Older infection-control guidance for preventing exposure to bloodborne infections. It has been incorporated into broader Standard Precautions, which apply to all patients and include hand hygiene, protective equipment based on exposure risk, safe injections, and safe handling of equipment.

Universal Recipient

A person with type AB RhD-positive blood, whose red blood cells can generally receive red-cell transfusions of any ABO and RhD type. Other red-cell antigens can still affect compatibility, and this term does not apply to plasma transfusions.

Alternate Names:
Type AB Positive Recipient; Universal Blood Recipient

Unloader Knee Brace

A knee brace designed to shift some load away from an affected compartment of the knee, often in osteoarthritis. It may be called a valgus or varus brace, depending on the direction of force.

Alternate Names:
Unloader Knee Braces; Unloader Knee Bracing; Offloader Knee Brace

Unopposed Estrogen

Estrogen exposure without enough progestogen to oppose its effect on the uterine lining. In a person with a uterus, prolonged exposure can cause endometrial overgrowth and increase the risk of endometrial cancer.

Unresectable

Describing a tumor or lesion that cannot be com-

pletely removed safely by surgery because of its location, extent, invasion of vital structures, or the patient's operative risk.

Unresponsive Coma

Alternate name; see *Coma*.

Unsaturated Fat

A dietary fat whose fatty-acid chains contain one or more carbon-carbon double bonds. Monounsaturated and polyunsaturated fats are common in vegetable oils, nuts, seeds, and fish; replacing saturated fat with unsaturated fat generally supports healthier LDL cholesterol levels.

Unstable Angina

Chest pain caused by reduced blood flow to the heart that is new, worsening, lasts longer, or occurs at rest, without clear evidence of heart-muscle death. It is an emergency warning of possible heart attack.

Unsteadiness

Impaired balance or gait stability, which may result from vestibular disease, neurologic disorders, weakness, medication effects, visual impairment, or musculoskeletal problems.

Untidy Wound

An irregular or contaminated wound with crushing, devitalized tissue, tissue loss, foreign material, or associated injury to vessels, nerves, tendons, or bone. It has increased infection risk and may require exploration, irrigation, debridement, and delayed or staged closure.

Upper Airway Biopsy

Removal of tissue from the nasal cavity, pharynx, larynx, or related upper airway for microscopic evaluation of suspected infection, inflammation, infiltrative disease, or tumor.

Upper Airway Cough Syndrome

A possible cause of long-lasting cough associated with conditions of the nose or sinuses, such as allergies or chronic sinus inflammation. Nasal symptoms may occur, but the exact cause of the cough can be difficult to establish.

Alternate Names:
UACS

Upper Airway Obstruction

Narrowing or blockage of the breathing passage in the nose, throat, or voice box. It can cause noisy breathing, breathlessness, voice changes, or blue lips and can become life-threatening when severe or rapidly worsening.

Upper Airway Resistance Syndrome

Repeated extra effort to breathe through a partly narrowed upper airway during sleep. It can cause brief repeated awakenings, unrefreshing sleep, morning headache, and daytime sleepiness even without clearly positive standard sleep-apnea testing.

Alternate Names:
UARS

Upper Arm

The portion of the upper limb between the shoulder and elbow, containing the humerus and muscles, nerves, and vessels that serve the arm.

Upper Endoscopy

A flexible camera examination of the food pipe, stomach, and first part of the small intestine. It can identify inflammation, ulcers, bleeding, narrowing, or tumors and can allow tissue samples or treatment.

Upper Esophageal Sphincter

A ring of muscle at the top of the esophagus that opens during swallowing and coordinates food passage.

Alternate Names:
UES

Upper Extremity

The anatomic region extending from the shoulder through the arm, forearm, wrist, and hand. Disorders may involve its bones, joints, muscles, nerves, vessels, or skin.

Upper Extremity Deep Vein Thrombosis

A thrombosis occurring in the deep venous system of the arm or thoracic inlet (axillary, subclavian, or brachiocephalic veins), categorized as primary (effort-induced venous thrombosis or Paget-Schroetter syndrome) or secondary (most commonly related to indwelling central venous catheters or pacemaker leads).

Alternate Names:
UEDVT

Upper Extremity Venous Doppler

An ultrasound examination of the arm and related veins that assesses compressibility and blood flow, commonly to evaluate suspected venous thrombosis.

Upper Gastrointestinal Bleeding

Bleeding from the esophagus, stomach, or first part of the small intestine. It may cause vomiting of red or coffee-ground blood, black stools, dizziness, weakness, or fainting. Common causes include ulcers, inflammation, tears, and enlarged veins; significant bleeding can be life-threatening.

Alternate Names:
UGIB; Upper GI Bleed; Upper GI Hemorrhage

Upper GI And Small Bowel Series

A fluoroscopic x-ray examination in which swallowed contrast outlines the esophagus, stomach, duodenum, and small intestine to evaluate structure and transit.

Upper GI Series

An X-ray examination of the food pipe, stomach, and first part of the small intestine after swallowing contrast material. It can show narrowing, blockage, ulcers, abnormal movement, or other structural problems.

Upper Leg

The portion of the lower limb between the hip and knee, containing the femur and the thigh muscles, nerves, and blood vessels.

Upper Limb Disorders

Conditions affecting the shoulder, arm, elbow, forearm, wrist, or hand, including musculoskeletal, nerve, vascular, and work-related disorders.

Upper Motor Neuron

A nerve cell in the brain or spinal cord that controls nerve cells supplying muscles. Damage to these pathways can cause weakness, stiffness, exaggerated reflexes, or difficulty controlling movement.

Upper Motor Neuron Lesion

Damage to movement pathways in the brain or spinal cord. It can cause weakness, increased muscle tone, exaggerated reflexes, spasms, or an abnormal plantar reflex; findings depend on the site and extent of injury.

Alternate Names:
Pyramidal Tract Lesion

Upper Motor Neuron Syndrome

A group of findings caused by damage to movement pathways in the brain or spinal cord. It may cause weakness, stiffness, muscle spasms, exaggerated reflexes, or reduced control of movement.

Upper Respiratory Infection

Alternate name; see *Upper Respiratory Tract Infection*.

Upper Respiratory Tract Infection

An infection of the nose, sinuses, throat, or voice box, most often caused by a virus. Examples include the common cold, rhinitis, pharyngitis, tonsillitis, and sinusitis.

Alternate Names:
URTI; Upper Respiratory Infection; URI

Upper Tract Urothelial Carcinoma

Tumors arising from the urothelial lining of the upper urinary tract. Blood in the urine, flank pain, obstruction, or incidental imaging findings may occur; urine cytology, imaging, ureteroscopy, and tissue assessment guide diagnosis and treatment.

Upper-Tract Urothelial Carcinoma

Alternate name; see *Upper Tract Urothelial Carcinoma*.

Upright Labor Positions

Maternal positions during labor, such as walking, standing, squatting, kneeling, or sitting upright. They may improve comfort and mobility and can be used when safe and acceptable to the laboring person and clinical team.

Upward Gaze

Elevation of both eyes to direct the visual axis upward. It depends on coordinated activity of the extraocular muscles and their brainstem control pathways.

Urachal Abnormalities

Birth-related problems caused by incomplete closure of the urachus, the temporary fetal connection between the bladder and navel. They include a urachal cyst, sinus, or open connection and may cause infection, navel discharge, abdominal pain, or urine leakage.

Urachal Carcinoma

A rare cancer arising from a leftover connection between the bladder and the navel, usually near the top of the bladder. It may cause blood or mucus in the urine, pelvic pain, or urinary changes.

Urachal Cyst

A fluid-filled sac left from the temporary fetal connection between the bladder and navel. It may cause no symptoms, but infection can produce lower-abdominal pain, fever, navel discharge, or urinary symptoms.

Urachal Fistula

A persistent passage between the bladder and navel that results from incomplete closure of the urachus before birth. It can cause urine to leak from the navel.

Alternate Names:
Patent Urachus; Persistent Urachal Canal

Urachal Mucinous Cystic Tumor

A rare tumor arising from the urachal remnant between the bladder dome and umbilicus. It may be benign or malignant, with mucinous histology, and requires surgical excision.

Urachus

An embryologic connection between the fetal bladder and umbilicus that normally becomes the median umbilical ligament after birth. Persistent urachal remnants can form cysts, sinuses, or other complications.

Uracil-DNA Glycosylase

A DNA repair enzyme that initiates the base excision repair (BER) pathway by specifically recognizing and hydrolyzing the N-glycosidic bond of mutagenic uracil residues formed by spontaneous deamination of cytosine in DNA, generating an abasic (AP) site for downstream repair.

Alternate Names:
UDG

Uraemia

Alternate spelling; see *Uremia*.

Uraemic Foetor

Alternate spelling; see *Uremic Fetor*.

Uraemic Syndrome

Alternate name; see *Uremia*.

Uranium

A naturally occurring radioactive heavy metal. Internal exposure can damage the kidneys, while inhaled or retained radioactive material can also expose tissues to ionizing radiation.

Urate

A form of uric acid, a waste product made when the body breaks down certain substances in food and cells. Too much urate in the blood can form crystals in joints and cause gout.

Urate Nephropathy

Kidney injury caused by uric acid or urate crystals collecting in the kidney's small tubes. It can occur when uric acid rises rapidly, such as during tumor lysis syndrome, and may reduce kidney function.

Alternate Names:
Acute Uric Acid Nephropathy; Crystal-Induced Urate Nephropathy

Urate-Lowering Therapy

Long-term treatment that lowers urate in the blood, helping dissolve gout crystals and prevent further attacks and joint damage. The medicine is chosen according to kidney function, other illnesses, and treatment goals.

Urates

Salts or ions of uric acid. Monosodium urate crystals can accumulate in joints in gout, and urate crystals may contribute to urinary stones.

Urea

The principal nitrogen-containing waste product of protein metabolism, formed in the liver and excreted mainly by the kidneys.

Urea Breath Test

A noninvasive test for active Helicobacter pylori infection: the person drinks labeled urea, and labeled carbon dioxide in exhaled breath indicates bacterial urease activity.

Urea Cycle

A series of chemical reactions in the liver that changes toxic ammonia, produced when the body breaks down protein, into urea. The kidneys then remove urea in urine.

Urea Cycle Disorder

An inherited problem in the liver's process for removing ammonia. Ammonia can build up in the blood and cause vomiting, poor feeding, sleepiness, confusion, seizures, or brain injury, especially during illness or fasting.

Urea Nitrogen Urine Test

A urine test measuring urea nitrogen excretion, interpreted with blood urea nitrogen, creatinine, diet, and urine volume to assess protein metabolism and renal handling.

Ureaplasma

A genus of very small bacteria without a cell wall that can colonize the genital or urinary tract and is sometimes associated with urethritis or pregnancy complications.

Ureaplasma urealyticum

A bacterium without a cell wall that can live in the genital or urinary tract. It is sometimes associated with urethritis, pregnancy complications, or infection in vulnerable newborns.

Uremia

A clinical syndrome caused by advanced kidney failure and accumulation of waste products and other biologically active substances. Symptoms may include nausea, itching, fatigue, confusion, bleeding, or pericarditis; laboratory values and symptoms must be interpreted together.

Uremic Bleeding

A tendency to bleed in advanced kidney failure, mainly because platelets do not function normally. It may cause easy bruising, nosebleeds, or prolonged bleeding.

Uremic Encephalopathy

Brain dysfunction caused by severe kidney failure and the resulting buildup of waste products. It may cause confusion, extreme sleepiness, muscle twitching, seizures, or coma.

Uremic Fetor

A urine-like or ammonia-like odor on the breath in severe kidney failure, caused when oral bacteria break down urea in saliva.

Alternate Names:
Ammoniacal Breath; Uremic Breath Odor

Uremic Frost

Rare white, powdery crystals of urea that appear on the skin when severe untreated kidney failure causes very high waste levels in the blood. It indicates advanced kidney failure.

Uremic Pericarditis

Inflammation of the sac around the heart caused by severe kidney failure and buildup of waste products. It may cause sharp chest pain, a scratchy heart sound, or fluid around the heart; fluid can sometimes compress the heart and impair its pumping.

Uremic Platelet Dysfunction

Reduced ability of platelets to stick together and stop bleeding because of advanced kidney failure. It can cause easy bruising, nosebleeds, heavy menstrual bleeding, or bleeding from the stomach or bowel and may improve when the kidney failure is treated.

Uremic Pruritus

Persistent itching associated with chronic kidney disease, especially advanced disease. The cause is complex and may involve changes in the skin, nerves, immune system, and signaling pathways.

Alternate Names:
Chronic Kidney Disease-Associated Pruritus; CKD-Associated Pruritus; CKD-aP

Uremic Stomatitis

Inflammation of the mouth caused by severe kidney failure and buildup of waste products. It may cause a bad taste, mouth soreness, white patches, ulcers, or bleeding gums and tongue.

Ureter

One of two muscular tubes that carry urine from a kidney to the bladder. A stone or narrowing can block a ureter and cause severe side pain, swelling of the kidney, infection, or kidney damage.

Ureter Duplex

A birth variation in which one kidney has two urine tubes instead of one. It may cause no problems but can lead to urine flowing backward, blockage, repeated infections, or poor drainage.

Ureter Fissus

A birth difference in which a ureter is divided lengthwise or partly duplicated. It may cause no symptoms, but abnormal urine flow can lead to urine reflux, blockage, repeated infection, or poor kidney drainage.

Ureter Obstruction

Alternate name; see *Ureteral Obstruction*.

Ureteral Calculi

Alternate name; see *Ureteral Stones*.

Ureteral Catheters

Thin tubes passed into a ureter to drain urine, inject contrast, measure pressure, or guide a procedure. Possible complications include infection, bleeding, a tear, movement of the tube, or blockage.

Ureteral Injury During Gynecologic Surgery

Damage to a ureter during pelvic surgery, including cutting, tying off, heat injury, loss of blood supply, or blockage. It may cause flank pain, urine leakage, kidney swelling, fever, or delayed kidney injury.

Ureteral Obstruction

Blockage of urine flow through a ureter, the tube from a kidney to the bladder. Stones, scar tissue, tumors, or pressure from nearby structures can cause it and may lead to kidney swelling, infection, or reduced kidney function.

Ureteral Orifice

One of the two openings where the ureters enter the bladder and release urine. The angled passage through the bladder wall helps reduce backward flow of urine toward the kidneys.

Ureteral Perforation

A tear or hole in the ureter, sometimes caused by a stone, trauma, surgery, or an endoscopic procedure.

Urine may leak into surrounding tissues and cause pain, infection, or inflammation.

Ureteral Polyp

Usually a benign fibroepithelial growth arising from the ureter. It may cause hematuria, flank pain, or obstruction and must be distinguished from urothelial malignancy when evaluated.

Ureteral Reimplantation

Surgery that moves the lower end of a ureter to a new opening in the bladder. It may be used to correct urine flowing backward, blockage, injury, or an abnormal ureter entry.

Alternate Names:
Ureteroneocystostomy; Ureteral Neoimplantation

Ureteral Retrograde Brush Biopsy

A small brush passed through a thin camera into the ureter to collect cells from its lining. A laboratory examines the cells for cancer or other abnormal changes.

Ureteral Stenosis

Alternate name; see *Ureteral Stricture*.

Ureteral Stent

A thin tube placed inside the ureter to keep urine flowing from the kidney to the bladder when a stone, narrowing, tumor, or swelling blocks the passage. It can cause urinary urgency, discomfort, blood in the urine, infection, or mineral buildup and is usually temporary.

Ureteral Stones

Stones in a ureter, the tube carrying urine from a kidney to the bladder. They may cause wave-like side or groin pain, blood in the urine, nausea, blockage, or infection.

Ureteral Stricture

A scar-related narrowing of the ureter that can slow urine drainage and cause kidney swelling, side pain, infection, or reduced kidney function.

Ureteric Bud

A small outgrowth in the developing embryo that grows into the tissue that will form a kidney. It develops into the ureter, renal pelvis, calyces, and collecting ducts.

Alternate Names:
Metanephric Diverticulum

Ureteric Calculi

Alternate name; see *Ureteral Stones*.

Ureteric Colic

Severe, cramping pain caused by a stone moving through or blocking a ureter, the tube that carries urine from a kidney to the bladder. Pain often starts in the side or back and moves toward the lower abdomen or groin; blood in the urine, nausea, or vomiting may occur.

Alternate Names:
Ureteral Colic; Ureteral Calculus Pain

Ureteric Perforation

Alternate name; see *Ureteral Perforation*.

Ureteritis

Inflammation of the ureter, usually related to infection, obstruction, stone passage, instrumentation, or adjacent inflammatory disease. It may cause flank or abdominal pain, urinary symptoms, hematuria, and fever.

Ureterocele

A balloon-like dilation of the lower ureter where it enters the bladder, usually congenital; it can obstruct urine flow and cause infection, hydronephrosis, reflux, stones, or impaired renal function.

Ureterolithiasis

Alternate name; see *Ureteral Stones*.

Ureteropelvic Junction Obstruction

A blockage where the kidney's urine-collecting area joins the ureter. It may be present from birth or develop later and can cause kidney swelling, side pain, infections, stones, or loss of kidney function.

Ureteroscope

A thin camera instrument passed through the urinary passage to examine the ureter and kidney. It can help remove stones, take tissue samples, or place a stent.

Ureteroscopes

Alternate name; see *Ureteroscope*.

Ureteroscopy

Ureteroscopy uses a small endoscope passed through the urinary tract to inspect, biopsy, or treat ureteral or kidney stones and other lesions.

Ureterostomy Procedure

Surgery that creates an opening from a ureter to the skin or another urinary conduit to divert urine when normal drainage to the bladder is impossible or must be bypassed.

Urethra

The tube that carries urine from the bladder out of the body. In people with male reproductive anatomy it also carries semen; the shorter urethra in people with female reproductive anatomy makes bladder infections more likely.

Urethra Disorder

A condition affecting the urethra, such as infection, inflammation, stricture, trauma, congenital abnormality, or tumor, that may cause pain, discharge, weak stream, or retention.

Urethral Cancer

Alternate name; see *Urethral Carcinoma*.

Urethral Carcinoma

A rare cancer arising from the urethra. It may cause bleeding, a lump, discharge, pain, or difficulty urinating.

Urethral Caruncle

A small, usually benign red growth at the opening of the urethra, most often seen after menopause. It may cause bleeding, tenderness, or pain during urination.

Alternate Names:
Benign Meatal Vascular Polyp; Estrogen-Deficient Urethral Lesion

Urethral Catheter

A tube inserted through the urethra into the bladder to drain urine, obtain a specimen, instill medication, or monitor output. Urinary infection and urethral trauma are important risks.

Urethral Discharge

Fluid or pus coming from the urethral opening. It may result from urethritis, including a sexually transmitted infection, but can also follow irritation or injury.

Urethral Diverticulum

A pocket beside the urethra that connects with the urine tube, often developing after infection or blockage of nearby glands. It may cause burning urination, urine dribbling after voiding, repeated infections, pain during sex, or a vaginal-wall lump.

Urethral Fistula

An abnormal channel between the urethra and another epithelial surface, often the vagina or skin. It can cause continuous urine leakage, recurrent infection, and local irritation.

Urethral Hypermobility

Excessive movement of the urethra when abdominal pressure rises, contributing to urine leakage during coughing, lifting, or exercise.

Urethral Infection

Infection involving the urethra, commonly caused by bacteria, including sexually transmitted organisms. Symptoms may include burning urination, discharge, frequent urination, or pelvic discomfort.

Urethral Injury

Alternate name; see *Urethral Trauma*.

Urethral Meatus

The external opening of the urethra through which urine leaves the body. Its position may be abnormal in conditions such as hypospadias or epispadias.

Urethral Obstruction

Partial or complete blockage of urine leaving the bladder, often from stricture, stone, prostate disease, tumor, or a congenital valve. Acute retention can damage the bladder or kidneys.

Urethral Pressure Profile

A test using a small catheter to measure pressure along the urethra and assess how well it closes. It may help investigate certain types of urine leakage or difficulty emptying the bladder.

Urethral Prolapse

Protrusion of the inner lining of the urethra through its opening. It may appear as a red ring of tissue and can cause bleeding, pain, or difficulty urinating; it occurs most often in young children and after menopause.

Alternate Names:
Urethral Mucosal Prolapse; Meatal Eversion

Urethral Sling

A strip of synthetic material or the person's own tissue placed beneath the urethra to support it and reduce urine leakage during coughing, lifting, or exercise. Possible complications include urgency, difficulty urinating, infection, or erosion.

Urethral Sphincter

Muscles around the urine tube that help keep urine from leaking and relax when a person urinates. Nerve or muscle damage can weaken control and cause leakage or difficulty emptying the bladder.

Urethral Stenosis

Alternate name; see *Urethral Stricture*.

Urethral Stent

A small tube placed inside the urethra to help keep a narrowed or blocked segment open and allow urine to pass. Migration, blockage, infection, pain, or tissue injury can occur.

Urethral Stricture

A narrowing of the urethra, the tube that carries urine out of the body, usually caused by scar tissue. The narrowing can slow or block urine flow and may cause a weak or spraying stream, straining, pain with urination, dribbling, or incomplete bladder emptying. It can lead to repeated urinary infections, urinary retention, and, if severe or prolonged, damage to the bladder or kidneys. Causes include injury, infection, surgery, radiation, or previous use of a catheter or other instrument; sometimes no cause is found.

Urethral Syndrome

Urinary frequency, urgency, dysuria, or discomfort without a clear bacterial urinary-tract infection; causes may include irritation, pelvic-floor dysfunction, or inflammation.

Urethral Trauma

Injury to the urethra caused by a pelvic fracture, blunt or penetrating trauma, or medical instrumentation. It may cause bleeding at the urethral opening, difficulty passing urine, bruising, or leakage of urine into nearby tissues.

Urethritis

Inflammation of the urethra, often caused by infection, including sexually transmitted infections, but sometimes by irritation or injury. It can cause burning urination, itching, pelvic discomfort, or discharge.

Urethrocele

Prolapse of the urethra into the front wall of the vagina. It may cause a vaginal bulge, pelvic pressure, urine leakage, or difficulty emptying the bladder, but can also cause no symptoms.

Urethrography

An X-ray test in which contrast liquid outlines the urethra, the tube carrying urine out of the body. It can show narrowing, leaks, injury, abnormal connec-

tions, or birth differences.

Urethroplasty

Surgery that rebuilds or widens the urine tube, most often to treat a narrowing called a stricture. It may use nearby tissue or a graft and aims to improve urine flow.

Urethroscopy

Examination of the urethra with a thin camera passed through its opening. It can identify narrowing, injury, inflammation, stones, tumors, or other abnormalities and may allow treatment during the same procedure.

Urge Incontinence

Leakage of urine that happens with or just after a sudden, hard-to-delay need to urinate. It may occur with overactive bladder, infection, bladder irritation, nerve disease, or other conditions.

Alternate Names:
Detrusor Overactivity Incontinence; Urgency Urinary Incontinence

Urge Urinary Incontinence

Alternate name; see *Urge Incontinence*.

Urgency

A sudden, difficult-to-delay need to urinate. It may result from a urinary infection, bladder irritation, overactive bladder, a stone, nerve disease, prostate enlargement, or pelvic-floor problems.

URI (Upper Respiratory Infection)

Abbreviation; see *Upper Respiratory Tract Infection*.

Uric Acid

A waste product formed when the body breaks down purines. High blood levels can cause gout or kidney stones, although many people with high levels have no symptoms.

Uric Acid Nephrolithiasis

Formation or presence of kidney stones made mainly of uric acid. They form more readily when urine is persistently acidic and may not show on a plain X-ray, though they can be seen on CT.

Alternate Names:
Uric Acid Calculi

Uric Acid Nephropathy

Kidney injury caused when too much uric acid forms crystals in the kidney's small tubes. It can occur during rapid breakdown of cancer cells or severe uric-acid excess.

Uric Acid Stones

Stones composed mainly of uric acid that form in the kidney or elsewhere in the urinary tract. They form more readily in persistently acidic urine and may be associated with gout, high uric acid levels, or chronic diarrhea.

Uric Acid Urine Test

A urine test measuring uric acid excretion, used in evaluation of gout, kidney stones, uric-acid overproduction, and selected metabolic disorders.

Uricosuria

Excretion of uric acid in urine. The amount depends on uric-acid production, diet, kidney handling, and medicines. Excess urinary uric acid, called hyperuricosuria, can contribute to uric acid or calcium oxalate stones and may be assessed with a timed urine collection.

Uricosuric Drug

A medicine that increases renal excretion of uric acid, such as probenecid, used in selected patients with gout.

Uridine Triacetate

An oral prodrug that supplies uridine and is used as an emergency antidote for severe or life-threatening toxicity from fluorouracil or related fluoropyrimidines, under specialist direction.

Urinal

A portable container used to collect urine from someone who cannot easily reach a toilet. It should

be emptied, cleaned, and stored safely to reduce spills, odor, and infection risk.

Urinalysis

Laboratory examination of urine for its appearance, acidity, blood, cells, protein, sugar, ketones, bacteria, and other substances. It can provide clues to infection, kidney disease, bleeding, diabetes, dehydration, and other illness.

Urinary

Relating to urine or to the organs and processes involved in making, storing, and passing urine, including the kidneys, ureters, bladder, and urethra.

Urinary Anion Gap

A calculation using urine sodium, potassium, and chloride levels that indirectly estimates ammonium excretion. It can help assess the kidney response to some types of metabolic acidosis but does not by itself identify the cause.

Alternate Names:
UAG; Urine Net Charge

Urinary Bladder

A hollow muscular organ in the lower abdomen that stores urine until it is released through the urethra.

Urinary Bladder Disorder

A disease affecting bladder storage or emptying, including infection, overactivity, pain syndrome, stones, tumor, neurologic dysfunction, or outlet obstruction.

Urinary Bladder Squamous Cell Carcinoma Pathology

An invasive malignant squamous neoplasm of the bladder showing keratinization, intercellular bridges, or both. It may be associated with chronic irritation, infection, stones, or schistosomiasis and is assessed for depth of invasion.

Urinary Calculi

Hard deposits formed when substances in urine crystallize and aggregate in the kidneys, ureters, bladder, or urethra. Composition varies and may include calcium salts, uric acid, struvite, or cystine. Some pass without symptoms; others can cause renal colic, blood in urine, obstruction, infection, or kidney injury, depending on their size and location.

Urinary Casts

Small tube-shaped particles formed inside kidney tubules and passed in urine. Their appearance can provide clues about kidney inflammation, bleeding, infection, or damage.

Urinary Catheter

A hollow, flexible tube inserted through the urethra into the bladder to drain urine; it may be used intermittently or left in place.

Urinary Catheterization

Insertion of a tube into the bladder to drain urine, measure output, obtain a specimen, or deliver treatment; infection, trauma, and blockage are possible complications.

Urinary Catheters

Urinary catheters drain the bladder when a person cannot empty it normally or accurate urine measurement is needed, with risks including infection, trauma, blockage, and discomfort.

Urinary Diversion

Surgical or catheter-based rerouting of urine when the normal passage from the kidneys to the urethra cannot be used, often to a stoma or bowel reservoir.

Urinary Fistula

An abnormal connection between part of the urinary tract and another organ or the skin, allowing urine to leak outside its normal pathway. Causes include surgery, childbirth injury, inflammation, and cancer.

Urinary Frequency

The need to urinate more often than usual, which may result from infection, bladder irritation, increased urine production, or other urinary disorders.

Urinary Hesitancy

Alternate name; see *Urinary Hesitation*.

Urinary Hesitation

A delay or difficulty starting urination after a person is ready to void. Causes include prostate enlargement, urethral narrowing, medicines, pain, nerve disorders, or weak bladder contraction. Hesitancy is a symptom rather than a diagnosis; accompanying stream changes or incomplete emptying help characterize it.

Urinary Incontinence

Unwanted leakage of urine. It may happen with coughing or exercise, a sudden strong urge, an overfull bladder, difficulty reaching the toilet, or nerve and muscle problems. More than one pattern may occur in the same person.

Alternate Names:
Involuntary Urination; Loss of Bladder Control

Urinary Lithiasis

Alternate name; see *Urolithiasis*.

Urinary Retention

Inability to empty the bladder fully. It may be sudden and painful or develop gradually with a weak stream, frequent small amounts of urine, or leakage from an overfull bladder. Blockage, medicines, nerve problems, or weak bladder muscles can cause it.

Urinary Retraining

Scheduled toilet visits and bladder-control techniques used to reduce urgency, frequent urination, or leakage. It may include gradually extending the time between urination and practicing ways to delay an urge.

Urinary Stasis

Slowing or stopping of normal urine flow, which can promote urinary infection, stone formation, or obstruction-related kidney injury.

Urinary System

The kidneys, ureters, bladder, and urethra. Together they filter blood, make and transport urine, store and remove it, and help regulate fluid volume, electrolytes, acid-base balance, blood pressure, and hormone-related functions such as red-cell production.

Urinary Tract

The kidneys, ureters, bladder, and urethra. Together these organs make urine, carry it to the bladder, store it, and remove it from the body.

Urinary Tract Disorder

Any disease of the kidneys, ureters, bladder, or urethra, including infection, stones, obstruction, congenital abnormalities, cancer, and functional or neurologic disorders.

Urinary Tract Imaging

Imaging tests used to examine the kidneys, ureters, bladder, and urethra. Methods include ultrasound, X-ray studies, computed tomography, magnetic resonance imaging, and nuclear scans, chosen according to the suspected problem.

Urinary Tract Infection

Infection affecting part of the urinary tract. A bladder infection (cystitis) is a lower urinary tract infection; a kidney infection (pyelonephritis) is an upper infection. Symptoms vary by site and may include painful or frequent urination, urgency, fever, flank pain, or nausea. *Escherichia coli* is a common cause.

Urinary Tract Infection (UTI)

Alternate name; see *Urinary Tract Infection*.

Urinary Tract Infection In Adults

A urinary infection in an adult involving the bladder, urethra, kidneys, or another part of the urinary tract. Symptoms vary by site and may include painful urination, frequency, urgency, blood in the urine, fever, or flank pain.

Urinary Tract Infection In Children

A urinary infection in a child involving the blad-

der, kidneys, ureters, or urethra. Symptoms may include fever, painful or frequent urination, new wetting, abdominal or back pain, vomiting, or unusual irritability.

Alternate Names:
Pediatric UTI

Urinary Tract Infection In Pregnancy

A term covering asymptomatic bacteriuria and symptomatic infection of the urinary tract during pregnancy, including bladder or kidney infection. Kidney infection can cause serious maternal and fetal complications.

Urinary Tract Infections in Pregnancy

Alternate name; see *Urinary Tract Infection In Pregnancy*.

Urinary Tract Neoplasm

A benign or malignant growth in the kidneys, ureters, bladder, or urethra; evaluation depends on its site, symptoms, tissue type, and extent of spread.

Urinary Tract Obstruction

A blockage that slows or stops urine flow anywhere from the kidneys to the urethral opening. It can cause urine to back up, kidney injury, or infection.

Urinary Urgency

A sudden, difficult-to-delay need to urinate. It may occur with urinary infection, bladder irritation, overactive bladder, stones, neurologic disease, or other conditions.

Urination

The process of releasing urine from the bladder through the urethra and out of the body.

Alternate Names:
Micturition; Voiding

Urination Disorder

Abnormal storage or emptying of urine causing frequency, urgency, dysuria, incontinence, hesitancy, weak stream, retention, or excessive or reduced urine output.

Urine

The liquid waste produced by the kidneys, containing water and dissolved substances eliminated from the blood.

Urine 24-Hour Volume

Twenty-four-hour urine volume is the total urine produced in a day and helps assess hydration, kidney function, endocrine disease, or abnormal urine production.

Urine Albuminuria

Alternate name; see *Albuminuria*.

Urine Alkalinization

Treatment that makes urine less acidic, usually with a carefully monitored medicine, to help remove certain poisons such as salicylate. It can disturb body salts or fluid balance and is used only for selected cases.

Urine Amylase Test

A urine test that measures the amount of amylase passed from the body. It may help assess pancreatitis, salivary-gland problems, or unusually high amylase levels in the blood.

Alternate Names:
Urine Amylase; Urinary Amylase Test; Amylase Urine Test

Urine Analysis

Alternate name; see *Urinalysis*.

Urine Bilirubin Test

A urine test that detects conjugated (water-soluble) bilirubin. A positive result can occur with liver or bile-duct disease; unconjugated bilirubin does not normally pass into urine.

Alternate Names:
Urine Bilirubin; Urinary Bilirubin Test

Urine Calcium Test

A diagnostic urinalysis quantifying urinary calcium

excretion, typically measured in a 24-hour urine collection. It is utilized in the evaluation and metabolic workup of nephrolithiasis, hyperparathyroidism, osteomalacia, and idiopathic hypercalciuria.

Alternate Names:
Urinary Calcium; 24-Hour Urine Calcium; Urine Calcium Excretion

Urine Catecholamine Test

A urine test that measures catecholamines or their breakdown products. It may help assess certain hormone-producing tumors, such as pheochromocytoma or paraganglioma; tests of metanephrines are commonly preferred for these tumors.

Alternate Names:
24-Hour Urine Catecholamines; Urinary Catecholamines; Fractionated Urinary Catecholamines

Urine Chemistry

Measurement of chemical constituents in urine, such as glucose, protein, electrolytes, ketones, blood, and pH, to evaluate kidney function and systemic disease.

Urine Chloride Test

A test that measures chloride in urine. The result can help evaluate fluid and electrolyte disorders, including some causes of metabolic alkalosis, but must be interpreted with the clinical context and other laboratory results.

Alternate Names:
Urinary Chloride; Urine Chloride Excretion; Spot Urine Chloride

Urine Concentration Test

A test of the kidney's ability to concentrate urine, assessed by urine osmolality or specific gravity after controlled fluid conditions when appropriate.

Urine Conductivity

Urine conductivity measures how readily urine carries electrical current and reflects its dissolved electrolyte and solute concentration.

Urine Culture

A laboratory test that grows microorganisms from a urine specimen to identify urinary-tract infection and guide antimicrobial selection. Results may report the organism, quantity of growth, and antimicrobial susceptibility. Proper collection is important because contamination can produce misleading growth; results must be interpreted with symptoms and urinalysis.

Urine Cytology

Microscopic examination of cells shed into urine, mainly used to help detect high-grade urothelial carcinoma and some other abnormalities. A negative result does not exclude all urinary-tract cancers.

Urine Dipstick

A strip placed in urine that changes color to screen for findings such as blood, protein, sugar, ketones, and signs of infection. Abnormal results may need confirmation with other tests.

Urine Drainage Bag

A bag connected to a urinary catheter or diversion to collect urine.

Urine Electrolytes Test

A test measuring electrolytes, such as sodium, potassium, and chloride, in urine. Results can help assess kidney handling of electrolytes and contribute to evaluation of fluid, electrolyte, and acid-base disorders.

Alternate Names:
Urinary Electrolytes; Spot Urine Electrolytes; 24-Hour Urine Electrolytes

Urine Formation

The process by which the kidneys make urine: they filter blood, return needed water and substances to the body, and add selected wastes and extra ions to the fluid that leaves as urine.

Urine HCG Test

A urine test that detects human chorionic gonadotropin, a hormone produced during pregnancy.

Testing too early or using diluted urine can give a false-negative result; a positive result confirms pregnancy but does not show its location or health.

Alternate Names:
Urine hCG Test

Urine Hemoglobin

Free hemoglobin in urine, usually from breakdown of red blood cells within the circulation. A urine dipstick detects heme and can also be positive from intact red blood cells or myoglobin, so microscopy and other findings help distinguish these causes.

Urine Immunoelectrophoresis

A laboratory test that separates urine proteins and uses antibodies to identify specific proteins, including monoclonal immunoglobulins or light chains.

Alternate Names:
Urine IEP; Urinary Protein Immunoelectrophoresis

Urine Immunofixation

A laboratory test that uses electrophoresis and antibodies to identify specific proteins in urine, especially monoclonal immunoglobulins or light chains.

Alternate Names:
Urine IFE; Urinary Immunofixation Electrophoresis; Bence Jones Protein IFE

Urine Osmolality

A measure of how concentrated urine is. It helps assess whether the kidneys can conserve or remove water and must be interpreted with fluid intake, medicines, kidney function, and blood tests.

Urine pH

A measurement of urine acidity or alkalinity. It varies with diet, metabolism, medicines, infection, and kidney function and can influence the formation of some urinary stones.

Urine PH Test

Alternate name; see *Urine pH*.

Urine Protein Dipstick Test

A screening test using a reagent strip to detect mainly albumin in urine; positive results require confirmation and quantitative assessment when clinically indicated.

Urine Protein Electrophoresis Test

A laboratory test that separates urine proteins by electrical charge and size to help detect abnormal proteins, including monoclonal light chains associated with plasma-cell disorders.

Urine Retention

Alternate name; see *Urinary Retention*.

Urine Sediment

The cells, crystals, casts, and other particles seen under a microscope after urine is concentrated. Their appearance can provide clues to bleeding, infection, stones, or kidney inflammation.

Urine Sodium

The amount of sodium in urine. It can help assess fluid balance and kidney handling of salt, but results are strongly affected by diet, medicines, hydration, and the timing of the sample.

Urine Specific Gravity Test

A test comparing the density of urine with the density of water. It gives a rough estimate of how concentrated the urine is and can help assess hydration and the kidneys' ability to conserve water.

Urine Toxicology

Laboratory analysis of urine for medicines, drugs, or their metabolites. Results require interpretation because detection does not always establish impairment or the timing of exposure.

Urinoma

A collection of urine that has leaked into tissues around the kidney or urinary tract, usually because of an injury, blockage, or medical procedure. It may cause pain, swelling, or infection and may need drainage or repair.

Alternate Names:
Urine Pseudocyst

Urinometer

An instrument that measures how dense urine is compared with water. The result gives an estimate of urine concentration and may help assess hydration or the kidney's ability to conserve water.

Urobilinogen

A colourless product formed in the intestine from bilirubin and partly reabsorbed and excreted in urine; abnormal levels may provide clues to liver disease or haemolysis.

Urodynamic Testing

Alternate name; see *Urodynamics*.

Urodynamics

A group of tests that measures how the bladder stores urine, how pressure changes as it fills, and how the urethra and bladder release urine. It helps investigate leakage, urgency, weak stream, or difficulty emptying when simpler tests are inconclusive.

Uroflow

A test that measures how quickly and steadily urine leaves the body during urination. The result can suggest blockage, weak bladder muscles, or other emptying problems, but it is interpreted with symptoms and sometimes additional tests.

Uroflowmetry

A noninvasive test that measures the rate and pattern of urine flow during urination. Results can suggest blockage or weak bladder contraction but are interpreted with symptoms and other findings.

Urogenital

Relating to the urinary and reproductive systems or structures involving both. The term may describe organs, infections, cancers, birth conditions, injuries, symptoms, tests, or treatments affecting these closely connected body systems.

Urogenital Fistula

An abnormal connection between the urinary and genital tracts, such as a vesicovaginal or ureterovaginal fistula. It commonly causes continuous urinary leakage and requires specialist evaluation.

Urogenital Sinus

A birth-related abnormality in which the urethra and vagina join into a common channel before reaching the outside of the body. It may occur with differences in the external genitalia, urinary tract, or reproductive organs.

Urogenital System

The related urinary and reproductive organs and their associated ducts, vessels, and supporting tissues. The systems share developmental origins and anatomic relationships.

Urogenital Tract

The combined urinary and reproductive organs and passages. These include kidneys, urine tubes, bladder, urethra, reproductive organs, and connected structures that develop partly from related tissues before birth.

Urography

Imaging of the urinary tract, traditionally using X-rays after contrast dye is given. It can show the kidneys, urine tubes, bladder, narrowing, stones, leaks, blockage, or other structural problems.

Urokinase

A plasminogen activator produced by the body and also used as a thrombolytic medicine to help dissolve blood clots.

Urolithiasis

Formation or presence of stones in the urinary tract, including the kidneys, ureters, bladder, or urethra. Stones may contain calcium salts, uric acid, struvite, or cystine.

Urologic Diagnostic Yield

The proportion of tests or procedures in urology that produce a diagnostic result.

Urologist

A doctor who specializes in the urinary system and, in many practices, the male reproductive system. Urologists diagnose and treat kidney stones, infections, urine leakage, prostate problems, cancers, infertility, and conditions requiring procedures or surgery.

Urology

The medical specialty that diagnoses and treats diseases of the kidneys, urine tubes, bladder, and urethra, as well as the male reproductive organs. Treatment may include medicines, procedures, or surgery.

Uropathy

Disease or damage affecting the kidneys or urinary tract. Blockage, infection, stones, urine flowing backward, medicines, and other conditions can cause it and may reduce kidney function.

Urosepsis

A life-threatening whole-body response to a severe urinary infection. It may start in the bladder or kidney and cause fever or low temperature, confusion, low blood pressure, reduced urine, organ failure, or shock.

Urostomy

A surgically created opening that diverts urine from the urinary tract through the abdominal wall into an external pouch or appliance. It may be formed with a segment of intestine after bladder removal or when normal urinary drainage is not possible.

Urostomy Leak

Escape of urine beneath or around a urostomy appliance or from a surgical connection. Persistent leakage can irritate the skin and may signal poor appliance fit, obstruction, infection, or a surgical complication.

Urostomy Procedure

Surgery that diverts urine through a stoma into an external pouch or conduit, commonly after bladder removal or when the lower urinary tract cannot safely transport urine.

Urostomy Prolapse

Protrusion of a segment of bowel used as a urostomy stoma beyond its usual level. It may cause bleeding, swelling, appliance problems, or impaired urine drainage and should be assessed clinically.

Urostomy Stenosis

Narrowing of a urinary stoma or conduit that impedes drainage, causing reduced urine output, leakage, infection, or kidney-pressure changes and sometimes requiring revision.

Urothelial Carcinoma

A cancer arising from the stretchable lining of the urinary tract, most often the bladder but also the kidney's drainage area, ureters, or urethra. Blood in the urine is common, and treatment depends on location, depth, grade, and spread.

Urothelium

A specialized stretchable lining of the renal pelvis, ureters, bladder, and part of the urethra. It forms a protective barrier between urine and underlying tissues and allows the bladder to expand.

Urotrauma

Injury to the urinary or genital organs, including the kidneys, ureters, bladder, urethra, or external genitalia. It may result from blunt force, penetrating wounds, fractures, surgery, or medical instruments.

Ursodeoxycholic Acid

A hydrophilic bile acid used for primary biliary cholangitis and selected cholestatic liver diseases; it may also dissolve certain small cholesterol gallstones when bile flow is preserved.

Urticaria

A skin reaction causing transient, itchy raised welts that change location and usually resolve within 24 hours. It may occur with angioedema, which is deeper swelling often affecting the lips, eyelids, tongue, or extremities.

Urticaria Multiforme

A short-lived allergic-type rash in children that causes widespread, ring-shaped or target-like raised patches, often with swelling of the hands, feet, or face. It may follow an infection or medicine and usually fades without scarring.

Urticaria Pigmentosa

An older name for maculopapular cutaneous mastocytosis, a condition in which mast cells collect in the skin and form tan or brown spots or bumps that may swell and itch when rubbed. Some people also have symptoms from mast-cell chemicals released elsewhere in the body.

Urticarial Vasculitis

Inflammation of small blood vessels causing hive-like patches that usually last longer than 24 hours and may burn, bruise, or leave dark marks. It can be limited to the skin or linked with joint, kidney, lung, or other disease.

Usher Syndrome

An inherited condition causing hearing loss together with gradually worsening vision from retinal disease. The age and severity vary by type; hearing, vision, balance, communication, and genetic support may all be needed.

