Transtracheal means passing through or relating to the trachea, such as a catheter, oxygen delivery route, or diagnostic procedure.

Transtympanic

Transtympanic means passing through the tympanic membrane, such as medicine delivered into the middle ear or a procedure crossing the eardrum.

Transudate

A thin fluid with little protein that leaks from blood vessels because of pressure or blood-protein changes rather than inflammation. It may collect around organs, such as the lungs, heart, or abdomen.

Transudation

Movement of relatively watery, low-protein fluid out of blood vessels when pressure or blood-protein levels change. This process can cause some types of swelling or fluid collection around organs.

Transudative Pleural Effusion

A buildup of relatively thin fluid around a lung caused by changes in blood pressure or protein balance, most often heart failure. Treatment focuses on the underlying condition and drainage may be needed if breathing is affected.

Transurethral

Performed through the urethra, the tube that carries urine out of the body. Instruments passed through it can examine the urinary tract, remove tissue, treat blockage, or place a device.

Transurethral Incision Of The Prostate

An operation making small cuts in the prostate through an instrument passed in the urethra. It can improve urine flow in selected people with prostate enlargement while preserving most prostate tissue.

Alternate Names:

TUIP

Transurethral Microwave Thermotherapy

A treatment for some people with an enlarged

prostate in which a catheter uses microwave heat to shrink or destroy prostate tissue blocking urine flow. It is less commonly used now and can cause pain, bleeding, infection, or temporary urinary problems.

Alternate Names:

TUMT

Transurethral Needle Ablation

A treatment using needles passed through the urethra to deliver radiofrequency heat into enlarged prostate tissue. The heat destroys selected tissue and may improve urine flow, but relief develops gradually and complications can occur.

Alternate Names:

TUNA

Transurethral Resection

Removal of tissue through an instrument passed along the urethra, commonly for prostate or bladder disease.

Transurethral Resection of Bladder Tumor

A procedure in which a urologist passes a camera and small cutting tool through the urethra to remove a visible bladder tumor and collect tissue for testing. The results show the type and depth of the cancer and guide further treatment. Some early tumors are treated during the same procedure, but follow-up treatment may still be needed.

Alternate Names:

TURBT; Transurethral Bladder Tumor Resection; Bladder Tumor Resection

Transurethral Resection Of The Prostate

An endoscopic operation that removes obstructing prostate tissue to improve urine flow in selected people with benign prostatic enlargement. Alternatives and indications depend on symptoms, prostate size, complications, and patient preference.

Transvaginal

Performed through the vagina, commonly describing an ultrasound examination or a procedure involving the uterus, cervix, ovaries, or other pelvic structures.

Transvaginal Ultrasound

Transvaginal ultrasound uses a covered probe in the vagina to produce images of the uterus, ovaries, cervix, pregnancy, or nearby pelvic structures.

Transverse

Running across or perpendicular to the long axis or midline.

Transverse Colon

The section of the large intestine that crosses the upper abdomen from the right side to the left. It absorbs water and moves partly digested food toward the descending colon.

Transverse Lie

A position in which the baby lies sideways across the uterus rather than head-down or bottom-down. A shoulder or arm may be closest to the birth canal; if the position persists near labor, vaginal birth is usually not possible and cesarean birth is recommended.

Transverse Myelitis

Inflammation across part of the spinal cord that can develop over hours or days and cause weakness, numbness, pain, or problems controlling the bladder or bowel. It needs prompt evaluation because treatment may limit lasting disability.

Transverse Plane

An imaginary horizontal slice that divides the body or an organ into upper and lower parts. Medical scans often use this view to show structures at a particular level.

Transverse Vaginal Septum

A congenital band of tissue crossing the vagina and partly or completely blocking it. A complete blockage can cause absent periods and monthly pelvic pain after puberty; imaging confirms the condition, and surgery may create an open vaginal passage.

Transversus Abdominis Muscle

The deepest broad muscle of the abdominal wall.

It tightens the abdomen, supports the spine, and helps with coughing, breathing out, lifting, and other movements that increase pressure inside the abdomen.

Transvestic Disorder

A mental-health diagnosis involving repeated sexual arousal from cross-dressing that causes significant distress, interferes with life, causes harm, or involves another person without consent. Cross-dressing alone is not a disorder and is different from gender identity.

Tranylcypromine

An antidepressant that increases certain brain chemicals by blocking their breakdown. It can interact dangerously with many medicines and foods high in tyramine, so careful prescribing and a medicine-free waiting period before or after some treatments are required.

Trapezium Bone

A small wrist bone at the base of the thumb. It forms the thumb's highly mobile joint with the hand and can be affected by fractures or arthritis that causes pain during gripping and pinching.

Trapezius Muscle

A large triangular muscle across the upper back and neck. It helps lift, lower, and draw the shoulder blades backward and supports movement and stability of the neck and shoulders.

Trapezoid

A small wedge-shaped wrist bone between the trapezium and capitate. It joins mainly with the index-finger metacarpal and helps stabilize the thumb-side of the wrist; fractures are uncommon.

Trapezoid Bone

A small distal-row carpal bone between the trapezium and capitate that articulates mainly with the index metacarpal and helps stabilize the radial side of the hand.

Trapped Lung

A condition in which a lung cannot fully expand because a fibrous layer or another restriction prevents normal movement. It may follow long-standing pleural inflammation, infection, bleeding, or cancer and can cause persistent pleural fluid or breathlessness.

TRAP Sequence

A rare complication of an identical-twin pregnancy in which one twin has a severely malformed heart or no heart and receives blood from the other twin through shared placental vessels. The healthy twin may develop heart strain and needs specialist monitoring.

Trastuzumab

Trastuzumab is a monoclonal antibody targeting HER2 used for HER2-positive breast, gastric, and other cancers; infusion reactions and potentially reversible cardiomyopathy require cardiac monitoring.

Trauma

Physical injury caused by an outside force, or the mental response to a deeply distressing event. Physical trauma may damage organs, bones, or blood vessels; psychological trauma can affect emotions, sleep, and daily life.

Trauma- And Stressor-Related Disorders

A group of mental disorders involving exposure to a traumatic or stressful event or condition and subsequent emotional, behavioral, or physiologic symptoms. Examples include acute stress disorder, post-traumatic stress disorder, adjustment disorder, reactive attachment disorder, and disinhibited social engagement disorder.

Trauma Center

A hospital organized to provide rapid, coordinated care for seriously injured people. Trauma centers differ in available specialists, equipment, surgery, intensive care, and ability to treat complex injuries.

Trauma Surgery

Emergency surgery and other immediate care for seriously injured people. The team first checks and

protects breathing, the neck and spine, circulation, brain function, and the whole body, while controlling bleeding and repairing damaged organs.

Traumatic Amputation

Loss of a body part caused by an injury. It can cause life-threatening bleeding, shock, infection, and lasting disability; emergency care controls bleeding, treats damaged tissue, preserves the separated part when possible, and begins rehabilitation and psychological support.

Traumatic Bleb

A fragile, fluid-filled area that forms after glaucoma drainage surgery and is damaged by an injury. It may leak or become infected and can cause dangerously low eye pressure or vision problems.

Traumatic Brain Injury

Traumatic Brain Injury (TBI) is a change in brain function or damage to the brain caused by an external force. It may result from a bump, blow, or jolt to the head or body, a fall, blast, or an object penetrating the skull. Effects range from brief confusion or headache to memory problems, seizures, loss of consciousness, permanent disability, or death. Later swelling, bleeding, low oxygen, or other complications can cause additional brain damage.

Alternate Names:

TBI

Traumatic Events And Children

Traumatic events can affect children's safety, behavior, sleep, learning, and emotions; supportive caregivers, stable routines, and professional assessment help identify persistent trauma responses.

Traumatic Grief

Alternate name; see *Complicated grief*.

Traumatic Hemorrhagic Shock

Shock caused by severe blood loss after an injury. Reduced circulating blood volume limits oxygen delivery to organs and may cause fast heartbeat, pale or clammy skin, confusion, low blood pressure, and organ failure.

Traumatic Injury

Damage to the body caused by an external force, such as a fall, collision, blow, cut, burn, or penetrating object. Injury may affect skin, bones, organs, blood vessels, nerves, or the brain.

Traumatic Bladder and Urethral Injury

Damage to the bladder or urethra caused by an accident, surgery, or penetrating injury. Blood in the urine, inability to urinate, pelvic pain, or shock requires urgent evaluation.

Traumatic Shock

A life-threatening failure of blood flow after serious injury, often because of major bleeding, but sometimes because of heart damage or another cause. It can cause pale clammy skin, confusion, rapid breathing, and collapse and requires immediate treatment.

Traumatology

The medical field concerned with physical injuries and their consequences. It includes emergency assessment, control of bleeding, repair of damaged tissues, prevention of complications, surgery, and rehabilitation.

Traumeel S

Traumeel S is a multi-ingredient complementary product marketed for pain and inflammation; evidence, formulation, and safety depend on the product and it should not replace needed care.

Travelers' Diarrhea

Acute diarrhea occurring during or shortly after travel, usually caused by contaminated food or water and commonly involving bacterial, viral, or parasitic infection.

Travel Sickness

Nausea, dizziness, sweating, or vomiting caused by conflicting signals from the eyes and balance organs during travel or other motion. Looking toward the horizon, fresh air, gradual exposure, and suitable preventive medicines may help; severe or persistent symptoms need assessment.

Travel Vaccinations

Travel vaccinations are vaccines recommended or required for protection against infections encountered in particular countries or regions. Recommendations depend on the destination, activities, health conditions, and previous vaccinations.

Travoprost

Travoprost is a prostaglandin analogue eye drop that increases uveoscleral outflow and lowers intraocular pressure in glaucoma or ocular hypertension; iris pigmentation and eyelash changes may occur.

Trazodone

A prescription medicine used mainly for depression and sometimes for sleep problems. It can cause drowsiness, dizziness, low blood pressure, falls, and rare prolonged painful erection; dangerous reactions are more likely with certain medicines or substances.

Trazodone Overdose

Poisoning from taking too much trazodone. It can cause severe sleepiness, vomiting, low blood pressure, seizures, abnormal heart rhythms, or a prolonged painful erection.

Trb Gene

A gene involved in biological processes that vary by species; its precise identity and function must be interpreted from the organism and gene nomenclature used.

Trd Gene

The gene encoding the delta chain of the T-cell receptor in humans, contributing to gamma-delta T-cell antigen recognition.

Treacher Collins Syndrome

An inherited condition affecting development of the face and skull. It may cause small cheekbones and jaw, downward-slanting eyes, malformed ears, and hearing loss; breathing or feeding may also be difficult. Intelligence is usually normal. Care may include airway support, hearing treatment, and reconstructive surgery.

Treacle

A thick sugar syrup with little current medical use. Older medical writing sometimes used the word for a sweetened mixture or supposed antidote; it is not a modern treatment or diagnosis.

Treatment-Resistant Depression

Depression that does not improve adequately after appropriate trials of standard treatments. It requires reassessment of diagnosis, adherence, comorbidity, and treatment options.

Treatment-Resistant Schizophrenia

Schizophrenia that continues to cause important symptoms or disability despite adequate trials of at least two appropriate antipsychotic medicines. The term requires careful review of the diagnosis, treatment adherence, substance use, medical causes, and the adequacy of previous treatment.

Treat-To-Target Strategy

A treatment approach in which care is checked and adjusted regularly toward a clear goal, such as no disease activity, controlled blood pressure, or a safe blood-glucose range. The goal and changes are agreed with the patient and based on ongoing monitoring.

Trematoda

A class of parasitic flatworms called flukes; human infections include schistosomiasis and liver or lung fluke disease.

Tremelimumab

A monoclonal antibody that blocks CTLA-4 and enhances T-cell activity; it is used with durvalumab for selected unresectable hepatocellular carcinoma and other cancers, with immune-related adverse effects possible.

Tremor

An involuntary, rhythmic shaking of a body part. It may occur at rest, while holding a position, or during movement and can result from medicines, caffeine, anxiety, essential tremor, Parkinson disease, or other neurologic or metabolic conditions.

Trench Fever

A louse-borne infection caused by *Bartonella quintana*, causing recurring fever, headache, weakness, and bone pain.

Trench Foot

An injury caused by keeping feet cold and wet for a long time. It can cause numbness, swelling, pain, skin color changes, blisters, infection, and tissue death without gradual warming and medical care.

Trench Mouth

Trench mouth is acute necrotizing ulcerative gingivitis causing painful bleeding gums, foul breath, and ulceration, often associated with plaque, smoking, stress, or poor nutrition.

Trendelenberg Position

A position in which the patient lies supine with the feet higher than the head; clinical uses and risks depend on context.

Trendelenburg

Trendelenburg position places the body supine with the feet higher than the head; its use is procedure-specific and may affect breathing, pressure, and circulation.

Trendelenburg Gait

An abnormal gait pattern characterized by a downward pelvic drop toward the unsupported side during the swing phase, or a lateral trunk lurch over the weight-bearing side to compensate for hip abductor weakness. It occurs due to weakness or paralysis of the gluteus medius and minimus muscles or superior gluteal nerve lesion.

Trendelenburg Position

A position lying on the back with the head and upper body lower than the feet. It is used for selected procedures but can worsen breathing, pressure in the head, or blood pressure in some patients.

Trendelenburg Sign

A physical clinical sign indicating weakness or paral-

ysis of the hip abductor muscles (gluteus medius and minimus) innervated by the superior gluteal nerve; when the patient stands on one leg (the affected stance side), the unsupported pelvis tilts downward toward the opposite non-weight-bearing swing side.

Alternate Names:

Trendelenburg Hip Abductor Sign; Positive Trendelenburg Test

Trendelenburg Test

A clinical test used to evaluate the integrity and strength of the hip abductor mechanism (gluteus medius and minimus). The patient stands on one leg; a drop of the pelvis on the contralateral unsupported side indicates abductor weakness or hip instability on the stance side.

Treosulfan

An alkylating chemotherapy drug used in conditioning before allogeneic hematopoietic stem-cell transplantation; infection, mucositis, infertility, and organ toxicities may occur.

Trephine

A circular cutting instrument used to remove a disk of tissue or bone, such as during a bone-marrow biopsy or corneal procedure.

Treponema

A group of spiral-shaped bacteria, including *Treponema pallidum*, which causes syphilis. Different species can live in people or the environment, and identifying the species helps determine whether disease and treatment are present.

Treponemal Infections

Infections caused by spiral-shaped *Treponema* bacteria. They include syphilis and related diseases and may affect the skin, nerves, heart, eyes, or other organs; diagnosis usually combines clinical findings with blood or lesion tests.

Treponema Pallidum

The spiral-shaped bacterium that causes syphilis. It spreads mainly through contact with an infectious sore during sex and can cross the placenta to an

unborn baby. Untreated infection can later affect the skin, nerves, eyes, heart, or brain.

Treponema Pallidum Infection

Infection with the bacterium *Treponema pallidum*, which causes syphilis and can affect the skin, nervous system, cardiovascular system, and other organs.

Trepopnea

Breathlessness that occurs or becomes worse when lying on one side but not the other. It can result from disease affecting one lung, fluid around a lung, or pressure from a nearby mass and should be assessed with other symptoms.

Tretinoin

A vitamin-A-related medicine applied to the skin for acne and sun-related skin changes, or taken by mouth for a type of acute leukemia. Skin irritation is common; oral treatment can cause serious fluid buildup, fever, and breathing problems.

TRG Gene

A gene encoding the gamma chain of the T-cell receptor, contributing to gamma-delta T-cell development and antigen recognition.

Triage

Sorting patients by urgency and resource needs so those at greatest risk receive timely care.

Trial Of Labor After Cesarean

An attempt to give birth vaginally after a previous cesarean delivery. Whether it is appropriate depends on the prior uterine incision, obstetric history, current pregnancy, facility resources, and the person's preferences. Counseling includes the possibility of successful VBAC, repeat cesarean delivery, and uterine rupture.

Triamcinolone

A corticosteroid medicine used on skin, by injection, or in other forms to reduce inflammation and itching.

Triamcinolone Acetonide

A synthetic corticosteroid used topically, by injection, or in other preparations to reduce inflammation; prolonged or extensive use can cause local and systemic steroid effects.

Triamterene

A water tablet that helps the kidneys remove salt and water while conserving potassium. It is used for high blood pressure or swelling, but can cause dangerously high potassium, kidney problems, or kidney stones.

Triangle of Doom

An essential laparoscopic anatomical region in the pelvis bounded by the vas deferens medially, the spermatic (testicular) vessels laterally, and the peritoneal reflection inferiorly, containing the external iliac artery and vein and deep circumflex iliac vein, which must be avoided during laparoscopic inguinal hernia mesh fixation to prevent catastrophic vascular injury.

Alternate Names:

Laparoscopic Vascular Danger Triangle; Inguinal Triangle of Doom

Triangle of Pain

A laparoscopic anatomical region in the groin bounded by the spermatic vessels medially, the iliohypocostic tract superolaterally, and the peritoneal reflection inferiorly, containing the femoral branch of the genitofemoral nerve, the lateral femoral cutaneous nerve, and the femoral nerve, where placement of tacks or staples must be avoided during hernia repair to prevent chronic neuropathic groin pain.

Alternate Names:

Laparoscopic Neural Danger Triangle; Inguinal Triangle of Pain

Triazenes

A group of chemical compounds that includes some chemotherapy medicines. Their effects and risks depend on the specific drug; possible problems include nausea, low blood counts, infection, and damage to other organs.

Triaziquone

An older alkylating anticancer drug that cross-links DNA; its clinical use is limited by toxicity and availability.

Triazolam

Triazolam is a short-acting benzodiazepine hypnotic for short-term insomnia; amnesia, falls, dependence, respiratory depression, and dangerous interactions with opioids or other sedatives can occur.

Triazole

A five-membered nitrogen-containing chemical ring found in several antifungal medicines and other drugs; clinical effects depend on the specific compound.

Triazophos

An organophosphate insecticide that blocks acetylcholinesterase, allowing nerve signals to remain active. Significant exposure can cause sweating, vomiting, diarrhea, small pupils, breathing difficulty, weakness, seizures, or life-threatening poisoning.

Triceps

A muscle with three heads, especially the triceps brachii at the back of the upper arm. It straightens the elbow and helps stabilize the shoulder; injury or nerve problems can weaken pushing and lifting.

Triceps Brachii Muscle

The large muscle at the back of the upper arm. It straightens the elbow and helps move and stabilize the shoulder; injury or nerve damage can weaken pushing and lifting.

Triceps Reflex

A monosynaptic deep tendon stretch reflex elicited by tapping the triceps brachii tendon immediately superior to the olecranon process with a reflex hammer, stretching muscle spindles and provoking reflex forearm extension mediated through the radial nerve (evaluating spinal cord segments C7 and C8).

Alternate Names:

Triceps Tendon Reflex; C7 Reflex

Trichiasis

Inward misdirection of eyelashes so they rub against the eye.

Trichilemmal Carcinoma

A rare malignant follicular tumor showing outer-root-sheath differentiation, usually occurring on sun-damaged skin of older adults as a papule or nodule; complete excision is generally required.

Trichilemmal Cyst (Pilar Cyst)

A usually benign keratin-filled cyst arising from the outer root sheath of a hair follicle, most often on the scalp. It is typically a firm, mobile lump and may become inflamed, rupture, or rarely develop a proliferating pilar tumor.

Trichilemmoma

A usually harmless tumor arising from a hair follicle, most often appearing as a small skin-colored bump on the face. Multiple growths can be associated with an inherited condition called Cowden syndrome.

Trichinellosis

Trichinellosis is an infection caused by *Trichinella* worms, usually after eating undercooked infected meat. It may cause diarrhea followed by fever, muscle pain, and swelling around the eyes.

Trichiniasis

An infection caused by *Trichinella* larvae, acquired from undercooked meat.

Trichinosis

Infection with *Trichinella* worms, usually acquired by eating undercooked infected pork or wild game. It may cause diarrhea, fever, muscle pain, and swelling around the eyes.

Trichobezoar

A mass of swallowed hair in the digestive tract, usually the stomach, which may cause pain, vomiting, or blockage.

Trichoblastoma

A rare benign follicular tumor of the scalp or face, usually presenting as a solitary dermal or subcutaneous nodule; it can resemble basal-cell carcinoma and is diagnosed histologically.

Trichoepithelioma

A rare benign follicular adnexal tumor that usually presents as a skin-coloured papule or nodule on the face or scalp; it can resemble basal-cell carcinoma and may require histopathologic confirmation.

Trichomonas

A flagellated protozoan, *Trichomonas vaginalis*, that infects the urogenital tract and causes trichomoniasis. It is transmitted mainly through sexual contact and may cause discharge, irritation, or no symptoms.

Trichomonas Vaginalis

A flagellated protozoan that causes trichomoniasis, a sexually transmitted infection.

Trichomoniasis

A sexually transmitted infection caused by the parasite *Trichomonas vaginalis*. It may cause genital irritation and discharge or no symptoms; testing and treatment of partners help prevent reinfection.

Trichophyton

A group of fungi that grow in keratin and cause ringworm infections of skin, hair, or nails. They spread through contact with infected people, animals, or objects and are treated with antifungal medicines.

Trichorrhexis Nodosa

A hair-shaft defect in which weakened points split into brush-like ends, caused by inherited disease, trauma, chemicals, heat, or nutritional or metabolic disorders.

Trichostasis Spinulosa

A follicular disorder in which many fine vellus hairs become retained in a dilated follicle, producing dark, rough, spiny papules often on the back, chest, or

face. It is benign and may improve with topical keratolytics, retinoids, or hair-removal methods.

Trichothiodystrophy Syndrome

A group of inherited disorders characterized by brittle sulfur-deficient hair with a distinctive banded appearance, often accompanied by photosensitivity, ichthyosis, developmental delay, short stature, or recurrent infection.

Trichotillomania

Recurrent pulling out of one's hair, causing hair loss, distress, or impairment, together with repeated attempts to reduce or stop the behavior.

Trichuriasis

Intestinal infection caused by the whipworm *Trichuris trichiura*, usually acquired by swallowing eggs from contaminated soil or food. Heavy infection can cause abdominal pain, diarrhea, anemia, or rectal prolapse.

Tricuspid Annular Plane Systolic Excursion

A measurement made during an echocardiogram that shows how far part of the tricuspid valve moves as the right ventricle contracts. A low value may indicate reduced right-heart pumping and is interpreted with the complete scan and clinical findings.

Alternate Names:

TAPSE; Tricuspid Annular Excursion; RV Longitudinal Systolic Function

Tricuspid Atresia

A congenital absence or complete closure of the tricuspid valve, blocking normal flow from the right atrium to the right ventricle. Survival depends on an atrial communication and usually a ventricular septal defect or patent ductus to allow blood to reach the lungs; newborns typically have cyanosis and need urgent specialist care and staged treatment.

Tricuspid Incompetence

Incomplete closure of the tricuspid heart valve, allowing blood to leak backward into the right upper chamber. Severe leakage can cause swelling, liver

congestion, irregular heartbeat, fatigue, and breathlessness.

Tricuspid Regurgitation

Backward flow through the tricuspid valve from the right ventricle to the right atrium during systole. It may result from primary valve disease or annular enlargement caused by right-ventricular or right-atrial dilation, pulmonary hypertension, or left-sided heart disease; severe regurgitation can cause fatigue, edema, ascites, liver congestion, or right-sided heart failure.

Tricuspid Stenosis

Narrowing of the tricuspid valve opening, making it harder for blood to move from the right upper chamber to the right lower chamber. It can cause fatigue, swelling, enlarged liver, or neck-vein fullness.

Tricuspid Valve

The heart valve between the right upper and right lower chambers. It opens to let blood move forward and closes to prevent backflow; leakage or narrowing can strain the heart.

Tricuspid Valve Disease

Alternate name; see *Tricuspid regurgitation* and *Tricuspid stenosis*.

Tricyclic Antidepressant Drugs

A group of older antidepressants that increase certain chemical signals in the brain. They can also cause dry mouth, constipation, sleepiness, dangerous heart rhythms, and serious poisoning in overdose.

Tricyclic Antidepressants

Antidepressants that block reuptake of serotonin and norepinephrine, with additional anticholinergic, antihistaminic, and alpha-adrenergic blocking effects. Examples include amitriptyline, nortriptyline, imipramine, and desipramine. They are effective for depression, neuropathic pain, and migraine prophylaxis.

Alternate Names:

Tricyclics; First-Generation Antidepressants

Tricyclic Antidepressant Toxicity

Rapid anticholinergic and sodium-channel toxicity causing dry skin, mydriasis, delirium, seizures, hypotension, QRS widening, ventricular dysrhythmias, and coma. Obtain an ECG early; airway support, intravenous sodium bicarbonate for QRS widening or ventricular toxicity, and benzodiazepines for seizures are key interventions.

Trifluoperazine

A phenothiazine antipsychotic used for selected psychotic disorders. It can cause drowsiness, movement disorders, and other serious effects, so treatment requires medical supervision.

Trigeminal Nerve

The fifth cranial nerve, carrying sensation from the face and controlling muscles used for chewing.

Trigeminal Neuralgia

A chronic pain disorder causing sudden, repeated bursts of severe electric-shock-like, stabbing, or burning pain on one side of the face along one or more branches of the trigeminal nerve, the fifth cranial nerve. Attacks usually last from a fraction of a second to about two minutes and may occur in clusters, with pain-free periods between them. Light touch, brushing the teeth, eating, drinking, speaking, or a breeze may trigger an attack. The usual cause is pressure on the nerve near the brainstem, but multiple sclerosis, a tumor, or another nerve disorder can sometimes be responsible.

Alternate Names:

Tic Douloureux; Fothergill Disease

Trigger

A trigger is an event, exposure, stimulus, or condition that initiates or worsens a symptom, disease episode, behavior, or physiologic response.

Trigger Finger

A condition in which a finger tendon catches as it moves through a tight covering. It can cause pain, clicking, stiffness, or locking and may improve with rest, injections, splinting, or surgery.

Alternate Names:

Stenosing Tenosynovitis; Snapping Digit

Trigger Finger Release

A procedure that opens the tight tunnel around a finger tendon so the finger can move more freely. It may be offered when rest, a splint, or an injection has not helped. Movement often improves, but recovery and results vary and infection, nerve injury, pain, or continued symptoms can occur.

Alternate Names:

A1 Pulley Release; Trigger Thumb Release; Stenosing Tenosynovitis Surgery; Percutaneous Trigger Finger Release

Trigger Thumb

A condition in which the thumb tendon catches as it moves through a tight covering. It may cause pain, clicking, stiffness, or locking and can often be treated with rest, splinting, an injection, or surgery.

Triglyceride

A lipid composed of glycerol and three fatty acids, transported in blood and stored in adipose tissue.

Triglyceride Level

A triglyceride level measures a type of fat in the blood; persistently high levels can increase cardiovascular risk and, when very high, cause pancreatitis.

Triglycerides

Triglycerides are blood fats made of glycerol and three fatty acids; elevated levels contribute to cardiovascular risk and, when very high, pancreatitis risk.

Trigone

A triangular area, especially the smooth region at the base of the urinary bladder between the ureter openings and urine outlet. It helps direct urine flow and can be affected by inflammation or tumors.

Triiodothyronine

The thyroid hormone T3, which contains three iodine atoms and has stronger biological activity than T4. It helps regulate metabolism, heart rate, tem-

perature, and growth.

Trimester

One of the three approximately three-month periods of pregnancy. Each trimester has typical developmental milestones and screening or care needs.

Trimethoprim

An antibiotic that blocks bacterial folate production and is often combined with sulfamethoxazole. It treats selected infections but can cause rash, blood-cell changes, high potassium, kidney effects, or medicine interactions.

Trimethoprim-Sulfamethoxazole

An antibiotic combination that blocks bacteria from making folate, which they need to grow. It treats selected urinary, lung, skin, and other infections but can cause allergy, blood-count changes, high potassium, or kidney problems.

Trimethylaminuria

A metabolic disorder in which impaired oxidation of trimethylamine causes a characteristic fish-like body odor in sweat, urine, and breath. It may be inherited or acquired and can cause substantial psychosocial distress despite limited physical illness.

Trimipramine

A sedating tricyclic antidepressant used for depression in some countries. Its anticholinergic and cardiovascular effects can cause dry mouth, constipation, blurred vision, drowsiness, orthostatic hypotension, or dangerous toxicity in overdose; interactions and suicide risk require clinical monitoring.

Trinitrin

Another name for glyceryl trinitrate or nitroglycerin, a nitrate vasodilator.

Trinitrophenol

Picric acid, a corrosive and potentially explosive chemical once used in medicine, laboratories, and industry.

Trinucleotide Repeat

A short DNA sequence of three building blocks repeated many times. Extra copies can interfere with genes and cause inherited disorders such as Huntington disease, fragile X syndrome, myotonic dystrophy, or Friedreich ataxia.

Trip

A trip is a journey or an accidental stumble; in drug-related language it can also mean an episode of altered perception after a hallucinogen.

Tripe Palms

Diffuse, velvety, thickened hyperkeratosis of the palmar skin with a cerebriform, corrugated appearance resembling the lining of a cow's stomach (tripe), which is strongly associated with underlying malignancy, most commonly gastric adenocarcinoma. It may occur alone or in conjunction with acanthosis nigricans.

Triple-Negative Breast Cancer

Breast cancer whose cells lack three common growth-related markers: estrogen receptors, progesterone receptors, and HER2. It does not respond to treatments aimed at those markers, so treatment may include surgery, chemotherapy, immunotherapy, or other options based on the cancer's features.

Triplets

Three offspring born from the same pregnancy or three infants born in a multiple birth.

Triple X Syndrome

A sex-chromosome variation in which a female has an extra X chromosome. Many affected people have typical sexual development and fertility, while some have tall stature, speech or learning difficulties, coordination problems, or anxiety; severity varies widely.

Alternate Names:

Trisomy X; 47,XXX Syndrome

Triploidy Syndrome

A chromosome condition in which cells have three

complete sets of chromosomes instead of two. It usually causes severe growth restriction and multiple birth defects and often prevents long-term survival; rare mosaic forms may be less severe.

Triptan

A medicine for stopping a migraine attack. It changes signals in pain pathways and narrows certain blood vessels. It is not suitable for everyone, especially people with some heart or blood-vessel conditions.

Triptans

A group of medicines used to stop a migraine attack. They act on serotonin receptors and pain pathways; they are not suitable for some people with heart or blood-vessel disease and can cause chest or pressure sensations.

Triquetrum

One of the small bones on the little-finger side of the wrist. It helps stabilize the wrist and can be injured by a fall or direct blow, causing pain and swelling.

Trismus

Difficulty opening the mouth because the jaw muscles are tight or painful. Causes include dental infection, injury, medicines, muscle disorders, and tetanus; severe or rapidly worsening restriction can interfere with eating or breathing and needs urgent assessment.

Trisodium Phosphate Poisoning

Poisoning from swallowing or contacting trisodium phosphate, a strong alkaline cleaner. It can burn the mouth, throat, eyes, and skin and may cause vomiting or breathing problems.

Trisomy

A chromosome condition in which cells have an extra copy of a whole chromosome or chromosome segment, giving three copies instead of the usual two. It may affect all cells or only some cells (mosaicism); effects depend on the chromosome or segment involved and may include developmental differences,

birth defects, or pregnancy loss.

Trisomy 13

Patau syndrome, a chromosomal disorder caused by an extra chromosome 13 and associated with severe developmental, brain, facial, heart, kidney, and limb abnormalities.

Alternate Names:

D Trisomy Syndrome; Patau Syndrome

Trisomy 18

Edwards syndrome, a chromosomal disorder caused by an extra chromosome 18 and associated with growth restriction, characteristic craniofacial and limb findings, heart disease, and severe developmental impairment.

Trisomy 21

Down syndrome, a genetic condition caused by an extra copy of chromosome 21. It may affect learning, growth, muscle tone, the heart, hearing, vision, or other organs; the features and level of support needed vary widely.

Trisomy 21 Syndrome

Alternate name; see *Down syndrome*.

Trisomy X

Alternate name; see *Triple X syndrome*.

Trocar

A pointed instrument placed inside a hollow tube to enter a body cavity or tissue. It is used in minimally invasive procedures to create an opening for cameras, instruments, or drainage tubes.

Trochanter

A bony projection on the thigh bone, especially the larger outer or smaller inner projection. Muscles and tendons attach there, and irritation around the greater trochanter can cause outer-hip pain.

Trochanteric Bursitis

Alternate name; see *Greater trochanteric pain syndrome*.

Troche

A troche is a small medicated lozenge that dissolves slowly in the mouth or throat for local or systemic drug delivery.

Trochlear Nerve

Cranial nerve IV, which supplies the superior oblique eye muscle. Injury can cause vertical or tilted double vision, often worse when looking down or inward.

Trochlear Nerve Palsy

A cranial neuropathy involving the fourth cranial nerve (CN IV), causing paralysis of the superior oblique muscle, presenting with vertical and torsional diplopia (characteristically worse on downgaze and reading), an upward and inward hypertropia of the affected eye, and a compensatory head tilt toward the opposite contralateral shoulder (Bielschowsky head tilt test).

Alternate Names:

Fourth Nerve Palsy; CN IV Palsy

Trophic

Relating to the nutrition, growth, development, or maintenance of tissue. Trophic changes may occur when nerve supply or blood flow is impaired.

Trophoblast

The outer cell layer of an early embryo that attaches to the uterus and helps form the placenta. It supports implantation, exchanges nutrients, and produces hormones needed to maintain early pregnancy.

Trophoderm

The outer layer of cells in a very early embryo before it attaches to the uterus. It helps the embryo implant and develops into tissues that form much of the placenta.

Trophozoite

The active stage of a single-celled parasite. In this stage it feeds, grows, and often multiplies; it differs from the more resistant form that some parasites

use to survive outside the body.

Tropical Disease

A tropical disease is an infection or other health condition more common in tropical and subtropical regions, often because of local climate, vectors, or living conditions. Travel history helps guide diagnosis.

Tropical Diseases

Illnesses more common in warm tropical or subtropical regions, including malaria, dengue, schistosomiasis, and other neglected infections.

Tropical Medicine

The medical specialty concerned with diseases common in tropical and subtropical regions and illnesses related to travel. It includes infections, parasites, insect-borne diseases, environmental hazards, prevention, diagnosis, and treatment.

Tropical Sprue

A disorder causing long-lasting diarrhea and poor absorption of nutrients, reported mainly in tropical and subtropical areas. It can lead to weight loss and deficiencies of folate, iron, and vitamin B12. Testing helps exclude infection and other causes; treatment usually includes antibiotics and replacement of missing nutrients.

Tropical Ulcer

A chronic ulcer occurring in tropical regions, often associated with infection, trauma, or poor wound healing.

Troponin

A protein released into the blood when heart muscle is injured. A raised level can support a heart-attack diagnosis, but it may also result from other heart, lung, kidney, or severe systemic illnesses.

Troponin I

An inhibitory subunit of the troponin regulatory complex of cardiac striated muscle; cardiac troponin I (cTnI) possesses an amino acid sequence unique

to myocardium, serving as an exquisitely sensitive and specific clinical blood biomarker for acute myocardial injury and infarction.

Alternate Names:

cTnI; Cardiac Troponin I

Troponin Test

A troponin test measures heart-muscle proteins in the blood and helps assess possible heart injury, especially during suspected heart attack.

Trouble Swallowing

Difficulty moving food or liquid from the mouth to the stomach. It may cause coughing, choking, pain, or a feeling that food is stuck in the throat or chest.

Trousseau Sign

A hand cramp where the fingers stiffen and the thumb pulls inward when a blood pressure cuff is pumped up on the arm, showing low calcium in the blood.

Trousseau Sign Of Latent Tetany

A hand spasm that may occur when blood flow to the arm is briefly reduced with a blood-pressure cuff. It can suggest low blood calcium, but it is not specific and must be interpreted with symptoms and blood tests.

Alternate Names:

Trousseau Sign; Carpopedal Spasm Sign

Trousseau Sign of Malignancy

Spontaneous, migratory superficial thrombophlebitis characterized by recurrent tender, erythematous venous cords appearing sequentially in different superficial veins of the extremities and trunk, strongly associated with underlying visceral mucinous adenocarcinomas, particularly of the pancreas.

Alternate Names:

Trousseau Syndrome; Migratory Thrombophlebitis

Trousseau Syndrome

Repeated or shifting blood clots in veins associated with active cancer, especially some cancers of the

pancreas, stomach, or lung. The cancer can make the blood clot too easily; it differs from the hand spasm called Trousseau sign.

Trp

Trp is the standard abbreviation for tryptophan, an essential amino acid used in protein synthesis and serotonin and niacin pathways.

True Hermaphroditism

Deprecated historical term for ovotesticular disorder or difference of sex development (ovotesticular DSD), in which both ovarian and testicular tissue are present, either in one ovotestis or in separate gonads. Chromosomal patterns and external anatomy vary; current medical writing should use ovotesticular DSD.

Alternate Names:

Ovotesticular Disorder of Sex Development; Ovotesticular DSD

True Ribs

The first seven pairs of ribs, each attached directly to the breastbone by its own flexible cartilage. They protect the heart and lungs and move with the chest during breathing.

Truncation

A shortened or incomplete form caused by removal of part of a sequence, structure, chromosome, protein, or process; the effect depends on what was lost and where.

Truncus Arteriosus

A birth defect in which one large blood vessel leaves the heart instead of separate vessels for the body and lungs. A large hole between the lower chambers usually allows oxygen-poor and oxygen-rich blood to mix, causing blue skin and heart failure. Early surgery is usually required.

Trunk

The central part of the body excluding the head and limbs, or a major nerve or vessel trunk.

Trypanosoma

A genus of protozoan parasites causing African and American trypanosomiasis.

Trypanosoma Brucei

A protozoan parasite transmitted by tsetse flies that causes African trypanosomiasis, or sleeping sickness. The human-infecting subspecies differ in geographic distribution and typical disease course; infection can progress from fever and lymph-node enlargement to neurologic involvement.

Trypanosomiasis

Disease caused by Trypanosoma parasites, including African sleeping sickness and Chagas disease. Infected insects spread them, and illness may affect blood, lymph nodes, the nervous system, heart, or digestive organs.

Trypsin

A digestive enzyme made by the pancreas and activated in the small intestine. It breaks proteins in food into smaller parts and activates other pancreatic digestive enzymes.

Trypsin And Chymotrypsin In Stool

Stool trypsin and chymotrypsin testing measures digestive enzymes and may help assess pancreatic enzyme production, although other tests are often preferred.

Trypsinogen Test

A trypsinogen test measures a pancreatic enzyme precursor and may help evaluate pancreatic function or newborn screening for cystic fibrosis.

Tryptophan

An amino acid the body cannot make and must obtain from food. It is used to make proteins and can be changed into serotonin, melatonin, and niacin, which help regulate mood, sleep, and other body functions.

Tsetse Fly

A blood-feeding fly found in parts of sub-Saharan

Africa. Its bite can spread Trypanosoma parasites, which cause African sleeping sickness; infection may cause fever, headaches, behavior changes, sleep disturbance, and serious nervous-system disease.

TSH

Thyroid-stimulating hormone, made by the pituitary gland to tell the thyroid to produce its hormones. A blood TSH measurement is commonly the first test for many thyroid problems.

TSH-Receptor Antibody

An antibody that attaches to the thyroid's control receptor. Some antibodies overstimulate the thyroid and cause Graves disease, while others block its activity; testing can help diagnose thyroid disease and assess pregnancy-related risk.

TSH Test

A TSH test measures thyroid-stimulating hormone in the blood and is a common initial test of thyroid function.

TSI Test

A blood test that detects antibodies which overstimulate the thyroid. It can support the diagnosis or monitoring of Graves disease and may help assess risk to a fetus during pregnancy.

Tsutsugamushi Fever

Scrub typhus, a mite-borne infection caused by Orientia tsutsugamushi. It may cause fever, headache, rash, an eschar, and organ complications and is treated with an appropriate antibiotic.

Tubal Ligation

A permanent birth-control procedure that closes, cuts, or removes the fallopian tubes so sperm and egg cannot normally meet. It does not protect against sexually transmitted infections, and pregnancy after the procedure, though uncommon, can be ectopic.

Tubal Ligation Reversal

Microsurgical reconnection of previously divided or

blocked fallopian-tube segments to restore a possible path for sperm and egg; success depends on remaining tube length, age, scarring, and original method.

Tubal Pregnancy

An ectopic pregnancy that implants in a fallopian tube instead of the uterus. It can rupture and cause internal bleeding; one-sided pain, vaginal bleeding, dizziness, or fainting may occur.

Tubercle

A small rounded projection or nodule; it may refer to bone anatomy or a tuberculous lesion.

Tuberculide

A skin eruption caused by an immune reaction to tuberculosis elsewhere in the body. The skin lesions usually contain no bacteria and may improve when the underlying tuberculosis is treated.

Tuberculin

Protein material from *Mycobacterium tuberculosis* used in a skin test for immune sensitization. A positive result suggests exposure or vaccination but does not by itself prove active tuberculosis or show when exposure occurred.

Tuberculin Skin Test

A small amount of tuberculosis protein is injected into the skin. The raised, firm area is measured 2 to 3 days later; the result depends on its size and the person's risk factors and does not by itself distinguish latent from active tuberculosis.

Tuberculin Test

A skin test that checks whether the immune system has reacted to tuberculosis proteins. A positive result suggests infection or previous vaccination and does not by itself prove active disease.

Tuberculoid Leprosy

A form of leprosy in which the immune system keeps the number of bacteria low. It usually causes a few pale or reddish skin patches with reduced feeling

and can injure nearby nerves, causing weakness or numbness.

Tuberculosis

An infection caused by *Mycobacterium tuberculosis*, most often affecting the lungs. It spreads through airborne particles and may cause cough, fever, night sweats, weight loss, or silent infection without symptoms.

Alternate Names:

TB

Tuberculosis In Children

Tuberculosis infection in a child, usually acquired by breathing air containing the bacteria from an infectious person. It may be silent or cause cough, fever, poor growth, night sweats, or swollen lymph nodes; testing and treatment depend on exposure and findings.

Tuberculosis (TB)

An infectious disease caused by *Mycobacterium tuberculosis*, usually affecting the lungs but potentially involving any organ. Pulmonary disease may cause prolonged cough, fever, night sweats, weight loss, or hemoptysis; diagnosis, multidrug treatment, contact evaluation, and infection control are essential.

Tuberculous Meningitis

A life-threatening infection of the coverings of the brain caused by tuberculosis bacteria. It may cause persistent headache, fever, vomiting, neck stiffness, confusion, seizures, or weakness.

Tuberous Sclerosis

A rare genetic disorder, also called tuberous sclerosis complex, that causes growths in the brain and other organs, including the skin, kidneys, heart, and lungs. It may cause seizures, developmental or behavioral problems, and skin changes; the severity varies widely.

Tuberous Sclerosis Complex

An autosomal dominant genetic condition, usually caused by a disease-causing change in the *TSC1* or *TSC2* gene, in which noncancerous growths develop

in several organs, especially the brain, skin, kidneys, heart, and lungs. It may cause seizures, developmental or learning difficulties, skin changes, kidney problems, or breathing disease. Lifelong monitoring and treatment are tailored to the organs affected.

Tubes

Hollow structures that carry air, fluid, food, or medical instruments. Examples include breathing tubes, fallopian tubes, drainage tubes, and blood vessels; the specific structure must be named for the term to be clinically precise.

Tubography

Contrast imaging of the fallopian tubes, usually as part of hysterosalpingography, to see whether they are open. It may help assess infertility but can cause temporary cramping, bleeding, infection, or rarely injury.

Tubo-Ovarian Abscess

A pocket of pus involving a fallopian tube and ovary, usually caused by a pelvic infection. It can cause pelvic pain, fever, and severe illness and may need antibiotics, drainage, or surgery.

Tubular Adenoma

A benign glandular polyp, most often in the colon, that can develop dysplastic changes and is considered a precursor lesion for some colorectal cancers.

Tubular Maximum

The maximum transport rate across the renal tubular epithelium for a filtered solute (such as glucose, phosphate, or amino acids), representing the point of carrier protein saturation beyond which any additional filtered load spills directly into the urine.

Alternate Names:

T_m; Transport Maximum

Tubular Reabsorption

The process by which kidney tubules return useful water and dissolved substances from filtered fluid to the blood. This prevents the loss of most water, salt, glucose, and other substances in urine.

Tubular Secretion

The movement of selected medicines, waste products, and extra ions from the blood into kidney tubules. This helps the kidneys remove substances from the body and regulate fluid and salt balance.

Tubule

A small tube in the body. In the kidney, tubules change filtered fluid by taking useful water and substances back into the blood and leaving waste to form urine; other tubules carry fluids in different organs.

Tubuloglomerular Feedback

A kidney control system that adjusts blood flow and filtration according to how much salt reaches part of a kidney tubule. It helps keep filtration and fluid balance reasonably stable.

Tubulointerstitial Diseases of the Kidney

Disorders that primarily injure renal tubules and the surrounding interstitial tissue rather than the glomeruli. They may cause impaired urine concentration, electrolyte or acid-base abnormalities, sterile pyuria, mild proteinuria, and acute or chronic loss of kidney function.

Tubulointerstitial Nephritis

A pattern of renal parenchymal inflammation predominantly centered on the renal interstitial compartment and tubules rather than the glomeruli, classically triggered by allergic adverse reactions to medications (beta-lactams, NSAIDs, PPIs), autoimmune diseases, or direct infections.

Alternate Names:

TIN; Interstitial Nephritis

Tubulointerstitial Nephropathy

Kidney damage involving the small tubes that process urine and the tissue around them. Medicines, infections, toxins, autoimmune disease, and inherited conditions can cause it and may reduce kidney function.

Tularaemia

A zoonotic infection caused by *Francisella tularensis*, acquired from animals, ticks, contaminated water, or aerosols.

Tularemia

Tularemia is infection with *Francisella tularensis* acquired from ticks, animals, contaminated water, or aerosols and causing ulcer-glandular, pulmonary, or other disease.

Alternate Names:

Deerfly Fever; Rabbit Fever; *Francisella Tularensis* Infection

Tularemia Blood Test

A tularemia blood test looks for antibodies or other evidence of infection with *Francisella tularensis*; antibodies may not appear early in illness.

Tulle Gras

A paraffin-impregnated gauze dressing used to cover wounds and burns.

Tullio Phenomenon

Dizziness, eye movements, or balance problems triggered by loud sounds. It can occur with inner-ear conditions such as superior semicircular canal dehiscence or a perilymphatic fistula, but testing is needed to find the cause.

Alternate Names:

Sound-Induced Vertigo; Acoustic Vestibular Phenomenon

Tumescence

Swelling or enlargement caused by increased blood flow, fluid, or tissue growth. The term commonly describes erection but can also refer to temporary or abnormal enlargement in other body tissues.

Tumor

An abnormal mass formed by cells growing more than they should or surviving when they should not. A tumor may be noncancerous and remain localized, or cancerous and invade nearby tissue or spread.

Tumor Board

A meeting in which doctors from different specialties review a person's cancer diagnosis and test results together. They discuss the possible treatment options and coordinate a care plan.

Tumor Burden

The total amount of cancer in the body, estimated from the number, size, and spread of tumor deposits. It can help doctors assess disease extent and treatment response but does not alone determine a person's outlook.

Tumor Differentiation

How closely tumor cells resemble the normal cells from which they arose. Well-differentiated tumors look and behave more like normal tissue, while poorly differentiated tumors often behave more aggressively.

Tumor Embolism

A blockage caused when cancer cells or a piece of a tumor travels through the bloodstream and lodges in another vessel, most often in the lungs. It can impair blood flow and may cause breathing or other organ problems.

Tumor Grade

A description of how abnormal cancer cells look under a microscope compared with normal cells. Lower-grade tumors often grow more slowly, while higher-grade tumors may grow or spread more quickly; grade is different from cancer stage.

Tumor Grading

The process of examining cancer cells under a microscope and assigning a grade according to how different they look from normal cells. Lower-grade tumors often grow more slowly, while higher-grade tumors may behave more aggressively; grade is different from stage.

Tumor Heterogeneity

Differences between cancer cells in the same tumor or between the original tumor and its spread. These differences can affect how quickly cancer grows and

why some cells respond to treatment while others resist it.

Tumor-Infiltrating Lymphocyte Therapy

A cellular cancer treatment using immune cells removed from a tumor, selected or expanded in the laboratory, and returned to the person to attack cancer cells. It is used for selected advanced cancers and requires specialized treatment because serious immune and treatment-related complications can occur.

Tumor Lysis Syndrome

A medical emergency caused by rapid cancer-cell breakdown, releasing substances that disturb blood chemistry. It can damage kidneys, trigger seizures or abnormal heart rhythms, and requires prevention, monitoring, and urgent treatment.

Tumor Marker

A substance found in blood, urine, tissue, or another body fluid that may be produced by cancer or by the body's response to it. Tumor markers can help monitor treatment or recurrence and sometimes guide diagnosis, but most are not specific enough to prove cancer alone.

Tumor Mutational Burden

The number of gene changes found in a sample of cancer. A high number may help predict response to some immunotherapy, but the result depends on the test, cancer type, and other tumor features.

Tumor Necrosis Factor

An immune-system messenger that promotes inflammation, fever, and activation of other immune cells. Helpful during infection, it can also contribute to autoimmune disease, tissue damage, and wasting when produced excessively.

Tumor Necrosis Factor Receptor-Associated Periodic Syndrome

A rare inherited autoinflammatory disorder caused by variants in the TNFRSF1A gene, producing recurrent prolonged fever, muscle pain, abdominal pain, rash, and inflammation; it is also called

TRAPS.

Tumor Staging

The process of determining how large a cancer is and whether it has spread to nearby lymph nodes or distant organs. The results help guide treatment and estimate outlook.

Tumor Suppressor

A gene or protein that helps prevent abnormal cell growth by slowing cell division, repairing DNA damage, or removing damaged cells. Loss of this protection can contribute to cancer.

Tumor Suppressor Gene

A gene that helps prevent uncontrolled cell growth by slowing division, repairing DNA damage, or directing abnormal cells to die. If both copies or the gene's function are lost or disabled, cells may grow abnormally and cancer risk can increase.

Tumor-Suppressor Gene

A gene that helps prevent uncontrolled cell growth by slowing cell division, repairing damaged DNA, or removing abnormal cells. Loss of its protective function can increase the chance of cancer.

Tumour

An abnormal mass caused by uncontrolled or inappropriate cell growth; it may be noncancerous or cancerous.

Tungiasis

A skin infestation caused by the sand flea *Tunga* penetrans, producing an itchy or painful lesion, usually on the feet.

Tunica Adventitia

The tough outer layer of a blood vessel. It contains supportive tissue, nerves, and small vessels and helps anchor the vessel to nearby structures.

Tunica Albuginea

A tough layer of connective tissue surrounding the testis. It helps protect the testicular tissue and

sends inward partitions that divide it into lobules.

Tunica Media

The middle layer of a blood-vessel wall, made mainly of muscle and elastic tissue. It can tighten or relax to change vessel width and help control blood pressure and blood flow.

Tunica Vaginalis

A thin, slippery covering around most of the testis, formed from the abdominal lining during testicular descent. It allows the testis to move smoothly inside the scrotum.

Tunnel Vision

Loss of peripheral visual field leaving a narrowed central field, caused by glaucoma, retinal disease, optic-nerve or brain lesions, severe hypoxia, or other conditions.

Turbinates

Curved structures inside the nose that warm, moisten, and filter breathed air. They contain bone covered by soft tissue and can swell during allergies, infection, or irritation and make nasal breathing difficult.

Turbinates Hypertrophy

Long-lasting enlargement of the tissues inside the nose, often from allergies, irritation, sinus disease, or hormonal changes. It can block nasal airflow and cause a stuffy nose, mouth breathing, snoring, or reduced smell.

Turbinate Surgery

An operation that reduces or reshapes swollen tissues along the side walls of the nose to improve airflow. It may help persistent nasal blockage when other treatment fails; bleeding, crusting, dryness, scarring, or ongoing obstruction are possible.

Turcot Syndrome

A rare inherited cancer-predisposition pattern involving colon polyps or colon cancer together with a brain tumor. It can result from mismatch-repair

gene changes or the APC gene change seen in familial adenomatous polyposis, so genetic counseling and screening are important.

Alternate Names:

Brain Tumor-Polyposis Syndrome

Turgor

The firmness and springiness of body tissue caused partly by its fluid content. Skin that remains tented after being gently pinched may suggest dehydration, but this sign is not reliable by itself.

Turner Hypoplasia

A defect in the enamel of a permanent tooth caused by infection or injury involving the baby tooth above it. The affected tooth may have a discolored, rough, or weakened area.

Turner's Syndrome

A chromosome condition affecting females in which one X chromosome is missing or altered. It commonly causes short stature and reduced ovarian function, with delayed or absent puberty and infertility. Heart, kidney, hearing, and thyroid problems may also occur, so lifelong medical follow-up is important.

Turner Syndrome

A chromosome condition affecting females in which one X chromosome is missing or altered. It commonly causes short stature and reduced ovarian function, with delayed or absent puberty and infertility. Heart, kidney, hearing, and thyroid problems may also occur, so lifelong medical follow-up is important.

Turning Patients Over In Bed

Repositioning a patient at planned intervals to protect skin, improve comfort and breathing, prevent pressure injuries and contractures, and reduce complications of immobility.

Turpentine Oil Poisoning

Poisoning from swallowing or inhaling turpentine oil. It can irritate or damage the lungs, stomach, and nervous system and may cause chemical pneumonia.

Tussis

Cough; a forceful reflex expiration that helps clear secretions, irritants, or foreign material from the airways.

TVS

TVS commonly means transvaginal sonography, an ultrasound examination using a probe in the vagina to assess pelvic organs and early pregnancy.

T Wave

The part of an ECG that shows the heart's lower chambers resetting electrically after each beat. Changes in its height or direction can occur with reduced blood flow, abnormal body salts, heart strain, or other conditions.

T-Wave Alternans

T-wave alternans is a beat-to-beat change in the size or shape of the heart's T wave and may indicate increased risk of dangerous ventricular rhythms.

Twin

A twin is one of two offspring from the same pregnancy, either identical from one fertilized egg or fraternal from two eggs and two sperm.

Twin Placenta

The number and arrangement of placentas and the sacs surrounding twins. Knowing whether twins share a placenta or a sac helps estimate risks and determines how closely the pregnancy is monitored.

Twin Pregnancy

A pregnancy involving two fetuses. Clinical risk depends on chorionicity and amnionicity, with increased risks including preterm birth, fetal growth problems, and hypertensive disorders.

Twins

Two offspring from the same pregnancy, either monozygotic or dizygotic.

Twin-To-Twin Transfusion Syndrome

A serious complication of an identical-twin preg-

nancy in which shared placental blood vessels send too much blood to one twin and too little to the other. It requires urgent specialist monitoring and treatment.

Twin-Twin Transfusion Syndrome

A complication of an identical-twin pregnancy sharing one placenta, in which blood flows unevenly between the twins. One twin may receive too little blood and fluid, while the other receives too much; both need urgent specialist monitoring and treatment.

Twitch

A brief involuntary muscle contraction or movement, which may be benign, medication-related, stress-related, or a sign of nerve, muscle, or brain disease.

Twitching

Repeated involuntary muscle contractions or fasciculations, commonly caused by fatigue, stimulants, electrolyte disturbance, nerve irritation, medicines, or neurologic disease.

Tympanic

Tympanic means relating to the eardrum or middle ear, or resembling a drum in shape or sound.

Tympanic Bulla

The tympanic bulla is a hollow or expanded bony chamber surrounding the middle ear, especially prominent in many mammals.

Tympanic Cavity

The air-filled chamber of the middle ear. It contains the eardrum and three tiny bones that transmit sound vibrations toward the inner ear, while a passage to the throat helps equalize air pressure.

Tympanic Hyperectasis

Abnormal bulging or stretching of the eardrum, usually related to long-lasting pressure changes in the middle ear. It may cause blocked-ear sensations or reduced hearing and requires assessment for the underlying cause.

Tympanic Membrane

The thin eardrum separating the outer ear canal from the middle ear. Sound makes it vibrate, and those vibrations move the middle-ear bones; infection, injury, or pressure can tear it.

Tympanic Membrane Perforation

A tear or hole in the eardrum caused by infection, trauma, pressure changes, or instrumentation, potentially producing pain, drainage, or conductive hearing loss.

Tympanites

Abdominal distension caused by excessive gas in the stomach or intestines, producing a drum-like sound on percussion and sometimes pain, belching, or altered bowel movements.

Tympanometer

An instrument that changes pressure in the ear canal and measures movement of the tympanic membrane and middle-ear system. It is used to perform tympanometry.

Tympanometry

An objective test that varies air pressure in the ear canal while measuring movement of the tympanic membrane and middle-ear pressure. It helps assess middle-ear fluid, eustachian-tube dysfunction, perforation, and ossicular or tympanic-membrane abnormalities.

Tympanoplasty

Surgical repair or reconstruction of the tympanic membrane and, when necessary, the middle-ear ossicles to close a perforation or improve hearing.

Tympanosclerosis

Scarring and calcification of the tympanic membrane or middle-ear lining, often following recurrent infection or previous inflammation. It may be asymptomatic or cause conductive hearing loss when the ossicles are affected.

Alternate Names:

Myringosclerosis; Tympanic Membrane Calcifica-

tion

Tympanostomy Tube Insertion

The most commonly performed pediatric surgical procedure worldwide, in which a tiny cylindrical ventilation tube (grommet) is placed across the tympanic membrane (eardrum). An ear, nose, and throat (ENT) specialist makes a microscopic incision in the eardrum (myringotomy), suctions out accumulated thick, sticky fluid from the middle ear cavity, and positions the tiny tube across the incision. The tube acts as an artificial pressure-equalizing valve, providing continuous airflow ventilation to the middle ear and allowing trapped fluid to drain freely, effectively compensating for an immature or malfunctioning Eustachian tube. It is primarily indicated for persistent middle ear fluid (otitis media with effusion or “glue ear”) causing conductive hearing impairment and speech delays, or for frequent recurrent acute ear infections. Tubes typically stay in place for 6 to 18 months before naturally extruding on their own as the eardrum heals.

Alternate Names:

Ear Tube Insertion; Grommet Insertion; Myringotomy with Tube Insertion; Tympanostomy

Tympanostomy Tubes

Small tubes placed through the eardrum to let air into the middle ear and help fluid drain. They may be recommended for repeated ear infections or persistent fluid causing hearing problems; drainage, blockage, scarring, or early tube loss can occur.

Tympanum

The middle-ear cavity or, in some contexts, the tympanic membrane.

Tympany

Tympany is a drumlike sound on percussion, often produced by gas in a hollow organ such as the stomach or intestine.

Tyndall Effect

The optical scattering of light by suspended inflammatory cells and proteinaceous exudate (‘aqueous

flare') in the anterior chamber of the eye viewed with a narrow slit-lamp biomicroscope beam against a dark background, serving as a cardinal physical sign of active anterior uveitis (iritis / iridocyclitis).

Alternate Names:

Aqueous Flare; Anterior Chamber Tyndall Phenomenon

Type 1 Diabetes

A long-term disease in which the immune system destroys the pancreas cells that make insulin. Without insulin treatment, blood sugar rises dangerously and can lead to diabetic ketoacidosis.

Alternate Names:

T1D; Insulin-Dependent Diabetes Mellitus; IDDM

Type 1 Diabetes In Children

Type 1 diabetes diagnosed during childhood, causing high blood sugar and requiring insulin, monitoring, nutrition planning, and education.

Type 1 Diabetes Mellitus

Type 1 diabetes is an autoimmune disease in which the immune system attacks and destroys the insulin-producing beta cells of the pancreas, resulting in absolute insulin deficiency.

Type 2 Diabetes

A long-term disease in which the body does not use insulin effectively and gradually makes less of it. High blood sugar can damage the eyes, kidneys, nerves, heart, and blood vessels.

Alternate Names:

T2D; Non-Insulin-Dependent Diabetes Mellitus; NIDDM

Type 2 Diabetes In Children

Type 2 diabetes beginning during childhood or adolescence, often involving insulin resistance and requiring lifestyle and medical management.

Type 2 Diabetes Meal Planning

Nutritional guidance focusing on consistent carbohydrate intake, portion control, dietary fiber, lean proteins, and healthy fats to maintain target blood

glucose and body weight.

Alternate Names:

Diabetic Meal Planning; Nutritional Therapy for Type 2 Diabetes; Diabetic Diet Plan

Type 2 Diabetes Medications

Alternate name; see *Oral Antidiabetic Agents*.

Type 2 Diabetes Mellitus

Type 2 diabetes is a chronic metabolic disorder characterized by insulin resistance and progressive pancreatic beta-cell dysfunction, leading to hyperglycemia.

Type 3B Diabetes

Type 3b diabetes is a form of diabetes caused by disease or removal of the pancreas, which can impair both insulin and digestive-enzyme production.

Type Ia Glycogen Storage Disease

Von Gierke disease, caused by glucose-6-phosphatase deficiency. It typically causes severe fasting hypoglycemia, lactic acidosis, hyperlipidemia, hyperuricemia, hepatomegaly, and impaired growth.

Type Ib Glycogen Storage Disease

A glycogen-storage disorder caused by impaired glucose-6-phosphate transport in the endoplasmic reticulum. It can cause fasting hypoglycemia, lactic acidosis, hepatomegaly, neutropenia, recurrent infections, and inflammatory bowel disease.

Type I Hypersensitivity

A rapid allergic reaction in which the immune system releases substances such as histamine after exposure to an allergen. It can cause hay fever, asthma symptoms, hives, food allergy, or life-threatening anaphylaxis.

Type II Hypersensitivity

An immune reaction in which antibodies attach to a person's cells or tissues and cause injury or destruction. It contributes to some blood-cell disorders, medicine reactions, and autoimmune diseases.

Type III GSD (Forbes-Cori)

An inherited glycogen-storage disorder caused by debranching-enzyme deficiency. It can cause fasting hypoglycemia, hepatomegaly, muscle weakness, elevated liver enzymes, and sometimes cardiomyopathy, with severity varying by subtype.

Type III Hypersensitivity

An immune reaction in which clusters of antibodies and foreign or abnormal proteins settle in tissues and trigger inflammation. It can damage the skin, joints, blood vessels, kidneys, or other organs.

Type III Hypersensitivity Reaction

Tissue injury caused when antigen-antibody clusters deposit in tissues and activate inflammation. This reaction can damage blood vessels, joints, kidneys, skin, or other organs, as in serum sickness or lupus.

Type II Muscle Fiber

A fast-contracting muscle fiber that can produce high force quickly but usually tires sooner than a type I fiber.

Type I Muscle Fiber

A slow-contracting muscle fiber that uses oxygen efficiently and can keep working for a long time. It is important for posture and endurance.

Type IV GSD (Andersen)

An inherited disorder caused by branching-enzyme deficiency, leading to abnormal glycogen accumulation. Progressive liver disease, cirrhosis, growth problems, muscle disease, or neuromuscular involvement may occur.

Type IV Hypersensitivity

A delayed immune reaction driven mainly by T cells rather than antibodies. It usually develops hours to days after exposure and can cause contact dermatitis, some medicine reactions, or inflammation in an organ.

Types Of Ileostomy

Types of ileostomy include end, loop, and continent

procedures, which divert stool through an opening in the abdominal wall when the colon or rectum cannot be used normally.

Type V Glycogen Storage Disease

An inherited muscle disorder, also called McArdle disease, in which muscle cells cannot properly break down glycogen for energy. Exercise can cause muscle pain, cramps, and sometimes dark urine from muscle injury.

Type VI Glycogen Storage Disease

Hers disease, caused by hepatic glycogen-phosphorylase deficiency. It usually causes mild fasting hypoglycemia, hepatomegaly, growth delay, and elevated liver enzymes, with symptoms often improving with age.

Type VII Glycogen Storage Disease

Tarui disease, caused by phosphofructokinase deficiency in muscle and red blood cells. Exercise intolerance, muscle cramps, rhabdomyolysis, and hemolytic anemia may occur, sometimes with a second-wind phenomenon.

Typhlitis

A serious infection and inflammation of the first part of the large intestine, usually in someone with very low white-cell counts after cancer treatment. It can cause right-sided abdominal pain, fever, diarrhea, and bowel damage and needs urgent care.

Alternate Names:

Neutropenic Enterocolitis; Ileocecal Syndrome; Cecitis

Typhoid

Alternate name; see *Typhoid Fever*.

Typhoid Fever

A severe systemic bacterial infection caused by *Salmonella* Typhi, transmitted through contaminated food or water. It causes a gradually rising step-ladder fever, headache, stomach pain, constipation or “pea-soup” diarrhea, a relatively slow heart rate, and faint pink spots on the abdomen (rose spots). Untreated infection can lead to ulcera-

tion of the small intestine with severe bleeding or bowel perforation in the third week. Diagnosis is made by blood or bone marrow culture, and treatment requires targeted antibiotics like ceftriaxone or azithromycin.

Alternate Names:

Enteric Fever; Salmonella Typhi Infection; Typhoid

Typhus

A group of bacterial infections spread mainly by lice, fleas, or mites. They can cause fever, headache, rash, and serious illness affecting several organs; the type and treatment depend on the bacteria and insect involved.

Typhus Fever

A group of bacterial infections spread by lice, fleas, or mites. They commonly cause sudden fever, severe headache, weakness, and sometimes rash or organ injury; the exact illness determines testing and antibiotic treatment.

Typical Antipsychotics

Older antipsychotic medicines used for conditions such as psychosis, mania, or severe agitation. They can reduce hallucinations and delusions but may cause stiffness, tremor, involuntary movements, sleepiness, or other serious effects.

Tyramine

A naturally occurring amine found in some aged or fermented foods. In people taking monoamine oxidase inhibitors, excessive tyramine can cause a dangerous rise in blood pressure.

Tyrosine

An amino acid used to build proteins and make thyroid hormones, melanin, and adrenaline-like chemicals. The body usually makes enough from phenylalanine, but inherited metabolic disorders can disrupt this pathway.

Alternate Names:

L-Tyrosine; 4-Hydroxyphenylalanine; Tyr

Tyrosine Kinase Inhibitors

A major class of targeted antineoplastic pharmacological agents that competitively inhibit the adenosine triphosphate-binding catalytic pocket of tyrosine kinase enzymes, blocking downstream oncogenic proliferative signaling cascades (e.g., imatinib for BCR-ABL, osimertinib for EGFR).

Alternate Names:

TKIs

Tyrosinemia

An inherited disorder in which the body cannot break down the amino acid tyrosine normally. Harmful substances can build up and damage the liver, kidneys, nerves, or eyes; severity depends on the type and treatment.

Tzanck Smear

A microscope test of cells scraped from a blister or sore. It may suggest a herpes infection or pemphigus, but it cannot reliably identify the cause and is often replaced by more specific laboratory tests.

Tachycardia, Supraventricular

Alternate name; see *Supraventricular Tachycardia*.

Tardive Oral Dyskinesia

Involuntary repetitive movements of the mouth, tongue, jaw, or face that develop after prolonged exposure to dopamine-blocking medicines. It may persist after the medicine is stopped and needs medication review and specialist assessment.

Tarsal Cyst

A fluid-filled or other cystic lesion in the ankle or foot region, which may cause a lump, pain, pressure, or nerve symptoms. Examination and imaging determine whether it is a ganglion, synovial cyst, or another lesion.

TB (Tuberculosis)

Alternate name; see *Tuberculosis*.

TBM

Abbreviation; see *Tuberculous Meningitis*.

TCOF1

A gene in which disease-causing variants can produce Treacher Collins syndrome, a craniofacial developmental disorder. Genetic counseling and assessment of breathing, hearing, vision, feeding, and speech may be needed.

TCS

Abbreviation; see *Treacher Collins Syndrome*.

TENS

Abbreviation; see *Transcutaneous Electrical Nerve Stimulation*.

TMJ Disorder

Alternate name; see *Temporomandibular Joint Disorder*.

Tongue, Fissured

A tongue with grooves or cracks on its surface. It is usually harmless, but food and debris can collect in the fissures and cause irritation or odor; painful, changing, or associated lesions need assessment.

Tongue, Geographic

A benign inflammatory condition producing smooth red patches with pale or white borders on the tongue. The patches move or change over time and may sting with spicy or acidic foods.

Tongue, Hairy

A usually temporary overgrowth and discoloration of the tongue's surface projections, making it look coated or hairy. It may be linked to smoking, antibiotics, poor oral hygiene, dry mouth, or other factors and often improves with gentle cleaning and cause management.

Tonic Pupil Syndrome

A pupil that is enlarged or irregular and reacts poorly to light but constricts slowly with near focus, usually because of damage to postganglionic parasympathetic nerves. New pupil asymmetry, headache, drooping eyelid, or neurologic symptoms requires urgent assessment.

TORCH Syndrome

A group of congenital infections caused by Toxoplasma, Other infections, Rubella, Cytomegalovirus, and Herpes simplex, which may cause growth restriction, rash, jaundice, eye disease, hearing loss, brain abnormalities, or other newborn problems.

Torn Rotator Cuff

A partial or complete tear of one or more rotator-cuff tendons, causing shoulder pain, weakness, night symptoms, or difficulty lifting or rotating the arm.

Transient Acantholytic Dermatitis

A recurrent itchy papular rash caused by temporary loss of cohesion between skin cells. It often affects the trunk of older adults and may be triggered by heat, sweating, sunlight, medicines, or illness; it is also called transient acantholytic dermatosis or Grover disease.

Transient Ischemic Attack (TIA)

Alternate name; see *Transient Ischemic Attack*.

Transthyretin Familial Amyloid Polyneuropathy

An inherited transthyretin amyloidosis in which abnormal protein deposits damage peripheral and autonomic nerves. It may cause progressive numbness, pain, weakness, blood-pressure or heart-rate changes, gastrointestinal symptoms, and sometimes heart disease.

Transthyretin Methionine-30 Amyloidosis (Type I)

A hereditary transthyretin amyloidosis caused by a methionine-at-position-30 transthyretin variant, classically producing progressive peripheral and autonomic neuropathy with variable cardiac, kidney, or eye involvement.

Traumatic Brain Injury (Concussion)

A head injury that disrupts brain function temporarily or permanently. Concussion is a mild traumatic brain injury and may cause headache, dizziness, confusion, memory problems, or sensitivity to light; worsening headache, repeated vomiting,

seizure, weakness, or reduced alertness is an emergency.

Traveler's Diarrhea

Diarrhea during or shortly after travel, usually caused by contaminated food or water and commonly by bacteria, viruses, or parasites. Oral rehydration is important; blood, high fever, severe dehydration, or persistent symptoms require medical evaluation.

Treacher Collins-Franceschetti Syndrome 1

A craniofacial developmental disorder, usually caused by a variant affecting TCOF1, that may cause underdeveloped cheekbones and jaw, malformed ears, hearing loss, cleft palate, and airway or feeding problems.

Tremor, Familial

A tremor occurring in more than one family member, often reflecting inherited essential tremor or another genetic movement disorder. The pattern, age of onset, medicines, and associated neurologic findings guide diagnosis.

Tremor, Familial Essential

Alternate name; see *Essential Tremor*.

Tremor, Hereditary Benign

Alternate name; see *Essential Tremor*.

Trisomy 13 Syndrome

Alternate name; see *Patau Syndrome*.

Trisomy 18 Syndrome

Alternate name; see *Edwards Syndrome*.

Tuberose Sclerosis

Historical or variant name for tuberous sclerosis complex, a genetic disorder causing benign tumors in multiple organs, including the brain, skin, kidneys, heart, lungs, or eyes.

Tuberous Sclerosis-1

A form of tuberous sclerosis complex associated with pathogenic variants in the *TSC1* gene. Features may include seizures, developmental or behavioral differences, skin findings, and benign tumors in several organs.

Turner-Varny Syndrome

Alternate name; see *Turner Syndrome*.

Twin Twin Transfusion Syndrome

Alternate name; see *Twin-to-Twin Transfusion Syndrome*.

Temporary Blindness

A transient loss of vision in one or both eyes. It can result from retinal or brain ischemia, migraine, seizures, changes in blood pressure, eye disease, or other causes; sudden new loss of vision requires emergency assessment.

U

UA (Urinalysis)

UA commonly means urinalysis, laboratory examination of urine for blood, protein, cells, glucose, infection, and other findings.

Ubiquitin-Proteasome System

The primary non-lysosomal intracellular protein degradation pathway in eukaryotic cells, in which damaged, misfolded, or regulatory proteins are tagged with polyubiquitin chains by ubiquitin ligases (E1, E2, E3) and subsequently recognized and degraded by the 26S proteasome complex.

Alternate Names:

UPS; Ubiquitination Degradation Pathway

UBT (Urea Breath Test)

UBT commonly means urea breath test, which detects active *Helicobacter pylori* infection by measuring labeled carbon dioxide after ingested urea.

UDP-Glucuronosyltransferase

A group of enzymes, found mainly in the liver, that helps the body process and remove bilirubin, medicines, hormones, and other substances. Inherited differences in these enzymes can cause some types of jaundice or change how medicines work.

UDP-Glucuronosyltransferase Deficiency

Reduced activity of a liver enzyme that prepares bilirubin for removal from the body. Inherited deficiency can cause intermittent mild jaundice or, in severe forms, dangerous bilirubin buildup.

Uhl Anomaly

A rare heart defect present from birth in which

much of the muscle of the right lower chamber is missing. The chamber may pump poorly, causing blue coloring, abnormal rhythms, or heart failure in infancy or childhood.

Uhthoff Phenomenon

A transient, reversible worsening of pre-existing neurological symptoms or visual blurring occurring in patients with multiple sclerosis when body temperature is elevated by physical exercise, hot baths, or fever, resulting from heat-induced conduction block in chronically demyelinated axons.

Alternate Names:

Uhthoff Sign

Ulcer

A crater-like open sore caused by loss of the surface layers of skin or a mucous membrane, sometimes extending into deeper tissue. Causes include poor blood flow, pressure, infection, nerve damage, inflammation, injury, and cancer; the appearance and cause determine treatment.

Ulceration

The formation of an open sore caused by loss of surface tissue, usually involving skin or a mucous membrane and sometimes extending into deeper tissue.

Ulcerative Colitis

A long-term disease causing inflammation and open sores in the inner lining of the rectum and colon. It usually starts in the rectum and spreads continuously through part of the colon. It may cause repeated diarrhea, blood or mucus in the stool, ur-

gent bowel movements, abdominal cramps, tiredness, weight loss, or a feeling that the bowel has not emptied. Symptoms often flare and then improve. Severe disease may cause heavy bleeding, anemia, dehydration, or a hole in the bowel; long-standing extensive disease increases the risk of colorectal cancer.

Alternate Names:

UC; Idiopathic Proctocolitis

Ulcerative Colitis Pathology

Chronic, usually continuous mucosal inflammation beginning in the rectum and extending proximally. Findings include crypt architectural distortion, cryptitis, crypt abscesses, mucosal ulceration, and inflammatory polyps in active or longstanding disease.

Ulcerative Keratitis

An ulcerative infection or inflammatory defect of the cornea that can cause pain, redness, photophobia, and impaired vision and may threaten sight if untreated.

Ulcerative Proctitis

Inflammation and ulceration limited to the lining of the rectum, often causing rectal bleeding, urgency, tenesmus, mucus, and diarrhea.

Ulcer Healing Drugs

Medicines used to promote healing of gastrointestinal ulcers, usually by suppressing acid secretion or protecting the mucosa; treatment also addresses causes such as *H. pylori* infection or NSAID use.

Ulcers

Plural of ulcer; see *Ulcer*.

Ulerythema

A group of follicular keratinization disorders causing rough plugged follicles, redness, and sometimes atrophic scarring, most often on the cheeks, eyebrows, or upper arms. The term may refer to variants such as ulerythema ophryogenes and requires clinical distinction from eczema or acne.

Ullrich Congenital Muscular Dystrophy

An inherited muscle disease caused by problems with collagen VI, a protein that supports muscle and connective tissue. It begins in infancy with weakness, low muscle tone, tight joints near the body, unusually loose joints in the hands and feet, and later breathing problems.

Alternate Names:

UCMD; Ullrich Scleroatonic Muscular Dystrophy

Ulna

The forearm bone on the side of the little finger. Its upper end forms most of the hinge of the elbow, and its lower end helps form the wrist. Together with the radius, it supports rotation of the forearm and movement of the hand.

Ulnar

Relating to the ulna or to the side of the forearm and hand nearest the little finger. Pressure on the ulnar nerve in this area can cause tingling or numbness in the little and ring fingers.

Ulnar Artery

A major artery running along the little-finger side of the forearm and into the hand. It supplies blood to the forearm and hand and helps form the hand's arterial arches.

Ulnar Claw Hand

A distinctive resting hand deformity (Duchenne claw hand) resulting from a distal ulnar nerve injury at the wrist, characterized by hyperextension of the metacarpophalangeal (MCP) joints and hyperflexion of the proximal and distal interphalangeal (PIP/DIP) joints of the fourth and fifth digits due to loss of the medial lumbricals and interossei.

Alternate Names:

Duchenne Claw Hand; Main en Griffes

Ulnar Collateral Ligament

A thick triangular ligament on the medial side of the elbow joint (consisting of anterior, posterior, and transverse bands) that stabilizes against valgus stress, commonly torn in overhead throwing athletes ('Tommy John' injury).

Alternate Names:

UCL of the Elbow; Medial Collateral Ligament of Elbow

Ulnar Deviation

A characteristic musculoskeletal deformity of the hand in advanced chronic rheumatoid arthritis, characterized by the abnormal lateral (ulnar-directed) subluxation and drifting of the fingers at the metacarpophalangeal joints resulting from extensor tendon stretching and volar plate destruction.

Alternate Names:

Ulnar Drift

Ulnar Drift

A classic progressive hand deformity seen in chronic rheumatoid arthritis characterized by abnormal ulnar deviation of the second through fifth fingers at the metacarpophalangeal (MCP) joints, resulting from chronic synovitis, stretching of collateral ligaments, and extensor tendon subluxation.

