibrocavitary (older men, COPD).

**Synonyms:**

### **Nonalcoholic Fatty Liver Disease**

NAFLD: hepatic steatosis ( $>5$  percent of hepatocytes) in the absence of significant alcohol use, associated with the metabolic syndrome (obesity, type 2 diabetes, dyslipidemia, hypertension).

**Synonyms:**

### **Nonalcoholic Steatohepatitis**

Progressive form of NAFLD characterized by hepatic steatosis with lobular inflammation and hepatocyte ballooning with significant risk of progression to fibrosis, cirrhosis, and hepatocellular carcinoma. NASH affects approximately three to five percent of the general population.

**Synonyms:**

### **Noncompetitive Antagonist**

A noncompetitive antagonist is a drug that reduces the effect of an agonist by a mechanism that cannot be overcome by increasing the agonist concentration.

**Synonyms:**

### **Noncompetitive Inhibition**

A type of enzyme inhibition where the inhibitor

---

binds at a site distinct from the active site (allosteric site), and can bind to both the free enzyme (E) and the enzyme-substrate complex (ES) with equal affinity. The inhibitor does not compete with the substrate and cannot be overcome by increasing substrate concentration.

**Synonyms:**

### **Noninvasive Prenatal Testing**

A maternal blood test that analyzes cell-free DNA to estimate the chance of selected fetal chromosomal conditions. It is a screening test, not a definitive diagnosis.

**Synonyms:**

### **Noninvasive Ventilation**

Positive-pressure ventilatory support delivered without an endotracheal tube, commonly by a mask or helmet. CPAP provides continuous positive pressure; bilevel support provides separate inspiratory and expiratory pressures. It is used selectively when the patient can protect the airway and cooperate.

**Synonyms:**

### **Nonmelanoma Skin Cancer**

A group of skin cancers that arise from the cells of the epidermis, excluding melanoma. The two most common types are basal cell carcinoma (BCC) and squamous cell carcinoma (SCC), which together account for the vast majority of all skin cancers diagnosed globally.

**Synonyms:**

### **Nonselective Beta-Blockers**

Nonselective beta-adrenergic blocking agents block both beta-1 and beta-2 adrenergic receptors, reducing heart rate, myocardial contractility, and cardiac output through beta-1 blockade, while also blocking beta-2 receptors in the bronchial smooth muscle and peripheral vasculature.

**Synonyms:**

### **Nonsense Variant**

A sequence variant that creates a premature stop codon, potentially producing a truncated protein

or triggering nonsense-mediated mRNA decay. The effect depends on the gene, location, transcript, and residual protein production.

**Synonyms:**

### **Nonspecific Interstitial Pneumonia**

A pattern with uniform, temporally homogeneous inflammation and/or fibrosis. Most common ILD associated with connective tissue disease. HRCT shows bilateral ground-glass opacities with subpleural sparing.

**Synonyms:**

### **Nonsteroidal Anti-Inflammatory Drug**

A medicine that inhibits cyclooxygenase enzymes and reduces prostaglandin production, producing analgesic, anti-inflammatory, and fever-reducing effects. NSAIDs can cause gastrointestinal, kidney, cardiovascular, or other adverse effects.

**Synonyms:**

### **Nonsteroidal Anti-inflammatory Drugs**

Analgesic and anti-inflammatory drugs that inhibit cyclooxygenase enzymes and prostaglandin synthesis. Perioperative use requires assessment of renal function, gastrointestinal bleeding risk, platelet effects, cardiovascular risk, and surgical bleeding considerations.

**Synonyms:**

### **Nontuberculous Mycobacterial Lung Disease**

Chronic lung infection caused by environmental Mycobacterium species other than *M. tuberculosis*. It may produce cough, fatigue, weight loss, breathlessness, or coughing blood, especially in people with structural lung disease. Diagnosis requires compatible imaging and repeated microbiologic testing; treatment is prolonged and individualized.

**Synonyms:**

### **Nonunion and Malunion**

Nonunion is failure of a fractured bone to heal after an adequate period (generally 6-9 months for long bones) without clinical or radiographic evidence

---

of progression toward union for 3 months. Classification: hypertrophic (viable ends, inadequate stability), atrophic (devitalized ends, poor biology), oligotrophic (intermediate).

**Synonyms:**

### Noonan Syndrome

An inherited disorder of the RAS–MAPK signaling pathway, characterized by distinctive facial features, short stature, congenital heart disease, and variable developmental or bleeding problems.

**Synonyms:**

### Normal Flora

The resident microorganisms (commensals) colonizing body surfaces—skin, oropharynx, gastrointestinal tract, genitourinary tract—without causing disease under normal conditions. They provide protection (colonization resistance, immune priming), synthesis of vitamins, and nutrient metabolism.

**Synonyms:**

### Normal Pressure Hydrocephalus

A disorder of cerebrospinal-fluid circulation causing enlarged ventricles and a clinical pattern that may include gait impairment, cognitive decline, and urinary urgency or incontinence.

**Synonyms:**

### Normalization

Correction for detector efficiency variations. Performed daily with uniform source.

**Synonyms:**

### Normocalcemic Hyperparathyroidism

Condition of elevated parathyroid hormone with persistently normal serum calcium and normal vitamin D levels. Exclusion of secondary causes of elevated PTH including vitamin D deficiency, renal insufficiency, and medications is required. Represents an early or mild form of primary hyperparathyroidism. May progress to overt hypercalcemia.

**Synonyms:**

### Norovirus

A single-stranded RNA virus that is the leading cause of gastroenteritis outbreaks worldwide. The virus is highly contagious and can cause large outbreaks in closed settings including hospitals, cruise ships, and nursing homes. Norovirus causes acute onset of vomiting and diarrhea. Diagnosis is made by PCR or antigen detection in stool.

**Synonyms:**

### Norovirus Infection

A highly contagious viral gastroenteritis causing sudden nausea, vomiting, watery diarrhea, abdominal cramps, and sometimes fever. Illness is usually short but can cause dangerous dehydration, especially in infants, older adults, or medically vulnerable people. Oral rehydration and careful hand hygiene are central to management and prevention.

**Synonyms:**

### Norrie Disease

An X-linked retinal disorder, usually caused by pathogenic variants in NDP, characterized by congenital or early-onset blindness from abnormal retinal development. Hearing loss, developmental differences, and peripheral vascular or vitreoretinal complications may occur.

**Synonyms:**

### Nose

The external nasal structure and nasal cavities, the primary organ of olfaction and the entry to the respiratory tract. External nose: bone (nasal bones, frontal process of maxilla) and cartilage (septal, upper/lower lateral cartilages).

**Synonyms:**

### Nosebleed

Bleeding from the nasal mucosa, also called epistaxis. Most cases arise from the anterior nasal septum and result from local trauma, dryness, inflammation, or vascular disease; persistent or severe bleeding may require medical intervention.

**Synonyms:** epistaxis.

---

## Nosocomial

Hospital-acquired. Nosocomial infection: infection acquired in hospital.

**Synonyms:**

## Nosocomial Infection

A hospital-acquired infection developing during or after hospitalization that was not present or incubating at admission, classically defined by onset beyond 48 hours. Common sites are bloodstream, urinary tract, lungs, and surgical wounds; causative organisms are frequently multidrug-resistant, prevented by hand hygiene and stewardship.

**Synonyms:**

## Notifiable Disease

Disease required by law to be reported to health authorities. Examples: tuberculosis, measles, HIV, COVID-19.

**Synonyms:**

## NSAIDs

Nonsteroidal anti-inflammatory drugs are a class of drugs that inhibit cyclooxygenase enzymes, COX-1 and COX-2, reducing the synthesis of prostaglandins and thromboxanes from arachidonic acid. They produce analgesic, anti-inflammatory, antipyretic, and antiplatelet effects.

**Synonyms:**

## NSAIDs (Nonsteroidal Anti-Inflammatory Drugs)

A class of analgesic, antipyretic, and anti-inflammatory drugs that inhibit cyclooxygenase (COX-1 and/or COX-2), reducing prostaglandin and thromboxane synthesis.

**Synonyms:** Nonsteroidal Anti-Inflammatory Drugs

## NSTEMI

Non-ST-elevation myocardial infarction: acute myocardial necrosis (elevated cardiac troponin) without persistent ST-segment elevation on ECG, caused by subtotal occlusion or distal embolization of a coronary artery. Features: chest pain, ECG changes (ST

depression, T-wave inversion), elevated troponin.

**Synonyms:**

## Nuchal Translucency Screening

An ultrasound measurement of the fluid-filled space at the posterior fetal nuchal region, performed at 11-14 weeks (crown-rump length 45-84 mm). Increased NT (>95th percentile or >3.0-3.5 mm) is associated with trisomies 21, 18, 13, Turner syndrome, and cardiac defects.

**Synonyms:**

## Nuclear Medicine

A medical specialty that uses small amounts of radioactive substances (radiotracers) to diagnose, stage, and treat various diseases, including cancer and heart disease.

**Synonyms:**

## Nuclear Medicine Documentation

Record keeping for radioactive materials, including inventory, disposal, administered activity, and patient release.

**Synonyms:**

## Nuclear Medicine Reporting

Structured interpretation of nuclear medicine studies using standardized terminology and clinically relevant findings.

**Synonyms:**

## Nuclear Medicine Resolution

Ability of a PET or SPECT system to distinguish small details, limited by factors such as positron range, non-collinearity, and detector geometry.

**Synonyms:**

## Nuclear Sclerosis

A common age-related cataract in which the central lens becomes increasingly yellow and hard. It can gradually reduce vision, alter color perception, and sometimes temporarily improve near vision.

**Synonyms:**

---

### **Nuclear Stress Test**

Myocardial perfusion imaging during stress. Detects coronary artery disease.

**Synonyms:**

### **Nucleoside Analogs**

A class of antiviral drugs that structurally resemble natural nucleosides and inhibit viral replication by interfering with DNA or RNA synthesis.

**Synonyms:**

### **Nucleus**

The membrane-bound organelle containing the genetic material (DNA) in eukaryotic cells. Surrounded by the nuclear envelope (double membrane with nuclear pores for transport). Contains chromatin (DNA + histone proteins), nucleolus (ribosome biogenesis), and nuclear matrix.

**Synonyms:**

### **Number Needed to Harm**

The number of people exposed to an intervention for one additional person to experience a specified adverse outcome compared with the control over a defined time. It is the reciprocal of absolute risk increase.

**Synonyms:**

### **Number Needed to Treat**

The number of people who must receive an intervention for one additional person to experience the specified beneficial outcome compared with the control over a defined time. It is the reciprocal of absolute risk reduction.

**Synonyms:**

### **Numbness and Tingling**

Abnormal sensations, also called paresthesias, that may result from nerve compression, peripheral neuropathy, spinal disease, vitamin deficiency, vascular problems, or neurologic disorders. Sudden one-sided symptoms require urgent evaluation for stroke.

**Synonyms:** paresthesias, that may result from nerve compression,.

### **Nummular eczema**

A chronic inflammatory dermatosis presenting as coin-shaped, well-demarcated, erythematous, vesicular, or crusted plaques, typically on the extremities. The lesions are intensely pruritic and may be triggered by dry skin, skin trauma, or allergic contact dermatitis. It is more common in adults with atopic predisposition.

**Synonyms:**

### **Nursing**

A health profession focused on assessing patients, providing care, supporting recovery, preventing illness, and educating patients and families.

**Synonyms:**

### **Nursing Home**

A residential facility that provides ongoing nursing care, assistance with daily activities, and medical or rehabilitation services for people who cannot live independently.

**Synonyms:**

### **Nutcracker esophagus**

Esophageal motility disorder characterized by high-amplitude peristaltic contractions exceeding 180 mmHg in the distal esophagus on manometry, with preserved peristaltic coordination. Presents with intermittent chest pain and dysphagia to solids and liquids.

**Synonyms:**

### **Nutcracker Syndrome**

Compression of left renal vein between aorta and SMA causing hematuria and flank pain. Managed conservatively. Stenting or surgery for severe cases.

**Synonyms:**

### **Nutrient Density**

Amount of nutrients per calorie. Whole foods more nutrient-dense than processed foods. Importance for weight management, health.

**Synonyms:**

---

## Nutrition

The intake and use of food and nutrients needed for energy, growth, tissue maintenance, and health.

**Synonyms:**

### Nutrition (Geriatric)

Nutritional assessment and intervention in elderly. Risks: malnutrition (undernutrition, obesity), micronutrient deficiencies (vitamin D, B12, calcium), dehydration. Assessment: weight, BMI, dietary intake, lab values. Interventions: supplementation, meal delivery, appetite stimulants, feeding assistance.

**Synonyms:** Geriatric

### Nutrition (Oncology)

Nutritional care for people with cancer, addressing intake, symptoms, treatment effects, weight, muscle mass, and personal goals.

**Synonyms:** Oncology

### Nutrition Education

Teaching patients about healthy eating. Cultural sensitivity, health literacy appropriate. Motivational interviewing effective.

**Synonyms:**

### Nutrition in Pregnancy

A balanced diet providing adequate calories, protein, vitamins, and minerals to support maternal and fetal health. Additional caloric needs: 300 kcal/day in the second and third trimesters. Key nutrients: folic acid (400 mcg/day), iron (27 mg/day), calcium (1000 mg/day), vitamin D (600 IU/day), iodine (220 mcg/day), DHA (200-300 mg/day).

**Synonyms:**

### Nutrition Risk Screening 2002

A validated screening tool for hospitalized adults that considers nutritional status and disease severity to identify patients likely to benefit from nutrition support. Screening is not itself a complete malnutrition diagnosis.

**Synonyms:**

## Nutrition-Focused Physical Examination

A structured examination for physical findings associated with malnutrition, including loss of subcutaneous fat, muscle wasting, edema, ascites, reduced functional status, and micronutrient-related signs. It complements dietary history, anthropometry, laboratory data, and disease assessment.

**Synonyms:**

### Nutritional Assessment

Comprehensive evaluation: dietary intake, anthropometrics, biochemical tests, clinical examination. Dietitian involvement essential.

**Synonyms:**

### Nutritional Dermatoses

Nutritional deficiencies cause distinctive skin findings. Vitamin C deficiency (scurvy): perifollicular hemorrhage, corkscrew hairs, gingival bleeding. Niacin deficiency (pellagra): photosensitive dermatitis in sun-exposed areas, diarrhea, dementia.

**Synonyms:**

### Nutritional Screening

Rapid assessment for malnutrition risk. Tools: MST, MNA, MUST. Screening all elderly patients recommended. Identifies need for comprehensive assessment.

**Synonyms:**

### Nyctalopia

Difficulty seeing in dim light or darkness. See Night Blindness.

**Synonyms:**

### NYHA Functional Classification

A four-class system grading heart failure severity based on symptoms and exercise tolerance. Class I: no limitation of physical activity. Class II: slight limitation; comfortable at rest but ordinary activity causes symptoms. Class III: marked limitation; comfortable at rest but less than ordinary activity causes symptoms.

**Synonyms:**

---

## Nystagmus

A rhythmic, involuntary oscillation of the eyes that can be horizontal, vertical, rotational, or mixed in pattern, and it is classified based on the underlying cause as infantile (developing in the first six months of life), acquired (developing later in life), or periodic alternating.

**Synonyms:**

## Nephritis

Inflammation of kidney tissue.

**Synonyms:**

## Nerve Block

Injection of medicine near a nerve or nerve group to reduce pain or interrupt nerve signals.

**Synonyms:**

## Nitric Oxide

A signaling molecule that relaxes blood-vessel muscle and promotes vasodilation.

**Synonyms:**

## Nociceptors

Sensory nerve endings that detect potentially tissue-damaging stimuli and transmit pain signals.

**Synonyms:**

## Nonketotic Hyperglycemic Hyperosmolar Syndrome

A severe complication of diabetes marked by very high blood glucose, dehydration, and increased blood osmolality, usually without substantial ketoacidosis.

**Synonyms:**

## Normal-Pressure Hydrocephalus

A disorder in which cerebrospinal fluid accumulates and causes gait difficulty, cognitive decline, and urinary problems despite near-normal measured pressure.

**Synonyms:**

## Nucleus Accumbens

A brain region involved in reward, motivation, and reinforcement.

**Synonyms:**

## Nephrosclerosis

Hardening and scarring of the kidneys caused by chronic vascular injury, often related to hypertension.

**Synonyms:**

## Nocardia Infection

An infection caused by Nocardia bacteria, often affecting the lungs, skin, or brain.

**Synonyms:**

## Noma

A rapidly progressive destructive infection of the mouth and face, usually associated with severe malnutrition and poor health conditions.

**Synonyms:**

## Non-Hodgkin's Lymphoma

A group of cancers arising from lymphocytes outside the Hodgkin lymphoma category.

**Synonyms:**

## Non-Infectious Cystitis

Inflammation of the bladder that is not caused by an infectious organism.

**Synonyms:**

## Nickel Allergy

An allergic skin reaction caused by contact with nickel-containing materials.

**Synonyms:**

## Nightmare Disorder

Repeated disturbing dreams that cause significant distress or interfere with sleep and daytime function.

**Synonyms:**

## Nonallergic Rhinitis

Nasal congestion, sneezing, or runny nose caused by

---

irritants or other triggers rather than an allergy.

**Synonyms:**

### **Neuroglia**

Supporting cells of the nervous system that nourish, protect, and maintain neurons.

**Synonyms:**

### **Neutrophils**

The most abundant type of white blood cell. Neutrophils rapidly migrate to sites of infection or injury and ingest microorganisms and cellular debris.

**Synonyms:**

### **Non-Rapid Eye Movement Sleep**

Sleep consisting of stages N1, N2, and N3, with progressively deeper sleep and reduced responsiveness to the environment.

**Synonyms:**

### **Normal Saline**

A sterile 0.9% sodium-chloride solution used as an intravenous fluid, for irrigation, and to dilute or deliver medications.

**Synonyms:**

### **Nucleus Pulposus**

The soft, gel-like central portion of an intervertebral disk, surrounded by the annulus fibrosus.

**Synonyms:**

### **Nutritional Anemia**

Anemia caused by inadequate intake, absorption, or use of nutrients needed for red-cell production, especially iron, vitamin B12, or folate.

**Synonyms:**

### **Nondisjunction**

Failure of homologous chromosomes or sister chromatids to separate properly during cell division, producing cells with abnormal chromosome numbers.

**Synonyms:**

### **Nontuberculous Mycobacterial Infection**

Infection caused by Mycobacterium species other than *M. tuberculosis*, often affecting the lungs but sometimes the lymph nodes, skin, or other organs. Disease is more likely in people with structural lung disease or impaired immunity.

**Synonyms:**

### **Nuchal Rigidity**

Abnormal stiffness and resistance to passive flexion of the neck, classically associated with irritation or inflammation of the meninges, including meningitis or subarachnoid hemorrhage.

**Synonyms:**

### **Nasal Septum Perforation**

A hole through the cartilage or bone separating the nasal passages, which may cause crusting, nosebleeds, whistling, or obstruction and can result from trauma, surgery, intranasal drugs, or inflammatory disease.

**Synonyms:**

### **Neurogenic Orthostatic Hypotension**

A fall in blood pressure on standing caused by failure of the autonomic nervous system to produce an adequate vasoconstrictor response. It may cause dizziness, fainting, or falls.

**Synonyms:**

### **Nephroptosis (Floating Kidney)**

Abnormal downward movement of a kidney when a person stands, sometimes causing flank discomfort, urinary symptoms, or intermittent obstruction.

**Synonyms:** Floating Kidney

### **Nephrosis**

A non-inflammatory disorder of the kidney, classically associated with heavy protein loss in the urine and the changes of nephrotic syndrome.

**Synonyms:**

### **Nephrotoxic**

Describing a substance or condition capable of damaging the kidneys or impairing their function.

---

**Synonyms:**

### **Nerve Deafness (Sensorineural Deafness)**

Hearing loss caused by damage to the cochlea, auditory nerve, or central auditory pathways rather than blockage of sound transmission through the outer or middle ear.

**Synonyms:** Sensorineural Deafness

### **Nerve Growth Factor**

A protein that supports the development, survival, and maintenance of certain sensory and sympathetic nerve cells.

**Synonyms:**

### **Nerve Injury**

Damage to a peripheral or central nerve that may cause pain, numbness, altered sensation, weakness, or loss of autonomic function.

**Synonyms:**

### **Nervous System**

The body-wide system consisting of the brain, spinal cord, and peripheral nerves that receives information, processes it, and coordinates movement, sensation, and internal functions.

**Synonyms:**

### **Neuritis**

Inflammation or irritation of a nerve, often causing pain, altered sensation, or weakness.

**Synonyms:**

### **Neuroanatomy**

The study of the structure and organization of the nervous system.

**Synonyms:**

### **Neuroendocrinology**

The study of interactions between the nervous system and the endocrine system, including how the brain regulates hormone release.

**Synonyms:**

### **Niacin (Nicotinic Acid, Vitamin B3)**

A water-soluble vitamin required for cellular energy metabolism; severe deficiency causes pellagra, with dermatitis, diarrhoea, and cognitive changes.

**Synonyms:** Nicotinic Acid, Vitamin B3

### **Nipple**

The projection at the centre of the breast through which milk is released from the mammary ducts; it contains smooth muscle and sensory nerve endings.

**Synonyms:**

### **Nipple Discharge**

Fluid released from a nipple outside normal breast-feeding; it may be physiological or associated with infection, duct disease, hormonal disturbance, or breast cancer.

**Synonyms:**

### **Nipple Inversion or Retraction**

Inward turning or pulling-in of the nipple. It may be longstanding and benign, but new unilateral inversion or retraction requires assessment for duct disease or breast cancer.

**Synonyms:**

### **Nocturnal Enuresis (Bed-Wetting)**

Repeated involuntary urination during sleep in a child old enough to have achieved bladder control.

**Synonyms:** Bed-Wetting

### **Nocturnal Emission**

Involuntary ejaculation during sleep, sometimes called a wet dream. It is a common and normal event during male puberty and adolescence.

**Synonyms:**

### **Nocturnal Lagophthalmos**

Incomplete closure of the eyelids during sleep, which may cause dryness, irritation, and exposure injury to the cornea.

**Synonyms:**

---

### Normocytic Anaemia

Anaemia in which the red blood cells are of approximately normal size, occurring in conditions such as chronic disease, acute blood loss, or haemolysis.

**Synonyms:**

### Nummular Eczema

An inflammatory skin disorder producing itchy, coin-shaped patches, commonly on the limbs or trunk.

**Synonyms:**

### Night Terrors

Episodes of abrupt partial awakening from deep non-REM sleep with intense fear, screaming, autonomic arousal, and limited recall afterward, occurring most often in children.

**Synonyms:**

### Nonconvulsive Status Epilepticus

Ongoing seizure activity without prominent rhythmic limb jerking, often presenting as prolonged confusion, impaired awareness, or subtle twitching and requiring electroencephalographic confirmation and urgent treatment.

**Synonyms:**

### Nonunion Fracture

Failure of a broken bone to heal within the expected time and without progressive healing, often causing persistent pain, instability, or deformity.

**Synonyms:**

### Nasal Vestibulitis

Inflammation or infection of the nasal vestibule, commonly caused by *Staphylococcus* bacteria and producing tenderness, crusting, redness, or small pustules near the nostrils.

**Synonyms:**

### Necrotizing Pneumonia

Severe pneumonia in which infection causes necrosis and cavitation of lung tissue, often accompanied by sepsis, respiratory failure, or abscess formation.

**Synonyms:**

### Nonspecific Interstitial Pneumonitis

An interstitial lung disease characterized by relatively uniform inflammation and fibrosis of the lung interstitium, often associated with connective-tissue disease, medications, or an unknown cause.

**Synonyms:**

### Nuchal Cord

Wrapping of the umbilical cord around the fetal neck, occurring once or more times. It is common and often harmless, but monitoring during labor is needed if fetal heart-rate abnormalities occur.

**Synonyms:**

### Nausea and vomiting

Nausea is the urge to vomit; vomiting is forceful emptying of stomach contents. Causes include infection, medicines, pregnancy, migraine, obstruction, and other illnesses. **Synonyms:**

### Neck pain: Symptom

Pain or stiffness in the neck caused by muscle strain, injury, arthritis, disc disease, nerve compression, or other conditions. **Synonyms:**

### Night leg cramps

Sudden, painful involuntary contractions of leg muscles occurring during sleep or rest, often affecting the calf or foot. **Synonyms:**

### Nosebleeds

Bleeding from blood vessels in the nose, commonly caused by dryness, irritation, injury, infection, allergies, medicines, or high blood pressure. **Synonyms:**

### NAFLD

Alternate index label; see *Fatty liver disease (MASLD)*. **Synonyms:**

### NEC

Alternate index label; see *Neuroendocrine tumors*. **Synonyms:**

### Neonatal jaundice

Alternate index label; see *Infant jaundice*. **Syn-**

---

onyms:

### **Nephroblastoma**

Alternate index label; see *Wilms tumor*. **Synonyms:**

### **Nerve compression**

Alternate index label; see *Pinched nerve*. **Synonyms:**

### **NET**

Alternate index label; see *Neuroendocrine tumors*. **Synonyms:**

### **Neuralgia, postherpetic**

Alternate index label; see *Postherpetic neuralgia*. **Synonyms:**

### **Neuralgia, trigeminal**

Alternate index label; see *Trigeminal neuralgia*. **Synonyms:**

### **Neurilemmoma**

Alternate index label; see *Schwannoma*. **Synonyms:**

### **Neurinomatosis**

Alternate index label; see *Schwannomatosis*. **Synonyms:**

### **Neurocardiogenic syncope**

Alternate index label; see *Vasovagal syncope*. **Synonyms:**

### **Neuroendocrine carcinoma of the skin**

Alternate index label; see *Merkel cell carcinoma*. **Synonyms:**

### **Neurofibromatosis type I**

Alternate index label; see *Neurofibromatosis type 1*. **Synonyms:**

### **Neurofibromatosis type II**

Alternate index label; see *NF2-related schwanno-*

*matosis (neurofibromatosis type 2)*. **Synonyms:**

### **Neurofibrosarcoma**

Alternate index label; see *Malignant peripheral nerve sheath tumors (MPNST)*. **Synonyms:**

### **Neuroma, acoustic**

Alternate index label; see *Acoustic neuroma (vestibular schwannoma)*. **Synonyms:**

### **Neuroma, plantar**

Alternate index label; see *Morton neuroma*. **Synonyms:**

### **Neuromyelitis optica spectrum disorder**

Alternate index label; see *Neuromyelitis optica*. **Synonyms:**

### **Neuropathy, autonomic**

Alternate index label; see *Autonomic neuropathy*. **Synonyms:**

### **Neuropathy, diabetic**

Alternate index label; see *Diabetic neuropathy*. **Synonyms:**

### **Neuropathy, hereditary motor and sensory**

Alternate index label; see *Charcot-Marie-Tooth disease*. **Synonyms:**

### **Neuropathy, peripheral**

Alternate index label; see *Peripheral neuropathy*. **Synonyms:**

### **Newborn jaundice**

Alternate index label; see *Infant jaundice*. **Synonyms:**

### **NF1**

Alternate index label; see *Neurofibromatosis type 1*. **Synonyms:**

---

## NF2

Alternate index label; see *NF2-related schwannomatosis (neurofibromatosis type 2)*. **Synonyms:**

## Nicotine addiction

Alternate index label; see *Nicotine dependence*. **Synonyms:**

## NMO

Alternate index label; see *Neuromyelitis optica*. **Synonyms:**

## NMOSD

Alternate index label; see *Neuromyelitis optica*. **Synonyms:**

## Nocturnal enuresis

Alternate index label; see *Bed-wetting*. **Synonyms:**

## Noise-related hearing loss

Alternate index label; see *Hearing loss*. **Synonyms:**

## Nonischemic priapism

Alternate index label; see *Priapism*. **Synonyms:**

## Nontropical sprue

Alternate index label; see *Celiac disease*. **Synonyms:**

## Nonulcer dyspepsia

Alternate index label; see *Functional dyspepsia*. **Synonyms:**

## Nonulcer stomach pain

Alternate index label; see *Functional dyspepsia*. **Synonyms:**

## Nose fracture

Alternate index label; see *Broken nose*. **Synonyms:**

## Nymphomania

Alternate index label; see *Compulsive sexual behavior*. **Synonyms:**

## O

### Obesity

Abnormal or excessive fat accumulation that presents a health risk. Defined by BMI:  $\geq 30 \text{ kg/m}^2$  (class I: 30-34.9, class II: 35-39.9, class III:  $\geq 40$ ). Major risk factor for type 2 diabetes, hypertension, cardiovascular disease, sleep apnea, osteoarthritis, certain cancers, and reduced life expectancy.

**Synonyms:**

### Object of Addiction

A substance or rewarding behavior to which a person develops a harmful compulsive relationship. **Synonyms:**

### Occult

Hidden or not visible without microscopy or laboratory testing. **Synonyms:**

### Omega-3 Fatty Acids

Polyunsaturated fats found especially in fatty fish and some plant foods. **Synonyms:** n-3 fatty acids

### Omega-6 Fatty Acids

Essential polyunsaturated fats found in many plant oils and foods. **Synonyms:** n-6 fatty acids

### Ondine's Curse

A rare disorder of automatic breathing in which ventilation may fail during sleep. **Synonyms:** Congenital central hypoventilation syndrome

### Ophthalmologist

A medical doctor specializing in diseases and surgery of the eyes. **Synonyms:**

### Opioid

A natural or synthetic substance that acts on opioid receptors to relieve pain and may cause sedation or dependence. **Synonyms:**

### Optician

A technician who fits and dispenses eyeglasses or contact lenses. **Synonyms:**

### Optimism

A tendency to expect favorable outcomes or interpret events positively. **Synonyms:**

### Orthopedist

A physician specializing in disorders and injuries of bones, joints, muscles, and related tissues. **Synonyms:** Orthopedic surgeon

### Osteoblasts

Cells that form new bone. **Synonyms:**

### Osteoclasts

Cells that break down and resorb bone tissue. **Synonyms:**

### Osteocytes

Mature bone cells embedded within bone tissue that help maintain it. **Synonyms:**

### Osteons

Cylindrical structural units of compact bone arranged around central canals. **Synonyms:** Haversian systems

---

### **Osteopath**

A physician trained in medicine and surgery who earns a Doctor of Osteopathic Medicine degree.

**Synonyms:** DO

### **Outpatient**

A person receiving medical care without being admitted overnight. **Synonyms:**

### **Output**

The maximum sound level a hearing aid can produce.

**Synonyms:**

### **Overweight**

Body weight above the healthy range, commonly defined in adults as a BMI of 25 to 29.9. **Synonyms:**

### **Oxidant**

A reactive molecule that can damage cells and tissues by promoting oxidation. **Synonyms:** Oxidizing agent

### **Oxidation**

A chemical process that changes a substance through loss of electrons or reaction with oxygen.

**Synonyms:**

### **Oxygenated Blood**

Blood that has acquired oxygen in the lungs and carries it to body tissues. **Synonyms:**

### **Adolescent Obesity**

Obesity during adolescence, assessed using age- and sex-specific growth charts rather than adult BMI thresholds alone. It may affect metabolic, cardiovascular, orthopedic, and psychological health.

**Synonyms:**

### **Obesity Hypoventilation Syndrome**

Chronic daytime hypercapnia in obese individuals without other causes. Reduced chest wall compliance and blunted respiratory drive. Often coexists with OSA. Treatment: weight loss and BiPAP.

**Synonyms:**

### **Obex Region**

The caudal tip of the fourth ventricle where it narrows into the central canal of the spinal cord. It lies near the dorsal medulla and is an important anatomical landmark in the floor of the ventricular system.

**Synonyms:**

### **Objective Response Rate**

The proportion of patients whose tumor shrinks by a predefined amount (complete or partial response) during treatment; a common efficacy endpoint in oncology trials.

**Synonyms:**

### **Oblique Plane**

A plane that passes through the body or an organ at an angle other than a right angle (diagonal plane).

**Synonyms:**

### **Obsessions**

Recurrent, persistent, intrusive, and unwanted thoughts, urges, or images that are experienced as intrusive and cause marked anxiety or distress. Common obsessions include contamination fears, fears of harming oneself or others, need for symmetry, taboo thoughts (sexual, religious, or aggressive), and doubt.

**Synonyms:**

### **Obsessive-Compulsive Disorder**

Characterized by the presence of obsessions, compulsions, or both. Obsessions are recurrent, persistent, intrusive, and unwanted thoughts, urges, or images that cause marked anxiety or distress. The individual attempts to ignore or suppress them or neutralize them with some other thought or action.

**Synonyms:**

### **Obsessive-Compulsive Personality Disorder**

A pattern of preoccupation with orderliness, perfectionism, and mental and interpersonal control, at the expense of flexibility and efficiency.

**Synonyms:**

---

### Obstetric Anal Sphincter Injury

A third- or fourth-degree perineal tear involving the anal sphincter complex during childbirth. It requires accurate examination, repair, follow-up, and assessment for bowel or continence problems.

**Synonyms:**

### Obstetric Ultrasound

Ultrasound imaging during pregnancy. First trimester: dating, viability. Second trimester: anatomy survey. Third trimester: growth, position.

**Synonyms:**

### Obstetrician

A medical doctor who specializes in the care of women during pregnancy, labor, and the postpartum period (obstetrics). Obstetricians manage normal and high-risk pregnancies, perform cesarean deliveries and assisted vaginal deliveries, and treat pregnancy complications (pre-eclampsia, gestational diabetes, hemorrhage, preterm labor).

**Synonyms:**

### Obstetrics

The branch of medicine and surgery concerned with the care of women during pregnancy, childbirth, and the postpartum period.

**Synonyms:**

### Obstructed Infected Urinary System

Urinary tract obstruction accompanied by infection, pyonephrosis, or sepsis. It is a urologic emergency requiring immediate resuscitation, antimicrobial therapy, and urgent decompression by nephrostomy or ureteral stent.

**Synonyms:**

### Obstruction

Blockage of urinary flow. Ureteral, urethral, bladder outlet. Causes: stones, stricture, tumor, BPH. Complications: hydronephrosis, infection, renal failure.

**Synonyms:**

### Obstructive Jaundice

Jaundice caused by obstruction of bile flow from the liver to the duodenum, resulting in accumulation of conjugated bilirubin in the blood. See Jaundice for complete overview.

**Synonyms:**

### Obstructive Nephropathy

Kidney damage caused by blockage of urine flow anywhere from the kidney to the urethra. Causes include stones, tumors, strictures, enlarged prostate, and congenital abnormalities; untreated obstruction can lead to hydronephrosis, infection, and kidney failure.

**Synonyms:**

### Obstructive parotitis

Inflammation of the parotid gland resulting from obstruction of the parotid duct, most commonly by sialolithiasis, presenting with painful glandular swelling that worsens with meals. The obstruction leads to stasis, secondary bacterial infection, and recurrent episodes of swelling and tenderness.

**Synonyms:**

### Obstructive Shock

A form of shock caused by physical obstruction of blood flow outside the heart, reducing cardiac output despite normal cardiac function.

**Synonyms:**

### Obstructive Sleep Apnea

Recurrent partial or complete upper-airway collapse during sleep, causing disrupted breathing and often daytime symptoms. Evaluation may include sleep testing; treatment is individualized and can include positive-airway-pressure therapy, weight management, oral appliances, positional therapy, or surgery.

**Synonyms:**

### Obstructive Uropathy

Urinary tract obstruction at any level from the renal pelvis to the urethra, leading to impaired urine flow and potential renal damage. Causes include nephrolithiasis, benign prostatic hyperplasia,

---

ureteral strictures, tumors of the bladder, prostate, or cervix, and external compression from lymphadenopathy or retroperitoneal fibrosis.

**Synonyms:**

### **Obturator**

A structure that occludes an opening. In anatomy, the obturator foramen is a large opening in the pelvic bone, closed by the obturator membrane. The obturator nerve (L2–L4) innervates the adductor muscles of the thigh and provides sensory innervation to the medial thigh. The obturator artery supplies the adductor compartment.

**Synonyms:**

### **Obturator hernia**

Herniation of abdominal contents through the obturator canal, most commonly occurring in thin elderly women with a history of multiple pregnancies. It is a rare cause of small bowel obstruction and may present with the Howship-Romberg sign of medial thigh pain from obturator nerve compression.

**Synonyms:**

### **Obtuse Marginal Artery**

A branch of the circumflex coronary artery that runs along the obtuse margin of the heart and supplies the lateral wall of the left ventricle. Its size and number vary with coronary anatomy.

**Synonyms:**

### **Occipital Bone**

Forms the posterior-inferior cranium surrounding the foramen magnum (spinal cord passage). Has basilar, lateral, and squamous parts. Occipital condyles articulate with C1 for nodding movement. The external occipital protuberance provides muscle attachment.

**Synonyms:**

### **Occipital Lobe**

The most posterior of the four cerebral lobes, located behind the parieto-occipital sulcus and above the tentorium cerebelli. The occipital lobe is the primary visual processing center of the brain.

**Synonyms:**

### **Occipital Neuralgia**

A paroxysmal, severe, stabbing or electric shock-like pain in the distribution of the greater, lesser, or third occipital nerves (posterior scalp, from the nuchal line to the vertex).

**Synonyms:**

### **Occiput Posterior Position**

A fetal head position in which the occiput faces the maternal sacrum. It may cause back pain or slow labor, although the fetus may rotate during labor.

**Synonyms:**

### **Occiput Transverse Position**

The fetal head presenting with the sagittal suture oriented transversely. Usually the normal descent position; most rotate to OA with contractions. When persistent, it can cause protracted descent and prolonged second stage.

**Synonyms:**

### **Occlusal Guard**

Appliance protecting teeth from attrition. Night guard for bruxism. Sports mouthguard.

**Synonyms:**

### **Occlusion**

Complete blockage of vessel. May be natural (thrombosis) or iatrogenic (embolization).

**Synonyms:**

### **Occult Blood**

Blood that is not visible to the naked eye and is detected by chemical or immunochemical testing. Fecal occult-blood tests may be used in colorectal-cancer screening; the test type and collection instructions determine whether dietary or medicine restrictions apply.

**Synonyms:**

### **Occult Gastrointestinal Bleeding**

Chronic or intermittent gastrointestinal blood loss that is not visible to the patient and may not

---

produce melaena or haematochezia. It commonly presents with iron-deficiency anaemia or a positive faecal blood test.

**Synonyms:**

### **Occupational Asthma**

Asthma from workplace exposures to sensitizers (isocyanates, flour, latex) or irritants. Improves away from work and worsens at work. Serial peak flow monitoring supports diagnosis.

**Synonyms:**

### **Occupational COPD**

Chronic obstructive pulmonary disease associated with workplace exposure to dust, chemicals, fumes, or other inhaled hazards. Symptoms and risk depend on the exposure and other factors, including smoking.

**Synonyms:**

### **Occupational Dermatoses**

Work-related skin diseases. Occupational contact dermatitis accounts for 90 percent of occupational skin diseases. Irritant contact dermatitis is more common (hands, wet work) than allergic contact dermatitis. Occupations at risk include healthcare workers, hairdressers, construction workers, food handlers, and metalworkers.

**Synonyms:**

### **Occupational Exposure**

Radiation exposure to nuclear medicine staff. Monitored with dosimeters. Limits: 50 mSv/year whole body, 150 mSv/year lens, 500 mSv/year extremities.

**Synonyms:**

### **Occupational Exposure Limit**

A regulatory or advisory concentration or dose limit intended to reduce worker exposure to a hazardous substance over a defined averaging period. Limits vary by substance, jurisdiction, route, and whether the value is a ceiling, short-term limit, or time-weighted average.

**Synonyms:**

### **Occupational Health**

Health of workers. Examples: workplace safety, occupational diseases, ergonomics.

**Synonyms:**

### **Occupational Hearing Loss**

Permanent sensorineural hearing impairment caused by repeated or prolonged exposure to workplace noise or ototoxic hazards. Prevention depends on reducing exposure and using effective hearing protection.

**Synonyms:**

### **Occupational Medicine**

The medical specialty concerned with the effects of work on health, prevention of work-related illness and injury, and safe return to work.

**Synonyms:**

### **Occupational Rehabilitation**

Services that help a person regain or adapt the skills needed for work after illness, injury, or disability.

**Synonyms:**

### **Occupational Therapy**

OT helps patients perform daily activities (ADLs, IADLs) through therapeutic activities, adaptive equipment, environmental modification. Focus on upper extremity function, cognition, sensory integration.

**Synonyms:**

### **Occupational Therapy Assessment**

Evaluation of a person's ability to perform daily activities, work, and other meaningful occupations, including factors affecting performance and the need for adaptive strategies or equipment.

**Synonyms:**

### **OCD**

Obsessive-compulsive disorder, a condition involving recurrent unwanted thoughts or urges and/or repetitive behaviors or mental acts that cause distress or interfere with daily life.

**Synonyms:**

---

### **Ochronosis**

A blue-black or brownish pigmentation of connective tissues (cartilage, skin, sclerae, tendons) caused by accumulation of homogentisic acid and its oxidation products.

**Synonyms:**

### **Octreoscan**

Nuclear medicine imaging using In-111 octreotide. Detects neuroendocrine tumors.

**Synonyms:**

### **Ocular Histoplasmosis Syndrome**

Ocular disease following prior subclinical Histoplasma capsulatum infection, characterized by punched-out peripheral chorioretinal scars, peripapillary atrophy, and choroidal neovascularization that causes central vision loss. Active choroidal neovascularization is treated with anti-VEGF therapy.

**Synonyms:**

### **Ocular Hypertension**

Persistently elevated intraocular pressure without demonstrable glaucomatous optic-nerve damage or corresponding visual-field loss. It increases future glaucoma risk and requires individualized assessment of corneal thickness, optic-nerve appearance, pressure, and other risk factors.

**Synonyms:**

### **Ocular myiasis**

Infestation of the eye or ocular adnexa by fly larvae, which may involve the conjunctiva, cornea, or intraocular structures, presenting with pain, irritation, tearing, and visual disturbance. In severe cases, larvae can penetrate the globe causing endophthalmitis and blindness.

**Synonyms:**

### **Ocular Pain**

Pain in or around the eye caused by surface irritation, infection, inflammation, trauma, glaucoma, or orbital disease. Severe pain with vision loss, light sensitivity, nausea, or injury requires urgent ophthalmic assessment.

**Synonyms:**

### **Ocular Surface Disease**

A group of disorders affecting the cornea, conjunctiva, eyelids, and tear film, including dry eye, blepharitis, meibomian-gland dysfunction, and exposure-related disease. Symptoms and signs reflect tear-film instability, inflammation, epithelial injury, or abnormal lid function.

**Synonyms:**

### **Oculocerebrorenal Syndrome**

An inherited peroxisomal disorder, also called Zellweger spectrum disorder, affecting the brain, eyes, kidneys, liver, and other organs. Severe forms present neonatally with hypotonia, seizures, feeding difficulty, distinctive facial features, and profound developmental impairment.

**Synonyms:** Zellweger spectrum disorder, affecting.

### **Odds Ratio**

Ratio of odds of exposure in cases vs. controls. Used in case-control studies. OR approximates RR for rare diseases.

**Synonyms:**

### **Odontogenic cutaneous fistula**

An abnormal tract connecting the skin surface to a periapical dental infection, typically presenting as a draining sinus tract on the chin, cheek, or submandibular region. It results from chronic dental infection eroding through the bone and soft tissue to the skin surface.

**Synonyms:**

### **Odontogenic Keratocyst**

Aggressive cyst with high recurrence. Associated with nevoid basal cell carcinoma syndrome (Gorlin syndrome). Treatment: enucleation, resection, or decompression.

**Synonyms:**

### **Odontoid Process**

A tooth-like projection superiorly from the body of the axis (C2 vertebra). The odontoid process

---

projects into the atlas (C1) and is held in place by the transverse ligament of the atlas, allowing rotation of the head (the atlantoaxial joint accounts for 50% of cervical rotation).

**Synonyms:**

### **Odontoma**

Hamartomatous dental tissue mass. Compound (multiple tooth-like structures) or complex (amorphous calcified mass). Treatment: surgical removal.

**Synonyms:**

### **Odor Threshold**

Lowest concentration detectable by smell. Important for warning properties of toxins.

**Synonyms:**

### **Odynophagia**

Painful swallowing, characterized by a burning, squeezing, or sticking sensation behind the sternum during deglutition. Strongly suggests mucosal inflammation or ulceration of the esophagus.

**Synonyms:**

### **Oesophageal Ulcer**

A mucosal ulceration of the oesophagus caused by gastro-oesophageal reflux, infection, medication or corrosive injury, inflammatory disease, or malignancy. It may cause odynophagia, dysphagia, chest pain, haematemesis, or melaena.

**Synonyms:**

### **Oesophageal Varices**

Enlarged veins in the esophagus, usually caused by portal hypertension. They can rupture and cause life-threatening bleeding.

**Synonyms:**

### **Oesophagitis**

Inflammation of the oesophageal mucosa. Common causes include gastro-oesophageal reflux, infection in immunocompromised patients, medication-related injury, eosinophilic inflammation, radiation, and caustic ingestion. Symptoms include heartburn, odynophagia, dysphagia, and chest pain.

**Synonyms:**

### **Oestrogen**

The primary female sex hormone, produced mainly by the ovaries (granulosa cells of developing follicles) and in smaller amounts by adipose tissue, the adrenal glands, and the placenta during pregnancy.

**Synonyms:**

### **Oestrogen Replacement Therapy**

The administration of exogenous estrogen (with or without progestogen) to relieve symptoms of estrogen deficiency and prevent long-term health consequences in postmenopausal women. See Hormone Replacement Therapy (HRT).

**Synonyms:**

### **Off-Label Use**

The use of a licensed medication for an indication, dose, route, or patient population not included in its marketing authorisation (product licence).

**Synonyms:**

### **Ogilvie Syndrome**

Acute colonic pseudo-obstruction characterized by massive colonic dilation in the absence of mechanical obstruction typically occurring in hospitalized patients with serious comorbidities including post-surgical states, severe infections, and medication effects.

**Synonyms:**

### **Ogilvie's syndrome**

Acute colonic pseudo-obstruction characterized by massive dilation of the colon, particularly the cecum and right colon, without mechanical obstruction. It occurs in hospitalized patients with serious medical or surgical conditions, often postoperatively, and results from autonomic nervous system imbalance.

**Synonyms:**

### **Ointment**

A semi-solid, greasy topical preparation for application to the skin, mucous membranes, or eyes. Ointments are typically composed of a hydrophobic

---

base (petrolatum, lanolin, paraffin, beeswax, vegetable oils) and may contain dissolved or suspended active pharmaceutical ingredients.

**Synonyms:**

### **Okihiro Syndrome**

A congenital disorder, usually caused by pathogenic variants in *SALL4*, combining radial-ray limb abnormalities with Duane retraction anomaly or other eye-movement defects. Hearing, cardiac, renal, and vertebral anomalies may also occur.

**Synonyms:**

### **Oleothorax**

Historical surgical obliteration of the pleural space using infused oil to collapse the lung, once used for tuberculosis treatment before effective chemotherapy, now largely obsolete.

**Synonyms:**

### **Olfactory Nerve**

Cranial nerve I (CN I), responsible for the sense of smell. Olfactory receptor neurons in the olfactory epithelium of the nasal roof project axons through the cribriform plate of the ethmoid bone to the olfactory bulb, then via the olfactory tract to the primary olfactory cortex (piriform cortex, amygdala, entorhinal cortex).

**Synonyms:**

### **Oligoclonal Bands**

Immunoglobulin G (IgG) proteins produced by a limited number of B-cell clones in the cerebrospinal fluid (CSF), detected by isoelectric focusing of CSF and serum samples.

**Synonyms:**

### **Oligodendroglioma**

A slow-growing glioma arising from oligodendrocytes, most often in the cerebral hemispheres. Associated with IDH mutation and 1p/19q codeletion, which confer a better prognosis and chemosensitivity.

**Synonyms:**

### **Oligohydramnios**

Insufficient amniotic fluid volume, defined as amniotic fluid index less than 5 cm or single deepest pocket less than 2 cm. Causes include fetal renal anomalies, post-term pregnancy, premature rupture of membranes, maternal dehydration, and placental insufficiency.

**Synonyms:**

### **Oligometastasis**

A limited number of metastatic deposits, often defined as up to five, amenable to aggressive local treatment (surgery, stereotactic radiation, or ablation) with the potential for prolonged control.

**Synonyms:**

### **Oliguria**

Reduced urine output, defined as <400 mL/day or <0.5 mL/kg/hour in adults. Oliguria is an important sign of acute kidney injury (AKI) and prerenal azotaemia.

**Synonyms:**

### **Olive Pontocerebellar Atrophy**

A group of neurodegenerative disorders characterized by progressive loss of neurons in the inferior olives, pons, and cerebellum. They cause worsening ataxia, dysarthria, incoordination, and sometimes pyramidal, autonomic, or cognitive features.

**Synonyms:**

### **Omega-3**

Polyunsaturated fatty acids (EPA, DHA, ALA). Anti-inflammatory, cardiovascular benefits. Sources: fatty fish, flaxseed, walnuts. Supplementation common.

**Synonyms:**

### **Omega-6**

Polyunsaturated fatty acids (linoleic acid). Pro-inflammatory in excess. Balance with omega-3 important. Sources: vegetable oils, nuts, seeds.

**Synonyms:**

---

## Omenn Syndrome

A severe combined immunodeficiency caused by hypomorphic defects affecting lymphocyte-receptor gene rearrangement or related pathways. It presents in infancy with erythroderma, lymphadenopathy, hepatosplenomegaly, diarrhea, failure to thrive, and recurrent or opportunistic infections.

**Synonyms:**

## Omentectomy

Removal of part or all of the greater omentum, commonly performed during staging and cytoreduction for ovarian and other intra-abdominal cancers.

**Synonyms:**

## Omentum

A double layer of peritoneum connecting the stomach to other abdominal organs. The greater omentum (gastrocolic omentum) hangs from the greater curvature of the stomach, covers the transverse colon and small intestine, and is rich in fat and immune cells (milky spots—aggregates of macrophages and lymphocytes).

**Synonyms:**

## Omphalitis

Infection of the umbilical stump in neonates, typically occurring within the first 1–2 weeks of life. Omphalitis is a potentially serious condition requiring prompt treatment due to the risk of spread to the liver (portal vein thrombosis, portal hypertension) and peritoneum via the umbilical vessels.

**Synonyms:**

## Omphalocele

A congenital abdominal wall defect where abdominal organs herniate into the base of the umbilical cord, covered by a peritoneal-amniotic membrane. Associated with chromosomal abnormalities (trisomies 13, 18) and other anomalies. Differentiated from gastroschisis by membrane coverage and midline location.

**Synonyms:**

## Onchocerca volvulus

A filarial nematode that causes onchocerciasis (river blindness), transmitted by repeated bites of infected blackflies (*Simulium* species) breeding near fast-flowing rivers. Adult worms reside in subcutaneous nodules (onchocercomata), where they can survive for years, producing microfilariae that migrate through the skin and eyes.

**Synonyms:**

## Onchocerciasis

A parasitic disease caused by the filarial nematode *Onchocerca volvulus*, transmitted by repeated bites of infected blackflies (*Simulium* species) breeding near fast-flowing rivers. Adult worms form subcutaneous nodules (onchocercomata).

**Synonyms:**

## Oncocytoma

A usually benign epithelial tumor, commonly arising in the kidney and composed of cells with abundant eosinophilic mitochondria-rich cytoplasm.

**Synonyms:**

## Oncogene

A gene that, when activated, overexpressed, or altered, can promote uncontrolled cell proliferation or survival. Oncogenes commonly arise from normal proto-oncogenes through mutation, amplification, translocation, or abnormal regulation.

**Synonyms:**

## Oncogenic

Capable of promoting the development of cancer.

**Synonyms:**

## Oncologic Emergency

A cancer-related condition that threatens life, organ function, or neurologic integrity and requires urgent treatment. Examples include malignant spinal-cord compression, superior vena cava syndrome, tumor lysis syndrome, hypercalcemia, airway obstruction, and febrile neutropenia.

**Synonyms:**

---

## **Oncologist**

A physician who specializes in the diagnosis and treatment of cancer. Includes medical oncologists (systemic therapy), radiation oncologists (radiotherapy), and surgical oncologists (operative management).

**Synonyms:**

## **Oncology PET**

PET, often combined with CT, used in selected cancers to assess disease distribution, treatment response, or recurrence.

**Synonyms:**

## **Oncology Rehabilitation**

Cancer rehabilitation: fatigue, pain, neuropathy, lymphedema, functional impairment. Pre- and post-treatment support.

**Synonyms:**

## **Oncolytic Virus**

A genetically modified virus that selectively replicates in and destroys cancer cells while sparing normal tissue, e.g., talimogene laherparepvec (T-VEC) for melanoma.

**Synonyms:**

## **Oncosis**

A form of cell death characterized by cellular swelling, derived from the Greek word *onkos* meaning swelling, representing a pre-lethal state that precedes necrosis. It is typically caused by ischemic injury leading to ATP depletion, which impairs the sodium-potassium pump and causes osmotic water influx.

**Synonyms:**

## **Oncotic Pressure**

The osmotic pressure exerted by plasma proteins (predominantly albumin) that do not freely cross the capillary wall. Normal plasma oncotic pressure is approximately 25-28 mmHg. It opposes the hydrostatic pressure that drives fluid out of capillaries, favoring fluid reabsorption at the venular end.

**Synonyms:**

## **One Health**

Approach recognizing health connections between humans, animals, environment. Examples: zoonotic diseases, antibiotic resistance, food safety.

**Synonyms:**

## **One-Hour Glucose Challenge Test**

A screening test for gestational diabetes mellitus (GDM) performed at 24-28 weeks. The patient drinks 50 g of glucose (regardless of fasting state), and plasma glucose is measured at 1 hour. Thresholds vary by protocol; a result in the range of 130–140 mg/dL positive, warranting diagnostic 3-hour oral glucose tolerance test (OGTT).

**Synonyms:**

## **Onycholysis**

Separation of the nail plate from the underlying nail bed, beginning distally or laterally. Causes include trauma, psoriasis, fungal infection, thyroid disease, medications, and chemical exposure; the underlying cause should be identified.

**Synonyms:**

## **Onychomycosis**

Fungal nail infection, most commonly caused by dermatophytes (*Trichophyton rubrum*), affecting toenails more than fingernails. It presents as nail thickening, discoloration (yellow-brown), subungual debris, and nail separation. Diagnosis is confirmed by KOH preparation or fungal culture.

**Synonyms:**

## **Oocyte**

The female gamete (egg cell) produced in the ovary through oogenesis. Oocytes develop from primordial germ cells, which undergo mitosis to form oogonia, then enter meiosis I before birth and arrest in prophase I until puberty.

**Synonyms:**

## **Oophorectomy**

Surgical removal of one (unilateral) or both (bilateral) ovaries.

**Synonyms:**

---

## **Oophoritis**

Inflammation of an ovary, usually associated with pelvic infection or, less commonly, autoimmune disease. It may cause lower abdominal or pelvic pain, fever, abnormal discharge, or menstrual changes; severe pain requires assessment to exclude ovarian torsion or abscess.

**Synonyms:**

## **Opacity**

Lack of transparency of a normally transparent ocular structure (cornea, lens, vitreous, or aqueous humour). Corneal opacity results from scarring (trauma, infection—herpes simplex keratitis, trachoma), dystrophies (Fuchs endothelial dystrophy, granular/lattice/macular dystrophies), or edema.

**Synonyms:**

## **Open Fractures**

Fractures in which the broken bone or fracture hematoma communicates with an external wound. They have increased risks of infection and soft-tissue injury and require urgent assessment and specialized treatment.

**Synonyms:**

## **Open Reduction and Internal Fixation**

Operative exposure and realignment of a fracture followed by fixation with implants such as plates, screws, wires, or nails. It is used when closed treatment cannot provide acceptable alignment, stability, or joint restoration.

**Synonyms:**

## **Open Surgery**

Traditional surgical approach with incision. Used for bypass, aneurysm repair, thrombectomy.

**Synonyms:**

## **Open-book fracture**

A pelvic ring disruption with diastasis of the pubic symphysis or sacroiliac joints, often from high-energy trauma, carrying risk of massive hemorrhage and organ injury.

**Synonyms:**

## **Open-Heart Surgery**

Any surgical procedure involving opening the chest wall (sternotomy or thoracotomy) and operating on the heart, usually with cardiopulmonary bypass (the heart–lung machine).

**Synonyms:**

## **Operative Vaginal Delivery**

Vaginal delivery assisted by vacuum or forceps. Indications: prolonged second stage, suspected fetal compromise, need to shorten the second stage for maternal benefit (exhaustion, cardiac disease, hypertensive crisis).

**Synonyms:**

## **Ophthalmic Emergency**

An eye or visual condition requiring urgent evaluation to prevent irreversible vision loss or severe ocular injury. Examples include acute angle closure, retinal detachment, central retinal artery occlusion, endophthalmitis, chemical injury, orbital cellulitis, and open-globe trauma.

**Synonyms:**

## **Ophthalmomyiasis**

Infestation of the eye by fly larvae (most commonly Oestridae), which may be superficial (conjunctival) or deep (intraocular), with the latter carrying a risk of retinal detachment, endophthalmitis, and permanent vision loss.

**Synonyms:**

## **Ophthalmoplegia**

Weakness or paralysis of one or more eye muscles, causing limited eye movement, double vision, or abnormal eye position. Causes include nerve disorders, stroke, diabetes, thyroid disease, trauma, and neuromuscular conditions.

**Synonyms:**

## **Ophthalmoscope**

Instrument for examining retina and optic nerve. Direct: larger, brighter image. Indirect: wider field. Essential for fundoscopic examination.

**Synonyms:**

---

## Ophthalmoscopy

Examination of the interior of the eye, especially the retina, optic disc, and retinal blood vessels, using an ophthalmoscope. It helps detect retinal disease, optic-nerve abnormalities, glaucoma, and systemic vascular disease.

**Synonyms:**

## Opiate

A natural alkaloid derived from the opium poppy (*Papaver somniferum*) or a semi-synthetic derivative that binds to opioid receptors.

**Synonyms:**

## Opioid Agonist Treatment

Treatment of opioid use disorder with a prescribed opioid agonist or partial agonist, most commonly methadone or buprenorphine, together with psychosocial and medical support. It reduces withdrawal, craving, illicit opioid use, overdose, and mortality.

**Synonyms:**

## Opioid Analgesics

A class of drugs that bind to opioid receptors in the central and peripheral nervous systems, producing analgesia and other effects.

**Synonyms:**

## Opioid Antagonist

A medicine that blocks opioid receptors and can reverse opioid effects such as respiratory depression. Naloxone is a commonly used example.

**Synonyms:**

## Opioid Overdose

A medical emergency characterized by the classic triad of respiratory depression, miosis (pinpoint pupils), and decreased level of consciousness. It can progress to respiratory arrest, cardiovascular collapse, and death.

**Synonyms:**

## Opioid Reversal

Emergency treatment of opioid toxicity with nalox-

one, a competitive opioid-receptor antagonist. It is titrated to restore adequate breathing, with repeated doses or monitoring sometimes needed because its effect may wear off before the opioid.

**Synonyms:**

## Opioid Toxicity

Toxic effects of opioid agonists, classically respiratory depression, central nervous system depression, and miosis. Management prioritizes ventilation and airway support; naloxone is titrated to restore adequate breathing while recognizing the risk of recurrent toxicity and withdrawal.

**Synonyms:**

## Opioid Use Disorder

A problematic pattern of opioid use leading to significant impairment or distress. Opioids include heroin, fentanyl, morphine, oxycodone, and hydrocodone. Criteria are the same eleven as for substance use disorders generally. Overdose presents with respiratory depression, miosis, and decreased level of consciousness.

**Synonyms:**

## Opioids

A class of drugs that bind to opioid receptors in the central and peripheral nervous systems, producing analgesia and other effects. See Opioid Analgesics.

**Synonyms:**

## Opisthotonos

Severe backward arching of the head, neck, and spine caused by sustained extensor muscle spasm. It is classically associated with tetanus but may also occur in meningitis, seizures, or severe brain injury.

**Synonyms:**

## Opportunistic Infection

An infection caused by organisms that ordinarily do not cause disease in immunocompetent hosts but cause significant illness when host defences are impaired.

**Synonyms:**

---

## Opposition

Movement of the thumb across the palm to contact the fingertips. It combines abduction, flexion, and medial rotation at the first carpometacarpal joint.

**Synonyms:**

## Oppositional Defiant Disorder

A childhood/adolescent disorder characterized by a persistent pattern ( $\geq 6$  months) of angry/irritable mood, argumentative/defiant behavior, and vindictiveness.

**Synonyms:**

## Opsoclonus

Rapid, involuntary, multidirectional, conjugate eye movements without an intersaccadic interval. It may occur with myoclonus and ataxia as part of an autoimmune or paraneoplastic syndrome, particularly in children with neuroblastoma.

**Synonyms:**

## Opsonization

The process by which pathogens or particles are coated with opsonins (antibodies—IgG, complement—C3b, or acute-phase proteins) that enhance recognition and phagocytosis by phagocytes bearing corresponding receptors (Fc receptors, complement receptors).

**Synonyms:**

## Optic Atrophy

End-stage degeneration of the optic nerve fibers resulting from any optic neuropathy. Causes: glaucoma, ischemic optic neuropathy, multiple sclerosis, compressive lesions (pituitary tumor, aneurysm), toxins (methanol, ethambutol), and hereditary (Leber hereditary optic neuropathy).

**Synonyms:**

## Optic Disc

The point on the retina where the optic nerve exits the eye, lacking photoreceptors and creating the natural blind spot.

**Synonyms:**

## Optic Disc Edema

Swelling of the optic-nerve head caused by axoplasmic-flow disruption. Bilateral optic-disc edema from raised intracranial pressure is papilledema; unilateral or non-pressure causes require separate evaluation for optic-nerve, retinal, inflammatory, ischemic, or infiltrative disease.

**Synonyms:**

## Optic Glioma

A usually slow-growing glioma of the optic nerve or optic pathway, occurring most often in children. It may cause progressive visual loss, optic atrophy, proptosis, or visual-field defects and is associated with neurofibromatosis type 1.

**Synonyms:**

## Optic Nerve

CN II exiting through the optic disc (blind spot), passing through the optic canal, and partially decussating at the optic chiasm. Technically a CNS tract with oligodendrocyte myelination and meningeal coverings, making it susceptible to demyelinating disease (optic neuritis in MS).

**Synonyms:**

## Optic Nerve Atrophy

Pallor and degeneration of the optic nerve caused by loss of retinal ganglion-cell axons. It produces permanent visual impairment and may result from ischemia, inflammation, compression, glaucoma, trauma, or raised intracranial pressure.

**Synonyms:**

## Optic Neuritis

Inflammation or demyelination of the optic nerve, often causing subacute vision loss, impaired color vision, and pain with eye movement. It may be associated with multiple sclerosis or other inflammatory, infectious, or immune-mediated disorders.

**Synonyms:**

## Optical Coherence Tomography

A non-invasive imaging technique that uses low-coherence interferometry to produce high-resolution,

---

cross-sectional images of the retina and other ocular structures, providing quantitative measurements of retinal layer thickness and detecting structural abnormalities with micrometer-level resolution.

**Synonyms:**

### Optometry

A healthcare profession concerned with examining the eyes and visual system for defects and abnormalities, prescribing corrective lenses (spectacles, contact lenses), diagnosing eye disease, and providing pre- and post-operative care for surgical eye treatments.

**Synonyms:**

### Oral Cancer

Malignancy of oral cavity, including lips, tongue, floor of mouth, buccal mucosa, palate, tonsils, oropharynx. Major risk factors: tobacco use, alcohol consumption, human papillomavirus (HPV, especially p16-positive oropharyngeal cancer). Presentation: persistent ulcer, leukoplakia, erythroplakia, mass, pain, difficulty swallowing.

**Synonyms:**

### Oral Candidiasis

Infection or overgrowth of *Candida* species on the oral mucosa, often presenting as removable white plaques, erythematous patches, or angular cheilitis. Risk factors include antibiotics, inhaled corticosteroids, immunosuppression, diabetes, xerostomia, and dentures.

**Synonyms:**

### Oral Cavity

The space extending from the lips to the oropharynx, bounded by the cheeks, palate, and tongue. It receives food, begins mechanical and chemical digestion, and contributes to speech.

**Synonyms:**

### Oral Cavity Cancer

Squamous cell carcinoma of the lip, tongue, buccal mucosa, floor of mouth, or palate, associated with tobacco, alcohol, and betel quid use. Treatment is

primarily surgical resection, with adjuvant radiation or chemoradiation for adverse features.

**Synonyms:**

### Oral Contraceptive

Birth control pill: combined oral contraceptive (COC—ethinylestradiol + progestin) or progestin-only pill (POP/minipill). Mechanisms: ovulation inhibition, cervical mucus thickening, endometrial change.

**Synonyms:**

### Oral Glucose Tolerance Test

A diagnostic test measuring plasma glucose response after a standardized oral glucose load. It is used in selected evaluations of diabetes, impaired glucose tolerance, and gestational diabetes when fasting glucose or HbA1c is insufficient.

**Synonyms:**

### Oral Hygiene

Practices maintaining oral health: brushing twice daily with fluoride toothpaste, flossing daily, mouthwash (optional), regular dental visits. Proper brushing technique: soft brush, 45-degree angle to gumline, gentle circular motions. Interdental cleaning essential for plaque removal.

**Synonyms:**

### Oral Hypoglycemic

A class of drugs used to treat type 2 diabetes (with lifestyle).

**Synonyms:**

### Oral Leukoplakia

A white patch or plaque on the oral mucosa that cannot be scraped off and cannot be characterized as any other diagnosable disease, considered a potentially malignant disorder. Risk factors: tobacco use (most common), alcohol, and betel nut chewing. Most common sites: buccal mucosa, alveolar ridge, and tongue.

**Synonyms:**

---

### Oral Lichen Planus

Chronic inflammatory condition. Reticular (lace-like white lines), erosive (painful ulcers). Associated with hepatitis C. Malignant transformation rare but possible.

**Synonyms:**

### Oral Medicine

Specialty diagnosing oral mucosal diseases, dental causes of facial pain, oral manifestations of systemic disease.

**Synonyms:**

### Oral Mucosa

The moist stratified squamous epithelial lining of the oral cavity. It includes masticatory, lining, and specialized mucosa and provides barrier protection, sensation, lubrication, and sites for minor salivary glands.