Ustekinumab

A biologic medicine that blocks immune signals involved in inflammation. It is used for psoriasis, psoriatic arthritis, Crohn disease, ulcerative colitis, and other approved conditions; infections and allergic reactions are important risks.

Usual Ductal Hyperplasia

A benign increase in the number of cells lining the breast ducts. The cells look close to normal, unlike the abnormal cells in atypical ductal hyperplasia; it is associated with a slight increase in breast cancer risk.

Usual Interstitial Pneumonia

A pattern of permanent scarring in the lungs, often seen in idiopathic pulmonary fibrosis. Scarring is usually greatest near the outer and lower parts of the lungs and can form small spaces called honeycombing. It causes increasing breathlessness and cough and is assessed with lung tests and CT imaging.

Usual Interstitial Pneumonia Pathology

A patchy, temporally heterogeneous interstitial fibrosing pattern with subpleural or paraseptal fibrosis, fibroblastic foci, architectural distortion, and honeycomb change. Clinical and radiologic correlation is required.

Ut Dict.

An abbreviation of the Latin phrase “ut dictum,” meaning “as stated” or “as directed.” In medical notes it refers the reader to information already given or to an instruction previously specified.

Uterine Adnexae

The structures beside and connected to the uterus, mainly the fallopian tubes, ovaries, and supporting tissues. Problems in these structures can cause pelvic pain, abnormal bleeding, infertility, or an ectopic pregnancy.

Uterine Artery Embolization

A minimally invasive procedure that blocks blood flow to uterine fibroids so they shrink. It can reduce heavy bleeding and pelvic pressure, but may cause pain, infection, or effects on fertility and future pregnancy.

Uterine Atony

Failure of the uterus to contract effectively after childbirth, which can cause heavy postpartum bleeding. It is the most common cause of postpartum hemorrhage.

Alternate Names:
Postpartum Uterine Atony

Uterine Balloon Tamponade

A treatment for severe bleeding after childbirth when medicines do not control bleeding. A soft balloon is placed inside the uterus and filled with sterile fluid to press against the uterine wall and slow or stop blood loss while other treatment is

arranged.

Uterine Bleeding

Bleeding from the uterus outside the expected menstrual pattern or in an abnormal amount. Causes include pregnancy complications, fibroids, polyps, hormonal changes, medicines, infection, and cancer; heavy or postmenopausal bleeding can have an underlying medical cause.

Uterine Cancer

Cancer arising in the uterus, most commonly from the endometrium. It may cause abnormal vaginal bleeding, bleeding after menopause, pelvic pain, or unusual discharge.

Uterine Cavity

The hollow space inside the uterus, lined by the endometrium. A fertilized egg normally implants in this lining, which thickens during the menstrual cycle and supports pregnancy; polyps, fibroids, scar tissue, or abnormal shape may affect it.

Uterine Compression Suture

A stitch placed around the uterus to press its walls together and control severe bleeding after childbirth when the uterus does not contract well. The B-Lynch suture is one example; other compression-suture techniques are also used.

Alternate Names:
Uterine Bracing Suture

Uterine Contraction

Tightening of the uterine muscle. Contractions occur during menstruation and labor and may also occur at other times, including as irregular practice contractions in pregnancy. Their timing, strength, and pattern vary with the cause.

Uterine Diseases

Conditions affecting the womb, including fibroids, adenomyosis, endometriosis, infection, unusual bleeding, prolapse, and cancer. Symptoms may include pain, heavy periods, infertility, pressure, discharge, or bleeding after menopause.

Uterine Fibroid

Alternate name; see *Uterine Fibroids*.

Uterine Fibroid Embolization

Alternate name; see *Uterine Artery Embolization*.

Uterine Fibroids

Noncancerous growths made of muscle and other tissue that develop in or on the uterus. Many cause no symptoms. Depending on their size and location, they may cause heavy or painful periods, pelvic pressure, frequent urination, constipation, or problems with fertility or pregnancy. They are also called leiomyomas or myomas.

Alternate Names:
Uterine Fibroid; Uterine Leiomyoma; Uterine Leiomyomas; Uterine Leiomyomata; Uterine Myoma; Uterine Myomas; Fibroid; Fibroids; Fibroid Tumor; Fibromyoma; Fibromyomas

Uterine Fistula

A uterine fistula is an abnormal passage connecting the uterus with another organ or the skin, often after surgery, childbirth injury, infection, or cancer.

Uterine Fornix

One of the shallow spaces at the top of the vagina surrounding the cervix. A clinician can examine these spaces during a pelvic examination, and selected procedures may use them as an access route.

Uterine Gland

A small gland in the lining of the uterus that produces fluid and helps support the early embryo. Its activity changes during the menstrual cycle and pregnancy.

Uterine Growths

Uterine growths may include fibroids, polyps, adenomyosis, or rarely cancer. They can cause heavy or irregular bleeding, pelvic pressure, pain, infertility, or no symptoms; examination and imaging determine the type and treatment.

Uterine Hemorrhage

Heavy or abnormal bleeding from the uterus, occurring during pregnancy, after childbirth, or at other times. Causes include pregnancy complications, fibroids, hormonal disorders, and malignancy; severe bleeding with dizziness or weakness is an emergency.

Uterine Inversion

A rare, life-threatening complication of childbirth in which the uterus turns partly or completely inside out and may protrude into or beyond the vagina. It can cause severe bleeding, shock, and intense pain. Treatment restores the uterus and controls blood loss.

Uterine Leiomyoma

Alternate name; see *Uterine Fibroids*.

Alternate Names:
Fibroid

Uterine Leiomyosarcoma

A rare malignant tumor of uterine smooth muscle that may cause abnormal bleeding, pelvic pain, or an enlarging mass; diagnosis is based on tissue examination and staging.

Uterine Monitoring

Recording how often and how long the uterus contracts during labor. Contraction strength may be estimated by touch or measured with a pressure sensor inside the uterus; monitoring helps assess labor patterns and the response to labor medicines.

Uterine Myomectomy

Surgical removal of uterine fibroids while preserving the uterus; it may be performed through hysteroscopy, laparoscopy, or open surgery depending on fibroid size and location.

Uterine Obstruction

Blockage that prevents normal passage through the uterus or cervix, which may cause menstrual outflow obstruction, infertility, pregnancy complications, or retained blood or tissue.

Uterine Perforation

A hole through the wall of the uterus, most often caused by an instrument used during a procedure such as hysteroscopy or removal of uterine tissue. It can cause internal bleeding or injury to nearby organs and may need repair.

Uterine Polyp

A growth from the lining of the uterus that sticks into its inner space. Most are not cancer. They may cause irregular or heavy bleeding, bleeding after menopause, or difficulty becoming pregnant, but often cause no symptoms. Some contain precancerous or cancer cells.

Alternate Names:
Uterine Polyps; Endometrial Polyp; Endometrial Polyps; Intrauterine Polyp; Intrauterine Polyps

Uterine Polyps

Alternate name; see *Uterine Polyp*.

Uterine Prolapse

Descent of the uterus toward or through the vaginal opening because pelvic-floor muscles and supporting tissues have weakened. It may cause pelvic pressure, a bulge, backache, urinary or bowel problems, or discomfort during sex; childbirth and aging increase risk.

Alternate Names:
Descensus Uteri; Uterine Herniation

Uterine Rupture

A full-thickness tear of the uterine wall that occurs in late pregnancy before labor or during labor. It most often involves a prior uterine surgical scar, especially after cesarean delivery or myomectomy, but can occur in an unscarred uterus. It may cause severe maternal hemorrhage and compromise fetal oxygen supply. Unlike scar dehiscence, complete rupture extends through the outer uterine layer.

Uterine Rupture in Pregnancy

Alternate name; see *Uterine Rupture*.

Uterine Sarcoma

Uterine sarcoma is a rare malignant tumor arising from uterine muscle, connective tissue, or related cells and may cause bleeding, pain, or an enlarging mass.

Uterine Tachysystole

More than five uterine contractions in 10 minutes, averaged over a 30-minute period during labor. The pattern is assessed together with the fetal heart rate because frequent contractions can be associated with fetal heart-rate changes.

Uterine Tube

A paired muscular tube that carries an egg from the ovary toward the uterus and is the usual site of fertilization.

Alternate Names:
Fallopian Tube; Oviduct

Uterine Tumors

Abnormal growths in or on the uterus. They include noncancerous fibroids and polyps as well as rare cancers; assessment depends on symptoms, imaging, and sometimes tissue testing.

Utero-Ovarian Ligament

A band of tissue connecting each ovary to the uterus. It helps hold the ovary in position within the pelvis and lies near the fallopian tube and other pelvic supporting tissues.

Alternate Names:
Ovarian Ligament; Proper Ovarian Ligament

Uteroplacental Insufficiency

Reduced blood flow or function of the placenta that limits the supply of oxygen and nutrients to the fetus. It may contribute to poor fetal growth or signs of fetal distress; causes include maternal health conditions and problems with placental development.

Alternate Names:
Placental Insufficiency

Uterosacral Ligament

One of two strong bands of tissue supporting the uterus and top of the vagina by attaching them toward the sacrum at the back of the pelvis. Weakness can contribute to pelvic-organ prolapse; endometriosis can also affect or cause pain in this area.

Uterus

A hollow muscular organ in the pelvis between the bladder and rectum. Its inner lining thickens to prepare for pregnancy and is shed during menstruation. A fertilized egg normally implants in this lining, and a fetus develops in the uterus during pregnancy.

Common name: Womb

Uterus Didelphys

A congenital condition in which two separate uteruses develop, often with two cervixes and a dividing wall in the vagina. Many people can become pregnant, but miscarriage, premature birth, abnormal fetal position, or other pregnancy complications are more common.

Alternate Names:
Double Uterus; Didelphic Uterus

Uterus Disorder

A condition affecting the uterus, including fibroids, adenomyosis, endometriosis, infection, abnormal bleeding, congenital anomalies, prolapse, and cancer.

Uterus Neoplasm

A benign or malignant growth arising in the uterus, including fibroids, endometrial cancer, and sarcomas; diagnosis depends on examination, imaging, and tissue sampling.

UTI

Alternate name; see *Urinary Tract Infection*.

Utricle

A small balance organ in the inner ear that senses head position and movement in a straight line, such as forward, backward, or side-to-side motion.

UV Light

Ultraviolet radiation, an invisible part of sunlight

or artificial light that can affect the skin and eyes and may cause sunburn, aging, or skin cancer.

Uvea

The middle layer of the eye, made up of the iris, ciliary body, and choroid. It controls the amount of light entering the eye, helps focus vision, and supplies blood to eye tissues.

Uveal Disease

A disorder of the iris, ciliary body, or choroid, including uveitis, tumors, vascular disease, and inflammation that may cause eye pain, photophobia, floaters, or visual loss.

Uveal Melanoma

The most common primary cancer inside the adult eye. It begins in pigment-producing cells of the iris, ciliary body, or choroid and may cause visual changes or be found during an eye examination; it can spread to other organs.

Uveal Neoplasm

A tumor arising in the uveal tract of the eye—the iris, ciliary body, or choroid; malignant melanoma may threaten vision and spread to distant organs.

Uveitic Glaucoma

Glaucoma that develops in a person with uveitis, inflammation inside the eye. Inflammation, scarring, or steroid treatment can raise eye pressure and damage the optic nerve.

Alternate Names:
Inflammatory Glaucoma

Uveitis

Inflammation of the uvea, the middle layer of the eye containing the iris, ciliary body, and choroid. It may also affect nearby eye tissues and may result from infection, immune-mediated disease, injury, or an unknown cause. Symptoms vary with the affected area and may include pain, redness, light sensitivity, floaters, or blurred vision.

Alternate Names:
Intraocular Inflammation

Uveoparotid Fever

A form of sarcoidosis causing fever, swelling of both parotid glands near the ears, and inflammation in the front of the eyes. It may also cause facial-nerve weakness; treatment depends on the organs affected and severity.

Uvula

A small, soft flap hanging from the back of the roof of the mouth. It helps with swallowing and speech; swelling can cause gagging, pain, snoring, or difficulty breathing.

Uvulitis

Inflammation and swelling of the uvula, the small tissue hanging at the back of the throat. Infection, allergy, injury, dehydration, or irritation may cause it; severe swelling or breathing difficulty can threaten the airway.

Uvulopalatopharyngoplasty

An operation that removes or reshapes parts of the soft palate, the hanging uvula, and the throat to widen the breathing passage. It may help selected people with obstructive sleep apnea, but can cause pain, swallowing changes, bleeding, or recurrence.

V

V-Fib

Alternate name; see *Ventricular fibrillation*.

Vaccination

Giving a vaccine to train the immune system to recognize a specific infection. Vaccination lowers the risk of illness, severe complications, and sometimes transmission; the recommended schedule depends on age, health, and local guidance.

Vaccination Schedule

A time-based plan for administering vaccines according to age, previous doses, medical conditions, exposure risks, and public-health guidance. Schedules vary by country and are updated as recommendations change.

Vaccinations/Immunizations During Pregnancy

Vaccines given during pregnancy are selected according to safety, disease risk, season, exposure, and local recommendations. Inactivated vaccines such as influenza and Tdap are commonly used when indicated, while some live vaccines are deferred until after pregnancy.

Vaccine

A vaccine trains the immune system to recognize a specific infection or toxin and respond more effectively. Vaccination lowers the risk of severe disease and helps protect communities.

Vaccine Allergy

An immune reaction to a vaccine or one of its ingredients. It may cause hives, swelling, breathing difficulty, or, rarely, anaphylaxis. Soreness and redness at the injection site are common vaccine reactions, but are not usually allergies.

Vaccine-Associated Paralytic Poliomyelitis

An extremely rare form of polio paralysis caused by a weakened poliovirus used in the oral polio vaccine changing back to a harmful form.

Alternate Names:
VAPP

Vaccines

Preparations that train the immune system to recognize a particular germ or toxin before exposure. They reduce the risk of infection and severe illness and may also reduce complications and spread.

Vaccines and Immunizations

Vaccines train the immune system to recognize specific pathogens or toxins and reduce the risk of infection, severe disease, complications, and transmission.

Vaccinia

A virus used to make smallpox vaccines. Rare accidental infection can cause a sore at the contact site or more widespread illness, especially in people with weakened immunity.

Vaccinia Virus

Vaccinia virus is a poxvirus used to make smallpox vaccines and studied in some experimental cancer treatments; accidental infection is uncommon but possible.

VACTERL Association

A pattern of birth defects affecting several of the spine, anus, heart, food pipe, windpipe, kidneys, or limbs. There is no single test; the pattern of differences is used to identify it and rule out other conditions.

Vacuum Curettage

A procedure that removes tissue from the uterus using suction, commonly for uterine evacuation or endometrial sampling. Risks include bleeding, infection, retained tissue, and rarely uterine injury.

Vacuum Delivery

Assisted vaginal birth using a suction cup placed on the baby's scalp. It may be used when labor is not progressing or the baby needs to be born promptly and can cause scalp injury, bleeding, or tears.

Vacuum Erection Devices

Devices with a cylinder and pump that draw blood into the penis to produce an erection. A flexible ring may hold the erection during sex; bruising, numbness, or discomfort can occur, especially if the ring is left on too long.

Alternate Names:
Vacuum Erection Pump; Penis Pump

Vacuum Extractor

A cup-shaped device applied to the fetal scalp to assist vaginal delivery when specific maternal or fetal indications are present.

Vacuum-Assisted Delivery

A vaginal birth assisted by a suction cup placed on the baby's scalp when labor is not progressing or the baby needs to be born promptly. It is used only when the cervix is fully open and the baby's position and head size are suitable. Possible complications include scalp injury, bleeding, or tears.

Vagabond's Disease

Older term for skin thickening (lichenification) and darkening caused by chronic body-louse infestation and repeated scratching. Changes often affect clothing-covered areas, including the waist, groin, thighs, and armpits. The term describes a skin manifestation of pediculosis corporis, not the infestation itself.

Alternate Names:
Parasitic Melanoderma

Vagal Maneuver

A physical action that affects the vagus nerve and can slow the heart's electrical activity. Examples include bearing down and, in clinical settings, certain pressure or cold-stimulation methods. These maneuvers may help assess or stop some fast heart rhythms.

Alternate Names:
Vagal Stimulation Technique; Parasympathetic Provocative Maneuver

Vagal Nerve Stimulation

Alternate name; see *Vagus Nerve Stimulation*.

Alternate Names:
VNS

Vagal Paraganglioma

A usually slow-growing tumor arising from nerve-related cells near the vagus nerve in the neck. It may cause a neck mass, hoarseness, swallowing difficulty, or nerve symptoms and can be identified with imaging and specialist assessment.

Vagina

A muscular, elastic canal connecting the cervix to the vaginal opening. It allows menstrual blood to leave the body, receives a penis or other objects during vaginal sex, and serves as the birth canal.

Vagina Carcinoma

Alternate name; see *Vaginal Cancer*.

Vagina Neoplasm

An abnormal growth in the vagina that may be benign, precancerous, or cancerous. It can cause bleeding, discharge, pain, or a lump, although early growths may cause no symptoms.

Vaginal Agenesis

A condition in which the vagina is absent or has not fully formed before birth. It may occur with differences in the uterus, kidneys, hearing, or spine; care is individualized and may include counseling, gradual treatment, or surgery when wanted.

Vaginal Atresia

Absence or complete blockage of the vaginal canal from birth. It may cause absent menstrual flow, repeated monthly pelvic pain, or difficulty with penetration.

Vaginal Atrophy

Thinning and reduced moisture of vaginal tissues, usually related to lower estrogen after menopause or other hormone changes. It can cause dryness, burning, itching, pain during sex, or urinary symptoms. The broader term genitourinary syndrome of menopause also includes vulvar and urinary symptoms.

Alternate Names:
Atrophic Vaginitis; Vulvovaginal Atrophy; Vaginal Dryness

Vaginal Bleeding

Unexpected, unusually heavy, or prolonged bleeding from the vagina, including bleeding between periods, after sexual intercourse, during pregnancy, or after menopause. Causes include hormonal changes, infection, pregnancy-related conditions, structural lesions, medications, and cancer.

Vaginal Bleeding Between Periods

Bleeding between menstrual periods may result from contraception, infection, pregnancy, polyps, fibroids, hormonal changes, or cancer. Persistent or heavy bleeding can have a serious cause.

Vaginal Bleeding During Early Pregnancy

Bleeding from the vagina during the first part of pregnancy can result from cervical changes, miscarriage, ectopic pregnancy, infection, or other conditions. A small amount may occur without a serious cause, but bleeding with heavy loss, severe or one-sided pain, shoulder pain, dizziness, or fainting can indicate a serious problem.

Vaginal Bleeding During Late Pregnancy

Bleeding from the vagina later in pregnancy may be caused by placenta previa, placental separation, labor, cervical disease, or other complications. Significant bleeding can be a serious pregnancy complication.

Vaginal Bleeding In Early Pregnancy

Alternate name; see *Vaginal Bleeding During Early Pregnancy*.

Vaginal Bleeding In Late Pregnancy

Alternate name; see *Vaginal Bleeding During Late Pregnancy*.

Vaginal Bleeding In Pregnancy

Bleeding from the vagina during pregnancy. Causes vary with the stage of pregnancy and include cervical changes, miscarriage, ectopic pregnancy, placental disorders, labor, and other conditions; see *Vaginal Bleeding During Early Pregnancy* and *Vaginal Bleeding During Late Pregnancy*.

Vaginal Cancer

A rare cancer of the vagina, most often arising from its surface lining. It may cause bleeding, discharge, pain, or a lump; treatment depends on its type, size, location, and spread.

Alternate Names:
Vaginal Carcinoma; Malignant Vaginal Neoplasm

Vaginal Candidiasis

Alternate name; see *Vulvovaginal Candidiasis*.

Vaginal Cuff

The upper end of the vagina that is closed with stitches after the uterus is removed during a hysterectomy.

Vaginal Cuff Dehiscence

An opening of the stitched upper end of the vagina after hysterectomy. It may cause pelvic pain, bleeding, discharge, or tissue bulging through the open-

ing.

Vaginal Cysts

Vaginal cysts are fluid-filled or tissue-lined sacs in or beside the vaginal wall, commonly benign but sometimes causing pain, pressure, infection, or obstruction.

Vaginal Dilator

A smooth device used to gently stretch or keep open the vaginal canal when it has become narrow or short because of scarring, surgery, radiation, or a difference present from birth.

Vaginal Discharge

Vaginal discharge may be normal or may indicate infection, inflammation, hormonal change, or another condition. Normal discharge is usually clear to whitish and odourless and varies with the menstrual cycle, pregnancy, sexual arousal, and some contraceptives.

Vaginal Dryness

Reduced vaginal lubrication, commonly associated with menopause, breastfeeding, hormonal changes, medications, or irritation. It may cause discomfort, itching, painful intercourse, or minor bleeding.

Vaginal Dysplasia

Alternate name; see *Vaginal Intraepithelial Neoplasia*.

Vaginal Fistula

An abnormal passage between the vagina and another organ, commonly the bladder or rectum. It may cause continuous urine or stool leakage, infection, skin irritation, and emotional distress.

Vaginal Foreign Body

An object retained in the vagina, most often a tampon or other inserted material. It may cause discharge, odor, bleeding, pain, or infection.

Vaginal Fornix

One of the recesses surrounding the cervix where the vagina meets the cervix. The posterior fornix is adjacent to the peritoneal cul-de-sac and is relevant in pelvic examination and some procedures.

Vaginal Fusion And Duplication

Birth-related differences in which the vaginal canal is partly joined, divided, or duplicated. They may occur with abnormalities of the uterus, cervix, urinary tract, or external genitalia and may cause obstruction, pain, menstrual problems, or difficulty with intercourse.

Vaginal Health

Vaginal health includes normal vaginal tissues, fluids, microorganisms, and comfort. Persistent odor, itching, pain, bleeding, or unusual discharge can indicate infection or another condition.

Vaginal Hematoma

A collection of blood within the vaginal wall or surrounding tissues, usually caused by childbirth, trauma, or surgery and potentially producing severe pain, swelling, or blood loss.

Vaginal Hemorrhage

Heavy or clinically significant bleeding from the vagina. Causes include childbirth, pregnancy complications, trauma, infection, structural disease, hormonal disorders, and gynecologic cancer; severe or pregnancy-related bleeding can be life-threatening.

Vaginal Hypoplasia

Vaginal hypoplasia is underdevelopment of the vagina, usually present from birth. It may occur with other reproductive or urinary-tract differences and can affect menstruation, sexual function, or fertility.

Vaginal Hysterectomy

Surgical removal of the uterus through the vagina. It may be used for selected benign uterine conditions and usually avoids an abdominal incision, although suitability depends on anatomy and disease.

Vaginal Inflammation

Alternate name; see *Vaginitis*.

Vaginal Intercourse

Sexual activity involving insertion into the vagina, commonly of a penis or sex toy. Pregnancy can result when sperm enter the vagina.

Vaginal Intraepithelial Neoplasia

Abnormal squamous cells confined to the vaginal lining, often associated with persistent human papillomavirus infection. Low-grade changes often regress; high-grade changes (VaIN 2 or 3) are precancerous and may progress to vaginal cancer. It is not invasive cancer.

Alternate Names:
VaIN; Vaginal Dysplasia

Vaginal Introitus

The entrance to the vagina. It is part of the external genital area and may be examined when assessing pain, infection, injury, scarring, or pelvic-floor problems.

Vaginal Itching

Itching or irritation in or around the vagina, often involving the vulva. Causes include candidiasis, some sexually transmitted infections, dermatitis, hormonal changes, and other conditions; bacterial vaginosis more often causes odor or discharge than itching.

Vaginal Laceration

A tear in the vaginal tissue, often caused by childbirth, sexual activity, trauma, or a medical procedure. It may cause pain, swelling, or bleeding.

Vaginal Lubrication

Natural moisture made by the vaginal tissues and nearby glands. It usually increases with sexual arousal and may decrease with hormonal changes, some medicines, illness, or irritation.

Vaginal Membrane

A thin fold of tissue associated with the vagina. The term may refer to the hymen at the vaginal opening or to an abnormal membrane that blocks the vaginal canal.

Vaginal Microbiome

The community of microorganisms living in the vagina. Many healthy vaginal microbiomes are dominated by Lactobacillus species, which help maintain an acidic environment; changes in the community can be associated with bacterial vaginosis and other conditions.

Vaginal Mucosa

The moist inner lining of the vagina. It contains folds that allow the vaginal canal to stretch and helps protect the tissue.

Vaginal Odor

An unusual or unpleasant odor from vaginal discharge that may result from bacterial vaginosis, infection, retained material, hormonal changes, or other conditions.

Vaginal Opening

The external entrance to the vagina. It is part of the vulvar vestibule and may be affected by infection, inflammation, trauma, scarring, or congenital variation.

Vaginal Pessary

A removable device placed in the vagina to support the vaginal walls or nearby pelvic organs, usually for pelvic-organ prolapse or some forms of urine leakage.

Vaginal pH

A measure of how acidic the vagina is. The vaginal environment is normally mildly acidic, and the pH can change with hormones, semen, blood, medicines, or infection.

Vaginal Prolapse

Downward bulging of a vaginal wall because the tissues supporting the vagina have weakened. The bulge may involve the bladder, rectum, or the top

of the vagina after hysterectomy.

Vaginal Rugae

Soft folds in the inner lining of the vagina that allow it to stretch and return toward its usual shape.

Vaginal Seeding

Placing vaginal fluid on a baby born by cesarean section in an attempt to expose the baby to the parent's vaginal microorganisms. Clear health benefits have not been established, and harmful infections may be transmitted.

Vaginal Speculum

An instrument inserted into the vagina and gently opened to separate the vaginal walls and visualize the vagina and cervix. It may be used for pelvic examination, cervical cytology such as a Pap test, swab collection, assessment of bleeding or discharge, and selected procedures. Size and design are chosen according to anatomy, comfort, and the clinical purpose.

Vaginal Stenosis

Narrowing or shortening of the vaginal canal, which may result from surgery, radiation, scarring, inflammation, trauma, or congenital development. It can cause pain, difficult examination, or difficulty with penetration.

Vaginal Swab

A sample of fluid or cells collected from the vagina for laboratory testing, often to look for infection or other changes.

Vaginal Trauma

Injury to the vaginal tissues caused by childbirth, sexual activity, foreign objects, procedures, or blunt or penetrating trauma. It may cause bleeding, pain, swelling, or urinary symptoms; severe bleeding or deep injury can be serious.

Vaginal Ultrasound Probe

A specialized endocavitary ultrasound transducer used through the vagina to produce images of the uterus, cervix, ovaries, nearby pelvic structures, or an early pregnancy. It sends and receives sound waves and does not use ionizing radiation.

Alternate Names:
Endovaginal Transducer Transvaginal Ultrasound Transducer

Vaginal Vault Prolapse

Descent of the top of the vagina into or through the vaginal opening, usually after removal of the uterus. It may cause pelvic pressure, a bulge, backache, or difficulty emptying the bladder or bowel; pelvic-floor therapy, a support device, or surgery may help.

Alternate Names:
Post-Hysterectomy Vault Prolapse; Apical Prolapse

Vaginal Vestibule

The space of the vulva between the labia minora that contains the external openings of the urethra and vagina and the ducts of the greater and lesser vestibular glands.

Vaginal Wall

The layers of muscle, connective tissue, and moist lining that form the walls of the vaginal canal.

Vaginal Yeast Infection

Alternate name; see *Vulvovaginal Candidiasis*.

Vaginectomy

Surgical removal of part or all of the vagina, usually to treat selected cancers or severe disease; effects may include changes in sexual function, fertility, urination, and bowel function.

Vaginismus

Alternate name; see *Genito-Pelvic Pain/Penetration Disorder*.

Vaginitis

Inflammation or irritation of the vagina that may cause discharge, itching, burning, odor, pain, or discomfort with urination or sex. Causes include infections, hormones, chemicals, allergies, and tissue dryness.

Vaginoplasty

Vaginoplasty is surgery to create, repair, or reshape the vagina. It may be performed for congenital differences, injury, cancer treatment, pelvic-floor problems, or gender-affirming care.

Vaginospasm

Alternate name; see *Genito-Pelvic Pain/Penetration Disorder*.

Vagotomy

Surgery that cuts selected branches of the vagus nerve to reduce signals that stimulate stomach acid and movement. It was once used for difficult stomach ulcers but is now uncommon because medicines and less invasive treatments are available.

Vagus Nerve

The tenth cranial nerve, carrying signals between the brain and the heart, lungs, throat, voice box, and digestive tract. It helps regulate heart rate, breathing, swallowing, voice, and digestion.

Vagus Nerve Stimulation

A treatment that sends regular, mild electrical pulses to the vagus nerve through an implanted device in the chest or, in some settings, a handheld device. It is used for selected epilepsy, treatment-resistant depression, and other conditions; benefits may take time and side effects can include voice change, cough, or throat discomfort.

Valacyclovir

An antiviral medicine that the body changes into acyclovir to stop herpes viruses from multiplying. It treats cold sores, genital herpes, and shingles; the dose may need adjustment in kidney disease, and excessive levels can affect the nervous system.

Valganciclovir

An antiviral medicine used mainly to prevent or treat cytomegalovirus infection after transplantation. The body changes it into ganciclovir, which blocks viral multiplication; it can lower blood counts, injure the kidneys, affect fertility, and harm a fetus.

Valgus

A limb or joint deformity in which the part farther from the body bends outward, away from the body's center line. Examples include a bunion and knock-knees.

Valgus Stress Test

A physical examination manoeuvre used to assess the structural integrity of medial collateral ligaments, most commonly at the knee or elbow. A medial-directed force is applied to the joint while stabilizing the limb; excessive joint opening, laxity, or pain indicates a medial collateral ligament sprain or rupture.

Valinemia

A rare inherited condition in which the body cannot process the amino acid valine normally. High valine levels may cause feeding problems, low muscle tone, developmental delay, or other nervous-system symptoms.

Valley Fever

The common name for coccidioidomycosis, a fungal infection caused by Coccidioides species and acquired by inhaling airborne spores from soil. It usually causes a mild respiratory illness but can disseminate to skin, bone, joints, or meninges, especially in people at higher risk.

Valproate

An antiseizure medicine also used for selected mood disorders. It can affect the liver, pancreas, blood cells, weight, and fetal development, so age, pregnancy possibility, other illnesses, and medicines must be considered.

Alternate Names:
Valproic Acid; Divalproex Sodium

Valproate Toxicity

Harm from an overdose or other excessive exposure to valproate. It may cause sleepiness, vomiting, low blood pressure, slowed breathing, or coma; high ammonia, liver injury, and metabolic abnormalities may also occur.

Valproic Acid

A medicine used for certain seizures, bipolar disorder, and migraine prevention. It can cause liver injury, pancreatitis, birth defects, and developmental harm during pregnancy.

Valproic Acid Toxicity

Alternate name; see *Valproate Toxicity*.

Valrubicin

A chemotherapy medicine placed directly into the bladder for selected bladder cancers that have not responded adequately to other treatment. It can cause bladder irritation, blood in the urine, infection, and, rarely, effects throughout the body.

Valsalva

Alternate name; see *Valsalva Maneuver*.

Valsalva Maneuver

Forceful expiration against a closed airway, often performed by bearing down. It changes pressure in the chest and affects heart rate and blood pressure; the maneuver is used in selected examinations and procedures.

Valsalva Retinopathy

Preretinal (subhyaloid or sub-internal limiting membrane) hemorrhage occurring within the macula following a sudden, dramatic rise in intrathoracic or intra-abdominal pressure (such as from forceful coughing, vomiting, or heavy lifting) that transmits back through the valveless venous system into retinal capillaries.

Valsalva's Manoeuvre

Alternate spelling; see *Valsalva Maneuver*.

Valsartan

Valsartan is an angiotensin-II receptor blocker used for hypertension, heart failure, and selected cardiovascular indications; hyperkalaemia, renal-function changes, hypotension, and fetal toxicity are important risks.

Valves

Structures that permit fluid or blood to move predominantly in one direction and prevent backward flow; cardiac valves and venous valves are important examples.

Valvotomy

Surgical or catheter-based division of narrowed valve tissue to improve blood flow, most often performed for selected stenotic heart valves.

Valvulae Conniventes

Large, permanent transverse circular folds of the mucous membrane and submucosa that project into the lumen of the small intestine (most prominent and numerous in the jejunum), which do not disappear with intestinal distension and act to triple the mucosal surface area for absorption.

Alternate Names:
Plicae Circulares; Kerckring Folds

Valvular Disease

Alternate term; see *Heart valve disease*.

Valvular Endocarditis

Alternate name; see *Endocarditis*.

Valvular Heart Disease

A broad spectrum of structural and functional disorders affecting one or more of the four cardiac valves (aortic, mitral, tricuspid, pulmonic), classified hemodynamically as valvular stenosis (narrowing and outflow obstruction) or valvular regurgitation (insufficiency and backward flow).

Alternate Names:
VHD

Valvular Insufficiency

Incomplete closure of a heart valve, allowing blood to leak backward when the heart contracts or relaxes. It can affect the mitral, aortic, tricuspid, or pulmonary valve and may eventually strain the heart.

Valvuloplasty

A procedure used to widen or repair a narrowed or abnormal heart valve, by balloon catheter or open surgery depending on the valve and condition.

Valvulotomy

A procedure that cuts open a narrowed heart valve to improve blood flow. It may be performed with a catheter or surgery; the valve can leak afterward and narrowing may recur.

Van der Woude Syndrome

An autosomal dominant congenital disorder caused by mutations in the IRF6 gene, characterized by the combination of paramedian lower-lip pits (fistulae), cleft lip, and cleft palate, representing the most frequent form of syndromic orofacial clefting.

Alternate Names:
VWS; Lip-Pit Syndrome

Vancomycin

An antibiotic used for selected serious bacterial infections and, by mouth, for certain infections of the large intestine. It can cause infusion reactions, kidney injury, hearing problems, or low blood counts and requires medical monitoring.

Vancomycin Flushing Reaction

A reaction that can occur when vancomycin is given too quickly into a vein. It may cause flushing, warmth, itching, and redness of the face, neck, and upper body.

Alternate Names:
Red Man Syndrome; Red Neck Syndrome

Vancomycin-Resistant Enterococcus

Enterococcus bacteria that are resistant to vancomycin, usually because of altered cell-wall precursors. VRE can cause healthcare-associated urinary, bloodstream, wound, or other infections and may require susceptibility-guided treatment.

Vandetanib

A targeted cancer medicine used for selected medullary thyroid cancers. It blocks signals that help cancer cells grow and blood vessels form; diarrhea, high blood pressure, skin effects, and dangerous heart-rhythm changes require monitoring.

Vaping

Vaping uses an electronic device to heat a liquid and produce an aerosol for inhalation. Aerosols may contain nicotine and other substances that can harm the lungs and cause dependence.

Vaporiser

A device that converts a liquid medicine or volatile substance into a vapor for inhalation or controlled delivery, such as in anesthesia.

Variable Decelerations

Brief drops in a baby's heart rate that vary in timing and shape, often caused by pressure on the umbilical cord during labor. Occasional drops may be harmless, but frequent or prolonged drops require assessment of the baby's oxygen supply.

Variant Angina Pectoris

Chest pain caused by a temporary tightening of an artery supplying the heart, often occurring at rest or at night. Episodes may be severe and can disturb the heart rhythm; sudden or prolonged chest pain needs emergency care.

Alternate Names:
Prinzmetal Angina; Vasospastic Angina

Variant CJD

A rare prion disease linked to eating food contaminated with the agent that causes bovine spongiform encephalopathy in cattle. It differs from classic Creutzfeldt-Jakob disease in its typical age, early symptoms, and tissue findings.

Variant Classification

The process of estimating whether a genetic change is harmless, uncertain, or likely to cause disease. Specialists use laboratory evidence, family history, population data, and the person's clinical findings.

Varibaculum Cambriense

A bacterial species in the genus Varibaculum reported from human clinical specimens. Its role may be opportunistic and requires identification with the clinical context and susceptibility data.

Variceal Band Ligation

A procedure using a flexible camera to place small bands around enlarged veins in the food pipe. The bands stop blood flow through the veins and are used to control or prevent bleeding.

Alternate Names:
Endoscopic Variceal Ligation; EVL

Variceal Hemorrhage

Severe bleeding from enlarged, fragile veins in the food pipe or stomach, usually caused by high pressure in the liver's blood vessels. It can cause vomiting blood, black stools, shock, and death without urgent treatment.

Alternate Names:
Variceal Bleeding

Varicella

A primary infection with varicella-zoster virus that causes fever and a generalized itchy rash. See *Chickenpox*.

Alternate Names:
Chickenpox

Varicella-Zoster Virus

The virus that causes chickenpox and shingles. After chickenpox, it can remain inactive in nerve tissue and reactivate years later as a painful, blistering rash called shingles.

Varicellovirus

Varicellovirus is a genus of herpesviruses that includes varicella-zoster virus, the cause of chickenpox and shingles.

Varices

Abnormally enlarged, twisted veins. Varices in the esophagus or stomach are often caused by portal hypertension; varicose veins in the legs are usually related to impaired vein-valve function.

Varicocele

Enlarged veins in the bundle that drains blood from a testicle, usually on the left side of the scrotum. It may feel like a soft, tangled mass and can cause a dull ache, reduced growth of the affected testicle, or lower sperm production. Many varicoceles cause no symptoms or fertility problems.

Varicocele Embolization

A procedure that uses a thin tube to place coils or another material in enlarged scrotal veins. This blocks abnormal backward blood flow and reduces pressure in the veins.

Varicose Ulcer

An open sore near the ankle caused by long-term poor drainage through the leg veins. It may be surrounded by swelling or skin discoloration and often needs compression and treatment of the underlying vein problem.

Varicose Vein

An abnormally enlarged and twisted superficial vein, usually in the leg, caused by venous-wall weakness or valve dysfunction that permits blood pooling.

Varicose Veins

Enlarged, twisted superficial veins, usually in the legs, caused by weak or damaged vein walls or valves that allow blood to pool and flow backward. They may cause visible bulging veins, aching, heaviness, itching, cramps, swelling, skin discoloration, bleeding, superficial inflammation or clotting, and difficult-to-heal venous ulcers.

Varicose Veins (Spider Veins)

Related terms, not synonyms: varicose veins are enlarged, often bulging veins; spider veins are smaller dilated vessels near the skin. See *Varicose Veins* and *Spider Veins*.

Varicose Veins and Venous Insufficiency

Enlarged superficial veins and inadequate return of

blood from the legs because venous valves or the vein wall do not work effectively. Aching, heaviness, swelling, skin discoloration, dermatitis, and ulcers may occur.

Variegate Porphyria

An inherited disorder of heme production that can cause attacks of abdominal pain, vomiting, nerve symptoms, confusion, or dark urine and can also cause fragile, blistering skin after sunlight exposure.

Variola

A highly contagious and deadly disease caused by variola virus, eradicated globally by 1980 through vaccination. See Smallpox.

Varix

An abnormally dilated, tortuous vein; multiple varices commonly occur in portal hypertension or chronic venous disease.

Varus

A limb or joint deformity in which the part farther from the body bends inward, toward the body's center line. Examples include bowlegs and some inward-turning foot deformities.

Varus Stress Test

A clinical examination manoeuvre used to evaluate the lateral collateral ligaments of a joint, particularly the knee or elbow. A lateral-directed force is applied across the joint line while stabilizing the limb; increased laxity, gapping, or localized pain signifies injury to the lateral collateral ligament complex.

Vas

A duct or vessel; in reproductive anatomy, the vas deferens transports sperm from the epididymis toward the ejaculatory duct.

Vas Deferens

A muscular tube that carries sperm from the epididymis toward the urethra during ejaculation.

Vasa Deferentia

Alternate name; see *Vas Deferens*.

Vasa Efferentia

Small tubes that carry sperm from the testicle's collecting channels to the epididymis, where sperm mature. They also remove some fluid and help move sperm onward.

Vasa Previa

An obstetric condition in which unprotected fetal blood vessels run within the membranes over or close to the internal cervical opening, commonly because of velamentous umbilical cord insertion or vessels connecting separate placental lobes. The vessels may rupture when the membranes break or labor begins, causing rapid fetal hemorrhage. Unlike placenta previa, the vessels rather than placental tissue lie over or near the opening.

Vasa Recta

Long, hairpin-shaped blood vessels in the inner part of the kidney. They run beside the loops of Henle and help the kidneys concentrate urine.

Vasa Vasorum

Small blood vessels in the walls of large arteries and veins. They supply oxygen and nutrients to the outer parts of these vessel walls.

Vascular

Relating to blood vessels or, sometimes, lymphatic vessels. Vascular conditions include narrowed or blocked arteries, aneurysms, blood clots, abnormal vessel connections, and problems with veins; the term may also describe tests, surgery, or medicines involving these vessels.

Vascular Access

A route into a blood vessel for medicines, fluids, blood tests, monitoring, or dialysis. It may be a short-term catheter, a surgically joined artery and vein, or a synthetic graft, depending on the purpose and expected duration.

Vascular Access For Hemodialysis

A route that allows blood to leave the body and return during dialysis. It may be a joined artery and vein, a synthetic graft, or a large vein catheter; each has different risks of infection, clotting, and failure.

Vascular Balloon Catheter

An inflatable balloon mounted at the distal tip of a flexible vascular catheter used to dilate stenotic or occluded blood vessels during angioplasty, deliver and expand endovascular stents, or temporarily occlude vascular flow.

Alternate Names:
Angioplasty Balloon; Vascular Balloon Dilator; Balloon Catheter

Vascular Bed

The network of blood vessels supplying a particular organ or tissue. Its vessels widen or narrow to adjust blood flow according to the tissue's needs.

Vascular Bypass

Surgery that uses a vein or artificial tube to carry blood around a blocked part of an artery and restore blood flow.

Alternate Names:
Surgical Bypass; Bypass Grafting; Arterial Bypass Graft

Vascular Claudication

Alternate name; see *Claudication*.

Vascular Clip

A small device placed during a procedure to close or control a blood vessel. It may stop bleeding, prevent blood flow to a selected area, or secure a vessel permanently.

Alternate Names:
Hemostatic Clip; Surgical Vessel Clip; Ligation Clip

Vascular Compliance

The change in a blood vessel's volume in response to a change in pressure. More compliant vessels expand more for a given pressure increase.

Vascular Complications

Problems involving blood vessels after disease, injury, or a procedure, such as bleeding, hematoma, thrombosis, embolism, vessel injury, or reduced blood flow to a limb. Symptoms and urgency depend on the vessel and tissue affected.

Vascular Dementia

Problems with thinking, memory, mood, or walking caused by strokes or long-term damage to the brain's small blood vessels. Symptoms may appear suddenly or gradually, and treatment focuses on preventing further vessel damage and supporting daily function.

Alternate Names:
VaD; Multi-Infarct Dementia; Vascular Cognitive Impairment

Vascular Disease

Vascular disease affects arteries, veins, or lymphatic vessels and includes atherosclerosis, aneurysm, peripheral artery disease, venous thrombosis, varicose disease, and inflammatory disorders. Symptoms and treatment depend on the vessel and may involve risk-factor control, medicines, procedures, or surgery.

Vascular Ehlers-Danlos Syndrome

A rare inherited connective-tissue disorder that makes arteries and hollow organs unusually fragile. It may cause thin translucent skin, easy bruising, characteristic facial features, or serious spontaneous blood-vessel or bowel rupture; specialist care and genetic counseling are important.

Alternate Names:
vEDS; Ehlers-Danlos Syndrome Type IV

Vascular Embolic Particles

Small materials placed in a blood vessel during a procedure to block blood flow. They may be used to control bleeding or reduce blood flow to a tumor, fibroid, or other abnormal area.