Alternate Names:

Ulnar Deviation of Digits; Rheumatoid Ulnar Drift

Ulnar Hypoplasia

Underdevelopment or partial absence of the ulna, the forearm bone on the little-finger side. Present from birth in most cases, it may shorten or bend the forearm, limit elbow or wrist movement, and occur with finger or other body differences.

Ulnar Nerve

A nerve running from the neck through the inner arm and behind the elbow to the hand. It controls some hand and forearm muscles and carries feeling from the little finger and part of the ring finger.

Ulnar Nerve Dysfunction

Impairment of the ulnar nerve, commonly caused by compression at the elbow (cubital tunnel) or wrist (Guyon canal). Symptoms include numbness or tingling in the little and ring fingers, weakened grip, and hand-muscle wasting; severe lesions may produce an ulnar claw.

Ulnar Nerve Entrapment

Compression or irritation of the ulnar nerve, commonly at the elbow or wrist, causing numbness or tingling in the ring and little fingers and sometimes weakness of the hand.

Ulnar Neuropathy

A peripheral compression neuropathy of the ulnar nerve occurring most commonly at the elbow within the cubital tunnel (cubital tunnel syndrome) or at the wrist within Guyon canal, presenting with numbness and paresthesias in the fifth and medial half of the fourth digit, intrinsic hand weakness, and diminished grip strength.

Alternate Names:

Ulnar Nerve Entrapment; Cubital Tunnel Neuropathy

Ulnar Neuropathy at Guyon Canal

Entrapment or compressive neuropathy of the ulnar nerve as it traverses the fibro-osseous canal (pisohamate tunnel) at the wrist between the pisiform and the hook of the hamate. Subdivided into zone I (proximal trunk lesion with combined motor and sensory deficits), zone II (deep motor branch lesion with pure motor clawing and intrinsic muscle weakness sparing hypothenar sensation), and zone III (superficial sensory branch lesion with pure sensory paresthesias of the fifth and medial fourth digits).

Alternate Names:

Guyon Canal Syndrome; Handlebar Palsy

Ulnar Paradox

The apparently unexpected finding that damage to the ulnar nerve at the wrist can cause more clawing of the fingers than damage higher in the arm. The difference occurs because some finger-bending muscles remain active after a wrist injury.

Ulnar-Sided Wrist Pain

Alternate name; see *Ulnar wrist pain*.

Ulnar Tunnel Syndrome

An entrapment neuropathy of the ulnar nerve as it passes through Guyon canal (the ulnar tunnel at the wrist between the pisiform bone and hook

of the hamate), causing sensory loss in the medial ring and little fingers and motor weakness of the hypothenar and intrinsic hand muscles.

Alternate Names:

Guyon Canal Syndrome; Handlebar Palsy

Ulnar Vein

Veins on the little-finger side of the forearm that carry blood away from the forearm and hand. They join other deep veins near the elbow to continue toward the heart.

Ulnar Wrist Pain

Pain on the side of the wrist nearest the little finger, often involving the ulna or nearby tendons and ligaments.

Alternate Names:

Ulnar-Sided Wrist Pain

Ultrafiltration

A process in which pressure pushes water and small dissolved substances through a very fine filter while larger particles remain behind. The kidneys use it to begin forming urine, and dialysis uses it to remove excess fluid.

Ultra-processed food

Ultra-processed food is an industrially formulated product made mostly from refined ingredients and additives, often with little intact whole food. Frequent high intake is associated with poorer health outcomes, although effects vary by the food and overall diet.

Ultrasonic Therapy

Treatment using high-frequency sound energy to heat, move, break up, or otherwise affect tissue. It is used in selected physical-therapy procedures and some operations; benefits and risks depend on the device, body site, and condition.

Ultrasonography

A scan using high-frequency sound waves to create images of organs, tissues, vessels, or a fetus without radiation.

Ultrasound

An imaging test that uses high-frequency sound waves to show organs, blood vessels, tissues, or a developing fetus without ionizing radiation. Different examinations can assess the abdomen, pelvis, kidneys, thyroid, heart, blood flow, or testicles.

Ultrasound Biomicroscopy

Very high-frequency ultrasound that creates detailed images of the front part of the eye, including the cornea, iris, lens, and drainage angle when an ordinary eye examination is not enough.

Ultrasound Contrast

Tiny gas-filled bubbles given into a vein to improve ultrasound images of blood flow and selected organs. They are usually cleared through the lungs but can rarely cause allergic or cardiopulmonary reactions.

Ultrasound-Guided Biopsy

An image-guided interventional procedure in which real-time ultrasonography is utilized to continuously visualize and steer a biopsy needle (core needle or fine-needle aspiration) into a target lesion or mass (such as in the thyroid, breast, liver, or lymph nodes) for histological diagnosis.

Ultrasound-Guided Breast Biopsy

A percutaneous core-needle or vacuum-assisted tissue sampling procedure performed under continuous real-time sonographic guidance to biopsy solid masses, architectural abnormalities, or complex cystic breast lesions.

Alternate Names:

Ultrasound-Guided Breast Biopsy; Sonographically Guided Core Biopsy; Ultrasound Breast Biopsy

Ultrasound Therapy

Use of sound waves at therapeutic intensity to heat or mechanically affect tissue. It is used in selected rehabilitation settings, but evidence and suitability vary by condition and it is not appropriate over every body area.

Ultrasound Transducer

The probe placed against the skin or inside a body opening during an ultrasound scan. It sends and receives sound waves to create images or guide a procedure; different probes are used for different body areas.

Ultraviolet Rays

Invisible electromagnetic radiation with wavelengths shorter than visible violet light. Excess exposure can cause sunburn, photoaging, eye injury, and skin cancers; controlled ultraviolet exposure has selected therapeutic uses.

Ultraviolet Therapy

Controlled exposure to ultraviolet light used for selected skin disorders such as psoriasis, eczema, and vitiligo; treatment requires eye and skin protection and monitoring for burns and long-term skin cancer risk.

Umbilical

Relating to the umbilicus or navel, including structures, lesions, discharge, or abnormalities located at or connected with it.

Umbilical Artery Catheter

A specialized vascular catheter inserted into one of the two umbilical arteries in critically ill neonates, advancing into the descending thoracic aorta (high placement, T6-T8) or infrarenal abdominal aorta (low placement, L3-L5) for continuous arterial blood pressure monitoring and arterial blood gas sampling.

Alternate Names:

UAC

Umbilical Artery Doppler

An ultrasound measurement of blood flow through the umbilical cord. It helps assess how well the placenta is supplying the fetus, especially when fetal growth is reduced or pregnancy complications affect placental function.

Umbilical Catheters

Umbilical catheters provide vascular access through

a newborn's umbilical vessels for fluids, medicines, monitoring, or blood sampling while complications are monitored.

Umbilical Cord

The connection between a fetus and the placenta. It contains blood vessels that carry oxygen, nutrients, and waste between them and is protected by a soft, cushioning tissue.

Umbilical Cord Blood Gas

A test of blood taken from the umbilical cord after birth to assess the baby's oxygen supply and acid-base balance around delivery. Arterial and venous results provide different information and must be interpreted with the baby's condition, gestational age, and delivery circumstances.

Umbilical Cord Complications

Problems involving the umbilical cord, including prolapse, compression, knots, abnormal insertion, short or long cord, and vascular abnormalities. They may reduce fetal oxygenation or complicate delivery and require fetal monitoring and obstetric management.

Umbilical Cord Prolapse

The umbilical cord slips through the cervix ahead of or alongside the baby, usually after the waters break. The cord can be squeezed and reduce the baby's oxygen supply, making this an obstetric emergency.

Umbilical Granuloma

A small moist pink or red lump of healing tissue at a baby's navel after the cord falls off. It may ooze clear fluid but should not cause spreading redness, fever, or marked tenderness; a clinician can treat it and exclude infection or another abnormal connection.

Alternate Names:

Granuloma Umbilicale; Neonatal Umbilical Granuloma

Umbilical Hernia

A soft bulge caused when tissue pushes through the opening at the navel. Many infant hernias close as the child grows, while adult hernias may enlarge or become trapped and painful and sometimes need

surgery.

Umbilical Region

The central part of the abdomen around the navel. Pain, swelling, a hernia, or a lump in this area may arise from the bowel, abdominal wall, blood vessels, or other organs and is assessed with examination and, when needed, imaging.

Umbilical Vein

The umbilical vein carries oxygen- and nutrient-rich blood from the placenta to the fetus during pregnancy.

Umbilication

Formation of a central hollow or navel-like depression in a skin lesion or other body structure. It can occur in some infections, inflammatory lesions, tumors, or normal anatomical features and must be interpreted with the lesion's appearance.

Umbilicus

The navel, a scar on the front of the abdomen left after the umbilical cord separates at birth. It may be affected by a hernia, infection, discharge, or other skin changes.

Alternate Names:

Belly Button; Omphalos

Uncal Herniation

A life-threatening subtype of transtentorial herniation in which expanding supratentorial mass effect pushes the medial temporal lobe (uncus) downward over the free edge of the tentorium cerebelli, compressing the ipsilateral oculomotor nerve (CN III, causing fixed dilated 'blown' pupil), the ipsilateral cerebral peduncle (contralateral hemiparesis), and the posterior cerebral artery (occipital infarction).

Alternate Names:

Lateral Transtentorial Herniation; Uncinate Herniation

Uncal Transtentorial Herniation

A life-threatening intracranial herniation syndrome in which an expanding supratentorial mass displaces

the uncus of the medial temporal lobe medially and downward across the tentorial incisura, compressing the ipsilateral oculomotor nerve (cranial nerve III; producing an unreactive dilated pupil) and the ipsilateral cerebral peduncle (producing contralateral hemiparesis).

Unconjugated Hyperbilirubinemia

An elevation of circulating indirect (water-insoluble) bilirubin in blood plasma exceeding physiological limits, resulting from excessive bilirubin overproduction (hemolysis), impaired hepatic uptake (heart failure, portosystemic shunts), or defective glucuronosyltransferase conjugation (Gilbert syndrome, Crigler-Najjar syndrome, neonatal jaundice).

Unconscious

Not awake and not responsive to ordinary external stimuli. Unconsciousness may result from syncope, seizure, trauma, intoxication, metabolic disease, stroke, or other emergencies.

Unconsciousness

Loss of awareness and normal response to surroundings, ranging from brief fainting to prolonged coma. It can result from reduced brain blood flow, injury, seizures, low blood sugar, drugs, or serious illness.

Uncoupling Protein

A family of mitochondrial inner membrane transport proteins (such as UCP1 / thermogenin) that dissipate the proton electrochemical gradient across the inner mitochondrial membrane as heat without ATP synthesis, playing a vital role in non-shivering thermogenesis in brown adipose tissue.

Alternate Names:

Thermogenin; UCP1

Uncover Test

An ophthalmologic test performed following the cover test to detect latent strabismus (phoria). As the occluder is removed from an eye, the examiner observes whether that eye rapidly refixates from a deviated position back to alignment with the target.

Underventilation

Breathing that is too slow or shallow to remove enough carbon dioxide. It may also lower oxygen and can result from sedatives, weak breathing muscles, severe obesity, lung disease, or brain problems.

Underweight

Body weight that is lower than expected for a person's height, age, and build. It may be healthy for some people but can also reflect poor nutrition, illness, or unintentional weight loss and is interpreted with the whole clinical picture.

Undescended Testicle

A testicle that has not moved into the scrotum before birth, also called cryptorchidism. It may descend during early infancy, but a testicle that remains high can have increased risks of infertility, twisting, injury, and cancer.

Alternate Names:

Cryptorchidism; Undescended Testis

Undescended Testicle Repair

An operation that moves a testicle into the scrotum and fixes it there. It is usually performed in childhood to support fertility, allow examination, and reduce risks related to twisting, injury, and cancer.

Undescended Testis

Congenital failure of one or both testes to descend along the normal path into the scrotum. Persistent cases require evaluation because they may affect fertility and increase the risk of torsion, hernia, or testicular cancer.

Alternate Names:

Cryptorchism; Maldescended Testis

Undifferentiated

Not showing the recognizable features of a specialized cell or tissue. An undifferentiated tumor has cells that look very unlike normal tissue, so its origin and behavior may be difficult to determine.

Undifferentiated Arthritis

Inflammatory arthritis with joint symptoms and

signs that do not yet fit one specific named arthritis. The pattern may become clearer over time or remain an undifferentiated condition.

Undifferentiated Cancer

Cancer made of cells that look very unlike normal cells and do not clearly show the tissue where they began. Special laboratory tests and imaging may be needed to identify its type and guide treatment.

Undifferentiated Carcinoma

A high-grade carcinoma whose cells lack recognizable features of a specific tissue or tumor subtype; diagnosis and treatment require pathology, immunostaining, and staging.

Undifferentiated Connective Tissue Disease

An autoimmune connective-tissue disease with symptoms or laboratory findings suggesting systemic inflammation but not enough features for a specific diagnosis such as lupus or systemic sclerosis.

Undifferentiated Connective-Tissue Disease

An autoimmune connective-tissue disorder with symptoms, examination findings, or laboratory abnormalities suggesting systemic autoimmunity but not meeting criteria for a defined disease such as lupus or systemic sclerosis. Features and long-term course vary.

Undifferentiated Pleomorphic Sarcoma

An uncommon, often fast-growing cancer of soft tissue or bone whose cells vary greatly in shape and do not resemble a specific normal tissue. Treatment depends on its site, size, and spread.

Alternate Names:

UPS; Malignant Fibrous Histiocytoma; MFH

Undifferentiated Pleomorphic Sarcoma Of The Breast

A rare high-grade breast sarcoma formerly called malignant fibrous histiocytoma. It is a diagnosis of exclusion after other specific sarcomas and metastatic carcinoma have been ruled out histologically.

Undifferentiated Spondyloarthritis

Inflammatory arthritis with features of the spondyloarthritis group but insufficient or atypical findings for classification as ankylosing spondylitis, psoriatic arthritis, reactive arthritis, enteropathic arthritis, or another defined subtype. Symptoms may involve the spine, sacroiliac joints, peripheral joints, entheses, skin, eyes, or bowel.

Undulant Fever

An infection caused by *Brucella* bacteria, usually acquired from infected animals or unpasteurized dairy products. It can cause repeated or fluctuating fever, sweats, tiredness, joint pain, and serious organ complications.

Unerupted Tooth

A tooth that has not emerged into the oral cavity at the expected time. It may be normally developing, delayed, impacted, or prevented from erupting by obstruction or abnormal position.

Ungual

Relating to a fingernail or toenail. The term may describe a finding beneath, around, or within the nail, such as a bruise, fungal infection, wart, or pigmented lesion.

Unicameral Bone Cyst

A noncancerous, fluid-filled space in a bone, usually in the upper arm or thigh of a child or teenager. It may be found after a weakened bone breaks. An imaging sign called a fallen-leaf sign can support the diagnosis, but it is not specific by itself.

Alternate Names:

Simple Bone Cyst; Solitary Bone Cyst

Unicornuate Uterus

A congenital condition in which only one side of the uterus develops fully, usually with one fallopian tube. Some people have no symptoms, but it can increase risks of infertility, pregnancy outside the uterus, miscarriage, or premature birth and may require specialist pregnancy care.

Unilateral

Affecting, occurring on, or involving one side of the body or one paired organ, such as unilateral weakness or unilateral eye disease.

Unilateral Gynecomastia

Enlargement of breast glandular tissue affecting one breast in a male patient. A new, firm, fixed, painful, or nipple-associated mass can have causes other than gynecomastia.

Unilateral Microphthalmos

A congenital condition in which one eye is abnormally small. It may be associated with other ocular malformations and can cause substantial visual impairment.

Unilateral Spatial Neglect

A common neurobehavioral syndrome following acute brain injury (most frequently a right-sided stroke involving the right inferior parietal lobule or temporoparietal junction) in which the patient fails to attend to, respond to, or orient toward sensory stimuli presented on the contralesional (typically left) hemispace, despite intact primary visual and sensory pathways.

Alternate Names:

Hemispatial Neglect; Left Visual Neglect; Spatial Inattention

Uninodular Goiter

An enlarged thyroid containing one main lump, or nodule. Blood tests and ultrasound help assess thyroid function and the chance of cancer; some nodules need follow-up or a needle sample.

Unintentional Weight Loss

Unintentional weight loss is reduction in body weight without planned dietary or activity change and may result from malignancy, endocrine disease, infection, gastrointestinal disease, medication, or mood disorder.

Uniparental Disomy

A chromosome difference in which both copies of a

chromosome, or part of one, come from the same parent. It can cause disease by disrupting genes that depend on parental origin or by giving a child two copies of a harmful gene variant.

Universal Donor

An individual with blood group O Rh-negative (O-neg), whose red blood cells lack A, B, and Rh(D) surface antigens, making their packed red blood cells safe for emergency transfusion into recipients of any ABO and Rh blood group without immediate hemolytic transfusion reactions.

Alternate Names:

Type O Negative Donor; Universal Erythrocyte Donor

Universal Recipient

An individual with blood group AB Rh-positive (AB-pos), whose plasma lacks anti-A, anti-B, and anti-Rh(D) isohemagglutinins, allowing them to safely receive packed red blood cells of any ABO/Rh blood group.

Alternate Names:

Type AB Positive Recipient; Universal Blood Recipient

Unloader Knee Braces

Specialized orthotic knee braces designed to redistribute mechanical weight and load away from an osteoarthritic or damaged compartment of the knee joint (such as the medial or lateral tibiofemoral compartment) to the healthier compartment, reducing pain and improving mobility.

Alternate Names:

Unloader Knee Bracing; Offloader Braces; Osteoarthritis Knee Brace

Unopposed Estrogen

Estrogen treatment given without a progestogen to someone with a uterus. Long-term use can overstimulate the uterine lining and increase cancer risk, so protection is usually recommended when appropriate.

Unresectable

Describing a tumor or lesion that cannot be com-

pletely removed safely by surgery because of its location, extent, invasion of vital structures, or the patient's operative risk.

Unresponsive Coma

A state of profound unconsciousness in which a person cannot be awakened or follow commands. Causes include brain injury, stroke, seizures, poisoning, infection, and metabolic failure. It is a medical emergency.

Unsaturated Fat

A dietary fat whose fatty-acid chains contain one or more carbon-carbon double bonds. Monounsaturated and polyunsaturated fats are common in vegetable oils, nuts, seeds, and fish; replacing saturated fat with unsaturated fat generally supports healthier LDL cholesterol levels.

Unstable Angina

Chest pain caused by reduced blood flow to the heart that is new, worsening, lasts longer, or occurs at rest, without clear evidence of heart-muscle death. It is an emergency warning of possible heart attack.

Unsteadiness

Impaired balance or gait stability, which may result from vestibular disease, neurologic disorders, weakness, medication effects, visual impairment, or musculoskeletal problems.

Untidy Wound

An irregular or contaminated wound with crushing, devitalized tissue, tissue loss, foreign material, or associated injury to vessels, nerves, tendons, or bone. It has increased infection risk and may require exploration, irrigation, debridement, and delayed or staged closure.

Upper Airway Biopsy

Removal of tissue from the nasal cavity, pharynx, larynx, or related upper airway for microscopic evaluation of suspected infection, inflammation, infiltrative disease, or tumor.

Upper Airway Cough Syndrome

A common clinical etiology of chronic cough provoked by post-nasal drip and mechanical or chemical stimulation of upper airway sensory cough receptors, secondary to allergic rhinitis, non-allergic rhinitis, or chronic rhinosinusitis.

Alternate Names:

UACS; Post-Nasal Drip Syndrome

Upper Airway Obstruction

Narrowing or blockage of the breathing passage in the nose, throat, or voice box. It can cause noisy breathing, breathlessness, voice changes, or blue lips and can become life-threatening when severe or rapidly worsening.

Upper Airway Resistance Syndrome

Repeated extra effort to breathe through a partly narrowed upper airway during sleep. It can cause brief repeated awakenings, unrefreshing sleep, morning headache, and daytime sleepiness even without clearly positive standard sleep-apnea testing.

Alternate Names:

UARS

Upper Arm

The portion of the upper limb between the shoulder and elbow, containing the humerus and muscles, nerves, and vessels that serve the arm.

Upper Endoscopy

A flexible camera examination of the food pipe, stomach, and first part of the small intestine. It can identify inflammation, ulcers, bleeding, narrowing, or tumors and can allow tissue samples or treatment.

Upper Esophageal Sphincter

A ring of muscle at the top of the esophagus that opens during swallowing and coordinates food passage.

Alternate Names:

UES

Upper Extremity

The anatomic region extending from the shoulder

through the arm, forearm, wrist, and hand. Disorders may involve its bones, joints, muscles, nerves, vessels, or skin.

Upper Extremity Deep Vein Thrombosis

A thrombosis occurring in the deep venous system of the arm or thoracic inlet (axillary, subclavian, or brachiocephalic veins), categorized as primary (effort-induced venous thrombosis or Paget-Schroetter syndrome) or secondary (most commonly related to indwelling central venous catheters or pacemaker leads).

Alternate Names:

UEDVT

Upper Extremity Venous Doppler

An ultrasound examination of the arm and related veins that assesses compressibility and blood flow, commonly to evaluate suspected venous thrombosis.

Upper Gastrointestinal Bleeding

Bleeding from the esophagus, stomach, or first part of the small intestine. It may cause vomiting of red or coffee-ground blood, black stools, dizziness, weakness, or fainting. Common causes include ulcers, inflammation, tears, and enlarged veins; significant bleeding can be life-threatening.

Upper GI And Small Bowel Series

A fluoroscopic x-ray examination in which swallowed contrast outlines the esophagus, stomach, duodenum, and small intestine to evaluate structure and transit.

Upper GI Series

An X-ray examination of the food pipe, stomach, and first part of the small intestine after swallowing contrast material. It can show narrowing, blockage, ulcers, abnormal movement, or other structural problems.

Upper Leg

The portion of the lower limb between the hip and knee, containing the femur and the thigh muscles, nerves, and blood vessels.

Upper Limb Disorders

Conditions affecting the shoulder, arm, elbow, forearm, wrist, or hand, including musculoskeletal, nerve, vascular, and work-related disorders.

Upper Motor Neuron

A nerve cell in the brain or spinal cord that controls nerve cells supplying muscles. Damage to these pathways can cause weakness, stiffness, exaggerated reflexes, or difficulty controlling movement.

Upper Motor Neuron Lesion

Damage or interruption of the corticospinal (pyramidal) or corticobulbar motor pathways within the cerebral cortex, internal capsule, brainstem, or spinal cord, characterized clinically by muscle spasticity ('clasp-knife' hypertonia), hyperreflexia, clonus, extensor plantar response (positive Babinski sign), and pronator drift without significant muscle atrophy.

Alternate Names:

Pyramidal Tract Lesion; UMN Syndrome

Upper Motor Neuron Syndrome

A group of findings caused by damage to movement pathways in the brain or spinal cord. It may cause weakness, stiffness, muscle spasms, exaggerated reflexes, or reduced control of movement.

Upper Respiratory Infection

An infection of the nose, sinuses, pharynx, or larynx, most often caused by a virus and producing symptoms such as congestion, sore throat, cough, or runny nose.

Upper Respiratory Tract Infection

An acute, typically self-limiting viral or bacterial infection of the mucosal structures of the upper aerodigestive tract above the larynx, encompassing the common cold, rhinitis, pharyngitis, tonsillitis, and acute rhinosinusitis.

Alternate Names:

URTI; Upper Respiratory Infection; URI

Upper-Tract Urothelial Carcinoma

A cancer arising from the urothelial lining of the renal pelvis or ureter. It may cause blood in the urine, flank pain, or blockage and is distinct from urothelial cancer arising in the bladder.

Upright Labor Positions

Maternal positions during labor, such as walking, standing, squatting, kneeling, or sitting upright. They may improve comfort and mobility and can be used when safe and acceptable to the laboring person and clinical team.

Upward Gaze

Elevation of both eyes to direct the visual axis upward. It depends on coordinated activity of the extraocular muscles and their brainstem control pathways.

Urachal Abnormalities

Birth-related problems caused by incomplete closure of the urachus, the temporary fetal connection between the bladder and navel. They include a urachal cyst, sinus, or open connection and may cause infection, navel discharge, abdominal pain, or urine leakage.

Urachal Carcinoma

A rare cancer arising from a leftover connection between the bladder and the navel, usually near the top of the bladder. It may cause blood or mucus in the urine, pelvic pain, or urinary changes.

Urachal Cyst

A fluid-filled sac left from the temporary fetal connection between the bladder and navel. It may cause no symptoms, but infection can produce lower-abdominal pain, fever, navel discharge, or urinary symptoms.

Urachal Fistula

A congenital anomaly resulting from complete failure of obliteration of the embryonic urachus (allantoic canal), creating a persistent patent fibrous lumen connecting the bladder dome directly to the umbilicus, presenting as continuous or intermittent

urine drainage from the umbilicus.

Alternate Names:

Patent Urachus; Persistent Urachal Canal

Urachal Mucinous Cystic Tumor

A rare tumor arising from the urachal remnant between the bladder dome and umbilicus. It may be benign or malignant, with mucinous histology, and requires surgical excision.

Urachus

An embryologic connection between the fetal bladder and umbilicus that normally becomes the median umbilical ligament after birth. Persistent urachal remnants can form cysts, sinuses, or other complications.

Uracil-DNA Glycosylase

A DNA repair enzyme that initiates the base excision repair (BER) pathway by specifically recognizing and hydrolyzing the N-glycosidic bond of mutagenic uracil residues formed by spontaneous deamination of cytosine in DNA, generating an abasic (AP) site for downstream repair.

Alternate Names:

UDG

Uraemia

A serious illness caused by severe kidney failure and buildup of waste products in the blood. It may cause nausea, itching, tiredness, confusion, bleeding, or inflammation around the heart.

Uraemic Foetor

A distinctive, fishy, ammoniacal, or urine-like breath odor caused by the breakdown of elevated salivary urea into ammonia by oral bacterial urease in patients with advanced chronic kidney disease or acute renal failure.

Alternate Names:

Uremic Fetor; Ammoniacal Breath

Uraemic Syndrome

The collection of symptoms and biochemical abnormalities caused by severe accumulation of uraemic

waste products in advanced kidney failure.

Uranium

A naturally occurring radioactive heavy metal. Internal exposure can damage the kidneys, while inhaled or retained radioactive material can also expose tissues to ionizing radiation.

Urate

A form of uric acid, a waste product made when the body breaks down certain substances in food and cells. Too much urate in the blood can form crystals in joints and cause gout.

Urate-Lowering Therapy

Long-term treatment that lowers urate in the blood, helping dissolve gout crystals and prevent further attacks and joint damage. The medicine is chosen according to kidney function, other illnesses, and treatment goals.

Urate Nephropathy

Acute kidney injury caused by the intratubular precipitation of needle-shaped monosodium urate and uric acid crystals within the renal collecting ducts and distal tubules, typically occurring in the setting of acute tumor lysis syndrome following cytotoxic chemotherapy for high-turnover hematological malignancies. Marked by an elevated urinary uric acid-to-creatinine ratio greater than 1.0.

Alternate Names:

Acute Uric Acid Nephropathy; Crystal-Induced Urate Nephropathy

Urates

Salts or ions of uric acid. Monosodium urate crystals can accumulate in joints in gout, and urate crystals may contribute to urinary stones.

Urea

The principal nitrogen-containing waste product of protein metabolism, formed in the liver and excreted mainly by the kidneys.

Urea Breath Test

A noninvasive test for active *Helicobacter pylori* infection: the person drinks labeled urea, and labeled carbon dioxide in exhaled breath indicates bacterial urease activity.

Urea Cycle

A series of chemical reactions in the liver that changes toxic ammonia, produced when the body breaks down protein, into urea. The kidneys then remove urea in urine.

Urea Cycle Disorder

An inherited problem in the liver's process for removing ammonia. Ammonia can build up in the blood and cause vomiting, poor feeding, sleepiness, confusion, seizures, or brain injury, especially during illness or fasting.

Urea Nitrogen Urine Test

A urine test measuring urea nitrogen excretion, interpreted with blood urea nitrogen, creatinine, diet, and urine volume to assess protein metabolism and renal handling.

Ureaplasma

A genus of very small bacteria without a cell wall that can colonize the genital or urinary tract and is sometimes associated with urethritis or pregnancy complications.

Ureaplasma Urealyticum

A cell-wall-free bacterium that can colonize the genital or urinary tract and is sometimes associated with nongonococcal urethritis, pregnancy complications, or infection in vulnerable newborns.

Uremia

A clinical syndrome caused by advanced kidney failure and accumulation of waste products and other biologically active substances. Symptoms may include nausea, itching, fatigue, confusion, bleeding, or pericarditis; laboratory values and symptoms must be interpreted together.

Uremic Bleeding

A qualitative hemorrhagic diathesis occurring in patients with severe acute kidney injury or end-stage renal disease, resulting from uremic toxin-induced platelet dysfunction (impaired GPIIb/IIIa activation and defective von Willebrand factor interaction), characteristically treated with desmopressin (DDAVP), cryoprecipitate, or dialysis.

Uremic Encephalopathy

Brain dysfunction caused by the buildup of waste products in severe kidney failure. It may cause confusion, extreme sleepiness, muscle twitching, seizures, or coma. It is a medical emergency and is often treated by addressing the kidney failure, sometimes with dialysis.

Uremic Fetor

A characteristic fishy, ammoniacal, or urine-like odor on the breath of patients with severe end-stage renal disease (ESRD), produced by the bacterial breakdown of elevated concentrations of salivary urea into ammonia by oral urease-producing microflora.

Alternate Names:

Ammoniacal Breath; Uremic Breath Odor

Uremic Frost

Rare white, powdery crystals of urea that appear on the skin when severe untreated kidney failure causes very high waste levels in the blood. It indicates advanced kidney failure.

Uremic Pericarditis

Inflammation of the sac around the heart caused by severe kidney failure and buildup of waste products. It may cause sharp chest pain, a scratchy heart sound, or fluid around the heart; fluid can sometimes compress the heart and impair its pumping.

Uremic Platelet Dysfunction

Reduced ability of platelets to stick together and stop bleeding because of advanced kidney failure. It can cause easy bruising, nosebleeds, heavy menstrual bleeding, or bleeding from the stomach or bowel and may improve when the kidney failure is treated.

Uremic Pruritus

A refractory, distressing cutaneous itch affecting patients with advanced chronic kidney disease and end-stage renal disease on hemodialysis or peritoneal dialysis, related to immune dysregulation, microinflammation, peripheral neuropathy, and opioid receptor imbalance.

Alternate Names:

Chronic Kidney Disease-Associated Pruritus; CKD-aP

Uremic Stomatitis

Inflammation of the mouth caused by severe kidney failure and buildup of waste products. It may cause a bad taste, mouth soreness, white patches, ulcers, or bleeding gums and tongue.

Ureter

One of two muscular tubes that carry urine from a kidney to the bladder. A stone or narrowing can block a ureter and cause severe side pain, swelling of the kidney, infection, or kidney damage.

Ureteral Calculi

Stones that form in or pass through a ureter, the tube carrying urine from a kidney to the bladder.

Ureteral Catheters

Thin tubes passed into a ureter to drain urine, inject contrast, measure pressure, or guide a procedure. Possible complications include infection, bleeding, a tear, movement of the tube, or blockage.

Ureteral Injury During Gynecologic Surgery

Damage to a ureter during pelvic surgery, including transection, ligation, thermal injury, devascularization, or obstruction. It may cause flank pain, urine leakage, hydronephrosis, fever, or delayed kidney injury and requires prompt imaging and urologic management.

Ureteral Obstruction

A blockage that prevents urine from flowing from a kidney to the bladder. It may cause side pain, in-

fection, kidney swelling, or reduced kidney function. Common causes include stones, scar tissue, tumors, and pressure from nearby tissues.

Ureteral Orifice

One of two slit-like mucosal openings situated at the posterolateral angles of the trigone of the urinary bladder through which urine from the ureters enters the bladder lumen, guarded by an oblique intramural muscular tunnel that acts as a functional physiological valve to prevent vesicoureteral reflux.

Ureteral Perforation

A tear or hole in the ureter, sometimes caused by a stone, trauma, surgery, or an endoscopic procedure. Urine may leak into surrounding tissues, causing pain, infection, or inflammation; prompt imaging and urologic assessment are required.

Ureteral Polyp

Usually a benign fibroepithelial growth arising from the ureter. It may cause hematuria, flank pain, or obstruction and must be distinguished from urothelial malignancy when evaluated.

Ureteral Reimplantation

Surgery that moves the lower end of a ureter to a new opening in the bladder. It may be used to correct urine flowing backward, blockage, injury, or an abnormal ureter entry.

Alternate Names:

Ureteroneocystostomy; Ureteral Neoimplantation

Ureteral Retrograde Brush Biopsy

A small brush passed through a thin camera into the ureter to collect cells from its lining. A laboratory examines the cells for cancer or other abnormal changes.

Ureteral Stenosis

Narrowing of the ureter caused by scar tissue, prior surgery, radiation, stones, inflammation, or congenital disease, impairing urine drainage and possibly causing hydronephrosis or recurrent infection.

Ureteral Stent

A thin tube placed inside the ureter to keep urine flowing from the kidney to the bladder when a stone, narrowing, tumor, or swelling blocks the passage. It can cause urinary urgency, discomfort, blood in the urine, infection, or mineral buildup and is usually temporary.

Ureteral Stricture

Narrowing of the ureter caused by fibrosis, surgery, instrumentation, radiation, infection, malignancy, or congenital disease. It can produce upstream hydronephrosis, pain, infection, and declining renal function.

Ureter Duplex

A birth variation in which one kidney has two urine tubes instead of one. It may cause no problems but can lead to urine flowing backward, blockage, repeated infections, or poor drainage.

Ureter Fissus

A birth difference in which a ureter is divided lengthwise or partly duplicated. It may cause no symptoms, but abnormal urine flow can lead to urine reflux, blockage, repeated infection, or poor kidney drainage.

Ureteric Bud

An embryonic epithelial outgrowth arising from the posteromedial wall of the mesonephric (Wolffian) duct that invades the metanephric blastema, branching repeatedly to form the ureter, renal pelvis, major and minor calyces, and collecting duct system.

Alternate Names:

Metanephric Diverticulum

Ureteric Calculi

Kidney stones that have moved into a ureter, the tube carrying urine from a kidney to the bladder. They can cause severe wave-like side pain, blood in the urine, nausea, blockage, or infection.

Ureteric Colic

Severe, paroxysmal, agonizing flank and abdominal

pain radiating anteriorly and inferiorly toward the ipsilateral groin, testicle, or labium majus, caused by acute smooth muscle spasm and proximal hydronephrotic distension from an obstructing urinary calculus (nephrolithiasis) in the ureter.

Alternate Names:

Renal Colic; Ureteral Calculus Pain

Ureteric Perforation

A tear or hole in the ureter that can allow urine to leak into surrounding tissue, usually after instrumentation, surgery, trauma, or a stone; it needs prompt urologic assessment.

Ureteritis

Inflammation of the ureter, usually related to infection, obstruction, stone passage, instrumentation, or adjacent inflammatory disease. It may cause flank or abdominal pain, urinary symptoms, hematuria, and fever.

Ureter Obstruction

Blockage of urine flow from a kidney to the bladder, commonly caused by a stone, stricture, tumor, or external compression and potentially leading to hydronephrosis, infection, or kidney injury.

Ureterocele

A balloon-like dilation of the lower ureter where it enters the bladder, usually congenital; it can obstruct urine flow and cause infection, hydronephrosis, reflux, stones, or impaired renal function.

Ureterolithiasis

A kidney stone located in the ureter, the tube from the kidney to the bladder. It can block urine and cause severe wave-like side pain, blood in the urine, nausea, infection, or kidney damage.

Ureteropelvic Junction Obstruction

A blockage where the kidney's urine-collecting area joins the ureter. It may be present from birth or develop later and can cause kidney swelling, side pain, infections, stones, or loss of kidney function.

Ureteroscope

A thin camera instrument passed through the urinary passage to examine the ureter and kidney. It can help remove stones, take tissue samples, or place a stent.

Ureteroscopes

Small endoscopes used to inspect the ureter and renal collecting system and to perform procedures such as stone removal, biopsy, or stent placement.

Ureteroscopy

Ureteroscopy uses a small endoscope passed through the urinary tract to inspect, biopsy, or treat ureteral or kidney stones and other lesions.

Ureterostomy Procedure

Surgery that creates an opening from a ureter to the skin or another urinary conduit to divert urine when normal drainage to the bladder is impossible or must be bypassed.

Urethra

The tube that carries urine from the bladder out of the body. In people with male reproductive anatomy it also carries semen; the shorter urethra in people with female reproductive anatomy makes bladder infections more likely.

Urethra Disorder

A condition affecting the urethra, such as infection, inflammation, stricture, trauma, congenital abnormality, or tumor, that may cause pain, discharge, weak stream, or retention.

Urethral Cancer

Cancer arising from the urethra, usually from its lining cells. It may cause blood in the urine, a lump, discharge, pain, or difficulty passing urine.

Urethral Carcinoma

A rare cancer arising from the urethra that may cause bleeding, a lump, discharge, pain, or difficult urination; diagnosis requires examination, imaging, and biopsy.

Urethral Caruncle

A benign, fleshy, vascular, exophytic polypoid outgrowth of the posterior margin of the external urethral meatus occurring almost exclusively in postmenopausal women due to chronic hypoestrogenism and local urethral prolapse, presenting with spotting, dysuria, or a tender reddish meatal nodule.

Alternate Names:

Benign Meatal Vascular Polyp; Estrogen-Deficient Urethral Lesion

Urethral Catheter

A tube inserted through the urethra into the bladder to drain urine, obtain a specimen, instill medication, or monitor output. Urinary infection and urethral trauma are important risks.

Urethral Diverticulum

A pocket beside the urethra that connects with the urine tube, often developing after infection or blockage of nearby glands. It may cause burning urination, urine dribbling after voiding, repeated infections, pain during sex, or a vaginal-wall lump.

Urethral Fistula

An abnormal channel between the urethra and another epithelial surface, often the vagina or skin. It can cause continuous urine leakage, recurrent infection, and local irritation.

Urethral Hypermobility

Excessive movement of the urethra when abdominal pressure rises, contributing to urine leakage during coughing, lifting, or exercise.

Urethral Infection

Infection involving the urethra, commonly caused by bacteria, including sexually transmitted organisms. Symptoms may include burning urination, discharge, frequency, or pelvic discomfort; testing and appropriate treatment help prevent complications and transmission.

Urethral Injury

Damage to the urethra caused by trauma, a pelvic

fracture, a penetrating wound, or a medical instrument. It may cause blood at the urethral opening, difficulty passing urine, bruising, or urine leakage into nearby tissues.

Urethral Meatus

The external opening of the urethra through which urine leaves the body. Its position may be abnormal in conditions such as hypospadias or epispadias.

Urethral Obstruction

Partial or complete blockage of urine leaving the bladder, often from stricture, stone, prostate disease, tumor, or a congenital valve. Acute retention can damage the bladder or kidneys.

Urethral Pressure Profile

A test using a small catheter to measure pressure along the urethra and assess how well it closes. It may help investigate certain types of urine leakage or difficulty emptying the bladder.

Urethral Prolapse

A circumferential eversion and protrusion of the distal urethral mucosa through the external urethral meatus, presenting as a reddish, doughnut-shaped or rosette-like congestion at the vulva, typically occurring in prepubertal Black girls or frail postmenopausal women.

Alternate Names:

Urethral Mucosal Prolapse; Meatal Eversion

Urethral Sling

A strip of synthetic material or the person's own tissue placed beneath the urethra to support it and reduce urine leakage during coughing, lifting, or exercise. Possible complications include urgency, difficulty urinating, infection, or erosion.

Urethral Sphincter

Muscles around the urine tube that help keep urine from leaking and relax when a person urinates. Nerve or muscle damage can weaken control and cause leakage or difficulty emptying the bladder.

Urethral Stenosis

Scar-related narrowing of the urethral channel that restricts urinary flow and can cause spraying, weak stream, recurrent infection, retention, or bladder damage.

Urethral Stent

A small tube placed inside the urethra to help keep a narrowed or blocked segment open and allow urine to pass. Migration, blockage, infection, pain, or tissue injury can occur.

Urethral Stricture

A narrowing of the urethra, the tube that carries urine out of the body, usually caused by scar tissue. The narrowing can slow or block urine flow and may cause a weak or spraying stream, straining, pain with urination, dribbling, or incomplete bladder emptying. It can lead to repeated urinary infections, urinary retention, and, if severe or prolonged, damage to the bladder or kidneys. Causes include injury, infection, surgery, radiation, or previous use of a catheter or other instrument; sometimes no cause is found.

Urethral Syndrome

Urinary frequency, urgency, dysuria, or discomfort without a clear bacterial urinary-tract infection; causes may include irritation, pelvic-floor dysfunction, or inflammation.

Urethral Trauma

Injury to the urethra caused by a pelvic fracture, blunt or penetrating trauma, or medical instrumentation. It may cause bleeding, difficulty passing urine, bruising, or leakage of urine into nearby tissues.

Urethral Discharge

Fluid or pus coming from the urethral opening. It may result from urethritis, including sexually transmitted infection, but can also follow irritation or injury and warrants appropriate medical assessment and testing.

Urethritis

Inflammation of the urethra, often caused by infection, including sexually transmitted infections, but sometimes by irritation or injury. It can cause burning urination, itching, pelvic discomfort, or discharge.

Urethrocele

Bulging or downward displacement of the urethra, usually into the front wall of the vagina. It may cause pressure, urinary leakage, difficulty emptying the bladder, discomfort, or no symptoms.

Urethrography

An X-ray test in which contrast liquid outlines the urethra, the tube carrying urine out of the body. It can show narrowing, leaks, injury, abnormal connections, or birth differences.

Urethroplasty

Surgery that rebuilds or widens the urine tube, most often to treat a narrowing called a stricture. It may use nearby tissue or a graft and aims to improve urine flow.

Urethroscopy

Examination of the urethra with a thin camera passed through its opening. It can identify narrowing, injury, inflammation, stones, tumors, or other abnormalities and may allow treatment during the same procedure.

Urge Incontinence

Involuntary leakage of urine preceded immediately by a sudden, intense, compelling desire to void that is difficult to defer, resulting from involuntary detrusor muscle contractions (detrusor overactivity / overactive bladder) during the bladder filling phase.

Alternate Names:

Detrusor Overactivity Incontinence; Urgency Urinary Incontinence

Urgency

A sudden, difficult-to-delay need to urinate. It may result from a urinary infection, bladder irritation,

overactive bladder, a stone, nerve disease, prostate enlargement, or pelvic-floor problems.

Urge Urinary Incontinence

Involuntary leakage of urine that follows a sudden, difficult-to-delay need to urinate. It may occur with overactive bladder, urinary infection, bladder irritation, nerve disease, or other urinary-tract problems.

Uric Acid

A waste product formed when the body breaks down purines. High blood levels can cause gout or kidney stones, although many people with high levels have no symptoms.

Uric Acid Nephrolithiasis

The formation of pure uric acid urinary stones resulting from chronic acidic urine (urine pH less than 5.5), hyperuricosuria, and low urine volume, which appear radiolucent on plain abdominal radiographs but are readily visualized as hyperdense calculi on non-contrast CT.

Alternate Names:

Uric Acid Calculi; Radiolucent Kidney Stones

Uric Acid Nephropathy

Kidney injury caused when too much uric acid forms crystals in the kidney's small tubes. It can occur during rapid breakdown of cancer cells or severe uric-acid excess.

Uric Acid Stones

Kidney stones composed primarily of uric acid. They form more readily in acidic urine and are associated with hyperuricemia, gout, high purine intake, or chronic diarrhea. Some can dissolve when urine is alkalinized.

Uric Acid Urine Test

A urine test measuring uric acid excretion, used in evaluation of gout, kidney stones, uric-acid overproduction, and selected metabolic disorders.

Uricosuric Drug

A medicine that increases renal excretion of uric

acid, such as probenecid, used in selected patients with gout.

Uridine Triacetate

An oral prodrug that supplies uridine and is used as an emergency antidote for severe or life-threatening toxicity from fluorouracil or related fluoropyrimidines, under specialist direction.

Urinal

A portable container used to collect urine from someone who cannot easily reach a toilet. It should be emptied, cleaned, and stored safely to reduce spills, odor, and infection risk.

Urinalysis

Laboratory examination of urine for its appearance, acidity, blood, cells, protein, sugar, ketones, bacteria, and other substances. It can provide clues to infection, kidney disease, bleeding, diabetes, dehydration, and other illness.

Urinary

Relating to urine or to the organs and processes involved in making, storing, and passing urine, including the kidneys, ureters, bladder, and urethra.

Urinary Anion Gap

A calculation using urine sodium, potassium, and chloride levels. It can help doctors assess how the kidneys are handling acid during some types of blood acidosis. The result is only one part of the assessment and cannot by itself identify the cause.

Alternate Names:

UAG; Urine Net Charge

Urinary Bladder

A hollow muscular organ in the lower abdomen that stores urine until it is released through the urethra.

Urinary Bladder Disorder

A disease affecting bladder storage or emptying, including infection, overactivity, pain syndrome, stones, tumor, neurologic dysfunction, or outlet obstruction.

Urinary Bladder Squamous Cell Carcinoma Pathology

An invasive malignant squamous neoplasm of the bladder showing keratinization, intercellular bridges, or both. It may be associated with chronic irritation, infection, stones, or schistosomiasis and is assessed for depth of invasion.

Urinary Calculi

Stones formed from crystallized minerals in the urinary tract. They may cause colicky pain, hematuria, obstruction, infection, or kidney injury depending on their size and location.

Urinary Casts

Small tube-shaped particles formed inside kidney tubules and passed in urine. Their appearance can provide clues about kidney inflammation, bleeding, infection, or damage.

Urinary Catheter

A hollow, flexible tube inserted through the urethra into the bladder to drain urine; it may be used intermittently or left in place.

Urinary Catheterization

Insertion of a tube into the bladder to drain urine, measure output, obtain a specimen, or deliver treatment; infection, trauma, and blockage are possible complications.

Urinary Catheters

Urinary catheters drain the bladder when a person cannot empty it normally or accurate urine measurement is needed, with risks including infection, trauma, blockage, and discomfort.

Urinary Diversion

Surgical or catheter-based rerouting of urine when the normal passage from the kidneys to the urethra cannot be used, often to a stoma or bowel reservoir.

Urinary Fistula

An abnormal connection between part of the urinary tract and another organ or the skin, allowing urine

to leak outside its normal pathway. Causes include surgery, childbirth injury, inflammation, and cancer.

Urinary Frequency

The need to urinate more often than usual, which may result from infection, bladder irritation, increased urine production, or other urinary disorders.

Urinary Hesitation

Difficulty starting or maintaining urination, which may result from prostate enlargement, urethral narrowing, medications, nerve disorders, pain, or impaired bladder contraction.

Urinary Incontinence

Unwanted leakage of urine. It may happen with coughing or exercise, a sudden strong urge, an overfull bladder, difficulty reaching the toilet, or nerve and muscle problems. More than one pattern may occur in the same person.

Alternate Names:

Involuntary Urination; Loss of Bladder Control; Enuresis

Urinary Lithiasis

The formation or presence of stones anywhere in the urinary tract, including the kidneys, ureters, bladder, or urethra.

Urinary Retention

Inability to empty the bladder fully. It may be sudden and painful or develop gradually with a weak stream, frequent small amounts of urine, or leakage from an overfull bladder. Blockage, medicines, nerve problems, or weak bladder muscles can cause it.

Urinary Retraining

Scheduled toilet visits and bladder-control techniques used to reduce urgency, frequent urination, or leakage. A clinician may combine it with pelvic-floor exercises, fluid changes, or treatment of the underlying cause.

Urinary Stasis

Slowing or stopping of normal urine flow, which

can promote urinary infection, stone formation, or obstruction-related kidney injury.

Urinary System

The kidneys, ureters, bladder, and urethra. Together they filter blood, make and transport urine, store and remove it, and help regulate fluid volume, electrolytes, acid-base balance, blood pressure, and hormone-related functions such as red-cell production.

Urinary Tract

The kidneys, ureters, bladder, and urethra. Together these organs make urine, carry it to the bladder, store it, and remove it from the body.

Urinary Tract Disorder

Any disease of the kidneys, ureters, bladder, or urethra, including infection, stones, obstruction, congenital abnormalities, cancer, and functional or neurologic disorders.

Urinary Tract Imaging

Imaging tests used to examine the kidneys, ureters, bladder, and urethra. Methods include ultrasound, X-ray studies, computed tomography, magnetic resonance imaging, and nuclear scans, chosen according to the suspected problem.

Urinary Tract Infection

Infection of the urinary tract, classified as lower infection such as cystitis or urethritis, or upper infection such as pyelonephritis. Symptoms vary; dysuria, frequency, urgency, fever, flank pain, or nausea may occur. *Escherichia coli* is a common cause, but organisms vary by setting and patient factors.

Urinary Tract Infection In Adults

A urinary infection in an adult involving the bladder, urethra, kidneys, or another part of the urinary tract. Symptoms vary by site and may include painful urination, frequency, urgency, blood in the urine, fever, or flank pain.

Urinary Tract Infection In Children

A urinary infection in a child involving the bladder, kidneys, ureters, or urethra. Symptoms may include fever, painful or frequent urination, new wetting, abdominal or back pain, vomiting, or unusual irritability.

Alternate Names:

Pediatric UTI; Childhood Cystitis

Urinary Tract Infection In Pregnancy

A urinary infection or asymptomatic bacterial growth occurring during pregnancy. Pregnancy increases the risk of upper urinary infection, so screening and treatment follow pregnancy-specific clinical guidance.

Urinary Tract Infections in Pregnancy

Bacterial infection of the urethra, bladder, or kidneys during pregnancy. Even asymptomatic bacteriuria can progress to pyelonephritis, preterm birth, or sepsis, so screening, culture-directed pregnancy-safe treatment, and follow-up are important.

Urinary Tract Neoplasm

A benign or malignant growth in the kidneys, ureters, bladder, or urethra; evaluation depends on its site, symptoms, tissue type, and extent of spread.

Urinary Tract Obstruction

An anatomical or functional impediment to the normal antegrade flow of urine along the urinary tract from the renal calyces to the urethral meatus, predisposing to hydronephrosis, postrenal acute kidney injury, urinary stasis, and urosepsis.

Urinary Urgency

A sudden, difficult-to-delay need to urinate. It may occur with urinary infection, bladder irritation, overactive bladder, stones, neurologic disease, or other conditions. Urgency with fever, flank pain, blood in the urine, or inability to urinate requires medical assessment.

Urination

The process of releasing urine from the bladder through the urethra and out of the body.

Alternate Names:

Micturition; Voiding

Urination Disorder

Abnormal storage or emptying of urine causing frequency, urgency, dysuria, incontinence, hesitancy, weak stream, retention, or excessive or reduced urine output.

Urine

The liquid waste produced by the kidneys, containing water and dissolved substances eliminated from the blood.

Urine 24-Hour Volume

Twenty-four-hour urine volume is the total urine produced in a day and helps assess hydration, kidney function, endocrine disease, or abnormal urine production.

Urine Albuminuria

An abnormal amount of the blood protein albumin in urine. Persistent albumin loss can be an early sign of kidney disease and also increases the risk of worsening kidney function and cardiovascular disease.

Urine Alkalinization

Treatment that makes urine less acidic, usually with a carefully monitored medicine, to help remove certain poisons such as salicylate. It can disturb body salts or fluid balance and is used only for selected cases.

Urine Amylase Test

A urine test that measures the amount of amylase passed from the body. It may help assess pancreatitis, salivary-gland problems, or unusually high amylase levels in the blood.

Alternate Names:

Urine Amylase; Urinary Amylase Test; Amylase Urine Test

Urine Analysis

Laboratory testing of urine for blood, cells, protein, sugar, microbes, and other clues to illness. It can help assess urinary infection, kidney disease, diabetes, dehydration, and other conditions.

Urine Bilirubin Test

A clinical urinalysis that detects conjugated (water-soluble) bilirubin in urine. A positive result indicates hepatobiliary disease, hepatocellular injury, or biliary tract obstruction; unconjugated bilirubin is bound to albumin and does not filter into urine.

Alternate Names:

Urine Bilirubin; Urinary Bilirubin Test

Urine Calcium Test

A diagnostic urinalysis quantifying urinary calcium excretion, typically measured in a 24-hour urine collection. It is utilized in the evaluation and metabolic workup of nephrolithiasis, hyperparathyroidism, osteomalacia, and idiopathic hypercalciuria.

Alternate Names:

Urinary Calcium; 24-Hour Urine Calcium; Urine Calcium Excretion

Urine Catecholamine Test

A diagnostic biochemical assay measuring 24-hour urinary excretion of epinephrine, norepinephrine, dopamine, and their metanephrine metabolites to diagnose neuroendocrine tumors such as pheochromocytoma, paraganglioma, and neuroblastoma.

Alternate Names:

24-Hour Urine Catecholamines; Urinary Catecholamines; Fractionated Urinary Catecholamines

Urine Chemistry

Measurement of chemical constituents in urine, such as glucose, protein, electrolytes, ketones, blood, and pH, to evaluate kidney function and systemic disease.

Urine Chloride Test

A diagnostic urinalysis quantifying urinary chloride excretion, crucial in differentiating chloride-responsive (e.g., vomiting, diuretic use)

from chloride-resistant (e.g., hyperaldosteronism) metabolic alkalosis.

Alternate Names:

Urinary Chloride; Urine Chloride Excretion; Spot Urine Chloride

Urine Concentration Test

A test of the kidney's ability to concentrate urine, assessed by urine osmolality or specific gravity after controlled fluid conditions when appropriate.

Urine Conductivity

Urine conductivity measures how readily urine carries electrical current and reflects its dissolved electrolyte and solute concentration.

Urine Culture

A laboratory test that grows microorganisms from a urine specimen to identify urinary-tract infection and guide antimicrobial selection. Results may report the organism, quantity of growth, and antimicrobial susceptibility. Proper collection is important because contamination can produce misleading growth; results must be interpreted with symptoms and urinalysis.

Urine Cytology

Microscopic examination of cells shed into urine, mainly used to help detect high-grade urothelial carcinoma and some other abnormalities. A negative result does not exclude all urinary-tract cancers.

Urine Dipstick

A rapid, point-of-care biochemical test consisting of a plastic strip with reagent pads that undergo colorimetric changes upon chemical reaction with urine, screening for leukocytes, nitrite, urobilinogen, protein, pH, blood, specific gravity, ketones, bilirubin, and glucose.

Urine Drainage Bags

Urine drainage bags collect urine from a catheter or urinary diversion and require correct positioning, emptying, hygiene, and monitoring for blockage or infection.

Urine Electrolytes Test

A diagnostic urinalysis measuring the concentrations of sodium, potassium, and chloride in urine to evaluate acute kidney injury, dehydration, electrolyte imbalances, and acid-base disturbances.

Alternate Names:

Urinary Electrolytes; Spot Urine Electrolytes; 24-Hour Urine Electrolytes

Urine Formation

The process by which the kidneys make urine: they filter blood, return needed water and substances to the body, and add selected wastes and extra ions to the fluid that leaves as urine.

Urine HCG Test

A urine test that detects human chorionic gonadotropin, a hormone produced during pregnancy. Testing too early or using diluted urine can give a false-negative result; a positive result confirms pregnancy but does not show its location or health.

Alternate Names:

Urine hCG Test; Gravidex Test

Urine Hemoglobin

Hemoglobin detected in urine, which may reflect intravascular hemolysis or contamination with intact red blood cells. Interpretation requires comparison with urine microscopy and clinical findings.

Urine Immunoelectrophoresis

A specialized clinical laboratory test that separates urinary proteins by agarose gel electrophoresis followed by immunodiffusion with monospecific antibodies. Primarily utilized to identify and characterize monoclonal light chains (Bence Jones proteins) in plasma cell dyscrasias such as multiple myeloma.

Alternate Names:

Urine IEP; Urinary Protein Immunoelectrophoresis; Urine Immunofixation Electrophoresis

Urine Immunofixation

An immunochemical laboratory technique combining high-resolution electrophoresis with specific antibody precipitation to identify and type monoclonal

free light chains (kappa or lambda) and intact immunoglobulins excreted in urine.

Alternate Names:

Urine IFE; Urinary Immunofixation Electrophoresis; Bence Jones Protein IFE

Urine Osmolality

A measure of how concentrated urine is. It helps assess whether the kidneys can conserve or remove water and must be interpreted with fluid intake, medicines, kidney function, and blood tests.

Urine PH

A measurement of urine acidity or alkalinity. It varies with diet, metabolism, medications, infection, and kidney function and can influence the formation of some urinary stones.

Urine PH Test

A test measuring urine acidity or alkalinity, useful in evaluating acid-base handling, urinary infection, kidney stones, and some metabolic conditions.

Urine Protein Dipstick Test

A screening test using a reagent strip to detect mainly albumin in urine; positive results require confirmation and quantitative assessment when clinically indicated.

Urine Protein Electrophoresis Test

A laboratory test that separates urine proteins by electrical charge and size to help detect abnormal proteins, including monoclonal light chains associated with plasma-cell disorders.

Urine Retention

Alternate name; see *Urinary Retention*.

Urine Sediment

The cells, crystals, casts, and other particles seen under a microscope after urine is concentrated. Their appearance can provide clues to bleeding, infection, stones, or kidney inflammation.

Urine Sodium

The amount of sodium in urine. It can help assess fluid balance and kidney handling of salt, but results are strongly affected by diet, medicines, hydration, and the timing of the sample.

Urine Specific Gravity Test

A test comparing the density of urine with the density of water. It gives a rough estimate of how concentrated the urine is and can help assess hydration and the kidneys' ability to conserve water.

Urine Toxicology

Laboratory analysis of urine for medicines, drugs, or their metabolites. Results require interpretation because detection does not always establish impairment or the timing of exposure.

Urinoma

An encapsulated or non-encapsulated extravasation of urine into the retroperitoneal space or perirenal tissues, resulting from traumatic rupture or iatrogenic instrumentation injury to the renal pelvis, calyces, or ureter.

Alternate Names:

Urine Pseudocyst

Urinometer

An instrument that measures how dense urine is compared with water. The result gives an estimate of urine concentration and may help assess hydration or the kidney's ability to conserve water.

URI (Upper Respiratory Infection)

URI usually means upper respiratory infection, commonly a viral infection of the nose, throat, or upper airways causing congestion, cough, and sore throat.

Urobilinogen

A colourless product formed in the intestine from bilirubin and partly reabsorbed and excreted in urine; abnormal levels may provide clues to liver disease or haemolysis.

Urodynamics

A group of tests that measures how the bladder stores urine, how pressure changes as it fills, and how the urethra and bladder release urine. It helps investigate leakage, urgency, weak stream, or difficulty emptying when simpler tests are inconclusive.

Urodynamic Testing

A group of tests that measures how the bladder and urethra store and release urine. It can help explain leakage, urgency, difficulty emptying, or repeated retention when simpler tests do not identify the cause.

Uroflow

A test that measures how quickly and steadily urine leaves the body during urination. The result can suggest blockage, weak bladder muscles, or other emptying problems, but it is interpreted with symptoms and sometimes additional tests.

Uroflowmetry

A noninvasive test measuring how fast and steadily urine leaves the body. A low or abnormal flow may reflect blockage, weak bladder contraction, or an incomplete test and must be interpreted with symptoms and other findings.

Urogenital

Relating to the urinary and reproductive systems or structures involving both. The term may describe organs, infections, cancers, birth conditions, injuries, symptoms, tests, or treatments affecting these closely connected body systems.

Urogenital Fistula

An abnormal connection between the urinary and genital tracts, such as a vesicovaginal or ureterovaginal fistula. It commonly causes continuous urinary leakage and requires specialist evaluation.

Urogenital Sinus

A birth-related abnormality in which the urethra and vagina join into a common channel before reaching the outside of the body. It may occur with differences in the external genitalia, urinary tract,

or reproductive organs.

Urogenital System

The related urinary and reproductive organs and their associated ducts, vessels, and supporting tissues. The systems share developmental origins and anatomic relationships.

Urogenital Tract

The combined urinary and reproductive organs and passages. These include kidneys, urine tubes, bladder, urethra, reproductive organs, and connected structures that develop partly from related tissues before birth.

Urography

Imaging of the urinary tract, traditionally using X-rays after contrast dye is given. It can show the kidneys, urine tubes, bladder, narrowing, stones, leaks, blockage, or other structural problems.

Urokinase

A plasminogen activator produced by the body and also used as a thrombolytic medicine to help dissolve blood clots.

Urolithiasis

Formation of stones in the urinary tract, including the kidneys, ureters, bladder, or urethra. Stone composition varies by population and may include calcium oxalate, calcium phosphate, uric acid, struvite, or cystine.

Urologic Diagnostic Yield

The proportion of urinary-system tests or procedures that provide a clear, useful diagnosis. A test may have a low yield when the sample is too small, the disease is difficult to detect, or the result does not change care.

Urologist

A doctor who specializes in the urinary system and, in many practices, the male reproductive system. Urologists diagnose and treat kidney stones, infections, urine leakage, prostate problems, cancers,

infertility, and conditions requiring procedures or surgery.

Urology

The medical specialty that diagnoses and treats diseases of the kidneys, urine tubes, bladder, and urethra, as well as the male reproductive organs. Treatment may include medicines, procedures, or surgery.

Uropathy

Disease or damage affecting the kidneys or urinary tract. Blockage, infection, stones, urine flowing backward, medicines, and other conditions can cause it and may reduce kidney function.

Urosepsis

A life-threatening whole-body response to a severe urinary infection. It may start in the bladder or kidney and cause fever or low temperature, confusion, low blood pressure, reduced urine, organ failure, or shock.

Urostomy Leak

Escape of urine beneath or around a urostomy appliance or from a surgical connection. Persistent leakage can irritate the skin and may signal poor appliance fit, obstruction, infection, or a surgical complication.

Urostomy Procedure

Surgery that diverts urine through a stoma into an external pouch or conduit, commonly after bladder removal or when the lower urinary tract cannot safely transport urine.

Urostomy Prolapse

Protrusion of a segment of bowel used as a urostomy stoma beyond its usual level. It may cause bleeding, swelling, appliance problems, or impaired urine drainage and should be assessed clinically.

Urostomy Stenosis

Narrowing of a urinary stoma or conduit that impedes drainage, causing reduced urine output, leak-

age, infection, or kidney-pressure changes and sometimes requiring revision.

Urothelial Carcinoma

A cancer arising from the stretchable lining of the urinary tract, most often the bladder but also the kidney's drainage area, ureters, or urethra. Blood in the urine is common, and treatment depends on location, depth, grade, and spread.

Upper Tract Urothelial Carcinoma

Tumors arising from the urothelial lining of the upper urinary tract. Blood in the urine, flank pain, obstruction, or incidental imaging findings may occur; urine cytology, imaging, ureteroscopy, and tissue assessment guide diagnosis and treatment.

Urothelium

A specialized stretchable lining of the renal pelvis, ureters, bladder, and part of the urethra. It forms a protective barrier between urine and underlying tissues and allows the bladder to expand.

Urotrauma

Injury to the urinary or genital organs, including the kidneys, ureters, bladder, urethra, or external genitalia. It may result from blunt force, penetrating wounds, fractures, surgery, or medical instruments.

Ursodeoxycholic Acid

A hydrophilic bile acid used for primary biliary cholangitis and selected cholestatic liver diseases; it may also dissolve certain small cholesterol gallstones when bile flow is preserved.

Urticaria

A skin reaction causing transient, itchy raised welts that change location and usually resolve within 24 hours. It may occur with angioedema, which is deeper swelling often affecting the lips, eyelids, tongue, or extremities.

Urticarial Vasculitis

Inflammation of small blood vessels causing hive-like patches that usually last longer than 24 hours

and may burn, bruise, or leave dark marks. It can be limited to the skin or linked with joint, kidney, lung, or other disease.

Urticaria Multiforme

A short-lived allergic-type rash in children that causes widespread, ring-shaped or target-like raised patches, often with swelling of the hands, feet, or face. It may follow an infection or medicine and usually fades without scarring.

Urticaria Pigmentosa

A skin condition in which too many mast cells collect in the skin, causing tan or brown spots or bumps that swell and itch when rubbed. Flushing or other body-wide symptoms can occur.

Usher Syndrome

An inherited condition causing hearing loss together with gradually worsening vision from retinal disease. The age and severity vary by type; hearing, vision, balance, communication, and genetic support may all be needed.

Ustekinumab

A biologic medicine that blocks immune signals involved in inflammation. It is used for psoriasis, psoriatic arthritis, Crohn disease, ulcerative colitis, and other approved conditions; infections and allergic reactions are important risks.

Usual Interstitial Pneumonia

A pattern of permanent scarring in the lungs, often seen in idiopathic pulmonary fibrosis. Scarring is usually greatest near the outer and lower parts of the lungs and can form small spaces called honeycombing. It causes increasing breathlessness and cough and is assessed with lung tests and CT imaging.

Usual Interstitial Pneumonia Pathology

A patchy, temporally heterogeneous interstitial fibrosing pattern with subpleural or paraseptal fibrosis, fibroblastic foci, architectural distortion, and honeycomb change. Clinical and radiologic correlation is required.

Ut Dict.

An abbreviation of the Latin phrase “ut dictum,” meaning “as stated” or “as directed.” In medical notes it refers the reader to information already given or to an instruction previously specified.

Uterine Adnexae

The structures beside and connected to the uterus, mainly the fallopian tubes, ovaries, and supporting tissues. Problems in these structures can cause pelvic pain, abnormal bleeding, infertility, or an ectopic pregnancy.

Uterine Artery Embolization

A minimally invasive procedure that blocks blood flow to uterine fibroids so they shrink. It can reduce heavy bleeding and pelvic pressure, but may cause pain, infection, or effects on fertility and future pregnancy.

Uterine Atony

Failure of the uterus to contract effectively after childbirth, causing heavy postpartum bleeding. It is the most common cause of postpartum hemorrhage and may be managed with medicines, uterine massage, procedures, or surgery, depending on severity and response.

Alternate Names:

Postpartum Uterine Atony

Uterine Balloon Tamponade

A treatment for severe bleeding after childbirth when medicines do not control bleeding. A soft balloon is placed inside the uterus and filled with sterile fluid to press against the uterine wall and slow or stop blood loss while other treatment is arranged.

Uterine Bleeding

Bleeding from the uterus outside the expected menstrual pattern or in an abnormal amount. Causes include pregnancy complications, fibroids, polyps, hormonal changes, medicines, infection, and cancer; heavy or postmenopausal bleeding can have an underlying medical cause.

Uterine Cancer

Cancer arising in the uterus, most commonly from the endometrium. Abnormal vaginal bleeding, bleeding after menopause, pelvic pain, or unusual discharge requires evaluation; early diagnosis often permits effective treatment.

Uterine Cavity

The hollow space inside the uterus, lined by the endometrium. A fertilized egg normally implants in this lining, which thickens during the menstrual cycle and supports pregnancy; polyps, fibroids, scar tissue, or abnormal shape may affect it.

Uterine Compression Suture

A surgical hemostatic technique (exemplified by the B-Lynch, Hayman, or Cho suture) in which heavy absorbable sutures are placed through the uterine wall to mechanically compress the anterior and posterior walls of an atonic uterus, controlling refractory postpartum hemorrhage while preserving future fertility.

Alternate Names:

B-Lynch Suture; Uterine Bracing Suture

Uterine Contraction

Tightening of the uterine muscle. Contractions normally occur during menstruation and labor, but painful or unusually frequent contractions can occur with pregnancy complications, dehydration, infection, or medicines and may require assessment.

Uterine Diseases

Conditions affecting the womb, including fibroids, adenomyosis, endometriosis, infection, unusual bleeding, prolapse, and cancer. Symptoms may include pain, heavy periods, infertility, pressure, discharge, or bleeding after menopause.

Uterine Fibroid

A benign tumor arising from the smooth muscle of the uterus. Fibroids may be submucosal, intramural, or subserosal and may cause heavy menstrual bleeding, pelvic pressure, pain, urinary symptoms, or reproductive problems.

Alternate Names:

Uterine Myoma; Fibromyoma

Uterine Fibroid Embolization

A minimally invasive procedure in which particles block blood flow to uterine fibroids, causing them to shrink. It can reduce heavy bleeding and pressure symptoms but may cause pain, infection, or effects on fertility.

Uterine Fibroids

Benign tumors of uterine smooth muscle, also called leiomyomas. They may cause heavy menstrual bleeding, pelvic pressure, pain, infertility, or no symptoms.

Alternate Names:

Uterine Leiomyomata; Uterine Myomas; Fibromyomas

Uterine Fistula

A uterine fistula is an abnormal passage connecting the uterus with another organ or the skin, often after surgery, childbirth injury, infection, or cancer.

Uterine Fornix

One of the shallow spaces at the top of the vagina surrounding the cervix. A clinician can examine these spaces during a pelvic examination, and selected procedures may use them as an access route.

Uterine Gland

A small gland in the lining of the uterus that produces fluid and helps support the early embryo. Its activity changes during the menstrual cycle and pregnancy.

Uterine Growths

Uterine growths may include fibroids, polyps, adenomyosis, or rarely cancer. They can cause heavy or irregular bleeding, pelvic pressure, pain, infertility, or no symptoms; examination and imaging determine the type and treatment.

Uterine Hemorrhage

Heavy or abnormal bleeding from the uterus, occurring during pregnancy, after childbirth, or at other

times. Causes include pregnancy complications, fibroids, hormonal disorders, and malignancy; severe bleeding with dizziness or weakness is an emergency.

Uterine Inversion

A rare, life-threatening complication of childbirth in which the uterus turns partly or completely inside out and may protrude into or beyond the vagina. It can cause severe bleeding, shock, and intense pain. Treatment restores the uterus and controls blood loss.

Uterine Leiomyoma

A benign tumor of uterine smooth muscle that may cause heavy menstrual bleeding, pelvic pressure, pain, or no symptoms.

Alternate Names:

Fibroid

Uterine Leiomyosarcoma

A rare malignant tumor of uterine smooth muscle that may cause abnormal bleeding, pelvic pain, or an enlarging mass; diagnosis is based on tissue examination and staging.

Uterine Monitoring

Recording how often, how long, and how strongly the uterus contracts. During labor it helps assess progress, response to induction medicines, and excessive contractions that could affect the baby.

Uterine Myomectomy

Surgical removal of uterine fibroids while preserving the uterus; it may be performed through hysteroscopy, laparoscopy, or open surgery depending on fibroid size and location.

Uterine Obstruction

Blockage that prevents normal passage through the uterus or cervix, which may cause menstrual outflow obstruction, infertility, pregnancy complications, or retained blood or tissue.

Uterine Perforation

A hole through the wall of the uterus, most often

caused by an instrument used during a procedure such as hysteroscopy or removal of uterine tissue. It can cause internal bleeding or injury to nearby organs and may need repair.

Uterine Polyps

Growths arising from the inner lining of the uterus that may cause irregular bleeding, heavy periods, or fertility problems.

Alternate Names:

Endometrial Polyps; Intrauterine Polyps

Uterine Prolapse

Descent of the uterus toward or through the vaginal opening because pelvic-floor muscles and supporting tissues have weakened. It may cause pelvic pressure, a bulge, backache, urinary or bowel problems, or discomfort during sex; childbirth and aging increase risk.

Alternate Names:

Descensus Uteri; Pelvic Organ Prolapse; Uterine Herniation

Uterine Rupture

A complete tear through the wall of the uterus, usually during pregnancy or labor. It can cause severe internal bleeding and reduce the baby's oxygen supply; previous cesarean surgery is an important risk factor.

Uterine Rupture in Pregnancy

A tear through the uterine wall, most often during labor in a scarred uterus but sometimes in an unscarred uterus. Sudden pain, bleeding, fetal heart-rate abnormality, loss of station, or maternal shock may occur; emergency surgery is required.

Uterine Sarcoma

Uterine sarcoma is a rare malignant tumor arising from uterine muscle, connective tissue, or related cells and may cause bleeding, pain, or an enlarging mass.

Uterine Tachysystole

More than five contractions in 10 minutes, aver-

aged over 30 minutes during labor. Very frequent contractions can reduce the baby's oxygen supply, especially after labor medicines, and may require prompt treatment adjustment.

Uterine Tube

A paired muscular tube that transports the oocyte from the ovary toward the uterus and is the usual site of fertilization.

Uterine Tumors

Alternate name; see *Uterine fibroids*.

Utero-Ovarian Ligament

A band of tissue connecting each ovary to the uterus. It helps hold the ovary in position within the pelvis and lies near the fallopian tube and other pelvic supporting tissues.

Alternate Names:

Ovarian Ligament; Proper Ovarian Ligament

Uteroplacental Insufficiency

Inadequate maternal blood flow and nutrient delivery across the intervillous spaces of the placenta to the developing fetus, resulting from defective spiral artery remodeling, maternal vascular disease, or placental infarction; the primary cause of fetal growth restriction and intrapartum late decelerations.

Alternate Names:

Placental Insufficiency

Uterosacral Ligament

One of two strong bands of tissue supporting the uterus and top of the vagina by attaching them toward the sacrum at the back of the pelvis. Weakness can contribute to pelvic-organ prolapse; endometriosis can also affect or cause pain in this area.

Uterus

A hollow muscular organ in the pelvis between the bladder and rectum. Its inner lining thickens to prepare for pregnancy and is shed during menstruation. A fertilized egg normally implants in this lining, and a fetus develops in the uterus during pregnancy.

Common name: Womb

Uterus Didelphys

A congenital condition in which two separate uteruses develop, often with two cervixes and a dividing wall in the vagina. Many people can become pregnant, but miscarriage, premature birth, abnormal fetal position, or other pregnancy complications are more common.

Alternate Names:

Double Uterus; Didelphic Uterus

Uterus Disorder

A condition affecting the uterus, including fibroids, adenomyosis, endometriosis, infection, abnormal bleeding, congenital anomalies, prolapse, and cancer.

Uterus Neoplasm

A benign or malignant growth arising in the uterus, including fibroids, endometrial cancer, and sarcomas; diagnosis depends on examination, imaging, and tissue sampling.

UTI

Alternate name; see *Urinary Tract Infection*.

Utricle

A small balance organ in the inner ear that senses head position and movement in a straight line, such as forward, backward, or side-to-side motion.

Uvea

The middle layer of the eye, made up of the iris, ciliary body, and choroid. It controls the amount of light entering the eye, helps focus vision, and supplies blood to eye tissues.

Uveal Disease

A disorder of the iris, ciliary body, or choroid, including uveitis, tumors, vascular disease, and inflammation that may cause eye pain, photophobia, floaters, or visual loss.

Uveal Melanoma

The most common primary cancer inside the adult eye. It begins in pigment-producing cells of the

iris, ciliary body, or choroid and may cause visual changes or be found during an eye examination; it can spread to other organs.

Uveal Neoplasm

A tumor arising in the uveal tract of the eye—the iris, ciliary body, or choroid; malignant melanoma may threaten vision and spread to distant organs.

Uveitic Glaucoma

Secondary open-angle or closed-angle glaucoma caused by active intraocular inflammation (anterior uveitis); elevated intraocular pressure results from inflammatory cell and debris trabecular meshwork obstruction (trabeculitis), posterior synechiae causing pupillary block (iris bombé), or topical corticosteroid therapy.

Alternate Names:

Inflammatory Glaucoma; Secondary Uveitic Ocular Hypertension

Uveitis

Inflammation of the uveal tract—the iris, ciliary body, and choroid—and sometimes nearby eye tissues. It may result from infection, autoimmune or other inflammatory disease, trauma, or an unknown cause. Symptoms can include eye pain, redness, light sensitivity, floaters, blurred vision, or reduced vision; prompt eye assessment is important because untreated inflammation can damage vision.

Alternate Names:

Intraocular Inflammation; Iritis; Cyclitis

Uveoparotid Fever

A form of sarcoidosis causing fever, swelling of both parotid glands near the ears, and inflammation in the front of the eyes. It may also cause facial-nerve weakness; treatment depends on the organs affected and severity.

UV Light

Ultraviolet radiation, an invisible part of sunlight or artificial light that can affect the skin and eyes and may cause sunburn, aging, or skin cancer.

Uvula

A small, soft flap hanging from the back of the roof of the mouth. It helps with swallowing and speech; swelling can cause gagging, pain, snoring, or difficulty breathing.

Uvulitis

Inflammation and swelling of the uvula, the small tissue hanging at the back of the throat. Infection, allergy, injury, dehydration, or irritation may cause it; severe swelling or breathing difficulty can threaten the airway.

Uvulopalatopharyngoplasty

An operation that removes or reshapes parts of the soft palate, the hanging uvula, and the throat to widen the breathing passage. It may help selected people with obstructive sleep apnea, but can cause pain, swallowing changes, bleeding, or recurrence.

U Wave

A small wave that may appear after the T wave on an electrocardiogram. A prominent U wave can occur with low potassium, a slow heart rate, or some medicines and must be interpreted with the complete tracing and clinical findings.

Underactive Thyroid

Alternate name; see *Hypothyroidism*.

Urinary Tract Infection (UTI)

Alternate name; see *Urinary Tract Infection*.

Ureteral Stones

Stones lodged in a ureter, the tube carrying urine from a kidney to the bladder. They may cause severe wave-like flank or groin pain, blood in the urine, nausea, blockage, or infection and sometimes need urgent treatment.

Uterine Polyp

A growth arising from the inner lining of the uterus. Many are benign, but they can cause irregular or heavy bleeding, bleeding after menopause, or infertility and may require imaging, sampling, or removal.

Universal Precautions

Infection-control practices that treat blood and certain body fluids as potentially infectious, regardless of a person's diagnosed condition. They include hand hygiene, appropriate gloves and protective barriers, safe sharps handling, and measures to prevent exposure to bloodborne pathogens.

Urostomy

A surgically created opening that diverts urine from the urinary tract through the abdominal wall into an external pouch or appliance. It may be formed with a segment of intestine after bladder removal or when normal urinary drainage is not possible.