**Synonyms:**

### Oral Nutritional Supplement

A calorie-, protein-, or micronutrient-containing product consumed by mouth to supplement, not automatically replace, usual food intake. The product and dose should match the patient's needs, swallowing ability, disease restrictions, and tolerance.

**Synonyms:**

### Oral Pathology

Study of diseases affecting oral tissues. Includes neoplasms, cysts, inflammatory conditions, developmental anomalies.

**Synonyms:**

### Oral Polio Vaccine

A live attenuated poliovirus vaccine administered by mouth. Its formulation and use depend on the public-health program and circulating poliovirus strains; it has played an important role in polio control.

**Synonyms:**

### Oral Radiology

Specialty of producing and interpreting images of

oral and maxillofacial region.

**Synonyms:**

### Oral Sex (Fellatio, Cunnilingus)

Oral stimulation of the genitals for sexual pleasure. Fellatio: oral stimulation of the penis. Cunnilingus: oral stimulation of the vulva and clitoris. Analingus (rimming): oral stimulation of the anus.

**Synonyms:** Fellatio, Cunnilingus

### Oral Squamous Cell Carcinoma

A malignant neoplasm arising from oral stratified squamous epithelium. Persistent induration, ulceration, red or white patches, unexplained bleeding, pain, or neck mass requires evaluation and biopsy; staging incorporates tumor, nodal, and metastatic findings.

**Synonyms:**

### Oral Surgery

Surgical procedures in oral and maxillofacial region. Extractions, implant placement, biopsies, cyst removal, corrective jaw surgery.

**Synonyms:**

### Oral Toxicity

Harm caused by swallowing a toxic substance, medicine, or excessive dose.

**Synonyms:**

### Oral Ulcer

Ulceration of oral mucosa. Aphthous ulcer (canker sore) most common. Traumatic, viral, autoimmune causes.

**Synonyms:**

### Orbital Cellulitis

A serious infection of the orbital tissues posterior to the orbital septum, potentially sight-threatening and life-threatening due to the risk of optic nerve compression, cavernous sinus thrombosis, and intracranial extension.

**Synonyms:**

---

### Orbital metastasis

Secondary cancer deposits in the orbit, most commonly from breast, lung, or prostate primaries. Symptoms include proptosis, diplopia, pain, and visual impairment.

**Synonyms:**

### Orbital Pseudotumor

Noninfectious, idiopathic inflammation of orbital tissues, also called idiopathic orbital inflammation. It can cause painful eye movement, proptosis, eyelid swelling, diplopia, and restricted ocular motility.

**Synonyms:** idiopathic.

### Orchiectomy

Surgical removal of one or both testicles. Radical inguinal orchiectomy is diagnostic and therapeutic for testicular cancer; bilateral orchiectomy is a hormonal therapy for prostate cancer.

**Synonyms:**

### Orchitis

Inflammation of the testis, often associated with epididymitis (epididymo-orchitis).

**Synonyms:**

### Orexin Receptor Antagonists

Medications that block orexin (hypocretin) receptors to promote sleep. Suvorexant and lemborexant are approved for insomnia. They reduce wakefulness by blocking the arousal system. They have lower abuse potential than benzodiazepines and do not cause respiratory depression.

**Synonyms:**

### Orf

A zoonotic viral skin infection caused by the parapoxvirus, transmitted to humans from infected sheep and goats (direct contact with lesions, fomites—virus survives in scabs for months). Orf is an occupational disease of farmers, butchers, and veterinarians. Incubation: 3–7 days.

**Synonyms:**

### Organ

A structure composed of two or more different types of tissues that has a recognizable shape and performs specific functions.

**Synonyms:**

### Organ System

A group of related organs that work together to perform major body functions.

**Synonyms:**

### Organ Transplants

The surgical transfer of an organ from a donor to a recipient whose organ function is severely impaired. Solid-organ transplantation may involve the kidney, liver, heart, lung, pancreas, or intestine and requires donor assessment, recipient selection, and ongoing follow-up.

**Synonyms:**

### Organophosphate

A class of chemicals that can inhibit acetylcholinesterase. Some are pesticides or nerve agents and can cause cholinergic poisoning.

**Synonyms:**

### Organophosphate Poisoning

Acetylcholinesterase inhibitors. SLUDGE syndrome: salivation, lacrimation, urination, defecation, GI upset, emesis. Miosis, bradycardia, bronchospasm, muscle fasciculations. Treatment: atropine, pralidoxime, supportive care.

**Synonyms:**

### Orogastric Tube

Tube through mouth to stomach. For infants, unconscious patients.

**Synonyms:**

### Oropharyngeal Airway

A rigid airway adjunct inserted through the mouth to displace the tongue and help maintain upper-airway patency in an unconscious patient without an intact gag reflex. It does not protect against aspiration.

---

**Synonyms:**

### **Oropharyngeal Carcinoma**

Malignancy arising in the oropharynx, including the tonsil, base of tongue, soft palate, and posterior pharyngeal wall. HPV-associated tumors form an important subgroup; evaluation includes endoscopy, biopsy, imaging, and cervical-node assessment.

**Synonyms:**

### **Oropharynx**

The posterior portion of the mouth leading to the esophagus, containing the tonsils and base of tongue. Area for swallowing and speech. Examination with tongue depressor and light source. Pathology: pharyngitis, tonsillitis, malignancy.

**Synonyms:**

### **Orphan Drug**

A pharmaceutical agent developed specifically to treat a rare medical condition (affecting fewer than 200,000 people in the United States, as defined by the Orphan Drug Act of 1983).

**Synonyms:**

### **Orthodontic Bracket**

A bonded or banded attachment that transmits forces from an orthodontic archwire to a tooth. Bracket position and wire sequence guide controlled tooth movement.

**Synonyms:**

### **Orthodontic Retainer**

A removable or fixed appliance used after active orthodontic treatment to maintain tooth position while periodontal and alveolar tissues remodel. Retention is often needed long term because relapse can occur.

**Synonyms:**

### **Orthodontics**

Specialty of dental management of malocclusion and dental-facial discrepancies. Appliances: fixed braces, removable appliances, clear aligners. Treatment indications: crowding, spacing, overbite, underbite,

crossbite, open bite, midline discrepancy. Treatment duration: 12-24 months typically. Retention phase essential for stability.

**Synonyms:**

### **Orthognathic Surgery**

Corrective jaw surgery for skeletal malocclusion. Le Fort I, Bilateral Sagittal Split Osteotomy. Combined with orthodontics.

**Synonyms:**

### **Orthopedic Biologics**

Biological or biomaterial products used to support bone or soft-tissue healing. Examples include autograft, allograft, demineralized bone matrix, bone-marrow products, and synthetic graft substitutes; their uses and evidence vary by procedure and condition.

**Synonyms:**

### **Orthopedic Implant**

Devices for bone/joint reconstruction. Types: plates, screws, rods, hinges, prostheses. Materials: titanium, cobalt-chrome, stainless steel, polyethylene, ceramic. Used for fractures, arthritis, tumors, deformities. Complications: infection, loosening, fracture, wear.

**Synonyms:**

### **Orthopedic Infections**

Infections involving bones, joints, muscles, or orthopedic implants. Examples include osteomyelitis, septic arthritis, prosthetic-joint infection, and some diabetic foot infections.

**Synonyms:**

### **Orthopedic Rehabilitation**

Therapy that restores movement, strength, function, and independence after musculoskeletal injury or surgery.

**Synonyms:**

### **Orthopedic Screws**

Fixation devices for fractures. Materials: titanium, stainless steel. Types: cortical, cancellous, inter-

---

fragmentary. Used with plates, rods, nails. Complications: loosening, breakage, infection.

**Synonyms:**

### orthopedics

The branch of surgery concerned with the musculoskeletal system, including bones, joints, ligaments, tendons, muscles, and nerves.

**Synonyms:**

### Orthopnea

Dyspnea that occurs when lying flat and is relieved by sitting upright. It is measured by the number of pillows the patient needs to sleep (two-pillow orthopnea). It is a hallmark of left heart failure and is caused by redistribution of fluid from the lower extremities to the lungs in the supine position.

**Synonyms:**

### Orthopnoea

Shortness of breath that occurs when lying flat and is relieved by sitting or standing upright. Orthopnoea is a classic symptom of left-sided heart failure (elevated pulmonary venous pressure worsens pulmonary congestion in the supine position). Other causes: severe COPD, asthma exacerbation, diaphragmatic paralysis, ascites, and obesity.

**Synonyms:**

### Orthorexia

A term used for an excessive or rigid preoccupation with eating foods considered healthy. It is not a universally recognized formal psychiatric diagnosis but may cause nutritional or social impairment.

**Synonyms:**

### Orthosis

An externally applied device that supports, aligns, prevents deformity, protects, or assists movement of a body segment. It differs from a prosthesis, which replaces a missing body part.

**Synonyms:**

### Orthostatic Hypotension

Decrease in SBP  $\geq 20$  mmHg or DBP  $\geq 10$  mmHg

within 3 minutes of standing. Causes: dehydration, medications (antihypertensives, diuretics, alpha-blockers, antidepressants), autonomic dysfunction (diabetes, Parkinson disease), and prolonged bed rest. Symptoms: dizziness, lightheadedness, syncope, falls.

**Synonyms:**

### Orthostatic Intolerance

Symptoms or signs that develop when standing because the cardiovascular and autonomic systems do not maintain adequate cerebral perfusion. Manifestations include light-headedness, palpitations, fatigue, visual dimming, presyncope, or syncope and may occur with or without orthostatic tachycardia or hypotension.

**Synonyms:**

### Orthotic Training

Training for brace users: donning/doffing, skin care, gait training with brace.

**Synonyms:**

### Osborn wave

A positive deflection at the junction of the QRS complex and ST segment on electrocardiography, also known as a J wave. It is classically associated with hypothermia, where its amplitude correlates with the degree of cooling.

**Synonyms:** a J wave.

### OSFED

Other Specified Feeding or Eating Disorder, used when the clinical presentation causes significant distress or impairment but does not meet full criteria for any of the specific eating disorders.

**Synonyms:**

### Osgood-Schlatter Disease

A traction apophysitis of the tibial tuberosity at the insertion of the patellar tendon, caused by repetitive microtrauma during periods of rapid growth.

**Synonyms:**

---

### Osler Nodes

Painful, erythematous nodules on the pads of fingers and toes, caused by immune complex deposition in infective endocarditis. They are a minor criterion in the Duke criteria. Osler nodes are tender and may last hours to days.

**Synonyms:**

### Osmolality

The concentration of osmotically active particles per kilogram of solvent. Plasma osmolality is determined mainly by sodium and its accompanying anions, glucose, and urea and governs water movement across cell membranes.

**Synonyms:**

### Osmosis

The net movement of water molecules across a semipermeable membrane from a region of lower solute concentration (higher water concentration) to a region of higher solute concentration (lower water concentration). Driven by the osmotic pressure difference, which is proportional to the number of solute particles.

**Synonyms:**

### Osmotic Demyelination Syndrome

Demyelinating process affecting the pons and extrapontine regions caused by overly rapid correction of chronic hyponatremia. The brain adapts to chronic hyponatremia by extruding osmoles and when sodium is corrected too quickly water shifts out of brain cells causing osmotic injury to oligodendrocytes.

**Synonyms:**

### Osmotic Diarrhea

Diarrhea caused by poorly absorbed solutes retaining water in the intestinal lumen. It typically improves with fasting and may result from carbohydrate malabsorption, laxatives, or other osmotically active substances.

**Synonyms:**

### Osmotic Fragility Test

A test that measures the susceptibility of red blood cells to haemolysis when placed in progressively more dilute saline solutions. Increased fragility supports hereditary spherocytosis, although the result may also be affected by other haemolytic disorders and recent transfusion.

**Synonyms:**

### Osmotic Pressure

The pressure required to prevent the movement of water across a semipermeable membrane when a solute concentration gradient exists, proportional to the number of dissolved particles (van't Hoff law:  $\pi = iCRT$ ). It is a colligative property depending on particle number, not particle identity.

**Synonyms:**

### Osseointegration

Direct structural and functional connection between living bone and the surface of a load-bearing implant under appropriate conditions. It depends on implant stability, surface characteristics, bone quality, healing, and control of infection and occlusal forces.

**Synonyms:**

### Ossicles

Three smallest body bones forming the ossicular chain in the middle ear: malleus (hammer, attached to tympanic membrane), incus (anvil), stapes (stirrup, footplate in oval window).

**Synonyms:**

### Ossicular Discontinuity

Partial or complete separation of the middle-ear ossicles, usually caused by trauma, chronic ear disease, or surgery. It produces conductive hearing loss and may be evaluated with otoscopy, audiometry, and imaging.

**Synonyms:** Ossicular-chain discontinuity; ossicular disruption.

### Osteoarthritis

The most common joint disease, characterized by

---

progressive cartilage loss, subchondral bone sclerosis, osteophyte formation, and synovial inflammation, affecting knees, hips, hands (DIP/PIP Heberden/Bouchard nodes), spine. Risk factors: age, obesity, joint injury, malalignment, genetics, female sex.

**Synonyms:**

### **Osteoarthritis (Geriatric)**

Osteoarthritis occurring in later life, commonly affecting the knees, hips, hands, or spine and causing joint pain, stiffness, and reduced movement. Management may include exercise, weight management, medicines, assistive measures, or joint replacement when appropriate.

**Synonyms:** Geriatric

### **Osteoblast**

A bone-forming cell derived from mesenchymal stem cells in the bone marrow. Osteoblasts synthesise and deposit the bone matrix (osteoid), composed primarily of type I collagen and non-collagenous proteins (osteocalcin, osteonectin, alkaline phosphatase).

**Synonyms:**

### **Osteochondritis Dissecans**

A condition characterized by separation of a fragment of articular cartilage and subchondral bone from the joint surface, most commonly in the knee (lateral aspect of the medial femoral condyle). Most common in adolescents and young adults. Etiology: repetitive microtrauma, ischemia, or genetic predisposition.

**Synonyms:**

### **Osteochondroma**

A usually benign cartilage-capped bony projection arising from the surface of a bone and continuous with its cortex and medullary cavity. It may be solitary or occur in hereditary multiple exostoses.

**Synonyms:**

### **Osteoclast**

A large, multinucleated bone-resorbing cell derived from the monocyte-macrophage lineage (hematopoi-

etic stem cells).

**Synonyms:**

### **Osteocyte**

The mature, terminally differentiated bone cell embedded within the bone matrix in lacunae, derived from osteoblasts. Osteocytes are connected to each other and to bone surface cells via canaliculi, forming a mechanosensory network that senses mechanical loading and fluid flow.

**Synonyms:**

### **Osteogenesis Imperfecta**

A connective tissue disorder caused by collagen type I mutations, ranging from mild to lethal. Features: fractures with minimal trauma, blue sclerae, dental abnormalities, and hearing loss. Severe forms (type II) cause multiple fractures in utero and perinatal death. Diagnosis: clinical features, genetic testing, and bone biopsy.

**Synonyms:**

### **Osteoid Osteoma**

A benign bone-forming tumor, usually in an adolescent or young adult, characterized by a small vascular nidus surrounded by reactive sclerosis. It commonly causes localized pain that is worse at night and may improve with nonsteroidal anti-inflammatory drugs.

**Synonyms:**

### **Osteomalacia**

Impaired mineralization of newly formed osteoid in adults resulting from vitamin D deficiency, phosphate depletion, or defective mineralization.

**Synonyms:**

### **Osteomyelitis**

An infection of bone and bone marrow, most commonly caused by bacterial pathogens, with *Staphylococcus aureus* responsible for the majority of cases.

**Synonyms:**

### **Osteonecrosis (Avascular Necrosis)**

Osteonecrosis (AVN) is bone death from vascular

---

compromise, affecting femoral head (most common), humeral head, femoral condyles, talus. Risk factors: glucocorticoids (high dose, cumulative), alcohol, trauma, sickle cell disease, SLE, antiphospholipid syndrome, pancreatitis, decompression sickness, radiation, organ transplantation.

**Synonyms:** Avascular Necrosis

### **Osteopathy**

A system of manual medicine and healthcare founded by Andrew Taylor Still (1828–1917) based on the principle that the body's structure (musculoskeletal system) and function are interrelated, and that the body has inherent self-regulatory and healing mechanisms.

**Synonyms:**

### **Osteopenia**

Bone mineral density (BMD) that is lower than normal but not low enough to be classified as osteoporosis. T-score between -1.0 and -2.5 on DXA scan. A risk factor for osteoporosis and fractures.

**Synonyms:**

### **Osteopetrosis**

A rare inherited bone disease characterized by defective osteoclast function, leading to impaired bone resorption and abnormally dense, sclerotic bones. The bone is structurally abnormal—brittle despite increased density—and prone to fracture.

**Synonyms:**

### **Osteoporosis**

A skeletal disorder in which reduced bone strength increases the risk of fractures. Risk is influenced by age, hormones, medicines, genetics, nutrition, smoking, alcohol, and other conditions; diagnosis and management use clinical assessment and bone-density testing when appropriate.

**Synonyms:**

### **Osteoporosis Fracture Risk Assessment**

Evaluation combining clinical risk factors, prior fragility fracture history, bone mineral density, and tools such as FRAX to estimate future fracture

probability and guide treatment.

**Synonyms:**

### **Osteosarcoma**

The most common primary malignant bone tumor in children and adolescents (excluding leukemia), with a peak incidence during the adolescent growth spurt (ages 10-20 years), and a second smaller peak in older adults (usually secondary to Paget disease or prior radiation).

**Synonyms:**

### **Osteotomy**

A surgical procedure involving cutting and repositioning of bone to correct deformity, realign joint surfaces, alter weight-bearing forces, or change limb length.

**Synonyms:**

### **Ostomy**

Surgical opening into bowel or urinary tract. Colostomy, ileostomy, urostomy. Appliances for collection.

**Synonyms:**

### **Ostomy Appliance**

Collection device for feces/urine after ostomy surgery. Types: urostomy (urine), colostomy (feces), ileostomy (ileum). One-piece or two-piece systems. Open or closed end. Skin care essential. Complications: skin irritation, hernia, obstruction, prolapse.

**Synonyms:**

### **Ostraceous psoriasis**

A severe, chronic variant of plaque psoriasis in which the lesions become thick, hard, and shell-like (ostraceous), with laminated, greyish-brown crusts resembling oyster shells. It is often refractory to standard therapies and may require systemic agents, biologics, or combination treatment.

**Synonyms:**

### **Other Pain Conditions**

Pain conditions that do not fit neatly into a single category, including nociplastic pain, fibromyalgia,

---

chronic tension-type headache, temporomandibular pain, chronic pelvic pain, and complex regional pain syndrome. Diagnosis and treatment depend on the specific condition.

**Synonyms:**

### Other Specified Sexual Dysfunction

A category for sexual dysfunction symptoms that cause distress but do not meet full criteria for any specific sexual dysfunction.

**Synonyms:**

### Otic capsule

The otic capsule is the dense bony shell (otic capsule bone) that surrounds and protects the inner ear structures, including the cochlea, vestibule, and semicircular canals, forming the hardest bone in the human body.

**Synonyms:**

### Otitis Externa

Inflammation or infection of the external ear canal, commonly causing ear pain, itching, tenderness, or discharge.

**Synonyms:**

### Otitis media

A group of inflammatory conditions of the middle ear, most commonly caused by viral or bacterial infection, with *Streptococcus pneumoniae*, *Haemophilus influenzae*, and *Moraxella catarrhalis* being the most frequent bacterial pathogens.

**Synonyms:**

### Otitis Media with Effusion

Nonpurulent fluid in the middle ear without acute signs of infection. It may cause conductive hearing loss, aural fullness, or speech and learning effects in children; many cases resolve spontaneously, but persistent or consequential effusion requires hearing assessment and ENT review.

**Synonyms:**

### Otocephaly

A severe congenital craniofacial malformation char-

acterized by absent or markedly underdeveloped mandible, ventral displacement or fusion of the ears, and associated facial and airway abnormalities. It is usually lethal because of profound impairment of breathing and feeding.

**Synonyms:**

### Otolaryngology

The surgical specialty concerned with the diagnosis and treatment of disorders of the ear, nose, throat, head, and neck. Otolaryngologists (ENT surgeons) manage conditions ranging from otitis media and sinusitis to head and neck cancer, thyroid disease, and voice disorders.

**Synonyms:**

### Otology

The medical specialty concerned with disorders of the ear, including hearing loss, tinnitus, balance disorders, ear infections, otosclerosis, cholesteatoma, and related conditions.

**Synonyms:**

### Otorrhea

Discharge from the ear. Classification: acute otorrhea (<6 weeks) and chronic otorrhea (>6 weeks).

**Synonyms:**

### Otosclerosis

An abnormal bony growth in the middle ear that causes hearing loss.

**Synonyms:**

### Otoscope

Instrument for examining ear canal and tympanic membrane. Light source, magnifying lens, speculum. Essential for otologic evaluation.

**Synonyms:**

### Otoscopy

A clinical examination technique used to visualize the external auditory canal and tympanic membrane, and it is an essential component of the evaluation of ear complaints including hearing loss, ear pain, otorrhea, and tinnitus.

---

**Synonyms:**

### Otoacoustic Emissions

Low-level sounds generated by the cochlea, usually by outer hair cells, that can be recorded with a sensitive probe in the ear canal. Testing is used for newborn hearing screening and for assessing cochlear function.

**Synonyms:** OAE; otoacoustic-emission testing; cochlear emissions.

### Ototoxicity

Functional damage to the cochlea or vestibular system caused by exposure to a toxic substance, including some medicines or industrial chemicals. It may present with hearing loss, tinnitus, or imbalance and can be temporary or permanent.

**Synonyms:** Auditory toxicity; vestibular toxicity; ototoxic effect.

### Outbreak

Synonymous with epidemic. Sometimes used to refer to a local epidemic as compared to a larger, general epidemic.

**Synonyms:**

### Outcome Measurement

The use of defined measures to assess a patient's symptoms, function, quality of life, or other results before and after care.

**Synonyms:**

### Outcome Research

Study of rehabilitation outcomes. Effectiveness, cost-effectiveness, patient-reported outcomes.

**Synonyms:**

### Outer Ear

The visible auricle and the external auditory canal, which collect and conduct sound toward the eardrum.

**Synonyms:**

### Outpatient Rehabilitation

Rehabilitation provided without hospital admission

to improve function after illness, injury, surgery, or disability. The setting, frequency, and duration are individualized.

**Synonyms:**

### Ovarian Cancer

A malignant tumor arising in the ovary or related tissues. It may cause abdominal or pelvic symptoms, but early disease can be asymptomatic.

**Synonyms:**

### Ovarian Cyst

A fluid-filled sac within or on the ovary, most commonly functional (follicular or corpus luteum cysts) related to the menstrual cycle. Usually asymptomatic; can present with pelvic pain, pressure, and bloating. Complications: rupture, hemorrhage, torsion (sudden severe pain with nausea/vomiting).

**Synonyms:**

### Ovarian Hyperstimulation Syndrome

A potentially serious complication of ovarian stimulation in assisted reproduction caused by increased vascular permeability and fluid shift. It produces enlarged ovaries, abdominal distension, ascites, hemoconcentration, electrolyte abnormalities, thrombosis risk, and, in severe cases, organ dysfunction.

**Synonyms:**

### Ovarian Pregnancy

A rare ectopic pregnancy implanted in ovarian tissue rather than in the uterine cavity or fallopian tube. Diagnosis uses clinical findings, serial human chorionic gonadotropin measurements, ultrasound, and sometimes surgical or pathologic confirmation; treatment is individualized.

**Synonyms:**

### Ovarian Torsion

Twisting of the ovary (and often the fallopian tube) on its vascular pedicle, causing obstruction of blood flow—a gynecologic emergency. Risk: ovarian cysts/tumors (especially >5 cm), longer utero-ovarian ligament, younger women, pregnancy.

**Synonyms:**

---

## Ovariectomy

Surgical removal of one or both ovaries.

**Synonyms:**

## Ovary

The female gonad, a paired almond-shaped organ located in the pelvic cavity on each side of the uterus. Functions: production of oocytes (ova) and secretion of female sex hormones (oestrogen, progesterone, and small amounts of androgens). Each ovary contains follicles at various stages of development.

**Synonyms:**

## Over-the-Counter

Medications available without a prescription, considered safe and effective for self-care with appropriate labeling and low abuse potential. Examples: acetaminophen, ibuprofen, antacids, antihistamines, decongestants, laxatives. Regulated in the US by the FDA (OTC monograph system) and Rx-to-OTC switches (e.g., omeprazole, loratadine).

**Synonyms:**

## Over-the-Counter Medications

Nonprescription drugs approved as safe and effective for self-management of common symptoms, available at pharmacies and retail stores without a prescription.

**Synonyms:**

## Over-the-Counter Drug

A medication that can be purchased without a prescription, deemed safe and effective for self-medication when used according to label instructions. OTC drugs have established safety profiles, low toxicity, and clear dosing guidelines suitable for consumer use.

**Synonyms:**

## Overactive Bladder

A clinical syndrome of urinary urgency, usually with frequency and nocturia, with or without urge incontinence, due to detrusor overactivity during filling. Causes: idiopathic (most), neurogenic (stroke,

spinal injury, MS, Parkinson), bladder outlet obstruction, and aging; worsened by caffeine and diuretics.

**Synonyms:**

## Overall Survival

Time from treatment to death from any cause.

**Synonyms:**

## Overdenture

Removable denture supported by implants or natural teeth. Preservation of alveolar bone, improved stability.

**Synonyms:**

## Overdose

Exposure to a dose of a medicine or substance that is greater than intended or safe and may cause toxicity.

**Synonyms:**

## Overflow Urinary Incontinence

Leakage of urine caused by incomplete bladder emptying and excessive bladder filling. It may occur with weak urinary flow, dribbling, urgency, or urinary retention.

**Synonyms:**

## Overgrowth Syndrome

A group of congenital disorders characterized by excessive growth of the body, a region, or specific tissues, often with developmental or tumor-predisposition features. Causes include genomic imprinting abnormalities, mosaic variants, and alterations in growth-signaling pathways.

**Synonyms:**

## Overlap Myositis

Patients with features of inflammatory myopathy (DM/PM/IMNM) plus another systemic autoimmune disease (SLE, SSc, MCTD, Sjogren). Anti-PM-Scl (Scl/PM overlap, limited SSc + myositis, good prognosis); anti-Ku (SLE/PM overlap); anti-U1-RNP (MCTD with myositis).

**Synonyms:**

---

## Ovulation

The release of a mature egg from the ovary, at which time it is available to be fertilized by sperm.

**Synonyms:**

## Ovum

The female reproductive cell (egg) after ovulation and before fertilization. The ovum is a large, non-motile cell ( 100  $\mu$ m diameter) surrounded by the zona pellucida (glycoprotein layer that mediates sperm binding and prevents polyspermy after fertilization) and the corona radiata (follicular cells).

**Synonyms:**

## Oxalate

A metabolic end product that can form calcium oxalate crystals in the kidneys, contributing to nephrolithiasis and oxalate nephropathy, particularly in hyperoxaluric states.

**Synonyms:**

## Oxaloacetate

A four-carbon citric-acid-cycle intermediate that condenses with acetyl-CoA to form citrate. It is also a precursor for gluconeogenesis and participates in amino-acid transamination to aspartate.

**Synonyms:**

## Oxidative Phosphorylation

Process generating ATP using energy released by electron transfer through the electron transport chain. Protons pumped across inner mitochondrial membrane create electrochemical gradient (proton motive force). ATP synthase (Complex V) uses proton flow to phosphorylate ADP to ATP. P/O ratio: 2.5 ATP per NADH, 1.5 ATP per FADH<sub>2</sub>.

**Synonyms:**

## Oxidative Stress

Imbalance between reactive oxygen species and antioxidants. DNA damage, protein oxidation, lipid peroxidation.

**Synonyms:**

## Oxygen Consumption

The volume of oxygen consumed by the body per unit time, reflecting overall metabolic rate. Resting oxygen consumption (VO<sub>2</sub>) in a normal adult is approximately 250 mL/min (about 3.5 mL/kg/min, 1 MET). It is calculated as cardiac output x (arterial O<sub>2</sub> content - venous O<sub>2</sub> content) by the Fick principle.

**Synonyms:**

## Oxygen Delivery

The rate at which oxygen is transported from the lungs to the tissues, equal to cardiac output multiplied by arterial oxygen content:  $DO_2 = CO \times CaO_2$ . Arterial oxygen content =  $(1.34 \times \text{hemoglobin} \times SaO_2) + (0.003 \times PaO_2)$ . Normal oxygen delivery is approximately 1000 mL/min.

**Synonyms:**

## Oxygen Enhancement Ratio

Ratio of dose under hypoxic vs. aerobic conditions. Higher for low LET radiation.

**Synonyms:**

## Oxygen Mask

Delivers supplemental oxygen. Types: simple, nasal cannula, non-rebreather, Venturi.

**Synonyms:**

## Oxygen Saturation

The percentage of hemoglobin carrying oxygen in blood. It may be estimated by pulse oximetry (SpO<sub>2</sub>) or measured in an arterial blood sample by co-oximetry (SaO<sub>2</sub>). The appropriate range depends on the person's condition, baseline oxygenation, and treatment goals.

**Synonyms:**

## Oxygen-Hemoglobin Dissociation Curve

The sigmoidal relationship between partial pressure of oxygen (PO<sub>2</sub>) and hemoglobin oxygen saturation (SO<sub>2</sub>). The curve reflects hemoglobin's cooperative binding: oxygen binding to one subunit increases affinity for subsequent oxygen molecules. At PO<sub>2</sub> of 100 mmHg (alveolar), hemoglobin is approximately

---

98 percent saturated.

**Synonyms:**

### **Oxytocics**

A class of medications that stimulate uterine contractions, used for induction and augmentation of labor and prevention/treatment of postpartum hemorrhage. Oxytocin (Syntocinon) — synthetic analog of endogenous oxytocin, administered IV infusion for labor induction or IM/IV for PPH prevention.

**Synonyms:**

### **Oxytocin Infusion**

Intravenous synthetic oxytocin used to induce or augment labor or, in selected settings, to manage postpartum bleeding. The dose is started and adjusted according to uterine activity, fetal status, maternal condition, and local protocol; excessive uterine stimulation can be harmful.

**Synonyms:**

### **Ozaena**

A chronic condition characterized by atrophic rhinitis with crusting, foul-smelling nasal discharge (fetor), and a sensation of nasal obstruction despite a patent airway. Ozaena is caused by progressive atrophy of the nasal mucosa and underlying bone, often associated with *Klebsiella ozaenae* infection.

**Synonyms:**

### **Ondine's Curse**

A rare disorder in which automatic breathing is impaired, especially during sleep; also called congenital central hypoventilation syndrome.

**Synonyms:** congenital central hypoventilation syndrome.

### **Open Prostatectomy**

Surgical removal of enlarged prostate tissue through an abdominal incision.

**Synonyms:**

### **Orbital Irradiation**

Radiation treatment directed at tissues within the eye socket, sometimes used for severe thyroid eye

disease.

**Synonyms:**

### **Overt Proteinuria**

Abnormally high protein loss in the urine that is detectable by routine testing and may indicate kidney disease.

**Synonyms:**

### **Obstructive Hydrocephalus**

A buildup of cerebrospinal fluid caused by a blockage in its normal flow through the brain's ventricles.

**Synonyms:**

### **Ocular Melanoma**

A cancer that begins in pigment-producing cells of the eye.

**Synonyms:**

### **Oculomotor Nerve**

The third cranial nerve, which controls most eye movements, raises the upper eyelid, and constricts the pupil.

**Synonyms:**

### **Odontogenic Cyst**

A fluid-filled sac that develops from tissues involved in tooth formation, usually in the jaw.

**Synonyms:**

### **Oblique Fracture**

A fracture in which the break crosses the bone at an angle rather than perpendicular or parallel to its long axis.

**Synonyms:**

### **Obstipation**

Severe constipation with inability to pass stool or gas, often suggesting intestinal obstruction.

**Synonyms:**

### **Occlusive Vascular Disease**

Disease in which narrowing or blockage of a blood vessel reduces or stops blood flow to tissues.

---

**Synonyms:**

**Olecranon**

The bony projection of the proximal ulna that forms the point of the elbow.

**Synonyms:**

**Olfaction**

The sense of smell, mediated by receptors in the olfactory epithelium and pathways to the brain.

**Synonyms:**

**Orbit**

The bony cavity of the skull that contains the eye, extraocular muscles, nerves, vessels, and associated tissues.

**Synonyms:**

**Organelle**

A specialized structure within a cell that performs a particular function, such as energy production, protein synthesis, or waste processing.

**Synonyms:**

**Orifice**

An opening into or out of a body structure, organ, or anatomical passage.

**Synonyms:**

**Ossification**

The process of forming bone tissue.

**Synonyms:**

**Osteochondrosis**

A disorder of bone and cartilage development, often affecting a growth center or joint surface.

**Synonyms:**

**Osteodystrophy**

Abnormal bone growth or remodeling caused by a systemic or metabolic disorder.

**Synonyms:**

**Osteogenic Sarcoma**

Osteosarcoma, a malignant bone tumor whose cells produce osteoid or immature bone.

**Synonyms:**

**Osteoma**

A usually benign, slow-growing tumor composed of mature bone tissue.

**Synonyms:**

**Osteoplasty**

Surgical repair, reshaping, or reconstruction of bone.

**Synonyms:**

**Otorhinolaryngology**

The medical specialty concerned with diseases of the ear, nose, throat, head, and neck; also called otolaryngology.

**Synonyms:** otolaryngology.

**Oxygen**

A gas required for aerobic cellular metabolism. It is transported in blood mainly bound to hemoglobin and in a small amount dissolved in plasma.

**Synonyms:**

**Ocular Rosacea**

Inflammation affecting the eyes and eyelids in people with rosacea, causing irritation, redness, or dryness.

**Synonyms:**

**Ophthalmia Neonatorum**

Eye inflammation or infection in a newborn, often acquired during delivery.

**Synonyms:**

**Optic Disk**

The point where the optic nerve leaves the retina; it has no photoreceptors and forms the blind spot.

**Synonyms:**

**Orthopneic Position**

An upright sitting position that helps a person breathe more easily, often with the arms supported.

---

**Synonyms:**

### **Osteotome**

A sharp surgical instrument used to cut or shape bone.

**Synonyms:**

### **Oculomotor Nerve Palsy**

Weakness or paralysis of muscles supplied by the third cranial nerve, causing eyelid drooping, double vision, abnormal eye position, and sometimes a dilated pupil.

**Synonyms:**

### **Oedema**

Abnormal accumulation of fluid in the tissues, causing swelling; it may be localized or generalized and can result from venous disease, inflammation, heart failure, kidney disease, or low blood protein.

**Synonyms:**

### **Oesophagus**

The muscular tube that carries swallowed food and liquid from the throat to the stomach by coordinated waves of contraction.

**Synonyms:**

### **Oligomenorrhoea**

Infrequent menstrual periods, usually with cycles longer than 35 days or fewer than about eight periods per year.

**Synonyms:**

### **Oligospermia**

A lower-than-expected concentration of sperm in semen, which may reduce fertility.

**Synonyms:**

### **Open-Angle Glaucoma**

A chronic optic-nerve disease in which the drainage angle of the eye remains anatomically open but aqueous humour outflow is impaired, often causing progressive, initially symptomless visual-field loss.

**Synonyms:**

### **Onychocryptosis (Ingrowing Toenail)**

A condition in which the edge of a nail grows into the surrounding skin, causing pain, inflammation, and sometimes infection.

**Synonyms:** Ingrowing Toenail

### **Oral Rehydration Therapy (ORT)**

Replacement of water and electrolytes by mouth using a balanced glucose-and-salt solution, especially to prevent or treat dehydration from diarrhoea or vomiting.

**Synonyms:** ORT

### **Ortolani's Sign**

A palpable or audible clunk produced when a dislocated but reducible infant hip is gently abducted and reduced; it is a screening sign of developmental dysplasia of the hip.

**Synonyms:**

### **Osteitis**

Inflammation of bone, usually caused by infection, trauma, or another inflammatory process.

**Synonyms:**

### **Otalgia (Earache)**

Pain in or around the ear, arising from the ear itself or referred from structures such as the teeth, jaw, throat, or cervical spine.

**Synonyms:** Earache

### **Otorrhoea**

Discharge from the ear, which may be watery, bloody, or purulent and may result from infection, trauma, or a perforated eardrum.

**Synonyms:**

### **Otolith**

A small calcium-carbonate crystal in the vestibular organs of the inner ear that contributes to sensing gravity and linear acceleration; displaced otoliths can cause benign positional vertigo.

**Synonyms:**

---

## Ocular Migraine

A migraine-related visual disturbance, often involving flashing lights, zigzag lines, or a temporary blind spot. It may occur with or without headache.

**Synonyms:**

## Orbital Fracture

A break in one or more bones forming the eye socket, usually caused by facial trauma and potentially associated with double vision, eye-movement restriction, or injury to the eye.

**Synonyms:**

## Osteophyte

A bony outgrowth, commonly called a bone spur, that develops near a joint or along the spine and may cause pain, stiffness, or nerve compression.

**Synonyms:** a bone spur, that develops near a joint or along the spine and may cause pain, stiffness, or nerve compression.

## Osteonecrosis of the Jaw

Death of jawbone tissue, often associated with antiresorptive or antiangiogenic medications, radiation, infection, or trauma, and characterized by exposed bone or a nonhealing oral wound.

**Synonyms:**

## Opioid Withdrawal

A characteristic group of symptoms occurring after abrupt reduction or cessation of prolonged opioid use, including anxiety, muscle aches, sweating, abdominal cramps, diarrhea, nausea, and insomnia.

**Synonyms:**

## Oropharyngeal Dysphagia

Difficulty transferring food or liquid from the mouth through the throat, often causing coughing, choking, nasal regurgitation, or aspiration.

**Synonyms:**

## Oxygen Toxicity

Tissue injury caused by exposure to oxygen at excessively high partial pressures or concentrations, potentially affecting the lungs, eyes, or central ner-

vous system.

**Synonyms:**

## Obstetric Fistula

An abnormal connection between the birth canal and the bladder or rectum, usually caused by prolonged obstructed labor, resulting in continuous leakage of urine or stool. It requires specialist evaluation and repair.

## obatoclast

obatoclast refers to obatoclast, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## obatoclast mesylate

obatoclast mesylate refers to obatoclast mesylate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## oblimersen sodium

oblimersen sodium refers to oblimersen sodium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## observational study

observational study refers to observational study, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## obstetric nursing

obstetric nursing refers to obstetric nursing, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

## obstetrical forceps

obstetrical forceps refers to obstetrical forceps, a

---

medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **occipital diastasis**

occipital diastasis refers to occipital diastasis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **occlusal adjustment**

occlusal adjustment refers to occlusal adjustment, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **occlusal splint**

occlusal splint refers to occlusal splint, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **occupation**

occupation refers to occupation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **occupational disease**

occupational disease denotes a clinical condition or finding involving occupational disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **ochrobactrum**

ochrobactrum identifies ochrobactrum, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **ochrobactrum anthropi**

ochrobactrum anthropi identifies ochrobactrum anthropi, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **ochrobactrum intermedium**

ochrobactrum intermedium identifies ochrobactrum intermedium, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **octadecadienoic acid**

octadecadienoic acid denotes octadecadienoic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **octanoic acid**

octanoic acid denotes octanoic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **octopamine**

octopamine refers to octopamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **octreotide**

octreotide concerns octreotide, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **ocular albinism**

ocular albinism refers to ocular albinism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**ocular fixation**

ocular fixation refers to ocular fixation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ocular orbit**

ocular orbit refers to ocular orbit, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ocular toxoplasmosis**

ocular toxoplasmosis denotes an infectious or toxic condition involving ocular toxoplasmosis; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**oculocardiac reflex**

oculocardiac reflex refers to oculocardiac reflex, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oculomotor nucleus**

oculomotor nucleus refers to oculomotor nucleus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**odontoblast**

odontoblast refers to odontoblast, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**odontodysplasia**

odontodysplasia refers to odontodysplasia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**odontogenesis**

odontogenesis denotes odontogenesis, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**odontogenic fibroma**

odontogenic fibroma refers to odontogenic fibroma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**odontogenic neoplasm**

odontogenic neoplasm denotes a neoplastic condition involving odontogenic neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**odorant**

odorant refers to odorant, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**odoribacter splanchnicus**

odoribacter splanchnicus is a microorganism or microbial group associated with odoribacter splanchnicus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**oerskovia**

oerskovia identifies oerskovia, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**oerskovia turbata**

oerskovia turbata identifies oerskovia turbata, a biological taxon or infectious-disease concept whose

---

clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **ofatumumab**

ofatumumab concerns ofatumumab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **offspring**

offspring refers to offspring, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **ofloxacin**

ofloxacin concerns ofloxacin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **oidiodendron**

oidiodendron identifies oidiodendron, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **oil**

oil refers to oil, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **ointment bases**

ointment bases refers to ointment bases, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **okadaic acid**

okadaic acid denotes okadaic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **olanzapine**

olanzapine refers to olanzapine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **olaparib**

olaparib refers to olaparib, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **olaratumab**

olaratumab concerns olaratumab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **oleandomycin**

oleandomycin concerns oleandomycin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **oleic acid**

oleic acid denotes oleic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **olfactory bulb**

olfactory bulb refers to olfactory bulb, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **olfactory cortex**

olfactory cortex refers to olfactory cortex, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **olfactory gyrus**

olfactory gyrus refers to olfactory gyrus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **olfactory learning**

olfactory learning refers to olfactory learning, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **olfactory mucosa**

olfactory mucosa refers to olfactory mucosa, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **olfactory neuroblastoma**

olfactory neuroblastoma denotes a neoplastic condition involving olfactory neuroblastoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **olfactory tract**

olfactory tract refers to olfactory tract, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **olfactory tubercle**

olfactory tubercle refers to olfactory tubercle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **oligella**

oligella identifies oligella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **oligella ureolytica**

oligella ureolytica identifies oligella ureolytica, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **oligella urethralis**

oligella urethralis identifies oligella urethralis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **oligodendroglia**

oligodendroglia refers to oligodendroglia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **oligodendroglial neoplasm**

oligodendroglial neoplasm denotes a neoplastic condition involving oligodendroglial neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **oligogenic inheritance**

oligogenic inheritance refers to oligogenic inheritance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **oligomenorrhea**

oligomenorrhea refers to oligomenorrhea, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**oligomycin**

oligomycin concerns oligomycin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**oligonucleotide**

oligonucleotide concerns oligonucleotide, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**oligopeptide**

oligopeptide is a defined chemical or biologic substance involved in oligopeptide and studied in physiology, pharmacology, laboratory medicine, or treatment.

**Synonyms:**

**oligosaccharide**

oligosaccharide refers to oligosaccharide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**olivary nucleus**

olivary nucleus refers to olivary nucleus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**olivomycin**

olivomycin concerns olivomycin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**olivopontocerebellar atrophy**

olivopontocerebellar atrophy refers to olivopontocerebellar atrophy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**olmesartan medoxomil**

olmesartan medoxomil refers to olmesartan medoxomil, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**olopatadine hydrochloride**

olopatadine hydrochloride refers to olopatadine hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**olsenella**

olsenella identifies olsenella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**olsenella uli**

olsenella uli identifies olsenella uli, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**oltipraz**

oltipraz refers to oltipraz, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**omacetaxine mepesuccinate**

omacetaxine mepesuccinate refers to omacetaxine mepesuccinate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**omalizumab**

omalizumab concerns omalizumab, a pharmacologic or chemical agent; clinical use depends on its mech-

---

anism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **omasum**

omasum refers to omasum, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **omega-n-methylarginine**

omega-n-methylarginine refers to omega-n-methylarginine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **omeprazole**

omeprazole concerns omeprazole, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **ommaya reservoir**

ommaya reservoir refers to ommaya reservoir, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **oncocytic neoplasm**

oncocytic neoplasm denotes a neoplastic condition involving oncocytic neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **oncogenic virus**

oncogenic virus is a virus or viral group associated with oncogenic virus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **oncogenicity**

oncogenicity refers to oncogenicity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **oncology**

oncology refers to oncology, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **oncology nursing**

oncology nursing refers to oncology nursing, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **oncolytic virotherapy**

oncolytic virotherapy is used in relation to oncolytic virotherapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

### **oncolytic viruses**

oncolytic viruses is a virus or viral group associated with oncolytic viruses; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **oncoprotein**

oncoprotein denotes oncoprotein, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **oncostatin m**

oncostatin m refers to oncostatin m, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**ondansetron**

ondansetron concerns ondansetron, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**ondansetron hydrochloride**

ondansetron hydrochloride refers to ondansetron hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**onychomadesis**

onychomadesis refers to onychomadesis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oogenesis**

oogenesis denotes oogenesis, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**oogonium**

oogonium refers to oogonium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ooplasm**

ooplasm refers to ooplasm, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**open bite**

open bite refers to open bite, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**operant conditioning**

operant conditioning refers to operant conditioning, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**operating room**

operating room refers to operating room, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**operating tables**

operating tables refers to operating tables, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**operon**

operon refers to operon, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ophthalmic solution**

ophthalmic solution refers to ophthalmic solution, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**opiate alkaloid**

opiate alkaloid refers to opiate alkaloid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**opiate assay**

opiate assay is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat opiate assay.

**Synonyms:**

---

**opiate overdose**

opiate overdose refers to opiate overdose, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**opioid receptor**

opioid receptor denotes opioid receptor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**opisthorchis felineus**

opisthorchis felineus identifies opisthorchis felineus, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**oprelvekin**

oprelvekin refers to oprelvekin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**opsonin**

opsonin refers to opsonin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**optic chiasma**

optic chiasma refers to optic chiasma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**optic nerve disorder**

optic nerve disorder denotes a clinical condition or finding involving optic nerve disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**optic tract**

optic tract refers to optic tract, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**optical illusion**

optical illusion refers to optical illusion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**optical rotation**

optical rotation refers to optical rotation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**optical trap**

optical trap refers to optical trap, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**optics**

optics refers to optics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**optometrist**

optometrist refers to optometrist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oral**

oral refers to oral, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oral administration**

oral administration refers to oral administration,

---

a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **oral health**

oral health refers to oral health, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **oral hemorrhage**

oral hemorrhage denotes a clinical condition or finding involving oral hemorrhage; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **oral spray**

oral spray refers to oral spray, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **orantinib**

orantinib concerns orantinib, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **orbital contusion**

orbital contusion refers to orbital contusion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **orbital fractures**

orbital fractures denotes a clinical condition or finding involving orbital fractures; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **orbital myositis**

orbital myositis refers to orbital myositis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **orbital neoplasm**

orbital neoplasm denotes a neoplastic condition involving orbital neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **orbivirus**

orbivirus is a virus or viral group associated with orbivirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **order coleoptera**

order coleoptera refers to order coleoptera, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **order spirochaetales**

order spirochaetales refers to order spirochaetales, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **oregovomab**

oregovomab concerns oregovomab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **orexin**

orexin refers to orexin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **organ culture**

organ culture refers to organ culture, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **organ transplantation**

organ transplantation refers to organ transplantation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **organic chemical**

organic chemical refers to organic chemical, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **organic impurity**

organic impurity refers to organic impurity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **organic oxide**

organic oxide refers to organic oxide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **organism**

organism refers to organism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **organization name**

organization name refers to organization name, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **organogenesis**

organogenesis denotes organogenesis, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **organoid**

organoid refers to organoid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **organometallic compound**

organometallic compound refers to organometallic compound, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **organosilicon compounds**

organosilicon compounds refers to organosilicon compounds, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **orgasm**

orgasm refers to orgasm, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **orientation**

orientation refers to orientation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **orlistat**

orlistat refers to orlistat, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**ornithine**

ornithine refers to ornithine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ornithine decarboxylase**

ornithine decarboxylase refers to ornithine decarboxylase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oropharyngeal**

oropharyngeal refers to oropharyngeal, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oropharyngeal neoplasm**

oropharyngeal neoplasm denotes a neoplastic condition involving oropharyngeal neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**orotic aciduria**

orotic aciduria denotes orotic aciduria, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**orphenadrine**

orphenadrine refers to orphenadrine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ortataxel**

ortataxel concerns ortataxel, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**orthobunyavirus**

orthobunyavirus is a virus or viral group associated with orthobunyavirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**orthodontic appliance**

orthodontic appliance refers to orthodontic appliance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**orthodontic wires**

orthodontic wires refers to orthodontic wires, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**orthodontist**

orthodontist refers to orthodontist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**orthohepadnavirus**

orthohepadnavirus is a virus or viral group associated with orthohepadnavirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**orthokeratosis**

orthokeratosis refers to orthokeratosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**orthomyxoviridae**

orthomyxoviridae identifies orthomyxoviridae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

---

**orthopoxvirus**

orthopoxvirus is a virus or viral group associated with orthopoxvirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**orthoptera**

orthoptera refers to orthoptera, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**orthoreovirus**

orthoreovirus is a virus or viral group associated with orthoreovirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**orthotic devices**

orthotic devices refers to orthotic devices, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**os odontoideum**

os odontoideum refers to os odontoideum, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oscillometry**

oscillometry refers to oscillometry, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oseltamivir**

oseltamivir concerns oseltamivir, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**oseltamivir phosphate**

oseltamivir phosphate refers to oseltamivir phosphate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osmium**

osmium refers to osmium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osmium tetroxide**

osmium tetroxide refers to osmium tetroxide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osmoregulation**

osmoregulation refers to osmoregulation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osseous metaplasia**

osseous metaplasia refers to osseous metaplasia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ossifying fibroma**

ossifying fibroma refers to ossifying fibroma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osteitis deformans**

osteitis deformans refers to osteitis deformans, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**osteoblastoma**

osteoblastoma denotes a neoplastic condition involving osteoblastoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**osteocalcin**

osteocalcin refers to osteocalcin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osteocalcin assay**

osteocalcin assay is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat osteocalcin assay.

**Synonyms:**

**osteochondritis**

osteochondritis refers to osteochondritis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osteochondromatosis**

osteochondromatosis refers to osteochondromatosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osteogenesis**

osteogenesis denotes osteogenesis, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**osteolysis**

osteolysis refers to osteolysis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osteoma cutis**

osteoma cutis refers to osteoma cutis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osteon**

osteon refers to osteon, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osteonectin**

osteonectin refers to osteonectin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osteopoikilosis**

osteopoikilosis refers to osteopoikilosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osteopontin**

osteopontin refers to osteopontin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osteoporotic fracture**

osteoporotic fracture denotes a clinical condition or finding involving osteoporotic fracture; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**osteoprotegerin test**

osteoprotegerin test is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat osteoprotegerin test.

**Synonyms:**

---

**osteoradionecrosis**

osteoradionecrosis refers to osteoradionecrosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**osteosclerosis**

osteosclerosis refers to osteosclerosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**other**

other refers to other, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**other race**

other race refers to other race, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**otic ointment**

otic ointment refers to otic ointment, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**otolaryngologist**

otolaryngologist refers to otolaryngologist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ouabain**

ouabain refers to ouabain, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ounce**

ounce refers to ounce, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**outcomes research**

outcomes research refers to outcomes research, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**outlier**

outlier refers to outlier, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ovalbumin**

ovalbumin refers to ovalbumin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ovalocyte count**

ovalocyte count refers to ovalocyte count, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ovarian failure**

ovarian failure refers to ovarian failure, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ovarian fibromata**

ovarian fibromata refers to ovarian fibromata, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**ovarian follicle**

ovarian follicle refers to ovarian follicle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ovarian gonadoblastoma**

ovarian gonadoblastoma denotes a neoplastic condition involving ovarian gonadoblastoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**ovarian hemorrhage**

ovarian hemorrhage denotes a clinical condition or finding involving ovarian hemorrhage; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**ovarian infection**

ovarian infection denotes an infectious or toxic condition involving ovarian infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**ovarian rupture**

ovarian rupture refers to ovarian rupture, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ovarian teratoma**

ovarian teratoma refers to ovarian teratoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ovarian thecoma**

ovarian thecoma refers to ovarian thecoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ovary disease**

ovary disease denotes a clinical condition or finding involving ovary disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**ovary neoplasm**

ovary neoplasm denotes a neoplastic condition involving ovary neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**overbite**

overbite refers to overbite, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**overlay denture**

overlay denture refers to overlay denture, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**overriding aorta**

overriding aorta refers to overriding aorta, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oversedate**

oversedate refers to oversedate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oviposition**

oviposition refers to oviposition, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**ovomucin**

ovomucin refers to ovomucin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**ovotestis**

ovotestis is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat ovotestis.

**Synonyms:**

**ownership**

ownership refers to ownership, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxacillin**

oxacillin concerns oxacillin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**oxalates**

oxalates refers to oxalates, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxaliplatin**

oxaliplatin concerns oxaliplatin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**oxandrolone**

oxandrolone refers to oxandrolone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxaprozin**

oxaprozin refers to oxaprozin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxazepam**

oxazepam concerns oxazepam, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**oxazole**

oxazole concerns oxazole, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**oxcarbazepine**

oxcarbazepine refers to oxcarbazepine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxidants**

oxidants refers to oxidants, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxidation-reduction**

oxidation-reduction refers to oxidation-reduction, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxide**

oxide refers to oxide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**oxidopamine**

oxidopamine refers to oxidopamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxidoreductase**

oxidoreductase refers to oxidoreductase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxime**

oxime refers to oxime, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oximetry**

oximetry refers to oximetry, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxonic acid**

oxonic acid denotes oxonic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**oxprenolol**

oxprenolol concerns oxprenolol, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**oxycodone**

oxycodone refers to oxycodone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxycodone hydrochloride**

oxycodone hydrochloride refers to oxycodone hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxygen pulse**

oxygen pulse refers to oxygen pulse, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxygen therapy**

oxygen therapy is used in relation to oxygen therapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**oxygen transport**

oxygen transport refers to oxygen transport, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxygenases**

oxygenases refers to oxygenases, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxygenator**

oxygenator refers to oxygenator, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**oxyhemoglobin**

oxyhemoglobin refers to oxyhemoglobin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### oxylipins

oxylipins refers to oxylipins, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### oxymetazoline

oxymetazoline refers to oxymetazoline, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### oxymetholone

oxymetholone refers to oxymetholone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### oxymorphone

oxymorphone refers to oxymorphone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### oxyphil cell

oxyphil cell denotes oxyphil cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### oxyphilic adenoma

oxyphilic adenoma refers to oxyphilic adenoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### oxytocic

oxytocic refers to oxytocic, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### oxytocin

oxytocin refers to oxytocin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### ozone

ozone refers to ozone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### OAB

Alternate index label; see *Overactive bladder*. **Synonyms:**

### Obesity, childhood

Alternate index label; see *Childhood obesity*. **Synonyms:**

### Obstetric cholestasis

Alternate index label; see *Cholestasis of pregnancy*. **Synonyms:**

### Obstructive sleep apnea in children

Alternate index label; see *Pediatric obstructive sleep apnea*. **Synonyms:**

### Occult primary cancer

Alternate index label; see *Carcinoma of unknown primary*. **Synonyms:**

### Oculocutaneous albinism

Alternate index label; see *Albinism*. **Synonyms:**

### Oculosympathetic palsy

Alternate index label; see *Horner syndrome*. **Synonyms:**

### ODD

Alternate index label; see *Oppositional defiant disorder (ODD)*. **Synonyms:**

---

### Odontogenic tumors and cysts

Alternate index label; see *Jaw tumors and cysts*.

**Synonyms:**

### OHSS

Alternate index label; see *Ovarian hyperstimulation syndrome*. **Synonyms:**

### OLP

Alternate index label; see *Oral lichen planus*. **Synonyms:**

### Optic nerve glioma

Alternate index label; see *Optic glioma*. **Synonyms:**

### Optic pathway glioma

Alternate index label; see *Optic glioma*. **Synonyms:**

### Osteoarthritis, cervical

Alternate index label; see *Cervical spondylosis*. **Synonyms:**

### Osteonecrosis

Alternate index label; see *Avascular necrosis (osteonecrosis)*. **Synonyms:**

### Osteophytes

Alternate index label; see *Bone spurs*. **Synonyms:**

### Outer ear infection

Alternate index label; see *Swimmer's ear*. **Synonyms:**

### Overactive thyroid

Alternate index label; see *Hyperthyroidism (overactive thyroid)*. **Synonyms:**

### Oxyphil cell carcinoma

Alternate index label; see *Hurthle cell cancer*. **Synonyms:**

**Synonyms:**

## P

### P Wave

The first deflection on the ECG, representing atrial depolarization. Normal P waves are upright in leads I and II, inverted in aVR, and less than 0.12 seconds (3 small boxes) in duration and 2.5 mm in amplitude.

**Synonyms:**

### Pacemaker, Artificial

An implanted device that sends electrical impulses to maintain an appropriate heart rhythm. **Synonyms:** Artificial pacemaker

### Pacemaker, Natural

The sinoatrial node, whose cells normally initiate the heartbeat. **Synonyms:** Sinoatrial node

### PAD

Peripheral artery disease caused by narrowed arteries, usually affecting the legs. **Synonyms:** Peripheral artery disease

### Painkillers

Medicines or other treatments that relieve pain. **Synonyms:** Analgesics

### Palpate

To examine body tissues by carefully feeling them with the hands. **Synonyms:** Palpation

### Pelvic Floor

A group of muscles and connective tissues supporting the pelvic organs and controlling urinary and fecal continence. **Synonyms:**

### Pepsin

A stomach enzyme that begins digestion of proteins.

**Synonyms:**

### Percutaneous Electrical Nerve Stimulation

Electrical stimulation delivered through the skin to reduce pain signals. **Synonyms:** PENS

### Percutaneous Transluminal Coronary Angioplasty

Balloon-based treatment that widens a narrowed coronary artery, often followed by stent placement. **Synonyms:** PTCA; balloon angioplasty

### Performance Anxiety

Anxiety about sexual performance that can interfere with sexual function. **Synonyms:**

### Periodic Limb Movement Disorder

Repeated involuntary limb movements during sleep that may disrupt rest. **Synonyms:** PLMD

### Periodization

Planned variation of exercise volume and intensity over time. **Synonyms:**

### Peripheral Vascular Disease

Disease involving narrowed or blocked blood vessels outside the heart and brain. **Synonyms:** Peripheral arterial disease

### Peripheral Vision

The portion of the visual field outside the direct line of sight. **Synonyms:** Side vision

---

### Personal Emergency Response System

A wearable or nearby device that lets a person summon help during an emergency. **Synonyms:** Medical alert system

### Pessimism

A tendency to expect negative outcomes or interpret situations unfavorably. **Synonyms:**

### Peyronie's Disease

Scar tissue within the penis that can cause curvature and pain during erection. **Synonyms:** Peyronie disease

### Phantom Limb

The sensation that an amputated limb is still present, sometimes with pain. **Synonyms:** Phantom-limb sensation

### Phlebotomy

The collection of blood from a vein, usually with a needle. **Synonyms:** Venipuncture

### Photoreceptors

Specialized retinal cells that detect light; rods and cones are the two main types. **Synonyms:**

### Physician Assistant

A licensed clinician who evaluates patients and provides medical care under a physician's practice framework. **Synonyms:** PA

### Pigment

A substance that gives tissue, hair, skin, or other material its color. **Synonyms:**

### Piles

Enlarged or swollen veins in the anus or lower rectum. **Synonyms:** Hemorrhoids

### Pill

A solid oral dosage form containing medicine or another active ingredient. **Synonyms:** Tablet

### Plasma

The liquid portion of blood in which blood cells and dissolved substances circulate. **Synonyms:**

### Plasma Cells

Mature B lymphocytes that produce antibodies. **Synonyms:**

### Platelets

Small blood components that gather at damaged vessels and help form clots. **Synonyms:** Thrombocytes

### Polymenorrhea

Menstrual bleeding occurring at unusually short intervals. **Synonyms:**

### Polyp

A growth projecting from a mucous membrane; it may be benign, precancerous, or rarely cancerous. **Synonyms:**

### Positive Psychology

The study of well-being, strengths, resilience, and factors that help people thrive. **Synonyms:**

### Posterior Chamber

The part of the eye between the iris and lens, containing aqueous humor. **Synonyms:**

### Posterior Heel Bursitis

Inflammation of a bursa near the back of the heel, causing pain and swelling. **Synonyms:** Retrocalcaneal bursitis

### Posterior Keyhole Foraminotomy

A minimally invasive operation that enlarges a spinal nerve opening to relieve compression. **Synonyms:**

### Postpartum

Relating to the period after childbirth. **Synonyms:** Postnatal

---

### Post-Traumatic Headache

A headache that begins or persists after a head or neck injury. **Synonyms:**

### Power

The rate at which work is performed; in exercise, it combines force and movement speed. **Synonyms:**

### Power Training

Exercise designed to improve the ability to produce force rapidly. **Synonyms:** Explosive training

### Prazosin

An alpha-1 blocker that relaxes blood vessels and smooth muscle. **Synonyms:**

### Precursor

A substance that can be converted into another biologically active substance. **Synonyms:**

### Prehypertension

Blood pressure above normal but below the former threshold for hypertension. **Synonyms:** Elevated blood pressure

### Preload Reduction

Lowering the amount of blood returning to the heart to reduce cardiac workload. **Synonyms:**

### Premature Ventricular Contraction

An early heartbeat arising from the ventricles. **Synonyms:** PVC

### Prick Test

A skin test in which small amounts of suspected allergens are introduced into the skin. **Synonyms:** Skin-prick test

### Primary Angioplasty

Angioplasty used as the initial treatment to reopen an artery during an acute heart attack. **Synonyms:**

### Primary Osteoporosis

Bone loss due to aging, menopause, or other normal

physiological processes rather than another disease.

**Synonyms:**

### Protocol

A predefined plan specifying procedures for a clinical study, examination, or treatment. **Synonyms:**

### PSA

Prostate-specific antigen, a protein measured in blood to help evaluate prostate conditions. **Synonyms:** Prostate-specific antigen

### PSA Velocity

The rate at which PSA concentration changes over time. **Synonyms:**

### Psychogenic

Caused or substantially influenced by psychological factors. **Synonyms:**

### Psychogenic Erectile Dysfunction

Erectile difficulty primarily related to psychological factors rather than a structural disease. **Synonyms:**

### Psychosomatic

Relating to physical symptoms influenced by psychological processes or stress. **Synonyms:**

### PTCA

Percutaneous transluminal coronary angioplasty, a procedure that opens a narrowed coronary artery. **Synonyms:** Percutaneous coronary intervention

### Puborectalis Muscle

A pelvic-floor muscle sling around the rectum that helps maintain continence. **Synonyms:**

### Pudendal Arteries

Arteries supplying blood to the external genital and perineal region. **Synonyms:**

### Pudendal Nerve

The nerve carrying sensation and motor signals to much of the perineum and pelvic floor. **Synonyms:**

---

## **Pulmonary**

Relating to the lungs. **Synonyms:**

## **Pulmonary Veins**

Veins carrying oxygen-rich blood from the lungs to the left atrium. **Synonyms:**

## **Pulse Pressure**

The difference between systolic and diastolic blood pressure. **Synonyms:**

## **Pump Failure**

Severe weakening of the heart's pumping ability, causing inadequate blood flow to organs. **Synonyms:** Cardiogenic pump failure

## **Purulent**

Containing or producing pus. **Synonyms:**

## **Pyloric Sphincter**

A muscular valve regulating passage of stomach contents into the duodenum. **Synonyms:** Pylorus

## **Pyridoxine**

A form of vitamin B6 involved in metabolism and nervous-system function. **Synonyms:** Vitamin B6

## **P2Y12 Inhibitor**

An antiplatelet drug that blocks the platelet P2Y12 ADP receptor, reducing activation and aggregation. Clopidogrel, prasugrel, and ticagrelor are used in selected acute coronary syndrome and percutaneous coronary intervention settings, with bleeding and drug-specific contraindications considered.

**Synonyms:**

## **p53 Tumor Suppressor**

The p53 protein, encoded by the TP53 gene on chromosome 17p, is a transcription factor and the most commonly mutated gene in human cancer, with mutations found in over 50 percent of all malignancies.

**Synonyms:**

## **Pacemaker**

An implanted electronic device that delivers electrical impulses to the heart to regulate heart rate and rhythm. Indications include symptomatic bradycardia, high-degree AV block, and sick sinus syndrome. Single-chamber pacemakers pace the atrium or ventricle; dual-chamber pacemakers pace both.

**Synonyms:**

## **Pacemaker Complications**

Early: pneumothorax, hematoma, cardiac perforation/tamponade, lead dislodgement. Late: lead fracture, battery depletion, infection, tricuspid regurgitation from lead interference, venous thrombosis, and pacemaker syndrome (AV dyssynchrony in VVI pacing).

**Synonyms:**

## **Pachygyria**

A cortical malformation in which the cerebral gyri are abnormally broad and reduced in number because of impaired neuronal migration. It may cause developmental delay, intellectual disability, seizures, and motor or neurological impairment of variable severity.

**Synonyms:**

## **Pachymeningitis**

Inflammation of the dura mater (pachymeninx), the outermost layer of the meninges. Pachymeningitis is less common than leptomeningitis (inflammation of pia and arachnoid mater).

**Synonyms:**

## **Pacing**

Planned regulation of activity, rest, and intensity to avoid symptom exacerbation while gradually increasing tolerance. It is used in fatigue, chronic pain, cardiopulmonary disease, and post-viral conditions.

**Synonyms:**

## **PACS**

Picture Archiving and Communication System. Digital image storage and retrieval.

**Synonyms:**

---

## PAD Management

Atherosclerotic occlusive disease of arteries supplying the lower limbs, causing reduced blood flow. See peripheral arterial disease.

**Synonyms:**

## Page kidney

Renal compression from a perinephric hematoma or mass causing hypertension through activation of the renin-angiotensin system, typically following trauma or occurring in patients on anticoagulation.

**Synonyms:**

## Paget Disease of Bone

A chronic bone disorder characterized by excessive, disorganized bone remodeling with increased osteoclastic bone resorption followed by compensatory osteoblastic bone formation, producing structurally abnormal bone that is enlarged, weak, and prone to fracture.

**Synonyms:**

## Paget's Disease

A chronic bone disorder characterized by excessive, disorganized bone remodeling with increased osteoclastic bone resorption followed by compensatory osteoblastic bone formation, producing structurally abnormal bone that is enlarged, weak, and prone to fracture. See Paget Disease of Bone.

**Synonyms:**

## Paget Disease of the Nipple

A rare breast cancer involving the nipple and areola, often causing persistent eczema-like scaling, redness, itching, burning, or discharge. It may be associated with underlying ductal carcinoma in situ or invasive breast cancer.