Alternate Names:
Vascular Embolization Particle

Vascular Embolization

Intentional blockage of a blood vessel with material delivered through a catheter. It may stop bleeding, reduce blood flow to a tumor, or close an aneurysm or abnormal vessel connection.

Alternate Names:
Catheter Embolization; Therapeutic Embolization

Vascular Embolization Coil

A catheter-delivered wire device used to block selected blood vessels, often to treat aneurysms or bleeding.

Alternate Names:
Endovascular Coil

Vascular Embolization Plug

A vascular occlusion device used to block a selected vessel under image guidance. A device placed in a blood vessel to block selected blood flow during image-guided treatment.

Alternate Names:
Vascular Occlusion Plug; Embolization Plug

Vascular Endothelial Growth Factor

A protein that helps new blood vessels form and makes blood vessels more leaky. Some medicines block it to treat certain eye diseases and cancers.

Alternate Names:
VEGF; Vascular Permeability Factor

Vascular Endothelial Growth Factor Inhibitor

A medicine that blocks vascular endothelial growth factor, a protein that helps blood vessels grow. These medicines are used for some cancers and eye diseases involving abnormal new blood vessels.

Alternate Names:
Anti-VEGF Agent

Vascular Endothelial Growth Factor Inhibitors

Alternate name; see *Vascular Endothelial Growth Factor Inhibitor*.

Vascular Forceps

Surgical forceps designed to handle blood vessels, clots, tissue, or medical materials during vascular procedures. Appropriate use helps avoid crushing or tearing delicate vessels.

Alternate Names:
Vascular Surgical Forceps

Vascular Graft

A tube used to replace or bypass a damaged or blocked blood vessel. It may be made from a person's vein or from a synthetic material; possible problems include infection, bleeding, narrowing, or a clot blocking the graft.

Vascular Graft Patency

The continued openness and useful blood flow through a blood-vessel graft or bypass. A clot, narrowing, infection, or scar growth can block it, so examination and sometimes ultrasound are used for monitoring.

Vascular Hemostat

A surgical clamp used to temporarily occlude a blood vessel and control bleeding.

Alternate Names:
Vascular Clamp; Atraumatic Hemostasis Forceps

Vascular Imaging

Tests that show blood vessels and sometimes measure blood flow. Ultrasound, CT, MRI, or catheter-based imaging can find narrowing, blockage, aneurysm, dissection, clot, bleeding, or abnormal vessels; the safest test depends on the body area, urgency, kidney function, and contrast risks.

Vascular Laser Therapy

A treatment that uses laser energy to close or change selected blood vessels. The laser may be applied through the skin or through a thin tube.

Alternate Names:
Vascular Laser Treatment

Vascular Ligation

Surgical tying, clipping, or sealing of a blood vessel

to stop bleeding or redirect blood flow. It may be used during surgery or to treat selected abnormal vessels.

Alternate Names:
Vessel Clipping

Vascular Malformation

A blood-vessel or lymph-vessel structure that developed abnormally before birth. It may cause a skin mark, swelling, pain, bleeding, or pressure on nearby organs; effects depend on its type and location.

Vascular Needle Holder

A surgical instrument used to hold and guide fine suture needles during repair of blood vessels. It permits precise stitches while minimizing crushing or tearing of delicate vessel walls.

Alternate Names:
Vascular Suturing Needle Holder

Vascular Pain

Pain caused by impaired blood flow, often appearing in a limb with exertion as claudication or, in more severe disease, at rest.

Vascular Patch Graft

A piece of biological or synthetic material sewn onto a blood vessel to widen or repair it.

Alternate Names:
Angioplasty Patch

Vascular Retraction

To pull a vessel or tissue away from an operative field using a surgical retractor.

Alternate Names:
Vessel Retraction; Surgical Vessel Exposure

Vascular Ring

A birth defect in which blood vessels around the heart form a ring that can press on the windpipe or food pipe. It may cause noisy breathing, cough, repeated chest infections, swallowing difficulty, or feeding problems. Some people need no treatment; symptomatic rings may require surgery.

Vascular Scissors

A surgical instrument with two blades used to cut tissue, sutures, dressings, or other materials during vascular procedures.

Alternate Names:
Vascular Surgical Scissors

Vascular Shunt

A surgically created or implanted pathway that redirects blood or another fluid from one vessel or body space to another.

Alternate Names:
Bypass Shunt

Vascular Sponge

A sterile absorbent material used during blood-vessel procedures to absorb blood, apply pressure, or protect delicate tissue.

Alternate Names:
Vascular Laparotomy Sponge

Vascular Staple

A small metal or polymer device used to close tissue or join selected blood-vessel structures. It provides rapid closure but can cause narrowing, bleeding, thrombosis, or tissue injury if unsuitable or misplaced.

Alternate Names:
Vascular Surgical Staple; Vessel Closure Device

Vascular Stent

A small mesh or tube placed inside a narrowed or blocked vessel to help keep it open.

Alternate Names:
Endovascular Stent

Vascular Stent Balloon

A balloon on a catheter used to expand a vascular stent against the vessel wall and restore an open channel. Inflation can cause vessel injury, bleeding, clotting, or rarely rupture.

Alternate Names:
Stent-Expansion Balloon

Vascular Stent-Graft

A fabric-covered metal frame placed inside a blood vessel to reinforce a weak wall or seal an aneurysm, tear, or leak. Follow-up imaging checks for movement, blockage, or leakage around the graft.

Alternate Names:
Endovascular Graft; Aortic Stent-Graft

Vascular Suction

A suction device used during a vascular procedure to remove blood or other fluid from the operative field.

Alternate Names:
Vascular Suction Cannula; Frazier Suction

Vascular Surgery

Operations that repair, widen, replace, or reroute blood vessels to restore circulation or prevent bleeding. Procedures may treat aneurysms, blocked arteries, blood-vessel injuries, or problems with veins and dialysis access.

Vascular System

The network of arteries, veins, and capillaries that carries blood throughout the body. It delivers oxygen, nutrients, and hormones to tissues and carries carbon dioxide and other waste products away. Disease may narrow, weaken, block, or inflame these vessels.

Vascular Thrombectomy

Removal of a blood clot from a blood vessel using surgery or a catheter-based procedure. The aim is to restore blood flow and protect tissue from damage when a clot blocks an important artery or vein.

Alternate Names:
Clot Extraction

Vascular Tissue Adhesive

A liquid material used to block selected blood vessels during image-guided embolization. Doctors inject it through a catheter to control bleeding, close an abnormal vessel, or reduce blood flow to a tumor.

Alternate Names:
Cyanoacrylate Embolization Glue; Endovascular Embolic Adhesive

Vascular Tone

The usual degree of tightening in the muscle within blood-vessel walls. It helps control vessel width, blood flow, and blood pressure.

Vascular Trauma

Injury to an artery or vein caused by a blunt blow, penetrating wound, crush injury, or medical procedure. It may cause severe bleeding or loss of blood flow and needs urgent assessment of circulation and nearby nerves.

Vascular Ulcer

A persistent open wound caused or maintained by poor blood flow, high pressure in the veins, loss of protective feeling, or another blood-vessel problem. It usually affects the legs or feet and may heal slowly or become infected.

Vascularity

The amount and arrangement of blood vessels supplying a tissue or growth. A highly vascular area may heal or bleed differently and may look different on imaging; blood supply can also affect some treatments.

Vasculitic Neuropathy

Nerve damage caused by inflammation of the small blood vessels that supply nerves. It often causes painful, uneven numbness or weakness and may affect several limbs as the vessel inflammation continues.

Vasculitis

Inflammation of blood vessels that can narrow them, reduce blood flow, or cause bleeding and tissue damage. It may affect large, medium, or small vessels and can involve the skin, nerves, kidneys, lungs, or other organs.

Alternate Names:
Angiitis; Arteritis; Blood Vessel Inflammation

Vasectomy

A permanent contraceptive procedure in which the vas deferens are divided or occluded to prevent sperm from entering the ejaculate. It does not immediately provide sterility and does not protect against sexually transmitted infections.

Vasectomy Reversal

Surgery to restore sperm flow after vasectomy by reconnecting the cut ends of the vas deferens or connecting it to the epididymis. These operations are called vasovasostomy and vasoepididymostomy; pregnancy is not guaranteed.

Vaso-Occlusive Crisis

An episode in sickle cell disease in which sickled red blood cells obstruct small blood vessels, reducing blood flow and causing acute pain and sometimes tissue injury.

Alternate Names:
Sickle Cell Pain Crisis; VOC

Vasoactive Intestinal Peptide Test

A blood test measuring a hormone that affects the intestine and blood vessels. It is used mainly when a rare hormone-producing tumor is suspected in someone with severe watery diarrhea, dehydration, or abnormal body salts.

Vasoconstriction

Narrowing of blood vessels caused by contraction of vascular smooth muscle, which can raise blood pressure or reduce blood flow to affected tissues.

Vasoconstrictor

A substance that narrows blood vessels by making their muscle walls contract. This can raise blood pressure and reduce local blood flow; vasoconstrictor medicines are used in selected emergencies or with local anesthetics and require careful monitoring.

Vasoconstrictors

Alternate name; see *Vasoconstrictor*.

Vasodepressor Syncope

Fainting caused mainly by sudden widening of blood vessels and a fall in blood pressure. It often occurs as part of a vasovagal reaction and may be preceded by nausea, sweating, warmth, or lightheadedness.

Vasodilatation

Alternate spelling; see *Vasodilation*.

Vasodilation

Widening of blood vessels when their muscular walls relax. It can increase blood flow and lower blood pressure and occurs with exercise, heat, medicines, and inflammation.

Vasodilator

A substance that relaxes blood-vessel walls and makes the vessels wider. It can lower blood pressure or improve blood flow and is used for selected heart, blood-pressure, or circulation problems; excessive widening may cause headache, flushing, dizziness, or fainting.

Vasodilators

Alternate name; see *Vasodilator*.

Vasodilatory Shock

Shock caused by widespread widening of blood vessels and loss of vascular tone, leading to dangerously low blood pressure and inadequate blood flow to organs. It can occur in severe infection, anaphylaxis, or some neurologic injuries.

Vasomotor

Relating to control of blood-vessel width by nerves, hormones, and local chemicals. Vasomotor changes narrow or widen vessels and help regulate blood pressure, body temperature, tissue blood flow, and skin color.

Vasomotor Center

A group of nerve cells in the lower brain that helps control the widening and narrowing of blood vessels and helps maintain blood pressure.

Vasomotor Centre

Alternate spelling; see *Vasomotor Center*.

Vasomotor Nerves

Autonomic nerves controlling blood-vessel widening and narrowing by changing smooth-muscle activity, helping regulate blood pressure and temperature.

Vasomotor Rhinitis

Common subtype term; see *Nonallergic rhinitis*.

Vasopressin

A hormone that increases water reabsorption in the kidney and can constrict blood vessels. It is released from the posterior pituitary.

Alternate Names:
Arginine Vasopressin; AVP

Vasopressin Receptor

A cell sensor that responds to the hormone vasopressin. Different types help the kidneys retain water and help blood vessels narrow, influencing body-fluid balance and blood pressure.

Vasopressin Receptor Antagonists

Medicines that block vasopressin receptors and increase water excretion by the kidneys. Some are used for selected cases of low blood sodium or fluid overload.

Alternate Names:
Vaptans

Vasopressor

A medicine or body signal that raises blood pressure, mainly by narrowing blood vessels and sometimes by strengthening the heartbeat. These medicines are used in selected emergencies such as shock and require close monitoring.

Vasopressors

Medicines that raise blood pressure primarily by increasing vascular tone and, depending on the agent, supporting cardiac output.

Vasopressors In Anesthesia

Medicines that increase vascular tone or cardiac output to support blood pressure during anesthesia or critical illness. The choice and dose depend on the cause of hypotension, heart rate, cardiac function, and local protocol; monitoring is required.

Vasospasm

Sudden narrowing of a blood vessel caused by contraction of its muscular wall. It can temporarily reduce blood flow and cause chest pain, headache, stroke-like symptoms, or tissue injury, depending on the vessel affected.

Vasovagal Attack

Alternate name; see *Vasovagal Syncope*.

Vasovagal Reaction

Alternate name; see *Vasovagal Syncope*.

Vasovagal Syncope

Temporary loss of consciousness caused by a reflex drop in heart rate, blood pressure, or both, reducing blood flow to the brain. It may be triggered by pain, fear, heat, or prolonged standing and is often preceded by nausea, sweating, or lightheadedness.

Alternate Names:
Neurocardiogenic Syncope; Reflex Syncope

Vater-Pacini Corpuscles

Large, rapidly adapting, encapsulated mechanoreceptors located deep in the dermis, subcutaneous tissue, periosteum, and joint capsules. Morphologically composed of a central unmyelinated nerve axon surrounded by multiple concentric lamellae of flattened Schwann-like cells separated by fluid; specialized physiologically to detect high-frequency mechanical vibration (200 to 300 Hz) and transient acceleration.

Alternate Names:
Pacinian Corpuscles; Lamellar Corpuscles

VATS

Alternate name; see *Video-Assisted Thoracoscopic Surgery*.

Vaughan Williams Classification

A system that groups medicines used for abnormal heart rhythms according to their main effect on the heart's electrical activity. It helps describe treatment but does not replace patient-specific prescribing.

VCJD

Alternate name; see *Creutzfeldt-Jakob disease*.

VDRL Test

A blood or spinal-fluid test that looks for an immune reaction associated with syphilis. A reactive result needs a more specific confirmatory test and may help monitor response to treatment.

Vector

1. In infection control, a living organism, such as a mosquito or tick, that carries a disease-causing germ to a person or animal. The germ may develop or multiply inside the vector, or be carried without doing so. 2. In genetics, a molecule or modified virus used to carry genetic material into a cell.

Vector Control

Measures that reduce insects or other animals that spread infection. Examples include removing standing water, using insecticides, treating breeding areas, improving buildings, wearing protective clothing, and using repellents or bed nets.

Vector-Borne Disease

An infection spread by a living carrier such as a mosquito, tick, flea, or sandfly. Examples include malaria, dengue, Lyme disease, and some forms of viral encephalitis; prevention focuses on avoiding bites and controlling the carrier.

Vegetarian

Vegetarian describes a diet that avoids meat and may include dairy products, eggs, or both. Nutritional needs can usually be met with varied foods, but iron, vitamin B12, protein, and other nutrients may need attention.

Vegetation

A mass that can form on a heart valve during infective endocarditis. It may contain bacteria, blood-clotting material, and immune cells and can damage the valve or break off and travel to other organs.

Vein

A blood vessel that carries blood toward the heart. Most veins carry oxygen-poor blood, but veins from the lungs and placenta carry oxygen-rich blood. Veins often contain valves that help prevent backward flow.

Vein of Galen Malformation

A rare congenital intracranial vascular anomaly resulting from an embryonic arteriovenous fistula that drains directly into the primitive median prosencephalic vein (the precursor of the great cerebral vein of Galen), presenting in neonates with high-output congestive heart failure and hydrocephalus.

Alternate Names:
VGM; Vein of Galen Aneurysmal Malformation

Vein-Graft Aneurysms

An abnormal widening of a vein used to bypass a blocked heart artery. It may contain a clot, block blood flow, press on nearby structures, or rupture and therefore needs specialist assessment.

VeIP Regimen

A cancer-treatment combination of vinblastine, ifosfamide, and cisplatin, used mainly for selected germ-cell tumors. It can lower blood counts and damage the kidneys, nerves, or bladder, so specialist monitoring is required.

Velamentous Cord Insertion

An abnormal attachment in which the umbilical blood vessels travel through the membranes before reaching the placenta without the usual protective tissue. The vessels can be compressed or torn, increasing risks of poor fetal growth, bleeding, or vasa previa and requiring specialist pregnancy monitoring.

Alternate Names:
Velamentous Insertion of the Umbilical Cord

Velocardiofacial Syndrome

Alternate name; see *DiGeorge syndrome (22q11.2 deletion syndrome)*.

Velopharyngeal Insufficiency

A structural or functional anatomical failure of the soft palate (velum) and posterior pharyngeal wall to achieve complete closure during speech and deglutition, resulting in hypernasal speech resonance, nasal air emission, and nasal regurgitation of fluids.

Alternate Names:
VPI; Velopharyngeal Incompetence

Vemurafenib

A targeted cancer medicine for tumors with a specific BRAF V600 gene change, including some melanomas. It can cause joint pain, sun sensitivity, abnormal heart rhythm, new skin cancers, or treatment resistance.

Vena Cava

Either of the two largest veins returning blood to the right side of the heart. The superior vena cava drains the upper body, and the inferior vena cava drains the abdomen, pelvis, and legs.

Alternate Names:
Venae Cavae; Superior and Inferior Vena Cava

Vena Cava Filter

A small device placed in the large vein leading to the heart to trap blood clots traveling from the legs toward the lungs. It may be used when blood-thinning medicines cannot be used or have not worked.

Alternate Names:
IVC Filter; Greenfield Filter

Venepuncture

Inserting a needle into a vein to collect blood or place intravenous access. It may cause brief pain, bruising, bleeding, infection, or fainting, and clean technique reduces complications.

Venereal Disease Research Laboratory Test

A blood test that looks for antibodies associated with syphilis. It is used for screening and monitoring treatment, but a reactive result needs confirmation with a treponemal test.

Venesection

The controlled removal of blood from a vein, used diagnostically or therapeutically, for example in selected cases of hemochromatosis or polycythemia.

Venipuncture

Puncture of a vein with a needle to obtain blood, administer fluids or medicines, or establish intravenous access. Bruising, infection, bleeding, and nerve or artery injury are uncommon complications.

Veno-Occlusive Disease

Alternate name; see *Hepatic Sinusoidal Obstruction Syndrome*.

Venogram

Contrast imaging of veins used to detect thrombosis, obstruction, abnormal anatomy, or selected venous flow disorders.

Venography

Imaging of veins, usually after contrast material is administered, to assess venous anatomy, obstruction, thrombosis, or malformation.

Venom

A poisonous substance delivered by an animal through a bite, sting, or similar structure. Its effects vary by species and may include pain, swelling, nerve problems, bleeding, or dangerous changes in breathing or blood pressure.

Venomous Bite

A bite that injects venom from an animal such as a snake, spider, or arthropod. Effects range from local pain and swelling to bleeding, paralysis, or systemic toxicity.

Venous

Relating to veins, which usually carry blood back toward the heart. Vein problems include blood clots,

varicose veins, poor return of blood, and ulcers; pulmonary veins are an exception because they carry oxygen-rich blood from the lungs to the heart.

Venous Air Embolism

Obstruction of the venous circulation by intravascular gas, usually after procedures, trauma, or pressure changes. It can impair pulmonary or cardiac function and, if gas reaches the arterial circulation, cause neurologic or systemic ischemia.

Venous Aneurysm

A localized abnormal dilatation of a vein. It may be asymptomatic or present as a soft mass, pain, thrombosis, embolism, or bleeding depending on its location and size.

Venous Blood Gas

A test measuring acidity, carbon dioxide, and bicarbonate in blood taken from a vein. It helps assess acid-base balance and carbon dioxide levels, but does not measure oxygenation as reliably as an arterial blood gas.

Alternate Names:
VBG

Venous Capacitance

The physical and physiological capacity of the systemic venous circulation to accommodate large changes in blood volume with minimal alterations in venous pressure, functioning as the primary high-capacitance, low-resistance reservoir holding approximately 60 to 70 percent of total blood volume at rest.

Venous Diseases

Conditions affecting veins, including blood clots, varicose veins, poor return of blood, inflammation, ulcers, injuries, and birth-related malformations. They may cause pain, swelling, skin changes, bleeding, or dangerous clots traveling to the lungs.

Venous Hum

A harmless continuous humming sound heard over the neck veins, most often in healthy children. It changes or disappears with body position or gentle pressure on the vein, helping distinguish it from heart murmurs that need further evaluation.

Alternate Names:
Cervical Venous Hum; Innocent Venous Hum

Venous Insufficiency

Impaired return of blood through the veins, usually in the legs, because valves allow backward flow, veins are blocked, or the calf-muscle pump is ineffective. Blood may pool and cause aching, heaviness, swelling, varicose veins, itching, darkened or hardened skin, stasis dermatitis, and difficult-to-heal ulcers near the ankle.

Venous Leak

Difficulty maintaining an erection because blood leaves the penis too readily during erection. It may reflect vascular, nerve, hormonal, or medication-related problems and should be evaluated as erectile dysfunction.

Alternate Names:
Veno-Occlusive Dysfunction; Cavernous Venous Leakage

Venous Pressure

The pressure of blood inside the veins. It depends on blood volume, vein width, gravity, and how well the right side of the heart pumps; abnormally high pressure can cause swelling, enlarged veins, or fluid buildup.

Venous Return

The flow of blood through the veins back to the heart. It is helped by vein valves, muscle movement, breathing, and pressure changes in the chest.

Venous Stasis Dermatitis

Inflammation of the skin of the lower legs caused by chronic swelling and pooling of blood and fluid, usually from chronic venous insufficiency. It may cause itching, redness, scaling, skin darkening, thickening, or ulcers; treatment addresses the swelling and protects the skin.

Venous Stasis Ulcer

A long-lasting wound near the ankle caused by poor blood return through the leg veins. The leg may also be swollen, painful, or have darkened, thickened skin; compression and treatment of the vein problem may help.

Venous Thromboembolism

A blood clot that forms in a vein, usually deep in the leg, and may travel to the lungs. A clot in the lungs can cause sudden breathlessness, chest pain, collapse, or death.

Venous Thromboembolism In Pregnancy

A blood clot in a deep vein or lungs during pregnancy or after birth. Pregnancy increases clot risk, and symptoms such as one-sided leg swelling, chest pain, sudden breathlessness, or coughing blood can indicate a serious clot.

Venous Thromboembolism Prophylaxis

Measures used to prevent dangerous vein clots, especially around surgery or hospitalization. They may include walking early, compression devices or stockings, and blood-thinning medicine when bleeding risk is acceptable.

Venous Thrombosis

The formation of a blood clot (thrombus) within a vein, most commonly in the deep veins of the lower extremities (deep vein thrombosis, DVT).

Venous Ulcer

A slow-healing sore caused by poor blood return through the leg veins, usually near the ankle. It may occur with leg swelling, varicose veins, or skin discoloration. Arterial circulation should be assessed because it affects whether compression treatment is safe.

Ventilation

Movement of air into and out of the lungs. Alveolar ventilation removes carbon dioxide; oxygen uptake into blood is called oxygenation.

Ventilation-Perfusion Mismatch

A mismatch between air reaching parts of the lungs and blood reaching those same parts. It can lower blood oxygen and occur with pneumonia, COPD, asthma, heart failure, or a lung clot.

Ventilation-Perfusion Ratio

The relationship between air reaching the lungs and blood reaching the lung tissues. Good matching allows efficient oxygen exchange; poor matching can cause low blood oxygen.

Ventilation-Perfusion Scan

A nuclear-medicine scan that compares air movement in the lungs with blood flow through them. Areas with blood flow blocked but preserved air movement may suggest a pulmonary embolism. The test uses a breathed tracer and an injected tracer and is interpreted with symptoms and other findings.

Ventilator

A machine that supports or replaces spontaneous breathing by delivering air, oxygen, or an air-oxygen mixture under positive pressure. Noninvasive ventilators deliver support through a mask, while invasive ventilators connect through an endotracheal or tracheostomy tube. Ventilators can provide different patterns and levels of pressure or volume according to the device and clinical purpose.

Alternate Names:
Mechanical Ventilator Breathing Machine

Ventilator-Associated Pneumonia

Pneumonia that develops at least 48 hours after a person begins invasive mechanical ventilation. It may cause fever, worsening oxygen levels, increased airway secretions, or new lung changes on imaging.

Ventilator-Induced Lung Injury

Lung damage caused or worsened by a breathing machine when pressure, volume, or oxygen levels are excessive. Clinicians use protective settings and close monitoring to support breathing while limiting further injury.

Ventouse

A vacuum extractor placed on the baby's scalp to assist a vaginal birth when delivery needs help. It is used only when specific safety conditions are met and can cause temporary scalp swelling or bruising.

Ventral

Relating to the belly or front side of the body; synonym for anterior in human anatomy.

Ventral Body Cavity

The body cavity toward the front. It includes the thoracic cavity and the abdominopelvic cavity, which contain many of the body's major organs.

Ventral Hernia

Protrusion of tissue through a weakness in the front abdominal wall, including incisional and umbilical hernias. It may cause a bulge or pain; a trapped hernia can lose its blood supply.

Ventral Root

The front root of a spinal nerve. It carries movement and other outgoing signals from the spinal cord.

Ventricle

One of the two lower chambers of the heart that pump blood out of it. The right ventricle sends blood to the lungs to receive oxygen; the left ventricle sends oxygen-rich blood to the rest of the body.

Ventricular

Relating to a ventricle. In the heart, it concerns one of the lower pumping chambers; in the brain, it concerns the fluid-filled spaces that contain cerebrospinal fluid. The organ gives the term its specific meaning.

Ventricular Aneurysm

A localized, thin, fibrous, dyskinetic or akinetic bulging outpouching of the scarred left ventricular wall developing as a late mechanical complication of transmural myocardial infarction (typically anterior MI), predisposing to heart failure, refractory ventricular arrhythmias, and apical mural thrombus formation.

Ventricular Arrhythmia

An abnormal heart rhythm arising from the ventricles. It may cause palpitations, dizziness, fainting, chest discomfort, or sudden cardiac arrest; fainting or severe symptoms require emergency care.

Ventricular Arrhythmias

Alternate name; see *Ventricular Arrhythmia*.

Ventricular Assist Device

A mechanical pump that helps a weakened heart move blood. It may support the left side, right side, or both and can be temporary or long-term, but bleeding, infection, stroke, and clots are important risks.

Ventricular Bigeminy

A heart-rhythm pattern in which each normal beat is followed by a premature beat from a ventricle. It may be seen on an electrocardiogram and can occur with or without heart disease.

Ventricular Fibrillation

A chaotic, disorganized ventricular rhythm in which the ventricles quiver rather than contract, producing no effective cardiac output and cardiac arrest. It is a shockable rhythm; immediate CPR and unsynchronized defibrillation are required, with treatment of the underlying cause.

Alternate Names:
V-Fib

Ventricular Hypertrophy

Thickening of the wall of one of the heart's lower chambers. It may develop from long-term high blood pressure, valve disease, inherited heart muscle disease, or intense training and can lead to stiffness, abnormal rhythms, or heart failure.

Ventricular Myocardium

The heart muscle forming the walls of the ventricles. Its contraction pumps blood to the lungs and the

rest of the body.

Ventricular Non-Compaction

A heart-muscle appearance with prominent trabeculations and deep spaces in the ventricular wall, most often in the left ventricle. It may occur with cardiomyopathy, but the imaging appearance alone does not establish heart disease.

Alternate Names:
LVNC; Non-Compaction Cardiomyopathy

Ventricular Premature Contraction

Alternate name; see *Premature ventricular contractions (PVCs)*.

Ventricular Remodeling

Progressive alterations in left ventricular geometry, mass, chamber volume, and spherical shape occurring after acute myocardial infarction or chronic pressure/volume overload, driven by neurohormonal activation, cardiomyocyte hypertrophy, and interstitial fibrosis.

Alternate Names:
Post-Infarction Remodeling

Ventricular Rupture

A tear in a wall of one of the heart's lower chambers, often after a heart attack. It can cause life-threatening bleeding around the heart.

Ventricular Septal Defect

An opening in the wall between the heart's lower chambers, usually present from birth but rarely caused later by a heart attack or chest injury. Blood usually flows from the left chamber to the right, sending extra blood to the lungs. Small openings may close on their own or cause no symptoms; larger ones can make the heart and lungs work too hard, leading to heart failure or lasting high pressure in the lung blood vessels.

Alternate Names:
VSD

Ventricular Tachycardia

A rapid heart rhythm that starts in the lower chambers of the heart. It may cause palpitations, dizziness, fainting, shock, or cardiac arrest and can be life-threatening.

Ventriculoatrial

Relating to a connection between a ventricle and an atrium. In brain surgery, a ventriculoatrial shunt is a tube that drains extra fluid from a brain cavity into the right upper chamber of the heart.

Ventriculoatrial Shunt

A surgically implanted cerebrospinal-fluid diversion system that drains fluid from a brain ventricle through a valve and catheter tunneled under the skin into a vein, with the distal catheter positioned in the right atrium. It treats hydrocephalus by returning excess fluid to the bloodstream and may be used when peritoneal drainage is unsuitable. Potential complications include blockage or infection and, because the catheter lies in the venous circulation, thrombosis or embolism.

Alternate Names:
VA Shunt; Ventriculo-Atrial Shunt

Ventriculography

Imaging of a heart ventricle, usually during cardiac catheterization after contrast dye is injected into the chamber. It shows chamber shape and movement and can help assess pumping function.

Ventriculoperitoneal Shunt

A surgically implanted catheter-and-valve system that diverts cerebrospinal fluid from a brain ventricle through tubing tunneled beneath the skin into the peritoneal cavity, where the fluid is absorbed. It is commonly used to treat hydrocephalus by reducing excess fluid and pressure in the ventricles. The valve regulates flow and may be fixed-pressure or programmable. Complications include blockage, infection, overdrainage or underdrainage, and problems at the abdominal catheter tip; malfunction can allow fluid to build up again or drain too rapidly.

Alternate Names:
VP Shunt

Ventrosuspension

Surgical fixation of a displaced or prolapsed uterus to the anterior abdominal wall or nearby supporting tissues.

Venturi Mask

An oxygen mask that mixes oxygen with room air through calibrated openings to deliver a controlled oxygen concentration. The delivered concentration can vary if the total gas flow is too low for the person's breathing demand.

Alternate Names:
Air-Entrainment Mask; Venturi Oxygen Mask; High-Flow Oxygen Mask

Venturi Principle

A physical principle in fluid dynamics stating that as a fluid or gas flows through a constricted section of a pipe or nozzle, its velocity increases and its static lateral pressure decreases. In medicine, this localized pressure drop creates suction that entrains ambient air or fluids, forming the operational basis for air-entrainment oxygen masks (Venturi masks), jet nebulizers, suction aspirators, and explaining hemodynamic phenomena such as systolic anterior motion of the mitral valve in hypertrophic obstructive cardiomyopathy.

Alternate Names:
Venturi Effect; Bernoulli-Venturi Principle; Air-Entrainment Principle

Venule

A small blood vessel that collects blood from capillaries and carries it into larger veins. Venules also allow white blood cells and fluid to leave the bloodstream during inflammation.

Venules

Small blood vessels that collect blood from capillaries and join to form veins. Their walls also participate in inflammation by allowing white blood cells to leave the bloodstream.

Verapamil

A non-dihydropyridine calcium-channel blocker used for selected hypertension, angina, and supraventricular tachyarrhythmias; it can cause bradycardia and constipation.

Verapamil Toxicity

Harm from an overdose or excessive exposure to verapamil, which can cause low blood pressure, a slow heart rate, abnormal heart rhythms, and impaired heart pumping.

Vermicides

Medicines or chemicals that kill parasitic worms. The correct treatment depends on the worm, the body site affected, the person's age, and other health conditions.

Vernal Keratoconjunctivitis

A severe, recurrent allergic eye inflammation that primarily affects young boys in warm, sunny climates and often flares up during the spring and summer (spring catarrh). It causes intense eye itching, light sensitivity, watering, and thick, stringy mucus. Characteristic findings include large, cobblestone-like bumps on the underside of the upper eyelid (giant papillae) and small white dots along the border of the cornea (Horner-Trantas dots). In severe cases, inflammation and eye-rubbing can create a non-healing sore on the clear front of the eye (a shield ulcer), which can lead to corneal scarring and vision changes. The condition typically improves on its own after puberty.

Alternate Names:
VKC; Spring Catarrh; Vernal Catarrh; Vernal Conjunctivitis

Verner-Morrison Syndrome

Alternate name; see *VIPoma*.

Vernix

A white, greasy protective coating on the skin of a fetus or newborn, composed mainly of water, lipids, and shed skin cells.

Vernix Caseosa

Alternate name; see *Vernix*.

Verruca

Alternate name; see *Wart*.

Verruca Plana

Small, smooth, relatively flat warts caused by HPV, often occurring in groups on the face, hands, or legs.

Alternate Names:
Flat Warts; Juvenile Warts

Verruca Vulgaris

A common, benign, hyperkeratotic, exophytic cutaneous papilloma with a rough, verrucous ('warty') surface and thrombosed capillary black dots, caused by localized epidermal infection by human papillomavirus (HPV types 2, 4, 7, and 1).

Alternate Names:
Common Wart; Viral Verruca

Verrucas

Verrucas are rough skin growths on the feet caused by human papillomavirus. They may be painful with pressure and often resolve without treatment, although treatment can reduce discomfort or spread.

Verruciform Xanthoma

A rare, noncancerous growth usually found in the mouth or genital area. It may look like a wart, so examination and sometimes a tissue sample are needed to distinguish it from cancer.

Verrucose

Alternate spelling; see *Verrucous*.

Verrucous

Having a rough, thickened, irregular, or wart-like surface. The appearance can occur in benign growths, infections, chronic inflammation, or some cancers.

Verrucous Carcinoma

A low-grade, well-differentiated variant of squamous cell carcinoma with a warty, exophytic appearance. It is locally invasive but rarely metastasizes, commonly affecting the oral cavity, skin, or genitalia.

Version

A change in the position or presentation of a body structure. In pregnancy, fetal version is a procedure or movement that changes the baby's position, often to place the head downward before birth.

Vertebra

One of the bones forming the spinal column. Each vertebra helps support the body, allows movement, provides attachment for muscles, and surrounds and protects the spinal cord.

Vertebrae

Vertebrae are the bones of the spinal column that protect the spinal cord, support the body, allow movement, and provide attachment for muscles and ligaments.

Vertebral Artery

One of two arteries that travel through the neck and join to supply the brainstem, cerebellum, and back of the brain. Narrowing or blockage can cause dizziness, imbalance, or stroke.

Vertebral Artery Dissection

A tear in the inner lining of a vertebral artery that lets blood enter the vessel wall, forming an intramural hematoma and possibly narrowing the artery or creating a pseudoaneurysm. It may occur spontaneously or after neck injury and can cause sudden neck or occipital headache, dizziness, imbalance, or a posterior-circulation transient ischemic attack or stroke.

Alternate Names:
VAD; Spontaneous Vertebral Artery Dissection

Vertebral Canal

The passage formed by the stacked spinal bones that surrounds and protects the spinal cord. Narrowing, bleeding, tumors, fractures, or disc disease inside it can compress nerves and cause weakness or pain.

Vertebral Column

The chain of bones running from the neck to the pelvis. It supports the head and trunk, protects

the spinal cord, allows bending and twisting, and provides attachment for muscles and ribs.

Vertebral Compression Fracture

Collapse or cracking of one of the bones in the spine, often from osteoporosis, injury, or cancer. It may cause sudden or gradual back pain, loss of height, or a rounded back and can sometimes press on nerves.

Vertebral Hemangioma

Alternate name; see *Spinal hemangioma*.

Vertebral Tumor

A growth arising in or near a spinal bone. It may be benign or cancerous, start in the spine or spread there, and cause pain, fracture, nerve compression, weakness, or paralysis.

Vertebrobasilar Circulatory Disorders

Conditions that reduce blood flow through the vertebral or basilar arteries supplying the brainstem, cerebellum, and posterior brain; symptoms may include vertigo, double vision, imbalance, weakness, or stroke.

Vertebrobasilar Insufficiency

Reduced blood flow through arteries supplying the back of the brain. It may cause dizziness, double vision, imbalance, weakness, trouble speaking, or stroke-like symptoms and can be serious when sudden.

Vertebrobasilar Insuffiency

Misspelling; see *Vertebrobasilar Insufficiency*.

Vertebroplasty

A procedure in which medical cement is injected into a collapsed spinal bone to help stabilize it and sometimes reduce pain. It is used selectively because cement leakage, infection, nerve injury, or other complications can occur.

Vertical

Oriented from superior to inferior or perpendicular to a horizontal plane. In medicine, it may describe position, transmission from parent to child, or a body-oriented imaging or movement axis.

Vertical Talus

A stiff flatfoot present from birth in which one of the ankle bones points downward and the middle of the foot is bent upward. It may occur alone or with other conditions and usually needs early orthopedic treatment.

Vertical Transmission

Passage of an infection or genetic condition from parent to child during pregnancy, delivery, or breastfeeding.

Vertigo

A false feeling that you or your surroundings are moving, spinning, tilting, or shifting when they are not. It is a symptom rather than a disease and often comes from the inner ear, but brain and other conditions can also cause it.

Vertigo-Associated Disorders

Vertigo-associated disorders cause an illusion of movement from vestibular, neurologic, visual, medication-related, or systemic dysfunction and may be accompanied by imbalance, nausea, or hearing symptoms.

Alternate Names:
Vestibular Disorders; Peripheral Vestibulopathy; Labyrinthine Disorders

Very Long-Chain Acyl-CoA Dehydrogenase Deficiency

A rare inherited disorder in which cells cannot use certain long-chain fats for energy, especially during fasting or illness. Infants may develop low blood sugar, heart disease, or liver problems; older children or adults may have exercise-triggered muscle breakdown and dark urine.

Alternate Names:
VLCAD Deficiency; VLCADD

Very-Low-Density Lipoprotein

A particle made by the liver that carries mainly

triglycerides through the blood. High levels can contribute to fatty deposits in artery walls and increase cardiovascular risk, although the result is interpreted with the full lipid profile.

Alternate Names:
VLDL

Vesical

Relating to the urinary bladder. For example, vesical inflammation affects the bladder lining, a vesical tumor is a bladder growth, and the vesical neck is the bladder outlet leading toward the urethra.

Vesicant

A substance that causes blistering and tissue injury on contact. In oncology, vesicant drugs can cause severe extravasation injury if they escape from a vein into surrounding tissue.

Vesicants

Substances that can cause severe blistering and tissue damage when they touch skin or escape from a vein. Some chemotherapy medicines and industrial chemicals are vesicants.

Vesicle

A small, circumscribed, raised skin lesion containing clear, serous, or sometimes bloody fluid, usually less than 1 cm in diameter. A vesicle is a small blister; causes include viral infection, contact irritation, eczema, burns, friction, and immune-mediated skin disease.

Vesico-Ureteric Reflux

Backward flow of urine from the bladder into one or both ureters and sometimes the kidneys, increasing the risk of recurrent urinary infection and renal scarring.

Vesicoureteral Reflux

Backward flow of urine from the bladder toward the kidneys because the valve where a ureter enters the bladder does not work normally. It can cause repeated kidney infections and scarring, especially in children.

Alternate Names:
VUR; Urinary Reflux

Vesicovaginal and Ureterovaginal Fistula

Abnormal connections between the urinary tract and vagina: a vesicovaginal fistula connects bladder to vagina, while a ureterovaginal fistula connects ureter to vagina. Both commonly cause continuous urine leakage and require imaging and reconstructive urologic or gynecologic care.

Vesicovaginal Fistula

An abnormal connection between the bladder and vagina that causes continuous or frequent leakage of urine through the vagina. It may follow childbirth injury, pelvic surgery, radiation, or advanced infection and usually requires specialist repair.

Vesicular

Describing or containing small, fluid-filled blisters. A vesicular rash may occur with viral infection, allergy, eczema, burns, or other conditions; its appearance alone does not establish the cause.

Vesicular Breathing

The normal soft, gentle breath sound heard over most outer lung areas with a stethoscope. Changes in loudness or quality may suggest fluid, collapse, blockage, infection, or other lung disease.

Vesicular Palmoplantar Eczema

An itchy eczema affecting the palms or soles with small, deep-seated fluid-filled vesicles, followed by peeling, scaling, or fissures. Triggers include sweating, irritants, allergy, stress, and fungal infection elsewhere; persistent disease may need specialist treatment.

Vesiculobullous Dermatoses

A group of skin diseases that cause small or large fluid-filled blisters. Causes include infection, allergy, autoimmune disease, inherited conditions, medicines, and injury; examination and sometimes a biopsy identify the cause.

Vessel

A vessel is a tube carrying blood, lymph, air, urine, bile, or another fluid through the body, depending on context.

Vestibular

Relating to the vestibular system of the inner ear and brain, which detects head motion and position and helps maintain balance and gaze stability.

Vestibular Disorder

A problem affecting the inner-ear balance organs or the brain pathways that process balance signals. It may cause dizziness, vertigo, unsteadiness, nausea, abnormal eye movements, or difficulty walking. Causes include inner-ear disease, infection, head injury, medicines, migraine, reduced blood flow, or disorders of the brain or nerves.

Alternate Names:
Vestibular Balance Disorder

Vestibular Migraine

Repeated attacks of dizziness or vertigo related to migraine, with or without headache. Episodes may include sensitivity to movement, light, sound, or visual patterns; other inner-ear and brain causes must be considered.

Vestibular Neuritis

Sudden inflammation or dysfunction of the balance nerve, causing severe spinning, nausea, vomiting, and unsteadiness that may last for days. Hearing is usually unaffected, but urgent assessment may be needed to exclude a stroke.

Vestibular Papillomatosis

A harmless normal variation in which several soft, small, finger-like bumps occur on the inner vulvar folds. It can resemble genital warts but is not caused by an infection and usually needs no treatment.

Vestibular Rehabilitation

Exercise-based therapy that improves balance, gaze stability, and adaptation in people with vestibular disorders or dizziness.

Vestibular Schwannoma

A benign, slow-growing tumor of the vestibular portion of the eighth cranial nerve. See Acoustic Neuroma.

Vestibular System

The inner-ear sensors and connected brain pathways that detect head movement and position and help maintain balance, posture, and steady vision. Problems can cause vertigo, unsteadiness, nausea, or blurred vision during movement.

Vestibule

A balance area of the inner ear between the cochlea and semicircular canals. It contains sensors that detect head position and straight-line movement and send this information to the brain.

Vestibulo-Ocular Reflex

An automatic response that moves the eyes opposite to head movement so vision stays steady while a person turns or walks. Problems with it can cause blurred vision, dizziness, or imbalance.

Vestibulocochlear Nerve

The eighth cranial nerve, carrying information for hearing and balance from the inner ear to the brain.

Vestibulodynia

Persistent burning, stinging, or tenderness at the entrance to the vagina, often triggered by touch, penetration, or inserting a tampon. Examination rules out infection and other causes; care may include pelvic-floor therapy, pain treatment, and support for sexual and emotional health.

Alternate Names:
Provoked Vestibulodynia; Vulvar Vestibulitis Syndrome; PVD

Vestigial

Describing a structure or feature that has become greatly reduced through evolution and has little or no apparent original function.

VEXAS Syndrome

A serious inflammatory illness that begins in adulthood because of a gene change acquired in blood-forming cells. It can cause persistent fever, painful joints, skin rashes, inflamed blood vessels or cartilage, anemia, and other blood abnormalities.

Viable

Capable of surviving or developing under suitable conditions. In clinical contexts it may describe a viable pregnancy, tissue, organism, cell, or treatment option.

Vibration Problem

Symptoms or injury caused by repeated exposure to vibrating tools or equipment, which may affect nerves, blood vessels, muscles, and joints in the hands or arms.

Vibrator

A device that produces mechanical vibration and may be used for sexual stimulation, therapeutic massage, or selected rehabilitation purposes.

Vibrio

A genus of curved, Gram-negative bacteria; species include *V. cholerae*, which causes cholera, and *V. vulnificus*, which can cause severe wound or bloodstream infection.