Ultrasound Scan

Alternate name; see *Ultrasound*.

Ulcerative Colitis (UC)

Alternate name; see *Ulcerative Colitis*.

V

Vaccination

Giving a vaccine to train the immune system to recognize a specific infection. Vaccination lowers the risk of illness, severe complications, and sometimes transmission; the recommended schedule depends on age, health, and local guidance.

Vaccination Schedule

A time-based plan for administering vaccines according to age, previous doses, medical conditions, exposure risks, and public-health guidance. Schedules vary by country and are updated as recommendations change.

Vaccinations/Immunizations During Pregnancy

Vaccines given during pregnancy are selected according to safety, disease risk, season, exposure, and local recommendations. Inactivated vaccines such as influenza and Tdap are commonly used when indicated, while some live vaccines are deferred until after pregnancy.

Vaccine

A vaccine trains the immune system to recognize a specific infection or toxin and respond more effectively. Vaccination lowers the risk of severe disease and helps protect communities.

Vaccine Allergy

An allergic reaction to a vaccine or one of its ingredients. Reactions may be local and mild or, rarely, involve hives, swelling, breathing difficulty, or anaphylaxis; suspected reactions are assessed to identify the responsible ingredient and guide future

vaccination.

Vaccine-Associated Paralytic Poliomyelitis

An extremely rare form of polio paralysis caused by a weakened poliovirus used in the oral polio vaccine changing back to a harmful form.

Alternate Names:

VAPP

Vaccines

Preparations that train the immune system to recognize a particular germ or toxin before exposure. They reduce the risk of infection and severe illness and may also reduce complications and spread.

Vaccines and Immunizations

Vaccines train the immune system to recognize specific pathogens or toxins and reduce the risk of infection, severe disease, complications, and transmission.

Vaccinia

A virus used to make smallpox vaccines. Rare accidental infection can cause a sore at the contact site or more widespread illness, especially in people with weakened immunity.

Vaccinia Virus

Vaccinia virus is a poxvirus used to make smallpox vaccines and studied in some experimental cancer treatments; accidental infection is uncommon but possible.

VACTERL Association

A pattern of birth defects affecting several of the spine, anus, heart, food pipe, windpipe, kidneys, or limbs. There is no single test; the pattern of differences is used to identify it and rule out other conditions.

Vacuum-Assisted Delivery

A vaginal birth assisted by a suction cup placed on the baby's scalp when labor is not progressing or the baby needs to be born promptly. It is used only when the cervix is fully open and the baby's position and head size are suitable. Possible complications include scalp injury, bleeding, or tears.

Vacuum Curettage

A procedure that removes tissue from the uterus using suction, commonly for uterine evacuation or endometrial sampling. Risks include bleeding, infection, retained tissue, and rarely uterine injury.

Vacuum Delivery

Assisted vaginal birth using a suction cup placed on the baby's scalp. It may be used when labor is not progressing or the baby needs to be born promptly and can cause scalp injury, bleeding, or tears.

Vacuum Erection Devices

Devices with a cylinder and pump that draw blood into the penis to produce an erection. A flexible ring may hold the erection during sex; bruising, numbness, or discomfort can occur, especially if the ring is left on too long.

Alternate Names:

Vacuum Erection Pump; Penis Pump

Vacuum Extractor

A cup-shaped device applied to the fetal scalp to assist vaginal delivery when specific maternal or fetal indications are present.

Vagal Maneuver

A physical action that affects the vagus nerve and can slow the heart's electrical activity. Examples include bearing down and, in clinical settings, cer-

tain pressure or cold-stimulation methods. These maneuvers may help assess or stop some fast heart rhythms.

Alternate Names:

Vagal Stimulation Technique; Parasympathetic Provocative Maneuver

Vagal Nerve Stimulation

A treatment that uses an implanted device to send small electrical signals to the vagus nerve in the neck. It may be used for selected cases of epilepsy or depression that have not improved with other treatments.

Alternate Names:

VNS

Vagal Paraganglioma

A usually slow-growing tumor arising from nerve-related cells near the vagus nerve in the neck. It may cause a neck mass, hoarseness, swallowing difficulty, or nerve symptoms and can be identified with imaging and specialist assessment.

Vagina

A muscular, elastic canal connecting the cervix to the vaginal opening. It allows menstrual blood to leave the body, receives a penis or other objects during vaginal sex, and serves as the birth canal.

Vagina Carcinoma

Cancer arising from the vagina. It may cause unusual bleeding, discharge, pain, or a visible sore, although early cancer may cause no symptoms; examination and tissue testing are needed for diagnosis.

Vaginal Agenesis

A condition in which the vagina is absent or has not fully formed before birth. It may occur with differences in the uterus, kidneys, hearing, or spine; care is individualized and may include counseling, gradual treatment, or surgery when wanted.

Vaginal Atresia

Absence or complete blockage of the vaginal canal

from birth. It may cause absent menstrual flow, repeated monthly pelvic pain, or difficulty with penetration.

Vaginal Atrophy

Thinning, dryness, and irritation of vaginal tissues, usually caused by lower estrogen after menopause or other hormone changes. It can cause burning, itching, pain during sex, bleeding, or urinary symptoms and may improve with moisturizers, lubricants, or prescribed hormone treatment.

Alternate Names:

Atrophic Vaginitis; Vulvovaginal Atrophy; Genitourinary Syndrome of Menopause; GSM; Vaginal Dryness

Vaginal Bleeding

Unexpected, unusually heavy, or prolonged bleeding from the vagina, including bleeding between periods, after sexual intercourse, during pregnancy, or after menopause. Causes include hormonal changes, infection, pregnancy-related conditions, structural lesions, medications, and cancer.

Vaginal Bleeding Between Periods

Bleeding between menstrual periods may result from contraception, infection, pregnancy, polyps, fibroids, hormonal changes, or cancer. Persistent or heavy bleeding can have a serious cause.

Vaginal Bleeding During Early Pregnancy

Bleeding from the vagina during the first part of pregnancy can result from cervical changes, miscarriage, ectopic pregnancy, infection, or other conditions. A small amount may occur without a serious cause, but bleeding with heavy loss, severe or one-sided pain, shoulder pain, dizziness, or fainting can indicate a serious problem.

Vaginal Bleeding During Late Pregnancy

Bleeding from the vagina later in pregnancy may be caused by placenta previa, placental separation, labor, cervical disease, or other complications. Significant bleeding can be a serious pregnancy complication.

Vaginal Bleeding In Early Pregnancy

Alternate name; see *Vaginal Bleeding During Early Pregnancy*.

Vaginal Bleeding In Late Pregnancy

Alternate name; see *Vaginal Bleeding During Late Pregnancy*.

Vaginal Bleeding In Pregnancy

Broad index label for bleeding during pregnancy; see *Vaginal Bleeding During Early Pregnancy* and *Vaginal Bleeding During Late Pregnancy*. Heavy bleeding or bleeding with pain, dizziness, fainting, or reduced fetal movement can indicate a serious pregnancy complication.

Vaginal Cancer

A rare cancer of the vagina, most often arising from its surface lining. It may cause bleeding, discharge, pain, or a lump; treatment depends on its type, size, location, and spread.

Alternate Names:

Vaginal Carcinoma; Malignant Vaginal Neoplasm

Vaginal Candidiasis

Alternate name; see *Yeast infection (vaginal)*.

Vaginal Cuff

The upper end of the vagina that is closed with stitches after the uterus is removed during a hysterectomy.

Vaginal Cuff Dehiscence

An opening of the stitched upper end of the vagina after hysterectomy. It may cause pelvic pain, bleeding, discharge, or tissue bulging through the opening.

Vaginal Cysts

Vaginal cysts are fluid-filled or tissue-lined sacs in or beside the vaginal wall, commonly benign but sometimes causing pain, pressure, infection, or obstruction.

Vaginal Dilator

A smooth device used to gently stretch or keep open the vaginal canal when it has become narrow or short because of scarring, surgery, radiation, or a difference present from birth.

Vaginal Discharge

Vaginal discharge may be normal or may indicate infection, inflammation, hormonal change, or another condition. Normal discharge is usually clear to whitish and odourless and varies with the menstrual cycle, pregnancy, sexual arousal, and some contraceptives.

Vaginal Dryness

Reduced vaginal lubrication, commonly associated with menopause, breastfeeding, hormonal changes, medications, or irritation. It may cause discomfort, itching, painful intercourse, or minor bleeding.

Vaginal Fistula

An abnormal passage between the vagina and another organ, commonly the bladder or rectum. It may cause continuous urine or stool leakage, infection, skin irritation, and emotional distress.

Vaginal Foreign Body

An object retained in the vagina, most often a tampon or other inserted material. It may cause discharge, odor, bleeding, pain, or infection.

Vaginal Fornix

One of the recesses surrounding the cervix where the vagina meets the cervix. The posterior fornix is adjacent to the peritoneal cul-de-sac and is relevant in pelvic examination and some procedures.

Vaginal Fusion And Duplication

Birth-related differences in which the vaginal canal is partly joined, divided, or duplicated. They may occur with abnormalities of the uterus, cervix, urinary tract, or external genitalia and may cause obstruction, pain, menstrual problems, or difficulty with intercourse.

Vaginal Health

Vaginal health includes normal vaginal tissues, fluids, microorganisms, and comfort. Persistent odor, itching, pain, bleeding, or unusual discharge can indicate infection or another condition.

Vaginal Hematoma

A collection of blood within the vaginal wall or surrounding tissues, usually caused by childbirth, trauma, or surgery and potentially producing severe pain, swelling, or blood loss.

Vaginal Hemorrhage

Heavy or clinically significant bleeding from the vagina. Causes include childbirth, pregnancy complications, trauma, infection, structural disease, hormonal disorders, and gynecologic cancer; severe or pregnancy-related bleeding can be life-threatening.

Vaginal Hypoplasia

Vaginal hypoplasia is underdevelopment of the vagina, usually present from birth. It may occur with other reproductive or urinary-tract differences and can affect menstruation, sexual function, or fertility.

Vaginal Hysterectomy

Surgical removal of the uterus through the vagina. It may be used for selected benign uterine conditions and usually avoids an abdominal incision, although suitability depends on anatomy and disease.

Vaginal Inflammation

Alternate name; see *Vaginitis*.

Vaginal Intercourse

The insertion of the penis into the vagina for sexual pleasure or reproduction. The most common form of sexual intercourse. Vaginal intercourse can lead to pregnancy if sperm are deposited in the vagina.

Vaginal Intraepithelial Neoplasia

Abnormal, precancerous cells in the surface lining of the vagina, often related to human papillomavirus. The changes vary from mild to severe and may

require monitoring, treatment, or removal.

Vaginal Introitus

The entrance to the vagina. It is part of the external genital area and may be examined when assessing pain, infection, injury, scarring, or pelvic-floor problems.

Vaginal Itching

Itching or irritation of the vulva or vagina caused by candidiasis, bacterial vaginosis, sexually transmitted infections, dermatitis, hormonal changes, or other conditions. It may occur with discharge, odor, soreness, or burning.

Vaginal Laceration

A tear in the vaginal tissue, often caused by childbirth, sexual activity, trauma, or a medical procedure. It may cause pain, swelling, or bleeding.

Vaginal Lubrication

Natural moisture made by the vaginal tissues and nearby glands. It usually increases with sexual arousal and may decrease with hormonal changes, some medicines, illness, or irritation.

Vaginal Membrane

A thin fold of tissue associated with the vagina. The term may refer to the hymen at the vaginal opening or to an abnormal membrane that blocks the vaginal canal.

Vaginal Microbiome

The community of microorganisms living in the vagina, commonly dominated by *Lactobacillus* species that help maintain an acidic environment. Changes in this community may contribute to bacterial vaginosis, candidiasis, or other symptoms.

Vaginal Mucosa

The moist inner lining of the vagina. It contains folds that allow the vaginal canal to stretch and helps protect the tissue.

Vaginal Odor

An unusual or unpleasant odor from vaginal discharge that may result from bacterial vaginosis, infection, retained material, hormonal changes, or other conditions.

Vaginal Opening

The external entrance to the vagina. It is part of the vulvar vestibule and may be affected by infection, inflammation, trauma, scarring, or congenital variation.

Vaginal Pessary

A removable device placed in the vagina to support the vaginal walls or nearby pelvic organs, usually for pelvic-organ prolapse or some forms of urine leakage.

Vaginal pH

A measure of how acidic the vagina is. The vaginal environment is normally mildly acidic, and the pH can change with hormones, semen, blood, medicines, or infection.

Vaginal Prolapse

Downward bulging of a vaginal wall because the tissues supporting the vagina have weakened. The bulge may involve the bladder, rectum, or the top of the vagina after hysterectomy.

Vaginal Rugae

Soft folds in the inner lining of the vagina that allow it to stretch and return toward its usual shape.

Vaginal Seeding

Placing vaginal fluid on a baby born by cesarean section in an attempt to expose the baby to the parent's vaginal microorganisms. Clear health benefits have not been established, and harmful infections may be transmitted.

Vaginal Speculum

An instrument inserted into the vagina and gently opened to separate the vaginal walls and visualize the vagina and cervix. It may be used for pelvic

examination, cervical cytology such as a Pap test, swab collection, assessment of bleeding or discharge, and selected procedures. Size and design are chosen according to anatomy, comfort, and the clinical purpose.

Vaginal Stenosis

Narrowing or shortening of the vaginal canal, which may result from surgery, radiation, scarring, inflammation, trauma, or congenital development. It can cause pain, difficult examination, or difficulty with penetration.

Vaginal Swab

A sample of fluid or cells collected from the vagina for laboratory testing, often to look for infection or other changes.

Vaginal Trauma

Injury to the vaginal tissues caused by childbirth, sexual activity, foreign objects, procedures, or blunt or penetrating trauma. It may cause bleeding, pain, swelling, or urinary symptoms; severe bleeding or deep injury can be serious.

Vaginal Ultrasound Probe

A specialized endocavitary ultrasound transducer used through the vagina to produce images of the uterus, cervix, ovaries, nearby pelvic structures, or an early pregnancy. It sends and receives sound waves and does not use ionizing radiation.

Alternate Names:

Endovaginal Transducer Transvaginal Ultrasound Transducer

Vaginal Vault Prolapse

Descent of the top of the vagina into or through the vaginal opening, usually after removal of the uterus. It may cause pelvic pressure, a bulge, backache, or difficulty emptying the bladder or bowel; pelvic-floor therapy, a support device, or surgery may help.

Alternate Names:

Post-Hysterectomy Vault Prolapse; Apical Prolapse

Vaginal Vestibule

The space of the vulva between the labia minora that contains the external openings of the urethra and vagina and the ducts of the greater and lesser vestibular glands.

Vaginal Wall

The layers of muscle, connective tissue, and moist lining that form the walls of the vaginal canal.

Vaginal Yeast Infection

Alternate name; see *Vulvovaginal Candidiasis*.

Vagina Neoplasm

An abnormal growth in the vagina that may be benign, precancerous, or cancerous. It can cause bleeding, discharge, pain, or a lump, although early growths may cause no symptoms.

Vaginectomy

Surgical removal of part or all of the vagina, usually to treat selected cancers or severe disease; effects may include changes in sexual function, fertility, urination, and bowel function.

Vaginismus

Alternate name; see *Genito-Pelvic Pain/Penetration Disorder*.

Vaginitis

Inflammation or irritation of the vagina that may cause discharge, itching, burning, odor, pain, or discomfort with urination or sex. Causes include infections, hormones, chemicals, allergies, and tissue dryness.

Vaginoplasty

Vaginoplasty is surgery to create, repair, or reshape the vagina. It may be performed for congenital differences, injury, cancer treatment, pelvic-floor problems, or gender-affirming care.

Vaginospasm

Alternate name; see *Genito-Pelvic Pain/Penetration Disorder*.

Vagotomy

Surgery that cuts selected branches of the vagus nerve to reduce signals that stimulate stomach acid and movement. It was once used for difficult stomach ulcers but is now uncommon because medicines and less invasive treatments are available.

Vagus Nerve

The tenth cranial nerve, carrying signals between the brain and the heart, lungs, throat, voice box, and digestive tract. It helps regulate heart rate, breathing, swallowing, voice, and digestion.

Vagus Nerve Stimulation

A treatment that sends regular, mild electrical pulses to the vagus nerve through an implanted device in the chest or, in some settings, a handheld device. It is used for selected epilepsy, treatment-resistant depression, and other conditions; benefits may take time and side effects can include voice change, cough, or throat discomfort.

Valacyclovir

An antiviral medicine that the body changes into acyclovir to stop herpes viruses from multiplying. It treats cold sores, genital herpes, and shingles; the dose may need adjustment in kidney disease, and excessive levels can affect the nervous system.

Valganciclovir

An antiviral medicine used mainly to prevent or treat cytomegalovirus infection after transplantation. The body changes it into ganciclovir, which blocks viral multiplication; it can lower blood counts, injure the kidneys, affect fertility, and harm a fetus.

Valgus

A limb or joint deformity in which the part farther from the body bends outward, away from the body's center line. Examples include a bunion and knock-knees.

Valgus Stress Test

A physical examination manoeuvre used to assess the structural integrity of medial collateral ligaments, most commonly at the knee or elbow. A

medial-directed force is applied to the joint while stabilizing the limb; excessive joint opening, laxity, or pain indicates a medial collateral ligament sprain or rupture.

Valinemia

A rare inherited condition in which the body cannot process the amino acid valine normally. High valine levels may cause feeding problems, low muscle tone, developmental delay, or other nervous-system symptoms.

Valley Fever

The common name for coccidioidomycosis, a fungal infection caused by *Coccidioides* species and acquired by inhaling airborne spores from soil. It usually causes a mild respiratory illness but can disseminate to skin, bone, joints, or meninges, especially in people at higher risk.

Valproate

An antiseizure medicine also used for selected mood disorders. It can affect the liver, pancreas, blood cells, weight, and fetal development, so age, pregnancy possibility, other illnesses, and medicines must be considered.

Alternate Names:

Valproic Acid; Divalproex Sodium

Valproate Toxicity

Overdose or adverse exposure causing CNS depression, vomiting, hyperammonemic encephalopathy, hepatotoxicity, pancreatitis, thrombocytopenia, metabolic acidosis, or cerebral edema. Measure serum valproate, glucose, ammonia, liver tests, and acid-base status; L-carnitine may be considered and severe poisoning may require hemodialysis.

Valproic Acid

A medicine used for certain seizures, bipolar disorder, and migraine prevention. It can cause liver injury, pancreatitis, birth defects, and developmental harm during pregnancy.

Valproic Acid Toxicity

Acute overdose or adverse metabolic toxicity of the

broad-spectrum antiepileptic agent valproate, characterized clinically by central nervous system depression, high anion gap metabolic acidosis, hyperammonemia (due to urea cycle inhibition) with encephalopathy, and drug-induced microvesicular hepatic necrosis; treated with L-carnitine.

Valrubicin

A chemotherapy medicine placed directly into the bladder for selected bladder cancers that have not responded adequately to other treatment. It can cause bladder irritation, blood in the urine, infection, and, rarely, effects throughout the body.

VRE Infection

An infection caused by vancomycin-resistant enterococci, bacteria that commonly live in the intestine but can cause urinary-tract, wound, bloodstream, heart-valve, or other infections. Treatment depends on the infection site and susceptibility testing because usual antibiotics may not work.

Visceral Pain

Pain arising from internal organs, often felt as pressure, cramping, aching, or poorly localized discomfort rather than sharp surface pain. It may result from stretching, inflammation, reduced blood flow, obstruction, or injury of an organ.

Valsalva

Straining while trying to breathe out against a closed throat, like bearing down during a bowel movement. It changes pressure in the chest and can affect heart rate and blood pressure, so it is not safe for everyone.

Valsalva Maneuver

Alternate name; see *Valsalva manoeuvre*.

Valsalva Retinopathy

Preretinal (subhyaloid or sub-internal limiting membrane) hemorrhage occurring within the macula following a sudden, dramatic rise in intrathoracic or intra-abdominal pressure (such as from forceful coughing, vomiting, or heavy lifting) that transmits back through the valveless venous system into

retinal capillaries.

Valsalva's Manoeuvre

Forceful straining while trying to breathe out against a closed airway, like bearing down during a bowel movement. It changes pressure in the chest and can affect heart rate and blood pressure; it is used in selected tests but may be unsafe for some people.

Alternate Names:

Valsalva Maneuver

Valsartan

Valsartan is an angiotensin-II receptor blocker used for hypertension, heart failure, and selected cardiovascular indications; hyperkalemia, renal-function changes, hypotension, and fetal toxicity are important risks.

Valves

Structures that permit fluid or blood to move predominantly in one direction and prevent backward flow; cardiac valves and venous valves are important examples.

Valvotomy

Surgical or catheter-based division of narrowed valve tissue to improve blood flow, most often performed for selected stenotic heart valves.

Valvulae Conniventes

Large, permanent transverse circular folds of the mucous membrane and submucosa that project into the lumen of the small intestine (most prominent and numerous in the jejunum), which do not disappear with intestinal distension and act to triple the mucosal surface area for absorption.

Alternate Names:

Plicae Circulares; Kerckring Folds

Valvular Disease

Alternate term; see *Heart valve disease*.

Valvular Endocarditis

Alternate name; see *Endocarditis*.

Valvular Heart Disease

A broad spectrum of structural and functional disorders affecting one or more of the four cardiac valves (aortic, mitral, tricuspid, pulmonic), classified hemodynamically as valvular stenosis (narrowing and outflow obstruction) or valvular regurgitation (insufficiency and backward flow).

Alternate Names:

VHD

Valvular Insufficiency

Incomplete closure of a heart valve, allowing blood to leak backward when the heart contracts or relaxes. It can affect the mitral, aortic, tricuspid, or pulmonary valve and may eventually strain the heart.

Valvuloplasty

A procedure used to widen or repair a narrowed or abnormal heart valve, by balloon catheter or open surgery depending on the valve and condition.

Valvulotomy

A procedure that cuts open a narrowed heart valve to improve blood flow. It may be performed with a catheter or surgery; the valve can leak afterward and narrowing may recur.

Vancomycin

An antibiotic used for selected serious bacterial infections and, by mouth, for certain infections of the large intestine. It can cause infusion reactions, kidney injury, hearing problems, or low blood counts and requires medical monitoring.

Vancomycin Flushing Reaction

A reaction that can occur when vancomycin is given too quickly into a vein. It may cause flushing, warmth, itching, and redness of the face, neck, and upper body.

Alternate Names:

Red Man Syndrome; Red Neck Syndrome

Vancomycin-Resistant Enterococcus

Enterococcus bacteria that are resistant to van-

comycin, usually because of altered cell-wall precursors. VRE can cause healthcare-associated urinary, bloodstream, wound, or other infections and may require susceptibility-guided treatment.

Van der Woude Syndrome

An autosomal dominant congenital disorder caused by mutations in the IRF6 gene, characterized by the combination of paramedian lower-lip pits (fistulae), cleft lip, and cleft palate, representing the most frequent form of syndromic orofacial clefting.

Alternate Names:

VWS; Lip-Pit Syndrome

Vandetanib

A targeted cancer medicine used for selected medullary thyroid cancers. It blocks signals that help cancer cells grow and blood vessels form; diarrhea, high blood pressure, skin effects, and dangerous heart-rhythm changes require monitoring.

Vaping

Vaping uses an electronic device to heat a liquid and produce an aerosol for inhalation. Aerosols may contain nicotine and other substances that can harm the lungs and cause dependence.

Vaporiser

A device that converts a liquid medicine or volatile substance into a vapor for inhalation or controlled delivery, such as in anesthesia.

Variable Decelerations

Brief drops in a baby's heart rate that vary in timing and shape, often caused by pressure on the umbilical cord during labor. Occasional drops may be harmless, but frequent or prolonged drops require assessment of the baby's oxygen supply.

Variant Angina Pectoris

Chest pain caused by a temporary tightening of an artery supplying the heart, often occurring at rest or at night. Episodes may be severe and can disturb the heart rhythm; sudden or prolonged chest pain needs emergency care.

Alternate Names:

Prinzmetal Angina; Vasospastic Angina

Variant CJD

Alternate name; see *Creutzfeldt-Jakob disease*.

Variant Classification

The process of estimating whether a genetic change is harmless, uncertain, or likely to cause disease. Specialists use laboratory evidence, family history, population data, and the person's clinical findings.

Varibaculum Cambriense

A bacterial species in the genus *Varibaculum* reported from human clinical specimens. Its role may be opportunistic and requires identification with the clinical context and susceptibility data.

Variceal Band Ligation

A procedure using a flexible camera to place small bands around enlarged veins in the food pipe. The bands stop blood flow through the veins and are used to control or prevent bleeding.

Alternate Names:

Endoscopic Variceal Ligation; EVL

Variceal Hemorrhage

Severe bleeding from enlarged, fragile veins in the food pipe or stomach, usually caused by high pressure in the liver's blood vessels. It can cause vomiting blood, black stools, shock, and death without urgent treatment.

Varicella

A primary infection with varicella-zoster virus that causes fever and a generalized itchy rash. See Chickenpox.

Alternate Names:

Chickenpox; Varicella-Zoster Virus Infection

Varicella-Zoster Virus

The virus that causes chickenpox and shingles. After chickenpox, it can remain inactive in nerve tissue and reactivate years later as a painful, blistering rash called shingles.

Varicellovirus

Varicellovirus is a genus of herpesviruses that includes varicella-zoster virus, the cause of chickenpox and shingles.

Varices

Abnormally dilated and tortuous veins, commonly occurring in the legs or in the oesophagus and stomach as a result of portal hypertension.

Varicocele

Enlargement of veins in the scrotum, often on the left. It may cause aching, a soft "bag of worms" feeling, testicular growth differences, or reduced fertility, but many cause no symptoms.

Varicocele Embolization

A procedure that uses a thin tube to place coils or another material in enlarged scrotal veins. This blocks abnormal backward blood flow and reduces pressure in the veins.

Varicose Ulcer

An open sore near the ankle caused by long-term poor drainage through the leg veins. It may be surrounded by swelling or skin discoloration and often needs compression and treatment of the underlying vein problem.

Varicose Veins

Enlarged, twisted superficial veins, usually in the legs, caused by weak or damaged vein walls or valves that allow blood to pool and flow backward. They may cause visible bulging veins, aching, heaviness, itching, cramps, swelling, skin discoloration, bleeding, superficial inflammation or clotting, and difficult-to-heal venous ulcers.

Varicose Veins and Venous Insufficiency

Enlarged superficial veins and inadequate return of blood from the legs because venous valves or the vein wall do not work effectively. Aching, heaviness, swelling, skin discoloration, dermatitis, and ulcers may occur.

Variegate Porphyria

An inherited disorder of heme production that can cause attacks of abdominal pain, vomiting, nerve symptoms, confusion, or dark urine and can also cause fragile, blistering skin after sunlight exposure.

Variola

A highly contagious and deadly disease caused by variola virus, eradicated globally by 1980 through vaccination. See Smallpox.

Varix

An abnormally dilated, tortuous vein; multiple varices commonly occur in portal hypertension or chronic venous disease.

Varus

A limb or joint deformity in which the part farther from the body bends inward, toward the body's center line. Examples include bowlegs and some inward-turning foot deformities.

Varus Stress Test

A clinical examination manoeuvre used to evaluate the lateral collateral ligaments of a joint, particularly the knee or elbow. A lateral-directed force is applied across the joint line while stabilizing the limb; increased laxity, gapping, or localized pain signifies injury to the lateral collateral ligament complex.

Vas

A duct or vessel; in reproductive anatomy, the vas deferens transports sperm from the epididymis toward the ejaculatory duct.

Vasa Deferentia

The paired muscular ducts that transport mature sperm from the epididymides toward the ejaculatory ducts during ejaculation.

Alternate Names:

Ductus Deferentes; Vas Deferens

Vasa Efferentia

Small tubes that carry sperm from the testicle's

collecting channels to the epididymis, where sperm mature. They also remove some fluid and help move sperm onward.

Vasa Previa

A pregnancy complication in which fetal blood vessels run across or near the cervix without the usual protection of the placenta or umbilical cord. If the membranes break, the vessels can tear and cause rapid fetal blood loss, so specialist planning is essential.

Vasa Recta

Long, hairpin-shaped blood vessels in the inner part of the kidney. They run beside the loops of Henle and help the kidneys concentrate urine.

Vasa Vasorum

Small blood vessels in the walls of large arteries and veins. They supply oxygen and nutrients to the outer parts of these vessel walls.

Vascular

Relating to blood vessels or, sometimes, lymphatic vessels. Vascular conditions include narrowed or blocked arteries, aneurysms, blood clots, abnormal vessel connections, and problems with veins; the term may also describe tests, surgery, or medicines involving these vessels.

Vascular Access

A route into a blood vessel for medicines, fluids, blood tests, monitoring, or dialysis. It may be a short-term catheter, a surgically joined artery and vein, or a synthetic graft, depending on the purpose and expected duration.

Vascular Access For Hemodialysis

A route that allows blood to leave the body and return during dialysis. It may be a joined artery and vein, a synthetic graft, or a large vein catheter; each has different risks of infection, clotting, and failure.

Vascular Balloon Catheter

An inflatable balloon mounted at the distal tip of a flexible vascular catheter used to dilate stenotic or occluded blood vessels during angioplasty, deliver and expand endovascular stents, or temporarily occlude vascular flow.

Alternate Names:

Angioplasty Balloon; Vascular Balloon Dilator; Balloon Catheter

Vascular Bed

The network of blood vessels supplying a particular organ or tissue. Its vessels widen or narrow to adjust blood flow according to the tissue's needs.

Vascular Bypass

Surgery that uses a vein or artificial tube to carry blood around a blocked part of an artery and restore blood flow.

Alternate Names:

Surgical Bypass; Bypass Grafting; Arterial Bypass Graft

Vascular Claudication

Alternate name; see *Claudication*.

Vascular Clip

A small device placed during a procedure to close or control a blood vessel. It may stop bleeding, prevent blood flow to a selected area, or secure a vessel permanently.

Alternate Names:

Hemostatic Clip; Surgical Vessel Clip; Ligation Clip

Vascular Compliance

The ability of a blood vessel to stretch when pressure or blood volume increases. More compliant vessels can hold more blood with a smaller rise in pressure.

Alternate Names:

Angiopathic Complications; Vascular Adverse Events

Vascular Complications

Problems involving blood vessels after disease, injury, or a procedure, such as bleeding, hematoma,

thrombosis, embolism, vessel injury, or reduced blood flow to a limb. Symptoms and urgency depend on the vessel and tissue affected.

Vascular Dementia

Problems with thinking, memory, mood, or walking caused by strokes or long-term damage to the brain's small blood vessels. Symptoms may appear suddenly or gradually, and treatment focuses on preventing further vessel damage and supporting daily function.

Alternate Names:

VaD; Multi-Infarct Dementia; Vascular Cognitive Impairment

Vascular Disease

Vascular disease affects arteries, veins, or lymphatic vessels and includes atherosclerosis, aneurysm, peripheral artery disease, venous thrombosis, varicose disease, and inflammatory disorders. Symptoms and treatment depend on the vessel and may involve risk-factor control, medicines, procedures, or surgery.

Vascular Ehlers-Danlos Syndrome

A rare inherited connective-tissue disorder that makes arteries and hollow organs unusually fragile. It may cause thin translucent skin, easy bruising, characteristic facial features, or serious spontaneous blood-vessel or bowel rupture; specialist care and genetic counseling are important.

Alternate Names:

vEDS; Ehlers-Danlos Syndrome Type IV

Vascular Embolic Particles

Small materials placed in a blood vessel during a procedure to block blood flow. They may be used to control bleeding or reduce blood flow to a tumor, fibroid, or other abnormal area.

Alternate Names:

Vascular Embolization Particle; PVA Particles

Vascular Embolization

Intentional blockage of a blood vessel with material delivered through a catheter. It may stop bleeding, reduce blood flow to a tumor, or close an aneurysm

or abnormal vessel connection.

Alternate Names:

Catheter Embolization; Therapeutic Embolization

Vascular Embolization Coil

A catheter-delivered wire device used to block selected blood vessels, often to treat aneurysms or bleeding.

Alternate Names:

Endovascular Coil

Vascular Embolization Plug

A vascular occlusion device used to block a selected vessel under image guidance. A device placed in a blood vessel to block selected blood flow during image-guided treatment.

Alternate Names:

Vascular Occlusion Plug; Embolization Plug; Amplatzer Plug

Vascular Endothelial Growth Factor

A protein that helps new blood vessels form and makes blood vessels more leaky. Some medicines block it to treat certain eye diseases and cancers.

Alternate Names:

VEGF; Vascular Permeability Factor

Vascular Endothelial Growth Factor Inhibitor

A medicine that blocks vascular endothelial growth factor, a protein that helps blood vessels grow. These medicines are used for some cancers and eye diseases involving abnormal new blood vessels.

Alternate Names:

Anti-VEGF Agent

Vascular Endothelial Growth Factor Inhibitors

Medicines that block vascular endothelial growth factor and reduce abnormal blood-vessel growth or leakage. They are used for some eye diseases and cancers.

Alternate Names:

Anti-VEGF Agents; VEGF Neutralizers

Vascular Forceps

Surgical forceps designed to handle blood vessels, clots, tissue, or medical materials during vascular procedures. Appropriate use helps avoid crushing or tearing delicate vessels.

Alternate Names:

Vascular Surgical Forceps; Atraumatic Clamp

Vascular Graft

A tube used to replace or bypass a damaged or blocked blood vessel. It may be made from a person's vein or from a synthetic material; possible problems include infection, bleeding, narrowing, or a clot blocking the graft.

Vascular Graft Patency

The continued openness and useful blood flow through a blood-vessel graft or bypass. A clot, narrowing, infection, or scar growth can block it, so examination and sometimes ultrasound are used for monitoring.

Vascular Hemostat

A surgical clamp used to temporarily occlude a blood vessel and control bleeding.

Alternate Names:

Vascular Clamp; Atraumatic Hemostasis Forceps

Vascular Imaging

Tests that show blood vessels and sometimes measure blood flow. Ultrasound, CT, MRI, or catheter-based imaging can find narrowing, blockage, aneurysm, dissection, clot, bleeding, or abnormal vessels; the safest test depends on the body area, urgency, kidney function, and contrast risks.

Vascularity

The amount and arrangement of blood vessels supplying a tissue or growth. A highly vascular area may heal or bleed differently and may look different on imaging; blood supply can also affect some treatments.

Vascular Laser Therapy

A treatment that uses laser energy to close or change

selected blood vessels. The laser may be applied through the skin or through a thin tube.

Alternate Names:

Pulsed Dye Laser; PDL; Vascular Laser Therapy

Vascular Ligation

Surgical tying, clipping, or sealing of a blood vessel to stop bleeding or redirect blood flow. It may be used during surgery or to treat selected abnormal vessels.

Alternate Names:

Vascular Occlusion; Vessel Clipping

Vascular Malformation

A blood-vessel or lymph-vessel structure that developed abnormally before birth. It may cause a skin mark, swelling, pain, bleeding, or pressure on nearby organs; effects depend on its type and location.

Vascular Needle Holder

A surgical instrument used to hold and guide fine suture needles during repair of blood vessels. It permits precise stitches while minimizing crushing or tearing of delicate vessel walls.

Alternate Names:

Vascular Needle Holder; Castroviejo Needle Holder

Vascular Pain

Pain caused by impaired blood flow, often appearing in a limb with exertion as claudication or, in more severe disease, at rest.

Vascular Patch Graft

A piece of biological or synthetic material sewn onto a blood vessel to widen or repair it.

Alternate Names:

Vascular Patch Graft; Angioplasty Patch

Vascular Retraction

To pull a vessel or tissue away from an operative field using a surgical retractor.

Alternate Names:

Vessel Retraction; Surgical Vessel Exposure

Vascular Ring

A birth defect in which blood vessels around the heart form a ring that can press on the windpipe or food pipe. It may cause noisy breathing, cough, repeated chest infections, swallowing difficulty, or feeding problems. Some people need no treatment; symptomatic rings may require surgery.

Vascular Scissors

A surgical instrument with two blades used to cut tissue, sutures, dressings, or other materials during vascular procedures.

Alternate Names:

Vascular Scissors; Potts Scissors

Vascular Shunt

A surgically created or implanted pathway that redirects blood or another fluid from one vessel or body space to another.

Alternate Names:

Vascular Shunt; Bypass Shunt

Vascular Sponge

A sterile absorbent material used during blood-vessel procedures to absorb blood, apply pressure, or protect delicate tissue.

Alternate Names:

Vascular Laparotomy Sponge; Surgical Cottonoid

Vascular Staple

A small metal or polymer device used to close tissue or join selected blood-vessel structures. It provides rapid closure but can cause narrowing, bleeding, thrombosis, or tissue injury if unsuitable or misplaced.

Alternate Names:

Vascular Surgical Staple; Vessel Closure Device

Vascular Stent

A small mesh or tube placed inside a narrowed or blocked vessel to help keep it open.

Alternate Names:

Endovascular Stent; Vascular Prosthesis

Vascular Stent Balloon

A balloon on a catheter used to expand a vascular stent against the vessel wall and restore an open channel. Inflation can cause vessel injury, bleeding, clotting, or rarely rupture.

Alternate Names:

Stent-Expansion Balloon; Angioplasty Balloon

Vascular Stent-Graft

A fabric-covered metal frame placed inside a blood vessel to reinforce a weak wall or seal an aneurysm, tear, or leak. Follow-up imaging checks for movement, blockage, or leakage around the graft.

Alternate Names:

Endovascular Graft; Aortic Stent-Graft

Vascular Suction

A suction device used during a vascular procedure to remove blood or other fluid from the operative field.

Alternate Names:

Vascular Suction Cannula; Frazier Suction

Vascular Surgery

Operations that repair, widen, replace, or reroute blood vessels to restore circulation or prevent bleeding. Procedures may treat aneurysms, blocked arteries, blood-vessel injuries, or problems with veins and dialysis access.

Vascular System

The network of arteries, veins, and capillaries that carries blood throughout the body. It delivers oxygen, nutrients, and hormones to tissues and carries carbon dioxide and other waste products away. Disease may narrow, weaken, block, or inflame these vessels.

Vascular Thrombectomy

Removal of a blood clot from a blood vessel using surgery or a catheter-based procedure. The aim is to restore blood flow and protect tissue from damage when a clot blocks an important artery or vein.

Alternate Names:

Vascular Thrombectomy; Clot Extraction

Vascular Tissue Adhesive

A liquid material used to block selected blood vessels during image-guided embolization. Doctors inject it through a catheter to control bleeding, close an abnormal vessel, or reduce blood flow to a tumor.

Alternate Names:

Cyanoacrylate Embolization Glue; Endovascular Embolic Adhesive

Vascular Tone

The usual degree of tightening in the muscle within blood-vessel walls. It helps control vessel width, blood flow, and blood pressure.

Vascular Trauma

Injury to an artery or vein caused by a blunt blow, penetrating wound, crush injury, or medical procedure. It may cause severe bleeding or loss of blood flow and needs urgent assessment of circulation and nearby nerves.

Vascular Ulcer

A persistent open wound caused or maintained by poor blood flow, high pressure in the veins, loss of protective feeling, or another blood-vessel problem. It usually affects the legs or feet and may heal slowly or become infected.

Alternate Names:

Vascular Ulceration; Ischemic Ulcer; Arterial Ulcer

Vasculitic Neuropathy

Nerve damage caused by inflammation of the small blood vessels that supply nerves. It often causes painful, uneven numbness or weakness and may affect several limbs as the vessel inflammation continues.

Vasculitis

Inflammation of blood vessels that can narrow them, reduce blood flow, or cause bleeding and tissue damage. It may affect large, medium, or small vessels and can involve the skin, nerves, kidneys, lungs, or other organs.

Alternate Names:

Angiitis; Arteritis; Blood Vessel Inflammation

Vas Deferens

A muscular tube that carries sperm from the epididymis toward the urethra during ejaculation.

Vasectomy

A permanent contraceptive procedure in which the vas deferens are divided or occluded to prevent sperm from entering the ejaculate. It does not immediately provide sterility and does not protect against sexually transmitted infections.

Vasectomy Reversal

Surgery to reconnect the tubes that carry sperm after a vasectomy. It may restore sperm to the semen, but pregnancy is not guaranteed.

Alternate Names:

Vasovasostomy; Vasoepididymostomy

Vasoactive Intestinal Peptide Test

A blood test measuring a hormone that affects the intestine and blood vessels. It is used mainly when a rare hormone-producing tumor is suspected in someone with severe watery diarrhea, dehydration, or abnormal body salts.

Vasoconstriction

Narrowing of blood vessels caused by contraction of vascular smooth muscle, which can raise blood pressure or reduce blood flow to affected tissues.

Vasoconstrictor

A substance that narrows blood vessels by making their muscle walls contract. This can raise blood pressure and reduce local blood flow; vasoconstrictor medicines are used in selected emergencies or with local anesthetics and require careful monitoring.

Vasoconstrictors

Substances or medicines that narrow blood vessels by making their muscular walls contract. They can raise blood pressure or reduce local blood flow and are used only for selected conditions because excessive narrowing can be harmful.

Vasodepressor Syncope

Fainting caused mainly by sudden widening of blood vessels and a fall in blood pressure. It often occurs as part of a vasovagal reaction and may be preceded by nausea, sweating, warmth, or lightheadedness.

Vasodilatation

Widening of blood vessels caused by relaxation of vascular smooth muscle, increasing blood flow and potentially lowering blood pressure.

Vasodilation

Widening of blood vessels when their muscular walls relax. It can increase blood flow and lower blood pressure and occurs with exercise, heat, medicines, and inflammation.

Vasodilator

A substance that relaxes blood-vessel walls and makes the vessels wider. It can lower blood pressure or improve blood flow and is used for selected heart, blood-pressure, or circulation problems; excessive widening may cause headache, flushing, dizziness, or fainting.

Vasodilators

Medicines or substances that relax vascular smooth muscle and widen blood vessels. They are used for conditions such as hypertension, angina, heart failure, or pulmonary hypertension depending on the agent.

Vasodilatory Shock

A form of distributive shock characterized by severe systemic arterial hypotension and tissue hypoperfusion resulting from profound, refractory peripheral vasodilation and loss of vascular tone despite preserved or elevated cardiac output, most frequently seen in severe sepsis, anaphylaxis, and neurogenic injury.

Vasomotor

Relating to control of blood-vessel width by nerves, hormones, and local chemicals. Vasomotor changes narrow or widen vessels and help regulate blood pressure, body temperature, tissue blood flow, and

skin color.

Vasomotor Center

A group of nerve cells in the lower brain that helps control the widening and narrowing of blood vessels and helps maintain blood pressure.

Vasomotor Centre

Groups of nerve cells in the brainstem that help control blood-vessel narrowing and widening. By changing vessel tone, they influence blood pressure, heart and tissue blood flow, and the body's response to standing or stress.

Vasomotor Nerves

Autonomic nerves controlling blood-vessel widening and narrowing by changing smooth-muscle activity, helping regulate blood pressure and temperature.

Vasomotor Rhinitis

Common subtype term; see *Nonallergic rhinitis*.

Vaso-Occlusive Crisis

The classic acute, excruciatingly painful hallmark complication of sickle cell disease, caused by the intravascular sludging and adherence of rigid, polymer-filled sickled erythrocytes in the microvasculature, producing focal tissue ischemia, infarction, and systemic inflammation in bones, joints, or viscera.

Alternate Names:

Sickle Cell Pain Crisis; VOC

Vasopressin

A hormone that increases water reabsorption in the kidney and can constrict blood vessels. It is released from the posterior pituitary.

Alternate Names:

Arginine Vasopressin; AVP

Vasopressin Receptor

A cell sensor that responds to the hormone vasopressin. Different types help the kidneys retain water and help blood vessels narrow, influencing body-fluid balance and blood pressure.

Vasopressin Receptor Antagonists

A pharmacological class of aquaretic medications (vaptans, such as tolvaptan and conivaptan) that competitively block vasopressin V2 receptors in the renal collecting duct, promoting solute-free water excretion without electrolyte loss in euvolemic and hypervolemic hyponatremia (SIADH, heart failure, cirrhosis).

Alternate Names:

Vaptans

Vasopressor

A medicine or body signal that raises blood pressure, mainly by narrowing blood vessels and sometimes by strengthening the heartbeat. These medicines are used in selected emergencies such as shock and require close monitoring.

Vasopressors In Anesthesia

Medicines that increase vascular tone or cardiac output to support blood pressure during anesthesia or critical illness. The choice and dose depend on the cause of hypotension, heart rate, cardiac function, and local protocol; monitoring is required.

Vasospasm

Sudden narrowing of a blood vessel caused by contraction of its muscular wall. It can temporarily reduce blood flow and cause chest pain, headache, stroke-like symptoms, or tissue injury, depending on the vessel affected.

Vasovagal Attack

A transient reflex episode caused by reduced sympathetic tone and increased vagal activity, producing hypotension and often bradycardia with fainting or near-fainting. Common triggers include prolonged standing, pain, fear, heat, dehydration, or emotional stress.

Vasovagal Reaction

A reflex that slows the heart and widens blood vessels, briefly lowering blood pressure and sometimes causing fainting; triggers include pain, fear, prolonged standing, heat, or blood exposure.

Vasovagal Syncope

A common faint caused by a reflex that briefly slows the heart or widens blood vessels, lowering blood pressure and brain blood flow. Triggers include standing still, heat, pain, fear, or seeing blood; warning symptoms often occur first.

Alternate Names:

Neurocardiogenic Syncope

Vater-Pacini Corpuscles

Large, rapidly adapting, encapsulated mechanoreceptors located deep in the dermis, subcutaneous tissue, periosteum, and joint capsules. Morphologically composed of a central unmyelinated nerve axon surrounded by multiple concentric lamellae of flattened Schwann-like cells separated by fluid; specialized physiologically to detect high-frequency mechanical vibration (200 to 300 Hz) and transient acceleration.

Alternate Names:

Pacinian Corpuscles; Lamellar Corpuscles

VATS

Alternate name; see *Video-Assisted Thoracoscopic Surgery*.

Vaughan Williams Classification

A system that groups medicines used for abnormal heart rhythms according to their main effect on the heart's electrical activity. It helps describe treatment but does not replace patient-specific prescribing.

VCJD

Alternate name; see *Creutzfeldt-Jakob disease*.

VDRL Test

A blood or spinal-fluid test that looks for an immune reaction associated with syphilis. A reactive result needs a more specific confirmatory test and may help monitor response to treatment.

Vector

A living carrier, usually an insect or tick, that spreads an infection between people or animals.

Some vectors allow the germ to develop inside them; others transfer it mechanically without the germ changing.

Vector-Borne Disease

An infection spread by a living carrier such as a mosquito, tick, flea, or sandfly. Examples include malaria, dengue, Lyme disease, and some forms of viral encephalitis; prevention focuses on avoiding bites and controlling the carrier.

Vector Control

Measures that reduce insects or other animals that spread infection. Examples include removing standing water, using insecticides, treating breeding areas, improving buildings, wearing protective clothing, and using repellents or bed nets.

Vegetarian

Vegetarian describes a diet that avoids meat and may include dairy products, eggs, or both. Nutritional needs can usually be met with varied foods, but iron, vitamin B12, protein, and other nutrients may need attention.

Vegetation

A mass that can form on a heart valve during infective endocarditis. It may contain bacteria, blood-clotting material, and immune cells and can damage the valve or break off and travel to other organs.

Vein

A blood vessel that carries blood toward the heart. Most veins carry oxygen-poor blood, but veins from the lungs and placenta carry oxygen-rich blood. Veins often contain valves that help prevent backward flow.

Vein-Graft Aneurysms

An abnormal widening of a vein used to bypass a blocked heart artery. It may contain a clot, block blood flow, press on nearby structures, or rupture and therefore needs specialist assessment.

Vein of Galen Malformation

A rare congenital intracranial vascular anomaly resulting from an embryonic arteriovenous fistula that drains directly into the primitive median prosencephalic vein (the precursor of the great cerebral vein of Galen), presenting in neonates with high-output congestive heart failure and hydrocephalus.

Alternate Names:

VGM; Vein of Galen Aneurysmal Malformation

VeIP Regimen

A cancer-treatment combination of vinblastine, ifosfamide, and cisplatin, used mainly for selected germ-cell tumors. It can lower blood counts and damage the kidneys, nerves, or bladder, so specialist monitoring is required.

Velamentous Cord Insertion

An abnormal attachment in which the umbilical blood vessels travel through the membranes before reaching the placenta without the usual protective tissue. The vessels can be compressed or torn, increasing risks of poor fetal growth, bleeding, or vasa previa and requiring specialist pregnancy monitoring.

Alternate Names:

Velamentous Insertion of the Umbilical Cord

Velocardiofacial Syndrome

Alternate name; see *DiGeorge syndrome (22q11.2 deletion syndrome)*.

Velopharyngeal Insufficiency

A structural or functional anatomical failure of the soft palate (velum) and posterior pharyngeal wall to achieve complete closure during speech and deglutition, resulting in hypernasal speech resonance, nasal air emission, and nasal regurgitation of fluids.

Alternate Names:

VPI; Velopharyngeal Incompetence

Vemurafenib

A targeted cancer medicine for tumors with a specific BRAF V600 gene change, including some melanomas. It can cause joint pain, sun sensitiv-

ity, abnormal heart rhythm, new skin cancers, or treatment resistance.

Vena Cava

Either of the two largest veins returning blood to the right side of the heart. The superior vena cava drains the upper body, and the inferior vena cava drains the abdomen, pelvis, and legs.

Alternate Names:

Venae Cavae; Superior and Inferior Vena Cava

Vena Cava Filter

A small device placed in the large vein leading to the heart to trap blood clots traveling from the legs toward the lungs. It may be used when blood-thinning medicines cannot be used or have not worked.

Alternate Names:

IVC Filter; Greenfield Filter

Venepuncture

Inserting a needle into a vein to collect blood or place intravenous access. It may cause brief pain, bruising, bleeding, infection, or fainting, and clean technique reduces complications.

Venereal Disease Research Laboratory Test

A blood test that looks for antibodies associated with syphilis. It is used for screening and monitoring treatment, but a reactive result needs confirmation with a treponemal test.

Venesection

The controlled removal of blood from a vein, used diagnostically or therapeutically, for example in selected cases of hemochromatosis or polycythemia.

Venipuncture

Puncture of a vein with a needle to obtain blood, administer fluids or medicines, or establish intravenous access. Bruising, infection, bleeding, and nerve or artery injury are uncommon complications.

Venogram

Contrast imaging of veins used to detect thrombosis,

obstruction, abnormal anatomy, or selected venous flow disorders.

Venography

Imaging of veins, usually after contrast material is administered, to assess venous anatomy, obstruction, thrombosis, or malformation.

Venom

A poisonous substance delivered by an animal through a bite, sting, or similar structure. Its effects vary by species and may include pain, swelling, nerve problems, bleeding, or dangerous changes in breathing or blood pressure.

Venomous Bite

A bite that injects venom from an animal such as a snake, spider, or arthropod. Effects range from local pain and swelling to bleeding, paralysis, or systemic toxicity.

Veno-Occlusive Disease

Blockage and injury of small veins in the liver, especially after some chemotherapy or stem-cell transplantation. It can cause painful liver enlargement, rapid weight gain, fluid retention, and jaundice and can be life-threatening.

Veno-occlusive Hepatic Disease (Sinusoidal Obstruction Syndrome)

A potentially severe liver injury caused by narrowing or blockage of hepatic sinusoids, classically after hematopoietic-cell transplantation or certain chemotherapy. Painful liver enlargement, weight gain, fluid retention, jaundice, and rising bilirubin may occur.

Venous

Relating to veins, which usually carry blood back toward the heart. Vein problems include blood clots, varicose veins, poor return of blood, and ulcers; pulmonary veins are an exception because they carry oxygen-rich blood from the lungs to the heart.

Venous Air Embolism

Obstruction of the venous circulation by intravascular gas, usually after procedures, trauma, or pressure changes. It can impair pulmonary or cardiac function and, if gas reaches the arterial circulation, cause neurologic or systemic ischemia.

Venous Aneurysm

A localized abnormal dilatation of a vein. It may be asymptomatic or present as a soft mass, pain, thrombosis, embolism, or bleeding depending on its location and size.

Venous Blood Gas

The clinical laboratory measurement of pH, partial pressure of carbon dioxide ($p\text{CO}_2$), bicarbonate (HCO_3^-), and base excess in a peripheral or central venous blood sample to assess systemic acid-base balance, ventilatory status, and tissue perfusion.

Alternate Names:

Venous Blood Gas; VBG; Central Venous Blood Gas

Venous Capacitance

The physical and physiological capacity of the systemic venous circulation to accommodate large changes in blood volume with minimal alterations in venous pressure, functioning as the primary high-capacitance, low-resistance reservoir holding approximately 60 to 70 percent of total blood volume at rest.

Venous Diseases

Conditions affecting veins, including blood clots, varicose veins, poor return of blood, inflammation, ulcers, injuries, and birth-related malformations. They may cause pain, swelling, skin changes, bleeding, or dangerous clots traveling to the lungs.

Venous Hum

A harmless continuous humming sound heard over the neck veins, most often in healthy children. It changes or disappears with body position or gentle pressure on the vein, helping distinguish it from heart murmurs that need further evaluation.

Alternate Names:

Cervical Venous Hum; Innocent Venous Hum

Venous Insufficiency

Impaired return of blood through the veins, usually in the legs, because valves allow backward flow, veins are blocked, or the calf-muscle pump is ineffective. Blood may pool and cause aching, heaviness, swelling, varicose veins, itching, darkened or hardened skin, stasis dermatitis, and difficult-to-heal ulcers near the ankle.

Venous Leak

Difficulty maintaining an erection because blood leaves the penis too readily during erection. It may reflect vascular, nerve, hormonal, or medication-related problems and should be evaluated as erectile dysfunction.

Alternate Names:

Veno-Occlusive Dysfunction; Cavernous Venous Leakage

Venous Pressure

The pressure of blood inside the veins. It depends on blood volume, vein width, gravity, and how well the right side of the heart pumps; abnormally high pressure can cause swelling, enlarged veins, or fluid buildup.

Venous Return

The flow of blood through the veins back to the heart. It is helped by vein valves, muscle movement, breathing, and pressure changes in the chest.

Venous Stasis Dermatitis

Inflammation of the skin of the lower legs caused by chronic swelling and pooling of blood and fluid, usually from chronic venous insufficiency. It may cause itching, redness, scaling, skin darkening, thickening, or ulcers; treatment addresses the swelling and protects the skin.

Venous Stasis Ulcer

A long-lasting wound near the ankle caused by poor blood return through the leg veins. The leg may also be swollen, painful, or have darkened, thickened skin; compression and treatment of the vein problem

may help.

Venous Thromboembolism

A blood clot that forms in a vein, usually deep in the leg, and may travel to the lungs. A clot in the lungs can cause sudden breathlessness, chest pain, collapse, or death.

Venous Thromboembolism In Pregnancy

A blood clot in a deep vein or lungs during pregnancy or after birth. Pregnancy increases clot risk, and symptoms such as one-sided leg swelling, chest pain, sudden breathlessness, or coughing blood can indicate a serious clot.

Venous Thromboembolism Prophylaxis

Measures used to prevent dangerous vein clots, especially around surgery or hospitalization. They may include walking early, compression devices or stockings, and blood-thinning medicine when bleeding risk is acceptable.

Venous Thrombosis

The formation of a blood clot (thrombus) within a vein, most commonly in the deep veins of the lower extremities (deep vein thrombosis, DVT).

Venous Ulcer

A chronic wound caused by impaired venous drainage, usually occurring near the ankle in a limb with chronic venous insufficiency.

Ventilation

Movement of air into and out of the lungs; effective ventilation brings oxygen to the alveoli and removes carbon dioxide.

Ventilation-Perfusion Mismatch

A mismatch between air reaching parts of the lungs and blood reaching those same parts. It can lower blood oxygen and occur with pneumonia, COPD, asthma, heart failure, or a lung clot.

Ventilation-Perfusion Ratio

The relationship between air reaching the lungs and

blood reaching the lung tissues. Good matching allows efficient oxygen exchange; poor matching can cause low blood oxygen.

Ventilation-Perfusion Scan

A nuclear-medicine scan that compares air movement in the lungs with blood flow through them. Areas with blood flow blocked but preserved air movement may suggest a pulmonary embolism. The test uses a breathed tracer and an injected tracer and is interpreted with symptoms and other findings.

Ventilator

A machine that supports or replaces spontaneous breathing by delivering air, oxygen, or an air-oxygen mixture under positive pressure. Noninvasive ventilators deliver support through a mask, while invasive ventilators connect through an endotracheal or tracheostomy tube. Ventilators can provide different patterns and levels of pressure or volume according to the device and clinical purpose.

Alternate Names:

Mechanical Ventilator Breathing Machine

Ventilator-Associated Pneumonia

A lung infection that develops after a person has used a breathing machine for at least two days. It may cause fever, worsening oxygen levels, cough, or abnormal lung findings and requires prompt evaluation and treatment.

Ventilator-Induced Lung Injury

Lung damage caused or worsened by a breathing machine when pressure, volume, or oxygen levels are excessive. Clinicians use protective settings and close monitoring to support breathing while limiting further injury.

Ventouse

A vacuum extractor placed on the baby's scalp to assist a vaginal birth when delivery needs help. It is used only when specific safety conditions are met and can cause temporary scalp swelling or bruising.

Ventral

Relating to the belly or front side of the body; synonym for anterior in human anatomy.

Ventral Body Cavity

The body cavity toward the front. It includes the thoracic cavity and the abdominopelvic cavity, which contain many of the body's major organs.

Ventral Hernia

Protrusion of abdominal tissue through a weakness in the front abdominal wall, including incisional and umbilical hernias. It may cause a bulge or pain and requires urgent assessment if incarceration or strangulation is suspected.

Ventral Root

The front root of a spinal nerve. It carries movement and other outgoing signals from the spinal cord.

Ventricle

One of the two lower chambers of the heart that pump blood out of it. The right ventricle sends blood to the lungs to receive oxygen; the left ventricle sends oxygen-rich blood to the rest of the body.

Ventricular

Relating to a ventricle. In the heart, it concerns one of the lower pumping chambers; in the brain, it concerns the fluid-filled spaces that contain cerebrospinal fluid. The organ gives the term its specific meaning.

Ventricular Aneurysm

A localized, thin, fibrous, dyskinetic or akinetic bulging outpouching of the scarred left ventricular wall developing as a late mechanical complication of transmural myocardial infarction (typically anterior MI), predisposing to heart failure, refractory ventricular arrhythmias, and apical mural thrombus formation.

Ventricular Arrhythmia

An abnormal heart rhythm arising from the ventri-

cles. It may cause palpitations, dizziness, fainting, chest discomfort, or sudden cardiac arrest; fainting or severe symptoms require emergency care.

Ventricular Arrhythmias

Abnormal heart rhythms arising from the ventricles. They range from premature ventricular contractions to ventricular tachycardia and fibrillation, which can cause sudden cardiac arrest.

Ventricular Assist Device

A mechanical pump that helps a weakened heart move blood. It may support the left side, right side, or both and can be temporary or long-term, but bleeding, infection, stroke, and clots are important risks.

Ventricular Bigeminy

A cardiac rhythm pattern on electrocardiogram in which every normal sinus beat is consistently followed by a premature ventricular complex (PVC) in a regular alternating 1:1 sequence, commonly provoked by electrolyte derangements, digitalis toxicity, or underlying ischemic heart disease.

Ventricular Fibrillation

A chaotic, disorganized ventricular rhythm in which the ventricles quiver rather than contract, producing no effective cardiac output and cardiac arrest. It is a shockable rhythm; immediate CPR and unsynchronized defibrillation are required, with treatment of the underlying cause.

Alternate Names:

V-Fib

Ventricular Hypertrophy

Thickening of the wall of one of the heart's lower chambers. It may develop from long-term high blood pressure, valve disease, inherited heart muscle disease, or intense training and can lead to stiffness, abnormal rhythms, or heart failure.

Ventricular Myocardium

The heart muscle forming the walls of the ventricles. Its contraction pumps blood to the lungs and the rest of the body.

Ventricular Non-Compaction

A primary genetic cardiomyopathy characterized by a thickened myocardial wall with a non-compacted endocardial layer displaying prominent, deep intertrabecular recesses and deep trabeculations, typically affecting the left ventricular apex and lateral wall.

Alternate Names:

LVNC; Non-Compaction Cardiomyopathy

Ventricular Premature Contraction

Alternate name; see *Premature ventricular contractions (PVCs)*.

Ventricular Remodeling

Progressive alterations in left ventricular geometry, mass, chamber volume, and spherical shape occurring after acute myocardial infarction or chronic pressure/volume overload, driven by neurohormonal activation, cardiomyocyte hypertrophy, and interstitial fibrosis.

Alternate Names:

Post-Infarction Remodeling; Cardiac Remodeling

Ventricular Rupture

A tear in a wall of one of the heart's lower chambers, often after a heart attack. It can cause life-threatening bleeding around the heart.

Ventricular Septal Defect

A hole in the wall between the heart's lower chambers. Blood may flow from the stronger left side to the right and increase blood flow to the lungs. Small holes may cause no problems; larger ones can cause heart failure or lung-vessel damage.

Ventricular Septal Defect Cross-Reference

Alternate name; see *Ventricular septal defect*.

Ventricular Tachycardia

A rapid heart rhythm that starts in the lower chambers of the heart. It may cause palpitations, dizziness, fainting, shock, or cardiac arrest and can be life-threatening.

Ventriculoatrial

Relating to a connection between a ventricle and an atrium. In brain surgery, a ventriculoatrial shunt is a tube that drains extra fluid from a brain cavity into the right upper chamber of the heart.

Ventriculography

Imaging used to measure how well the heart's ventricles pump blood. A radionuclide scan or cardiac MRI can estimate the amount of blood ejected with each heartbeat and show abnormal wall movement; the method is chosen for the clinical question.

Ventriculoperitoneal Shunt

A surgically implanted system that drains cerebrospinal fluid from a brain ventricle into the abdominal cavity, where the fluid can be absorbed.

Ventrosuspension

Surgical fixation of a displaced or prolapsed uterus to the anterior abdominal wall or nearby supporting tissues.

Venturi Mask

A high-flow oxygen delivery device that uses the Venturi principle to supply a precise, fixed fraction of inspired oxygen (FiO_2 , typically 24% to 50%). Oxygen passing through a calibrated narrow jet nozzle creates a pressure drop that draws in a predictable volume of room air through color-coded entrainment ports. Because the total gas flow meets or exceeds the patient's peak inspiratory flow rate, the delivered oxygen concentration remains constant regardless of the patient's breathing rate or depth, making it vital for managing hypoxemia in patients with chronic obstructive pulmonary disease at risk of hypercapnic respiratory failure.

Alternate Names:

Air-Entrainment Mask; Venturi Oxygen Mask; High-Flow Oxygen Mask

Venturi Principle

A physical principle in fluid dynamics stating that as a fluid or gas flows through a constricted section of a pipe or nozzle, its velocity increases and its static lateral pressure decreases. In medicine, this

localized pressure drop creates suction that entrains ambient air or fluids, forming the operational basis for air-entrainment oxygen masks (Venturi masks), jet nebulizers, suction aspirators, and explaining hemodynamic phenomena such as systolic anterior motion of the mitral valve in hypertrophic obstructive cardiomyopathy.

Alternate Names:

Venturi Effect; Bernoulli-Venturi Principle; Air-Entrainment Principle

Venule

A small blood vessel that collects blood from capillaries and carries it into larger veins. Venules also allow white blood cells and fluid to leave the bloodstream during inflammation.

Venules

Small blood vessels that collect blood from capillaries and join to form veins. Their walls also participate in inflammation by allowing white blood cells to leave the bloodstream.

Verapamil

A non-dihydropyridine calcium-channel blocker used for selected hypertension, angina, and supraventricular tachyarrhythmias; it can cause bradycardia and constipation.

Verapamil Toxicity

Acute severe poisoning from the non-dihydropyridine calcium channel blocker verapamil, characterized by profound peripheral vasodilation, profound myocardial depression, high-grade atrioventricular block, refractory bradycardia, and cardiogenic shock; managed with intravenous calcium, high-dose insulin euglycemia therapy, and lipid emulsion.

Vermicides

Medicines or chemicals that kill parasitic worms. The correct treatment depends on the worm, the body site affected, the person's age, and other health conditions.

Vernal Keratoconjunctivitis

A severe, recurrent allergic eye inflammation that primarily affects young boys in warm, sunny climates and often flares up during the spring and summer (spring catarrh). It causes intense eye itching, light sensitivity, watering, and thick, stringy mucus. Characteristic findings include large, cobblestone-like bumps on the underside of the upper eyelid (giant papillae) and small white dots along the border of the cornea (Horner-Trantas dots). In severe cases, inflammation and eye-rubbing can create a non-healing sore on the clear front of the eye (a shield ulcer), which can lead to corneal scarring and vision changes. The condition typically improves on its own after puberty.

Alternate Names:

VKC; Spring Catarrh; Vernal Catarrh; Vernal Conjunctivitis

Verner-Morrison Syndrome

A rare neuroendocrine tumor syndrome (WDHA syndrome) caused by a vasoactive intestinal peptide-secreting pancreatic islet cell tumor (VIPoma), characterized by the tetrad of severe watery diarrhea ('pancreatic cholera'), hypokalemia, achlorhydria (hypochlorhydria), and metabolic acidosis.

Alternate Names:

VIPoma Syndrome; WDHA Syndrome

Vernix

A white, greasy protective coating on the skin of a fetus or newborn, composed mainly of water, lipids, and shed skin cells.

Vernix Caseosa

A white, greasy protective coating on the skin of a fetus or newborn, composed mainly of water, lipids, and shed skin cells.

Verruca

Alternate name; see *Wart*.

Verruca Plana

Small, smooth, relatively flat warts caused by HPV, often occurring in groups on the face, hands, or legs.

Alternate Names:

Flat Warts; Juvenile Warts

Verrucas

Verrucas are rough skin growths on the feet caused by human papillomavirus. They may be painful with pressure and often resolve without treatment, although treatment can reduce discomfort or spread.

Verruca Vulgaris

A common, benign, hyperkeratotic, exophytic cutaneous papilloma with a rough, verrucous ('warty') surface and thrombosed capillary black dots, caused by localized epidermal infection by human papillomavirus (HPV types 2, 4, 7, and 1).

Alternate Names:

Common Wart; Viral Verruca

Verruciform Xanthoma

A rare, noncancerous growth usually found in the mouth or genital area. It may look like a wart, so examination and sometimes a tissue sample are needed to distinguish it from cancer.

Verrucose

Having a rough, thickened, wart-like, or finger-like surface. It is a descriptive term for a skin, mucosal, or other lesion and does not by itself identify whether the lesion is benign, infectious, or cancerous.

Verrucous

Having a rough, thickened, irregular, or wart-like surface. The appearance can occur in benign growths, infections, chronic inflammation, or some cancers.

Verrucous Carcinoma

A low-grade, well-differentiated variant of squamous cell carcinoma with a warty, exophytic appearance. It is locally invasive but rarely metastasizes, commonly affecting the oral cavity, skin, or genitalia.

Version

A change in the position or presentation of a body

structure. In pregnancy, fetal version is a procedure or movement that changes the baby's position, often to place the head downward before birth.

Vertebra

One of the bones forming the spinal column. Each vertebra helps support the body, allows movement, provides attachment for muscles, and surrounds and protects the spinal cord.

Vertebrae

Vertebrae are the bones of the spinal column that protect the spinal cord, support the body, allow movement, and provide attachment for muscles and ligaments.

Vertebral Artery

One of two arteries that travel through the neck and join to supply the brainstem, cerebellum, and back of the brain. Narrowing or blockage can cause dizziness, imbalance, or stroke.

Vertebral Artery Dissection

A tear in the inner lining of a vertebral artery that lets blood enter the vessel wall, forming an intramural hematoma and possibly narrowing the artery or creating a pseudoaneurysm. It may occur spontaneously or after neck injury and can cause sudden neck or occipital headache, dizziness, imbalance, or a posterior-circulation transient ischemic attack or stroke.

Alternate Names:

VAD; Spontaneous Vertebral Artery Dissection

Vertebral Canal

The passage formed by the stacked spinal bones that surrounds and protects the spinal cord. Narrowing, bleeding, tumors, fractures, or disc disease inside it can compress nerves and cause weakness or pain.

Vertebral Column

The chain of bones running from the neck to the pelvis. It supports the head and trunk, protects the spinal cord, allows bending and twisting, and provides attachment for muscles and ribs.

Vertebral Compression Fracture

Collapse or cracking of one of the bones in the spine, often from osteoporosis, injury, or cancer. It may cause sudden or gradual back pain, loss of height, or a rounded back and can sometimes press on nerves.

Vertebral Hemangioma

Alternate name; see *Spinal hemangioma*.

Vertebral Tumor

A growth arising in or near a spinal bone. It may be benign or cancerous, start in the spine or spread there, and cause pain, fracture, nerve compression, weakness, or paralysis.

Vertebrobasilar Circulatory Disorders

Conditions that reduce blood flow through the vertebral or basilar arteries supplying the brainstem, cerebellum, and posterior brain; symptoms may include vertigo, double vision, imbalance, weakness, or stroke.

Vertebrobasilar Insufficiency

Reduced blood flow through arteries supplying the back of the brain. It may cause dizziness, double vision, imbalance, weakness, trouble speaking, or stroke-like symptoms and can be serious when sudden.

Vertebrobasilar Insufficiency

Source spelling variant of *vertebrobasilar insufficiency*, reduced blood flow in the vertebral or basilar circulation supplying the brainstem, cerebellum, and posterior brain.

Vertebroplasty

A procedure in which medical cement is injected into a collapsed spinal bone to help stabilize it and sometimes reduce pain. It is used selectively because cement leakage, infection, nerve injury, or other complications can occur.

Vertical

Oriented from superior to inferior or perpendicular to a horizontal plane. In medicine, it may describe

position, transmission from parent to child, or a body-oriented imaging or movement axis.

Vertical Talus

A stiff flatfoot present from birth in which one of the ankle bones points downward and the middle of the foot is bent upward. It may occur alone or with other conditions and usually needs early orthopedic treatment.

Vertical Transmission

Passage of an infection or genetic condition from parent to child during pregnancy, delivery, or breastfeeding.

Vertigo

A false feeling that you or your surroundings are moving, spinning, tilting, or shifting when they are not. It is a symptom rather than a disease and often comes from the inner ear, but brain and other conditions can also cause it.

Vertigo-Associated Disorders

Vertigo-associated disorders cause an illusion of movement from vestibular, neurologic, visual, medication-related, or systemic dysfunction and may be accompanied by imbalance, nausea, or hearing symptoms.

Alternate Names:

Vestibular Disorders; Peripheral Vestibulopathy; Labyrinthine Disorders

Very Long-Chain Acyl-CoA Dehydrogenase Deficiency

A rare inherited disorder in which cells cannot use certain long-chain fats for energy, especially during fasting or illness. Infants may develop low blood sugar, heart disease, or liver problems; older children or adults may have exercise-triggered muscle breakdown and dark urine.

Alternate Names:

VLCAD Deficiency; VLCADD

Very-Low-Density Lipoprotein

A particle made by the liver that carries mainly

triglycerides through the blood. High levels can contribute to fatty deposits in artery walls and increase cardiovascular risk, although the result is interpreted with the full lipid profile.

Alternate Names:

VLDL

Vesical

Relating to the urinary bladder. For example, vesical inflammation affects the bladder lining, a vesical tumor is a bladder growth, and the vesical neck is the bladder outlet leading toward the urethra.

Vesicant

A substance that causes blistering and tissue injury on contact. In oncology, vesicant drugs can cause severe extravasation injury if they escape from a vein into surrounding tissue.

Vesicants

Substances that can cause severe blistering and tissue damage when they touch skin or escape from a vein. Some chemotherapy medicines and industrial chemicals are vesicants.

Vesicle

A small, circumscribed, raised skin lesion containing clear, serous, or sometimes bloody fluid, usually less than 1 cm in diameter. A vesicle is a small blister; causes include viral infection, contact irritation, eczema, burns, friction, and immune-mediated skin disease.

Vesicles

Plural of vesicle; see *Vesicle*.

Vesicoureteral Reflux

Backward flow of urine from the bladder toward the kidneys because the valve where a ureter enters the bladder does not work normally. It can cause repeated kidney infections and scarring, especially in children.

Alternate Names:

VUR; Urinary Reflux

Vesico-Ureteric Reflux

Backward flow of urine from the bladder into one or both ureters and sometimes the kidneys, increasing the risk of recurrent urinary infection and renal scarring.

Vesicovaginal and Ureterovaginal Fistula

Abnormal connections between the urinary tract and vagina: a vesicovaginal fistula connects bladder to vagina, while a ureterovaginal fistula connects ureter to vagina. Both commonly cause continuous urine leakage and require imaging and reconstructive urologic or gynecologic care.

Vesicovaginal Fistula

An abnormal connection between the bladder and vagina that causes continuous or frequent leakage of urine through the vagina. It may follow childbirth injury, pelvic surgery, radiation, or advanced infection and usually requires specialist repair.

Vesicular

Describing or containing small, fluid-filled blisters. A vesicular rash may occur with viral infection, allergy, eczema, burns, or other conditions; its appearance alone does not establish the cause.

Vesicular Breathing

The normal soft, gentle breath sound heard over most outer lung areas with a stethoscope. Changes in loudness or quality may suggest fluid, collapse, blockage, infection, or other lung disease.

Vesicular Palmoplantar Eczema

An itchy eczema affecting the palms or soles with small, deep-seated fluid-filled vesicles, followed by peeling, scaling, or fissures. Triggers include sweating, irritants, allergy, stress, and fungal infection elsewhere; persistent disease may need specialist treatment.

Vesiculobullous Dermatoses

A group of skin diseases that cause small or large fluid-filled blisters. Causes include infection, allergy, autoimmune disease, inherited conditions, medicines, and injury; examination and sometimes

a biopsy identify the cause.

Vessel

A vessel is a tube carrying blood, lymph, air, urine, bile, or another fluid through the body, depending on context.

Vestibular

Relating to the vestibular system of the inner ear and brain, which detects head motion and position and helps maintain balance and gaze stability.

Vestibular Disorder

A problem affecting the inner-ear balance organs or the brain pathways that process balance signals. It may cause dizziness, vertigo, unsteadiness, nausea, abnormal eye movements, or difficulty walking. Causes include inner-ear disease, infection, head injury, medicines, migraine, reduced blood flow, or disorders of the brain or nerves.

Alternate Names:

Vestibular Balance Disorder

Vestibular Migraine

Repeated attacks of dizziness or vertigo related to migraine, with or without headache. Episodes may include sensitivity to movement, light, sound, or visual patterns; other inner-ear and brain causes must be considered.

Vestibular Neuritis

Sudden inflammation or dysfunction of the balance nerve, causing severe spinning, nausea, vomiting, and unsteadiness that may last for days. Hearing is usually unaffected, but urgent assessment may be needed to exclude a stroke.

Vestibular Papillomatosis

A harmless normal variation in which several soft, small, finger-like bumps occur on the inner vulvar folds. It can resemble genital warts but is not caused by an infection and usually needs no treatment.

Vestibular Rehabilitation

Exercise-based therapy that improves balance, gaze

stability, and adaptation in people with vestibular disorders or dizziness.

Vestibular Schwannoma

A benign, slow-growing tumor of the vestibular portion of the eighth cranial nerve. See Acoustic Neuroma.

Vestibular System

The inner-ear sensors and connected brain pathways that detect head movement and position and help maintain balance, posture, and steady vision. Problems can cause vertigo, unsteadiness, nausea, or blurred vision during movement.

Vestibule

A balance area of the inner ear between the cochlea and semicircular canals. It contains sensors that detect head position and straight-line movement and send this information to the brain.

Vestibulocochlear Nerve

The eighth cranial nerve, carrying information for hearing and balance from the inner ear to the brain.

Vestibulodynia

Persistent burning, stinging, or tenderness at the entrance to the vagina, often triggered by touch, penetration, or inserting a tampon. Examination rules out infection and other causes; care may include pelvic-floor therapy, pain treatment, and support for sexual and emotional health.

Alternate Names:

Provoked Vestibulodynia; Vulvar Vestibulitis Syndrome; PVD

Vestibulo-Ocular Reflex

An automatic response that moves the eyes opposite to head movement so vision stays steady while a person turns or walks. Problems with it can cause blurred vision, dizziness, or imbalance.

Vestigial

Describing a structure or feature that has become greatly reduced through evolution and has little or

no apparent original function.

VEXAS Syndrome

A serious inflammatory illness that begins in adulthood because of a gene change acquired in blood-forming cells. It can cause persistent fever, painful joints, skin rashes, inflamed blood vessels or cartilage, anemia, and other blood abnormalities.

V-Fib

Alternate name; see *Ventricular fibrillation*.

Viable

Capable of surviving or developing under suitable conditions. In clinical contexts it may describe a viable pregnancy, tissue, organism, cell, or treatment option.

Vibration Problem

Symptoms or injury caused by repeated exposure to vibrating tools or equipment, which may affect nerves, blood vessels, muscles, and joints in the hands or arms.

Vibrator

A device that produces mechanical vibration and may be used for sexual stimulation, therapeutic massage, or selected rehabilitation purposes.

Vibrio

A genus of curved, Gram-negative bacteria; species include *V. cholerae*, which causes cholera, and *V. vulnificus*, which can cause severe wound or blood-stream infection.

Vibrio Cholerae

A bacterium that causes cholera, a severe diarrheal illness spread mainly through contaminated water or food. It can cause sudden, large-volume watery diarrhea, dehydration, shock, and death without rapid fluid replacement.

Vibrio Infection

Infection caused by *Vibrio* bacteria, acquired through contaminated seafood or exposure of

wounds to warm seawater. It may cause watery diarrhea, wound infection, or rapidly worsening bloodstream infection, especially in people with liver disease or weakened immunity. Severe wound pain, blistering, fever, or shock can occur.