**Synonyms:**

## Pain

An unpleasant sensory and emotional experience associated with actual or potential tissue damage, serving as a protective alerting system but becoming maladaptive when chronic (lasting >3 months).

**Synonyms:**

## Pain (Geriatric)

Pain in an older adult. Assessment considers communication, cognition, function, medicines, and possible causes; treatment is individualized to the person and condition.

**Synonyms:** Geriatric

## Pain (Vascular)

Pain caused by impaired blood flow, often appearing in a limb with exertion as claudication or, in more severe disease, at rest.

**Synonyms:** Vascular

## Pain Assessment Scales

Pain assessment uses standardized scales to quantify pain intensity. Numeric rating scale (NRS) asks patients to rate pain from 0 (no pain) to 10 (worst pain imaginable). Visual analog scale (VAS) is a 10 cm line with anchors. Faces pain scale (Wong-Baker FACES) uses facial expressions for children and cognitively impaired patients.

**Synonyms:**

## Pain Management

Assessment and treatment of pain using appropriate pharmacologic, physical, psychological, and interventional approaches. Treatment is individualized according to the cause, severity, duration, functional effect, and risks of each option.

**Synonyms:**

## Pain Relief (Analgesia)

Achieved through pharmacologic, interventional, physical, and psychologic modalities targeting nociceptive transmission and pain perception.

**Synonyms:** Analgesia

## Pair Production

Photon interaction producing electron-positron pair. Requires energy >1.022 MeV.

**Synonyms:**

## Paleness

Unusual lightening of the skin or mucous membranes caused by reduced blood flow, vasoconstriction, ane-

---

mia, shock, hypothermia, or other systemic illness. Sudden paleness with weakness, bleeding, chest pain, or fainting requires urgent assessment.

**Synonyms:**

### **Palindromic Rheumatism**

Characterized by recurrent, self-limited attacks of mono- or oligoarthritis (hours to days), periarticular soft tissue swelling, no radiographic erosions between attacks. 30-50% evolve to RA (anti-CCP positive predicts progression).

**Synonyms:**

### **Palliative Care**

Specialized medical care for serious illness focusing on symptom relief and quality of life. Not limited to end-of-life. Can be provided alongside curative treatment. Components: pain management, symptom control, psychosocial support, spiritual care, advance care planning. Referral early in disease course.

**Synonyms:**

### **Palliative Rehabilitation**

Rehabilitation for people with serious or life-limiting illness, focused on comfort, function, participation, symptom management, and quality of life.

**Synonyms:**

### **Pallister-Hall Syndrome**

A congenital disorder usually caused by pathogenic variants in *GLI3*. It is characterized by hypothalamic hamartoma and mesoaxial polydactyly and may include imperforate anus, renal or airway anomalies, and pituitary hormone abnormalities.

**Synonyms:**

### **Pallor**

Paleness of the skin and mucous membranes, caused by reduced cutaneous blood flow (vasoconstriction—cold, shock, anemia, fear) or reduced hemoglobin/pigmentation.

**Synonyms:**

### **Palmar erythema of pregnancy**

Symmetrical redness of the palms occurring during pregnancy, thought to be related to elevated circulating oestrogen levels causing vasodilatation. It is a benign, physiological finding that typically resolves after delivery and requires no specific treatment.

**Synonyms:**

### **Palmar Grasp Reflex**

A primitive reflex in which an infant flexes the fingers around an object placed in the palm. It is normally present at birth and gradually diminishes as voluntary grasp develops; asymmetry or persistence may warrant neurologic assessment.

**Synonyms:**

### **Palpation**

The second step of the physical examination, utilizing the sense of touch to evaluate body structures for size, shape, consistency, mobility, tenderness, temperature, and vibration.

**Synonyms:**

### **Palpebral Conjunctiva**

The part of the conjunctiva that lines the inner surfaces of the eyelids. It joins the bulbar conjunctiva at the fornices and helps protect and lubricate the eye.

**Synonyms:**

### **Palpitation**

The subjective sensation of a rapid, forceful, or irregular heartbeat. Palpitations are a common symptom with a broad differential.

**Synonyms:**

### **Palsy of the long thoracic nerve**

Weakness or paralysis of the long thoracic nerve (C5-C7), which innervates the serratus anterior muscle. Causes include trauma, compression, viral infection, or idiopathic. Results in winging of the scapula, particularly when pushing against a wall, and impaired overhead arm elevation. Most cases resolve spontaneously.

**Synonyms:**

---

## Pancoast Syndrome

A clinical syndrome caused by an apical lung tumour invading the lower brachial plexus, sympathetic chain, or adjacent structures. It may produce severe shoulder and arm pain, hand weakness, sensory loss, and Horner syndrome.

**Synonyms:**

## Pancoast Tumor

Superior sulcus tumor invading brachial plexus, subclavian vessels, and sympathetic chain. Causes Horner syndrome, shoulder/arm pain, and hand muscle atrophy. Treated with chemoradiation followed by surgery.

**Synonyms:**

## Pancreas

Retroperitoneal gland (15-20 cm) behind the stomach, spanning from duodenum to spleen. Exocrine function: acinar cells secrete digestive enzymes (amylase, lipase, proteases) and bicarbonate into pancreatic duct to duodenum.

**Synonyms:**

## Pancreas Divisum

A congenital anomaly in which the dorsal and ventral pancreatic ducts fail to fuse. Most people are asymptomatic, but impaired drainage through the minor papilla can predispose to recurrent pancreatitis.

**Synonyms:**

## Pancreatectomy

Removal of all (total) or part of the pancreas. Pancreaticoduodenectomy (Whipple) is used for pancreatic head and periampullary tumors; distal pancreatectomy for body and tail lesions.

**Synonyms:**

## Pancreatic Abscess

A localized collection of pus within or adjacent to the pancreas, usually developing as a complication of infected pancreatic necrosis or severe pancreatitis. It may cause persistent fever, abdominal pain, sepsis, and organ failure.

**Synonyms:**

## Pancreatic Adenocarcinoma

A malignant tumor arising from the exocrine ductal cells of the pancreas. It may cause jaundice, abdominal or back pain, weight loss, or no early symptoms; risk factors include smoking, chronic pancreatitis, diabetes, obesity, and inherited cancer syndromes.

**Synonyms:**

## Pancreatic Cancer

Malignancy arising in the pancreas, most often pancreatic ductal adenocarcinoma. Symptoms may include jaundice, abdominal or back pain, weight loss, or digestive problems, although early disease may be asymptomatic. Treatment depends on tumor type, extent, and patient factors.

**Synonyms:**

## Pancreatic Duct

The main duct of the pancreas, conveying exocrine pancreatic secretions to the duodenum. It commonly joins the common bile duct before opening at the major duodenal papilla.

**Synonyms:**

## Pancreatic Elastase

A stool test that measures elastase-1 as an indirect estimate of pancreatic exocrine function. Low results support pancreatic exocrine insufficiency, but interpretation depends on stool consistency, the assay, and the clinical setting. Replacement pancreatic enzymes do not usually interfere with the test.

**Synonyms:**

## Pancreatic Enzyme

Digestive enzymes secreted by pancreatic acinar cells into the duodenum, including proteases (trypsinogen, chymotrypsinogen, proelastase, procarboxypeptidases), amylase (starch digestion), and lipase (triglyceride digestion), along with bicarbonate from ductal cells to neutralize gastric acid.

**Synonyms:**

---

### **Pancreatic Exocrine Insufficiency**

Inadequate secretion or delivery of pancreatic digestive enzymes and bicarbonate, causing maldigestion and malabsorption. Chronic pancreatitis, cystic fibrosis, pancreatic resection, and advanced pancreatic disease are important causes; steatorrhea and weight loss may respond to pancreatic enzyme replacement.

**Synonyms:**

### **Pancreatic Insufficiency**

Inadequate production or delivery of pancreatic digestive enzymes, causing impaired digestion and absorption, weight loss, diarrhea, or fatty stools. Treatment may include pancreatic enzyme replacement and nutritional support.

**Synonyms:**

### **Pancreatic Mass**

Abnormality in pancreas detected on imaging. Pancreatic adenocarcinoma most common malignancy. Neuroendocrine tumors also important.

**Synonyms:**

### **Pancreatic Neuroendocrine Tumors**

Tumors arising from neuroendocrine cells of the pancreas. They may produce hormones, such as insulin or gastrin, or be nonfunctioning. Classification and prognosis use differentiation, grade, proliferation measures, stage, and clinical behavior.

**Synonyms:**

### **Pancreatic Pseudocyst**

A pancreatic pseudocyst is a localized collection of pancreatic fluid surrounded by a wall of granulation tissue without an epithelial lining, typically occurring as a complication of acute or chronic pancreatitis. Unlike true cysts, pseudocysts lack an epithelial lining, which is why they are called pseudocysts.

**Synonyms:**

### **Pancreatic Surgery**

Pancreaticoduodenectomy (Whipple): pancreatic head, duodenum, gallbladder, distal stomach (pylorus-preserving standard), common bile duct;

reconstruction: pancreaticojejunostomy (duct-to-mucosa or invagination), hepaticojejunostomy, gastrojejunostomy/duodenojejunostomy.

**Synonyms:**

### **Pancreatic Trauma**

Injury to the pancreas caused by blunt or penetrating trauma. Assessment may require CT, laboratory testing, and observation or intervention according to the injury.

**Synonyms:**

### **Pancreatitis**

Inflammation of the pancreas that may be acute or chronic. Causes include gallstones, alcohol, medicines, metabolic disorders, and other conditions; severity ranges from mild to necrotizing disease.

**Synonyms:**

### **Pancreatoblastoma**

A rare malignant pancreatic epithelial tumour occurring mainly in children. It may present with an abdominal mass, pain, vomiting, weight loss, or hormonal symptoms and requires imaging, tissue diagnosis, staging, and multidisciplinary treatment.

**Synonyms:**

### **Pancreatography**

Contrast imaging of pancreatic duct. ERCP approach. Evaluates pancreatic duct abnormalities.

**Synonyms:**

### **Pancytopenia**

Simultaneous reduction of red cells, white cells, and platelets, indicating bone marrow failure or infiltration.

**Synonyms:**

### **PANDAS**

Pediatric autoimmune neuropsychiatric disorder associated with streptococcal infection, a proposed syndrome involving abrupt onset or worsening of obsessive-compulsive symptoms or tics in a child after infection. Diagnosis is clinical and remains con-

---

troversial; evaluation should also consider common neurologic, psychiatric, and infectious causes.

**Synonyms:**

### **Pandemic**

Epidemic spread across multiple countries/continents. Examples: COVID-19, Spanish flu, HIV/AIDS.

**Synonyms:**

### **Paneth Cell**

Specialized secretory epithelial cell at the base of a small-intestinal crypt that produces antimicrobial substances.

**Synonyms:**

### **Panic Attack**

An abrupt surge of intense fear or discomfort reaching a peak within minutes.

**Synonyms:**

### **Panic Disorder**

Recurrent unexpected panic attacks, which are abrupt surges of intense fear or discomfort peaking within minutes.

**Synonyms:**

### **Panlobular Emphysema**

A subtype involving diffuse destruction of the entire acinus. It predominantly affects the lower lobes and is classically associated with alpha-1 antitrypsin deficiency. The destruction is more uniform compared to centriacinar emphysema.

**Synonyms:**

### **Panniculitis**

Inflammation of the subcutaneous fat, presenting as tender, erythematous or violaceous nodules and plaques, most commonly on the lower extremities. The classification is based on whether the septa or lobules of the fat are primarily affected, and the aetiology includes infections, autoimmune diseases, medications, and pancreatic disease.

**Synonyms:**

### **Panoramic Radiograph**

An extraoral radiograph displaying both jaws, teeth, temporomandibular regions, and surrounding structures in one image. It is useful for surveying dentition, development, impaction, and gross osseous pathology but has less fine detail than intraoral radiographs.

**Synonyms:**

### **Panretinal Photocoagulation**

A laser treatment that applies scattered burns to the peripheral retina to reduce abnormal blood-vessel growth. It is used for selected proliferative retinal diseases, including proliferative diabetic retinopathy, and can affect peripheral or night vision.

**Synonyms:**

### **Panuveitis**

Inflammation involving the anterior uvea, vitreous, and posterior uveal tissues. It can threaten vision and may be caused by infection, autoimmune disease, trauma, or other disorders; treatment depends on the cause and severity.

**Synonyms:**

### **Pap Smear**

Papanicolaou test (cervical cytology): a screening test collecting cervical cells (conventional or liquid-based) to detect precancerous cervical changes (CIN) and cancer, usually combined with HPV DNA testing (co-testing).

**Synonyms:**

### **Papillary Muscle**

Muscular projections of the ventricular myocardium attached by chordae tendineae to the atrioventricular valve leaflets (anterolateral and posteromedial in the left ventricle; anterior, septal, and posterior in the right ventricle).

**Synonyms:**

### **Papillary Thyroid Carcinoma**

Most common histological subtype of thyroid carcinoma accounting for approximately eighty percent of cases. Characterized by nuclear features including

---

nuclear grooves, intranuclear cytoplasmic inclusions, and Orphan Annie eye nuclei. Often multifocal and bilateral with lymph node metastases.

**Synonyms:**

### **Papilledema**

Swelling of the optic disc caused by elevated intracranial pressure, and it is a critical clinical sign that requires urgent investigation to identify the underlying cause, which may be life-threatening.

**Synonyms:**

### **Papilloma**

A benign epithelial neoplasm characterised by finger-like projections of fibrovascular tissue covered by hyperplastic epithelium, most commonly caused by human papillomavirus infection in cutaneous warts or mucosal sites. Cutaneous papillomas present as flesh-coloured, rough, or pedunculated growths.

**Synonyms:**

### **Papillomatosis cutis lymphostatica**

Diffuse, warty, papillomatous thickening of the skin resulting from chronic lymphoedema, most commonly affecting the lower extremities in the setting of long-standing venous or lymphatic insufficiency. The skin develops cobblestone-like hyperkeratotic papules and plaques due to lymph stasis and chronic inflammation.

**Synonyms:**

### **Papular**

A papule: a small, solid, elevated skin lesion <1 cm in diameter (palpable), of various colors and etiologies.

**Synonyms:**

### **Papular Urticaria**

A hypersensitivity reaction to insect bites, especially from fleas, bedbugs, or mosquitoes, causing recurrent intensely itchy papules or small vesicles, often clustered on exposed areas in children. Diagnosis is clinical.

**Synonyms:**

### **Papule**

A solid, raised skin lesion, conventionally less than 1 cm in diameter. Papules may arise from epidermal, dermal, inflammatory, infectious, or neoplastic processes.

**Synonyms:**

### **Paracentesis**

Percutaneous needle aspiration of ascitic fluid from the peritoneal cavity. Used for diagnostic analysis to determine the cause of ascites and for therapeutic removal of large volumes for symptom relief. The serum-ascites albumin gradient is calculated to differentiate portal hypertensive from non-portal hypertensive causes.

**Synonyms:**

### **Paracetamol overdose**

Toxic ingestion of paracetamol that can cause dose-dependent hepatic necrosis; risk assessment uses the timing and serum concentration of the ingestion.

**Synonyms:**

### **Paracetamol Toxicity**

Liver injury caused by excessive acetaminophen (paracetamol) exposure. Severe poisoning may cause nausea, abdominal pain, liver failure, or death and requires urgent assessment.

**Synonyms:**

### **Paraesophageal hernia**

A hiatal hernia in which part of the stomach moves through the diaphragm beside the esophagus. It may cause obstruction or strangulation even when reflux is absent.

**Synonyms:**

### **Paraganglioma**

A neuroendocrine tumor arising from extra-adrenal paraganglia, related to pheochromocytoma; may secrete catecholamines. Associations with hereditary syndromes (SDH mutations, VHL, NF1) warrant genetic counseling.

**Synonyms:**

---

### Paragonimiasis

A parasitic infection caused by *Paragonimus* lung flukes, usually acquired by eating undercooked crustaceans. It commonly affects the lungs.

**Synonyms:**

### Parainfluenza

Infection caused by human parainfluenza viruses, commonly producing croup, laryngitis, bronchiolitis, or pneumonia in children. Adults often have a mild upper-respiratory illness.

**Synonyms:**

### Paranasal Sinuses

Air-filled cavities in the bones around the nose that connect with the nasal cavity through small openings. They are lined with mucosa and contribute to mucus production and resonance of the voice.

**Synonyms:**

### Paraneoplastic disorder

A systemic syndrome caused by a malignancy through mechanisms other than direct invasion, metastasis, or metabolic effects of the tumor. Paraneoplastic syndromes result from hormone production, immune-mediated mechanisms, or cytokine release by the tumor, affecting distant organs.

**Synonyms:**

### Paraneoplastic Neurologic Syndrome

Neurologic symptoms from immune response to cancer. Examples: Lambert-Eaton, cerebellar degeneration.

**Synonyms:**

### Paraneoplastic Syndrome

Symptoms caused by cancer but not by tumor mass or metastasis. Mechanisms: hormone production, immune cross-reaction. Examples: SIADH, Cushing syndrome, Lambert-Eaton myasthenia, hypercalcemia.

**Synonyms:**

### Paranoia

A thought process characterized by excessive or

irrational suspiciousness and distrust of others, often manifesting as delusions of persecution, reference, or grandeur.

**Synonyms:**

### Paraphilia

A condition characterized by intense and persistent sexual interest in atypical objects, situations, or individuals. Examples: exhibitionism, fetishism, frotteurism, pedophilic disorder, sexual masochism, sexual sadism, transvestic disorder, voyeurism, and paraphilia not otherwise specified.

**Synonyms:**

### Paraphimosis

Urological emergency in uncircumcised males occurring when a retracted, tight foreskin becomes trapped behind the coronal sulcus of the glans penis, forming a constricting ring.

**Synonyms:**

### Parapneumonic Effusion

Pleural effusion complicating pneumonia. Simple effusions resolve with antibiotics. Complicated effusions (pH < 7.2, glucose < 60 mg/dL) require chest tube drainage.

**Synonyms:**

### Parapneumonic Pleural Effusion

Pleural fluid accumulation associated with bacterial pneumonia. It may be uncomplicated or progress to a complicated effusion or empyema, requiring imaging, pleural-fluid analysis, antibiotics, and sometimes drainage.

**Synonyms:**

### Paraquat

A highly toxic herbicide. Ingestion can cause injury to the mouth and gastrointestinal tract, kidney failure, and delayed lung injury; severe poisoning has a high risk of death.

**Synonyms:**

### Paraseptal Emphysema

A form of emphysema characterized by destruction

---

of alveoli adjacent to the pleura. It typically affects young adults and predisposes to spontaneous pneumothorax due to rupture of subpleural blebs. It may be associated with Marfan syndrome.

**Synonyms:**

### Parasite

An organism that lives on or within a host organism, deriving nutrients at the host's expense.

**Synonyms:**

### Parasitemia

The presence and measurable burden of parasites in the blood. It is used particularly for malaria and some blood-borne protozoal infections and may correlate with disease severity.

**Synonyms:**

### Parasitic Infections

Malaria: *Plasmodium* (*falciparum*, *vivax*, *ovale*, *malariae*, *knowlesi*). *Falciparum*: cerebral malaria, severe anemia, ARDS, AKI, hypoglycemia. Diagnosis: thick/thin smear, RDT (HRP2 for *P. falciparum*, pLDH for all species, aldolase). Amoebiasis: *E. histolytica*, stool antigen, PCR. Giardiasis: stool antigen, duodenal aspirate.

**Synonyms:**

### Parasitology

The branch of microbiology that studies parasites, including protozoa, helminths, and ectoparasites. Parasitic infections are a major global health problem, particularly in tropical and subtropical regions. Protozoan parasites include *Plasmodium* (malaria), *Trypanosoma* (sleeping sickness, Chagas disease), and *Leishmania* (leishmaniasis).

**Synonyms:**

### Parasympathetic Nervous System

The craniosacral division of the autonomic nervous system mediating 'rest-and-digest' functions. Preganglionic fibers from cranial nerves III, VII, IX, X, and sacral nerves S2-S4 synapse on ganglia near or within target organs (short postganglionic fibers).

**Synonyms:**

### Parasympatholytic

A drug that blocks muscarinic (cholinergic) receptors, inhibiting parasympathetic nervous system activity. Agents: atropine (bradycardia, organophosphate poisoning), ipratropium/tiotropium (COPD/asthma—bronchodilation), scopolamine (motion sickness), oxybutynin/tolterodine (overactive bladder), and glycopyrrolate.

**Synonyms:**

### Parasympathomimetic

A drug that mimics or enhances parasympathetic (cholinergic) activity. Direct agonists: muscarinic (pilocarpine—glaucoma, dry mouth) and nicotinic agonists.

**Synonyms:**

### Parathyroid

One of the small endocrine glands behind the thyroid that secretes parathyroid hormone and regulates calcium and phosphate balance.

**Synonyms:**

### Parathyroid Crisis

Severe hypercalcemia with calcium greater than fourteen milligrams per deciliter causing altered mental status, cardiac arrhythmias, and acute kidney injury. Most commonly occurs in patients with primary hyperparathyroidism precipitated by dehydration, immobility, or thiazide diuretics.

**Synonyms:**

### Parathyroid Hormone Physiology

Parathyroid hormone is the primary regulator of calcium homeostasis secreted by the four parathyroid glands in response to low ionized calcium levels detected by the calcium-sensing receptor.

**Synonyms:**

### Parathyroid Hyperplasia

Enlargement and increased cellularity of one or more parathyroid glands causing excessive parathyroid hormone secretion and primary hyperparathyroidism. It may occur sporadically or as part of multiple endocrine neoplasia.

---

**Synonyms:**

### **Parathyroid Surgery**

Operations on the parathyroid glands, usually performed for selected cases of primary or secondary hyperparathyroidism. The decision depends on symptoms, calcium levels, kidney involvement, bone disease, overall health, and current clinical guidance.

**Synonyms:**

### **Parathyroidectomy**

Surgical removal of parathyroid glands for refractory secondary hyperparathyroidism unresponsive to medical therapy. Indicated when calcium-phosphorus product persistently elevated despite maximal medical management, symptomatic bone disease, or calciphylaxis. Subtotal or total parathyroidectomy with autotransplantation.

**Synonyms:**

### **Parenteral Nutrition**

Intravenous nutrition bypassing GI tract. Total parenteral nutrition (TPN) provides complete nutrition. Indications: bowel failure, short bowel syndrome, prolonged NPO, malabsorption. Risks: infection, liver dysfunction, metabolic complications, line complications.

**Synonyms:**

### **Paresthesia**

An abnormal sensation such as tingling, prickling, numbness, burning, or pins and needles. See Numbness and Tingling.

**Synonyms:**

### **Parietal Lobe**

The cerebral lobe posterior to the central sulcus and above the lateral sulcus, containing the primary somatosensory cortex (postcentral gyrus, Brodmann 3,1,2) processing touch, pain, temperature, and proprioception, plus the somatosensory association cortex.

**Synonyms:**

### **Parinaud Syndrome**

A disorder caused by dysfunction of the dorsal midbrain, characterized by impaired upward gaze, abnormal pupil responses, and convergence-retraction eye movements. Causes include tumors, stroke, multiple sclerosis, and hydrocephalus.

**Synonyms:**

### **Parkinson Disease**

A progressive neurodegenerative disorder characterized by the loss of dopaminergic neurons in the substantia nigra pars compacta of the midbrain, leading to reduced dopamine levels in the striatum and the cardinal motor features of bradykinesia, resting tremor, rigidity, and postural instability.

**Synonyms:**

### **Parkinson's Disease**

A progressive neurodegenerative disorder caused by selective loss of dopaminergic neurons in the substantia nigra pars compacta, leading to dopamine depletion in the striatum. The pathological hallmark is the presence of Lewy bodies, intracellular inclusions composed of aggregated alpha-synuclein protein, within surviving neurons.

**Synonyms:**

### **Parkinsonism**

A clinical syndrome characterized by bradykinesia, rigidity, tremor (resting, pill-rolling), and postural instability. Idiopathic Parkinson disease: most common cause, responds well to levodopa.

**Synonyms:**

### **Paronychia**

Inflammation of the nail fold. Acute paronychia is bacterial (*Staphylococcus aureus*, *Streptococcus*), presenting as painful, erythematous, swollen nail fold with possible abscess. Treatment includes warm compresses, antibiotics, and incision and drainage if abscessed.

**Synonyms:**

### **Parotid Gland**

The largest of the three major salivary glands, lo-

---

cated in the preauricular region, extending from the zygomatic arch superiorly to the angle of the mandible inferiorly. The parotid gland is encased in the parotid fascia (investing layer of deep cervical fascia).

**Synonyms:**

### **Parotitis**

Inflammation of the parotid gland caused by infection, duct obstruction, dehydration, medicines, or autoimmune disease. It may produce painful swelling near the ear, fever, dry mouth, or purulent drainage; treatment depends on the cause.

**Synonyms:**

### **Paroxysmal Nocturnal Dyspnea**

Episodes of breathlessness that awaken a person from sleep after a period of lying down. It can occur with heart failure or other cardiopulmonary conditions and differs from orthopnea, which begins soon after lying down.

**Synonyms:**

### **Paroxysmal Nocturnal Hemoglobinuria**

A rare, acquired clonal disorder of hematopoietic stem cells characterized by complement-mediated intravascular hemolysis, thrombosis (particularly in unusual sites such as hepatic, portal, and cerebral veins), and bone marrow failure.

**Synonyms:**

### **Paroxysmal Supraventricular Tachycardia**

Sudden-onset and sudden-termination episodes of rapid regular tachycardia arising above the ventricles, usually involving an atrioventricular re-entry or nodal re-entry circuit. Palpitations, dizziness, chest discomfort, or syncope may occur.

**Synonyms:**

### **Partial Agonist**

A partial agonist is a drug that binds to a receptor and produces a biological response that is less than the maximum possible response, even when all receptors are occupied. Partial agonists have affinity for the receptor but lower intrinsic activity

compared to full agonists, producing a submaximal response regardless of dose.

**Synonyms:**

### **Partial Denture**

Removable prosthesis replacing some teeth. Metal framework or acrylic. Requires remaining teeth for support.

**Synonyms:**

### **Partial Response**

Significant tumor reduction but not complete.

**Synonyms:**

### **Partial Thromboplastin Time**

A coagulation test measuring the intrinsic and common pathways (factors XII, XI, IX, VIII, X, V, II, fibrinogen), used to monitor unfractionated heparin and detect factor deficiencies.

**Synonyms:**

### **Partial Volume Artifact**

CT artifact from voxel containing multiple tissues. Reduced by thinner slices.

**Synonyms:**

### **Partial-Volume Effect**

Underestimation or distortion of measured activity in small or low-contrast structures because the object size approaches the scanner's spatial resolution. It affects quantitative PET and SPECT and may require recovery or correction methods.

**Synonyms:**

### **Particle (Vascular)**

An embolic particle used to occlude selected vessels under image guidance.

**Synonyms:** Vascular

### **Particulate Matter**

Small solid or liquid particles suspended in air. Fine particles can penetrate the lungs and increase cardiovascular and respiratory risk.

**Synonyms:**

---

### **Partograph (Partogram)**

A graphic record of cervical change, fetal descent, contractions, and maternal or fetal observations during labor. It can support communication and recognition of abnormal progress, but findings must be interpreted with current labor guidance and the overall clinical situation.

**Synonyms:** Partogram

### **Parturition (Childbirth)**

The process of giving birth, encompassing three stages: (1) First stage: from the onset of regular uterine contractions (cervical effacement and dilation) to full dilation (10 cm). Latent phase—slow dilation (0–4 cm) over hours, variable duration. Active phase—more rapid dilation (4–10 cm), typically 1–1.5 cm/hour in nulliparous women.

**Synonyms:** Childbirth

### **Parvovirus B19**

Human parvovirus B19: a small DNA virus causing erythema infectiosum ('fifth disease') in children, transmitted by respiratory droplets.

**Synonyms:**

### **Parvovirus B19 infection**

A viral infection that may cause slapped-cheek rash, joint symptoms, or temporary suppression of red-cell production.

**Synonyms:**

### **Pasteurella multocida**

A bacterium commonly carried by animals that can cause wound infections after bites or scratches and, less often, respiratory or bloodstream infection.

**Synonyms:**

### **Pasteurization**

A heat treatment reducing microbial load in liquids by heating below boiling point to inactivate vegetative pathogens and spoilage organisms while preserving quality.

**Synonyms:**

### **Patau Syndrome**

Trisomy 13, affecting 1 in 10,000-20,000 live births. Features: holoprosencephaly (most characteristic, incomplete forebrain division), microcephaly, microphthalmia or anophthalmia, cleft lip and palate, polydactyly (postaxial), clenched fists with overlapping fingers, and congenital heart defects (VSD, PDA, dextrocardia, 80%).

**Synonyms:**

### **Patch**

A flat, circumscribed area of altered skin color larger than approximately 1 cm. It is the larger counterpart of a macule and may be caused by pigmentary, vascular, inflammatory, or neoplastic disease.

**Synonyms:**

### **Patch (Vascular)**

A piece of biological or synthetic material sewn onto a blood vessel to widen or repair it.

**Synonyms:** Vascular

### **Patch Graft**

Vascular graft for patch angioplasty. Bovine pericardium, PTFE.

**Synonyms:**

### **Patch Testing**

Patch testing identifies allergens causing allergic contact dermatitis. The standard series includes 35 allergens. Additional custom trays include occupational and personal allergens. Patches are applied to the upper back for 48 hours and removed. Reading at 48 hours (initial) and 72 to 96 hours (delayed) identifies positive reactions.

**Synonyms:**

### **Patella**

The largest sesamoid bone, embedded in the quadriceps tendon. It articulates with the femoral trochlea to form the patellofemoral joint and improves the mechanical efficiency of knee extension. It is triangular and covered by thick articular cartilage.

**Synonyms:**

---

## Patella (Kneecap)

The largest sesamoid bone in the human body, embedded within the quadriceps tendon at the front of the knee. It improves the mechanical efficiency of knee extension, protects the front of the joint, and distributes forces across the femoral trochlea.

**Synonyms:** Kneecap

## Patellofemoral Instability

A tendency of the patella to move abnormally or dislocate from the femoral trochlea. Risk factors include abnormal trochlear shape, a high-riding patella, ligament insufficiency, altered limb alignment, and previous dislocation.

**Synonyms:**

## Patellofemoral Pain Syndrome

Anterior knee pain related to the patellofemoral joint, common in adolescents and young adults (especially runners). Etiology: multifactorial (malalignment, quadriceps imbalance, overuse, tight lateral structures, weak VMO, and patellar instability).

**Synonyms:**

## Patent Ductus Arteriosus

A congenital heart defect characterized by persistent patency of the ductus arteriosus, a vessel connecting the pulmonary artery to the proximal descending aorta, which normally closes within the first few days of life. The resulting left-to-right shunt leads to pulmonary overcirculation and left heart volume overload.

**Synonyms:**

## Patent Foramen Ovale

A persistent flap-like opening between the atria that normally permits fetal blood flow and usually closes after birth. It is often an incidental finding but may allow a clot to pass from the venous to the arterial circulation in selected circumstances.

**Synonyms:**

## Paternal uniparental disomy 14 (UDP 14

## pat) thoracic dysplasia

A rare genetic condition resulting from inheritance of both copies of chromosome 14 from the father, leading to dysregulated expression of imprinted genes on chromosome 14. It presents with severe thoracic hypoplasia, pulmonary hypoplasia, and characteristic facial features. It is a lethal condition in most cases.

**Synonyms:** UDP 14 pat

## Paternity Testing

The use of genetic markers to establish or exclude a biological parent-child relationship, the reference method being short tandem repeat DNA profiling of the child, alleged father, and mother. Modern STR analysis commonly yields paternity probability exceeding 99.99 percent for true fathers.

**Synonyms:**

## Pathogen

A tiny organism such as a virus, bacterium, or parasite that can invade the body and produce disease.

**Synonyms:**

## Pathogenesis

Mechanism of disease development. Steps: initiation, promotion, progression.

**Synonyms:**

## Pathogenic Variant

A genetic variant with sufficient validated evidence to be interpreted as causing or contributing to disease. Classification uses standardized evidence from population data, segregation, functional studies, computational analysis, and phenotype correlation.

**Synonyms:**

## Pathogenicity

The capacity of a microorganism to cause disease in a susceptible host. Pathogenicity is a qualitative property, whereas virulence describes the relative degree of disease-causing capacity among strains or organisms.

**Synonyms:**

---

## **Pathologic Fracture**

A fracture occurring through bone weakened by an underlying disease such as metastasis, myeloma, infection, benign tumor, or metabolic bone disorder. Evaluation includes characterization of the lesion and treatment of both the fracture and its cause.

**Synonyms:**

## **Pathologic Hypertrophy**

The enlargement of an organ resulting from an increase in the size of its constituent cells without an increase in cell number, typically occurring as a response to chronically increased workload or hormonal stimulation.

**Synonyms:**

## **Pathology**

Study of disease. Includes general pathology (cell injury, inflammation, neoplasia) and systemic pathology (organ-specific diseases).

**Synonyms:**

## **Pathology Artifact**

A distortion, alteration, or contaminant introduced during specimen collection, fixation, processing, sectioning, staining, or imaging rather than representing true disease. Artifacts must be recognized to avoid diagnostic error.

**Synonyms:**

## **Patient**

Person receiving medical care. Also: patient zero (initial case), patient safety.

**Synonyms:**

## **Patient Advocacy**

Acting on behalf of a patient to ensure that the patient's needs, rights, and preferences are addressed in healthcare.

**Synonyms:**

## **Patient Communication**

The exchange of information and understanding between a patient, caregivers, and healthcare professionals during care.

**Synonyms:**

## **Patient Education**

The process of explaining a health condition, treatment, medicines, exercises, equipment, warning signs, and prevention strategies in a way the patient can understand and use.

**Synonyms:**

## **Patient Positioning**

Placing and supporting a patient in a position that permits safe care, accurate examination or imaging, and adequate comfort.

**Synonyms:**

## **Patient Preparation**

The instructions and assessments completed before a test or procedure, such as fasting, medicine review, hydration, consent, or skin preparation when required.

**Synonyms:**

## **Patient Safety**

Prevention of harm from healthcare. Examples: medication errors, healthcare-associated infections, surgical errors. Strategies: checklists, hand hygiene, barcoding.

**Synonyms:**

## **Patient-Centered Care**

Care respecting patient preferences, needs, values. Examples: shared decision-making, communication, coordination.

**Synonyms:**

## **Patient-Centered Outcome**

An outcome that reflects what matters to the patient, including symptoms, function, quality of life, treatment burden, and ability to achieve personal goals, rather than relying only on laboratory or imaging measures.

**Synonyms:**

## **Patient-Controlled Analgesia**

A method in which a patient self-administers pre-

---

scribed doses of analgesic medication using a programmable pump with preset safety limits. The medication, dose, and lockout interval are individualized according to the patient's condition and monitoring needs.

**Synonyms:**

### Patient-Reported Outcome Measure

A validated questionnaire completed directly by a patient to assess symptoms, function, health status, or quality of life without clinician interpretation of the response.

**Synonyms:**

### Patlak Plot

Linear graphical method for quantitative PET.

**Synonyms:**

### Pattern Recognition Receptors

PRRs recognize PAMPs (pathogen) and DAMPs (damage). TLRs: TLR1/2 (lipoproteins), TLR2/6 (lipoteichoic acid), TLR3 (dsRNA), TLR4 (LPS, MD-2, CD14), TLR5 (flagellin), TLR7/8 (ssRNA), TLR9 (CpG DNA). Cytosolic: RIG-I/MDA5 (RNA), cGAS (DNA → cGAMP → STING → IFN), NOD1/2 (peptidoglycan).

**Synonyms:**

### PCL Injuries

Posterior cruciate ligament (PCL) tears: dashboard injury (posterior tibial force), hyperflexion. Clinical: posterior drawer (most sensitive), quadriceps active test, posterior sag sign. Grade I (1-5mm), II (6-10mm), III (>10mm). Isolated PCL: nonoperative (brace, rehab) for Grade I/II; surgical for Grade III or combined.

**Synonyms:**

### PCOS

Common endocrine disorder affecting six to twelve percent of reproductive-aged women characterized by hyperandrogenism, ovulatory dysfunction, and polycystic ovarian morphology on ultrasound. See Polycystic Ovary Syndrome.

**Synonyms:**

### PCR (Polymerase Chain Reaction)

Technique amplifying specific DNA sequences exponentially. Components: template DNA, primers, DNA polymerase (Taq), nucleotides, buffer. Cycles: denaturation, annealing, extension. Applications: diagnostics, forensics, research.

**Synonyms:** Polymerase Chain Reaction

### PE Anticoagulation

Anticoagulant treatment for pulmonary embolism to prevent clot extension and recurrence. Options include direct oral anticoagulants, heparins, and vitamin K antagonists; the choice and duration depend on bleeding risk, pregnancy, kidney function, cancer, provoking factors, and other clinical features.

**Synonyms:**

### Peak Expiratory Flow Rate

The maximum flow rate achieved during a forced expiratory manoeuvre after maximal inspiration, measured in litres per minute (L/min) using a peak flow meter. PEFR reflects the degree of airflow obstruction and is effort-dependent.

**Synonyms:**

### Peak Flow Meter

A handheld device that measures the maximum speed of forced expiration, often used to monitor asthma.

**Synonyms:**

### Pearly penile papules

Small, benign, dome-shaped papules arranged circumferentially around the glans penis, representing normal anatomical variants requiring no treatment.

**Synonyms:**

### Pectoralis Major Muscle

Thick fan-shaped chest muscle with clavicular and sternocostal heads, inserting on the lateral intertubercular groove lip. Innervated by medial/lateral pectoral nerves (C5-T1). Clavicular head flexes; sternocostal head extends from flexion. Adducts and medially rotates powerfully.

---

**Synonyms:**

### **Pectoralis Minor Muscle**

Thin triangular muscle deep to pectoralis major, from ribs 3-5 to the coracoid process. Innervated by medial pectoral nerve (C8-T1). Draws scapula anteriorly/inferiorly, stabilizing it against the thorax. Assists forced inspiration. Tightness contributes to rounded shoulder posture and thoracic outlet syndrome.

**Synonyms:**

### **Pectus Carinatum**

A congenital chest wall deformity characterized by anterior protrusion of the sternum (pigeon chest), caused by excessive growth of the costal cartilages pushing the sternum forward. Less common than pectus excavatum. Associated with congenital heart disease, Marfan syndrome, Noonan syndrome, and homocystinuria.

**Synonyms:**

### **Pectus Excavatum**

The most common congenital chest wall deformity, characterized by depression of the sternum (funnel chest), caused by excessive growth of the costal cartilages that push the sternum inward. Typically sporadic, but associated with Marfan syndrome, Ehlers-Danlos syndrome, Noonan syndrome, and Poland syndrome.

**Synonyms:**

### **Pediatric Anesthesia**

Pediatric anesthesia requires age-appropriate dosing, equipment, and techniques. Children have higher metabolic rates, increased oxygen consumption, smaller functional residual capacity, and higher risk of desaturation. Airway anatomy differs (larger tongue, more anterior larynx, narrower subglottic area).

**Synonyms:**

### **Pediatric Appendicitis**

Acute inflammation of the vermiform appendix, usually caused by luminal obstruction. Children may

have evolving periumbilical-to-right-lower-quadrant pain, anorexia, vomiting, fever, and guarding, but presentation can be atypical in young children; timely surgical and antimicrobial assessment reduces perforation risk.

**Synonyms:**

### **Pediatric Cancer**

Cancer occurring in infants, children, or adolescents. Common types include leukemia, brain tumors, lymphoma, neuroblastoma, and Wilms tumor; prognosis varies by type and stage.

**Synonyms:**

### **Pediatric Dentistry**

Specialty of dental care for children. Manages primary dentition, growth, behavior. Preventive focus. Special needs adaptation.

**Synonyms:**

### **Pediatric Dermatology**

The medical specialty concerned with skin, hair, and nail disorders in infants, children, and adolescents. It includes congenital lesions, inflammatory diseases, infections, vascular lesions, and tumors.

**Synonyms:**

### **Pediatric Dermatology Conditions**

Distinct from adult dermatology. Birthmarks include vascular (hemangiomas, port-wine stains) and pigmented (café-au-lait, congenital nevi, Mongolian spots). Infantile hemangiomas proliferate in first months then involute. Congenital melanocytic nevi carry melanoma risk proportional to size.

**Synonyms:**

### **Pediatric Diabetic Ketoacidosis**

A life-threatening complication of type 1 diabetes characterized by hyperglycemia, metabolic acidosis, and ketosis. Presents with polyuria, polydipsia, vomiting, abdominal pain, Kussmaul respirations, and fruity breath odor.

**Synonyms:**

---

## **Pediatric Eczema**

Atopic dermatitis in children commonly begins in infancy with facial and extensor involvement; flexural disease predominates in older children. Pruritus, xerosis, sleep disturbance, and scratching are characteristic.

**Synonyms:**

## **Pediatric Fever**

An elevated body temperature in a child, usually caused by infection but sometimes by inflammation, medicines, or environmental heat. Evaluation depends on age, appearance, duration, and associated findings.

**Synonyms:**

## **Pediatric Health**

Pediatric health encompasses the physical, cognitive, emotional, and social development of children from infancy through adolescence, with emphasis on preventive care, developmental surveillance, and age-appropriate management of acute and chronic conditions.

**Synonyms:**

## **Pediatric Meningitis**

Inflammation of the meninges in children, bacterial forms being the most dangerous. Presents with fever, headache, neck stiffness, photophobia, altered mental status, and petechial rash (meningococcal). Infants may present with irritability, poor feeding, bulging fontanelle, and high-pitched cry.

**Synonyms:**

## **Pediatric Nuclear Medicine**

Special considerations for children: lower doses, sedation often needed, distraction techniques. Dose reduction: weight-based activity, optimized protocols.

**Synonyms:**

## **Pediatric Rehabilitation**

Rehabilitation for children with congenital or acquired disabilities. Developmental considerations, family-centered care, school collaboration.

**Synonyms:**

## **Pediatric Shock**

Inadequate tissue oxygen delivery or utilization in a child, most often caused by hypovolemia, distributive disease, cardiogenic dysfunction, or obstruction. Children may maintain blood pressure until late; tachycardia, abnormal perfusion, altered mental status, and oliguria are important early warning signs.

**Synonyms:**

## **Pediatric Skin Tumors**

Pediatric skin tumors differ from adult tumors. Infantile hemangioma is the most common benign tumor of infancy. Congenital melanocytic nevus carries risk of melanoma (larger nevi have higher risk). Juvenile xanthogranuloma is a benign histiocytic lesion. Pyogenic granuloma is a common vascular lesion. Dermoid cysts are congenital.

**Synonyms:**

## **Pediatric Toxicology**

Poisoning in children. Common: iron, medications, household cleaners, plants. Prevention: child-proof containers, education.

**Synonyms:**

## **Pediatrician**

A medical doctor who specializes in the health and medical care of children from birth through adolescence (typically up to age 16-18).

**Synonyms:**

## **Pediatrics**

The branch of medicine concerned with the health and medical care of infants, children, and adolescents from birth to age 18 (or up to age 16 in the UK).

**Synonyms:**

## **Pediculosis**

Infestation with lice. Head lice spread mainly through close head-to-head contact and cause scalp pruritus with nits attached to hair shafts. Body lice live in clothing and can transmit certain infec-

---

tions; pubic lice infest coarse hair-bearing regions. Treatment and contact management depend on the species and local resistance patterns.

**Synonyms:**

### **Pediculosis Capitis**

Infestation of the scalp by head lice, causing itching and attached eggs or lice in the hair.

**Synonyms:**

### **Pediculus humanus capitis**

A blood-sucking parasite commonly known as the louse (plural, lice) that can cause an itchy scalp; infestations are highly contagious and especially common in school-age children.

**Synonyms:**

### **Pedigree**

Diagram showing inheritance of traits through generations. Symbols: squares (males), circles (females), shaded (affected), half-shaded (carriers). Used to determine inheritance pattern and recurrence risk.

**Synonyms:**

### **Pedophilic Disorder**

A paraphilic disorder involving recurrent, intense sexual fantasies, urges, or behaviors toward pre-pubescent children, generally beginning in adolescence or adulthood. Clinical diagnosis requires the criteria to cause significant distress or impairment, or to be acted upon, and requires the person to meet established age-difference criteria.

**Synonyms:**

### **PEG Tube**

A feeding tube placed through the abdominal wall into the stomach using endoscopic guidance.

**Synonyms:**

### **Percutaneous Endoscopic Gastrostomy**

Endoscopic placement of a feeding tube through the abdominal wall directly into the stomach. Indications: long-term enteral feeding (>4 weeks) for dysphagia (stroke, ALS, dementia, head/neck cancer) and malnutrition.

**Synonyms:**

### **Pellagra**

A nutritional deficiency disease caused by a severe lack of niacin (Vitamin B3) or its precursor amino acid tryptophan.

**Synonyms:**

### **Pelvic Binder**

A circumferential device applied around the pelvis to reduce motion and hemorrhage from suspected unstable pelvic-ring injury. It should be centered over the greater trochanters and used with definitive imaging and hemorrhage-control management.

**Synonyms:**

### **Pelvic Cavity**

The lower abdominal cavity enclosed by the pelvis, containing the urinary bladder, internal reproductive organs, and rectum.

**Synonyms:**

### **Pelvic Congestion Syndrome**

Chronic pelvic pain associated with enlarged or inefficient pelvic veins, often worsening with prolonged standing, before menstruation, or after intercourse. Diagnosis requires evaluation for other causes of pelvic pain and may involve pelvic imaging; treatment is individualized by gynecology or vascular specialists.

**Synonyms:**

### **Pelvic Floor Dysfunction**

Weakness, overactivity, poor coordination, or injury of the muscles and connective tissues supporting the bladder, bowel, and reproductive organs. Symptoms may include urinary or fecal problems, pelvic pain, constipation, pain with sex, or pelvic organ prolapse; assessment may involve pelvic-health clinicians.

**Synonyms:**

### **Pelvic Floor Health and Disorders**

The pelvic floor is a musculofascial sling (levator ani, coccygeus, and surrounding fascia) spanning the pelvic outlet, supporting the pelvic organs (blad-

---

der, uterus, rectum), maintaining continence, and facilitating urination, defecation, and sexual function.

**Synonyms:**

### **Pelvic Inflammatory Disease**

Infection and inflammation of the upper female genital tract (uterus, fallopian tubes, ovaries, and peritoneum), most commonly caused by sexually transmitted infections (*Chlamydia trachomatis*, *Neisseria gonorrhoeae*). Presents with lower abdominal pain, cervical motion tenderness, adnexal tenderness, and fever.

**Synonyms:**

### **Pelvic Inlet**

The superior opening of the true pelvis, bounded by the sacral promontory posteriorly, the arcuate lines of the ilia laterally, and the symphysis pubis anteriorly. Its anteroposterior diameter (true conjugate) normally measures at least 11 cm. The transverse diameter is typically 13 cm.

**Synonyms:**

### **Pelvic Organ Prolapse**

POP: descent of the pelvic organs through the vagina due to pelvic floor weakness. Types: cystocele (anterior—bladder), rectocele (posterior—rectum), uterine prolapse (apical), enterocele, and vault prolapse (post-hysterectomy).

**Synonyms:**

### **Pelvic Outlet**

The inferior opening of the true pelvis, bounded by the pubic symphysis, ischial tuberosities, sacrotuberous ligaments, and coccyx. Normal anteroposterior diameter is 11-13 cm (from the lower border of the pubic symphysis to the tip of the coccyx), and the transverse diameter (between the ischial tuberosities) is approximately 10-11 cm.

**Synonyms:**

### **Pelvic Pain**

Pain localized to the lower abdomen, pelvis, or perineum, lasting <3 months (acute) or >3–6 months

(chronic), and can arise from gynecologic, urologic, gastrointestinal, musculoskeletal, or psychologic causes.

**Synonyms:**

### **Pelvic spleen**

An ectopic or wandering spleen that has descended into the pelvic cavity, resulting from laxity or absence of the normal ligamentous attachments that fix the spleen in the left upper quadrant. It may present as a palpable pelvic mass, with risk of torsion, infarction, or rupture. Diagnosis is by CT or ultrasound.

**Synonyms:**

### **Pelvis**

Bony ring from 2 hip bones, sacrum, and coccyx. Each hip bone fuses from ilium, ischium, and pubis meeting at the acetabulum. Divided into false (greater, above brim) and true (lesser, below brim) pelvis. Males: narrower, deeper, heart-shaped inlet. Females: wider, shallower, oval inlet for childbirth.

**Synonyms:**

### **Pemberton Sign**

Facial flushing, cyanosis, or breathing difficulty induced by raising both arms, suggesting obstruction at the thoracic inlet, often from a large retrosternal goiter.

**Synonyms:**

### **Pemberton's sign**

A clinical sign elicited by asking the patient to raise both arms above the head for one minute, causing facial plethora, cyanosis, and distended neck veins in patients with a substernal goiter or mediastinal mass compressing the thoracic inlet.

**Synonyms:**

### **Pemphigoid**

Bullous pemphigoid is an autoimmune subepidermal blistering disease caused by antibodies against hemidesmosomal proteins, especially BP180 and BP230. It usually causes intensely pruritic tense blisters on urticarial or erythematous skin, with less

---

mucosal involvement than pemphigus.

**Synonyms:**

### **Pemphigoid gestationis**

An autoimmune blistering disease of pregnancy characterised by intensely pruritic urticarial plaques and tense vesicles or bullae, typically arising in the second or third trimester around the umbilicus and spreading to the trunk and extremities.

**Synonyms:**

### **Pemphigus**

A group of autoimmune blistering diseases with intraepidermal blisters due to antibodies against desmogleins (cell adhesion molecules): pemphigus vulgaris (PV—flaccid blisters, mucosal involvement, positive Nikolsky sign), pemphigus foliaceus (superficial, no mucosal), paraneoplastic pemphigus.

**Synonyms:**

### **Pemphigus Vulgaris**

An autoimmune intraepidermal blistering disease caused by IgG antibodies against desmoglein 1 and 3. It presents with flaccid blisters that rupture easily, leaving painful erosions of skin and mucous membranes. Nikolsky sign is positive (lateral pressure causes epidermal sloughing).

**Synonyms:**

### **Penetrance**

Proportion of individuals with a particular genotype who express the expected phenotype. Complete penetrance: all with genotype show phenotype. Incomplete penetrance: some with genotype do not show phenotype.

**Synonyms:**

### **Penetrating Abdominal Trauma**

Injury to the abdomen caused by a projectile, sharp object, or other penetrating force. It may damage abdominal organs or blood vessels and requires urgent assessment for internal bleeding or organ injury; management depends on the mechanism, examination, stability, and imaging findings.

**Synonyms:**

### **Congenital Penile Curvature**

Curvature of the penis present from birth, usually caused by unequal development of the erectile tissues. Mild curvature may need no treatment; significant curvature causing functional difficulty may require specialist assessment.

**Synonyms:**

### **Penile Adhesions**

Abnormal attachment of penile skin to the glans, often after circumcision or during childhood. They may cause irritation or conceal part of the glans and are assessed and treated according to severity.

**Synonyms:**

### **Penile Discharge**

Fluid leaving the urethral opening that is not normal urine or semen. It may result from urethritis, including sexually transmitted infection, and requires clinical assessment and appropriate testing.

**Synonyms:**

### **Penile Edema**

Swelling of the penis caused by inflammation, infection, trauma, allergic reaction, impaired lymphatic drainage, or a constricting ring or retracted foreskin. Sudden painful swelling with an irreducible foreskin is an emergency.

**Synonyms:**

### **Penile Cancer**

Rare malignancy, mostly squamous cell carcinoma. Risk factors: HPV, phimosis, poor hygiene, smoking. Presentation: penile lesion, ulcer, mass. Treatment: surgery (partial/total penectomy), radiation, chemotherapy.

**Synonyms:**

### **Penile Fracture**

Rupture of tunica albuginea during erection. "Pop" sound, immediate detumescence, swelling, ecchymosis. Surgical emergency.

**Synonyms:**

---

## Penile Implant

A surgically implanted device used to produce penile rigidity in selected people with erectile dysfunction that has not responded to other treatments.

**Synonyms:**

## Penile Prosthesis

Inflatable or malleative device for erectile dysfunction. Types: two-piece, three-piece (reservoir, pump, cylinders). Surgical implantation. Complications: infection, erosion, mechanical failure, dissatisfaction.

**Synonyms:**

## Penile Torsion

Rotation of the penis around its longitudinal axis, usually a congenital condition in which the glans or urethral opening is rotated. Symptomatic or marked torsion may require urologic evaluation and surgical correction.

**Synonyms:**

## Penile Hygiene

Routine cleaning and drying of the penis and foreskin, with gentle retraction only when it moves freely and replacement afterward. Good hygiene helps reduce irritation and infection without harsh soaps or forceful retraction.

**Synonyms:**

## Penis

The male external genital organ, composed of three erectile columns: two dorsal corpora cavernosa and one ventral corpus spongiosum (containing the urethra, expanding into the glans). Root is attached to the pubic arch (crura and bulb).

**Synonyms:**

## Pentad of TTP

Classic clinical pentad of Thrombotic Thrombocytopenic Purpura: (1) Thrombocytopenia, (2) Microangiopathic Hemolytic Anemia (schistocytes), (3) Neurological symptoms, (4) Renal insufficiency, and (5) Fever. See Thrombotic Thrombocytopenic Purpura (TTP).

**Synonyms:**

## Pentavalent Vaccine

A WHO-prequalified five-in-one combination vaccine containing Diphtheria toxoid, Tetanus toxoid, whole-cell Pertussis antigen, Hepatitis B (HBsAg), and Haemophilus influenzae type b (Hib) conjugate, administered as a single intramuscular injection.

**Synonyms:**

## Pentose Phosphate Pathway

A cytoplasmic glucose oxidation pathway running parallel to glycolysis, primarily in the liver, adipose tissue, adrenal cortex, and red blood cells. It has two phases: the oxidative phase (producing NADPH and ribose-5-phosphate) and the non-oxidative phase (interconverting sugar phosphates).

**Synonyms:**

## Peptic Ulcer

An open sore in the stomach or duodenal lining caused most often by Helicobacter pylori infection or nonsteroidal anti-inflammatory drug use. It may cause burning upper-abdominal pain, bleeding, perforation, or obstruction. Also called peptic ulcer disease.

**Synonyms:** peptic ulcer.

## Peptic Ulcer Bleeding

Haemorrhage caused by erosion of an artery or other blood vessel beneath a gastric or duodenal peptic ulcer. It is a common cause of upper gastrointestinal bleeding and may present with haematemesis, coffee-ground vomiting, melaena, or haemodynamic instability.

**Synonyms:**

## Peptic Ulcer Disease

Condition characterized by ulceration of the gastrointestinal mucosa extending through the muscularis mucosae into the submucosa or deeper layers, occurring most commonly in the duodenal bulb and gastric antrum.

**Synonyms:**

---

## Peptide Bond

A covalent amide bond formed between the carboxyl group of one amino acid and the amino group of another, releasing water. Peptide bonds link amino acids into polypeptide chains and have partial double-bond character that restricts rotation.

**Synonyms:**

## Percussion

Tapping body surface to assess underlying structures. Sounds: dull (solid organ, fluid), resonant (lung), tympanic (gas-filled). Used to assess organ size, presence of fluid, air.

**Synonyms:**

## Percussion Note

The sound produced by percussing the chest wall. Normal lung produces a resonant note. Dullness suggests consolidation or fluid. Hyperresonance suggests pneumothorax or emphysema. Stony dullness suggests pleural effusion. Tympany suggests large pneumothorax.

**Synonyms:**

## Percutaneous Biopsy

Removal of tissue through the skin using a needle or other instrument, often guided by ultrasound, CT, or another imaging method.

**Synonyms:**

## Percutaneous Coronary Intervention

A catheter-based procedure to open blocked coronary arteries, typically involving balloon angioplasty and stent placement. Indications include acute STEMI (primary PCI), NSTEMI (early invasive strategy), and stable CAD with significant stenosis. Drug-eluting stents have reduced restenosis rates compared to bare-metal stents.

**Synonyms:**

## Percutaneous Drainage

Placement of a needle or catheter through the skin to drain a fluid collection or obstructed body space, often with imaging guidance.

**Synonyms:**

## Percutaneous Nephrolithotomy

Minimally invasive surgical procedure for removing large, complex, or staghorn renal calculi. Access: a needle track is established under fluoroscopic or ultrasound guidance from the flank through the renal parenchyma into the target renal calyx, dilated to allow passage of a nephroscope and working sheath.

**Synonyms:**

## Percutaneous Transluminal Angioplasty

Balloon dilation of arterial stenosis. Often combined with stenting.

**Synonyms:**

## Percutaneous Umbilical Blood Sampling

An invasive procedure for fetal blood sampling from the umbilical vein under ultrasound guidance, typically performed after 18-20 weeks.

**Synonyms:**

## Perforation of a viscus

Full-thickness breach of the wall of a hollow abdominal organ, most commonly the stomach, duodenum, or colon, resulting in leakage of luminal contents into the peritoneal cavity. Causes include peptic ulcer disease, diverticulitis, appendicitis, inflammatory bowel disease, ischemia, and trauma.

**Synonyms:**

## Performance Status

A standardized measure of a patient's functional ability and activity level, commonly recorded with ECOG or Karnofsky scales. It helps estimate prognosis, determine treatment eligibility, and quantify change during cancer care.

**Synonyms:**

## Perfusion

Blood flow through tissue. Adequate perfusion essential for organ function.

**Synonyms:**

## Perfusion Imaging

Imaging tissue blood flow. CT perfusion, MR perfusion, PET perfusion. Used for stroke, tumor char-

---

acterization.

**Synonyms:**

### **Perfusion PET**

Tracers: Rb-82, N-13 ammonia, O-15 water. Measure blood flow.

**Synonyms:**

### **Periapical Abscess**

An acute or chronic localized collection of pus at the apex of a tooth's root, arising from pulpal infection and necrosis (usually due to untreated dental caries or trauma).

**Synonyms:**

### **Periapical Granuloma**

A chronic inflammatory lesion at the apex of a tooth, usually resulting from pulpal necrosis and persistent apical infection. It may be asymptomatic and is diagnosed through clinical, radiographic, and sometimes histopathologic assessment.

**Synonyms:**

### **Pericardial Cavity**

The narrow, fluid-filled space between the layers of the pericardium surrounding the heart.

**Synonyms:**

### **Pericardial Effusion**

The accumulation of excess fluid within the pericardial space. The clinical significance is determined by both the volume of fluid and the rate of accumulation; rapid accumulation of even small volumes can restrict cardiac filling, leading to cardiac tamponade. Symptoms include chest pressure, dyspnea, and orthopnea.

**Synonyms:**

### **Pericardial Effusion Etiology**

Causes include infection, malignancy, kidney failure, hypothyroidism, autoimmune disease, inflammation after myocardial injury or cardiac surgery, radiation, trauma, and some medications. The likely cause varies with geography, age, medical history, and immune status.

**Synonyms:**

### **Pericardial Knock**

A high-pitched, early diastolic sound caused by sudden cessation of ventricular filling in constrictive pericarditis. It is heard at the left sternal border and may be confused with an S3 or opening snap. The knock is typically louder with inspiration and is a characteristic finding in constrictive pericarditis.

**Synonyms:**

### **Pericardial metastases**

Cancer deposits in the pericardium, which may cause inflammation or accumulation of fluid around the heart.

**Synonyms:**

### **Pericardial Tamponade**

Fluid accumulation in pericardial space compromising cardiac filling. Beck triad: hypotension, jugular venous distension, muffled heart sounds. Electrical alternans on ECG. Diagnosis: echocardiography. Treatment: emergent pericardiocentesis, pericardial window.

**Synonyms:**

### **Pericardiocentesis**

A procedure to aspirate fluid from the pericardial space, performed emergently for cardiac tamponade or diagnostically for pericardial effusion. The subxiphoid approach is most commonly used, with the needle directed toward the left shoulder under echocardiographic guidance.

**Synonyms:**

### **Pericarditis**

Inflammation of the pericardium, the fibrous sac surrounding the heart. Acute pericarditis presents with sharp, pleuritic chest pain that improves with leaning forward, pericardial friction rub, and diffuse ST elevation on ECG.

**Synonyms:**

### **Pericardium**

The fibroserous sac surrounding the heart and prox-

---

imal great vessels. Outer fibrous pericardium (anchors to diaphragm, sternum) and inner serous pericardium (parietal layer lining the sac; visceral layer/epicardium on the heart) with the pericardial cavity (15-50 mL serous fluid) between them.

**Synonyms:**

### **Perichondritis of the Ear**

Infection or inflammation of the auricular perichondrium, often after trauma, piercing, or surgery. *Pseudomonas aeruginosa* is an important cause; delayed treatment can produce cartilage necrosis and permanent deformity.

**Synonyms:**

### **Pericoronitis**

Inflammation of the soft tissue around the crown of a partially erupted tooth, most often a mandibular third molar. Food retention and bacterial accumulation may cause pain, swelling, trismus, fever, or spread into deeper spaces.

**Synonyms:**

### **Periductal mastitis**

Inflammation around the major subareolar ducts, often associated with smoking, causing a painful periareolar mass, discharge, or recurrent breast abscess.

**Synonyms:**

### **Perilymphatic Fistula**

Abnormal communication between the inner ear fluid spaces and the middle ear or mastoid, often after trauma, barotrauma, or surgery. It may cause episodic vertigo, hearing loss, tinnitus, or pressure-induced symptoms and requires specialist evaluation.

**Synonyms:**

### **Perimenopause**

The transition time in a woman's life that begins when ovaries produce less estrogen and menstruation becomes less frequent, and ends when the ovaries no longer produce eggs and menstruation stops.

**Synonyms:**

### **Perinatal Psychiatry**

The subspecialty focused on psychiatric disorders during pregnancy and the postpartum period. Common conditions include perinatal depression, perinatal anxiety, perinatal OCD, and postpartum psychosis. Medication selection must balance maternal mental health with fetal or neonatal exposure risks.

**Synonyms:**

### **Perineal Laceration**

Tearing of the perineal tissues during vaginal delivery. The injury is graded by depth: it may involve skin, perineal muscle, the anal sphincter, or the rectal mucosa.

**Synonyms:**

### **Perineal Laceration Classification**

Obstetric perineal tears are graded by depth: first degree involves skin, second degree involves perineal muscle, third degree involves the anal sphincter complex, and fourth degree extends through the rectal mucosa. Accurate examination and repair reduce long-term pelvic-floor and continence complications.

**Synonyms:**

### **Perineal Protection**

Techniques used during the second stage to minimize perineal trauma (lacerations, episiotomy). Manual protection: the attendant's hand applies gentle pressure to the fetal head to control the speed of delivery (not too fast), supporting the perineum and flexing the fetal head.

**Synonyms:**

### **Perineal Tear**

Laceration of the perineum during vaginal delivery, classified by degree: first degree (skin only), second degree (perineal muscles), third degree (sphincter complex involvement), and fourth degree (rectal mucosa). Most deliveries involve first or second degree tears. Third and fourth degree tears risk fecal incontinence.

**Synonyms:**

---

## Perineum

The region between the external genitalia and anus, bounded by the pubic symphysis, coccyx, and ischial tuberosities. It contains structures of the urogenital and anal regions and stretches during childbirth.

**Synonyms:**

## Periodontal Abscess

A localized accumulation of pus within periodontal tissues, commonly associated with a periodontal pocket, foreign material, or impaired drainage. It may cause pain, swelling, suppuration, tooth mobility, and systemic symptoms and requires urgent dental assessment.

**Synonyms:**

## Periodontal Disease

Inflammation and destruction of the tissues supporting the teeth, usually caused by dental plaque. It can lead to gum bleeding, bone loss, loose teeth, and tooth loss.

**Synonyms:**

## Periodontal Flap Surgery

Surgical access for deep debridement. Flap reflected, calculus removed, bone contoured, flap repositioned.

**Synonyms:**

## Periodontal Ligament

Connective tissue attaching tooth to bone. Contains collagen fibers, cells, blood vessels, nerves. Provides proprioception, shock absorption. Expanded in bruxism.

**Synonyms:**

## Periodontal Pocket

A pathologically deepened gingival sulcus caused by apical migration of the junctional epithelium and loss of periodontal attachment. Pocket depth and clinical attachment level are measured with a periodontal probe and interpreted with bleeding, inflammation, and radiographic bone loss.

**Synonyms:**

## Periodontal Probing

Measurement of the depth of the gingival sulcus/pocket using a periodontal probe with millimeter markings. Normal: 1–3 mm. Periodontal pockets:  $\geq 4$  mm (indicates attachment loss and periodontitis). Full-mouth probing at 6 sites per tooth: mesio-buccal, mid-buccal, disto-buccal, mesio-lingual, mid-lingual, disto-lingual.

**Synonyms:**

## Periodontitis

Inflammatory disease destroying supporting structures of teeth (periodontal ligament, alveolar bone). Caused by dysbiotic plaque biofilm with host immune response. Clinical signs: pocket formation, attachment loss, bone loss, tooth mobility, recession. Staging and grading guide treatment.

**Synonyms:**

## Perioperative Antibiotic Prophylaxis

Administration of an appropriate antimicrobial within a defined interval before incision to reduce infection risk for selected procedures. Choice, timing, redosing, and discontinuation depend on procedure, organisms, patient factors, and local guidance.

**Synonyms:**

## Perioral Dermatitis

A papulopustular eruption around the mouth, sparing the vermilion border. It is more common in young women and associated with topical corticosteroid use. Other triggers include fluoridated toothpaste, cosmetics, and inhaler steroids.

**Synonyms:**

## Periosteum

The dense connective tissue membrane covering the outer surface of bones (except at articular surfaces, which are covered by cartilage). Two layers: outer fibrous (collagen, vessels, nerves) and inner cambium (osteoprogenitor cells, osteoblasts).

**Synonyms:**

## Peripancreatic malignancy

Neoplastic process involving tissues surrounding the

---

pancreas, including primary pancreatic adenocarcinoma with peripancreatic extension and metastatic disease from adjacent or distant organs. Often presents at an advanced stage with abdominal pain, weight loss, obstructive jaundice, and new-onset diabetes.

**Synonyms:**

### Peripartum Cardiomyopathy

A form of dilated cardiomyopathy occurring in the last month of pregnancy or within 5 months postpartum, with no other identifiable cause. Risk factors include advanced maternal age, multiple gestations, preeclampsia, and African American race. Presents with heart failure symptoms.