Vibrio Cholerae

A bacterium that causes cholera, a severe diarrheal illness spread mainly through contaminated water or food. It can cause sudden, large-volume watery diarrhea, dehydration, shock, and death without rapid fluid replacement.

Vibrio Infection

Infection caused by Vibrio bacteria, acquired through contaminated seafood or exposure of wounds to warm seawater. It may cause watery diarrhea, wound infection, or rapidly worsening bloodstream infection, especially in people with liver disease or weakened immunity. Severe wound pain, blistering, fever, or shock can occur.

Alternate Names:
Vibriosis; Vibrio Bacteremia

Vibrio Parahaemolyticus Infection

A foodborne intestinal infection caused by a salt-tolerant bacterium, often linked to raw or undercooked seafood. It commonly causes watery diarrhea, abdominal cramps, nausea, vomiting, and sometimes fever.

Alternate Names:
Vibrio Parahaemolyticus Gastroenteritis; Halophilic Vibrio Infection

Vibrio vulnificus Infection

Infection caused by a saltwater-associated bacterium that can produce rapidly progressive wound infection, sepsis, or severe gastroenteritis. Risk is higher with liver disease, iron overload, or immune suppression; raw oysters and seawater exposure are important sources.

Vibrio Vulnificus Infections

Infections caused by Vibrio vulnificus, a gram-negative bacterium found in warm seawater and raw seafood. It can cause wound infection, bloodstream infection, or gastroenteritis, with particularly severe disease in people with chronic liver disease or other risk factors.

Vibrios

Comma-shaped bacteria, usually Gram-negative, that include species capable of causing cholera and wound or gastrointestinal infections.

Video Laryngoscope

An airway device with a small camera that shows the entrance to the windpipe on a screen. It helps clinicians place a breathing tube, especially when a direct view is difficult, but does not remove the risks of the procedure.

Video Laryngoscopy

A technique for viewing the entrance to the windpipe with a camera on a blade connected to a screen. It can help clinicians place a breathing tube when a direct view is difficult.

Video-Assisted Thoracoscopic Surgery

A chest operation performed through several small openings using a camera and long instruments rather than a large incision between the ribs. It may be used for lung or pleural biopsy, removing part of a lung, or other chest procedures and often allows faster recovery, though bleeding, air leakage, infection, or conversion to open surgery can occur.

Alternate Names:
VATS; Video Thoracoscopy; Thoracoscopic Surgery

Videofluoroscopic Swallow Study

A moving X-ray test that records swallowing after small amounts of food or liquid containing contrast are taken. It shows whether food enters the airway, where swallowing is delayed, and which textures or techniques may be safer.

Videostroboscopy

A voice examination that uses a camera and flashing light to create a slow-motion view of the vocal cords as they vibrate. It helps investigate hoarseness, voice strain, and vocal-cord injury.

Vildagliptin

An oral dipeptidyl-peptidase-4 inhibitor used in some countries for type 2 diabetes, alone or with other medicines. It improves glucose-dependent insulin secretion; liver function and pancreatitis symptoms may require attention.

Villi

Tiny finger-like projections lining the small intestine that greatly increase the area available to absorb nutrients. Similar projections in the placenta help exchange substances between the pregnant person and fetus.

Villous Adenoma

A high-risk subtype of neoplastic colonic adenomatous polyp characterized histologically by long, finger-like, frond-like epithelial projections covering more than 75

Alternate Names:
Villous Colonic Polyp; Papillary Adenoma

Villous Atrophy

Flattening or loss of the tiny projections lining the small intestine. This reduces nutrient absorption and may occur in celiac disease, some infections, immune disorders, or other intestinal conditions.

Villus

A small finger-like projection, especially one of the intestinal mucosa that increases absorptive surface area; chorionic villi mediate exchange between placenta and fetus.

Villus Atrophy

Alternate name; see *Villous Atrophy*.

Vinca Alkaloids

Cancer medicines including vincristine and vinblastine that disrupt microtubules, structures needed for cell division. They can treat several cancers but may cause nerve damage, low blood counts, constipation, or other toxicity.

Vincent Angina

Alternate name; see *Acute Necrotizing Ulcerative Gingivitis*.

Vincent Disease

Alternate name; see *Acute Necrotizing Ulcerative Gingivitis*.

Vincent Infection

Alternate name; see *Acute Necrotizing Ulcerative Gingivitis*.

Vincent Stomatitis

Alternate name; see *Acute Necrotizing Ulcerative Gingivitis*.

Vincent's Angina

Alternate name; see *Acute Necrotizing Ulcerative Gingivitis*.

Vinorelbine

A chemotherapy medicine that interferes with cell division. It is used for selected lung and breast

cancers and can cause low blood counts, infection, constipation, nerve symptoms, nausea, or irritation if it leaks outside a vein.

Viomycin

An older aminoglycoside antibiotic related to capreomycin that was used against tuberculosis and other mycobacterial infections; kidney and hearing toxicity limit its use.

VIPoma

A rare neuroendocrine tumor, usually in the pancreas, that produces excess vasoactive intestinal peptide (VIP). It causes persistent watery diarrhea and can lead to low potassium and dehydration.

Alternate Names:
Vasoactive Intestinal Peptide Tumor; Verner-Morrison Neoplasm; WDHA Syndrome; Pancreatic Cholera

VIPoma Syndrome

Alternate name; see *VIPoma*.

Viraemia

Alternate spelling; see *Viremia*.

Viral

Caused by or relating to a virus. Viruses enter living cells to multiply and can cause illnesses ranging from mild colds to serious brain, lung, liver, or bleeding diseases; testing and treatment depend on the specific virus.

Viral Antibody

A protective protein made by the immune system after infection or vaccination that recognizes a virus. Blood tests for these antibodies may show past exposure, immune response, or selected current infections, depending on timing and test design.

Viral Arthritis

Joint inflammation caused by or associated with a viral infection. It may cause sudden pain, swelling, and stiffness in several joints and often improves as the infection resolves, although some viruses can cause prolonged symptoms.

Viral Assembly

The stage of viral reproduction when newly made viral genetic material and proteins are put together to form complete new virus particles.

Viral Attachment

The first step of infection, when proteins on a virus bind to matching molecules on a host cell. This binding helps determine which species, tissues, or cell types the virus can infect.

Viral Carcinogenesis

Cancer development caused or promoted by a viral infection. Some viruses alter cell growth directly, weaken immune protection, or cause long-lasting inflammation; examples include human papillomavirus, hepatitis B and C viruses, and Epstein-Barr virus.

Viral Conjunctivitis

Inflammation of the conjunctiva caused by a virus, often producing red, watery, irritated eyes and sometimes discharge. It is usually contagious and can spread through contact with infected secretions or contaminated hands and surfaces.

Viral Culture

Growth of a virus in susceptible cell cultures to identify an infectious agent. It can be useful for selected viruses, but molecular and antigen-based tests are often faster or more sensitive; the appropriate method depends on the suspected infection and specimen.

Viral Encephalitis

Inflammation of the brain caused by a virus. It may cause fever, headache, confusion, behavior change, seizures, weakness, or reduced consciousness. Severe cases can be life-threatening.

Viral Entry

The process by which a virus gets inside a host cell and releases its genetic material so the cell can make

more virus.

Viral Exanthem

A widespread rash caused by a viral infection. It may occur with fever, tiredness, sore throat, cough, diarrhea, or other symptoms; the rash pattern and overall illness help determine the cause.

Viral Gastroenteritis

Infection of the stomach and intestines by a virus, usually causing diarrhea, vomiting, or both. "Stomach flu" is a colloquial term and does not mean influenza.

Viral Haemorrhagic Fever

Alternate spelling; see *Viral Hemorrhagic Fevers*.

Viral Hemorrhagic Fevers

Severe illnesses caused by certain viruses that can damage blood vessels, disrupt clotting, and lead to bleeding, shock, or organ failure. Routes of spread and transmission risk vary by virus.

Alternate Names:
VHF; Hemorrhagic Fevers; Viral Hemorrhagic Disease

Viral Hepatitis

Liver inflammation caused by hepatitis viruses A, B, C, D, or E. Hepatitis A and E usually spread through contaminated food or water. Hepatitis B, C, and D spread mainly through blood or body fluids; hepatitis D occurs only in people who also have hepatitis B. B and C, and sometimes D, can cause long-term liver infection.

Alternate Names:
Infectious Hepatitis

Viral Hepatitis Types

Five viruses that can inflame the liver. They differ in how they spread, whether infection can become long-term, the complications they cause, and whether vaccination or curative treatment is available.

Viral Immune Evasion

Ways viruses avoid or weaken the body's immune defenses, allowing them to survive, multiply, or return after infection. These methods can make infections harder to clear and vaccines or treatments less effective.

Viral Infection

An illness caused by a virus entering body cells and making copies of itself. Viruses can damage cells directly or cause inflammation as the immune system responds. Viral infections range from mild illnesses such as colds and cold sores to serious diseases such as influenza, COVID-19, hepatitis, and HIV. Some viruses remain inactive in the body and can become active again later, such as the chickenpox virus causing shingles.

Alternate Names:
Viral Infections; Viral Disease; Viral Illness

Viral Infections and Pregnancy

Viral infections during pregnancy may affect maternal illness, fetal development, placenta, or newborn health. Evaluation considers the virus, gestational age, symptoms, immunity, exposure, testing, treatment, vaccination, and measures to reduce perinatal transmission.

Viral Infections of the Mouth

Infections of oral skin or mucosa caused by viruses such as herpes simplex, varicella-zoster, enteroviruses, HPV, or EBV. They may cause blisters, ulcers, warts, sore throat, or systemic symptoms, and treatment depends on the virus and host risk.

Viral Latency

A state in which a virus remains inside cells without actively making new virus particles. Some latent viruses can become active again, especially when the immune system is weakened or the body is under stress.

Viral Latency Mechanisms

Alternate name; see *Viral Latency*.

Viral Load

The amount of virus or viral genetic material in a body fluid or tissue, measured by a laboratory assay;

trends can help assess disease activity or response to antiviral treatment.

Viral Meningitis

Infection and inflammation of the coverings of the brain and spinal cord caused by a virus. It may cause fever, headache, neck stiffness, vomiting, light sensitivity, or confusion. Bacterial meningitis can cause similar symptoms and is more dangerous.

Viral Myocarditis

Inflammation of the heart muscle caused by a viral infection or by the immune response after an infection. It may cause tiredness, chest discomfort, palpitations, heart failure, shock, or dangerous abnormal heart rhythms.

Viral Pathogenesis

The ways a virus enters the body, infects and spreads through cells, and causes illness. Damage may come directly from infected cells or from the immune system's response to the infection.

Viral Pericarditis

Inflammation of the sac around the heart caused by a viral infection. It often follows a respiratory or stomach illness and may cause sharp chest pain that changes with breathing or position.

Viral Pharyngitis

Inflammation of the throat caused by a virus. It may cause sore throat, cough, runny nose, or conjunctivitis; the specific symptoms vary with the virus.

Alternate Names:
Viral Sore Throat; Acute Viral Pharyngotonsillitis; Viral Upper Respiratory Pharyngitis

Viral Pneumonia

Infection and inflammation of lung tissue caused by a virus, producing cough, fever, chills, breathlessness, chest discomfort, fatigue, and variable impairment of oxygenation. Severe disease can cause respiratory failure or secondary bacterial infection.

Viral Release

The stage when newly made viruses leave an infected cell and spread to other cells. Some leave by pushing through the cell membrane, while others are released when the infected cell breaks apart.

Viral Replication

The process by which a virus uses an infected cell to copy its genetic material and make viral proteins. The exact steps differ among viruses, but the result is production of new virus particles.

Viral Replication Cycle

The sequence of steps by which a virus makes new particles inside a host cell, usually including attachment, entry, genome replication, assembly, and release.

Viral Respiratory Infection

An infection of the nose, throat, or lower respiratory tract caused by a respiratory virus. Symptoms may include cough, runny nose, sore throat, fever, fatigue, or breathing difficulty; the specific virus and severity determine the clinical presentation.

Viral Rhinitis

Inflammation of the nasal lining caused by a respiratory virus, often as part of the common cold. It can cause a runny or blocked nose, sneezing, sore throat, and reduced sense of smell.

Alternate Names:
Acute Viral Rhinitis; Acute Coryza; Common Cold Rhinitis

Viral Structure

The parts of a virus: genetic material made of DNA or RNA inside a protective protein coat. Some viruses also have an outer fatty covering taken from the infected cell's membrane.

Viral Uncoating

The step after a virus enters a cell when its protective outer coat comes apart and releases the genetic material. The cell can then be directed to make new viral components.

Virchow Node

A firm, non-tender, pathologically enlarged left supraclavicular lymph node (Troisier sign) located in the left supraclavicular fossa, which receives abdominal lymphatic drainage via the thoracic duct and signals metastatic spread of abdominal malignancies (particularly gastric adenocarcinoma).

Alternate Names:
Troisier Node; Left Supraclavicular Sentinel Node

Virchow Triad

Three factors that increase the chance of a blood clot forming: injury to the inside of a blood vessel, slow blood flow, and blood that clots too easily.

Alternate Names:
Virchow's Triad; Thrombosis Pathophysiological Triad

Virchow's Triad

Alternate name; see *Virchow Triad*.

Virchow-Robin Spaces

Small fluid-filled spaces around blood vessels as they pass through the brain. They are a normal part of the spaces that surround and support these vessels.

Alternate Names:
Perivascular Spaces

Viremia

The presence of a virus in the bloodstream. It may be brief or persistent and can allow infection to spread to other organs. Laboratory tests may detect the virus itself or its genetic material.

Viridans Streptococci

Viridans streptococci are a group of bacteria commonly found in the mouth that can cause dental infections and, after entering the blood, infect heart valves.

Virilisation

The development of male secondary sexual characteristics in females, resulting from excessive androgen production or exposure.

Virilism

Development of masculinizing features in a female, usually from excess androgen exposure or production, such as hirsutism, deep voice, acne, and menstrual disturbance.

Virilism Foetal

Prenatal or neonatal masculinization of a genetically female fetus or infant due to excess androgen exposure. Causes include congenital adrenal hyperplasia, maternal androgen-producing disease, or placental and fetal steroidogenic disorders.

Virilization

Virilization is development of typically male secondary sexual features, such as hirsutism, deep voice, acne, increased muscle mass, or clitoromegaly, from androgen excess or androgen exposure.

Virilize

To virilize is to develop or cause typically male physical changes from androgen excess or treatment, including facial hair, voice deepening, acne, muscle change, or genital enlargement.

Virology

The study of viruses, including their structure, reproduction, spread, effects on the body, diagnosis, treatment, and prevention.

Virotherapy

Treatment that uses a virus, often modified, to attack cancer cells or deliver a useful gene into cells. It is an evolving field; the possible benefits, risks, and availability depend on the specific therapy and disease.

Virtual Colonoscopy

Virtual colonoscopy is CT colonography, which uses bowel preparation and gas or carbon-dioxide insufflation to create images of the colon; it can detect polyps and masses but cannot remove lesions or biopsy them.

Virulence

How severely a microorganism can cause disease or tissue damage. It depends on the organism's harmful properties and on the person's immune defenses and other health factors.

Virulence Factor

A feature of a microorganism that helps it survive in the body, avoid immune defenses, attach to cells, damage tissue, or cause disease. Examples include toxins, protective coatings, and enzymes.

Virulent

Capable of causing severe disease or extensive harm. Virulence describes the harmfulness of a microorganism and is different from infectivity, which describes how easily it spreads or establishes infection.

Virus

An infectious agent made of genetic material inside a protective protein coat, sometimes with an outer membrane. It can reproduce only inside living cells and may cause illness by damaging cells or triggering inflammation.

Virus Activation

Virus activation is the switch from a dormant or inactive viral state to production of new viral components and particles.

Virus Assembly

Alternate name; see *Viral Assembly*.

Virus Diseases

Illnesses caused by viruses. They range from mild infections of one area, such as a cold, to severe diseases affecting the lungs, liver, brain, blood, or several organs; prevention and treatment depend on the virus.

Virus Integration

Virus integration is insertion of viral genetic material into the DNA of a host cell, a process used by some viruses and important in certain cancers.

Virus Protein

A virus protein is a protein made from viral genetic instructions that helps form the virus, enter cells, replicate, or evade immunity.

Virus Receptor

A virus receptor is a molecule on a host cell that a virus binds to in order to attach to and enter the cell.

Virus Replication

Alternate name; see *Viral Replication*.

Virus Uncoating

Virus uncoating is removal of the virus's protective outer layer after entry into a host cell, releasing its genetic material for replication.

Viruses

Alternate name; see *Virus*.

Viscera

The internal organs of the body, particularly those within the thoracic and abdominal cavities. The thoracic viscera include the heart, lungs, esophagus, trachea, and thymus.

Visceral

Relating to the internal organs, especially those within the thorax or abdomen, rather than the body wall or limbs.

Visceral Afferents

Sensory nerve fibers that carry information from internal organs to the spinal cord and brain. They convey signals related to stretch, chemical changes, inflammation, and internal pain and help regulate autonomic and reflex responses.

Visceral Larva Migrans

A syndrome caused by migration of animal nematode larvae through human tissues, most often from Toxocara species. It may produce fever, eosinophilia, liver lesions, or ocular and neurologic disease.

Visceral Leishmaniasis

A severe, potentially fatal systemic protozoan infection caused by species of the Leishmania donovani complex (Leishmania donovani and Leishmania infantum) transmitted to humans by the bite of female phlebotomine sandflies. Characterized by the intracellular dissemination of amastigotes within the reticuloendothelial system, it presents with prolonged irregular fever, progressive massive splenomegaly, hepatomegaly, profound pancytopenia (anemia, leukopenia, and thrombocytopenia), hypergammaglobulinemia, and severe wasting, fatal in over 95% of untreated cases.

Alternate Names:
Kala-Azar; Black Fever; Dumdum Fever; Systemic Leishmaniasis

Visceral Pain

Pain arising from internal organs, often felt as pressure, cramping, aching, or poorly localized discomfort rather than sharp surface pain. It may result from stretching, inflammation, reduced blood flow, obstruction, or injury of an organ.

Viscerogenic

Originating in the internal organs; the term may describe pain or reflexes that arise from them.

Visceromegaly

Abnormal enlargement of one or more internal organs, such as the liver, spleen, or kidneys. It is a physical finding with causes that include infection, congestion, storage disease, inflammation, and cancer.

Viscerotropic

Primarily affecting or tending to target the internal organs (viscera), as a disease or infectious agent.

Viscus

An internal organ, especially one in the chest or abdomen. The plural is viscera; examples include the heart, lungs, liver, stomach, and intestines.

Vision

The sense that detects light and enables the brain to form and interpret images, including shape, color, movement, and spatial relationships. It depends on the eyes, optic nerves, and visual pathways in the brain.

Alternate Names:
Eyesight; Sight; Visual Perception

Vision And Hearing

Two major senses used to understand and communicate with the world. Problems may develop separately or together because of aging, illness, injury, medicines, or inherited conditions and can affect learning, safety, communication, and daily activities.

Vision Impairment

Alternate name; see *Visual Impairment*.

Vision Loss

A decrease in the ability to see that cannot be fully corrected with eyeglasses, contact lenses, or medical treatment. It ranges from partial impairment to complete blindness and can result from conditions such as macular degeneration, glaucoma, diabetic retinopathy, cataracts, and traumatic injury.

Vision Problems

Changes in visual acuity, field, color, or clarity caused by refractive error, eye disease, neurologic disease, or systemic illness. Sudden vision loss is an emergency.

Vision Receptors

Light-sensing cells in the retina, mainly rods and cones, that convert light into nerve signals. Rods support dim-light vision, while cones provide color and sharp detail in brighter conditions.

Vision Screening

Brief checks used to find possible eye or vision problems before symptoms are obvious. Newborn checks may detect cataracts or other serious disorders; screening in young children looks for poor

vision, misaligned eyes, or risks for reduced vision and leads to a full eye examination when needed.

Vision Test

An examination that measures visual acuity, fields, color, alignment, or eye structures to detect refractive error, retinal disease, optic-nerve dysfunction, glaucoma, or other causes of visual impairment.

Visual Acuity

How clearly a person can see fine details, usually measured by reading letters or symbols at a set distance. It can be reduced by focusing problems, eye disease, or disorders affecting the visual nerves or brain.

Visual Acuity Test

A test measuring the smallest standardized detail a person can resolve at a specified distance, usually reported as a fraction or decimal.

Visual Agnosia

Inability to recognize familiar objects, faces, or symbols by sight even though the eyes may see adequately. It usually results from damage to brain areas that interpret vision, such as after a stroke or head injury.

Visual Evoked Potential

A test that records the brain's electrical response to flashes or changing visual patterns. It helps assess the nerve pathways that carry visual signals from the eyes to the brain.

Alternate Names:
VEP; Visual Evoked Response (VER)

Visual Field

The entire area that can be seen while the eyes remain fixed in one position. Visual-field loss may result from retinal, optic-nerve, or brain lesions and is assessed by perimetry.

Visual Field Defect

Loss or change in part of the area a person can see while looking straight ahead. It may result from disease of the retina, optic nerve, or brain, and the pattern can help identify where the problem is.

Visual Field Perimetry

A test that maps how well a person sees in different parts of the visual field while looking at a fixed point. It can detect and monitor missing areas caused by eye-nerve, retinal, or brain disease.

Visual Field Test

A test that measures central and side vision and maps areas that are missing or less sensitive.

Visual Fields

The total area that can be seen while the eyes are fixed in one position; defects may indicate retinal, optic-nerve, or brain disease.

Visual Impairment

Reduced vision that cannot be fully corrected by ordinary glasses or contact lenses. Causes include refractive error, cataract, glaucoma, retinal disease, optic-nerve injury, and disorders of the brain or nervous system.

Visual Neglect

A brain disorder in which a person fails to notice or respond to things on one side, even though the eyes may work normally. It often follows a stroke affecting the right side of the brain and causes neglect of the left side.

Alternate Names:
Hemispatial Neglect; Spatial Inattention

Visualized Laser-Assisted Prostatectomy

A procedure that uses a laser, guided by a camera, to remove or vaporize prostate tissue blocking urine flow. It is used for some people with an enlarged prostate and may cause bleeding, infection, scar narrowing, or temporary urinary and sexual problems.

Alternate Names:
VLAP

Vital

Essential for life or relating to vital physiologic functions. Vital signs commonly include temperature, pulse, respiratory rate, blood pressure, and oxygen saturation.

Vital Capacity

The greatest amount of air a person can breathe out after filling the lungs as fully as possible. It is measured during lung-function testing and may be reduced by lung disease, weak breathing muscles, or restriction of chest movement.

Vital Signs

Basic measurements of physiologic status, commonly including temperature, pulse, respiratory rate, blood pressure, and oxygen saturation. Values vary with age, activity, illness, and measurement conditions; trends and clinical context are important.

Vitamin A

A fat-soluble nutrient needed for vision, immune function, growth, and healthy tissues. Retinol is a major form; deficiency can impair vision, while excess preformed vitamin A can injure the liver and developing fetus.

Vitamin A Blood Test

A blood test measuring circulating retinol, used to assess suspected vitamin A deficiency or toxicity in appropriate clinical settings.

Vitamin A Deficiency

A nutritional disorder resulting from inadequate intake or absorption of vitamin A (retinol), causing dry eyes (xerophthalmia), night blindness, dry skin, and weakened immunity. Severe deficiency leads to corneal ulceration and is the leading cause of preventable childhood blindness worldwide; clinical eye stages are categorized using the WHO xerophthalmia classification.

Alternate Names:
Hypovitaminosis A; Retinol Deficiency; Vitamin A Lack

Vitamin A Toxicity

Harm caused by taking too much vitamin A or related medicines. It may cause nausea, vomiting, headache, dry skin, hair loss, liver injury, high calcium levels, and serious fetal abnormalities during pregnancy.

Vitamin A: Retinal

Retinal (retinaldehyde) is a form of vitamin A made from retinol. In the eye, it binds to opsin proteins to form light-sensitive pigments in rod and cone cells.

Vitamin B

Vitamin B refers to a group of water-soluble vitamins that support energy metabolism, blood-cell formation, nerve function, and other processes. The group includes several distinct vitamins, not one single substance.

Vitamin B Complex

A group of eight water-soluble vitamins: thiamine (B1), riboflavin (B2), niacin (B3), pantothenic acid (B5), vitamin B6, biotin (B7), folate (B9), and vitamin B12. They support processes such as energy metabolism, blood-cell formation, and nerve function. Each has distinct roles and deficiency effects.

Alternate Names:
B Vitamins; Vitamin B Group

Vitamin B1

Thiamine, a water-soluble vitamin that acts as a cofactor in carbohydrate and amino-acid metabolism and supports nerve function. Severe deficiency can cause beriberi or Wernicke encephalopathy.

Alternate Names:
Thiamine; Aneurin

Vitamin B12

A vitamin needed for red blood cell formation, DNA production, and normal nerve function. Deficiency can cause anemia, numbness, balance problems, or cognitive changes.

Alternate Names:
Cobalamin

Vitamin B12 Deficiency

Too little vitamin B12, which can cause large abnormal red cells, tiredness, numbness, balance problems, or nerve damage. Causes include poor intake, poor absorption, autoimmune disease, stomach surgery, and medicines.

Vitamin B12 Deficiency Anemia

Anemia caused by too little vitamin B12 or poor absorption of it. It can cause tiredness, pale skin, a sore tongue, numbness, balance problems, and permanent nerve damage if untreated for a long time.

Alternate Names:
Vitamin B12 Deficiency Anaemia

Vitamin B12 Deficiency In Older Adults

Deficiency caused by inadequate intake, malabsorption, autoimmune intrinsic-factor deficiency, gastric surgery, or medications. It may cause megaloblastic anemia, neuropathy, cognitive changes, gait impairment, and glossitis; neurologic injury can occur without anemia.

Vitamin B12 Level

The amount of vitamin B12 measured in blood; results are interpreted with symptoms and related tests because serum levels may not fully reflect tissue deficiency.

Vitamin B12: Cobalamin

Alternate name; see *Vitamin B12*.

Vitamin B1: Thiamine

Alternate name; see *Vitamin B1*.

Vitamin B2

Riboflavin, a water-soluble vitamin that helps cells produce energy and supports healthy skin, eyes, and the lining of the mouth. Deficiency can cause cracks at the mouth corners, a sore tongue, skin changes, or anemia.

Alternate Names:
Riboflavin; Lactoflavin

Vitamin B2 Riboflavin

Alternate name; see *Riboflavin*.

Vitamin B3

Niacin, a water-soluble vitamin that helps cells use food for energy and supports normal skin and nervous-system function. Severe deficiency causes pellagra, which can include diarrhea, skin inflammation, and neurologic problems.

Alternate Names:
Niacin

Vitamin B5

A water-soluble vitamin needed to help the body use fats, carbohydrates, and proteins and make hormones and other substances. It is found in many foods, so deficiency is rare; very large supplement doses may cause stomach upset.

Alternate Names:
Pantothenate; Calcium Pantothenate

Vitamin B6

A group of related compounds needed for amino-acid metabolism, red-cell production, and nerve function. Pyridoxine is one form; excess supplemental vitamin B6 can cause sensory nerve damage.

Vitamin B6: Pyridoxine

Alternate name; see *Vitamin B6*.

Vitamin B7

A vitamin that helps the body use fats, carbohydrates, and proteins. Deficiency is uncommon but may cause hair loss, skin rash, or neurologic symptoms; large doses can interfere with some laboratory tests.

Alternate Names:
Vitamin H; Coenzyme R

Vitamin B9

A vitamin needed for DNA production and healthy red blood cells. Deficiency can cause large-cell anemia and, during pregnancy, increases the risk of neural-tube defects; folic acid is recommended before conception and early in pregnancy.

Alternate Names:
Folic Acid; Pteroylglutamic Acid

Vitamin C

A water-soluble vitamin needed for collagen formation, wound healing, immune function, antioxidant activity, and absorption of iron from plant foods. Severe deficiency causes scurvy, with bleeding gums, bruising, poor wound healing, and weakness.

Alternate Names:
Ascorbic Acid

Vitamin C Deficiency

Too little vitamin C, usually after prolonged low intake. Severe deficiency causes scurvy, with bleeding gums, easy bruising, poor wound healing, joint pain, and weakness.

Vitamin D

Vitamin D supports calcium and phosphate balance, bone mineralization, muscle function, and immune processes; deficiency causes rickets in children and osteomalacia or bone loss in adults.

Vitamin D Deficiency

Too little vitamin D for the body's needs. It can result from low intake or sunlight, poor absorption, or liver or kidney disease and may weaken bones, cause muscle weakness, or lead to rickets in children.

Vitamin D3

Cholecalciferol, a form of vitamin D made in skin and found in some foods and supplements. It helps the body absorb calcium and maintain healthy bones.

Vitamin D: Calcitriol

Alternate name; see *Calcitriol*. Calcitriol is the active hormone form of vitamin D, not another name for vitamin D as a whole.

Vitamin Deficiency Anemia

Anemia caused by inadequate vitamin B-12, folate, or other nutrients needed for normal red blood cell production.

Vitamin E

A group of fat-soluble compounds, including tocopherols and tocotrienols, with antioxidant activity. Alpha-tocopherol is the main form maintained in the human body. High-dose supplements can increase bleeding risk and interact with medicines.

Vitamin E Deficiency

Deficiency of a fat-soluble antioxidant vitamin, usually caused by fat-malabsorption disorders or rare inherited conditions. Severe deficiency can cause peripheral neuropathy, ataxia, muscle weakness, retinal dysfunction, or hemolytic anemia.

Vitamin E: Tocopherol

Tocopherols are one group of compounds with vitamin E activity; see *Vitamin E*.

Vitamin K

A fat-soluble vitamin needed to activate several blood-clotting proteins and support bone metabolism. Phylloquinone, the main dietary form, is found in leafy green vegetables and some vegetable oils. Deficiency can cause abnormal bleeding.

Vitamin K Deficiency

Too little vitamin K for normal production of clotting factors, causing an increased bleeding tendency. It can result from poor intake, malabsorption, liver disease, or certain medicines; newborns receive vitamin K prophylaxis.

Vitamin K Deficiency Bleeding

Bleeding in a newborn or young infant caused by inadequate vitamin K-dependent clotting activity. It may occur early, classically, or late and can involve the brain or gastrointestinal tract.

Alternate Names:
VKDB; Neonatal Hypoprothrombinemia

Vitamin K Prophylaxis

Giving vitamin K to a newborn soon after birth to prevent bleeding caused by vitamin K deficiency.

Vitamin K: Phylloquinone

Phylloquinone is the main dietary form of vitamin K; see *Vitamin K*.

Vitamin Toxicity

Harm caused by excessive vitamin intake, most often involving fat-soluble vitamins that can accumulate in the body. Excess vitamin A can injure the liver and developing fetus; excess vitamin D can raise blood calcium; and high-dose vitamin E can increase bleeding risk.

Vitamins

Organic nutrients needed in small amounts for normal metabolism, growth, and tissue maintenance; some are water-soluble and others fat-soluble, and both deficiency and excess can cause disease.

Vitiligo

Vitiligo is a condition in which areas of skin lose pigment because melanocytes are destroyed or stop functioning. It is not contagious, and treatment may include camouflage, topical medicines, or light therapy.

Vitrectomy

Eye surgery that removes some or all of the vitreous, the clear gel that fills the middle of the eye. Small instruments are inserted through the wall of the eye to remove cloudy gel, blood, scar tissue, or a foreign object and to repair problems of the retina. It may be used for retinal detachment, diabetic eye disease, macular hole, macular pucker, severe eye injury, or serious eye infection. The removed gel may be replaced with a salt solution, air or gas, or silicone oil.

Vitreous

Relating to the transparent gel filling most of the space between the lens and retina, or describing a glass-like appearance. Vitreous disorders can cause floaters, hemorrhage, detachment, or retinal traction.

Vitreous Body

The transparent gel filling the large space between the lens and retina. It helps maintain the shape of the eye and transmits light; age-related liquefaction can cause floaters or contribute to retinal traction.

Alternate Names:
Corpus Vitreum

Vitreous Detachment

Separation of the vitreous gel from the retina, usually related to aging and often causing new floaters or flashes. Sudden symptoms can occur with a retinal tear or detachment.

Vitreous Hemorrhage

Bleeding into the vitreous cavity that causes sudden painless floaters, cobwebs, haze, or loss of vision. Common causes include proliferative diabetic retinopathy, retinal tear or detachment, trauma, and posterior vitreous separation.

Vitreous Humor

Alternate name; see *Vitreous Body*.

VKORC1 Polymorphism

An inherited variation in the vitamin K epoxide reductase complex subunit 1 gene that can alter sensitivity to warfarin. Genotype may contribute to dose selection, but clinical factors, interacting medicines, diet, and INR monitoring remain important.

VLDL Test

A blood test that measures or estimates very-low-density lipoprotein, a particle carrying triglycerides. The result may help assess cardiovascular risk but is interpreted with the full cholesterol and triglyceride profile.

VO2 Max

The greatest amount of oxygen the body can use during intense exercise. It is a measure of aerobic fitness and is influenced by the heart, lungs, blood, muscles, age, health, and training.

Alternate Names:
Maximal Oxygen Consumption; Maximal Aerobic Capacity

Vocal Cord Disorders

Disorders affecting the vocal folds or their nerves, including nodules, polyps, cysts, inflammation, paralysis, and spasmodic dysphonia. They may cause hoarseness, voice loss, throat discomfort, noisy breathing, or difficulty swallowing.

Vocal Cord Dysfunction

Older name; see *Inducible Laryngeal Obstruction*.

Vocal Cord Nodules

Benign thickened areas on the vocal folds, often affecting both sides and associated with repeated voice strain. They can cause hoarseness, vocal fatigue, and a rough or breathy voice.

Vocal Cord Paralysis

Inability of one or both vocal folds to move normally, often because of nerve damage. It may cause hoarseness, weak cough, choking, or difficulty protecting the airway.

Alternate Names:
Vocal Fold Paralysis

Vocal Cord Paresis

Weakness or partial paralysis of one or both vocal cords, often from injury to the nerves that control them. It can cause a weak or breathy voice, voice fatigue, coughing during eating, or aspiration.

Vocal Cord Polyp

A usually noncancerous growth on a vocal fold, often after heavy or sudden voice use. It can cause persistent hoarseness, a rough voice, or voice fatigue and is assessed by examining the larynx.

Vocal Cords

Alternate name; see *Vocal Folds*.

Vocal Fold Paralysis

Alternate name; see *Vocal Cord Paralysis*.

Vocal Folds

Two folds inside the voice box that vibrate as air passes between them to make sound. They also close during swallowing to protect the lungs from food and liquid.

Vocal Hemorrhage

Vocal hemorrhage is bleeding into a vocal fold, often after sudden or forceful voice use. It can cause abrupt hoarseness.

Vocal Nodules

Benign thickened areas on the vocal folds, usually caused by repeated voice strain. They can cause hoarseness, a rough or breathy voice, vocal fatigue, and loss of vocal range.

Vocal Resonance

The sound of a person's voice heard through the chest with a stethoscope while they speak. Changes in the sound can provide clues to pneumonia, fluid around the lung, a collapsed lung, or other lung disease.

Vocal-Cord Dysfunction

Older name; see *Inducible Laryngeal Obstruction*.

Vocal-Fold Nodules

Alternate name; see *Vocal Cord Nodules*.

Vocal-Fold Polyps

Alternate name for vocal cord polyps, usually noncancerous growths on the vocal folds that can cause persistent hoarseness or voice fatigue.

Vogt-Koyanagi-Harada Disease

A rare autoimmune disease affecting both eyes and other organs. It causes inflammation inside the eyes, often with fluid beneath the retina, and may also affect hearing, the meninges, and skin or hair pigment.

Alternate Names:
VKH Syndrome; Uveomeningoencephalitic Syndrome

Vogt-Koyanagi-Harada Syndrome

Alternate name; see *Vogt-Koyanagi-Harada Disease*.

Vohwinkel Syndrome

A rare inherited palmoplantar keratoderma causing thick skin on the palms and soles, constricting bands around fingers or toes, and sometimes hearing loss or other features. Severe constriction can threaten circulation and requires specialist care.

Voice

Sound produced by vibration of the vocal folds as air passes through the larynx, then shaped by the throat, mouth, and nose for speech.

Voice And Speech

The products of complex coordinated activity of the respiratory, laryngeal, and articulatory systems. Communication produced by coordinated breathing, voice-box vibration, and movements of the mouth, tongue, and other speech structures.

Voice Box

The larynx, an organ in the neck containing the vocal folds and forming part of the airway. It produces voice and helps protect the lower respiratory tract during swallowing.

Voice Disorders

Conditions affecting voice quality, pitch, loudness, or ease of speaking because of problems involving the vocal folds, airway, nerves, or voice use.

Void

To empty the urinary bladder by urinating; in other medical contexts, void may mean an empty space or absence of a substance.

Voiding Cystourethrogram

An X-ray test that fills the bladder with contrast through a catheter and records the bladder and urethra while the person urinates. It can show urine flowing backward toward the kidneys, blockage, leakage, or structural problems, especially in children with selected urinary infections.

Volar

Relating to the palm of the hand or sole of the foot, especially the surface opposite the dorsum.

Volatile Anesthetics

Inhaled medicines used to produce and maintain unconsciousness during some operations. They can lower blood pressure and breathing and rarely cause a dangerous rise in body temperature in susceptible people.

Alternate Names:
Inhalational Anesthetics; Inhalation General Anesthetics

Volkmann Contracture

A permanent, severe ischemic contracture of the forearm flexor musculature leading to a claw-like hand deformity, resulting from untreated acute compartment syndrome of the forearm following supracondylar humeral fractures, crush injuries, or tight casting.

Alternate Names:
Volkmann's Ischemic Contracture; Ischemic Myodystrophy

Alternate Names:
Volkmann contracture; Volkmann's ischaemic contracture; Volkmann claw deformity.

Volume Of Distribution

A calculated measure of how widely a medicine appears to spread through the body compared with the amount left in the blood. It helps guide dosing but does not represent a real space inside the body.

Volume Overload

Excess total body sodium and water, causing peripheral or pulmonary oedema; common causes include heart failure, kidney failure, liver disease, and excessive intravenous fluid, and treatment depends on the cause and severity.

Voluntary

Under conscious control or performed by choice, such as voluntary movement. Voluntary action is distinguished from reflex, autonomic, or involuntary activity.

Voluntary Psychiatric Admission

Admission to a hospital or psychiatric facility with the person's agreement for assessment, treatment, or safety support. Legal rules about consent, leaving, capacity, and conversion to involuntary status vary by jurisdiction.

Volutrauma

Lung injury caused by overstretching the lungs, usually when a breathing machine delivers breaths that are too large. Careful ventilator settings can reduce this risk.

Volvulus

Twisting of a loop of intestine that blocks passage through the bowel and may cut off its blood supply. It can cause severe pain, vomiting, swelling, and tissue death and can be life-threatening.

Vomit

To eject stomach or upper gastrointestinal contents through the mouth; the expelled material may also be called vomitus. Persistent vomiting can cause dehydration and electrolyte abnormalities.

Vomiting

Forceful emptying of stomach contents through the mouth. It may result from infection, digestive disease, medicines, pregnancy, migraine, brain disorders, or poisoning. Repeated vomiting can cause dehydration, disturbed body salts, or inhalation of vomit.

Vomiting Blood

The passage of blood or coffee-ground material in vomit, usually indicating bleeding in the upper digestive tract. It can be a serious symptom.

Vomitus

Material expelled from the stomach or upper gastrointestinal tract during vomiting. Its color and contents can provide clues but do not by themselves establish a diagnosis.

Von Economo Encephalitis

An atypical form of epidemic encephalitis (encephalitis lethargica) characterized by pronounced lethargy, hypersomnolence, ophthalmoplegia, and a frequent late sequela of progressive post-encephalitic parkinsonism, pathologically marked by midbrain and basal ganglia inflammation.

Alternate Names:
Encephalitis Lethargica; Sleeping Sickness (Von Economo Type)

Von Gierke Disease

Glycogen storage disease type I, an inherited deficiency of glucose-6-phosphatase or its transport system that causes fasting hypoglycemia, lactic acidosis, enlarged liver, and excess uric acid or lipids.

Von Graefe Sign

A delay of the upper eyelid as the eyes look downward, leaving a strip of white visible above the iris. It can occur with an overactive thyroid and related eye disease.

Alternate Names:
Lid Lag Sign; Von Graefe's Lid Lag

Von Hippel-Lindau Disease

An inherited condition, usually caused by a change in the *VHL* gene, that increases the risk of tumors and cysts in the brain, spinal cord, eyes, kidneys, adrenal glands, and pancreas. These growths can affect vision, blood pressure, or kidney function.

Von Hippel-Lindau Syndrome

Von Hippel-Lindau syndrome is an inherited disorder caused by changes in the VHL gene. It increases the risk of tumors and cysts in organs such as the brain, retina, kidneys, pancreas, and adrenal glands.

Von Meyenburg Complex

A benign congenital biliary ductal plate malformation (biliary microhamartoma) consisting of small, non-progressive clusters of dilated, cystic bile ducts embedded in a dense collagenous stroma, usually discovered incidentally on liver imaging or biopsy.

Alternate Names:

Biliary Microhamartoma; Ductal Plate Malformation

Von Recklinghausen Disease

Von Recklinghausen disease is another name for neurofibromatosis type 1, an inherited condition causing multiple café-au-lait spots, neurofibromas, and increased risk of certain nerve, bone, eye, and other problems.

Von Recklinghausen'S Disease

Alternate name; see *Neurofibromatosis type 1*.

Von Recklinghausen'S Neurofibromatosis

Alternate name; see *Neurofibromatosis type 1*.

Von Recklinghausen'S Phakomatosis

Alternate name; see *Neurofibromatosis type 1*.

Von Rosen Splint

A malleable, lightweight orthopedic abduction splint applied in neonates with developmental dysplasia of the hip (DDH) to maintain the femoral head securely centered within the acetabulum in flexion and abduction.

Alternate Names:
Von Rosen Frame; DDH Abduction Splint

Von Willebrand Disease

A bleeding disorder caused by too little or poorly working von Willebrand factor, a blood protein that helps clots form. It is often autosomal dominant, although severe type 3 and some other forms are autosomal recessive. It commonly causes nosebleeds, easy bruising, heavy menstrual bleeding, or prolonged bleeding after procedures.

VOR Reflex

A reflex that moves the eyes opposite to head movement so vision stays steady while the head turns. Problems with this reflex can cause blurred or bouncing vision, dizziness, or imbalance.

Voriconazole

An antifungal medicine used for selected serious fungal infections. It stops fungi making an essential part of their outer structure; vision changes, liver problems, medicine interactions, and skin sensitivity require monitoring.

Voyeurism

A recurrent sexual interest in observing an unsuspecting person who is naked, disrobing, or engaging in sexual activity. The interest alone is not a mental disorder; voyeuristic disorder is the diagnostic term when required criteria are met.

Voyeuristic Disorder

A paraphilic disorder involving recurrent, intense sexual arousal from observing an unsuspecting person who is naked, disrobing, or engaging in sexual activity. Diagnostic criteria include acting on the urges or clinically significant distress or impairment, with the required duration criteria.

VPCs (Ventricular Premature Contractions)

Alternate name; see *Premature ventricular contractions (PVCs)*.

VRE (Vancomycin-Resistant Enterococci)

Enterococcus bacteria that are no longer killed by vancomycin, an antibiotic. They may live harmlessly in the body or cause urinary, wound, bloodstream, or other infections that require infection-control measures and suitable treatment.