Alternate Names:

Vibriosis; Vibrio Bacteremia

Vibrio Parahaemolyticus Infection

An acute halophilic bacterial gastroenteritis acquired through ingestion of raw or undercooked marine seafood, particularly shellfish. It typically manifests with explosive watery diarrhea, abdominal cramps, nausea, vomiting, low-grade fever, and headache within 12 to 24 hours of exposure, usually resolving spontaneously within 3 to 5 days without antibiotics.

Alternate Names:

Vibrio Parahaemolyticus Gastroenteritis; Halophilic Vibrio Infection

Vibrios

Comma-shaped bacteria, usually Gram-negative, that include species capable of causing cholera and wound or gastrointestinal infections.

Vibrio vulnificus Infection

Infection caused by a saltwater-associated bacterium that can produce rapidly progressive wound infection, sepsis, or severe gastroenteritis. Risk is higher with liver disease, iron overload, or immune suppression; raw oysters and seawater exposure are important sources.

Vibrio Vulnificus Infections

Infections caused by *Vibrio vulnificus*, a gram-negative bacterium found in warm seawater and raw seafood. It can cause wound infection, bloodstream infection, or gastroenteritis, with particularly severe disease in people with chronic liver disease or other risk factors.

Video-Assisted Thoracoscopic Surgery

A chest operation performed through several small openings using a camera and long instruments rather than a large incision between the ribs. It may be

used for lung or pleural biopsy, removing part of a lung, or other chest procedures and often allows faster recovery, though bleeding, air leakage, infection, or conversion to open surgery can occur.

Alternate Names:

VATS; Video Thoracoscopy; Thoracoscopic Surgery

Videofluoroscopic Swallow Study

A moving X-ray test that records swallowing after small amounts of food or liquid containing contrast are taken. It shows whether food enters the airway, where swallowing is delayed, and which textures or techniques may be safer.

Video Laryngoscope

An airway device with a small camera that shows the entrance to the windpipe on a screen. It helps clinicians place a breathing tube, especially when a direct view is difficult, but does not remove the risks of the procedure.

Video Laryngoscopy

A technique for viewing the entrance to the windpipe with a camera on a blade connected to a screen. It can help clinicians place a breathing tube when a direct view is difficult.

Videostroboscopy

A voice examination that uses a camera and flashing light to create a slow-motion view of the vocal cords as they vibrate. It helps investigate hoarseness, voice strain, and vocal-cord injury.

Vildagliptin

An oral dipeptidyl-peptidase-4 inhibitor used in some countries for type 2 diabetes, alone or with other medicines. It improves glucose-dependent insulin secretion; liver function and pancreatitis symptoms may require attention.

Villi

Tiny finger-like projections lining the small intestine that greatly increase the area available to absorb nutrients. Similar projections in the placenta help exchange substances between the pregnant person and fetus.

Villous Adenoma

A high-risk subtype of neoplastic colonic adenomatous polyp characterized histologically by long, finger-like, frond-like epithelial projections covering more than 75

Alternate Names:

Villous Colonic Polyp; Papillary Adenoma

Villous Atrophy

Flattening or loss of the tiny projections lining the small intestine. This reduces nutrient absorption and may occur in celiac disease, some infections, immune disorders, or other intestinal conditions.

Villus

A small finger-like projection, especially one of the intestinal mucosa that increases absorptive surface area; chorionic villi mediate exchange between placenta and fetus.

Villus Atrophy

The histopathological flattening, blunting, and loss of the microscopic finger-like villi lining the small intestinal mucosa, accompanied by crypt hyperplasia and intraepithelial lymphocytosis, classically observed in celiac disease, tropical sprue, and autoimmune enteropathy.

Vinca Alkaloids

Cancer medicines including vincristine and vinblastine that disrupt microtubules, structures needed for cell division. They can treat several cancers but may cause nerve damage, low blood counts, constipation, or other toxicity.

Vincent Angina

An acute necrotizing infection of the gums and oropharynx associated with fusobacteria and spirochetes. It causes painful ulceration, bleeding, foul breath, and gingival necrosis and requires dental or medical treatment.

Vincent Disease

Acute necrotizing ulcerative gingivitis associated with fusospirochetal bacteria, causing painful bleed-

ing gums, ulceration, and foul breath.

Vincent Infection

Vincent infection is acute necrotizing ulcerative gingivitis caused by mixed oral bacteria, producing painful bleeding gums, ulcers, and foul breath.

Vincent's Angina

Acute necrotizing ulcerative gingivitis or tonsillitis associated with fusiform bacteria and spirochetes, causing painful ulcers, bleeding, and fetid breath.

Vincent Stomatitis

A painful necrotizing infection of the gums caused by mixed anaerobic bacteria, producing foul breath, bleeding, ulceration, and gray necrotic tissue; it is also called acute necrotizing ulcerative gingivitis.

Vinorelbine

A chemotherapy medicine that interferes with cell division. It is used for selected lung and breast cancers and can cause low blood counts, infection, constipation, nerve symptoms, nausea, or irritation if it leaks outside a vein.

Viomycin

An older aminoglycoside antibiotic related to capreomycin that was used against tuberculosis and other mycobacterial infections; kidney and hearing toxicity limit its use.

VIPoma

A rare functioning neuroendocrine tumor arising from the non-beta islet cells of the pancreas (or occasionally extra-pancreatic sympathetic ganglia in children) that hypersecretes vasoactive intestinal peptide (VIP), causing refractory secretory diarrhea and hypokalemia.

Alternate Names:

Vasoactive Intestinal Peptide Tumor; Verner-Morrison Neoplasm

VIPoma Syndrome

A rare neuroendocrine tumor syndrome arising predominantly from the non-beta islet cells of the

pancreas that hypersecretes vasoactive intestinal peptide (VIP). Clinically characterized by massive, secretory, watery diarrhea persisting during fasting, severe hypokalemia, and hypochlorhydria or achlorhydria (the WDHA syndrome), accompanied by dehydration and metabolic acidosis.

Alternate Names:

WDHA Syndrome; Verner-Morrison Syndrome; Pancreatic Cholera

Viraemia

The presence of viruses in the bloodstream. It may be brief or long-lasting and can allow the infection to spread from its original site to other tissues.

Viral

Caused by or relating to a virus. Viruses enter living cells to multiply and can cause illnesses ranging from mild colds to serious brain, lung, liver, or bleeding diseases; testing and treatment depend on the specific virus.

Viral Antibody

A protective protein made by the immune system after infection or vaccination that recognizes a virus. Blood tests for these antibodies may show past exposure, immune response, or selected current infections, depending on timing and test design.

Viral Arthritis

Joint inflammation caused by or associated with a viral infection. It may cause sudden pain, swelling, and stiffness in several joints and often improves as the infection resolves, although some viruses can cause prolonged symptoms.

Viral Assembly

The stage of viral reproduction when newly made viral genetic material and proteins are put together to form complete new virus particles.

Viral Attachment

The first step of infection, when proteins on a virus bind to matching molecules on a host cell. This binding helps determine which species, tissues, or cell types the virus can infect.

Viral Carcinogenesis

Cancer development caused or promoted by a viral infection. Some viruses alter cell growth directly, weaken immune protection, or cause long-lasting inflammation; examples include human papillomavirus, hepatitis B and C viruses, and Epstein-Barr virus.

Viral Conjunctivitis

Infection of the thin lining over the eye and inside the eyelids, usually causing redness, watering, irritation, and discharge. It spreads easily through contact with infected secretions or contaminated hands and surfaces.

Viral Culture

Growth of a virus in susceptible cell cultures to identify an infectious agent. It can be useful for selected viruses, but molecular and antigen-based tests are often faster or more sensitive; the appropriate method depends on the suspected infection and specimen.

Viral Encephalitis

Inflammation of the brain caused by a virus. It may cause fever, headache, confusion, behavior change, seizures, weakness, or reduced consciousness. Severe cases can be life-threatening.

Viral Entry

The process by which a virus gets inside a host cell and releases its genetic material so the cell can make more virus.

Viral Exanthem

A widespread rash caused by a viral infection. It may occur with fever, tiredness, sore throat, cough, diarrhea, or other symptoms; the rash pattern and overall illness help determine the cause.

Viral Gastroenteritis

Alternate name; see *Stomach Flu*.

Viral Haemorrhagic Fever

A severe illness caused by certain viruses that can

damage blood vessels, disturb clotting, and cause bleeding, shock, or organ failure. The way it spreads and its treatment depend on the virus.

Viral Hemorrhagic Fevers

Severe illnesses caused by certain viruses that can damage blood vessels, disrupt clotting, and lead to bleeding, shock, or organ failure. Some spread easily and may require special infection-control measures.

Alternate Names:

VHF; Hemorrhagic Fevers; Viral Hemorrhagic Disease

Viral Hepatitis

Liver inflammation caused by hepatitis viruses A, B, C, D, or E. Hepatitis A and E usually spread through contaminated food or water; B, C, and D can spread through blood or body fluids and may become long-term infections that damage the liver.

Alternate Names:

Infectious Hepatitis

Viral Hepatitis Types

Five viruses that can inflame the liver. They differ in how they spread, whether infection can become long-term, the complications they cause, and whether vaccination or curative treatment is available.

Viral Immune Evasion

Ways viruses avoid or weaken the body's immune defenses, allowing them to survive, multiply, or return after infection. These methods can make infections harder to clear and vaccines or treatments less effective.

Viral Infection

An illness caused by a virus entering body cells and making copies of itself. Viruses can damage cells directly or cause inflammation as the immune system responds. Viral infections range from mild illnesses such as colds and cold sores to serious diseases such as influenza, COVID-19, hepatitis, and HIV. Some viruses remain inactive in the body and can become active again later, such as the chickenpox virus causing shingles.

Alternate Names:

Viral Infections; Viral Disease; Viral Illness

Viral Infections and Pregnancy

Viral infections during pregnancy may affect maternal illness, fetal development, placenta, or newborn health. Evaluation considers the virus, gestational age, symptoms, immunity, exposure, testing, treatment, vaccination, and measures to reduce perinatal transmission.

Viral Infections of the Mouth

Infections of oral skin or mucosa caused by viruses such as herpes simplex, varicella-zoster, enteroviruses, HPV, or EBV. They may cause blisters, ulcers, warts, sore throat, or systemic symptoms, and treatment depends on the virus and host risk.

Viral Latency

A state in which a virus remains inside cells without actively making new virus particles. Some latent viruses can become active again, especially when the immune system is weakened or the body is under stress.

Viral Latency Mechanisms

The ways some viruses remain inactive inside cells while avoiding immune detection. Reactivation can occur when immune defenses are weakened or after other triggers, depending on the virus.

Viral Load

The amount of virus or viral genetic material in a body fluid or tissue, measured by a laboratory assay; trends can help assess disease activity or response to antiviral treatment.

Viral Meningitis

Infection and inflammation of the coverings of the brain and spinal cord caused by a virus. It may cause fever, headache, neck stiffness, vomiting, light sensitivity, or confusion. Bacterial meningitis can cause similar symptoms and is more dangerous.

Viral Myocarditis

Inflammation of the heart muscle caused by a vi-

ral infection or by the immune response after an infection. It may cause tiredness, chest discomfort, palpitations, heart failure, shock, or dangerous abnormal heart rhythms.

Alternate Names:

Infectious Viral Myocarditis; Acute Viral Myocarditis

Viral Pathogenesis

The ways a virus enters the body, infects and spreads through cells, and causes illness. Damage may come directly from infected cells or from the immune system's response to the infection.

Viral Pericarditis

Inflammation of the sac around the heart caused by a viral infection. It often follows a respiratory or stomach illness and may cause sharp chest pain that changes with breathing or position.

Alternate Names:

Acute Viral Pericarditis; Viral Pericardial Inflammation

Viral Pharyngitis

Pharyngeal inflammation caused by viral pathogens such as adenovirus, rhinovirus, coronavirus, Epstein-Barr virus, or influenza virus. Characterized by cough, rhinorrhea, conjunctivitis, and lack of prominent tonsillar exudates, resolving with supportive care.

Alternate Names:

Viral Sore Throat; Acute Viral Pharyngotonsillitis; Viral Upper Respiratory Pharyngitis

Viral Pneumonia

Infection and inflammation of lung tissue caused by a virus, producing cough, fever, chills, breathlessness, chest discomfort, fatigue, and variable impairment of oxygenation. Severe disease can cause respiratory failure or secondary bacterial infection.

Viral Release

The stage when newly made viruses leave an infected cell and spread to other cells. Some leave by pushing through the cell membrane, while others are released when the infected cell breaks apart.

Viral Replication

The process by which a virus uses an infected cell to copy its genetic material and make viral proteins. The exact steps differ among viruses, but the result is production of new virus particles.

Viral Replication Cycle

The steps a virus uses to make more copies inside a living cell. Usually the virus attaches to the cell, enters, releases its genetic material, makes new parts, assembles new viruses, and leaves to infect other cells.

Viral Rhinitis

Acute inflammation and edema of the nasal mucous membranes caused by respiratory viral pathogens, predominantly rhinoviruses, coronaviruses, respiratory syncytial virus, or parainfluenza viruses. Clinically recognized as acute viral coryza or the common cold, it manifests with clear anterior rhinorrhea, nasal congestion, sneezing, itchy throat, low-grade malaise, and temporary hyposmia, generally resolving without antimicrobial therapy within 7 to 10 days.

Alternate Names:

Acute Viral Rhinitis; Acute Coryza; Common Cold Rhinitis

Viral Structure

The parts of a virus: genetic material made of DNA or RNA inside a protective protein coat. Some viruses also have an outer fatty covering taken from the infected cell's membrane.

Viral Uncoating

The step after a virus enters a cell when its protective outer coat comes apart and releases the genetic material. The cell can then be directed to make new viral components.

Virchow Node

A firm, non-tender, pathologically enlarged left supraclavicular lymph node (Troisier sign) located in the left supraclavicular fossa, which receives abdominal lymphatic drainage via the thoracic duct and signals metastatic spread of abdominal malignancies

(particularly gastric adenocarcinoma).

Alternate Names:

Troisier Node; Left Supraclavicular Sentinel Node

Virchow-Robin Spaces

Small fluid-filled spaces around blood vessels as they pass through the brain. They are a normal part of the spaces that surround and support these vessels.

Alternate Names:

Perivascular Spaces

Virchow's Triad

Three factors that increase the chance of a blood clot forming: slow blood flow, injury to the inside of a blood vessel, and blood that clots too easily. These factors can contribute to clots in deep veins or clots that travel to the lungs.

Alternate Names:

Virchow Triad; Triad of Virchow; Thrombogenesis Triad

Virchow Triad

Three factors that increase the chance of a blood clot forming: injury to the inside of a blood vessel, slow blood flow, and blood that clots too easily.

Alternate Names:

Virchow's Triad; Thrombosis Pathophysiological Triad

Viremia

The presence of a virus in the bloodstream. It may be brief or persistent and can allow infection to spread to other organs. Laboratory tests may detect the virus itself or its genetic material.

Viridans Streptococci

Viridans streptococci are a group of bacteria commonly found in the mouth that can cause dental infections and, after entering the blood, infect heart valves.

Virilisation

The development of male secondary sexual characteristics in females, resulting from excessive androgen production or exposure.

Virilism

Development of masculinizing features in a female, usually from excess androgen exposure or production, such as hirsutism, deep voice, acne, and menstrual disturbance.

Virilism Foetal

Prenatal or neonatal masculinization of a genetically female fetus or infant due to excess androgen exposure. Causes include congenital adrenal hyperplasia, maternal androgen-producing disease, or placental and fetal steroidogenic disorders.

Virilization

Virilization is development of typically male secondary sexual features, such as hirsutism, deep voice, acne, increased muscle mass, or clitoromegaly, from androgen excess or androgen exposure.

Virilize

To virilize is to develop or cause typically male physical changes from androgen excess or treatment, including facial hair, voice deepening, acne, muscle change, or genital enlargement.

Virology

The study of viruses, including their structure, reproduction, spread, effects on the body, diagnosis, treatment, and prevention.

Virotherapy

Treatment that uses a virus, often modified, to attack cancer cells or deliver a useful gene into cells. It is an evolving field; the possible benefits, risks, and availability depend on the specific therapy and disease.

Virtual Colonoscopy

Virtual colonoscopy is CT colonography, which uses bowel preparation and gas or carbon-dioxide insufflation to create images of the colon; it can detect polyps and masses but cannot remove lesions or biopsy them.

Virulence

How severely a microorganism can cause disease or tissue damage. It depends on the organism's harmful properties and on the person's immune defenses and other health factors.

Virulence Factor

A feature of a microorganism that helps it survive in the body, avoid immune defenses, attach to cells, damage tissue, or cause disease. Examples include toxins, protective coatings, and enzymes.

Virulent

Capable of causing severe disease or extensive harm. Virulence describes the harmfulness of a microorganism and is different from infectivity, which describes how easily it spreads or establishes infection.

Virus

An infectious agent made of genetic material inside a protective protein coat, sometimes with an outer membrane. It can reproduce only inside living cells and may cause illness by damaging cells or triggering inflammation.

Virus Activation

Virus activation is the switch from a dormant or inactive viral state to production of new viral components and particles.

Virus Assembly

Virus assembly is the stage of the viral life cycle when viral genetic material and proteins are packaged into new virus particles.

Virus Diseases

Illnesses caused by viruses. They range from mild infections of one area, such as a cold, to severe diseases affecting the lungs, liver, brain, blood, or several organs; prevention and treatment depend on the virus.

Viruses

Viruses are infectious particles containing DNA or RNA within a protein coat, sometimes with a lipid

envelope; they replicate only inside host cells and cause disease through direct injury or immune responses.

Virus Integration

Virus integration is insertion of viral genetic material into the DNA of a host cell, a process used by some viruses and important in certain cancers.

Virus Protein

A virus protein is a protein made from viral genetic instructions that helps form the virus, enter cells, replicate, or evade immunity.

Virus Receptor

A virus receptor is a molecule on a host cell that a virus binds to in order to attach to and enter the cell.

Virus Replication

Virus replication is the process by which a virus copies its genetic material and makes proteins and new virus particles inside a host cell.

Virus Uncoating

Virus uncoating is removal of the virus's protective outer layer after entry into a host cell, releasing its genetic material for replication.

Viscera

The internal organs of the body, particularly those within the thoracic and abdominal cavities. The thoracic viscera include the heart, lungs, esophagus, trachea, and thymus.

Visceral

Relating to the internal organs, especially those within the thorax or abdomen, rather than the body wall or limbs.

Visceral Afferents

Sensory nerve fibers that carry information from internal organs to the spinal cord and brain. They convey signals related to stretch, chemical changes, inflammation, and internal pain and help regulate

autonomic and reflex responses.

Visceral Larva Migrans

A syndrome caused by migration of animal nematode larvae through human tissues, most often from *Toxocara* species. It may produce fever, eosinophilia, liver lesions, or ocular and neurologic disease.

Visceral Leishmaniasis

A severe, potentially fatal systemic protozoan infection caused by species of the *Leishmania* donovani complex (*Leishmania donovani* and *Leishmania infantum*) transmitted to humans by the bite of female phlebotomine sandflies. Characterized by the intracellular dissemination of amastigotes within the reticuloendothelial system, it presents with prolonged irregular fever, progressive massive splenomegaly, hepatomegaly, profound pancytopenia (anemia, leukopenia, and thrombocytopenia), hypergammaglobulinemia, and severe wasting, fatal in over 95% of untreated cases.

Alternate Names:

Kala-Azar; Black Fever; Dumdum Fever; Systemic Leishmaniasis

Visceromegaly

Abnormal enlargement of one or more internal organs, such as the liver, spleen, or kidneys. It is a physical finding with causes that include infection, congestion, storage disease, inflammation, and cancer.

Viscus

An internal organ, especially one in the chest or abdomen. The plural is viscera; examples include the heart, lungs, liver, stomach, and intestines.

Vision

The sensory ability to perceive light and interpret visual information processed by the eyes and brain, enabling recognition of shapes, colors, depth, and motion. Normal vision depends on the proper function of the cornea, lens, retina, and optic nerve, as well as intact neural pathways to the visual cortex.

Alternate Names:

Eyesight; Sight; Visual Perception

Vision And Hearing

Two major senses used to understand and communicate with the world. Problems may develop separately or together because of aging, illness, injury, medicines, or inherited conditions and can affect learning, safety, communication, and daily activities.

Vision Impairment

Reduced visual acuity or visual-field function that affects daily activities. Causes include refractive error, cataract, glaucoma, retinal disease, optic-nerve injury, and neurologic disease. Evaluation and treatment depend on the cause; rehabilitation and visual aids may improve function.

Vision Loss

A decrease in the ability to see that cannot be fully corrected with eyeglasses, contact lenses, or medical treatment. It ranges from partial impairment to complete blindness and can result from conditions such as macular degeneration, glaucoma, diabetic retinopathy, cataracts, and traumatic injury.

Vision Problems

Changes in visual acuity, field, color, or clarity caused by refractive error, eye disease, neurologic disease, or systemic illness. Sudden vision loss is an emergency.

Vision Receptors

Light-sensing cells in the retina, mainly rods and cones, that convert light into nerve signals. Rods support dim-light vision, while cones provide color and sharp detail in brighter conditions.

Vision Screening

Brief checks used to find possible eye or vision problems before symptoms are obvious. Newborn checks may detect cataracts or other serious disorders; screening in young children looks for poor vision, misaligned eyes, or risks for reduced vision and leads to a full eye examination when needed.

Vision Test

An examination that measures visual acuity, fields,

color, alignment, or eye structures to detect refractive error, retinal disease, optic-nerve dysfunction, glaucoma, or other causes of visual impairment.

Visual Acuity

How clearly a person can see fine details, usually measured by reading letters or symbols at a set distance. It can be reduced by focusing problems, eye disease, or disorders affecting the visual nerves or brain.

Visual Acuity Test

A test measuring the smallest standardized detail a person can resolve at a specified distance, usually reported as a fraction or decimal.

Visual Agnosia

Inability to recognize familiar objects, faces, or symbols by sight even though the eyes may see adequately. It usually results from damage to brain areas that interpret vision, such as after a stroke or head injury.

Visual Evoked Potential

A test that records the brain's electrical response to flashes or changing visual patterns. It helps assess the nerve pathways that carry visual signals from the eyes to the brain.

Alternate Names:

VEP; Visual Evoked Response (VER)

Visual Field

The entire area that can be seen while the eyes remain fixed in one position. Visual-field loss may result from retinal, optic-nerve, or brain lesions and is assessed by perimetry.

Visual Field Defect

Loss or change in part of the area a person can see while looking straight ahead. It may result from disease of the retina, optic nerve, or brain, and the pattern can help identify where the problem is.

Visual Field Perimetry

A test that maps how well a person sees in different

parts of the visual field while looking at a fixed point. It can detect and monitor missing areas caused by eye-nerve, retinal, or brain disease.

Visual Fields

The total area that can be seen while the eyes are fixed in one position; defects may indicate retinal, optic-nerve, or brain disease.

Visual Field Test

A test that measures central and side vision and maps areas that are missing or less sensitive.

Visual Impairment

Reduced vision that cannot be fully corrected by ordinary glasses or contact lenses. Causes include refractive error, cataract, glaucoma, retinal disease, optic-nerve injury, and disorders of the brain or nervous system.

Visualized Laser-Assisted Prostatectomy

A procedure that uses a laser, guided by a camera, to remove or vaporize prostate tissue blocking urine flow. It is used for some people with an enlarged prostate and may cause bleeding, infection, scar narrowing, or temporary urinary and sexual problems.

Alternate Names:

VLAP

Visual Neglect

A brain disorder in which a person fails to notice or respond to things on one side, even though the eyes may work normally. It often follows a stroke affecting the right side of the brain and causes neglect of the left side.

Alternate Names:

Hemispatial Neglect; Spatial Inattention

Vital

Essential for life or relating to vital physiologic functions. Vital signs commonly include temperature, pulse, respiratory rate, blood pressure, and oxygen saturation.

Vital Capacity

The greatest amount of air a person can breathe out after filling the lungs as fully as possible. It is measured during lung-function testing and may be reduced by lung disease, weak breathing muscles, or restriction of chest movement.

Vital Signs

Basic measurements of physiologic status, commonly including temperature, pulse, respiratory rate, blood pressure, and oxygen saturation. Values vary with age, activity, illness, and measurement conditions; trends and clinical context are important.

Vitamin A

A fat-soluble vitamin needed for vision, immune function, skin and mucosal health, and growth; deficiency causes night blindness, while excess can injure the liver and developing fetus.

Alternate Names:

Retinol; Retinoic Acid

Vitamin A Blood Test

A blood test measuring circulating retinol, used to assess suspected vitamin A deficiency or toxicity in appropriate clinical settings.

Vitamin A Deficiency

A nutritional disorder resulting from inadequate intake or absorption of vitamin A (retinol), causing dry eyes (xerophthalmia), night blindness, dry skin, and weakened immunity. Severe deficiency leads to corneal ulceration and is the leading cause of preventable childhood blindness worldwide; clinical eye stages are categorized using the WHO xerophthalmia classification.

Alternate Names:

Hypovitaminosis A; Retinol Deficiency; Vitamin A Lack

Vitamin A: Retinal

Vitamin A (retinol) is a fat-soluble vitamin essential for vision, immune function, cell differentiation, and reproduction. In the eye, retinol is oxidized to retinal (retinaldehyde), which binds to opsin in the

photoreceptor outer segments forming rhodopsin (in rods) and photopsins (in cones).

Vitamin A Toxicity

Harm caused by taking too much vitamin A or related medicines. It may cause nausea, vomiting, headache, dry skin, hair loss, liver injury, high calcium levels, and serious fetal abnormalities during pregnancy.

Vitamin B

Vitamin B refers to a group of water-soluble vitamins that support energy metabolism, blood-cell formation, nerve function, and other processes. The group includes several distinct vitamins, not one single substance.

Vitamin B1

Thiamine, a water-soluble vitamin that acts as a co-factor in carbohydrate and amino-acid metabolism and supports nerve function. Severe deficiency can cause beriberi or Wernicke encephalopathy.

Alternate Names:

Thiamine; Aneurin

Vitamin B12

A vitamin needed for red-cell formation, DNA production, and normal nerve function. Deficiency can cause anemia, numbness, balance problems, or cognitive changes.

Alternate Names:

Cobalamin; Cyanocobalamin

Vitamin B12: Cobalamin

Alternate name; see *Vitamin B12*.

Vitamin B12 Deficiency

Too little vitamin B12, which can cause large abnormal red cells, tiredness, numbness, balance problems, or nerve damage. Causes include poor intake, poor absorption, autoimmune disease, stomach surgery, and medicines.

Vitamin B12 Deficiency Anemia

Anemia caused by too little vitamin B12 or poor

absorption of it. It can cause tiredness, pale skin, a sore tongue, numbness, balance problems, and permanent nerve damage if untreated for a long time.

Alternate Names:

Vitamin B12 Deficiency Anaemia

Vitamin B12 Deficiency In Older Adults

Deficiency caused by inadequate intake, malabsorption, autoimmune intrinsic-factor deficiency, gastric surgery, or medications. It may cause megaloblastic anemia, neuropathy, cognitive changes, gait impairment, and glossitis; neurologic injury can occur without anemia.

Vitamin B12 Level

The amount of vitamin B12 measured in blood; results are interpreted with symptoms and related tests because serum levels may not fully reflect tissue deficiency.

Vitamin B1: Thiamine

Alternate name; see *Vitamin B1*.

Vitamin B2

Riboflavin, a water-soluble vitamin that helps cells produce energy and supports healthy skin, eyes, and the lining of the mouth. Deficiency can cause cracks at the mouth corners, a sore tongue, skin changes, or anemia.

Alternate Names:

Riboflavin; Lactoflavin

Vitamin B2 Riboflavin

Alternate name; see *Riboflavin*.

Vitamin B3

A vitamin that helps cells use food for energy and supports the skin and nervous system. Severe deficiency causes pellagra, with diarrhea, skin inflammation, confusion, and other neurologic problems.

Alternate Names:

Nicotinic Acid; Nicotinamide

Vitamin B5

A water-soluble vitamin needed to help the body use fats, carbohydrates, and proteins and make hormones and other substances. It is found in many foods, so deficiency is rare; very large supplement doses may cause stomach upset.

Alternate Names:

Pantothenate; Calcium Pantothenate

Vitamin B6

A group of related vitamins needed for amino-acid metabolism, red-cell production, and nerve function. Excess supplements can cause sensory nerve damage.

Alternate Names:

Pyridoxine; Pyridoxal Phosphate

Vitamin B6: Pyridoxine

Alternate name; see *Vitamin B6*.

Vitamin B7

A vitamin that helps the body use fats, carbohydrates, and proteins. Deficiency is uncommon but may cause hair loss, skin rash, or neurologic symptoms; large doses can interfere with some laboratory tests.

Alternate Names:

Vitamin H; Coenzyme R

Vitamin B9

A vitamin needed for DNA production and healthy red blood cells. Deficiency can cause large-cell anemia and, during pregnancy, increases the risk of neural-tube defects; folic acid is recommended before conception and early in pregnancy.

Alternate Names:

Folic Acid; Pteroylglutamic Acid

Vitamin B Complex

A group of eight water-soluble vitamins that act mainly as coenzymes or their precursors in cell metabolism. The group includes thiamine (B1), riboflavin (B2), niacin (B3), pantothenic acid (B5), pyridoxine (B6), biotin (B7), folate (B9), and cobalamin (B12), which together support energy

metabolism, red-blood-cell formation, and nervous-system function. These vitamins occur together in whole grains, meat, eggs, and legumes; individual deficiencies cause distinct disorders, and combined supplements can prevent or correct deficiency. The sequence has gaps because early candidate substances were later excluded as nonessential: B8 (inositol) is synthesized by the body, B4 (choline, adenine) is not a true vitamin, and the provisional labels B10 and B11 were abandoned once their activity was identified as folate or para-aminobenzoic acid.

Alternate Names:

B Vitamins; Vitamin B Group

Vitamin C

A water-soluble vitamin needed for collagen formation, wound healing, immune function, antioxidant activity, and absorption of iron from plant foods. Severe deficiency causes scurvy, with bleeding gums, bruising, poor wound healing, and weakness.

Alternate Names:

Ascorbic Acid

Vitamin C Deficiency

A lack of vitamin C, a water-soluble vitamin needed for collagen formation, wound healing, iron absorption, and antioxidant activity. It follows prolonged low intake and, when severe, causes scurvy, with bleeding gums, easy bruising, poor wound healing, joint pain, and weakness. Replacement and dietary correction reverse the deficiency.

Vitamin D

Vitamin D supports calcium and phosphate balance, bone mineralization, muscle function, and immune processes; deficiency causes rickets in children and osteomalacia or bone loss in adults.

Vitamin D3

Cholecalciferol, a form of vitamin D made in skin and found in some foods and supplements. It helps the body absorb calcium and maintain healthy bones.

Vitamin D: Calcitriol

Alternate name; see *Calcitriol*.

Vitamin D Deficiency

Too little vitamin D for the body's needs. It can result from low intake or sunlight, poor absorption, or liver or kidney disease and may weaken bones, cause muscle weakness, or lead to rickets in children.

Vitamin Deficiency Anemia

Anemia caused by inadequate vitamin B-12, folate, or other nutrients needed for normal red blood cell production.

Vitamin E

Vitamin E is a group of fat-soluble compounds with antioxidant activity. It is found in foods such as nuts, seeds, and vegetable oils; high-dose supplements can increase bleeding risk and interact with medicines.

Alternate Names:

Tocopherol; Alpha-Tocopherol

Vitamin E Deficiency

Deficiency of a fat-soluble antioxidant vitamin, usually caused by fat-malabsorption disorders or rare inherited conditions. Severe deficiency can cause peripheral neuropathy, ataxia, muscle weakness, retinal dysfunction, or hemolytic anemia.

Vitamin E: Tocopherol

Alternate name; see *Vitamin E*.

Vitamin K

A fat-soluble vitamin required to activate several blood-clotting proteins and support bone metabolism; the main dietary form is phylloquinone, found especially in leafy green vegetables and some vegetable oils. Deficiency can cause bleeding and is treated or prevented with replacement.

Vitamin K Deficiency

Too little vitamin K for normal production of clotting factors, causing an increased bleeding tendency. It can result from poor intake, malabsorption, liver disease, or certain medicines; newborns receive vi-

tamin K prophylaxis.

Vitamin K Deficiency Bleeding

Bleeding in a newborn or young infant caused by inadequate vitamin K-dependent clotting activity. It may occur early, classically, or late and can involve the brain or gastrointestinal tract.

Alternate Names:

VKDB; Neonatal Hypoprothrombinemia

Vitamin K: Phylloquinone

Alternate name; see *Vitamin K*.

Vitamin K Prophylaxis

Giving vitamin K to a newborn soon after birth to prevent bleeding caused by vitamin K deficiency.

Vitamins

Organic nutrients needed in small amounts for normal metabolism, growth, and tissue maintenance; some are water-soluble and others fat-soluble, and both deficiency and excess can cause disease.

Vitamin Toxicity

Harm from excessive vitamin intake, most often involving fat-soluble vitamins that accumulate in the body. Vitamin A can cause headache, liver injury, and bone effects; vitamin D can cause hypercalcemia; and high-dose vitamin E can increase bleeding risk. Stop the source and treat the affected organ or metabolic abnormality.

Vitiligo

Vitiligo is a condition in which areas of skin lose pigment because melanocytes are destroyed or stop functioning. It is not contagious, and treatment may include camouflage, topical medicines, or light therapy.

Vitrectomy

Eye surgery that removes some or all of the vitreous, the clear gel that fills the middle of the eye. Small instruments are inserted through the wall of the eye to remove cloudy gel, blood, scar tissue, or a foreign object and to repair problems of the retina.

It may be used for retinal detachment, diabetic eye disease, macular hole, macular pucker, severe eye injury, or serious eye infection. The removed gel may be replaced with a salt solution, air or gas, or silicone oil.

Vitreous

Relating to the transparent gel filling most of the space between the lens and retina, or describing a glass-like appearance. Vitreous disorders can cause floaters, hemorrhage, detachment, or retinal traction.

Vitreous Body

The transparent gel filling the large space between the lens and retina. It helps maintain the shape of the eye and transmits light; age-related liquefaction can cause floaters or contribute to retinal traction.

Alternate Names:

Vitreous Humor; Corpus Vitreum

Vitreous Detachment

Separation of the vitreous gel from the retina, usually related to aging and often causing new floaters or flashes. Sudden symptoms can occur with a retinal tear or detachment.

Vitreous Hemorrhage

Bleeding into the vitreous cavity that causes sudden painless floaters, cobwebs, haze, or loss of vision. Common causes include proliferative diabetic retinopathy, retinal tear or detachment, trauma, and posterior vitreous separation.

Vitreous Humor

The clear gel that fills the space between the lens and retina. It helps maintain the shape of the eye and transmits light to the retina.

VKORC1 Polymorphism

An inherited variation in the vitamin K epoxide reductase complex subunit 1 gene that can alter sensitivity to warfarin. Genotype may contribute to dose selection, but clinical factors, interacting medicines, diet, and INR monitoring remain important.

VLDL Test

A blood test that measures or estimates very-low-density lipoprotein, a particle carrying triglycerides. The result may help assess cardiovascular risk but is interpreted with the full cholesterol and triglyceride profile.

VO2 Max

The greatest amount of oxygen the body can use during intense exercise. It is a measure of aerobic fitness and is influenced by the heart, lungs, blood, muscles, age, health, and training.

Alternate Names:

Maximal Oxygen Consumption; Maximal Aerobic Capacity

Vocal-Cord Dysfunction

Older term for inducible laryngeal obstruction, in which the larynx temporarily narrows during breathing and may cause throat tightness, noisy breathing, cough, or shortness of breath.

Vocal Cord Nodules

Benign, usually paired thickened areas of the vocal folds caused by repeated voice strain or overuse. They can cause

hoarseness, vocal fatigue, and a rough or breathy voice.

Vocal Cord Paralysis

Inability of one or both vocal folds to move normally, often because of nerve damage. It may cause hoarseness, weak cough, choking, or difficulty protecting the airway; sudden breathing trouble is an emergency.

Alternate Names:

Vocal Fold Paralysis

Vocal Cord Paresis

Weakness or partial paralysis of one or both vocal cords, often from injury to the nerves that control them. It can cause a weak or breathy voice, voice fatigue, coughing during eating, or aspiration.

Vocal Cord Polyp

A usually noncancerous growth on a vocal fold, often after heavy or sudden voice use. It can cause persistent hoarseness, a rough voice, or voice fatigue and is assessed by examining the larynx.

Vocal Cords

Vocal cords, or vocal folds, are bands of tissue in the larynx that vibrate as air passes between them to produce the voice. Swelling, nodules, or injury can cause hoarseness.

Vocal-Fold Nodules

Alternate name for vocal cord nodules, benign thickened areas of the vocal folds that can cause persistent hoarseness.

Vocal Fold Paralysis

Alternate name; see *Vocal cord paralysis*.

Vocal-Fold Polyps

Alternate name for vocal cord polyps, usually noncancerous growths on the vocal folds that can cause persistent hoarseness or voice fatigue.

Vocal Folds

Two folds inside the voice box that vibrate as air passes between them to make sound. They also close during swallowing to protect the lungs from food and liquid.

Vocal Hemorrhage

Vocal hemorrhage is bleeding into a vocal fold, often after sudden or forceful voice use. It can cause abrupt hoarseness.

Vocal Resonance

The sound of a person's voice heard through the chest with a stethoscope while they speak. Changes in the sound can provide clues to pneumonia, fluid around the lung, a collapsed lung, or other lung disease.

Vogt-Koyanagi-Harada Disease

A rare, multisystem, cell-mediated autoimmune dis-

order directed against melanocyte-associated antigens (such as tyrosinase), occurring predominantly in pigmented ethnic populations. Characterized by chronic bilateral granulomatous panuveitis with exudative retinal detachments, accompanied by sensorineural hearing loss, tinnitus, vitiligo, poliosis (whitening of eyelashes and hair), and aseptic meningitis.

Alternate Names:

VKH Syndrome; Uveomeningoencephalitic Syndrome

Vogt-Koyanagi-Harada Syndrome

A multisystem autoimmune inflammatory disorder mediated by T-cell responses against melanocyte-associated antigens, characterized by bilateral chronic granulomatous panuveitis, exudative retinal detachments, meningismus (CSF pleocytosis), sensorineural dysacusis, poliosis, and patchy vitiligo.

Alternate Names:

VKH Syndrome; Uveomeningoencephalitic Syndrome

Vohwinkel Syndrome

A rare inherited palmoplantar keratoderma causing thick skin on the palms and soles, constricting bands around fingers or toes, and sometimes hearing loss or other features. Severe constriction can threaten circulation and requires specialist care.

Voice

Sound produced by vibration of the vocal folds as air passes through the larynx, then shaped by the throat, mouth, and nose for speech.

Voice And Speech

The products of complex coordinated activity of the respiratory, laryngeal, and articulatory systems. Communication produced by coordinated breathing, voice-box vibration, and movements of the mouth, tongue, and other speech structures.

Voice Box

The larynx, an organ in the neck containing the vocal folds and forming part of the airway. It produces voice and helps protect the lower respiratory

tract during swallowing.

Voice Disorders

Conditions affecting voice quality, pitch, loudness, or ease of speaking because of problems involving the vocal folds, airway, nerves, or voice use.

Alternate Names:

Dysphonia; Vocal Cord Dysfunction

Void

To empty the urinary bladder by urinating; in other medical contexts, void may mean an empty space or absence of a substance.

Voiding Cystourethrogram

An X-ray test that fills the bladder with contrast through a catheter and records the bladder and urethra while the person urinates. It can show urine flowing backward toward the kidneys, blockage, leakage, or structural problems, especially in children with selected urinary infections.

Volar

Relating to the palm of the hand or sole of the foot, especially the surface opposite the dorsum.

Volatile Anesthetics

Inhaled medicines used to produce and maintain unconsciousness during some operations. They can lower blood pressure and breathing and rarely cause a dangerous rise in body temperature in susceptible people.

Alternate Names:

Inhalational Anesthetics; Inhalation General Anesthetics

Volkman Contracture

A permanent, severe ischemic contracture of the forearm flexor musculature leading to a claw-like hand deformity, resulting from untreated acute compartment syndrome of the forearm following supracondylar humeral fractures, crush injuries, or tight casting.

Alternate Names:

Volkman's Ischemic Contracture; Ischemic Myo-

dystrophy

Alternate Names:

Volkman contracture; Volkman's ischaemic contracture; Volkman claw deformity.

Volume Of Distribution

A calculated measure of how widely a medicine appears to spread through the body compared with the amount left in the blood. It helps guide dosing but does not represent a real space inside the body.

Volume Overload

Excess total body sodium and water, causing peripheral or pulmonary oedema; common causes include heart failure, kidney failure, liver disease, and excessive intravenous fluid, and treatment depends on the cause and severity.

Voluntary

Under conscious control or performed by choice, such as voluntary movement. Voluntary action is distinguished from reflex, autonomic, or involuntary activity.

Voluntary Psychiatric Admission

Admission to a hospital or psychiatric facility with the person's agreement for assessment, treatment, or safety support. Legal rules about consent, leaving, capacity, and conversion to involuntary status vary by jurisdiction.

Volutrauma

Lung injury caused by overstretching the lungs, usually when a breathing machine delivers breaths that are too large. Careful ventilator settings can reduce this risk.

Volvulus

Twisting of a loop of intestine that blocks passage through the bowel and may cut off its blood supply. It can cause severe pain, vomiting, swelling, and tissue death and can be life-threatening.

Vomit

To eject stomach or upper gastrointestinal contents

through the mouth; the expelled material may also be called vomitus. Persistent vomiting can cause dehydration and electrolyte abnormalities.

Vomiting

Forceful emptying of stomach contents through the mouth. It may result from infection, digestive disease, medicines, pregnancy, migraine, brain disorders, or poisoning. Repeated vomiting can cause dehydration, disturbed body salts, or inhalation of vomit.

Vomiting Blood

The passage of blood or coffee-ground material in vomit, usually indicating bleeding in the upper digestive tract. It can be a serious symptom.

Vomitus

Material expelled from the stomach or upper gastrointestinal tract during vomiting. Its color and contents can provide clues but do not by themselves establish a diagnosis.

Von Economo Encephalitis

An atypical form of epidemic encephalitis (encephalitis lethargica) characterized by pronounced lethargy, hypersomnolence, ophthalmoplegia, and a frequent late sequela of progressive post-encephalitic parkinsonism, pathologically marked by midbrain and basal ganglia inflammation.

Alternate Names:

Encephalitis Lethargica; Sleeping Sickness (Von Economo Type)

Von Gierke Disease

Glycogen storage disease type I, an inherited deficiency of glucose-6-phosphatase or its transport system that causes fasting hypoglycemia, lactic acidosis, enlarged liver, and excess uric acid or lipids.

Von Graefe Sign

A delay of the upper eyelid as the eyes look downward, leaving a strip of white visible above the iris. It can occur with an overactive thyroid and related eye disease.

Alternate Names:

Lid Lag Sign; Von Graefe's Lid Lag

Von Hippel-Lindau Disease

An inherited condition, usually caused by a change in the *VHL* gene, that increases the risk of tumors and cysts in the brain, spinal cord, eyes, kidneys, adrenal glands, and pancreas. These growths can affect vision, blood pressure, or kidney function.

Von Hippel-Lindau Syndrome

Von Hippel-Lindau syndrome is an inherited disorder caused by changes in the *VHL* gene. It increases the risk of tumors and cysts in organs such as the brain, retina, kidneys, pancreas, and adrenal glands.

Von Meyenburg Complex

A benign congenital biliary ductal plate malformation (biliary microhamartoma) consisting of small, non-progressive clusters of dilated, cystic bile ducts embedded in a dense collagenous stroma, usually discovered incidentally on liver imaging or biopsy.

Alternate Names:

Biliary Microhamartoma; Ductal Plate Malformation

Von Recklinghausen Disease

Von Recklinghausen disease is another name for neurofibromatosis type 1, an inherited condition causing multiple café-au-lait spots, neurofibromas, and increased risk of certain nerve, bone, eye, and other problems.

Von Recklinghausen's Disease

Alternate name; see *Neurofibromatosis type 1*.

Von Recklinghausen's Neurofibromatosis

Alternate name; see *Neurofibromatosis type 1*.

Von Recklinghausen's Phakomatosis

Alternate name; see *Neurofibromatosis type 1*.

Von Rosen Splint

A malleable, lightweight orthopedic abduction splint applied in neonates with developmental dysplasia

of the hip (DDH) to maintain the femoral head securely centered within the acetabulum in flexion and abduction.

Alternate Names:

Von Rosen Frame; DDH Abduction Splint

Von Willebrand Disease

A bleeding disorder caused by too little or poorly working von Willebrand factor, a blood protein that helps clots form. It is often autosomal dominant, although severe type 3 and some other forms are autosomal recessive. It commonly causes nosebleeds, easy bruising, heavy menstrual bleeding, or prolonged bleeding after procedures.

Voriconazole

An antifungal medicine used for selected serious fungal infections. It stops fungi making an essential part of their outer structure; vision changes, liver problems, medicine interactions, and skin sensitivity require monitoring.

VOR Reflex

A reflex that moves the eyes opposite to head movement so vision stays steady while the head turns. Problems with this reflex can cause blurred or bouncing vision, dizziness, or imbalance.

Voyeurism

A recurrent sexual interest in observing an unsuspecting person who is naked, disrobing, or engaging in sexual activity. The interest alone is not a mental disorder; voyeuristic disorder is the diagnostic term when required criteria are met.

Voyeuristic Disorder

A paraphilic disorder involving recurrent, intense sexual arousal from observing an unsuspecting person who is naked, disrobing, or engaging in sexual activity. Diagnostic criteria include acting on the urges or clinically significant distress or impairment, with the required duration criteria.

VPCs (Ventricular Premature Contractions)

Alternate name; see *Premature ventricular contrac-*

tions (PVCs).

VRE (Vancomycin-Resistant Enterococci)

Enterococcus bacteria that are no longer killed by vancomycin, an antibiotic. They may live harmlessly in the body or cause urinary, wound, bloodstream, or other infections that require infection-control measures and suitable treatment.

VSD (Ventricular Septal Defect)

A hole in the wall between the heart's lower chambers. Small holes may close or cause no symptoms, while larger holes can make the heart and lungs work too hard and may need treatment.

Alternate Names:

Ventricular Septal Defect

Vulnerary

A substance traditionally believed to help heal wounds. Such products may lack good evidence and can cause allergy or contamination.

Vulva

The external female genital structures, including the mons pubis, labia, clitoris, and vestibule. It protects the openings of the urinary and reproductive tracts and contains specialized sensory and glandular tissue.

Alternate Names:

Female External Genitalia; Pudendum

Vulval Intraepithelial Neoplasia

Vulval intraepithelial neoplasia is abnormal cell growth limited to the surface layers of the vulvar skin. Some types are linked to HPV, and untreated lesions may progress to invasive cancer.

Vulvar

Relating to the vulva, the external female genital structures including the labia, clitoris, vestibule, and associated glands.

Vulvar Cancer

Cancer arising in the external female genitalia. It may appear as a persistent lump, ulcer, wart-like

lesion, itching, pain, or bleeding.

Vulvar Carcinoma

Cancer of the external female genital area, most often arising from surface skin cells. It may appear as a persistent lump, sore, wart-like growth, itching, pain, or bleeding.

Alternate Names:

Vulvar Cancer; Squamous Cell Carcinoma of Vulva

Vulvar Inclusion Cysts

Small sacs under the skin of the vulva that contain tissue trapped from the surface lining. They may develop after childbirth tears, surgery, or other injury, or occur without an obvious cause. Most cause no symptoms, but they may become swollen, painful, infected, or uncomfortable during sexual activity. Symptomatic cysts may need removal.

Vulvar Intraepithelial Neoplasia

Abnormal cells limited to the surface layer of the vulva. Some forms can progress to invasive cancer, especially without treatment. It may cause itching, burning, sores, warty growths, or a color change, but some people have no symptoms.

Vulvar Melanoma

A rare cancer of the pigment-producing cells in the vulva. It may appear as a dark or skin-colored lump, patch, sore, or bleeding area; diagnosis requires a biopsy, and treatment depends on size and spread.

Vulvar Squamous Cell Carcinoma

The most common invasive vulvar malignancy, arising through HPV-related or HPV-independent pathways. It usually presents as a persistent mass, ulcer, plaque, or wart-like lesion and requires biopsy for diagnosis.

Vulvectomy

Surgical removal of part or all of the vulva, performed for selected cancers, precancerous lesions, or severe persistent disease.

Vulvitis

Inflammation or irritation of the external female genital area. It can cause itching, burning, redness, swelling, soreness, or discharge and may result from infection, allergy, skin disease, hormones, or friction.

Vulvodynia

Vulvodynia is chronic vulvar pain without an identifiable specific cause, often described as burning or rawness and triggered by touch, pressure, or occurring spontaneously.

Alternate Names:

Chronic Vulvar Pain

Vulvovaginal Candidiasis

A yeast infection of the vulva and vagina, usually caused by *Candida*. It commonly causes intense itching, burning, soreness, redness, and thick discharge; recurrent, severe, unusual, or treatment-resistant symptoms need testing to confirm the cause.

Vulvovaginitis

Simultaneous inflammation or infection of the vulva and vagina, commonly presenting with pruritus, burning, dysuria, dyspareunia, and abnormal vaginal discharge, resulting from infectious etiologies (such as *Candida albicans*, Bacterial vaginosis, *Trichomonas vaginalis*) or non-infectious causes (atrophic vaginitis, contact irritants).

Alternate Names:

Vaginitis and Vulvitis; Vulvovaginal Inflammation

Vocal Cord Disorders

Disorders affecting the vocal folds or their nerves, including nodules, polyps, cysts, inflammation, paralysis, spasmodic dysphonia, and paradoxical vocal-fold movement. They may cause hoarseness, voice loss, throat discomfort, noisy breathing, or difficulty breathing and swallowing.

Vocal Cord Dysfunction

Inappropriate closing or narrowing of the vocal folds, especially during inhalation, causing sudden throat tightness, noisy breathing, cough, or shortness of breath that can resemble asthma. It is also called inducible laryngeal obstruction and needs assessment

when breathing is difficult.

Vocal Nodules

Benign callus-like growths on the vocal folds caused by repeated voice strain. They can produce hoarseness, a rough or breathy voice, vocal fatigue, and loss of range; voice therapy and reducing strain are common treatments.

Varicose Veins (Spider Veins)

Alternate name; see *Varicose Veins* and *Spider Veins*.

W

Waardenburg Syndrome

A group of inherited conditions that may cause hearing loss and unusual coloring of the eyes, hair, or skin. Some forms also affect the arms or the nerves controlling the bowel; findings vary by type.

Waddell Signs

A standardized group of physical examination signs evaluated during back assessment to identify non-organic or behavioral components contributing to lower back pain. Signs include superficial tenderness, simulation testing, distraction maneuvers, regional sensory or motor deficits inconsistent with neuroanatomy, and overreaction during examination.

Alternate Names:

Waddell Non-Organic Signs; Waddell Score

WAGR Syndrome

A rare genetic condition that may cause an increased risk of Wilms kidney tumor, missing or poorly formed irises, urinary or reproductive differences, and developmental delay. Children need regular specialist monitoring, especially for kidney tumors.

Waist Circumference

The distance around the abdomen, measured at a standard level. A larger measurement can indicate more abdominal fat and a higher risk of diabetes and heart disease, but it must be interpreted with other health information.

Waist-Hip Ratio

A measurement comparing waist size with hip size.

It provides an estimate of where body fat is stored and may add information about diabetes and cardiovascular risk, but it does not diagnose disease by itself.

Wait List

A list of candidates registered to receive an organ transplant. Placement and allocation priority are determined by the applicable transplant system and may consider medical urgency, expected benefit, blood or tissue compatibility, organ size, waiting time, and other policy-based factors; it is not necessarily a simple first-come, first-served queue.

Alternate Names:

Waiting List; Transplant Waiting List; Transplant Waitlist

Wakefulness

The state of being conscious and able to respond to the surroundings. Sleep, medicines, illness, brain injury, and metabolic problems can change the level of wakefulness.

Waldenström's Macroglobulinemia

A slow-growing blood cancer in which abnormal immune cells make too much of an antibody called IgM. The blood can become unusually thick, causing blurred vision, headaches, bleeding, confusion, or numbness.

Waldenstrom Macroglobulinemia

A rare blood cancer in which abnormal immune cells build up in the bone marrow and make too much of an antibody called IgM. It may cause anemia, bleeding, vision or nerve problems, enlarged lymph

nodes, or no symptoms at first.

Alternate Names:

Lymphoplasmacytic Lymphoma

Waldenstrom's Macroglobulinemia

A lymphoplasmacytic cancer of the bone marrow that produces excess IgM and may cause anemia, enlarged lymph nodes, or hyperviscosity symptoms.

Waldeyer Ring

An annular anatomical arrangement of lymphoid tissue surrounding the opening of the pharynx and nasal cavity, consisting of the pharyngeal tonsils (adenoids), tubal tonsils, palatine tonsils, and lingual tonsils. It functions as the first line of immune defense against ingested or inhaled pathogens.

Alternate Names:

Waldeyer Lymphatic Ring; Pharyngeal Lymphoid Ring

Walker-Warburg Syndrome

A rare inherited disorder causing severe muscle weakness together with major abnormalities of the brain and eyes from birth. Babies may have low muscle tone, seizures, poor feeding, enlarged fluid spaces in the brain, and abnormal eye development; the condition is usually life-threatening in infancy.

Alternate Names:

WWS; Muscle-Eye-Brain Disease (Severe Type); HARD +/- E Syndrome

Walking Abnormalities

Walking abnormalities include changes in speed, balance, stride, posture, or coordination caused by pain, weakness, sensory loss, joint disease, or neurologic illness.

Walking Pneumonia

An informal clinical term for a mild, atypical community-acquired pneumonia (most frequently caused by *Mycoplasma pneumoniae* or *Chlamydia pneumoniae*), in which the patient presents with persistent dry cough, low-grade fever, and prominent radiographic interstitial infiltrates while remaining ambulatory and non-toxic.

Alternate Names:

Atypical Pneumonia

Walking Speed

The rate at which a person walks, often measured over a defined distance. It can provide information about mobility and function, but no single speed determines disability in every person.

Wallenberg Syndrome

A neurological condition caused by infarction of the lateral medulla oblongata, most commonly resulting from occlusion of the posterior inferior cerebellar artery (PICA) or vertebral artery. Manifestations include ipsilateral facial sensory loss, Horner syndrome, ataxia, dysphagia, hoarseness, and contralateral loss of pain and temperature sensation in the trunk and limbs.

Alternate Names:

Lateral Medullary Syndrome; PICA Syndrome; Posterior Inferior Cerebellar Artery Syndrome

Wallerian Degeneration

Breakdown of the part of a nerve beyond a severe injury after it loses contact with the nerve cell. The nerve may regrow slowly if the surrounding pathway remains intact, but recovery depends on the injury.

Walleyed

Walleyed describes eyes that appear misaligned or divergent; clinically, the condition may be strabismus and requires eye assessment when persistent.

Wall Stress

The strain placed on the wall of a heart chamber by the pressure inside it and the chamber's size. High wall stress makes pumping harder and may contribute to heart enlargement or failure.

Wandering Spleen

A spleen that can move unusually because its supporting bands are loose or missing. It may cause no symptoms or lead to abdominal pain, enlargement, twisting, loss of blood supply, or sudden severe illness.

Warburg Effect

A hallmark metabolic phenotype of malignant neoplastic cells in which cells preferentially convert glucose to lactate via aerobic glycolysis even in the presence of abundant oxygen, rather than utilizing mitochondrial oxidative phosphorylation, generating glycolytic intermediates for rapid cell proliferation.

Warfarin

A blood-thinning medicine that reduces production of vitamin-K-dependent clotting proteins. It prevents and treats clots but requires regular blood tests because food, illnesses, and many medicines alter its effect.

Warfarin and Superwarfarin Toxicity

Excess anticoagulation from warfarin or long-acting rodenticides, causing an elevated INR and potentially delayed bleeding, including gastrointestinal or intracranial hemorrhage. Serial coagulation testing is essential; vitamin K reverses the effect, while life-threatening bleeding may require four-factor prothrombin complex concentrate and prolonged treatment for superwarfarins.

Warfarin-Induced Skin Necrosis

A rare, catastrophic thrombotic complication occurring 2 to 5 days after starting warfarin without heparin bridging, caused by the rapid initial decline in the short-half-life natural anticoagulant protein C before procoagulant factors fall, triggering microvascular thrombosis and cutaneous infarction in breasts, buttocks, and thighs.

Alternate Names:

Coumadin-Induced Skin Necrosis

Warfarin Syndrome

A pattern of fetal abnormalities caused by warfarin exposure during pregnancy, including nasal and skeletal abnormalities, eye or neurologic defects, and fetal or neonatal bleeding.

Warm and Cold Autoantibodies

Antibodies that make red blood cells clump at warmer or colder temperatures. They can inter-

fere with laboratory testing or cause autoimmune destruction of red cells and anemia.

Warm Autoimmune Hemolytic Anemia

An illness in which the immune system makes antibodies that cause red blood cells to be destroyed too early, mainly in the spleen. It can cause tiredness, pale or yellow skin, dark urine, shortness of breath, or a fast heartbeat and requires medical evaluation.

Alternate Names:

wAIHA; Warm Antibody Hemolytic Anemia

Warm Ischemia

Lack of blood and oxygen reaching tissue while it remains at body temperature. It can quickly cause cell damage and is important during some injuries, operations, and organ transplantation.

Wart

A usually harmless rough skin growth caused by human papillomavirus. Warts may spread by contact and often disappear over time. Common types include common, plantar, and flat warts; appearance and symptoms vary by site.

Alternate Names:

Verruca

Warthin Tumor

A usually harmless tumor of a salivary gland, most often the parotid near the ear. It is strongly associated with tobacco use and may occur on both sides; evaluation distinguishes it from other growths.

Wart Remover Poisoning

Toxic exposure to a wart-removal product, often involving salicylic acid or another keratolytic. Severity depends on the substance, amount, route, symptoms, and duration of exposure.

Warty Dyskeratoma

A usually harmless skin growth, often on the head or neck, with a small central dip filled with keratin. It may look like skin cancer, so examination and sometimes a biopsy are needed.

Wasting

Abnormal loss of body weight, muscle, or other tissue, often associated with chronic disease, inadequate nutrition, inflammation, or cancer. Severe wasting may impair strength, immunity, and recovery.

Watchful Waiting

Planned observation without immediate active treatment, with clinical review and treatment if symptoms develop or the condition progresses. It may be used for selected cancers and other slowly progressive conditions.

Water Birth

Delivery of a baby while the birthing person remains in a tub or pool of warm water. It may reduce perceived labor pain for some people, but evidence about delivery-related benefits and risks is limited. Eligibility, monitoring, and facility policies determine whether it is offered.

Alternate Names:

Aquatic Delivery; Water Labor and Birth

Water Blister

A fluid-filled blister, usually containing clear serum, caused by friction, pressure, burns, or some skin disorders. The blister should be protected from further trauma and assessed if infected or widespread.

Waterborne Bacterial Disease

An infection acquired from water contaminated with bacteria, such as cholera, typhoid fever, or leptospirosis; prevention depends on safe water, sanitation, and food hygiene.

Water-Borne Disease

An illness acquired through water contaminated with infectious organisms or harmful chemicals. Examples include cholera, typhoid fever, and hepatitis A; prevention includes safe drinking water, sanitation, hand hygiene, and appropriate treatment of contaminated water.

Water Brash

A sudden rise of watery or salty-tasting saliva into the mouth, usually because stomach acid has refluxed into the esophagus. It may occur with heartburn, sour taste, throat irritation, or regurgitation.

Water Channel

A protein pore in a cell membrane that lets water cross quickly. These pores help the kidneys and other tissues move water and maintain the body's fluid balance.

Water Consumption

Intake of water and other fluids to replace normal losses and maintain hydration. Requirements vary with body size, diet, activity, climate, pregnancy, illness, and kidney or heart function; thirst and urine concentration can help guide intake, while excessive intake can cause dangerous hyponatremia.

Water-Deprivation Test

A supervised test that briefly limits drinking while urine concentration and blood results are monitored. It helps identify why a person produces excessive amounts of dilute urine and must be done under medical supervision because dehydration and high sodium can occur.

Water Hammer Pulse

A physical sign of severe chronic aortic regurgitation or high-output states characterized by a bounding, hyperdynamic peripheral pulse with an abrupt, forceful systolic upstroke followed by a rapid, precipitous diastolic collapse.

Alternate Names:

Corrigan Pulse; Collapsing Pulse

Water-Hammer Pulse

A pulse that feels forceful at first and then suddenly collapses. It is often associated with severe leakage of the aortic valve or other causes of a wide pulse pressure.

Alternate Names:

Corrigan's Pulse; Collapsing Pulse; Cannon Pulse

Waterhouse-Friderichsen Syndrome

Waterhouse-Friderichsen syndrome is adrenal hemorrhage and acute adrenal failure associated with overwhelming sepsis, classically meningococcal infection, causing shock and coagulopathy.

Water Intoxication

A dangerous fall in blood sodium caused by drinking or retaining more water than the body can remove. Severe cases can cause headache, confusion, seizures, or coma and need urgent treatment.

Water On The Brain

A nontechnical term usually referring to hydrocephalus, an abnormal accumulation or impaired circulation of cerebrospinal fluid that enlarges the ventricles and may increase intracranial pressure.

Water On The Knee

Alternate name; see *Swollen knee*.

Water Retention

Excess accumulation of fluid in the body's tissues or cavities, commonly causing swelling and sometimes resulting from heart, kidney, liver, venous, hormonal, or medication-related disorders.

Watershed Infarction

An ischemic cerebral or intestinal infarct occurring at the border zones between the terminal distal capillary distributions of two non-anastomosing major arterial territories (e.g., between ACA and MCA in the brain, or at the splenic flexure / Griffiths point in the colon), provoked by systemic hypoperfusion and severe hypotension.

Alternate Names:

Border-Zone Infarction

Water-Soluble Vitamin

A vitamin that dissolves in water and is stored only in limited amounts. The group includes vitamin C and the B vitamins, so regular intake is generally needed.

Waterston Shunt

A historical palliative surgical systemic-to-pulmonary shunt created between the ascending aorta and the right pulmonary artery to increase pulmonary blood flow in infants with cyanotic congenital heart defects. It has largely been replaced by the modified Blalock-Taussig shunt due to lower complication rates.

Alternate Names:

Waterston-Cooley Anastomosis; Ascending Aorta to Right Pulmonary Artery Shunt

Watery Eyes

Excessive tearing caused by irritation, allergy, infection, dry-eye reflex tearing, or blockage of the tear-drainage system. Persistent unilateral tearing or pain requires ocular assessment.

Wax

A water-resistant substance produced by ceruminous glands in the ear canal; earwax protects the canal and usually clears naturally.

Wax Poisoning

Toxic exposure to a wax product, usually causing little harm after a small accidental ingestion but potentially causing choking, aspiration, irritation, or toxicity when mixed with other chemicals.

Waxy Casts

Large, smooth, pale tube-shaped particles seen under a microscope in urine. They form in damaged kidney tubules and can suggest severe or long-standing kidney disease, especially when other urine or blood tests are abnormal.

WBC Count

A measurement of the number of white blood cells in a volume of blood, used with the differential count to evaluate infection, inflammation, immune disorders, marrow disease, or treatment effects.

Weakness

Reduced ability to generate force, which may be generalized or limited to one body region. Causes

include disorders of muscle, nerve, neuromuscular junction, brain, or spinal cord, as well as metabolic illness, infection, medication effects, and deconditioning; sudden one-sided weakness or weakness with breathing, swallowing, or speech difficulty requires emergency assessment.

Weaning

Gradual reduction and eventual discontinuation of breastfeeding, bottle-feeding, or a medicine or other treatment, according to the relevant clinical context.

Wear Debris

Tiny particles produced when an artificial joint or other implant wears down. The particles can trigger inflammation, damage nearby bone, loosen the implant, and eventually cause it to fail.

Weaver's Bottom

Inflammation of the ischial bursa over the sitting bone, causing pain in the buttock that may worsen with prolonged sitting. It is also called ischial bursitis.

Weaver Syndrome

A rare genetic condition causing rapid growth before and after birth, a large head, distinctive facial features, low muscle tone, and delayed development or learning. Bone age may be advanced. Most cases involve a change in the *EZH2* gene; care is tailored to the child's needs.

Webbed Fingers

Partial or complete joining of adjacent fingers by skin or soft tissue, known as syndactyly; it may be congenital or acquired.

Webbed Neck

Extra folds of skin extending from the sides of the neck toward the shoulders. They may be present from birth and can occur with conditions such as Turner syndrome or Noonan syndrome.

Webbing Of The Fingers Or Toes

Partial or complete joining of adjacent fingers or

toes by skin or other tissue. It is called syndactyly and may be congenital or acquired.

Weber

A name used in hearing assessment, especially the Weber test, in which a vibrating tuning fork is placed on the forehead or skull. It helps compare hearing between the two ears but is not a unit of measurement.

Weber-Christian Disease

Alternate name; see *Weber-Christian Disease*.

Weber Syndrome

A brainstem stroke syndrome caused by occlusion of paramedian branches of the posterior cerebral artery affecting the anterior midbrain. It is characterized by ipsilateral oculomotor (cranial nerve III) palsy and contralateral spastic hemiparesis of the upper and lower extremities.

Alternate Names:

Superior Alternating Hemiplegia; Ventral Midbrain Syndrome

Weber Test

A quick hearing test using a vibrating tuning fork placed on the middle of the forehead or skull. The examiner asks which ear hears the sound louder; the result helps distinguish blockage-related hearing loss from inner-ear or nerve-related loss.

Wedge Excision

Surgical removal of a triangular or wedge-shaped portion of tissue; commonly performed for breast biopsies, cervical lesions, and skin tumors.

Wedge Resection

Surgery that removes a small wedge-shaped piece of tissue, commonly from the lung or breast, to diagnose or treat a localized lesion. It removes less tissue than removal of an entire lobe.

Weever Fish

A venomous marine fish whose dorsal spines can cause a painful sting, local swelling, and occasionally

systemic symptoms.

Weight-Bearing As Tolerated

An orthopaedic postoperative rehabilitation prescription allowing the patient to place as much weight and mechanical force on an injured or operated lower extremity as is comfortable and tolerated without severe pain, typically using crutches or a walker for support.

Alternate Names:
WBAT

Weight Gain

Increase in body weight; may be intentional (muscle building, pregnancy) or unintentional (fluid retention, endocrine disorders, medication effects).

Weight Gain In Pregnancy

Recommended weight gain depends on weight before pregnancy and whether one or more babies are expected. For one baby, usual ranges are about 12.5–18 kg if underweight, 11.5–16 kg at usual weight, 7–11.5 kg if overweight, and 5–9 kg with obesity; prenatal clinicians monitor the pattern and fetal growth.

Weight Gain – Unintentional

Increase in body weight without a planned change in diet or activity, often caused by fluid retention, medicines, endocrine disease, reduced activity, or changes in eating; rapid swelling or breathlessness needs prompt assessment.

Weight Loss

A decrease in body weight that may be intentional or unintentional. Intentional loss is usually achieved through sustainable changes in eating, physical activity, and behavior; unintentional or rapid loss can indicate illness, inadequate nutrition, or medication effects and may require medical evaluation.

Weight Loss Medications

Medicines prescribed for selected people with obesity to help reduce weight, usually together with nutrition and activity changes. Choice depends on health conditions, other medicines, side effects, cost,

and treatment goals.

Weight-Loss Medicines

Alternate name; see *Weight Loss Medications*.

Weight Loss Surgery

Weight-loss surgery, or bariatric surgery, changes the stomach or digestive tract to help treat severe obesity and related conditions. It requires long-term nutritional, medical, and lifestyle follow-up.

Weight-Reducing Diets

Dietary plans intended to create a sustained energy deficit and reduce excess body weight, ideally individualized with attention to nutrition, health conditions, and long-term adherence.

Weil Disease

Alternate name; see *Leptospirosis*.

Weil-Felix Reaction

A historical agglutination serological test for rickettsial infections (such as typhus and spotted fevers) that utilizes cross-reacting somatic O-antigens of *Proteus vulgaris* strains (OX-19, OX-2, and OX-K) to detect serum anti-rickettsial antibodies.

Weil-Felix Test

A classic serological agglutination assay that utilizes antigens from cross-reacting *Proteus vulgaris* strains (OX-19, OX-2, OX-K) to detect serum antibodies against various *Rickettsia* species responsible for typhus and spotted fever infections.

Alternate Names:

Weil-Felix Agglutination Reaction; Proteus Agglutination Test

Weill-Marchesani Syndrome

A rare inherited systemic connective tissue disorder characterized by the constellation of brachydactyly (short fingers and toes), short stature, joint stiffness, microspherophakia (small spherical lenses), and ectopia lentis with high predisposition to secondary pupillary block angle-closure glaucoma. Caused by autosomal recessive mutations in *ADAMTS10* or

autosomal dominant mutations in *FBN1*.

Alternate Names:

WMS; Spherophakia-Brachymorphia Syndrome

Weil's Disease

A zoonotic bacterial infection caused by spirochaetes of the genus *Leptospira*, transmitted through contact with water or soil contaminated with the urine of infected animals (rodents, cattle, dogs). See Leptospirosis.

Wellens Syndrome

A specific pattern on a heart tracing that can signal severe narrowing of a major heart artery, even after chest pain stops. It indicates high heart-attack risk and needs urgent specialist assessment; exercise testing can be dangerous.

Alternate Names:

Wellens Pattern; LAD Coronary T-Wave Syndrome; Wellens Sign

Wells Score

A validated clinical prediction rule used to estimate the probability that a patient has a dangerous blood clot, specifically deep vein thrombosis (DVT) in the legs or pulmonary embolism (PE) in the lungs. By calculating points for clinical risk factors (including active cancer, recent surgery or bed rest, localized leg swelling or tenderness, fast heart rate, coughing blood, and prior clots), patients are categorized as “unlikely” (low risk) or “likely” (high risk). In low-risk patients, a normal/negative D-dimer blood test safely rules out a clot without scans; high-risk patients proceed directly to imaging (leg compression ultrasound for DVT or CT pulmonary angiography for PE).

Alternate Names:

Wells Criteria; Wells Clinical Score; Wells Rule for DVT and PE

Wells Score For Pulmonary Embolism

Alternate name; see *Wells Score*.

Wells Syndrome (Eosinophilic Cellulitis)

A recurrent inflammatory skin disorder with itchy or burning red plaques, swelling, and tissue eosinophils

that can mimic bacterial cellulitis. It is not usually an infection; biopsy helps diagnosis and systemic corticosteroids may be used for severe flares.

Welt

A raised, often itchy area of skin caused by localized swelling, commonly seen in hives or after an insect bite. A welt may fade within hours, but persistent or severe reactions need evaluation.

Wen

A common, usually harmless lump beneath the skin filled with a soft protein called keratin. It may become swollen, painful, or infected and can be removed if necessary.

Alternate Names:

Infundibular Cyst; Epidermal Inclusion Cyst; Sebaceous Wen

Wenckebach Phenomenon

A heart-rhythm pattern in which each heartbeat takes slightly longer to pass from the upper to lower chambers until one beat is missed. It may be harmless or reflect heart disease, depending on the setting.

Alternate Names:

Second-Degree AV Block Type 1; Mobitz I Block

Wens

Alternate name; see *Epidermoid cyst*.

Werdnig-Hoffmann Disease

The most severe early form of inherited spinal muscular atrophy, also called type 1 spinal muscular atrophy. It usually begins before 6 months of age and causes very weak muscles, poor head control, reduced reflexes, a weak cry, feeding difficulty, and breathing problems. Babies generally cannot sit without support. New treatments can improve survival and function, but affected infants need urgent specialist care and breathing and feeding support.

Alternate Names:

Spinal Muscular Atrophy Type 1 (SMA 1); Severe Infantile Spinal Muscular Atrophy

Wermer's Syndrome

Alternate name; see *Multiple endocrine neoplasia, type 1 (MEN 1)*.

Wermer Syndrome

Alternate name; see *Multiple endocrine neoplasia, type 1 (MEN 1)*.

Werner's Syndrome

A rare inherited condition that causes signs of aging earlier than usual, often after puberty. It may cause early cataracts, short stature, thin skin, gray hair, diabetes, weak bones, and increased cancer risk.

Werner Syndrome

A rare inherited condition that causes signs of aging earlier than usual, often after puberty. Features may include short stature, early cataracts, thin or tight skin, gray hair, diabetes, weak bones, and increased cancer risk. Regular medical monitoring and treatment of each complication are needed.

Wernicke Aphasia

A fluent receptive aphasic syndrome resulting from an ischemic stroke or lesion in the posterior portion of the superior temporal gyrus of the dominant hemisphere (Brodmann area 22), characterized by fluent, effortless speech that lacks semantic meaning ("word salad"), accompanied by profound impairment in language comprehension and repetition.

Alternate Names:

Receptive Aphasia; Sensory Aphasia

Wernicke Area

A brain region, usually in the left temporal lobe, that helps a person understand spoken and written language. Damage can cause fluent speech that lacks meaning and poor understanding of language.

Wernicke Encephalopathy

A sudden brain disorder caused by severe vitamin B1 deficiency. It may cause confusion, difficulty walking, and abnormal eye movements and can lead to permanent damage without prompt treatment.

Wernicke-Korsakoff Encephalopathy

A spectrum of neurocognitive impairment caused by severe thiamine (vitamin B1) deficiency (most commonly in chronic alcohol use disorder), progressing from the acute reversible triad of Wernicke encephalopathy (confusion, ataxia, ophthalmoplegia) to the chronic irreversible Korsakoff syndrome (anterograde amnesia, confabulation).

Wernicke-Korsakoff Syndrome

A brain disorder caused by severe vitamin B1 deficiency. It may begin with confusion and poor coordination and leave lasting memory problems, difficulty learning, and inaccurate made-up explanations; alcohol misuse, poor nutrition, and prolonged vomiting are common causes.

Wernicke's Area

A brain region important for understanding spoken and written language.

Alternate Names:

Wernicke's Speech Area; Sensory Speech Area

Wernicke's Encephalopathy

An acute neurologic disorder caused by thiamine deficiency, classically involving confusion, eye-movement abnormalities, and gait or coordination impairment. It requires prompt thiamine treatment.

Westergren Method

The reference laboratory procedure used to determine the erythrocyte sedimentation rate (ESR). Anticoagulated whole blood is placed in an upright, calibrated Westergren tube for one hour, measuring the distance in millimeters that red blood cells settle under gravity to assess systemic inflammation.

Alternate Names:

Westergren ESR; Westergren Sedimentation Technique

Westermark Sign

An area of unusually reduced blood-vessel markings on a chest X-ray, sometimes seen beyond a clot in a lung artery. It may suggest pulmonary embolism but is not reliable enough to diagnose it alone.

Western Blot

A laboratory test that separates proteins and uses antibodies to find a specific protein. It can help study infections, immune reactions, or genetic and research problems, depending on the test.

Alternate Names:

Protein Immunoblot

Westley Croup Score

A clinical score used to estimate how severely croup is obstructing a child's airway. It considers noisy breathing, chest retractions, air movement, bluish coloring, and alertness; a higher score suggests more severe illness and helps guide urgent treatment and observation.

Alternate Names:

Westley Clinical Scoring System for Croup; Croup Severity Score

West Nile Encephalitis

Inflammation of the brain caused by neuroinvasive West Nile virus, transmitted mainly by mosquitoes. It may cause fever, headache, confusion, tremor, weakness, seizures, or coma. There is no specific routine antiviral treatment; severe illness requires hospital-based supportive care.

West Nile Neuroinvasive Disease

A severe, potentially fatal manifestation of mosquito-borne West Nile virus infection affecting less than 1 percent of infected individuals, presenting as aseptic meningitis, encephalitis (with tremors and parkinsonism), or acute flaccid paralysis resembling poliomyelitis (anterior horn cell loss).

Alternate Names:

WNND

West Nile Virus

A mosquito-borne flavivirus that can cause asymptomatic infection, a febrile illness, or neuroinvasive disease such as meningitis, encephalitis, or acute flaccid paralysis. Risk of severe disease is higher in older adults and people with certain medical conditions.

West Nile Virus Infection

West Nile virus infection is a mosquito-borne illness ranging from fever and body aches to neuroinvasive meningitis, encephalitis, weakness, or paralysis.

West Syndrome

A serious seizure disorder beginning in infancy, with repeated sudden spasms and an abnormal brain-wave pattern. Development may slow or regress; causes include brain injury, genetic conditions, and metabolic disease, and urgent treatment is needed.

Wet Age-Related Macular Degeneration

Alternate name; see *Wet macular degeneration*.

Wet AMD

Alternate name; see *Wet macular degeneration*.

Wet Beriberi

The predominantly cardiovascular form of severe thiamine deficiency. It can cause a fast heartbeat, enlarged or weakened heart, fluid retention, swelling, and high-output heart failure.

Wet Dream

Involuntary ejaculation during sleep, usually occurring in adolescence or adulthood and generally a normal physiological event.

Wet Gangrene

Tissue death complicated by bacterial infection and tissue swelling, producing moist, discolored, rapidly spreading necrosis. It requires urgent medical assessment.

Wet Macular Degeneration

The neovascular form of age-related macular degeneration in which abnormal blood vessels grow beneath or within the retina and leak fluid or blood, causing rapid central-vision loss.

Alternate Names:

Neovascular AMD; Exudative Age-Related Macular Degeneration; Wet AMD

Wet-to-Dry Dressing

A mechanical wound debridement technique in which saline-moistened gauze is applied directly to an open wound bed, allowed to dry, and subsequently removed. Dead tissue and exudate adhering to the dried dressing are pulled away during dressing changes.