**Synonyms:**

### Peripartum Cardiomyopathy Prognosis

Recovery of ventricular function varies widely. Prognosis is influenced by the initial ejection fraction, ventricular size, symptoms, treatment, complications, and follow-up; persistent dysfunction requires ongoing cardiac care.

**Synonyms:**

### Peripheral

Located away from the center or toward the outer edges of the body or an organ.

**Synonyms:**

### Peripheral Arterial Disease

Atherosclerotic narrowing of arteries supplying limbs. Symptoms: intermittent claudication (pain with walking, relieved by rest), critical limb ischemia (rest pain, ulcers, gangrene). Diagnosis: ABI <0.9, Doppler, angiography. Treatment: risk factor modification, exercise, cilostazol, revascularization for severe disease.

**Synonyms:**

### Peripheral Artery Disease

Narrowing of arteries supplying the limbs, usually caused by atherosclerosis. It may cause exertional leg pain relieved by rest, reduced pulses, nonhealing wounds, or critical limb ischemia. Also called

peripheral arterial disease.

**Synonyms:** peripheral arterial disease.

### Peripheral Blood Smear

Microscopic examination of a stained blood smear (Wright-Giemsa stain).

**Synonyms:**

### Peripheral Edema

Swelling due to accumulation of fluid in the interstitial space of the limbs, most commonly the lower extremities.

**Synonyms:**

### Peripheral Nerve Blocks

Peripheral nerve blocks provide targeted anesthesia and analgesia for specific surgical sites. Ultrasound-guided blocks improve success rates and reduce complications.

**Synonyms:**

### Peripheral Nerve Injuries

Damage to nerves outside the brain and spinal cord caused by trauma, compression, stretching, disease, or toxins. It may cause pain, numbness, weakness, or loss of function; recovery depends on the severity and location of the injury.

**Synonyms:**

### Peripheral Nervous System

The portion of the nervous system consisting of nerves and ganglia outside the brain and spinal cord. The PNS connects the central nervous system (CNS) to peripheral tissues and organs. Components: (1) Cranial nerves (12 pairs)—emerging from the brain/brainstem, innervating head, neck, and viscera.

**Synonyms:**

### Peripheral Neuropathy

A disorder of peripheral nerves causing sensory, motor, and/or autonomic symptoms in a distal, symmetric 'stocking-glove' pattern.

**Synonyms:**

---

### **Periprosthetic Joint Infection**

Infection involving a joint prosthesis and adjacent tissues. Diagnosis integrates clinical findings, inflammatory markers, joint-fluid analysis and culture, and imaging; treatment may require debridement, implant retention, staged exchange, or resection arthroplasty.

**Synonyms:**

### **Perirenal extramedullary hematopoiesis**

Formation of blood cells in the tissue surrounding the kidney, occurring as a compensatory response to chronic severe anemia such as myelofibrosis or thalassemia major.

**Synonyms:**

### **Peristalsis**

Rhythmic sequential contractions of longitudinal and circular smooth muscle that propel gastrointestinal contents in an aboral (oral to anal) direction.

**Synonyms:**

### **Peritoneal Carcinomatosis**

Diffuse metastatic seeding of the peritoneal cavity from gastrointestinal or ovarian malignancies. Presents with ascites, bowel obstruction, and cachexia. Diagnosed by CT and paracentesis showing malignant cells. Prognosis is generally poor.

**Synonyms:**

### **Peritoneal Dialysis**

Dialysis using peritoneum as semipermeable membrane. CAPD with four manual exchanges daily or APD using cyclor overnight. Advantages include home-based therapy and hemodynamic stability. Complications include peritonitis and catheter infection. Tenckhoff catheter is standard access.

**Synonyms:**

### **Peritoneal Dialysis Catheter**

Flexible tube surgically placed into the peritoneal cavity for peritoneal dialysis. The Tenckhoff catheter is the most commonly used type with one or two cuffs that promote tissue ingrowth and anchor

the catheter. Placement can be done surgically, laparoscopically, or percutaneously under radiological guidance.

**Synonyms:**

### **Peritoneal Infection**

Infection of the lining of the abdominal cavity, often called peritonitis. Causes include a ruptured appendix or bowel, abdominal surgery, pelvic infection, or contamination during dialysis. Severe abdominal pain, fever, vomiting, or a rigid abdomen requires urgent assessment.

**Synonyms:**

### **Peritoneum**

The serous membrane lining the abdominal cavity and covering the abdominal organs. Parietal peritoneum lines the abdominal wall (innervated by somatic nerves—pain is well-localized); visceral peritoneum covers organs (innervated by visceral afferents—pain is dull, poorly localized).

**Synonyms:**

### **Peritonitis**

Inflammation or infection of the peritoneum, commonly caused by a perforated abdominal organ, appendicitis, abdominal trauma, or infection of ascitic fluid. Severe abdominal pain, guarding, fever, vomiting, or shock requires urgent medical evaluation.

**Synonyms:**

### **Peritonitis in PD**

Infection or inflammation of the peritoneum in a person receiving peritoneal dialysis. Cloudy effluent, abdominal pain, or fever requires prompt evaluation of the effluent and other causes. Treatment usually includes antibiotics selected for the suspected organisms; recurrent or refractory infection may require catheter removal.

**Synonyms:**

### **Peritonsillar Abscess**

A collection of pus beside the tonsil, usually developing as a complication of tonsillar infection. See

---

Quinsy.

**Synonyms:**

### **Periungual fibroma**

Benign, flesh-colored or pink fibrous tumors arising from the nail fold or nail bed, presenting as firm, exophytic nodules that may distort the nail plate. They occur sporadically or in association with tuberous sclerosis complex. When multiple periungual fibromas are present, they raise suspicion for tuberous sclerosis.

**Synonyms:**

### **Periventricular Leukomalacia**

Ischemic white matter injury in the premature infant brain, a major cause of cerebral palsy. Risk factors include prematurity, hypotension, and inflammation. Diagnosis by cranial ultrasound showing periventricular echodensities or cystic changes. Prevention: avoiding hypotension, maintaining normothermia, and managing infection.

**Synonyms:**

### **Permissive Hypercapnia**

A ventilator strategy that allows PaCO<sub>2</sub> to rise above normal (and pH to fall) in exchange for lung-protective ventilation with lower tidal volumes and airway pressures. It is used in severe ARDS when achieving normal PaCO<sub>2</sub> would require harmful ventilation parameters.

**Synonyms:**

### **Pernicious Anemia**

A type of vitamin B12 deficiency anemia caused by autoimmune destruction of gastric parietal cells, leading to lack of intrinsic factor and impaired B12 absorption in the terminal ileum.

**Synonyms:**

### **Peroxisome**

Single-membrane organelles containing oxidative enzymes (catalase, urate oxidase, D-amino acid oxidase) that produce and degrade hydrogen peroxide (H<sub>2</sub>O<sub>2</sub>).

**Synonyms:**

### **Persistent Asthma**

Asthma requiring daily controller therapy. Mild persistent: symptoms > 2 days/week but not daily. Moderate persistent: daily symptoms, nighttime awakenings > 1/week. Severe persistent: symptoms throughout the day, frequent nighttime awakenings, SABA use several times/day, extremely limited activity.

**Synonyms:**

### **Persistent Depressive Disorder**

formerly called dysthymia, a chronic depressive mood lasting at least two years in adults (one year in children and adolescents).

**Synonyms:**

### **Persistent Organic Pollutant**

POCPs: organochlorines, PCBs, dioxins. Bioaccumulate, long-range transport, persistent. Stockholm Convention bans/restricts.

**Synonyms:**

### **Persistent Pulmonary Hypertension of the Newborn**

Failure of the normal fall in pulmonary vascular resistance after birth, causing right-to-left shunting and hypoxaemia. Management requires urgent neonatal respiratory and circulatory support.

**Synonyms:**

### **Persistent pupillary membranes**

Remnants of the fetal tunica vasculosa lentis that fail to regress after birth, appearing as fine pigmented strands bridging across the pupil or attaching from the iris collarette to the lens capsule. They are usually benign and asymptomatic but may rarely obstruct the visual axis requiring surgical or laser treatment.

**Synonyms:**

### **Personal Protective Equipment**

PPE: gloves, gowns, masks, eye protection. Used based on transmission-based precautions.

**Synonyms:**

---

## Personality Disorder

A group of mental disorders characterized by enduring maladaptive patterns of thinking, feeling, and behaving that deviate from cultural expectations and cause functional impairment. Cluster A (odd/eccentric): paranoid, schizoid, schizotypal. Cluster B (dramatic/erratic): antisocial, borderline, histrionic, narcissistic.

**Synonyms:**

## Personalized Medicine

An approach that uses a person's biological, clinical, and sometimes genetic information to guide prevention, diagnosis, or treatment.

**Synonyms:**

## Pertussis

A contagious respiratory infection caused by *Bordetella pertussis* and characterized by severe coughing spells. See Whooping Cough.

**Synonyms:**

## Pessaries

Devices inserted into the vagina to support pelvic organs in cases of pelvic organ prolapse (cystocele, rectocele, uterine prolapse). Types: ring pessary (most common, with or without supportive membrane), shelf pessary (for severe prolapse), cube pessary (suction-based), and Gellhorn pessary (for advanced prolapse).

**Synonyms:**

## Pessary

A removable device placed in the vagina to provide structural support for pelvic organ prolapse (uterine prolapse, cystocele, rectocele) or stress urinary incontinence.

**Synonyms:**

## PET Scan

An imaging study that detects the distribution of a radioactive tracer to assess tissue metabolism or function.

**Synonyms:**

## PET Scan (Positron Emission Tomography)

Nuclear medicine imaging using radioactive tracers (most commonly FDG, a glucose analog) to detect metabolically active tissues.

**Synonyms:** Positron Emission Tomography

## PET Scanner

Ring of detectors capturing coincidence events. BGO, LSO, or LYSO crystals. Time-of-flight PET improves signal-to-noise.

**Synonyms:**

## PET Tracers

18F-FDG: glucose metabolism (cancer, infection, inflammation). 18F-fluoride: bone turnover. 11C-metionine: protein synthesis. 68Ga-DOTATATE: somatostatin receptors. 68Ga-PSMA: prostate cancer.

**Synonyms:**

## PET/CT

Combined PET and CT imaging. CT provides anatomical localization and attenuation correction. Essential for accurate interpretation. Low-dose CT for attenuation correction; diagnostic CT for detailed anatomy.

**Synonyms:**

## PET/MRI

Combined PET and MRI. Superior soft tissue contrast, no ionizing radiation from CT. Useful for neurology, oncology, cardiology. Longer scan time, higher cost.

**Synonyms:**

## Petechiae

Small, pinpoint, non-blanching red or purple spots on the skin or mucous membranes caused by extravasation of red blood cells from capillaries into the surrounding tissue. They are typically less than 2 millimeters in diameter and result from decreased platelet count, platelet dysfunction, or increased vascular fragility.

**Synonyms:**

---

### Petit Mal

An older term for an absence seizure, a brief episode of impaired awareness with little or no movement.

**Synonyms:**

### Peutz-Jeghers Syndrome

An autosomal dominant neurocutaneous disorder caused by germline loss-of-function mutations in the STK11 (LKB1) tumor suppressor gene on chromosome 19p13.

**Synonyms:**

### Peutz-Jeghers's syndrome

An autosomal dominant condition caused by STK11 gene mutations, characterized by hamartomatous polyps throughout the gastrointestinal tract and mucocutaneous hyperpigmented macules on the lips, buccal mucosa, and digits. The polyps may cause gastrointestinal bleeding, intussusception, and obstruction.

**Synonyms:**

### Peyronie Disease

Fibrous plaque in penis causing curvature, pain, erectile dysfunction. Treatment: observation, medications, injection therapy, surgery.

**Synonyms:**

### Pfeiffer Syndrome

An autosomal dominant craniosynostosis syndrome caused by FGFR1 or FGFR2 mutations. Features: craniosynostosis (bilateral coronal), midface hypoplasia, proptosis, hypertelorism, broad thumbs and great toes (medial deviation), and variable syndactyly.

**Synonyms:**

### pH

Measure of hydrogen ion concentration:  $\text{pH} = -\log[\text{H}^+]$ . Normal blood pH: 7.35-7.45. Acidemia:  $\text{pH} < 7.35$ . Alkalemia:  $\text{pH} > 7.45$ . Buffers minimize pH changes.

**Synonyms:**

### pH Monitoring

Measurement of esophageal pH. Evaluates gastroesophageal reflux disease.

**Synonyms:**

### Phacoemulsification

A cataract-surgery technique that uses ultrasound to break up and remove the cloudy lens through a small incision. An intraocular lens is usually implanted to restore focusing ability.

**Synonyms:**

### Phagocytosis

The process by which specialized cells (phagocytes) engulf and destroy foreign particles, microorganisms, and cellular debris.

**Synonyms:**

### Phalanges

14 finger bones. Thumb: 2 (proximal, distal). Each other finger: 3 (proximal, middle, distal). MCP joints are condyloid allowing flexion, extension, abduction, adduction, circumduction. IP joints are hinge joints allowing only flexion/extension. Mallet finger and jersey finger are common tendon avulsion injuries.

**Synonyms:**

### Phalen Test

Wrist flexion test for carpal tunnel syndrome. Symptoms reproduced within 60 seconds.

**Synonyms:**

### Phantom

Device simulating human anatomy for quality control and calibration. Types: line source, uniform, Jaszczak, NEMA IU body phantom.

**Synonyms:**

### Phantom Limb Pain

Painful sensations perceived in a limb that has been amputated, caused by persistent or reorganized activity in peripheral nerves and central sensory pathways. It may feel burning, shooting, cramping, or electric.

---

**Synonyms:**

### **Phantosmia**

Perception of a smell when no corresponding odor is present. It may occur with sinonasal disease, migraine, seizures involving olfactory networks, head injury, neurodegenerative disease, infection, or other neurological conditions.

**Synonyms:**

### **Pharmaceutical**

A medicine or medicinal preparation produced for prevention, diagnosis, or treatment of disease.

**Synonyms:**

### **Pharmacodynamic Interaction**

A drug interaction in which one drug changes the effect of another at its site of action without necessarily changing its concentration. Effects may be additive, synergistic, or antagonistic, such as combined respiratory depression or bleeding risk.

**Synonyms:**

### **Pharmacodynamics**

The study of the biochemical and physiological effects of drugs on the body and their mechanisms of action, describing what the drug does to the body.

**Synonyms:**

### **Pharmacogenetics**

Study of genetic variation affecting drug response. Examples: TPMT (mercaptopurine toxicity), CYP2C9/VKORC1 (warfarin dosing), HLA-B\*1502 (carbamazepine SJS in Asians), HLA-B\*5701 (abacavir hypersensitivity), UGT1A1 (irinotecan toxicity).

**Synonyms:**

### **Pharmacogenomics**

The study of how genetic variations influence individual responses to drugs, including drug efficacy, toxicity, and metabolism. Genetic polymorphisms in drug-metabolizing enzymes, transporters, and receptors can lead to significant inter-individual variability in drug response.

**Synonyms:**

### **Pharmacokinetic Interaction**

A drug interaction that changes absorption, distribution, metabolism, or excretion of another drug, thereby altering its concentration over time. Enzyme inhibition, enzyme induction, transporter effects, and altered gastric pH are common mechanisms.

**Synonyms:**

### **Pharmacokinetics**

The study of what the body does to a medicine, including its absorption, distribution, metabolism, and elimination. It helps explain drug concentrations over time and supports dose selection.

**Synonyms:**

### **Pharmacological Stress Test**

Stress testing using medications (dobutamine, adenosine, regadenoson). For patients unable to exercise.

**Synonyms:**

### **Pharmacology**

The scientific study of drugs and their actions, properties, sources, and effects on living systems.

**Synonyms:**

### **Pharmacovigilance**

The science and activities relating to the detection, assessment, understanding, and prevention of adverse drug reactions and other drug-related problems.

**Synonyms:**

### **Pharyngeal Tonsil**

The adenoid tissue located in the roof of the nasopharynx, behind the nose.

**Synonyms:**

### **Pharyngitis**

Inflammation of the throat that commonly causes soreness or pain with swallowing. It is usually viral but may be caused by bacteria or other conditions;

---

fever, cough, rash, and examination findings help guide evaluation.

**Synonyms:**

### **Pharynx**

A muscular tube extending from the base of the skull (clivus) to the level of the cricoid cartilage (C6), where it continues as the esophagus.

**Synonyms:**

### **Phase I Metabolism**

Phase I metabolism involves chemical modification of drug molecules through oxidation, reduction, and hydrolysis reactions, primarily catalyzed by the cytochrome P450 enzyme system in the liver.

**Synonyms:**

### **Phase II Metabolism**

Phase II metabolism, also known as conjugation reactions, involves the attachment of endogenous hydrophilic molecules to drugs or their Phase I metabolites, dramatically increasing water solubility and facilitating renal excretion.

**Synonyms:** conjugation reactions, involves the attachment of.

### **Phencyclidine**

A dissociative drug that can cause altered perception, agitation, hallucinations, impaired coordination, or dangerous behavior.

**Synonyms:**

### **Phenotype**

Observable characteristics of an individual, resulting from genotype and environmental interactions. Includes morphology, development, biochemical properties, behavior.

**Synonyms:**

### **Phenylketonuria**

An inherited disorder, usually due to phenylalanine hydroxylase deficiency, causing accumulation of phenylalanine and reduced tyrosine availability. Untreated disease can cause intellectual disability, seizures, eczema, and a musty odor; newborn screen-

ing and dietary treatment are effective.

**Synonyms:**

### **Pheochromocytoma**

Catecholamine-secreting tumor arising from chromaffin cells of the adrenal medulla or extra-adrenal paraganglia. Approximately ten percent are bilateral, ten percent are extra-adrenal, and ten percent are malignant. Classic presentation includes episodic headache, sweating, and palpitations with sustained or paroxysmal hypertension.

**Synonyms:**

### **Phimosis**

Inability to retract the foreskin (prepuce) proximally over the glans penis. Physiologic phimosis is normal in infants and uncircumcised young boys due to natural adhesions between glans and prepuce, resolving spontaneously in over 90% by age 3-5 years.

**Synonyms:**

### **Phlebitis**

Inflammation of a vein, often affecting the lower extremities. Superficial thrombophlebitis: inflammation and thrombosis of a superficial vein (great saphenous vein most common), presenting with erythema, tenderness, warmth, and a palpable cord along the vein.

**Synonyms:**

### **Phlebography**

Venography using contrast dye. Used for diagnosing venous thrombosis, malformations. Largely replaced by duplex ultrasound.

**Synonyms:**

### **Phlegmasia cerulea dolens**

Massive deep vein thrombosis causing severe venous outflow obstruction, cyanosis, marked edema, and compromised arterial perfusion. A limb-threatening emergency with risk of venous gangrene and pulmonary embolism. Requires urgent anticoagulation and consideration of thrombolysis or surgical thrombectomy.

**Synonyms:**

---

## Phobias

Persistent, excessive fear of a specific object or situation that leads to avoidance or significant distress.

**Synonyms:**

## Phocomelia

A severe congenital limb deficiency where the proximal portion of a limb (humerus/femur, radius/tibia) is absent or severely hypoplastic, and the hand or foot attaches directly to the trunk. Most famously associated with thalidomide exposure during the first trimester of pregnancy (days 20-36 after conception).

**Synonyms:**

## Phosphate

An inorganic ion and component of nucleotides, phospholipids, proteins, and bone mineral. It participates in ATP energy transfer, phosphorylation-dependent signaling, intracellular buffering, and acid excretion by the kidney.

**Synonyms:**

## Phosphate Binders

Calcium acetate, sevelamer, lanthanum. Bind dietary phosphate in GI tract. Target normal serum phosphorus in CKD-MBD. Avoid calcium-based binders in patients with vascular calcification.

**Synonyms:**

## Phosphate Homeostasis

Serum phosphate is regulated by the interplay of PTH vitamin D and fibroblast growth factor 23. PTH promotes renal phosphate excretion. Active vitamin D stimulates intestinal phosphate absorption. FGF23 produced by osteocytes inhibits renal phosphate reabsorption and suppresses 1-alpha-hydroxylase reducing active vitamin D production.

**Synonyms:**

## Phosphodiesterase Inhibitor

A class of drugs that inhibit phosphodiesterase enzymes, which break down cyclic nucleotides (cAMP and cGMP), thereby increasing intracellular levels of these second messengers and potentiating their

downstream effects.

**Synonyms:**

## Phosphodiesterase-5 Inhibitors

Medications that inhibit PDE-5, increasing cGMP and causing smooth muscle relaxation and vasodilation. Sildenafil and tadalafil are used for PAH and erectile dysfunction. In PAH, they reduce pulmonary vascular resistance and improve exercise capacity.

**Synonyms:**

## Phosphofructokinase-1

Rate-limiting enzyme of glycolysis. Activated by AMP, fructose-2,6-bisphosphate. Inhibited by ATP, citrate.

**Synonyms:**

## Phospholipase C Pathway

A GPCR signaling pathway activated primarily by Gq-protein coupled receptors (e.g., alpha-1 adrenergic, muscarinic M1/M3, vasopressin V1, angiotensin II AT1 receptors).

**Synonyms:**

## Phospholipid

Lipid containing phosphate group, major component of cell membranes. Structure: glycerol backbone, two fatty acid tails (hydrophobic), phosphate group with polar head group (hydrophilic). Forms bilayers spontaneously in aqueous environment.

**Synonyms:**

## Phosphorus

An essential mineral present in ATP, nucleic acids, phospholipids, and bone. Its concentration is regulated chiefly by the kidneys, parathyroid hormone, fibroblast growth factor 23, and vitamin D; kidney failure may cause hyperphosphatemia.

**Synonyms:**

## Photoallergy

An immune-mediated skin reaction that occurs when ultraviolet light activates a sensitizing substance on or in the skin, causing an eczematous

---

rash.

**Synonyms:**

### **Photocoagulation**

Coagulation of tissue by intense light, often laser light, to treat lesions such as abnormal retinal vessels.

**Synonyms:**

### **Photodynamic Therapy**

A treatment that combines a photosensitizing agent with light to generate reactive oxygen species and destroy cancer cells, used for actinic keratosis, superficial skin cancers, and selected visceral tumors.

**Synonyms:**

### **Photoelectric Effect**

Photon absorption by inner shell electron. Major interaction at low energies, high Z materials.

**Synonyms:**

### **Photomultiplier Tube**

Converts light photons to electrical signals. Array of PMTs positioned behind crystal. Positioning circuit determines interaction location.

**Synonyms:**

### **Photopeak**

Full-energy peak in gamma spectrum. Used for energy window setting.

**Synonyms:**

### **Photopheresis**

Extracorporeal treatment in which white blood cells are exposed to a photosensitizer and ultraviolet A light before being returned to the patient.

**Synonyms:**

### **Photophobia**

Abnormal sensitivity or intolerance to light, causing discomfort or the need to avoid bright environments. It may occur with migraine, corneal disease, uveitis, meningitis, retinal disease, medication effects, or neurologic disorders.

**Synonyms:**

### **Photosensitivity**

An abnormal skin reaction to sunlight (UVA/UVB), manifesting as rash, erythema, or burning on sun-exposed areas.

**Synonyms:**

### **Phototherapy**

Therapeutic exposure to a controlled wavelength and dose of ultraviolet or visible light. Common modalities include narrowband UVB, broadband UVB, and PUVA; treatment requires assessment of photosensitizing drugs, cumulative exposure, eye protection, and long-term skin risk.

**Synonyms:**

### **Phototoxic dermatitis**

An acute, dose-dependent inflammatory skin reaction occurring when certain ingested or topically applied chemicals (such as psoralens, tetracyclines, NSAIDs, or thiazides) absorb ultraviolet radiation, leading to direct cellular damage and a sunburn-like eruption in exposed areas.

**Synonyms:**

### **Phototoxicity**

Skin reaction from UV light + chemical. Sunburn-like. Examples: tetracyclines, thiazides, NSAIDs, psoralens.

**Synonyms:**

### **Phrenic Nerve**

Primarily from C4 (with C3 and C5: "C3, 4, 5 keeps the diaphragm alive"), traveling between anterior and middle scalene muscles, descending anterior to the anterior scalene across the first rib. Right phrenic passes anterior to the lung root; left passes anterior and lateral.

**Synonyms:**

### **Phyllodes Tumor**

A breast tumor composed of both stromal and epithelial elements, ranging from benign through borderline to malignant. Typically a large, rapidly

---

growing mass; treatment is surgical excision with clear margins.

**Synonyms:**

### Physiatrist

Physician specialty focusing on function, quality of life for patients with impairment, disability. See rehabilitation medicine.

**Synonyms:**

### Physical Half-Life

The time required for half of the radioactive nuclei in a sample to undergo nuclear decay. It is distinct from biologic half-life, which describes biological elimination, and effective half-life, which combines both processes.

**Synonyms:**

### Physical Therapy Assessment

Comprehensive evaluation: history, observation, ROM, strength, sensation, coordination, balance, gait, functional tasks.

**Synonyms:**

### Physiologic Jaundice of Newborn

A common, benign condition characterized by unconjugated hyperbilirubinemia appearing after 24 hours of age (peak at 3-5 days) in healthy term newborns. Caused by increased bilirubin production (high RBC turnover, short RBC lifespan) and immature hepatic conjugation (low UDP-glucuronyl transferase activity).

**Synonyms:**

### Physiological Dead Space

Volume of ventilated respiratory tract that does not participate in gas exchange, including anatomic and alveolar dead space.

**Synonyms:**

### Physiology

Study of body function. Systems physiology: cardiovascular, respiratory, renal, gastrointestinal, endocrine, nervous, muscular, reproductive.

**Synonyms:**

### Phytomenadione

Vitamin K is a fat-soluble vitamin essential for the post-translational gamma-carboxylation of glutamate residues to gamma-carboxyglutamate (Gla) in specific clotting factors (II, VII, IX, X, protein C, protein S) and anticoagulant proteins (protein C, protein S, protein Z). See Vitamin K: Phylloquinone.

**Synonyms:**

### PI-RADS

Prostate Imaging-Reporting and Data System. Standardizes multiparametric MRI reporting for prostate cancer detection and staging.

**Synonyms:**

### Pia Mater

The innermost meningeal layer, a delicate vascularized membrane firmly adherent to the surface of the brain and spinal cord, following all gyri and sulci. It carries blood vessels that penetrate the CNS and forms the tela choroidea, contributing to the choroid plexus (CSF production).

**Synonyms:**

### Pica

Compulsive eating of non-nutritive substances (ice, dirt, clay). Associated with iron deficiency, pregnancy, developmental disorders.

**Synonyms:**

### Peripherally Inserted Central Catheter

A long, flexible catheter inserted into the basilic or cephalic vein and advanced so the tip sits in the superior vena cava. Inserted at the bedside, often by a specialized PICC nurse, with ultrasound and ECG or X-ray confirmation. Indications: long-term IV antibiotics (>2 weeks), TPN, chemotherapy, and frequent blood draws.

**Synonyms:**

### Pierre Robin Sequence

A congenital anomaly triad: micrognathia (small mandible), glossoptosis (posteriorly displaced tongue causing airway obstruction), and U-shaped

---

cleft palate. The sequence arises from early mandibular hypoplasia, which prevents the tongue from descending, thereby impairing palatal shelf fusion.

**Synonyms:**

### Pierson Syndrome

A rare autosomal-recessive disorder caused by LAMB2 variants, classically combining congenital nephrotic syndrome with microcoria and structural abnormalities of the eyes. Kidney failure, developmental impairment, and severe visual disability may occur.

**Synonyms:**

### Pigment Cirrhosis

Liver cirrhosis associated with abnormal pigment or iron deposition, as may occur in hereditary hemochromatosis.

**Synonyms:**

### Pigmentary mosaicism

A pattern of alternating hyperpigmented and hypopigmented skin patches arranged in a linear, segmental, or blaschkoid distribution, caused by genetic mosaicism from post-zygotic mutations affecting melanocyte development. It is a cosmetic condition without systemic involvement.

**Synonyms:**

### Pilar Cyst

A benign cyst arising from the outer root sheath of hair follicles, most commonly on the scalp. It presents as a firm, mobile, subcutaneous nodule without a central punctum. Unlike epidermoid cysts, pilar cysts have smooth walls and contain dense keratin. They may be multiple in familial cases. Treatment is simple excision.

**Synonyms:**

### Piles (Hemorrhoids)

Swollen, inflamed vascular cushions in the anal canal that normally aid continence. Internal hemorrhoids (above the dentate line, painless) present with painless bright red rectal bleeding and prolapse; graded

I-IV by degree of prolapse.

**Synonyms:** Hemorrhoids

### Pilonidal Disease

A chronic inflammatory condition of the sacrococcygeal region involving hair follicles. Pilonidal sinus: epithelialized tract containing hair and debris. Pilonidal abscess: acute infection of the sinus. Most common in young, hirsute males, exacerbated by prolonged sitting, obesity, and local trauma.

**Synonyms:**

### Pilonidal Sinus Disease

A chronic sinus or cyst in the natal cleft, usually containing hair and debris. It may cause recurrent pain, swelling, drainage, or abscess formation.

**Synonyms:**

### Pineal Gland Tumor

A tumor of the pineal region, including germinoma, pineocytoma, and pineoblastoma. Presents with Parinaud syndrome, hydrocephalus, and raised intracranial pressure; germinomas are highly radiosensitive.

**Synonyms:**

### Pinguecula

A yellowish-white, slightly elevated benign degenerative lesion of the bulbar conjunctiva near the limbus, from elastotic degeneration of the substantia propria. Chronic ultraviolet exposure, dust, wind, and dryness are the principal risk factors.

**Synonyms:**

### Pink Eye

Inflammation of the conjunctiva producing a pink or red appearance of the eye, most often indicating conjunctivitis. Causes are infectious (viral, bacterial, chlamydial) or noninfectious (allergic, irritant), with viral the most common overall.

**Synonyms:**

### Pink Puffer

A clinical phenotype of emphysema in COPD. Patients present with severe dyspnea, minimal cough,

---

thin habitus, pursed-lip breathing, accessory muscle use, and relatively normal PaO<sub>2</sub> with late hypercapnia. They tend to be older and have more extensive emphysema.

**Synonyms:**

### **Pinna**

Visible external ear portion, elastic cartilage covered by skin, shaped to funnel sound into the external auditory canal. Key features: helix (outer rim), antihelix (inner ridge), tragus (canal prominence), antitragus, concha (canal-leading depression), lobule (earlobe, only non-cartilaginous part).

**Synonyms:**

### **Pure-Tone Audiometry**

A hearing test that measures the softest tones a person can hear at selected frequencies through air and bone conduction. The results are plotted on an audiogram and help distinguish conductive from sensorineural hearing loss.

**Synonyms:** Pure-tone threshold audiometry; pure-tone hearing test.

### **Pinworm**

Infection with *Enterobius vermicularis*, the most common helminth infection in developed countries, primarily in school-age children. Lifecycle: ingestion of eggs larvae hatch in small intestine adults colonize the cecum/appendix; female migrates to perianal area at night to deposit eggs.

**Synonyms:**

### **Piriformis Syndrome**

Sciatic nerve compression by piriformis muscle. Buttock pain, radiating down leg. Diagnosis: clinical, exclude disc herniation. Treatment: stretching, injection, surgical release.

**Synonyms:**

### **Pisiform**

Small pea-shaped sesamoid bone in the flexor carpi ulnaris tendon, in the proximal row. Articulates only with the triquetrum. Forms the medial border of Guyon's canal (ulnar nerve/artery passage).

Only sesamoid carpal bone, subcutaneous and easily palpable on the ulnar palm.

**Synonyms:**

### **Pituitary Adenoma**

Pituitary adenomas are benign neoplasms arising from the adenohypophysis (anterior pituitary gland), accounting for approximately ten to fifteen percent of all intracranial neoplasms.

**Synonyms:**

### **Pituitary Apoplexy**

Acute hemorrhage or infarction within a pituitary adenoma causing sudden headache, visual field defects, ophthalmoplegia, and altered consciousness. Medical emergency requiring urgent glucocorticoid administration to prevent adrenal crisis from acute ACTH deficiency.

**Synonyms:**

### **Pituitary Gland**

Pea-sized "master gland" in the sella turcica, connected to hypothalamus by infundibulum. Anterior pituitary (adenohypophysis): GH, TSH, ACTH, FSH, LH, prolactin. Posterior pituitary (neurohypophysis): ADH (vasopressin), oxytocin (from hypothalamus). Regulates other endocrine glands and bodily functions.

**Synonyms:**

### **Pituitary tumor**

A neoplasm arising from the pituitary gland, either functioning (hormone-secreting) or non-functioning. It can cause visual field defects, headaches, and hormonal imbalances depending on size and secretory status.

**Synonyms:**

### **Pityriasis Rosea**

An acute, self-limited eruption often beginning with a herald patch followed by oval scaly lesions distributed along skin-cleavage lines. It usually resolves within several weeks; treatment is symptomatic, and atypical, severe, recurrent, or persistent disease should be reassessed.

---

**Synonyms:**

### **Placebo**

Inactive substance used as control in trials. Placebo effect: improvement from expectation.

**Synonyms:**

### **Placebo Effect**

A psychological and physiological phenomenon where a patient experiences a real improvement in health or symptoms after receiving an inactive treatment (like a sugar pill) due to their expectations of healing.

**Synonyms:**

### **Placenta**

A temporary organ that develops in the uterus during pregnancy, providing oxygen and nutrients to the growing fetus while removing waste products.

**Synonyms:**

### **Placenta increta**

Abnormal placental invasion into the myometrium without reaching the serosa, increasing the risk of massive hemorrhage at delivery and often requiring cesarean hysterectomy.

**Synonyms:**

### **Placenta Praevia**

Placental implantation over or near the internal cervical opening. It may cause painless vaginal bleeding later in pregnancy and can affect the safety and mode of delivery.

**Synonyms:**

### **Placental Abruption**

Premature separation of the placenta from the uterine wall before delivery. It may cause vaginal bleeding, abdominal pain, uterine tenderness, fetal distress, and maternal or fetal compromise.

**Synonyms:**

### **Placental Accreta Spectrum**

Abnormal placental attachment to the myometrium, ranging from accreta (adherent to decidua basalis)

to increta (invading myometrium) to percreta (invading through serosa). Major risk factor is prior caesarean section with anterior placenta previa.

**Synonyms:**

### **Placental Separation Signs**

Clinical signs indicating the placenta has separated from the uterine wall and is ready for delivery. Classic signs: lengthening of the umbilical cord (cord lengthens as the placenta descends), a sudden gush of blood, and uterine elevation and firming (the uterus rises and becomes globular as the placenta moves into the lower segment).

**Synonyms:**

### **Plague**

A bacterial infection caused by *Yersinia pestis*, transmitted by fleas from rodents. Three forms: bubonic (most common, 80-90%): painful, swollen lymph nodes (buboes) after flea bite, fever, chills. Septicemic: bacteremia without bubo, endotoxic shock, DIC, purpura.

**Synonyms:**

### **Plant Thorn Synovitis**

Inflammation of a joint after penetration by a plant thorn or splinter, sometimes involving an infection introduced by the injury. Symptoms may develop gradually as persistent joint pain, swelling, and limited movement; evaluation may require removal of retained material and targeted treatment.

**Synonyms:**

### **Plantar Fasciitis**

The most common cause of heel pain, caused by degeneration and microtears of the plantar fascia at its calcaneal origin. Presents with sharp, stabbing heel pain with the first steps in the morning (post-static dyskinesia), improving after a few minutes but worsening with prolonged standing or activity.

**Synonyms:**

### **Plantar Wart (Verruca Plantaris)**

A wart (verruca) located on the sole of the foot, caused by human papillomavirus (HPV, typically

---

types 1, 2, 4, 63). Plantar warts are endophytic (grow inward due to pressure) rather than exophytic like common warts, and are often painful with direct pressure (walking, standing).

**Synonyms:** Verruca Plantaris

### **Plantar warts**

Common warts (verrucae) occurring on the plantar surface of the foot, caused by human papillomavirus infection of the keratinocytes. They present as hard, thickened papules with a rough surface and disrupted dermatoglyphics (skin lines), often with pinpoint black dots representing thrombosed capillaries.

**Synonyms:**

### **Plaque**

A raised, palpable lesion greater than approximately 1 cm, often formed by the coalescence of papules. Plaques are characteristic of several inflammatory, infectious, and neoplastic skin disorders.

**Synonyms:**

### **Plaque Assay**

A method for quantifying viruses: serial dilutions of a viral suspension are added to a monolayer of host cells, forming zones of cell destruction (plaques), each plaque representing one infectious unit; results expressed as plaque-forming units per mL (PFU/mL).

**Synonyms:**

### **Plasma Cell**

The terminally differentiated antibody-secreting cell derived from activated B lymphocytes (after antigen stimulation, class switching, and affinity maturation in germinal centers).

**Synonyms:**

### **Plasma Cell Myeloma**

A malignant neoplasm of clonal plasma cells, usually producing a monoclonal immunoglobulin or light chain. It may cause hypercalcemia, renal impairment, anemia, and destructive bone lesions, collectively known as CRAB features, together with

recurrent infection and hyperviscosity in some patients.

**Synonyms:**

### **Plasma Concentration**

The amount of a substance present in a defined volume of plasma at a given time. It is used to interpret exposure, toxicity, therapeutic drug monitoring, and pharmacokinetic relationships.

**Synonyms:**

### **Plasmacytoma**

A solitary mass of neoplastic plasma cells, which may occur in bone (solitary plasmacytoma of bone) or soft tissue (extramedullary plasmacytoma). It can progress to multiple myeloma.

**Synonyms:**

### **Plasmids**

Small, circular, extrachromosomal DNA elements that replicate independently of the bacterial chromosome. Plasmids carry non-essential genes that provide selective advantages including antibiotic resistance, virulence factors, and metabolic capabilities.

**Synonyms:**

### **Plasmodium vivax**

A malaria parasite transmitted by Anopheles mosquitoes. It infects red blood cells and can persist in the liver as dormant hypnozoites that cause relapses.

**Synonyms:**

### **Plastic bronchitis**

A rare condition producing large, branching mucous casts that form in the airways, causing life-threatening airway obstruction, often associated with congenital heart disease or post-fontan circulation.

**Synonyms:**

### **Plate Method**

Simple portion control: half plate vegetables, quarter plate protein, quarter plate grains. Promotes

---

balanced eating.

**Synonyms:**

### **Platelet Aggregation**

The adhesion and clumping of platelets to form a hemostatic plug at sites of vascular injury.

**Synonyms:**

### **Platelet Count**

The number of platelets per unit volume of blood (normal 150,000-400,000/ $\mu$ L), part of the CBC. Reduced (thrombocytopenia): bleeding risk (severe <20,000, spontaneous <10,000)—ITP, TTP, HIT, DIC, marrow failure, drugs, sepsis. Elevated (thrombocytosis): reactive or myeloproliferative.

**Synonyms:**

### **Platelet Function Disorders**

Conditions in which platelets do not adhere, activate, or aggregate normally, causing impaired primary hemostasis. They may be inherited or acquired and can cause easy bruising, nosebleeds, heavy menstrual bleeding, or bleeding after procedures.

**Synonyms:**

### **Platelet Plug Formation**

The initial hemostatic response to vascular injury, involving platelet adhesion, activation, and aggregation. When the endothelium is disrupted, subendothelial von Willebrand factor and collagen are exposed to flowing blood.

**Synonyms:**

### **Platelets (Thrombocytes)**

Small, anucleate, disc-shaped cell fragments (2–4  $\mu$ m diameter) derived from megakaryocytes in the bone marrow, circulating at  $150\text{--}400 \times 10^9/\text{L}$ .

**Synonyms:** Thrombocytes

### **Platypnea**

Dyspnea that occurs in the upright position and is relieved by lying down. It is the opposite of orthopnea. It is rare and may be associated with hepatopulmonary syndrome, intracardiac shunting,

or pulmonary arteriovenous malformations.

**Synonyms:**

### **Pleiotropy**

Single gene influencing multiple phenotypic traits. Examples: phenylketonuria (PKU) affects multiple systems; sickle cell anemia causes anemia, pain crises, organ damage.

**Synonyms:**

### **Pleomorphic Adenoma**

A usually benign salivary-gland tumor composed of epithelial and connective-tissue elements. It most often occurs in the parotid gland and may slowly enlarge; long-standing lesions can rarely undergo malignant transformation.

**Synonyms:**

### **Pleomorphism**

Variation in the size and shape of cells or their nuclei within a tissue. Marked pleomorphism is a feature of many high-grade malignancies but can also occur in some reactive or degenerative conditions.

**Synonyms:**

### **Pleura**

The serous membrane covering the lungs (visceral pleura) and lining the thoracic cavity (parietal pleura: costal, mediastinal, diaphragmatic, cervical/cupola). The pleural cavity is a potential space containing a thin film of serous fluid that couples the lung to the chest wall during ventilation.

**Synonyms:**

### **Pleural Cavity**

The narrow, fluid-filled space between the two layers of the pleura surrounding each lung.

**Synonyms:**

### **Pleural Effusion**

Abnormal fluid in the pleural space. Transudates result from altered pressures; exudates from inflammation, infection, or malignancy. Light's criteria differentiate the two.

**Synonyms:**

---

### **Pleural Fluid Glucose**

Pleural-fluid glucose may be reduced in empyema, complicated parapneumonic effusion, rheumatoid pleuritis, tuberculosis, and malignancy. It is interpreted with pH, cell count, protein, LDH, microbiology, imaging, and the clinical setting.

**Synonyms:**

### **Pleural Fluid pH**

Pleural-fluid pH helps assess infection and other causes of effusion. A markedly low pH supports a complicated parapneumonic effusion in the appropriate clinical setting, but drainage decisions also depend on imaging, fluid appearance, microbiology, glucose, and the patient's condition.

**Synonyms:**

### **Pleural Friction Rub**

A grating, leathery sound heard on auscultation caused by inflamed pleural surfaces rubbing against each other during breathing. It is a sign of pleurisy and may be heard in pneumonia, PE, and pleural effusion. It disappears when fluid accumulates and separates the pleural surfaces.

**Synonyms:**

### **Pleural perforation**

A breach in the pleural lining allowing air or fluid to enter the pleural space, potentially causing pneumothorax or hydropneumothorax, often from trauma, procedures, or underlying lung disease.

**Synonyms:**

### **Pleural Plaque**

Circumscribed fibrous tissue on parietal pleura, hallmark of asbestos exposure. Bilateral, often calcified. Does not indicate asbestosis.

**Synonyms:**

### **Pleurectomy**

Surgical removal of part or all of the pleura, used in the treatment of malignant pleural mesothelioma and recurrent malignant pleural effusion.

**Synonyms:**

### **Pleurisy**

Pleural inflammation causing sharp, breathing-related chest pain. Causes: pneumonia, PE, autoimmune disease, malignancy. Treatment addresses the underlying cause.

**Synonyms:**

### **Pleuritis**

Inflammation of the pleural membranes (visceral and parietal pleura). Presents with pleuritic chest pain: sharp, stabbing pain exacerbated by deep breathing, coughing, or sneezing.

**Synonyms:**

### **Pleurodesis**

Fusion of visceral and parietal pleura to prevent recurrence of effusions or pneumothorax. Chemical pleurodesis uses talc, doxycycline, or bleomycin.

**Synonyms:**

### **Pleurodynia**

Acute, severe chest pain caused by inflammation or spasm of the intercostal muscles, often associated with viral infection.

**Synonyms:**

### **Plexus**

A complex network of intersecting nerves or blood vessels in the body.

**Synonyms:**

### **Plombage**

An obsolete surgical technique for treating pulmonary tuberculosis in which material was placed in the extraparietal pleural space to compress the diseased lung and promote collapse therapy. Various materials including paraffin wax, lucite balls, and oil were used.

**Synonyms:**

### **Plug (Vascular)**

A vascular occlusion device used to block a selected vessel under image guidance.

**Synonyms:** Vascular

---

### **Plummer-Vinson Syndrome**

Triad of iron deficiency anemia, esophageal web, and dysphagia occurring predominantly in middle-aged women. The esophageal webs are thin mucosal folds typically located in the postcricoid region of the hypopharynx and proximal esophagus.

**Synonyms:**

### **Pneumatic Otoscopy**

A diagnostic technique that combines visualization of the tympanic membrane with assessment of its mobility in response to positive and negative air pressure changes, providing information about the presence of middle ear fluid and the condition of the Eustachian tube.

**Synonyms:**

### **Pneumatic Retinopexy**

A procedure for selected retinal detachments in which an intravitreal gas bubble is injected and laser or cryotherapy seals the retinal break while positioning helps the bubble support the repair.

**Synonyms:**

### **Pneumatocele**

Thin-walled, air-filled cystic spaces in the lung, often in staphylococcal pneumonia. Typically self-resolving.

**Synonyms:**

### **Pneumatosis cystoides coli**

Condition characterized by multiple gas-filled cysts within the wall of the colon, which may be primary (idiopathic) or secondary to intestinal mucosal disruption from conditions such as chronic obstructive pulmonary disease, ischemic bowel disease, or intestinal obstruction. Often discovered incidentally on imaging or colonoscopy.

**Synonyms:**

### **Pneumatosis Cystoides Intestinalis**

Gas-filled cysts within the bowel wall that may be primary or secondary to bowel ischemia, infection, chronic lung disease, or medications. Often an incidental finding on imaging. Primary pneumatosis is

benign and asymptomatic. Secondary pneumatosis may indicate serious underlying disease. Managed by treating the underlying condition.

**Synonyms:**

### **Pneumatosis Intestinalis**

Presence of gas within the bowel wall appearing as linear or cystic radiolucencies on imaging. Primary pneumatosis is benign and idiopathic accounting for approximately fifteen percent of cases.

**Synonyms:**

### **Pneumocephalus**

The presence of air or gas within the cranial cavity, most commonly following trauma, surgery, or sinus disease, and potentially causing increased intracranial pressure if tension develops.

**Synonyms:**

### **Pneumococcal Conjugate Vaccine**

A vaccine that links pneumococcal polysaccharides to a carrier protein to produce protective immunity against selected *Streptococcus pneumoniae* serotypes. Product choice and schedule depend on age, vaccination history, medical risk, and local recommendations.

**Synonyms:**

### **Pneumococcal sepsis**

Sepsis caused by *Streptococcus pneumoniae*, often arising from pneumonia, meningitis, or another invasive pneumococcal infection.

**Synonyms:**

### **Pneumoconiosis**

ILDs from mineral dust inhalation (silicosis, asbestosis, coal worker's, berylliosis). They share interstitial fibrosis and risk of infection and malignancy.

**Synonyms:**

### **Pneumocystis Jirovecii Pneumonia**

Opportunistic pneumonia caused by *Pneumocystis jirovecii*, especially in people with advanced HIV infection or other cellular immunodeficiency. It causes progressive exertional dyspnea, dry cough,

---

fever, and hypoxemia.

**Synonyms:**

### **Pneumocystis Pneumonia**

Opportunistic pneumonia caused by *Pneumocystis jirovecii*, usually in people with impaired cell-mediated immunity. It may cause progressive exertional dyspnea, dry cough, fever, and hypoxemia with diffuse ground-glass changes. Diagnosis and treatment require clinical, microbiologic, and radiologic assessment; trimethoprim-sulfamethoxazole is commonly used.

**Synonyms:**

### **Pneumography**

Contrast imaging of body cavities. Pneumoencephalography obsolete. Pneumoperitoneum for laparoscopy.

**Synonyms:**

### **Pneumomediastinum**

Air in the mediastinum, often from alveolar rupture with air tracking along bronchovascular sheaths. Causes include asthma exacerbation, trauma, Valsalva maneuver, and esophageal rupture (Boerhaave syndrome). It presents with chest pain, subcutaneous emphysema, and Hamman's crunch (mediastinal crunch synchronous with heartbeat).

**Synonyms:**

### **Pneumonectomy**

Removal of an entire lung, most often for centrally located lung cancer; carries higher operative morbidity and mortality than lobectomy and requires preserved contralateral lung function.

**Synonyms:**

### **Pneumonia**

Infection of the lung parenchyma, classified as community-acquired (CAP), hospital-acquired (HAP), or ventilator-associated (VAP). Common pathogens: *Streptococcus pneumoniae*, *Haemophilus influenzae*, *Mycoplasma pneumoniae*, viruses. Presents with cough, fever, dyspnea, and consolidation on imaging. Severity assessment:

CURB-65 or PSI.

**Synonyms:**

### **Pneumopericardium**

Air in the pericardial space, usually from trauma (penetrating chest injury), esophageal perforation, or iatrogenic causes (central line placement, cardiac surgery). Can cause cardiac tamponade if under tension. Diagnosis by chest X-ray showing air surrounding the heart (air-fluid level if combined with effusion).

**Synonyms:**

### **Pneumoperitoneum**

Free air within the peritoneal cavity, most commonly caused by perforation of a hollow viscus such as the stomach, duodenum, or colon. Iatrogenic causes include recent laparoscopy, endoscopy with perforation, and peritoneal dialysis. Presents with acute abdominal pain, rigidity, and signs of peritonitis.

**Synonyms:**

### **Pneumothorax**

Air in the pleural space causing lung collapse. Primary spontaneous occurs in tall, thin young men. Secondary occurs with underlying lung disease. Tension is a medical emergency.

**Synonyms:**

### **POEMS Syndrome**

A rare plasma-cell disorder named for polyneuropathy, organomegaly, endocrinopathy, monoclonal plasma-cell disorder, and skin changes. Other manifestations include sclerotic bone lesions, papilledema, fluid overload, thrombocytosis, and elevated vascular endothelial growth factor.

**Synonyms:**

### **Point Mutation**

Change in single nucleotide base pair. Substitutions: transition (purine to purine, pyrimidine to pyrimidine) or transversion (purine to pyrimidine). Effects: silent (same amino acid), missense (different amino acid), nonsense (stop codon).

**Synonyms:**

---

### Point-of-Care Testing

Diagnostic testing performed near the patient rather than in a central laboratory. POCT can shorten turnaround time but requires validated devices, quality control, operator training, and appropriate interpretation.

**Synonyms:**

### Point-of-Care Ultrasound

Bedside ultrasonography performed and interpreted by the treating clinician to answer focused diagnostic or procedural questions. Emergency applications include cardiac activity, volume status, pulmonary pathology, abdominal free fluid, vascular thrombosis, and procedural guidance.

**Synonyms:**

### Poison Control

A specialized service that provides immediate advice about exposure to medicines, chemicals, or other potential poisons.

**Synonyms:**

### Poison-Center Consultation

Specialist toxicology advice used to identify hazards, interpret exposure and laboratory data, select antidotes, guide observation or disposition, and coordinate public-health response. Consultation is appropriate for significant, uncertain, mixed, pediatric, or unusual exposures.

**Synonyms:**

### Poisoning

Harmful effect from exposure to toxic substance. Routes: ingestion, inhalation, dermal, injection. Management: ABCs, decontamination, antidote if available, supportive care.

**Synonyms:**

### Poland Syndrome

A congenital condition characterized by absence or underdevelopment of part of the pectoral muscles on one side, sometimes accompanied by abnormalities of the hand on the same side.

**Synonyms:**

### Polio

Abbreviation for poliomyelitis, an acute viral infection caused by poliovirus, an enterovirus of the Picornaviridae family transmitted via the fecal-oral route, primarily affecting children under 5 years of age.

**Synonyms:**

### Poliomyelitis

An infection caused by poliovirus that may be asymptomatic or may damage motor neurons and cause acute flaccid paralysis.

**Synonyms:**

### Poliovirus

An enterovirus that causes poliomyelitis, a paralytic illness. The virus is transmitted by the fecal-oral route. Most infections are asymptomatic, but a small percentage cause acute flaccid paralysis. The virus attacks motor neurons in the spinal cord. Diagnosis involves stool culture and PCR. There is no specific treatment.

**Synonyms:**

### Polish (Dental)

Smoothing restorative surfaces to reduce plaque accumulation. Essential for longevity.

**Synonyms:** Dental

### Polyarteritis Nodosa

Necrotizing inflammation of medium-sized muscular arteries, spares lungs. Associated with hepatitis B (10-30%). Clinical: systemic symptoms, mononeuritis multiplex, livedo reticularis, renal involvement (hypertension, renal insufficiency—no glomerulonephritis), GI ischemia.

**Synonyms:**

### Polychondritis

Relapsing inflammatory disorder targeting cartilage throughout the body, causing pain, swelling, and destruction of the ears, nose, larynx, trachea, and joints. May lead to airway collapse and hearing loss.

**Synonyms:**

---

### Polycystic Kidney Disease

Inherited disorder with progressive renal cyst formation. ADPKD most common from PKD1 or PKD2 mutations. Bilateral enlarged kidneys with countless cysts. PKD1 more severe with earlier ESRD. Extrarenal manifestations include hepatic cysts and berry aneurysms. Screen family members.

**Synonyms:**

### Polycystic Liver Disease

Dominant polycystic liver disease is an autosomal dominant condition characterized by multiple hepatic cysts that may cause massive hepatomegaly, abdominal pain, and compressive symptoms. Usually associated with autosomal dominant polycystic kidney disease. Liver function is preserved even with extensive cyst involvement.

**Synonyms:**

### Polycystic Ovary Syndrome

Common endocrine disorder affecting six to twelve percent of reproductive-aged women characterized by hyperandrogenism, ovulatory dysfunction, and polycystic ovarian morphology on ultrasound.

**Synonyms:**

### Polycythemia

Elevated red blood cell mass/hematocrit. Primary: polycythemia vera (JAK2 V617F mutation, trilineage proliferation, low EPO, risk of thrombosis and myelofibrosis/leukemia). Secondary: hypoxia (COPD, high altitude, congenital heart disease, sleep apnea) with high EPO, or EPO-secreting tumors (renal cell, hepatoma).

**Synonyms:**

### Polycythemia Vera

A chronic myeloproliferative neoplasm characterized by increased red blood cell mass, often with increased white blood cell and platelet counts, driven by constitutive activation of the JAK-STAT signaling pathway.

**Synonyms:**

### Polydactylysm

Congenital presence of extra fingers or toes.

**Synonyms:**

### Polydactyly

A congenital anomaly characterized by supernumerary digits on the hands or feet. Postaxial polydactyly (ulnar/fibular side, most common): more frequent in African American and Native American populations, often isolated and autosomal dominant.

**Synonyms:**

### Polydipsia

Excessive, unquenchable thirst. A classic symptom of hyperosmolar states and endocrine disorders.

**Synonyms:**

### Polyethylene Glycol

An osmotic laxative used for constipation and bowel preparation for colonoscopy. PEG (e.g., Miralax, GoLYTELY) is a non-absorbable polymer that draws water into the colonic lumen, softening stool and stimulating defecation without significant electrolyte shifts. For chronic constipation: 17 g daily in water.

**Synonyms:**

### Polygenic Inheritance

Trait influenced by multiple genes, each with small effect. Examples: height, skin color, common diseases (diabetes, heart disease). Produces continuous variation.

**Synonyms:**

### Polygenic Risk Score

A statistical estimate of disease susceptibility calculated from the combined effects of many genetic variants, each usually contributing a small amount of risk. It modifies but does not replace clinical risk assessment or environmental factors.

**Synonyms:**

### Polyhydramnios

Excessive amniotic fluid during pregnancy. Causes include diabetes, fetal swallowing or gastrointesti-

---

nal disorders, chromosomal abnormalities, and unknown factors; severity and treatment depend on the cause.

**Synonyms:**

### **Polymastia**

The presence of more than two breasts, resulting from development of accessory breast tissue along the mammary ridge, most commonly in the axillary region and present at birth or appearing at puberty.

**Synonyms:**

### **Polymerase Chain Reaction**

An in-vitro method that exponentially amplifies a defined DNA segment through repeated cycles of denaturation, primer annealing, and DNA synthesis by a thermostable polymerase. It is used in diagnosis, research, forensics, and pathogen detection.

**Synonyms:**

### **Polymicrobial infections**

Infections caused by multiple microbial species. Polymicrobial infections are common in wound infections, intra-abdominal infections, and respiratory infections. The interactions between organisms can be synergistic or antagonistic. Understanding polymicrobial infections is essential for selecting appropriate antimicrobial therapy.

**Synonyms:**

### **Polymicrogyria**

A brain malformation characterized by an excessive number of abnormally small, fused gyri, resulting in an irregular, bumpy cortical surface with shallow sulci. Caused by abnormal late neuronal migration or post-migrational cortical organization. May be focal or diffuse, unilateral or bilateral, and symmetric or asymmetric.

**Synonyms:**

### **Polymyalgia Rheumatica**

An inflammatory syndrome, usually affecting older adults, that causes bilateral shoulder and hip-girdle pain and morning stiffness. It is associated with giant-cell arteritis and requires assessment for symp-

toms such as new headache or visual disturbance.

**Synonyms:**

### **Polymyositis**

An idiopathic inflammatory myopathy characterized by symmetric, proximal muscle weakness (shoulders, hips) with elevated muscle enzymes (CK, aldolase, LDH). More common in women, peaks at 30-50 years.

**Synonyms:**

### **Polyp Surveillance Colonoscopy**

Interval-based endoscopic follow-up of patients with previously identified colorectal polyps. Intervals are determined by polyp number, size, and histological features. One to two small adenomas require surveillance at seven to ten years. Three to four adenomas at three to five years.

**Synonyms:**

### **Polyphagia**

Excessive, uncontrollable hunger or increased appetite. Classic cardinal symptom of uncontrolled Diabetes Mellitus (cellular starvation due to lack of insulin or insulin resistance), Hyperthyroidism (elevated basal metabolic rate), Prader-Willi Syndrome, and atypical depression.

**Synonyms:**

### **Polypharmacy**

Use of multiple medications by one patient, often defined numerically as five or more concurrent medicines. It increases the risk of interactions, adverse effects, prescribing cascades, nonadherence, and medication errors, although some multidrug regimens are clinically appropriate.

**Synonyms:**

### **Polysomnography**

Sleep study measuring brain activity, breathing, oxygen saturation, muscle activity. Diagnoses sleep apnea, parasomnias.

**Synonyms:**

---

### **Polysomnography (Sleep Study)**

Overnight monitoring for sleep-disordered breathing. Parameters: EEG (sleep staging: N1, N2, N3, REM), EOG (eye movements), EMG (chin and leg movements), airflow (nasal pressure, thermistor), respiratory effort (chest/abdomen belts), snore microphone, body position, oximetry (SpO2), and ECG.

**Synonyms:** Sleep Study

### **Polyunsaturated Fat**

Liquid at room temperature. Sources: fish, vegetable oils, nuts. Essential fatty acids.

**Synonyms:**

### **Polyuria**

Excessive urine output, defined as >3 L/day in adults. Causes are divided into water diuresis and solute diuresis. Water diuresis: central diabetes insipidus (ADH deficiency), nephrogenic diabetes insipidus (ADH resistance from lithium, hypercalcemia, hypokalemia, genetic causes), and primary polydipsia (psychogenic or dipsogenic).

**Synonyms:**

### **Pons**

Middle brainstem segment with prominent anterior bulge containing pontine nuclei (relaying cortical input to cerebellum), corticospinal fibers, and cranial nerve V, VI, VII, and VIII nuclei. Fourth ventricle floor is partly formed by the pons. Pneumotaxic center (parabrachial nucleus) regulates breathing pattern.

**Synonyms:**

### **Popliteal Aneurysm**

Aneurysm of popliteal artery behind knee. Associated with AAA. Risk: thrombosis, embolism, compression. Treatment: surgical repair or endovascular stenting.

**Synonyms:**

### **Popliteal Artery**

Continues from femoral artery at the adductor hiatus, dividing into anterior/posterior tibial arteries

at the lower popliteus border. Deepest popliteal fossa structure, related anteriorly to vein and tibial nerve. Palpable at the fossa's inferior margin.

**Synonyms:**

### **Popliteal Fossa**

Diamond-shaped space on the posterior knee, bounded by hamstrings superiorly and gastrocnemius heads inferiorly. Contains popliteal artery/vein, tibial nerve, and common peroneal nerve. The popliteal pulse is palpated at the inferior margin.

**Synonyms:**

### **Population Attributable Fraction**

The proportion of cases or disease burden in the total population that would theoretically be prevented if the exposure were eliminated, assuming the exposure is causal and other conditions remain unchanged.

**Synonyms:**

### **Population Attributable Risk**

Proportion of disease in population attributable to exposure.  $PAR = (\text{incidence total} - \text{incidence unexposed}) / \text{incidence total}$ .

**Synonyms:**

### **Porcelain Gallbladder**

Calcification of the gallbladder wall visible on imaging representing chronic inflammatory condition associated with cholelithiasis and chronic cholecystitis. Historically considered a strong risk factor for gallbladder carcinoma, recent studies suggest the cancer risk may be lower than previously estimated.

**Synonyms:**

### **Porencephaly**

A cavity or cyst within the cerebral hemisphere caused by developmental malformation or destruction of previously formed brain tissue. Clinical effects depend on location and size and may include seizures, hemiparesis, developmental impairment, hydrocephalus, or cerebral palsy.

**Synonyms:**

---

## Porphyria Cutanea Tarda

The most common porphyria, caused by a deficiency of hepatic uroporphyrinogen decarboxylase (UROD), leading to accumulation of uroporphyrinogens. Triggered by hepatitis C virus (HCV), alcohol abuse, iron overload (hemochromatosis), and estrogen therapy.

**Synonyms:**

## Porphyrias

Metabolic disorders of heme synthesis causing cutaneous and neurological symptoms. Cutaneous porphyrias include porphyria cutanea tarda (blisters on sun-exposed skin, hypertrichosis, sclerodermoid changes), erythropoietic protoporphyria (immediate pain and burning on sun exposure without visible changes), and variegate porphyria.

**Synonyms:**

## Portal Hypertension

Elevated pressure in the portal venous system defined as hepatic venous pressure gradient exceeding five millimeters of mercury with clinically significant portal hypertension occurring when the gradient exceeds ten.

**Synonyms:**

## Portal Hypertensive Gastropathy

Diffuse mucosal changes in the stomach due to portal hypertension causing chronic blood loss. Characterized by mosaic pattern and cherry red spots on endoscopy representing dilated mucosal vessels. Most common in patients with advanced cirrhosis and portal hypertension.

**Synonyms:**

## Portal System

Venous network draining the GI tract, spleen, and pancreas to the liver via the portal vein (formed by superior mesenteric and splenic vein union behind the pancreatic neck). Carries nutrient-rich deoxygenated blood for hepatic processing before systemic entry. Receives left gastric, right gastric, cystic, and paraumbilical veins.

**Synonyms:**

## Portal Vein

The vein carrying nutrient-rich blood from the gastrointestinal tract, spleen, pancreas, and gallbladder to the liver, formed behind the pancreatic neck by the union of the superior mesenteric and splenic veins. It enters the porta hepatis with the hepatic artery and bile duct.

**Synonyms:**

## Portal Vein Thrombosis

Partial or complete thrombosis of the portal vein or its branches. It may result from cirrhosis, malignancy, inflammation, thrombophilia, or abdominal surgery and can cause portal hypertension, intestinal ischemia, or variceal formation.

**Synonyms:**

## Portion Control

Managing serving sizes. Larger portions available today contribute to obesity. Using smaller plates, reading labels helpful.

**Synonyms:**

## Portopulmonary Syndrome

Development of pulmonary arterial hypertension in the setting of portal hypertension or liver disease. Results from increased cardiac output and splanchnic vasodilation leading to pulmonary vascular remodeling.

**Synonyms:**

## Positional Asphyxia

Fatal or potentially fatal impairment of breathing caused by body position that restricts chest movement, airway patency, or venous return. Risk is increased by restraint, intoxication, obesity, and inability to reposition; findings are nonspecific and require scene and medical correlation.

**Synonyms:**

## Positive End-Expiratory Pressure

Pressure maintained at end-expiration to prevent alveolar collapse. Improves oxygenation by recruiting alveoli and increasing FRC. Balances oxygenation with hemodynamic effects.

---

**Synonyms:**

### **Positive Feedback**

A regulatory mechanism in which an output amplifies the initiating stimulus, producing an accelerating or self-reinforcing response that drives the system away from equilibrium and toward completion of an event.

**Synonyms:**

### **Positive Predictive Value**

The probability that a person with a positive test result truly has the target condition. PPV depends on test specificity and sensitivity and on disease prevalence or pretest probability in the tested population.

**Synonyms:**

### **Positive Predictive Value in Surveillance**

The proportion of reported signals or alerts that represent true events meeting the surveillance case definition. It is influenced by the specificity of the signal and the underlying prevalence of the condition.

**Synonyms:**

### **Positive Pressure Ventilation**

Mechanical ventilation that delivers air/oxygen under positive pressure to support or replace spontaneous breathing. Noninvasive (NIV): CPAP (continuous) and BiPAP (two levels) via mask for obstructive sleep apnea, cardiogenic pulmonary edema, and hypercapnic COPD.

**Synonyms:**

### **Positive Symptoms**

Symptoms reflecting an excess or distortion of normal mental functions, such as hallucinations, delusions, disorganized speech, or grossly disorganized behavior. They are contrasted with negative symptoms, which reflect loss or reduction of function.

**Synonyms:**

### **Positron**

Anti-particle of electron. Emitted by PET radionu-

clides. Annihilation with electron produces two 511 keV photons.

**Synonyms:**

### **Positron Emission Mammography**

PET imaging of breast. Higher sensitivity than mammography for dense breasts. Limited availability.

**Synonyms:**

### **Positron Emission Tomography**

Functional imaging modality using positron-emitting radionuclides. Common isotope: fluorine-18 (110 min half-life). Detection: annihilation photons (511 keV) detected in coincidence. Tracers: FDG (metabolism), florbetapir (amyloid), flortaucipir (tau), PSMA (prostate cancer).

**Synonyms:**

### **Post-Acute Rehabilitation**

Time-limited interdisciplinary care after an acute illness, injury, or hospitalization to restore mobility, self-care, cognition, communication, and safe community function. Intensity and setting depend on medical stability and rehabilitation potential.

**Synonyms:**

### **Post-Cardiac Arrest Management**

Care after return of spontaneous circulation that supports breathing and circulation, identifies and treats the cause of the arrest, manages temperature and seizures when indicated, and assesses neurologic recovery over time.

**Synonyms:**

### **Post-Concussion Syndrome**

Persistent symptoms after concussion: headache, dizziness, cognitive difficulties, sleep disturbance, mood changes. Management: symptom-directed, gradual return to activity.