VRE Infection

An infection caused by vancomycin-resistant enterococci, bacteria that commonly live in the intestine but can cause urinary-tract, wound, bloodstream, heart-valve, or other infections. Treatment depends on the infection site and susceptibility testing because usual antibiotics may not work.

VSD

Alternate name; see *Ventricular Septal Defect*.

Vulnerary

A substance traditionally believed to help heal

wounds. Such products may lack good evidence and can cause allergy or contamination.

Vulva

The external female genital structures, including the mons pubis, labia, clitoris, and vestibule. It protects the openings of the urinary and reproductive tracts and contains specialized sensory and glandular tissue.

Alternate Names:
Female External Genitalia; Pudendum

Vulval Intraepithelial Neoplasia

Alternate spelling; see *Vulvar Intraepithelial Neoplasia*.

Vulvar

Relating to the vulva, the external female genital structures including the labia, clitoris, vestibule, and associated glands.

Vulvar Cancer

Cancer arising in the external female genitalia. It may appear as a persistent lump, ulcer, wart-like lesion, itching, pain, or bleeding.

Vulvar Carcinoma

Alternate name; see *Vulvar Cancer*.

Vulvar Inclusion Cysts

Small sacs under the skin of the vulva that contain tissue trapped from the surface lining. They may develop after childbirth tears, surgery, or other injury, or occur without an obvious cause. Most cause no symptoms, but they may become swollen, painful, infected, or uncomfortable during sexual activity. Symptomatic cysts may need removal.

Vulvar Intraepithelial Neoplasia

Abnormal cells limited to the surface layer of the vulva. Some forms can progress to invasive cancer, especially without treatment. It may cause itching, burning, sores, warty growths, or a color change, but some people have no symptoms.

Vulvar Melanoma

A rare cancer of the pigment-producing cells in the vulva. It may appear as a dark or skin-colored lump, patch, sore, or bleeding area; diagnosis requires a biopsy, and treatment depends on size and spread.

Vulvar Squamous Cell Carcinoma

The most common invasive vulvar malignancy, arising through HPV-related or HPV-independent pathways. It usually presents as a persistent mass, ulcer, plaque, or wart-like lesion and requires biopsy for diagnosis.

Vulvectomy

Surgical removal of part or all of the vulva, performed for selected cancers, precancerous lesions, or severe persistent disease.

Vulvitis

Inflammation or irritation of the external female genital area. It can cause itching, burning, redness, swelling, soreness, or discharge and may result from infection, allergy, skin disease, hormones, or friction.

Vulvodynia

Persistent or recurring pain in the vulva without an identifiable cause or specific disorder. The pain may be localized or widespread, triggered by touch or pressure, or occur without touch; it is often described as burning, rawness, or soreness.

Alternate Names:
Chronic Vulvar Pain

Vulvovaginal Candidiasis

Inflammation of the vulva and vagina caused by symptomatic overgrowth of Candida yeasts, usually *C. albicans*; Candida may also be present without causing symptoms. It commonly causes itching, soreness, redness or swelling, external burning with urination, pain during sex, and sometimes thick white discharge, but these symptoms are not specific. It is not usually sexually transmitted; recurrent disease generally means three or more symptomatic episodes in less than a year.

Vulvovaginitis

Simultaneous inflammation or infection of the vulva and vagina, commonly presenting with pruritus, burning, dysuria, dyspareunia, and abnormal vaginal discharge, resulting from infectious etiologies (such as Candida albicans, Bacterial vaginosis, Trichomonas vaginalis) or non-infectious causes (atrophic vaginitis, contact irritants).

Alternate Names:
Vaginitis and Vulvitis; Vulvovaginal Inflammation

W

Waardenburg Syndrome

A group of inherited conditions that may cause hearing loss and unusual coloring of the eyes, hair, or skin. Some forms also affect the arms or the nerves controlling the bowel; findings vary by type.

Waddell Signs

A group of examination responses sometimes seen during assessment of low back pain, including tenderness, simulated pain tests, and findings that do not follow typical anatomy. They are not a test for malingering and do not by themselves show that pain is psychological.

Alternate Names:
Waddell Nonorganic Signs

WAGR Syndrome

A rare genetic condition that may cause an increased risk of Wilms kidney tumor, missing or poorly formed irises, urinary or reproductive differences, and developmental delay. Children need regular specialist monitoring, especially for kidney tumors.

Waist Circumference

The distance around the abdomen, measured at a standard level. A larger measurement can indicate more abdominal fat and a higher risk of diabetes and heart disease, but it must be interpreted with other health information.

Waist-Hip Ratio

A measurement comparing waist size with hip size. It provides an estimate of where body fat is stored and may add information about diabetes and cardiovascular risk, but it does not diagnose disease by itself.

Wait List

A list of candidates registered to receive an organ transplant. Placement and allocation priority are determined by the applicable transplant system and may consider medical urgency, expected benefit, blood or tissue compatibility, organ size, waiting time, and other policy-based factors; it is not necessarily a simple first-come, first-served queue.

Alternate Names:
Waiting List; Transplant Waiting List; Transplant Waitlist

Wakefulness

The state of being conscious and able to respond to the surroundings. Sleep, medicines, illness, brain injury, and metabolic problems can change the level of wakefulness.

Waldenstrom Macroglobulinemia

A slow-growing blood cancer, a type of lymphoplasmacytic lymphoma, in which abnormal cells in the bone marrow make too much of an antibody called IgM. It may cause anemia, bleeding, vision or nerve problems, enlarged lymph nodes, or no symptoms at first.

Waldenstrom's Macroglobulinemia

Alternate name; see *Waldenstrom macroglobulinemia*.

Waldenström's Macroglobulinemia

Alternate spelling; see *Waldenstrom macroglobuline-*

mia.

Waldeyer Ring

An annular anatomical arrangement of lymphoid tissue surrounding the opening of the pharynx and nasal cavity, consisting of the pharyngeal tonsils (adenoids), tubal tonsils, palatine tonsils, and lingual tonsils. It functions as the first line of immune defense against ingested or inhaled pathogens.

Alternate Names:
Waldeyer Lymphatic Ring; Pharyngeal Lymphoid Ring

Walker-Warburg Syndrome

A rare inherited disorder causing severe muscle weakness together with major abnormalities of the brain and eyes from birth. Babies may have low muscle tone, seizures, poor feeding, enlarged fluid spaces in the brain, and abnormal eye development; the condition is usually life-threatening in infancy.

Alternate Names:
WWS; HARD +/- E Syndrome

Walking Abnormalities

Walking abnormalities include changes in speed, balance, stride, posture, or coordination caused by pain, weakness, sensory loss, joint disease, or neurologic illness.

Walking Pneumonia

An informal term for a usually mild pneumonia that does not prevent a person from carrying on many daily activities. It is often associated with *Mycoplasma pneumoniae*, but the term does not identify a specific cause.

Walking Speed

The rate at which a person walks, often measured over a defined distance. It can provide information about mobility and function, but no single speed determines disability in every person.

Wall Stress

The force acting on a heart chamber's wall, influenced by pressure inside the chamber, its size, and wall thickness. Increased wall stress makes the heart work harder and can contribute to remodeling or failure.

Wallenberg Syndrome

A neurological condition caused by infarction of the lateral medulla oblongata, most commonly resulting from occlusion of the posterior inferior cerebellar artery (PICA) or vertebral artery. Manifestations include ipsilateral facial sensory loss, Horner syndrome, ataxia, dysphagia, hoarseness, and contralateral loss of pain and temperature sensation in the trunk and limbs.

Alternate Names:
Lateral Medullary Syndrome; PICA Syndrome; Posterior Inferior Cerebellar Artery Syndrome

Wallerian Degeneration

Breakdown of the part of an axon beyond a nerve injury after it loses contact with the nerve cell. In peripheral nerves, this process clears damaged axon and myelin and can support later regrowth; regeneration in the central nervous system is much more limited.

Walleyed

An older, informal term for outward turning of one or both eyes, medically called exotropia.

Wandering Rash Tongue

A common name for geographic tongue, a benign inflammatory condition in which smooth red patches with pale borders move across the tongue. It is not contagious and may cause sensitivity to spicy or acidic foods.

Wandering Spleen

A spleen that can move unusually because its supporting bands are loose or missing. It may cause no symptoms or lead to abdominal pain, enlargement, twisting, loss of blood supply, or sudden severe illness.

Warburg Effect

The tendency of many cancer cells to take up glucose and convert much of it to lactate even when

oxygen is available. This pattern can occur alongside mitochondrial energy production and supports the cells' growth and metabolism.

Warfarin

A blood-thinning medicine that reduces production of vitamin-K-dependent clotting proteins. It prevents and treats clots but requires regular blood tests because food, illnesses, and many medicines alter its effect.

Warfarin and Superwarfarin Toxicity

Harm from excessive exposure to warfarin or a long-acting related rodenticide. It can prevent blood from clotting normally and cause bleeding, sometimes after a delay.

Warfarin Syndrome

A pattern of fetal abnormalities caused by warfarin exposure during pregnancy, including nasal and skeletal abnormalities, eye or neurologic defects, and fetal or neonatal bleeding.

Warfarin-Induced Skin Necrosis

A rare complication in which small blood clots block vessels in the skin, causing painful red or purple areas that may progress to tissue death. It usually begins within days of starting warfarin and is associated with an imbalance in clotting proteins, including protein C.

Alternate Names:
Coumadin-Induced Skin Necrosis

Warm and Cold Autoantibodies

Antibodies that bind to a person's red blood cells most effectively at warmer or colder temperatures. They can interfere with laboratory testing and, in some cases, cause red-cell destruction and anemia.

Warm Autoimmune Hemolytic Anemia

An illness in which the immune system makes antibodies that cause red blood cells to be destroyed too early, mainly in the spleen. It can cause tiredness, pale or yellow skin, dark urine, shortness of breath, or a fast heartbeat and requires medical evaluation.

Alternate Names:
wAIHA; Warm Antibody Hemolytic Anemia

Warm Ischemia

Lack of blood and oxygen reaching tissue while it remains at body temperature. It can quickly cause cell damage and is important during some injuries, operations, and organ transplantation.

Wart

A usually harmless rough skin growth caused by human papillomavirus. Warts may spread by contact and often disappear over time. Common types include common, plantar, and flat warts; appearance and symptoms vary by site.

Alternate Names:
Verruca

Wart Remover Poisoning

Toxic exposure to a wart-removal product, often involving salicylic acid or another keratolytic. Severity depends on the substance, amount, route, symptoms, and duration of exposure.

Warthin Tumor

A usually harmless tumor of a salivary gland, most often the parotid near the ear. It is strongly associated with tobacco use and may occur on both sides; evaluation distinguishes it from other growths.

Warts and Plantar Warts

Alternate name; see *Wart* and *Plantar Wart*.

Warty Dyskeratoma

A usually harmless skin growth, often on the head or neck, with a small central dip filled with keratin. It may look like skin cancer, so examination and sometimes a biopsy are needed.

Wasting

Abnormal loss of body weight, muscle, or other tissue, often associated with chronic disease, inadequate nutrition, inflammation, or cancer. Severe wasting may impair strength, immunity, and recovery.

Watchful Waiting

Planned observation without immediate active treatment, with clinical review and treatment if symptoms develop or the condition progresses. It may be used for selected cancers and other slowly progressive conditions.

Water Birth

Delivery of a baby while the birthing person is immersed in water. Immersion during the first stage of labor is distinct from underwater delivery; evidence for the latter is limited, and the American College of Obstetricians and Gynecologists recommends that birth occur on land.

Alternate Names:
Aquatic Delivery; Water Labor and Birth

Water Blister

A blister containing clear fluid, usually caused by friction, pressure, a burn, or a skin disorder.

Water Brash

A sudden increase of watery saliva in the mouth, often associated with gastroesophageal reflux. It may occur with heartburn or a sour taste.

Water Channel

A membrane protein, usually an aquaporin, that allows water to cross a cell membrane. Aquaporins help the kidneys and other tissues regulate water movement.

Water Consumption

Intake of water and other fluids. Fluid requirements vary with body size, diet, activity, climate, pregnancy, illness, and kidney or heart function; excessive intake can cause hyponatremia.

Water Hammer Pulse

A bounding pulse that rises forcefully and then collapses rapidly. It may occur with aortic valve leakage or other causes of a wide pulse pressure.

Alternate Names:
Water-Hammer Pulse; Corrigan Pulse; Collapsing Pulse

Water Intoxication

A dangerous fall in blood sodium caused by drinking or retaining more water than the body can remove. Severe cases can cause headache, confusion, seizures, or coma and need urgent treatment.

Water On The Brain

A nontechnical term usually referring to hydrocephalus, an abnormal accumulation or impaired circulation of cerebrospinal fluid that enlarges the ventricles and may increase intracranial pressure.

Water On The Knee

Alternate name; see *Knee Effusion*.

Water Retention

Excess accumulation of fluid in the body's tissues or cavities, commonly causing swelling and sometimes resulting from heart, kidney, liver, venous, hormonal, or medication-related disorders.

Water-Borne Disease

An illness acquired through water contaminated with infectious organisms or harmful chemicals. Examples include cholera, typhoid fever, and hepatitis A; prevention includes safe drinking water, sanitation, hand hygiene, and appropriate treatment of contaminated water.

Water-Deprivation Test

A supervised test that briefly limits drinking while urine concentration and blood results are monitored. It helps identify why a person produces excessive amounts of dilute urine and must be done under medical supervision because dehydration and high sodium can occur.

Water-Hammer Pulse

Alternate spelling; see *Water Hammer Pulse*.

Alternate Names:
Corrigan's Pulse; Collapsing Pulse

Water-Soluble Vitamin

A vitamin that dissolves in water. The group includes vitamin C and the B vitamins; most are

stored in limited amounts, although the body can store vitamin B12 for years.

Waterborne Bacterial Disease

An infection acquired from water contaminated with bacteria, such as cholera, typhoid fever, or leptospirosis; prevention depends on safe water, sanitation, and food hygiene.

Waterhouse-Friderichsen Syndrome

Waterhouse-Friderichsen syndrome is adrenal hemorrhage and acute adrenal failure associated with overwhelming sepsis, classically meningococcal infection, causing shock and coagulopathy.

Watershed Infarction

Tissue death in a border zone between the areas supplied by two major arteries, most often in the brain. It commonly follows a substantial fall in blood flow or blood pressure; less commonly, it affects the bowel.

Alternate Names:
Border-Zone Infarction

Waterston Shunt

A historical palliative surgical systemic-to-pulmonary shunt created between the ascending aorta and the right pulmonary artery to increase pulmonary blood flow in infants with cyanotic congenital heart defects. It has largely been replaced by the modified Blalock-Taussig shunt due to lower complication rates.

Alternate Names:
Waterston-Cooley Anastomosis; Ascending Aorta to Right Pulmonary Artery Shunt

Watery Eyes

Excessive tearing caused by irritation, allergy, infection, reflex tearing from dry eye, or blockage of the tear-drainage system.

Wax

A water-resistant substance produced by ceruminous glands in the ear canal; earwax protects the canal and usually clears naturally.

Wax Poisoning

Toxic exposure to a wax product, usually causing little harm after a small accidental ingestion but potentially causing choking, aspiration, irritation, or toxicity when mixed with other chemicals.

Waxy Casts

Large, smooth, pale tube-shaped particles seen under a microscope in urine. They form in damaged kidney tubules and can suggest severe or long-standing kidney disease, especially when other urine or blood tests are abnormal.

WBC Count

A measurement of the number of white blood cells in a volume of blood, used with the differential count to evaluate infection, inflammation, immune disorders, marrow disease, or treatment effects.

WBS

Abbreviation for Williams-Beuren syndrome, a genetic disorder associated with characteristic facial features, developmental differences, cardiovascular disease, and sometimes high blood calcium.

Weakness

Reduced ability to generate force, which may be generalized or limited to one body region. Causes include disorders of muscle, nerve, neuromuscular junction, brain, or spinal cord, as well as metabolic illness, infection, medication effects, and deconditioning.

Weaning

Gradual reduction and eventual discontinuation of breastfeeding, bottle-feeding, or a medicine or other treatment, according to the relevant clinical context.

Wear Debris

Tiny particles produced when an artificial joint or other implant wears down. The particles can trigger inflammation, damage nearby bone, loosen the implant, and eventually cause it to fail.

Weaver Syndrome

A rare genetic condition causing rapid growth before and after birth, a large head, distinctive facial features, low muscle tone, and delayed development or learning. Bone age may be advanced. Most cases involve a change in the *EZH2* gene; care is tailored to the child's needs.

Weaver's Bottom

Inflammation of the ischial bursa over the sitting bone, causing pain in the buttock that may worsen with prolonged sitting. It is also called ischial bursitis.

Webbed Fingers

Partial or complete joining of adjacent fingers by skin or soft tissue, known as syndactyly; it may be congenital or acquired.

Webbed Neck

Extra folds of skin extending from the sides of the neck toward the shoulders. They may be present from birth and can occur with conditions such as Turner syndrome or Noonan syndrome.

Webbing Of The Fingers Or Toes

Partial or complete joining of adjacent fingers or toes by skin or other tissue. It is called syndactyly and may be congenital or acquired.

Weber

Alternate name; see *Weber Test*.

Weber Syndrome

A brainstem stroke syndrome caused by occlusion of paramedian branches of the posterior cerebral artery affecting the anterior midbrain. It is characterized by ipsilateral oculomotor (cranial nerve III) palsy and contralateral spastic hemiparesis of the upper and lower extremities.

Alternate Names:
Superior Alternating Hemiplegia; Ventral Midbrain Syndrome

Weber Test

A quick hearing test using a vibrating tuning fork placed on the middle of the forehead or skull. The examiner asks which ear hears the sound louder; the result helps distinguish blockage-related hearing loss from inner-ear or nerve-related loss.

Weber-Christian Disease

An older term for recurrent inflammation of the fat beneath the skin (panniculitis), causing tender nodules and sometimes fever or other systemic symptoms. The term is now used inconsistently; see *Panniculitis*.

Wedge Excision

Surgical removal of a triangular or wedge-shaped portion of tissue; commonly performed for breast biopsies, cervical lesions, and skin tumors.

Wedge Resection

Surgery that removes a small wedge-shaped piece of tissue, commonly from the lung or breast, to diagnose or treat a localized lesion. It removes less tissue than removal of an entire lobe.

Weever Fish

A venomous marine fish whose dorsal spines can cause a painful sting, local swelling, and occasionally systemic symptoms.

Weight Gain

Increase in body weight; may be intentional (muscle building, pregnancy) or unintentional (fluid retention, endocrine disorders, medication effects).

Weight Gain In Pregnancy

Recommended total weight gain depends on pre-pregnancy body mass index and the number of fetuses. For a singleton pregnancy, guideline ranges are about 12.5–18 kg for underweight, 11.5–16 kg for normal weight, 7–11.5 kg for overweight, and 5–9 kg for obesity.

Weight Gain – Unintentional

Increase in body weight without a planned change

in diet or activity, often caused by fluid retention, medicines, endocrine disease, reduced activity, or changes in eating; rapid swelling or breathlessness needs prompt assessment.

Weight Loss

A decrease in body weight that may be intentional or unintentional. Intentional loss is usually achieved through sustainable changes in eating, physical activity, and behavior; unintentional or rapid loss can indicate illness, inadequate nutrition, or medication effects and may require medical evaluation.

Weight Loss Medications

Medicines prescribed for selected people with obesity to help reduce weight, usually together with nutrition and activity changes. Choice depends on health conditions, other medicines, side effects, cost, and treatment goals.

Weight Loss Surgery

Weight-loss surgery, or bariatric surgery, changes the stomach or digestive tract to help treat severe obesity and related conditions. It requires long-term nutritional, medical, and lifestyle follow-up.

Weight Management

Long-term care of body weight through nutrition, physical activity, behavior change, medicines, or bariatric procedures when appropriate. Goals should account for health, function, metabolic risk, and sustainable habits rather than weight alone.

Weight-Bearing As Tolerated

An instruction allowing a person to put as much weight on an injured or operated leg as they can tolerate. An assistive device may be used for support.

Alternate Names:
WBAT

Weight-Loss Medicines

Alternate name; see *Weight Loss Medications*.

Weight-Reducing Diets

Dietary plans intended to create a sustained energy deficit and reduce excess body weight, ideally individualized with attention to nutrition, health conditions, and long-term adherence.

Weil Disease

Alternate name; see *Leptospirosis*.

Weil's Disease

Alternate name; see *Leptospirosis*.

Weil-Felix Reaction

An older agglutination blood test for some rickettsial infections. It detects antibodies that cross-react with *Proteus vulgaris* OX19 or OX2 antigens or the *Proteus mirabilis* OXK antigen. Its accuracy is limited, and more specific tests are generally used.

Weil-Felix Test

Alternate name; see *Weil-Felix Reaction*.

Alternate Names:
Weil-Felix Agglutination Reaction; Proteus Agglutination Test

Weill-Marchesani Syndrome

A rare inherited connective-tissue disorder that often causes short stature, short fingers and toes, stiff joints, and unusually small, round eye lenses. The lens changes can cause severe nearsightedness or glaucoma. Changes in several genes, including *ADAMTS10*, *ADAMTS17*, *LTBP2*, or *FBN1*, can cause the condition.

Alternate Names:
WMS; Spherophakia-Brachymorphia Syndrome

Weir-Mitchell Disease

Older name for erythromelalgia, a condition causing episodes of burning pain, redness, and warmth, usually in the hands or feet.

Wellens Syndrome

A specific pattern on a heart tracing that can signal severe narrowing of a major heart artery, even after chest pain stops. It indicates high heart-attack risk and needs urgent specialist assessment; exercise testing can be dangerous.

Alternate Names:
Wellens Pattern; LAD Coronary T-Wave Syndrome; Wellens Sign

Wells Score

A clinical prediction rule used to estimate the likelihood of deep vein thrombosis (DVT) or pulmonary embolism (PE). Separate versions are used for DVT and PE. The score helps determine whether further testing, such as a D-dimer blood test or imaging, is needed; it does not diagnose or rule out a clot by itself.

Alternate Names:
Wells Criteria; Wells Clinical Score

Wells Score For Pulmonary Embolism

Alternate name; see *Wells Score*.

Wells Syndrome

Eosinophilic cellulitis, an uncommon inflammatory skin disorder causing itchy or burning red plaques, swelling, blisters, or a cellulitis-like eruption without typical bacterial infection. Blood eosinophilia and a skin biopsy may support the diagnosis, and recurrences are possible.

Wells Syndrome (Eosinophilic Cellulitis)

Alternate name; see *Wells Syndrome*.

Welt

A raised, often itchy area of skin caused by localized swelling, commonly seen in hives or after an insect bite. A welt may fade within hours, but persistent or severe reactions need evaluation.

Wen

An informal, imprecise name for a cyst beneath the skin, commonly an epidermoid or pilar cyst. It is not a specific diagnosis.

Wenckebach Phenomenon

A heart-rhythm pattern in which the PR interval lengthens with each beat until one atrial impulse is not conducted to the ventricles. It may occur without heart disease or with an underlying disorder.

Alternate Names:
Second-Degree AV Block Type 1; Mobitz I Block

Wens

Alternate name; see *Wen*.

Werdnig-Hoffmann Disease

The most severe early form of inherited spinal muscular atrophy, also called type 1 spinal muscular atrophy. It usually begins before 6 months of age and causes very weak muscles, poor head control, reduced reflexes, a weak cry, feeding difficulty, and breathing problems. Babies generally cannot sit without support. New treatments can improve survival and function, but affected infants need urgent specialist care and breathing and feeding support.

Alternate Names:
Spinal Muscular Atrophy Type 1 (SMA 1); Severe Infantile Spinal Muscular Atrophy

Werlhof Disease

An older name for immune thrombocytopenia (immune thrombocytopenic purpura), in which immune destruction of platelets can cause bruising, petechiae, nosebleeds, heavy menstrual bleeding, or other bleeding.

Wermer Syndrome

Alternate name; see *Multiple endocrine neoplasia, type 1 (MEN 1)*.

Wermer's Syndrome

Alternate name; see *Multiple endocrine neoplasia, type 1 (MEN 1)*.

Werner Syndrome

A rare inherited condition that causes signs of aging earlier than usual, often after puberty. Features may include short stature, early cataracts, thin or tight skin, gray hair, diabetes, weak bones, and increased cancer risk. Regular medical monitoring and treatment of each complication are needed.

Werner's Syndrome

A rare inherited condition that causes signs of aging

earlier than usual, often after puberty. It may cause early cataracts, short stature, thin skin, gray hair, diabetes, weak bones, and increased cancer risk.

Wernicke Aphasia

A language disorder that often causes fluent speech that is difficult to understand, with impaired understanding and repetition of words. It commonly follows damage to language areas in the dominant side of the brain, usually the left hemisphere.

Alternate Names:
Receptive Aphasia; Sensory Aphasia

Wernicke Area

A brain region, usually in the left hemisphere, involved in understanding language. Damage to this region or connected language areas can impair comprehension and produce fluent but difficult-to-understand speech.

Wernicke Encephalopathy

A sudden brain disorder caused by severe vitamin B1 deficiency. It may cause confusion, difficulty walking, and abnormal eye movements and can lead to permanent damage without prompt treatment.

Wernicke's Encephalopathy

Alternate name; see *Wernicke Encephalopathy*.

Wernicke-Korsakoff Encephalopathy

Alternate name; see *Wernicke-Korsakoff Syndrome*.

Wernicke-Korsakoff Syndrome

A brain disorder caused by severe vitamin B1 deficiency. It may begin with confusion and poor coordination and leave lasting memory problems, difficulty learning, and confabulation, in which a person unintentionally fills memory gaps with inaccurate accounts. Alcohol misuse, poor nutrition, and prolonged vomiting are common causes.

Wernicke'S Area

Alternate spelling; see *Wernicke Area*.

Alternate Names:
Wernicke's Speech Area; Sensory Speech Area

West Nile Encephalitis

Inflammation of the brain caused by neuroinvasive West Nile virus, transmitted mainly by mosquitoes. It may cause fever, headache, confusion, tremor, weakness, seizures, or coma. There is no specific routine antiviral treatment; severe illness requires hospital-based supportive care.

West Nile Fever

A febrile illness caused by West Nile virus, usually transmitted by mosquitoes. Most infections cause no symptoms or a flu-like illness; a small proportion causes neuroinvasive disease such as meningitis, encephalitis, or acute flaccid paralysis.

West Nile Neuroinvasive Disease

A serious form of West Nile virus infection that affects the brain, its coverings, or nerve cells controlling movement. It may cause meningitis, encephalitis, weakness, or acute flaccid paralysis.

Alternate Names:
WNND

West Nile Virus

A mosquito-borne flavivirus that can cause asymptomatic infection, a febrile illness, or neuroinvasive disease such as meningitis, encephalitis, or acute flaccid paralysis. Risk of severe disease is higher in older adults and people with certain medical conditions.

West Nile Virus Infection

West Nile virus infection is a mosquito-borne illness ranging from fever and body aches to neuroinvasive meningitis, encephalitis, weakness, or paralysis.

West Syndrome

An infantile-onset epilepsy marked by clusters of brief spasms and a characteristic disorganized electroencephalogram pattern called hypsarrhythmia. Development may slow or regress; causes include brain injury, genetic conditions, and metabolic disease. It is also called infantile epileptic spasms syndrome.

Westergren Method

The reference laboratory procedure used to determine the erythrocyte sedimentation rate (ESR). Anticoagulated whole blood is placed in an upright, calibrated Westergren tube for one hour, measuring the distance in millimeters that red blood cells settle under gravity to assess systemic inflammation.

Alternate Names:
Westergren ESR; Westergren Sedimentation Technique

Westermark Sign

An area of unusually reduced blood-vessel markings on a chest X-ray, sometimes seen beyond a clot in a lung artery. It may suggest pulmonary embolism but is not reliable enough to diagnose it alone.

Western Blot

A laboratory test that separates proteins and uses antibodies to find a specific protein. It can help study infections, immune reactions, or genetic and research problems, depending on the test.

Alternate Names:
Protein Immunoblot

Westley Croup Score

A clinical score used to estimate how severely croup is obstructing a child's airway. It considers noisy breathing, chest retractions, air movement, bluish coloring, and alertness; a higher score suggests more severe illness and helps guide urgent treatment and observation.

Alternate Names:
Westley Clinical Scoring System for Croup; Croup Severity Score

Wet Age-Related Macular Degeneration

Alternate name; see *Wet macular degeneration.*

Wet AMD

Alternate name; see *Wet macular degeneration.*

Wet Beriberi

The predominantly cardiovascular form of severe thiamine deficiency. It can cause a fast heartbeat, enlarged or weakened heart, fluid retention, swelling, and high-output heart failure.

Wet Dream

Involuntary ejaculation during sleep, usually occurring in adolescence or adulthood and generally a normal physiological event.

Wet Gangrene

Tissue death with bacterial infection and swelling, producing moist, discolored, rapidly spreading necrosis. It can spread quickly and lead to sepsis.

Wet Macular Degeneration

The neovascular form of age-related macular degeneration in which abnormal blood vessels grow beneath or within the retina and leak fluid or blood, causing rapid central-vision loss.

Alternate Names:
Neovascular AMD; Exudative Age-Related Macular Degeneration; Wet AMD

Wet-to-Dry Dressing

A wound dressing in which moist gauze is allowed to dry and then removed to pull away attached tissue and debris. This is a nonselective form of mechanical debridement that can also remove healthy tissue and cause pain, so its use is limited.

Alternate Names:
Wet-to-Dry Debridement; Mechanical Gauze Dressing

Wharton Duct

The primary excretory duct of the submandibular salivary gland, approximately 5 cm in length, that courses anteromedially along the floor of the mouth to empty through the sublingual caruncle at the base of the lingual frenulum; the most frequent anatomical site of salivary sialolithiasis.

Alternate Names:
Submandibular Duct

Wharton Jelly

The soft, jelly-like tissue surrounding the blood vessels in the umbilical cord. It cushions the vessels

and helps prevent them from being squeezed or bent during pregnancy and labor.

Wharton's Jelly

Alternate spelling; see *Wharton Jelly*.

Wheal

A temporary, raised, often itchy area of skin caused by swelling in the skin. It commonly occurs with hives, an allergic reaction, or an insect bite and may move or disappear within hours.

Wheal And Flare

A temporary raised, swollen area of skin surrounded by redness. It is usually caused by release of histamine during hives, an allergy, or another immediate skin reaction.

Wheat Allergy

An immune reaction to proteins in wheat that may cause hives, stomach symptoms, vomiting, or breathing problems. It is distinct from celiac disease and non-celiac gluten sensitivity.

Alternate Names:
Wheat Hypersensitivity

Wheelchairs

Wheeled mobility devices that support a seated person and allow movement by manual propulsion or powered controls.

Wheeled Stretcher

Mobile patient transport device with wheels; used in hospitals and emergency services for moving patients who cannot walk.

Wheeze

A high-pitched whistling sound caused by narrowed airways. It often occurs with asthma, infection, allergy, or chronic lung disease; sudden wheezing after choking or with severe breathlessness needs urgent care.

Wheezing

A musical or whistling sound caused by narrowed lower airways, usually louder when breathing out. It may result from asthma, infection, chronic lung disease, allergy, airway swelling, mucus, or an inhaled object.

Whiplash

A neck injury caused by the head moving suddenly backward and forward, often in a vehicle crash but also after a fall or sports injury. Pain, stiffness, headache, dizziness, or arm tingling may appear immediately or later. Most cases improve over weeks, but weakness, numbness, trouble walking, or severe pain after major trauma needs urgent assessment.

Alternate Names:
Cervical Acceleration-Deceleration Injury; CAD Injury

Whiplash Injury

Alternate name; see *Whiplash*.

Whipple Disease

A rare bacterial infection that can damage the small intestine, joints, brain, heart, or other organs. It may cause years of joint pain followed by weight loss, persistent diarrhea, abdominal pain, and poor nutrient absorption.

Whipple Procedure

A major operation that removes the head of the pancreas and nearby parts of the small intestine, bile duct, and gallbladder, then reconnects the digestive tract. It is used for selected cancers and other serious diseases in this area.

Whipple Triad

Three findings supporting that symptoms are caused by low blood sugar: typical symptoms occur, blood sugar is low at that time, and symptoms improve after blood sugar is raised.

Whipple Triad for Insulinoma

Alternate name; see *Whipple Triad*.

Whipple Triad of Hypoglycemia

Alternate name; see *Whipple Triad*.

Alternate Names:
Whipple Hypoglycemic Triad

Whipple's Disease

A rare bacterial infection caused by Tropheryma whipplei, damaging intestinal absorption and potentially affecting joints, brain, or heart.

Alternate Names:
Tropheryma Whipplei Infection; Whipple Disease

Whipworm

A parasitic roundworm of the genus Trichuris, usually Trichuris trichiura in humans. Infection occurs by ingesting embryonated eggs and may cause abdominal pain, diarrhea, anemia, or rectal prolapse when severe.

Whipworm Infection

Intestinal infection caused by the soil-transmitted helminth Trichuris trichiura (whipworm), endemic in tropical and subtropical regions with poor sanitation. Humans acquire infection by ingesting embryonated eggs from contaminated soil, food, or water.

Alternate Names:
Trichuris Trichiura Infection; Whipworm Infection

Whirlpool Bath

Hydrotherapy device providing agitated water for therapeutic bathing; used in wound care, physical therapy, and rehabilitation.

Whispered Pectoriloquy

An examination finding in which whispered words sound unusually clear through a stethoscope over the lung. It may suggest that air-filled lung has become solid, as in pneumonia, but it is not diagnostic alone.

White Blood Cell

A cell of the immune system that helps protect the body from infections, foreign substances, and abnormal cells. White blood cells are made mainly in the bone marrow and include neutrophils, lymphocytes, monocytes, eosinophils, and basophils. Their number or function may change with infection, inflammation, immune disorders, or bone-marrow disease.

White Blood Cell Count

A blood test measuring the number of white blood cells. A high or low result can occur with infection, inflammation, medicines, immune disorders, or bone-marrow disease and must be interpreted with the differential count and clinical findings.

White Blood Cell Labeling

A scan method in which a person's white blood cells are removed, marked with a small amount of radioactive material, and returned to the body. The cells may collect at areas of infection or inflammation, which can then be seen on images.

White Cell

Alternate name; see *White Blood Cell*.

White Cell Count

Alternate name; see *White Blood Cell Count*.

White Clot Syndrome

A severe arterial or venous thrombotic complication associated with heparin-induced thrombocytopenia (HIT). It is characterized by platelet-dense, fibrin-rich arterial thrombi (white thrombi) that can lead to limb ischemia, stroke, or myocardial infarction.

Alternate Names:
HIT-Associated Thrombosis; Heparin-Associated White Thrombus Syndrome

White Coat Hypertension

Blood pressure that is repeatedly high in a medical setting but normal outside it on home or ambulatory monitoring.

Alternate Names:
Isolated Clinic Hypertension

White Finger

Episodic pallor or whitening of the fingers caused by vasospasm, commonly associated with Raynaud phenomenon or hand-arm vibration syndrome.

White Infarction

Tissue death caused by loss of blood flow in a solid organ such as the heart, kidney, or spleen. The damaged area looks pale because little blood can reach it through alternate vessels.

Alternate Names:
Anemic Infarction; Pale Infarction

White Matter

Tissue in the brain and spinal cord made mainly of nerve fibers covered by a protective substance called myelin. It carries signals between different brain areas and between the brain and spinal cord.

White Matter Hyperintensities

Areas in the brain's white matter that appear brighter than surrounding tissue on certain MRI sequences. They are common with aging and small-vessel disease but can have other causes, so their meaning depends on the pattern and clinical context.

Alternate Names:
WMHs; Leukoaraiosis

White Matter Of The Brain

Alternate name; see *White Matter*.

White Of The Eye

The sclera, the tough, opaque outer coat of the eye surrounding the cornea and helping maintain the shape of the globe.

White Spot Disease

Older name for *lichen sclerosus*, a chronic inflammatory skin condition.

White Tongue

A white coating or patches on the tongue caused by debris, dry mouth, irritation, infection, inflammation, or other oral conditions.

White-Coat Hypertension

Alternate spelling; see *White Coat Hypertension*.

Alternate Names:
White-Coat Syndrome

Whiteheads

Whiteheads are closed comedones formed when oil and dead skin block a hair follicle, producing small pale or skin-colored acne bumps.

Whitlow

An infection of the fingertip or tissues around a finger or toenail, often involving the nail fold. It is usually bacterial or caused by herpes simplex virus; grouped blisters suggest herpetic whitlow, whereas pus and a localized abscess suggest bacterial infection.

WHO Classification of Vitamin A Deficiency

A standardized clinical grading system established by the World Health Organization (WHO) to stage eye damage (xerophthalmia) caused by vitamin A deficiency:

- **XN**: Night blindness (inability to see in dim light or darkness).
- **X1A**: Conjunctival xerosis (dryness and lack of shine on the white of the eye).
- **X1B**: Bitot's spots (foamy, silvery-white patches on the white of the eye).
- **X2**: Corneal xerosis (hazy, dry surface on the clear front of the eye).
- **X3A**: Corneal ulceration or keratomalacia involving less than one-third of the cornea.
- **X3B**: Corneal ulceration or keratomalacia involving one-third or more of the cornea, which can cause severe, lasting vision loss.
- **XS**: Corneal scars (permanent scarring left by healed ulcers).
- **XF**: Xerophthalmic fundus (small pale spots on the back of the eye/retina).

Alternate Names:
WHO Xerophthalmia Classification; Vitamin A Deficiency Eye Grading; WHO Vitamin A Staging

Whole Bowel Irrigation

A gastrointestinal decontamination technique in acute clinical toxicology in which large volumes of an isosmotic polyethylene glycol electrolyte solution are administered orally or via nasogastric tube

until the rectal effluent is clear, indicated for toxic ingestions of sustained-release medications, enteric-coated tablets, iron, or illicit drug packets ("body packers").

Alternate Names:
WBI

Whole Breast Radiation Therapy

Whole breast radiation therapy treats remaining breast tissue after breast-conserving surgery to reduce local recurrence risk, with planned dosing and monitoring for skin and tissue effects.

Whole Exome Sequencing

A genetic test that reads most protein-coding sections of a person's DNA. It can identify changes causing some inherited disorders, but it may miss changes outside coding regions, structural changes, or causes not yet understood; results require clinical interpretation.

Whole Genome Sequencing

Laboratory analysis of nearly all of a person's nuclear DNA, including coding and noncoding regions, and sometimes mitochondrial DNA. It can identify many types of genetic variants but may produce uncertain or incidental findings and does not detect every cause of disease; results require appropriate clinical interpretation.

Whole-Body Irradiation

Radiation treatment directed at the entire body, most often given before a stem-cell transplant to suppress the immune system and make room for donated cells. It can affect the bone marrow, fertility, and other organs.

Whole-Body Magnetic Resonance Imaging

An MRI examination that produces images of much or all of the body without using X-rays. It is used in selected cases to look for widespread disease, tumors, or problems affecting several body areas.

Whole-Body Scan

An imaging examination that surveys much or all of the body, using a technique such as PET/CT, CT, MRI, or a nuclear medicine scan. It may be used for selected cancer staging, infection localization, or evaluation of systemic disease; the coverage and usefulness depend on the test and clinical question.

Whole-Bowel Irrigation

Alternate spelling; see *Whole Bowel Irrigation*.

Whole-Brain Radiation Therapy

Radiation treatment directed at the entire brain, used in selected people with multiple brain metastases or cancer cells around the brain. It may also be used to reduce brain-spread risk in selected cancers; side effects depend on dose and treatment plan.

Whole-Genome Sequencing

Alternate spelling; see *Whole Genome Sequencing*.

Whooping Cough

A highly contagious respiratory infection caused by *Bordetella pertussis*. It causes prolonged bouts of rapid coughing that may be followed by a whooping sound or vomiting; infants may have pauses in breathing without the typical whoop. Also called pertussis.

Whooping Cough (Pertussis)

Alternate name for whooping cough, a highly contagious respiratory infection caused by *Bordetella pertussis*. Prolonged coughing fits may cause vomiting or a whoop; infants may instead have pauses in breathing.

Whooping-Cough

Alternate name; see *Whooping Cough*.

Whorled Pattern

A characteristic histological or clinical swirling, spiraling architectural configuration. In pathology, it describes swirling arrangements of spindle cells seen in meningiomas, fibromas, or leiomyomas; in dermatology, it describes patterns along the lines of Blaschko.

Alternate Names:

Whorled Architecture; Storiform-Whorled Pattern

WHS

Abbreviation for Wolf-Hirschhorn syndrome, a rare chromosome 4 deletion disorder that may cause poor growth, distinctive facial features, developmental disability, seizures, and congenital abnormalities.

Wickham Striae

Fine, lacy white reticular lines and arborizing patterns seen on the surface of papules and mucosal plaques in lichen planus, classically observed on the buccal mucosa.

Widal Reaction

An older blood test for antibodies associated with typhoid or paratyphoid fever. It is not very reliable because results may reflect past infection or vaccination, so culture or molecular testing is usually preferred.

Widal Test

Alternate name; see *Widal Reaction*.

Wide Splitting of S2

An abnormal prolongation of the interval between the aortic (A2) and pulmonic (P2) components of the second heart sound that varies physiologically with respiration but remains distinctly separated in expiration. It occurs due to delayed right ventricular emptying (such as right bundle branch block or pulmonary stenosis) or early aortic valve closure.

Widely Spaced Teeth

Teeth separated by unusually large gaps, also called diastema when the gap is localized. Causes include normal development, missing teeth, tooth-size differences, habits, or jaw and gum conditions.

Widened Mediastinum

An increased width of the central chest area on an imaging study, especially a chest X-ray. It can result from positioning or technique, but may also reflect bleeding, aortic disease, a mass, or other conditions.

Alternate Names:
Mediastinal Widening; Mediastinal Enlargement

Widened Pulse Pressure

An unusually large difference between systolic and diastolic blood pressure. It may occur with aging, aortic valve leakage, thyroid disease, fever, or other conditions; interpretation depends on age and clinical context.

Wilkie Syndrome

Vascular compression of the third (horizontal) segment of the duodenum between the abdominal aorta and the overlying superior mesenteric artery (SMA). It leads to partial or complete duodenal obstruction, characterized by postprandial abdominal pain, early satiety, nausea, and vomiting.

Alternate Names:
Superior Mesenteric Artery Syndrome; SMA Syndrome; Arteriomesenteric Duodenal Compression

Williams Syndrome

A genetic condition caused by loss of a small section of chromosome 7, including a gene important for elastic tissues. It may cause characteristic facial features, heart-vessel narrowing, high blood calcium, developmental differences, learning difficulties, and connective-tissue problems. Regular heart, calcium, hearing, and developmental checks are important.

Williams-Beuren Syndrome

Alternate name; see *Williams Syndrome*.

Willis-Ekbom Disease

Another name for restless legs syndrome, a neurologic sleep-related movement disorder causing an urge to move the legs and uncomfortable sensations that worsen at rest and at night.

Wilm's Tumour

Common misspelling; see *Wilms Tumor*.

Wilms Tumor

A malignant embryonal tumor of the kidney in children. It may present as an abdominal mass, pain, hematuria, or an incidental finding and may be asso-

ciated with syndromes such as WAGR or Beckwith-Wiedemann syndrome. Treatment and prognosis depend on stage and tumor biology.

Alternate Names:
Nephroblastoma

Wilson Disease

An autosomal recessive disorder usually caused by disease-causing variants in the *ATP7B* gene, which encodes a protein needed to transport copper and excrete excess copper into bile. Copper accumulates in the liver and may later affect the brain, eyes, kidneys, blood, and other tissues. Manifestations include hepatitis, cirrhosis, acute or chronic liver failure, tremor, dystonia, poor coordination, speech changes, mood or behavior changes, and Kayser–Fleischer rings around the cornea.