Alternate Names:

Wet-to-Dry Debridement; Mechanical Gauze Dressing

Wharton Duct

The primary excretory duct of the submandibular salivary gland, approximately 5 cm in length, that courses anteromedially along the floor of the mouth to empty through the sublingual caruncle at the base of the lingual frenulum; the most frequent anatomical site of salivary sialolithiasis.

Alternate Names:

Submandibular Duct

Wharton Jelly

The soft, jelly-like tissue surrounding the blood vessels in the umbilical cord. It cushions the vessels and helps prevent them from being squeezed or bent during pregnancy and labor.

Wharton's Jelly

Gelatinous connective tissue within the umbilical cord that surrounds and supports the umbilical blood vessels and helps protect them from compression.

Wheal

A temporary, raised, often itchy area of skin caused by swelling in the skin. It commonly occurs with hives, an allergic reaction, or an insect bite and may move or disappear within hours.

Wheal And Flare

A temporary raised, swollen area of skin surrounded by redness. It is usually caused by release of histamine during hives, an allergy, or another immediate skin reaction.

Wheat Allergy

An immune reaction to proteins in wheat that may cause hives, stomach symptoms, vomiting, or breathing problems.

Alternate Names:

Wheat Hypersensitivity; Cereal Grain Allergy

Wheelchairs

Alternate name; see *Wheelchair*.

Wheeled Stretcher

Mobile patient transport device with wheels; used in hospitals and emergency services for moving patients who cannot walk.

Wheeze

A high-pitched whistling sound caused by narrowed airways. It often occurs with asthma, infection, allergy, or chronic lung disease; sudden wheezing after choking or with severe breathlessness needs urgent care.

Wheezing

A musical or whistling sound caused by narrowed lower airways, usually louder when breathing out. It may result from asthma, infection, chronic lung disease, allergy, airway swelling, mucus, or an inhaled object.

Whiplash

A neck injury caused by the head moving suddenly backward and forward, often in a vehicle crash but also after a fall or sports injury. Pain, stiffness, headache, dizziness, or arm tingling may appear immediately or later. Most cases improve over weeks, but weakness, numbness, trouble walking, or severe pain after major trauma needs urgent assessment.

Alternate Names:

Cervical Acceleration-Deceleration Injury; CAD Injury; Neck Sprain

Whiplash Injury

Alternate name; see *Whiplash*.

Whipple Disease

A rare bacterial infection that can damage the small intestine, joints, brain, heart, or other organs. It may cause years of joint pain followed by weight loss, persistent diarrhea, abdominal pain, and poor nutrient absorption.

Whipple Procedure

A major operation that removes the head of the pancreas and nearby parts of the small intestine, bile duct, and gallbladder, then reconnects the digestive tract. It is used for selected cancers and other serious diseases in this area.

Whipple's Disease

A rare bacterial infection caused by *Tropheryma whipplei*, damaging intestinal absorption and potentially affecting joints, brain, or heart.

Alternate Names:

Tropheryma Whipplei Infection; Whipple Disease

Whipple Triad

Three findings supporting that symptoms are caused by low blood sugar: typical symptoms occur, blood sugar is low at that time, and symptoms improve after blood sugar is raised.

Whipple Triad for Insulinoma

Three findings that support that symptoms are caused by low blood sugar: symptoms occur, blood sugar is low at the same time, and the symptoms improve when blood sugar rises. Doctors use this pattern with other tests to find the cause, including a possible insulinoma.

Whipple Triad of Hypoglycemia

The three cardinal clinical criteria required to substantiate a clinical diagnosis of genuine hypoglycemia: symptoms and signs consistent with hypoglycemia (such as diaphoresis, tremor, tachycardia, confusion); a documented low plasma glucose concentration (typically below 55 mg/dL [3.0 mmol/L]) at the exact time of symptoms; and prompt resolution of symptoms following administration of exogenous glucose.

Alternate Names:

Whipple Hypoglycemic Triad

Whipworm

A parasitic roundworm of the genus *Trichuris*, usually *Trichuris trichiura* in humans. Infection occurs by ingesting embryonated eggs and may cause abdominal pain, diarrhea, anemia, or rectal prolapse when severe.

Whipworm Infection

Intestinal infection caused by the soil-transmitted helminth *Trichuris trichiura* (whipworm), endemic in tropical and subtropical regions with poor sanitation. Humans acquire infection by ingesting embryonated eggs from contaminated soil, food, or water.

Alternate Names:

Trichuris Trichiura Infection; Whipworm Infection

Whirlpool Bath

Hydrotherapy device providing agitated water for therapeutic bathing; used in wound care, physical therapy, and rehabilitation.

Whispered Pectoriloquy

An examination finding in which whispered words sound unusually clear through a stethoscope over the lung. It may suggest that air-filled lung has become solid, as in pneumonia, but it is not diagnostic alone.

White Blood Cell

A cell of the immune system that helps protect the body from infections, foreign substances, and abnormal cells. White blood cells are made mainly in the bone marrow and include neutrophils, lymphocytes, monocytes, eosinophils, and basophils. Their number or function may change with infection, inflammation, immune disorders, or bone-marrow disease.

White Blood Cell Count

A blood test measuring the number of white blood cells. A high or low result can occur with infection, inflammation, medicines, immune disorders, or bone-marrow disease and must be interpreted with the

differential count and clinical findings.

White Blood Cell Labeling

A scan method in which a person's white blood cells are removed, marked with a small amount of radioactive material, and returned to the body. The cells may collect at areas of infection or inflammation, which can then be seen on images.

White Cell

Another name for a white blood cell, an immune cell made mainly in the bone marrow that helps defend the body against infection, foreign substances, and abnormal cells.

White Cell Count

A blood test measuring the number of white blood cells and often the proportion of each type. Results help assess infection, inflammation, immune disorders, and bone-marrow problems.

White Clot Syndrome

A severe arterial or venous thrombotic complication associated with heparin-induced thrombocytopenia (HIT). It is characterized by platelet-dense, fibrin-rich arterial thrombi (white thrombi) that can lead to limb ischemia, stroke, or myocardial infarction.

Alternate Names:

HIT-Associated Thrombosis; Heparin-Associated White Thrombus Syndrome

White Coat Hypertension

A clinical blood pressure pattern characterized by persistently elevated blood pressure readings recorded in a medical office or clinic setting in an individual whose out-of-office automated ambulatory or home blood pressure monitoring readings are consistently normotensive.

Alternate Names:

White Coat Effect; Isolated Clinic Hypertension

White-Coat Hypertension

Blood pressure that is high in a medical setting but normal outside it. Home or ambulatory readings help confirm the pattern, which may still predict

higher future hypertension risk.

Alternate Names:

White-Coat Syndrome; Isolated Clinic Hypertension

White Finger

Episodic pallor or whitening of the fingers caused by vasospasm, commonly associated with Raynaud phenomenon or hand-arm vibration syndrome.

Whiteheads

Whiteheads are closed comedones formed when oil and dead skin block a hair follicle, producing small pale or skin-colored acne bumps.

White Infarction

Tissue death caused by loss of blood flow in a solid organ such as the heart, kidney, or spleen. The damaged area looks pale because little blood can reach it through alternate vessels.

Alternate Names:

Anemic Infarction; Pale Infarction

White Matter

Tissue in the brain and spinal cord made mainly of nerve fibers covered by a protective substance called myelin. It carries signals between different brain areas and between the brain and spinal cord.

White Matter Hyperintensities

Areas of increased signal intensity on T2-weighted and FLAIR brain magnetic resonance imaging scans located in the deep periventricular and subcortical white matter, representing microvascular lipohyalinosis, chronic ischemia, and demyelination from cerebral small vessel disease.

Alternate Names:

WMHs; Leukoaraiosis

White Matter Of The Brain

The brain tissue composed mainly of myelinated axons and supporting glial cells, connecting different brain regions and the brain with the spinal cord; disease or injury can impair cognition, sensation, coordination, or movement.

White Of The Eye

The sclera, the tough, opaque outer coat of the eye surrounding the cornea and helping maintain the shape of the globe.

White Spot Disease

Alternate name; see *Lichen sclerosus*.

White Tongue

A white coating or patches on the tongue caused by debris, dry mouth, irritation, infection, inflammation, or other oral conditions.

Whitlow

An infection of the fingertip or tissues around a finger or toenail, often involving the nail fold. It may be bacterial, fungal, or caused by herpes simplex virus; painful grouped blisters suggest herpetic whitlow, whereas pus and a localized abscess suggest bacterial infection.

Whitlows

Plural of whitlow; see *Whitlow*.

WHO Classification of Vitamin A Deficiency

A standardized clinical grading system established by the World Health Organization (WHO) to stage eye damage (xerophthalmia) caused by vitamin A deficiency:

- **XN:** Night blindness (inability to see in dim light or darkness).
- **X1A:** Conjunctival xerosis (dryness and lack of shine on the white of the eye).
- **X1B:** Bitot's spots (foamy, silvery-white patches on the white of the eye).
- **X2:** Corneal xerosis (hazy, dry surface on the clear front of the eye).
- **X3A:** Corneal ulceration or keratomalacia involving less than one-third of the cornea.
- **X3B:** Severe corneal melting (keratomalacia) involving one-third or more of the cornea, causing permanent blindness.
- **XS:** Corneal scars (permanent scarring left by healed ulcers).

- **XF:** Xerophthalmic fundus (small pale spots on the back of the eye/retina).

Alternate Names:

WHO Xerophthalmia Classification; Vitamin A Deficiency Eye Grading; WHO Vitamin A Staging

Whole-Body Irradiation

Radiation treatment directed at the entire body, most often given before a stem-cell transplant to suppress the immune system and make room for donated cells. It can affect the bone marrow, fertility, and other organs.

Whole-Body Magnetic Resonance Imaging

An MRI examination that produces images of much or all of the body without using X-rays. It is used in selected cases to look for widespread disease, tumors, or problems affecting several body areas.

Whole-Body Scan

An imaging examination that surveys much or all of the body, using a technique such as PET/CT, CT, MRI, or a nuclear medicine scan. It may be used for selected cancer staging, infection localization, or evaluation of systemic disease; the coverage and usefulness depend on the test and clinical question.

Whole Bowel Irrigation

A gastrointestinal decontamination technique in acute clinical toxicology in which large volumes of an isosmotic polyethylene glycol electrolyte solution are administered orally or via nasogastric tube until the rectal effluent is clear, indicated for toxic ingestions of sustained-release medications, enteric-coated tablets, iron, or illicit drug packets ("body packers").

Alternate Names:

WBI

Whole-Bowel Irrigation

A hospital treatment that flushes the intestines with a special polyethylene-glycol drink. It is used only for selected poisonings or swallowed objects after clinicians assess the airway and risks.

Whole-Brain Radiation Therapy

Radiation treatment directed at the entire brain, used in selected people with multiple brain metastases or cancer cells around the brain. It may also be used to reduce brain-spread risk in selected cancers; side effects depend on dose and treatment plan.

Whole Breast Radiation Therapy

Whole breast radiation therapy treats remaining breast tissue after breast-conserving surgery to reduce local recurrence risk, with planned dosing and monitoring for skin and tissue effects.

Whole Exome Sequencing

A genetic test that reads most protein-coding sections of a person's DNA. It can identify changes causing some inherited disorders, but it may miss changes outside coding regions, structural changes, or causes not yet understood; results require clinical interpretation.

Whole Genome Sequencing

Laboratory analysis of nearly all of a person's nuclear DNA, including coding and noncoding regions, and sometimes mitochondrial DNA. It can identify many types of genetic variants but may produce uncertain or incidental findings and does not detect every cause of disease; results require appropriate clinical interpretation.

Whole-Genome Sequencing

Sequencing of nearly the complete nuclear genome, including coding and noncoding regions, together with mitochondrial DNA when covered by the assay. It can detect a broad range of variants but generates substantial interpretation and incidental-finding challenges.

Whooping Cough

A highly contagious respiratory infection caused by *Bordetella pertussis*. It causes prolonged bouts of rapid coughing that may be followed by a whooping sound or vomiting; infants may have pauses in breathing without the typical whoop. Also called pertussis.

Whooping-Cough

Alternate name; see *Whooping Cough*.

Whorled Pattern

A characteristic histological or clinical swirling, spiraling architectural configuration. In pathology, it describes swirling arrangements of spindle cells seen in meningiomas, fibromas, or leiomyomas; in dermatology, it describes patterns along the lines of Blaschko.

Alternate Names:

Whorled Architecture; Storiform-Whorled Pattern

Wickham Striae

Fine, lacy white reticular lines and arborizing patterns seen on the surface of papules and mucosal plaques in lichen planus, classically observed on the buccal mucosa.

Widal Reaction

An older blood test for antibodies associated with typhoid or paratyphoid fever. It is not very reliable because results may reflect past infection or vaccination, so culture or molecular testing is usually preferred.

Widal Test

A historical presumptive serological agglutination test for enteric (typhoid and paratyphoid) fever that detects agglutinating serum antibodies against the somatic O and flagellar H antigens of *Salmonella enterica* serovar Typhi.

Widely Spaced Teeth

Teeth separated by unusually large gaps, also called diastema when the gap is localized. Causes include normal development, missing teeth, tooth-size differences, habits, or jaw and gum conditions.

Widened Mediastinum

A radiographic finding on an upright posterior-anterior chest X-ray defined as mediastinal width exceeding 8 cm (or greater than twenty-five percent of thoracic width). It warrants urgent evaluation for acute aortic dissection, mediastinal hematoma,

mediastinitis, or mass lesions.

Alternate Names:

Mediastinal Widening; Mediastinal Enlargement

Widened Pulse Pressure

A pulse pressure (difference between systolic and diastolic blood pressure) greater than 60 mmHg or greater than fifty percent of the systolic value. It is commonly observed in aortic regurgitation, severe arteriosclerosis, thyrotoxicosis, fever, sepsis, and arteriovenous malformations.

Wide Splitting of S2

An abnormal prolongation of the interval between the aortic (A2) and pulmonic (P2) components of the second heart sound that varies physiologically with respiration but remains distinctly separated in expiration. It occurs due to delayed right ventricular emptying (such as right bundle branch block or pulmonary stenosis) or early aortic valve closure.

Wilkie Syndrome

Vascular compression of the third (horizontal) segment of the duodenum between the abdominal aorta and the overlying superior mesenteric artery (SMA). It leads to partial or complete duodenal obstruction, characterized by postprandial abdominal pain, early satiety, nausea, and vomiting.

Alternate Names:

Superior Mesenteric Artery Syndrome; SMA Syndrome; Arteriomesenteric Duodenal Compression

Williams Syndrome

A genetic condition caused by loss of a small section of chromosome 7, including a gene important for elastic tissues. It may cause characteristic facial features, heart-vessel narrowing, high blood calcium, developmental differences, learning difficulties, and connective-tissue problems. Regular heart, calcium, hearing, and developmental checks are important.

Wilms Tumor

A malignant embryonal tumor of the kidney in children. It may present as an abdominal mass, pain, hematuria, or an incidental finding and may be associated with syndromes such as WAGR or Beckwith-

Wiedemann syndrome. Treatment and prognosis depend on stage and tumor biology.

Alternate Names:

Nephroblastoma; Pediatric Renal Adenosarcoma

Wilm's Tumour

Source spelling variant of *Wilms tumor*, a malignant embryonal kidney tumor occurring mainly in young children.

Wilson Disease

An autosomal recessive disorder usually caused by disease-causing variants in the *ATP7B* gene, which encodes a protein needed to transport copper and excrete excess copper into bile. Copper accumulates in the liver and may later affect the brain, eyes, kidneys, blood, and other tissues. Manifestations include hepatitis, cirrhosis, acute or chronic liver failure, tremor, dystonia, poor coordination, speech changes, mood or behavior changes, and Kayser-Fleischer rings around the cornea.

Wilson's Disease

Alternate name; see *Wilson Disease*.

Winchester Syndrome

A very rare inherited skeletal dysplasia with progressive osteolysis, short stature, joint contractures, and characteristic facial or skin findings. It requires genetic, orthopedic, and multidisciplinary evaluation.

Windkessel Effect

The hemodynamic property of large elastic arteries, particularly the aorta, which expand during ventricular systole to store a portion of stroke volume and recoil during diastole. This elastic recoil sustains downstream blood flow and maintains organ perfusion throughout diastole.

Alternate Names:

Windkessel Function; Arterial Elastic Reservoir Effect

Windowing

Adjusting the brightness and contrast of a CT image

so particular tissues, such as bone, lung, or soft tissue, are easier to see.

Windpipe

The tube carrying air from the voice box to the two main airways leading to the lungs. It is supported by firm rings that help keep it open.

Winged Scapula

An abnormal musculoskeletal prominence of the medial border and inferior angle of the scapula protruding posteriorly from the thoracic cage, most commonly caused by traction injury, surgical damage, or neuropathy of the long thoracic nerve of Bell paralyzing the serratus anterior muscle.

Alternate Names:

Scapula Alata

Winterbottom Sign

Prominent enlargement of the posterior cervical lymph nodes that serves as a classic clinical physical sign of early-stage African trypanosomiasis (sleeping sickness), caused by *Trypanosoma brucei*.

Alternate Names:

Winterbottom's Sign

Winter Formula

An established physiological mathematical equation used to assess whether respiratory compensation is appropriate in a patient with pure metabolic acidosis. Calculated as $\text{Expected } PaCO_2 = (1.5 \times [HCO_3^-]) + 8 \pm 2$; a measured $PaCO_2$ higher than the calculated expected range signifies a concomitant primary respiratory acidosis (ventilatory failure), whereas a measured $PaCO_2$ lower than expected indicates an accompanying primary respiratory alkalosis.

Alternate Names:

Winter's Compensation Formula; Acid-Base Compensation Equation

Winter's Formula

A clinical physiological equation used to calculate expected respiratory compensation (arterial partial pressure of carbon dioxide, PCO_2) in response to metabolic acidosis: $PCO_2 = (1.5 \times [HCO_3^-]) + 8 \pm 2$.

If measured PCO_2 is higher or lower than calculated, a coexisting respiratory acidosis or alkalosis is present.

Alternate Names:

Winter Formula; Metabolic Acidosis Compensation Formula

Winter Vomiting Disease

An acute gastroenteritis, usually caused by norovirus, characterized by sudden vomiting, diarrhea, and abdominal cramps.

Wireless Motility Capsule

A swallowed capsule that records pressure, acidity, temperature, and movement as it travels through the digestive tract. The measurements estimate how long food takes to pass through the stomach and intestines and may help investigate unexplained constipation, diarrhea, nausea, or bloating.

Wirsung Duct

The main excretory duct of the pancreas, extending from the tail through the body and head of the gland, joining the common bile duct at the hepatopancreatic ampulla of Vater to empty digestive enzymes into the second part of the duodenum at the major duodenal papilla.

Alternate Names:

Main Pancreatic Duct

Wisdom Teeth

Wisdom teeth are the third molars that commonly emerge in late adolescence or adulthood. Impaction, infection, decay, cysts, gum disease, or crowding can cause pain and swelling; dental examination and imaging determine whether monitoring or removal is appropriate.

Wisdom Tooth

The last molar in each dental quadrant, usually erupting in late adolescence or early adulthood. Impaction may cause pain, infection, or damage to adjacent teeth.

Alternate Names:

Dens Serotinus; Wisdom Teeth

Wiskott-Aldrich Syndrome

A rare inherited immune disorder that mainly affects boys and causes eczema, repeated infections, and a low number of unusually small platelets. It can also cause bleeding and autoimmune problems and requires specialist care.

Wiskott-Aldrich Syndrome Protein

A cytoplasmic actin-regulatory protein encoded by the *WAS* gene on the X chromosome that coordinates actin cytoskeleton remodeling in hematopoietic cells and immune synapse formation; loss-of-function mutations cause Wiskott-Aldrich syndrome and X-linked thrombocytopenia.

Alternate Names:

WASP

Witch's Milk

A temporary milky breast discharge in a newborn caused by maternal hormones crossing the placenta; it usually resolves without squeezing or treatment, which can otherwise cause infection.

Withdrawal

Physical or psychological symptoms that occur when a person who has developed dependence reduces or stops using a medicine or psychoactive substance. Symptoms vary by substance and may include anxiety, agitation, sweating, tremor, nausea, pain, insomnia, cravings, or seizures; some forms require urgent medical care.

Alternate Names:

Abstinence Syndrome; Substance Withdrawal Syndrome

Withdrawal Reflex

An automatic response in which a painful stimulus makes a limb pull away from danger. The opposite limb may straighten to help maintain balance.

Withdrawal Symptoms

Physical or psychological symptoms that occur when a person stops or reduces a substance or medicine after the body has adapted to it. The symptoms depend on the substance, duration of use, and the person's health.

Withdrawal Syndrome

A predictable set of signs and symptoms that occur when a drug is discontinued or the dose is reduced after chronic use, reflecting the physiological rebound from drug adaptation.

Withdrawal Syndromes

Physical and psychological symptoms that occur when regular exposure to an addictive substance is reduced or stopped. Severity and treatment depend on the substance, duration of use, comorbidities, and risk of seizures, delirium, or autonomic instability.

Wolff-Chaikoff Effect

An autoregulatory mechanism whereby exposure to high levels of inorganic iodide temporarily inhibits organification and thyroid hormone synthesis within the thyroid gland. This effect typically lasts about 10 to 14 days before escape occurs, preventing iodine-induced hyperthyroidism.

Alternate Names:

Wolff-Chaikoff Block; Iodide Organification Inhibition

Wolffian Ducts

Temporary tubes in the developing embryo that form parts of the male reproductive system, including the sperm-transport ducts. They usually shrink during typical female development, although small remnants may remain.

Wolff-Parkinson-White Accessory Pathway-Related Tachycardia

Alternate name; see *Wolff-Parkinson-White syndrome*.

Wolf-Hirschhorn Syndrome

A rare genetic disorder caused by loss of part of chromosome 4. It can cause poor growth, a small head, distinctive facial features, developmental and intellectual disability, seizures, and heart or other organ abnormalities; lifelong specialist support is usually needed.

Alternate Names:

4p- Syndrome; 4p Deletion Syndrome

Wolfram Syndrome

A rare inherited disorder that commonly causes diabetes requiring insulin and progressive loss of vision from optic-nerve damage. It may also cause excessive thirst and urination, hearing loss, bladder problems, balance difficulty, or other nerve-system problems. Treatment monitors and supports each affected function.

Wolinella

Genus of anaerobic, Gram-negative bacteria found in the oral cavity and gastrointestinal tract; associated with periodontal disease.

Wolman Disease

A severe inherited disorder in which a missing enzyme causes fats to build up in organs. It usually begins in infancy with vomiting, diarrhea, poor growth, an enlarged liver and spleen, and adrenal-gland problems. Without treatment it can be fatal early; enzyme replacement and specialist care are required.

Wolman's Disease

A severe lysosomal acid-lipase deficiency presenting in infancy with hepatosplenomegaly, adrenal calcification, malabsorption, vomiting, diarrhea, and failure to thrive. It is a severe form of lysosomal acid-lipase deficiency and can be fatal early without treatment.

Womb

Common name for the uterus; the muscular organ where a fetus develops during pregnancy.

Alternate Names:

Uterus; Metra; Hystera

Womb Growths

Alternate name; see *Uterine fibroids*.

Women Health

Alternate name; see *Women's health*.

Women's Health

Medical specialty focusing on conditions unique to

or more prevalent in females, including reproductive health, pregnancy, menopause, and gender-specific disease patterns.

Alternate Names:

Gynecological and Obstetric Health; Female Health Care

Wood Lamp Examination

Examination of the skin in a dark room using special ultraviolet light. The light can make some color changes and infections easier to see, but the finding usually needs confirmation with the examination and other tests.

Woods Corkscrew Maneuver

An emergency procedure used when a baby's shoulders become stuck during birth. A trained clinician rotates the baby's shoulders to help release them and complete delivery.

Wood's Light

A special ultraviolet light used in a darkened room to make some skin colors, scales, and infections easier to see. It can support an examination but usually cannot identify the cause by itself.

Wood Spirit

An old name for methanol, a toxic alcohol whose ingestion can cause metabolic acidosis, blindness, and death.

Woods Screw Maneuver

A rotational maneuver used during shoulder dystocia to rotate the fetal shoulders and assist delivery.

Wood-Unit

A clinical unit of vascular resistance calculated by dividing the pressure gradient across a vascular bed (in mmHg) by cardiac output (in L/min). One Wood unit equals approximately 80 dyn·s/cm⁵, commonly used in evaluating pulmonary hypertension.

Alternate Names:

Wood Resistance Unit; Hybrid Resistance Unit (HRU)

Woody Tongue

A rare long-lasting infection, usually caused by *Actinomyces*, that makes the tongue and nearby tissues hard and swollen. It can interfere with eating, speaking, or breathing.

Woolly Hair

A rare structural anomaly of scalp hair characterized by tightly coiled, fine, spiraled curls in individuals of non-African descent. It may be inherited in autosomal dominant or recessive patterns and can occur as an isolated trait or part of syndromic disorders such as Naxos disease or Carvajal syndrome.

Alternate Names:

Woolly Hair Syndrome; Hereditary Woolly Hair

Woolsorters' Disease

A form of inhaled anthrax acquired by breathing spores of *Bacillus anthracis*, historically associated with handling contaminated wool or animal products. It can cause severe breathing illness and requires urgent treatment.

Alternate Names:

Inhalation Anthrax; Pulmonary Anthrax; Ragpicker's Disease

Word Blindness

An older term for alexia, an acquired inability to read or recognize written words despite adequate vision and previously developed language ability, usually caused by brain dysfunction or injury.

Word Deafness

An acquired inability to understand spoken words even though ordinary hearing is intact. It usually results from damage to brain areas that connect hearing with language, such as after a stroke or head injury.

Alternate Names:

Pure Word Deafness; Auditory Agnosia for Speech

Word Recognition Scoring

A hearing test measuring how accurately a person repeats or identifies spoken words at a comfortable volume. It helps assess how well the hearing system

and brain understand speech.

Word Salad

Speech made of words or phrases that have little or no logical connection, making the person difficult to understand. It can occur with severe psychosis, mania, brain disease, or intoxication and needs assessment in context.

Working Memory

The ability to hold a small amount of information briefly and use it while completing a task, such as remembering instructions while following them. Attention, stress, sleep, illness, and brain conditions can affect it.

Wound

Damage to body tissue caused by trauma, surgery, pressure, heat, chemicals, or another cause. A wound may be open or closed and can vary in depth, contamination, bleeding, and injury to nearby nerves, vessels, or organs.

Wound Care

Assessment and treatment of a wound through cleansing, bleeding control, removal of dead or contaminated tissue when indicated, appropriate closure or dressing, pain control, and follow-up. Care also includes tetanus prevention, pressure relief, and treatment of infection or underlying conditions; antibiotics are reserved for selected contaminated wounds, bites, or infections.

Wound Classification

A description of common injury types: an abrasion is a scrape, a laceration is a torn cut, a contusion is a bruise from blunt force, and an incised wound is a clean cut from a sharp object.

Wound Complication

A problem that develops during healing, such as infection, separation of wound edges, bleeding, fluid collection, tissue death, or excessive scarring. Increasing pain, redness, swelling, drainage, fever, or wound opening should be assessed promptly.

Wound Debridement

The surgical, enzymatic, autolytic, or mechanical removal of foreign material, necrotic non-viable tissue, cellular debris, and infected slough from a wound bed to eliminate bacterial burden, reduce infection risk, and promote healthy granulation tissue formation.

Wound Dehiscence

Partial or complete reopening of a surgical wound after it has been closed. It may follow infection, poor blood supply, diabetes, increased pressure, or strain on the wound. New separation, drainage, fever, severe pain, or visible deeper tissue needs prompt medical assessment.

Wound Evisceration

Separation of a surgical wound with protrusion of internal organs or tissue through the opening. It is a surgical emergency requiring protection of the exposed tissue and urgent medical evaluation.

Wound Healing

The body's process of stopping bleeding, controlling inflammation, replacing damaged tissue, covering the surface, and strengthening the repair. Blood supply, infection, nutrition, diabetes, medicines, smoking, wound depth, and movement can affect healing.

Wound Healing Phases

Wound healing has overlapping stages: stopping bleeding, inflammation, building new tissue and skin, and strengthening the repair. The timing and result depend on the wound, blood supply, infection, nutrition, and general health.

Wound Infection

Infection of a wound by microorganisms, causing findings such as increasing pain, redness, warmth, swelling, pus, fever, or delayed healing.

Wound Management

Assessment and treatment of acute or chronic wounds through cleansing, debridement when indicated, moisture and exudate control, infection management, pressure relief, nutrition, and correc-

tion of underlying disease.

Wounds

Injuries in which tissue is damaged by trauma, surgery, pressure, heat, chemicals, or other causes; wounds may be open or closed and may require cleansing, closure, or debridement.

Wound VAC

A negative-pressure wound treatment in which a sealed dressing is connected to a pump that gently removes fluid and reduces swelling. It can support new tissue growth in selected complex wounds, but requires proper application and monitoring for bleeding, infection, or skin damage.

Wound Vacuum

A therapeutic wound management system that applies localized controlled subatmospheric (negative) pressure to a sealed wound dressing via an open-cell polyurethane foam sponge, facilitating continuous fluid drainage, reducing tissue edema, increasing microvascular blood flow, and accelerating granulation tissue formation.

Alternate Names:

Negative Pressure Wound Therapy; NPWT; Vacuum-Assisted Closure; VAC

Wright Hyperabduction Test

A clinical physical examination maneuver used to assess neurovascular compression in thoracic outlet syndrome, specifically involving the pectoralis minor space and retropectoral tunnel. With the patient seated, the examiner palpates the radial pulse while passively hyperabducting and externally rotating the arm beyond 90 degrees; a substantial diminution or complete obliteration of the radial pulse accompanied by paresthesias constitutes a positive test.

Alternate Names:

Wright Test; Hyperabduction Maneuver

Wright Stain

A laboratory dye applied to a blood sample so different blood cells and abnormal cell changes can be seen and identified under a microscope.

Wright Test

A clinical physical examination maneuver used in the assessment of thoracic outlet syndrome. The examiner palpates the radial pulse while the patient's arm is hyperabducted and externally rotated overhead; a marked diminution or obliteration of the radial pulse suggests neurovascular compression under the pectoralis minor tendon.

Alternate Names:

Wright Maneuver; Hyperabduction Test

Wrinkle Test

A simple clinical bedside test to evaluate peripheral sympathetic autonomic nerve function in the digits. Denervated skin fails to develop normal physiological wrinkling when submerged in warm water for 10 to 30 minutes, indicating loss of sympathetic vasoconstrictor tone.

Alternate Names:

Digital Wrinkling Test; Water Immersion Wrinkle Test

Wrisberg Ganglion

A small cluster of nerve cells connected with the facial nerve. It helps relay taste signals from part of the tongue and sensory signals from nearby areas of the ear.

Wrist

The joint connecting the hand to the forearm. It contains eight small wrist bones, ligaments, tendons, nerves, and blood vessels and allows the hand to bend, turn, and move from side to side.

Wrist Arthroscopy

A procedure using a small camera and instruments inserted through tiny wrist openings to examine or treat damaged cartilage, ligaments, joint lining, or other wrist problems.

Wrist Drop

Inability to lift the wrist and fingers, usually caused by injury or compression of the radial nerve. It may cause weakness, numbness, or difficulty using the hand and needs assessment for the cause.

Wrist Fracture

A break in one or more bones near the wrist, most commonly the distal radius or ulna, usually caused by a fall, direct trauma, or weakened bone.

Wrist Injury

Damage to the bones, ligaments, tendons, nerves, or vessels of the wrist from a fall, twist, impact, or overuse; fracture, instability, severe swelling, or neurovascular symptoms require assessment.

Wrist Joint

The joint where the forearm bones meet the small bones of the hand. It allows bending, straightening, side-to-side movement, and limited rotation while ligaments and cartilage provide stability.

Wrist Pain

Pain in or around the wrist, commonly caused by sprain, fracture, tendinitis, arthritis, or nerve compression such as carpal tunnel syndrome. Persistent pain, deformity, numbness, or weakness requires assessment.

Alternate Names:

Carpal Pain; Radiocarpal Joint Discomfort

Wrist Sprain

Stretching or tearing of one or more ligaments supporting the wrist, causing pain, swelling, bruising, and reduced movement after injury.

Writer's Cramp

A movement disorder in which involuntary muscle tightening causes abnormal hand or arm positions while writing. It may also affect other closely related fine hand movements.

Written Documentation

Formal recording of patient information, clinical decisions, and treatment plans; essential for continuity of care and medicolegal purposes.

Wry-Neck

Torticollis, an abnormal tilt or rotation of the head caused by involuntary contraction, shortening, or

dysfunction of neck muscles.

Wt

A medical abbreviation commonly meaning weight. Its meaning should be confirmed from the surrounding documentation because abbreviations can be ambiguous.

Wuchereria

A genus of filarial nematodes that includes *Wuchereria bancrofti*, a major cause of lymphatic filariasis. Infection is transmitted by mosquitoes and may cause lymphangitis, chronic lymphedema, hydrocele, and elephantiasis.

Wuchereria Bancrofti

A parasitic roundworm spread by mosquitoes and the main cause of lymphatic filariasis. Long-term infection can block lymph drainage and cause swelling of the limbs or genitals, sometimes becoming severe and permanent.

Wuhan Coronavirus

Alternate name; see *SARS-CoV-2*.

Wandering Rash Tongue

A common name for geographic tongue, a benign inflammatory condition in which smooth red patches with pale borders move across the tongue. It is not contagious and may cause sensitivity to spicy or acidic foods.

Warts and Plantar Warts

Warts are noncancerous skin growths caused by human papillomavirus. Plantar warts occur on the soles of the feet and may be painful when standing or walking because pressure pushes them inward.

Warts, Genital (Human Papillomavirus)

Soft, flesh-colored or cauliflower-like growths on the genital or anal skin caused by certain types of human papillomavirus (HPV). They are sexually transmissible; evaluation also considers other sexually transmitted infections and appropriate HPV prevention.

WBS

Abbreviation for Williams-Beuren syndrome, a genetic disorder associated with characteristic facial features, developmental differences, cardiovascular disease, and sometimes high blood calcium.

Weight Management

Long-term care of body weight through nutrition, physical activity, behavior change, medicines, or bariatric procedures when appropriate. Goals should account for health, function, metabolic risk, and sustainable habits rather than weight alone.

Weir-Mitchell Disease

An older name for restless legs syndrome, a neurologic disorder causing an urge to move the legs with uncomfortable sensations that are worse at rest and in the evening and improve temporarily with movement.

Werlhof Disease

An older name for immune thrombocytopenia (immune thrombocytopenic purpura), in which immune destruction of platelets can cause bruising, petechiae, nosebleeds, heavy menstrual bleeding, or other bleeding.

West Nile Fever

A febrile illness caused by West Nile virus, usually transmitted by mosquitoes. Most infections cause no symptoms or a flu-like illness; a small proportion causes neuroinvasive disease such as meningitis, encephalitis, or acute flaccid paralysis.

Whooping Cough (Pertussis)

Alternate name for whooping cough, a highly contagious respiratory infection caused by *Bordetella pertussis*. Prolonged coughing fits may cause vomiting or a whoop; infants may instead have pauses in breathing.

WHS

Abbreviation for Wolf-Hirschhorn syndrome, a rare chromosome 4 deletion disorder that may cause poor growth, distinctive facial features, developmental disability, seizures, and congenital abnormalities.

Williams-Beuren Syndrome

Alternate name for Williams syndrome, a chromosome 7 microdeletion disorder associated with characteristic facial features, supraaortic stenosis and other cardiovascular findings, developmental differences, and hypercalcemia in some people.

Wisdom Tooth Problems

Problems involving third molars, including impaction, infection, gum inflammation, decay, cysts, or damage to nearby teeth. Pain, swelling, fever, difficulty opening the mouth, or trouble swallowing needs dental assessment.

Wisdom Tooth Removal

Dental extraction of one or more third molars, commonly performed when they are impacted, repeatedly infected, decayed, or damaging adjacent teeth. Risks include pain, infection, bleeding, dry socket, and temporary or rarely persistent nerve symptoms.

Wolf Hirschhorn Syndrome

Alternate spelling of Wolf-Hirschhorn syndrome, a rare disorder caused by deletion of part of chromosome 4 and associated with growth restriction, seizures, developmental disability, and distinctive facial features.

Wolf Syndrome

Alternate name for Wolf-Hirschhorn syndrome, a chromosome 4 deletion disorder affecting growth, development, and multiple organ systems.

WPW Syndrome

Abbreviation for Wolff-Parkinson-White syndrome, a pre-excitation disorder in which an extra electrical pathway can cause episodes of supraventricular tachycardia. Palpitations, fainting, chest pain, or severe breathlessness require prompt assessment.

Wells Syndrome

Eosinophilic cellulitis, an uncommon inflammatory skin disorder causing itchy or burning red plaques, swelling, blisters, or a cellulitis-like eruption without typical bacterial infection. Blood eosinophilia and a skin biopsy may support the diagnosis, and

recurrences are possible.

Wolff-Parkinson-White Syndrome

A heart-rhythm disorder caused by an extra electrical connection between the atria and ventricles. It can produce episodes of supraventricular tachycardia, palpitations, dizziness, fainting, or, rarely, dangerous ventricular rhythms; catheter ablation can often eliminate the pathway.

X

Xanthelasma

A harmless yellowish patch or bump caused by fat deposits in the skin of the eyelids, usually near the inner corners of the eyes. It can occur with high blood fats but may also occur when blood-fat levels are normal.

Alternate Names:

Xanthelasma Palpebrarum; Eyelid Xanthoma; Palpebral Xanthoma

Xanthine

A natural breakdown product of substances found in cells and foods. It normally changes into uric acid, but can build up when a rare enzyme disorder blocks this pathway and may then contribute to kidney or urinary stones.

Xanthine Oxidase

An enzyme that helps convert cell and food breakdown products into uric acid. Medicines used for gout can block this enzyme, lowering uric-acid production and helping prevent urate crystal deposits.

Xanthine Oxidase Inhibitors

Medicines such as allopurinol and febuxostat that lower uric acid by blocking an enzyme involved in its production. They are used for selected people with gout or to prevent high uric acid during some cancer treatments. Choice and timing depend on the person's condition.

Alternate Names:

XOIs

Xanthinuria

A rare inherited disorder in which the body cannot

properly change xanthine into uric acid. Xanthine can build up and form kidney or urinary stones; muscle problems may also occur.

Xanthochromia

Yellow or amber color in the fluid around the brain and spinal cord. It can occur when blood has broken down in the fluid, including after bleeding around the brain, but other causes are possible and the meaning depends on timing and other test results.

Alternate Names:

CSF Xanthochromia; Cerebrospinal Fluid Yellowing

Xanthogranulomatous

Describing inflammation in which tissue contains many immune cells filled with fat. This pattern can occur in long-lasting infections and other inflammatory conditions.

Xanthogranulomatous Cholecystitis

A rare, long-lasting inflammation of the gallbladder that can thicken and damage its wall. It may spread to nearby tissues and can look like gallbladder cancer on scans.

Alternate Names:

XGC

Xanthogranulomatous Oophoritis

A rare long-lasting inflammation of an ovary, often linked to infection or endometriosis. It can form a mass that resembles ovarian cancer on scans and may cause pelvic pain, fever, or abnormal bleeding.

Xanthogranulomatous Pyelonephritis

A severe, long-lasting kidney infection that destroys

normal kidney tissue and replaces it with inflamed tissue. It is often associated with blockage or stones and may require antibiotics, drainage, or removal of the damaged kidney.

Xanthoma

A yellow-orange spot, bump, or patch formed by fat deposits in the skin, tissue beneath the skin, or tendons. It may occur with high blood fats, diabetes, some liver diseases, or an inherited lipid disorder.

Xanthoma Disseminatum

A rare disorder in which many yellow, red-brown, or orange bumps develop on the skin, especially in body folds. The mouth, throat, or other organs may also be affected, and some people develop problems controlling water balance.

Alternate Names:

Montgomery Syndrome; Disseminate Xanthoma

Xanthoma Eruptivum

A sudden outbreak of many small yellow-orange bumps, usually on the buttocks, arms, legs, or shoulders. It is often linked to very high blood triglyceride levels.

Alternate Names:

Eruptive Xanthoma; Eruptive Xanthomatosis

Xanthoma Planum

Flat or slightly raised yellow skin patches caused by the buildup of fat inside immune cells. They may occur in skin folds, the palms, or more widely on the body and can be linked to high blood fats or some blood disorders.

Alternate Names:

Plane Xanthoma; Xanthoma Striatum Palmare

Xanthomas

Yellowish papules, plaques, or nodules caused by lipid accumulation in skin immune cells. They may reflect high cholesterol or triglycerides, diabetes, cholestatic liver disease, or an inherited lipid disorder and should prompt appropriate evaluation.

Xanthoma Striatum Palmare

Yellow or orange lines or patches in the creases of the palms caused by fat deposits in the skin. They are strongly linked to some inherited blood-fat disorders, especially type III dysbetalipoproteinemia, but blood tests are needed.

Alternate Names:

Palmar Crease Xanthoma; Planar Palmar Xanthoma

Xanthoma Tendinosum

Firm, usually painless fat deposits in tendons or ligaments, most often in the Achilles tendon or tendons of the hands. They are strongly linked to inherited high cholesterol.

Alternate Names:

Tendon Xanthoma; Tendinous Xanthoma

Xanthomatosis

A disorder in which fatty deposits called xanthomas develop in the skin, tendons, or organs. It may be linked to inherited or acquired problems with blood fats.

Xanthoma Tuberosum

Slowly enlarging, painless, firm, yellowish-red nodular lipid deposits occurring over extensor pressure areas, particularly the elbows, knees, heels, and buttocks. They are strongly associated with familial hypercholesterolemia and type III hyperlipoproteinemia.

Alternate Names:

Tuberous Xanthoma; Tuberous Xanthomatosis

Xanthopsia

A visual disturbance in which objects appear yellow or yellowish. It can occur with some eye disorders, medicine toxicity such as digoxin toxicity, or disorders of the nerves or retina.

Xanthosis

Yellow discoloration of skin or other tissues caused by carotene or another yellow substance. Unlike jaundice, it does not usually make the whites of the eyes yellow; the cause is assessed from the person's

diet and health.

X Chromosome

One of the two types of human sex chromosomes. It carries genes involved in sex development as well as many other body functions. Most people have one or two X chromosomes.

Xenobiotic

A chemical that does not naturally belong in the body, such as a medicine, pollutant, pesticide, or industrial compound. The body changes and removes it, but some resulting chemicals can be harmful.

Xenobiotic Metabolism

The body's processing of foreign chemicals, including medicines, pollutants, and toxins. Enzymes, especially in the liver, change them so they can be removed; the changed substances may remain active or become harmful.

Xenobiotic Resistance

The ability of cells or organisms to withstand the effects of foreign chemicals, medicines, or toxins. It may result from breaking down the substance faster, pumping it out of cells, or changing the substance's target.

Alternate Names:

Multidrug Resistance; Xenobiotic Tolerance

Xenograft

Tissue, cells, or a biological material transplanted between different species, such as animal tissue used in a human. Rejection and infection are important risks, although some materials are used temporarily as tissue coverings or substitutes.

Xenon Anesthesia

Use of xenon gas to cause unconsciousness and prevent pain during an operation. Xenon acts on brain signaling and is cleared mainly through breathing.

Xenotransplantation

Transplanting living cells, tissues, or organs between different species, usually from an animal to a human.

It may increase the supply of transplant material but carries major risks of immune rejection, infection, and poor organ function.

Xerochilia

Abnormal, persistent dryness, scaling, and superficial vertical cracking or fissuring of the lips, resulting from environmental dehydration, persistent lip-licking (cheilitis simplex), chronic mouth breathing, or systemic therapy with oral retinoids (such as isotretinoin).

Alternate Names:

Dry Lips

Xeroderma

Alternate name; see *Dry skin*.

Xeroderma Pigmentosum

A rare usually autosomal-recessive disorder of nucleotide-excision DNA repair, with a variant form affecting translesion synthesis. Minimal ultraviolet exposure can cause severe sunburn or persistent redness, early freckle-like pigmentation, and rapid photoaging; skin and ocular-surface cancers occur at a young age, and some people develop progressive neurologic disease. Strict ultraviolet protection, regular skin and eye examinations, and early treatment of suspicious lesions are essential.

Xeroderma Pigmentosum Complementation Groups

Genetic subtypes of xeroderma pigmentosum. Each subtype results from a change in a different gene involved in repairing damage caused by ultraviolet light. All subtypes can cause extreme sun sensitivity, freckling, and a very high risk of skin cancer.

Alternate Names:

XP Complementation Groups; NER Defect Groups

Xerophthalmia

Dryness and damage of the eye caused by severe vitamin A deficiency. It may begin with poor night vision and dry eyes and can progress to corneal damage and permanent sight loss.

Alternate Names:

Vitamin A Deficiency Eye Disease; Ocular Xerosis;

Keratomalacia

Xerophthalmic Ulceration

Severe progressive ulceration of the cornea resulting from severe vitamin A deficiency (classified as WHO stage X3A when involving less than one-third of the corneal area, and stage X3B when involving more). Untreated, it rapidly causes corneal liquefactive necrosis (keratomalacia) and permanent blindness.

Alternate Names:

Vitamin A Corneal Ulcer; Keratomalacic Ulceration

Xerosis

Alternate name; see *Dry skin*.

Xerostomia

Alternate name; see *Dry Mouth*.

Xerotic Eczema

A common, intensely pruritic inflammatory dermatosis occurring predominantly on the pretibial lower extremities of elderly individuals during cold, dry winter months, characterized by profound epidermal dehydration, scaling, and fine superficial erythematous fissures resembling "cracked porcelain" or a "dry riverbed."

Alternate Names:

Asteatotic Eczema; Eczema Craquele; Winter Itch

X-Inactivation

A process in early development that switches off most genes on one of two X chromosomes in each cell. It helps balance gene activity, although some genes remain active and the pattern can differ between cells.

Xiphisternal Joint

The joint between the lower part of the breastbone and the xiphoid process. It often becomes partly or fully hardened with age.

Alternate Names:

Xiphisternal Synchondrosis; Xiphisternal Articulation

Xiphoidalgia

Pain or tenderness over the xiphoid process, the small lower part of the breastbone. Pain may spread to the upper abdomen, chest, back, or shoulders and may worsen with touch, bending, lifting, or coughing.

Alternate Names:

Xiphoidodynia; Hypersensitive Xiphoid Syndrome; Xiphoid Syndrome

Xiphoidectomy

Surgery to remove the xiphoid process, the small lower part of the breastbone. It may be done for persistent pain in this area or to provide access during some chest or abdominal operations.

Xiphoid Process

The small pointed lower part of the breastbone. Its shape varies between people and it provides attachment for some muscles and ligaments.

X-Linked

Describing a gene or condition caused by a change on the X chromosome. The pattern differs between people with one X chromosome and those with two; fathers pass their X chromosome to daughters, not sons.

X-Linked Adrenoleukodystrophy

An inherited disorder, usually affecting boys, in which certain fats build up and damage the adrenal glands and nervous system. It can cause behavior or learning changes, movement problems, seizures, or adrenal failure.

X-Linked Agammaglobulinemia

An inherited immune disorder, usually affecting boys, in which the body cannot make enough antibodies. Repeated bacterial infections often begin in infancy or early childhood and are treated with antibody replacement and infection care.

X-Linked Chronic Granulomatous Disease

An inherited immune disorder, usually affecting boys, caused by a change in the *CYBB* gene. Cer-

tain white blood cells cannot kill some bacteria and fungi normally, leading to repeated serious infections and areas of ongoing inflammation.

Alternate Names:

X-Linked CGD; CYBB Deficiency; Cytochrome b-245 Beta Deficiency

X-Linked Dominant Inheritance

A pattern in which one changed gene on the X chromosome can cause a condition. An affected father passes the changed X chromosome to all daughters and no sons.

X-Linked Emery-Dreifuss Muscular Dystrophy

An inherited muscle disorder, usually affecting boys, that causes stiff joints, slowly worsening muscle weakness, and problems with the heart's electrical rhythm.

Alternate Names:

EDMD1; Emerin Deficiency Muscular Dystrophy

X-Linked Hyper-IgM Syndrome

An inherited immune disorder, usually affecting boys, in which the body cannot change one type of protective antibody into other types. It causes repeated lung and sinus infections and may cause infections by organisms that usually do not cause illness.

Alternate Names:

HIGM1; CD40L Deficiency; Hyper-IgM Syndrome Type 1

X-Linked Hypophosphatemia

An inherited disorder that causes the kidneys to lose too much phosphate. Low phosphate can lead to soft or poorly growing bones, bone pain, bowed legs, dental problems, and reduced height.

X-Linked Ichthyosis

An inherited, usually X-linked recessive skin disorder caused by a variant or deletion affecting the STS gene and deficiency of steroid sulfatase. It usually affects males and causes widespread dry, dark, plate-like scales that often begin in infancy or early childhood.

X-Linked Inheritance

Inheritance of a gene change located on the X chromosome. The effects depend on the gene, the type of change, and whether a person has one or two X chromosomes; fathers do not pass an X chromosome to sons.

X-Linked Lymphoproliferative Disease Type 1

An inherited immune disorder, usually affecting boys, in which the body can react severely to Epstein-Barr virus. It may cause severe glandular fever, very high inflammation, low antibody levels, or lymphoma.

Alternate Names:

XLP1; Duncan Disease; SAP Deficiency

X-Linked Lymphoproliferative Syndrome

An inherited immune disorder, usually affecting boys, in which the body reacts abnormally to infections. Severe Epstein-Barr virus illness, persistent fever, liver or blood problems, lymphoma, and intestinal inflammation may occur.

X-Linked Myotubular Myopathy

A rare inherited muscle disease, usually affecting boys, that causes severe weakness and low muscle tone from birth. Babies may have drooping eyelids, feeding difficulty, and dangerous weakness of the breathing muscles.

Alternate Names:

XLMTM; Myotubularin Deficiency

X-Linked Recessive Inheritance

A pattern in which a changed gene on the X chromosome usually causes a condition in people with one X chromosome. People with two X chromosomes are often unaffected carriers, although they can sometimes have symptoms. An affected father does not pass the changed X chromosome to sons.

X-Linked Retinitis Pigmentosa

An inherited disorder in which the retina slowly loses its ability to sense light. It usually causes night blindness followed by narrowing of the field of vision and worsening sight.

Alternate Names:

XLRP; X-Linked Pigmentary Retinopathy

X-Linked Retinoschisis

An inherited eye disorder, usually affecting boys, in which layers of the retina separate. It can cause blurred central or distance vision, crossed eyes, bleeding, or retinal detachment in severe cases.

X-Linked Severe Combined Immunodeficiency

A severe inherited immune disorder, usually affecting boys, in which important immune cells do not develop normally and antibody protection is poor. Babies are highly vulnerable to serious infections.

X-Linked Sideroblastic Anemia

An inherited form of anemia, usually affecting boys, in which red blood cells cannot make hemoglobin normally. Iron builds up in developing blood cells, causing small, pale red blood cells and anemia.

Alternate Names:

XLSA; ALAS2 Deficiency; Hereditary Sideroblastic Anemia

X-Linked Spinal and Bulbar Muscular Atrophy

An inherited muscle and nerve disorder that usually begins in adulthood and slowly causes weakness. It may also cause muscle twitching, trouble speaking or swallowing, breast enlargement, and reduced fertility.

Alternate Names:

Kennedy Disease; SBMA; Bulbo-Spinal Muscular Atrophy

X-Ray

An imaging test that uses a small amount of radiation to create a picture of structures inside the body. It is especially useful for bones, lungs, teeth, and some other tissues.

X-Ray Attenuation

The reduction in strength of an X-ray beam as it passes through the body. Bone, soft tissue, and air

reduce the beam by different amounts, creating the differences seen in the image.

X-Ray Crystallography

A laboratory method that uses X-rays to work out the three-dimensional structure of molecules such as proteins. The molecule is made into a crystal, and the pattern produced by the X-rays is analyzed.

Alternate Names:

X-Ray Crystal Diffraction Analysis; Macromolecular Crystallography

X-Ray Shield

Protective material, often lead or another dense substance, used to reduce exposure to scattered X-rays during imaging.

X-Ray Therapy

Treatment that uses carefully aimed X-ray radiation to damage abnormal cells or relieve symptoms. It is used mainly for cancer and may be given from a machine outside the body or near the target.

XX Male Syndrome

A difference in sex development in which a person with two X chromosomes develops typically male physical features, usually because a sex-development gene has moved onto an X chromosome. Infertility is common, and care is individualized.

XXX Syndrome

Alternate name; see *Triple X syndrome*, a sex-chromosome variation in which a female has an additional X chromosome.

XXXX Syndrome

XXXX syndrome is a rare sex-chromosome variation in which a female has four X chromosomes; it may cause developmental or learning difficulties, distinctive physical features, and ovarian dysfunction, with severity varying widely.

Xylitol

A sugar alcohol used as a sweetener and in some oral-care products. Large human ingestions may

cause gastrointestinal symptoms; it is highly toxic to dogs.

Xylose

A simple sugar found in some plants. A form called D-xylose has been used in tests of how well the small intestine absorbs nutrients and is also used in laboratory studies.

Xylose Absorption Test

A test of how well the small intestine absorbs a simple sugar called D-xylose. Low amounts in the blood or urine may suggest poor absorption from the intestine; normal results with other signs of poor absorption may suggest a problem with the pancreas.

Alternate Names:

D-Xylose Absorption Test; D-Xylose Tolerance Test

XXY Syndrome

A sex-chromosome variation in which a male has an extra Y chromosome. Many affected individuals have few or no obvious symptoms, though some have tall stature, learning difficulties, or developmental differences.

X-linked Juvenile Retinoschisis

An inherited retinal disorder, usually affecting boys, in which layers of the retina separate during childhood. It can cause reduced central vision, difficulty seeing in dim light, crossed eyes, or retinal complications.

X-linked Adult Spinal Muscular Atrophy

Alternate name for Kennedy disease, or X-linked spinal and bulbar muscular atrophy. It is an inherited androgen-receptor disorder that gradually causes weakness, muscle wasting, twitching, swallowing or speech difficulty, and sometimes breast enlargement.

X-linked Intellectual Disability

Intellectual disability caused by a change in a gene on the X chromosome. Features vary widely and may include developmental delay, learning difficulty, behavior differences, seizures, or associated physical

findings.

XO Syndrome

A form of Turner syndrome caused by complete or partial absence of one X chromosome. It may cause short stature, ovarian insufficiency, infertility, characteristic physical findings, and heart, kidney, hearing, or thyroid problems.

XP

Abbreviation for xeroderma pigmentosum, a rare DNA-repair disorder causing extreme sensitivity to ultraviolet light and a markedly increased risk of early skin and eye cancers.

XXY Males

People with a typically male pattern of development and an extra X chromosome, usually 47,XXY. This is commonly called Klinefelter syndrome and may cause small testes, low testosterone, infertility, tall stature, or learning and language difficulties.

XXY Syndrome

Alternate name for Klinefelter syndrome, a sex-chromosome variation in which a typically male individual has an extra X chromosome. Effects vary and may include low testosterone, infertility, small testes, tall stature, and developmental or language differences.

Y

YAG Capsulotomy

A laser procedure that makes a small opening in the cloudy membrane behind an artificial lens after cataract surgery. It can restore vision when this clouding causes blurring or glare and is usually done without another incision.

YAG Laser Capsulotomy

Alternate name; see *YAG Capsulotomy*.

YAG Laser Surgery

Treatment using a focused laser to make a precise opening or alter tissue without a conventional surgical incision. It is used mainly for selected eye conditions, and risks depend on the part of the eye treated.

Yawn

An involuntary behavior consisting of a deep inhalation followed by a slower exhalation, often with stretching of the jaw and facial muscles. Yawning is common with fatigue but excessive or unusual yawning can occur with some medications or neurologic conditions.

Yawning

Alternate name; see *Yawn*.

Yaws

Yaws is a chronic infection caused by *Treponema pallidum* subsp. *pertenue* and spread mainly through close skin contact. It can cause an initial papilloma or ulcer and later destructive lesions of skin, bone, and cartilage; antibiotics can cure the infection.

Yaws Papilloma

The primary clinical cutaneous lesion of early yaws (*Treponema pallidum* subsp. *pertenue* infection), also termed a mother yaw or frambesioma. It presents as an initial painless, raised, yellow-crust, raspberry-like papule or ulcer at the site of cutaneous inoculation.

Alternate Names:

Mother Yaw; Frambesioma; Primary Yaws Lesion

Y-Box Binding Protein

A protein that attaches to DNA and RNA and helps control which genes are active and how proteins are made. It also helps cells respond to stress and repair damaged DNA.

Alternate Names:

YB-1; Y-Box Transcription Factor; Nuclease-Sensitive Element-Binding Protein 1

Y Chromosome

One of the two human sex chromosomes. It usually carries genes involved in testis development and is passed by a biological father to a child who inherits it; chromosome patterns and body development can vary.

Y-Chromosome Microdeletion

A small missing section of the Y chromosome that can interfere with sperm production and cause very low or absent sperm counts.

Alternate Names:

AZF Microdeletion

Yeast

A type of fungus made of single cells. Some yeasts

normally live on or in the body, while others can cause infections of the mouth, skin, vagina, lungs, blood, or other organs.

Yeast Infection

An infection caused by *Candida* yeast that may affect the mouth, skin, vagina, penis, or other tissues. Symptoms depend on the site and may include itching, soreness, redness, white plaques, discharge, or rash. *Candida* may also be present without causing disease, so the significance of a finding depends on the site, symptoms, and evidence of tissue invasion.

Yeast Infection In Women And Men

Genital *Candida* infection may affect the vulva or vagina in women and the glans penis or foreskin in men. Symptoms can include itching, soreness, redness, discharge, or rash.

Yeast Present

A laboratory report showing yeast in a specimen. This may mean harmless colonization, contamination, or infection; the meaning depends on the symptoms, specimen, and type of yeast.

Yeast Vulvitis

Inflammation of the vulva associated with a *Candida* yeast infection. It may cause itching, burning, redness, swelling, and soreness; other conditions can cause similar symptoms.

Yellow Cartilage

A flexible type of cartilage containing many elastic fibers. It is found in the outer ear, the epiglottis, parts of the voice box, and the tube connecting the middle ear to the throat.

Alternate Names:

Elastic Cartilage; Cartilago Elastica

Yellow Fever

Yellow fever is an acute mosquito-borne infection caused by yellow fever virus. Fever, headache, muscle aches, nausea, and vomiting may be followed by jaundice, bleeding, shock, and organ failure; vaccination is the main preventive measure.

Yellow Fever Vaccine

A vaccine made from a weakened yellow fever virus. It gives long-lasting protection, but rare serious reactions can affect the brain or internal organs.

Alternate Names:

17D Vaccine

Yellow Fever Virus

A flavivirus transmitted mainly by infected mosquitoes that can cause yellow fever, ranging from a mild febrile illness to jaundice, bleeding, shock, and organ failure.

Yellow Ligament

A series of elastic bands connecting the back parts of neighboring bones in the spine. They help support the spine and surround the spinal canal.

Alternate Names:

Ligamentum Flavum; Flavum Ligament

Yellow Marrow

Bone marrow containing mostly fat instead of blood-forming cells. It is common in the hollow centers of adult long bones and can change back toward blood-forming marrow when the body needs more blood cells.

Alternate Names:

Fatty Bone Marrow; Medulla Ossium Flava

Yellow Nail Syndrome

Alternate name; see *Yellow-Nail Syndrome*.

Yellow-Nail Syndrome

A rare disorder causing yellow, thickened, slowly growing nails together with swelling from lymph fluid, usually in the legs, and lung problems such as repeated infections or fluid around the lungs. The cause is not fully understood.

Yellow Nail Syndrome Triad

The three main features of yellow nail syndrome: slow-growing yellow or thickened nails, swelling from lymph-fluid buildup, and long-term breathing or lung problems.

Alternate Names:

YNS Triad; Lymphedema-Pleural Effusion-Yellow Nails

Yellow Spot

The macula, a small yellowish area near the center of the retina at the back of the eye. It provides the sharp central vision used for reading and seeing fine detail.

Alternate Names:

Macula Lutea; Anatomical Macula

Yellow Tongue

Yellow discoloration or coating of the tongue that may result from oral hygiene, smoking, dry mouth, diet, medicines, or an underlying illness.

Yergason Test

A shoulder examination in which a person turns the palm upward and rotates the arm outward against resistance. Pain or a snapping sensation near the front of the shoulder may suggest a problem involving the biceps tendon, but the test is not diagnostic by itself.

Yersinia

A group of bacteria that can cause intestinal illness, swollen lymph nodes in the abdomen, or plague. Different species spread through contaminated food or water, infected animals, or fleas.

Yersinia Enterocolitica

A bacterium that can cause diarrhea, fever, and abdominal pain, sometimes mimicking appendicitis. People usually acquire it from contaminated food, water, or contact with infected animals.

Yersinia Enterocolitica Pseudoappendicitis

A Yersinia infection that causes pain in the lower right abdomen and swollen lymph nodes near the intestine, making it resemble appendicitis. It can also cause fever and diarrhea, often after contaminated food such as undercooked pork.

Alternate Names:

Yersinia Mesenteric Adenitis; Pseudoappendiceal

Syndrome

Yersinia Infection

Infection caused by Yersinia bacteria, usually producing diarrhea, abdominal pain, fever, or vomiting. Some cases resemble appendicitis; bloody diarrhea, dehydration, or severe or persistent illness can occur.

Yersinia Outer Proteins

Proteins made by disease-causing Yersinia bacteria that are injected into human cells. They weaken the immune response and help the bacteria avoid being destroyed.

Alternate Names:

Yops; Yersinia Effector Proteins; Yop Virulence Factors

Yersinia Pestis

The bacterium that causes plague, a severe infection usually spread by infected fleas or animals. It may cause painful swollen lymph nodes, bloodstream infection, or lung disease and can be life-threatening.

Yersinia Pestis Pneumonic Plague

A severe form of plague affecting the lungs. It can spread through breathing in infected droplets or when plague spreads from another part of the body. It may cause high fever, breathing difficulty, chest pain, cough, shock, and rapidly worsening lung failure.

Alternate Names:

Pneumonic Plague; Pulmonary Yersiniosis

Yersinia Pseudotuberculosis

A bacterium usually acquired from contaminated food or water. It can cause fever, diarrhea, and pain from swollen lymph nodes in the abdomen, sometimes resembling appendicitis.

Yersinia Reactive Arthritis

Joint inflammation that develops after a Yersinia intestinal infection, usually one to four weeks later. It often affects a few joints, especially in the legs, without bacteria being present inside the joints.

Yersiniosis

Infection caused by *Yersinia* bacteria, most often *Y. enterocolitica* or *Y. pseudotuberculosis*, producing diarrhea, abdominal pain, fever, or pseudoappendicitis.

Yew Poisoning

Poisoning after eating parts of the yew plant, especially its leaves or seeds. The toxins can cause vomiting, dizziness, seizures, dangerous heart rhythms, collapse, and death.

Y-Linked Gene

A gene located specifically on the non-recombining region of the Y chromosome (such as the *SRY* gene, *ZFY*, or *AZF* azoospermia factor region). These genes are transmitted strictly from biological fathers to sons and are essential for testicular differentiation, gonadal development, and male spermatogenesis.

Alternate Names:

Holandric Gene; Y-Chromosomal Gene

Y-Linked Inheritance

Inheritance of a condition caused by a gene on the Y chromosome. A biological father passes a Y-linked gene to sons who inherit his Y chromosome, but not to daughters who inherit his X chromosome.

Y-Maze Test

A test used mainly in laboratory animals to study movement, exploration, and short-term memory. The animal moves through three arms of a Y-shaped maze, and the pattern of movement is recorded.

Alternate Names:

Y-Maze Spontaneous Alternation; Y-Maze Behavioral Paradigm

Yolk Sac

A temporary structure that supports an early embryo before the placenta is fully working. It helps form the first blood cells and part of the early intestine and can be seen on early pregnancy ultrasound.

Yolk Sac Carcinoma

An aggressive germ-cell cancer that often produces

high levels of alpha-fetoprotein (AFP). AFP can support the diagnosis and help track treatment, but it is interpreted with examination, imaging, and tissue testing.

Alternate Names:

Endodermal Sinus Tumor; Yolk Sac Germ Cell Tumor

Yolk Sac Tumor

A cancer of germ cells that often occurs in the ovary or testicle in children or young adults and produces alpha-fetoprotein. It can also occur outside the reproductive organs.

Yolk-Sac Tumor

Alternate name; see *Yolk Sac Tumor*.

Yolk Sac Tumor Pathology

A malignant germ-cell tumor with variable reticular, microcystic, papillary, glandular, or solid patterns. Schiller-Duval bodies, hyaline globules, and alpha-fetoprotein expression may support the diagnosis.

Yolk Sac Tumor Schiller-Duval Bodies

A characteristic microscope finding in yolk sac tumors. It looks somewhat like a tiny kidney filter, with tumor cells arranged around a small blood vessel. The finding helps confirm the diagnosis when considered with other test results.

Alternate Names:

Schiller-Duval Bodies; Glomeruloid Endodermal Bodies

Yolk Stalk

A temporary connection between the early yolk sac and the developing intestine. It normally disappears before birth; a remaining portion can form an abnormal intestinal pouch or other problem.

Young-Burgess Classification

A system used to describe pelvic-ring fractures according to how the injury happened and how stable the pelvis is. Groups include side-to-side compression, front-to-back compression, vertical separation, and mixed injuries.

Alternate Names:

Young-Burgess Pelvic Fracture Classification;
Burgess Pelvic Injury Scale

Young Syndrome

A rare condition, usually affecting males, that combines blockage of sperm transport with repeated sinus and lung infections. It may also cause bronchiectasis, a long-term widening and damage of the airways.

Alternate Names:

Sinopulmonary-Infertility Syndrome; Barry-Perkins-Young Syndrome

Y-Plate Osteosynthesis

Surgical repair of a complex broken bone using a metal plate shaped like the letter Y. The plate holds the bone pieces in place while they heal.

Alternate Names:

Y-Plate Fixation; Y-Shaped Contoured Bone Plate

Yttrium-90

A radioactive substance used in selected treatments to deliver radiation to abnormal tissue, such as some liver tumors or inflamed joints.

Yttrium-90 Microspheres

Tiny glass or resin beads containing radioactive yttrium-90. They are delivered through blood vessels to selected liver tumors, where they release radiation.

Alternate Names:

Y-90 Radioembolization Microspheres; TheraSphere; SIR-Spheres

Yttrium-90 Radioembolization

A treatment in which tiny beads containing radioactive yttrium-90 are delivered through liver blood vessels to release radiation inside liver tumors.

Alternate Names:

SIRT; Y-90 SIRT; Y-90 Transarterial Radioembolization

Yttrium-Aluminum-Garnet Laser

A laser that uses a crystal to produce a focused

beam of light. It is used in eye care for procedures such as opening a cloudy membrane after cataract surgery and making a small opening for some types of glaucoma.

Alternate Names:

Nd:YAG Laser; Neodymium:YAG Laser

Yuzpe Regimen

An older form of emergency contraception using two doses of combined birth-control hormones. It has largely been replaced by emergency contraception containing levonorgestrel or ulipristal.

Y-V Plasty

A surgical technique in which a Y-shaped cut is closed as a V. This lengthens or widens nearby tissue and may help release a tight scar or other narrowing.

Alternate Names:

Y-V Advancement Flap; Y-V Lengthening Procedure

Yeast Infections

Infections caused by an overgrowth of yeast, most often *Candida*. They commonly affect the vagina, mouth, skin, or bloodstream; symptoms and treatment depend on the site and the person's risk factors.

Z

Zafirlukast

A leukotriene-receptor antagonist used for long-term control and prevention of asthma symptoms. It is taken orally and is not a rescue treatment for an acute asthma attack; liver injury and drug interactions are important safety considerations.

Alternate Names:

Accolate

Zahn Lines

Alternating light and dark layers seen in a blood clot that formed while blood was flowing. The light layers contain platelets and fibrin, while the dark layers contain more red blood cells.

Alternate Names:

Lines of Zahn; Striae of Zahn

Zanamivir

An inhaled neuraminidase inhibitor used to treat or prevent influenza A and B when started appropriately. It may cause bronchospasm and is used cautiously in people with underlying airway disease.

Alternate Names:

Relenza

ZAP-70 Deficiency

A rare inherited immune disorder in which important immune cells do not work properly. Children may have repeated, serious infections.

Zavanelli Maneuver

An emergency procedure for severe shoulder dystocia that does not respond to other measures. The clinician gently returns the baby's head to the birth canal, followed by immediate cesarean delivery.

Alternate Names:

Cephalic Replacement Maneuver

Z-Disc

A thin structure inside muscle fibers that anchors the protein strands involved in muscle contraction. It marks the boundary of each repeating unit of a muscle fiber.

Alternate Names:

Z-Line; Z-Band; Zwischenscheibe

Zellweger Syndrome

A severe inherited disorder in which cells cannot make peroxisomes, structures that help process fats and other substances. It begins in infancy and may cause weak muscle tone, feeding problems, seizures, liver disease, and impaired brain development.

Alternate Names:

ZSD; Cerebrohepatorenal Syndrome

Zenker Degeneration

Severe damage and death of skeletal muscle fibers, formerly described in serious infections such as typhoid fever or widespread blood infection.

Alternate Names:

Zenker's Hyaline Necrosis; Waxy Muscle Degeneration

Zenker Diverticulum

A pouch that forms in the upper swallowing tube near the throat, usually because the nearby muscle does not relax normally. It may cause difficulty swallowing, return of undigested food, bad breath, a neck lump, cough, or repeated lung infections.

Alternate Names:

Zenker's Diverticulum; Pharyngoesophageal Diverticulum; Hypopharyngeal Diverticulum; Pulsion Diverticulum

Zenker Peroral Endoscopic Myotomy

A procedure that treats a pouch in the upper swallowing tube called a Zenker diverticulum. A flexible camera is passed through the mouth and the tight muscle between the pouch and swallowing tube is divided so food can pass more easily. Symptoms can return and the procedure has risks such as bleeding or a tear.

Alternate Names:

Z-POEM; Endoscopic Zenker Myotomy

Ziconotide

A strong pain medicine delivered continuously into the fluid around the spinal cord for selected severe chronic pain. It can cause dizziness, confusion, hallucinations, and other serious nervous-system or mental-health effects.

Alternate Names:

Prialt

Zidovudine

An HIV medicine that interferes with the virus's ability to copy itself. It may be used in selected treatment plans and to reduce transmission around childbirth; important risks include anemia, low white-cell counts, muscle problems, and other toxicity.

Alternate Names:

Azidothymidine; AZT; Retrovir

Ziehl-Neelsen Stain

A laboratory stain used to find bacteria with a waxy coating that resists removal by acid, especially the bacteria that cause tuberculosis. These bacteria appear red against a contrasting background under a microscope.

Alternate Names:

Acid-Fast Stain; AFB Stain

Zieve Syndrome

A temporary complication of heavy alcohol use and sudden liver injury. It causes breakdown of red

blood cells, yellowing of the skin or eyes, and increased blood fats.

Alternate Names:

Hemolytic Anemia with Hyperlipidemia and Jaundice

Zika

An infection caused by Zika virus. It often causes no symptoms or a mild fever, rash, red eyes, joint pain, and muscle pain. Infection during pregnancy can harm the developing baby, and it can rarely trigger Guillain-Barré syndrome.

Alternate Names:

Zika Virus Disease; ZVD; Congenital Zika Syndrome

Zika Virus

A virus spread mainly by infected *Aedes* mosquitoes and also through sexual contact and, less commonly, blood or pregnancy-related transmission. Infection is often mild or symptom-free but can injure a developing fetus.

Alternate Names:

ZIKV

Zileuton

A medicine used for long-term prevention and control of asthma. It does not relieve a sudden asthma attack and can cause liver problems or interact with other medicines.

Alternate Names:

Zyflo

Zinc

An essential mineral needed for many body reactions, normal growth, immunity, reproduction, and wound healing. Too little can cause deficiency; excessive supplements can cause stomach symptoms and copper deficiency.

Alternate Names:

Zn

Zinc Acetate

A zinc salt used to treat zinc deficiency and, in some forms, to reduce copper absorption in Wilson

disease. It may cause nausea or stomach irritation.

Zinc Deficiency

A state of inadequate available zinc caused by insufficient intake, malabsorption, excessive losses, or increased requirements. Manifestations may include impaired growth, dermatitis, alopecia, diarrhea, altered taste, delayed wound healing, and increased infection susceptibility.

Alternate Names:

Hypozincemia; Zinc Depletion

Zinc Finger Motif

A small part of a protein held in shape by a zinc atom. It often helps the protein attach to DNA and control gene activity.

Zinc Oxide

An insoluble zinc compound used topically as a skin protectant and barrier, including in preparations for diaper dermatitis and minor irritation. It can reduce contact with moisture and irritants but does not treat every cause of a rash.

Alternate Names:

ZnO

Zinc Oxide Ointment

A topical preparation containing zinc oxide that forms a protective barrier over irritated or moist skin. It is commonly used for diaper dermatitis and minor skin irritation.

Alternate Names:

Topical Zinc Barrier Cream; Zinc Oxide Paste

Zinc Protoporphyrin

A substance made in developing red blood cells when zinc is used instead of iron during hemoglobin production. High levels can occur with iron deficiency or long-term lead exposure.

Alternate Names:

ZPP; Erythrocyte Zinc Protoporphyrin

Zinc Sulfate

An oral or parenteral zinc salt used to prevent or treat zinc deficiency when clinically indicated. Gas-

trointestinal upset is common with oral therapy, and prolonged excessive use can cause copper deficiency.

Zinc Toxicity

Adverse effects caused by excessive zinc ingestion or exposure. Acute toxicity may cause nausea, vomiting, abdominal pain, and diarrhea; chronic excess can impair copper absorption and lead to anemia or neurologic and immune abnormalities.

Alternate Names:

Hyperzincemia; Zinc Poisoning

Zinner Syndrome

A rare condition present from birth in which one kidney is absent, a nearby seminal-vesicle cyst forms, and the sperm-carrying duct is blocked. It may cause pelvic pain, painful urination, or infertility after puberty.

Alternate Names:

Mesonephric Duct Malformation Syndrome; Seminal Vesicle Cyst with Renal Agenesis

Zirconia

A zirconium-oxide ceramic used in dentistry for crowns, bridges, implants, and other restorations. Its strength and tissue compatibility make it useful, although restoration design, surface treatment, and clinical indication affect performance.

Alternate Names:

Zirconium Dioxide; Ceramic Biomaterial

Zoledronic Acid

A potent intravenous bisphosphonate used for osteoporosis and certain cancer-related conditions, including hypercalcemia of malignancy and skeletal complications of bone metastases. Renal injury, hypocalcemia, acute-phase reactions, and rare osteonecrosis of the jaw are important risks.

Alternate Names:

Zoledronate; Zometa; Reclast

Zollinger-Ellison Secretin Stimulation Test

A test used when a gastrin-producing tumor is suspected but a blood gastrin result is unclear. Secretin

is given through a vein and blood gastrin levels are measured more than once.

Alternate Names:

Secretin Provocation Test; Secretin Gastrinoma Test

Zollinger-Ellison Syndrome

A rare condition in which a hormone-producing tumor makes too much gastrin, causing the stomach to produce excess acid. It can lead to repeated ulcers, severe reflux, abdominal pain, and diarrhea.

Zolpidem

A nonbenzodiazepine sedative-hypnotic used for short-term treatment of insomnia. It can cause next-day impairment, complex sleep behaviors, dependence, and respiratory or central-nervous-system depression, especially with other sedatives.

Alternate Names:

Ambien

Zona Fasciculata

The middle and largest layer of the outer part of the adrenal gland. It makes glucocorticoid hormones, including cortisol.

Alternate Names:

Adrenal Zona Fasciculata; Fascicular Zone

Zona Glomerulosa

The outer layer of the adrenal gland. It makes mineralocorticoid hormones, mainly aldosterone, which helps control salt, water, and blood pressure.

Alternate Names:

Adrenal Zona Glomerulosa; Glomerular Zone

Zona Pellucida

A protective layer of proteins surrounding an egg cell. It helps sperm attach to the egg and changes after fertilization to prevent more than one sperm from entering.

Alternate Names:

Oocyte Glycoprotein Coat; Pellucid Zone

Zona Reticularis

The inner layer of the outer part of the adrenal gland. It makes some hormones related to sex hormones,

including adrenal androgens.

Alternate Names:

Adrenal Zona Reticularis; Reticular Zone

Zonisamide

An antiseizure medicine used mainly for focal seizures. It can cause sleepiness, thinking problems, kidney stones, reduced sweating with overheating, acid imbalance, severe rash, or other serious reactions.

Alternate Names:

Zonegran

Zonula Adherens

A belt-like connection between neighboring cells that helps hold them together. It is especially important in sheets of lining cells.

Alternate Names:

Belt Desmosome; Intermediate Junction; Adherens Junction

Zonula Occludens

A tight connection between neighboring lining cells that helps prevent substances from passing freely between them.

Alternate Names:

Tight Junction

Zonule

Fine fibers that hold the eye's lens in place. They transfer tension from the ciliary muscle so the lens changes shape and the eye can focus at different distances.

Alternate Names:

Zonule of Zinn; Ciliary Zonule; Suspensory Ligament of Lens

Zoon Balanitis

A chronic benign inflammation of the glans penis, usually seen in uncircumcised men. It commonly appears as a sharply demarcated shiny orange-red or rust-colored patch; diagnosis is clinical, with biopsy used when the diagnosis is uncertain.

Alternate Names:

Plasma Cell Balanitis; Balanitis Circumscripta Plas-

macellularis

Zoonosis

An infection that naturally spreads between animals with backbones and people. Examples include rabies, brucellosis, leptospirosis, toxoplasmosis, and some influenza infections; spread may involve bites, food, water, droplets, or direct contact.