**Synonyms:**

### **Post-Dural Puncture Headache**

A positional headache occurring after accidental dural puncture during epidural placement or lum-

---

bar puncture, caused by cerebrospinal fluid leakage and intracranial hypotension. Symptoms include frontal or occipital headache worse when upright and relieved when supine, neck stiffness, tinnitus, photophobia, and nausea.

**Synonyms:**

### **Post-exposure prophylaxis**

The administration of antimicrobial agents after exposure to a pathogen to prevent infection. PEP is used for HIV, hepatitis B, hepatitis C, rabies, and other infections. The timing of PEP is critical, with early administration being most effective. Understanding PEP is essential for managing occupational exposures and outbreaks.

**Synonyms:**

### **Post-Infectious Cough**

A chronic cough persisting 3–8 weeks after a URI, caused by transient bronchial hyperresponsiveness and airway inflammation. It is self-limited and usually resolves without treatment. Inhaled corticosteroids, antitussives, and time are the mainstays of management.

**Synonyms:**

### **Post-Mortem**

An examination of a body after death to determine the cause of death, identify disease processes, and evaluate the effects of medical or surgical treatment. Also called autopsy, necropsy.

**Synonyms:** autopsy, necropsy.

### **Post-Obstructive Pneumonia**

Pneumonia occurring distal to a bronchial obstruction caused by tumor, foreign body, mucus plug, or stenosis. The obstruction prevents clearance of secretions, creating a favorable environment for infection. It does not resolve with antibiotics alone until the obstruction is relieved.

**Synonyms:**

### **Post-Operative Atelectasis**

Collapse of some alveoli after surgery, promoted by anesthesia, shallow breathing, pain, immobil-

ity, mucus retention, or underlying lung disease. Management addresses the cause and may include mobilization, effective analgesia, deep breathing, and treatment of complications.

**Synonyms:**

### **Post-Pneumonectomy Syndrome**

A rare complication following pneumonectomy where the remaining lung herniates across the mediastinum, causing compression of airways and vessels. It presents with dyspnea, stridor, and recurrent infections. Treatment is surgical correction with mediastinal repositioning and prosthetic implant placement.

**Synonyms:**

### **Post-Streptococcal Glomerulonephritis**

Immune-mediated glomerulonephritis following infection with nephritogenic strains of group A streptococcus typically 1 to 3 weeks after pharyngitis or 3 to 6 weeks after skin infection. Subepithelial humps on electron microscopy representing immune complex deposits.

**Synonyms:**

### **Post-Surgical Pain**

Acute pain following operative procedures, caused by tissue incision, retraction, dissection, and inflammation, mediated by nociceptors sensitized by prostaglandins, bradykinin, and cytokines. Intensity varies by procedure (thoracotomy, joint replacement, and laparotomy produce more severe pain).

**Synonyms:**

### **Post-Surgical Rehabilitation**

Recovery program after surgery. Phases: acute (pain control, wound care), subacute (range of motion, strengthening), functional (return to activities). Protocols vary by procedure.

**Synonyms:**

### **Post-Term Pregnancy**

Pregnancy continuing beyond 42 weeks gestation (294 days from LMP). Risk factors include prior post-term pregnancy, nulliparity, and genetic factors.

---

Complications include macrosomia, oligohydramnios, meconium aspiration, placental insufficiency, and stillbirth.

**Synonyms:**

### **Post-Test Probability**

The probability of disease after incorporating a test result with the pretest probability. It can be estimated using Bayes' theorem or by converting pretest odds to post-test odds with the appropriate likelihood ratio.

**Synonyms:**

### **Post-Thrombotic Syndrome**

Chronic pain, heaviness, edema, skin change, and sometimes ulceration developing after deep-vein thrombosis because of persistent venous obstruction and valvular damage. Compression, exercise, skin care, and selected interventions may reduce disability.

**Synonyms:**

### **Post-Transfusion Purpura**

A rare immune-mediated thrombocytopenic disorder occurring several days after transfusion of blood products, usually in previously sensitized individuals. It causes abrupt, severe thrombocytopenia with petechiae, mucosal bleeding, or more serious haemorrhage.

**Synonyms:**

### **Post-Traumatic Stress Disorder**

A disorder that may develop after exposure to actual or threatened death, serious injury, or sexual violence, causing persistent re-experiencing, avoidance, negative mood or cognition, and heightened arousal.

**Synonyms:**

### **Post-Void Residual**

The amount of urine remaining in the bladder after urination, measured by ultrasound or catheterization. A persistently high residual may indicate incomplete emptying, but its significance depends on the volume, timing, symptoms, and clinical context.

**Synonyms:**

### **Post-Void Residual Volume**

The amount of urine remaining in the bladder immediately after urination, measured by ultrasound or catheterization. An elevated residual suggests incomplete emptying but must be interpreted with timing, bladder volume, symptoms, and repeated measurements.

**Synonyms:**

### **Postanesthesia Care Unit**

The postanesthesia care unit (PACU) is a monitored recovery area where patients are observed during the immediate postoperative period. Admission assessment includes vital signs, level of consciousness, pain assessment, and surgical site evaluation.

**Synonyms:**

### **Postcholecystectomy Syndrome**

Persistence or recurrence of symptoms after cholecystectomy. Causes include retained common bile duct stones, sphincter of Oddi dysfunction, bile salt malabsorption, irritable bowel syndrome, and other gastrointestinal conditions. Evaluation includes liver function tests, MRCP, and endoscopic ultrasound.

**Synonyms:**

### **Posterior**

Relating to the back of the body or positioned closer to the back.

**Synonyms:**

### **Posterior Cruciate Ligament Injury**

Tear of the PCL, less common than ACL injury. Mechanism: dashboard injury (tibia striking dashboard), hyperflexion, or fall on a flexed knee with foot plantarflexed. Presents with posterior knee pain, mild swelling, and posterior sag of the tibia. Positive posterior drawer test (most sensitive), posterior sag sign (Godfrey test).

**Synonyms:**

---

### Posterior Cruciate Ligament Tear

PCL tear: less common, usually from direct blow to tibia (dashboard injury). Symptoms: knee pain, swelling, instability. Diagnosis: posterior drawer test, MRI. Treatment: usually conservative, surgical if combined injuries.

**Synonyms:**

### Posterior Descending Artery

An artery running in the posterior interventricular groove and supplying the inferior ventricular walls and posterior interventricular septum. It usually arises from the right coronary artery in right-dominant circulation but may arise from the circumflex artery.

**Synonyms:**

### Posterior Drawer Test

PCL integrity test. Knee flexed 90 degrees, posterior tibial translation.

**Synonyms:**

### Posterior Pituitary

The neural lobe of the pituitary that stores and releases vasopressin and oxytocin synthesized in the hypothalamus. Vasopressin regulates renal water retention and vascular tone; oxytocin contributes to uterine contraction and milk ejection.

**Synonyms:**

### Posterior reversible encephalopathy syndrome

A neurotoxic state caused by failed cerebrovascular autoregulation, typically from acute hypertension, eclampsia, immunosuppressive drugs (tacrolimus, cyclosporine), or sepsis. Presents with headache, seizures, altered consciousness, and visual disturbances.

**Synonyms:**

### Posterior Subcapsular Cataract

A type of lens opacity located at the posterior aspect of the lens, just anterior to the posterior lens capsule, in the visual axis, and it is particularly visually disabling because of its central location.

**Synonyms:**

### Posterior Tibial Artery

Arises from the popliteal artery, courses deep in the posterior leg, palpable behind the medial malleolus. Divides into medial/lateral plantar arteries for the sole. Supplies posterior leg muscles. Important for peripheral vascular disease assessment. The pedal pulse behind the medial malleolus is a key clinical examination component.

**Synonyms:**

### Posterior Urethral Valves

The most common cause of lower urinary tract obstruction in male infants, caused by congenital mucosal folds (valves) in the posterior urethra (prostatic urethra) that obstruct urine outflow.

**Synonyms:**

### Posterior Uveitis

Inflammation affecting the retina, choroid, or both. It may cause floaters, blurred vision, visual-field defects, or eye pain and can result from infection, autoimmune disease, or other inflammatory conditions.

**Synonyms:**

### Posterior Vitreous Detachment

Separation of the posterior vitreous cortex from the retinal surface, commonly related to age-related vitreous liquefaction. New flashes or floaters require dilated retinal examination because an associated retinal tear or detachment may be present.

**Synonyms:**

### Postmenopausal osteoporosis

Bone loss caused by lower estrogen levels associated with menopause. Sometimes called type I osteoporosis.

**Synonyms:**

### Postmenopause

The period in a woman's life lasting from the end of perimenopause until the end of life.

**Synonyms:**

---

### Postmortem Artifact

Any structural, chemical, or physical change introduced into a body after death (e.g., embalming artifacts, insect activity, postmortem animal scavenging, resuscitation trauma) that mimics antemortem disease or trauma.

**Synonyms:**

### Postmortem Interval

Estimated elapsed time between actual death and the time of autopsy or body discovery, calculated utilizing algor mortis, livor mortis, rigor mortis, vitreous potassium levels, and insect succession patterns.

**Synonyms:**

### Postmortem Toxicology

Toxicologic analysis of specimens collected after death to identify drugs, alcohols, poisons, and metabolites. Results must account for therapeutic administration, redistribution, decomposition, specimen site, contamination, and tolerance before conclusions about causation are made.

**Synonyms:**

### Postnatal depression

A depressive episode occurring after childbirth, with persistent low mood, anhedonia, sleep or appetite disturbance, guilt, impaired bonding, or suicidal thoughts.

**Synonyms:**

### Postoperative Care

Structured post-surgical management encompassing pain control, fluid balance, wound care, early mobilization, and venous thromboembolism prophylaxis.

**Synonyms:**

### Postoperative Cognitive Dysfunction

A decline in cognitive abilities such as memory, attention, or executive function after surgery. It may be temporary or persistent and is more frequent in older adults and after major or complicated procedures. Assessment requires comparison with the person's baseline and consideration of delirium, med-

ication effects, and other medical causes.

**Synonyms:**

### Postoperative Complications

Clavien-Dindo classification: Grade I (any deviation, no treatment), Grade II (pharmacologic), Grade III (surgical/endoscopic/radiologic intervention: IIIa no GA, IIIb GA), Grade IV (ICU: IVa single organ, IVb multi-organ), Grade V (death).

**Synonyms:**

### Postoperative Delirium

A common complication after major surgery, particularly in elderly patients. It is categorized as hyperactive (agitation, restlessness, hallucinations), hypoactive (lethargy, withdrawal, decreased responsiveness), or mixed. Hypoactive delirium is the most common and most missed form.

**Synonyms:**

### Postoperative Ileus

Temporary impairment of gastrointestinal motility after surgery, most common after abdominal surgery. Pathophysiology: autonomic dysfunction (sympathetic overactivity), inflammatory mediators, opioids, and electrolyte abnormalities.

**Synonyms:**

### Postoperative Nausea and Vomiting

Nausea, retching, or vomiting occurring after surgery. Risk is influenced by factors such as previous motion sickness or postoperative nausea, anesthetic technique, opioid use, and patient characteristics. Prevention and treatment are tailored to the individual risk and procedure.

**Synonyms:**

### Postoperative Pain Management

Management of pain after surgery using a combination of medicines, regional techniques, physical measures, and rehabilitation. The plan is tailored to the procedure, pain severity, medical conditions, and risks of adverse effects.

**Synonyms:**

---

### Postoperative Pulmonary Complication

Respiratory deterioration after surgery, including atelectasis, pneumonia, aspiration, respiratory failure, bronchospasm, and exacerbation of chronic lung disease. Risk reduction includes smoking cessation, lung-protective ventilation, analgesia, mobilization, and appropriate respiratory exercises.

**Synonyms:**

### Postpartum Anxiety

Excessive, persistent, or distressing anxiety during pregnancy or after childbirth that interferes with sleep, daily function, bonding, or self-care. It may occur with panic, intrusive worries, or depression and deserves clinical assessment; thoughts of self-harm or harm to the baby require emergency help.

**Synonyms:**

### Postpartum Blues

A common, short-lived period of tearfulness, mood changes, irritability, or anxiety beginning soon after childbirth and usually improving within two weeks. Support, rest, and practical help are important; persistent, severe, psychotic, or suicidal symptoms require prompt assessment for a postpartum mental-health disorder.

**Synonyms:**

### Postpartum Cardiomyopathy (Peripartum Cardiomyopathy)

A dilated cardiomyopathy causing heart failure toward the end of pregnancy or during the months after delivery. Symptoms may include breathlessness, difficulty lying flat, swelling, fatigue, or chest discomfort and require prompt assessment.

**Synonyms:** Peripartum Cardiomyopathy

### Postpartum Depression

Major depressive or manic episodes occurring during pregnancy or within four weeks of delivery (DSM-5). The term is often used more broadly to cover depressive episodes up to one year postpartum. Risk factors include prior depression, lack of social support, stressful life events, and hormonal fluctuations.

**Synonyms:**

### Postpartum Endometritis

Infection of the decidua and endometrial cavity after delivery, occurring more often after cesarean birth. Fever, uterine tenderness, pelvic pain, and foul-smelling lochia are typical; treatment generally requires intravenous broad-spectrum antibiotics.

**Synonyms:**

### Postpartum Hemorrhage

Excessive bleeding after childbirth, usually caused by poor uterine contraction, retained placental tissue, genital-tract trauma, or a clotting disorder. It can cause shock and requires urgent obstetric assessment and treatment.

**Synonyms:**

### Postpartum Hemorrhage (Secondary)

Excessive bleeding occurring between 24 hours and 12 weeks postpartum. Causes: retained products of conception (most common), endometritis, subinvolution of the placental site, and coagulopathy. Presents with heavy or prolonged bleeding, cramping, and passing clots. Diagnosis: ultrasound (retained tissue, thickened endometrium).

**Synonyms:** Secondary

### Postpartum Infection

Infections occurring after delivery, a leading cause of maternal morbidity. Types: endometritis (most common, especially after cesarean), wound infection (cesarean incision, episiotomy, perineal laceration), urinary tract infection, mastitis, septic pelvic thrombophlebitis, and pneumonia.

**Synonyms:**

### Postpartum Psychosis

A rare but severe psychiatric emergency (1-2 per 1000 deliveries) characterized by the acute onset of delusions, hallucinations, disorganized behavior, confusion, and mood swings (mania or depression) within 1-4 weeks postpartum.

**Synonyms:**

### Postpartum Thyroiditis

Autoimmune inflammation of the thyroid occurring

---

during the first year after delivery. It may cause a temporary hyperthyroid phase followed by hypothyroidism, and symptoms and recovery vary; thyroid-function testing guides follow-up and treatment.

**Synonyms:**

### **Postrenal AKI**

Acute kidney injury caused by obstruction of urine flow from the kidneys to the urethra. Causes include prostate enlargement, stones, tumors, fibrosis, and neurogenic bladder. The effect depends on the location, duration, completeness, and whether one or both kidneys are affected.

**Synonyms:**

### **Poststreptococcal pustulosis**

A sterile, non-follicular pustular eruption occurring as a rare sequela of streptococcal pharyngitis, presenting with scattered pustules on an erythematous base, typically on the trunk and extremities. It is thought to be an immune-mediated hypersensitivity reaction to streptococcal antigens.

**Synonyms:**

### **Postterm Pregnancy**

Pregnancy that continues beyond 42 completed weeks of gestation. Risks and management depend on gestational dating, fetal condition, and maternal health.

**Synonyms:**

### **Posttraumatic Stress Disorder**

A psychiatric disorder that develops after exposure to a traumatic event (death, serious injury, sexual violence).

**Synonyms:**

### **Postural Orthostatic Tachycardia Syndrome**

An autonomic disorder causing an excessive increase in heart rate after standing, with symptoms such as light-headedness, palpitations, fatigue, weakness, brain fog, nausea, or fainting. Diagnosis requires clinical assessment and exclusion of other causes of

orthostatic symptoms.

**Synonyms:**

### **Potassium**

Major intracellular cation. Essential for cardiac function, muscle contraction, blood pressure regulation. Deficiency: hypokalemia (weakness, arrhythmias). Sources: fruits, vegetables, potatoes, beans.

**Synonyms:**

### **Potassium Binders**

Sodium zirconium cyclosilicate and patiromer. Exchange potassium in GI tract for sodium or calcium. Treat chronic hyperkalemia allowing continued RAAS inhibitor use in CKD.

**Synonyms:**

### **Potassium-Sparing Diuretics**

Potassium-sparing diuretics act on the distal nephron to promote sodium excretion while minimizing potassium loss. They include epithelial sodium channel blockers such as amiloride and triamterene, and mineralocorticoid receptor antagonists such as spironolactone and eplerenone.

**Synonyms:**

### **Potency**

The amount of a drug required to produce a specified effect. A more potent drug produces that effect at a lower dose, but potency does not indicate the maximum effect.

**Synonyms:**

### **Potency vs Efficacy**

Potency is the amount of drug required to produce a given effect, measured by the EC<sub>50</sub> (the concentration producing 50% of maximal effect). Drugs with higher potency achieve effects at lower doses (e.g., fentanyl is more potent than morphine).

**Synonyms:**

### **Pott Disease**

TB of the spine involving thoracic or lumbar vertebrae. Causes vertebral destruction, kyphosis (gibbus

---

deformity), and paravertebral abscess. May cause spinal cord compression.

**Synonyms:**

### Potter Syndrome

A sequence of anomalies resulting from severe oligohydramnios (low amniotic fluid volume), most commonly caused by bilateral renal agenesis, but also from autosomal recessive polycystic kidney disease, posterior urethral valves, or chronic amniotic fluid leak.

**Synonyms:**

### Powassan Encephalitis

Encephalitis caused by Powassan virus, a tick-borne flavivirus.

**Synonyms:**

### PR Interval

The time from the onset of the P wave to the onset of the QRS complex, representing the time for electrical conduction through the atria, AV node, and His-Purkinje system. Normal duration is 0.12-0.20 seconds (3-5 small boxes). Prolonged PR interval (>0.20 s) indicates first-degree AV block.

**Synonyms:**

### Prader-Willi Syndrome

A genetic disorder caused by loss of function of genes on chromosome 15 (paternal deletion or maternal uniparental disomy). Features: neonatal hypotonia and failure to thrive, followed by hyperphagia and obesity in childhood. Intellectual disability, short stature, hypogonadism, and behavioral problems.

**Synonyms:**

### Pralidoxime

An oxime that can reactivate inhibited acetylcholinesterase when administered early after organophosphate poisoning, particularly for nicotinic weakness and respiratory-muscle dysfunction. It is used with atropine and supportive care according to exposure and local guidance.

**Synonyms:**

### Pramipexole

A non-ergot dopamine agonist (D2/D3) used for Parkinson disease (as monotherapy in early disease or adjunct to levodopa) and restless legs syndrome. Activates striatal dopamine receptors.

**Synonyms:**

### Prebiotics

Non-digestible fibers feeding beneficial gut bacteria. Sources: garlic, onions, leeks, asparagus, bananas, whole grains.

**Synonyms:**

### Prebiotics and Probiotics

Prebiotics are nondigestible food ingredients (fiber and oligosaccharides—inulin, fructooligosaccharides, galactooligosaccharides) that selectively stimulate the growth and activity of beneficial gut bacteria (*Bifidobacterium*, *Lactobacillus*), promoting host health.

**Synonyms:**

### Precision Medicine

Treatment tailored to individual tumor characteristics. Requires molecular profiling.

**Synonyms:**

### Precocious Puberty

Onset of secondary sexual characteristics before age eight in girls and age nine in boys. Central precocious puberty results from early activation of the hypothalamic-pituitary-gonadal axis. Causes include CNS tumors, hydrocephalus, and idiopathic.

**Synonyms:**

### Preconception Counseling

Counseling provided to women of reproductive age before pregnancy to optimize outcomes.

**Synonyms:**

### Prediabetes

Intermediate state of hyperglycemia between normal glucose homeostasis and diabetes defined by fasting glucose 100 to 125 milligrams per deciliter, two-hour glucose during oral glucose tolerance test 140 to 199

---

milligrams per deciliter, or A1c 5.7 to 6.4 percent.

**Synonyms:**

### **Predictive Test**

A test that estimates whether a person or disease is likely to respond to a particular treatment.

**Synonyms:**

### **Preeclampsia**

A pregnancy-specific hypertensive disorder defined as new-onset hypertension (blood pressure 140/90 mmHg or higher) after 20 weeks gestation with proteinuria or other end-organ damage.

**Synonyms:**

### **Preeclampsia with Severe Features**

Preeclampsia accompanied by severe hypertension or signs of significant organ involvement, such as low platelets, liver or kidney dysfunction, pulmonary edema, severe headache, or visual symptoms. It requires urgent obstetric evaluation and management.

**Synonyms:**

### **Pregnancy**

The physiological state in which a developing embryo or fetus grows within the female uterus, typically lasting approximately 40 weeks from the last menstrual period to childbirth.

**Synonyms:**

### **Pregnancy Nutrition**

Nutrition care during pregnancy that supports maternal health, placental and fetal growth, and appropriate gestational weight gain. Energy, protein, folate, iron, iodine, choline, vitamin D, and other requirements vary by stage and individual clinical factors.

**Synonyms:**

### **Pregnancy Test**

A glycoprotein hormone produced by the placenta, detected in urine and serum for pregnancy diagnosis. See hCG (Human Chorionic Gonadotropin).

**Synonyms:**

### **Pregnancy-Induced Hypertension**

New-onset hypertension during pregnancy without the proteinuria or organ dysfunction that defines preeclampsia. Diagnosis and treatment depend on repeated blood-pressure measurements, gestational age, symptoms, and evidence of maternal or fetal complications.

**Synonyms:**

### **Preload**

The end-diastolic volume or pressure in the ventricles, representing the degree of ventricular stretch before contraction. Preload is determined by venous return and is estimated by the pulmonary capillary wedge pressure (PCWP) or left ventricular end-diastolic pressure (LVEDP).

**Synonyms:**

### **Premature (Early) Ejaculation**

A persistent or recurrent pattern of ejaculation that occurs sooner than desired, with limited control and associated personal distress. Assessment considers the person's typical experience and sexual context.

**Synonyms:** Early

### **Premature Atrial Contraction**

A premature beat arising from an ectopic focus in the atria, producing an early P wave (often abnormal morphology) followed by a normal QRS; common and usually benign, increasing with age and caffeine/stress. ECG: early abnormal P wave, normal PR and QRS, followed by a compensatory pause.

**Synonyms:**

### **Premature Ejaculation**

Ejaculation occurring sooner than desired. Most common sexual dysfunction in men. Treatment: behavioral techniques, topical anesthetics, SSRIs, counseling.

**Synonyms:**

### **Premature Ovarian Insufficiency**

Loss of ovarian function before age forty characterized by amenorrhea, hypergonadotropic hypog-

---

onadism, and estrogen deficiency. Causes include genetic disorders particularly Turner syndrome and fragile X premutations, autoimmune oophoritis, iatrogenic from chemotherapy or radiation, and idiopathic.

**Synonyms:**

### Premature Rupture of Membranes

PROM: spontaneous rupture of the amniotic membranes before the onset of labor; preterm PROM (PPROM) occurs before 37 weeks. Features: gush or leakage of fluid per vaginam; confirmed by sterile speculum (pooling, ferning, nitrazine pH test) or amniotic fluid biomarkers (IGFBP-1, PAMG-1).

**Synonyms:**

### Premature Ventricular Contractions

Ectopic beats originating from the ventricles, appearing as wide, bizarre QRS complexes that occur earlier than expected. PVCs are common in the general population and are usually benign. Frequent PVCs (>10% of total beats) may cause left ventricular dysfunction.

**Synonyms:**

### Premenstrual Dysphoric Disorder

A severe, debilitating form of premenstrual syndrome characterized by marked mood symptoms (depression, anxiety, irritability, mood swings), physical symptoms (breast tenderness, bloating, fatigue), and functional impairment that occur during the luteal phase and remit within days of menses onset.

**Synonyms:**

### Premenstrual Syndrome

A recurrent pattern of physical, emotional, and behavioral symptoms during the luteal phase of the menstrual cycle that resolve with menses. Affects up to 50% of reproductive-age women. Symptoms: irritability, mood swings, depression, anxiety, bloating, breast tenderness, fatigue, and appetite changes.

**Synonyms:**

### Prenatal Care

Regular medical care during pregnancy to mon-

itor maternal and fetal health. Includes history and physical exam, weight and blood pressure monitoring, urine testing, blood work, fundal height measurements, fetal heart rate auscultation, and ultrasound.

**Synonyms:**

### Prenatal Diagnosis

Detection of genetic or structural disorders in fetus before birth. Methods: chorionic villus sampling (CVS, 10-13 weeks), amniocentesis (15-20 weeks), percutaneous umbilical blood sampling (PUBS, after 18 weeks). Non-invasive: NIPT (cell-free fetal DNA).

**Synonyms:**

### Prenatal Exposure

Contact of a fetus with a medicine, substance, infection, or environmental factor during pregnancy. Effects depend on the agent, dose, timing, and fetal susceptibility.

**Synonyms:**

### Prenatal Vitamins

Multivitamin supplements formulated for pregnancy, containing folic acid (400-800 mcg), iron (27-60 mg), calcium (200-300 mg), vitamin D (400-600 IU), DHA (200 mg), and iodine (150-220 mcg). Started preconceptually or at the first prenatal visit. Evidence supports NTD reduction from folic acid. Iron prevents maternal anemia.

**Synonyms:**

### Preoperative Assessment

Preoperative assessment evaluates surgical risk and optimizes medical conditions before anesthesia. It includes medical history, physical examination, airway assessment, cardiovascular risk stratification ( Revised Cardiac Risk Index ), pulmonary function assessment, and laboratory testing based on clinical indication.

**Synonyms:**

### Preoperative Evaluation

Medical assessment before elective surgery to opti-

---

mize outcomes and minimize perioperative risk.

**Synonyms:**

### **Prerenal Azotemia**

A rise in nitrogen-containing waste products caused by reduced effective blood flow to the kidneys without primary renal-tissue injury. Causes include dehydration, hemorrhage, heart failure, sepsis, and hepatorenal syndrome; urine indices may support but do not by themselves establish the diagnosis.

**Synonyms:**

### **Presbycusis**

Bilateral, usually symmetric age-related sensorineural hearing loss, initially affecting high frequencies and speech discrimination in noise. Management includes hearing rehabilitation, hearing aids, communication strategies, and cochlear implantation in selected severe cases.

**Synonyms:**

### **Presbyopia**

Age-related loss of accommodation caused by lens hardening and loss of elasticity, beginning around age 40 and causing progressive difficulty with near vision. Corrected with reading glasses, bifocals, or progressive lenses; the most common refractive change of aging.

**Synonyms:**

### **Prescription**

A written or electronic order by a licensed prescriber (physician, NP, PA, dentist) authorizing a pharmacy to dispense a specific drug to a specific patient. Components: patient identifiers, drug name, dose, route, frequency, quantity, refills, and prescriber signature.

**Synonyms:**

### **Prescription Drug**

A medication whose dispensing or use is subject to prescription requirements under the applicable law. It requires professional oversight because of its risks, complexity, or need for monitoring; regulatory approval and prescribing rules vary by country and

product.

**Synonyms:**

### **Prescription Medications**

Pharmaceutical drugs that require authorization from a licensed healthcare provider before they can be dispensed to a patient. These medications are regulated because they carry risks that necessitate professional oversight, including potential side effects, drug interactions, and the need for precise dosing.

**Synonyms:**

### **Preseptal Cellulitis**

Preseptal cellulitis, also known as periorbital cellulitis, is an infection of the eyelid and periorbital tissues anterior to the orbital septum, without involvement of the orbital contents, and it is the most common orbital infection, particularly in children.

**Synonyms:** periorbital cellulitis, is an infection of the.

### **Pressure Atrophy**

The gradual wasting of tissue resulting from sustained external compression that impairs blood supply and causes cellular shrinkage and eventual death. The mechanism involves compression of blood vessels, which reduces perfusion and causes ischemia of the dependent tissue.

**Synonyms:**

### **Pressure Injury**

Localized damage to the skin and/or underlying soft tissue caused by prolonged pressure, shear, or friction, most commonly over bony prominences.

**Synonyms:**

### **Pressure Support Ventilation**

Spontaneous breathing mode with ventilator-provided pressure support above PEEP for each breath. Reduces work of breathing. Used for weaning from mechanical ventilation.

**Synonyms:**

---

## Pressure Ulcer

Localized damage to skin and underlying tissue caused by sustained pressure or pressure with shear, typically over a bony prominence. Staging includes non-blanchable erythema, partial-thickness loss, full-thickness loss, and full-thickness tissue loss with exposed or palpable deep structures; obscured wounds are unstageable.

**Synonyms:**

## Pressure Ulcer Prevention

Measures that reduce prolonged pressure and tissue injury, including repositioning, support surfaces, skin inspection, moisture control, nutrition, and mobility.

**Synonyms:**

## Pressure Urticaria

A form of chronic inducible urticaria in which sustained pressure causes localized swelling, erythema, and pain, usually after a delay of several hours. Lesions may last 8 to 72 hours and commonly affect the hands, feet, buttocks, or areas compressed by clothing or sitting.

**Synonyms:**

## Pressure-Flow Study

Suite of diagnostic procedures designed to evaluate the physiological function of the lower urinary tract (bladder and urethral sphincter) during filling, storage, and emptying phases. See urodynamic testing.

**Synonyms:**

## Presyncope

The sensation of imminent fainting (lightheadedness, weakness, visual blurring) without actual loss of consciousness, due to transient global cerebral hypoperfusion that resolves before LOC. Causes: orthostatic hypotension (volume depletion, autonomic failure, medications), vasovagal, cardiac (arrhythmias, aortic stenosis), and metabolic.

**Synonyms:**

## Preterm Birth

Birth before 37 completed weeks of gestation. It may follow spontaneous labor or rupture of the membranes, or may be medically indicated because of maternal or fetal complications.

**Synonyms:**

## Preterm Infant

An infant born before 37 completed weeks of gestation; classified by gestational age (late preterm 34-36, moderate 32-33, very preterm <32, extremely <28 weeks) and by birth weight. Causes: preterm labor, PPROM, preeclampsia, multiple pregnancy, infection, and iatrogenic.

**Synonyms:**

## Preterm Labor

Regular uterine contractions causing cervical change before 37 weeks gestation. Risk factors include prior preterm delivery, multiple gestation, infection, and cervical insufficiency. Diagnosis requires regular contractions with documented cervical change.

**Synonyms:**

## Preterm Premature Rupture of Membranes

Rupture of the amniotic membranes before the onset of labor at <37 weeks gestation. Causes: infection (subclinical chorioamnionitis), cervical insufficiency, and prior PPROM. Presents with sudden gush or leakage of fluid per vagina.

**Synonyms:**

## Pretest Probability

The estimated probability that a patient has a disease before the result of a diagnostic test is known. It is based on prevalence, symptoms, examination findings, risk factors, and prior test results and should guide test selection and interpretation.

**Synonyms:**

## Pretibial Myxedema

Localized dermopathy occurring in approximately five percent of patients with Graves disease caused by glycosaminoglycan deposition in the dermis par-

---

ticularly over the pretibial area. Presents as non-pitting indurated plaques with a peau d'orange appearance.

**Synonyms:**

### Prevalence

Total number of cases (new and existing) in population at given time. Formula: all cases / total population. Prevalence = incidence  $\times$  duration.

**Synonyms:**

### Prevention

Measures to prevent disease. Primary (before disease), secondary (early detection), tertiary (complication prevention).

**Synonyms:**

### Preventive Dentistry

Practice of preventing dental disease. Methods: oral hygiene instruction, fluoride, sealants, diet counseling, regular check-ups.

**Synonyms:**

### Prevertebral air

Gas in the prevertebral soft tissues on lateral cervical spine radiograph, indicating a breach in the aerodigestive tract. It may result from esophageal perforation, tracheal injury, retropharyngeal abscess with gas-forming organisms, or trauma.

**Synonyms:**

### Priapism

Prolonged, painful erection lasting longer than 4 hours, occurring independently of sexual desire or stimulation. Medical emergency categorized into two types: ischemic (low-flow, veno-occlusive) and non-ischemic (high-flow, arterial).

**Synonyms:**

### Primary adrenal insufficiency (Addison's disease)

Destruction or dysfunction of the adrenal cortex causing deficiency of cortisol and aldosterone, presenting with fatigue, hyperpigmentation, weight loss, and salt craving. Lifelong hormone replacement is

required.

**Synonyms:** Addison's disease

### Primary adrenal lymphoma

A rare lymphoma arising primarily in the adrenal gland, most commonly diffuse large B-cell lymphoma. It often presents bilaterally and may cause adrenal insufficiency.

**Synonyms:**

### Primary Aldosteronism

Excess production of aldosterone by the adrenal glands, usually from an adrenal nodule or enlargement of both glands. It increases sodium retention and may cause hypertension, low potassium, or suppressed renin.

**Synonyms:**

### Primary Biliary Cholangitis

A chronic autoimmune liver disease in which small intrahepatic bile ducts are progressively damaged. It can cause cholestasis, itching, fatigue, and eventually cirrhosis; antimitochondrial antibodies often support the diagnosis.

**Synonyms:**

### Primary Ciliary Dyskinesia

An inherited disorder of ciliary structure or function that impairs mucociliary clearance. It can cause chronic sinus and lung infections, bronchiectasis, infertility, and abnormal organ laterality.

**Synonyms:**

### Primary Hyperaldosteronism

Excess autonomous production of aldosterone by the adrenal glands. It can cause hypertension, low potassium, metabolic alkalosis, and suppressed renin. Causes include an adrenal adenoma or bilateral adrenal hyperplasia.

**Synonyms:**

### Primary hyperoxaluria

A group of autosomal recessive metabolic disorders characterized by overproduction of oxalate by the liver, leading to calcium oxalate deposition in the

---

kidneys and other organs. Type 1 is caused by alanine-glyoxylate aminotransferase deficiency. It presents with recurrent nephrolithiasis, nephrocalcinosis, and progressive renal failure.

**Synonyms:**

### **Primary Hyperparathyroidism**

Autonomous overproduction of parathyroid hormone from one or more abnormal parathyroid glands causing hypercalcemia. Most commonly caused by a single parathyroid adenoma accounting for approximately eighty-five percent. Multigland hyperplasia accounts for approximately ten to fifteen percent and parathyroid carcinoma is rare.

**Synonyms:**

### **Primary hypertrophic osteoarthropathy**

A rare inherited syndrome characterized by digital clubbing, periostosis of long bones, and pachydermia, presenting with joint pain, skin thickening, and visible nail-bed enlargement.

**Synonyms:**

### **Primary Immune Response**

The adaptive immune response to first exposure to an antigen, characterized by a slow onset (lag phase: days, during which antigen processing, clonal expansion, and differentiation occur), followed by rising antibody titers (predominantly IgM, then IgG), and generation of memory cells.

**Synonyms:**

### **Primary Immunodeficiency**

A group of genetically determined disorders of the immune system causing increased susceptibility to infection, autoimmunity, and malignancy.

**Synonyms:**

### **Primary Lateral Sclerosis**

A rare neurodegenerative disorder confined to the upper motor neurons (corticospinal tract) of the motor cortex and brainstem. Presents with slowly progressive spasticity, hyperreflexia, Babinski sign, and pseudobulbar affect (emotional lability).

**Synonyms:**

### **Primary Metabolism**

The essential biochemical processes by which cells produce energy, synthesize molecules, and maintain their functions.

**Synonyms:**

### **Primary Myelofibrosis**

A chronic myeloproliferative neoplasm characterized by bone marrow fibrosis (reticulin and/or collagen fibrosis), extramedullary hematopoiesis (primarily splenic and hepatic), and a leukoerythroblastic peripheral blood picture.

**Synonyms:**

### **Primary Open-Angle Glaucoma**

A chronic optic neuropathy with characteristic retinal ganglion-cell and optic-nerve loss, usually accompanied by progressive visual-field defects, despite an anatomically open anterior-chamber angle. Intraocular pressure is an important modifiable risk factor, and treatment lowers pressure to slow progression.

**Synonyms:**

### **Primary Ovarian Insufficiency**

Loss of normal ovarian activity before age 40, characterized by irregular or absent menses, reduced estrogen, and intermittently or persistently elevated gonadotropins. Causes include genetic, autoimmune, iatrogenic, toxic, infectious, and unknown factors.

**Synonyms:**

### **Primary Prevention**

Preventing cancer development. Strategies: smoking cessation, vaccination (HPV, hepatitis B), sun protection, healthy diet, exercise.

**Synonyms:**

### **Primary Sclerosing Cholangitis**

Chronic cholestatic liver disease characterized by progressive fibrosis and strictures of intrahepatic and extrahepatic bile ducts. The disease has a strong association with ulcerative colitis occurring in seventy to eighty percent of patients.

**Synonyms:**

---

### Primary Tuberculosis

The first infection with *Mycobacterium tuberculosis*. It may produce a small pulmonary focus and regional lymph-node involvement; the infection may be contained as latent tuberculosis or progress to active disease.

**Synonyms:**

### Primary Tumor

Original cancer site. Secondary: metastatic sites.

**Synonyms:**

### Primordial Prevention

Preventing the emergence of disease risk factors by addressing social, economic, behavioural, and environmental conditions early. Examples: promoting healthy diets and physical activity in children, reducing tobacco exposure, and creating safe environments for exercise.

**Synonyms:**

### Prion

An infectious agent composed solely of misfolded protein (PrP<sup>Sc</sup>) that propagates by converting normal cellular prion protein (PrP<sup>C</sup>) into the abnormal conformation; contains no nucleic acid, resistant to standard sterilization (heat, radiation, formaldehyde).

**Synonyms:**

### Prion Disease

A neurodegenerative disease caused by abnormal folding and propagation of prion protein. These disorders are rare and usually progressive and fatal, although their course varies by the specific disease.

**Synonyms:**

### PRK

Photorefractive keratectomy, commonly known as PRK, is a refractive surgical procedure that corrects myopia, hyperopia, and astigmatism by reshaping the corneal stroma using an excimer laser after mechanical removal of the corneal epithelium, without creating a corneal flap.

**Synonyms:**

### Probable Cause

A legally recognized reasonable basis for believing that a person committed an offense or that evidence of an offense will be found.

**Synonyms:**

### Probe

Instrument for exploring wound or cavity.

**Synonyms:**

### Probiotic

Live microorganisms administered in adequate amounts to confer a health benefit by modulating the microbiome and immune responses.

**Synonyms:**

### Procalcitonin

A biomarker that may rise during some bacterial infections and systemic inflammation. It can support assessment of infection and antibiotic decisions, but it cannot by itself diagnose or exclude bacterial infection or determine sepsis severity.

**Synonyms:**

### Procalcitonin-guided antibiotic therapy

The use of procalcitonin levels to guide initiation and discontinuation of antibiotics. Procalcitonin is a biomarker that rises in bacterial infections and falls with effective treatment. Elevated levels support the need for antibiotic therapy, while declining levels support discontinuation.

**Synonyms:**

### Procedural Sedation

Administration of sedative and analgesic medicines to facilitate a painful or anxiety-provoking procedure while preserving spontaneous ventilation and protective reflexes to the intended depth. Continuous monitoring and immediate rescue capability are required.

**Synonyms:**

### Procedure

A planned medical or surgical action performed for diagnosis, treatment, prevention, or palliation.

---

**Synonyms:**

### **Proctitis**

Inflammation of the rectal mucosa causing tenesmus, rectal pain, and bloody discharge. Causes include inflammatory bowel disease, sexually transmitted infections including gonorrhea, chlamydia, and herpes, radiation therapy, and ischemia. Diagnosed by proctoscopy with biopsy. Treatment is directed at the underlying etiology.

**Synonyms:**

### **Prodrug**

A prodrug is a pharmacologically inactive compound that is converted to an active drug through metabolic processes within the body. Prodrugs are designed to overcome limitations of the parent drug including poor bioavailability, rapid metabolism, lack of tissue selectivity, or unacceptable side effects.

**Synonyms:**

### **Product Liability**

Legal responsibility for injury or damage caused by a defective or unsafe product.

**Synonyms:**

### **Progeria**

A rare genetic premature-aging syndrome, most commonly caused by a pathogenic LMNA variant. Children develop severe growth failure, characteristic skin and facial changes, loss of subcutaneous fat, joint stiffness, and early atherosclerotic cardiovascular disease.

**Synonyms:**

### **Progesterone**

A natural steroid hormone produced mainly by the corpus luteum after ovulation and by the placenta during pregnancy. It transforms and maintains the endometrium for implantation, reduces uterine contractility during pregnancy, supports breast glandular development, and contributes to regulation of the menstrual cycle.

**Synonyms:**

### **Progesterone Supplementation**

Administration of progesterone to prevent preterm birth in high-risk women. Natural progesterone (17-alpha hydroxyprogesterone caproate) shown to reduce preterm birth rate in women with prior spontaneous preterm delivery. Also beneficial for short cervix detected on screening. Typically started in the second trimester.

**Synonyms:**

### **Progestogen**

A synthetic form of progesterone, the hormone that maintains the uterine lining in the secretory phase of the menstrual cycle and supports early pregnancy.

**Synonyms:**

### **Prognosis**

Predicted outcome of cancer. Factors: stage, grade, molecular features, patient status. Survivability statistics.

**Synonyms:**

### **Prognostic Test**

A test that provides information about the likely course or outcome of a disease.

**Synonyms:**

### **Progression**

Worsening or advancement of a disease, such as increasing tumor size, new lesions, or spread to another site.

**Synonyms:**

### **Progression-Free Survival**

The length of time from a defined starting point, such as diagnosis or treatment, until cancer progression or death from any cause, whichever occurs first.

**Synonyms:**

### **Progressive Disease**

Worsening of cancer during or after treatment, defined per RECIST as growth of target lesions, appearance of new lesions, or unequivocal progression of non-target lesions.

---

**Synonyms:**

### **Progressive Supranuclear Palsy**

A neurodegenerative tauopathy characterized by the accumulation of tau protein in the basal ganglia, brainstem, and cerebral cortex, belonging to the family of Parkinson plus syndromes.

**Synonyms:**

### **Projection**

A defense mechanism in which unacceptable thoughts, feelings, or impulses are attributed to others. For example, a patient who is angry at the therapist may accuse the therapist of being angry at them. It is common in paranoid thinking, delusional disorders, and personality disorders.

**Synonyms:**

### **Prolactin Physiology**

Prolactin is the only pituitary hormone primarily under tonic inhibitory control by the hypothalamus through dopamine acting on D2 receptors. Prolactin stimulates lactation suppresses GnRH and is important for reproductive function. Physiological elevations occur during pregnancy lactation breast stimulation sleep and stress.

**Synonyms:**

### **Prolactinoma**

A benign prolactin-secreting pituitary adenoma, the most common functional pituitary tumor, presenting with galactorrhea, amenorrhea, infertility, and hypogonadism in women, and decreased libido, erectile dysfunction, and visual field defects in men. Prolactin levels are markedly elevated, often above 200 ng per mL.

**Synonyms:**

### **Prolactinoma Treatment**

Treatment may include a dopamine agonist, surgery, radiation, or observation, depending on tumor size, symptoms, hormone levels, treatment response, and patient preferences. Dopamine agonists often lower prolactin levels and reduce tumor size.

**Synonyms:**

### **Prolapse of orbital fat**

Herniation of intraorbital fat through a dehiscence in the orbital septum, most commonly presenting as a painless, soft, reducible mass in the upper eyelid or lower eyelid. It is often age-related and may be confused with a lipoma or dermoid cyst.

**Synonyms:**

### **Prolapse of the Uterus (Uterine Prolapse)**

Descent of the uterus into the vaginal canal due to weakening of pelvic floor supports, most commonly the uterosacral and cardinal ligaments.

**Synonyms:** Uterine Prolapse

### **Proliferative Diabetic Retinopathy**

The advanced stage of diabetic retinopathy, characterized by the growth of new, fragile blood vessels (neovascularization) on the retinal surface, optic disc, or iris in response to severe retinal ischemia and the release of vascular endothelial growth factor.

**Synonyms:**

### **Prolonged Deceleration**

A fetal heart rate deceleration lasting  $\geq 2$  minutes but  $<10$  minutes. If the deceleration persists  $\geq 10$  minutes, it is a baseline change. Causes: maternal hypotension (epidural-induced aortocaval compression), uterine hyperstimulation, umbilical cord prolapse, placental abruption, and maternal seizure.

**Synonyms:**

### **Prolonged Second Stage**

Second stage of labor exceeding the time limits: nulliparas — 3 hours with regional anesthesia (2 hours without); multiparas — 2 hours with regional (1 hour without). Management: reassess position, contractions, and fetal status. For inadequate contractions: oxytocin augmentation. For malposition (OP, OT): manual rotation.

**Synonyms:**

### **Prominent iris collarette**

A visible thickening or ridge of the iris at the junction of the pupillary and ciliary zones, representing the site where the embryonic pupillary membrane

---

was attached. It is typically a normal anatomical variant but can be a clinical sign in conditions such as Axenfeld-Rieger syndrome or iridocorneal endothelial syndrome.

**Synonyms:**

### Promoter

DNA sequence upstream of gene where RNA polymerase and transcription factors bind to initiate transcription. Core promoter: TATA box, transcription start site. Regulatory elements: enhancers, silencers.

**Synonyms:**

### Pronation

Rotation of the forearm so that the palm faces posteriorly in anatomical position, or downward when the elbow is flexed. The radius crosses over the ulna.

**Synonyms:**

### Prone Positioning

Turning supine patients to prone for > 12 hours daily in severe ARDS. Improves oxygenation by recruiting dorsal lung segments. Reduces mortality when PaO<sub>2</sub>/FiO<sub>2</sub> < 150.

**Synonyms:**

### Propafenone

A class IC antiarrhythmic with sodium channel blockade and weak beta-blocking activity. Used for paroxysmal atrial fibrillation (in patients without structural heart disease, including 'pill-in-the-pocket'), supraventricular tachycardias, and ventricular arrhythmias.

**Synonyms:**

### Properdin Deficiency

X-linked recessive (CFP gene). Properdin stabilizes alternative pathway C3 convertase. Recurrent Neisseria infections (meningococcemia, gonococcemia). Low AH50, normal CH50, low properdin. Treatment: meningococcal vaccination (ACWY + B), prophylactic penicillin, IVIG for severe infections.

**Synonyms:**

### Prophylaxis

Preventive administration of a vaccine, antimicrobial, or immune globulin to prevent infection in exposed or at-risk individuals. Examples: post-exposure prophylaxis for rabies, HIV, and hepatitis B; perioperative antibiotic prophylaxis; and chemoprophylaxis for malaria. See also Endocarditis Prophylaxis.

**Synonyms:**

### Propofol Infusion Syndrome

Rare but fatal complication of prolonged high-dose propofol infusion. Features: metabolic acidosis, rhabdomyolysis, cardiac failure, hyperlipidemia. Risk: critical illness, children, high doses (>4-5 mg/kg/hr), prolonged infusion (>48 hours). Prevention: limit dose and duration.

**Synonyms:**

### Proprioception

The sense of body position, movement, and joint position arising from mechanoreceptors in muscles (muscle spindles), tendons (Golgi tendon organs), and joints, as well as skin receptors. Signals ascend via the dorsal column-medial lemniscal pathway (conscious proprioception) and the spinocerebellar tract (unconscious).

**Synonyms:**

### Propylthiouracil

A thioamide antithyroid drug that inhibits thyroid peroxidase (hormone synthesis) and blocks peripheral T<sub>4</sub>-to-T<sub>3</sub> conversion. Used for hyperthyroidism/Graves disease—preferred in the first trimester of pregnancy (lower teratogenicity than methimazole) and in thyroid storm.

**Synonyms:**

### Prostacyclin Analogs

Medications that mimic prostacyclin (PGI<sub>2</sub>), causing vasodilation and inhibiting platelet aggregation in the pulmonary vasculature. They include epoprostenol (continuous IV), treprostinil (subcutaneous, IV, inhaled, oral), and iloprost (inhaled). They are used for severe PAH.

---

**Synonyms:**

### **Prostaglandin Analogs**

A class of topical medications used in the treatment of open-angle glaucoma and ocular hypertension that lower intraocular pressure by increasing the uveoscleral outflow of aqueous humor, reducing intraocular pressure by approximately twenty-five to thirty-five percent.

**Synonyms:**

### **Prostaglandins**

Lipid compounds involved in labor initiation and cervical ripening. Endogenous prostaglandins (PGE<sub>2</sub>, PGF<sub>2</sub>α) stimulate uterine contractions and promote cervical softening. Synthetic analogs used clinically: misoprostol (PGE<sub>1</sub>) and dinoprostone (PGE<sub>2</sub> gel or insert) for cervical ripening and labor induction.

**Synonyms:**

### **Prostate**

Walnut-sized gland (approximately 20 g) surrounding the urethra just below the bladder, producing approximately 30 percent of seminal fluid. It has peripheral, central, and transition zones.

**Synonyms:**

### **Prostate Adenocarcinoma**

The most common non-cutaneous malignancy in men and the second leading cause of cancer death in men after lung cancer. The disease typically arises in the peripheral zone of the prostate and is hormone-dependent, requiring androgens for growth.

**Synonyms:**

### **Prostate Biopsy**

Sampling of prostate tissue, commonly by transperineal or transrectal needle technique, for histologic diagnosis of prostate cancer. Targeted and systematic cores may be combined, with attention to infection prevention, bleeding, urinary retention, and sepsis risk.

**Synonyms:**

### **Prostate Cancer**

Most common non-cutaneous cancer in men. Risk factors: age, family history, African American race, high red meat intake. Screening: PSA testing, DRE. Diagnosis: transrectal ultrasound-guided biopsy. Staging: TNM system, Gleason score.

**Synonyms:**

### **Prostate-Specific Antigen**

A serine protease produced mainly by prostate epithelial cells and secreted into seminal fluid. PSA can be measured in blood, where levels may rise with benign enlargement, inflammation, infection, or prostate cancer. Interpretation depends on age, prostate size, medicines, symptoms, and changes over time.

**Synonyms:**

### **Prostatectomy**

Surgical procedure involving the partial or total removal of the prostate gland. Simple prostatectomy: removal of the inner adenoma while leaving the peripheral capsule intact, performed open, laparoscopically, or robotically for very large BPH (>80-100 grams).

**Synonyms:**

### **Prostatitis**

Inflammation or infection of the prostate that may cause pelvic or urinary pain, difficulty urinating, fever, or recurrent urinary infections. It can be acute, chronic bacterial, or chronic pelvic pain syndrome.

**Synonyms:**

### **Prosthesis**

Artificial replacement for missing body part. Types: upper extremity, lower extremity. Components: socket, suspension, joint, pylon, terminal device. Fitting: certified prosthetist. Training: physical therapy.

**Synonyms:**

### **Prosthetic Limb**

Artificial replacement for missing limb. Types:

---

above/below knee, above/below elbow. Components: socket, suspension, joint, pylon, terminal device. Materials: carbon fiber, silicone, metal. Rehabilitation: gait training, strength, ADL.

**Synonyms:**

### **Prosthetic Training**

Training for amputees: stump care, donning/doffing, gait training, balance, stair negotiation, community ambulation.

**Synonyms:**

### **Prosthetics**

Artificial replacement of missing body part. Elderly use: lower limb (transtibial, transfemoral), upper limb. Considerations: mobility level, cognition, vision, comorbidities, support system. Rehabilitation: physical therapy, strength training, balance.

**Synonyms:**

### **Prosthodontics**

Dental specialty concerned with replacement of missing teeth and restoration of oral function. Types: fixed (crowns, bridges, implants), removable (partial dentures, complete dentures), maxillofacial prosthetics (ocular, nasal, auricular). Goals: aesthetics, function, phonetics, preservation of remaining structures.

**Synonyms:**

### **Protease inhibitor**

A class of antiretroviral drugs that block the viral protease enzyme responsible for cleaving polyprotein precursors into functional proteins during HIV replication, preventing the formation of mature, infectious virions. Used in combination antiretroviral therapy for HIV infection.

**Synonyms:**

### **Protease Inhibitors**

A class of antiviral drugs that block viral proteases, enzymes essential for processing viral polyproteins into functional components needed for viral assembly and maturation.

**Synonyms:**

### **Protective Factor**

Attribute decreasing probability of disease. Examples: exercise (cardiovascular disease), vaccination (infectious disease).

**Synonyms:**

### **Protein**

Polymer of amino acids linked by peptide bonds. Structure: primary (sequence), secondary (alpha helix, beta sheet), tertiary (3D folding), quaternary (multiple subunits). Functions: enzymes, structural, transport, signaling, immune defense, movement. Folding determined by amino acid sequence (Anfinsen's dogma). Chaperones assist folding.

**Synonyms:**

### **Protein Binding**

The reversible association of drug molecules with plasma proteins, primarily albumin for acidic drugs and alpha-1 acid glycoprotein for basic drugs. Only unbound or free drug is pharmacologically active and available for distribution to tissues, metabolism by the liver, and excretion by the kidneys.

**Synonyms:**

### **Protein C**

Natural anticoagulant. Inactivates factors Va and VIIIa. Warfarin can cause skin necrosis in deficiency.

**Synonyms:**

### **Protein C Deficiency**

An inherited (autosomal dominant) thrombophilia causing increased VTE risk. Protein C is a vitamin K-dependent natural anticoagulant that inactivates factors Va and VIIIa and stimulates fibrinolysis. Heterozygous: 6-10 fold increased VTE risk.

**Synonyms:**

### **Protein Folding**

The process by which newly synthesized polypeptide chains acquire their functional three-dimensional structures. The amino acid sequence (primary structure) determines the folding pathway.

**Synonyms:**

---

## Protein S

Vitamin K-dependent plasma glycoprotein that acts as a cofactor for activated protein C in the inactivation of factors Va and VIIIa. Deficiency or dysfunction increases the risk of venous thromboembolism.

**Synonyms:**

## Protein S Deficiency

An inherited (autosomal dominant) thrombophilia. Protein S is a vitamin K-dependent natural anticoagulant that acts as a cofactor for activated protein C in inactivating factors Va and VIIIa. Heterozygous: 2-10 fold increased VTE risk. Homozygous: rare, purpura fulminans.

**Synonyms:**

## Protein Synthesis

Translation of mRNA code into polypeptide chain. Initiation: ribosome assembly at start codon (AUG). Elongation: aminoacyl-tRNAs bring amino acids; peptide bonds form in peptidyl transferase center; ribosome translocates. Termination: stop codon (UAA, UAG, UGA) recognized by release factors.

**Synonyms:**

## Protein-Energy Malnutrition

Severe deficiency of protein and calories. Types: marasmus (chronic, wasting), kwashiorkor (acute, edema, fatty liver), marasmic-kwashiorkor. Risk: famine, poverty, alcoholism, malignancy, malabsorption. Treatment: gradual refeeding, monitor refeeding syndrome.

**Synonyms:**

## Proteinuria

Excretion of more than 150 mg of protein in urine daily. Causes include glomerular disease, tubulointerstitial disease, overflow proteinuria from multiple myeloma, and functional proteinuria from fever or exercise. Quantification by 24-hour urine or spot protein-to-creatinine ratio.

**Synonyms:**

## Prothrombin Time

PT: a coagulation test measuring the extrinsic and

common pathways (factors VII, X, V, II, fibrinogen), used to monitor warfarin therapy (reported as INR) and assess bleeding risk. Prolonged PT: warfarin/Vitamin K deficiency, liver disease, DIC, factor deficiencies (VII), and anticoagulant use.

**Synonyms:**

## Proto-Oncogene

A normal gene that regulates cell growth, division, differentiation, or survival and can become an oncogene after activating mutation, amplification, translocation, or overexpression.

**Synonyms:**

## Proton Pump Inhibitor

A class of medications that irreversibly inhibit the gastric H<sup>+</sup>/K<sup>+</sup> ATPase (proton pump) in parietal cells, the final common pathway of gastric acid secretion, producing profound and sustained suppression of both basal and stimulated acid production.

**Synonyms:**

## Proton Therapy

Radiation using protons instead of photons. Bragg peak allows precise dose delivery. Used for pediatric tumors, skull base tumors.

**Synonyms:**

## Protozoa

Single-celled eukaryotes lacking a cell wall, classified by locomotion into amoebae, flagellates, ciliates, and sporozoa.

**Synonyms:**

## Proximal

Positioned closer to the trunk of the body or point of origin of a limb.

**Synonyms:**

## Proximal Humerus Fractures

Proximal humerus fractures: Neer classification (4 parts: articular surface, greater tuberosity, lesser tuberosity, shaft; displaced >1 cm or angulated >45 degrees = part). 1-part (nondisplaced): sling, early motion. 2-part: surgical neck (ORIF plate, IM nail)

---

or greater tuberosity (if displaced >5mm or rotator cuff involvement).

**Synonyms:**

### Proximal Radioulnar Joint

Pivot synovial joint between radial head circumference and ulnar radial notch, held by the annular ligament. Allows pronation/supination with approximately 150 degrees range. Parallel bones in supination; radius crosses ulna in pronation. Significant in radial head fractures, Monteggia fracture-dislocations, and nursemaid's elbow.

**Synonyms:**

### Proximal Tubule

Segment of the nephron extending from Bowman capsule to the loop of Henle with a convoluted proximal straight tubule and convoluted proximal tubule. Responsible for reabsorbing approximately sixty-five percent of filtered sodium, water, bicarbonate, glucose, amino acids, and phosphate through an extensive brush border.

**Synonyms:**

### Proximal Tubule Reabsorption

The proximal convoluted tubule (PCT) reabsorbs approximately 65 percent of filtered sodium, water, glucose, amino acids, bicarbonate, and phosphate.

**Synonyms:**

### Proximate Cause

The legally sufficient cause that directly contributes to an injury or outcome.

**Synonyms:**

### Prune Belly Syndrome

A congenital syndrome comprising the triad: deficient abdominal wall musculature (wrinkled, prune-like appearance), bilateral cryptorchidism (undescended testes), and urinary tract anomalies (dilated ureters, dilated and trabeculated bladder, and posterior urethral valves or urethral atresia). Almost exclusively affects boys.

**Synonyms:**

### Pruritus

Itching; an unpleasant sensation provoking scratching, a common symptom of skin and systemic disease.

**Synonyms:**

### Pruritus Ani

Persistent itching around the anus with multiple potential causes including hemorrhoids, fissures, infections such as pinworms and candidiasis, dermatologic conditions including psoriasis and lichen sclerosus, and idiopathic causes.

**Synonyms:**

### Pruritus in CKD

Severe itching in dialysis patients from uremic toxin accumulation, elevated calcium-phosphorus product, and secondary hyperparathyroidism. Difficult to treat. Include phosphate binders, dialysis optimization, gabapentin, and UV phototherapy.

**Synonyms:**

### PSA (Prostate-Specific Antigen)

A serine protease produced by prostate tissue and measured in blood. It may be used with shared decision-making to assess prostate-cancer risk and to monitor known disease. PSA can also rise with benign enlargement, inflammation, infection, or recent procedures, so no single value establishes or excludes cancer.

**Synonyms:** Prostate-Specific Antigen

### Pseudoaneurysm

A contained arterial wall disruption in which blood communicates with the arterial lumen but is held by surrounding tissue rather than all layers of the arterial wall. It may follow catheterization, trauma, surgery, infection, or grafting and can rupture or embolize.

**Synonyms:**

### Pseudobulbar Affect

Involuntary episodes of laughing or crying disproportionate to mood, usually due to neurologic disease.

**Synonyms:**

---

### **Pseudoclubbing**

Broadening and flattening of the nail tips without the complete loss of the angle between the nail and nail fold that characterizes true clubbing. It is seen in conditions such as hyperparathyroidism, rheumatoid arthritis, and psoriasis.

**Synonyms:**

### **Pseudoephedrine**

A sympathomimetic (alpha-1 agonist, some beta effects) oral decongestant used for nasal congestion in colds and sinusitis. Increases nasal mucosal vasoconstriction.

**Synonyms:**

### **Pseudogout**

Calcium pyrophosphate deposition disease (CPPD): deposition of calcium pyrophosphate dihydrate crystals in joints, causing acute arthritis resembling gout (pseudogout) or chronic osteoarthritis-like disease.

**Synonyms:**

### **Pseudogout Flare**

Acute crystal-induced arthritis caused by calcium pyrophosphate dihydrate deposition, often affecting the knee or wrist. Identification of positively birefringent rhomboid crystals in synovial fluid supports the diagnosis.

**Synonyms:**

### **Pseudohypoparathyroidism**

A group of inherited disorders in which target organs are resistant to parathyroid hormone, causing hypocalcaemia and hyperphosphataemia despite elevated PTH. Some forms cause Albright hereditary osteodystrophy, with short stature, round facies, brachydactyly, or subcutaneous ossifications.

**Synonyms:**

### **Pseudomelanosis duodeni**

Benign condition characterized by dark pigment deposits in the duodenal mucosa, visible as slate-gray or black patches on endoscopy, caused by accumulation of iron-containing pigment in macrophages within the lamina propria.

**Synonyms:**

### **Pseudomembranous Colitis**

Colonic inflammation caused by *C. difficile* infection showing yellow-white plaques on colonoscopy. The plaques consist of fibrin, inflammatory cells, and necrotic epithelial debris overlying mucosal ulceration. Presents with profuse watery diarrhea and abdominal pain.

**Synonyms:**

### **Pseudomonas aeruginosa infection**

Infection caused by *Pseudomonas aeruginosa*, an opportunistic gram-negative bacterium that can affect the lungs, wounds, urinary tract, blood, or other sites.

**Synonyms:**

### **Pseudomonas aeruginosa resistance**

*Pseudomonas aeruginosa* has intrinsic and acquired resistance mechanisms making it inherently resistant to many antibiotics. Intrinsic resistance includes low outer membrane permeability, efflux pumps, and chromosomal beta-lactamase.

**Synonyms:**

### **Pseudomyxoma Peritonei**

Accumulation of mucinous ascites and mucin-producing tumor nodules in the peritoneal cavity, usually from a ruptured low-grade appendiceal or ovarian mucinous neoplasm; treated with cytoreductive surgery and hyperthermic intraperitoneal chemotherapy.

**Synonyms:**

### **Pseudothrombocytosis due to red cell fragments**

Falsely elevated platelet count on automated hematology analyzers caused by fragmentation of red blood cells (schistocytes) being counted as platelets. Seen in microangiopathic hemolytic anemias such as TTP, HUS, DIC, and mechanical heart valves. Manual peripheral blood smear review confirms true platelet count.

**Synonyms:**

---

### **Pseudoxanthoma elasticum**

An inherited connective tissue disorder caused by mutations in the ABCC6 gene, leading to progressive calcification and fragmentation of elastic fibres in the skin, eyes, and cardiovascular system. Cutaneous findings include yellowish, peau d'orange papules in flexural areas (neck, axillae, groin) resembling plucked chicken skin.

**Synonyms:**

### **Psittacosis**

A zoonotic infection caused by *Chlamydia psittaci*, transmitted from infected birds (parrots, pigeons, poultry) via inhalation of dried bird droppings/secretions. Features: abrupt fever, headache, myalgia, dry cough, atypical pneumonia; complications: hepatitis, myocarditis, meningitis.

**Synonyms:**

### **PSMA**

Prostate-specific membrane antigen. Target for PET imaging and therapy in prostate cancer.

**Synonyms:**

### **Psoas Abscess**

A collection of pus in or around the psoas muscle, caused by infection spreading through the blood or from nearby tissues. It may cause back or hip pain, fever, difficulty walking, or few symptoms and usually requires imaging and targeted treatment.

**Synonyms:**

### **Psoriasis**

A chronic immune-mediated skin disorder that causes well-defined plaques with overlying scale. It may also affect the nails and joints, and its severity and distribution vary among individuals.

**Synonyms:**

### **Psoriatic Arthritis**

An inflammatory arthritis associated with psoriasis of the skin or nails. It may affect the spine, peripheral joints, digits, or tendon insertions, and diagnosis uses the clinical pattern together with appropriate laboratory and imaging findings.

**Synonyms:**

### **Psychoactive Substance**

A substance that alters mood, perception, cognition, behavior, or consciousness.

**Synonyms:**

### **Psychodermatology**

Psychodermatology addresses the mind-skin connection. Stress exacerbates psoriasis, eczema, acne, and urticaria. Psychiatric disorders (depression, anxiety, body dysmorphic disorder) are associated with skin conditions.

**Synonyms:**

### **Psychodynamic Therapy**

A form of depth psychology that explores how unconscious processes, early life experiences, and internal conflicts influence current thoughts, feelings, and behaviors. It involves exploration of transference and countertransference, defense mechanisms, and the therapeutic relationship as a vehicle for change.

**Synonyms:**

### **Psychogenic Non-Epileptic Seizures**

Seizure-like episodes that are not caused by abnormal electrical activity in the brain. They are a form of conversion disorder with attacks or seizures. Events may include shaking, stiffening, unresponsiveness, and other movements.

**Synonyms:**

### **Psychological Support**

Counseling, therapy for patients with chronic illness, disability, pain. Address depression, anxiety, adjustment difficulties, coping strategies.

**Synonyms:**

### **Psychopharmacology**

The study and clinical application of medications used to treat psychiatric disorders. It involves understanding drug mechanisms, pharmacokinetics, drug interactions, and side effect profiles.

**Synonyms:**

---

## **Psychosis**

A syndrome characterized by loss of contact with shared reality, commonly involving delusions, hallucinations, disorganized thought or behavior, and negative symptoms. Causes include primary psychotic disorders, mood disorders, substances, medications, neurologic disease, and systemic illness.

**Synonyms:**

## **Psychosocial Rehabilitation**

Support for mental illness recovery: skills training, supported employment, peer support.

**Synonyms:**

## **Psychosocial Support**

Cancer affects mental health. Depression, anxiety common. Support groups, counseling beneficial.

**Synonyms:**

## **Psychotherapy**

A structured treatment in which a trained therapist helps a person understand and change distressing thoughts, emotions, behaviors, or relationship patterns. Major approaches include cognitive behavioral therapy, psychodynamic therapy, interpersonal therapy, supportive therapy, exposure-based therapy, and family or group therapy.

**Synonyms:**

## **Pterygium**

A triangular, fibrovascular proliferation of bulbar conjunctiva extending onto the cornea, usually nasal, associated with chronic ultraviolet exposure, dust, and dry climates. Most are asymptomatic or cause mild irritation, but growth toward the visual axis can induce astigmatism and obstruct vision.

**Synonyms:**

## **PTH-Related Peptide**

A peptide that activates the parathyroid-hormone receptor and can cause humoral hypercalcemia of malignancy. It increases bone resorption and renal calcium retention while reducing phosphate reabsorption.