Wilson's Disease

Alternate name; see *Wilson Disease*.

Winchester Syndrome

A very rare inherited skeletal dysplasia with progressive osteolysis, short stature, joint contractures, and characteristic facial or skin findings. It requires genetic, orthopedic, and multidisciplinary evaluation.

Windkessel Effect

The hemodynamic property of large elastic arteries, particularly the aorta, which expand during ventricular systole to store a portion of stroke volume and recoil during diastole. This elastic recoil sustains downstream blood flow and maintains organ perfusion throughout diastole.

Alternate Names:
Windkessel Function; Arterial Elastic Reservoir Effect

Windowing

Adjusting the brightness and contrast of a CT image so particular tissues, such as bone, lung, or soft tissue, are easier to see.

Windpipe

The tube carrying air from the voice box to the two main airways leading to the lungs. It is supported by firm rings that help keep it open.

Winged Scapula

An abnormal musculoskeletal prominence of the medial border and inferior angle of the scapula protruding posteriorly from the thoracic cage, most commonly caused by traction injury, surgical damage, or neuropathy of the long thoracic nerve of Bell paralyzing the serratus anterior muscle.

Alternate Names:
Scapula Alata

Winter Formula

An established physiological mathematical equation used to assess whether respiratory compensation is appropriate in a patient with pure metabolic acidosis. Calculated as Expected $PaCO_2 = (1.5 \times [\mathrm{HCO_3^-}]) + 8 \pm 2$; a measured $PaCO_2$ higher than the calculated expected range signifies a concomitant primary respiratory acidosis (ventilatory failure), whereas a measured $PaCO_2$ lower than expected indicates an accompanying primary respiratory alkalosis.

Alternate Names:
Winter's Compensation Formula; Acid-Base Compensation Equation

Winter Vomiting Disease

An acute gastroenteritis, usually caused by norovirus, characterized by sudden vomiting, diarrhea, and abdominal cramps.

Winter's Formula

Alternate name; see *Winter Formula*.

Alternate Names:
Winter Formula; Metabolic Acidosis Compensation Formula

Winterbottom Sign

Prominent enlargement of the posterior cervical lymph nodes that serves as a classic clinical physical sign of early-stage African trypanosomiasis (sleeping

sickness), caused by Trypanosoma brucei.

Alternate Names:
Winterbottom's Sign

Wireless Motility Capsule

A swallowed capsule that records pressure, acidity, temperature, and movement as it travels through the digestive tract. The measurements estimate how long food takes to pass through the stomach and intestines and may help investigate unexplained constipation, diarrhea, nausea, or bloating.

Wirsung Duct

The main excretory duct of the pancreas, extending from the tail through the body and head of the gland, joining the common bile duct at the hepatopancreatic ampulla of Vater to empty digestive enzymes into the second part of the duodenum at the major duodenal papilla.

Alternate Names:
Main Pancreatic Duct

Wisdom Teeth

Wisdom teeth are the third molars that commonly emerge in late adolescence or adulthood. Impaction, infection, decay, cysts, gum disease, or crowding can cause pain and swelling; dental examination and imaging determine whether monitoring or removal is appropriate.

Wisdom Tooth

The last molar in each dental quadrant, usually erupting in late adolescence or early adulthood. Impaction may cause pain, infection, or damage to adjacent teeth.

Alternate Names:
Dens Serotinus; Wisdom Teeth

Wisdom Tooth Problems

Problems involving third molars, including impaction, infection, gum inflammation, decay, cysts, or damage to nearby teeth. Pain, swelling, fever, difficulty opening the mouth, or trouble swallowing needs dental assessment.

Wisdom Tooth Removal

Dental extraction of one or more third molars, commonly performed when they are impacted, repeatedly infected, decayed, or damaging adjacent teeth. Risks include pain, infection, bleeding, dry socket, and temporary or rarely persistent nerve symptoms.

Wiskott-Aldrich Syndrome

A rare inherited immune disorder that mainly affects boys and causes eczema, repeated infections, and a low number of unusually small platelets. It can also cause bleeding and autoimmune problems and requires specialist care.

Wiskott-Aldrich Syndrome Protein

A protein, encoded by the *WAS* gene, that helps immune and blood cells organize their internal support structure and interact with other cells. Changes in the gene can cause Wiskott-Aldrich syndrome or related platelet disorders.

Alternate Names:
WASP

Witch's Milk

A temporary milky breast discharge in a newborn caused by exposure to maternal hormones before birth. It usually resolves as those hormones decline.

Withdrawal

Physical or psychological symptoms that occur when a person who has developed dependence reduces or stops using a medicine or psychoactive substance. Symptoms vary by substance and may include anxiety, agitation, sweating, tremor, nausea, pain, insomnia, cravings, or seizures; some forms require urgent medical care.

Alternate Names:
Abstinence Syndrome; Substance Withdrawal Syndrome

Withdrawal Reflex

An automatic response in which a painful stimulus makes a limb pull away from danger. The opposite limb may straighten to help maintain balance.

Withdrawal Symptoms

Physical or psychological symptoms that occur when a person stops or reduces a substance or medicine after the body has adapted to it. The symptoms depend on the substance, duration of use, and the person's health.

Withdrawal Syndrome

A predictable set of signs and symptoms that occur when a drug is discontinued or the dose is reduced after chronic use, reflecting the physiological rebound from drug adaptation.

Withdrawal Syndromes

Alternate name; see *Withdrawal Syndrome*.

Wolf Hirschhorn Syndrome

Alternate spelling of Wolf-Hirschhorn syndrome, a rare disorder caused by deletion of part of chromosome 4 and associated with growth restriction, seizures, developmental disability, and distinctive facial features.

Wolf Syndrome

Alternate name for Wolf-Hirschhorn syndrome, a chromosome 4 deletion disorder affecting growth, development, and multiple organ systems.

Wolf-Hirschhorn Syndrome

A rare genetic disorder caused by loss of part of chromosome 4. It can cause poor growth, a small head, distinctive facial features, developmental and intellectual disability, seizures, and heart or other organ abnormalities; lifelong specialist support is usually needed.

Alternate Names:
4p- Syndrome; 4p Deletion Syndrome

Wolff-Chaikoff Effect

A temporary reduction in thyroid hormone production that can occur after a large increase in iodine exposure. The thyroid often adapts after several days and hormone production resumes; the response varies by person and condition.

Alternate Names:
Wolff-Chaikoff Block; Iodide Organification Inhibition

Wolff-Parkinson-White Syndrome

A heart-rhythm disorder caused by an extra electrical connection between the atria and ventricles. It can produce episodes of supraventricular tachycardia, palpitations, dizziness, fainting, or, rarely, dangerous ventricular rhythms; catheter ablation can often eliminate the pathway.

Wolff-Parkinson-White Tachycardia

Alternate name; see *Wolff-Parkinson-White Syndrome*.

Wolffian Ducts

Temporary tubes in the developing embryo that form parts of the male reproductive system, including the sperm-transport ducts. They usually shrink during typical female development, although small remnants may remain.

Wolfram Syndrome

A rare inherited disorder that commonly causes diabetes mellitus and progressive loss of vision from optic-nerve damage. It may also cause excessive thirst and urination, hearing loss, bladder problems, balance difficulty, or other nervous-system problems.

Wolinella

Genus of anaerobic, Gram-negative bacteria found in the oral cavity and gastrointestinal tract; associated with periodontal disease.

Wolman Disease

The severe infantile form of lysosomal acid lipase deficiency, an inherited disorder that causes cholesteryl esters and triglycerides to build up in organs. It can cause vomiting, diarrhea, poor growth, an enlarged liver and spleen, and adrenal-gland calcification; without treatment it is often fatal in infancy.

Wolman's Disease

Alternate name; see *Wolman Disease*.

Womb

Common name for the uterus; the muscular organ where a fetus develops during pregnancy.

Alternate Names:
Uterus; Metra; Hystera

Womb Growths

Alternate name; see *Uterine fibroids*.

Women Health

Alternate name; see *Women's health*.

Women's Health

Medical specialty focusing on conditions unique to or more prevalent in females, including reproductive health, pregnancy, menopause, and gender-specific disease patterns.

Alternate Names:
Gynecological and Obstetric Health; Female Health Care

Wood Lamp Examination

Examination of the skin in a dark room with ultraviolet A light. Fluorescence or color changes can help identify selected skin conditions, but findings are interpreted with the clinical examination.

Wood Spirit

An old name for methanol, a toxic alcohol whose ingestion can cause metabolic acidosis, blindness, and death.

Wood's Light

Alternate name; see *Wood Lamp Examination*.

Wood-Unit

A clinical unit of vascular resistance calculated by dividing the pressure gradient across a vascular bed (in mmHg) by cardiac output (in L/min). One Wood unit equals approximately 80 $\mathrm{dyn \cdot s/cm^5}$, commonly used in evaluating pulmonary hypertension.

Alternate Names:
Wood Resistance Unit; Hybrid Resistance Unit (HRU)

Woods Corkscrew Maneuver

An emergency procedure used when a baby's shoulders become stuck during birth. A trained clinician rotates the baby's shoulders to help release them and complete delivery.

Woods Screw Maneuver

Alternate name; see *Woods Corkscrew Maneuver*.

Woody Tongue

A rare long-lasting infection, usually caused by *Actinomyces*, that makes the tongue and nearby tissues hard and swollen. It can interfere with eating, speaking, or breathing.

Woolly Hair

Hair with unusually tight, fine curls. It may be an inherited trait occurring on its own or as part of a condition affecting other organs, such as Naxos or Carvajal syndrome.

Alternate Names:
Woolly Hair Syndrome; Hereditary Woolly Hair

Woolsorters' Disease

A form of inhaled anthrax acquired by breathing spores of *Bacillus anthracis*, historically associated with handling contaminated wool or animal products. It can cause severe breathing illness and requires urgent treatment.

Alternate Names:
Inhalation Anthrax; Pulmonary Anthrax; Ragpicker's Disease

Word Blindness

Older term; see *Alexia*.

Word Deafness

An acquired inability to understand spoken words even though ordinary hearing is intact. It usually results from damage to brain areas that connect hearing with language, such as after a stroke or head injury.

Alternate Names:
Pure Word Deafness; Auditory Agnosia for Speech

Word Recognition Scoring

A hearing test measuring how accurately a person repeats or identifies spoken words at a comfortable volume. It helps assess how well the hearing system and brain understand speech.

Word Salad

Speech made of words or phrases that have little or no logical connection, making the person difficult to understand. It can occur with severe psychosis, mania, brain disease, or intoxication and needs assessment in context.

Working Memory

The ability to hold a small amount of information briefly and use it while completing a task, such as remembering instructions while following them. Attention, stress, sleep, illness, and brain conditions can affect it.

Wound

Damage to body tissue caused by trauma, surgery, pressure, heat, chemicals, or another cause. A wound may be open or closed and can vary in depth, contamination, bleeding, and injury to nearby nerves, vessels, or organs.

Wound Care

Assessment and treatment of a wound through cleansing, bleeding control, removal of dead or contaminated tissue when indicated, appropriate closure or dressing, pain control, and follow-up. Care also includes tetanus prevention, pressure relief, and treatment of infection or underlying conditions; antibiotics are reserved for selected contaminated wounds, bites, or infections.

Wound Classification

A description of common injury types: an abrasion is a scrape, a laceration is a torn cut, a contusion is a bruise from blunt force, and an incised wound is a clean cut from a sharp object.

Wound Complication

A problem that develops during healing, such as infection, separation of wound edges, bleeding, fluid collection, tissue death, or excessive scarring. Increasing pain, redness, swelling, drainage, fever, or wound opening should be assessed promptly.

Wound Debridement

Removal of dead tissue, debris, or foreign material from a wound. It may be done with instruments, dressings, enzymes, or other methods to support wound assessment and healing.

Wound Dehiscence

Partial or complete reopening of a surgical wound after it has been closed. It may follow infection, poor blood supply, diabetes, increased pressure, or strain on the wound. New separation, drainage, fever, severe pain, or visible deeper tissue needs prompt medical assessment.

Wound Evisceration

Separation of a surgical wound with protrusion of internal organs or tissue through the opening. It is a surgical emergency requiring protection of the exposed tissue and urgent medical evaluation.

Wound Healing

The body's process of stopping bleeding, controlling inflammation, replacing damaged tissue, covering the surface, and strengthening the repair. Blood supply, infection, nutrition, diabetes, medicines, smoking, wound depth, and movement can affect healing.

Wound Healing Phases

Wound healing has overlapping stages: stopping bleeding, inflammation, building new tissue and skin, and strengthening the repair. The timing and result depend on the wound, blood supply, infection, nutrition, and general health.

Wound Infection

Infection of a wound by microorganisms, causing findings such as increasing pain, redness, warmth, swelling, pus, fever, or delayed healing.

Wound Management

Assessment and treatment of acute or chronic

wounds through cleansing, debridement when indicated, moisture and exudate control, infection management, pressure relief, nutrition, and correction of underlying disease.

Wound VAC

A system that applies controlled negative pressure through a sealed wound dressing to remove fluid. It is used for selected wounds to support healing.

Wound Vacuum

Alternate name; see *Wound VAC*.

Alternate Names:
Negative Pressure Wound Therapy; NPWT; Vacuum-Assisted Closure; VAC

Wounds

Alternate name; see *Wound*.

WPW Syndrome

Abbreviation for Wolff-Parkinson-White syndrome, a pre-excitation disorder in which an extra electrical pathway can cause episodes of supraventricular tachycardia. Palpitations, fainting, chest pain, or severe breathlessness require prompt assessment.

Wright Hyperabduction Test

Alternate name; see *Wright Test*.

Alternate Names:
Wright Test; Hyperabduction Maneuver

Wright Stain

A laboratory dye applied to a blood sample so different blood cells and abnormal cell changes can be seen and identified under a microscope.

Wright Test

A physical examination maneuver in which the arm is raised and rotated outward to see whether this reproduces symptoms or changes the pulse. It may be used when assessing thoracic outlet syndrome, but a pulse change alone does not establish the diagnosis.

Alternate Names:
Wright Maneuver; Hyperabduction Test

Wrinkle Test

A simple clinical bedside test to evaluate peripheral sympathetic autonomic nerve function in the digits. Denervated skin fails to develop normal physiological wrinkling when submerged in warm water for 10 to 30 minutes, indicating loss of sympathetic vasoconstrictor tone.

Alternate Names:
Digital Wrinkling Test; Water Immersion Wrinkle Test

Wrisberg Ganglion

A small cluster of nerve cells connected with the facial nerve. It helps relay taste signals from part of the tongue and sensory signals from nearby areas of the ear.

Wrist

The region connecting the hand to the forearm. It includes eight small carpal bones, joints, ligaments, tendons, nerves, and blood vessels and allows the hand to bend, straighten, and move from side to side.

Wrist Arthroscopy

A procedure using a small camera and instruments inserted through tiny wrist openings to examine or treat damaged cartilage, ligaments, joint lining, or other wrist problems.

Wrist Drop

Inability to lift the wrist and fingers, usually caused by injury or compression of the radial nerve. It may cause weakness, numbness, or difficulty using the hand and needs assessment for the cause.

Wrist Fracture

A break in one or more bones near the wrist, most commonly the distal radius or ulna, usually caused by a fall, direct trauma, or weakened bone.

Wrist Injury

Damage to the bones, ligaments, tendons, nerves, or vessels of the wrist from a fall, twist, impact, or overuse; fracture, instability, severe swelling, or

neurovascular symptoms require assessment.

Wrist Joint

The group of joints connecting the forearm to the hand. It allows the wrist to bend, straighten, and move from side to side; rotation of the forearm occurs mainly at the radioulnar joints.

Wrist Pain

Pain in or around the wrist, commonly caused by sprain, fracture, tendinitis, arthritis, or nerve compression such as carpal tunnel syndrome. Persistent pain, deformity, numbness, or weakness requires assessment.

Alternate Names:
Carpal Pain; Radiocarpal Joint Discomfort

Wrist Sprain

Stretching or tearing of one or more ligaments supporting the wrist, causing pain, swelling, bruising, and reduced movement after injury.

Writer's Cramp

A task-specific focal dystonia in which involuntary muscle contractions cause abnormal hand or arm positions while writing. Similar symptoms may occur during other skilled hand activities.

Written Documentation

Formal recording of patient information, clinical decisions, and treatment plans; essential for continuity of care and medicolegal purposes.

Wry-Neck

Torticollis, an abnormal tilt or rotation of the head caused by involuntary contraction, shortening, or dysfunction of neck muscles.

Wt

A medical abbreviation commonly meaning weight. Its meaning should be confirmed from the surrounding documentation because abbreviations can be ambiguous.

Wuchereria

A genus of filarial nematodes that includes Wuchereria bancrofti, a major cause of lymphatic filariasis. Infection is transmitted by mosquitoes and may cause lymphangitis, chronic lymphedema, hydrocele, and elephantiasis.

Wuchereria Bancrofti

A parasitic roundworm spread by mosquitoes and the main cause of lymphatic filariasis. Long-term infection can block lymph drainage and cause swelling of the limbs or genitals, sometimes becoming severe and permanent.

Wuhan Coronavirus

Informal early name; see *SARS-CoV-2*.

X

X Chromosome

One of the two human sex chromosomes. It carries genes involved in sex development and many other body functions. Most people have one or two X chromosomes, although chromosome patterns vary.

X-Inactivation

The process by which most genes on one X chromosome are switched off in each cell with more than one X chromosome. It balances X-linked gene activity; some genes escape inactivation, and the chromosome switched off can differ among cells.

X-Linked

Describing a gene or condition involving a gene on the X chromosome. Its inheritance and effects depend on the gene and a person's sex-chromosome pattern. A father passes his X chromosome to children who inherit his X, not to children who inherit his Y.

X-Linked Adrenoleukodystrophy

An inherited disorder in which very-long-chain fatty acids build up and can damage the brain, spinal cord, peripheral nerves, or adrenal glands. Childhood cerebral disease may cause changes in behavior, learning, or movement; adrenal insufficiency and adult-onset nerve or spinal-cord disease also occur.

X-linked Adult Spinal Muscular Atrophy

An older name for X-linked spinal and bulbar muscular atrophy (Kennedy disease), an inherited androgen-receptor disorder. It usually begins in adulthood and causes slowly progressive muscle weakness, wasting, and twitching; swallowing difficulty, breast enlargement, and reduced fertility may occur.

X-Linked Agammaglobulinemia

An inherited immune disorder in which B cells fail to mature, leaving very low levels of antibodies. Recurrent bacterial infections often begin in infancy or early childhood.

X-Linked Chronic Granulomatous Disease

An inherited immune disorder, usually affecting boys, caused by a change in the *CYBB* gene. Certain white blood cells cannot kill some bacteria and fungi normally, leading to repeated serious infections and areas of ongoing inflammation.

Alternate Names:
X-Linked CGD; CYBB Deficiency; Cytochrome b-245 Beta Deficiency

X-Linked Dominant Inheritance

A pattern in which a disease-causing variant in one copy of a gene on the X chromosome can cause a condition. An affected father passes the variant to all children who inherit his X chromosome and none who inherit his Y; an affected mother may pass it to any child.

X-Linked Emery-Dreifuss Muscular Dystrophy

An inherited muscle disorder, usually affecting boys, that causes stiff joints, slowly worsening muscle weakness, and problems with the heart's electrical rhythm.

Alternate Names:

EDMD1; Emerin Deficiency Muscular Dystrophy

X-Linked Hyper-IgM Syndrome

An inherited immune disorder, usually caused by a defect in CD40 ligand on T cells. This impairs B-cell antibody class switching, so IgM is present but other antibody types are low; recurrent infections may include opportunistic infections.

Alternate Names:
HIGM1; CD40L Deficiency; Hyper-IgM Syndrome Type 1

X-Linked Hypophosphatemia

An inherited disorder that causes the kidneys to lose too much phosphate. Low phosphate can lead to soft or poorly growing bones, bone pain, bowed legs, dental problems, and reduced height.

X-Linked Ichthyosis

An inherited skin disorder caused by deficient steroid sulfatase, usually due to a variant or deletion in the *STS* gene. It mainly affects males and causes widespread, dark, polygonal scales, often from infancy.

X-Linked Inheritance

Inheritance of a gene variant located on the X chromosome. The pattern and effects depend on the gene, the variant, and the person's sex-chromosome pattern. A father passes his X chromosome only to children who inherit his X, not to those who inherit his Y.

X-linked Intellectual Disability

Intellectual disability caused by a change in a gene on the X chromosome. Features vary widely and may include developmental delay, learning difficulty, behavior differences, seizures, or associated physical findings.

X-linked Juvenile Retinoschisis

An older name for X-linked retinoschisis, an inherited retinal disorder that usually begins in childhood.

X-Linked Lymphoproliferative Disease Type 1

An inherited immune disorder, usually affecting boys, in which the body can react severely to Epstein–Barr virus. It may cause severe glandular fever, very high inflammation, low antibody levels, or lymphoma.

Alternate Names:
XLP1; Duncan Disease; SAP Deficiency

X-Linked Lymphoproliferative Syndrome

Another name for X-linked lymphoproliferative disease type 1, an inherited immune disorder in which infection with Epstein–Barr virus can trigger severe inflammation, liver failure, low blood-cell counts, or lymphoma.

X-Linked Myotubular Myopathy

A rare inherited muscle disease, usually affecting boys, that causes severe weakness and low muscle tone from birth. Babies may have drooping eyelids, feeding difficulty, and dangerous weakness of the breathing muscles.

Alternate Names:
XLMTM; Myotubularin Deficiency

X-Linked Recessive Inheritance

A pattern in which a disease-causing variant on the X chromosome usually causes disease in people with one X chromosome. People with two X chromosomes may carry one variant copy and sometimes have symptoms. A father passes his X chromosome only to children who inherit his X, not to those who inherit his Y.

X-Linked Retinitis Pigmentosa

An inherited disorder in which the retina slowly loses its ability to sense light. It usually causes night blindness followed by narrowing of the field of vision and worsening sight.

Alternate Names:
XLRP; X-Linked Pigmentary Retinopathy

X-Linked Retinoschisis

An inherited retinal disorder, usually caused by a

variant in the *RS1* gene, in which layers of the retina split apart. It usually begins in childhood and causes reduced central vision; bleeding into the eye or retinal detachment can occur.

X-Linked Severe Combined Immunodeficiency

A severe inherited immune disorder, usually caused by a variant in the *IL2RG* gene. T cells and natural killer cells are absent or greatly reduced, and B cells cannot provide effective antibody protection, leaving infants vulnerable to serious infections.

X-Linked Sideroblastic Anemia

An inherited anemia, usually caused by a variant in the *ALAS2* gene. Defective heme production causes iron to build up in developing red blood cells, often producing small, pale red cells.

Alternate Names:
XLSA; ALAS2 Deficiency; Hereditary Sideroblastic Anemia

X-Linked Spinal and Bulbar Muscular Atrophy

An inherited muscle and nerve disorder that usually begins in adulthood and slowly causes weakness. It may also cause muscle twitching, trouble speaking or swallowing, breast enlargement, and reduced fertility.

Alternate Names:
Kennedy Disease; SBMA; Bulbo-Spinal Muscular Atrophy

X-Ray

An imaging test that uses a small amount of radiation to create a picture of structures inside the body. It is especially useful for bones, lungs, teeth, and some other tissues.

X-Ray Attenuation

The reduction in intensity of an X-ray beam as it passes through tissue, through absorption and scattering. Different tissues attenuate X-rays by different amounts, creating contrast in an image.

X-Ray Crystallography

A laboratory method that uses X-rays to work out the three-dimensional structure of molecules such as proteins. The molecule is made into a crystal, and the pattern produced by the X-rays is analyzed.

Alternate Names:
X-Ray Crystal Diffraction Analysis; Macromolecular Crystallography

X-Ray Shield

A barrier made of lead or another radiation-absorbing material that reduces exposure to scattered X-rays, especially for staff or the public outside the imaging room. Patient gonadal and fetal shielding is no longer routine in many settings because it can obscure anatomy or interfere with exposure controls; local guidance applies.

X-Ray Therapy

Treatment that uses carefully aimed X-rays, usually from a machine outside the body, to damage cancer cells or relieve symptoms.

Xanthelasma

A harmless yellowish patch or bump caused by fat deposits in the skin of the eyelids, usually near the inner corners of the eyes. It can occur with high blood fats but may also occur when blood-fat levels are normal.

Alternate Names:
Xanthelasma Palpebrarum; Eyelid Xanthoma; Palpebral Xanthoma

Xanthine

A natural breakdown product of substances found in cells and foods. It normally changes into uric acid, but can build up when a rare enzyme disorder blocks this pathway and may then contribute to kidney or urinary stones.

Xanthine Oxidase

An enzyme that helps convert cell and food breakdown products into uric acid. Medicines used for gout can block this enzyme, lowering uric-acid production and helping prevent urate crystal deposits.

Xanthine Oxidase Inhibitors

Medicines such as allopurinol and febuxostat that lower uric-acid production by blocking xanthine oxidase. They are used to lower uric acid in gout and in some cases of high uric acid associated with cancer treatment.

Alternate Names:
XOIs

Xanthinuria

A rare inherited disorder in which the body cannot properly change xanthine into uric acid. Xanthine can build up and form kidney or urinary stones; muscle problems may also occur.

Xanthochromia

Yellow or amber discoloration of cerebrospinal fluid, often caused by bilirubin formed as red blood cells break down after bleeding into the fluid. It can also have other causes, and interpretation depends on how and when the sample was collected.

Alternate Names:
CSF Xanthochromia; Cerebrospinal Fluid Yellowing

Xanthogranulomatous

Describing inflammation in which tissue contains many immune cells filled with fat. This pattern can occur in long-lasting infections and other inflammatory conditions.

Xanthogranulomatous Cholecystitis

A rare, long-lasting inflammation of the gallbladder that can thicken and damage its wall. It may spread to nearby tissues and can look like gallbladder cancer on scans.

Alternate Names:
XGC

Xanthogranulomatous Oophoritis

A rare long-lasting inflammation of an ovary, often linked to infection or endometriosis. It can form a mass that resembles ovarian cancer on scans and may cause pelvic pain, fever, or abnormal bleeding.

Xanthogranulomatous Pyelonephritis

A severe, long-lasting kidney infection that destroys normal kidney tissue and replaces it with inflamed tissue. It is often associated with blockage or stones and may require antibiotics, drainage, or removal of the damaged kidney.

Xanthoma

A yellow-orange spot, bump, or patch formed by fat deposits in the skin, tissue beneath the skin, or tendons. It may occur with high blood fats, diabetes, some liver diseases, or an inherited lipid disorder.

Xanthoma Disseminatum

A rare disorder in which many yellow, red-brown, or orange bumps develop on the skin, especially in body folds. The mouth, throat, or other organs may also be affected, and some people develop problems controlling water balance.

Alternate Names:
Montgomery Syndrome; Disseminate Xanthoma

Xanthoma Eruptivum

A sudden outbreak of many small yellow-orange bumps, usually on the buttocks, arms, legs, or shoulders. It is often linked to very high blood triglyceride levels.

Alternate Names:
Eruptive Xanthoma; Eruptive Xanthomatosis

Xanthoma Planum

Flat or slightly raised yellow patches caused by lipid-filled immune cells in the skin. They may occur in skin folds or over wider areas and can be associated with abnormal blood lipids or some blood disorders. Palmar crease xanthomas are a distinct pattern.

Alternate Names:
Plane Xanthoma

Xanthoma Striatum Palmare

Yellow or orange lines or patches in the creases of the palms caused by fat deposits in the skin. They are strongly linked to some inherited blood-fat disorders, especially type III dysbetalipoproteinemia,

but blood tests are needed.

Alternate Names:
Palmar Crease Xanthoma; Planar Palmar Xanthoma

Xanthoma Tendinosum

Firm, usually painless fat deposits in tendons or ligaments, most often in the Achilles tendon or tendons of the hands. They are strongly linked to inherited high cholesterol.

Alternate Names:
Tendon Xanthoma; Tendinous Xanthoma

Xanthoma Tuberosum

Slowly enlarging, painless, firm, yellowish-red nodular lipid deposits occurring over extensor pressure areas, particularly the elbows, knees, heels, and buttocks. They are strongly associated with familial hypercholesterolemia and type III hyperlipoproteinemia.

Alternate Names:
Tuberous Xanthoma; Tuberous Xanthomatosis

Xanthomas

See *Xanthoma*.

Xanthomatosis

A disorder in which fatty deposits called xanthomas develop in the skin, tendons, or organs. It may be linked to inherited or acquired problems with blood fats.

Xanthopsia

A visual disturbance in which objects appear yellow or yellow-tinted. It can occur with retinal or optic-nerve disorders and with toxicity from some medicines, including digoxin.

Xanthosis

Yellow discoloration of skin or other tissues caused by carotene or another yellow substance. Unlike jaundice, it does not usually make the whites of the eyes yellow; the cause is assessed from the person's diet and health.

Xenobiotic

A chemical foreign to an organism, such as a medicine, pollutant, pesticide, or industrial compound. The body may change or remove it; the original chemical or its products can have biological effects.

Xenobiotic Metabolism

The body's chemical processing of foreign substances, including medicines, pollutants, and toxins. Enzymes, especially in the liver, may make them easier to eliminate, alter their activity, or produce harmful products.

Xenobiotic Resistance

The ability of a cell or organism to withstand a foreign chemical, medicine, or toxin. It may result from faster breakdown, removal from cells, or changes in the substance's target.

Alternate Names:
Xenobiotic Tolerance

Xenograft

Tissue, cells, or a biological material transplanted between different species, such as animal tissue used in a human. Rejection and infection are important risks, although some materials are used temporarily as tissue coverings or substitutes.

Xenon Anesthesia

General anesthesia produced by inhaled xenon, a noble gas that acts on brain signaling. The gas is eliminated mainly through the lungs; its clinical use is limited by cost and availability.

Xenotransplantation

Transplanting living cells, tissues, or organs between different species, usually from an animal to a human. It may increase the supply of transplant material but carries major risks of immune rejection, infection, and poor organ function.

Xerochilia

Persistent dryness and scaling of the lips, sometimes with superficial cracks. Causes include dry weather,

repeated lip licking, mouth breathing, and medicines such as oral retinoids.

Alternate Names:
Dry Lips

Xeroderma

Alternate name; see *Dry skin*.

Xeroderma Pigmentosum

A rare inherited disorder of DNA repair or damage tolerance that causes extreme sensitivity to ultraviolet radiation. Affected people may develop freckling and skin aging early, skin or eye cancers at a young age, and, in some types, progressive neurologic problems.

Xeroderma Pigmentosum Complementation Groups

Genetic subtypes of xeroderma pigmentosum, each associated with a different gene involved in nucleotide-excision repair or DNA damage tolerance. The subtype helps explain the molecular cause; all types increase sensitivity to ultraviolet radiation and the risk of skin cancer.

Alternate Names:
XP Complementation Groups; NER Defect Groups

Xerophthalmia

Dryness and damage of the eye caused by severe vitamin A deficiency. It may begin with poor night vision and dry eyes and can progress to corneal damage and permanent sight loss.

Alternate Names:
Vitamin A Deficiency Eye Disease; Ocular Xerosis; Keratomalacia

Xerophthalmic Ulceration

Corneal ulceration caused by severe vitamin A deficiency, sometimes progressing to keratomalacia (softening and destruction of the cornea). In the WHO classification, stage X3A affects less than one-third of the cornea and X3B affects at least one-third; scarring and vision loss can result.

Alternate Names:
Vitamin A Corneal Ulcer; Keratomalacic Ulceration

Xerosis

Alternate name; see *Dry skin*.

Xerostomia

Alternate name; see *Dry Mouth*.

Xerotic Eczema

An itchy form of eczema caused by very dry skin, with scaling and fine cracks that may form a netlike pattern. It often affects the lower legs and is more common in cold, dry weather and in older adults.

Alternate Names:
Asteatotic Eczema; Eczema Craquele; Winter Itch

Xiphisternal Joint

The joint between the lower part of the breastbone and the xiphoid process. It often becomes partly or fully hardened with age.

Alternate Names:
Xiphisternal Synchondrosis; Xiphisternal Articulation

Xiphoid Process

The small pointed lower part of the breastbone. Its shape varies between people and it provides attachment for some muscles and ligaments.

Xiphoidalgia

Pain or tenderness over the xiphoid process, the small lower part of the breastbone. Pain may spread to the upper abdomen, chest, back, or shoulders and may worsen with touch, bending, lifting, or coughing.

Alternate Names:
Xiphoidodynia; Hypersensitive Xiphoid Syndrome; Xiphoid Syndrome

Xiphoidectomy

Surgery to remove the xiphoid process, the small lower part of the breastbone. It may be done for persistent pain in this area or to provide access during some chest or abdominal operations.

XO Syndrome

Alternate name; see *Turner Syndrome*.

XP

Abbreviation for xeroderma pigmentosum, a rare DNA-repair disorder causing extreme sensitivity to ultraviolet light and a markedly increased risk of early skin and eye cancers.

XX Male Syndrome

An older name for 46,XX testicular difference of sex development, in which a person with two X chromosomes develops typically male traits, often because the *SRY* gene has moved onto an X chromosome. Infertility is common.

XXX Syndrome

Alternate name; see *Triple X syndrome*, a sex-chromosome variation in which a person has three X chromosomes (47,XXX).

XXXX Syndrome

A rare sex-chromosome variation, also called tetrasomy X, in which a person has four X chromosomes (48,XXXX). Features vary and may include developmental or learning difficulties, differences in physical development, and ovarian dysfunction.

XXY Males

Older name; see *Klinefelter Syndrome*.

XXY Syndrome

Alternate name; see *Klinefelter Syndrome*.

Xylitol

A sugar alcohol used as a sweetener and in some oral-care products. Large amounts can cause abdominal discomfort and diarrhea.

Xylose

A simple sugar found in some plants. A form called D-xylose has been used in tests of how well the small intestine absorbs nutrients and is also used in laboratory studies.

Xylose Absorption Test

A test that measures D-xylose in the blood or urine after it is swallowed to assess absorption by the small intestine. A low result may indicate impaired intestinal absorption, although kidney function and other factors can affect the result.

Alternate Names:
D-Xylose Absorption Test; D-Xylose Tolerance Test

XYY Syndrome

A sex-chromosome variation in which a person has an extra Y chromosome (47,XYY). Many have no obvious physical features; some have tall stature or speech, learning, or developmental difficulties.

Y

Y Chromosome

One of the two human sex chromosomes. It carries genes involved in testis development and other functions. A biological father passes it to a child who inherits his Y chromosome; sex-chromosome patterns and body development vary.

Y-Box Binding Protein

A protein that attaches to DNA and RNA and helps control which genes are active and how proteins are made. It also helps cells respond to stress and repair damaged DNA.

Alternate Names:
YB-1; Y-Box Transcription Factor; Nuclease-Sensitive Element-Binding Protein 1

Y-Chromosome Microdeletion

A small missing section of the Y chromosome, often in an azoospermia-factor (AZF) region. It can impair sperm production, causing a very low sperm count or no sperm in the ejaculate.

Y-Linked Gene

A gene located on the Y chromosome outside its pseudoautosomal regions. Examples include *SRY*, which is involved in testis development, and genes in the AZF regions, which contribute to sperm production. It is passed to children who inherit the Y chromosome from their biological father.

Alternate Names:
Holandric Gene; Y-Chromosomal Gene

Y-Linked Inheritance

Inheritance of a condition caused by a gene on the Y chromosome. A biological father passes the gene to children who inherit his Y chromosome, but not to children who inherit his X chromosome.

Y-Maze Test

A test used mainly in laboratory animals to study movement, exploration, and short-term memory. The animal moves through three arms of a Y-shaped maze, and the pattern of movement is recorded.

Alternate Names:
Y-Maze Spontaneous Alternation; Y-Maze Behavioral Paradigm

Y-Plate Osteosynthesis

Surgical repair of a complex broken bone using a metal plate shaped like the letter Y. The plate holds the bone pieces in place while they heal.

Alternate Names:
Y-Plate Fixation; Y-Shaped Contoured Bone Plate

Y-V Plasty

A surgical technique in which a Y-shaped cut is closed as a V. This lengthens or widens nearby tissue and may help release a tight scar or other narrowing.

Alternate Names:
Y-V Advancement Flap; Y-V Lengthening Procedure

YAG Capsulotomy

A laser procedure that makes an opening in the cloudy posterior capsule behind an artificial lens after cataract surgery. It treats posterior capsule opacification, which can blur vision or cause glare.

YAG Laser Capsulotomy

Alternate name; see *YAG Capsulotomy*.

YAG Laser Surgery

An eye procedure using a neodymium-doped yttrium-aluminum-garnet (Nd:YAG) laser to cut or alter tissue. Uses include opening a cloudy lens capsule after cataract surgery and making an opening in the iris for selected types of glaucoma.

Yawn

An involuntary behavior consisting of a deep inhalation followed by a slower exhalation, often with stretching of the jaw and facial muscles. Yawning is common with fatigue but excessive or unusual yawning can occur with some medications or neurologic conditions.

Yawning

See *Yawn*.

Yaws

A chronic skin infection caused by *Treponema pallidum* subspecies *pertenue* and spread by direct contact with an infectious skin lesion. It can cause papillomas and ulcers, followed in some cases by damage to the skin, bone, or cartilage.

Yaws Papilloma

A raised, often painless, raspberry-like skin lesion of early yaws, caused by *Treponema pallidum* subspecies *pertenue*. It may become ulcerated and is also called a mother yaw or frambesioma.

Alternate Names:
Mother Yaw; Frambesioma; Primary Yaws Lesion

Yeast

A type of fungus made of single cells. Some yeasts normally live on or in the body, while others can cause infections of the mouth, skin, vagina, lungs, blood, or other organs.

Yeast Infection

An infection caused by yeast, most often *Candida* species. It may affect the mouth, skin, genital tract, or bloodstream; symptoms depend on the site. Yeast may also be present without causing disease, so detection alone does not establish infection.

Yeast Infection In Women And Men

A lay term for yeast infection of genital tissues, including vulvovaginal candidiasis and Candida-associated inflammation of the glans penis. Symptoms vary by site, and these infections are not usually sexually transmitted.

Yeast Infections

See *Yeast Infection*.

Yeast Present

A laboratory report showing yeast in a specimen. This may mean harmless colonization, contamination, or infection; the meaning depends on the symptoms, specimen, and type of yeast.

Yeast Vulvitis

Inflammation of the vulva associated with a Candida yeast infection. It may cause itching, burning, redness, swelling, and soreness; other conditions can cause similar symptoms.

Yellow Cartilage

A flexible type of cartilage containing many elastic fibers. It is found in the outer ear, the epiglottis, parts of the voice box, and the tube connecting the middle ear to the throat.

Alternate Names:
Elastic Cartilage; Cartilago Elastica

Yellow Fever

Yellow fever is an acute mosquito-borne infection caused by yellow fever virus. Fever, headache, muscle aches, nausea, and vomiting may be followed by jaundice, bleeding, shock, and organ failure; vaccination is the main preventive measure.

Yellow Fever Vaccine

A live, weakened-virus vaccine that usually provides long-lasting protection after one dose. Rare serious adverse reactions include neurologic disease or

infection-like illness affecting internal organs.

Alternate Names:
17D Vaccine

Yellow Fever Virus

A mosquito-borne flavivirus that causes yellow fever, which ranges from a mild febrile illness to severe disease with jaundice, bleeding, shock, or organ failure.

Yellow Ligament

A series of elastic bands connecting the back parts of neighboring bones in the spine. They help support the spine and surround the spinal canal.

Alternate Names:
Ligamentum Flavum; Flavum Ligament

Yellow Marrow

Bone marrow containing mostly fat instead of blood-forming cells. It is common in the hollow centers of adult long bones and can change back toward blood-forming marrow when the body needs more blood cells.

Alternate Names:
Fatty Bone Marrow; Medulla Ossium Flava

Yellow Nail Syndrome

Alternate name; see *Yellow-Nail Syndrome*.

Yellow Nail Syndrome Triad

The three main features of yellow nail syndrome: slow-growing yellow or thickened nails, swelling from lymph-fluid buildup, and long-term breathing or lung problems.

Alternate Names:
YNS Triad; Lymphedema-Pleural Effusion-Yellow Nails

Yellow Spot

The macula, a small yellowish area near the center of the retina. It contains the fovea, which provides the sharp central vision used for fine detail.

Alternate Names:
Macula Lutea; Anatomical Macula

Yellow Tongue

Yellow discoloration or coating of the tongue that may result from oral hygiene, smoking, dry mouth, diet, medicines, or an underlying illness.

Yellow-Nail Syndrome

A rare disorder causing yellow, thickened, slowly growing nails together with swelling from lymph fluid, usually in the legs, and lung problems such as repeated infections or fluid around the lungs. The cause is not fully understood.

Yergason Test

A shoulder examination in which the forearm is turned palm-up and the arm rotated outward against resistance. Pain over the biceps tendon in the front of the shoulder may suggest biceps tendinopathy, but the test alone cannot confirm a diagnosis.

Yersinia

A group of bacteria that can cause intestinal illness, swollen lymph nodes in the abdomen, or plague. Different species spread through contaminated food or water, infected animals, or fleas.

Yersinia Enterocolitica

A bacterium that can cause diarrhea, fever, and abdominal pain, sometimes mimicking appendicitis. People usually acquire it from contaminated food, water, or contact with infected animals.

Yersinia Enterocolitica Pseudoappendicitis

A Yersinia infection that causes pain in the lower right abdomen and swollen lymph nodes near the intestine, making it resemble appendicitis. It can also cause fever and diarrhea, often after contaminated food such as undercooked pork.

Alternate Names:
Yersinia Mesenteric Adenitis; Pseudoappendiceal Syndrome

Yersinia Infection

Infection caused by Yersinia bacteria, usually pro-

ducing diarrhea, abdominal pain, fever, or vomiting. Some cases resemble appendicitis; bloody diarrhea, dehydration, or severe or persistent illness can occur.

Yersinia Outer Proteins

Effector proteins made by disease-causing *Yersinia* bacteria and delivered into host cells by a type III secretion system. They disrupt cell signaling and immune defenses, helping the bacteria evade destruction.

Alternate Names:
Yops; Yersinia Effector Proteins; Yop Virulence Factors

Yersinia Pestis

The bacterium that causes plague, a severe infection usually spread by infected fleas or animals. It may cause painful swollen lymph nodes, bloodstream infection, or lung disease and can be life-threatening.

Yersinia Pestis Pneumonic Plague

Plague involving the lungs, caused by *Yersinia pestis*. It may follow inhalation of infectious respiratory droplets or spread from plague elsewhere in the body. It can cause fever, cough, chest pain, breathing difficulty, and rapidly worsening lung failure.

Alternate Names:
Pneumonic Plague

Yersinia Pseudotuberculosis

A bacterium usually acquired from contaminated food or water. It can cause fever, diarrhea, and pain from swollen lymph nodes in the abdomen, sometimes resembling appendicitis.

Yersinia Reactive Arthritis

Joint inflammation that develops after a Yersinia intestinal infection, usually one to four weeks later. It often affects a few joints, especially in the legs, without bacteria being present inside the joints.

Yersiniosis

See *Yersinia Infection*.

Yew Poisoning

Poisoning after eating parts of the yew plant, especially its leaves or seeds. The toxins can cause vomiting, dizziness, seizures, dangerous heart rhythms, collapse, and death.

Yolk Sac

A temporary structure that supports an early embryo before the placenta is fully working. It helps form the first blood cells and part of the early intestine and can be seen on early pregnancy ultrasound.