Alternate Names:

Zoonotic Infection; Zoonotic Disease

Zoonotic Spillover

The spread of a germ from an animal or insect carrier to a person. If the germ then spreads easily between people, it can cause an outbreak or epidemic.

Alternate Names:

Zoonotic Transmission Event; Cross-Species Spillover

Zoster

A painful, usually unilateral vesicular eruption caused by reactivation of latent varicella-zoster virus in a sensory nerve ganglion. It may be complicated by postherpetic neuralgia, ocular disease, or neurologic involvement.

Alternate Names:

Herpes Zoster; Shingles; Zona

Zoster Ophthalmicus

Shingles affecting the nerve that supplies the forehead, upper eyelid, and eye. It causes a painful one-sided rash around the eye and can damage vision.

Alternate Names:

Herpes Zoster Ophthalmicus; HZO

Z-Plasty

A reconstructive operation that rearranges nearby skin in a Z-shaped pattern. It can lengthen a tight scar, change the direction of a scar, and improve movement or appearance.

Z-Score (DEXA)

A statistical bone mineral density (BMD) score obtained from dual-energy X-ray absorptiometry

that compares a patient's measured BMD to the mean BMD of an age-, sex-, and ethnicity-matched reference population. A Z-score of -2.0 or lower is defined as "below the expected range for age" in children, premenopausal women, and men younger than 50 years.

Alternate Names:

Age-Matched Bone Density Z-Score; DEXA Z-Score

Z-Score (Echocardiography)

A number that compares the size of a child's heart or blood-vessel structure with the expected size for children of a similar body size. It can help describe unusually small or large structures.

Alternate Names:

Pediatric Echo Z-Score; Cardiovascular Z-Score

Z-Thumb Deformity

A characteristic deformity of the thumb in which fixed flexion occurs at the metacarpophalangeal (MCP) joint accompanied by hyperextension at the interphalangeal (IP) joint, resembling the letter Z. It is a hallmark joint manifestation of advanced rheumatoid arthritis.

Alternate Names:

Boutonniere-Type Thumb Deformity; Hitchhiker's Thumb Deformity

Z-Tracking Technique

An injection method in which the skin is moved to one side before an injection and allowed to return afterward. This creates a zigzag path that helps keep the medicine in the muscle.

Alternate Names:

Z-Track Injection Method; Z-Track Technique

Zygapophyseal Joint

One of the small joints at the back of the spine that connects neighboring vertebrae. These facet joints guide spinal movement and can become painful with arthritis.

Alternate Names:

Facet Joint; Z-Joint; Spinal Articular Facet

Zygapophyseal Joint Arthropathy

Arthritis of the small facet joints at the back of the spine. It can cause local or nearby neck or back pain and stiffness.

Alternate Names:

Facet Joint Arthropathy; Spinal Facet Osteoarthritis

Zygomatic Arch

A prominent horizontal bony bridge on the lateral aspect of the skull formed by the articulation of the temporal process of the zygomatic bone with the zygomatic process of the temporal bone, providing the origin for the masseter muscle and transmitting the temporalis muscle tendon beneath it.

Alternate Names:

Cheekbone Arch

Zygomatic Bone

A paired facial bone that forms the prominence of the cheek and part of the lateral orbital wall and floor. It articulates with the frontal, sphenoid, temporal, and maxillary bones.

Alternate Names:

Cheekbone; Malar Bone

Zygomatic Fracture

A break in the cheekbone or the group of bones joining it to the eye socket, usually caused by facial trauma. It may flatten the cheek, numb the skin below the eye, cause double vision, limit mouth opening, or injure the eye socket.

Alternate Names:

ZMC Fracture; Malar Fracture; Tripod Fracture

Zygomaxillary Complex Fracture

A break involving the cheekbone and its connections to the eye socket, upper jaw, and skull. It may flatten the cheek and cause double vision, numbness below the eye, or difficulty opening the mouth.

Alternate Names:

ZMC Fracture; Tetrapod Fracture; Tripod Fracture of the Face

Zygomycosis

A serious infection caused by molds called Mucorales. It mainly affects people with weakened immunity or poorly controlled diabetes and can rapidly damage the nose, brain, lungs, skin, or other tissues.

Alternate Names:

Mucormycosis; Invasive Mucorales Infection

Zygote

The first cell formed when a sperm joins an egg. It contains genetic material from both parents, divides repeatedly, and develops into an embryo.

Alternate Names:

Fertilized Oocyte; Conceptus

Zymogen

An inactive form of an enzyme that becomes active after a chemical change. Examples include pepsinogen, trypsinogen, and some blood-clotting proteins.

Alternate Names:

Proenzyme; Inactive Enzyme Precursor

Zymogen Granule

A small storage sac inside certain gland cells, such as cells in the pancreas. It stores inactive digestive enzymes until the cell releases them.

Alternate Names:

Zymogenic Secretory Vesicle; Proenzyme Granule

Zika Virus Infection

Infection caused by Zika virus, usually spread by infected *Aedes* mosquitoes and sometimes through sexual or pregnancy-related transmission. It is often mild or asymptomatic but can cause congenital infection and neurologic complications.

Zika Fever

The usually mild febrile illness caused by Zika virus. It may include rash, red eyes, joint pain, muscle pain, headache, and fever; infection during pregnancy can harm the developing fetus.

Zinc Poisoning

Illness caused by excessive zinc ingestion or exposure. It may cause nausea, vomiting, abdominal pain, and

diarrhea acutely; prolonged excess can interfere with copper absorption and cause anemia or neurologic problems.

Zoster (Shingles)

A painful rash caused by reactivation of varicella-zoster virus in a sensory nerve. It typically affects one side of the body and may lead to postherpetic neuralgia or eye and neurologic complications.

Drugs

Generic Medicines and Medication Terms

5-Alpha Reductase Inhibitor

A medicine that lowers production of dihydrotestosterone, a hormone that affects the prostate and hair follicles. It is used mainly for an enlarged prostate and selected types of hair loss.

Abortifacient

A medicine or substance used to end a pregnancy. Some block progesterone, others cause uterine contractions and cervical opening, and certain medicines stop rapidly dividing pregnancy tissue in selected ectopic pregnancies.

Abortion - Medication

Medication abortion uses prescribed medicines, commonly mifepristone followed by misoprostol or misoprostol alone, to end an early intrauterine pregnancy; confirmation of completion and assessment for ectopic pregnancy are important.

Abuse Steroid (Anabolic Steroid Abuse)

Alternate index label for Anabolic Steroid Abuse.

A&E Medicine

The medical specialty concerned with the immediate assessment, resuscitation, diagnosis, and initial treatment of acute illness and injury.

Alternate Names:

A&E Medicine

ACE Inhibitor

A medicine that relaxes blood vessels and reduces strain on the heart by lowering production of angiotensin II. It treats high blood pressure, heart failure, and some kidney disease; cough, high potassium, kidney problems, or swelling can occur.

Acitretin

An oral retinoid used mainly for severe psoriasis and selected keratinization disorders. It is highly teratogenic and requires strict pregnancy precautions and monitoring for adverse effects.

Adenovirus Vaccine

A vaccine used primarily to prevent adenovirus types 4 and 7 among selected military personnel. It is an oral, live vaccine and is not part of routine vaccination for the general public. Vaccine use and eligibility depend on current public-health recommendations.

Adverse Drug Event

Harm related to the use of a medication, including harm caused by an adverse drug reaction, medication error, overdose, or inappropriate use.

Adverse Drug Reaction

An unwanted and harmful response to a medicine taken at a usual dose for prevention, testing, or treatment. It may result from the medicine's expected effects, an allergy, an interaction, or an unusual individual response.

Agent, Tocolytic

A medicine that reduces uterine contractions, used

selectively to delay preterm birth long enough for corticosteroids, transfer, or other preparations to take effect.

Agonist-Antagonist

A medicine that activates some receptors while blocking others, or activates a receptor only partly. Its mixed action can produce a desired effect while limiting another effect; examples include some opioid medicines.

AIDS Vaccine

A vaccine designed to prevent HIV infection or reduce its effects; no generally effective licensed vaccine currently exists.

Alendronate

A bisphosphonate that reduces bone resorption and is used to treat or prevent osteoporosis and selected other disorders of excessive bone turnover.

Alternate Names:

Alendronic acid; oral bisphosphonate therapy.

Anabolic Steroid Abuse

Anabolic-androgenic steroid misuse can cause infertility, testicular shrinkage, acne, mood changes, high blood pressure, adverse cholesterol changes, liver injury, and cardiovascular events. Stopping may produce withdrawal symptoms and is safest with medical support.

Alternate Names:

Abuse Steroid (Anabolic Steroid Abuse)

Analgesic

A medicine that relieves pain without necessarily causing loss of consciousness. Analgesics include nonopioid medicines, opioids, and other medicines chosen according to the type and severity of pain.

Analgesic Nephropathy

Chronic tubulointerstitial renal injury associated with prolonged or excessive use of analgesic medicines. It may cause impaired urinary concentration, sterile pyuria, haematuria, papillary necrosis, hypertension, and progressive chronic kidney dis-

ease.

Anesthetic

A medicine or technique that numbs part or all of the body. Depending on the method, a person may remain awake or become unconscious during a procedure; breathing, blood pressure, and other vital functions may need monitoring.

Angiotensin Converting-Enzyme Inhibitor

A medicine that lowers the production of angiotensin II, a hormone that narrows blood vessels and promotes salt retention. It can treat high blood pressure, heart failure, and some kidney disease but may cause cough, high potassium, kidney problems, or swelling.

Angiotensin Receptor Blocker

A medicine that blocks angiotensin II at the AT1 receptor, reducing vasoconstriction and aldosterone effects; it is used for hypertension, heart failure, and selected kidney disease.

Antibiotic

A medicine that kills bacteria or stops them from multiplying. Antibiotics do not treat viral infections and should be selected for the suspected bacteria, infection site, allergies, and resistance risk.

Antibiotic-Associated Colitis

Alternate Mayo Clinic label; see *Pseudomembranous colitis*.

Antibiotic-Associated Diarrhea

Loose or frequent stools that occur during or soon after antibiotic treatment.

Alternate Names:

Diarrhea, Antibiotic-Associated

Antibiotic Cycling

A strategy in which the preferred antibiotic for a particular clinical use is changed at planned intervals. It is intended to limit selection of resistant organisms, although its benefit depends on local

conditions and implementation.

Antibiotic De-Escalation

The process of narrowing antimicrobial spectrum based on microbiological results and clinical response. De-escalation aims to reduce selective pressure for resistance while maintaining therapeutic efficacy.

Antibiotic Mixing

A strategy in which different antibiotics are assigned concurrently to different patients with the same indication. It is intended to reduce uniform selection pressure for resistance in a patient population.

Antibiotic Resistance

The ability of bacteria to survive or grow despite an antibiotic that would normally kill them or stop their growth. It can result from genetic changes and the spread of resistance genes; unnecessary or incorrect antibiotic use can accelerate it.

Alternate Names:

Resistance Antibiotic (Antibiotic Resistance)

Antibiotic Resistance Genes

Genes that help bacteria survive antibiotics. They may change the antibiotic's target, destroy or modify the medicine, or remove it from the cell. Bacteria can inherit these genes or acquire them from other bacteria.

Antibiotic Stewardship

Coordinated efforts to use antibiotics appropriately by selecting the right medicine, dose, route, and duration while reducing unnecessary treatment and resistance.

Anticholinergic Cognitive Burden Scale

A medication-review tool that estimates the total anticholinergic load of a patient's medicines. It supports risk assessment and deprescribing but does not replace individualized clinical judgment.

Anticoagulant

A medicine that slows the body's blood-clotting

process. It helps prevent or treat clots in veins, lungs, heart, or arteries but can cause bruising or serious bleeding.

Anticoagulant Agent

A drug that reduces blood clot formation by interfering with the coagulation cascade; examples include heparin, warfarin, and direct oral anticoagulants.

Anticoagulant Monitoring

Laboratory assessment used to measure the effect or safety of an anticoagulant. The appropriate test depends on the drug and may include aPTT, anti-Xa activity, INR, or measurements of kidney function and blood counts.

Anticoagulant Rodenticides Poisoning

Poisoning from rat or mouse bait that interferes with blood clotting. Symptoms such as easy bruising, nosebleeds, blood in urine or stool, or weakness may appear later; suspected exposure requires immediate poison-control or emergency advice.

Anticonvulsant

A medicine used to prevent or control seizures. Some are also used for nerve pain, migraine prevention, or mood disorders; choice depends on the condition, other medicines, pregnancy, and side effects.

Alternate Names:

Antiseizure medicine

Anticonvulsant Mood Stabilizers

Antiepileptic drugs used as mood stabilizers in bipolar disorder. Valproate (divalproex) is effective for acute mania and rapid cycling. Carbamazepine is effective for acute mania but has numerous drug interactions via CYP3A4 induction. Lamotrigine is effective for bipolar depression prevention but not acute mania.

Antidepressant

A medicine used to treat depressive disorders and some other conditions involving mood, anxiety, pain, or sleep.

Antidiabetic Agent

A medicine that lowers blood glucose or improves glucose regulation in diabetes, such as insulin, metformin, sulfonylureas, or GLP-1 receptor agonists.

Antidiarrheal

A medicine that reduces the frequency or amount of diarrhea. It may be unsafe when stools contain blood, there is high fever or severe infection, or the bowel is blocked, so the cause should be considered first.

Antidiarrheal Medicine Overdose

Toxic effects caused by excessive exposure to Antidiarrheal medicine. Severity depends on the dose, route, timing, coexisting conditions, and clinical findings; suspected poisoning requires prompt assessment.

Antiemetic

A medicine that prevents or reduces nausea and vomiting. The choice depends on the cause, such as infection, migraine, pregnancy, surgery, or cancer treatment, and some medicines can cause sleepiness or movement problems.

Antiestrogen

A drug that blocks estrogen effects or reduces estrogen production; it may be used in hormone-sensitive breast cancer or to alter reproductive hormone signaling.

Antifungal

A medicine that kills fungi or stops them from growing. It may be applied to the skin or given by mouth or injection; the choice depends on the fungus, the body site, and the severity of infection.

Antifungal Agent

A drug or chemical that kills fungi or inhibits their growth, used to treat fungal infections of the skin, mucosa, or internal organs.

Antifungal Drug Classes

Major classes of antifungal agents include polyenes

(amphotericin B), azoles (fluconazole, voriconazole), echinocandins (caspofungin, micafungin), and allylamines (terbinafine). Polyenes bind to ergosterol in fungal cell membranes. Azoles inhibit ergosterol synthesis. Echinocandins inhibit cell wall synthesis.

Antifungal Medication

A medicine used to treat fungal infection; the choice and route depend on the organism and site, and examples include azoles, terbinafine, polyenes, and echinocandins.

Antihistamine

A medicine that blocks histamine, a chemical involved in allergies. It can relieve sneezing, itching, hives, or watery eyes; older types may cause sleepiness, dry mouth, blurred vision, urinary retention, or confusion.

Antihypertensive

A medicine used to lower blood pressure. Classes include ACE inhibitors, angiotensin-receptor blockers, calcium-channel blockers, thiazide-type diuretics, beta-blockers, and other agents. Selection depends on blood pressure, kidney function, cardiovascular disease, pregnancy, and other clinical factors.

Antihypertensive Agent

A medicine or treatment that lowers high blood pressure. The choice depends on age, kidney function, heart disease, pregnancy, other medicines, and how high the pressure is.

Alternate Names:

Blood-pressure medicine

Anti-Infective

A medicine or other agent used to prevent or treat an infection. The choice depends on whether the cause is a bacterium, virus, fungus, or parasite, as well as the infection site and the person's health.

Antimalarial

A drug used to prevent or treat malaria caused by Plasmodium parasites; selection depends on species, disease severity, resistance, and geographic exposure.

Antimicrobial Drug

A medicine used to treat infection by bacteria, viruses, fungi, or parasites; the drug is selected according to the organism, infection site, and patient factors.

Antimicrobial Drug Interactions

Changes in the effect or level of an infection medicine caused by another medicine, food, or supplement. Some combinations reduce treatment effectiveness or increase toxicity, so the full medicine list should be checked.

Antiparasitic

A medicine used to prevent or treat infection caused by parasites. The choice depends on the parasite, body site, disease severity, resistance patterns, pregnancy status, and other patient factors.

Antiparkinsonian

A medicine used to improve movement or other symptoms of Parkinson disease. Medicines may replace dopamine, imitate its effects, or alter other brain signals; benefits and adverse effects vary with the drug and the person.

Antiplatelet Agent

A medicine that makes blood platelets less likely to clump together. It lowers the risk of clots in arteries but can increase bruising and serious bleeding.

Alternate Names:

Antiplatelet medicine

Antiprotozoal Drug

A medicine used to prevent or treat disease caused by protozoa, including drugs directed against malaria, intestinal protozoa, or tissue parasites.

Antipruritic

A medicine or skin treatment that relieves itching. It may work by reducing inflammation, blocking allergy signals, numbing the skin, or changing nerve signals; treatment should also address the cause of the itching.

Antipsychotic

A medicine used to reduce hallucinations, delusions, severe agitation, or mania and to treat some mood disorders. Possible effects include sleepiness, movement problems, weight or blood-sugar changes, and rarely a dangerous fever-and-stiffness reaction.

Antipsychotic Agent

A medicine used to reduce hallucinations, fixed false beliefs, severe agitation, or disorganized thinking. Some are also used for bipolar disorder or selected behavioral symptoms and can cause sleepiness, movement problems, or metabolic effects.

Alternate Names:

Antipsychotic

Antipsychotic-Induced Parkinsonism

Drug-induced bradykinesia, rigidity, tremor, or postural instability caused by dopamine-receptor blockade, usually from antipsychotic treatment. Management involves reviewing the medication, dose, alternatives, and symptomatic treatment when appropriate.

Antispasmodic

A medicine that relaxes involuntary muscle and may reduce cramping in the intestine, bladder, or other organs. Some types can cause dry mouth, blurred vision, constipation, urinary retention, or confusion.

Alternate Names:

Antispasmodics

Antithyroid

A medicine that lowers thyroid-hormone production or release, or reduces the effects of thyroid hormone. Treatment is selected according to the cause of hyperthyroidism, disease severity, pregnancy status, and other clinical factors.

Antithyroid Drug

A medicine that reduces thyroid hormone production or release, used to treat hyperthyroidism; examples include methimazole, propylthiouracil, and radioactive iodine.

Antiviral

A medicine that slows or stops viruses from multiplying. It works only against certain viruses and is chosen according to the infection, timing, resistance, and the patient's health.

Antiviral Drug Classes

Groups of antiviral medicines classified by the step of viral growth they block. Some stop copying of viral genetic material, some block viral proteins or entry into cells, and others prevent newly formed viruses from being released.

Anxiolytic

A medicine or other treatment that reduces anxiety. Choice depends on the anxiety disorder, urgency, coexisting conditions, adverse effects, and patient preference; psychological therapies and, when appropriate, antidepressant medicines are commonly used for persistent anxiety.

ARB-Nepriylsin Inhibitor

Sacubitril/valsartan combines an ARB with a neprilysin inhibitor, increasing natriuretic peptide levels while blocking the renin-angiotensin system. The PARADIGM-HF trial demonstrated superior reduction in cardiovascular death and heart failure hospitalization compared to enalapril.

Aromatase Inhibitor

A class of medications that inhibit aromatase, the enzyme that converts androgens (androstenedione, testosterone) to estrogens (estrone, estradiol) in peripheral tissues (adipose, breast, muscle, bone). Used primarily in hormone receptor-positive breast cancer in postmenopausal women.

Attenuated Vaccine

A vaccine made with a weakened microorganism that retains the ability to stimulate immunity.

Alternate Names:

Live attenuated vaccine

Bacterial Vaccine

A vaccine made from killed bacteria, weakened bac-

teria, purified bacterial parts, or bacterial toxins. It trains the immune system to prevent specific infections; protection and dosing depend on the vaccine and age group.

BCG Vaccine

A vaccine made from a weakened relative of the tuberculosis bacterium. It helps protect children from severe tuberculosis, especially meningitis, but protection against lung tuberculosis varies; use depends on local risk and policy.

Behavioral Medicine

An interdisciplinary field integrating behavioral science with medical practice to prevent, diagnose, and treat illness. It addresses psychological factors such as stress, coping, adherence, and health behaviors that influence disease outcomes.

Benzodiazepines

Medicines that strengthen the brain's main calming signal. They can reduce anxiety, stop some seizures, relax muscles, or cause sleepiness, but can also cause dependence, falls, confusion, and dangerously slow breathing, especially with opioids or alcohol.

Beta-Adrenergic Blocker

A drug that antagonizes beta-adrenergic receptors, reducing heart rate, myocardial contractility, and renin release. It is used in selected patients with hypertension, angina, arrhythmias, post-myocardial infarction disease, and heart failure; abrupt withdrawal may worsen ischemia.

Alternate Names:

Beta-Adrenergic Antagonist

Beta Agonists

Drugs that activate beta-adrenergic receptors, producing effects such as relaxation of airway smooth muscle or increased cardiac stimulation depending on receptor selectivity.

Alternate Names:

Beta-adrenergic agonists; beta-agonist drugs.

Beta Blocker

A drug that blocks beta-adrenergic receptors, lowering sympathetic effects such as heart rate and contractility; beta blockers are used for conditions including hypertension, angina, arrhythmias, and heart failure.

Beta-Blocker Overdose

Toxic exposure to a beta-adrenergic blocker that may cause slow heart rate, low blood pressure, low blood glucose, bronchospasm, seizures, or altered consciousness. It requires urgent poison-control and medical management.

Beta Blockers

A class of medicines that block the effects of adrenaline and related hormones at beta receptors. They usually slow the heart rate, reduce the force of heart contraction, and lower blood pressure. Depending on the medicine, they may be used for high blood pressure, angina, abnormal heart rhythms, heart failure, migraine prevention, tremor, or some symptoms of anxiety.

Beta-Lactamase Inhibitor Combinations

Combinations of beta-lactam antibiotics with beta-lactamase inhibitors that extend activity against beta-lactamase producing organisms. The major combinations include amoxicillin-clavulanate, ampicillin-sulbactam, piperacillin-tazobactam, cefoperazone-sulbactam, and ceftolozane-tazobactam.

C1 Esterase Inhibitor

A blood protein that helps control inflammation, swelling, and clotting reactions. Too little or abnormal activity can cause hereditary angioedema, with repeated attacks of swelling in the skin, bowel, or airway.

Calcium Channel Blocker

A medicine that reduces calcium movement into heart and blood-vessel muscle cells. It may relax arteries, lower blood pressure, reduce chest pain, or slow some abnormal heart rhythms; ankle swelling, constipation, dizziness, or a slow heartbeat may

occur.

Calcium Channel Blocker Overdose

Toxic exposure to a calcium-channel blocker that may cause low blood pressure, slow heart rate, conduction abnormalities, high blood glucose, or shock. It requires urgent medical and poison-control management.

Calcium Channel Blockers

Medicines that reduce the movement of calcium into heart and blood-vessel muscle cells. Dihydropyridines, such as amlodipine and nifedipine, mainly relax arteries and are used for high blood pressure and angina. Other calcium channel blockers, such as diltiazem and verapamil, also slow the heart rate and electrical conduction and may be used for certain abnormal heart rhythms.

Camptothecin Analogue

A cancer medicine related to camptothecin that blocks an enzyme cancer cells need to copy DNA. It can damage rapidly dividing cells and commonly causes low blood counts, diarrhea, nausea, or other gastrointestinal effects.

Cancer Vaccine

A vaccine designed either to prevent infections that can cause cancer or to help the immune system attack an existing cancer. Its use depends on the specific vaccine and cancer; it does not replace other cancer treatment when needed.

Cardiotonic Agent

A drug or substance that increases the force or efficiency of cardiac contraction, used selectively in heart failure or shock because benefits must be balanced against arrhythmia and other risks.

Carvedilol Phosphate

The phosphate formulation of carvedilol, a medicine that blocks beta and alpha-1 receptors. It lowers heart rate and blood pressure and is used for heart failure and hypertension; dizziness, slow heartbeat, and worsening fluid retention can occur.

Cebocephaly

A rare birth defect in which the middle part of the face is severely underdeveloped, sometimes with a single nostril or a nose-like structure between closely spaced eyes. It usually occurs with major brain and facial-development abnormalities.

Celecoxib

A selective COX-2 anti-inflammatory medicine used for pain and arthritis. It can cause stomach, kidney, blood-pressure, and heart problems and may increase cardiovascular risk, especially with long-term use or in people with existing risk factors.

Cholesterol - Drug Treatment

Medicines used to lower harmful blood cholesterol or triglycerides and reduce cardiovascular risk. Statins are used most often; other options may be added when needed, according to cholesterol levels, overall risk, other illnesses, and treatment tolerance.

Cholinesterase Inhibitor

A medicine that slows the breakdown of acetylcholine, a chemical used for nerve signalling. It can improve nerve communication in selected conditions but may cause nausea, diarrhoea, slow heartbeat, sweating, or muscle cramps.

Cold/Cough Medicines in Children

Many nonprescription cold and cough medicines are unsafe or ineffective for young children and can cause sedation, agitation, abnormal heart rate, overdose, or breathing problems. Age-appropriate fluids, saline, humidification, and clinician-guided treatment are safer approaches.

Conjugate Vaccine

A vaccine that joins a bacterial sugar to a carrier protein so the immune system makes a stronger, longer-lasting response. This design is especially useful in infants and young children.

Alternate Names:

Protein-conjugate vaccine; conjugated polysaccharide vaccine.

Conscious Sedation

Medicine given to make a person relaxed and drowsy during a procedure while allowing them to respond to voice or touch and usually breathe independently. Breathing, blood pressure, and alertness must be monitored because deeper sedation can occur.

Controlled Substance

A medicine or chemical whose production, supply, possession, or use is restricted by law because it may cause dependence, misuse, overdose, or other serious harm. Rules differ between countries and substances.

Cox-1 Inhibitor

A medicine that blocks cyclooxygenase-1, an enzyme involved in pain, stomach protection, kidney function, and platelet clotting. Blocking it may relieve pain but can increase stomach irritation, bleeding, or kidney problems.

COX Inhibitor

A class of medicines that reduce production of chemicals involved in pain, fever, and inflammation. They can irritate the stomach, affect kidney function, raise blood pressure, or increase bleeding and cardiovascular risk.

Crack (Drug)

A smokable, rapidly acting form of cocaine; it can cause dependence, severe cardiovascular effects, seizures, stroke, psychiatric symptoms, and overdose.

Cutaneous Drug Eruptions

Skin rashes or other skin reactions caused by medicines. They may appear as a widespread red rash, hives, sun-sensitive areas, or a lichen-planus-like eruption. Blisters, skin peeling, mouth sores, fever, or facial swelling require urgent assessment.

Cyclooxygenase Inhibitor

A medicine that reduces production of prostaglandins and may relieve pain and inflammation.

Designer Steroid

A chemically modified anabolic-androgenic steroid created to produce performance-enhancing effects or evade detection; products may be unapproved, contaminated, and medically dangerous.

Diarrhea, Antibiotic-Associated

Alternate index label; see *Antibiotic-associated diarrhea*.

Digitalis

A group of heart medicines from foxglove plants, including digoxin. They can strengthen heart contraction and slow some heart rhythms but have a narrow safety range and may cause dangerous toxicity.

Diphtheria Vaccine

A vaccine containing an inactivated form of diphtheria toxin. It trains the immune system to neutralize the toxin and is usually given in combination vaccines with protection against tetanus and pertussis.

Disease-Modifying Antirheumatic Drug

A medicine that reduces immune-driven inflammation and helps prevent lasting joint or organ damage, rather than only relieving symptoms. Different types are chosen according to the disease, severity, other conditions, and monitoring needs.

Disulfiram

A medicine used as an adjunct for alcohol-use disorder that inhibits aldehyde dehydrogenase and can cause an unpleasant reaction if alcohol is consumed.

Diuretic

A medicine that helps the kidneys remove extra salt and water in urine. It can treat swelling, high blood pressure, heart failure, or selected kidney and liver conditions but may disturb salts or cause dehydration.

Doctor Of Osteopathic Medicine

A physician who has completed an accredited osteopathic medical degree and residency training and is

licensed to diagnose, prevent, and treat disease.

Drug Administration Route

The pathway by which a medicine enters the body, such as oral, intravenous, intramuscular, inhaled, topical, or subcutaneous administration.

Drug Allergies

Drug allergies are immune-mediated reactions to a medicine, ranging from rash to anaphylaxis; they must be distinguished from predictable side effects and nonimmune intolerance.

Drug Allergy

An adverse immune-mediated reaction to a medication, representing a hypersensitivity response that is distinct from side effects, toxicities, and idiosyncratic reactions.

Drug Antagonism

An interaction where one drug blocks or decreases the effectiveness of another, such as when an antidote blocks a poison.

Drug Bioavailability

The proportion of a dose that reaches the bloodstream in an active form. It depends on how the medicine is given, how well it is absorbed, and how much is broken down before reaching the blood; intravenous doses enter the bloodstream completely.

Drug Classification Systems

Systems that group medicines according to properties such as their chemical structure, mechanism of action, therapeutic use, or effects on the body.

Drug Clearance

The body's ability to remove a medicine from the bloodstream, mainly through the liver and kidneys. Clearance affects how long a medicine works and how often it should be taken; liver or kidney disease may require dose adjustment.

Drug Dependence

A state of physiological or psychological adaptation

to a drug, characterized by a withdrawal syndrome upon discontinuation or dose reduction. Physical dependence: the body has adapted to the presence of the drug, and abrupt cessation produces a predictable withdrawal syndrome specific to the drug class.

Drug-Drug Interactions

Changes in the effect or amount of one medicine caused by another medicine. The combination may make treatment less effective or increase side effects, so all prescription, nonprescription, and supplement use should be reviewed.

Drug-Eluting Balloon (Vascular)

A vascular balloon catheter that delivers a medicine to the vessel wall during dilation, without leaving a permanent implant.

Alternate Names:

Vascular

Drug Emulsion

A medicine made by dispersing tiny droplets of one liquid throughout another liquid that normally would not mix with it. An added stabilizer keeps the mixture uniform so the medicine can be given safely.

Drug Eruption

A skin eruption caused by a medication, ranging from a mild morbilliform rash to severe reactions such as Stevens–Johnson syndrome or toxic epidermal necrolysis.

Drug-Facilitated Sexual Assault

Sexual contact occurring when a person's capacity to consent or resist is impaired by alcohol, medication, or another drug, whether administered covertly or knowingly consumed. Medical care includes urgent safety assessment, treatment of injuries, toxicology sampling when indicated, prophylaxis, and trauma-informed support.

Drug Hypersensitivity Reactions

Immune-mediated adverse reactions to medicines. They may be immediate or delayed and can range

from a mild rash to severe systemic illness.

Drug Hypersensitivity Syndrome

A serious delayed reaction to a medicine, usually beginning two to eight weeks after it is started. It may cause fever, widespread rash, facial swelling, enlarged lymph nodes, abnormal blood cells, and injury to the liver, kidneys, lungs, or heart.

Drug-Induced Autoimmunity

An immune reaction caused by a medicine in which the body attacks its own tissues. It may resemble lupus, cause joint pain, fever, rash, or organ inflammation, and often improves after the responsible medicine is stopped under medical guidance.

Drug-Induced Diarrhea

Diarrhea caused by a medicine or drug interaction. Common causes include antibiotics, laxatives, metformin, and medicines that alter intestinal motility.

Drug-Induced Immune Hemolytic Anemia

An uncommon immune-mediated destruction of red blood cells triggered by a medication; evaluation includes blood tests and review of exposures, with specialist management.

Drug Induced Liver Disease

Drug-induced liver injury occurs when a medicine, supplement, or toxin damages liver cells or bile flow. It may cause fatigue, nausea, itching, dark urine, jaundice, or no symptoms; identifying and stopping the responsible exposure under medical guidance is central to care.

Drug-Induced Low Blood Sugar

Low blood glucose caused by a medicine, most often insulin or an insulin secretagogue. Symptoms may include sweating, tremor, confusion, seizure, or loss of consciousness.

Drug-Induced Pulmonary Disease

Lung injury caused by a medicine or treatment. It may produce cough, breathlessness, fever, or abnor-

mal lung imaging; the medicine, timing, and other possible causes must be reviewed promptly because some cases can progress to respiratory failure.

Drug-Induced Thrombocytopenia

A low platelet count caused by a medicine through immune destruction, reduced production, or other mechanisms, increasing bleeding risk.

Drug-Induced Tremor

Tremor caused or worsened by a medicine, stimulant, or toxin. Assessment considers timing, dose, other causes, and whether the medicine can be changed.

Drug Interaction

A change in the effect or concentration of one medicine caused by another medicine, food, substance, or disease.

Drug Metabolism

The enzymatic conversion of medicines into metabolites, mainly in the liver but also in the intestine, kidneys, lungs, and other tissues.

Drug Metabolism Pharmacogenomics

The study of how inherited genetic differences change the way a person breaks down medicines. This information can sometimes help clinicians choose a safer or more effective medicine or dose.

Drug Overdose

Harm caused by taking too much medicine or taking it by the wrong route. Effects range from sleepiness, vomiting, and confusion to seizures, organ damage, or stopped breathing. Suspected overdose requires urgent poison-control or emergency advice.

Drug Packaging

The container, labeling, and protective materials used to preserve a medicine and support correct identification, storage, and use.

Drug, Prescription

A medicine legally supplied under the order of an authorized prescriber, with its indication, dose, du-

ration, interactions, and risks specified for the patient.

Drug Resistance

The ability of microorganisms, cancer cells, or parasites to survive and proliferate despite exposure to drugs that were previously effective.

Drug, Sulfa

A sulfonamide drug; some are antibacterial medicines, while others are used as diuretics or for other indications, and sulfonamide reactions vary by drug and patient.

Drug Therapeutics

The use of medicines to prevent, diagnose, or treat disease while balancing expected benefit and potential harm.

Drug Tolerance

A decreased pharmacological response to a drug after repeated administration, requiring dose escalation to achieve the same effect.

Drug Toxicity

Harmful effects caused by a medicine or its metabolites. Toxicity may result from excessive exposure, accumulation, interactions, or an unpredictable individual reaction.

Drug Use First Aid

Immediate care for suspected drug intoxication, including assessment of breathing and responsiveness, emergency activation, overdose-specific support, and naloxone when opioid toxicity is suspected.

Drug Vehicle

An inactive substance or carrier used to deliver an active drug ingredient in a formulation.

Drug Withdrawal

A clinically significant syndrome or return of symptoms caused by abrupt reduction or cessation of a drug after physiologic adaptation or dependence has developed. Tapering is required for some medica-

tions to reduce withdrawal and rebound effects.

DTaP Vaccine

A vaccine against diphtheria, tetanus, and pertussis (whooping cough), given mainly to infants and young children in a multi-dose series. It reduces severe illness, complications, and spread; schedules vary by country.

Eflornithine

A medicine that slows cell growth by blocking an enzyme needed to make certain cell components. A skin cream can reduce unwanted facial hair; an intravenous form has been used for selected African trypanosome infections.

Enzyme Inhibitor

A substance that slows or blocks an enzyme, a protein that helps chemical reactions occur in the body. Medicines use this action to change processes such as blood pressure, inflammation, infection, hormone production, or cancer-cell growth.

Estrogen Inhibitor

A medicine that reduces estrogen production or blocks estrogen's effects. It may treat selected hormone-sensitive cancers or other conditions; side effects can include hot flashes, bone loss, joint symptoms, or blood clots.

Etidronate

A bisphosphonate medicine that slows the breakdown and rebuilding of bone. It is used selectively for some disorders of abnormal bone remodeling; treatment depends on the condition and can affect the stomach, kidneys, or minerals.

Evidence-Based Medicine

The use of reliable research together with clinical expertise and the patient's values and circumstances to make healthcare decisions. It supports, but does not replace, discussion between patient and clinician.

Expectorant

A medicine intended to loosen or thin mucus so it is easier to cough up. Benefit varies with the cause of cough and the product; persistent breathlessness, fever, chest pain, or blood needs medical assessment.

Extensively Drug-Resistant TB

Tuberculosis caused by bacteria resistant to rifampicin and usually isoniazid, at least one fluoroquinolone, and at least one of the key drugs bedaquiline or linezolid. Diagnosis requires drug-susceptibility testing and specialist treatment.

Family Medicine

A medical specialty providing comprehensive continuing care for people of all ages, including prevention, acute illness, chronic disease, and coordination of referrals.

Fentanyl

A potent synthetic opioid analgesic used for severe pain and anesthesia. It can cause respiratory depression, sedation, constipation, nausea, tolerance, dependence, and fatal overdose, especially when combined with alcohol or other sedatives.

Fertility Agent

A medicine or biologic intervention intended to improve the chance of conception by inducing ovulation, supporting sperm production, or treating a reproductive mechanism.

Fidaxomicin

A narrow-spectrum oral macrocyclic antibiotic used to treat *Clostridioides difficile* infection. It has minimal systemic absorption and reduces disruption of normal intestinal flora compared with many alternatives, but recurrence can still occur.

Filgrastim

A recombinant granulocyte colony-stimulating factor that increases production and release of neutrophils from bone marrow. It is used to reduce or treat selected forms of chemotherapy-related neutropenia; bone pain and rare splenic complications can occur.

Finasteride

A medicine that lowers the conversion of testosterone to dihydrotestosterone. It can shrink an enlarged prostate and help some types of hair loss but may reduce libido, affect sexual function, or alter prostate-test results.

Fixed Drug Eruption

A medicine-related skin reaction that returns in the same place whenever the person takes the responsible medicine. It may appear as a sharply outlined red or dark patch, sometimes with a blister or sore, and can leave lasting discoloration.

Fluticasone

A corticosteroid available in inhaled, nasal, topical, and other formulations to reduce inflammation. Adverse effects depend on route and may include local irritation, oral candidiasis, skin thinning, adrenal suppression, or growth effects with prolonged exposure.

Food-Drug Interaction

A change in how a medicine works or is absorbed because of food, drink, nutrients, or supplements. Examples include grapefruit affecting some medicines, vitamin K changing warfarin's effect, and calcium reducing absorption of some antibiotics.

Forensic Medicine

Application of medical knowledge to legal questions, including injury interpretation, cause of death, toxicology, identification, sexual assault evaluation, and documentation.

Forensic Medicine (Legal Medicine)

Branch of medicine that applies medical, biological, and scientific knowledge to legal questions and the administration of justice.

Alternate Names:

Legal Medicine

Foscarnet

An intravenous antiviral agent used for selected cytomegalovirus or herpesvirus infections, especially

when resistance or intolerance limits other treatment. Important toxicities include kidney injury and disturbances of calcium, magnesium, potassium, or phosphate.

Furosemide

A diuretic that makes the kidneys remove more salt and water in urine. It treats swelling and some blood-pressure or heart conditions but may cause dehydration, abnormal body salts, kidney problems, or hearing damage.

Ganglionic Blocker

A medicine that interrupts nerve signals at switching points controlling automatic body functions. It can affect blood pressure, heart rate, digestion, sweating, vision, and bladder function, so these medicines are rarely used clinically.

Generic Drug

A medicine equivalent to a brand-name medicine in active ingredient, strength, dosage form, and intended use, usually sold under a nonproprietary name.

Alternate Names:

Generic medicine

Generic Medicine

A medicine with the same active ingredient, strength, form, route, and intended effect as an approved reference medicine. It may look different or have different inactive ingredients but must meet regulatory quality and performance requirements.

Generic Name, Drug

The official nonproprietary name of a medicine's active ingredient, used consistently across manufacturers and countries. It identifies the medicine itself rather than a company's brand name and helps prevent confusion when products have different trade names.

Genomic Medicine

Use of a person's genetic or genomic information to guide disease diagnosis, risk assessment, prevention, or treatment.

Geriatric Medicine

The medical specialty focused on the health, function, diseases, medications, and goals of older adults, often using comprehensive and coordinated care.

Growth Inhibitor

A medicine or biological substance that slows or stops cell growth. In cancer treatment, it may block cell division or a growth signal, but it can also affect healthy cells and cause side effects.

Haemophilus Vaccine

A vaccine that protects against serious disease caused by *Haemophilus influenzae* type b, including meningitis, pneumonia, and bloodstream infection. It is given mainly in infancy according to the recommended immunization schedule.

Hepatic Drug Metabolism

The liver changes medicines into forms that the body can use or remove. This may stop a medicine's effect, activate a medicine that works after conversion, or produce a harmful product; age, illness, genetics, and other medicines can alter the process.

Hepatitis B Vaccine

A recombinant vaccine that prevents hepatitis B infection, which can cause chronic liver disease, cirrhosis, and liver cancer. It is given in a series beginning at birth in many schedules; infants exposed at birth may also need hepatitis B immune globulin.

Hepatitis B Vaccine (Birth Dose)

The first hepatitis B vaccine dose, given soon after birth, helps prevent infection passed from a parent to the newborn. If the birth parent has hepatitis B, the infant also needs hepatitis B immune globulin promptly; local schedules determine later doses.

Alternate Names:

Birth Dose

HER2 Inhibitor

A targeted cancer treatment that blocks signaling through human epidermal growth factor receptor 2 in cancers with HER2 overexpression or amplifica-

tion.

High Blood Pressure - Medicine-Related

Hypertension caused or worsened by a medicine or substance, such as NSAIDs, steroids, decongestants, stimulants, oral contraceptives, or immunosuppressants; review and substitution may improve control.

Histamine-2 Receptor Antagonist

A medicine that reduces stomach-acid production by blocking histamine signals in the stomach. It may treat reflux, indigestion, or ulcers; headache, diarrhea, confusion, and medicine interactions can occur.

Hormone Inhibitor

A medicine or biologic that blocks hormone synthesis, release, receptor binding, or downstream signaling, used in selected endocrine disorders and hormone-sensitive cancers.

HPV Vaccine

A vaccine that prevents infection with human papillomavirus types that cause several cancers and genital warts. It is routinely offered in early adolescence, can start from age 9, and may require two or three doses depending on age and immune status; it does not treat existing HPV infection.

Hypoglycemic Agent

A medicine that lowers blood glucose, including insulin, insulin secretagogues, insulin sensitizers, incretin-based drugs, and sodium-glucose cotransporter inhibitors; choice depends on diabetes type and patient risks.

Hypolipidemic Agent

A medicine that lowers fats in the blood, such as LDL cholesterol or triglycerides. It helps reduce cardiovascular risk when combined with appropriate diet, activity, and treatment of other risk factors.

Immunosuppressant

A drug that reduces immune system activity, used to prevent organ transplant rejection and to treat

autoimmune and inflammatory diseases.

Immunosuppressant Drug

A medicine that reduces immune-system activity, often to prevent transplant rejection or treat autoimmune disease.

Immunosuppressive Drug

A drug that suppresses immune responses, used for organ transplantation, graft-versus-host disease, and autoimmune/inflammatory diseases.

Inactivated Polio Vaccine

An injected vaccine made from killed polioviruses. It trains the immune system to prevent poliomyelitis and is used in routine childhood immunization programs; the schedule and use of other polio vaccines vary by country.

Influenza Vaccine

A seasonal vaccine that reduces the risk of influenza and its complications. It is updated as needed and is offered each year to most people from early infancy; some young children need two doses in their first vaccinated season, according to local recommendations.

Inotrope

A drug that changes myocardial contractility; positive inotropes increase the force of contraction. Dobutamine and milrinone may be used short term under specialist monitoring for cardiogenic shock or selected cases of acute decompensated heart failure with low output. Dopamine, epinephrine, and norepinephrine are primarily vasopressors or emergency agents with additional inotropic effects, while digoxin is a separate cardiac glycoside used in selected chronic heart-failure or rate-control settings. These medicines can cause arrhythmias, ischemia, or other serious effects and are not routine long-term treatment for chronic heart failure.

Intensive Care Medicine

Specialty managing critically ill patients. Components: monitoring, ventilatory support, hemodynamic support, infection control, nutrition, seda-

tion, pain management. Common conditions: sepsis, ARDS, traumatic brain injury, post-cardiac arrest, multiorgan failure.

Internal Medicine

The medical specialty focused on prevention, diagnosis, and nonsurgical treatment of diseases in adults, including complex multisystem illness.

Japanese Encephalitis Vaccine

A vaccine that protects against Japanese encephalitis, a mosquito-borne viral infection of the central nervous system. Vaccine type, schedule, and eligibility depend on age, destination or exposure risk, and local recommendations.

Laxative

A medicine that helps empty the bowel and is used for constipation or bowel preparation. Some add fiber, some draw water into stool, and others stimulate bowel movement; the best choice depends on the cause, other medicines, and the person's health.

Legal Medicine

The application of medical knowledge to legal questions, including forensic examination, injury assessment, death investigation, and issues of capacity or consent.

Liquid Medication Administration

Giving a medicine in liquid form by mouth, feeding tube, injection, or another prescribed route. The dose must be measured accurately with the supplied device because liquid strengths differ; household spoons can cause dosing errors.

Local Anesthetic

A medicine that temporarily numbs a specific area without usually causing loss of consciousness. It blocks pain signals in nearby nerves and is used for procedures, dental work, wound repair, and some forms of regional pain relief.

Luteinizing Hormone-Releasing Hormone

Agonist

A medicine that first stimulates and then, with continued use, suppresses signals from the pituitary gland that control the ovaries or testes. It is used for selected cancers, endometriosis, fibroids, and puberty disorders.

Alternate Names:

GnRH agonist; LHRH agonist

Macrolide Antibiotic

An antibiotic of the macrolide class that binds the bacterial 50S ribosomal subunit and usually inhibits protein synthesis; activity and resistance vary by organism and drug.

Malaria Vaccine

A vaccine intended to reduce malaria caused by *Plasmodium* parasites, especially *P. falciparum*; the RTS,S/AS01 and R21/Matrix-M vaccines are used in recommended childhood immunization programs in some endemic settings, alongside other preventive measures.

MAO Inhibitor

A medicine that slows breakdown of certain brain chemicals and is used for selected depression or Parkinson disease. It can interact dangerously with other medicines and some foods, so it requires careful prescribing and instructions.

Measles-Rubella Vaccine

A combined live attenuated vaccine containing measles and rubella antigens without the mumps component, widely used in countries where mumps is not a significant public health burden, including India's Universal Immunization Schedule.

Measles Vaccine

Measles vaccine is a live attenuated vaccine that induces active immunity against measles virus. It is usually given as part of the measles-mumps-rubella (MMR) or measles-mumps-rubella-varicella (MMRV) vaccine.

Medication

A substance or biological product used to prevent, diagnose, treat, or control a disease or symptom. Medicines may be prescribed, bought without a prescription, applied to the body, inhaled, swallowed, or given by injection.

Medication Adherence

The extent to which a patient's medication-taking behavior corresponds with the agreed treatment plan. Adherence is influenced by understanding, adverse effects, cost, access, regimen complexity, beliefs, and cognitive or social factors.

Medication Adverse-Effect Profile

The clinically relevant pattern of predictable pharmacologic effects and harmful reactions associated with a medication. It includes common dose-related effects, serious rare events, organ-specific toxicity, interactions, and monitoring requirements.

Medication Cascade

A prescribing sequence in which an adverse drug effect is misinterpreted as a new medical condition and another drug is prescribed to treat it. Recognizing cascades is an important goal of medication reconciliation and deprescribing.

Medication Deprescribing

A planned, supervised process of reducing the dose or stopping a medicine when its current or future harms outweigh its benefits or when treatment goals change. Tapering may be required to prevent withdrawal or rebound disease.

Medication Error

A preventable event that may cause or lead to inappropriate medication use or patient harm while the medication is in the control of a healthcare professional, patient, or consumer. Errors can occur during prescribing, transcribing, dispensing, administration, or monitoring.

Medication Management

The systematic process of optimizing pharmacotherapy to achieve therapeutic goals while minimizing

adverse effects, encompassing prescribing, dispensing, administration, monitoring, and deprescribing.

Medication Overuse Headaches

Frequent headaches caused or worsened by regular overuse of headache medicines.

Alternate Names:

Rebound Headache

Medication Reconciliation

A structured process of obtaining and comparing the most accurate medication list with current prescriptions at transitions of care. It identifies omissions, duplications, incorrect doses, interactions, and unintended changes.

Medication Review

Systematic examination of all medications for appropriateness. Components: indication, efficacy, safety, adherence, interactions. Tools: Beers Criteria, STOPP/START. Goals: deprescribing, optimizing therapy, reducing adverse effects.

Medication Safety

Practices that reduce medication errors and prevent avoidable harm during prescribing, dispensing, administration, and use.

Medication Side Effects

Unintended harmful responses to medications occurring at standard doses, ranging from mild (nausea, rash, dry mouth) to severe (anaphylaxis, Stevens-Johnson syndrome, QT prolongation, hepatotoxicity).

Meningococcal Vaccine

Conjugate vaccine (MenACWY) and serogroup B vaccine (MenB) given at 11-12 years with booster at 16 years. Protects against *Neisseria meningitidis*, causing meningitis and septicemia. MenACWY booster at 16 years covers the high-risk period for serogroup C and Y disease.

Mineralocorticoid Receptor Antagonist

A medicine that blocks aldosterone, a hormone that

makes the body retain salt and water. It is used for selected heart failure, high blood pressure, and hormone disorders but can raise blood potassium and worsen kidney problems.

MMR Vaccine

A live attenuated vaccine against measles, mumps, and rubella. It is given according to the immunization schedule and is generally avoided during pregnancy and in people with certain severe immune deficiencies.

Molecular Medicine

Molecular medicine applies molecular and cellular biology to understand, diagnose, prevent, and treat disease. It includes genomics, precision oncology, molecular biomarkers, targeted therapy, and other mechanism-based approaches.

Monoamine Oxidase Inhibitor

A medicine that blocks monoamine oxidase, an enzyme that breaks down certain brain chemicals. It can treat selected depression or neurologic disorders but has important interactions with other medicines and some foods.

MRNA Vaccine

A vaccine that gives cells temporary instructions to make a harmless piece of a germ. The immune system learns to recognize that piece and respond later; the messenger RNA does not enter the cell nucleus or change DNA.

Multi-Drug Resistance

Multidrug resistance is resistance of a microorganism, cancer, or other disease process to multiple drugs that would otherwise be active. Mechanisms include target changes, drug inactivation, reduced uptake, efflux, and altered repair or survival pathways.

Multidrug-Resistant Extensively Drug-Resistant TB

Multidrug-resistant tuberculosis is resistant to key first-line drugs, while extensively drug-resistant TB has additional resistance that greatly limits options.

Diagnosis requires molecular or culture testing, and treatment uses prolonged individualized combinations with public-health oversight.

Neuropathy Secondary To Drugs

Drug-induced neuropathy is peripheral nerve damage caused by a medicine or toxin, often producing numbness, burning pain, weakness, or altered reflexes; management may require dose reduction, withdrawal, and treatment of symptoms.

Nonsteroidal Anti-Inflammatory Drug

A medicine that inhibits cyclooxygenase enzymes and reduces prostaglandin production, producing analgesic, anti-inflammatory, and fever-reducing effects. NSAIDs can cause gastrointestinal, kidney, cardiovascular, or other adverse effects.

NSAIDs

Nonsteroidal anti-inflammatory drugs are a class of drugs that inhibit cyclooxygenase enzymes, COX-1 and COX-2, reducing the synthesis of prostaglandins and thromboxanes from arachidonic acid. They produce analgesic, anti-inflammatory, antipyretic, and antiplatelet effects.

Occupational Medicine

The medical specialty concerned with the effects of work on health, prevention of work-related illness and injury, and safe return to work.

Opioid Analgesics

Strong pain medicines that act on opioid receptors in the brain, spinal cord, and other tissues. They can relieve severe pain but may cause sleepiness, constipation, dependence, and dangerously slow breathing or overdose.

Opioid Antagonist

A medicine that blocks opioid receptors and can reverse opioid effects such as respiratory depression. Naloxone is a commonly used example.

Oral Hypoglycemic

A medicine taken by mouth to lower blood glucose,

used mainly in type 2 diabetes. Different medicines improve insulin sensitivity, increase insulin release, slow glucose absorption, or increase glucose loss in urine; choice depends on the patient's risks and kidney function.

Oral Medicine

Specialty diagnosing oral mucosal diseases, dental causes of facial pain, oral manifestations of systemic disease.

Oral Polio Vaccine

A live attenuated poliovirus vaccine administered by mouth. Its formulation and use depend on the public-health program and circulating poliovirus strains; it has played an important role in polio control.

Orphan Drug

A pharmaceutical agent developed specifically to treat a rare medical condition (affecting fewer than 200,000 people in the United States, as defined by the Orphan Drug Act of 1983).

Over-The-Counter Drug

A medication that can be purchased without a prescription, deemed safe and effective for self-medication when used according to label instructions. OTC drugs have established safety profiles, low toxicity, and clear dosing guidelines suitable for consumer use.

Over-The-Counter (OTC) Drug

A medicine sold without a prescription for uses and doses described on its label. "Over the counter" does not mean risk-free; incorrect use, interactions, or excessive doses can still cause serious harm.

P2Y₁₂ Inhibitor

An antiplatelet drug that blocks the platelet P2Y₁₂ ADP receptor, reducing activation and aggregation. Clopidogrel, prasugrel, and ticagrelor are used in selected acute coronary syndrome and percutaneous coronary intervention settings, with bleeding and drug-specific contraindications considered.

Palifermin

A laboratory-made form of a natural growth factor that helps mouth and throat lining cells repair themselves. It is used in selected people receiving intensive treatment before blood-forming stem-cell transplantation to reduce severe mouth sores.

Palonosetron

A long-acting anti-nausea medicine that blocks serotonin signals involved in vomiting. It is used to prevent nausea and vomiting from chemotherapy or surgery; headache, constipation, and rare heart-rhythm changes can occur.

Parasympatholytic

A medicine that blocks some signals of the parasympathetic nervous system. It may widen the airways, relax the bladder, reduce motion sickness, or speed a slow heartbeat, but can cause dry mouth, blurred vision, constipation, urinary retention, or confusion.

Parasympathomimetic

A drug that mimics or enhances parasympathetic (cholinergic) activity. Direct agonists: muscarinic (pilocarpine—glaucoma, dry mouth) and nicotinic agonists.

Paroxetine

Paroxetine is a selective serotonin-reuptake inhibitor used for depression, anxiety disorders, obsessive-compulsive disorder, PTSD, and some other conditions; sexual dysfunction, withdrawal symptoms, serotonin syndrome, and pregnancy-related risks require consideration.

Pediatric Nuclear Medicine

Special considerations for children: lower doses, sedation often needed, distraction techniques. Dose reduction: weight-based activity, optimized protocols.

Pefloxacin

A fluoroquinolone antibiotic that blocks bacterial enzymes needed to copy and repair DNA. Its use is limited by resistance and potentially serious effects involving tendons, nerves, the heart, and the

nervous system.

PEG

An abbreviation that may refer to polyethylene glycol, a laxative that draws water into stool, or to a polyethylene-glycol chemical group used to modify medicines. The exact meaning depends on the clinical context.

Pegaspargase

A long-acting enzyme medicine used in combination treatment for some acute lymphoblastic leukemias. It lowers asparagine needed by leukemia cells; allergic reactions, pancreatitis, liver injury, clotting problems, and bleeding are important risks.

Pegfilgrastim

A long-acting growth factor that stimulates the bone marrow to make neutrophils. It helps prevent infection caused by chemotherapy-related low white-cell counts; bone pain and rare spleen rupture or serious inflammation can occur.

Penicillamine

A medicine that binds certain metals and can also reduce immune activity. It is used selectively for copper overload and some autoimmune or connective-tissue disorders; serious blood, kidney, skin, or allergic reactions can occur.

Pentavalent Vaccine

A WHO-prequalified five-in-one combination vaccine containing Diphtheria toxoid, Tetanus toxoid, whole-cell Pertussis antigen, Hepatitis B (HBsAg), and Haemophilus influenzae type b (Hib) conjugate, administered as a single intramuscular injection.

Pentobarbital

A barbiturate medicine that depresses brain activity and can cause sedation or control seizures. It has a high risk of slowed breathing, coma, dependence, and fatal overdose, especially with alcohol or other sedatives.

Perioperative Antibiotic Prophylaxis

Administration of an appropriate antimicrobial within a defined interval before incision to reduce infection risk for selected procedures. Choice, timing, redosing, and discontinuation depend on procedure, organisms, patient factors, and local guidance.

Pertussis Vaccine

A vaccine containing selected antigens from *Bordetella pertussis*, given in combination vaccines to prevent whooping cough and reduce severe disease and transmission.

Pharmaceutical

Relating to medicines, including their development, preparation, manufacture, testing, storage, or use.

Pharmacodynamic Interaction

A drug interaction in which one drug changes the effect of another at its site of action without necessarily changing its concentration. Effects may be additive, synergistic, or antagonistic, such as combined respiratory depression or bleeding risk.

Pharmacokinetic Interaction

A drug interaction that changes absorption, distribution, metabolism, or excretion of another drug, thereby altering its concentration over time. Enzyme inhibition, enzyme induction, transporter effects, and altered gastric pH are common mechanisms.

Phosphodiesterase Inhibitor

A medicine that blocks enzymes which normally break down chemical signals inside cells. Different types relax airways or blood vessels, improve heart pumping, or treat erectile dysfunction; effects and risks depend on the specific type.

Pneumococcal Conjugate Vaccine

A vaccine that joins parts of the pneumococcus bacterium to a carrier protein so the immune system can build lasting protection. It helps prevent pneumonia, meningitis, bloodstream infection, and other disease; product and schedule depend on age and risk.

Pneumococcal Vaccine

A vaccine that protects against selected serotypes of *Streptococcus pneumoniae* (pneumococcus), which can cause pneumonia, meningitis, bloodstream infection, sinusitis, and otitis media. Available products include pneumococcal conjugate vaccines and pneumococcal polysaccharide vaccine; the product and schedule depend on age, previous doses, and medical risk.

Poliovirus Vaccine

A vaccine that trains the immune system to prevent poliovirus infection and paralysis. Inactivated injectable and live oral forms are used in different programs; the schedule and product depend on age, health, and local public-health guidance.

Prazosin

An alpha-1 blocker that relaxes blood vessels and may relax the bladder outlet. It is used for high blood pressure and, in selected patients, trauma-related nightmares or urinary symptoms; dizziness and fainting are most likely after starting or increasing the dose.

Pre-Medication

Medicine given before a procedure, treatment, or exposure to prevent a predictable problem such as pain, nausea, allergy, infection, or anxiety.

Prescription Drug

A medication whose dispensing or use is subject to prescription requirements under the applicable law. It requires professional oversight because of its risks, complexity, or need for monitoring; regulatory approval and prescribing rules vary by country and product.

Procalcitonin-Guided Antibiotic Therapy

Use of blood procalcitonin measurements, together with examination and other tests, to help decide whether to start or stop antibiotics in selected infections. The result cannot by itself confirm bacterial infection or safely replace clinical judgment.

Prostaglandin Antagonist

A drug that blocks a prostaglandin receptor or pathway, reducing selected prostaglandin-mediated effects such as inflammation, pain, uterine contraction, or gastric secretion.

Protease Inhibitor

An antiviral medicine that blocks a virus enzyme needed to cut newly made proteins into working parts. In HIV treatment, it prevents formation of mature infectious virus and is used with other medicines.

Proton Pump Inhibitor

A medicine that strongly reduces stomach-acid production by blocking the acid pump in stomach cells. It treats reflux and ulcers; long-term or unnecessary use can cause diarrhea, infections, low magnesium, or vitamin deficiencies.

Psychotropic Drug

A medicine that affects brain function and may change mood, thinking, behavior, sleep, or perception. The term includes antidepressants, antipsychotics, mood stabilizers, stimulants, and some medicines for anxiety or sleep.

Psychotropic Medication

A medicine that changes brain activity and may affect mood, thoughts, behaviour, sleep, or perception. Examples include antidepressants, antipsychotics, mood stabilizers, and some medicines for anxiety or attention disorders.

Rabies Vaccine

A vaccine containing inactivated rabies virus used for preexposure protection or postexposure prophylaxis after a possible rabies exposure, together with wound care and immune globulin when indicated.

Rehabilitation Medicine

The medical specialty that helps people restore or adapt movement, communication, thinking, work, and daily activities after illness or injury. It is also called physiatry.

Alternate Names:

physiatry.

Renal Drug Excretion

Removal of medicines from the body by the kidneys into urine. Kidney disease can slow this process, allowing some medicines to build up and requiring dose changes or closer monitoring.

Renin Inhibitor

A blood-pressure medicine that blocks renin, an enzyme involved in narrowing blood vessels and retaining salt. It lowers blood pressure but can raise potassium, affect kidney function, and harm a developing fetus.

Resistance Antibiotic (Antibiotic Resistance)

Alternate index label for Antibiotic Resistance.

Rock (Drug)

A street term commonly used for crack cocaine, a smokeable form of cocaine. It produces intense, short-lived stimulation but can cause dependence, dangerous heart rhythms, heart attack, stroke, seizures, overheating, or severe agitation.

Scabicide

A medicine applied to the skin or taken by mouth to kill scabies mites. Treatment usually includes all close household or sexual contacts and washing or isolating recently used clothing and bedding to prevent reinfection.

Selective Serotonin Reuptake Inhibitor

A medicine that increases serotonin signalling between nerve cells by slowing serotonin reuptake. It treats depression and several anxiety-related disorders; nausea, sexual difficulties, withdrawal symptoms, and rarely serotonin toxicity can occur.

SGLT2 Inhibitor

A medicine that makes the kidneys pass more glucose and salt into the urine. It lowers blood sugar and can protect the heart and kidneys in selected

people, but may cause dehydration, genital infections, or rarely ketoacidosis.

Skeletal Muscle Relaxant

A medicine that reduces excessive contraction of skeletal muscles. It may relieve short-term muscle spasm or longer-term spasticity, but sleepiness, weakness, dizziness, and impaired breathing can occur with some drugs.

Sleep Drug

A medicine used to help a person fall asleep, stay asleep, or maintain a regular sleep pattern. Benefits and risks vary widely; drowsiness, falls, impaired thinking, dependence, and interactions with alcohol or sedatives are important concerns.

Steroid

A group of chemicals with a characteristic structure. In medicine, steroids include corticosteroids that reduce inflammation and natural or replacement hormones such as cortisol, estrogen, progesterone, and testosterone.

Steroid Abuse

Steroid misuse is non-prescribed or excessive use of corticosteroids or anabolic-androgenic steroids, which can cause endocrine suppression, psychiatric effects, infection, metabolic disease, liver injury, cardiovascular harm, or tissue damage.

Steroid Hormones

Lipid-soluble hormones derived from cholesterol, including cortisol, aldosterone, estrogen, progesterone, and testosterone.

Steroid Injections - Tendon, Bursa, Joint

Injection of a corticosteroid, often with local anesthetic, into or around a joint, bursa, or tendon sheath to reduce inflammation and pain; injections directly into tendons are generally avoided because of rupture risk.

Tamsulosin

Tamsulosin is a selective alpha-1A blocker that re-

laxes prostate and bladder-neck smooth muscle to improve urinary symptoms of benign prostatic hyperplasia; dizziness, postural hypotension, and ejaculatory dysfunction may occur.

TCAs

Tricyclic antidepressants are medicines that increase the effects of certain brain chemicals. They can treat depression, nerve pain, and some other conditions but may cause sleepiness, dry mouth, constipation, low blood pressure, abnormal heart rhythms, or overdose toxicity.

Tdap Vaccine

Tetanus, Diphtheria, and acellular Pertussis booster given at 11-12 years and during each pregnancy (27-36 weeks gestation). Replaces one dose of Td. Important for pertussis protection, particularly for protecting newborns through maternal antibody transfer. Also given to adolescents and adults to maintain tetanus and diphtheria immunity.

Terazosin

An alpha-blocking medicine that relaxes the prostate and blood vessels. It can improve urine flow in prostate enlargement and lower blood pressure, but dizziness or fainting may occur, especially after the first dose or dose increases.

Therapeutic Drug Levels

The range of medicine concentrations in blood associated with benefit while limiting toxicity for a particular drug. A measured level must be interpreted with the dose, timing, symptoms, kidney or liver function, and the person's response.

Thrombolytic

A medicine that helps dissolve a blood clot by changing plasminogen into plasmin, which breaks down fibrin. It may be used urgently for selected strokes, heart attacks, or other life-threatening clots when benefits outweigh bleeding risk.

Thrombolytic Drugs For Heart Attack

Medicines that dissolve a clot blocking a coronary artery during selected heart attacks. They can

restore blood flow when urgent artery-opening procedures are unavailable or delayed, but may cause dangerous bleeding and are not suitable for everyone.

Transfusion Medicine

The medical specialty that selects, prepares, tests, and gives blood or blood components such as red cells, platelets, plasma, and cryoprecipitate. It includes matching, preventing transfusion reactions, and monitoring patients.

Travel Medicine

Medical care concerned with prevention and treatment of health problems related to travel.

Tricyclic Antidepressant Overdose

Poisoning with a tricyclic antidepressant can cause drowsiness, confusion, dry mouth, seizures, low blood pressure, and dangerous heart rhythms. It is an emergency requiring immediate poison-control or hospital treatment.

Tumor Necrosis Factor Inhibitor

A biological medicine that blocks tumor-necrosis factor, an immune signal involved in inflammation. It treats selected arthritis, psoriasis, and bowel diseases but can increase serious infection risk, so screening and monitoring are important.

Tyrosine Kinase Inhibitor

A targeted medicine that blocks enzymes carrying growth signals inside cells. It can slow cancers driven by abnormal signaling, but side effects vary and may include diarrhea, skin changes, liver injury, high blood pressure, or heart problems.

Uricosuric Agent

A medicine that increases renal excretion of uric acid, lowering serum urate in selected patients with gout. Adequate kidney function and hydration are important, and urinary uric-acid stones may be a concern.

Urine Drug Screen

A preliminary urine test that looks for selected medicines or recreational drugs and their breakdown products. Results can be falsely positive or negative and may need confirmation with a more specific laboratory test.

Uterotonic

A medicine that makes the uterus contract. It is used under medical supervision to start or strengthen labor, prevent or treat heavy bleeding after birth, or complete selected pregnancy-related procedures; excessive contraction can harm the mother or fetus.

Vaccine Adjuvant

A substance added to some vaccines to enhance and prolong the immune response to the antigen. Examples include aluminum salts and newer adjuvant systems.

Vaccine Therapy

Treatment that uses a vaccine to stimulate an immune response against a disease. It may prevent infection or, in selected cancer treatments, help the immune system recognize abnormal cells; its benefits depend on the specific vaccine and condition.

Varicella Vaccine

A live attenuated vaccine that prevents or reduces the severity of chickenpox. The number and timing of doses depend on age, vaccination history, immune status, pregnancy, and local recommendations. It is generally avoided during pregnancy and in people with certain immune deficiencies.

Xanthine Oxidase Inhibitor

A medicine that lowers uric-acid production by blocking an enzyme involved in breaking down substances from cells and food. It is used mainly to prevent gout attacks and, in selected cases, complications from rapid cancer-cell breakdown.

Brand Medicines

Medical Prefix

Prefix	Meaning	Example of use in medical terms
Ab-	A medical prefix meaning away from, off, or separating from,	abduction (movement away from the midline) and ablation (removal or destruction of tissue)
Acou-	A medical combining form referring to hearing or sound,	acoustic nerve, audiology, and acoumeter
Acro-	Acro- is a medical word element meaning extremity, tip, or highest part,	acromegaly and acrocyanosis
Acu-	A combining form meaning sharp, pointed, or related to acuity; in medical terms it may refer to sharp sensation or vision,	acuity, acute, or acupuncture, depending on the word formed
Ad-	A medical prefix meaning toward, to, or near,	adduction (movement toward the midline) and adrenal (near the kidney)
Aden- Adeno-	A combining form meaning gland or glandular tissue, A combining form referring to a gland or glandular tissue,	adenitis and adenoma adenovirus, adenoid, and adenocarcinoma
Aer-, Aero-	A combining form meaning air or gas,	aerobic, aerosol, and aerophagia
Alb- Amyl-	A prefix derived from the Latin albus, meaning white, A combining form referring to starch or a starch-like substance,	albino and albinism amylase and amyloid
Amylo-	A combining form referring to starch-like material or amyloid protein deposits	amyloidosis and amyloidoma
An-	A prefix meaning without, lacking, or not,	anoxia, anesthesia, and anencephaly
Aniso-	A combining form meaning unequal or unequal in size, number, or degree	anisocytosis and anisometropia
Antero-	A combining form meaning anterior or toward the front	anteroposterior and anterolateral
Anti-	A prefix meaning against, opposed to, or preventing a specified process or condition	antibiotic and anticoagulant
Arthro- Bi-	A combining form meaning joint A prefix meaning two, twice, or involving two sides or components	arthritis and arthroscopy bilateral and bicuspid

Prefix	Meaning	Example of use in medical terms
Bio-	A combining form meaning life or living organisms	biochemistry and biopsy
Brachy-	A combining form meaning short or abnormally short	brachycephaly and brachydactyly
Cephal-	A combining form meaning head	cephalic and cephalalgia
Cholangi-	A combining form meaning bile duct or bile vessel	cholangitis and cholangiography
Circum-	A combining form meaning around or surrounding	circumcision and circumoral
Colpo-	A combining form meaning vagina	colposcopy and colpotomy
Cranio-	A combining form meaning skull or cranium	craniotomy and craniostomosis
Cyto-	A combining form meaning cell	cytology and cytotoxic
Dacryo-	A combining form meaning tear or tear duct	dacryocystitis and dacryostenosis
Dactyl-, -Dactyl	A combining form or suffix meaning finger or toe	polydactyly and brachydactyly
Dextro-	A combining form meaning right, toward the right, or sometimes clockwise	dextrocardia and dextroposition
Di-	A combining form meaning two, twice, or double	diplopia and diplegia
Dia-	A combining form with meanings including through, across, apart, or complete, depending on the word	dialysis and diagnosis
Disto-	A combining form meaning distal, distant, or away from a point of attachment or origin	distal and distobuccal
Dys-	A prefix meaning abnormal, difficult, painful, or impaired,	dysphagia (difficulty swallowing) and dysuria (painful urination)
Entero-	A combining form meaning intestine or bowel,	enteropathy and enteroscopy
Epi-	A prefix meaning on, upon, over, or above,	epidermis and epigastric
Extra-	A clinical condition or finding involving extra-. Its defining features, causes, evaluation, and management depend on the clinical context	extraocular and extracellular
Gyne-	A combining form meaning woman or female,	gynecology
Haem- / Haema- / Haemato- / Haemo-	Prefixes derived from the Greek word haima (blood), used in medical terminology to denote blood-related conditions and procedures	hematology, hematoma, and hemoglobin
(Prefixes Relating To Blood)		
Hemi-	A prefix meaning half or one side,	hemiplegia and hemithorax
Hepat-	A combining form meaning liver,	hepatic and hepatocellular
Hepato-	A combining form meaning liver,	hepatobiliary and hepatomegaly
Hetero-	A prefix meaning different, other, or unequal,	heterozygous and heterogeneous
Histo-	A combining form meaning tissue,	histology and histopathology
Homo-	A prefix meaning same or alike,	homozygous and homologous
Hyper-	A prefix meaning excessive, above normal, or increased,	hyperglycemia and hypertension
Hypo-	A prefix meaning below, deficient, reduced, or less than normal,	hypoglycemia and hypothermia

Prefix	Meaning	Example of use in medical terms
Iatr-	A combining form meaning medical treatment or physician,	iatrogenic and iatrogeny
Infra-	A medical term referring to infra-. Its precise meaning and clinical importance depend on the context in which it is used	infrapatellar and infraorbital
Intra-	Intra- is an anatomical structure, tissue relationship, physiologic process, or body function; its location and mechanism explain its clinical significance	intraocular and intravenous
Iso-	A prefix meaning equal, same, or uniform,	isotonic and isometric
Juxta-	A prefix meaning next to, beside, or adjoining,	juxtaglomerular
Kerato-	A combining form relating to the cornea or to horny or keratinized tissue,	keratitis and keratosis
Leuk-	A combining form meaning white, especially in terms relating to white blood cells,	leukocyte
Leuko-	A combining form meaning white,	leukoderma or leukopenia
Levo-	A prefix meaning left or turning toward the left, often used in chemistry or to describe spatial orientation	levocardia and levodopa
Lieno-	A combining form meaning relating to the spleen	lienorenal and lienectomy
Lipo-	A combining form meaning relating to fat or lipids	lipoma and lipoprotein
Litho-	A combining form meaning stone,	lithotripsy and nephrolithiasis
Macro- (Prefix)	A prefix meaning large, abnormally large, or on a large scale,	macrocytic, meaning involving abnormally large cells
Medical Prefix	A prefix used in medical terminology to modify a word's meaning	hyper- (above or excessive), hypo- (below or deficient), macro- (large), and micro- (small)
Mega-	A combining form meaning large, great, or abnormally enlarged	megacolon and megakaryocyte
Mega- (Prefix)	A prefix derived from Greek meaning large, great, or abnormally enlarged,	megacolon, megacardia, and megaloccephaly
Melan- (Prefix)	A combining form meaning dark or black, derived from the Greek melas; it refers especially to melanin or dark pigmentation,	melanoma and melanocyte
Mes-	A combining form meaning middle	mesencephalon and mesoderm
Meso-	A combining form meaning middle	mesothelioma and mesocolon
Mi-	A combining form meaning small or relating to muscle, depending on the word in which it appears	micturition and miosis
Micro-	A combining form meaning small or millionth, depending on context	microscopy and microcephaly
Myc-	A combining form meaning fungus or pertaining to fungi, derived from the Greek mykes	mycosis and mycology
Myco-	The term Myco- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	mycosis and mycology
Myel-	A combining form relating to bone marrow or the spinal cord, depending on the word	myelitis and myelopathy

Prefix	Meaning	Example of use in medical terms
Myo- (Prefix)	A medical term referring to myo- (prefix). Its clinical meaning depends on the context in which it is used	myopathy and myocarditis
Naso-	The term Naso- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	nasogastric and nasopharyngeal
Neo- (Prefix)	Neo- is a prefix meaning new or recently formed	neoplasm and neonatal
Nephro-	The term Nephro- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	nephritis and nephrectomy
Oligo-	A combining form meaning few, scanty, or deficient	oliguria and oligospermia
Oligo- (Prefix)	Oligo- is a prefix meaning few, scanty, or small in number or amount	oliguria and oligospermia
Onco-	A combining form relating to tumors or cancer	oncology and oncogenesis
Onycho-	A combining form relating to the nail	onychomycosis and onycholysis
Onycho- (Prefix)	Onycho- is a prefix meaning relating to a nail or claw	onychomycosis and onycholysis
Ortho- (Prefix)	Ortho- is a prefix meaning straight, correct, upright, or related to orthopedic care depending on the term	orthopedics and orthostatic
Osteo- (Prefix)	Osteo- is a prefix meaning relating to bone	osteomyelitis and osteoporosis
Ot-	The term Ot- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	otitis and otalgia
Oto-	The term Oto- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	otology and otoscope
Oxy	Oxy- is a prefix relating to oxygen, sharpness, or acidity depending on the medical or chemical term	oxygen and oxyhemoglobin
Pachy- (Prefix)	A word-forming prefix meaning thick or thickness,	pachyonychia, pachyderma, and pachycephaly
Para	Para- is a prefix meaning beside, beyond, abnormal, or related to childbirth depending on the word; its exact meaning must be read in context	parathyroid and paranasal
Para-	A combining form meaning beside, beyond, abnormal, or closely related, depending on the word	paracentesis and paraesthesia
Para- (Prefix)	Para- is a medical prefix whose meaning varies by use, including beside, beyond, abnormal, or the number of births reaching a specified gestational age	parathyroid and parity in obstetric history
Patho-	The term Patho- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	pathology and pathogenesis
Peri-	The term Peri- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	pericardium and periosteum
Phago-	The term Phago- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	phagocytosis and phagocyte
Phlebo- (Prefix)	Phlebo- is a medical prefix meaning relating to a vein,	phlebitis, phlebectomy, or phlebography

Prefix	Meaning	Example of use in medical terms
Pneumo-	The term Pneumo- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	pneumothorax and pneumonia
Poly-	A combining form meaning many or much	polyuria and polyneuropathy
Post	Post- is a prefix meaning after,	post-operative, postpartum, or postprandial
Post-	A combining form meaning after or behind	postnatal and postprandial
Pre-	A combining form meaning before or in front of	prenatal and preoperative
Prefix	A prefix is a word element placed before a root to modify meaning; medical prefixes commonly indicate location, number, time, direction, or abnormality	hyper-, hypo-, peri-, and brady-
Prefixes, Medical	Word beginnings that modify medical terms by indicating location, number, time, speed, size, direction, deficiency, excess, or other meaning,	hyper-, hypo-, peri-, and brady-
Pro-	A combining form meaning before, forward, or in favor of	prolactin and prognosis
Pseudo-	A combining form meaning false or resembling but not truly	pseudocyst and pseudarthrosis
Retro-	A combining form meaning backward, behind, or posterior	retroperitoneal and retrosternal
Salpingo-	A combining form relating to a fallopian tube	salpingitis and salpingectomy
Sarco-	A combining form meaning flesh or soft tissue	sarcoma and sarcoidosis
Schizo-	A combining form relating to splitting or schizophrenia	schizophrenia and schizoid
Scler-	The term Scler- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	sclerosis and scleritis
Sclero-	The term Sclero- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	scleroderma and sclerotherapy
Sub-	A combining form meaning under, below, or less than normal	subcutaneous and subdural
Super-	A combining form meaning above, excessive, or superior	superinfection and supernumerary
Supra-	A combining form meaning above or beyond	suprarenal and suprapubic
Syn-	A combining form meaning together, with, or joined	syndactyly and synovitis
Teno-	A combining form relating to a tendon	tenosynovitis and tenodesis
Thermo-	A combining form relating to heat or temperature	thermoregulation and thermotherapy
Toc- (Prefix)	Toc- is a prefix used in some medical terms and often relates to childbirth or labor,	tocolysis; the complete word determines its meaning
Toco-	The term Toco- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	tocography and tocolysis
Toko- (Prefix)	Toko- is a prefix relating to childbirth or labor, derived from Greek terms for birth	tocolysis and tokodynamometry
Tom-	The term Tom- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	tomography and tomodensitometry

Prefix	Meaning	Example of use in medical terms
Tomo-	The term Tomo- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	tomography and tomographic
Trans- (Prefix)	The term Trans- (prefix) is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	transdermal and transcatheter
Trich- (Prefix)	The term Trich- (prefix) is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	trichiasis and trichology
Tricho-	A combining form relating to hair	trichoscopy and trichotillomania
Tricho- (Prefix)	The term Tricho- (prefix) is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	trichorrhexis and trichomycosis
Tympano-	The term Tympano- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	tympanoplasty and tympanometry
Xanth- (Prefix)	Xanth- is a medical word element meaning yellow or yellowish,	xanthoma, xanthelasma, and xanthopsia
Xen- (Prefix)	A medical word element meaning foreign, strange, or originating outside the usual organism or system,	xenograft (a tissue transplanted between different species)
Xeno- (Prefix)	Xeno- is a medical word element meaning foreign, strange, or from another species,	xenograft and xenotransplantation
Xero-	Xero- is a medical word element meaning dry or dryness,	xeroderma, xerophthalmia, and xerostomia

Complete reference tables

These categorized tables reproduce the prefix reference structure from the Pressbooks resource cited below. Examples are retained as learning aids; the meaning of a word part can vary by term.