**Synonyms:**

## **Pthirus pubis**

The pubic louse, a parasitic insect that infests the pubic hair and occasionally other coarse body hair, causing pediculosis pubis. Transmission is primarily through sexual contact. It causes intense pruritus and may transmit *Borrelia recurrentis* causing relapsing fever. Diagnosis is by visual identification of the louse or nits.

**Synonyms:**

## **Ptosia**

The drooping of the upper eyelid, which can be congenital or acquired, and can range from mild drooping that is primarily a cosmetic concern to severe drooping that obstructs the visual axis and causes amblyopia in children or visual impairment in adults.

**Synonyms:**

## **PTSD**

Post-traumatic stress disorder, a condition involving persistent trauma-related memories, avoidance, negative mood or cognition, and heightened arousal after a severe traumatic event.

**Synonyms:**

## **Puberty**

Developmental period during which sexual maturation and reproductive capability are attained.

**Synonyms:**

## **Pubis**

Anterior-inferior hip bone with body, superior ramus, and inferior ramus. Two pubic bones meet at the pubic symphysis (cartilaginous joint widening in childbirth). Pubic tubercle is the lateral inguinal ligament attachment. Direct hernias emerge medial to inferior epigastric vessels near it.

**Synonyms:**

## **Public Exposure**

Radiation exposure to public from nuclear medicine patients. Guidelines for discharge after therapy. I-131 therapy: radiation safety instructions for 3-7 days.

---

**Synonyms:**

### **Public Health**

The science and practice of protecting and improving the health of communities through education, policy-making, and research for disease and injury prevention.

**Synonyms:**

### **Public Health Emergency**

Event threatening public health. Examples: pandemic, bioterrorism, natural disaster. Declaration enables special powers.

**Synonyms:**

### **Public Health Research Bias**

Systematic error in a population-health study, including selection bias, information bias, and confounding.

**Synonyms:**

### **Pudendal Block**

A local anesthetic block of the pudendal nerve (S2-S4) used for perineal anesthesia during the second stage of labor, outlet forceps delivery, or perineal repair. Technique: transvaginal approach — a needle guide is placed on the ischial spine, and the needle is advanced through the sacrospinous ligament.

**Synonyms:**

### **Puerperal Fever**

Fever higher than 38 degrees Celsius occurring during the first 10 days postpartum, not including the first 24 hours. Most common cause is endometritis, particularly after cesarean delivery. Other causes include urinary tract infection, wound infection, mastitis, and thrombophlebitis.

**Synonyms:**

### **Puerperal psychosis**

A rare psychiatric emergency beginning soon after childbirth, characterized by rapidly changing mood, confusion, delusions, hallucinations, or disorganized behavior.

**Synonyms:**

### **Puerperium**

The period following delivery during which the reproductive organs return to their prepregnancy state, approximately 6 weeks in duration. Characterized by uterine involution, cervical closure, lochial discharge changes, and hormonal shifts. Physical recovery includes perineal healing, breast engorgement, and metabolic readjustment.

**Synonyms:**

### **Pugilistic Stance**

The characteristic body position adopted by fire victims—flexed arms, elbows bent, fists clenched, knees flexed—resulting from heat-induced contraction (denaturation) of muscles (mainly flexors) and tendons, not from conscious movement. It occurs with thermal injury and can be present regardless of cause (even if death preceded fire).

**Synonyms:**

### **Pulmonary Alveolar Hemorrhage**

Bleeding into the alveolar spaces from disruption of the alveolar-capillary membrane. Causes include vasculitis (GPA, MPA, Goodpasture), connective tissue disease, medications, and coagulopathy. It presents with hemoptysis, falling hemoglobin, diffuse bilateral infiltrates, and serially bloody returns on BAL.

**Synonyms:**

### **Pulmonary Alveolar Microlithiasis**

A rare genetic disease caused by SLC34A2 mutations, leading to accumulation of calcium phosphate microliths within the alveoli. HRCT shows diffuse bilateral calcified nodules with a “sandstorm” appearance. It is usually diagnosed in the third to fourth decade.

**Synonyms:**

### **Pulmonary Alveolar Proteinosis**

A rare disease characterized by accumulation of surfactant-like material within the alveoli due to impaired clearance by alveolar macrophages. Most cases are autoimmune (anti-GM-CSF antibodies). Presents with progressive dyspnea and cough. HRCT shows bilateral ground-glass opacities with

---

“crazy paving” pattern.

**Synonyms:**

### **Pulmonary Angiography**

Contrast imaging of the pulmonary arteries, usually by catheter. It can diagnose pulmonary vascular abnormalities but is now used less often for pulmonary embolism because CT pulmonary angiography is less invasive.

**Synonyms:**

### **Pulmonary Arterial Hypertension**

A precapillary pulmonary hypertension syndrome caused by increased pulmonary vascular resistance from pulmonary arteriolar disease. It may be idiopathic, heritable, drug-associated, or associated with conditions such as connective-tissue disease, congenital heart disease, portal hypertension, or HIV.

**Synonyms:**

### **Pulmonary Arteriovenous Fistula**

An abnormal direct connection between a pulmonary artery and vein that bypasses the capillary bed. It can cause hypoxemia, cyanosis, dyspnea, paradoxical emboli, or brain abscess.

**Synonyms:**

### **Pulmonary Arteriovenous Malformation**

An abnormal direct communication between a pulmonary artery and vein, causing a right-to-left shunt. It may be idiopathic or associated with hereditary hemorrhagic telangiectasia (Osler-Weber-Rendu syndrome). It can cause hypoxemia, paradoxical emboli (stroke, brain abscess), and hemoptysis.

**Synonyms:**

### **Pulmonary Artery**

The blood vessel that carries deoxygenated blood from the right ventricle of the heart to the lungs.

**Synonyms:**

### **Pulmonary Artery Catheter**

A catheter inserted through the right heart into the pulmonary artery to measure hemodynamic

parameters (PA pressure, PAWP, cardiac output). Used for diagnosis and management of pulmonary hypertension, heart failure, and critical illness.

**Synonyms:**

### **Pulmonary Atresia**

A congenital heart defect where the pulmonary valve is completely absent (atretic), obstructing right ventricular outflow. Two main types: pulmonary atresia with intact ventricular septum (PA-IVS) and pulmonary atresia with ventricular septal defect (PA-VSD, also called tetralogy of Fallot with pulmonary atresia).

**Synonyms:** tetralogy of Fallot with pulmonary atresia).

### **Pulmonary Capillary Wedge Pressure**

An indirect estimate of left-atrial pressure obtained by briefly occluding a small pulmonary-artery branch with a balloon-tipped catheter. It reflects left-sided filling pressure when measured correctly and interpreted in the appropriate clinical and ventilatory context.

**Synonyms:**

### **Pulmonary Contusion**

Bruising of the lung parenchyma from blunt chest trauma, causing hemorrhage and edema without lung laceration. It impairs gas exchange and can progress to ARDS. It is often associated with rib fractures and flail chest. Treatment is supportive with lung-protective ventilation.

**Synonyms:**

### **Pulmonary Edema**

Accumulation of fluid in the pulmonary interstitium and alveoli, most commonly due to left-sided heart failure (cardiogenic). Causes increased hydrostatic pressure leads to transudation. Presents with acute dyspnea, orthopnea, crackles, and S3 gallop. Non-cardiogenic causes include ARDS, renal failure, and high altitude.

**Synonyms:**

---

## Pulmonary Embolism

Occlusion of the pulmonary arterial bed by a thrombus, tumor, air, or fat, most commonly originating as a deep vein thrombosis (DVT) from the lower extremities. Presents with acute onset of dyspnea, pleuritic chest pain, cough, hemoptysis, tachycardia, and hypoxemia.

**Synonyms:**

## Pulmonary Embolism Treatment

Anticoagulation: DOACs preferred (rivaroxaban, apixaban) or LMWH bridging to warfarin. Duration: 3 months for provoked (reversible risk factor), indefinite for unprovoked or recurrent. Massive PE: systemic thrombolysis (alteplase 100 mg IV over 2 hours) or surgical catheter-directed embolectomy.

**Synonyms:**

## Pulmonary Fibrosis

Scarring replacing normal alveolar architecture. Causes: IPF, connective tissue disease, asbestos, radiation, drugs (bleomycin, methotrexate). Features: progressive dyspnea, dry cough, digital clubbing.

**Synonyms:**

## Pulmonary Function Tests

Spirometry: FVC (forced vital capacity), FEV1 (forced expiratory volume in 1 second), FEV1/FVC ratio. Obstructive pattern: FEV1/FVC <0.7 (asthma, COPD). Restrictive pattern: FVC <80% with normal or increased FEV1/FVC (pulmonary fibrosis, chest wall disorders). Lung volumes: TLC (total lung capacity), RV (residual volume).

**Synonyms:**

## Pulmonary Hemosiderosis

Accumulation of iron-containing pigment in the lungs, usually after repeated bleeding into the air spaces. It may cause cough, coughing blood, anemia, shortness of breath, or diffuse lung changes and can result from immune-mediated or other disorders.

**Synonyms:**

## Pulmonary Hypertension

Elevated mean pulmonary artery pressure (>20

mmHg at rest) due to various etiologies. WHO Group 1: pulmonary arterial hypertension (idiopathic, heritable, drug-induced). Group 2: left heart disease. Group 3: lung disease. Group 4: chronic thromboembolic. Group 5: multifactorial. Diagnosis requires right heart catheterization.

**Synonyms:**

## Pulmonary Hypertension Classification

WHO Classification: Group 1 (PAH: idiopathic, heritable, drug-induced, connective tissue disease-associated). Group 2 (left heart disease: systolic/diastolic dysfunction, valvular). Group 3 (lung disease/hypoxia: COPD, ILD, sleep apnea). Group 4 (chronic thromboembolic). Group 5 (multifactorial: sarcoidosis, hematologic disorders).

**Synonyms:**

## Pulmonary Infarction

Lung necrosis from PE when bronchial supply is compromised. Causes pleuritic pain, hemoptysis, and wedge-shaped opacity. Most PE do not cause infarction due to dual blood supply.

**Synonyms:**

## Pulmonary Lobes

The anatomical divisions of the lungs separated by interlobar fissures. The right lung has superior, middle, and inferior lobes; the left lung has superior and inferior lobes and a lingula.

**Synonyms:**

## Pulmonary Rehabilitation

A supervised, multidisciplinary program combining exercise training, education, behavioral support, and self-management for chronic respiratory disease. It improves exercise capacity, dyspnea, functional status, and quality of life.

**Synonyms:**

## Pulmonary Sequestration

A congenital malformation of non-functioning lung tissue that lacks normal communication with the tracheobronchial tree and receives its blood supply from a systemic artery (usually the descending

---

aorta). Intralobar sequestration is within the normal pleural investment; extralobar is outside.

**Synonyms:**

### **Pulmonary Stenosis**

A right ventricular outflow tract obstruction at the valvular, subvalvular, or supra-valvular level. Valvular pulmonary stenosis (most common) is often congenital, frequently associated with Noonan syndrome.

**Synonyms:**

### **Pulmonary Surfactant**

A phospholipid-protein mixture produced by type II alveolar pneumocytes that reduces surface tension at the air-liquid interface within alveoli. The primary component is dipalmitoylphosphatidylcholine (DPPC, lecithin), which forms a monolayer that reduces surface tension to near zero during expiration.

**Synonyms:**

### **Pulmonary tuberculosis**

Tuberculosis infection involving the lungs, usually caused by *Mycobacterium tuberculosis* and spread through airborne particles.

**Synonyms:**

### **Pulmonary Valve**

Semilunar valve between right ventricle and pulmonary trunk with three cusps. Most superiorly located cardiac valve with thinner cusps than the aortic valve. Pulmonic stenosis is a congenital defect causing right ventricular hypertrophy. Less commonly affected by endocarditis than mitral/aortic valves.

**Synonyms:**

### **Pulmonary Vascular Resistance**

The resistance to blood flow through the pulmonary circulation, calculated approximately as the transpulmonary pressure gradient divided by cardiac output. Elevated resistance contributes to pulmonary hypertension and right-ventricular afterload.

**Synonyms:**

### **Pulmonary Vasodilator Therapy**

Medications that reduce pulmonary vascular resistance and pulmonary artery pressure. Used for WHO Group 1 PAH. Includes endothelin receptor antagonists (bosentan), PDE-5 inhibitors (sildenafil), prostacyclin analogs (epoprostenol), and soluble guanylate cyclase stimulators (riociguat).

**Synonyms:**

### **Pulmonary Vein**

The four veins (two from each lung) returning oxygenated blood from the lungs to the left atrium, a unique exception in the venous system (carrying oxygenated blood). Superior and inferior pulmonary veins enter the left atrium posteriorly.

**Synonyms:**

### **Pulmonary Wedge Pressure**

The pressure measured by a balloon-tipped pulmonary artery catheter when the balloon is inflated, occluding a branch of the pulmonary artery. It approximates left atrial pressure. Normal is 6–12 mmHg. Elevated in left heart failure (PCWP > 18 mmHg). Low in hypovolemia.

**Synonyms:**

### **Pulmonary-artery dissection**

Rare but life-threatening tear in the pulmonary artery wall, most commonly associated with pulmonary hypertension, Marfan syndrome, or prior pulmonary artery catheterization. Presents with acute chest pain, dyspnea, and hemodynamic collapse. Diagnosis by CT angiography or echocardiography; management requires emergent surgical repair.

**Synonyms:**

### **Pulp**

Soft connective tissue central to tooth containing blood vessels, nerves, connective tissue. Responds to injury with inflammation, necrosis, calcification. Root canal therapy removes infected pulp.

**Synonyms:**

---

### **Pulp Stone**

Calcified mass in pulp chamber or root canal. May be free, attached, or embedded. Incidental finding.

**Synonyms:**

### **Pulpectomy**

Complete removal of pulp from primary tooth. Followed by resorbable filling material.

**Synonyms:**

### **Pulposus**

Relating to the nucleus pulposus, the gelatinous central portion of an intervertebral disk.

**Synonyms:**

### **Pulpotomy**

Removal of coronal pulp in primary tooth with reversible inflammation. Maintains radicular pulp vitality.

**Synonyms:**

### **Pulse**

The rhythmic expansion of an artery produced by each heartbeat. Clinicians assess its rate, rhythm, strength, and symmetry.

**Synonyms:**

### **Pulse Examination**

Assessment of arterial pulses for rate, rhythm, strength, and symmetry to help evaluate circulation.

**Synonyms:**

### **Pulse Oximeter**

A noninvasive device that estimates peripheral oxygen saturation using light absorption. Readings can be affected by poor perfusion, motion, skin or nail characteristics, device limitations, and the clinical setting.

**Synonyms:**

### **Pulse Oximetry**

A noninvasive method for estimating peripheral oxygen saturation by measuring red and infrared light absorption through a pulsatile vascular bed. It is

widely used for monitoring, but values must be interpreted with symptoms, perfusion, device limitations, and the individual's clinical targets.

**Synonyms:**

### **Pulseless Electrical Activity**

A cardiac arrest rhythm organized electrical activity without a detectable pulse. PEA has many reversible causes (5 H's and 5 T's): hypovolemia, hypoxia, hydrogen ion (acidosis), hypo/hyperkalemia, hypothermia; tension pneumothorax, tamponade (cardiac), toxins, thrombosis (pulmonary), thrombosis (coronary).

**Synonyms:**

### **Pulsus Paradoxus**

A decrease in systolic blood pressure greater than 10 mmHg during inspiration, normally less than 10 mmHg. Exaggerated in cardiac tamponade (due to ventricular interdependence in the confined pericardial space), severe asthma, COPD exacerbation, and constrictive pericarditis.

**Synonyms:**

### **Punch Biopsy**

A small, full-thickness circular biopsy obtained with a rotating trephine, used to diagnose skin and soft-tissue lesions. Suture closure may be needed.

**Synonyms:**

### **Punctate Hemorrhages (Tardieu Spots)**

Small, pinpoint sub-ecchymotic hemorrhages (petechiae) resulting from the rupture of small capillaries under conditions of intense mechanical venous engorgement and asphyxia.

**Synonyms:** Tardieu Spots

### **Punctate palmoplantar keratoderma**

A hereditary keratoderma characterised by multiple, small, firm, circumscribed keratotic papules and plaques scattered across the palms and soles, often with an autosomal dominant inheritance pattern. It may present in adolescence or adulthood and can be associated with malignant transformation in rare cases.

---

**Synonyms:**

### **Pupil**

Central round iris aperture for light entry, size controlled by sphincter pupillae (CN III parasympathetic, constricts to 2-3 mm) and dilator pupillae (sympathetic, dilates to 8 mm). The pupillary light reflex tests CN II (afferent) and CN III (efferent): light in one eye causes bilateral constriction (direct and consensual).

**Synonyms:**

### **Pure Tone Audiometry**

The standard behavioral test used to measure hearing sensitivity across the frequency range important for speech perception, typically from 250 to 8000 Hertz, by determining the lowest intensity level at which a pure tone can be detected approximately fifty percent of the time (the hearing threshold).

**Synonyms:**

### **Purging**

Deliberate behaviors intended to compensate for eating, such as self-induced vomiting or misuse of laxatives, diuretics, or excessive exercise.

**Synonyms:**

### **Purging Disorder**

Recurrent purging behavior to influence weight or shape in the absence of binge eating. Self-induced vomiting, misuse of laxatives, diuretics, or other medications. It is classified under Other Specified Feeding or Eating Disorder (OSFED). It can lead to electrolyte imbalances, dental erosion, Russell's sign, and esophageal tears.

**Synonyms:**

### **Purines**

Nitrogenous bases containing a double-ring structure (a six-membered ring fused to a five-membered imidazole ring), which serve as essential components of nucleotides in DNA and RNA. The primary purines are adenine (A) and guanine (G).

**Synonyms:**

### **Purkinje Fibers**

The terminal branches of the cardiac conduction system, distributed throughout the ventricular myocardium. They conduct impulses rapidly (up to 4 m/s) to ensure coordinated ventricular contraction from apex to base. Purkinje fibers have an intrinsic firing rate of 20-40 beats per minute.

**Synonyms:**

### **Purpura**

Purple discoloration of the skin or mucous membranes caused by extravasation of red blood cells from blood vessels into the surrounding tissue. Purpura can be classified by size: petechiae are less than 2 millimeters, purpura are 2 to 10 millimeters, and ecchymoses are greater than 10 millimeters.

**Synonyms:**

### **Purpura fulminans**

A rapidly progressive, life-threatening condition characterised by extensive, confluent, non-blanching purpuric skin necrosis with haemorrhagic bullae, resulting from acute intravascular thrombosis and disseminated intravascular coagulation.

**Synonyms:**

### **Purulent Pericarditis**

Bacterial infection of the pericardial space, most commonly caused by *S. aureus*, *S. pneumoniae*, or gram-negative organisms. Often occurs as a complication of pneumonia, endocarditis, chest surgery, or immunosuppression. Presents with fever, pleuritic chest pain, and rapidly accumulating effusion with tamponade physiology.

**Synonyms:**

### **Pus**

A thick, yellow or green liquid that is composed of dead cells and bacteria, most often found at the site of a bacterial infection.

**Synonyms:**

### **Push Enteroscopy**

Endoscopic technique using a longer endoscope to visualize and intervene in the proximal small bowel

---

beyond the reach of standard upper endoscopy. Unlike capsule endoscopy, push enteroscopy allows direct visualization with the ability to obtain biopsies and perform hemostasis.

**Synonyms:**

### **Pustule**

A small, circumscribed elevation of skin containing pus (neutrophils) within the epidermis. Causes: bacterial (folliculitis, impetigo, furuncle), acne vulgaris (inflammatory comedones), pustular psoriasis (generalized pustular psoriasis—systemic symptoms), hidradenitis suppurativa, and drug reactions.

**Synonyms:**

### **Putrefaction**

Postmortem decomposition of body tissues brought about by bacterial and enzymatic action, characterized by green discoloration of lower abdomen (cecum), marbling of cutaneous veins, gas distension, foul odor, and liquefaction.

**Synonyms:**

### **Pyelonephritis**

An infection of the renal parenchyma and pelvicalyceal system, typically resulting from ascending urinary tract infection. Acute pyelonephritis most commonly affects women and is caused by gram-negative enteric organisms, particularly *Escherichia coli*, which account for approximately 80 percent of cases.

**Synonyms:**

### **Pyelotomy**

An incision into the renal pelvis, usually made to remove an obstruction or kidney stone.

**Synonyms:**

### **Pylephlebitis**

Septic thrombophlebitis of the portal vein or its tributaries, most commonly arising from intra-abdominal infections such as appendicitis, diverticulitis, cholangitis, or hepatic abscess. Presents with high fever, rigors, right upper quadrant pain, jaundice, and sepsis.

**Synonyms:**

### **Pyloric Stenosis**

Hypertrophy of the pyloric sphincter muscle causing gastric outlet obstruction most common in young infants. Presents with non-bilious projectile vomiting typically beginning at two to eight weeks of age. Dehydration and metabolic alkalosis with hypochloremia and hypokalemia develop as the condition progresses.

**Synonyms:**

### **Pylorus**

The muscular outlet of the stomach that connects to the duodenum. Its sphincter regulates the passage of partially digested food into the small intestine; narrowing or blockage can cause vomiting, abdominal distension, and dehydration, especially in infants with pyloric stenosis.

**Synonyms:**

### **Pyoderma Gangrenosum**

A neutrophilic inflammatory skin disorder that causes painful ulcers with undermined, violaceous borders. It may be associated with inflammatory bowel disease, arthritis, blood disorders, or other systemic conditions, and trauma can worsen the lesions.

**Synonyms:**

### **Pyogenic Granuloma**

A benign vascular proliferation presenting as a rapidly growing, friable, red papule or nodule that bleeds easily. It commonly occurs on fingers, face, and lips, and may be triggered by trauma or pregnancy (epulis gravidarum). Diagnosis is clinical.

**Synonyms:**

### **Pyonephrosis**

Pus in renal collecting system. Urological emergency. Requires drainage (stent or nephrostomy) and antibiotics.

**Synonyms:**

---

### **Pyostomatitis vegetans**

A rare, chronic, inflammatory oral mucosal condition characterized by multiple, soft, yellowish, vegetative pustules on an erythematous base, predominantly affecting the buccal mucosa and gingiva. It is strongly associated with inflammatory bowel disease, particularly ulcerative colitis, and may precede gastrointestinal symptoms.

**Synonyms:**

### **Pyrexia**

A regulated rise in body temperature caused by changes in the hypothalamic temperature set point. See Fever.

**Synonyms:**

### **Pyridoxine (Vitamin B6)**

A vitamin converted to pyridoxal phosphate, a coenzyme for transamination, decarboxylation, and other amino-acid reactions. Deficiency can cause neuropathy, dermatitis, seizures, and sideroblastic anemia; excessive supplementation can also cause neuropathy.

**Synonyms:** Vitamin B6

### **Pyrimidines**

Nitrogenous bases containing a single six-membered heterocyclic ring, serving as structural building blocks for nucleic acids. The primary pyrimidines are cytosine (C), thymine (T, present in DNA), and uracil (U, present in RNA).

**Synonyms:**

### **Pyruvate**

The three-carbon alpha-keto acid produced at the end of glycolysis from phosphoenolpyruvate by pyruvate kinase.

**Synonyms:**

### **Pyruvate Dehydrogenase**

Converts pyruvate to acetyl-CoA. Regulated by phosphorylation (inactivated by PDH kinase). Requires thiamine, lipoate, CoA, FAD, NAD+.

**Synonyms:**

### **Pyruvate Kinase Deficiency**

An inherited red-cell glycolytic defect causing chronic hemolytic anemia of variable severity. Manifestations include jaundice, splenomegaly, gallstones, fatigue, and complications of iron overload.

**Synonyms:**

### **Pannus**

An abnormal layer of vascularized tissue that grows over a joint or the cornea.

**Synonyms:**

### **Paraplegia**

Paralysis of both legs and usually part of the lower trunk.

**Synonyms:**

### **Parasomnias**

Unwanted movements, behaviors, emotions, or experiences that occur during sleep or at the transition between sleep and wakefulness.

**Synonyms:**

### **Parathyroid Hormone**

A hormone that regulates calcium and phosphate levels in the blood and supports bone remodeling.

**Synonyms:**

### **Paroxysmal Hemicrania**

A rare headache disorder causing brief, repeated attacks of severe one-sided head or facial pain.

**Synonyms:**

### **Passive Immunity**

Protection against infection provided by antibodies received from another source rather than produced by the person's own immune system.

**Synonyms:**

### **Patch Test**

A skin test used to identify delayed allergic contact reactions to substances applied under adhesive patches.

**Synonyms:**

---

### **Pattern-Recognition Receptors**

Immune receptors that detect common molecular features of pathogens or damaged cells.

**Synonyms:**

### **PDE5 Inhibitors**

Medicines that increase penile blood flow by inhibiting phosphodiesterase type 5; they are used mainly to treat erectile dysfunction.

**Synonyms:**

### **Percutaneous Discectomy**

Removal of part of a herniated spinal disk through a small skin incision.

**Synonyms:**

### **Perforation**

An abnormal hole through the wall of an organ or tissue.

**Synonyms:**

### **Perfusion Defect**

An area receiving abnormally low blood flow, identified by an imaging or functional test.

**Synonyms:**

### **Peyronie's Disease**

A condition in which scar tissue in the penis causes curvature or pain during erection.

**Synonyms:**

### **Phagocytes**

Immune cells that engulf and digest microorganisms, dead cells, and other particles.

**Synonyms:**

### **Phonophobia**

Abnormal sensitivity to or fear of sound, often associated with migraine.

**Synonyms:**

### **Photorefractive Keratectomy**

Laser eye surgery that reshapes the cornea to correct refractive errors.

**Synonyms:**

### **Physical Dependence**

A state in which the body adapts to a substance or medication and develops withdrawal symptoms when it is reduced or stopped.

**Synonyms:**

### **Pick's Disease**

A form of frontotemporal dementia characterized by progressive changes in behavior, language, and personality.

**Synonyms:**

### **Platelet**

A small blood component that helps form clots and stop bleeding.

**Synonyms:**

### **Posterior Myocardial Infarction**

A heart attack involving the back wall of the heart.

**Synonyms:**

### **Postherpetic Neuralgia**

Persistent nerve pain in an area affected by shingles after the rash has healed.

**Synonyms:**

### **Primary Hypertension**

High blood pressure without an identifiable single underlying cause.

**Synonyms:**

### **Procedural Memory**

Long-term memory for learned skills and procedures.

**Synonyms:**

### **Prodrome**

An early symptom or group of symptoms that precedes a disease episode.

**Synonyms:**

---

### **Prolapsed Disk**

A spinal disk that bulges or ruptures and may compress a nearby nerve; also called a herniated disk.

**Synonyms:** a herniated disk.

### **Proliferative Retinopathy**

Advanced retinal disease in which abnormal new blood vessels grow and may bleed or impair vision.

**Synonyms:**

### **Proptosis**

Forward displacement or bulging of an eye.

**Synonyms:**

### **Prostatic Urethral Stent**

A small device placed in the prostatic urethra to help maintain urine flow when the prostate obstructs it.

**Synonyms:**

### **Proctocolitis**

Inflammation of the rectum and the adjacent portion of the colon.

**Synonyms:**

### **Pulmonary Emphysema**

A chronic lung disease in which damage to the air sacs reduces the lungs' ability to exchange gases.

**Synonyms:**

### **Park-Bench Position**

A modified lateral position in which the upper body is partly rotated toward prone; it is used for selected posterior brain and neck procedures.

**Synonyms:**

### **Prone Position**

A position in which the patient lies face down, commonly providing access to the back, spine, buttocks, or posterior legs.

**Synonyms:**

### **Pancolitis**

Inflammation affecting the entire colon, often as an

extensive form of ulcerative colitis.

**Synonyms:**

### **Pancreatic Cysts**

Fluid-filled sacs in or around the pancreas, which may be benign or precancerous.

**Synonyms:**

### **Panic Attacks and Panic Disorder**

Panic attacks are sudden episodes of intense fear; panic disorder involves recurrent attacks and persistent concern about having more.

**Synonyms:**

### **Parotid Tumors**

Abnormal growths arising in the parotid salivary glands, located in front of and below the ears.

**Synonyms:**

### **Parvovirus Infection**

An infection caused by parvovirus B19 that commonly causes mild fever and rash but may be serious in some people.

**Synonyms:**

### **Peanut Allergy**

An immune reaction to peanut proteins that can cause symptoms ranging from hives to life-threatening anaphylaxis.

**Synonyms:**

### **Pediatric Brain Tumors**

Tumors that develop in the brain or nearby tissues of children.

**Synonyms:**

### **Pediatric Obstructive Sleep Apnea**

Repeated blockage of a child's upper airway during sleep, causing pauses in breathing.

**Synonyms:**

### **Penicillin Allergy**

An immune reaction to penicillin antibiotics that may cause rash, swelling, breathing difficulty, or

---

anaphylaxis.

**Synonyms:**

### **Peripheral Nerve Tumors**

Tumors that arise from or around nerves outside the brain and spinal cord.

**Synonyms:**

### **Postconcussion Syndrome**

Persistent physical, cognitive, or emotional symptoms after a concussion.

**Synonyms:**

### **Precordium**

The region of the chest overlying the heart.

**Synonyms:**

### **Pyuria**

An abnormal number of white blood cells or pus in the urine, often associated with urinary infection.

**Synonyms:**

### **Philadelphia Chromosome**

A chromosome rearrangement, usually t(9;22), that creates the BCR::ABL1 fusion gene and is characteristic of most cases of chronic myeloid leukemia.

**Synonyms:**

### **Phonocardiography**

Graphic recording of heart sounds and murmurs using a microphone and recording system.

**Synonyms:**

### **Phorometer**

An instrument used to measure ocular alignment and the amount of prism correction needed for binocular vision disorders.

**Synonyms:**

### **Photosensitization**

Increased sensitivity to ultraviolet or visible light caused by a medication, chemical, or disease, producing an exaggerated skin reaction.

**Synonyms:**

### **Physical Examination**

A systematic assessment of the body using inspection, palpation, percussion, auscultation, and other examination methods.

**Synonyms:**

### **Physical Therapy**

Rehabilitation using exercise, movement training, manual techniques, and physical modalities to improve function, mobility, and reduce disability.

**Synonyms:**

### **Phytomedicine**

The evidence-based use of medicinal products derived from plants to prevent or treat disease.

**Synonyms:**

### **Pineal Gland**

A small endocrine gland in the brain that secretes melatonin and helps regulate circadian rhythms.

**Synonyms:**

### **Pitting Edema**

Swelling in which pressure applied to the skin leaves a temporary indentation, usually because of excess interstitial fluid.

**Synonyms:**

### **Placental Abnormalities**

Disorders of placental location, attachment, structure, or separation that may affect pregnancy or cause bleeding.

**Synonyms:**

### **Placenta Previa**

Implantation of the placenta over or near the internal cervical opening, which can cause painless bleeding during the second half of pregnancy.

**Synonyms:**

### **Plasmin**

A proteolytic enzyme that breaks down fibrin and helps dissolve blood clots.

**Synonyms:**

---

### **Plethysmography**

Measurement of changes in the volume of a body part or organ, used to assess blood flow, lung volumes, or other physiologic functions.

**Synonyms:**

### **Pleural Disorders**

Conditions affecting the pleura, including pleural effusion, pneumothorax, pleurisy, infection, and tumors.

**Synonyms:**

### **Pleural Space**

The potential space between the visceral and parietal pleura surrounding each lung.

**Synonyms:**

### **Pneumonitis**

Inflammation of lung tissue, often caused by infection, inhaled substances, radiation, medications, or immune reactions.

**Synonyms:**

### **Pneumoplasty**

Surgical repair or reconstruction of lung tissue or an airway.

**Synonyms:**

### **Pneumotachometer**

An instrument that measures the rate of airflow during breathing.

**Synonyms:**

### **Postural Drainage**

Positioning the body so gravity helps move respiratory secretions toward the larger airways for clearance.

**Synonyms:**

### **Prepuce**

The fold of skin covering the glans penis; it is also called the foreskin.

**Synonyms:** the foreskin.

### **Protein Electrophoresis**

A laboratory test that separates proteins in serum or urine according to their electrical properties, helping detect abnormal protein patterns.

**Synonyms:**

### **Pseudophakia**

The presence of an artificial intraocular lens after removal of the natural lens, usually during cataract surgery.

**Synonyms:**

### **Pulmonary Circuit**

The circulation in which blood travels from the right ventricle to the lungs for gas exchange and returns to the left atrium.

**Synonyms:**

### **Pulmonary Ventilation**

The movement of air into and out of the lungs.

**Synonyms:**

### **Pyramidal Tracts**

Descending motor pathways from the cerebral cortex that control voluntary movement, especially precise movement of the limbs.

**Synonyms:**

### **Palate**

The roof of the mouth, consisting of a bony hard palate in front and a muscular soft palate behind.

**Synonyms:**

### **Palatine Tonsils**

Paired masses of lymphoid tissue on the sides of the oropharynx that contribute to immune defense.

**Synonyms:**

### **Pancreatic Islets**

Clusters of endocrine cells in the pancreas that release hormones such as insulin, glucagon, somatostatin, and pancreatic polypeptide.

**Synonyms:**

---

### **Panhypopituitarism**

Deficiency of most or all anterior pituitary hormones due to disease of the pituitary gland or hypothalamus.

**Synonyms:**

### **Paralysis**

Loss of voluntary muscle movement in part or all of the body, caused by disruption of motor pathways or muscles.

**Synonyms:**

### **Parenchyma**

The functional tissue of an organ, distinguished from its supporting connective tissue, or stroma.

**Synonyms:**

### **Pelvimetry**

Measurement of the dimensions of the maternal pelvis, usually to assess selected obstetric concerns.

**Synonyms:**

### **Peripartum**

The period immediately before, during, and shortly after childbirth.

**Synonyms:**

### **Peyer Patches**

Aggregated lymphoid follicles in the mucosa and submucosa of the ileum that monitor intestinal contents and support immune defense.

**Synonyms:**

### **Nullipara**

A person who has never given birth at or beyond the gestational age considered viable, regardless of the outcome of any pregnancies.

**Synonyms:**

### **Primipara**

A person who has given birth once at or beyond the gestational age considered viable, regardless of whether the infant was born alive.

**Synonyms:**

### **Primigravida**

A person who is pregnant for the first time.

**Synonyms:**

### **Nulligravida**

A person who has never been pregnant.

**Synonyms:**

### **Pes Anserinus**

The combined tendon insertion of the sartorius, gracilis, and semitendinosus muscles on the antero-medial proximal tibia; inflammation there is pes-anserine bursitis.

**Synonyms:**

### **Pilonidal Cyst**

A cyst or sinus in the cleft between the buttocks, usually containing hair and skin debris. It may become infected, painful, swollen, and drain pus.

**Synonyms:**

### **Polyneuropathy**

A generalized disorder affecting multiple peripheral nerves, often causing symmetric numbness, tingling, burning pain, weakness, or impaired reflexes in the limbs.

**Synonyms:**

### **Puncture Wound**

A wound produced when a pointed object penetrates the skin and underlying tissue, creating a small surface opening with potentially deep tissue damage and infection risk.

**Synonyms:**

### **Parathyroid Carcinoma**

A rare malignant tumor of the parathyroid gland that commonly causes excessive parathyroid-hormone secretion, hypercalcemia, kidney stones, bone disease, or related symptoms.

**Synonyms:**

### **Paraparesis**

Weakness affecting both legs, usually caused by

---

disease or injury of the spinal cord, nerve roots, or peripheral nerves.

**Synonyms:**

### **Paratyphoid Fever**

An enteric fever caused by *Salmonella Paratyphi*, producing prolonged fever and gastrointestinal or systemic illness similar to typhoid fever.

**Synonyms:**

### **Pasteurellosis**

Infection caused by *Pasteurella* bacteria, commonly introduced through animal bites or scratches and causing cellulitis, abscesses, or occasionally invasive disease.

**Synonyms:**

### **Parietal Bone**

One of two skull bones forming much of the roof and sides of the cranium.

**Synonyms:**

### **Pathophysiology**

The study of the functional changes produced by disease or injury and the mechanisms through which they cause signs and symptoms.

**Synonyms:**

### **Pavor Nocturnus (Night Terrors)**

Episodes of sudden intense fear, screaming, and autonomic arousal during sleep, usually arising from deep non-REM sleep and often followed by little or no memory.

**Synonyms:** Night Terrors

### **Pectoriloquy**

Abnormally clear transmission of spoken sounds through the chest wall, often suggesting lung consolidation or another change in lung tissue.

**Synonyms:**

### **Penumbra**

Brain tissue surrounding an area of infarction that is functionally impaired but potentially salvageable

if blood flow is restored promptly.

**Synonyms:**

### **Post-Natal Depression**

Depression beginning during pregnancy or after childbirth, with persistent low mood or loss of interest and possible effects on sleep, bonding, and daily functioning.

**Synonyms:**

### **Post-Partum Haemorrhage**

Excessive bleeding after childbirth, most commonly caused by failure of the uterus to contract, retained placental tissue, genital-tract trauma, or clotting problems.

**Synonyms:**

### **Pre-Eclampsia**

A pregnancy-related disorder involving new hypertension after 20 weeks of gestation with proteinuria or other evidence of maternal organ or placental dysfunction.

**Synonyms:**

### **Premature Birth**

Birth before 37 completed weeks of pregnancy; the earlier the birth, the greater the risks of respiratory, neurological, and developmental complications.

**Synonyms:**

### **Presbycusis (Presbycusis)**

Age-related, usually gradual sensorineural hearing loss, particularly affecting the ability to hear high-frequency sounds and understand speech in noise.

**Synonyms:** Presbycusis

### **Pseudocyesis**

A false belief or bodily state resembling pregnancy, with symptoms such as abdominal enlargement, breast changes, or even perceived fetal movement despite no fetus being present.

**Synonyms:**

---

### **Prothrombin Time (PT)**

A blood test measuring the time required for clot formation through the extrinsic and common coagulation pathways; it is commonly reported as the INR.

**Synonyms:** PT

### **Pregnancy of Unknown Location**

A positive pregnancy test without a confirmed intrauterine or ectopic pregnancy on ultrasound. Serial human chorionic gonadotropin measurements and repeat imaging help determine whether the pregnancy is early, failing, or ectopic.

**Synonyms:**

### **Subchorionic Hemorrhage**

Bleeding between the chorion and the uterine wall caused by partial separation of the gestational sac membranes. It may produce vaginal bleeding in early or mid-pregnancy and is assessed according to bleeding, gestational age, and ultrasound findings.

**Synonyms:**

### **Postpartum Preeclampsia**

New-onset hypertension with pre-eclampsia features after childbirth, sometimes occurring several days or weeks postpartum. Severe headache, visual symptoms, chest pain, shortness of breath, or seizures require urgent assessment.

**Synonyms:**

### **Pelvic Girdle Pain in Pregnancy**

Pain arising from the pelvic joints and surrounding tissues during pregnancy, often affecting the pubic symphysis, sacroiliac joints, hips, or lower back. It may impair walking, turning in bed, or climbing stairs.

**Synonyms:**

### **Round Ligament Pain**

Sharp or aching pain in the lower abdomen or groin caused by stretching of the round ligaments as the uterus enlarges during pregnancy. Persistent, severe, or bleeding-associated pain requires medical evaluation.

**Synonyms:**

### **Postpartum Care**

Clinical care during the weeks after childbirth that assesses bleeding, uterine involution, blood pressure, infection, wound healing, breastfeeding, mental health, contraception, and recovery.

**Synonyms:**

### **Postpartum Urinary Retention**

Inability to empty the bladder adequately after childbirth, sometimes associated with epidural anesthesia, perineal trauma, swelling, or prolonged labor. Prompt assessment prevents bladder overdistension and injury.

**Synonyms:**

### **Postpartum Contraception**

Contraceptive counseling and care after childbirth, taking account of breastfeeding, venous-thromboembolism risk, medical conditions, fertility intentions, and the timing of method initiation.

**Synonyms:**

### **Perinatal Asphyxia**

Impaired oxygenation or ventilation before, during, or shortly after birth that may cause neonatal encephalopathy, organ injury, or death. Immediate newborn assessment and resuscitation are essential.

**Synonyms:**

### **Prenatal Genetic Counseling**

A consultation that reviews the risk of inherited or chromosomal conditions, available screening and diagnostic tests, possible results, and reproductive options before or during pregnancy.

### **pachyonychia congenita**

pachyonychia congenita refers to pachyonychia congenita, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**pacifier**

pacifier refers to pacifier, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:****pacinian corpuscle**

pacinian corpuscle refers to pacinian corpuscle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:****packaging tube**

packaging tube refers to packaging tube, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:****paclitaxel**

paclitaxel concerns paclitaxel, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:****paclitaxel liposome**

paclitaxel liposome refers to paclitaxel liposome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:****paclitaxel poliglumex**

paclitaxel poliglumex refers to paclitaxel poliglumex, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:****paecilomyces**

paecilomyces is a microorganism or microbial group associated with paecilomyces; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:****paenibacillus**

paenibacillus is a microorganism or microbial group associated with paenibacillus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:****paenibacillus alvei**

paenibacillus alvei is a microorganism or microbial group associated with paenibacillus alvei; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:****paenibacillus phoenicis**

paenibacillus phoenicis is a microorganism or microbial group associated with paenibacillus phoenicis; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:****paenibacillus polymyxa**

paenibacillus polymyxa is a microorganism or microbial group associated with paenibacillus polymyxa; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:****pagetoid reticulosis**

pagetoid reticulosis refers to pagetoid reticulosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:****pain perception**

pain perception denotes a clinical condition or finding involving pain perception; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

---

### **pain threshold**

pain threshold denotes a clinical condition or finding involving pain threshold; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **palatal muscle**

palatal muscle refers to palatal muscle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **palate neoplasm**

palate neoplasm denotes a neoplastic condition involving palate neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **palatine tonsil**

palatine tonsil refers to palatine tonsil, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **palatorrhaphy**

palatorrhaphy refers to palatorrhaphy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **palifermin**

palifermin refers to palifermin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **palivizumab**

palivizumab concerns palivizumab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **palladium**

palladium refers to palladium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **palm oil**

palm oil refers to palm oil, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **palmar reflex**

palmar reflex refers to palmar reflex, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **palmitic acid**

palmitic acid denotes palmitic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **palmoplantar hyperkeratosis**

palmoplantar hyperkeratosis refers to palmoplantar hyperkeratosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **palonosetron**

palonosetron concerns palonosetron, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **palonosetron hydrochloride**

palonosetron hydrochloride refers to palonosetron hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**palpable**

palpable refers to palpable, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**palsy**

palsy refers to palsy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pamidronic acid**

pamidronic acid denotes pamidronic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**pan troglodyte**

pan troglodyte refers to pan troglodyte, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**panax**

panax refers to panax, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pancreas enzyme**

pancreas enzyme denotes pancreas enzyme, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**pancreas infection**

pancreas infection denotes an infectious or toxic condition involving pancreas infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**pancreas neoplasm**

pancreas neoplasm denotes a neoplastic condition involving pancreas neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**pancreas transplantation**

pancreas transplantation refers to pancreas transplantation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pancreatic carcinoma**

pancreatic carcinoma denotes a neoplastic condition involving pancreatic carcinoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**pancreatic diseases**

pancreatic diseases denotes a clinical condition or finding involving pancreatic diseases; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**pancreatic fistula**

pancreatic fistula refers to pancreatic fistula, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pancreatic hormones**

pancreatic hormones denotes pancreatic hormones, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**pancreatic islet**

pancreatic islet refers to pancreatic islet, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**pancreatic juice**

pancreatic juice refers to pancreatic juice, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pancreaticoduodenectomy**

pancreaticoduodenectomy is used in relation to pancreaticoduodenectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**pancrelipase**

pancrelipase refers to pancrelipase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pancuronium**

pancuronium refers to pancuronium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pandora**

pandora identifies pandora, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**pargyline**

pargyline refers to pargyline, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**paricalcitol**

paricalcitol refers to paricalcitol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**parietal pleura**

parietal pleura refers to parietal pleura, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**parinaric acid**

parinaric acid denotes parinaric acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**parity**

parity refers to parity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**paromomycin**

paromomycin concerns paromomycin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**parosteal osteosarcoma**

parosteal osteosarcoma denotes a neoplastic condition involving parosteal osteosarcoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**parotid neoplasm**

parotid neoplasm denotes a neoplastic condition involving parotid neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**parotidectomy**

parotidectomy is used in relation to parotidectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

---

**paroxetine**

paroxetine concerns paroxetine, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**paroxetine hydrochloride**

paroxetine hydrochloride refers to paroxetine hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pars compacta**

pars compacta refers to pars compacta, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pars planitis**

pars planitis refers to pars planitis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**parthenogenesis**

parthenogenesis denotes parthenogenesis, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**partial**

partial refers to partial, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**partial cystectomy**

partial cystectomy is used in relation to partial cystectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**partial hysterectomy**

partial hysterectomy is used in relation to partial hysterectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**partial nephrectomy**

partial nephrectomy is used in relation to partial nephrectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**partial remission**

partial remission refers to partial remission, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**participation**

participation refers to participation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**particle size**

particle size refers to particle size, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**parvimonas micra**

parvimonas micra identifies parvimonas micra, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**parvoviridae**

parvoviridae identifies parvoviridae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

---

**parvovirus**

parvovirus is a virus or viral group associated with parvovirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**passive immunization**

passive immunization refers to passive immunization, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**paste**

paste refers to paste, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pasteurella**

pasteurella identifies pasteurella, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**pasteurella aerogenes**

pasteurella aerogenes identifies pasteurella aerogenes, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**pasteurella bettyae**

pasteurella bettyae identifies pasteurella bettyae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**pasteurella canis**

pasteurella canis identifies pasteurella canis, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**pasteurella pneumotropica**

pasteurella pneumotropica identifies pasteurella pneumotropica, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**pasteurellaceae**

pasteurellaceae identifies pasteurellaceae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

**patellar dislocation**

patellar dislocation refers to patellar dislocation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**patent urachus**

patent urachus refers to patent urachus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**paternal behavior**

paternal behavior denotes paternal behavior, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**pathologic dilatation**

pathologic dilatation refers to pathologic dilatation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pathologic ossification**

pathologic ossification refers to pathologic ossifica-

---

tion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pathologic process**

pathologic process refers to pathologic process, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pathologic response**

pathologic response refers to pathologic response, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pathological fracture**

pathological fracture denotes a clinical condition or finding involving pathological fracture; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **pathologist**

pathologist refers to pathologist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **patient care**

patient care refers to patient care, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **patient discharge**

patient discharge refers to patient discharge, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **patient observation**

patient observation refers to patient observation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **patient rights**

patient rights refers to patient rights, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **paxillin**

paxillin refers to paxillin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pazopanib**

pazopanib concerns pazopanib, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **peanut oil**

peanut oil refers to peanut oil, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **peau d'orange**

peau d'orange refers to peau d'orange, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pectin**

pectin refers to pectin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**pectinate line**

pectinate line refers to pectinate line, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pectoral girdle**

pectoral girdle refers to pectoral girdle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pectoralis muscles**

pectoralis muscles refers to pectoralis muscles, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pediatric AIDS**

pediatric AIDS refers to pediatric aids, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pediatric nursing**

pediatric nursing refers to pediatric nursing, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pediatric obesity**

pediatric obesity refers to pediatric obesity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pediococcus**

pediococcus is a microorganism or microbial group associated with pediococcus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**pediococcus pentosaceus**

pediococcus pentosaceus is a microorganism or microbial group associated with pediococcus pentosaceus; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

**pedophilia**

pedophilia refers to pedophilia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pedunculate**

pedunculate refers to pedunculate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peer review**

peer review refers to peer review, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pefloxacin**

pefloxacin concerns pefloxacin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**pegargiminase**

pegargiminase refers to pegargiminase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pegaspargase**

pegaspargase refers to pegaspargase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**pegdinetanib**

pegdinetanib concerns pegdinetanib, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**pegfilgrastim**

pegfilgrastim refers to pegfilgrastim, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peldesine**

peldesine refers to peldesine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pelitrexol**

pelitrexol refers to pelitrexol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pellet**

pellet refers to pellet, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pelvic bone**

pelvic bone refers to pelvic bone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pelvic diaphragm**

pelvic diaphragm refers to pelvic diaphragm, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pelvic examination**

pelvic examination refers to pelvic examination, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pelvic exenteration**

pelvic exenteration refers to pelvic exenteration, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pelvic girdle**

pelvic girdle refers to pelvic girdle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pelvic infection**

pelvic infection denotes an infectious or toxic condition involving pelvic infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**pelvic kidney**

pelvic kidney refers to pelvic kidney, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pelvic lymphadenectomy**

pelvic lymphadenectomy is used in relation to pelvic lymphadenectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**pelvic mass**

pelvic mass refers to pelvic mass, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**pelvic neoplasm**

pelvic neoplasm denotes a neoplastic condition involving pelvic neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**pelvic viscus**

pelvic viscus refers to pelvic viscus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pemetrexed**

pemetrexed refers to pemetrexed, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pemetrexed disodium**

pemetrexed disodium refers to pemetrexed disodium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pemoline**

pemoline refers to pemoline, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**penbutolol**

penbutolol concerns penbutolol, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**penclomedine**

penclomedine refers to penclomedine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pendulous**

pendulous refers to pendulous, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**penicillamine**

penicillamine refers to penicillamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**penicillin**

penicillin concerns penicillin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**penicillin G**

penicillin G refers to penicillin g, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**penicillin V**

penicillin V refers to penicillin v, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**penicillium**

penicillium refers to penicillium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**penile disease**

penile disease denotes a clinical condition or finding involving penile disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

---

**penile erection**

penile erection refers to penile erection, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**penile infection**

penile infection denotes an infectious or toxic condition involving penile infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**penile leukoplakia**

penile leukoplakia refers to penile leukoplakia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**penis carcinoma**

penis carcinoma denotes a neoplastic condition involving penis carcinoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**penoscrotal transposition**

penoscrotal transposition refers to penoscrotal transposition, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pentadecanoic acid**

pentadecanoic acid denotes pentadecanoic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**pentamidine**

pentamidine refers to pentamidine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pentamidine isethionate**

pentamidine isethionate refers to pentamidine isethionate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pentatrichomonas hominis**

pentatrichomonas hominis refers to pentatrichomonas hominis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pentetic acid**

pentetic acid denotes pentetic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**pentobarbital**

pentobarbital concerns pentobarbital, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**pentosan polysulfate**

pentosan polysulfate refers to pentosan polysulfate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pentose**

pentose refers to pentose, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pentoxifylline**

pentoxifylline denotes an infectious or toxic con-

---

dition involving pentoxifylline; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

### **pentylenetetrazole**

pentylenetetrazole concerns pentylenetetrazole, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **peplomycin**

peplomycin concerns peplomycin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **pepsin A**

pepsin A refers to pepsin a, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pepsinogen**

pepsinogen refers to pepsinogen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **peptic esophagitis**

peptic esophagitis refers to peptic esophagitis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **peptichemio**

peptichemio refers to peptichemio, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **peptide**

peptide is a defined chemical or biologic substance involved in peptide and studied in physiology, pharmacology, laboratory medicine, or treatment.

**Synonyms:**

### **peptide biosynthesis**

peptide biosynthesis concerns peptide biosynthesis, a biologic or physiologic concept used in research, laboratory medicine, and the explanation of disease.

**Synonyms:**

### **peptide hormone**

peptide hormone denotes peptide hormone, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **peptide library**

peptide library concerns peptide library, a biologic or physiologic concept used in research, laboratory medicine, and the explanation of disease.

**Synonyms:**

### **peptide metabolism**

peptide metabolism concerns peptide metabolism, a biologic or physiologic concept used in research, laboratory medicine, and the explanation of disease.

**Synonyms:**

### **peptide transport**

peptide transport concerns peptide transport, a biologic or physiologic concept used in research, laboratory medicine, and the explanation of disease.

**Synonyms:**

### **peptide yy**

peptide yy concerns peptide yy, a biologic or physiologic concept used in research, laboratory medicine, and the explanation of disease.

**Synonyms:**

---

**peptidoglycan**

peptidoglycan refers to peptidoglycan, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peptococcaceae**

peptococcaceae refers to peptococcaceae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peptococcus**

peptococcus refers to peptococcus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peptococcus niger**

peptococcus niger refers to peptococcus niger, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peptoniphilus**

peptoniphilus refers to peptoniphilus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peptoniphilus harei**

peptoniphilus harei refers to peptoniphilus harei, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peptoniphilus indolicus**

peptoniphilus indolicus refers to peptoniphilus indolicus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peptostreptococcus**

peptostreptococcus refers to peptostreptococcus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peracetic acid**

peracetic acid denotes peracetic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**peracute**

peracute refers to peracute, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**perception**

perception refers to perception, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**perceptual disorder**

perceptual disorder denotes a clinical condition or finding involving perceptual disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**perceptual distortion**

perceptual distortion refers to perceptual distortion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**perceptual masking**

perceptual masking refers to perceptual masking, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**percutaneous discectomy**

percutaneous discectomy is used in relation to percutaneous discectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**perforant pathway**

perforant pathway refers to perforant pathway, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**performance**

performance refers to performance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**performed diagnosis**

performed diagnosis refers to performed diagnosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**performed histopathology**

performed histopathology refers to performed histopathology, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**performed procedure**

performed procedure is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat performed procedure.

**Synonyms:**

**perfusion culture**

perfusion culture refers to perfusion culture, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pergolide**

pergolide refers to pergolide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**perianal**

perianal refers to perianal, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**perianal abscess**

perianal abscess refers to perianal abscess, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**perianal glands**

perianal glands refers to perianal glands, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**periarteritis nodosa**

periarteritis nodosa refers to periarteritis nodosa, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**periarticular**

periarticular refers to periarticular, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pericardial mesothelioma**

pericardial mesothelioma refers to pericardial mesothelioma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**pericardial stripping**

pericardial stripping refers to pericardial stripping, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pericardial wall**

pericardial wall refers to pericardial wall, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pericardiectomy**

pericardiectomy is used in relation to pericardiectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**pericardiostomy**

pericardiostomy refers to pericardiostomy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pericytes**

pericytes refers to pericytes, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**perifosine**

perifosine refers to perifosine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**perillyl alcohol**

perillyl alcohol refers to perillyl alcohol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**perilymph**

perilymph refers to perilymph, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**perimenopausal**

perimenopausal refers to perimenopausal, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**perinatal death**

perinatal death refers to perinatal death, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**perindopril**

perindopril concerns perindopril, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**perineural**

perineural refers to perineural, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**perineuronal satellitosis**

perineuronal satellitosis refers to perineuronal satellitosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**perinuclear space**

perinuclear space refers to perinuclear space, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### periodic acid

periodic acid denotes periodic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### periodontal cyst

periodontal cyst refers to periodontal cyst, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### periodontal dressing

periodontal dressing refers to periodontal dressing, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### periodontist

periodontist refers to periodontist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### periodontium

periodontium refers to periodontium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### periodontium disease

periodontium disease denotes a clinical condition or finding involving periodontium disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### periorbital edema

periorbital edema denotes a clinical condition or finding involving periorbital edema; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### periorbital infection

periorbital infection denotes an infectious or toxic condition involving periorbital infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

### periostitis

periostitis refers to periostitis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### peripheral blood

peripheral blood refers to peripheral blood, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### peripheral ischemia

peripheral ischemia refers to peripheral ischemia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### peripheral nerve

peripheral nerve refers to peripheral nerve, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### periplasm

periplasm refers to periplasm, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### perirenal hematoma

perirenal hematoma refers to perirenal hematoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**peritoneal**

peritoneal refers to peritoneal, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peritoneal cavity**

peritoneal cavity refers to peritoneal cavity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peritoneal diseases**

peritoneal diseases denotes a clinical condition or finding involving peritoneal diseases; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**peritoneal fluid**

peritoneal fluid refers to peritoneal fluid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peritoneal lavage**

peritoneal lavage refers to peritoneal lavage, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peritoneal necrosis**

peritoneal necrosis refers to peritoneal necrosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peritoneal sac**

peritoneal sac refers to peritoneal sac, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peritoneum neoplasm**

peritoneum neoplasm denotes a neoplastic condition involving peritoneum neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**perivittelline space**

perivittelline space refers to perivittelline space, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**permease**

permease refers to permease, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**permethrin**

permethrin refers to permethrin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**permissiveness**

permissiveness refers to permissiveness, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peroneal nerve**

peroneal nerve refers to peroneal nerve, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**peroxidase**

peroxidase refers to peroxidase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### peroxisomal disorder

peroxisomal disorder denotes a clinical condition or finding involving peroxisomal disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### peroxisome proliferation

peroxisome proliferation refers to peroxisome proliferation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### perphenazine

perphenazine refers to perphenazine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### perseveration

perseveration refers to perseveration, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### persistent cloaca

persistent cloaca refers to persistent cloaca, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### person

person refers to person, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### person name

person name refers to person name, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### person with disability

person with disability refers to person with disability, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### personality

personality refers to personality, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### personality change

personality change refers to personality change, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### personality test

personality test is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat personality test.

**Synonyms:**

### persuasive communication

persuasive communication refers to persuasive communication, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### pertussis toxin

pertussis toxin denotes an infectious or toxic condition involving pertussis toxin; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

### pertussis vaccine

pertussis vaccine refers to pertussis vaccine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**pertuzumab**

pertuzumab concerns pertuzumab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**pestalotiopsis**

pestalotiopsis refers to pestalotiopsis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pesticide**

pesticide refers to pesticide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**petechia**

petechia refers to petechia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**petri dish**

petri dish refers to petri dish, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**petrolatum**

petrolatum refers to petrolatum, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pexophagy**

pexophagy refers to pexophagy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**P-glycoprotein**

P-glycoprotein denotes p-glycoprotein, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**pH meter**

pH meter refers to ph meter, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phagocyte**

phagocyte refers to phagocyte, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phagocytic vesicle**

phagocytic vesicle refers to phagocytic vesicle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phagolysosome**

phagolysosome refers to phagolysosome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phagophores**

phagophores refers to phagophores, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phalanx unspecified**

phalanx unspecified refers to phalanx unspecified, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**phantom pain**

phantom pain denotes a clinical condition or finding involving phantom pain; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**pharmaceutical adjuvant**

pharmaceutical adjuvant refers to pharmaceutical adjuvant, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pharmaceutical excipient**

pharmaceutical excipient refers to pharmaceutical excipient, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pharmaceutical solutions**

pharmaceutical solutions refers to pharmaceutical solutions, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pharmacist**

pharmacist refers to pharmacist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pharmacogenomic testing**

pharmacogenomic testing is a clinical assessment, measurement, or procedure used to investigate, monitor, classify, or treat pharmacogenomic testing.

**Synonyms:**

**pharmacologic substance**

pharmacologic substance refers to pharmacologic substance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pharmacotherapy**

pharmacotherapy is used in relation to pharmacotherapy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**pharmacy facility**

pharmacy facility refers to pharmacy facility, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pharyngeal carcinoma**

pharyngeal carcinoma denotes a neoplastic condition involving pharyngeal carcinoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**pharyngeal disease**

pharyngeal disease denotes a clinical condition or finding involving pharyngeal disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**pharyngeal hemorrhage**

pharyngeal hemorrhage denotes a clinical condition or finding involving pharyngeal hemorrhage; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**pharyngeal mucositis**

pharyngeal mucositis refers to pharyngeal mucositis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pharyngeal stenosis**

pharyngeal stenosis denotes a clinical condition or finding involving pharyngeal stenosis; evaluation

---

identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **pharyngectomy**

pharyngectomy is used in relation to pharyngectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

### **pharyngolaryngeal pain**

pharyngolaryngeal pain denotes a clinical condition or finding involving pharyngolaryngeal pain; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **pharynx necrosis**

pharynx necrosis refers to pharynx necrosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pharynx neoplasm**

pharynx neoplasm denotes a neoplastic condition involving pharynx neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **phase-contrast microscopy**

phase-contrast microscopy refers to phase-contrast microscopy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phenacetin**

phenacetin refers to phenacetin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phenazopyridine**

phenazopyridine refers to phenazopyridine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phenelzine**

phenelzine refers to phenelzine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phenethyl isothiocyanate**

phenethyl isothiocyanate refers to phenethyl isothiocyanate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phenethylamines**

phenethylamines refers to phenethylamines, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phenformin**

phenformin refers to phenformin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phenobarbital**

phenobarbital concerns phenobarbital, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **phenocopy**

phenocopy refers to phenocopy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**phenol**

phenol refers to phenol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phenolphthalein**

phenolphthalein refers to phenolphthalein, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phenols**

phenols refers to phenols, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phenothiazine**

phenothiazine refers to phenothiazine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phenothiazines**

phenothiazines refers to phenothiazines, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phenoxodiol**

phenoxodiol refers to phenoxodiol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phenoxybenzamine**

phenoxybenzamine refers to phenoxybenzamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phenprocoumon**

phenprocoumon refers to phenprocoumon, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phentermine**

phentermine refers to phentermine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phenthoate**

phenthoate refers to phenthoate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phentolamine**

phentolamine refers to phentolamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phenylacetate**

phenylacetate refers to phenylacetate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phenylalanine**

phenylalanine refers to phenylalanine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phenylbutyrate**

phenylbutyrate refers to phenylbutyrate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phenylephrine**

phenylephrine refers to phenylephrine, a medical

---

condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phenylpropanolamine**

phenylpropanolamine refers to phenylpropanolamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phenytoin**

phenytoin refers to phenytoin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phenytoin sodium**

phenytoin sodium refers to phenytoin sodium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pheromone**

pheromone refers to pheromone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phialemonium atrogriseum**

phialemonium atrogriseum refers to phialemonium atrogriseum, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phialophora**

phialophora refers to phialophora, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phialophora verrucosa**

phialophora verrucosa refers to phialophora verrucosa, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phlebovirus**

phlebovirus is a virus or viral group associated with phlebovirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **phlegm**

phlegm refers to phlegm, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phobia**

phobia refers to phobia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phonation**

phonation refers to phonation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phorate**

phorate refers to phorate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **phorbol ester**

phorbol ester refers to phorbol ester, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**phorbols**

phorbols refers to phorbols, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phosgene**

phosgene denotes phosgene, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**phosgene oxime**

phosgene oxime denotes phosgene oxime, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**phosmet**

phosmet refers to phosmet, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phosphamidon**

phosphamidon refers to phosphamidon, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phosphatidic acid**

phosphatidic acid denotes phosphatidic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**phosphatidylcholine**

phosphatidylcholine refers to phosphatidylcholine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phosphatidylethanolamines**

phosphatidylethanolamines refers to phosphatidylethanolamines, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phosphatidylinositol**

phosphatidylinositol refers to phosphatidylinositol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phosphatidylserine**

phosphatidylserine refers to phosphatidylserine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phosphatidylserines**

phosphatidylserines refers to phosphatidylserines, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**phosphine**

phosphine refers to phosphine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pigmentation disorder**

pigmentation disorder denotes a clinical condition or finding involving pigmentation disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**pilocarpine**

pilocarpine refers to pilocarpine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**pilocytic astrocytoma**

pilocytic astrocytoma refers to pilocytic astrocytoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**piloerection**

piloerection refers to piloerection, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pilomatrixoma**

pilomatrixoma refers to pilomatrixoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pilonidal fistula**

pilonidal fistula refers to pilonidal fistula, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pilot project**

pilot project refers to pilot project, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pilus**

pilus refers to pilus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pimozide**

pimozide refers to pimozide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pinch strength**

pinch strength refers to pinch strength, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pindolol**

pindolol concerns pindolol, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**pineal cyst**

pineal cyst refers to pineal cyst, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pineal germinoma**

pineal germinoma refers to pineal germinoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pineoblastoma**

pineoblastoma denotes a neoplastic condition involving pineoblastoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**pineocytoma**

pineocytoma refers to pineocytoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pinhole meatus**

pinhole meatus refers to pinhole meatus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**pinocytosis**

pinocytosis refers to pinocytosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pint**

pint refers to pint, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pinta**

pinta refers to pinta, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pioglitazone**

pioglitazone refers to pioglitazone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pipemidic acid**

pipemidic acid denotes pipemidic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**pipendoxifene**

pipendoxifene refers to pipendoxifene, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**piperacillin**

piperacillin concerns piperacillin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**piperazine**

piperazine refers to piperazine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**piperonyl butoxide**

piperonyl butoxide denotes an infectious or toxic condition involving piperonyl butoxide; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**pipette**

pipette refers to pipette, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pipobroman**

pipobroman refers to pipobroman, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pirfenidone**

pirfenidone refers to pirfenidone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pirimicarb**

pirimicarb refers to pirimicarb, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pirinitramide**

pirinitramide refers to pirinitramide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**piritrexim**

piritrexim refers to piritrexim, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**piromidic acid**

piromidic acid denotes piromidic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**piroxicam**

piroxicam refers to piroxicam, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pisiform bone**

pisiform bone refers to pisiform bone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pithomyces**

pithomyces refers to pithomyces, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pituicytoma**

pituicytoma refers to pituicytoma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pituitary**

pituitary refers to pituitary, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pituitary carcinoma**

pituitary carcinoma denotes a neoplastic condition involving pituitary carcinoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**pituitary disease**

pituitary disease denotes a clinical condition or finding involving pituitary disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**pituitary dwarfism**

pituitary dwarfism refers to pituitary dwarfism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pituitary hormone**

pituitary hormone denotes pituitary hormone, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**pituitary neoplasm**

pituitary neoplasm denotes a neoplastic condition involving pituitary neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**pityriasis lichenoides**

pityriasis lichenoides refers to pityriasis lichenoides, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pivampicillin**

pivampicillin concerns pivampicillin, a pharmacologic or chemical agent; clinical use depends on

---

its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **pixantrone**

pixantrone refers to pixantrone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **place**

place refers to place, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **placebo control**

placebo control refers to placebo control, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **placenta accreta**

placenta accreta refers to placenta accreta, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **placenta disorder**

placenta disorder denotes a clinical condition or finding involving placenta disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **placenta percreta**

placenta percreta refers to placenta percreta, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **placental hormone**

placental hormone denotes placental hormone, a biological component or molecular process interpreted

through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **placental infarction**

placental infarction refers to placental infarction, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **placental lactogen**

placental lactogen refers to placental lactogen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **placentation**

placentation refers to placentation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **plagiocephaly**

plagiocephaly refers to plagiocephaly, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **planococcaceae**

planococcaceae refers to planococcaceae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **planococcus bacteria**

planococcus bacteria is a microorganism or microbial group associated with planococcus bacteria; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

---

**plant development**

plant development refers to plant development, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**plant extract**

plant extract refers to plant extract, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**plant oils**

plant oils refers to plant oils, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**plant part**

plant part refers to plant part, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**plant poisoning**

plant poisoning denotes an infectious or toxic condition involving plant poisoning; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**plant proteins**

plant proteins denotes plant proteins, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**plant tumor**

plant tumor denotes a neoplastic condition involving plant tumor; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**plant virus**

plant virus is a virus or viral group associated with plant virus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**plantar nerve**

plantar nerve refers to plantar nerve, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**plantar wart**

plantar wart refers to plantar wart, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**plantaris muscle**

plantaris muscle refers to plantaris muscle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**plasma cell neoplasm**

plasma cell neoplasm denotes plasma cell neoplasm, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**plasma kallikrein**

plasma kallikrein refers to plasma kallikrein, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**plasma membrane**

plasma membrane refers to plasma membrane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### plasma substitutes

plasma substitutes refers to plasma substitutes, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### plasmablastic lymphoma

plasmablastic lymphoma denotes a neoplastic condition involving plasmablastic lymphoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### plasmalogen

plasmalogen refers to plasmalogen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### plasmapheresis

plasmapheresis refers to plasmapheresis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### plasmid

plasmid refers to plasmid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### plasminogen

plasminogen refers to plasminogen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### plasminogen activator

plasminogen activator refers to plasminogen activator, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### plasminogen inactivators

plasminogen inactivators refers to plasminogen inactivators, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### plasmodesma

plasmodesma refers to plasmodesma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### plasmodium

plasmodium refers to plasmodium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### pleural neoplasm

pleural neoplasm denotes a neoplastic condition involving pleural neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### pleural sac

pleural sac refers to pleural sac, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### pleural tuberculosis

pleural tuberculosis refers to pleural tuberculosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### pleuritic pain

pleuritic pain denotes a clinical condition or finding involving pleuritic pain; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

---

### **pleuropulmonary blastoma**

pleuropulmonary blastoma denotes a neoplastic condition involving pleuropulmonary blastoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

### **plexiform neurofibroma**

plexiform neurofibroma refers to plexiform neurofibroma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pliability**

pliability refers to pliability, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **plitidepsin**

plitidepsin refers to plitidepsin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **Ploidies**

Ploidies refers to ploidies, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **plozalizumab**

plozalizumab concerns plozalizumab, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **pluralibacter gergoviae**

pluralibacter gergoviae denotes an infectious or toxic condition involving pluralibacter gergoviae; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

### **pluripotent stem cell**

pluripotent stem cell denotes pluripotent stem cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **plutonium**

plutonium refers to plutonium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pneumococcal infection**

pneumococcal infection denotes an infectious or toxic condition involving pneumococcal infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

### **pneumococcal vaccine**

pneumococcal vaccine refers to pneumococcal vaccine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pneumocystis**

pneumocystis refers to pneumocystis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pneumocystis carinii**

pneumocystis carinii refers to pneumocystis carinii, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pneumocystis infection**

pneumocystis infection denotes an infectious or toxic condition involving pneumocystis infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

---

**Synonyms:**

**pneumocystis jiroveci**

pneumocystis jiroveci refers to pneumocystis jiroveci, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pneumovirinae**

pneumovirinae refers to pneumovirinae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pneumovirus**

pneumovirus is a virus or viral group associated with pneumovirus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**pocket erosion**

pocket erosion refers to pocket erosion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**podiatrist**

podiatrist refers to podiatrist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**podocyte**

podocyte refers to podocyte, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**podofilox**

podofilox refers to podofilox, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**podophyllin**

podophyllin refers to podophyllin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**podosome**

podosome refers to podosome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**poikilocytosis**

poikilocytosis refers to poikilocytosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**poikiloderma**

poikiloderma refers to poikiloderma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pokeweed mitogen**

pokeweed mitogen refers to pokeweed mitogen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pol gene**

pol gene denotes pol gene, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**polarity**

polarity refers to polarity, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**polarography**

polarography refers to polarography, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**policy**

policy refers to policy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**polidocanol**

polidocanol refers to polidocanol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**poliosis**

poliosis refers to poliosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**poliovirus vaccine**

poliovirus vaccine is a virus or viral group associated with poliovirus vaccine; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

**pollakisuria**

pollakisuria refers to pollakisuria, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pollen**

pollen refers to pollen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pollen tube**

pollen tube refers to pollen tube, a medical condition

or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pollination**

pollination refers to pollination, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**poly A**

poly A refers to poly a, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**poly I-C**

poly I-C refers to poly i-c, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**poly ICLC**

poly ICLC refers to poly iclc, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**polyadenylation**

polyadenylation refers to polyadenylation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**polyamine**

polyamine refers to polyamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**polyamine catabolism**

polyamine catabolism refers to polyamine catabolism, a medical condition or clinical finding defined by its features, causes, affected system, and

---

patient context.