Yolk Sac Carcinoma

Alternate name; see *Yolk Sac Tumor*.

Yolk Sac Tumor

A malignant germ-cell tumor that often occurs in the ovary or testicle and produces alpha-fetoprotein. It is common in children and can also arise in young adults or outside the reproductive organs.

Alternate Names:
Endodermal Sinus Tumor; Yolk Sac Germ Cell Tumor

Yolk Sac Tumor Pathology

A malignant germ-cell tumor with variable reticular, microcystic, papillary, glandular, or solid patterns. Schiller-Duval bodies, hyaline globules, and alpha-fetoprotein expression may support the diagnosis.

Yolk Sac Tumor Schiller-Duval Bodies

A characteristic microscope finding in yolk sac tumors. It looks somewhat like a tiny kidney filter, with tumor cells arranged around a small blood vessel. The finding helps confirm the diagnosis when considered with other test results.

Alternate Names:
Schiller-Duval Bodies; Glomeruloid Endodermal Bodies

Yolk Stalk

The temporary connection between the yolk sac and the developing midgut. It normally disappears during early development; a persistent remnant can form a Meckel diverticulum, cyst, or fistula.

Yolk-Sac Tumor

Alternate name; see *Yolk Sac Tumor*.

Young Syndrome

A rare condition, usually affecting males, that combines blockage of sperm transport with repeated sinus and lung infections. It may also cause bronchiectasis, a long-term widening and damage of the airways.

Alternate Names:
Sinopulmonary-Infertility Syndrome; Barry-Perkins-Young Syndrome

Young-Burgess Classification

A system that classifies pelvic-ring fractures by injury mechanism and pattern. Main groups are lateral compression, anteroposterior compression, vertical shear, and combined mechanisms.

Alternate Names:
Young-Burgess Pelvic Fracture Classification; Burgess Pelvic Injury Scale

Young-Onset Dementia

Dementia that begins before age 65. It may result from Alzheimer disease, frontotemporal lobar degeneration, vascular disease, or other causes.

Alternate Names:
Presenile Dementia (deprecated historical term)

Yttrium-90

A radioactive isotope that emits beta particles. It is used in selected treatments to deliver radiation to abnormal tissue, including some liver tumors and inflamed joints.

Yttrium-90 Microspheres

Tiny glass or resin beads containing radioactive yttrium-90. They are delivered through blood vessels to selected liver tumors, where they release radiation.

Alternate Names:
Y-90 Radioembolization Microspheres

Yttrium-90 Radioembolization

A treatment in which tiny beads containing radioactive yttrium-90 are delivered through liver blood vessels to release radiation inside liver tumors.

Alternate Names:
SIRT; Y-90 SIRT; Y-90 Transarterial Radioembolization

Yttrium-Aluminum-Garnet Laser

A laser that uses a crystal to produce a focused beam of light. It is used in eye care for procedures such as opening a cloudy membrane after cataract surgery and making a small opening for some types of glaucoma.

Alternate Names:
Nd:YAG Laser; Neodymium:YAG Laser

Yuzpe Regimen

An emergency-contraception method using two doses of combined estrogen and progestin pills. It is less effective and causes more nausea than levonorgestrel or ulipristal pills; a copper intrauterine device is another, more effective option.

Z

Z-Disc

A thin structure inside muscle fibers that anchors the protein strands involved in muscle contraction. It marks the boundary of each repeating unit of a muscle fiber.

Alternate Names:
Z-Line; Z-Band; Zwischenscheibe

Z-Plasty

A reconstructive operation that rearranges nearby skin in a Z-shaped pattern. It can lengthen a tight scar, change the direction of a scar, and improve movement or appearance.

Z-Score (DEXA)

A measure from dual-energy X-ray absorptiometry that shows how many standard deviations a person's bone mineral density is above or below the expected mean for an age-, sex-, and ethnicity-matched reference group. A Z-score of −2.0 or lower is called "below the expected range for age"; in children, premenopausal women, and men younger than 50, this result alone does not diagnose osteoporosis.

Alternate Names:
Age-Matched Bone Density Z-Score; DEXA Z-Score

Z-Score (Echocardiography)

The number of standard deviations a child's heart or blood-vessel measurement is above or below the expected value for body size, usually body surface area. It helps describe whether a structure is smaller or larger than expected.

Alternate Names:
Pediatric Echo Z-Score; Cardiovascular Z-Score

Z-Thumb Deformity

A thumb deformity in which the metacarpophalangeal joint is flexed and the interphalangeal joint is extended, creating a Z shape. It can occur in rheumatoid arthritis.

Alternate Names:
Boutonniere-Type Thumb Deformity

Z-Tracking Technique

An intramuscular injection method in which the skin is moved to one side before the injection and released afterward. The resulting angled path helps keep medicine in the muscle and limits leakage into tissue beneath the skin.

Alternate Names:
Z-Track Injection Method; Z-Track Technique

Zafirlukast

A leukotriene-receptor antagonist used for long-term control and prevention of asthma symptoms. It is taken orally and is not a rescue treatment for an acute asthma attack; liver injury and drug interactions are important safety considerations.

Alternate Names:
Accolate

Zahn Lines

Alternating light and dark layers seen in a blood clot that formed while blood was flowing. The light layers contain platelets and fibrin, while the dark layers contain more red blood cells.

Alternate Names:
Lines of Zahn; Striae of Zahn

Zanamivir

An inhaled neuraminidase inhibitor used to treat or prevent influenza A and B when started appropriately. It may cause bronchospasm and is used cautiously in people with underlying airway disease.

Alternate Names:
Relenza

ZAP-70 Deficiency

A rare inherited immune disorder that disrupts T-cell signaling. CD8 T cells are usually absent or very low, while CD4 T cells are present but do not function normally; serious infections often begin in infancy.

Zavanelli Maneuver

An emergency procedure for severe shoulder dystocia that does not respond to other measures. The clinician gently returns the baby's head to the birth canal, followed by immediate cesarean delivery.

Alternate Names:
Cephalic Replacement Maneuver

Zellweger Syndrome

The severe, usually neonatal form of Zellweger spectrum disorder, an inherited disorder in which cells lack working peroxisomes. It can cause very low muscle tone, feeding problems, seizures, impaired brain development, and liver or kidney disease.

Alternate Names:
Cerebrohepatorenal Syndrome

Zenker Degeneration

Severe damage and death of skeletal muscle fibers, formerly described in serious infections such as typhoid fever or widespread blood infection.

Alternate Names:
Zenker's Hyaline Necrosis; Waxy Muscle Degeneration

Zenker Diverticulum

A pouch that forms in the upper swallowing tube near the throat, usually because the nearby muscle does not relax normally. It may cause difficulty swallowing, return of undigested food, bad breath, a neck lump, cough, or repeated lung infections.

Alternate Names:
Zenker's Diverticulum; Pharyngoesophageal Diverticulum; Hypopharyngeal Diverticulum; Pulsion Diverticulum

Zenker Peroral Endoscopic Myotomy

An endoscopic procedure for Zenker diverticulum in which the cricopharyngeal muscle between the pouch and swallowing tube is divided through the mouth. This can improve passage of food; symptoms can return, and complications can include bleeding or perforation.

Alternate Names:
Z-POEM; Endoscopic Zenker Myotomy

Ziconotide

A non-opioid pain medicine that blocks N-type calcium channels in nerves. It is given by continuous infusion into the fluid around the spinal cord for selected cases of severe chronic pain and can cause serious neurologic or psychiatric effects.

Alternate Names:
Prialt

Zidovudine

A nucleoside reverse-transcriptase inhibitor used with other antiretroviral medicines to treat HIV infection. It can also be used in some settings to reduce transmission during pregnancy and birth; adverse effects include anemia and low white-cell counts.

Alternate Names:
Azidothymidine; AZT; Retrovir

Ziehl-Neelsen Stain

A laboratory stain used to find bacteria with a waxy coating that resists removal by acid, especially the bacteria that cause tuberculosis. These bacteria appear red against a contrasting background under a microscope.

Alternate Names:
Acid-Fast Stain; AFB Stain

Zieve Syndrome

A short-lived complication of heavy alcohol use, characterized by hemolytic anemia, jaundice, and increased blood fats, often during acute alcohol-related liver injury.

Alternate Names:
Hemolytic Anemia with Hyperlipidemia and Jaundice

Zika

See *Zika Virus Infection*.

Alternate Names:
Zika Virus Disease; ZVD

Zika Fever

The usually mild febrile illness caused by Zika virus. It may include rash, red eyes, joint pain, muscle pain, headache, and fever; infection during pregnancy can harm the developing fetus.

Zika Virus

A virus spread mainly by infected *Aedes* mosquitoes and also through sexual contact and, less commonly, blood or pregnancy-related transmission. Infection is often mild or symptom-free but can injure a developing fetus.

Alternate Names:
ZIKV

Zika Virus Infection

Infection caused by Zika virus, usually spread by infected *Aedes* mosquitoes and sometimes through sexual contact, pregnancy, or infected blood. It is often mild or symptom-free but can harm fetal development and is rarely linked to Guillain–Barré syndrome.

Zileuton

A 5-lipoxygenase inhibitor used for long-term control of asthma by reducing leukotriene production. It does not relieve a sudden asthma attack and can cause liver injury or interact with other medicines.

Alternate Names:
Zyflo

Zinc

An essential mineral needed for many body reactions, normal growth, immunity, reproduction, and wound healing. Too little can cause deficiency; excessive supplements can cause stomach symptoms and copper deficiency.

Alternate Names:
Zn

Zinc Acetate

An oral zinc salt used to treat zinc deficiency and to reduce copper absorption in Wilson disease. In the intestine, it increases metallothionein, a protein that binds copper and limits its entry into the blood; it may cause stomach irritation.

Zinc Deficiency

A state of inadequate available zinc caused by insufficient intake, malabsorption, excessive losses, or increased requirements. Manifestations may include impaired growth, dermatitis, alopecia, diarrhea, altered taste, delayed wound healing, and increased infection susceptibility.

Alternate Names:
Hypozincemia; Zinc Depletion

Zinc Finger Motif

A small part of a protein held in shape by a zinc atom. It often helps the protein attach to DNA and control gene activity.

Zinc Oxide

An insoluble zinc compound used topically as a skin protectant and barrier, including in preparations for diaper dermatitis and minor irritation. It can reduce contact with moisture and irritants but does not treat every cause of a rash.

Alternate Names:
ZnO

Zinc Oxide Ointment

A topical preparation containing zinc oxide that forms a protective barrier over irritated or moist skin. It is commonly used for diaper dermatitis and minor skin irritation.

Alternate Names:
Topical Zinc Barrier Cream; Zinc Oxide Paste

Zinc Poisoning

Illness caused by excessive zinc intake or exposure. Swallowing too much can cause nausea, vomiting, abdominal pain, and diarrhea; inhaling zinc-oxide fumes can cause metal-fume fever. Prolonged excess can interfere with copper absorption and cause anemia or neurologic problems.

Zinc Protoporphyrin

A substance made in developing red blood cells when zinc is used instead of iron during hemoglobin production. High levels can occur with iron deficiency or long-term lead exposure.

Alternate Names:
ZPP; Erythrocyte Zinc Protoporphyrin

Zinc Sulfate

An oral or parenteral zinc salt used to prevent or treat zinc deficiency when clinically indicated. Gastrointestinal upset is common with oral therapy, and prolonged excessive use can cause copper deficiency.

Zinc Toxicity

Alternate name; see *Zinc Poisoning*.

Zinner Syndrome

A rare congenital condition combining absence of one kidney, a cyst of the seminal vesicle on the same side, and blockage of the ejaculatory duct. It may cause pelvic pain, painful urination, or infertility after puberty.

Alternate Names:
Mesonephric Duct Malformation Syndrome; Seminal Vesicle Cyst with Renal Agenesis

Zirconia

A zirconium-oxide ceramic used in dentistry for crowns, bridges, implants, and other restorations. Its strength and tissue compatibility make it useful, although restoration design, surface treatment, and clinical indication affect performance.

Alternate Names:
Zirconium Dioxide

Zoledronic Acid

A potent intravenous bisphosphonate used for osteoporosis and certain cancer-related conditions, including hypercalcemia of malignancy and skeletal complications of bone metastases. Renal injury, hypocalcemia, acute-phase reactions, and rare osteonecrosis of the jaw are important risks.

Alternate Names:
Zoledronate; Zometa; Reclast

Zollinger-Ellison Secretin Stimulation Test

A blood test used when Zollinger–Ellison syndrome is suspected but fasting gastrin results are unclear. Secretin is given into a vein, and blood gastrin is measured before and after the injection; an abnormal rise supports the diagnosis.

Alternate Names:
Secretin Provocation Test; Secretin Gastrinoma Test

Zollinger-Ellison Syndrome

A rare condition in which a hormone-producing tumor makes too much gastrin, causing the stomach to produce excess acid. It can lead to repeated ulcers, severe reflux, abdominal pain, and diarrhea.

Zolpidem

A sedative-hypnotic medicine used to treat insomnia. It can cause next-day impairment, complex sleep behaviors, dependence, and central-nervous-system depression, especially with other sedatives.

Alternate Names:
Ambien

Zona Fasciculata

The middle and largest layer of the outer part of the adrenal gland. It makes glucocorticoid hormones, including cortisol.

Alternate Names:
Adrenal Zona Fasciculata; Fascicular Zone

Zona Glomerulosa

The outer layer of the adrenal gland. It makes min-

eralocorticoid hormones, mainly aldosterone, which helps control salt, water, and blood pressure.

Alternate Names:
Adrenal Zona Glomerulosa; Glomerular Zone

Zona Pellucida

A protective layer of proteins surrounding an egg cell. It helps sperm attach to the egg and changes after fertilization to prevent more than one sperm from entering.

Alternate Names:
Oocyte Glycoprotein Coat; Pellucid Zone

Zona Reticularis

The inner layer of the outer part of the adrenal gland. It makes some hormones related to sex hormones, including adrenal androgens.

Alternate Names:
Adrenal Zona Reticularis; Reticular Zone

Zonisamide

An antiseizure medicine used mainly for focal seizures. It can cause sleepiness, thinking problems, kidney stones, reduced sweating with overheating, acid imbalance, severe rash, or other serious reactions.

Alternate Names:
Zonegran

Zonula Adherens

A belt-like connection between neighboring cells that helps hold them together. It is especially important in sheets of lining cells.

Alternate Names:
Belt Desmosome; Intermediate Junction; Adherens Junction

Zonula Occludens

A tight connection between neighboring lining cells that helps prevent substances from passing freely between them.

Alternate Names:
Tight Junction

Zonule

Fine fibers that connect the ciliary body to the lens capsule and hold the lens in place. Changes in their tension help the lens adjust focus for near or distant vision.

Alternate Names:
Zonule of Zinn; Ciliary Zonule; Suspensory Ligament of Lens

Zoon Balanitis

A chronic benign inflammation of the glans penis, usually seen in uncircumcised men. It commonly appears as a sharply demarcated shiny orange-red or rust-colored patch; diagnosis is clinical, with biopsy used when the diagnosis is uncertain.

Alternate Names:
Plasma Cell Balanitis; Balanitis Circumscripta Plasmacellularis

Zoonosis

An infection that naturally spreads between animals with backbones and people. Examples include rabies, brucellosis, leptospirosis, toxoplasmosis, and some influenza infections; spread may involve bites, food, water, droplets, or direct contact.

Alternate Names:
Zoonotic Infection; Zoonotic Disease

Zoonotic Spillover

The spread of a germ from an animal or insect carrier to a person. If the germ then spreads easily between people, it can cause an outbreak or epidemic.

Alternate Names:
Zoonotic Transmission Event; Cross-Species Spillover

Zoster

A painful, usually unilateral vesicular eruption caused by reactivation of latent varicella-zoster virus in a sensory nerve ganglion. It may be complicated by postherpetic neuralgia, ocular disease, or neurologic involvement.

Alternate Names:
Herpes Zoster; Shingles; Zona

Zoster (Shingles)

Alternate name; see *Zoster*.

Zoster Ophthalmicus

Shingles affecting the ophthalmic branch of the trigeminal nerve, which supplies the forehead, upper eyelid, and parts of the eye. It can cause a one-sided rash and inflammation that threatens vision.

Alternate Names:
Herpes Zoster Ophthalmicus; HZO

Zygapophyseal Joint

One of the small joints at the back of the spine that connects neighboring vertebrae. These facet joints guide spinal movement and can become painful with arthritis.

Alternate Names:
Facet Joint; Z-Joint; Spinal Articular Facet

Zygapophyseal Joint Arthropathy

Arthritis of the small facet joints at the back of the spine. It can cause local or nearby neck or back pain and stiffness.

Alternate Names:
Facet Joint Arthropathy; Spinal Facet Osteoarthritis

Zygomatic Arch

The bony arch at the side of the face, formed by the cheekbone and temporal bone. It provides attachment for the masseter muscle, and the temporalis tendon passes beneath it.

Alternate Names:
Cheekbone Arch

Zygomatic Bone

A paired facial bone that forms the prominence of the cheek and part of the lateral orbital wall and floor. It articulates with the frontal, sphenoid, temporal, and maxillary bones.

Alternate Names:
Cheekbone; Malar Bone

Zygomatic Fracture

A break in the cheekbone, usually caused by facial trauma. It may flatten the cheek, numb the skin below the eye, cause double vision, limit mouth opening, or extend into the eye socket.

Alternate Names:
Malar Fracture

Zygomaticomaxillary Complex Fracture

A break involving the cheekbone and its connections to the eye socket, upper jaw, and skull. It may flatten the cheek and cause double vision, numbness below the eye, or difficulty opening the mouth.

Alternate Names:
ZMC Fracture; Tetrapod Fracture; Tripod Fracture of the Face

Zygomycosis

An outdated, broad term for fungal infections caused by fungi once grouped as zygomycetes. It has often been used imprecisely for mucormycosis, which is caused by fungi in the order Mucorales.

Zygote

The first cell formed when a sperm joins an egg. It contains genetic material from both parents, divides repeatedly, and develops into an embryo.

Alternate Names:
Fertilized Oocyte

Zymogen

An inactive form of an enzyme that becomes active after a chemical change. Examples include pepsinogen, trypsinogen, and some blood-clotting proteins.

Alternate Names:
Proenzyme; Inactive Enzyme Precursor

Zymogen Granule

A small storage sac inside certain gland cells, such as cells in the pancreas. It stores inactive digestive enzymes until the cell releases them.

Alternate Names:
Zymogenic Secretory Vesicle; Proenzyme Granule

Drugs

Generic Medicines and Medication Terms

5-Alpha Reductase Inhibitor

A medicine that lowers production of dihydrotestosterone, a hormone that affects the prostate and hair follicles. It is used mainly for an enlarged prostate and selected types of hair loss.

Abortifacient

A medicine or substance used to end a pregnancy. Some block progesterone, others cause uterine contractions and cervical opening, and certain medicines stop rapidly dividing pregnancy tissue in selected ectopic pregnancies.

Abortion - Medication

Medication abortion uses prescribed medicines, commonly mifepristone followed by misoprostol or misoprostol alone, to end an early intrauterine pregnancy; confirmation of completion and assessment for ectopic pregnancy are important.

Abuse Steroid (Anabolic Steroid Abuse)

Alternate index label for Anabolic Steroid Abuse.

A&E Medicine

The medical specialty concerned with the immediate assessment, resuscitation, diagnosis, and initial treatment of acute illness and injury.

Alternate Names:
A&E Medicine

ACE Inhibitor

A medicine that relaxes blood vessels and reduces strain on the heart by lowering production of angiotensin II. It treats high blood pressure, heart failure, and some kidney disease; cough, high potassium, kidney problems, or swelling can occur.

Acitretin

An oral retinoid used mainly for severe psoriasis and selected keratinization disorders. It is highly teratogenic and requires strict pregnancy precautions and monitoring for adverse effects.

Adenovirus Vaccine

A vaccine used primarily to prevent adenovirus types 4 and 7 among selected military personnel. It is an oral, live vaccine and is not part of routine vaccination for the general public. Vaccine use and eligibility depend on current public-health recommendations.

Adverse Drug Event

Harm related to the use of a medication, including harm caused by an adverse drug reaction, medication error, overdose, or inappropriate use.

Adverse Drug Reaction

An unwanted and harmful response to a medicine taken at a usual dose for prevention, testing, or treatment. It may result from the medicine's expected effects, an allergy, an interaction, or an unusual individual response.

Agent, Tocolytic

A medicine that reduces uterine contractions, used

selectively to delay preterm birth long enough for corticosteroids, transfer, or other preparations to take effect.

Agonist-Antagonist

A medicine that activates some receptors while blocking others, or activates a receptor only partly. Its mixed action can produce a desired effect while limiting another effect; examples include some opioid medicines.

AIDS Vaccine

A vaccine designed to prevent HIV infection or reduce its effects; no generally effective licensed vaccine currently exists.

Alendronate

A bisphosphonate that reduces bone resorption and is used to treat or prevent osteoporosis and selected other disorders of excessive bone turnover.

Alternate Names:
Alendronic acid; oral bisphosphonate therapy.

Anabolic Steroid Abuse

Anabolic-androgenic steroid misuse can cause infertility, testicular shrinkage, acne, mood changes, high blood pressure, adverse cholesterol changes, liver injury, and cardiovascular events. Stopping may produce withdrawal symptoms and is safest with medical support.

Alternate Names:
Abuse Steroid (Anabolic Steroid Abuse)

Analgesic

A medicine that relieves pain without necessarily causing loss of consciousness. Analgesics include nonopioid medicines, opioids, and other medicines chosen according to the type and severity of pain.

Analgesic Nephropathy

Chronic tubulointerstitial renal injury associated with prolonged or excessive use of analgesic medicines. It may cause impaired urinary concentration, sterile pyuria, haematuria, papillary necrosis, hypertension, and progressive chronic kidney disease.

Anesthetic

A medicine or technique that numbs part or all of the body. Depending on the method, a person may remain awake or become unconscious during a procedure; breathing, blood pressure, and other vital functions may need monitoring.

Angiotensin Converting-Enzyme Inhibitor

A medicine that lowers the production of angiotensin II, a hormone that narrows blood vessels and promotes salt retention. It can treat high blood pressure, heart failure, and some kidney disease but may cause cough, high potassium, kidney problems, or swelling.

Angiotensin Receptor Blocker

A medicine that blocks angiotensin II at the AT1 receptor, reducing vasoconstriction and aldosterone effects; it is used for hypertension, heart failure, and selected kidney disease.

Antibiotic

A medicine that kills bacteria or stops them from multiplying. Antibiotics do not treat viral infections and should be selected for the suspected bacteria, infection site, allergies, and resistance risk.

Antibiotic-Associated Colitis

Alternate Mayo Clinic label; see *Pseudomembranous colitis*.

Antibiotic-Associated Diarrhea

Loose or frequent stools that occur during or soon after antibiotic treatment.

Alternate Names:
Diarrhea, Antibiotic-Associated

Antibiotic Cycling

A strategy in which the preferred antibiotic for a particular clinical use is changed at planned intervals. It is intended to limit selection of resistant organisms, although its benefit depends on local

conditions and implementation.

Antibiotic De-Escalation

The process of narrowing antimicrobial spectrum based on microbiological results and clinical response. De-escalation aims to reduce selective pressure for resistance while maintaining therapeutic efficacy.

Antibiotic Mixing

A strategy in which different antibiotics are assigned concurrently to different patients with the same indication. It is intended to reduce uniform selection pressure for resistance in a patient population.

Antibiotic Resistance

The ability of bacteria to survive or grow despite an antibiotic that would normally kill them or stop their growth. It can result from genetic changes and the spread of resistance genes; unnecessary or incorrect antibiotic use can accelerate it.

Alternate Names:
Resistance Antibiotic (Antibiotic Resistance)

Antibiotic Resistance Genes

Genes that help bacteria survive antibiotics. They may change the antibiotic's target, destroy or modify the medicine, or remove it from the cell. Bacteria can inherit these genes or acquire them from other bacteria.

Antibiotic Stewardship

Coordinated efforts to use antibiotics appropriately by selecting the right medicine, dose, route, and duration while reducing unnecessary treatment and resistance.

Anticholinergic Cognitive Burden Scale

A medication-review tool that estimates the total anticholinergic load of a patient's medicines. It supports risk assessment and deprescribing but does not replace individualized clinical judgment.

Anticoagulant

A medicine that slows the body's blood-clotting process. It helps prevent or treat clots in veins, lungs, heart, or arteries but can cause bruising or serious bleeding.

Alternate Names:
Anticoagulants; Blood Thinners

Anticoagulant Agent

See *Anticoagulant*.

Anticoagulant Monitoring

Laboratory assessment used to measure the effect or safety of an anticoagulant. The appropriate test depends on the drug and may include aPTT, anti-Xa activity, INR, or measurements of kidney function and blood counts.

Anticoagulant Rodenticides Poisoning

Poisoning from rat or mouse bait that interferes with blood clotting. Symptoms such as easy bruising, nosebleeds, blood in urine or stool, or weakness may appear later; suspected exposure requires immediate poison-control or emergency advice.

Anticonvulsant

A medicine used to prevent or control seizures. Some are also used for nerve pain, migraine prevention, or mood disorders; choice depends on the condition, other medicines, pregnancy, and side effects.

Alternate Names:
Antiseizure medicine

Anticonvulsant Mood Stabilizers

Antiepileptic drugs used as mood stabilizers in bipolar disorder. Valproate (divalproex) is effective for acute mania and rapid cycling. Carbamazepine is effective for acute mania but has numerous drug interactions via CYP3A4 induction. Lamotrigine is effective for bipolar depression prevention but not acute mania.

Antidepressant

A medicine used to treat depressive disorders and some other conditions involving mood, anxiety, pain, or sleep.

Antidiabetic Agent

See *Antidiabetic Drugs*.

Antidiarrheal

A medicine that reduces the frequency or amount of diarrhea. It may be unsafe when stools contain blood, there is high fever or severe infection, or the bowel is blocked, so the cause should be considered first.

Alternate Names:
Antidiarrheals; Antidiarrheal Medicines

Antidiarrheal Medicine Overdose

Toxic effects caused by excessive exposure to Antidiarrheal medicine. Severity depends on the dose, route, timing, coexisting conditions, and clinical findings; suspected poisoning requires prompt assessment.

Antiemetic

A medicine that prevents or reduces nausea and vomiting. The choice depends on the cause, such as infection, migraine, pregnancy, surgery, or cancer treatment, and some medicines can cause sleepiness or movement problems.

Alternate Names:
Antiemetics; Antiemetic Medicines

Antiestrogen

A drug that blocks estrogen effects or reduces estrogen production; it may be used in hormone-sensitive breast cancer or to alter reproductive hormone signaling.

Antifungal

A medicine that kills fungi or stops them from growing. It may be applied to the skin or given by mouth or injection; the choice depends on the fungus, the body site, and the severity of infection.

Antifungal Agent

A drug or chemical that kills fungi or inhibits their growth, used to treat fungal infections of the skin, mucosa, or internal organs.

Antifungal Drug Classes

Major classes of antifungal agents include polyenes (amphotericin B), azoles (fluconazole, voriconazole), echinocandins (caspofungin, micafungin), and allylamines (terbinafine). Polyenes bind to ergosterol in fungal cell membranes. Azoles inhibit ergosterol synthesis. Echinocandins inhibit cell wall synthesis.

Antifungal Medication

A medicine used to treat fungal infection; the choice and route depend on the organism and site, and examples include azoles, terbinafine, polyenes, and echinocandins.

Alternate Names:
Antifungals; Antifungal Medicines; Antifungal Drugs

Antihistamine

A medicine that blocks histamine, a chemical involved in allergies. It can relieve sneezing, itching, hives, or watery eyes; older types may cause sleepiness, dry mouth, blurred vision, urinary retention, or confusion.

Antihypertensive

A medicine used to lower blood pressure. Classes include ACE inhibitors, angiotensin-receptor blockers, calcium-channel blockers, thiazide-type diuretics, beta-blockers, and other agents. Selection depends on blood pressure, kidney function, cardiovascular disease, pregnancy, and other clinical factors.

Alternate Names:
Antihypertensives; Blood Pressure-Lowering Medicines

Antihypertensive Agent

See *Antihypertensive*.

Alternate Names:
Blood-pressure medicine

Anti-Infective

A medicine or other agent used to prevent or treat an infection. The choice depends on whether the cause is a bacterium, virus, fungus, or parasite, as well as the infection site and the person's health.

Antimalarial

A drug used to prevent or treat malaria caused by Plasmodium parasites; selection depends on species, disease severity, resistance, and geographic exposure.

Antimicrobial Drug

A medicine used to treat infection by bacteria, viruses, fungi, or parasites; the drug is selected according to the organism, infection site, and patient factors.

Antimicrobial Drug Interactions

Changes in the effect or level of an infection medicine caused by another medicine, food, or supplement. Some combinations reduce treatment effectiveness or increase toxicity, so the full medicine list should be checked.

Antiparasitic

A medicine used to prevent or treat infection caused by parasites. The choice depends on the parasite, body site, disease severity, resistance patterns, pregnancy status, and other patient factors.

Alternate Names:
Antiparasitics; Antiparasitic Medicines; Antiparasitic Drugs

Antiparkinsonian

A medicine used to improve movement or other symptoms of Parkinson disease. Medicines may replace dopamine, imitate its effects, or alter other brain signals; benefits and adverse effects vary with the drug and the person.

Antiplatelet Agent

A medicine that makes blood platelets less likely to clump together. It lowers the risk of clots in arteries but can increase bruising and serious bleeding.

Alternate Names:
Antiplatelet medicine

Antiprotozoal Drug

A medicine used to prevent or treat disease caused by protozoa, including drugs directed against malaria, intestinal protozoa, or tissue parasites.

Antipruritic

A medicine or skin treatment that relieves itching. It may work by reducing inflammation, blocking allergy signals, numbing the skin, or changing nerve signals; treatment should also address the cause of the itching.

Antipsychotic

A medicine used to reduce hallucinations, delusions, severe agitation, or mania and to treat some mood disorders. Possible effects include sleepiness, movement problems, weight or blood-sugar changes, and rarely a dangerous fever-and-stiffness reaction.

Alternate Names:
Antipsychotics; Antipsychotic Medicines

Antipsychotic Agent

See *Antipsychotic*.

Antipsychotic-Induced Parkinsonism

Drug-induced bradykinesia, rigidity, tremor, or postural instability caused by dopamine-receptor blockade, usually from antipsychotic treatment. Management involves reviewing the medication, dose, alternatives, and symptomatic treatment when appropriate.

Antispasmodic

A medicine that relaxes involuntary muscle and may reduce cramping in the intestine, bladder, or other organs. Some types can cause dry mouth, blurred vision, constipation, urinary retention, or confusion.

Alternate Names:
Antispasmodics

Antithyroid

See *Antithyroid Drug*.

Antithyroid Drug

A medicine that reduces thyroid hormone production, used to treat some forms of hyperthyroidism. Examples include methimazole and propylthiouracil. Radioactive iodine is a separate treatment, not an

antithyroid drug.

Alternate Names:
Antithyroid Medicines; Antithyroid Drugs

Antiviral

A medicine that slows or stops viruses from multiplying. It works only against certain viruses and is chosen according to the infection, timing, resistance, and the patient's health.

Alternate Names:
Antivirals; Antiviral Medicines; Antiviral Drugs

Antiviral Drug Classes

Groups of antiviral medicines classified by the step of viral growth they block. Some stop copying of viral genetic material, some block viral proteins or entry into cells, and others prevent newly formed viruses from being released.

Anxiolytic

A medicine used to reduce anxiety. Different medicines work in different ways and have different risks; choice depends on the condition, urgency, other health problems, and patient factors. Psychotherapy is a separate, non-medicine treatment for anxiety.

Alternate Names:
Anxiolytics; Anti-Anxiety Medicines

ARB-Neprilysin Inhibitor

Sacubitril/valsartan combines an ARB with a neprilysin inhibitor, increasing natriuretic peptide levels while blocking the renin-angiotensin system. The PARADIGM-HF trial demonstrated superior reduction in cardiovascular death and heart failure hospitalization compared to enalapril.

Aromatase Inhibitor

A class of medications that inhibit aromatase, the enzyme that converts androgens (androstenedione, testosterone) to estrogens (estrone, estradiol) in peripheral tissues (adipose, breast, muscle, bone). Used primarily in hormone receptor-positive breast cancer in postmenopausal women.

Attenuated Vaccine

A vaccine made with a weakened microorganism that retains the ability to stimulate immunity.

Alternate Names:
Live attenuated vaccine

Bacterial Vaccine

A vaccine made from killed bacteria, weakened bacteria, purified bacterial parts, or bacterial toxins. It trains the immune system to prevent specific infections; protection and dosing depend on the vaccine and age group.

BCG Vaccine

A vaccine made from a weakened relative of the tuberculosis bacterium. It helps protect children from severe tuberculosis, especially meningitis, but protection against lung tuberculosis varies; use depends on local risk and policy.

Behavioral Medicine

An interdisciplinary field integrating behavioral science with medical practice to prevent, diagnose, and treat illness. It addresses psychological factors such as stress, coping, adherence, and health behaviors that influence disease outcomes.

Benzodiazepines

Medicines that strengthen the brain's main calming signal. They can reduce anxiety, stop some seizures, relax muscles, or cause sleepiness, but can also cause dependence, falls, confusion, and dangerously slow breathing, especially with opioids or alcohol.

Beta-Adrenergic Blocker

A drug that antagonizes beta-adrenergic receptors, reducing heart rate, myocardial contractility, and renin release. It is used in selected patients with hypertension, angina, arrhythmias, post-myocardial infarction disease, and heart failure; abrupt withdrawal may worsen ischemia.

Alternate Names:
Beta-Adrenergic Antagonist

Beta Agonists

Drugs that activate beta-adrenergic receptors, producing effects such as relaxation of airway smooth muscle or increased cardiac stimulation depending on receptor selectivity.

Alternate Names:
Beta-adrenergic agonists; beta-agonist drugs.

Beta Blocker

See *Beta Blockers*.

Beta-Blocker Overdose

Toxic exposure to a beta-adrenergic blocker that may cause slow heart rate, low blood pressure, low blood glucose, bronchospasm, seizures, or altered consciousness. It requires urgent poison-control and medical management.

Beta Blockers

Medicines that block some effects of adrenaline at beta receptors. They commonly slow the heart rate and lower blood pressure and are used for several heart conditions and other problems. Some types can worsen asthma or mask warning signs of low blood sugar.

Beta-Lactamase Inhibitor Combinations

Combinations of beta-lactam antibiotics with beta-lactamase inhibitors that extend activity against beta-lactamase producing organisms. The major combinations include amoxicillin-clavulanate, ampicillin-sulbactam, piperacillin-tazobactam, cefoperazone-sulbactam, and ceftolozane-tazobactam.

C1 Esterase Inhibitor

A blood protein that helps control inflammation, swelling, and clotting reactions. Too little or abnormal activity can cause hereditary angioedema, with repeated attacks of swelling in the skin, bowel, or airway.

Calcium Channel Blocker

A medicine that reduces calcium movement into heart and blood-vessel muscle cells. It may relax arteries, lower blood pressure, reduce chest pain, or slow some abnormal heart rhythms; ankle swelling, constipation, dizziness, or a slow heartbeat may occur.

Calcium Channel Blocker Overdose

Toxic exposure to a calcium-channel blocker that may cause low blood pressure, slow heart rate, conduction abnormalities, high blood glucose, or shock. It requires urgent medical and poison-control management.

Calcium Channel Blockers

Medicines that reduce the movement of calcium into heart and blood-vessel muscle cells. Dihydropyridines, such as amlodipine and nifedipine, mainly relax arteries and are used for high blood pressure and angina. Other calcium channel blockers, such as diltiazem and verapamil, also slow the heart rate and electrical conduction and may be used for certain abnormal heart rhythms.

Camptothecin Analogue

A cancer medicine related to camptothecin that blocks an enzyme cancer cells need to copy DNA. It can damage rapidly dividing cells and commonly causes low blood counts, diarrhea, nausea, or other gastrointestinal effects.

Cancer Vaccine

A vaccine designed either to prevent infections that can cause cancer or to help the immune system attack an existing cancer. Its use depends on the specific vaccine and cancer; it does not replace other cancer treatment when needed.

Cardiotonic Agent

A drug or substance that increases the force or efficiency of cardiac contraction, used selectively in heart failure or shock because benefits must be balanced against arrhythmia and other risks.

Carvedilol Phosphate

The phosphate formulation of carvedilol, a medicine that blocks beta and alpha-1 receptors. It lowers heart rate and blood pressure and is used for heart

failure and hypertension; dizziness, slow heartbeat, and worsening fluid retention can occur.

Cebocephaly

A rare birth defect in which the middle part of the face is severely underdeveloped, sometimes with a single nostril or a nose-like structure between closely spaced eyes. It usually occurs with major brain and facial-development abnormalities.

Celecoxib

A selective COX-2 anti-inflammatory medicine used for pain and arthritis. It can cause stomach, kidney, blood-pressure, and heart problems and may increase cardiovascular risk, especially with long-term use or in people with existing risk factors.

Alternate Names:
Celebrex

Cholesterol - Drug Treatment

Medicines used to lower harmful blood cholesterol or triglycerides and reduce cardiovascular risk. Statins are used most often; other options may be added when needed, according to cholesterol levels, overall risk, other illnesses, and treatment tolerance.

Cholinesterase Inhibitor

A medicine that slows the breakdown of acetylcholine, a chemical used for nerve signalling. It can improve nerve communication in selected conditions but may cause nausea, diarrhoea, slow heartbeat, sweating, or muscle cramps.

Cold/Cough Medicines in Children

Many nonprescription cold and cough medicines are unsafe or ineffective for young children and can cause sedation, agitation, abnormal heart rate, overdose, or breathing problems. Age-appropriate fluids, saline, humidification, and clinician-guided treatment are safer approaches.

Conjugate Vaccine

A vaccine that joins a bacterial sugar to a carrier protein so the immune system makes a stronger, longer-lasting response. This design is especially useful in infants and young children.

Alternate Names:
Protein-conjugate vaccine; conjugated polysaccharide vaccine.

Conscious Sedation

Medicine given to make a person relaxed and drowsy during a procedure while allowing them to respond to voice or touch and usually breathe independently. Breathing, blood pressure, and alertness must be monitored because deeper sedation can occur.

Controlled Substance

A medicine or chemical whose production, supply, possession, or use is restricted by law because it may cause dependence, misuse, overdose, or other serious harm. Rules differ between countries and substances.

Cox-1 Inhibitor

A medicine that blocks cyclooxygenase-1, an enzyme involved in pain, stomach protection, kidney function, and platelet clotting. Blocking it may relieve pain but can increase stomach irritation, bleeding, or kidney problems.

COX Inhibitor

A class of medicines that reduce production of chemicals involved in pain, fever, and inflammation. They can irritate the stomach, affect kidney function, raise blood pressure, or increase bleeding and cardiovascular risk.

Crack (Drug)

A smokable, rapidly acting form of cocaine; it can cause dependence, severe cardiovascular effects, seizures, stroke, psychiatric symptoms, and overdose.

Cutaneous Drug Eruptions

Skin rashes or other skin reactions caused by medicines. They may appear as a widespread red rash, hives, sun-sensitive areas, or a lichen-planus-like eruption. Blisters, skin peeling, mouth sores, fever, or facial swelling require urgent assessment.

Cyclooxygenase Inhibitor

A medicine that reduces production of prostaglandins and may relieve pain and inflammation.

Designer Steroid

A chemically modified anabolic-androgenic steroid created to produce performance-enhancing effects or evade detection; products may be unapproved, contaminated, and medically dangerous.

Diarrhea, Antibiotic-Associated

Alternate index label; see *Antibiotic-associated diarrhea*.

Digitalis

A group of heart medicines from foxglove plants, including digoxin. They can strengthen heart contraction and slow some heart rhythms but have a narrow safety range and may cause dangerous toxicity.

Diphtheria Vaccine

A vaccine containing an inactivated form of diphtheria toxin. It trains the immune system to neutralize the toxin and is usually given in combination vaccines with protection against tetanus and pertussis.

Disease-Modifying Antirheumatic Drug

A medicine used for inflammatory rheumatic diseases to reduce disease activity and help prevent lasting joint or organ damage, rather than only relieving symptoms. Different types are chosen according to the disease, severity, other conditions, and monitoring needs.

Alternate Names:
DMARD; DMARDs; Disease-Modifying Antirheumatic Drugs

Disulfiram

A medicine used as an adjunct for alcohol-use disorder that inhibits aldehyde dehydrogenase and can cause an unpleasant reaction if alcohol is consumed.

Diuretic

A medicine that helps the kidneys remove extra salt and water in urine. It can treat swelling, high blood pressure, heart failure, or selected kidney and liver conditions but may disturb salts or cause dehydration.

Alternate Names:
Diuretics; Water Pills

Doctor Of Osteopathic Medicine

A physician who has completed an accredited osteopathic medical degree and residency training and is licensed to diagnose, prevent, and treat disease.

Drug Administration Route

The pathway by which a medicine enters the body, such as oral, intravenous, intramuscular, inhaled, topical, or subcutaneous administration.

Drug Allergies

Drug allergies are immune-mediated reactions to a medicine, ranging from rash to anaphylaxis; they must be distinguished from predictable side effects and nonimmune intolerance.

Drug Allergy

An adverse immune-mediated reaction to a medication, representing a hypersensitivity response that is distinct from side effects, toxicities, and idiosyncratic reactions.

Drug Antagonism

An interaction where one drug blocks or decreases the effectiveness of another, such as when an antidote blocks a poison.

Drug Bioavailability

The proportion of a dose that reaches the bloodstream in an active form. It depends on how the medicine is given, how well it is absorbed, and how much is broken down before reaching the blood; intravenous doses enter the bloodstream completely.

Drug Classification Systems

Systems that group medicines according to proper-

ties such as their chemical structure, mechanism of action, therapeutic use, or effects on the body.

Drug Clearance

The body's ability to remove a medicine from the bloodstream, mainly through the liver and kidneys. Clearance affects how long a medicine works and how often it should be taken; liver or kidney disease may require dose adjustment.

Drug Dependence

A state of physiological or psychological adaptation to a drug, characterized by a withdrawal syndrome upon discontinuation or dose reduction. Physical dependence: the body has adapted to the presence of the drug, and abrupt cessation produces a predictable withdrawal syndrome specific to the drug class.

Drug-Drug Interactions

Changes in the effect or amount of one medicine caused by another medicine. The combination may make treatment less effective or increase side effects, so all prescription, nonprescription, and supplement use should be reviewed.

Drug-Eluting Balloon (Vascular)

A vascular balloon catheter that delivers a medicine to the vessel wall during dilation, without leaving a permanent implant.

Alternate Names:
Vascular

Drug Emulsion

A medicine made by dispersing tiny droplets of one liquid throughout another liquid that normally would not mix with it. An added stabilizer keeps the mixture uniform so the medicine can be given safely.

Drug Eruption

A skin eruption caused by a medication, ranging from a mild morbilliform rash to severe reactions such as Stevens–Johnson syndrome or toxic epidermal necrolysis.

Alternate Names:
Drug Eruptions

Drug-Facilitated Sexual Assault

Sexual contact occurring when a person's capacity to consent or resist is impaired by alcohol, medication, or another drug, whether administered covertly or knowingly consumed. Medical care includes urgent safety assessment, treatment of injuries, toxicology sampling when indicated, prophylaxis, and trauma-informed support.

Drug Hypersensitivity Reactions

Immune-mediated adverse reactions to medicines. They may be immediate or delayed and can range from a mild rash to severe systemic illness.