Prefix	Meaning	Example of use in medical terms
Common prefixes		
A-, An-	Without; lacking	Anemia
Andr/o-	Male	Androgen
Anti-	Against	Anticholinergic drugs
Auto-	Self	Autocrine
Bio-	Life	Biology
Chem/o-	Chemistry	Chemotherapy
Contra-	Against	Contraception
Cyt/o-	Cell	Cytokine
Dis-	Separation; taking apart	Dissection
Dys-	Difficult; abnormal	Dyspnea
Eu-	Good; well	Eupnea
Fibr/o-	Fiber	Fibrosis
Gluco-, Glyco-	Glucose; sugar	Glycogen

Prefix	Meaning	Example of use in medical terms
Gyn/o-, Gynec-	Female	Gynecology
Hydr/o-	Water	Hydrocephalus
Idio-	Self; one's own	Idiopathic
Lyso-, Lys-	Break down; destruction; dissolving	Lysosome
Mal-	Bad; abnormal	Malignant
Myc/o-	Fungus	Mycetoma
Necr/o-	Death	Necrosis
Neo-	New	Neonate
Oxy-	Sharp; acute; oxygen	Oxytocin
Pan-, Pant/o-	All or everywhere	Pancytopenia
Pharmaco-	Drug; medicine	Pharmacist
Re-	Again; backward	Rejuvenation
Somat/o-, Somatico-	Body; bodily	Somatic cell
Body-part prefixes		
Acous/o-	Hearing	Acoustic meatus
Aden/o-	Gland	Adenoid
Adip/o-	Fat	Adipocyte
Adren/o-	Gland	Adrenal cortex
Angi/o-	Blood vessel	Angioplasty
Arteri/o-	Artery	Arteriole
Arthr/o-	Joint	Arthroplasty
Bucc/o-	Cheek	Buccal cavity
Bronch/i-	Bronchus	Bronchioles
Burs/o-	Bursa	Bursa
Carcin/o-	Cancer	Basal cell carcinoma
Cardi/o-	Heart	Cardiology
Cephal/o-	Head	Cephalic flexure
Chol-	Bile	Cholesterol
Chondri-	Cartilage	Chondrosarcoma
Coron-	Heart	Coronary arteries
Cost-	Rib	Costal cartilage
Crani/o-	Brain	Cranium
Cutane-	Skin	Cutaneous
Cyst/o-, Cysti-	Bladder or sac	Cystoscopy
Derm-, Dermat/o-	Skin	Dermatologist
Duoden/o-	Duodenum	Duodenitis
Gastr-	Stomach	Gastrectomy
Gloss-	Tongue	Glossectomy
Hem-, Hema-, Hemat-, Hemo-, Hemat/o-	Blood	Hematopoiesis
Hepat/o-, Hepatico-	Liver	Hepatic portal system
Hist/o-, Histio-	Tissue	Histology
Hyster/o-	Uterus	Hysterectomy
Ileo-	Ileum	Ileostomy
Ischi/o-	Ischium	Ischial tuberosity
Kerat/o-	Cornea (eye or skin)	Keratin
Lacrim/o-	Tear	Lacrimal fluid
Lact/o-, Lacti-	Milk	Lactose
Laryng/o-	Larynx	Laryngitis
Lingu/o-	Tongue	Lingual tonsil

Prefix	Meaning	Example of use in medical terms
Lip/o-	Fat	Lipolysis
Lymph/o-	Lymph	Lymphocyte
Mamm-, Mast/o-	Breast	Mammary glands
Mening/o-	Meninges	Meningitis
Muscul/o-	Muscle	Musculoskeletal
My/o-	Muscle	Myocardium
Myel/o-	Spinal cord or bone marrow	Myelin
Nephr/o-	Kidney	Nephron
Neur/i-, Neur/o-	Nerve	Neuron
Oculo-	Eye	Oculomotor nerve
Onco-	Tumor; bulk; volume	Oncogene
Onych/o-	Fingernail; toenail	Onychodystrophy
Oo-	Egg; ovary	Oocyte
Oophor/o-	Ovary	Oophorectomy
Op-, Opt-	Vision	Optic nerve
Ophthalm/o-	Eye	Ophthalmic artery
Orchid/o-, Orchio-	Testis	Orchidectomy
Orth/o-	Straight; normal; correct	Orthostatic
Osseo-	Bony	Osseous tissue
Ossi-	Bone	Ossicles
Ost-, Oste/o-	Bone	Osteoporosis
Ot/o-	Ear	Otolaryngologist
Ovar/i-, Ovario-, Ovi-, Ovo-	Ovary	Ovarian follicle
Phalang-	Phalanx	Phalanges
Pharyng/o-	Pharynx; throat	Pharyngeal tonsil
Phleb/o-	Vein	Phlebotomist
Phren/i-, Phreno-, Phrenico-	Diaphragm	Phrenic nerve
Pleur-, Pleur/a-, Pleur/o-	Rib; pleura	Pleural cavity
Pneum/a-, Pneumat/o-	Air; lung	Pneumonia
Proct/o-	Anus; rectum	Proctoscopy
Prostat-	Prostate	Prostatectomy
Pseudo-	False	Pseudostratified
Psych/o-, Psyche-	Mind	Psychiatrist
Radio-	Radiation; radius	Radioisotopes
Ren/o-	Kidney	Renal cortex
Retin-	Retina	Retinitis pigmentosa
Rhin/o-	Nose	Rhinoscope
Salping/o-	Tube	Salpingo-oophorectomy
Sarco-	Muscular; flesh-like	Sarcomere
Schiz/o-	Split; cleft	Schizophrenia
Sclera-, Sclero-	Hardness	Sclerosis
Sigmoid/o-	Sigmoid colon	Sigmoidoscopy
Sperma-, Sperm-, Spermato-	Sperm	Spermatocyte
Splen/o-	Spleen	Splenomegaly
Sten/o-	Narrowed; blocked	Stenosis
Stern-	Sternum	Sternoclavicular joint

Prefix	Meaning	Example of use in medical terms
Stom/a-, Stomat/o-	Mouth	Stomatitis
Thorac/o-, Thoracico-	Chest	Thoracic cavity
Thromb/o-	Blood clot	Thrombolytic
Thyr/o-	Thyroid gland	Thyroiditis
Trache/o-	Trachea	Trachealis
Tympan/o-	Eardrum	Tympanic membrane
Ur/o-	Urine	Urologist
Vagin-	Vagina	Vaginal
Varic/o-	Duct; blood vessel	Varicose veins
Vasculo-	Blood vessel	Vasculitis
Ven/o-	Vein	Venae cavae
Vertbr-	Vertebra; spine	Vertebral column
Color prefixes		
Chlor/o-	Green	Chlorophyll
Chrom-, Chromato-	Color	Chromosome
Cyano-	Blue	Cyanosis
Erythr/o-	Red	Erythrocyte
Leuk/o-	White	Leukocyte
Melan/o-	Black	Melanin
Physical property and shape prefixes		
Cry/o-	Cold	Cryotherapy
Elect-	Electrical activity	Electrocardiogram
Kin/o-, Kine-, Kinesi/o-	Movement	Kinetic energy
Kyphy/o-	Humped	Kyphosis
Rhabd/o-	Rod-shaped; striated	Rhabdomyosarcoma
Phot/o-	Light	Photoreceptor
Reticul/o-	Net	Reticulocytes
Scoli/o-	Twisted	Scoliosis
Therm/o-	Heat	Thermotherapy
Direction and position prefixes		
Ab-, Abs-	Away from	Abductor
Ad-	Towards	Adductor
Ante-	Before; forward	Antenatal
Circum-	Around	Circumcision
Cycl-	Circle; cycle	Cyclic neutropenia
De-	Away from; ending	Dehydration
Dia-	Across; through	Diagnosis
Ect/o-, Exo-	Outer; outside	Exocrine gland
End/o-, Ent-, Enter/o-	Within; inner	Endocrine gland
Epi-	Upon; outside of	Epidermis
Ex-, Extra-	Beyond	Expiration
Infra-	Beneath; below	Infratemporal fossa
Inter-	Between	Interstitial fluid
Intra-	Within	Intracellular fluid
Meso-	Middle	Mesoderm
Meta-	Beyond; change	Metabolism
Para-	Alongside; abnormal	Parathyroid glands

Prefix	Meaning	Example of use in medical terms
Path/o-	Disease	Pathologist
Peri-	Around	Pericardium
Post-	Behind; after	Postpartum
Pre-	Before; in front	Precancerous
Retro-	Backward; behind	Retroperitoneum
Sub-	Under	Subcutaneous layer
Super-	Above	Superior
Supra-	Above; upon	Supraglottis
Sy-, Syl-, Sym-, Syn-, Sys-	Together	Syndrome
Trans-	Across; through	Transdermal
Quantity prefixes		
Bi-	Two	Biceps
Brady-	Slow	Bradycardia
Diplo-	Double	Diploid
Hemi-	Half	Hemihypertrophy
Hetero-	Other; different	Heterogeneous
Homo-	Same	Homozygous genotype
Hyper-	Above; beyond; excessive	Hypertension
Hypo-	Under; deficient	Hypotension
Iso-	Equal; like	Isointense
Macro-	Large; long; big	Macrophage
Mic-, Micro-	Small	Microglia
Mon-, Mono-	One	Monocyte
Olig/o-	Few; little	Oliguria
Poly-	Many; excessive	Polyuria
Quadri-	Four	Quadriceps
Semi-	Half	Semilunar valves
Tachy-	Fast	Tachycardia
Tetra-	Four	Tetralogy of Fallot
Tri-	Three	Triceps
Uni-	One	Unicellular

Medical Suffixes

Suffix	Meaning	Example of use in medical terms
-Stomy	A suffix meaning surgical creation of an opening,	colostomy or gastrostomy
-Tomy	A suffix meaning incision or cutting into	laparotomy or tracheotomy
Cidal	A suffix meaning killing or destroying,	bactericidal or fungicidal
Cide	A suffix meaning an agent or process that kills,	pesticide, bactericide, or homicide
Cyte	A suffix meaning cell,	erythrocyte or leukocyte
Cytosis	A suffix or term indicating a condition involving cells or, in some contexts, an increase in the number of a particular type of cell	leukocytosis or erythrocytosis
Dactyl-, -Dactyl	A combining form or suffix meaning finger or toe	polydactyly or brachydactyly
Ectomy	A suffix meaning surgical removal or excision,	appendectomy or mastectomy
Emia	A suffix meaning a condition of the blood or a substance present in the blood,	anemia or bacteremia
Iatrics	A suffix or word element referring to medical treatment or a medical specialty,	geriatrics and pediatrics
Iatry	A suffix meaning medical treatment or a medical specialty,	psychiatry and podiatry
Itis	A suffix meaning inflammation,	dermatitis, bronchitis, and arthritis
Kalemia	A suffix or term referring to the concentration of potassium in the blood,	hypokalemia or hyperkalemia
MAB	Abbreviation for monoclonal antibody; the suffix -mab in a generic drug name indicates a monoclonal antibody,	adalimumab or rituximab
Oma	-oma is a suffix commonly indicating a tumor or mass, although some words ending in -oma describe non-neoplastic conditions	lipoma or carcinoma
Pathy	A suffix meaning disease, disorder, or abnormality,	neuropathy, cardiomyopathy, and nephropathy
Plegia	-plegia is a suffix meaning paralysis,	paraplegia, hemiplegia, or quadriplegia

Complete reference tables

Suffix	Meaning	Example of use in medical terms
Common suffixes		
-ac	Pertaining to	Cardiac
-blast, -blasto, -blastic	Bud; germ	Myeloblast
-cyte, -cytic	Cell	Thrombocyte
-dynia	Pain; swelling	Thoracodynia
-eal, -ial	Pertaining to	Esophageal
-ectasis	Expansion; dilation	Atelectasis
-emia	Blood condition	Anemia
-ia	Condition	Hemophilia
-iasis	Condition; formation of	Psoriasis
-ism	Condition	Hypothyroidism
-ites, -itis	Inflammation	Arthritis
-ity	Pertaining to	Immunity
-ium	Structure or tissue	Epithelium
-lysis, -lytic	Breakdown; destruction; dissolving	Osteolytic
-malacia	Softening	Osteomalacia
-megaly	Enlargement	Acromegaly
-oid	Resembling	Arachnoid trabeculae
-oma	Tumor	Angiosarcoma
-osis	Condition; usually abnormal	Endometriosis
-ous	Pertaining to	Aqueous
-pathy	Disease	Lymphadenopathy
-penia	Deficiency; lack of	Thrombocytopenia
-phagia, -phagy	Eating; swallowing	Dysphagia
-phasia	Speech	Aphasia
-plasia, -plastic	Growth	Hyperplasia
-plegia	Paralysis	Hemiplegia
-pnea	Breathing	Sleep apnea
-poiesis	Production	Hemopoiesis
-ptosis	Falling; drooping	Apoptosis
-rrhage, -rrhagic	Bleeding	Hemorrhage
-rrhea	Flow or discharge	Diarrhea
-sclerosis	Hardening	Arteriosclerosis
-sis	Condition	Agranulocytosis
-stasis	Level; unchanging	Homeostasis
-trophy	Growth	Hypertrophy
-uria	In the urine	Anuria
Procedure suffixes		
-centesis	Surgical puncture to remove fluid	Thoracentesis
-desis	Surgical binding	Pleurodesis
-ectomy	Cut out; removal	Mastectomy
-gram	Record; picture	Electrocardiogram
-graph	Instrument used to create a record or picture	Electrocardiograph
-graphy	To record or take a picture	Echocardiography
-meter	Device used for measuring	Sphygmomanometer
-opsy	Visual examination	Biopsy

Suffix	Meaning	Example of use in medical terms
-ostomy	Opening	Colostomy
-otomy	Incision	Laparotomy
-pexy	Surgical fixation	Oophoropexy
-plasty	Surgical reconstruction	Vertebroplasty
-scope	For examining	Endoscope
-scopy	Examine	Endoscopy

Alternate Names

Primary term	Alternate names
ACE	angiotensin-converting enzyme
ACE Inhibitor	angiotensin-converting enzyme inhibitor
Acquired Immunodeficiency Syndrome	AIDS
Adenosine Triphosphate	ATP
AIDS	acquired immunodeficiency syndrome
Alcoholism	alcohol dependence: A chronic
Alimentary Canal	gastrointestinal
AMD	age-related macular degeneration
Angiotensin-Converting Enzyme	ACE
Angiotensin-Converting Enzyme Inhibitor	ACE
Amyloid Precursor Protein	APP
ARB	angiotensin II receptor blockers
ATP	adenosine triphosphate
AV Node	atrioventricular node
Balloon Dilation	Balloon dilatation
BMD	bone mineral density
BMI	body-mass index
BPH	benign prostatic hyperplasia
CABG	coronary artery bypass graft
CBC	complete blood count
	mdash
CCU	coronary care unit
Cerebral Hemorrhage	hemorrhagic stroke
CFS	chronic fatigue syndrome
CK	creatine kinase
COX-2 Inhibitors	cyclooxygenase-2 inhibitors
CPAP	continuous positive airway pressure
CPR	cardiopulmonary resuscitation
CRP	C-reactive protein
DNA	deoxyribonucleic acid
DNR	do-not-resuscitate order
DRI	dietary reference intake
EBCT	electron-beam computed tomography
ECG	electrocardiogram
ED	erectile dysfunction

Primary term	Alternate names
EEG	electroencephalogram
EKG	electrocardiogram
EMG	electromyography
	mdash
FSH	follicle-stimulating hormone
GERD	gastroesophageal reflux disease
GFR	glomerular filtration rate
Gingiva	gums: a form of oral tissue that covers the roots of teeth and surrounding bone
GnRH	gonadotropin-releasing hormone
HbA1C	hemoglobin A1c
HDL	high-density lipoprotein
HEPA Filter	high-efficiency particulate air
HIV	human immunodeficiency virus
HLA	human leukocyte antigen
HPA	hypothalamic-pituitary-adrenal axis
Human Immunodeficiency Virus	HIV
IBD	inflammatory bowel disease
ICD	implantable cardioverter defibrillator
IgE	immunoglobulin E
IU	international unit
LDL	low-density lipoprotein
LH	luteinizing hormone
LVAD	left-ventricular assist device
MAOIs	monoamine oxidase inhibitors
METs	metabolic equivalents
MHC Molecule	major histocompatibility complex molecule
Mitral Valve Prolapse	Barlow's Syndrome; Barlow Syndrome (Mitral Valve Prolapse)
MRI	magnetic resonance imaging—a scan that creates detailed pictures of internal organs
MUSE	medicated urethral system for erection
NK	natural killer cells
NMDA Receptor	N-methyl-D-aspartame receptor
NO	nitric oxide
NSAID	nonsteroidal anti-inflammatory drug
PAD	peripheral artery disease
PCOS	polycystic ovary syndrome
PDE5 Inhibitors	phosphodiesterase type 5 inhibitors
PET Scan	positron emission tomography
PSA	prostate-specific antigen
PTCA	percutaneous transluminal coronary angioplasty
PTSD	post-traumatic stress disorder
RAST	radioallergosorbent test
RCT	randomized controlled trial
RDA	recommended dietary allowance
REM	rapid eye movement
RLS	restless legs syndrome
SAD	seasonal affective disorder
SERMs	selective estrogen receptor modulators
SSRIs	selective serotonin reuptake inhibitors

Primary term	Alternate names
Steroids	corticosteroids
T Cell	mdash T lymphocyte
TDD	telecommunications device for the deaf
TENS	mdash transcutaneous electrical nerve stimulation
TIA	mdash transient ischemic attack
tPA	tissue plasminogen activator
TSH	thyroid-stimulating hormone
VLDL	very-low-density lipoprotein
VSD	ventricular septal defect
ABO Blood Group System	mdash ABO Blood Group; ABO Blood Groups; ABO Blood Types; ABO System
Absolute Neutrophil Count	ANC
Aarskog-Scott syndrome	Aarskog Syndrome
Banti Syndrome	Banti disease; Banti's syndrome
Barber itch	Barber's itch
Glycated Hemoglobin (A1C)	A1C; A1C test; Hemoglobin A1C; HbA1C

British and US Medical Terms

This table lists common differences between United States and British medical terminology. Some terms are used in both countries, and local hospitals may use additional variations.

United States term	British term
Acetaminophen	Paracetamol
Anemia	Anaemia
Anesthesia	Anaesthesia
Anesthetic	Anaesthetic
Apnea	Apnoea
Behavior	Behaviour
Cesarean section	Caesarean section
Celiac disease	Coeliac disease
Color	Colour
Diarrhea	Diarrhoea
Edema	Oedema
Epinephrine	Adrenaline
Esophagus	Oesophagus
Fetal	Foetal
Fetus	Foetus
Gynecology	Gynaecology
Hemoglobin	Haemoglobin
Hemolysis	Haemolysis
Hemorrhage	Haemorrhage
Labor	Labour
Leukocyte	Leucocyte
Maneuver	Manoeuvre
Orthopedics	Orthopaedics
Pediatric	Paediatric
Pediatrician	Paediatrician
Practice (verb)	Practise (verb)
Sulfur	Sulphur
Tumor	Tumour

Common vocabulary differences

United States term	British term
Pap test or Pap smear	Cervical smear test

United States term	British term
Emergency department (ED)	Accident and emergency department (A&E)
Emergency room (ER)	Accident and emergency department (A&E)
Family physician	General practitioner (GP)
Operating room (OR)	Operating theatre
Primary care physician (PCP)	General practitioner (GP)
Skilled nursing facility	Nursing home
Urgent care center	Walk-in centre or minor injuries unit, depending on the service

Common Medical Abbreviations

Abbreviation	Full form
ABG	Arterial blood gas
ACE	Angiotensin-converting enzyme
ACE inhibitor	Angiotensin-converting enzyme inhibitor
ACL	Anterior cruciate ligament
ACS	Acute coronary syndrome
ADHD	Attention-deficit/hyperactivity disorder
ADL	Activity of daily living
AED	Automated external defibrillator
AFib	Atrial fibrillation
AIDS	Acquired immunodeficiency syndrome
AKI	Acute kidney injury
ALP	Alkaline phosphatase
ALT	Alanine aminotransferase
AMI	Acute myocardial infarction
ALS	Amyotrophic lateral sclerosis; advanced life support, depending on context
ANC	Absolute neutrophil count
ANA	Antinuclear antibody
ANP	Atrial natriuretic peptide
APGAR	Appearance, pulse, grimace, activity, and respiration
ARDS	Acute respiratory distress syndrome
AST	Aspartate aminotransferase
ATN	Acute tubular necrosis
AV	Atrioventricular
AVM	Arteriovenous malformation
AVN	Atrioventricular node
BID	Twice a day; prescription shorthand that should be avoided when possible
BP	Blood pressure
BMI	Body mass index
BMR	Basal metabolic rate
BPH	Benign prostatic hyperplasia
BRCA	Breast cancer susceptibility gene; commonly referring to the BRCA1 or BRCA2 gene
BUN	Blood urea nitrogen
CABG	Coronary artery bypass graft
CA	Cancer antigen or calcium, depending on context
CA-125	Cancer antigen 125

Abbreviation	Full form
CAD	Coronary artery disease
CAT	Computed tomography; an older term for computerized axial tomography
CBC	Complete blood count
CBT	Cognitive behavioural therapy
CDC	Centers for Disease Control and Prevention
CEA	Carcinoembryonic antigen
CHF	Congestive heart failure
CHD	Congenital heart disease
CIN	Cervical intraepithelial neoplasia
CJD	Creutzfeldt–Jakob disease
CK	Creatine kinase
CMV	Cytomegalovirus
CNS	Central nervous system
COPD	Chronic obstructive pulmonary disease
CPAP	Continuous positive airway pressure
CPK	Creatine phosphokinase; an older name for creatine kinase
CPR	Cardiopulmonary resuscitation
CRF	Chronic renal failure; chronic kidney disease is preferred in current usage
CRP	C-reactive protein
CSF	Cerebrospinal fluid
CT	Computed tomography
CVS	Chorionic villus sampling
CVA	Cerebrovascular accident
CXR	Chest radiograph
D&C	Dilatation and curettage
DKA	Diabetic ketoacidosis
DJD	Degenerative joint disease
DM	Diabetes mellitus
DNA	Deoxyribonucleic acid
DTP	Diphtheria, tetanus, and pertussis
DVT	Deep-vein thrombosis
DX	Diagnosis
ECG	Electrocardiogram
EKG	Electrocardiogram
ECHO	Echocardiogram
EEG	Electroencephalogram
eGFR	Estimated glomerular filtration rate
EMG	Electromyography
ENT	Ear, nose, and throat
ERCP	Endoscopic retrograde cholangiopancreatography
ESR	Erythrocyte sedimentation rate
ESRD	End-stage renal disease
FBC	Full blood count
FEV1	Forced expiratory volume in the first second
FSH	Follicle-stimulating hormone
GABHS	Group A beta-haemolytic streptococcus
GERD	Gastroesophageal reflux disease
GFR	Glomerular filtration rate
GI	Gastrointestinal
GIST	Gastrointestinal stromal tumour
GU	Genitourinary
HbA1c	Glycated haemoglobin

Abbreviation	Full form
HDL	High-density lipoprotein
HAV	Hepatitis A virus
HBV	Hepatitis B virus
HCT	Hematocrit
HCV	Hepatitis C virus
HGB	Hemoglobin
HIV	Human immunodeficiency virus
HLA	Human leukocyte antigen
HPV	Human papillomavirus
HRT	Hormone replacement therapy
HTN	Hypertension
IBD	Inflammatory bowel disease
IBS	Irritable bowel syndrome
ICD	Implantable cardioverter-defibrillator
ICU	Intensive care unit
IDDM	Insulin-dependent diabetes mellitus; type 1 diabetes mellitus is preferred in current usage
IM	Intramuscular
IU	International unit
IUD	Intrauterine device
IV	Intravenous
IVP	Intravenous pyelography or intravenous pyelogram
LDL	Low-density lipoprotein
LH	Luteinizing hormone
LFT	Liver function test
MI	Myocardial infarction
MMR	Measles, mumps, and rubella
MRI	Magnetic resonance imaging
MRSA	Methicillin-resistant <i>Staphylococcus aureus</i>
MS	Multiple sclerosis; may have other meanings depending on context
NG	Nasogastric
NIDDM	Non-insulin-dependent diabetes mellitus; type 2 diabetes mellitus is preferred in current usage
NKDA	No known drug allergies
NSAID	Nonsteroidal anti-inflammatory drug
OCD	Obsessive-compulsive disorder
PAD	Peripheral arterial disease
PAP	Papanicolaou
PCOS	Polycystic ovary syndrome
PCR	Polymerase chain reaction
PE	Pulmonary embolism
PET	Positron emission tomography
PFT	Pulmonary function test
PID	Pelvic inflammatory disease
PMS	Premenstrual syndrome
PPD	Purified protein derivative
PRN	As needed (from the Latin <i>pro re nata</i>)
PSA	Prostate-specific antigen
PT	Prothrombin time
PTCA	Percutaneous transluminal coronary angioplasty
PTH	Parathyroid hormone
PTT	Partial thromboplastin time

Abbreviation	Full form
PUD	Peptic ulcer disease
PVC	Premature ventricular contraction
QID	Four times a day; prescription shorthand that should be avoided when possible
RA	Rheumatoid arthritis; may have other meanings depending on context
RAST	Radioallergosorbent test
RBC	Red blood cell
RCT	Randomized controlled trial
REM	Rapid eye movement
RLS	Restless legs syndrome
RNA	Ribonucleic acid
RSV	Respiratory syncytial virus
Rx	Prescription or treatment, depending on context
SaO ₂	Arterial oxygen saturation
SARS-CoV-2	Severe acute respiratory syndrome coronavirus 2
SIDS	Sudden infant death syndrome
SLE	Systemic lupus erythematosus
SOB	Shortness of breath
SSRI	Selective serotonin reuptake inhibitor
STD	Sexually transmitted disease; sexually transmitted infection is preferred in current usage
STI	Sexually transmitted infection
T ₃	Triiodothyronine
T ₄	Thyroxine; commonly referring to tetraiodothyronine
TAH	Total abdominal hysterectomy
TB	Tuberculosis
TIA	Transient ischemic attack
TIBC	Total iron-binding capacity
TID	Three times a day; prescription shorthand that should be avoided when possible
TMJ	Temporomandibular joint
TORCH	Toxoplasmosis, other infections, rubella, cytomegalovirus, and herpes simplex; a group of congenital-infection evaluations
TSH	Thyroid-stimulating hormone
TURP	Transurethral resection of the prostate
URI	Upper respiratory infection
UTI	Urinary tract infection
VSD	Ventricular septal defect
WBC	White blood cell
WDWN	Well-developed, well-nourished
WNL	Within normal limits; a finding is within the expected reference range or clinical appearance
WHO	World Health Organization
XRT	Radiotherapy

A.C. A prescription abbreviation meaning “before meals,” from the Latin *ante cibum*.

ALA An abbreviation for alpha-linolenic acid, an essential omega-3 fatty acid, or aminolevulinic acid, a heme-pathway compound used topically in some photodynamic treatments; context determines the meaning.

AP An abbreviation commonly meaning anteroposterior, or directed from front to back; in some contexts it may have another medical expansion.

ATM An abbreviation that may mean the temporomandibular joint or ataxia-telangiectasia mutated, a protein kinase involved in DNA-damage repair; context determines the meaning.

-
- BF** Physician's shorthand for Black female; demographic abbreviations should be used cautiously and replaced with precise, patient-preferred language when possible.
- BPD** An abbreviation commonly meaning bronchopulmonary dysplasia, chronic lung disease after premature birth; it can also mean borderline personality disorder in psychiatric contexts.
- CA** A medical abbreviation that may mean cancer, carcinoma, or calcium; the intended meaning depends on the surrounding clinical context.
- CKD** Abbreviation for Chronic Kidney Disease: a progressive loss of kidney function over months to years, defined by a glomerular filtration rate (GFR) less than 60 mL/min/1.73m² or markers of kidney damage (albuminuria, haematuria, structural abnormalities) persisting for at least 3 months.
- CLA** An abbreviation that commonly means conjugated linoleic acid, a group of fatty-acid isomers; in other medical contexts it may have a different expansion.
- CTG** Abbreviation for cardiotocography; continuous electronic monitoring of fetal heart rate and uterine contractions during labour.
- CVA** An abbreviation for cerebrovascular accident, meaning a stroke caused by interruption of blood flow to the brain or bleeding within the brain. It may cause sudden neurologic deficits.
- CVS** An abbreviation that may mean cardiovascular system or chorionic-villus sampling, a prenatal diagnostic procedure; context determines the meaning.
- DDAVP** The abbreviation for desmopressin, a synthetic vasopressin-like medicine used for some bleeding disorders, central diabetes insipidus, and nighttime urination.
- DES** An abbreviation that may mean diethylstilbestrol, a synthetic estrogen, or drug-eluting stent; diethylstilbestrol exposure during pregnancy is associated with later reproductive and cancer risks.
- DHHS** The abbreviation for the U.S. Department of Health and Human Services.
- DNR** An abbreviation for do-not-resuscitate, indicating that cardiopulmonary resuscitation should not be attempted if breathing or heartbeat stops.
- DNS** An abbreviation that may mean deviated nasal septum or dextrose in normal saline; the intended expansion depends on the clinical context.
- DPT** An older abbreviation for the combined diphtheria, pertussis, and tetanus vaccine; current formulations include DTaP and Tdap.
- DT** An abbreviation that may mean delirium tremens or diphtheria–tetanus vaccine; the intended meaning depends on context.
- DTC** An abbreviation that may mean differentiated thyroid carcinoma or direct-to-consumer, such as direct-to-consumer genetic testing; the intended meaning depends on context.
- DTP** An older abbreviation for diphtheria, tetanus, and pertussis vaccine; current childhood formulations are generally called DTaP.
- DV** An abbreviation that may mean domestic violence, ductus venosus, or another context-specific term; the full expression should be specified.
- DYS** An abbreviation or word root related to dysplasia, dystonia, dyslexia, or another condition beginning with dys-; the intended meaning depends on context.
- EC** An abbreviation that may mean enteric-coated, emergency contraception, or endothelial cell; the intended meaning depends on context.
- EFT** An abbreviation whose medical meaning depends on context, such as endocrine-function testing or emotional freedom technique; the intended expansion should be specified.
- ENT** Abbreviation for ear, nose, and throat; it commonly refers to the otolaryngology specialty or an otolaryngologist.
-

EOS Commonly an abbreviation for eosinophils or an eosinophil count in laboratory reports; the intended meaning should be confirmed from the report's context.

EPA Abbreviation for eicosapentaenoic acid, an omega-3 polyunsaturated fatty acid found in oily fish and fish-oil supplements.

EPR Abbreviation for electrophrenic respiration, also called diaphragm pacing, in which electrical stimulation helps activate the diaphragm in selected patients with respiratory muscle paralysis.

EPT Abbreviation for estrogen/progestin therapy, treatment using both an estrogen and a progestin, commonly discussed in menopausal hormone therapy when the uterus is present.

ER Abbreviation for emergency room or emergency department, the hospital service that evaluates and treats urgent illness and injury.

FCC In medicine, an abbreviation for familial colorectal cancer; in other contexts it may have nonmedical meanings.

FFI Abbreviation for fatal familial insomnia, a rare inherited prion disease causing progressively severe insomnia, autonomic dysfunction, and neurologic decline.

FISH Abbreviation for fluorescence in situ hybridization, a test that uses fluorescent DNA probes to detect specific genes, chromosomes, or chromosomal rearrangements in cells.

FLAP Abbreviation for 5-lipoxygenase-activating protein, a protein encoded by *ALOX5AP* that helps produce leukotrienes involved in inflammation.

GALT Abbreviation for gut-associated lymphoid tissue, immune tissue in the gastrointestinal tract that samples intestinal contents and helps defend against pathogens.

GBV-C Abbreviation for GB virus C, also called human pegivirus, a blood-borne virus that can persist in people but is not established as a cause of chronic hepatitis.

GD In the RxList medical-dictionary context, abbreviation for Gaucher disease, an inherited lysosomal storage disorder caused by deficient glucocerebrosidase.

GI Abbreviation for gastrointestinal, relating to the digestive tract from the mouth through the anus and its associated organs.

GPO Abbreviation for group purchasing organization, an organization that combines buyers' purchasing power to negotiate prices and contracts for medicines, supplies, or services.

HAART Abbreviation for highly active antiretroviral therapy, an older term for combination antiretroviral treatment used to suppress HIV replication and preserve immune function.

HAPE Abbreviation for high-altitude pulmonary edema, a life-threatening accumulation of fluid in the lungs after rapid ascent; immediate descent and supplemental oxygen are urgent treatments.

HAV Abbreviation for hepatitis A virus, an RNA virus spread mainly by the fecal-oral route that causes acute hepatitis but usually does not cause chronic infection.

HBV Abbreviation for hepatitis B virus, a DNA virus transmitted through infected blood or body fluids that can cause acute or chronic hepatitis and cirrhosis or liver cancer.

HEPA Abbreviation for high-efficiency particulate air, describing a filter designed to remove a very high proportion of airborne particles of specified sizes from an air stream.

HGD Commonly an abbreviation for high-grade dysplasia, a marked abnormality of cell development that may be a precursor to invasive cancer but is not itself invasive cancer.

HNP Abbreviation for herniated nucleus pulposus, in which the inner material of an intervertebral disk protrudes through the outer ring and may compress a nerve root.

HPS Common medical abbreviations include hantavirus pulmonary syndrome, a severe respiratory illness, and Hermansky-Pudlak syndrome, an inherited disorder with oculocutaneous albinism and platelet-storage abnormalities; context determines the meaning.

-
- HS** Commonly an abbreviation for hereditary spherocytosis, an inherited hemolytic anemia; it can also mean half-strength, heart sounds, hamstrings, heparan sulfate, hernia sac, or house surgeon, so context is essential.
- HSA** Abbreviation that may mean a US health savings account or human serum albumin, the main plasma protein that helps maintain oncotic pressure; context determines the meaning.
- ICU** Abbreviation for intensive care unit, a hospital unit providing continuous monitoring and specialized support for critically ill patients.
- ID** A context-dependent abbreviation that may mean infectious disease, infectious diseases specialist, intellectual disability, or identification; the surrounding clinical text determines the meaning.
- IFA** Abbreviation for indirect fluorescent antibody, a laboratory method that detects antibodies or antigens using fluorescent labels, commonly in serologic testing.
- IHS** Abbreviation for the Indian Health Service, a US federal agency providing health services to American Indians and Alaska Native people and communities.
- IPT** Abbreviation for interpersonal therapy, a structured psychotherapy that focuses on relationships, grief, role transitions, and interpersonal difficulties.
- IPV** Abbreviation for inactivated polio vaccine, an injectable vaccine containing killed poliovirus and used to prevent poliomyelitis.
- IQ** Abbreviation for intelligence quotient, a standardized score from cognitive testing; it describes performance on specified tests and is not a complete measure of a person's abilities or worth.
- ITC** Abbreviation for in-the-canal, describing a hearing aid or other device positioned within the ear canal.
- ITN** Abbreviation for insecticide-treated bednet, a net treated with insecticide to reduce mosquito bites and malaria transmission.
- IVC** Commonly abbreviation for inferior vena cava, the large vein returning blood from the lower body to the heart; it can also mean intravenous cholangiogram, an X-ray study of the biliary system.
- JIP** Abbreviation for juvenile intestinal polyposis, an inherited condition in which children develop multiple hamartomatous polyps in the gastrointestinal tract and may have increased cancer risk.
- KB** In medical usage, an abbreviation for keratoderma blennorrhagicum or kilobase of DNA; lower-case *kb* is preferred for kilobase, so context is important.
- KUB** Abbreviation for kidney, ureter, and bladder, commonly referring to a plain abdominal X-ray used to assess urinary tract calculi, bowel gas patterns, or other abdominal findings.
- L** Abbreviation for liter, a metric unit of volume equal to 1,000 milliliters.
- LAVH** Abbreviation for laparoscopically assisted vaginal hysterectomy, removal of the uterus through the vagina with laparoscopic assistance.
- LL** Commonly an abbreviation for lower lid of the eye or lower limit; the intended meaning depends on the clinical context.
- LLL** Abbreviation for the left lower lobe of the lung.
- LLQ** Abbreviation for left lower quadrant, usually referring to the lower-left quarter of the abdomen.
- LMP** Abbreviation for last menstrual period, the first day of the most recent menstrual bleeding, used in estimating gestational age when the date is reliable.
- LPA** LPA abbreviates Little People of America and may also refer to the left pulmonary artery.
- LUL** Abbreviation for the left upper lobe of the lung.
- LUQ** Abbreviation for the left upper quadrant of the abdomen.
- LVF** Abbreviation for left ventricular failure, meaning failure of the left side of the heart; it may also mean left ventricular function, depending on context.
-

-
- MAOI** Abbreviation for monoamine oxidase inhibitor, a drug that inhibits monoamine oxidase and is used in selected treatment of depression and other disorders.
- MAP** Common abbreviation for *Mycobacterium avium* subspecies *paratuberculosis*, an organism of the *M. avium* complex; the abbreviation can have other meanings in different clinical contexts.
- MCD** An abbreviation with several medical meanings, including minimal change disease, mean corpuscular diameter, and medullary cystic disease; the intended meaning depends on context.
- MCP** Membrane cofactor protein, also called CD46, is a cell-surface protein that regulates complement activation and helps protect host cells from complement-mediated injury; the abbreviation can have other meanings in different contexts.
- MDI** An abbreviation that may mean metered-dose inhaler, multiple daily injections, or mental developmental index; the intended meaning depends on context.
- MEDVAC** Abbreviation for medical evacuation: the transport of ill or injured people to a medical facility or to a location providing a higher level of care.
- MI** Abbreviation for myocardial infarction, or heart attack: death of heart-muscle tissue caused by prolonged inadequate blood flow, usually from acute coronary artery blockage.
- MM** An abbreviation that may mean meningomyelocele, malignant melanoma, or multiple myeloma; in lowercase, *mm* commonly means millimeter. The intended meaning depends on context.
- MP** Abbreviation for mercaptopurine, a purine-antimetabolite drug, or for molecular pathology; the intended meaning depends on context.
- MPS** Abbreviation for mucopolysaccharidosis, a group of inherited lysosomal storage disorders caused by deficient breakdown of glycosaminoglycans.
- MSG** Abbreviation for monosodium glutamate, the sodium salt of glutamic acid used as a flavor enhancer and contributing umami taste.
- MTX** Abbreviation for methotrexate, a folate-antagonist drug used in selected cancers, autoimmune diseases, and other conditions.
- MVP** Abbreviation for mitral valve prolapse, in which one or both mitral-valve leaflets bow into the left atrium during ventricular systole; it is often mild but can sometimes cause mitral regurgitation or arrhythmias.
- MYH** MYH is a gene-family abbreviation involving myosin or DNA-repair proteins; the specific gene and variant determine the clinical meaning.
- ND** ND is a context-dependent abbreviation that may mean naturopathic doctor, neurodevelopmental, or another term; the full meaning should be specified.
- NEP** NEP is a context-dependent abbreviation that may mean neuroendocrine pancreatic tumor, nasoendotracheal procedure, or another clinical term.
- NF** NF is a context-dependent abbreviation, including neurofibromatosis, a group of genetic disorders causing nerve-sheath tumors and other features.
- NG** NG commonly means nasogastric, referring to a tube passed through the nose into the stomach, but the abbreviation has other uses.
- NS** NS is a context-dependent abbreviation, commonly normal saline, a sterile sodium-chloride solution, or not significant; the full term should be stated.
- OB** OB is an abbreviation commonly meaning obstetrics, the care of pregnancy, labor, birth, and the postpartum period, but it may have other meanings.
- OBS** OBS is a context-dependent abbreviation that may mean observation, obstetric service, or organic brain syndrome; the intended term should be written out.

-
- OCG** OCG is a context-dependent abbreviation that may refer to oral contraceptive guidance, oculocardiac testing, or another clinical term; the full term should be specified.
- OMS** An abbreviation for oral and maxillofacial surgery; the intended meaning depends on the clinical context.
- PAP** PAP is an abbreviation with context-dependent meanings, including Papanicolaou testing, pulmonary alveolar proteinosis, or prostatic acid phosphatase; the full term should be specified.
- PAS** PAS is an abbreviation that may mean periodic-acid–Schiff staining, para-aminosalicylic acid, or pulmonary-artery systolic pressure; context determines the meaning.
- PAT** PAT is a context-dependent abbreviation that may refer to paroxysmal atrial tachycardia, a rapid rhythm beginning in the atria, or another clinical term.
- PCA** PCA is a context-dependent abbreviation, commonly meaning patient-controlled analgesia, in which a patient activates prescribed doses from an infusion device.
- PCT** PCT is a context-dependent abbreviation that may mean procalcitonin, porphyria cutanea tarda, or patient-care technician; the full term should be specified.
- PDR** PDR commonly means Physicians’ Desk Reference, a drug-information reference, but the abbreviation has other uses and should be interpreted in context.
- PEP** PEP is a context-dependent abbreviation, including post-exposure prophylaxis, a preventive medicine course after a possible infection exposure.
- PHS** PHS is an abbreviation whose meaning depends on context, including public health service or primary hyperhidrosis; the full term should be specified.
- PI** PI is a context-dependent abbreviation, including principal investigator, pulmonary insufficiency, or protease inhibitor; the intended meaning must be specified.
- PLP** PLP commonly means pyridoxal 5′-phosphate, the active coenzyme form of vitamin B6 required by many enzymes, but the abbreviation has other uses.
- PMD** PMD is a context-dependent abbreviation, including Pelizaeus–Merzbacher disease, a rare inherited disorder of central myelination, or a professional medical designation.
- PON** PON is a context-dependent abbreviation that may refer to postoperative nausea, paraoxonase, or another clinical term; the full meaning should be stated.
- PTU** PTU is the abbreviation for propylthiouracil, an antithyroid medicine used selectively because of liver toxicity and other safety considerations.
- PV** PV is a context-dependent abbreviation, including polycythemia vera, plasma volume, or peripheral vision; the full term should be specified.
- PVB** PVB is a context-dependent abbreviation that may mean paravertebral block, a regional anesthetic technique, or another medical term.
- PX** PX is a context-dependent abbreviation that may mean prognosis, patient, prescription, or a genetic marker; clinical documentation should spell out the intended term.
- Q.2H** A prescription abbreviation meaning “every 2 hours.” Medication instructions should use clear wording because abbreviation misinterpretation can cause dosing errors.
- Q.3H.** A prescription abbreviation meaning “every 3 hours.” Medication instructions should use clear wording because abbreviation misinterpretation can cause dosing errors.
- Q.S.** A prescription abbreviation from the Latin “quantum sufficiat,” meaning “quantity sufficient” to make the required amount or concentration. The exact quantity must be specified by the formulation or prescription context.
- R/O** R/O is an abbreviation for rule out, indicating that a condition is being considered but has not been confirmed; clear documentation should state the actual diagnostic question.
-

RAD Acronym whose medical meaning depends on context, commonly radiation absorbed dose or right axis deviation on an ECG.

RBC RBC is the abbreviation for red blood cell, the cell that transports oxygen with hemoglobin and carries carbon dioxide back toward the lungs.

RF RF is a context-dependent abbreviation, including rheumatoid factor, radiofrequency, or risk factor; the complete term should be stated.

RLL RLL is the abbreviation for right lower lobe, usually referring to the lower lobe of the right lung.

RLQ RLQ is the abbreviation for right lower quadrant of the abdomen, containing structures including the appendix, cecum, and right adnexa.

RML RML is the abbreviation for right middle lobe, the middle lobe of the right lung.

RP RP is a context-dependent abbreviation, commonly retinitis pigmentosa, an inherited retinal degeneration causing night blindness and progressive visual-field loss.

RUQ RUQ is the abbreviation for right upper quadrant of the abdomen, containing the liver, gallbladder, duodenum, and portions of bowel and kidney.

SGOT SGOT is the former abbreviation for AST, an enzyme measured in blood that can rise with injury to liver, heart, muscle, or other tissues.

SGPT SGPT is the former abbreviation for ALT, a liver-associated enzyme that rises in many forms of hepatocellular injury.

SHP SHP is a context-dependent abbreviation that may refer to a healthcare professional, a gene or protein, or another clinical term; the full meaning should be specified.

SLV SLV is a context-dependent abbreviation that may mean single-lung ventilation, serum lithium value, or another term; the full meaning should be specified.

STD(S) Abbreviation for sexually transmitted disease(s), now often called sexually transmitted infections.

STS STS is a context-dependent abbreviation that may mean soft-tissue sarcoma, sodium thiosulfate, or another clinical term; the full term should be stated.

TMR TMR is a context-dependent abbreviation, including targeted muscle reinnervation, a surgical technique used to improve control of a prosthesis and reduce amputation pain.

TPA/TPA Abbreviation for tissue plasminogen activator.

TSD TSD is a context-dependent abbreviation that may mean total sleep deprivation, traumatic stress disorder, or another clinical term; the full term should be specified.

TSE TSE is a context-dependent abbreviation, including transmissible spongiform encephalopathy, the prion-disease group that includes Creutzfeldt-Jakob disease.

UL UL is a context-dependent abbreviation that may mean upper limit, ulnar or ulna-related, or another clinical term; the full meaning should be specified.

URG URG is a context-dependent abbreviation that may refer to urinary urgency or an urgent clinical priority; documentation should state the full term.

URTI Abbreviation for upper respiratory tract infection, commonly involving the nose, sinuses, pharynx, or larynx and often caused by viruses.

VD Abbreviation for venereal disease, an older term for a sexually transmitted infection.

WBS Abbreviation for Williams–Beuren syndrome, a genetic condition associated with characteristic facial features, developmental differences, and cardiovascular disease. In other clinical contexts, WBS may have a different meaning, so the full term should be specified.

Modern Terms

Old or obsolete term	Modern or preferred term
Acute renal failure	Acute kidney injury
Adult-onset diabetes mellitus	Type 2 diabetes mellitus
Ague	Malaria; a historical term for intermittent fever, usually associated with malaria
Apoplexy	Stroke or intracerebral haemorrhage, depending on the historical context
Arteriosclerosis obliterans	Peripheral arterial disease
Bright's disease	Glomerular kidney disease; the specific modern diagnosis should be stated when known
Chronic renal failure	Chronic kidney disease
Congestive heart failure	Heart failure
Consumption	Tuberculosis, especially pulmonary tuberculosis
Crippling arthritis	Disabling arthritis; describe the functional limitation specifically
Diabetic retinopathy, background	Mild or nonproliferative diabetic retinopathy, with severity stated
Dropsy	Oedema or fluid accumulation, with the affected site specified
Eclampsia toxemia	Preeclampsia or eclampsia, depending on the clinical condition
Essential hypertension	Primary hypertension
Fallopian tube	Uterine tube; fallopian tube remains an accepted anatomical term
Female hysteria	No single modern diagnosis; reassess using the presenting symptoms and an appropriate diagnosis
Gastric ulcer disease	Peptic ulcer disease, with the ulcer site specified
Heart attack	Myocardial infarction in formal medical usage
Herpes zoster	Shingles in common language; herpes zoster remains the preferred medical term
Hyperlipaemia	Hyperlipidaemia
Idiopathic thrombocytopenic purpura	Immune thrombocytopenia
Imbecile	Intellectual disability; the historical term is offensive and must not be used clinically
Insulin-dependent diabetes mellitus	Type 1 diabetes mellitus
Junkie's abscess	Injection-related abscess or skin and soft-tissue infection
Leprosy	Hansen disease; leprosy remains a recognized medical term, but person-first language is preferred

Old or obsolete term	Modern or preferred term
Manic depression	Bipolar disorder
Mongolism	Down syndrome; the historical term is unacceptable and must not be used
Multiple personality disorder	Dissociative identity disorder
Non-insulin-dependent diabetes mellitus	Type 2 diabetes mellitus
Old age dementia	Dementia or major neurocognitive disorder, with the cause specified when known
Palsy	Paralysis or the specific neurological disorder, depending on the context
Paralytic stroke	Stroke with paralysis; specify the neurological deficit and stroke type
Phthisis	Pulmonary tuberculosis; historically, progressive wasting disease
Senile dementia	Dementia or major neurocognitive disorder; age alone should not define the diagnosis
Senility	Cognitive impairment, dementia, or another specific diagnosis, after assessment
Spastic colon	Irritable bowel syndrome
Stomach flu	Acute gastroenteritis
Sunstroke	Heatstroke
Terminal illness	Advanced or life-limiting illness, with the diagnosis and prognosis specified
Toxemia of pregnancy	Preeclampsia or eclampsia
Venereal disease	Sexually transmitted infection
Wassermann reaction	A modern syphilis serologic test, such as a nontreponemal or treponemal test
Water on the brain	Hydrocephalus

Medical Specialties

Medical specialty	Principal area of practice
Allergy and Immunology	Allergic disease, asthma, immune deficiency, and immune-mediated disorders
Anesthesiology	Perioperative care, anesthesia, critical care, and pain medicine
Cardiology	Diseases of the heart and circulatory system
Cardiothoracic Surgery	Surgical treatment of diseases of the heart, lungs, and chest
Clinical Genetics	Diagnosis, counseling, and management of inherited and genomic disorders
Clinical Pharmacology	Effects, uses, interactions, and safe clinical use of medicines
Colon and Rectal Surgery	Surgical treatment of diseases of the colon, rectum, and anus
Critical Care Medicine	Assessment and treatment of life-threatening organ dysfunction
Dermatology	Diseases of the skin, hair, nails, and mucous membranes
Emergency Medicine	Immediate assessment and treatment of acute illness and injury
Endocrinology	Hormones, metabolism, diabetes, and endocrine glands
Family Medicine	Comprehensive continuing care for individuals and families of all ages
Forensic Medicine	Application of medical knowledge to legal and medicolegal questions
Gastroenterology	Diseases of the digestive tract, liver, gallbladder, and pancreas
General Practice	First-contact and continuing medical care across a broad range of conditions
General Surgery	Operative treatment of diseases involving multiple body systems
Geriatric Medicine	Health care of older adults, including multimorbidity and functional decline
Hematology	Blood cells, blood-forming organs, clotting, and blood disorders
Hepatology	Diseases of the liver and biliary system
Hospital Medicine	Comprehensive medical care of hospitalized adults
Infectious Disease Medicine	Diagnosis, treatment, and prevention of infections
Internal Medicine	Prevention, diagnosis, and treatment of adult medical disorders
Interventional Cardiology	Catheter-based diagnosis and treatment of cardiovascular disease
Interventional Radiology	Image-guided minimally invasive diagnosis and treatment
Medical Oncology	Systemic treatment and supportive care for cancer
Neonatology	Care of newborn infants, especially premature or critically ill infants
Nephrology	Diseases of the kidneys, fluid balance, electrolytes, and hypertension
Neurology	Diseases of the brain, spinal cord, peripheral nerves, and muscles

Medical specialty	Principal area of practice
Neurosurgery	Surgical treatment of disorders of the nervous system
Nuclear Medicine	Diagnosis and treatment using radioactive substances and molecular imaging
Obstetrics and Gynecology	Pregnancy, childbirth, and diseases of the female reproductive system
Occupational Medicine	Health, safety, and disease prevention in the workplace
Ophthalmology	Medical and surgical care of the eyes and visual system
Oral and Maxillofacial Surgery	Surgical treatment of diseases and injuries of the mouth, jaws, face, and neck
Orthopedic Surgery	Surgical and nonsurgical treatment of the musculoskeletal system
Otolaryngology–Head and Neck Surgery	Diseases and surgery of the ear, nose, throat, and head and neck
Pain Medicine	Assessment and treatment of acute, chronic, and cancer-related pain
Palliative Medicine	Relief of symptoms and support for people with serious or life-limiting illness
Pathology	Laboratory examination of tissues, cells, blood, and body fluids
Pediatric Surgery	Surgical care of infants, children, and adolescents
Pediatrics	Medical care of infants, children, and adolescents
Physical Medicine and Rehabilitation	Restoration of function and independence after illness or injury
Plastic and Reconstructive Surgery	Reconstruction, restoration, and alteration of body tissues
Preventive Medicine	Prevention of disease and promotion of health in individuals and populations
Psychiatry	Diagnosis and treatment of mental, emotional, and behavioral disorders
Public Health Medicine	Protection and improvement of population health
Pulmonary Medicine	Diseases of the lungs and respiratory system
Radiation Oncology	Use of ionizing radiation to treat cancer
Radiology	Diagnostic and image-guided evaluation of disease
Reproductive Endocrinology and Infertility	Hormonal and reproductive disorders and fertility care
Rheumatology	Autoimmune, inflammatory, and musculoskeletal disorders
Sleep Medicine	Sleep disorders and their effects on health
Sports Medicine	Prevention, diagnosis, treatment, and rehabilitation of activity-related conditions
Thoracic Surgery	Surgery of the chest, lungs, esophagus, and mediastinum
Transfusion Medicine	Collection, testing, processing, and clinical use of blood components
Trauma Surgery	Surgical management of serious and complex injuries
Urology	Diseases of the urinary tract and male reproductive system
Vascular Surgery	Surgical and endovascular treatment of blood-vessel disease

Human Organs

This reference maps individual organ headwords to related entries in the dictionary. Each headword is followed by a semicolon-separated list of related dictionary terms.

Adrenal Gland

Adrenal Gland; Addison's Disease; Cushing's Syndrome; Pheochromocytoma; Adrenaline.

Appendix

Appendix; Appendicitis; Appendectomy.

Bladder

Bladder; Cystitis; Urinary Retention; Bladder Cancer.

Brain

Brain; Brain Tumour; Stroke; Seizure; Meningitis; Cerebral Palsy; Parkinson's Disease.

Breast

Breast; Breast Cancer; Mastitis; Mammography.

Cervix

Cervix; Cervical Cancer; Cervicitis; Pap Smear.

Colon

Colon; Colitis; Constipation; Diarrhea; Colorectal Cancer; Colonoscopy.

Ear

Ear; Otitis Media; Tinnitus; Hearing Loss; Vertigo.

Esophagus

Esophagus; Dysphagia; Esophagitis; Achalasia; Gastroesophageal Reflux Disease.

Eye

Eye; Cataract; Glaucoma; Conjunctivitis; Retinal Detachment; Macular Degeneration.

Gallbladder

Gallbladder; Cholelithiasis; Cholecystitis; Bile Duct; Cholangiocarcinoma.

Heart

Heart; Heart Failure; Arrhythmia; Myocardial Infarction; Pericarditis; Congenital Heart Defect.

Kidney

Kidney; Acute Kidney Injury; Chronic Kidney Disease; Glomerulonephritis; Nephritis; Dialysis.

Liver

Liver; Hepatitis; Cirrhosis; Fatty Liver Disease; Jaundice; Portal Hypertension.

Lung

Lung; Asthma; COPD; Pneumonia; Bronchitis; Pulmonary Embolism; Pleural Effusion.

Mouth

Mouth; Dental Caries; Gingivitis; Periodontitis.

Nose

Nose; Sinusitis; Rhinitis; Nasal Polyps; Anosmia; Epistaxis.

Ovary

Ovary; Ovarian Cyst; Ovarian Cancer; Fallopian Tube; Ectopic Pregnancy.

Pancreas

Pancreas; Pancreatitis; Diabetes Mellitus; Pancreatic Cancer; Insulin.

Pituitary Gland

Pituitary Gland; Pituitary Tumor; Acromegaly; Diabetes Insipidus.

Prostate

Prostate; Benign Prostatic Hyperplasia; Prostatitis; Prostate Cancer.

Rectum

Rectum; Rectal Bleeding; Proctitis; Rectal Cancer.

Skin

Skin; Dermatitis; Eczema; Psoriasis; Cellulitis; Pressure Ulcer; Melanoma.

Small Intestine

Small Intestine; Enteritis; Celiac Disease; Malabsorption; Intestinal Obstruction.

Spinal Cord

Spinal Cord; Spinal Cord Injury; Myelitis; Spinal Stenosis; Paraplegia.

Spleen

Spleen; Splenomegaly; Splenectomy; Hypersplenism.

Stomach

Stomach; Gastritis; Peptic Ulcer Disease; Gastroesophageal Reflux Disease; Gastric Cancer.

Testis

Testis; Testicular Torsion; Testicular Cancer; Epididymis.

Thymus

Thymus; Thymoma.

Thyroid Gland

Thyroid Gland; Hyperthyroidism; Hypothyroidism; Goitre; Thyroid Cancer.

Ureter

Ureter; Ureteral Calculi; Ureteral Obstruction; Ureteritis; Ureteral Stricture.

Urethra

Urethra; Urethral Stricture; Urethritis; Urethral Obstruction.

Uterus

Uterus; Endometriosis; Fibroids; Uterine Cancer; Ectopic Pregnancy.

Vagina

Vagina; Vaginitis; Vaginal Discharge; Vaginal Cancer.

Common Diseases

Scope: This reference-oriented list organizes common human diseases by organ system and clinical domain. It is a curated, high-importance list rather than a prevalence ranking, and some diseases appear under more than one heading where they are clinically relevant to several systems. It is not an exhaustive index of every term in the dictionary. Entries named as syndromes are covered in the companion appendix, Common Syndromes; conditions conventionally classified as disorders are covered in Common Disorders; and clinical findings, lesions, congenital anomalies, and injuries are covered in their own companion appendices. Individual symptoms, signs, and laboratory findings are defined as dictionary entries rather than listed here.

Cardiovascular Diseases Hypertension; Coronary Artery Disease; Stable Angina; Unstable Angina; Myocardial Infarction; Atherosclerosis; Heart Failure; Right Heart Failure; Cardiogenic Shock; Atrial Fibrillation; Atrial Flutter; Supraventricular Tachycardia; Ventricular Tachycardia; Ventricular Fibrillation; Sinus Bradycardia; Heart Block; Cardiomyopathy; Dilated Cardiomyopathy; Hypertrophic Cardiomyopathy; Restrictive Cardiomyopathy; Myocarditis; Pericarditis; Cardiac Tamponade; Endocarditis; Rheumatic Heart Disease; Aortic Stenosis; Aortic Regurgitation; Mitral Stenosis; Mitral Regurgitation; Mitral Valve Prolapse; Tricuspid Valve Disease; Pulmonary Hypertension; Peripheral Artery Disease; Aortic Aneurysm; Aortic Dissection; Deep Vein Thrombosis; Chronic Venous Insufficiency; Varicose Veins; Thrombophlebitis; Raynaud Phenomenon; Congenital Heart Disease.

Respiratory Diseases Asthma; Acute Bronchitis; Chronic Bronchitis; Emphysema; COPD; Pneumonia; Aspiration Pneumonia; Bronchopneumonia; Tuberculosis; COVID-19; Influenza; Bronchiolitis; Bronchiectasis; Cystic Fibrosis; Interstitial Lung Disease; Idiopathic Pulmonary Fibrosis; Pneumoconiosis; Silicosis; Asbestosis; Hypersensitivity Pneumonitis; Sarcoidosis; Pulmonary Edema; Pulmonary Embolism; Pulmonary Hypertension; Respiratory Failure; Pleurisy; Empyema; Lung Abscess; Occupational Lung Disease.

Gastrointestinal Diseases Gastroesophageal Reflux Disease; Esophagitis; Barrett Esophagus; Achalasia; Esophageal Spasm; Gastritis; Peptic Ulcer Disease; Gastric Ulcer; Duodenal Ulcer; Gastroenteritis; Gastroparesis; Crohn Disease; Ulcerative Colitis; Inflammatory Bowel Disease; Celiac Disease; Lactose Intolerance; Food Intolerance; Intestinal Obstruction; Ileus; Intussusception; Volvulus; Diverticulosis; Diverticulitis; Appendicitis; Peritonitis; Hemorrhoids; Anal Fissure; Anal Fistula; Rectal Prolapse; Mesenteric Ischemia.

Liver, Gallbladder & Biliary Diseases Metabolic Dysfunction-Associated Steatotic Liver Disease (MASLD); Alcoholic Liver Disease; Hepatitis A; Hepatitis B; Hepatitis C; Hepatitis D; Hepatitis E; Autoimmune Hepatitis; Acute Liver Failure; Chronic Liver Disease; Cirrhosis; Portal Hypertension; Hepatic Encephalopathy; Hemochromatosis; Wilson Disease; Primary Biliary Cholangitis; Primary Sclerosing Cholangitis; Cholelithiasis; Cholecystitis; Cholangitis.

Pancreatic Diseases Acute Pancreatitis; Chronic Pancreatitis; Autoimmune Pancreatitis; Pancreatic Insufficiency; Pancreatic Cancer; Pancreatic Neuroendocrine Tumors.

Kidney & Urinary Diseases Acute Kidney Injury; Chronic Kidney Disease; End-Stage Kidney Disease; Glomerulonephritis; Diabetic Nephropathy; Hypertensive Nephropathy; Interstitial Nephritis; Pyelonephritis; Urinary Tract Infection; Cystitis; Urethritis; Nephrolithiasis; Hydronephrosis; Polycystic Kidney Disease; Renal Tubular Acidosis; IgA Nephropathy; Minimal Change Disease; Focal Segmental Glomerulosclerosis; Membranous Nephropathy; Vesicoureteral Reflux.

Endocrine Diseases Type 1 Diabetes Mellitus; Type 2 Diabetes Mellitus; Gestational Diabetes; Diabetes Insipidus; Diabetic Ketoacidosis; Hyperosmolar Hyperglycemic State; Hypothyroidism; Hyperthyroidism; Hashimoto Thyroiditis; Graves Disease; Thyroiditis; Goiter; Addison Disease; Cushing Disease; Primary Aldosteronism; Hypoparathyroidism; Hyperparathyroidism; Pheochromocytoma; Pituitary Adenoma; Acromegaly; Gigantism; Growth Hormone Deficiency.

Metabolic Diseases Obesity; Gout; Dyslipidemia; Hypercholesterolemia; Hypertriglyceridemia; Porphyria; Amyloidosis.

Nutritional Diseases & Deficiencies Protein-Energy Malnutrition; Marasmus; Kwashiorkor; Iron Deficiency; Iron-Deficiency Anemia; Vitamin A Deficiency; Thiamine Deficiency; Beriberi; Riboflavin Deficiency; Niacin Deficiency; Pellagra; Folate Deficiency; Vitamin B12 Deficiency; Vitamin C Deficiency; Scurvy; Vitamin D Deficiency; Rickets; Osteomalacia; Vitamin K Deficiency; Iodine Deficiency; Zinc Deficiency; Copper Deficiency; Selenium Deficiency; Magnesium Deficiency.

Neurological Diseases Tension-Type Headache; Cluster Headache; Status Epilepticus; Stroke; Ischemic Stroke; Hemorrhagic Stroke; Transient Ischemic Attack; Cerebral Aneurysm; Parkinson Disease; Alzheimer Disease; Vascular Dementia; Frontotemporal Dementia; Lewy Body Dementia; Multiple Sclerosis; Amyotrophic Lateral Sclerosis; Huntington Disease; Diabetic Neuropathy; Myasthenia Gravis; Bell Palsy; Trigeminal Neuralgia; Radiculopathy; Meningitis; Encephalitis; Hydrocephalus; Cerebral Palsy.

Musculoskeletal Diseases Osteoarthritis; Osteoporosis; Osteomalacia; Rheumatoid Arthritis; Ankylosing Spondylitis; Psoriatic Arthritis; Reactive Arthritis; Septic Arthritis; Gout; Bursitis; Tendinitis; Tendinopathy; Frozen Shoulder; Tennis Elbow; Golfer's Elbow; Cervical Spondylosis; Lumbar Spondylosis; Spinal Stenosis; Herniated Disc; Scoliosis; Kyphosis; Spondylolisthesis; Fibromyalgia; Muscular Dystrophy; Myositis; Polymyositis; Dermatomyositis.

Rheumatologic & Autoimmune Diseases Rheumatoid Arthritis; Systemic Lupus Erythematosus; Polymyalgia Rheumatica; Giant Cell Arteritis; Polyarteritis Nodosa; Granulomatosis with Polyangiitis; Microscopic Polyangiitis; Behçet Disease; Inflammatory Myopathies; Ankylosing Spondylitis; Psoriatic Arthritis; Reactive Arthritis; Relapsing Polychondritis; Adult-Onset Still Disease.

Skin, Hair & Nail Diseases Acne Vulgaris; Rosacea; Atopic Dermatitis; Contact Dermatitis; Seborrheic Dermatitis; Psoriasis; Urticaria; Angioedema; Impetigo; Cellulitis; Erysipelas; Folliculitis; Boils; Carbuncle; Ringworm; Athlete's Foot; Jock Itch; Candidiasis; Scabies; Pediculosis; Wart; Molluscum Contagiosum; Herpes Simplex; Herpes Zoster; Hidradenitis Suppurativa; Pressure Ulcers; Onychomycosis.

Eye Diseases Amblyopia; Strabismus; Cataract; Open-Angle Glaucoma; Angle-Closure Glaucoma; Conjunctivitis; Keratitis; Corneal Ulcer; Dry Eye; Uveitis; Iritis; Retinal Detachment; Diabetic Retinopathy; Hypertensive Retinopathy; Macular Degeneration; Retinitis Pigmentosa; Central Retinal Artery Occlusion; Central Retinal Vein Occlusion; Optic Neuritis; Keratoconus; Blepharitis.

Ear & Hearing Diseases Otitis Externa; Acute Otitis Media; Chronic Otitis Media; Otitis Media with Effusion; Mastoiditis; Presbycusis; Meniere Disease; Labyrinthitis; Vestibular Neuritis; Benign Paroxysmal Positional Vertigo; Otosclerosis; Cholesteatoma; Acoustic Neuroma.

Nose, Sinus & Throat Diseases Allergic Rhinitis; Nonallergic Rhinitis; Acute Sinusitis; Chronic Sinusitis; Pharyngitis; Streptococcal Pharyngitis; Tonsillitis; Peritonsillar Abscess; Laryngitis; Epiglottitis; Vocal Cord Paralysis.

Oral & Dental Diseases Dental Caries; Pulpitis; Dental Abscess; Gingivitis; Periodontitis; Pericoronitis; Aphthous Ulcer; Oral Candidiasis; Leukoplakia; Oral Lichen Planus.

Blood Diseases Iron-Deficiency Anemia; Megaloblastic Anemia; Vitamin B12 Deficiency Anemia; Folate-Deficiency Anemia; Aplastic Anemia; Hemolytic Anemia; Sick Cell Disease; Thalassemia; Hereditary Spherocytosis; Glucose-6-Phosphate Dehydrogenase Deficiency; Polycythemia Vera; Immune Thrombocytopenia; Agranulocytosis; Hemophilia A; Hemophilia B; Von Willebrand Disease; Disseminated Intravascular Coagulation (DIC); Thrombotic Thrombocytopenic Purpura (TTP).

Immune-System Diseases Primary Immunodeficiency; Severe Combined Immunodeficiency; Common Variable Immunodeficiency; Selective IgA Deficiency; AIDS (Acquired Immunodeficiency Syndrome); HIV/AIDS; Chronic Granulomatous Disease; Graft-Versus-Host Disease.

Infectious & Parasitic Diseases Common Cold; Influenza; COVID-19; Measles; Mumps; Rubella; Chickenpox; Shingles; Herpes Simplex; Infectious Mononucleosis; Cytomegalovirus Infection; Polio; Rabies; Dengue; Chikungunya; Zika; Hepatitis A; Hepatitis B; Hepatitis C; Hepatitis D; Hepatitis E; HIV; Syphilis; Gonorrhea; Chlamydia; Tuberculosis; Leprosy; Diphtheria; Pertussis; Tetanus; Typhoid Fever; Cholera; Plague; Bacterial Meningitis; Meningococemia; Scarlet Fever; Salmonellosis; Shigellosis; Campylobacteriosis; Botulism; Brucellosis; Leptospirosis; Lyme Disease; Malaria; Amebiasis; Giardiasis; Toxoplasmosis; Leishmaniasis; Trichomoniasis; Ascariasis; Hookworm; Pinworm Infection; Schistosomiasis; Taeniasis; Echinococcosis; Candidiasis; Aspergillosis; Cryptococcosis; Histoplasmosis.

Female Reproductive & Gynecological Diseases Endometriosis; Adenomyosis; Uterine Fibroids; Ovarian Torsion; Pelvic Inflammatory Disease; Vaginitis; Bacterial Vaginosis; Vulvovaginal Candidiasis; Vulvodynia; Pelvic Organ Prolapse; Female Infertility; Premature Ovarian Insufficiency.

Male Reproductive & Urological Diseases Male Infertility; Benign Prostatic Hyperplasia; Prostatitis; Epididymitis; Orchitis; Testicular Torsion; Cryptorchidism; Phimosis; Paraphimosis; Peyronie Disease; Balanitis; Hypogonadism.

Pregnancy & Postpartum Diseases Hyperemesis Gravidarum; Gestational Diabetes; Gestational Hypertension; Preeclampsia; Eclampsia; Puerperal Infection; Postpartum Endometritis; Postpartum Depression; Mastitis.

Pediatric & Neonatal Diseases Respiratory Distress Syndrome; Neonatal Sepsis; Birth Asphyxia; Necrotizing Enterocolitis; Diaper Rash; Croup; Bronchiolitis; Cerebral Palsy; Congenital Hypothyroidism; Kawasaki Disease; Rheumatic Fever; Hand-Foot-and-Mouth Disease.

Genetic & Chromosomal Diseases Cystic Fibrosis; Sickle Cell Disease; Thalassemia; Huntington Disease; Duchenne Muscular Dystrophy; Becker Muscular Dystrophy; Neurofibromatosis; Tuberous Sclerosis; Tay-Sachs Disease; Gaucher Disease; Achondroplasia; Hemochromatosis; Wilson Disease.

Cancers & Other Neoplasms Breast Cancer; Lung Cancer; Colorectal Cancer; Prostate Cancer; Cervical Cancer; Ovarian Cancer; Endometrial Cancer; Vulvar Cancer; Vaginal Cancer; Testicular Cancer; Penile Cancer; Bladder Cancer; Kidney Cancer; Thyroid Cancer; Oral Cancer; Oropharyngeal Cancer; Laryngeal Cancer; Esophageal Cancer; Stomach Cancer; Liver Cancer; Gallbladder Cancer; Pancreatic Cancer; Small-Intestinal Cancer; Anal Cancer; Melanoma; Basal-Cell Carcinoma; Squamous-Cell Carcinoma; Osteosarcoma; Ewing Sarcoma; Soft-Tissue Sarcoma; Glioma; Glioblastoma; Meningioma; Leukemia; Hodgkin Lymphoma; Non-Hodgkin Lymphoma; Multiple Myeloma; Neuroblastoma; Retinoblastoma.

Multisystem & Systemic Diseases Fibromyalgia; Sarcoidosis; Amyloidosis; Sepsis; Septic Shock.

Common Disorders

Scope: This reference-oriented list organizes human conditions conventionally classified as clinical disorders by medical specialty and organ system. In medical nomenclature, disorders represent disruptions to regular bodily structure or function (frequently functional, metabolic, neurobehavioral, or regulatory disturbances), complementing the disease classifications in Common Diseases and clinical signs in Common Syndromes. Every entity listed corresponds to a defined medical concept in the dictionary.

Mental & Behavioral Disorders Generalized Anxiety Disorder; Panic Disorder; Social Anxiety Disorder; Agoraphobia; Specific Phobia; Major Depressive Disorder; Persistent Depressive Disorder; Bipolar Disorder; Cyclothymic Disorder; Obsessive-Compulsive Disorder; Post-Traumatic Stress Disorder; Acute Stress Disorder; Attention-Deficit/Hyperactivity Disorder; Autism Spectrum Disorder; Schizophrenia; Schizoaffective Disorder; Delusional Disorder; Brief Psychotic Disorder; Eating Disorders; Alcohol Use Disorder; Opioid Use Disorder; Substance Abuse; Dissociative Identity Disorder; Depersonalization.

Personality Disorders Borderline Personality Disorder; Antisocial Personality Disorder; Narcissistic Personality Disorder; Avoidant Personality Disorder; Dependent Personality Disorder; Obsessive-Compulsive Personality Disorder; Paranoid Personality Disorder; Schizoid Personality Disorder; Schizotypal Personality Disorder; Histrionic Personality Disorder.

Eating & Nutrition Disorders Anorexia Nervosa; Bulimia Nervosa; Binge-Eating Disorder; Avoidant/Restrictive Food Intake Disorder; Pica; Rumination.

Impulse-Control & Conduct Disorders Intermittent Explosive Disorder; Kleptomania; Pyromania; Oppositional Defiant Disorder; Conduct Disorder; Trichotillomania; Excoriation Disorder.

Somatic & Related Disorders Somatic Symptom Disorder; Illness Anxiety Disorder; Conversion Disorder; Factitious Disorder.

Sleep-Wake Disorders Insomnia; Hypersomnia; Narcolepsy; Obstructive Sleep Apnea; Central Sleep Apnea; Sleepwalking; Night Terrors; Nightmare Disorder; REM Sleep Behavior Disorder; Restless Legs Syndrome; Delayed Sleep Phase.

Neurological & Movement Disorders Migraine; Cluster Headache; Tension-Type Headache; Epilepsy; Seizure Disorder; Essential Tremor; Parkinson's Disease; Dystonia; Chorea; Myoclonus; Tic Disorder; Tourette Disorder; Ataxia; Stiff-Person Syndrome.

Neurodevelopmental & Learning Disorders Intellectual Disability; Language Disorder; Stuttering; Specific Learning Disorder; Dyslexia; Developmental Coordination Disorder; Fetal Alcohol Spectrum Disorder.

Autonomic Disorders Dysautonomia; Postural Orthostatic Tachycardia Syndrome; Orthostatic Hypotension; Neurocardiogenic Syncope; Multiple System Atrophy; Autonomic Neuropathy.

Cardiovascular & Hemodynamic Disorders Heart Arrhythmia; Atrioventricular Block; Bundle Branch Block; Microvascular Angina; Cardiac Syndrome X; Orthostatic Intolerance.

Respiratory & Ventilatory Disorders Chronic Obstructive Pulmonary Disorder; Hypoventilation; Obesity Hypoventilation Syndrome; Pulmonary Fibrosis; Upper Airway Resistance Syndrome; Hyperventilation.

Digestive & Functional GI Disorders Irritable Bowel Syndrome; Functional Dyspepsia; Functional Constipation; Functional Diarrhea; Cyclic Vomiting Syndrome; Rumination; Achalasia; Diffuse Esophageal Spasm; Pelvic Floor Dysfunction; Gastroparesis.

Endocrine & Metabolic Disorders Hypothyroidism; Hyperthyroidism; Euthyroid Sick Syndrome; Hypopituitarism; Hyperprolactinemia; Adrenal Insufficiency; Cushing Syndrome; Hypoparathyroidism; Hyperparathyroidism; Polycystic Ovary Syndrome; Precocious Puberty; Delayed Puberty; Metabolic Syndrome.

Lipid & Inborn Metabolic Disorders Dyslipidemia; Hypercholesterolemia; Hypertriglyceridemia; Familial Hypercholesterolemia; Galactosemia; Phenylketonuria; Maple Syrup Urine Disease; Glycogen Storage Disease; Lysosomal Storage Disorders; Porphyria.

Electrolyte & Acid–Base Disorders Hyponatremia; Hypernatremia; Hypokalemia; Hyperkalemia; Hypocalcemia; Hypercalcemia; Hypomagnesemia; Hypermagnesemia; Hypophosphatemia; Hyperphosphatemia; Metabolic Acidosis; Metabolic Alkalosis; Respiratory Acidosis; Respiratory Alkalosis.

Bone Mineral Density Disorders Osteopenia; Osteoporosis; Osteomalacia; Renal Osteodystrophy; Fibrous Dysplasia; Paget Disease of Bone.

Musculoskeletal & Soft-Tissue Disorders Temporomandibular Joint Disorders; Rotator Cuff Tear; Rotator Cuff Injury; Herniated Disc; Degenerative Disc Disease; Myofascial Pain Syndrome; Tendinitis; Tendinopathy; Carpal Tunnel Syndrome; Cubital Tunnel Syndrome; Hypermobility Syndrome.

Blood & Coagulation Disorders Hemophilia A; Hemophilia B; Von Willebrand Disease; Thrombophilia; Glanzmann Thrombasthenia; Immune Thrombocytopenic Purpura; Aplastic Anemia; Myelodysplastic Syndrome.

Immune, Allergic & Eosinophilic Disorders Autoimmune Disease; Primary Immunodeficiency; Anaphylaxis; Angioedema; Mastocytosis; Eosinophilic Esophagitis; Eosinophilic Gastroenteritis.