**Synonyms:**

### **polyarthritis**

polyarthritis refers to polyarthritis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polybrominated biphenyl**

polybrominated biphenyl refers to polybrominated biphenyl, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polychlorinated biphenyl**

polychlorinated biphenyl refers to polychlorinated biphenyl, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polychromasia**

polychromasia refers to polychromasia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polyene**

polyene refers to polyene, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polyethylene**

polyethylene refers to polyethylene, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polygenic obesity**

polygenic obesity refers to polygenic obesity, a medical condition or clinical finding defined by its fea-

tures, causes, affected system, and patient context.

**Synonyms:**

### **polyglutamate camptothecin**

polyglutamate camptothecin refers to polyglutamate camptothecin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polygraphy**

polygraphy refers to polygraphy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polyketide synthase**

polyketide synthase refers to polyketide synthase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polylysine**

polylysine refers to polylysine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polymer**

polymer refers to polymer, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polymerization**

polymerization refers to polymerization, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polymyxin b**

polymyxin b refers to polymyxin b, a medical condition or clinical finding defined by its features, causes,

---

affected system, and patient context.

**Synonyms:**

### **polyneuritis**

polyneuritis refers to polyneuritis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polynucleotide**

polynucleotide concerns polynucleotide, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **polyoma virus**

polyoma virus is a virus or viral group associated with polyoma virus; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **polyomavirus hominis 2**

polyomavirus hominis 2 is a virus or viral group associated with polyomavirus hominis 2; disease risk depends on strain, transmission route, host, and tissue tropism.

**Synonyms:**

### **polyphenol**

polyphenol refers to polyphenol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polyploid**

polyploid refers to polyploid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polyposis**

polyposis refers to polyposis, a medical condition or clinical finding defined by its features, causes,

affected system, and patient context.

**Synonyms:**

### **polypropylene**

polypropylene refers to polypropylene, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polyradiculopathy**

polyradiculopathy refers to polyradiculopathy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polysaccharide**

polysaccharide refers to polysaccharide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polysome**

polysome refers to polysome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polysplenia**

polysplenia refers to polysplenia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polystyrene**

polystyrene refers to polystyrene, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **polytene chromosome**

polytene chromosome denotes polytene chromosome, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and

---

laboratory findings.

**Synonyms:**

**polythiazide**

polythiazide refers to polythiazide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**polyurethane**

polyurethane refers to polyurethane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**polyvinyl**

polyvinyl refers to polyvinyl, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pomalidomide**

pomalidomide refers to pomalidomide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**Pontiac fever**

Pontiac fever denotes an infectious or toxic condition involving pontiac fever; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**popliteal cyst**

popliteal cyst refers to popliteal cyst, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**population density**

population density refers to population density, a medical condition or clinical finding defined by its features, causes, affected system, and patient con-

text.

**Synonyms:**

**population genetics**

population genetics denotes population genetics, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**population group**

population group refers to population group, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**population health**

population health refers to population health, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pore**

pore refers to pore, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**porfimer sodium**

porfimer sodium refers to porfimer sodium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**porfiromycin**

porfiromycin concerns porfiromycin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**porifera**

porifera refers to porifera, a medical condition or

---

clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**porin**

porin concerns porin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**porokeratosis**

porokeratosis refers to porokeratosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**poroma**

poroma refers to poroma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**porphyria**

porphyria refers to porphyria, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**porphyrin**

porphyrin refers to porphyrin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**porphyromonas**

porphyromonas refers to porphyromonas, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**porphyromonas bennonis**

porphyromonas bennonis refers to porphyromonas bennonis, a medical condition or clinical finding defined by its features, causes, affected system, and

patient context.

**Synonyms:**

**porphyromonas catoniae**

porphyromonas catoniae refers to porphyromonas catoniae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**porphyromonas endodontalis**

porphyromonas endodontalis refers to porphyromonas endodontalis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**porphyromonas levii**

porphyromonas levii refers to porphyromonas levii, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**porphyromonas somerae**

porphyromonas somerae refers to porphyromonas somerae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**portion of cytosol**

portion of cytosol refers to portion of cytosol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**port-wine stain**

port-wine stain refers to port-wine stain, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**positive**

positive refers to positive, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**positive finding**

positive finding refers to positive finding, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**positron camera**

positron camera refers to positron camera, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**postal service**

postal service refers to postal service, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**posterior rhinorrhea**

posterior rhinorrhea refers to posterior rhinorrhea, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**postganglionic fiber**

postganglionic fiber refers to postganglionic fiber, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**postnatal care**

postnatal care refers to postnatal care, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**postoperative hemorrhage**

postoperative hemorrhage denotes a clinical condition or finding involving postoperative hemorrhage; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**postoperative infection**

postoperative infection denotes an infectious or toxic condition involving postoperative infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**postoperative period**

postoperative period refers to postoperative period, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**postprandial period**

postprandial period refers to postprandial period, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**postsynaptic membrane**

postsynaptic membrane refers to postsynaptic membrane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**potassium acetate**

potassium acetate refers to potassium acetate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**potassium channel**

potassium channel refers to potassium channel, a medical condition or clinical finding defined by its

---

features, causes, affected system, and patient context.

**Synonyms:**

### **potassium chloride**

potassium chloride refers to potassium chloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **potassium citrate**

potassium citrate refers to potassium citrate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **potassium cyanide**

potassium cyanide refers to potassium cyanide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **potassium deficiency**

potassium deficiency denotes a clinical condition or finding involving potassium deficiency; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **potassium dichromate**

potassium dichromate refers to potassium dichromate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **potassium iodide**

potassium iodide refers to potassium iodide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **potassium ion**

potassium ion refers to potassium ion, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **potential**

potential refers to potential, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **potentiometry**

potentiometry refers to potentiometry, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **poultice**

poultice refers to poultice, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pound**

pound refers to pound, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **povidone**

povidone refers to povidone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **povidone-iodine**

povidone-iodine refers to povidone-iodine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **powder diffraction**

powder diffraction refers to powder diffraction, a

---

medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **poxviridae**

poxviridae identifies poxviridae, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **poxviridae infection**

poxviridae infection identifies poxviridae infection, a biological taxon or infectious-disease concept whose clinical importance depends on the organism, host, and site involved.

**Synonyms:**

### **ppar alpha**

ppar alpha refers to ppar alpha, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **ppar delta**

ppar delta refers to ppar delta, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pracinostat**

pracinostat refers to pracinostat, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **practitioner**

practitioner refers to practitioner, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pragmatic trial**

pragmatic trial refers to pragmatic trial, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pralatrexate**

pralatrexate refers to pralatrexate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **pravastatin**

pravastatin concerns pravastatin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **pravastatin sodium**

pravastatin sodium refers to pravastatin sodium, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **praziquantel**

praziquantel refers to praziquantel, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **prealbumin**

prealbumin refers to prealbumin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **precancerous condition**

precancerous condition denotes a neoplastic condition involving precancerous condition; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

---

**precancerous polyp**

precancerous polyp denotes a neoplastic condition involving precancerous polyp; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**precipitating factor**

precipitating factor refers to precipitating factor, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**preclinical study**

preclinical study refers to preclinical study, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**preconception care**

preconception care refers to preconception care, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prediabetes syndrome**

prediabetes syndrome denotes a clinical condition or finding involving prediabetes syndrome; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**prednimustine**

prednimustine concerns prednimustine, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**prednisolone**

prednisolone refers to prednisolone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prednisone**

prednisone refers to prednisone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**preexcitation syndrome**

preexcitation syndrome denotes a clinical condition or finding involving preexcitation syndrome; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**prefix**

prefix refers to prefix, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prefrontal cortex**

prefrontal cortex refers to prefrontal cortex, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pregabalin**

pregabalin refers to pregabalin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**preganglionic fiber**

preganglionic fiber refers to preganglionic fiber, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pregnancy complication**

pregnancy complication refers to pregnancy complication, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**pregnancy outcome**

pregnancy outcome refers to pregnancy outcome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pregnancy status**

pregnancy status refers to pregnancy status, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pregnancy trimester**

pregnancy trimester refers to pregnancy trimester, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pregnane**

pregnane refers to pregnane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pregnanolone**

pregnanolone refers to pregnanolone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pregnenolone**

pregnenolone refers to pregnenolone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**premalignant**

premalignant refers to premalignant, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**premature adrenarche**

premature adrenarche refers to premature adrenarche, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**premature closure**

premature closure refers to premature closure, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**premature labor**

premature labor refers to premature labor, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**premature thelarche**

premature thelarche refers to premature thelarche, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pre-medication**

pre-medication refers to pre-medication, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pre-miRNA**

pre-miRNA denotes pre-mirna, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**prenylation**

prenylation refers to prenylation, a medical condition or clinical finding defined by its features, causes,

---

affected system, and patient context.

**Synonyms:**

**preoperative care**

preoperative care refers to preoperative care, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**preoptic area**

preoptic area refers to preoptic area, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**presenile dementia**

presenile dementia refers to presenile dementia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**presenilin**

presenilin refers to presenilin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**preservation**

preservation refers to preservation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**preservative**

preservative refers to preservative, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pressoreceptor**

pressoreceptor denotes pressoreceptor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory

findings.

**Synonyms:**

**presynaptic terminals**

presynaptic terminals refers to presynaptic terminals, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**primary endpoint**

primary endpoint refers to primary endpoint, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**primary hypersomnia**

primary hypersomnia refers to primary hypersomnia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**primary hypoparathyroidism**

primary hypoparathyroidism refers to primary hypoparathyroidism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**primary hypothyroidism**

primary hypothyroidism refers to primary hypothyroidism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**primary microRNA**

primary microRNA denotes primary microRNA, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

---

**primidone**

primidone refers to primidone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**primitive node**

primitive node refers to primitive node, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**primitive streak**

primitive streak refers to primitive streak, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prinomastat**

prinomastat refers to prinomastat, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**privacy**

privacy refers to privacy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**privacy breach**

privacy breach refers to privacy breach, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**probability**

probability refers to probability, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**probenecid**

probenecid refers to probenecid, a medical condition

or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proboscis**

proboscis refers to proboscis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**probucol**

probucol refers to probucol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**procainamide**

procainamide refers to procainamide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**procaine**

procaine concerns procaine, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**procarbazine**

procarbazine refers to procarbazine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**procarbazine hydrochloride**

procarbazine hydrochloride refers to procarbazine hydrochloride, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**procentriole**

procentriole refers to procentriole, a medical condi-

---

tion or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **procerus muscle**

procerus muscle refers to procerus muscle, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **processing bodies**

processing bodies refers to processing bodies, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **processor**

processor refers to processor, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **prochlorperazine**

prochlorperazine refers to prochlorperazine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **procollagen**

procollagen refers to procollagen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **proctoscope**

proctoscope refers to proctoscope, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **proctoscopy**

proctoscopy refers to proctoscopy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **product recall**

product recall refers to product recall, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **productive cough**

productive cough refers to productive cough, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **proestrus**

proestrus refers to proestrus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **progesterone antagonist**

progesterone antagonist refers to progesterone antagonist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **progestin**

progestin refers to progestin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **prognostic factor**

prognostic factor refers to prognostic factor, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **program development**

program development refers to program development, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**programmed instruction**

programmed instruction refers to programmed instruction, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proinsulin**

proinsulin refers to proinsulin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**projectile vomiting**

projectile vomiting refers to projectile vomiting, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prokaryote**

prokaryote refers to prokaryote, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prolactin**

prolactin refers to prolactin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prolactin receptor**

prolactin receptor denotes prolactin receptor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**prolapsed cord**

prolapsed cord refers to prolapsed cord, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proliferation**

proliferation refers to proliferation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prolindac**

prolindac refers to prolindac, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proline**

proline refers to proline, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prolymphocyte count**

prolymphocyte count refers to prolymphocyte count, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prolymphocytic leukemia**

prolymphocytic leukemia denotes a neoplastic condition involving prolymphocytic leukemia; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**promazine**

promazine refers to promazine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**promecarb**

promecarb refers to promecarb, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**promegapoietin**

promegapoietin refers to promegapoietin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prometaphase**

prometaphase refers to prometaphase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**promethazine**

promethazine refers to promethazine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**promonocyte count**

promonocyte count refers to promonocyte count, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**promyelocytes**

promyelocytes refers to promyelocytes, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prone**

prone refers to prone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pronephric**

pronephric refers to pronephric, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**propane**

propane refers to propane, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**propanol**

propanol refers to propanol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**propellant**

propellant refers to propellant, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**properdin**

properdin refers to properdin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**propetamphos**

propetamphos refers to propetamphos, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prophage**

prophage refers to prophage, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prophase**

prophase refers to prophase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prophenofos**

prophenofos refers to prophenofos, a medical condi-

---

tion or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **prophylactic mastectomy**

prophylactic mastectomy is used in relation to prophylactic mastectomy during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

### **propiolactone**

propiolactone refers to propiolactone, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **propionates**

propionates refers to propionates, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **propionibacteriaceae**

propionibacteriaceae is a microorganism or microbial group associated with propionibacteriaceae; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **propionibacterium**

propionibacterium is a microorganism or microbial group associated with propionibacterium; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **propionibacterium acnes**

propionibacterium acnes is a microorganism or microbial group associated with propionibacterium acnes; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **propofol**

propofol refers to propofol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **propoxur**

propoxur refers to propoxur, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **propoxycaine**

propoxycaine concerns propoxycaine, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **propoxyphene**

propoxyphene refers to propoxyphene, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **propranolol**

propranolol concerns propranolol, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **propylene glycol**

propylene glycol refers to propylene glycol, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **prosencephalon**

prosencephalon refers to prosencephalon, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**prosopagnosia**

prosopagnosia refers to prosopagnosia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prosoposchisis**

prosoposchisis refers to prosoposchisis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prostaglandin**

prostaglandin refers to prostaglandin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prostaglandin antagonist**

prostaglandin antagonist refers to prostaglandin antagonist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prostaglandin degradation**

prostaglandin degradation refers to prostaglandin degradation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prostaglandin receptor**

prostaglandin receptor denotes prostaglandin receptor, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**prostaglandins e**

prostaglandins e refers to prostaglandins e, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prostaglandins f**

prostaglandins f refers to prostaglandins f, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prostate carcinoma**

prostate carcinoma denotes a neoplastic condition involving prostate carcinoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**prostate disease**

prostate disease denotes a clinical condition or finding involving prostate disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**prostate infection**

prostate infection denotes an infectious or toxic condition involving prostate infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**prostate neoplasm**

prostate neoplasm denotes a neoplastic condition involving prostate neoplasm; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**prostatic fluid**

prostatic fluid refers to prostatic fluid, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prostatic obstruction**

prostatic obstruction denotes a clinical condition or finding involving prostatic obstruction; evaluation identifies mechanism, affected system, severity, complications, and management.

---

**Synonyms:**

**prostatism**

prostatism refers to prostatism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prosthetic heart valve**

prosthetic heart valve refers to prosthetic heart valve, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**protamine**

protamine refers to protamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**protanopia**

protanopia refers to protanopia, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proteaphagy**

proteaphagy refers to proteaphagy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proteasome**

proteasome refers to proteasome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proteasome binding**

proteasome binding refers to proteasome binding, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proteasome inhibitor**

proteasome inhibitor refers to proteasome inhibitor, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**protective agent**

protective agent refers to protective agent, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**protegrin**

protegrin refers to protegrin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**protein acetylation**

protein acetylation denotes protein acetylation, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**protein biosynthesis**

protein biosynthesis denotes protein biosynthesis, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**protein deficiency**

protein deficiency denotes protein deficiency, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**protein denaturation**

protein denaturation denotes protein denaturation, a biological component or molecular process inter-

---

preted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein dephosphorylation**

protein dephosphorylation denotes protein dephosphorylation, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein engineering**

protein engineering denotes protein engineering, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein expression**

protein expression denotes protein expression, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein glycosylation**

protein glycosylation denotes protein glycosylation, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein import**

protein import denotes protein import, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein isoform**

protein isoform denotes protein isoform, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein kinase**

protein kinase denotes protein kinase, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein metabolism**

protein metabolism denotes protein metabolism, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein methylation**

protein methylation denotes protein methylation, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein overexpression**

protein overexpression denotes protein overexpression, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein phosphorylation**

protein phosphorylation denotes protein phosphorylation, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein prenylation**

protein prenylation denotes protein prenylation, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein purification**

protein purification denotes protein purification, a biological component or molecular process inter-

---

preted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein refolding**

protein refolding denotes protein refolding, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein secretion**

protein secretion denotes protein secretion, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein sequence**

protein sequence denotes protein sequence, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein splicing**

protein splicing denotes protein splicing, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein subunit**

protein subunit denotes protein subunit, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein translocation**

protein translocation denotes protein translocation, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein transport**

protein transport denotes protein transport, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **protein unfolding**

protein unfolding denotes protein unfolding, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **proteinaceous plug**

proteinaceous plug denotes proteinaceous plug, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **proteobacteria**

proteobacteria is a microorganism or microbial group associated with proteobacteria; clinical relevance depends on pathogenicity, exposure, site, and antimicrobial susceptibility.

**Synonyms:**

### **proteogenomics**

proteogenomics refers to proteogenomics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **proteoglycan**

proteoglycan refers to proteoglycan, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **proteolipids**

proteolipids denotes proteolipids, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

---

**Synonyms:**

**proteolysis**

proteolysis refers to proteolysis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proteome**

proteome refers to proteome, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proteomic profile**

proteomic profile refers to proteomic profile, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proteomics**

proteomics refers to proteomics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proteus**

proteus refers to proteus, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proteus hauseri**

proteus hauseri refers to proteus hauseri, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proteus mirabilis**

proteus mirabilis refers to proteus mirabilis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proteus penneri**

proteus penneri refers to proteus penneri, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**proteus syndrome**

proteus syndrome denotes a clinical condition or finding involving proteus syndrome; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**proteus vulgaris**

proteus vulgaris refers to proteus vulgaris, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prothionamide**

prothionamide refers to prothionamide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**prothrombin**

prothrombin refers to prothrombin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**protista**

protista refers to protista, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**protocol agent**

protocol agent refers to protocol agent, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

### **psychoacoustics**

psychoacoustics refers to psychoacoustics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **psychobiology**

psychobiology refers to psychobiology, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **psychodidae**

psychodidae refers to psychodidae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **psychodrama**

psychodrama refers to psychodrama, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **psycholinguistics**

psycholinguistics refers to psycholinguistics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **psychological adjustment**

psychological adjustment refers to psychological adjustment, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **psychological dependence**

psychological dependence refers to psychological dependence, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **psychological transfer**

psychological transfer refers to psychological transfer, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **psychology**

psychology refers to psychology, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **psychometrics**

psychometrics refers to psychometrics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **psychomotor agitation**

psychomotor agitation refers to psychomotor agitation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **psychomotor disorder**

psychomotor disorder denotes a clinical condition or finding involving psychomotor disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

### **psychomotor performance**

psychomotor performance refers to psychomotor performance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **psychoneuroimmunology**

psychoneuroimmunology refers to psychoneuroimmunology, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**psychopathology**

psychopathology refers to psychopathology, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**psychophysics**

psychophysics refers to psychophysics, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**psychophysiology**

psychophysiology refers to psychophysiology, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**psychosexual development**

psychosexual development refers to psychosexual development, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**psychosurgery**

psychosurgery is used in relation to psychosurgery during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

**Psychotic Disorder**

Psychotic Disorder denotes a clinical condition or finding involving psychotic disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**psychotropic drug**

psychotropic drug refers to psychotropic drug, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**psychrobacter**

psychrobacter denotes an infectious or toxic condition involving psychrobacter; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**psychrobacter immobilis**

psychrobacter immobilis denotes an infectious or toxic condition involving psychrobacter immobilis; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**pteridine**

pteridine refers to pteridine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pubertal failure**

pubertal failure refers to pubertal failure, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**public assistance**

public assistance refers to public assistance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**public policy**

public policy refers to public policy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**publication**

publication refers to publication, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**puerperal disorder**

puerperal disorder denotes a clinical condition or finding involving puerperal disorder; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**puerperal infection**

puerperal infection denotes an infectious or toxic condition involving puerperal infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**pulmonary blastoma**

pulmonary blastoma denotes a neoplastic condition involving pulmonary blastoma; evaluation establishes tissue of origin, extent, biologic behavior, and treatment.

**Synonyms:**

**pulmonary circulation**

pulmonary circulation refers to pulmonary circulation, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pulmonary compliance**

pulmonary compliance refers to pulmonary compliance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pulmonary fistula**

pulmonary fistula refers to pulmonary fistula, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pulmonary hemorrhage**

pulmonary hemorrhage denotes a clinical condition or finding involving pulmonary hemorrhage; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**pulmonary infection**

pulmonary infection denotes an infectious or toxic condition involving pulmonary infection; diagnosis considers exposure or pathogen, affected site, severity, and host response.

**Synonyms:**

**pulmonary mass**

pulmonary mass refers to pulmonary mass, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pulmonary nodule**

pulmonary nodule refers to pulmonary nodule, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pulmonary reactance**

pulmonary reactance refers to pulmonary reactance, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pulmonary trunk**

pulmonary trunk refers to pulmonary trunk, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pulmonary valve insufficiency**

pulmonary valve insufficiency refers to pulmonary valve insufficiency, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**pulmonologist**

pulmonologist refers to pulmonologist, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pulp canal**

pulp canal refers to pulp canal, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pulp disease**

pulp disease denotes a clinical condition or finding involving pulp disease; evaluation identifies mechanism, affected system, severity, complications, and management.

**Synonyms:**

**pulpitis**

pulpitis refers to pulpitis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pulse irregular**

pulse irregular refers to pulse irregular, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pulse radiolysis**

pulse radiolysis refers to pulse radiolysis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pulse rate**

pulse rate refers to pulse rate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pulvinar**

pulvinar refers to pulvinar, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**puncture biopsy**

puncture biopsy refers to puncture biopsy, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**punicic acid**

punicic acid denotes punicic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**punishment**

punishment refers to punishment, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**purine**

purine refers to purine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**purine nucleosides**

purine nucleosides refers to purine nucleosides, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**purine nucleotides**

purine nucleotides refers to purine nucleotides, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**purinoceptor**

purinoceptor refers to purinoceptor, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**purkinje cell**

purkinje cell denotes purkinje cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**puromycin**

puromycin concerns puromycin, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**purulent discharge**

purulent discharge refers to purulent discharge, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**putamen**

putamen refers to putamen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**putrescine**

putrescine refers to putrescine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**p-value**

p-value refers to p-value, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pynodysostosis**

pynodysostosis refers to pynodysostosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyelitis**

pyelitis refers to pyelitis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyloric antrum**

pyloric antrum refers to pyloric antrum, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyoderma**

pyoderma refers to pyoderma, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyometra**

pyometra refers to pyometra, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyramidal cell**

pyramidal cell denotes pyramidal cell, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**pyramidal tract**

pyramidal tract refers to pyramidal tract, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

---

**pyrazinamide**

pyrazinamide refers to pyrazinamide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyrazines**

pyrazines refers to pyrazines, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyrazole**

pyrazole concerns pyrazole, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**pyrazoles**

pyrazoles refers to pyrazoles, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyrene**

pyrene refers to pyrene, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyrenochaeta**

pyrenochaeta refers to pyrenochaeta, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyridine**

pyridine refers to pyridine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyridostigmine bromide**

pyridostigmine bromide refers to pyridostigmine bromide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyridoxal phosphate**

pyridoxal phosphate refers to pyridoxal phosphate, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyrimethamine**

pyrimethamine refers to pyrimethamine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyrimidine analog**

pyrimidine analog refers to pyrimidine analog, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyrimidine dimer**

pyrimidine dimer refers to pyrimidine dimer, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyrimidine nucleosides**

pyrimidine nucleosides refers to pyrimidine nucleosides, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyrimidine nucleotides**

pyrimidine nucleotides refers to pyrimidine nucleotides, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

---

**Synonyms:**

**pyrogen**

pyrogen refers to pyrogen, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyroglyphidae**

pyroglyphidae refers to pyroglyphidae, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyronine**

pyronine refers to pyronine, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyrophosphatase**

pyrophosphatase refers to pyrophosphatase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyropoikilocytosis**

pyropoikilocytosis refers to pyropoikilocytosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyroptosis**

pyroptosis refers to pyroptosis, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyrosequencing**

pyrosequencing refers to pyrosequencing, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyroxamide**

pyroxamide refers to pyroxamide, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyrroles**

pyrroles refers to pyrroles, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyrrolidonecarboxylic acid**

pyrrolidonecarboxylic acid denotes pyrrolidonecarboxylic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

**pyrrolnitrin**

pyrrolnitrin refers to pyrrolnitrin, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyruvate decarboxylase**

pyruvate decarboxylase refers to pyruvate decarboxylase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

**pyruvate kinase**

pyruvate kinase refers to pyruvate kinase, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

It is guided by personal and family history, previous pregnancy outcomes, ancestry, and test findings.

**Synonyms:** Pregnancy genetic counseling; antenatal genetic counseling.

**Painful urination (dysuria)**

Pain, burning, or discomfort during urination, com-

---

monly caused by urinary infection, inflammation, stones, irritation, or sexually transmitted infection. **Synonyms:**

### **Peeling skin**

Loss or shedding of the outer layer of skin, which may result from dryness, sunburn, irritation, allergy, infection, inflammation, or a systemic illness. **Synonyms:**

### **Protein in urine (proteinuria)**

An abnormal amount of protein in the urine, which may be temporary or indicate kidney disease, diabetes, high blood pressure, infection, or another condition. **Synonyms:**

### **Testicle pain**

Pain in one or both testicles that may result from injury, infection, inflammation, torsion, hernia, or referred pain; sudden severe pain requires urgent assessment. **Synonyms:**

### **PA/IVS**

Alternate index label; see *Pulmonary atresia with intact ventricular septum*. **Synonyms:**

### **PAES**

Alternate index label; see *Popliteal artery entrapment*. **Synonyms:**

### **Pain, back**

Alternate index label; see *Back pain*. **Synonyms:**

### **Pain, breast**

Alternate index label; see *Breast pain*. **Synonyms:**

### **Pain, chest**

Alternate index label; see *Chest pain*. **Synonyms:**

### **Pain, knee**

Alternate index label; see *Knee pain*. **Synonyms:**

### **Pain, neck**

Alternate index label; see *Neck pain*. **Synonyms:**

### **Pain, wrist**

Alternate index label; see *Wrist pain*. **Synonyms:**

### **Painful bladder syndrome**

Alternate index label; see *Interstitial cystitis*. **Synonyms:**

### **Painful periods**

Alternate index label; see *Menstrual cramps*. **Synonyms:**

### **Palsy, Bell's**

Alternate index label; see *Bell's palsy*. **Synonyms:**

### **Palsy, cerebral**

Alternate index label; see *Cerebral palsy*. **Synonyms:**

### **Palsy, facial**

Alternate index label; see *Bell's palsy*. **Synonyms:**

### **Pancreas inflammation**

Alternate index label; see *Pancreatitis*. **Synonyms:**

### **PAPVR**

Alternate index label; see *Partial anomalous pulmonary venous return*. **Synonyms:**

### **Paraneoplastic neurological disorder**

Alternate index label; see *Paraneoplastic syndromes of the nervous system*. **Synonyms:**

### **Paraneoplastic neurological syndrome**

Alternate index label; see *Paraneoplastic syndromes of the nervous system*. **Synonyms:**

### **Partial anomalous pulmonary venous connection**

Alternate index label; see *Partial anomalous pulmonary venous return*. **Synonyms:**

### **Pathological gambling**

Alternate index label; see *Compulsive gambling*. **Synonyms:**

---

**Pathological laughter and crying**

Alternate index label; see *Pseudobulbar affect*. **Synonyms:**

**Pathological stealing**

Alternate index label; see *Kleptomania*. **Synonyms:**

**PBA**

Alternate index label; see *Pseudobulbar affect*. **Synonyms:**

**PDA**

Alternate index label; see *Patent ductus arteriosus (PDA)*. **Synonyms:**

**Pelvic pain, chronic**

Alternate index label; see *Chronic pelvic pain*. **Synonyms:**

**Pelvic support problems, uterine prolapse**

Alternate index label; see *Uterine prolapse*. **Synonyms:**

**Perforated eardrum**

Alternate index label; see *Ruptured eardrum (perforated eardrum)*. **Synonyms:**

**Pericardial inflammation**

Alternate index label; see *Pericarditis*. **Synonyms:**

**Periodontal disease, gingivitis**

Alternate index label; see *Gingivitis*. **Synonyms:**

**Periodontal disease, periodontitis**

Alternate index label; see *Periodontitis*. **Synonyms:**

**Peripheral neurofibromatosis**

Alternate index label; see *Neurofibromatosis type 1*. **Synonyms:**

**Pernio**

Alternate index label; see *Chilblains*. **Synonyms:**

**Peroneal muscular atrophy**

Alternate index label; see *Charcot-Marie-Tooth disease*. **Synonyms:**

**Personality disorder, antisocial**

Alternate index label; see *Antisocial personality disorder*. **Synonyms:**

**Personality disorder, borderline**

Alternate index label; see *Borderline personality disorder*. **Synonyms:**

**Personality disorder, narcissistic**

Alternate index label; see *Narcissistic personality disorder*. **Synonyms:**

**Personality disorder, schizoid**

Alternate index label; see *Schizoid personality disorder*. **Synonyms:**

**Personality disorder, schizotypal**

Alternate index label; see *Schizotypal personality disorder*. **Synonyms:**

**Pes planus**

Alternate index label; see *Flatfeet*. **Synonyms:**

**Petit mal seizure**

Alternate index label; see *Absence seizure*. **Synonyms:**

**Phobia, social**

Alternate index label; see *Social anxiety disorder (social phobia)*. **Synonyms:**

**PHT**

Alternate index label; see *Portal hypertension*. **Synonyms:**

**PID**

Alternate index label; see *Pelvic inflammatory disease (PID)*. **Synonyms:**

---

### **Pilonidal dimple**

Alternate index label; see *Sacral dimple*. **Synonyms:**

### **Pimples**

Alternate index label; see *Acne*. **Synonyms:**

### **Pituitary insufficiency**

Alternate index label; see *Hypopituitarism*. **Synonyms:**

### **Pituitary neuroendocrine tumor**

Alternate index label; see *Pituitary tumors and adenomas*. **Synonyms:**

### **Pityriasis versicolor**

Alternate index label; see *Tinea versicolor*. **Synonyms:**

### **PJI**

Alternate index label; see *Periprosthetic joint infection (PJI)*. **Synonyms:**

### **PJS**

Alternate index label; see *Peutz-Jeghers syndrome*. **Synonyms:**

### **PKD**

Alternate index label; see *Polycystic kidney disease*. **Synonyms:**

### **PKU**

Alternate index label; see *Phenylketonuria (PKU)*. **Synonyms:**

### **Plantar neuroma**

Alternate index label; see *Morton neuroma*. **Synonyms:**

### **PLS**

Alternate index label; see *Primary lateral sclerosis (PLS)*. **Synonyms:**

### **PMBCL**

Alternate index label; see *Primary mediastinal large B-cell lymphoma*. **Synonyms:**

### **PMBL**

Alternate index label; see *Primary mediastinal large B-cell lymphoma*. **Synonyms:**

### **PN**

Alternate index label; see *Plexiform neurofibroma*. **Synonyms:**

### **PNF**

Alternate index label; see *Plexiform neurofibroma*. **Synonyms:**

### **Polyps, colon**

Alternate index label; see *Colon polyps*. **Synonyms:**

### **Polyps, endometrial**

Alternate index label; see *Uterine polyps*. **Synonyms:**

### **Polyps, nasal**

Alternate index label; see *Nasal polyps*. **Synonyms:**

### **Polyps, stomach**

Alternate index label; see *Stomach polyps*. **Synonyms:**

### **Polyps, uterine**

Alternate index label; see *Uterine polyps*. **Synonyms:**

### **Pompholyx**

Alternate index label; see *Dyshidrosis*. **Synonyms:**

### **Poor color vision**

Alternate index label; see *Color blindness*. **Synonyms:**

### **Post-cardiac injury syndrome**

Alternate index label; see *Dressler syndrome*. **Synonyms:**

---

**Post-chemotherapy cognitive impairment**

Alternate index label; see *Chemo brain*. **Synonyms:**

**Posterior prolapse**

Alternate index label; see *Posterior vaginal prolapse (rectocele)*. **Synonyms:**

**Postmyocardial infarction syndrome**

Alternate index label; see *Dressler syndrome*. **Synonyms:**

**Postural hypotension**

Alternate index label; see *Orthostatic hypotension (postural hypotension)*. **Synonyms:**

**Prader-Labhart-Willi syndrome**

Alternate index label; see *Prader-Willi syndrome*. **Synonyms:**

**Pregnancy-related hypertension**

Alternate index label; see *Preeclampsia*. **Synonyms:**

**Premature ovarian failure**

Alternate index label; see *Primary ovarian insufficiency*. **Synonyms:**

**Premature puberty**

Alternate index label; see *Precocious puberty*. **Synonyms:**

**Pressure sore**

Alternate index label; see *Bedsore (pressure ulcer)*. **Synonyms:**

**Prickly heat**

Alternate index label; see *Heat rash*. **Synonyms:**

**Primary adrenal insufficiency**

Alternate index label; see *Addison's disease*. **Synonyms:**

**Primary biliary cirrhosis**

Alternate index label; see *Primary biliary cholangitis (PBC)*. **Synonyms:**

**Primary polycythemia**

Alternate index label; see *Polycythemia vera*. **Synonyms:**

**Prolapse, mitral valve**

Alternate index label; see *Mitral valve prolapse*. **Synonyms:**

**Prolapsed bladder**

Alternate index label; see *Anterior vaginal prolapse (cystocele)*. **Synonyms:**

**Prolapsed uterus**

Alternate index label; see *Uterine prolapse*. **Synonyms:**

**Prostate gland enlargement**

Alternate index label; see *Benign prostatic hyperplasia (BPH)*. **Synonyms:**

**Pruritis ani**

Alternate index label; see *Anal itching*. **Synonyms:**

**PTCL**

Alternate index label; see *Peripheral T-cell lymphoma*. **Synonyms:**

**Puffy eyes**

Alternate index label; see *Bags under eyes*. **Synonyms:**

**PVCs**

Alternate index label; see *Premature ventricular contractions (PVCs)*. **Synonyms:**

**PVD**

Alternate index label; see *Peripheral artery disease (PAD)*. **Synonyms:**

---

## PVPS

Alternate index label; see *Post-vasectomy pain syndrome*. **Synonyms:**

## Q

### Q Fever

A zoonotic disease caused by *Coxiella burnetii*, an obligate intracellular Gram-negative bacterium. Q fever is transmitted to humans primarily by inhalation of contaminated aerosols from infected livestock (cattle, sheep, goats) and their products (placenta, birth fluids, urine, feces, milk). Incubation: 2–3 weeks.

**Synonyms:**

### Quantitative Computed Tomography

CT-based imaging that measures bone mineral density as well as showing bone structure. **Synonyms:** QCT

### Quick Relievers

Fast-acting medicines that relax airway muscle and rapidly ease bronchoconstriction. **Synonyms:** Rescue medicines

### Quiet Sleep

Non-REM sleep, during which brain and body activity generally slow. **Synonyms:** Non-REM sleep

### Q Wave

The negative deflection that follows the P wave in some electrocardiographic leads, representing initial ventricular depolarization.

**Synonyms:**

### QALY

Quality-adjusted life year, a measure combining the length of life with a value assigned to health-related quality of life during that time.

**Synonyms:**

### QRS Complex

The deflection representing ventricular depolarization, consisting of a Q wave (initial downward deflection), R wave (upward deflection), and S wave (downward deflection after R). Normal duration is 0.06-0.10 seconds (1.5-2.5 small boxes). Widened QRS (>0.12 s) indicates bundle branch block, ventricular rhythm, or hyperkalemia.

**Synonyms:**

### QT Interval

The time from the onset of the QRS complex to the end of the T wave, representing total ventricular depolarization and repolarization. Normal QT is 0.35-0.44 seconds. The corrected QT (QTc) adjusts for heart rate using Bazett's formula:  $QTc = QT / \text{square root of RR interval}$ .

**Synonyms:**

### QT Prolongation

An electrocardiographic finding characterized by prolongation of the QT interval, representing the time from ventricular depolarization to repolarization, which predisposes to the potentially fatal arrhythmia torsades de pointes. The corrected QT interval should be less than 440 milliseconds in men and 460 milliseconds in women.

**Synonyms:**

### Quad Screen (Maternal Serum Screening)

Second-trimester prenatal screening (15-22 weeks) for fetal aneuploidy and neural tube defects. Measures 4 markers: AFP (alpha-fetoprotein: elevated in NTD, low in Down syndrome), hCG (elevated in Down syndrome), uE3 (unconjugated estriol: low in Down syndrome), and inhibin A (elevated in Down

---

syndrome).

**Synonyms:** Maternal Serum Screening

### Quadrant

One of four sections of the abdomen (RUQ, LUQ, RLQ, LLQ) used for clinical description. RUQ: liver, gallbladder, duodenum, right kidney. LUQ: stomach, spleen, left kidney, pancreas tail. RLQ: appendix, cecum, right ovary. LLQ: sigmoid colon, left ovary.

**Synonyms:**

### Quadrantectomy

Surgical removal of one quadrant of an organ, most commonly a breast-conserving operation removing a breast tumour with a surrounding margin of tissue. The exact procedure and need for additional treatment depend on pathology and clinical staging.

**Synonyms:**

### Quadriceps Femoris

The four-headed muscle group on the anterior thigh consisting of rectus femoris and the three vasti. It extends the knee; rectus femoris also flexes the hip, and the group contributes to standing, walking, and shock absorption.

**Synonyms:**

### Quadriceps Femoris Muscle

Four-muscle anterior thigh group: rectus femoris, vastus lateralis, vastus medialis, vastus intermedius, all inserting on the tibial tuberosity via the patellar ligament. Innervated by femoral nerve (L2-L4). Primary knee extensor for walking, running, rising from seated. VMO is important for patellar tracking.

**Synonyms:**

### Quadriceps Injury

Damage to the quadriceps muscle or tendon caused by sudden force, overuse, or direct trauma. It may cause front-of-thigh pain, bruising, weakness, or difficulty extending the knee. Severe pain, a palpable defect, or inability to bear weight requires assessment for a significant tear or tendon rupture.

**Synonyms:**

### Quadriceps tendon ruptures

A tear of the tendon connecting the quadriceps muscle to the patella, causing weakness or inability to extend the knee. Complete tears often require surgical repair; treatment depends on the extent of injury and the person's functional needs.

**Synonyms:**

### Quadriplegia

Paralysis of all four limbs and trunk, resulting from a spinal cord lesion at the cervical level or a bilateral brainstem lesion. Common causes include traumatic spinal cord injury, stroke, multiple sclerosis, spinal cord tumors, and demyelinating disease.

**Synonyms:**

### Quadruplet Pregnancy

A pregnancy involving four fetuses. It carries increased risks of preterm birth, fetal growth restriction, hypertensive and metabolic complications, and maternal morbidity and therefore requires specialized multidisciplinary antenatal care.

**Synonyms:**

### Quality Assurance

Planned activities used to verify that healthcare services meet defined standards of safety, quality, and performance.

**Synonyms:**

### Quality Control

Daily, weekly, monthly tests ensure system performance. Uniformity, energy, sensitivity, spatial resolution, count rate performance.

**Synonyms:**

### Quality Control (Laboratory)

Procedures using control materials, calibration, equipment checks, and documented review to ensure that a laboratory method remains accurate and precise during routine testing.

**Synonyms:** Laboratory

### Quality Improvement

Systematic efforts to improve healthcare. Methods:

---

PDSA cycles, Lean, Six Sigma. Outcomes: safety, effectiveness, patient-centeredness.

**Synonyms:**

### **Quality of Life**

A person's perceived physical, psychological, social, and functional well-being.

**Synonyms:**

### **Quality-Adjusted Life Year**

A health-economic measure combining length of life with health-related quality of life on a scale where 1 represents full health and 0 represents death. It is used to compare cost-effectiveness across interventions.

**Synonyms:**

### **Quantification**

Measurement of radiotracer uptake or clearance. SUV (PET), clearance rates (renal), ejection fraction (cardiac). Essential for treatment monitoring.

**Synonyms:**

### **Quantitative PET**

The measurement or estimation of radiotracer concentration and tissue kinetics from PET data, using measures such as standardized uptake value or compartmental modeling.

**Synonyms:**

### **Quarantine**

Separation or restriction of movement of people who have been exposed to an infectious disease while monitoring whether they become ill. It differs from isolation of people who are already infected.

**Synonyms:**

### **Quickening**

The first perception of fetal movement by the mother, typically felt between 16-20 weeks in multiparous women and 18-22 weeks in nulliparous women. Described initially as a subtle fluttering sensation that becomes stronger and more regular as pregnancy progresses.

**Synonyms:**

### **Quiescent**

Inactive or dormant state of disease. Example: quiescent ulcerative colitis (no symptoms but histologic inflammation may persist).

**Synonyms:**

### **Quinine**

An alkaloid derived from cinchona bark, with anti-malarial, antipyretic, and skeletal muscle relaxant properties. Quinine is a blood schizonticide with activity against all Plasmodium species, but resistance has emerged in *P. falciparum*.

**Synonyms:**

### **Quinsy**

A peritonsillar abscess: a collection of pus between the tonsillar capsule and the superior pharyngeal constrictor muscle, usually developing as a complication of tonsillar infection.

**Synonyms:**

### **Quinupristin-dalfopristin**

A streptogramin antibiotic combination that inhibits bacterial protein synthesis. It is used intravenously for selected serious gram-positive infections, including some resistant *Enterococcus faecium* infections, when appropriate alternatives are unavailable.

**Synonyms:**

### **Quorum Sensing**

Cell-density-dependent bacterial communication system in which bacteria produce and detect small signaling molecules (autoinducers—acyl-homoserine lactones in gram-negative, autoinducing peptides in gram-positive, AI-2 inter-species) to coordinate population-wide behaviors.

**Synonyms:**

### **Quadripareisis**

Weakness affecting all four limbs, usually resulting from cervical spinal-cord disease, brain injury, neuromuscular disease, or another disorder of the central or peripheral nervous system.

**Synonyms:**

---

### Quinolone

A class of synthetic antibacterial drugs that inhibit bacterial DNA gyrase or topoisomerase IV. Examples include ciprofloxacin and levofloxacin.

**Synonyms:**

### Quadrantanopia

Loss of vision in one quarter of the visual field, usually caused by a lesion affecting specific portions of the optic pathways.

**Synonyms:**

### Quadriceps Tendon Rupture

A tear of the tendon connecting the quadriceps muscle to the patella, causing pain, swelling, and inability to actively extend the knee.

**Synonyms:**

### Quadriceps Tendinitis

Overuse-related inflammation or degeneration of the quadriceps tendon, causing pain above the kneecap that worsens with jumping, running, or resisted knee extension.

**Synonyms:**

### Quartan Fever

A fever pattern in which fever attacks recur approximately every 72 hours, classically associated with infection by *Plasmodium malariae*.

**Synonyms:**

### Quincke's Disease (Angioneurotic Oedema)

Sudden swelling of deeper layers of the skin or mucosa, commonly affecting the lips, face, tongue, throat, or bowel; airway involvement is an emergency.

**Synonyms:** Angioneurotic Oedema

### Quincke's Pulse

Visible capillary pulsation in the nail bed or skin, often associated with a wide pulse pressure and severe aortic regurgitation.

**Synonyms:**

### Quincke's Sign

A sign of severe aortic regurgitation in which alternating flushing and blanching of the nail bed or skin can be seen with each heartbeat.

**Synonyms:**

### Quotidian Fever

A fever pattern in which fever attacks occur approximately every 24 hours; it may occur in malaria and several other infections.

### qigong

qigong is used in relation to qigong during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

### quality

quality is used in relation to quality during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

### quantum dot

quantum dot is used in relation to quantum dot during assessment, diagnosis, treatment, monitoring, or patient support.

**Synonyms:**

### quassins

quassins concerns quassins, a biologic or physiologic concept used in research, laboratory medicine, and the explanation of disease.

**Synonyms:**

### quercetin

quercetin concerns quercetin, a biologic or physiologic concept used in research, laboratory medicine, and the explanation of disease.

**Synonyms:**

### questionnaire

questionnaire is a clinical assessment, measurement, or procedure used to investigate, monitor, classify,

---

or treat questionnaire.

**Synonyms:**

### **quetiapine fumarate**

quetiapine fumarate concerns quetiapine fumarate, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **quinalphos**

quinalphos concerns quinalphos, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **quinapril**

quinapril concerns quinapril, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **quinazoline**

quinazoline refers to quinazoline, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **quinidine**

quinidine concerns quinidine, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

### **quinolinic acid**

quinolinic acid denotes quinolinic acid, a biological component or molecular process interpreted through relevant cells, pathways, tissues, and laboratory findings.

**Synonyms:**

### **quinone metabolism**

quinone metabolism refers to quinone metabolism, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **quinones**

quinones refers to quinones, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **quinuclidines**

quinuclidines refers to quinuclidines, a medical condition or clinical finding defined by its features, causes, affected system, and patient context.

**Synonyms:**

### **quipazine**

quipazine concerns quipazine, a pharmacologic or chemical agent; clinical use depends on its mechanism, indication, dose, interactions, and adverse effects.

**Synonyms:**

**Synonyms:**

## R

### Rabies

A fatal viral encephalitis caused by rabies virus, transmitted through the bite of infected animals. After inoculation, the virus travels to the CNS via peripheral nerves. Symptoms include hydrophobia, aerophobia, and progressive neurological deterioration. Diagnosis is made by direct fluorescent antibody testing of brain tissue.

**Synonyms:**

### Radial Tunnel Syndrome

Compression of the radial nerve near the elbow, causing arm pain, tingling, or weakness. **Synonyms:**

### Radiation

Energy transmitted as particles or electromagnetic waves, including X-rays and gamma rays. **Synonyms:**

### Radical Prostatectomy

Surgery that removes the entire prostate, usually with nearby seminal vesicles. **Synonyms:**

### Radioallergosorbent Test

A blood test used to detect allergen-specific IgE antibodies. **Synonyms:** RAST

### Radiofrequency

Electromagnetic energy used in some diagnostic and therapeutic medical procedures. **Synonyms:** RF energy

### Radiograph

An image produced using X-rays. **Synonyms:** X-ray

### Radionuclide Imaging or Scan

Imaging that detects radiation from a tracer administered to the patient. **Synonyms:** Nuclear scan; scintigraphy

### Radionuclides

Radioactive atoms used as tracers in nuclear medicine imaging or treatment. **Synonyms:**

### Randomized

Assigned by chance rather than choice or preference, as in a clinical trial. **Synonyms:**

### Rapid Eye Movement Sleep

A sleep stage marked by rapid eye movements, vivid dreaming, and high brain activity. **Synonyms:** REM sleep

### RAST

A blood test for allergen-specific IgE antibodies. **Synonyms:** Radioallergosorbent test

### Raynaud's Syndrome

Episodic narrowing of small blood vessels in fingers or toes triggered by cold or stress. **Synonyms:** Raynaud phenomenon

### RCT

Randomized controlled trial, a study comparing randomly assigned intervention and control groups. **Synonyms:** Randomized controlled trial

### RDA

Recommended dietary allowance, the daily nutrient intake sufficient for nearly all healthy people in a

---

defined group. **Synonyms:** Recommended dietary allowance

### Rebound Insomnia

Return or worsening of insomnia after stopping a sleep medicine. **Synonyms:**

### Receptors

Cell proteins or structures that bind specific signaling molecules and trigger a response. **Synonyms:**

### Recombinant Tissue Plasminogen Activator

A laboratory-produced clot-dissolving medicine used in selected emergencies. **Synonyms:** Recombinant tPA

### Recommended Dietary Allowance

The average daily intake expected to meet the nutrient needs of nearly all healthy people in a defined group. **Synonyms:** RDA

### Recovery

The process of regaining health or overcoming an addiction or harmful behavior. **Synonyms:**

### Rehabilitative Driving Specialist

A professional who evaluates driving ability and recommends adaptive equipment or training. **Synonyms:**

### Rejection

An immune response in which the body attacks transplanted tissue or an organ. **Synonyms:** Transplant rejection

### Relaxation Response

Physiological changes produced by relaxation practices that counter the stress response. **Synonyms:**

### REM

Rapid eye movement, a sleep stage associated with vivid dreams and intense brain activity. **Synonyms:** Rapid eye movement sleep

### REM Behavior Disorder

A sleep disorder in which a person acts out dreams during REM sleep. **Synonyms:** REM sleep behavior disorder

### REM Rebound

Increased REM sleep after REM deprivation or withdrawal of a REM-suppressing medicine. **Synonyms:**

### Renal

Relating to the kidneys. **Synonyms:**

### Reperfusion

Restoration of blood flow to tissue after an interruption. **Synonyms:**

### Reperfusion Therapy

Treatment that restores circulation to tissue deprived of blood, such as clot-dissolving treatment or angioplasty. **Synonyms:**

### Repetitions

The number of times an exercise movement is performed. **Synonyms:** Reps

### Resistance

The ability of a microorganism to withstand a medicine that previously inhibited or killed it. **Synonyms:** Drug resistance

### Resistant Hypertension

High blood pressure that remains above goal despite appropriate treatment with multiple medicines. **Synonyms:** Treatment-resistant hypertension

### Restenosis

Re-narrowing of a blood vessel after it has been opened by angioplasty or another procedure. **Synonyms:**

### Resting Energy Expenditure

The calories the body uses at rest to maintain essential functions. **Synonyms:** Resting metabolic rate

---

### Resuscitation

Emergency measures used to restore breathing and circulation. **Synonyms:** CPR; revival

### Retinoid

A vitamin-A-related compound used in some skin treatments and other medical applications. **Synonyms:**

### Retrieval

The process of recalling information stored in memory. **Synonyms:** Memory retrieval

### Retrospective Study

A study that examines past records or exposures to investigate disease causes or outcomes. **Synonyms:**

### Revascularization

Restoration of blood flow to an area through bypass surgery, angioplasty, or another procedure. **Synonyms:**

### Reward Insufficiency Theory

The theory that inadequate pleasure responses may contribute to addictive behavior. **Synonyms:**

### Reward Pathway

Interconnected brain regions involved in motivation, pleasure, reinforcement, and reward learning. **Synonyms:** Mesolimbic pathway

### Rheumatic Disease

A disorder affecting joints, muscles, connective tissue, or related structures, often through inflammation. **Synonyms:**

### Rheumatism

Pain, stiffness, or discomfort in joints and surrounding soft tissues. **Synonyms:**

### Rheumatologist

A physician specializing in inflammatory and autoimmune diseases of joints and connective tissue. **Synonyms:**

### Rhytidectomy

Cosmetic surgery that removes excess facial skin and tightens supporting tissues. **Synonyms:** Facelift

### Risky Drinking

Alcohol use that increases the likelihood of health, safety, or social consequences. **Synonyms:** Hazardous drinking

### RLS

Restless legs syndrome, an urge to move the legs with uncomfortable sensations, especially at night. **Synonyms:** Restless legs syndrome

### Root

The part of a tooth below the gum line. **Synonyms:**

### Root Canal

The channel inside a tooth root containing the pulp and its nerves and blood vessels. **Synonyms:**

### Roughage

The indigestible portion of plant foods that adds bulk to stool. **Synonyms:** Dietary fiber

### Rupture

A tear or complete break in an organ, vessel, muscle, or other tissue. **Synonyms:**

### Ruptured Disk

A spinal disk whose outer layer has torn, allowing inner material to bulge outward. **Synonyms:** Herniated disk; slipped disk

### Rabies vaccination

Immunization used before or after exposure to reduce the risk of rabies. Post-exposure management also includes wound care and, when indicated, rabies immunoglobulin.

**Synonyms:**

### Radial Artery

The smaller terminal branch of the brachial artery, arising at the cubital fossa, running laterally along the radius to the wrist (palpable at the anatomical

---

snuffbox) and hand. Supplies the lateral forearm and the thumb side of the hand; forms the deep palmar arch.

**Synonyms:**

### **Radial artery thrombosis**

Formation of a thrombus in the radial artery, often at the site of arterial catheterization or in the setting of a hypercoagulable state or vasculitis. May cause hand ischemia with pain, pallor, and decreased pulse. Treatment includes anticoagulation and surgical intervention for limb-threatening ischemia.

**Synonyms:**

### **Radial Club Hand**

A congenital longitudinal deficiency of the radial ray, ranging from thumb hypoplasia to complete absence of the radius. The hand is radially deviated due to the absent radial support, with the carpus displaced proximally and radially.

**Synonyms:**

### **Radial keratotomy**

A refractive surgical procedure, now largely obsolete, in which radial incisions are made in the peripheral corneal stroma to flatten the central cornea and reduce myopia. It was superseded by laser refractive surgery (LASIK, PRK) due to complications including diurnal visual fluctuation, glare, and hyperopic shift.

**Synonyms:**

### **Radial Nerve**

From posterior cord (C5-T1), the plexus's largest branch. In the arm runs in the radial groove with the profunda brachii artery, innervating triceps and anconeus. At the elbow divides into superficial (sensory to dorsal hand) and deep (posterior interosseous) branches. Deep branch innervates forearm/hand extensors.

**Synonyms:**

### **Radiation Biology**

The study of how ionizing or nonionizing radiation affects cells, tissues, organisms, and populations.

**Synonyms:**

### **Radiation Contamination**

Unwanted radioactive material on a person, surface, object, or body site. Contamination may be removable or fixed and requires containment, monitoring, decontamination, and documentation according to radiation-safety procedures.

**Synonyms:**

### **Radiation Dose**

The amount of ionizing radiation absorbed or received by a person or tissue. Dose varies with the examination, equipment, protocol, and patient size; imaging should be justified and optimized to obtain the needed information with the lowest reasonable exposure.

**Synonyms:**

### **Radiation Emergency**

An event involving actual or suspected harmful radiation exposure or contamination that requires urgent protective and medical measures.

**Synonyms:**

### **Radiation Enteritis**

Inflammation and injury of the small or large intestine caused by therapeutic ionizing radiation. It may be acute with diarrhea, cramping, and nausea or delayed with strictures, malabsorption, bleeding, fistula, or obstruction.

**Synonyms:**

### **Radiation Fibrosis**

Permanent scarring and stiffening of tissue caused by radiation injury, which may develop months or years after treatment. It can affect the skin, lungs, bowel, or other organs and may cause pain, reduced function, or shortness of breath.

**Synonyms:**

### **Radiation Monitoring**

Measurement of radiation levels or individual exposure using devices such as personal dosimeters and area monitors.

---

**Synonyms:**

### **Radiation Necrosis**

Irreversible tissue injury caused by ionizing radiation, often developing months or years after treatment. In the brain it may produce edema, seizures, headache, or focal deficits and can resemble recurrent tumour on imaging.

**Synonyms:**

### **Radiation Oncologist**

A physician who uses ionizing radiation and related treatments to manage cancer and selected other diseases.

**Synonyms:**

### **Radiation Oncology**

A medical specialty that uses high-energy radiation (such as X-rays or gamma rays) to shrink tumors and destroy cancer cells.

**Synonyms:**

### **Radiation Physics**

The study and application of physical principles governing radiation production, detection, imaging, therapy, and protection.

**Synonyms:**

### **Radiation Pneumonitis**

An inflammatory lung injury occurring weeks to months after thoracic radiation. It may cause dry cough, fever, dyspnea, and hypoxemia within the irradiated field and can progress to radiation fibrosis.

**Synonyms:**

### **Radiation Poisoning**

Illness caused by substantial exposure to ionizing radiation, potentially producing skin injury, bone-marrow suppression, gastrointestinal symptoms, or organ failure.

**Synonyms:**

### **Radiation Pregnancy Screening**

Assessment of pregnancy status before procedures involving ionizing radiation or radioactive materials

when pregnancy is possible. The decision to proceed requires clinical justification, risk optimization, and consideration of gestational age and fetal dose.

**Synonyms:**

### **Radiation Protection**

The practice of keeping radiation exposure as low as reasonably achievable while obtaining the required diagnostic or therapeutic result. It relies on justification, optimization, time reduction, distance, shielding, and appropriate contamination control.

**Synonyms:**

### **Radiation recall**

An inflammatory reaction that occurs in previously irradiated skin or mucosa after administration of certain chemotherapeutic agents, particularly antimetabolites and anthracyclines. It manifests as erythema, desquamation, or mucositis in the previously irradiated field, mimicking acute radiation dermatitis.

**Synonyms:**

### **Radiation Safety**

Principles: time, distance, shielding. ALARA (As Low As Reasonably Achievable). Radioactive materials handled in designated areas. Waste disposal per regulations. Pregnancy screening for women of childbearing age.

**Synonyms:**

### **Radiation Sickness**

Acute radiation syndrome caused by high-dose whole-body or substantial partial-body exposure to ionizing radiation. It may produce nausea, vomiting, marrow failure, infection, bleeding, gastrointestinal injury, neurovascular collapse, and death depending on dose.

**Synonyms:**

### **Radiation Therapy**

Use of ionizing radiation to kill cancer cells. Types: external beam, brachytherapy, stereotactic. Mechanisms: DNA damage, cell death. Side effects: fatigue, skin reactions, site-specific effects.

---

**Synonyms:**

### **Radiation-induced angiosarcoma**

A rare, aggressive soft tissue sarcoma arising in previously irradiated tissue, typically with a long latency period. It carries a poor prognosis due to local recurrence and metastatic potential.

**Synonyms:**

### **Radiation-Recall Dermatitis**

An inflammatory skin reaction that occurs in a previously irradiated area after exposure to a triggering substance, often months or years later. The area may become red, swollen, painful, or blistered and requires clinical evaluation.

**Synonyms:**

### **Radiculitis**

Inflammation or irritation of a spinal nerve root, causing radiating pain, paresthesia, sensory loss, weakness, or reflex change in a dermatomal or myotomal distribution. Causes include infection, inflammatory disease, disc pathology, and compression.

**Synonyms:**

### **Radiculopathy**

Dysfunction of a spinal nerve root, usually from disc herniation, narrowing, or inflammation. It may cause shooting pain, tingling, numbness, weakness, or altered reflexes along the affected nerve pathway.

**Synonyms:**

### **Radioactive Iodine**

Used for thyroid imaging and treatment. I-131 emits beta particles (therapy) and gamma rays (imaging). Half-life: 8 days. Used for hyperthyroidism (Graves, toxic nodules) and thyroid cancer ablation. I-123 for diagnostics (shorter half-life, pure gamma).

**Synonyms:**

### **Radioactive Iodine Ablation**

Treatment of differentiated thyroid carcinoma using iodine-131 to destroy residual thyroid tissue after total thyroidectomy. Indications include intermedi-

ate and high-risk disease for remnant ablation and treatment of residual or recurrent disease. Patients must be hypothyroid or receive recombinant TSH to maximize iodine uptake.

**Synonyms:**

### **Radioactivity**

The spontaneous transformation of unstable atomic nuclei with emission of particles or electromagnetic radiation. Activity is the rate of nuclear transformations and is measured in becquerels.

**Synonyms:**

### **Radiobiology**

Study of radiation effects on biological systems. DNA damage, cell death, repair mechanisms.

**Synonyms:**

### **Radiocarpal Joint**

The wrist joint between the distal radius and articular disc proximally and the scaphoid, lunate, and triquetrum distally. It permits flexion, extension, radial deviation, ulnar deviation, and circumduction.

**Synonyms:**

### **Radiochemical Purity**

The fraction of total radioactivity present in the intended chemical form of a radiopharmaceutical. Impurities may alter biodistribution, reduce target uptake, and increase radiation dose to nontarget tissues.

**Synonyms:**

### **Radiochemistry**

Chemistry of radiopharmaceuticals. Labeling, purification, quality control.

**Synonyms:**

### **Radiocontrast**

A substance administered during imaging to make selected tissues, vessels, or body spaces more visible.

**Synonyms:**

---

## Radioembolization

Intra-arterial delivery of radioactive microspheres (yttrium-90) to liver tumors through the hepatic artery, used for hepatocellular carcinoma and liver metastases.

**Synonyms:**

## Radiofrequency Ablation

A procedure that uses high-frequency electrical energy to heat and destroy selected tissue, often under imaging guidance.

**Synonyms:**

## Radioimmunoassay

Sensitive immunoassay using radiolabeled antigens or antibodies. Competitive binding principle. Used for hormone measurement (thyroid, reproductive), tumor markers, drug levels. Largely replaced by non-radioactive methods (ELISA) but still used for some assays.

**Synonyms:**

## Radiologic Technologist

A trained health professional who performs selected medical-imaging examinations and helps protect patients from unnecessary radiation exposure.

**Synonyms:**

## Radiologic-Pathologic Correlation

Integration of imaging findings with gross and microscopic pathology to explain lesion location, extent, tissue composition, and sampling adequacy. It is important for discordant biopsy and imaging results.

**Synonyms:**

## Radiologist

A physician trained to interpret medical images and, in some specialties, perform image-guided procedures.

**Synonyms:**

## Radiology Report

Document describing imaging findings and interpretation. Structure: indication, technique, findings, impression. Clear, concise language essential. Criti-

cal findings require immediate communication.

**Synonyms:**

## Radiology-Patient Identification

Verification of the correct patient, examination, body site, indication, pregnancy status when relevant, allergies, renal function, and prior imaging before image acquisition or intervention. It is a core diagnostic and procedural safety step.

**Synonyms:**

## Radiolucent

Describing a material that allows relatively greater passage of X-rays and therefore appears darker on a radiograph or CT image. Air is highly radiolucent; some stones, foreign bodies, and lesions may also be radiolucent.

**Synonyms:**

## Radionuclide Therapy

Internal radiation therapy using radiopharmaceuticals. Examples: I-131 (thyroid), Lu-177 DOTATATE (neuroendocrine tumors), Lu-177 PSMA (prostate cancer), Ra-223 (bone metastases), Y-90 microspheres (liver cancer).

**Synonyms:**

## Radionuclidic Purity

The fraction of radioactivity arising from the intended radionuclide rather than contaminating radionuclides. It is important because contaminants may change radiation type, energy, half-life, dosimetry, and patient risk.

**Synonyms:**

## Radiopaque

Describing a material that attenuates X-rays strongly and therefore appears relatively white on a radiograph or CT image. Bone, metal, and some contrast agents are radiopaque.

**Synonyms:**

## Radiopharmaceutical

Radioactive compound used for diagnostic or therapeutic purposes. Components: radionuclide + tar-

---

getting molecule. Selectivity determines biodistribution and image quality.

**Synonyms:**

### **Radiopharmaceutical Extravasation**

Inadvertent leakage of a radiopharmaceutical from the injection vessel into surrounding tissue. It can reduce diagnostic accuracy and, with therapeutic agents, cause local radiation injury; the event requires documentation and dose assessment.

**Synonyms:**

### **Radiopharmaceutical Labeling Kit**

A prepared set of reagents used to attach a radionuclide, commonly technetium-99m, to a compound for diagnostic imaging.

**Synonyms:**

### **Radiopharmaceutical Quality Control**

Testing performed to verify identity, radionuclidic purity, radiochemical purity, pH, sterility, endotoxin limits, and other release specifications before clinical administration. Requirements depend on the preparation and jurisdiction.

**Synonyms:**

### **Radiopharmacy**

Preparation and dispensing of radiopharmaceuticals. Good manufacturing practice (GMP) required. Sterility, pyrogen testing, quality control.

**Synonyms:**

### **Radiosensitization**

Increased susceptibility of cells or tissues to injury from ionizing radiation.

**Synonyms:**

### **Radiotracer**

A compound containing a radioactive nuclide that follows a biologic pathway and permits in-vivo imaging or measurement. Its distribution reflects the target physiology, receptor, enzyme, transporter, or tissue process.

**Synonyms:**

### **Radium-223**

Alpha emitter, half-life 11.4 days. Used for bone metastases from prostate cancer. Mimics calcium, targets bone turnover sites.

**Synonyms:**

### **Radius**

Lateral forearm bone in the anatomical position. Proximal end: head, neck, radial tuberosity. Shaft. Distal end: styloid process, articular surfaces. The radial head articulates with the capitulum and ulnar notch, allowing pronation/supination. Bears approximately 80 percent of wrist axial load.

**Synonyms:**

### **Rampant Caries**

Widespread severe caries affecting multiple surfaces. Associated with sugary drinks, xerostomia, bulimia.

**Synonyms:**

### **Ramsay Hunt Syndrome**

Reactivation of varicella-zoster virus in the geniculate ganglion causing ipsilateral facial paralysis, severe ear pain, and vesicular eruption in or around the ear or oral cavity. Hearing loss and vertigo may occur; prompt treatment is important.

**Synonyms:**

### **Random Events**

Coincidence events from unrelated photons. Reduced by timing window and energy discrimination.

**Synonyms:**

### **Randomization**

Assignment of study participants to intervention groups by chance, helping reduce systematic differences between groups.

**Synonyms:**

### **Randomized Controlled Trial**

An experimental study in which participants are assigned by chance to different interventions or a control condition and followed for specified outcomes.

**Synonyms:**

---

## Range of Motion

ROM: joint movement capacity. Goniometer measurement. Restrictions from contracture, pain, swelling.

**Synonyms:**

## Ranson Criteria

Clinical scoring system for acute pancreatitis severity incorporating eleven parameters at two time points. Admission parameters include age, white blood cell count, glucose, LDH, and AST. Forty-eight hour parameters include hematocrit drop, BUN increase, calcium, oxygen tension, base deficit, and fluid sequestration.

**Synonyms:**

## Ranula

A mucocele (mucus extravasation cyst) of the sublingual salivary gland, presenting as a blue-translucent, fluctuant swelling in the floor of the mouth, typically lateral to the lingual frenulum. A ranula results from trauma or obstruction of a sublingual gland duct, causing mucus accumulation in the sublingual space.

**Synonyms:**

## Rape

Sexual penetration of the mouth, vagina, or anus accomplished without consent or with a person unable to consent, often through force, threat, fraud, or impairment; many statutes subsume it under sexual assault.

**Synonyms:**

## Rapid Sequence Induction

An intubation technique designed to minimize aspiration risk in patients with full stomach.

**Synonyms:**

## Rapid Strep Test

A test performed on a throat swab to detect Group A Streptococcus. It provides a rapid result, but a negative result may require confirmatory testing depending on the patient's age, symptoms, and local guidance.

**Synonyms:**

## Rapid-Sequence Intubation

A planned emergency airway technique using a sedative-hypnotic and a neuromuscular blocker in rapid succession to facilitate tracheal intubation while minimizing aspiration risk. Preparation includes preoxygenation, backup airway plans, hemodynamic assessment, and confirmation of tube position.

**Synonyms:**

## Rapidly Progressive Glomerulonephritis

A syndrome of rapidly worsening kidney function accompanied by glomerular inflammation, often with crescent formation on biopsy. Causes include anti-glomerular-basement-membrane disease, immune-complex disease, and pauci-immune vasculitis. It requires urgent evaluation and treatment.

**Synonyms:**

## Rasburicase

A recombinant urate-oxidase enzyme that converts uric acid to the more soluble allantoin. It is used in selected patients at risk of or experiencing tumor-lysis-related hyperuricemia. It can cause serious hypersensitivity or hemolysis in people with glucose-6-phosphate dehydrogenase deficiency and requires appropriate screening and monitoring.

**Synonyms:**

## Rash

A general term for any visible skin eruption, change in skin color, texture, or appearance.

**Synonyms:**

## Rashes

Visible eruptions or changes in skin color, texture, or appearance that may result from infection, inflammation, allergy, medicines, or other causes.

**Synonyms:**

## Rat bite fever

A systemic bacterial infection caused by *Streptobacillus moniliformis* or *Spirillum minus*, trans-

---

mitted through rat bites or contact with rat-contaminated food or water. It presents with relapsing fever, rash, polyarthritis, and lymphadenopathy. The characteristic rash is petechial or maculopapular on the extremities.

**Synonyms:**

### **Rat-Bite Fever**

Systemic infection caused by *Streptobacillus moniliformis* or *Spirillum minus* after exposure to infected rodents. Fever, migratory arthralgia, vomiting, and a maculopapular or petechial rash may occur.

**Synonyms:**

### **Raynaud Phenomenon**

Exaggerated vasospastic response of digital arteries to cold or stress, causing well-demarcated color changes (white-blue-red) in fingers or toes. Primary Raynaud: idiopathic, symmetric, no tissue damage, normal capillaries.

**Synonyms:**

### **Raynaud Syndrome**

A vasospastic disorder causing episodic digital color changes (white → blue → red) triggered by cold or stress, due to exaggerated vasoconstriction of digital arteries. Primary Raynaud: benign, symmetric, in young women, no underlying disease.

**Synonyms:**

### **Raynaud's phenomenon**

Episodic constriction of small arteries in the fingers or toes, causing color changes, numbness, or pain after cold exposure or emotional stress.

**Synonyms:**

### **Reaction Time**

Time from stimulus to response. Declines with age, neurological disease.

**Synonyms:**

### **Reactivation Tuberculosis**

Reactivation of latent infection, typically years later. Characteristically affects apical and posterior upper lobe segments. Features include chronic cough,

hemoptysis, night sweats, weight loss, and cavitation.

**Synonyms:**

### **Reactive Arthritis**

An inflammatory arthritis that develops after certain genitourinary or gastrointestinal infections. It may involve the joints, eyes, skin, or urinary tract; not every person has all of these features.

**Synonyms:**

### **Reactive Attachment Disorder**

A pattern of inhibited, emotionally withdrawn behavior toward adult caregivers. The child rarely or minimally seeks comfort when distressed and rarely or minimally responds to comfort when distressed. The child shows a pattern of persistently irritable and sad mood that is not limited to interactions with caregivers.

**Synonyms:**

### **Reactive Oxygen Species**

Superoxide, hydrogen peroxide, hydroxyl radical. Normal metabolism byproducts.

**Synonyms:**

### **Reactive perforating collagenosis**

A perforating dermatosis in which dermal collagen is extruded through the epidermis, presenting as discrete, dome-shaped papules with a central keratotic plug, most commonly on the extensor extremities.

**Synonyms:**

### **Receiver Operating Characteristic**

ROC curve: plot of sensitivity vs. 1-specificity. Area under curve measures test accuracy.

**Synonyms:**

### **Receptor**

A protein that binds a specific signaling molecule (ligand) and initiates a cellular response. Types: (1) Cell surface: ion channel (nicotinic AChR), G-protein coupled (GPCR: adrenergic, muscarinic, opioid), enzyme-linked (RTK: insulin receptor, cytokine receptors).

---

**Synonyms:**

### Receptor Desensitization

A rapid decrease in the response of a receptor to continuous or repeated agonist stimulation, occurring within minutes to hours.

**Synonyms:**

### Receptor Downregulation

A decrease in the number or sensitivity of receptors in response to chronic receptor stimulation by agonists. When receptors are chronically activated, the cells compensate by internalizing and degrading receptors, reducing receptor density on the cell surface, and decreasing receptor responsiveness.

**Synonyms:**

### Receptor Tyrosine Kinases

Single-pass transmembrane receptors with intrinsic tyrosine kinase activity in their intracellular domain. Ligand binding (e.g., insulin, EGF, PDGF, FGF) induces receptor dimerization and autophosphorylation of tyrosine residues.

**Synonyms:**

### Receptor Upregulation

An increase in the number or sensitivity of receptors in response to chronic receptor blockade or decreased neurotransmitter activity. When receptors are chronically blocked by antagonists, the cells compensate by synthesizing more receptors to maintain homeostatic signaling, leading to increased sensitivity to agonists.

**Synonyms:**

### Recessive

Allele whose phenotype is masked in heterozygotes. Autosomal recessive disorders: cystic fibrosis, sickle cell anemia, Tay-Sachs disease. Requires two copies for expression.

**Synonyms:**

### RECIST

Response Evaluation Criteria in Solid Tumors, standardized imaging-based criteria that categorize re-

sponse to anticancer therapy as complete response, partial response, stable disease, or progressive disease.

**Synonyms:**

### Recombinant DNA

DNA molecule formed by combining genetic material from different sources. Basis of biotechnology. Used to produce insulin, growth hormone, vaccines, gene therapy vectors.

**Synonyms:**

### Recreational Therapy

Use of recreation for therapeutic purposes. Improves quality of life, socialization, coping.

**Synonyms:**

### Rectal Bleeding

Passage of bright-red or dark blood from the rectum, caused by hemorrhoids, fissures, polyps, inflammatory bowel disease, diverticular disease, or cancer. Persistent, heavy, or unexplained bleeding requires evaluation.

**Synonyms:**

### Rectal Prolapse

Protrusion of rectal tissue through the anal opening. Complete prolapse involves all layers of the rectal wall and presents as a concentric cylindrical mass with visible mucosal folds. Partial prolapse involves only the mucosa. Associated with chronic straining, pelvic floor dysfunction, and neurological conditions.

**Synonyms:**

### Rectocele

A weakening of the vaginal wall that allows the rectum to bulge into the vagina.

**Synonyms:**

### Rectovaginal Fistula

Abnormal connection between the rectum and vagina causing passage of stool or gas through the vagina. Causes include obstetric injury particularly third and fourth degree perineal tears, Crohn dis-

---

ease, radiation therapy, and surgical complications. Presents with vaginal discharge of stool, flatus, or recurrent vaginal infections.

**Synonyms:**

### **Rectum**

The final straight section of the large intestine, approximately 12-15 cm long, extending from the sigmoid colon to the anal canal. The rectum stores feces before defecation.

**Synonyms:**

### **Rectus Abdominis Muscle**

Long flat vertical anterior abdominal wall muscle from pubic symphysis to xiphoid process/costal cartilages 5-7, divided by tendinous intersections ("six-pack"). Innervated by T7-T12. Flexes trunk, compresses abdomen, increases intra-abdominal pressure. Diastasis recti common in pregnancy/obesity.

**Synonyms:**

### **Rectus Abdominis Sheath**

A fibrous aponeurotic envelope formed by the abdominal wall muscles and surrounding the rectus abdominis muscle. It contains the superior and inferior epigastric vessels and related nerves.

**Synonyms:**

### **Recurrence**

Return of cancer after treatment. Can be local, regional, or distant.

**Synonyms:**

### **Recurrence Risk**

The probability that a genetic condition will occur again in a future pregnancy or relative, estimated from the inheritance pattern, parental testing, penetrance, and observed or presumed pathogenic variant.

**Synonyms:**

### **Recurrence-Free Survival**

Time without cancer return after treatment.

**Synonyms:**

### **Recurrent**

Disease returning after remission. Examples: recurrent UTI, herpes.

**Synonyms:**

### **Recurrent Caries**

Caries under or around restoration. Due to microleakage, marginal breakdown.

**Synonyms:**

### **Red Blood Cell Labeling**

Nuclear medicine technique labeling RBCs with Tc-99m. Used for GI bleeding detection, cardiac blood pool imaging.

**Synonyms:**

### **Red Flag**

A symptom, sign, or test result suggesting a potentially serious condition that requires urgent assessment or escalation of care. Red flags are context-specific and should not be used as a substitute for clinical judgment.

**Synonyms:**

### **Red Infarction**

Red infarction, also known as hemorrhagic infarction, occurs in tissues with dual blood supply, loose tissue architecture, or venous obstruction, allowing blood to accumulate in the necrotic area and produce a dark red appearance.

**Synonyms:** hemorrhagic infarction, occurs in tissues with dual blood.

### **Redundant mitral valve**

Excess leaflet tissue of the mitral valve, most commonly the posterior leaflet, which may prolapse into the left atrium during systole. Often associated with myxomatous degeneration and mitral valve prolapse. May be asymptomatic or cause mild mitral regurgitation detected incidentally on echocardiography.

**Synonyms:**

### **Reemerging Disease**

Previously controlled disease increasing. Examples: tuberculosis, measles, drug-resistant infections.

---

**Synonyms:**

### **Reexpansion pulmonary edema**

Noncardiogenic pulmonary edema developing rapidly after rapid reexpansion of a collapsed lung, typically following chest tube drainage of a large or long-standing pneumothorax.

**Synonyms:**

### **Refeeding Syndrome**

Life-threatening fluid and electrolyte shifts when nutrition restarted in malnourished patient. Hypophosphatemia, hypokalemia, hypomagnesemia, fluid overload, cardiac failure. Prevention: start low (25-30 kcal/kg), advance slowly, supplement electrolytes, monitor closely.

**Synonyms:**

### **Reference Interval**

The range of laboratory results expected in a defined reference population, usually encompassing the central 95 percent of values. A result outside the interval is not by itself diagnostic and must be interpreted with clinical context, biologic variation, and the laboratory's method-specific range.

**Synonyms:**

### **Referred Pain**

An unpleasant sensory and emotional experience associated with actual or potential tissue damage, serving as a protective alerting system but becoming maladaptive when chronic (lasting >3 months). See pain.

**Synonyms:**

### **Reflex anoxic seizure**

A brief seizure-like episode caused by transient cerebral hypoperfusion after a sudden painful or emotional stimulus, usually with pallor, bradycardia, and rapid recovery.

**Synonyms:**

### **Reflex Arc**

The neural pathway that mediates a reflex action, bypassing conscious brain processing for rapid, au-

tomatic responses. A reflex arc consists of five components: (1) Receptor—sensory nerve ending detecting a stimulus (e.g., pain, stretch).

**Synonyms:**

### **Reflux**

Gastroesophageal reflux in infants: effortless regurgitation of gastric contents, very common (physiologic 'spitting up') and usually benign, resolving by 12 months with maturation of the lower esophageal sphincter.

**Synonyms:**

### **Reflux Nephropathy**

Renal scarring and chronic kidney damage caused by vesicoureteral reflux, recurrent urinary infection, or both. It may lead to hypertension, proteinuria, impaired growth, and chronic kidney disease.

**Synonyms:**

### **Refraction**

The bending of light rays as they pass through the eye's optical system (cornea, aqueous humour, crystalline lens, vitreous humour) to focus a sharp image on the retina. The refractive power of the eye is measured in dioptres (D). Emmetropia: normal refractive state—parallel light rays focus exactly on the retina without accommodation.

**Synonyms:**

### **Refractive Errors and Astigmatism**

Refractive errors are vision disorders caused by the eye's inability to properly focus light onto the retina, resulting in blurred vision.

**Synonyms:**

### **Refractive Surgery**

Surgical procedures that reshape the cornea or alter the eye to correct refractive errors and reduce dependence on eyeglasses or contact lenses. Laser techniques include LASIK (corneal flap with excimer ablation), photorefractive keratectomy (surface ablation), and small-incision lenticule extraction (SMILE).

**Synonyms:**

---

## Refractory

Resistant to a treatment or not responding adequately to it. The term may refer to cancer or other diseases.

**Synonyms:**

## Refractory Period

The period after an action potential during which a cell cannot (absolute refractory period) or can only partially (relative refractory period) generate a new action potential.

**Synonyms:**

## Refsum Disease

An autosomal-recessive peroxisomal disorder of phytanic-acid metabolism. It causes retinitis pigmentosa, anosmia, peripheral neuropathy, ataxia, hearing loss, ichthyosis, and shortened metacarpals or metatarsals with variable onset.

**Synonyms:**

## Regadenoson Pharmacological Stress

Selective A2A adenosine receptor agonist used as a pharmacological vasodilator for nuclear myocardial perfusion imaging. Single IV bolus injection produces coronary vasodilation with fewer side effects than adenosine (less bronchospasm, AV block). Contraindicated in severe asthma or COPD requiring oxygen.

**Synonyms:**

## Regional Anesthesia

Regional anesthesia involves the administration of local anesthetic agents to specific nerves or nerve plexuses to provide surgical anesthesia and postoperative analgesia for a defined body region.

**Synonyms:**

## Regulatory Approval

Authorization by a competent regulatory authority for a medicine, device, or procedure to be marketed or used for specified purposes after review of evidence.

**Synonyms:**

## Regulatory T Cells

Tregs (CD4+ CD25+ FOXP3+): essential for peripheral tolerance. Thymic (tTreg) vs peripheral (pTreg) origin. FOXP3: master transcription factor; mutations cause IPEX.

**Synonyms:**

## Regurgitation

The backward flow of blood through a heart valve that fails to close properly (valvular incompetence or insufficiency).

**Synonyms:**

## Rehabilitation

A coordinated process that helps a person restore or adapt physical, cognitive, psychological, and social function after illness, injury, surgery, or disability.

**Synonyms:**

## Rehabilitation Clinic

Outpatient rehabilitation facility.

**Synonyms:**

## Rehabilitation Engineering

Technology development for disability: prosthetics, orthotics, assistive devices, environmental control.

**Synonyms:**

## Rehabilitation Hospital

Inpatient facility specializing in rehabilitation.

**Synonyms:**

## Rehabilitation Medicine

Physician specialty focusing on function, quality of life for patients with impairment, disability. Also called physiatry.

**Synonyms:** physiatry.

## Rehabilitation Motivation

Patient factors that influence participation in rehabilitation, including intrinsic and extrinsic motivation and engagement with therapeutic goals.

**Synonyms:**

---

## Rehabilitation Potential

The expected capacity to improve function, independence, participation, or quality of life through rehabilitation. It depends on diagnosis, prognosis, cognition, motivation, comorbidity, social support, and environmental resources.

**Synonyms:**

## Rehabilitation Unit

Hospital ward dedicated to rehabilitation.

**Synonyms:**

## Reinfection

A new episode of infection by the same or a related pathogen after the original infection has resolved. Reinfection is distinct from relapse, in which the original infection persists or returns from an incompletely eradicated focus.

**Synonyms:**

## Relapse

Return or worsening of a disease after a period of improvement or remission. The term is used for cancer and many noncancerous disorders.

**Synonyms:**

## Relapse-Free Survival

The time from completion of treatment to recurrence of the cancer or death from any cause.

**Synonyms:**

## Relapsing Fever

An acute febrile illness caused by *Borrelia* species, characterized by recurrent episodes of fever separated by afebrile intervals.

**Synonyms:**

## Relapsing Polychondritis

A systemic autoimmune disorder causing inflammation and destruction of cartilage throughout the body. Airway involvement can cause tracheal and bronchial stenosis. Other features include auricular chondritis, nasal chondritis, ocular inflammation, and arthritis. Treatment is corticosteroids and immunosuppressants.

**Synonyms:**

## Relative Afferent Pupillary Defect

An asymmetric reduction in the direct pupillary light response caused by unequal afferent input from the retina or optic nerve. It is detected with the swinging-flashlight test and is also called a Marcus Gunn pupil.

**Synonyms:** a Marcus Gunn pupil.

## Relative Biological Effectiveness

Ratio of dose of reference radiation to dose of test radiation for same effect. Alpha particles: RBE 10-20.

**Synonyms:**

## Relative Risk

Ratio of disease risk in exposed vs. unexposed.  $RR = (a/(a+b)) / (c/(c+d))$ .  $RR > 1$ : increased risk.  $RR < 1$ : protective.

**Synonyms:**

## Reliability

Consistency of measurement. Test-retest, inter-rater reliability.

**Synonyms:**

## REM Sleep Behavior Disorder

A sleep disorder in which the normal muscle paralysis of REM sleep is reduced or absent, allowing a person to move or vocalize while dreaming.

**Synonyms:**

## Remifentanyl

An ultra-short-acting synthetic opioid analgesic metabolized by non-specific plasma and tissue esterases, producing context-sensitive half-time of approximately 3 to 10 minutes regardless of infusion duration. This makes it ideal for total intravenous anesthesia (TIVA) combined with propofol, and for procedures requiring rapid emergence.

**Synonyms:**

## Remission

Decrease or disappearance of cancer signs. Com-

---

plete remission: no detectable disease. Partial remission: significant reduction but not complete.

**Synonyms:**

### **Remitting Seronegative Symmetrical Synovitis with Pitting Edema**

RS3PE: an acute-onset, symmetric polyarthritis (usually in elderly) with pitting edema of the hands/feet, negative rheumatoid factor and anti-CCP, and marked response to low-dose corticosteroids.

**Synonyms:**

### **Remodeling**

Bone adaptation to implant stress. Wolff's law: bone remodels along lines of stress.

**Synonyms:**

### **Renal Abscess**

A localized collection of pus within or around the kidney, usually caused by infection. Diagnosis and treatment may require imaging, antibiotics, and drainage.

**Synonyms:**

### **Renal Agenesis**

Congenital absence of one (unilateral, 1 in 1,000) or both (bilateral, 1 in 4,000) kidneys. Unilateral renal agenesis: usually asymptomatic, discovered incidentally — the solitary kidney undergoes compensatory hypertrophy. The contralateral kidney may have VUR, UPJ obstruction, or ectopia.

**Synonyms:**

### **Renal Anemia**

Anemia associated with chronic kidney disease, caused by reduced erythropoietin production and other factors such as iron deficiency, inflammation, and shortened red-cell survival. Evaluation and treatment are individualized; iron replacement and erythropoiesis-stimulating therapy may be considered when appropriate.

**Synonyms:**

### **Renal Artery**

A paired branch of the abdominal aorta supplying a kidney. It divides into segmental, interlobar, arcuate, and interlobular arteries within the renal parenchyma.

**Synonyms:**

### **Renal Artery Aneurysm**

A focal enlargement of a renal artery, often asymptomatic but capable of causing hypertension, thromboembolism, or rupture. Management depends on size, symptoms, anatomy, pregnancy, and growth, and may involve surveillance, endovascular treatment, or surgery.

**Synonyms:**

### **Renal Artery Doppler**

Ultrasound assessing renal artery stenosis. Screening for renovascular hypertension.

**Synonyms:**

### **Renal Artery Embolism**

Acute occlusion of renal artery from cardiac emboli typically from atrial fibrillation or mural thrombus. Presents with acute flank pain and hematuria. CT angiography shows filling defect. Treat with anticoagulation and possibly thrombolysis or embolectomy if caught early.

**Synonyms:**

### **Renal Artery Stenosis**

Narrowing of renal artery causing renovascular hypertension. Atherosclerotic most common in elderly at ostium. Fibromuscular dysplasia in young women causing mid-distal stenosis with string-of-beads appearance. Flash pulmonary edema and declining function on ACE inhibitors indicate intervention.

**Synonyms:**

### **Renal Biopsy**

Percutaneous needle biopsy for histological diagnosis. Indicated for unexplained AKI, nephrotic syndrome, hematuria with renal involvement, and transplant dysfunction. Ultrasound-guided for accuracy. Complications include bleeding, arteriovenous

---

fistula, and rarely loss of kidney.

**Synonyms:**

### **Renal Calculi (Kidney Stones)**

Crystalline mineral deposits that form in the kidneys or urinary tract. They may cause severe colicky pain, blood in the urine, urinary obstruction, or infection.

**Synonyms:** Kidney Stones

### **Renal Cell Carcinoma**

A malignant tumor arising from the kidney's renal tubular epithelium. Major subtypes include clear-cell, papillary, and chromophobe carcinoma; symptoms and treatment depend on the tumor's extent.

**Synonyms:**

### **Renal Changes in Pregnancy**

Pregnancy increases renal blood flow and glomerular filtration. These changes lower usual serum creatinine values and may increase urinary loss of glucose and amino acids.

**Synonyms:**

### **Renal Clearance**

The volume of plasma completely cleared of a substance by the kidneys per unit time, measured in mL/min. Clearance of any substance X is calculated as:  $CX = (Ux \times V)/Px$ , where  $Ux$  is urine concentration,  $V$  is urine flow rate, and  $Px$  is plasma concentration.

**Synonyms:**

### **Renal Colic**

Severe, paroxysmal flank pain caused by ureteral obstruction, typically by a kidney stone, with radiation to the groin; often the worst pain experienced.

**Synonyms:**

### **Renal Cortex**

Outer kidney portion between capsule and medulla. Granular tissue with glomeruli, convoluted tubules, and cortical collecting ducts. Extends between pyramids as renal columns. Receives approximately 90 percent of renal blood flow; primary filtration site.

**Synonyms:**

### **Renal cryptococcosis**

Infection of the kidney by *Cryptococcus* species, usually as part of disseminated cryptococcosis in an immunocompromised person.

**Synonyms:**

### **Renal Diet**

Restricted protein, sodium, potassium, phosphorus for kidney disease. Individualized based on stage. Dialysis increases protein need requirement.

**Synonyms:**

### **Renal Dose Adjustment**

Modification of a medication dose, dosing interval, or both to account for reduced kidney clearance. The adjustment should use an appropriate estimate of renal function, drug-specific pharmacokinetics, treatment indication, and therapeutic monitoring when available.

**Synonyms:**

### **Renal Drug Excretion**

The elimination of drugs by the kidney through glomerular filtration, active tubular secretion, and passive tubular reabsorption. Drugs eliminated renally (e.g., aminoglycosides, vancomycin, lithium, metformin) require dose adjustment in renal impairment.

**Synonyms:**

### **Renal Failure**

Decline in kidney function leading to accumulation of waste products (azotemia) and electrolyte abnormalities. Acute kidney injury (AKI): rapid decline over hours to days, potentially reversible. Chronic kidney disease (CKD): progressive decline over months to years.

**Synonyms:**

### **Renal Infarction**

Renal infarction results from occlusion of the renal artery or its branches, causing coagulative necrosis of the renal parenchyma. The kidney has end-

---

arterial supply with limited collateral circulation, making it susceptible to ischemic injury even from small vessel occlusion.

**Synonyms:**

### Renal Leukemia Infiltration

Kidney involvement by chronic lymphocytic leukemia or other hematological malignancies causing bilateral renomegaly and renal dysfunction. Leukemic cells infiltrate the interstitium and peritubular capillaries. May cause AKI from compression of tubules and vessels or chronic kidney disease.

**Synonyms:**

### Renal Mass

Abnormality in kidney detected on imaging. Solid masses may be renal cell carcinoma. Cystic masses classified by Bosniak system.

**Synonyms:**

### Renal Medulla

The inner part of the kidney containing the renal pyramids, loops of Henle, vasa recta, and collecting ducts. Its structure and blood supply help establish the concentration gradient used to concentrate urine.

**Synonyms:**

### Renal Osteodystrophy

Bone disease in CKD including osteitis fibrosa, osteomalacia, adynamic bone disease, and osteoporosis. Results from calcium-phosphate imbalance, secondary hyperparathyroidism, and vitamin D deficiency. Manage with phosphate binders, vitamin D analogues, and parathyroidectomy for refractory hyperparathyroidism.

**Synonyms:**

### Renal Pelvis

The funnel-shaped expansion of the ureter within the kidney, formed by the union of major calyces. It collects urine from the renal papillae and directs it into the ureter.

**Synonyms:**

### Renal Replacement Therapy

Treatment that substitutes for inadequate kidney excretory and regulatory function. Modalities include intermittent hemodialysis, continuous kidney replacement therapy, peritoneal dialysis, and kidney transplantation.

**Synonyms:**

### Renal Replacement Therapy Indications

Urgent indications for dialysis include refractory hyperkalemia, severe metabolic acidosis, toxin exposure by a dialyzable agent, refractory fluid overload or pulmonary edema, and symptomatic uremia. The decision incorporates the patient's trajectory and overall goals of care.

**Synonyms:**

### Renal Scan

Nuclear medicine imaging using Tc-99m compounds. Evaluates renal function, obstruction, blood flow. MAG3 for function, DTPA for GFR.

**Synonyms:**

### Renal Scintigraphy

Renal imaging using Tc-99m compounds. MAG3 (tubular secretion) for functional assessment, DTPA (glomerular filtration) for GFR measurement. Used for obstruction, function, transplant monitoring, renin-mediated hypertension.

**Synonyms:**

### Renal Transplant (Renal Transplantation)

Surgical placement of a functioning donor kidney into a person with advanced kidney failure. It can restore kidney function but requires suitability assessment and long-term immunosuppression.

**Synonyms:** Renal Transplantation

### Renal Trauma

Kidney injury from trauma. CT staging guides management. Grades I-V based on injury severity.

**Synonyms:**

---

### Renal Tubular Acidosis

Group of disorders with normal anion gap metabolic acidosis from impaired renal acid excretion or bicarbonate reabsorption. Type 1 distal with impaired H<sup>+</sup> secretion and urine pH greater than 5.5. Type 2 proximal with impaired bicarbonate reabsorption. Type 4 hyperkalemic from aldosterone deficiency or resistance.

**Synonyms:**

### Renal Ultrasound

Noninvasive imaging used to assess kidney size, structure, blood flow, and urinary obstruction. It is particularly useful when obstruction, cystic disease, or structural abnormality is suspected and is often used in the evaluation of acute or chronic kidney disease.

**Synonyms:**

### Renal Vein

A paired vein draining each kidney into the inferior vena cava. The left renal vein is longer and crosses anterior to the aorta, receiving the left gonadal and suprarenal veins.

**Synonyms:**

### Renin Inhibitor

A class of antihypertensive drugs that directly inhibit renin, the first and rate-limiting enzyme in the renin-angiotensin-aldosterone system. Renin catalyzes the conversion of angiotensinogen to angiotensin I, which is then converted to angiotensin II by ACE. Aliskiren is the only direct renin inhibitor available.

**Synonyms:**

### Renin-Angiotensin-Aldosterone System

A hormonal system in which renin initiates formation of angiotensin II, promoting vasoconstriction and aldosterone secretion. Aldosterone increases distal sodium reabsorption and potassium and hydrogen-ion secretion; RAAS dysregulation contributes to hypertension, heart failure, and CKD progression.

**Synonyms:**

### Renin-Angiotensin-Aldosterone System Physiology

The RAAS regulates blood pressure and fluid electrolyte balance. Renin released from juxtaglomerular cells cleaves angiotensinogen to angiotensin I. Angiotensin converting enzyme converts angiotensin I to angiotensin II which causes vasoconstriction and stimulates aldosterone secretion from the adrenal cortex.

**Synonyms:**

### Renography

Nuclear medicine imaging of kidneys. Evaluates function, obstruction, blood flow.

**Synonyms:**

### Renovascular Hypertension

Hypertension due to renal artery stenosis. Diagnosis: Doppler ultrasound, CTA, MRA, renography. Treatment: angioplasty, stenting, surgery.

**Synonyms:**

### Reperfusion Injury

Tissue damage following restoration of blood flow after ischemia. Mechanisms: oxidative stress, calcium overload, inflammation. Examples: myocardial reperfusion injury, stroke reperfusion injury. Mitigation: antioxidants, reperfusion protocols.

**Synonyms:**

### Replantation of an Avulsed Tooth

Replacement of an avulsed permanent tooth into its socket after trauma, followed by flexible stabilization and endodontic and periodontal follow-up when indicated. Prognosis depends strongly on extraoral dry time, storage conditions, root maturity, and contamination.

**Synonyms:**

### Repolarization

The return of the membrane potential toward the resting value after depolarization. In neurons and skeletal/cardiac muscle, repolarization is primarily caused by the efflux of potassium through voltage-gated potassium channels and inactivation

---

of sodium channels.

**Synonyms:**

### Reporting Standards

Standards for structured reporting. ACR guidelines, BI-RADS, LI-RADS, PI-RADS.

**Synonyms:**

### Reproductive Organs

The organs involved in reproduction. Female: ovaries (produce eggs and hormones), fallopian tubes (transport eggs, site of fertilization), uterus (nurtures the developing fetus), cervix (lower part of uterus, dilates during labor), vagina (passage for sperm and baby), and vulva (external genitalia).

**Synonyms:**

### Reproductive Toxicity

Effects on reproduction: infertility, teratogenesis, fetal toxicity, developmental toxicity. Testing required for pharmaceuticals.

**Synonyms:**

### Reproductive Years

The period of a woman's life during which she is capable of conceiving, typically from menarche (first menstrual period, average age 12-13) to menopause (final menstrual period, average age 51).

**Synonyms:**

### Research

The systematic investigation and scientific study of new materials, methods, or clinical trials to advance medical knowledge and patient care.

**Synonyms:**

### Research Ethics

Principles that protect the rights, safety, welfare, privacy, and informed participation of people or animals involved in research.

**Synonyms:**

### Reservoir

A human, animal, or environmental habitat in which

an infectious agent normally lives, multiplies, and persists. A reservoir may serve as the source from which the agent is transmitted to a susceptible host.

**Synonyms:**

### Residual Limb

The portion of a limb remaining after amputation. Care includes edema control, skin inspection, shaping, strengthening, desensitization, contracture prevention, and prosthetic preparation.

**Synonyms:**

### Residual Volume

The volume of air remaining in the lungs after a maximal forced expiration, approximately 1.2 L in adults. Residual volume cannot be measured by simple spirometry because it cannot be exhaled; it is measured by body plethysmography, helium dilution, or nitrogen washout.

**Synonyms:**

### Resilience

Ability to recover from stressors. Important for healthy aging.

**Synonyms:**

### Resolution

Ability to distinguish small structures. Spatial, temporal, contrast resolution.

**Synonyms:**

### Resolution Recovery

Correction for detector resolution degradation with distance.

**Synonyms:**

### Resorption Atelectasis

Atelectasis caused by complete obstruction of an airway, leading to absorption of trapped air by the pulmonary capillaries. Common causes include mucus plugging, foreign body, tumor, and post-surgical shallow breathing. The affected area appears as increased density on CXR with volume loss.

**Synonyms:**

---

## Respiratory Acidosis

Acid-base disturbance due to accumulation of CO<sub>2</sub> from hypoventilation, lowering pH (acidemia). Causes: respiratory depression (opioids, sedatives, CNS disease), airway obstruction, neuromuscular weakness (GBS, myasthenia), chest wall restriction, severe COPD/asthma, and ventilation-perfusion mismatch.

**Synonyms:**

## Respiratory Alkalosis

Acid-base disturbance from excessive elimination of CO<sub>2</sub> by hyperventilation, raising pH (alkalemia). Causes: anxiety/hyperventilation, hypoxia, pulmonary embolism, sepsis, fever, pain, salicylate toxicity, liver failure, pregnancy, high altitude. Compensation: renal bicarbonate excretion (days).

**Synonyms:**

## Respiratory Changes in Pregnancy

The growing uterus elevates the diaphragm, while hormonal changes increase ventilatory drive. Tidal volume and minute ventilation generally increase, while functional residual capacity decreases.

**Synonyms:**

## Respiratory Depression

Breathing that is abnormally slow or shallow, causing inadequate ventilation and possible carbon-dioxide retention or low oxygen. Medicines, brain disorders, and metabolic illness can cause it.

**Synonyms:**

## Respiratory Distress

Difficulty breathing due to various causes. Assessment: work of breathing (retractions, nasal flaring, tripod position), oxygen saturation, breath sounds. Causes: asthma, COPD, pneumonia, pulmonary embolism, pneumothorax, anaphylaxis, heart failure.

**Synonyms:**

## Respiratory Distress Syndrome

A condition primarily affecting premature infants caused by pulmonary surfactant deficiency, leading

to alveolar collapse and respiratory failure. Presents with tachypnea, grunting, nasal flaring, retractions, and cyanosis. Chest X-ray shows diffuse ground-glass opacity.

**Synonyms:**

## Respiratory Drive

The neural output that stimulates respiratory muscles and determines ventilation. It is generated by brainstem networks and modified by chemoreceptor input, mechanoreceptors, wakefulness, metabolic state, medications, and behavioral control.

**Synonyms:**

## Respiratory Failure

Inadequate gas exchange resulting in hypoxemia (PaO<sub>2</sub> <60 mmHg), hypercapnia (PaCO<sub>2</sub> >50 mmHg), or both. Type 1 (hypoxemic): V/Q mismatch, shunt, diffusion impairment. Type 2 (hypercapnic): hypoventilation from neuromuscular disease, COPD exacerbation, or opioid overdose.

**Synonyms:**

## Respiratory Health

The proper functioning of the lungs and airways, enabling efficient gas exchange and oxygen delivery to the body. Maintaining respiratory health involves avoiding tobacco smoke, minimizing exposure to air pollutants and occupational hazards, and receiving vaccinations against respiratory infections like influenza and pneumococcal disease.

**Synonyms:**

## Respiratory Infections

Illnesses caused by pathogens including viruses, bacteria, and fungi that affect the airways and lungs.

**Synonyms:**

## Respiratory Physiology

The study of pulmonary function encompassing ventilation (movement of air), gas exchange (diffusion of O<sub>2</sub> and CO<sub>2</sub> across the alveolar-capillary membrane), transport of gases in blood, and regulation of breathing.

**Synonyms:**

---

## Respiratory Protection

Measures and equipment used to reduce inhalation of harmful dusts, fumes, gases, aerosols, or infectious particles.

**Synonyms:**

## Respiratory Quotient

The ratio of carbon dioxide production to oxygen consumption for a particular substrate or metabolic state. It differs from the respiratory exchange ratio measured at the mouth and is used in metabolic and ventilatory physiology.

**Synonyms:**

## Respiratory Rate

The number of breaths taken per minute. The expected rate varies with age, activity, temperature, illness, and other factors.

**Synonyms:**

## Respiratory Rehabilitation

A program of exercise, education, breathing techniques, and self-management that improves function and quality of life in people with chronic respiratory disease.

**Synonyms:**

## Respiratory Syncytial Virus

A respiratory virus that commonly causes bronchiolitis and pneumonia in infants and young children. Infection is usually mild in adults but may be severe in infants, older adults, and people with chronic heart or lung disease.

**Synonyms:**

## Respiratory System

The anatomical and physiological system responsible for gas exchange—delivering oxygen to the blood and removing carbon dioxide. Components: (1) Upper respiratory tract—nose, nasal cavity, paranasal sinuses, pharynx (nasopharynx, oropharynx, laryngopharynx).

**Synonyms:**

## Respiratory Tract Infections

Infections affecting any part of the respiratory tract, classified by anatomical location into upper respiratory tract infections (URTIs) and lower respiratory tract infections (LRTIs).

**Synonyms:**

## Respiratory viruses

Viruses that cause respiratory tract infections. Major respiratory viruses include influenza, respiratory syncytial virus (RSV), parainfluenza virus, adenovirus, and human metapneumovirus. SARS-CoV-2 causes COVID-19. Symptoms range from mild upper respiratory illness to severe pneumonia.

**Synonyms:**

## Response Assessment

Evaluation of treatment response. RECIST criteria for solid tumors. PET response criteria for lymphoma.

**Synonyms:**

## Response Evaluation Criteria

RECIST criteria for tumor response. PERCIST for PET.

**Synonyms:**

## Resting Membrane Potential

The steady electrical potential difference across the cell membrane of an unstimulated cell, typically -70 mV in neurons, -80 to -90 mV in skeletal and cardiac muscle, and -50 to -60 mV in smooth muscle.

**Synonyms:**

## Restless Legs Syndrome

An urge to move the legs, usually accompanied by uncomfortable sensations, that begins or worsens during rest, is relieved by movement, and occurs predominantly in the evening or night. The condition causes significant distress or impairment. It is associated with iron deficiency, renal failure, pregnancy, and peripheral neuropathy.

**Synonyms:**

---

## Restorative Dentistry

Specialty of restoring damaged teeth. Procedures: fillings, inlays, onlays, crowns, bridges, implants. Goals: function, aesthetics, durability.

**Synonyms:**

## Restraint

Device or medication limiting movement. Physical restraints: vests, wrist restraints, lap traps. Chemical restraints: antipsychotics, benzodiazepines for behavior control. Should be last resort, time-limited, with monitoring. Alternatives: addressing underlying causes, environmental modification.

**Synonyms:**

## Restraint-Related Harm

Physical or psychological injury associated with using a device, medication, or environmental restriction to limit a person's movement. Older adults are at risk of falls, pressure injury, delirium, aspiration, and functional decline; the least restrictive alternatives should be prioritized.

**Synonyms:**

## Restriction Enzyme

Bacterial enzyme cutting DNA at specific recognition sequences. Used in molecular cloning, DNA fingerprinting, restriction fragment length polymorphism (RFLP) analysis.

**Synonyms:**

## Restrictive Cardiomyopathy

A cardiomyopathy characterized by impaired ventricular relaxation and filling due to stiff, noncompliant myocardium, with preserved systolic function and normal or reduced ventricular volumes. Causes include amyloidosis, sarcoidosis, hemochromatosis, endomyocardial fibrosis, and radiation.

**Synonyms:**

## Retained Placenta

Failure of the placenta to deliver after birth within the interval expected for safe management. It may result from failure of separation, abnormal placental attachment, or trapping behind a closed cervix and

can cause severe bleeding.

**Synonyms:**

## Retained Products of Conception

Fragments of placental or fetal tissue retained in the uterus after delivery, miscarriage, or abortion. Causes: incomplete placental separation, succenturiate lobe, and placenta accreta. Presents: persistent or heavy bleeding, pain, and fever in the postpartum period.

**Synonyms:**

## Retention Time

The time required for a compound to pass through a chromatographic system from injection to detection. In analytical toxicology, comparison with validated standards helps identify compounds, but retention time alone is not definitive identification.

**Synonyms:**

## Reticular Formation

A network of interconnected nuclei in the brainstem (midbrain, pons, medulla) that regulates arousal, consciousness, sleep-wake transitions, and alertness (ascending reticular activating system), as well as muscle tone, posture, cardiovascular and respiratory control (vasomotor and respiratory centers), pain modulation, and attention.

**Synonyms:**

## Reticulocyte Count

The number or percentage of immature red blood cells in blood. It reflects recent bone-marrow red-cell production and helps assess anemia, especially when interpreted with the hemoglobin and clinical context.

**Synonyms:**

## Retina

Innermost eye layer, a thin neural tissue layer lining the posterior two-thirds of the globe for phototransduction (light to neural signals). Ten layers, with photoreceptors (rods for low-light vision, cones for color vision) in the outer nuclear layer.

**Synonyms:**

---

## Retinal Detachment

A separation of the neurosensory retina from the underlying retinal pigment epithelium, creating a potential space that fills with fluid and resulting in progressive vision loss in the affected area, and it is classified into three main types based on the underlying mechanism.

**Synonyms:**

## Retinal Artery Occlusion

Blockage of a retinal artery causing sudden, usually painless loss of vision. It requires urgent ophthalmic and vascular evaluation because it may indicate a systemic embolic or vascular disorder.

**Synonyms:**

## Retinal Detachment Repair

Surgical or pneumatic treatment to close retinal breaks and reattach the retina. Techniques include vitrectomy, scleral buckling, and pneumatic retinopexy, selected according to the type and location of detachment.

**Synonyms:**

## Retinal Hemorrhages

Bleeding within the retina, a hallmark finding in abusive head trauma (shaken baby syndrome). Found on dilated fundoscopic examination, often bilateral and multi-layered. Also seen in severe accidental trauma, bleeding disorders, and increased intracranial pressure.

**Synonyms:**

## Retinal ischemia

Inadequate blood flow to the retina, often caused by a retinal artery occlusion or severe vascular disease. It may cause sudden, painless visual loss and requires emergency ophthalmic and vascular assessment; treatment depends on the cause and time of presentation.

**Synonyms:**

## Retinal Layers

The retina consists of ten distinct layers that process visual information through a complex neural circuit.

**Synonyms:**

## Retinal Prosthesis

Experimental device for blindness. Argus II system: camera to processor to electrode array stimulates retina. Indications: retinitis pigmentosa. Provides light perception, pattern recognition.

**Synonyms:**

## Retinal Tear

A full-thickness break in the neurosensory retina, often caused by vitreoretinal traction. It can permit fluid to enter the subretinal space and progress to rhegmatogenous retinal detachment; symptomatic tears are generally treated urgently with laser photocoagulation or cryotherapy.

**Synonyms:**

## Retinal Vein Occlusion

Obstruction of a retinal vein producing retinal hemorrhages, edema, and variable visual loss. Branch and central forms may cause macular edema, retinal ischemia, and neovascular complications.

**Synonyms:**

## Retinitis Pigmentosa

A group of inherited retinal disorders in which rod and cone photoreceptors gradually degenerate. Symptoms may include night blindness, narrowing of the visual field, and progressive loss of vision.

**Synonyms:**

## Retinoblastoma

Childhood eye cancer. RB1 gene mutation (autosomal dominant inheritance, but sporadic cases common). Hereditary form: bilateral, multifocal, earlier onset. Sporadic: unilateral, single focus. Treatment: chemotherapy, radiation, surgery, enucleation.

**Synonyms:**

## Retinol

Vitamin A (retinol) is a fat-soluble vitamin essential for vision, immune function, cell differentiation, and reproduction. See Vitamin A: Retinal.

**Synonyms:**

---

## Retinopathy

Disease or damage of the retina, often related to diabetes, hypertension, vascular disease, inflammation, or inherited disorders.

**Synonyms:**

## Retinopathy of Prematurity

Abnormal vascularization of the retina in premature infants, a leading cause of childhood blindness. Affects infants less than 32 weeks gestation and less than 1500 grams. Stages range from mild (avascular retina) to severe (retinal detachment). Screening began at 31-33 weeks corrected gestational age or 4 weeks chronological age.

**Synonyms:**

## Retinoschisis

Splitting of the retinal layers, producing a separation between inner and outer retinal tissue. It may be degenerative and peripheral or inherited and juvenile, and can cause visual-field loss, reduced acuity, or complications resembling retinal detachment.

**Synonyms:**

## Retract (Vascular)

To pull a vessel or tissue away from an operative field using a surgical retractor.

**Synonyms:** Vascular

## Retraction (Self-Retaining)

Holding tissue away from an operative field with a retractor that remains in position without continuous manual support.

**Synonyms:** Self-Retaining

## Retractor

Holds tissue aside for exposure. Types: handheld, self-retaining (Weitlaner, Gelpi).

**Synonyms:**

## Retractor (Abdominal)

A surgical instrument used to hold back the abdominal wall or organs to improve access and visibility during an operation.

**Synonyms:** Abdominal

## Retractor (Hand)

A handheld surgical instrument used to hold tissue or an organ away from the operative field.

**Synonyms:** Hand

## Retractor (Surgical)

An instrument used to separate or hold tissues aside during a surgical procedure.

**Synonyms:** Surgical

## Retrograde Ejaculation

Semen enters bladder instead of exiting urethra. Causes: diabetes, surgery, medications. Dry orgasm. Treatment: medications, sperm retrieval for fertility.

**Synonyms:**

## Retroperitoneal Fibrosis

Chronic fibroinflammatory tissue formation in the retroperitoneum, often encasing the ureters and great vessels. It can cause hydronephrosis, flank pain, reduced kidney function, hypertension, or lower-limb edema and may be idiopathic, immune-mediated, drug-related, or secondary to malignancy.

**Synonyms:**

## Retroperitoneal hemorrhage

Bleeding into the retroperitoneal space, which may result from aortic rupture, anticoagulation therapy, retroperitoneal hematoma following femoral catheterization, trauma, or retroperitoneal neoplasms. Presents with flank pain, abdominal distension, hypotension, and anemia.

**Synonyms:**

## Retroperitoneum

The anatomical space posterior to the peritoneum. It contains the kidneys, adrenal glands, ureters, aorta, and inferior vena cava, as well as portions of the duodenum, pancreas, and colon. Some organs are secondarily retroperitoneal after development. It is divided into anterior pararenal, perirenal, and posterior pararenal spaces.

**Synonyms:**

---

### **Retropharyngeal Abscess**

A collection of pus in the retropharyngeal space, located between the posterior pharyngeal wall and the prevertebral fascia. Most common in children aged 2-4 years, arising from suppurative lymphadenitis of the retropharyngeal lymph nodes that drain the nasopharynx, adenoids, and sinuses.

**Synonyms:**

### **Retrovirus**

An RNA virus that replicates by reverse transcribing its RNA genome into DNA, which is then integrated into the host cell genome. Family Retroviridae. Key enzyme: reverse transcriptase (RNA-dependent DNA polymerase) converts viral RNA into double-stranded DNA; integrase inserts the viral DNA (provirus) into the host chromosome.

**Synonyms:**

### **Rett Syndrome**

An X-linked dominant neurodevelopmental disorder affecting almost exclusively females, caused by mutations in the MECP2 gene.

**Synonyms:**

### **Return of Spontaneous Circulation**

Restoration of sustained cardiac mechanical activity after cardiac arrest, evidenced by a palpable pulse or measurable blood pressure and signs of circulation. Post-arrest care addresses oxygenation, ventilation, blood pressure, temperature, neurologic injury, and the cause of arrest.

**Synonyms:**

### **Reverberation Artifact**

Ultrasound artifact from multiple reflections. Reduced by changing angle, using tissue harmonic imaging.

**Synonyms:**

### **Reverse Transcription**

Synthesis of DNA from an RNA template by the enzyme reverse transcriptase.

**Synonyms:**

### **Reversible Cell Injury**

Cellular dysfunction caused by a harmful stimulus that can resolve when the stimulus is removed. Common changes include cellular swelling, fatty change, membrane blebbing, and reduced oxidative phosphorylation without irreversible membrane or nuclear destruction.

**Synonyms:**

### **Revision Arthroplasty**

Surgical replacement, exchange, or repair of a failed or painful joint prosthesis. Indications include infection, aseptic loosening, instability, periprosthetic fracture, wear, and recurrent dislocation.

**Synonyms:**

### **Reye Syndrome**

A rare acute encephalopathy with hepatic dysfunction, classically occurring in children recovering from a viral illness. It causes persistent vomiting, altered mental status, cerebral edema, and elevated liver enzymes without primary inflammatory liver failure.

**Synonyms:**

### **Reynolds Pentad**

Extension of the Charcot triad to include hypotension and altered mental status representing suppurative cholangitis, a severe life-threatening form of ascending cholangitis. Patients present with high fever, rigors, right upper quadrant pain, jaundice, hypotension, and confusion.

**Synonyms:**

### **Rezafungin**

A long-acting echinocandin antifungal medicine that inhibits fungal cell-wall synthesis. It is used for selected invasive candidiasis infections; its long duration permits an intermittent dosing schedule under specialist supervision.

**Synonyms:**

### **Rh Factor**

A system of blood group antigens (the Rh system) on the surface of red blood cells, the most important of which is the D antigen (RhD). See Rhesus (Rh)

---

Factor.

**Synonyms:**

### **Rh Isoimmunization**

Maternal alloantibody production against fetal Rh D-positive red blood cells in an Rh D-negative mother, occurring when fetal RBCs enter the maternal circulation (fetomaternal hemorrhage).

**Synonyms:**

### **Rhabdoid Tumor**

A highly aggressive malignant tumor of infancy, occurring in the kidney (malignant rhabdoid tumor) or brain (atypical teratoid/rhabdoid tumor), characterized by loss of the SMARCB1 (INI1) gene.

**Synonyms:**

### **Rhabdomyolysis**

Rapid breakdown of skeletal muscle that releases muscle proteins into the bloodstream. Causes include crush injury, extreme exertion, seizures, heat illness, and some diseases; it can lead to acute kidney injury and requires prompt medical assessment.

**Synonyms:**

### **Rhabdomyolysis and AKI**

Severe muscle breakdown releases myoglobin and other intracellular contents, potentially causing acute kidney injury, electrolyte abnormalities, and cardiac arrhythmias. Findings may include muscle pain, weakness, dark urine, and elevated creatine kinase; treatment requires urgent assessment and cause-directed fluid and supportive therapy.

**Synonyms:**

### **Rhabdomyoma**

A benign cardiac tumour composed of striated muscle cells, occurring predominantly in infants and children and strongly associated with tuberous sclerosis. It commonly involves the ventricular myocardium and may regress spontaneously, although large or multiple tumours can cause obstruction or arrhythmias.

**Synonyms:**

### **Rhabdomyosarcoma**

A malignant tumor showing skeletal-muscle differentiation, occurring primarily in children and commonly involving the head and neck, genitourinary tract, or extremities.

**Synonyms:**

### **Rhegmatogenous Retinal Detachment**

The most common type of retinal detachment, caused by a full-thickness break or tear in the retina that allows liquefied vitreous humor to enter the subretinal space, separating the neurosensory retina from the underlying retinal pigment epithelium.

**Synonyms:**

### **Rhesus (Rh) Factor**

A system of antigens on the surface of red blood cells, especially the D antigen. A person is Rh-positive when the D antigen is present and Rh-negative when it is absent. Rh incompatibility can affect pregnancy and transfusion safety.

**Synonyms:** Rh

### **Rheumatic Fever**

A nonsuppurative inflammatory complication of Group A Streptococcal pharyngitis, occurring 2-4 weeks after infection. Diagnosed by Jones criteria: major manifestations (carditis, polyarthritides, chorea, erythema marginatum, subcutaneous nodules) plus evidence of prior streptococcal infection. Major criterion plus two minor criteria.

**Synonyms:**

### **Rheumatic Heart Disease**

Valvular damage resulting from acute rheumatic fever, an autoimmune response to Group A streptococcal pharyngitis. Most commonly affects the mitral valve (stenosis/regurgitation), followed by aortic. Prevention through prompt treatment of streptococcal pharyngitis.

**Synonyms:**

### **Rheumatoid Arthritis**

A chronic autoimmune inflammatory disease that commonly causes symmetric pain, swelling, and

---

progressive damage in the small joints of the hands and feet. It may also affect other organs.

**Synonyms:**

### Rheumatoid Factor

An autoantibody, usually of the IgM class, directed against part of IgG. It may support a diagnosis of rheumatoid arthritis but can also occur in other autoimmune diseases, infections, and healthy people.

**Synonyms:**

### Rhinencephalon

The part of the brain concerned chiefly with the sense of smell and related limbic functions.

**Synonyms:**

### Rhinitis

Inflammation or dysfunction of the nasal mucosa causing congestion, rhinorrhea, sneezing, or itching.

**Synonyms:**

### Rhinophyma

A severe, end-stage subtype of phymatous rosacea occurring predominantly in elderly men. Characterized by progressive nodular thickening, hypertrophy, and lobular enlargement of the nasal skin with prominent, dilated pilosebaceous pores. Pathophysiology: sebaceous gland hyperplasia, fibrosis, and chronic inflammation.

**Synonyms:**

### Rhinoplasty

A surgical procedure to alter the shape, size, or function of the nose, performed for cosmetic reasons (aesthetic rhinoplasty—improving nasal appearance) or functional reasons (functional rhinoplasty—improving nasal airflow by correcting internal/external nasal valve collapse, deviated septum, or turbinate hypertrophy).

**Synonyms:**

### Rhinovirus

A genus of non-enveloped, positive-sense RNA viruses in the Picornaviridae family. Rhinoviruses are a common cause of the common cold and spread

mainly through respiratory secretions and contaminated hands or surfaces.

**Synonyms:**

### RhoGAM

Rh immune globulin containing anti-D antibodies, used to prevent Rh isoimmunization in Rh-negative mothers. Administered intramuscularly at 28 weeks gestation and within 72 hours after delivery of an Rh-positive infant. Also given after amniocentesis, chorionic villus sampling, miscarriage, ectopic pregnancy, or abdominal trauma.

**Synonyms:**

### Rhonchi

Low-pitched, continuous adventitious sounds heard primarily during expiration, caused by secretions in the large airways. They may clear with coughing. They are heard in COPD, bronchitis, and bronchiectasis. They are different from wheezes in their lower pitch and coarser quality.

**Synonyms:**

### Rib

One of 12 paired, curved bones forming the thoracic cage, protecting the heart, lungs, and great vessels. True ribs (1–7) attach directly to the sternum via costal cartilage. False ribs (8–10) attach indirectly to the sternum via the costal cartilage of rib 7. Floating ribs (11–12) have no anterior attachment.

**Synonyms:**

### Riboflavin (Vitamin B2)

A water-soluble vitamin that forms the coenzymes FAD and FMN. These cofactors participate in oxidation-reduction reactions, including electron transfer, fatty-acid oxidation, and energy metabolism.

**Synonyms:** Vitamin B2

### Ribosomal RNA

RNA component of ribosomes, catalyzing peptide bond formation (peptidyl transferase activity). Eukaryotic ribosome: 60S (28S, 5.8S, 5S rRNAs + proteins) + 40S (18S rRNA + proteins) = 80S.

---

Prokaryotic: 50S (23S, 5S rRNAs) + 30S (16S rRNA) = 70S. rRNA genes are highly conserved, used in phylogenetics.

**Synonyms:**

### Ribosome

Ribonucleoprotein complexes (rRNA + proteins) that synthesize proteins by translating mRNA. Two subunits: 60S (large, 28S/5.8S/5S rRNA) and 40S (small, 18S rRNA) in eukaryotes (80S complete). Prokaryotes have 50S/30S (70S complete).

**Synonyms:**

### Ribozyme

RNA molecule with catalytic activity. Peptidyl transferase is a ribozyme.

**Synonyms:**

### Rickets

A disorder of growing bones caused by inadequate mineralization, often from vitamin D deficiency or phosphate disorders. It may cause bone pain, poor growth, deformity, fractures, or widening at the growth plates.

**Synonyms:**

### Rickettsia

A genus of obligate intracellular Gram-negative coccobacillary bacteria transmitted by arthropod vectors (ticks, fleas, lice, mites). Rickettsia are the causative agents of the spotted fever group (SFG) and typhus group (TG) rickettsioses.

**Synonyms:**

### Rickettsialpox

A mite-borne infection caused by Rickettsia akari, producing a vesicular rash, fever, headache, and an inoculation eschar. It is usually self-limited but may resemble other febrile exanthems.

**Synonyms:**

### Ridge Preservation

Socket grafting after extraction to maintain bone volume. Reduces ridge resorption.

**Synonyms:**

### Right Atrium

Receives deoxygenated blood from superior vena cava, inferior vena cava, and coronary sinus. Smooth posterior part (sinus venosus) and rough anterior auricle with pectinate muscles. The fossa ovalis is the fetal foramen ovale remnant. The SA node pacemaker is near the superior vena cava opening.

**Synonyms:**

### Right Bundle Branch

A continuation of the bundle of His that travels along the right side of the interventricular septum to the right ventricle. It supplies the right ventricular myocardium and Purkinje fibers. Right bundle branch block (RBBB) occurs when this branch is damaged, causing delayed right ventricular activation.

**Synonyms:**

### Right Coronary Artery

Arises from the right aortic sinus and travels in the right atrioventricular groove. It supplies the right atrium, right ventricle, SA node (60% of individuals), AV node (85% of individuals), and the inferior wall of the left ventricle.

**Synonyms:**

### Right coronary artery occlusion

Blockage of the right coronary artery, reducing blood flow to areas of the heart it supplies and potentially causing myocardial infarction or rhythm disturbances.

**Synonyms:**

### Right Heart Failure

Failure of the right ventricle to adequately pump blood to the lungs, causing systemic venous congestion. Causes include left heart failure (most common), pulmonary hypertension, right ventricular infarction, pulmonary embolism, and constrictive pericarditis. Signs include elevated JVD, peripheral edema, hepatomegaly, and ascites.

**Synonyms:**

---

### Right Hypochondriac Region

One of nine abdominal regions in the upper right abdomen, bounded medially by the right midclavicular line and superiorly by the right costal margin. Contains the cecum, appendix, ascending colon, and inferior right liver lobe. Pain here may indicate appendicitis (McBurney's point), cecal pathology, or hepatic disease.

**Synonyms:**

### Right Iliac Region

Lower right abdomen containing the cecum, appendix, and terminal ileum. McBurney's point (junction of lateral and middle thirds from umbilicus to ASIS) is critical for appendicitis diagnosis. Also significant for evaluating inguinal and femoral hernias, and the right ureter's course.

**Synonyms:**

### Right Lymphatic Duct

Short lymphatic vessel (approximately 1.5 cm) draining lymph from the right upper quadrant: right arm, right side of the head and neck, and right thorax. Formed by the junction of right jugular, subclavian, and bronchomediastinal trunks, emptying into the right venous angle (junction of right internal jugular and subclavian veins).

**Synonyms:**

### Right sixth cranial nerve palsy

Weakness or paralysis of the right abducens nerve (CN VI), causing inability to abduct the right eye and resulting in horizontal diplopia worse at distance and on right gaze.

**Synonyms:**

### Right ureterovesical calculus

A stone lodged at the junction of the right ureter and bladder, causing flank pain, hematuria, and urinary urgency or frequency. May require endoscopic or lithotripsy intervention.

**Synonyms:**

### Right Ventricle

Receives deoxygenated blood from the right atrium

through the tricuspid valve, pumping into the pulmonary trunk via the pulmonary valve. Thinner walls (3-5 mm) than the left ventricle due to low pulmonary resistance.

**Synonyms:**

### Rigor Mortis

Post-mortem stiffening of body muscles resulting from loss of ATP synthesis following death. Without ATP, actin and myosin filaments remain permanently cross-linked in a rigid state.

**Synonyms:**

### Ring in the Ears

Perception of ringing, buzzing, hissing, or other sound without an external source, medically called tinnitus. It may be associated with hearing loss, loud-noise exposure, earwax, ear infection, medicines, or jaw disorders. Sudden hearing loss, one-sided symptoms, or pulsatile ringing requires medical evaluation.

**Synonyms:**

### Ringworm

Dermatophytosis: superficial fungal infection of keratinized tissue (skin, hair, nails) by dermatophytes (*Trichophyton*, *Microsporum*, *Epidermophyton*). See Tinea.

**Synonyms:**

### Rinne Test

The Rinne test is a screening test that compares air conduction and bone conduction hearing using a vibrating tuning fork (typically 512 Hz) to help differentiate between conductive and sensorineural hearing loss.

**Synonyms:**

### RIPE Therapy

Standard 4-drug regimen for active TB: Rifampin, Isoniazid, Pyrazinamide, Ethambutol. Intensive phase 2 months, continuation phase 4 months (total 6 months). Pyridoxine prevents isoniazid-induced neuropathy.

**Synonyms:**

---

### **Rippling Muscle Disease**

A rare, benign myopathy characterized by mechanically-induced muscle contractions that spread across the muscle as a visible wave (rippling), typically triggered by stretch, percussion, or movement.

**Synonyms:**

### **RIS**

Radiology Information System. Workflow management for radiology department.

**Synonyms:**

### **Risk Assessment**

Process: hazard identification, dose-response, exposure assessment, risk characterization. Used for regulatory decisions.

**Synonyms:**

### **Risk Factor**

Attribute increasing probability of disease. Examples: smoking (lung cancer), hypertension (stroke), obesity (diabetes).

**Synonyms:**

### **Risk Factor Modification**

Smoking cessation, blood pressure control, lipid management, diabetes control, exercise.

**Synonyms:**

### **Risk-Benefit Analysis**

Weighing therapeutic benefit against potential harm.

**Synonyms:**

### **Ristocetin-Induced Platelet Aggregation**

A platelet-function assay that evaluates platelet agglutination in the presence of ristocetin, which depends on von Willebrand factor and platelet glycoprotein Ib.

**Synonyms:**

### **Ritalin**

A central nervous system stimulant, a piperidine

derivative that blocks the reuptake of dopamine and noradrenaline (norepinephrine) by inhibiting the dopamine transporter (DAT) and noradrenaline transporter (NAT) in the prefrontal cortex, increasing their synaptic concentrations. See Methylphenidate.

**Synonyms:**

### **River Blindness**

Onchocerciasis, a parasitic infection caused by *Onchocerca volvulus* and transmitted by blackflies. It can cause severe itching, skin disease, and visual impairment.

**Synonyms:**

### **RNA**

Ribonucleic acid, single-stranded nucleic acid (ribose sugar, uracil instead of thymine).

**Synonyms:**

### **Robot-Assisted Rehabilitation**

Robotic devices for repetitive task training. Upper extremity, lower extremity, gait training. Objective measurement, high repetition.

**Synonyms:**

### **Romberg Test**

The Romberg test is a clinical neurological test used to assess the integrity of the dorsal column-medial lemniscus pathway (proprioception) and the cerebellum in maintaining balance. The test is performed by asking the patient to stand with feet together and eyes open, and then to close the eyes.

**Synonyms:**

### **Romberg's sign**

Increased unsteadiness when a person stands with the feet together and closes the eyes, suggesting impaired proprioception or vestibular function.

**Synonyms:**

### **Root Caries**

Caries on exposed root surfaces. Common in elderly with recession. Fluoride effective.

**Synonyms:**

---

## Root Fracture

Vertical or horizontal fracture of root. Prognosis depends on location and direction. Vertical root fractures typically require extraction.

**Synonyms:**

## Rooting Reflex