Sexual Disorders Male Hypoactive Sexual Desire Disorder; Erectile Dysfunction; Premature Ejaculation; Delayed Ejaculation; Female Sexual Dysfunction; Female Orgasmic Disorder; Vaginismus; Dyspareunia; Gender Dysphoria.

Menstrual & Reproductive Disorders Dysmenorrhea; Amenorrhea; Abnormal Uterine Bleeding; Menorrhagia; Premenstrual Syndrome; Premenstrual Dysphoric Disorder; Anovulation; Premature Ovarian Insufficiency; Androgen Insensitivity Syndrome.

Urinary & Micturition Disorders Overactive Bladder; Urinary Incontinence; Stress Incontinence; Neurogenic Bladder; Urinary Retention; Bladder Outlet Obstruction.

Vision & Ocular Motility Disorders Refractive Disorder; Myopia; Hyperopia; Astigmatism; Presbyopia; Amblyopia; Strabismus; Color Vision Deficiency; Nystagmus; Dry Eye.

Hearing, Balance & Auditory Disorders Conductive Hearing Loss; Sensorineural Hearing Loss; Tinnitus; Auditory Processing Disorder; Benign Paroxysmal Positional Vertigo; Meniere Disease.

Speech, Language & Voice Disorders Language Disorder; Speech Disorder; Stuttering; Dysarthria; Apraxia; Aphasia; Voice Disorders; Dysphonia; Vocal Cord Dysfunction.

Hair, Nail & Pigmentation Disorders Alopecia; Alopecia Areata; Androgenetic Alopecia; Telogen Effluvium; Cicatricial Alopecia; Melasma; Vitiligo; Albinism.

Connective Tissue & Fascial Disorders Ehlers-Danlos Syndrome; Marfan Syndrome; Loeys-Dietz Syndrome; Mixed Connective Tissue Disease; Dupuytren Contracture; Plantar Fasciitis.

Mental Health Terms

Scope: This appendix groups commonly used mental-health terms for quick reference. It is an index, not a diagnostic or treatment guide. Preferred modern terms are used where an older or informal term may be misleading.

Foundations and assessment Acute; Affect; Chronic; Cognition; Diagnosis; Disorder; Distress; Functional Impairment; Mental Disorder; Mental Health; Mental Illness; Mood; Risk Factor; Syndrome.

Brain and nervous-system structures Amygdala; Axon; Brain; Brain Stem; Cerebellum; Cerebrum; Dendrite; Frontal Lobe; Gray Matter; Hippocampus; Hypothalamus; Limbic System; Locus Coeruleus; Myelin; Neuron; Neurotransmission; Neurotransmitter; Occipital Lobe; Parietal Lobe; Postsynaptic Membrane; Presynaptic Terminals; Receptor; Serotonin; Synapse; Temporal Lobe; Thalamus.

Common psychological and behavioral symptoms Anhedonia; Anxiety; Avolition; Cognitive Symptoms; Compulsions; Delusion; Euphoria; Obsessions; Panic Attack; Psychomotor Agitation; Psychomotor Retardation; Psychosis; Self-Harm; Stress; Trauma.

Anxiety, trauma, and obsessive-compulsive disorders Anxiety Disorders; Generalized Anxiety Disorder; Panic Disorder; Specific Phobia; Social Anxiety Disorder (Social Phobia); Separation Anxiety Disorder; Post-Traumatic Stress Disorder; Obsessive-Compulsive Disorder; Trichotillomania.

Mood disorders Bipolar Disorder; Bipolar II Disorder; Cyclothymic Disorder; Depression; Major Depressive Disorder; Major Depressive Episode; Persistent Depressive Disorder; Postpartum Depression; Seasonal Affective Disorder.

Psychotic and personality disorders Antisocial Personality Disorder; Borderline Personality Disorder; Narcissistic Personality Disorder; Personality Disorders; Brief Psychotic Disorder; Schizoaffective Disorder; Schizophrenia.

Neurodevelopmental and related conditions Conduct Disorder; Neurodevelopmental Disorders; Intellectual Disability; Neurocognitive Disorder; Functional Neurologic Disorder.

Psychiatric and psychological treatments Antidepressants; Antipsychotic Medicine; Atypical Antipsychotics; Benzodiazepine; Cognitive Behavioral Therapy; Dialectical Behavior Therapy; Electroconvulsive Therapy; Psychotherapy; Systematic Desensitization; Transcranial Magnetic Stimulation.

Care settings and professionals Community Mental-Health Treatment; Hospitalization; Psychiatry; Psychiatrist; Clinical Psychologist; Social Worker; Voluntary Psychiatric Admission.

Investigations and brain imaging Computed Tomography (CT); Electroencephalography; Functional MRI; Positron Emission Tomography; Single-Photon Emission Computed Tomography.

Suicide and safety terminology Suicidality; Suicide; Suicide Attempt; Suicidal Ideation; Suicidal Intent; Suicidal Plan; Suicide Risk Assessment.

Related scientific concepts Evidence-Based Practice; Neurosciences; Tolerance; Withdrawal.

Common Syndromes

Scope: This reference-oriented list organizes clinically significant medical syndromes by organ system and medical specialty. In medical terminology, a syndrome represents a characteristic constellation of concurrent signs, symptoms, or anatomical features that consistently occur together and point toward a common pathophysiological mechanism or etiology.

Cardiovascular Syndromes Acute Coronary Syndrome; Acute Aortic Syndrome; Sick Sinus Syndrome; Wolff–Parkinson–White Syndrome; Long QT Syndrome; Short QT Syndrome; Brugada Syndrome; Takotsubo Syndrome (Stress Cardiomyopathy); Eisenmenger Syndrome; Postural Orthostatic Tachycardia Syndrome (POTS); Postpericardiotomy Syndrome; Dressler Syndrome; Cardiac Syndrome X; Cardiorenal Syndrome.

Respiratory Syndromes Acute Respiratory Distress Syndrome (ARDS); Infant Respiratory Distress Syndrome; Obesity Hypoventilation Syndrome; Upper Airway Resistance Syndrome; Hepatopulmonary Syndrome; Acute Chest Syndrome; Kartagener Syndrome.

Gastrointestinal Syndromes Irritable Bowel Syndrome (IBS); Malabsorption Syndrome; Short Bowel Syndrome; Dumping Syndrome; Cyclic Vomiting Syndrome; Rumination Syndrome; Mallory–Weiss Syndrome; Zollinger–Ellison Syndrome; Boerhaave Syndrome; Afferent Loop Syndrome; Cannabinoid Hyperemesis Syndrome; Superior Mesenteric Artery Syndrome; Ogilvie Syndrome.

Liver & Biliary Syndromes Hepatorenal Syndrome; Hepatopulmonary Syndrome; Budd–Chiari Syndrome; Gilbert Syndrome; Crigler–Najjar Syndrome; Dubin–Johnson Syndrome; Rotor Syndrome; Reye Syndrome; Mirizzi Syndrome.

Kidney & Urinary Syndromes Nephrotic Syndrome; Nephritic Syndrome; Hemolytic Uremic Syndrome (HUS); Alport Syndrome; Fanconi Syndrome; Goodpasture Syndrome; Hepatorenal Syndrome; Nutcracker Syndrome.

Endocrine Syndromes Cushing Syndrome; Metabolic Syndrome; Syndrome of Inappropriate Antidiuretic Hormone Secretion (SIADH); Polycystic Ovary Syndrome (PCOS); Carcinoid Syndrome; Empty Sella Syndrome; Androgen Insensitivity Syndrome; Sheehan Syndrome; Nelson Syndrome; Polyglandular Autoimmune Syndromes (PAPS Type 1 and 2); Insulin Resistance Syndrome.

Neurological Syndromes Guillain–Barré Syndrome; Miller Fisher Syndrome; Lambert–Eaton Myasthenic Syndrome (LEMS); Restless Legs Syndrome; Locked-In Syndrome; Post-Concussion Syndrome; Cauda Equina Syndrome; Conus Medullaris Syndrome; Anterior Cord Syndrome; Central Cord Syndrome; Central Pain Syndrome; Alien Hand Syndrome; CADASIL Syndrome; Foix–Alajouanine Syndrome; Horner Syndrome; Tourette Syndrome; Lennox–Gastaut Syndrome; West Syndrome; Wernicke–Korsakoff Syndrome; Brown–Séquard Syndrome; Wallenberg Syndrome (Lateral Medullary Syndrome); Isaacs Syndrome.

Pain & Neuromuscular Syndromes Carpal Tunnel Syndrome; Cubital Tunnel Syndrome; Complex Regional Pain Syndrome (CRPS); Myofascial Pain Syndrome; Piriformis Syndrome; Compartment Syndrome; Thoracic Outlet Syndrome; Burning Mouth Syndrome; Tarsal Tunnel Syndrome; Greater Trochanteric Pain Syndrome.

Psychiatric & Behavioral Syndromes Serotonin Syndrome; Neuroleptic Malignant Syndrome; Capgras Syndrome; Cotard Syndrome; Münchausen Syndrome (Factitious Disorder); Korsakoff Syndrome; Amotivational Syndrome; Ekblom Syndrome (Delusional Parasitosis); Ganser Syndrome.

Rheumatologic & Autoimmune Syndromes Sjögren Syndrome; Antiphospholipid Syndrome; CREST Syndrome; Felty Syndrome; Behçet Syndrome; SAPHO Syndrome; Reactive Arthritis (formerly Reiter Syndrome); Churg–Strauss Syndrome (EGPA); Caplan Syndrome.

Hematological Syndromes Myelodysplastic Syndromes; Antiphospholipid Syndrome; Evans Syndrome; Hyperviscosity Syndrome; Tumor Lysis Syndrome; Hemophagocytic Syndrome (HLH); Acute Chest Syndrome; Thrombotic Thrombocytopenic Purpura (TTP).

Immunological Syndromes Severe Combined Immunodeficiency Syndrome; Acquired Immunodeficiency Syndrome (AIDS); Alpha-Gal Syndrome; Antisynthetase Syndrome; Capillary Leak Syndrome; Hyper-IgE Syndrome (Job Syndrome); Autoimmune Lymphoproliferative Syndrome (ALPS); Cytokine Release Syndrome (CRS); Immune Reconstitution Inflammatory Syndrome; Wiskott–Aldrich Syndrome.

Infectious & Postinfectious Syndromes Toxic Shock Syndrome (TSS); Post-COVID-19 Condition; Post-Polio Syndrome; Congenital Rubella Syndrome; Congenital Zika Syndrome; Waterhouse–Friderichsen Syndrome; Lemierre Syndrome.

Genetic & Chromosomal Syndromes Down Syndrome; Turner Syndrome; Klinefelter Syndrome; Edwards Syndrome; Patau Syndrome; DiGeorge Syndrome (22q11.2 Deletion); Fragile X Syndrome; Williams Syndrome; Prader–Willi Syndrome; Angelman Syndrome; Noonan Syndrome; Rett Syndrome; Cri-du-Chat Syndrome; Beckwith–Wiedemann Syndrome; McCune–Albright Syndrome.

Connective Tissue Syndromes Ehlers–Danlos Syndromes; Marfan Syndrome; Loeys–Dietz Syndrome; Stickler Syndrome; Joint Hypermobility Syndrome.

Pediatric Syndromes Down Syndrome; Fetal Alcohol Syndrome; Sudden Infant Death Syndrome (SIDS); Reye Syndrome; DiGeorge Syndrome; Beckwith–Wiedemann Syndrome; Nephrotic Syndrome; Hand-Foot-and-Mouth Syndrome.

Obstetric Syndromes HELLP Syndrome; Antiphospholipid Syndrome; Twin-to-Twin Transfusion Syndrome (TTTS); Amniotic Band Syndrome; Fetal Alcohol Syndrome.

Gynecological Syndromes Polycystic Ovary Syndrome; Premenstrual Syndrome (PMS); Asherman Syndrome; Genitourinary Syndrome of Menopause; Mayer–Rokitansky–Küster–Hauser (MRKH) Syndrome.

Male Reproductive Syndromes Klinefelter Syndrome; Androgen Insensitivity Syndrome; Kallmann Syndrome; Post-Vasectomy Pain Syndrome.

Cancer-Predisposition & Paraneoplastic Syndromes Lynch Syndrome (HNPCC); Li–Fraumeni Syndrome; Von Hippel–Lindau Syndrome; Multiple Endocrine Neoplasia (MEN 1 and 2); Carcinoid Syndrome; Tumor Lysis Syndrome; Superior Vena Cava Syndrome; Paraneoplastic Neurological Syndromes; Cancer Cachexia Syndrome.

Metabolic & Nutritional Syndromes Metabolic Syndrome; Refeeding Syndrome; Wernicke–Korsakoff Syndrome; Milk–Alkali Syndrome; Hungry Bone Syndrome; Fanconi–Bickel Syndrome.

Toxicological Syndromes (Toxidromes) Serotonin Syndrome; Neuroleptic Malignant Syndrome; Anticholinergic Syndrome; Cholinergic Syndrome; Sympathomimetic Syndrome; Sedative-Hypnotic Syndrome; Opioid Withdrawal Syndrome; Alcohol Withdrawal Syndrome.

Critical Care Syndromes Systemic Inflammatory Response Syndrome (SIRS); Multiple Organ Dysfunction Syndrome (MODS); Acute Respiratory Distress Syndrome (ARDS); Abdominal Compartment Syndrome; Fat Embolism Syndrome.

Sleep Syndromes Obstructive Sleep Apnea Syndrome; Central Sleep Apnea Syndromes; Restless Legs Syndrome; Kleine–Levin Syndrome; Delayed Sleep Phase Syndrome.

Eye & Cranial Nerve Syndromes Horner Syndrome; Adie Syndrome; Brown Syndrome; Duane Retraction Syndrome; Charles Bonnet Syndrome; Dry Eye Syndrome; Tolosa–Hunt Syndrome.

ENT & Otolaryngologic Syndromes Ramsay Hunt Syndrome; Eagle Syndrome; Empty Nose Syndrome; Gradenigo Syndrome; Samter Triad (Aspirin-Exacerbated Respiratory Disease).

Dermatological Syndromes Stevens–Johnson Syndrome; Toxic Epidermal Necrolysis; Staphylococcal Scalded Skin Syndrome; Sweet Syndrome; Gorlin Syndrome; Peutz–Jeghers Syndrome; DRESS Syndrome (Drug Reaction with Eosinophilia and Systemic Symptoms).

Vascular Syndromes Raynaud Syndrome; Superior Vena Cava Syndrome; Thoracic Outlet Syndrome; Subclavian Steal Syndrome; Leriche Syndrome; May–Thurner Syndrome; Nutcracker Syndrome.

Multisystem Syndromes Chronic Fatigue Syndrome (ME/CFS); Postural Orthostatic Tachycardia Syndrome (POTS); Ehlers–Danlos Syndromes; Metabolic Syndrome; Antiphospholipid Syndrome; Behcet Syndrome.

Rare Diseases

Scope: This reference-oriented list organizes clinically significant rare diseases (orphan diseases) by organ system and clinical domain. A rare disease is typically defined as one affecting fewer than 1 in 2,000 individuals (EU criteria) or fewer than 200,000 people in the United States. It highlights high-importance benchmark conditions characterized by distinct genetic, metabolic, or autoimmune etiologies.

Genetic & Chromosomal Diseases Turner Syndrome; Klinefelter Syndrome; Fragile X Syndrome; Williams Syndrome; Prader–Willi Syndrome; Angelman Syndrome; Noonan Syndrome; 22q11.2 Deletion Syndrome; Cri-du-Chat Syndrome; Hutchinson–Gilford Progeria Syndrome; Cornelia de Lange Syndrome.

Neurological & Neurogenetic Diseases Huntington Disease; Amyotrophic Lateral Sclerosis (ALS); Spinal Muscular Atrophy (SMA); Friedreich Ataxia; Ataxia–Telangiectasia; Rett Syndrome; Batten Disease (Neuronal Ceroid Lipofuscinosis); Creutzfeldt–Jakob Disease; Fatal Familial Insomnia; Progressive Supranuclear Palsy; Multiple System Atrophy; Stiff-Person Syndrome.

Neuromuscular & Peripheral Nerve Diseases Duchenne Muscular Dystrophy; Becker Muscular Dystrophy; Facioscapulohumeral Muscular Dystrophy; Limb-Girdle Muscular Dystrophies; Congenital Muscular Dystrophies; Myasthenia Gravis; Charcot–Marie–Tooth Disease; Amyloid Polyneuropathy.

Inborn Errors of Metabolism & Storage Diseases Gaucher Disease; Fabry Disease; Pompe Disease; Tay–Sachs Disease; Niemann–Pick Disease; Krabbe Disease; Metachromatic Leukodystrophy; X-Linked Adrenoleukodystrophy; Alkaptonuria; Homocystinuria; Phenylketonuria; Maple Syrup Urine Disease; Von Gierke Disease (GSD I); Mucopolysaccharidoses (Hurler, Hunter, Sanfilippo Syndromes).

Blood & Bone Marrow Diseases Hemophilia A; Hemophilia B; Paroxysmal Nocturnal Hemoglobinuria (PNH); Fanconi Anemia; Diamond–Blackfan Anemia; Pure Red Cell Aplasia; Thrombotic Thrombocytopenic Purpura (TTP); Atypical Hemolytic Uremic Syndrome; Cryoglobulinemia; Castleman Disease.

Immune, Autoinflammatory & Histiocytic Diseases Severe Combined Immunodeficiency (SCID); Common Variable Immunodeficiency; Chronic Granulomatous Disease; Wiskott–Aldrich Syndrome; Familial Mediterranean Fever; Cryopyrin-Associated Periodic Syndromes (CAPS); Hemophagocytic Lymphohistiocytosis (HLH); Histiocytosis X (Langerhans Cell Histiocytosis).

Rheumatologic & Autoimmune Diseases Systemic Sclerosis (Scleroderma); Granulomatosis with Polyangiitis; Microscopic Polyangiitis; Polyarteritis Nodosa; Behçet Disease; Takayasu Arteritis; Eosinophilic Granulomatosis with Polyangiitis (Churg–Strauss); Relapsing Polychondritis; Adult-Onset Still Disease.

Connective Tissue & Dermatological Genetic Diseases Ehlers–Danlos Syndromes (Vascular and Classic Types); Marfan Syndrome; Loeys–Dietz Syndrome; Osteogenesis Imperfecta; Pseudoxanthoma Elasticum; Epidermolysis Bullosa; Ichthyosis; Xeroderma Pigmentosum; Pemphigus Vulgaris; Bullous Pemphigoid.

Endocrine Diseases Addison Disease; Congenital Adrenal Hyperplasia; Acromegaly; Cushing Disease (Pituitary-Dependent); Hypoparathyroidism; Multiple Endocrine Neoplasia (MEN 1 and 2); Pheochromocytoma; Autoimmune Polyglandular Syndromes.

Hepatic & Biliary Diseases Wilson Disease; Alpha-1 Antitrypsin Deficiency; Primary Biliary Cholangitis; Primary Sclerosing Cholangitis; Biliary Atresia; Progressive Familial Intrahepatic Cholestasis; Caroli Disease.

Renal & Urinary Diseases Alport Syndrome; Cystinosis; Primary Hyperoxaluria; Bartter Syndrome; Gitelman Syndrome; Polycystic Kidney Disease (Autosomal Recessive Type); Medullary Cystic Kidney Disease.

Pulmonary Diseases Idiopathic Pulmonary Fibrosis; Pulmonary Arterial Hypertension; Lymphangioleiomyomatosis (LAM); Pulmonary Alveolar Proteinosis; Primary Ciliary Dyskinesia.

Cardiovascular Diseases Brugada Syndrome; Long QT Syndrome; Short QT Syndrome; Arrhythmogenic Right Ventricular Cardiomyopathy; Fibromuscular Dysplasia; Takayasu Arteritis.

Gastrointestinal Diseases Hirschsprung Disease; Achalasia; Eosinophilic Esophagitis; Short Bowel Syndrome; Hereditary Pancreatitis; Microvillus Inclusion Disease.

Eye & Visual Pathway Diseases Retinitis Pigmentosa; Stargardt Disease; Leber Hereditary Optic Neuropathy; Leber Congenital Amaurosis; Retinoblastoma; Aniridia; Best Disease.

Bone, Skeletal & Cartilage Diseases Achondroplasia; Fibrodysplasia Ossificans Progressiva (FOP); Hypophosphatasia; Osteopetrosis (Marble Bone Disease); Cleidocranial Dysplasia; Thanatophoric Dysplasia.

Rare Infectious & Prion Diseases Creutzfeldt–Jakob Disease; Variant CJD; Kuru; Whipple Disease; Progressive Multifocal Leukoencephalopathy (PML); Ebola Virus Disease; Marburg Virus Disease; Lassa Fever.

Rare Cancers & Neoplasms Malignant Mesothelioma; Gastrointestinal Stromal Tumor (GIST); Neuroendocrine Tumors; Ewing Sarcoma; Osteosarcoma; Retinoblastoma; Uveal Melanoma; Adrenocortical Carcinoma; Thymoma; Merkel Cell Carcinoma; Kaposi Sarcoma; Burkitt Lymphoma.

Multisystem & Inflammatory Diseases Erdheim–Chester Disease; POEMS Syndrome; VEXAS Syndrome; IgG4-Related Disease; Systemic Amyloidosis; Castleman Disease.

Genetic Diseases

Scope: This reference-oriented list organizes human genetic diseases by mode of inheritance, cytogenetic classification, and molecular pathophysiological mechanism. Genetic diseases result from alterations in DNA sequences, ranging from single-nucleotide variants to gross chromosomal rearrangements and non-Mendelian mechanisms, providing a focused reference complementing Common Diseases and Rare Diseases.

Autosomal Dominant Diseases Huntington Disease; Marfan Syndrome; Neurofibromatosis Type 1 (von Recklinghausen Disease); Neurofibromatosis Type 2; Familial Hypercholesterolemia; Polycystic Kidney Disease (Autosomal Dominant, ADPKD); Achondroplasia; Tuberous Sclerosis Complex; Hereditary Spherocytosis; Von Hippel–Lindau Syndrome; Li–Fraumeni Syndrome; Multiple Endocrine Neoplasia (MEN 1 and 2); Myotonic Dystrophy (Type 1 and 2); Hereditary Non-Polyposis Colorectal Cancer (Lynch Syndrome); Familial Adenomatous Polyposis (FAP); Osteogenesis Imperfecta (Type I); Ehlers–Danlos Syndrome (Hypermobile and Classic Types).

Autosomal Recessive Diseases Cystic Fibrosis; Sickle-Cell Disease; Beta-Thalassemia; Alpha-Thalassemia; Phenylketonuria (PKU); Gaucher Disease; Tay–Sachs Disease; Niemann–Pick Disease; Wilson Disease; Hereditary Hemochromatosis; Alpha-1 Antitrypsin Deficiency; Spinal Muscular Atrophy (SMA); Friedreich Ataxia; Alkaptonuria; Homocystinuria; Maple Syrup Urine Disease; Congenital Adrenal Hyperplasia; Galactosemia; Glycogen Storage Diseases (von Gierke, Pompe, Cori); Ataxia–Telangiectasia; Fanconi Anemia; Xeroderma Pigmentosum; Bloom Syndrome; Ellis–van Creveld Syndrome; Kartagener Syndrome.

X-Linked Recessive Diseases Duchenne Muscular Dystrophy; Becker Muscular Dystrophy; Hemophilia A (Factor VIII Deficiency); Hemophilia B (Factor IX Deficiency); Glucose-6-Phosphate Dehydrogenase (G6PD) Deficiency; Red-Green Color Blindness; Fragile X Syndrome; Lesch–Nyhan Syndrome; Wiskott–Aldrich Syndrome; X-Linked Agammaglobulinemia (Bruton Tyrosine Kinase Deficiency); X-Linked Adrenoleukodystrophy; Hunter Syndrome (MPS II); Fabry Disease; Menkes Disease; Alport Syndrome (X-Linked Type); Chronic Granulomatous Disease (X-Linked Form).

X-Linked Dominant Diseases Rett Syndrome (MECP2 Mutation); Incontinentia Pigmenti; X-Linked Hypophosphatemic Rickets; Aicardi Syndrome; Focal Dermal Hypoplasia (Goltz Syndrome); Fragile X-Associated Tremor/Ataxia Syndrome (FXTAS).

Y-Linked (Holandric) Conditions Y-Chromosome Infertility (AZF Deletions); SRY Gene Deletions/Mutations; Swyer Syndrome (46,XY Gonadal Dysgenesis); Retinitis Pigmentosa (Y-Linked Form); Hypertrichosis Pinnarum.

Mitochondrial (Maternal) Genetic Diseases Leber Hereditary Optic Neuropathy (LHON); Mitochondrial Encephalomyopathy, Lactic Acidosis, and Stroke-Like Episodes (MELAS); Myoclonic Epilepsy with Ragged Red Fibers (MERRF); Neuropathy, Ataxia, and Retinitis Pigmentosa (NARP); Leigh Syndrome (Subacute Necrotizing Encephalomyelopathy); Kearns–Sayre Syndrome; Pearson Syndrome; Chronic Progressive External Ophthalmoplegia (CPEO).

Chromosomal Aneuploidies (Autosomal) Trisomy 21 (Down Syndrome); Trisomy 18 (Edwards Syndrome); Trisomy 13 (Patau Syndrome); Trisomy 8 (Warkany Syndrome 2); Trisomy 9 Mosaicism.

Sex Chromosome Aneuploidies 45,X (Turner Syndrome); 47,XXY (Klinefelter Syndrome); 47,XXX (Triple X Syndrome); 47,XYY (Jacob Syndrome); 48,XXYY Syndrome; 48,XXXY Syndrome; Tetrasomy X.

Microdeletion & Microduplication Syndromes 22q11.2 Deletion Syndrome (DiGeorge Syndrome, Velocardio-facial Syndrome); 5p Deletion Syndrome (Cri-du-Chat Syndrome); 4p Deletion Syndrome (Wolf–Hirschhorn Syndrome); 7q11.23 Deletion Syndrome (Williams Syndrome); 17p11.2 Deletion Syndrome (Smith–Magenis Syndrome); 17p11.2 Duplication Syndrome (Potocki–Lupski Syndrome); 1p36 Deletion Syndrome; 15q11–q13 Deletion; Rubinstein–Taybi Syndrome.

Genomic Imprinting Disorders Prader–Willi Syndrome (Maternal Imprinting / Paternal 15q11–q13 Loss); Angelman Syndrome (Paternal Imprinting / Maternal UBE3A Loss); Beckwith–Wiedemann Syndrome (11p15.5 Alteration); Silver–Russell Syndrome; Pseudohypoparathyroidism (Albright Hereditary Osteodystrophy); Uniparental Disomy Syndromes.

Trinucleotide Repeat Expansion Diseases Huntington Disease (CAG Repeat); Fragile X Syndrome (CGG Repeat); Myotonic Dystrophy Type 1 (CTG Repeat); Friedreich Ataxia (GAA Repeat); Spinocerebellar Ataxias (SCA Types 1, 2, 3, 6, 7); Dentatorubral–Pallidoluysian Atrophy (DRPLA); Spinal and Bulbar Muscular Atrophy (Kennedy Disease).

Lysosomal Storage Diseases Gaucher Disease (Glucocerebrosidase Deficiency); Tay–Sachs Disease (Hexosaminidase A Deficiency); Niemann–Pick Disease (Types A, B, C); Fabry Disease (Alpha-Galactosidase A Deficiency); Pompe Disease (Acid Alpha-Glucosidase Deficiency); Krabbe Disease; Metachromatic Leukodystrophy; Mucopolysaccharidoses (Hurler, Scheie, Hunter, Sanfilippo, Morquio, Maroteaux–Lamy, Sly Syndromes); Fucosidosis; Sialidosis.

Connective Tissue Genetic Disorders Marfan Syndrome (FBN1 Mutation); Ehlers–Danlos Syndromes; Loeys–Dietz Syndrome; Osteogenesis Imperfecta (Brittle Bone Disease); Cutis Laxa; Stickler Syndrome; Pseudoxanthoma Elasticum; Alport Syndrome.

Hereditary Cancer Predisposition Syndromes Hereditary Breast and Ovarian Cancer Syndrome (BRCA1, BRCA2); Lynch Syndrome (MLH1, MSH2, MSH6, PMS2); Familial Adenomatous Polyposis (APC Mutation); Li–Fraumeni Syndrome (TP53 Mutation); Multiple Endocrine Neoplasia Types 1, 2A, 2B; Von Hippel–Lindau Disease; Cowden Syndrome (PTEN Hamartoma Tumor Syndrome); Peutz–Jeghers Syndrome; Nevroid Basal Cell Carcinoma Syndrome (Gorlin Syndrome); Retinoblastoma (RB1 Mutation); Wilms Tumor Predisposition (WT1).

Inherited Diseases

Classification: The first groups show the most common inheritance pattern. The later clinical categories overlap, and several conditions have rare alternate patterns or genetically heterogeneous forms.

Autosomal Dominant Achondroplasia; Autosomal Dominant Polycystic Kidney Disease (ADPKD); Familial Adenomatous Polyposis; Familial Hypercholesterolemia; Hereditary Angioedema (most forms); Huntington Disease; Marfan Syndrome; Multiple Endocrine Neoplasia; Neurofibromatosis Type 1; Neurofibromatosis Type 2; Tuberous Sclerosis Complex; Von Hippel–Lindau Disease.

Autosomal Recessive Alpha-Thalassemia; Beta-Mannosidosis; Beta-Thalassemia; Congenital Adrenal Hyperplasia; Cystic Fibrosis; Familial Mediterranean Fever; Gaucher Disease; Hemochromatosis; Phenylketonuria (PKU); Sickle-Cell Disease; Spinal Muscular Atrophy; Tay–Sachs Disease; Wilson Disease.

X-Linked Becker Muscular Dystrophy; Duchenne Muscular Dystrophy; Fragile X Syndrome; Glucose-6-Phosphate Dehydrogenase (G6PD) Deficiency; Hemophilia A; Hemophilia B; X-Linked Agammaglobulinemia.

Variable or Genetically Heterogeneous Alport Syndrome (X-linked, autosomal dominant, or autosomal recessive); Charcot–Marie–Tooth Disease (multiple inheritance patterns); Hereditary Spherocytosis (usually autosomal dominant, sometimes autosomal recessive); Retinitis Pigmentosa (autosomal dominant, autosomal recessive, X-linked, or mitochondrial); Von Willebrand Disease (usually autosomal dominant, with some autosomal recessive forms).

Mitochondrial MELAS; MERRF; Leber Hereditary Optic Neuropathy (LHON).

Inherited Metabolic Disorders Maple Syrup Urine Disease; Galactosemia; Homocystinuria; Glycogen Storage Diseases; Lysosomal Storage Diseases; Urea-Cycle Disorders.

Inherited Neurological or Neuromuscular Disorders Charcot–Marie–Tooth Disease; Spinal Muscular Atrophy; Hereditary Spastic Paraplegia; Friedreich Ataxia.

Inherited Blood Disorders Sickle-Cell Disease; Alpha-Thalassemia; Beta-Thalassemia; Hereditary Spherocytosis; Hemophilia A; Hemophilia B; some forms of Von Willebrand Disease.

Inherited Connective-Tissue or Skeletal Disorders Osteogenesis Imperfecta; Ehlers–Danlos Syndromes; Marfan Syndrome; Achondroplasia.

Inherited Renal Disorders Alport Syndrome; Autosomal Dominant Polycystic Kidney Disease (ADPKD); Autosomal Recessive Polycystic Kidney Disease (ARPKD); Cystinuria.

Inherited Eye Disorders Retinitis Pigmentosa; Stargardt Disease; congenital color-vision deficiencies; some forms of congenital cataract.

Hereditary Cancer Syndromes Lynch Syndrome; Familial Adenomatous Polyposis; Hereditary Breast and Ovarian Cancer Syndrome; Multiple Endocrine Neoplasia (MEN) Syndromes; Li–Fraumeni Syndrome; Von Hippel–Lindau Disease.

Common Symptoms

Scope: For a medical dictionary or disease-reference project, symptoms are best organized by body system, because a flat alphabetical list quickly becomes difficult to use. Here is a broad list of common medical symptoms.

General / Systemic Fatigue; Weakness; Malaise; Fever; Chills; Night Sweats; Excessive Sweating; Hot Flashes; Flushing; Loss of Appetite; Increased Appetite; Unexplained Weight Loss; Unexplained Weight Gain; Excessive Thirst; Dehydration; Exercise Intolerance; Lethargy; Generalized Body Aches.

Pain Headache; Chest Pain; Pleuritic Chest Pain; Abdominal Pain; Cramping or Colicky Pain; Back Pain; Neck Pain; Joint Pain; Muscle Pain; Bone Pain; Pelvic Pain; Flank Pain; Facial Pain; Eye Pain; Earache; Sore Throat; Toothache; Painful Urination; Rectal Pain; Burning Pain; Radiating Pain; Throbbing Pain.

Neurological Dizziness; Vertigo; Fainting; Light-Headedness; Orthostatic Lightheadedness; Numbness; Tingling; Burning Sensation; Electric Shock Sensations; Tremor; Muscle Weakness; Paralysis; Seizures; Confusion; Memory Problems; Forgetfulness; Difficulty Concentrating; Brain Fog; Loss of Balance; Poor Coordination; Slurred Speech; Altered Consciousness; Aura.

Eye / Vision Blurred Vision; Double Vision; Loss of Vision; Reduced Visual Acuity; Night Blindness; Eye Redness; Watery Eyes; Dry Eyes; Gritty or Foreign-Body Sensation; Eye Strain; Itchy Eyes; Photophobia; Floaters; Flashes of Light; Halos Around Lights; Sensitivity to Glare.

Ear / Hearing Hearing Loss; Tinnitus; Ear Discharge; Ear Fullness; Ear Pain; Sensitivity to Sound; Popping or Clicking in Ears.

Nose / Sinus Runny Nose; Nasal Congestion; Sneezing; Nosebleed; Loss of Smell; Reduced Smell; Sinus Pressure; Postnasal Drip; Frequent Throat Clearing.

Mouth / Throat Dry Mouth; Mouth Ulcers; Bad Breath; Altered Taste; Loss of Taste; Bleeding Gums; Hoarseness; Sore Throat; Difficulty Swallowing; Painful Swallowing; Lump in Throat; Burning Mouth Sensation.

Respiratory Cough; Dry Cough; Productive Cough; Coughing up Blood; Shortness of Breath; Shortness of Breath on Exertion; Wheezing; Rapid Breathing; Noisy Breathing; Sputum Production; Chest Tightness; Air Hunger; Choking Sensation; Inability to Take a Deep Breath.

Cardiovascular Palpitations; Rapid Heartbeat; Slow Heartbeat; Irregular Heartbeat; Heart Fluttering; Chest Pressure; Chest Squeezing; Shortness of Breath on Exertion; Orthopnea; Paroxysmal Nocturnal Dyspnea; Fainting; Ankle or Leg Swelling; Cold Extremities; Intermittent Claudication; Cyanosis.

Gastrointestinal Nausea; Vomiting; Vomiting Blood; Heartburn; Acid Regurgitation; Indigestion; Bloating; Abdominal Distension; Abdominal Cramps; Excessive Gas; Belching; Difficulty Passing Gas; Diarrhea; Constipation; Straining at Stool; Tenesmus; Blood in Stool; Black or Tarry Stool; Mucus in Stool; Fecal Urgency; Fecal Incontinence; Early Satiety; Anal Itching.

Urinary Frequent Urination; Urinary Urgency; Painful Urination; Excessive Urination; Reduced Urination; Inability to Urinate; Urinary Hesitancy; Post-Void Dribbling; Nighttime Urination; Blood in Urine; Urinary Incontinence; Weak Urinary Stream; Bladder Spasms; Foamy Urine.

Musculoskeletal Joint Stiffness; Morning Stiffness; Joint Swelling; Reduced Range of Motion; Joint Clicking or Grating; Joint Instability or Giving Way; Muscle Cramps; Muscle Spasms; Muscle Stiffness; Muscle Twitches; Restless Legs Sensation; Limb Pain; Difficulty Walking; Limping.

Skin Itching; Rash; Redness; Dry Skin; Scaling or Flaking; Skin Discoloration; Bruising; Easy Bruisability; Swelling; Hives; Blisters; Skin Ulcers; Lumps; Excessive Sweating; Reduced Sweating; Hair Loss; Hair Shedding; Brittle Nails; Crawling Sensation on Skin; Skin Tenderness.

Endocrine / Metabolic Excessive Thirst; Excessive Hunger; Frequent Urination; Heat Intolerance; Cold Intolerance; Unexplained Weight Change; Excessive Sweating; Hot Flashes.

Sleep-Related Insomnia; Difficulty Falling Asleep; Difficulty Staying Asleep; Frequent Awakening; Early Morning Awakening; Non-Restorative Sleep; Excessive Daytime Sleepiness; Snoring; Gasping in Sleep; Restless Sleep; Nightmares; Sleepwalking.

Psychological / Behavioral Anxiety; Depressed Mood; Irritability; Agitation; Mood Changes; Loss of Interest or Pleasure; Poor Concentration; Racing Thoughts; Restlessness; Sleep Disturbance; Appetite Changes; Feeling Detached.

Reproductive / Gynecological Pelvic Pain; Painful Menstruation; Heavy Menstrual Bleeding; Irregular Menstruation; Missed Periods; Vaginal Discharge; Vaginal Bleeding; Bleeding Between Periods; Vaginal Itching; Painful Intercourse; Hot Flashes.

Male Reproductive Erectile Dysfunction; Reduced Libido; Testicular Pain; Testicular Swelling; Penile Discharge; Painful Ejaculation; Scrotal Heaviness.

Blood / Lymphatic Easy Bruising; Prolonged Bleeding; Pale Skin; Swollen Lymph Nodes; Recurrent Infections; Petechiae.

Allergic Itching; Sneezing; Watery Eyes; Nasal Congestion; Hives; Facial Swelling; Lip or Tongue Swelling; Wheezing; Shortness of Breath; Anaphylactic Reactions Sensation.

Clinical Note: For a comprehensive medical dictionary, it is essential to distinguish symptoms (subjective experiences reported by the patient, such as nausea or pain) from clinical signs (objectively observed physical findings detected on examination, such as jaundice, edema, or tachycardia). Mixing them is common in general health lists, but an authoritative reference maintains clear separation among Symptoms, Clinical Signs, Syndromes, and Diseases/Disorders categories.

Clinical Signs

Scope: A clinical sign is an objective abnormality that can be observed, measured, elicited, or detected by a clinician, unlike a symptom, which is experienced and reported by the patient. For a medical dictionary, the following system-based classification is useful.

General / Vital Signs Fever; Hypothermia; Tachycardia; Bradycardia; Tachypnea; Bradypnea; Hypertension; Hypotension; Orthostatic Hypotension; Pulsus Paradoxus; Wide Pulse Pressure; Narrow Pulse Pressure; Hypoxemia; Central Cyanosis; Peripheral Cyanosis; Altered Level of Consciousness; Cachexia; Pallor; Jaundice; Dehydration; Pitting Edema; Non-Pitting Edema; Generalized Lymphadenopathy; Clubbing.

Skin Signs Erythema; Pallor; Cyanosis; Jaundice; Petechiae; Purpura; Ecchymosis; Spider Angiomas; Palmar Erythema; Splinter Hemorrhages; Osler Nodes; Janeway Lesions; Rash; Urticaria; Vesicles; Bullae; Pustules; Papules; Nodules; Ulcers; Scaling; Excoriations; Lichenification; Skin Thickening; Hyperpigmentation; Hypopigmentation; Alopecia; Diaphoresis; Reduced Skin Turgor.

Head & Face Signs Facial Asymmetry; Facial Edema; Ptosis; Proptosis; Moon Facies; Mask-Like Facies; Temporal Wasting; Kayser-Fleischer Rings; Arcus Senilis; Xanthelasma; Subconjunctival Hemorrhage.

Eye Signs Conjunctival Pallor; Conjunctival Injection; Scleral Icterus; Anisocoria; Nystagmus; Strabismus; Ptosis; Proptosis; Papilledema; Absent Pupillary Reflex; Abnormal Red Reflex; Corneal Opacity; Roth Spots; Argyll Robertson Pupil.

Ear, Nose & Throat Signs Tympanic Membrane Erythema; Tympanic Membrane Perforation; Otorrhea; Nasal Polyps; Epistaxis; Tonsillar Enlargement; Tonsillar Exudate; Pharyngeal Erythema; Oral Ulcers; Oral Thrush; Strawberry Tongue; Coated Tongue; Koplik Spots; Gingival Hyperplasia; Peritonsillar Bulge; Deviated Uvula.

Neck Signs Cervical Lymphadenopathy; Goiter; Thyroid Nodule; Neck Stiffness; Elevated Jugular Venous Pressure; Carotid Bruit; Tracheal Deviation; Pemberton Sign.

Cardiovascular Signs Tachycardia; Bradycardia; Irregular Pulse; Weak Pulse; Bounding Pulse; Pulsus Alternans; Corrigan Pulse; Water-Hammer Pulse; Pulse Deficit; Displaced Apex Beat; Heart Murmur; Systolic Murmur; Diastolic Murmur; Gallop Rhythm; Third Heart Sound; Fourth Heart Sound; Pericardial Friction Rub; Cardiac Thrill; Ventricular Heave; Elevated Jugular Venous Pressure; Peripheral Edema; Delayed Capillary Refill.

Respiratory Signs Tachypnea; Bradypnea; Apnea; Cyanosis; Accessory-Muscle Use; Nasal Flaring; Chest Retractions; Barrel Chest; Pectus Excavatum; Pectus Carinatum; Asymmetric Chest Expansion; Subcutaneous Emphysema; Reduced Air Entry; Wheezing; Crackles; Rhonchi; Stridor; Bronchial Breath Sounds; Dullness to Percussion; Hyperresonance; Pleural Friction Rub.

Abdominal & Gastrointestinal Signs Abdominal Distension; Abdominal Tenderness; Guarding; Rigidity; Rebound Tenderness; Shifting Dullness; Fluid Wave; Caput Medusae; Palpable Abdominal Mass; Hepatomegaly; Splenomegaly; Ascites; Succussion Splash; Abnormal Bowel Sounds; Abdominal Bruit; Visible Peristalsis; Rectal Bleeding; Melena.

Neurological Signs Altered Consciousness; Disorientation; Abnormal Gait; Festinating Gait; Spastic Hemiplegic Gait; Ataxia; Tremor; Asterixis; Fasciculations; Muscle Wasting; Pronator Drift; Cogwheel Rigidity; Lead-Pipe Rigidity; Abnormal Muscle Tone; Hyperreflexia; Hyporeflexia; Areflexia; Pathological Reflexes; Clonus; Dysmetria; Dysdiadochokinesia; Sensory Deficit; Motor Weakness on Examination; Cranial Nerve Deficit; Nystagmus; Neck Rigidity.

Musculoskeletal Signs Joint Swelling; Joint Deformity; Joint Effusion; Restricted Range of Motion; Crepitus; Muscle Wasting; Muscle Spasm; Heberden Nodes; Bouchard Nodes; Swan-Neck Deformity; Boutonniere Deformity; Baker Cyst; Limb Deformity; Abnormal Posture; Scoliosis; Kyphosis; Lordosis; Abnormal Gait.

Renal & Urinary Signs Bladder Distension; Costovertebral-Angle Tenderness; Peripheral Edema; Hematuria on Testing; Proteinuria; Oliguria; Anuria.

Endocrine Signs Goiter; Exophthalmos; Tremor; Abnormal Hair Distribution; Hirsutism; Striae; Acanthosis Nigricans; Moon Facies; Buffalo Hump; Peripheral Edema.

Hematological Signs Pallor; Petechiae; Purpura; Ecchymoses; Generalized Lymphadenopathy; Splenomegaly; Hepatomegaly; Active Bleeding.

Peripheral Vascular Signs Peripheral Edema; Pitting Edema; Varicose Veins; Absent or Diminished Peripheral Pulses; Cool Extremities; Delayed Capillary Refill; Venous Ulcers; Arterial Ulcers; Peripheral Cyanosis.

Gynecological Signs Abnormal Vaginal Bleeding on Examination; Vaginal or Cervical Discharge; Cervical Lesions; Pelvic Mass; Uterine Enlargement; Adnexal Mass; Cervical-Motion Tenderness; Chandelier Sign.

Male Genital Signs Testicular Swelling; Testicular Mass; Scrotal Edema; Penile Discharge; Genital Ulceration; Phimosis; Hydrocele; Varicocele.

Pediatric & Neonatal Signs Poor Weight Gain on Growth Charts; Growth Retardation; Bulging Fontanelle; Sunken Fontanelle; Neonatal Jaundice; Central Cyanosis; Chest Retractions; Abnormal Primitive Reflexes; Gowers Sign.

Named Clinical Signs Babinski Sign; Murphy Sign; Kernig Sign; Brudzinski Sign; Rovsing Sign; Cullen Sign; Grey Turner Sign; Trousseau Sign; Chvostek Sign; Romberg Sign; Hoffmann Sign; Courvoisier Sign; Kussmaul Sign; Battle Sign; Nikolsky Sign; Auspitz Sign; Ortolani Sign; Barlow Sign; Trendelenburg Sign; McBurney Sign; Tinel Sign; Phalen Sign; Lhermitte Sign; Blumberg Sign; Kehr Sign; Hamman Sign; Homans Sign; Psoas Sign; Obturator Sign; Lachman Sign; Anterior Drawer Sign.

Clinical Note: A comprehensive medical reference can contain 500–1,000+ clinical signs, encompassing physical examination findings, named signs, dermatological signs, radiological signs, and laboratory markers.

Common Congenital Anomalies

Scope: A congenital anomaly is a structural abnormality present at birth, whether genetic, chromosomal, or environmental in origin. This list complements the appendices of Common Diseases, Common Disorders, and Common Syndromes.

Orofacial & Head Anomalies Cleft Lip; Cleft Palate.

Neural Tube & Brain Anomalies Spina Bifida; Anencephaly; Encephalocele; Hydrocephalus.

Thorax & Abdominal Wall Anomalies Congenital Diaphragmatic Hernia; Omphalocele; Gastroschisis.

Digestive System Anomalies Imperforate Anus; Hirschsprung Disease.

Urinary & Genital Anomalies Hypospadias; Epispadias.

Limb & Skeletal Anomalies Clubfoot; Developmental Dysplasia of the Hip; Polydactyly; Syndactyly.

Eye Anomalies Congenital Cataract.

Heart & Great-Vessel Anomalies Congenital Heart Defects; Ventricular Septal Defect; Atrial Septal Defect; Patent Ductus Arteriosus; Tetralogy of Fallot; Coarctation of the Aorta.

Common Findings, Lesions & Conditions

Scope: This companion list collects clinical findings, structural lesions, symptom patterns, and obstetric events that are not diseases in themselves but are frequently encountered in clinical work, imaging, and laboratory testing. It complements the appendices of Common Diseases, Common Disorders, and Common Syndromes.

Cardiovascular & Respiratory Findings Pericardial Effusion; Pleural Effusion; Pneumothorax; Hemothorax; Atelectasis.

Abdominal & Pancreatic Findings Esophageal Varices; Gallstones; Biliary Obstruction; Cholestasis; Pancreatic Pseudocyst; Pancreatic Cysts; Pancreatic Necrosis.

Renal & Urinary Findings Kidney Stones; Hydronephrosis.

Head, Neck & Airway Findings Thyroid Nodules; Nasal Polyps; Deviated Nasal Septum; Vocal-Cord Nodules; Earwax Impaction; Tympanic Membrane Perforation.

Oral & Dental Findings Tooth Erosion; Impacted Teeth; Malocclusion; Geographic Tongue.

Eye & Skin Findings Chalazion; Stye; Keloids; Ingrown Toenail.

Genital & Reproductive Findings Ovarian Cysts; Bartholin Cyst; Varicocele; Hydrocele; Spermatocoele.

Pain & Symptom Conditions Low-Back Pain; Sciatica.

Metabolic Risk & Allergic States Prediabetes; Anaphylaxis.

Obstetric & Labor Events Ectopic Pregnancy; Miscarriage; Recurrent Pregnancy Loss; Placenta Previa; Placental Abruption; Placenta Accreta Spectrum; Premature Rupture of Membranes; Preterm Labor; Fetal Growth Restriction; Obstructed Labor; Postpartum Hemorrhage.

Common Injuries, Poisoning & Environmental Conditions

Scope: This companion list covers injuries (trauma), poisoning and envenomation, and adverse effects of environmental exposure and extremes. These are events or conditions rather than diseases; it complements the appendices of Common Diseases, Common Disorders, and Common Syndromes.

Bone, Joint & Muscle Injuries Fracture; Dislocation; Sprain; Strain.

Skin & Soft-Tissue Injuries Contusion; Laceration; Abrasion; Crush Injury.

Nervous-System Injuries Traumatic Brain Injury; Concussion; Spinal-Cord Injury.

Thermal & Electrical Injuries Burns; Electrical Injury; Hypothermia; Frostbite; Heat Exhaustion; Heatstroke.

Environmental Conditions Drowning; Dehydration; Altitude Sickness; Motion Sickness.

Poisoning & Envenomation Carbon Monoxide Poisoning; Lead Poisoning; Mercury Poisoning; Arsenic Poisoning; Pesticide Poisoning; Snakebite; Scorpion Sting.

Drug & Alcohol Overdose Drug Overdose; Alcohol Poisoning.

Conditions That May Be Asymptomatic

Scope: This reference list groups diseases, infections, and other conditions that may be present without noticeable symptoms, particularly during early, latent, or compensated stages. Being asymptomatic is a clinical state or mode of presentation rather than a separate category of disease, so every condition here also belongs under its usual organ-system or specialty heading, and “May be asymptomatic” is best treated as an attribute or tag in addition to that classification. Many of these conditions cause symptoms in some people and none in others, and some come to attention only through screening or when a complication appears. The list is a curated, high-importance reference rather than a prevalence ranking, and some conditions appear under more than one heading where they are clinically relevant to several systems. Individual symptoms, signs, and laboratory findings are defined as dictionary entries rather than listed here.

Important distinction: “Asymptomatic disease” is not a distinct disease; it describes how a disease presents. Hypertension is a cardiovascular disease that is often asymptomatic, chlamydia is an infection that is frequently asymptomatic, osteoporosis is a skeletal disease that is typically asymptomatic until a fracture, and open-angle glaucoma is an eye disease that is often asymptomatic in its early stages.

Cardiovascular Hypertension; Atherosclerosis; Coronary Artery Disease; Peripheral Artery Disease; Some Arrhythmias; Early Valvular Heart Disease

Metabolic & Endocrine Prediabetes; Early Type 2 Diabetes; Dyslipidemia; Subclinical Hypothyroidism; Subclinical Hyperthyroidism; Hyperuricemia

Kidney & Urinary Early Chronic Kidney Disease; Diabetic Kidney Disease; Mild Proteinuria; Microscopic Hematuria; Some Kidney Stones

Liver Metabolic Dysfunction-Associated Steatotic Liver Disease (MASLD); Chronic Hepatitis B; Chronic Hepatitis C; Early Cirrhosis; Hemochromatosis

Infectious HIV Infection During Clinical Latency; Hepatitis B; Hepatitis C; Chlamydia; Gonorrhea; HPV Infection; Latent Tuberculosis Infection; Some COVID-19 Infections

Cancer & Precancer Early Colorectal Cancer; Cervical Precancer; Early Cervical Cancer; Early Prostate Cancer; Early Kidney Cancer; Some Thyroid Cancers; Early Breast Cancer

Gynecological HPV Infection; Some Ovarian Cysts; Uterine Fibroids; Early Cervical Abnormalities; Some Sexually Transmitted Infections

Male Reproductive Early Prostate Cancer; Some Sexually Transmitted Infections; Varicocele; Some Cases of Benign Prostatic Enlargement

Blood Mild Anemia; Monoclonal Gammopathy of Undetermined Significance (MGUS); Early Chronic Leukemia; Mild Thrombocytopenia

Bone Osteoporosis; Osteopenia

Eye Open-Angle Glaucoma; Early Diabetic Retinopathy; Early Age-Related Macular Degeneration

Neurological & Vascular Silent Cerebral Infarction; Asymptomatic Carotid Stenosis; Some Unruptured Intracranial Aneurysms

Gastrointestinal Diverticulosis; Colon Polyps; Some Gallstones; Some Hiatal Hernias

Gallbladder Asymptomatic Gallstones (“Silent Gallstones”); Gallbladder Polyps

Genetic Hemochromatosis Before Organ Damage; Some Inherited Thrombophilias; Some Genetic Carrier States

Parasitic & Latent Infections Some Malaria Infections; Intestinal Parasitic Infections; Toxoplasmosis and Other Latent Infections

Lay Language Medical Terms

Lay term	Medical term	Lay-language explanation
Belly area	ABDOMEN/ABDOMINAL	The body cavity below the diaphragm containing the stomach, intestines, liver, and other organs.
Take in	ABSORB	To take up or take in a substance, such as fluid.
Too much acid in blood	ACIDOSIS	A condition in which the blood is more acidic than normal.
Sharpness or clarity	ACUITY	The clearness or keenness of a sense, especially vision.
Recent or sudden	ACUTE	New, recent, sudden, or requiring urgent attention.
Swollen glands	ADENOPATHY	Enlarged or swollen lymph nodes.
Helpful added treatment	ADJUVANT	Something that supports or assists the main treatment.
Added treatment	ADJUVANT TREATMENT	Treatment given in addition to the main or standard treatment.
Germ-killing drug	ANTIBIOTIC	A drug used to kill or control bacteria and some other germs.
Germ-killing treatment	ANTIMICROBIAL	A substance or treatment that acts against microorganisms such as bacteria, fungi, or parasites.
Antiviral drug	ANTIRETROVIRAL	A drug that slows or stops the growth of certain viruses.
Side effect	ADVERSE EFFECT	An unwanted or harmful response to a treatment or medicine.
Walking	AMBULATE/AMBULATION/ AMBULATORY	To walk, or to be able to walk.
Severe allergy	ANAPHYLAXIS	A serious, potentially life-threatening allergic reaction.
Low red-cell count	ANEMIA	A reduced number of red blood cells or a low red-cell blood count.
Numbing medicine	ANESTHETIC	A drug or agent that reduces or removes the feeling of pain, sometimes by causing sleep.
Heart pain	ANGINA	Chest pain caused by inadequate blood flow to the heart muscle.
Heart pain	ANGINA PECTORIS	Another medical term for chest pain caused by reduced blood flow to the heart.
Loss of appetite	ANOREXIA	Lack of appetite or, in some contexts, a disorder involving refusal to eat.

Lay term	Medical term	Lay-language explanation
Inner elbow area	ANTECUBITAL	Relating to the inner side of the elbow or forearm.
Protective protein	ANTIBODY	A protein made by the body in response to a foreign substance.
Seizure-prevention drug	ANTICONVULSANT	A medicine used to prevent or control seizures.
Cholesterol-lowering drug	ANTILIPEMIC	A drug that lowers fat or cholesterol levels in the blood.
Cough medicine	ANTITUSSIVE	A medicine used to reduce coughing.
Irregular heartbeat	ARRHYTHMIA	Any abnormal change in the normal heartbeat or rhythm.
Breathing material into the lungs	ASPIRATION	Entry of fluid, food, or other material into the lungs, often after vomiting.
Laboratory test	ASSAY	A laboratory test used to measure or identify something.
Check or evaluate	ASSESS	To examine, measure, evaluate, or look at something carefully.
Asthma	ASTHMA	A lung disease in which narrowed or tightened airways make breathing difficult.
Without symptoms	ASYMPTOMATIC	Having no noticeable symptoms.
Armpit	AXILLA	The armpit area.
Not cancerous	BENIGN	Not malignant and generally not cancerous.
Twice daily	BID	Prescription shorthand meaning twice a day.
Carried or stuck together	BINDING/BOUND	Carried by something, or made to stick or join together.
Drug availability	BIOAVAILABILITY	The amount or proportion of a drug that becomes available for the body to use.
Series of blood tests	BLOOD PROFILE	A group or panel of blood tests.
Large dose at once	BOLUS	A relatively large amount given all at one time.
Amount of mineral in bone	BONE MASS	The amount of calcium and other minerals in a given amount of bone.
Slow irregular heartbeats	BRADYARRHYTHMIAS	Slow heart rhythms that may also be irregular.
Slow heartbeat	BRADYCARDIA	A slower-than-usual heartbeat.
Narrowed airways	BRONCHOSPASM	Breathing difficulty caused by tightening of the airway muscles.
Cancer-causing	CARCINOGENIC	Capable of causing cancer.
Cancer type	CARCINOMA	A cancer that begins in lining or covering cells of the body.
Related to the heart	CARDIAC	Relating to the heart.
Resetting the heartbeat	CARDIOVERSION	Restoring a normal heart rhythm, often with a controlled electrical shock.
Tube	CATHETER	A thin tube used to give or remove fluids, or to perform certain medical procedures.
Epidural tube	CATHETER	A catheter placed near the spinal cord to deliver anesthesia during surgery.
Brain and spinal cord	CENTRAL NERVOUS SYSTEM (CNS)	The brain and spinal cord.
Brain injury	CEREBRAL TRAUMA	Damage to the brain caused by an injury.
Stopping	CESSATION	The act of stopping something.
Coronary heart disease	CHD	Disease of the blood vessels that supply the heart.
Cancer drug treatment	CHEMOTHERAPY	Treatment of disease, usually cancer, with chemical medicines.

Lay term	Medical term	Lay-language explanation
Long-lasting	CHRONIC	Continuing for a long time or ongoing.
Related to patient care	CLINICAL	Pertaining to medical care or the care of patients.
Human research study	CLINICAL TRIAL	A research study involving human participants.
Unconscious state	COMA	A prolonged state of unconsciousness in which a person cannot be awakened normally.
All disease gone	COMPLETE RESPONSE	Total disappearance of the detectable disease being treated.
Present from birth	CONGENITAL	Present before or at birth.
Pink, irritated eye	CONJUNCTIVITIS	Redness and irritation of the thin membrane covering the eye.
Treatment to keep improvement	CONSOLIDATION PHASE	A treatment phase intended to make a remission last, usually after initial treatment.
Comparison study	CONTROLLED TRIAL	A study comparing an experimental treatment with a standard or control treatment.
Research partnership	COOPERATIVE GROUP	An association of institutions that work together on clinical research.
Related to heart arteries	CORONARY	Relating to the heart or the blood vessels that supply it.
Computerized X-ray scan	CT SCAN (CAT)	A series of computer-processed X-ray images that show sections of the body.
Germ-growth test	CULTURE	A test that grows or detects organisms that may cause infection.
Added together	CUMULATIVE	Added up from the beginning.
Related to the skin	CUTANEOUS	Relating to the skin.
Stroke	CVA	A stroke, also called a cerebrovascular accident.
Related to the skin	DERMATOLOGIC	Pertaining to the skin.
Lower blood-pressure number	DIASTOLIC	Relating to the lower blood-pressure number, when the heart relaxes.
Farther away	DISTAL	Toward the end or away from the center of the body.
Water pill	DIURETIC	A drug that increases urination.
Sound-wave blood-flow test	DOPPLER	A device or test using sound waves to assess blood flow.
Masked study	DOUBLE BLIND	A study in which neither the participants nor investigators know which treatment is being given.
Improper function	DYSFUNCTION	A state in which something does not work normally.
Abnormal cells	DYSPLASIA	Abnormal changes in the size, shape, or organization of cells.
Heart sound-wave test	ECHOCARDIOGRAM	An ultrasound test that creates pictures of the heart.
Swelling from fluid	EDEMA	Excess fluid collecting in body tissues.
Brain-wave test	EEG	A recording of the brain's electrical activity.
Effectiveness	EFFICACY	How well a treatment works under specified conditions.
Heart electrical tracing	ELECTROCARDIOGRAM	A tracing of the heart's electrical activity, also called an ECG or EKG.
Mineral imbalance	ELECTROLYTE IMBALANCE	An abnormal level or balance of minerals in the blood.
Vomiting	EMESIS	The act of vomiting.

Lay term	Medical term	Lay-language explanation
Based on experience	EMPIRIC	Based on experience or likely cause rather than definitive test results.
Viewing inside the body	ENDOSCOPIC	Looking inside the body with a lighted tube or camera.
Through the intestines	ENTERAL	Given through or involving the digestive tract.
Outside the spinal cord	EPIDURAL	Located outside the spinal cord covering, or medicine given into that space.
Remove completely	ERADICATE	To get rid of a disease, infection, or other problem.
Examined	EVALUATED, ASSESSED	Examined or checked for a medical condition.
Fast ethics review	EXPEDITED REVIEW	A rapid research-protocol review allowed for certain lower-risk studies.
Outside the body	EXTERNAL	Located or occurring outside the body.
Leak out	EXTRAVASATE	To leak outside the intended area, such as from a blood vessel into nearby tissue.
U.S. drug agency	FDA	The U.S. Food and Drug Administration, which regulates medicines and medical products.
Scar-like	FIBROUS	Containing many fibers, often resembling scar tissue.
Irregular quivering	FIBRILLATION	Very rapid, uncoordinated activity of the heart or another muscle.
Being put fully to sleep	GENERAL ANESTHESIA	Use of medicines to cause unconsciousness and prevent pain during a procedure.
Related to pregnancy	GESTATIONAL	Pertaining to pregnancy.
Red-cell percentage	HEMATOCRIT	The proportion of blood made up of red blood cells.
Bruise or blood collection	HEMATOMA	A collection of blood under the skin or in a tissue, often appearing as a bruise.
Blood-flow measurement	HEMODYNAMIC MEASURING	Measuring blood flow and circulation.
Red-cell breakdown	HEMOLYSIS	Breakdown or destruction of red blood cells.
Heparin tube or port	HEPARIN LOCK	An intravenous access device kept open with a prescribed solution, sometimes containing heparin.
Liver tumor	HEPATOMA	A tumor of the liver, often referring to hepatocellular carcinoma.
Inherited disease	HERITABLE DISEASE	A disease that can be passed through genes to future children.
Tissue-disease examination	HISTOPATHOLOGIC	Relating to examination of tissues or cells for disease.
Portable heart monitor	HOLTER MONITOR	A portable device that records heartbeats, usually for a day or longer.
High blood calcium	HYPERCALCEMIA	An abnormally high calcium level in the blood.
High blood potassium	HYPERKALEMIA	An abnormally high potassium level in the blood.
High blood sodium	HYPERNATREMIA	An abnormally high sodium level in the blood.
High blood pressure	HYPERTENSION	Blood pressure that is higher than recommended.
Low blood calcium	HYPOCALCEMIA	An abnormally low calcium level in the blood.
Low blood potassium	HYPOKALEMIA	An abnormally low potassium level in the blood.
Low blood sodium	HYPONATREMIA	An abnormally low sodium level in the blood.
Low blood pressure	HYPOTENSION	Blood pressure that is lower than expected.
Low blood oxygen	HYPOXEMIA	A low level of oxygen in the blood.
Low tissue oxygen	HYPOXIA	Too little oxygen reaching body tissues.

Lay term	Medical term	Lay-language explanation
Removal of the uterus	HYSTERECTOMY	Surgical removal of the uterus; the ovaries and other structures may or may not also be removed.
Treatment-caused	IATROGENIC	Caused by medical treatment or a healthcare procedure.
Device research permission	IDE	Permission to study an unapproved medical device in people.
Cause unknown	IDIOPATHIC	Having no known cause.
Body protection	IMMUNITY	The body's defense against infection or other foreign substances.
Antibody protein	IMMUNOGLOBIN	A protein involved in making antibodies and immune defense; the standard spelling is immunoglobulin.
Immune-suppressing	IMMUNOSUPPRESSIVE	A drug or treatment that reduces the body's immune response.
Immune-based treatment	IMMUNOTHERAPY	Treatment that uses or changes the immune system, often against cancer or immune disease.
Abnormal function	IMPAIRED FUNCTION	Function that is reduced or not working normally.
Placed inside the body	IMPLANTED	Surgically or otherwise placed inside the body.
New-drug research permission	IND	Authorization to test an unapproved new drug in people.
Hardening	INDURATION	An area that has become unusually firm or hard.
Left in place	INDWELLING	Remaining in a particular location, such as a catheter.
Dead tissue from poor blood flow	INFARCT	Death of tissue caused by inadequate blood supply.
Disease that can spread	INFECTIOUS DISEASE	An illness caused by organisms that may spread between people or through other routes.
Swelling and irritation	INFLAMMATION	The body's response to injury or infection, often causing swelling, warmth, redness, or pain.
Slow delivery into the body	INFUSION	Slow delivery of a substance, usually through a vein or catheter.
Taking by mouth	INGESTION	Eating, drinking, or taking something into the body by mouth.
Antiviral immune protein	INTERFERON	A medicine or natural protein that helps the body act against viruses.
On and off	INTERMITTENT	Occurring repeatedly with pauses between episodes.
Inside the body	INTERNAL	Located or occurring within the body.
Inside	INTERIOR	Located on the inside.
Into a muscle	INTRAMUSCULAR	Given into a muscle.
Into the abdomen	INTRAPERITONEAL	Given into or located within the abdominal cavity.
Into spinal fluid	INTRATHECAL	Given into the fluid space around the spinal cord.
Into a vein	INTRAVENOUS (IV)	Given through a vein.
Into the bladder	INTRAVESICAL	Given into the bladder.
Place a breathing tube	INTUBATE	To place a tube into the airway.
Breaking the skin	INVASIVE PROCEDURE	A procedure that punctures, opens, or cuts the skin or enters the body.
Unapproved-drug study	INVESTIGATIONAL NEW DRUG (IND)	A new drug being studied before it has full approval for general use.

Lay term	Medical term	Lay-language explanation
Unproven treatment method	INVESTIGATIONAL METHOD	A treatment method still being studied and not established as standard care.
Reduced blood flow	ISCHEMIA	Too little blood and oxygen reaching a tissue, usually because blood flow is reduced.
Open abdominal surgery	LAPAROTOMY	Surgery using an incision in the abdominal wall to reach the organs inside.
Abnormal area	LESION	A wound, injury, or area of abnormal tissue.
Very tired or sleepy	LETHARGY	Sleepiness, tiredness, or reduced energy.
Low white-cell count	LEUKOPENIA	A lower-than-normal number of white blood cells.
Fat	LIPID	A fat or fat-like substance.
Amount of fat	LIPID CONTENT	The amount of fat in a substance, tissue, or blood sample.
Cholesterol and fat panel	LIPID PROFILE (PANEL)	Blood tests measuring fats and cholesterol.
Numbing a small area	LOCAL ANESTHESIA	Numbing medicine used to prevent pain in a limited area.
Limited to one area	LOCALIZED	Restricted to one area.
Inner space	LUMEN	The hollow space inside a tube or organ, such as a blood vessel.
Lymph-vessel X-ray	LYMPHANGIOGRAPHY	An X-ray study of lymph vessels or nodes after contrast dye is injected.
Immune white blood cell	LYMPHOCYTE	A type of white blood cell that helps protect against infection.
Lymph-node cancer	LYMPHOMA	A cancer of lymph nodes or related lymphatic tissue.
Feeling unwell	MALAISE	A vague feeling of illness or bodily discomfort.
Not working correctly	MALFUNCTION	A condition in which a device, organ, or system does not work properly.
Cancerous growth	MALIGNANCY	A cancer or other tumor capable of growing and spreading.
Brain tumor	MEDULLABLASTOMA	A type of tumor that begins in the brain.
Abnormal red-cell development	MEGALOBLASTOSIS	A change in blood-forming cells that produces unusually large, abnormal red-cell precursors.
Break down in the body	METABOLIZE	To chemically process or break down a substance in the body.
Cancer spread	METASTASIS	Spread of cancer cells from one body part to another.
Antibiotic medicine	METRONIDAZOLE	A medicine used for certain bacterial and parasitic infections.
Heart attack	MI	Myocardial infarction, or death of heart muscle from blocked blood flow.
Small or slight	MINIMAL	Very small or slight.
Reduce	MINIMIZE	To reduce something as much as possible.
Check or watch	MONITOR	To observe, measure, or keep track of something over time.
Ease of movement	MOBILITY	The ability to move easily.
Illness or complication	MORBIDITY	Illness, disability, or an unwanted result of disease or treatment.
Death rate or death	MORTALITY	Death, or the rate of death in a population.
Ability to move	MOTILITY	The ability of a body part, cell, or organism to move.
Magnetic body scan	MRI	Pictures of the inside of the body made with magnets and radio waves rather than X-rays.

Lay term	Medical term	Lay-language explanation
Moist body lining	MUCOSA, MUCOUS MEMBRANE	The moist lining of the digestive, respiratory, reproductive, and urinary passages.
Muscle aches	MYALGIA	Pain or aching in the muscles.
Related to heart muscle	MYOCARDIAL	Pertaining to the muscle of the heart.
Heart attack	MYOCARDIAL INFARCTION	Death of heart muscle caused by inadequate blood flow.
Nose-to-stomach tube	NASOGASTRIC TUBE	A tube passed through the nose into the stomach.
U.S. health institute	NCI	The National Cancer Institute.
Tissue death	NECROSIS	Death of cells or tissue.
Tumor	NEOPLASIA/NEOPLASM	An abnormal new growth that may be benign or malignant.
Nerve-tissue cancer	NEUROBLASTOMA	A cancer that develops from immature nerve tissue.
Related to the nervous system	NEUROLOGICAL	Pertaining to the brain, spinal cord, or nerves.
Low infection-fighting cells	NEUTROPENIA	A decrease in neutrophils, a major type of infection-fighting white blood cell.
U.S. health agency	NIH	The National Institutes of Health.
Not entering the body	NONINVASIVE	Not breaking, cutting, or entering the skin or body.
Hospital-acquired	NOSOCOMIAL	Acquired during a stay in a healthcare facility.
Blockage	OCCLUSION	Closing, blockage, or obstruction.
Cancer specialty	ONCOLOGY	The study and treatment of cancer and tumors.
Related to the eye	OPHTHALMIC	Pertaining to the eye.
Best choice	OPTIMAL	Best, most favorable, or most suitable.
By mouth	ORAL ADMINISTRATION	Giving a medicine through the mouth.
Related to bones	ORTHOPEDIC	Pertaining to bones, joints, muscles, or related structures.
Rare dense-bone disorder	OSTEOPETROSIS	A rare disorder in which bones become unusually dense but may be fragile.
Weak bones	OSTEOPOROSIS	A condition in which bones lose strength and become more likely to break.
Female sex glands	OVARIES	The organs that produce eggs and reproductive hormones.
Given by injection	PARENTERAL	Given by injection rather than through the digestive tract.
Open passage	PATENCY	The condition of being open and unobstructed.
How a disease develops	PATHOGENESIS	The process by which a disease or unhealthy condition develops.
Through the skin	PERCUTANEOUS	Done through or across the skin.
Away from the center	PERIPHERAL	At or toward the outer part rather than the center.
By mouth	PER OS (PO)	A prescription direction meaning by mouth.
How the body handles a drug	PHARMACOKINETICS	The study of how the body absorbs, distributes, changes, and removes a drug.
First drug-study phase	PHASE I	The first human study phase, usually focused on safety, effects, and dosing.
Early effectiveness study	PHASE II	A study phase examining safety and early evidence of benefit in people with a condition.
Large confirmation study	PHASE III	A larger study phase used to confirm safety and effectiveness and identify common side effects.

Lay term	Medical term	Lay-language explanation
After-approval study	PHASE IV	A study performed after approval to monitor safety or examine additional uses.
Vein irritation	PHLEBITIS	Irritation or inflammation of a vein.
Inactive treatment	PLACEBO	An inactive substance or treatment that looks like the real treatment.
Improvement from expectation	PLACEBO EFFECT	An improvement that occurs after an inactive treatment, often because of expectation or context.
Clotting blood particles	PLATELETS	Small blood components that help stop bleeding by forming clots.
Possible	POTENTIAL	Possible or capable of happening.
Make stronger	POTENTIATE	To increase or multiply the effect of a drug, treatment, or substance.
Effect booster	POTENTIATOR	An agent that helps another agent work more strongly.
Before birth	PRENATAL	Occurring before birth.
Preventive treatment	PROPHYLAXIS	A medicine or action used to prevent disease or infection.
As needed	PRN	Prescription shorthand meaning when needed.
Expected outlook	PROGNOSIS	The expected course and outcome of a disease.
Lying face down	PRONE	Lying on the stomach or front.
Study looking forward	PROSPECTIVE STUDY	A study that follows participants forward in time.
Artificial body part	PROSTHESIS	An artificial replacement for a body part.
Study plan	PROTOCOL	The written plan for a study or treatment.
Closer to the center	PROXIMAL	Closer to the center of the body or point of attachment.
Related to the lungs	PULMONARY	Pertaining to the lungs.
Every day	QD	Prescription shorthand meaning every day; clearer wording is preferred.
Four times daily	QID	Prescription shorthand meaning four times a day.
Radiation treatment	RADIATION THERAPY	Treatment using high-energy radiation to damage or destroy abnormal cells.
By chance	RANDOM	Selected or occurring by chance.
Chance assignment	RANDOMIZATION	Assigning participants to groups by chance.
Red blood cell	RBC	A red blood cell.
Genetically combined	RECOMBINANT	Made by combining genetic material from different sources.
Put back together	RECONSTITUTION	Restoring something by putting its parts back together or adding a liquid.
Happen again	RECUR	To happen again.
Not responding	REFRACTORY	Not responding adequately to treatment.
Regrowth or repair	REGENERATION	Growth again or replacement of lost or damaged tissue.
Treatment schedule	REGIMEN	The planned pattern, dose, and timing of treatment.
Return of disease	RELAPSE	Return of a disease after improvement or remission.
No detectable disease	REMISSION	Disappearance or reduction of evidence of disease; it may be partial or complete.
Related to kidneys	RENAL	Pertaining to the kidneys.
Can be repeated	REPLICABLE	Able to be repeated with similar results.

Lay term	Medical term	Lay-language explanation
Remove surgically	RESECT	To remove part or all of an organ or tissue by surgery.
Study looking back	RETROSPECTIVE STUDY	A study that examines past records or past events.
Connective-tissue cancer	SARCOMA	A cancer arising from connective, bone, muscle, fat, or related tissues.
Calming medicine	SEDATIVE	A medicine that calms or makes a person sleepy.
Testicular cancer	SEMINOMA	A type of cancer arising in the testicle.
In order	SEQUENTIALLY	Happening one after another in order.
Sleepiness	SOMNOLENCE	Unusual sleepiness or a tendency to fall asleep.
Air-measuring instrument	SPIROMETER	An instrument that measures the amount of air moved into and out of the lungs.
Extent of disease	STAGING	Assessment of how far a disease has progressed or spread.
Usual accepted treatment	STANDARD OF CARE	A treatment plan generally accepted by the medical community as appropriate.
Narrowing	STENOSIS	Narrowing of a passage, duct, or blood vessel.
Mouth inflammation	STOMATITIS	Sores or inflammation inside the mouth.
Group for comparison	STRATIFY	To arrange people or results into groups for analysis.
Barely responsive state	STUPOR	A greatly reduced level of alertness in which a person is difficult to awaken or respond to.
Under the collarbone	SUBCLAVIAN	Located beneath the collarbone.
Under the skin	SUBCUTANEOUS	Beneath the skin.
Lying on the back	SUPINE	Lying face up on the back.
Care focused on comfort	SUPPORTIVE CARE	General care that relieves symptoms and supports the person without directly curing the underlying disease.
Having symptoms	SYMPTOMATIC	Showing or having symptoms.
Group of related findings	SYNDROME	A condition identified by a characteristic group of symptoms and signs.
Upper blood-pressure number	SYSTOLIC	Relating to the upper blood-pressure number when the heart contracts.
Birth-defect-causing	TERATOGENIC	Capable of causing abnormalities in a developing fetus.
Male sex glands	TESTES/TESTICLES	The organs that produce sperm and male reproductive hormones.
Clot formation	THROMBOSIS	Formation of a blood clot inside a blood vessel or other location.
Blood clot	THROMBUS	A blood clot formed within a blood vessel or the heart.
Three times daily	TID	Prescription shorthand meaning three times a day.
Gradual dose adjustment	TITRATION	Gradually changing a dose or solution to reach a desired effect.
Immune white blood cells	T-LYMPHOCYTES	White blood cells that help coordinate or carry out immune responses.
On the surface	TOPICAL	Applied to the surface, usually the skin or a mucous membrane.
Surface numbing medicine	TOPICAL ANESTHETIC	A numbing medicine applied to a particular surface area.

Lay term	Medical term	Lay-language explanation
Harmful effects	TOXICITY	Harmful or unwanted effects caused by a drug, chemical, or treatment.
Through the skin	TRANSDERMAL	Delivered through the skin.
Temporarily	TRANSIENTLY	For a short time or temporarily.
Injury	TRAUMA	Physical injury or wound.
Walking exercise machine	TREADMILL	A moving walking surface used for exercise or heart testing.
Absorption into tissue	UPTAKE	Absorbing or taking in a substance by living tissue.
Heart-valve repair	VALVULOPLASTY	A procedure that repairs or widens a heart valve.
Enlarged veins	VARICES	Abnormally enlarged or twisted veins.
Blood-vessel spasm	VASOSPASM	Sudden narrowing of blood vessels.
Disease carrier	VECTOR	An organism or carrier that can transmit a disease-causing microorganism.
Blood draw	VENIPUNCTURE	Puncturing a vein with a needle to draw blood or give treatment.
Parent-to-child spread	VERTICAL TRANSMISSION	Spread of an infection from a parent to a child, often during pregnancy, birth, or breastfeeding.
White blood cell	WBC	A white blood cell involved in immune defense.

Source and adaptation: Terms and concepts were checked against the University of Iowa Human Subjects Office, “Medical Terms in Lay Language,” available at <https://hso.research.uiowa.edu/get-started/guides-and-standard-operating-procedures-sops/medical-terms-lay-language>. The explanations in this appendix are paraphrased for this dictionary and are not the only acceptable plain-language alternatives.