Drug Hypersensitivity Syndrome

A serious delayed reaction to a medicine, usually beginning two to eight weeks after it is started. It may cause fever, widespread rash, facial swelling, enlarged lymph nodes, abnormal blood cells, and injury to the liver, kidneys, lungs, or heart.

Drug-Induced Autoimmunity

An immune reaction caused by a medicine in which the body attacks its own tissues. It may resemble lupus, cause joint pain, fever, rash, or organ inflammation, and often improves after the responsible medicine is stopped under medical guidance.

Drug-Induced Diarrhea

Diarrhea caused by a medicine or drug interaction. Common causes include antibiotics, laxatives, metformin, and medicines that alter intestinal motility.

Drug-Induced Immune Hemolytic Anemia

An uncommon immune-mediated destruction of red blood cells triggered by a medication; evaluation includes blood tests and review of exposures, with specialist management.

Drug Induced Liver Disease

Drug-induced liver injury occurs when a medicine,

supplement, or toxin damages liver cells or bile flow. It may cause fatigue, nausea, itching, dark urine, jaundice, or no symptoms; identifying and stopping the responsible exposure under medical guidance is central to care.

Drug-Induced Low Blood Sugar

Low blood glucose caused by a medicine, most often insulin or an insulin secretagogue. Symptoms may include sweating, tremor, confusion, seizure, or loss of consciousness.

Drug-Induced Pulmonary Disease

Lung injury caused by a medicine or treatment. It may produce cough, breathlessness, fever, or abnormal lung imaging; the medicine, timing, and other possible causes must be reviewed promptly because some cases can progress to respiratory failure.

Drug-Induced Thrombocytopenia

A low platelet count caused by a medicine through immune destruction, reduced production, or other mechanisms, increasing bleeding risk.

Drug-Induced Tremor

Tremor caused or worsened by a medicine, stimulant, or toxin. Assessment considers timing, dose, other causes, and whether the medicine can be changed.

Drug Interaction

A change in the effect or concentration of one medicine caused by another medicine, food, substance, or disease.

Drug Metabolism

The enzymatic conversion of medicines into metabolites, mainly in the liver but also in the intestine, kidneys, lungs, and other tissues.

Drug Metabolism Pharmacogenomics

The study of how inherited genetic differences change the way a person breaks down medicines. This information can sometimes help clinicians choose a safer or more effective medicine or dose.

Drug Overdose

Harm caused by taking too much medicine or taking it by the wrong route. Effects range from sleepiness, vomiting, and confusion to seizures, organ damage, or stopped breathing. Suspected overdose requires urgent poison-control or emergency advice.

Drug Packaging

The container, labeling, and protective materials used to preserve a medicine and support correct identification, storage, and use.

Drug, Prescription

A medicine legally supplied under the order of an authorized prescriber, with its indication, dose, duration, interactions, and risks specified for the patient.

Drug Resistance

The ability of microorganisms, cancer cells, or parasites to survive and proliferate despite exposure to drugs that were previously effective.

Drug, Sulfa

A sulfonamide drug; some are antibacterial medicines, while others are used as diuretics or for other indications, and sulfonamide reactions vary by drug and patient.

Drug Therapeutics

The use of medicines to prevent, diagnose, or treat disease while balancing expected benefit and potential harm.

Drug Tolerance

A decreased pharmacological response to a drug after repeated administration, requiring dose escalation to achieve the same effect.

Drug Toxicity

Harmful effects caused by a medicine or its metabolites. Toxicity may result from excessive exposure, accumulation, interactions, or an unpredictable individual reaction.

Drug Use First Aid

Immediate care for suspected drug intoxication, including assessment of breathing and responsiveness, emergency activation, overdose-specific support, and naloxone when opioid toxicity is suspected.

Drug Vehicle

An inactive substance or carrier used to deliver an active drug ingredient in a formulation.

Drug Withdrawal

A clinically significant syndrome or return of symptoms caused by abrupt reduction or cessation of a drug after physiologic adaptation or dependence has developed. Tapering is required for some medications to reduce withdrawal and rebound effects.

DTaP Vaccine

A vaccine against diphtheria, tetanus, and pertussis (whooping cough), given mainly to infants and young children in a multi-dose series. It reduces severe illness, complications, and spread; schedules vary by country.

Eflornithine

A medicine that slows cell growth by blocking an enzyme needed to make certain cell components. A skin cream can reduce unwanted facial hair; an intravenous form has been used for selected African trypanosome infections.

Enzyme Inhibitor

A substance that slows or blocks an enzyme, a protein that helps chemical reactions occur in the body. Medicines use this action to change processes such as blood pressure, inflammation, infection, hormone production, or cancer-cell growth.

Estrogen Inhibitor

A medicine that reduces estrogen production or blocks estrogen's effects. It may treat selected hormone-sensitive cancers or other conditions; side effects can include hot flashes, bone loss, joint symptoms, or blood clots.

Etidronate

A bisphosphonate medicine that slows the breakdown and rebuilding of bone. It is used selectively for some disorders of abnormal bone remodeling; treatment depends on the condition and can affect the stomach, kidneys, or minerals.

Evidence-Based Medicine

The use of reliable research together with clinical expertise and the patient's values and circumstances to make healthcare decisions. It supports, but does not replace, discussion between patient and clinician.

Expectorant

A medicine intended to loosen or thin mucus so it is easier to cough up. Benefit varies with the cause of cough and the product; persistent breathlessness, fever, chest pain, or blood needs medical assessment.

Extensively Drug-Resistant TB

Tuberculosis caused by bacteria resistant to rifampicin and usually isoniazid, at least one fluoroquinolone, and at least one of the key drugs bedaquiline or linezolid. Diagnosis requires drug-susceptibility testing and specialist treatment.

Family Medicine

A medical specialty providing comprehensive continuing care for people of all ages, including prevention, acute illness, chronic disease, and coordination of referrals.

Fentanyl

A potent synthetic opioid analgesic used for severe pain and anesthesia. It can cause respiratory depression, sedation, constipation, nausea, tolerance, dependence, and fatal overdose, especially when combined with alcohol or other sedatives.

Fertility Agent

A medicine or biologic intervention intended to improve the chance of conception by inducing ovulation, supporting sperm production, or treating a reproductive mechanism.

Fidaxomicin

A narrow-spectrum oral macrocyclic antibiotic used to treat Clostridioides difficile infection. It has minimal systemic absorption and reduces disruption of normal intestinal flora compared with many alternatives, but recurrence can still occur.

Filgrastim

A recombinant granulocyte colony-stimulating factor that increases production and release of neutrophils from bone marrow. It is used to reduce or treat selected forms of chemotherapy-related neutropenia; bone pain and rare splenic complications can occur.

Finasteride

A medicine that lowers the conversion of testosterone to dihydrotestosterone. It can shrink an enlarged prostate and help some types of hair loss but may reduce libido, affect sexual function, or alter prostate-test results.

Fixed Drug Eruption

A medicine-related skin reaction that returns in the same place whenever the person takes the responsible medicine. It may appear as a sharply outlined red or dark patch, sometimes with a blister or sore, and can leave lasting discoloration.

Fluticasone

A corticosteroid available in inhaled, nasal, topical, and other formulations to reduce inflammation. Adverse effects depend on route and may include local irritation, oral candidiasis, skin thinning, adrenal suppression, or growth effects with prolonged exposure.

Food-Drug Interaction

A change in how a medicine works or is absorbed because of food, drink, nutrients, or supplements. Examples include grapefruit affecting some medicines, vitamin K changing warfarin's effect, and calcium reducing absorption of some antibiotics.

Forensic Medicine

Application of medical knowledge to legal questions, including injury interpretation, cause of death, toxicology, identification, sexual assault evaluation, and documentation.

Forensic Medicine (Legal Medicine)

Branch of medicine that applies medical, biological, and scientific knowledge to legal questions and the administration of justice.

Alternate Names:
Legal Medicine

Foscarnet

An intravenous antiviral agent used for selected cytomegalovirus or herpesvirus infections, especially when resistance or intolerance limits other treatment. Important toxicities include kidney injury and disturbances of calcium, magnesium, potassium, or phosphate.

Furosemide

A diuretic that makes the kidneys remove more salt and water in urine. It treats swelling and some blood-pressure or heart conditions but may cause dehydration, abnormal body salts, kidney problems, or hearing damage.

Ganglionic Blocker

A medicine that interrupts nerve signals at switching points controlling automatic body functions. It can affect blood pressure, heart rate, digestion, sweating, vision, and bladder function, so these medicines are rarely used clinically.

Generic Drug

A medicine equivalent to a brand-name medicine in active ingredient, strength, dosage form, and intended use, usually sold under a nonproprietary name.

Alternate Names:
Generic medicine

Generic Medicine

A medicine with the same active ingredient, strength, form, route, and intended effect as an approved reference medicine. It may look different

or have different inactive ingredients but must meet regulatory quality and performance requirements.

Generic Name, Drug

The official nonproprietary name of a medicine's active ingredient, used consistently across manufacturers and countries. It identifies the medicine itself rather than a company's brand name and helps prevent confusion when products have different trade names.

Genomic Medicine

Use of a person's genetic or genomic information to guide disease diagnosis, risk assessment, prevention, or treatment.

Geriatric Medicine

The medical specialty focused on the health, function, diseases, medications, and goals of older adults, often using comprehensive and coordinated care.

Growth Inhibitor

A medicine or biological substance that slows or stops cell growth. In cancer treatment, it may block cell division or a growth signal, but it can also affect healthy cells and cause side effects.

Haemophilus Vaccine

A vaccine that protects against serious disease caused by Haemophilus influenzae type b, including meningitis, pneumonia, and bloodstream infection. It is given mainly in infancy according to the recommended immunization schedule.

Hepatic Drug Metabolism

The liver changes medicines into forms that the body can use or remove. This may stop a medicine's effect, activate a medicine that works after conversion, or produce a harmful product; age, illness, genetics, and other medicines can alter the process.

Hepatitis B Vaccine

A recombinant vaccine that prevents hepatitis B infection, which can cause chronic liver disease, cirrhosis, and liver cancer. It is given in a series beginning at birth in many schedules; infants exposed at birth may also need hepatitis B immune globulin.

Hepatitis B Vaccine (Birth Dose)

The first hepatitis B vaccine dose, given soon after birth, helps prevent infection passed from a parent to the newborn. If the birth parent has hepatitis B, the infant also needs hepatitis B immune globulin promptly; local schedules determine later doses.

Alternate Names:
Birth Dose

HER2 Inhibitor

A targeted cancer treatment that blocks signaling through human epidermal growth factor receptor 2 in cancers with HER2 overexpression or amplification.

High Blood Pressure - Medicine-Related

Hypertension caused or worsened by a medicine or substance, such as NSAIDs, steroids, decongestants, stimulants, oral contraceptives, or immunosuppressants; review and substitution may improve control.

Histamine-2 Receptor Antagonist

A medicine that reduces stomach-acid production by blocking histamine signals in the stomach. It may treat reflux, indigestion, or ulcers; headache, diarrhea, confusion, and medicine interactions can occur.

Hormone Inhibitor

A medicine or biologic that blocks hormone synthesis, release, receptor binding, or downstream signaling, used in selected endocrine disorders and hormone-sensitive cancers.

HPV Vaccine

A vaccine that prevents infection with human papillomavirus types that cause several cancers and genital warts. It is routinely offered in early adolescence, can start from age 9, and may require two or three doses depending on age and immune status; it does not treat existing HPV infection.

Hypoglycemic Agent

A medicine that lowers blood glucose, including insulin, insulin secretagogues, insulin sensitizers, incretin-based drugs, and sodium–glucose cotransporter inhibitors; choice depends on diabetes type and patient risks.

Hypolipidemic Agent

A medicine that lowers fats in the blood, such as LDL cholesterol or triglycerides. It helps reduce cardiovascular risk when combined with appropriate diet, activity, and treatment of other risk factors.

Immunosuppressant

A medicine that reduces immune-system activity. It may be used to prevent organ transplant rejection or treat autoimmune and inflammatory diseases; effects and infection risks vary by medicine and dose.

Immunosuppressant Drug

A medicine that reduces immune-system activity, often to prevent transplant rejection or treat autoimmune disease.

Immunosuppressive Drug

A drug that suppresses immune responses, used for organ transplantation, graft-versus-host disease, and autoimmune/inflammatory diseases.

Inactivated Polio Vaccine

An injected vaccine made from killed polioviruses. It trains the immune system to prevent poliomyelitis and is used in routine childhood immunization programs; the schedule and use of other polio vaccines vary by country.

Influenza Vaccine

A seasonal vaccine that reduces the risk of influenza and its complications. It is updated as needed and is offered each year to most people from early infancy; some young children need two doses in their first vaccinated season, according to local recommendations.

Inotrope

A drug that changes myocardial contractility; positive inotropes increase the force of contraction. Dobutamine and milrinone may be used short term under specialist monitoring for cardiogenic shock or selected cases of acute decompensated heart failure with low output. Dopamine, epinephrine, and norepinephrine are primarily vasopressors or emergency agents with additional inotropic effects, while digoxin is a separate cardiac glycoside used in selected chronic heart-failure or rate-control settings. These medicines can cause arrhythmias, ischemia, or other serious effects and are not routine long-term treatment for chronic heart failure.

Intensive Care Medicine

Specialty managing critically ill patients. Components: monitoring, ventilatory support, hemodynamic support, infection control, nutrition, sedation, pain management. Common conditions: sepsis, ARDS, traumatic brain injury, post-cardiac arrest, multiorgan failure.

Internal Medicine

The medical specialty focused on prevention, diagnosis, and nonsurgical treatment of diseases in adults, including complex multisystem illness.

Japanese Encephalitis Vaccine

A vaccine that protects against Japanese encephalitis, a mosquito-borne viral infection of the central nervous system. Vaccine type, schedule, and eligibility depend on age, destination or exposure risk, and local recommendations.

Laxative

See *Laxatives*.

Legal Medicine

The application of medical knowledge to legal questions, including forensic examination, injury assessment, death investigation, and issues of capacity or consent.

Liquid Medication Administration

Giving a medicine in liquid form by mouth, feeding

tube, injection, or another prescribed route. The dose must be measured accurately with the supplied device because liquid strengths differ; household spoons can cause dosing errors.

Local Anesthetic

A medicine that temporarily numbs a specific area without usually causing loss of consciousness. It blocks pain signals in nearby nerves and is used for procedures, dental work, wound repair, and some forms of regional pain relief.

Alternate Names:
Local Anesthetics

Luteinizing Hormone-Releasing Hormone Agonist

A medicine that first stimulates and then, with continued use, suppresses signals from the pituitary gland that control the ovaries or testes. It is used for selected cancers, endometriosis, fibroids, and puberty disorders.

Alternate Names:
GnRH agonist; LHRH agonist

Macrolide Antibiotic

An antibiotic of the macrolide class that binds the bacterial 50S ribosomal subunit and usually inhibits protein synthesis; activity and resistance vary by organism and drug.

Malaria Vaccine

A vaccine intended to reduce malaria caused by *Plasmodium* parasites, especially *P. falciparum*; the RTS,S/AS01 and R21/Matrix-M vaccines are used in recommended childhood immunization programs in some endemic settings, alongside other preventive measures.

MAO Inhibitor

A medicine that slows breakdown of certain brain chemicals and is used for selected depression or Parkinson disease. It can interact dangerously with other medicines and some foods, so it requires careful prescribing and instructions.

Measles-Rubella Vaccine

A combined live attenuated vaccine containing measles and rubella antigens without the mumps component, widely used in countries where mumps is not a significant public health burden, including India's Universal Immunization Schedule.

Measles Vaccine

Measles vaccine is a live attenuated vaccine that induces active immunity against measles virus. It is usually given as part of the measles–mumps–rubella (MMR) or measles–mumps–rubella–varicella (MMRV) vaccine.

Medication

A substance or biological product used to prevent, diagnose, treat, or control a disease or symptom. Medicines may be prescribed, bought without a prescription, applied to the body, inhaled, swallowed, or given by injection.

Medication Adherence

The extent to which a patient's medication-taking behavior corresponds with the agreed treatment plan. Adherence is influenced by understanding, adverse effects, cost, access, regimen complexity, beliefs, and cognitive or social factors.

Medication Adverse-Effect Profile

The clinically relevant pattern of predictable pharmacologic effects and harmful reactions associated with a medication. It includes common dose-related effects, serious rare events, organ-specific toxicity, interactions, and monitoring requirements.

Medication Cascade

A prescribing sequence in which an adverse drug effect is misinterpreted as a new medical condition and another drug is prescribed to treat it. Recognizing cascades is an important goal of medication reconciliation and deprescribing.

Medication Deprescribing

A planned, supervised process of reducing the dose or stopping a medicine when its current or future harms outweigh its benefits or when treatment goals

change. Tapering may be required to prevent withdrawal or rebound disease.

Medication Error

A preventable event that may cause or lead to inappropriate medication use or patient harm while the medication is in the control of a healthcare professional, patient, or consumer. Errors can occur during prescribing, transcribing, dispensing, administration, or monitoring.

Medication Management

The systematic process of optimizing pharmacotherapy to achieve therapeutic goals while minimizing adverse effects, encompassing prescribing, dispensing, administration, monitoring, and deprescribing.

Medication Overuse Headaches

Frequent headaches caused or worsened by regular overuse of headache medicines.

Alternate Names:
Rebound Headache

Medication Reconciliation

A structured process of obtaining and comparing the most accurate medication list with current prescriptions at transitions of care. It identifies omissions, duplications, incorrect doses, interactions, and unintended changes.

Medication Review

Systematic examination of all medications for appropriateness. Components: indication, efficacy, safety, adherence, interactions. Tools: Beers Criteria, STOPP/START. Goals: deprescribing, optimizing therapy, reducing adverse effects.

Medication Safety

Practices that reduce medication errors and prevent avoidable harm during prescribing, dispensing, administration, and use.

Medication Side Effects

Unintended harmful responses to medications occurring at standard doses, ranging from mild (nausea, rash, dry mouth) to severe (anaphylaxis, Stevens-Johnson syndrome, QT prolongation, hepatotoxicity).

Meningococcal Vaccine

Conjugate vaccine (MenACWY) and serogroup B vaccine (MenB) given at 11-12 years with booster at 16 years. Protects against Neisseria meningitidis, causing meningitis and septicemia. MenACWY booster at 16 years covers the high-risk period for serogroup C and Y disease.

Mineralocorticoid Receptor Antagonist

A medicine that blocks aldosterone, a hormone that makes the body retain salt and water. It is used for selected heart failure, high blood pressure, and hormone disorders but can raise blood potassium and worsen kidney problems.

MMR Vaccine

A live attenuated vaccine against measles, mumps, and rubella. It is given according to the immunization schedule and is generally avoided during pregnancy and in people with certain severe immune deficiencies.

Molecular Medicine

Molecular medicine applies molecular and cellular biology to understand, diagnose, prevent, and treat disease. It includes genomics, precision oncology, molecular biomarkers, targeted therapy, and other mechanism-based approaches.

Monoamine Oxidase Inhibitor

A medicine that blocks monoamine oxidase, an enzyme that breaks down certain brain chemicals. It can treat selected depression or neurologic disorders but has important interactions with other medicines and some foods.

MRNA Vaccine

A vaccine that gives cells temporary instructions to make a harmless piece of a germ. The immune system learns to recognize that piece and respond later; the messenger RNA does not enter the cell nucleus or change DNA.

Multi-Drug Resistance

Multidrug resistance is resistance of a microorganism, cancer, or other disease process to multiple drugs that would otherwise be active. Mechanisms include target changes, drug inactivation, reduced uptake, efflux, and altered repair or survival pathways.

Multidrug-Resistant Extensively Drug-Resistant TB

Multidrug-resistant tuberculosis is resistant to key first-line drugs, while extensively drug-resistant TB has additional resistance that greatly limits options. Diagnosis requires molecular or culture testing, and treatment uses prolonged individualized combinations with public-health oversight.

Neuropathy Secondary To Drugs

Drug-induced neuropathy is peripheral nerve damage caused by a medicine or toxin, often producing numbness, burning pain, weakness, or altered reflexes; management may require dose reduction, withdrawal, and treatment of symptoms.

Nonsteroidal Anti-Inflammatory Drug

A medicine that inhibits cyclooxygenase enzymes and reduces prostaglandin production, producing analgesic, anti-inflammatory, and fever-reducing effects. NSAIDs can cause gastrointestinal, kidney, cardiovascular, or other adverse effects.

NSAIDs

See *Nonsteroidal Anti-Inflammatory Drug*.

Occupational Medicine

The medical specialty concerned with the effects of work on health, prevention of work-related illness and injury, and safe return to work.

Opioid Analgesics

Strong pain medicines that act on opioid receptors in the brain, spinal cord, and other tissues. They can relieve severe pain but may cause sleepiness, constipation, dependence, and dangerously slow breathing or overdose.

Opioid Antagonist

A medicine that blocks opioid receptors and can reverse opioid effects such as respiratory depression. Naloxone is a commonly used example.

Oral Hypoglycemic

A medicine taken by mouth to lower blood glucose, used mainly in type 2 diabetes. Different medicines improve insulin sensitivity, increase insulin release, slow glucose absorption, or increase glucose loss in urine; choice depends on the patient's risks and kidney function.

Oral Medicine

Specialty diagnosing oral mucosal diseases, dental causes of facial pain, oral manifestations of systemic disease.

Oral Polio Vaccine

A live attenuated poliovirus vaccine administered by mouth. Its formulation and use depend on the public-health program and circulating poliovirus strains; it has played an important role in polio control.

Orphan Drug

A pharmaceutical agent developed specifically to treat a rare medical condition (affecting fewer than 200,000 people in the United States, as defined by the Orphan Drug Act of 1983).

Over-The-Counter Drug

A medication that can be purchased without a prescription, deemed safe and effective for self-medication when used according to label instructions. OTC drugs have established safety profiles, low toxicity, and clear dosing guidelines suitable for consumer use.

Over-The-Counter (OTC) Drug

A medicine sold without a prescription for uses and doses described on its label. "Over the counter" does not mean risk-free; incorrect use, interactions, or excessive doses can still cause serious harm.

P2Y12 Inhibitor

An antiplatelet drug that blocks the platelet P2Y12 ADP receptor, reducing activation and aggregation. Clopidogrel, prasugrel, and ticagrelor are used in selected acute coronary syndrome and percutaneous coronary intervention settings, with bleeding and drug-specific contraindications considered.

Palifermin

A laboratory-made form of a natural growth factor that helps mouth and throat lining cells repair themselves. It is used in selected people receiving intensive treatment before blood-forming stem-cell transplantation to reduce severe mouth sores.

Palonosetron

A long-acting anti-nausea medicine that blocks serotonin signals involved in vomiting. It is used to prevent nausea and vomiting from chemotherapy or surgery; headache, constipation, and rare heart-rhythm changes can occur.

Parasympatholytic

A medicine that blocks some signals of the parasympathetic nervous system. It may widen the airways, relax the bladder, reduce motion sickness, or speed a slow heartbeat, but can cause dry mouth, blurred vision, constipation, urinary retention, or confusion.

Parasympathomimetic

A drug that mimics or enhances parasympathetic (cholinergic) activity. Direct agonists: muscarinic (pilocarpine—glaucoma, dry mouth) and nicotinic agonists.

Paroxetine

Paroxetine is a selective serotonin-reuptake inhibitor used for depression, anxiety disorders, obsessive-compulsive disorder, PTSD, and some other conditions; sexual dysfunction, withdrawal symptoms, serotonin syndrome, and pregnancy-related risks require consideration.

Pediatric Nuclear Medicine

Special considerations for children: lower doses, sedation often needed, distraction techniques. Dose reduction: weight-based activity, optimized protocols.

Pefloxacin

A fluoroquinolone antibiotic that blocks bacterial enzymes needed to copy and repair DNA. Its use is limited by resistance and potentially serious effects involving tendons, nerves, the heart, and the nervous system.

PEG

An abbreviation that may refer to polyethylene glycol, a laxative that draws water into stool, or to a polyethylene-glycol chemical group used to modify medicines. The exact meaning depends on the clinical context.

Pegaspargase

A long-acting enzyme medicine used in combination treatment for some acute lymphoblastic leukemias. It lowers asparagine needed by leukemia cells; allergic reactions, pancreatitis, liver injury, clotting problems, and bleeding are important risks.

Pegfilgrastim

A long-acting growth factor that stimulates the bone marrow to make neutrophils. It helps prevent infection caused by chemotherapy-related low white-cell counts; bone pain and rare spleen rupture or serious inflammation can occur.

Penicillamine

A medicine that binds certain metals and can also reduce immune activity. It is used selectively for copper overload and some autoimmune or connective-tissue disorders; serious blood, kidney, skin, or allergic reactions can occur.

Pentavalent Vaccine

A WHO-prequalified five-in-one combination vaccine containing Diphtheria toxoid, Tetanus toxoid, whole-cell Pertussis antigen, Hepatitis B (HBsAg), and Haemophilus influenzae type b (Hib) conjugate, administered as a single intramuscular injection.

Pentobarbital

A barbiturate medicine that depresses brain activity and can cause sedation or control seizures. It has a high risk of slowed breathing, coma, dependence, and fatal overdose, especially with alcohol or other sedatives.

Perioperative Antibiotic Prophylaxis

Administration of an appropriate antimicrobial within a defined interval before incision to reduce infection risk for selected procedures. Choice, timing, redosing, and discontinuation depend on procedure, organisms, patient factors, and local guidance.

Pertussis Vaccine

A vaccine containing selected antigens from Bordetella pertussis, given in combination vaccines to prevent whooping cough and reduce severe disease and transmission.

Pharmaceutical

Relating to medicines, including their development, preparation, manufacture, testing, storage, or use.

Pharmacodynamic Interaction

A drug interaction in which one drug changes the effect of another at its site of action without necessarily changing its concentration. Effects may be additive, synergistic, or antagonistic, such as combined respiratory depression or bleeding risk.

Pharmacokinetic Interaction

A drug interaction that changes absorption, distribution, metabolism, or excretion of another drug, thereby altering its concentration over time. Enzyme inhibition, enzyme induction, transporter effects, and altered gastric pH are common mechanisms.

Phosphodiesterase Inhibitor

A medicine that blocks enzymes which normally break down chemical signals inside cells. Different types relax airways or blood vessels, improve heart pumping, or treat erectile dysfunction; effects and risks depend on the specific type.

Pneumococcal Conjugate Vaccine

A vaccine that joins parts of the pneumococcus bacterium to a carrier protein so the immune system can build lasting protection. It helps prevent pneumonia, meningitis, bloodstream infection, and other disease; product and schedule depend on age and risk.

Pneumococcal Vaccine

A vaccine that protects against selected serotypes of *Streptococcus pneumoniae* (pneumococcus), which can cause pneumonia, meningitis, bloodstream infection, sinusitis, and otitis media. Available products include pneumococcal conjugate vaccines and pneumococcal polysaccharide vaccine; the product and schedule depend on age, previous doses, and medical risk.

Poliovirus Vaccine

A vaccine that trains the immune system to prevent poliovirus infection and paralysis. Inactivated injectable and live oral forms are used in different programs; the schedule and product depend on age, health, and local public-health guidance.

Prazosin

An alpha-1 blocker that relaxes blood vessels and may relax the bladder outlet. It is used for high blood pressure and, in selected patients, trauma-related nightmares or urinary symptoms; dizziness and fainting are most likely after starting or increasing the dose.

Pre-Medication

Medicine given before a procedure, treatment, or exposure to prevent a predictable problem such as pain, nausea, allergy, infection, or anxiety.

Prescription Drug

A medication whose dispensing or use is subject to prescription requirements under the applicable law. It requires professional oversight because of its risks, complexity, or need for monitoring; regulatory approval and prescribing rules vary by country and product.

Procalcitonin-Guided Antibiotic Therapy

Use of blood procalcitonin measurements, together with examination and other tests, to help decide whether to start or stop antibiotics in selected infections. The result cannot by itself confirm bacterial infection or safely replace clinical judgment.

Prostaglandin Antagonist

A drug that blocks a prostaglandin receptor or pathway, reducing selected prostaglandin-mediated effects such as inflammation, pain, uterine contraction, or gastric secretion.

Protease Inhibitor

An antiviral medicine that blocks a virus enzyme needed to cut newly made proteins into working parts. In HIV treatment, it prevents formation of mature infectious virus and is used with other medicines.

Proton Pump Inhibitor

See *Proton Pump Inhibitors*.

Psychotropic Drug

A medicine that affects brain function and may change mood, thinking, behavior, sleep, or perception. The term includes antidepressants, antipsychotics, mood stabilizers, stimulants, and some medicines for anxiety or sleep.

Psychotropic Medication

A medicine that changes brain activity and may affect mood, thoughts, behaviour, sleep, or perception. Examples include antidepressants, antipsychotics, mood stabilizers, and some medicines for anxiety or attention disorders.

Rabies Vaccine

A vaccine containing inactivated rabies virus used for preexposure protection or postexposure prophylaxis after a possible rabies exposure, together with wound care and immune globulin when indicated.

Rehabilitation Medicine

The medical specialty that helps people restore or adapt movement, communication, thinking, work, and daily activities after illness or injury. It is also called physiatry.

Alternate Names:
physiatry.

Renal Drug Excretion

Removal of medicines from the body by the kidneys into urine. Kidney disease can slow this process, allowing some medicines to build up and requiring dose changes or closer monitoring.

Renin Inhibitor

A blood-pressure medicine that blocks renin, an enzyme involved in narrowing blood vessels and retaining salt. It lowers blood pressure but can raise potassium, affect kidney function, and harm a developing fetus.

Resistance Antibiotic (Antibiotic Resistance)

Alternate index label for Antibiotic Resistance.

Rock (Drug)

A street term commonly used for crack cocaine, a smokeable form of cocaine. It produces intense, short-lived stimulation but can cause dependence, dangerous heart rhythms, heart attack, stroke, seizures, overheating, or severe agitation.

Scabicide

A medicine applied to the skin or taken by mouth to kill scabies mites. Treatment usually includes all close household or sexual contacts and washing or isolating recently used clothing and bedding to prevent reinfection.

Selective Serotonin Reuptake Inhibitor

A medicine that increases serotonin signalling between nerve cells by slowing serotonin reuptake. It treats depression and several anxiety-related disorders; nausea, sexual difficulties, withdrawal symptoms, and rarely serotonin toxicity can occur.

SGLT2 Inhibitor

A medicine that makes the kidneys pass more glucose and salt into the urine. It lowers blood sugar and can protect the heart and kidneys in selected people, but may cause dehydration, genital infections, or rarely ketoacidosis.

Skeletal Muscle Relaxant

A medicine that reduces excessive contraction of skeletal muscles. It may relieve short-term muscle spasm or longer-term spasticity, but sleepiness, weakness, dizziness, and impaired breathing can occur with some drugs.

Sleep Drug

A medicine used to help a person fall asleep, stay asleep, or maintain a regular sleep pattern. Benefits and risks vary widely; drowsiness, falls, impaired thinking, dependence, and interactions with alcohol or sedatives are important concerns.

Steroid

A group of chemicals with a characteristic structure. In medicine, steroids include corticosteroids that reduce inflammation and natural or replacement hormones such as cortisol, estrogen, progesterone, and testosterone.

Steroid Abuse

Steroid misuse is non-prescribed or excessive use of corticosteroids or anabolic-androgenic steroids, which can cause endocrine suppression, psychiatric effects, infection, metabolic disease, liver injury, cardiovascular harm, or tissue damage.

Steroid Hormones

Lipid-soluble hormones derived from cholesterol, including cortisol, aldosterone, estrogen, progesterone, and testosterone.

Steroid Injections - Tendon, Bursa, Joint

Injection of a corticosteroid, often with local anesthetic, into or around a joint, bursa, or tendon sheath to reduce inflammation and pain; injections directly into tendons are generally avoided because of rupture risk.

Tamsulosin

Tamsulosin is a selective alpha-1A blocker that relaxes prostate and bladder-neck smooth muscle to improve urinary symptoms of benign prostatic hyperplasia; dizziness, postural hypotension, and ejaculatory dysfunction may occur.

TCAs

Tricyclic antidepressants are medicines that increase the effects of certain brain chemicals. They can treat depression, nerve pain, and some other conditions but may cause sleepiness, dry mouth, constipation, low blood pressure, abnormal heart rhythms, or overdose toxicity.

Tdap Vaccine

Tetanus, Diphtheria, and acellular Pertussis booster given at 11-12 years and during each pregnancy (27-36 weeks gestation). Replaces one dose of Td. Important for pertussis protection, particularly for protecting newborns through maternal antibody transfer. Also given to adolescents and adults to maintain tetanus and diphtheria immunity.

Terazosin

An alpha-blocking medicine that relaxes the prostate and blood vessels. It can improve urine flow in prostate enlargement and lower blood pressure, but dizziness or fainting may occur, especially after the first dose or dose increases.

Therapeutic Drug Levels

The range of medicine concentrations in blood associated with benefit while limiting toxicity for a particular drug. A measured level must be interpreted with the dose, timing, symptoms, kidney or liver function, and the person's response.

Thrombolytic

A medicine that helps dissolve a blood clot by changing plasminogen into plasmin, which breaks down fibrin. It may be used urgently for selected strokes, heart attacks, or other life-threatening clots when benefits outweigh bleeding risk.

Thrombolytic Drugs For Heart Attack

Medicines that dissolve a clot blocking a coronary artery during selected heart attacks. They can restore blood flow when urgent artery-opening procedures are unavailable or delayed, but may cause dangerous bleeding and are not suitable for everyone.

Transfusion Medicine

The medical specialty that selects, prepares, tests, and gives blood or blood components such as red cells, platelets, plasma, and cryoprecipitate. It includes matching, preventing transfusion reactions, and monitoring patients.

Travel Medicine

Medical care concerned with prevention and treatment of health problems related to travel.

Tricyclic Antidepressant Overdose

Poisoning with a tricyclic antidepressant can cause drowsiness, confusion, dry mouth, seizures, low blood pressure, and dangerous heart rhythms. It is an emergency requiring immediate poison-control or hospital treatment.

Tumor Necrosis Factor Inhibitor

A biological medicine that blocks tumor-necrosis factor, an immune signal involved in inflammation. It treats selected arthritis, psoriasis, and bowel diseases but can increase serious infection risk, so screening and monitoring are important.

Tyrosine Kinase Inhibitor

A targeted medicine that blocks enzymes carrying growth signals inside cells. It can slow cancers driven by abnormal signaling, but side effects vary and may include diarrhea, skin changes, liver injury, high blood pressure, or heart problems.

Uricosuric Agent

A medicine that increases renal excretion of uric acid, lowering serum urate in selected patients with gout. Adequate kidney function and hydration are important, and urinary uric-acid stones may be a concern.

Urine Drug Screen

A preliminary urine test that looks for selected medicines or recreational drugs and their breakdown products. Results can be falsely positive or negative and may need confirmation with a more specific laboratory test.

Uterotonic

A medicine that makes the uterus contract. It is used under medical supervision to start or strengthen labor, prevent or treat heavy bleeding after birth, or complete selected pregnancy-related procedures; excessive contraction can harm the mother or fetus.

Vaccine Adjuvant

A substance added to some vaccines to enhance and prolong the immune response to the antigen. Examples include aluminum salts and newer adjuvant systems.

Vaccine Therapy

Treatment that uses a vaccine to stimulate an immune response against a disease. It may prevent infection or, in selected cancer treatments, help the immune system recognize abnormal cells; its benefits depend on the specific vaccine and condition.

Varicella Vaccine

A live attenuated vaccine that prevents or reduces the severity of chickenpox. The number and timing of doses depend on age, vaccination history, immune status, pregnancy, and local recommendations. It is generally avoided during pregnancy and in people with certain immune deficiencies.

Xanthine Oxidase Inhibitor

A medicine that lowers uric-acid production by blocking an enzyme involved in breaking down substances from cells and food. It is used mainly to prevent gout attacks and, in selected cases, complications from rapid cancer-cell breakdown.

Brand Medicines

Medical Prefix

Prefix	Meaning	Example of use in medical terms
Ab-	A medical prefix meaning away from, off, or separating from,	abduction (movement away from the midline) and ablation (removal or destruction of tissue)
Acou-	A medical combining form referring to hearing or sound,	acoustic nerve, audiology, and acoumeter
Acro-	Acro- is a medical word element meaning extremity, tip, or highest part,	acromegaly and acrocyanosis
Acu-	A combining form meaning sharp, pointed, or related to acuity; in medical terms it may refer to sharp sensation or vision,	acuity, acute, or acupuncture, depending on the word formed
Ad-	A medical prefix meaning toward, to, or near,	adduction (movement toward the midline) and adrenal (near the kidney)
Aden-	A combining form meaning gland or glandular tissue,	adenitis and adenoma
Adeno-	A combining form referring to a gland or glandular tissue,	adenovirus, adenoid, and adenocarcinoma
Aer-, Aero-	A combining form meaning air or gas,	aerobic, aerosol, and aerophagia
Alb-	A prefix derived from the Latin albus, meaning white,	albino and albinism
Amyl-	A combining form referring to starch or a starch-like substance,	amylase and amyloid
Amylo-	A combining form referring to starch-like material or amyloid protein deposits	amyloidosis and amyloidoma
An-	A prefix meaning without, lacking, or not,	anoxia, anesthesia, and anencephaly
Aniso-	A combining form meaning unequal or unequal in size, number, or degree	anisocytosis and anisometropia
Antero-	A combining form meaning anterior or toward the front	anteroposterior and anterolateral
Anti-	A prefix meaning against, opposed to, or preventing a specified process or condition	antibiotic and anticoagulant
Arthro-	A combining form meaning joint	arthritis and arthroscopy
Bi-	A prefix meaning two, twice, or involving two sides or components	bilateral and bicuspid

Prefix	Meaning	Example of use in medical terms
Bio-	A combining form meaning life or living organisms	biochemistry and biopsy
Brachy-	A combining form meaning short or abnormally short	brachycephaly and brachydactyly
Cephal-	A combining form meaning head	cephalic and cephalalgia
Cholangi-	A combining form meaning bile duct or bile vessel	cholangitis and cholangiography
Circum-	A combining form meaning around or surrounding	circumcision and circumoral
Colpo-	A combining form meaning vagina	colposcopy and colpotomy
Cranio-	A combining form meaning skull or cranium	craniotomy and craniosynostosis
Cyto-	A combining form meaning cell	cytology and cytotoxic
Dacryo-	A combining form meaning tear or tear duct	dacryocystitis and dacryostenosis
Dactyl-, -Dactyl	A combining form or suffix meaning finger or toe	polydactyly and brachydactyly
Dextro-	A combining form meaning right, toward the right, or sometimes clockwise	dextrocardia and dextroposition
Di-	A combining form meaning two, twice, or double	diplopia and diplegia
Dia-	A combining form with meanings including through, across, apart, or complete, depending on the word	dialysis and diagnosis
Disto-	A combining form meaning distal, distant, or away from a point of attachment or origin	distal and distobuccal
Dys-	A prefix meaning abnormal, difficult, painful, or impaired,	dysphagia (difficulty swallowing) and dysuria (painful urination)
Entero-	A combining form meaning intestine or bowel,	enteropathy and enteroscopy
Epi-	A prefix meaning on, upon, over, or above,	epidermis and epigastric
Extra-	A clinical condition or finding involving extra-. Its defining features, causes, evaluation, and management depend on the clinical context	extraocular and extracellular
Gyne-	A combining form meaning woman or female,	gynecology
Haem- / Haema- / Haemato- / Haemo- (Prefixes Relating To Blood)	Prefixes derived from the Greek word haima (blood), used in medical terminology to denote blood-related conditions and procedures	hematology, hematoma, and hemoglobin
Hemi-	A prefix meaning half or one side,	hemiplegia and hemithorax
Hepat-	A combining form meaning liver,	hepatic and hepatocellular
Hepato-	A combining form meaning liver,	hepatobiliary and hepatomegaly
Hetero-	A prefix meaning different, other, or unequal,	heterozygous and heterogeneous
Histo-	A combining form meaning tissue,	histology and histopathology
Homo-	A prefix meaning same or alike,	homozygous and homologous
Hyper-	A prefix meaning excessive, above normal, or increased,	hyperglycemia and hypertension
Hypo-	A prefix meaning below, deficient, reduced, or less than normal,	hypoglycemia and hypothermia

Prefix	Meaning	Example of use in medical terms
Iatr-	A combining form meaning medical treatment or physician,	iatrogenic and iatrology
Infra-	A medical term referring to infra-. Its precise meaning and clinical importance depend on the context in which it is used	infrapatellar and infraorbital
Intra-	Intra- is an anatomical structure, tissue relationship, physiologic process, or body function; its location and mechanism explain its clinical significance	intraocular and intravenous
Iso-	A prefix meaning equal, same, or uniform,	isotonic and isometric
Juxta-	A prefix meaning next to, beside, or adjoining,	juxtaglomerular
Kerato-	A combining form relating to the cornea or to horny or keratinized tissue,	keratitis and keratosis
Leuk-	A combining form meaning white, especially in terms relating to white blood cells,	leukocyte
Leuko-	A combining form meaning white,	leukoderma or leukopenia
Levo-	A prefix meaning left or turning toward the left, often used in chemistry or to describe spatial orientation	levocardia and levodopa
Lieno-	A combining form meaning relating to the spleen	lienorenal and lienectomy
Lipo-	A combining form meaning relating to fat or lipids	lipoma and lipoprotein
Litho-	A combining form meaning stone,	lithotripsy and nephrolithiasis
Macro- (Prefix)	A prefix meaning large, abnormally large, or on a large scale,	macrocytic, meaning involving abnormally large cells
Medical Prefix	A prefix used in medical terminology to modify a word's meaning	hyper- (above or excessive), hypo- (below or deficient), macro- (large), and micro- (small)
Mega-	A combining form meaning large, great, or abnormally enlarged	megacolon and megakaryocyte
Mega- (Prefix)	A prefix derived from Greek meaning large, great, or abnormally enlarged,	megacolon, megacardia, and megalocephaly
Melan- (Prefix)	A combining form meaning dark or black, derived from the Greek melas; it refers especially to melanin or dark pigmentation,	melanoma and melanocyte
Mes-	A combining form meaning middle	mesencephalon and mesoderm
Meso-	A combining form meaning middle	mesothelioma and mesocolon
Mi-	A combining form meaning small or relating to muscle, depending on the word in which it appears	micturition and miosis
Micro-	A combining form meaning small or millionth, depending on context	microscopy and microcephaly
Myc-	A combining form meaning fungus or pertaining to fungi, derived from the Greek mykes	mycosis and mycology
Myco-	The term Myco- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	mycosis and mycology
Myel-	A combining form relating to bone marrow or the spinal cord, depending on the word	myelitis and myelopathy

Prefix	Meaning	Example of use in medical terms
Myo- (Prefix)	A medical term referring to myo- (prefix). Its clinical meaning depends on the context in which it is used	myopathy and myocarditis
Naso-	The term Naso- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	nasogastric and nasopharyngeal
Neo- (Prefix)	Neo- is a prefix meaning new or recently formed	neoplasm and neonatal
Nephro-	The term Nephro- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	nephritis and nephrectomy
Oligo-	A combining form meaning few, scanty, or deficient	oliguria and oligospermia
Oligo- (Prefix)	Oligo- is a prefix meaning few, scanty, or small in number or amount	oliguria and oligospermia
Onco-	A combining form relating to tumors or cancer	oncology and oncogenesis
Onycho-	A combining form relating to the nail	onychomycosis and onycholysis
Onycho- (Prefix)	Onycho- is a prefix meaning relating to a nail or claw	onychomycosis and onycholysis
Ortho- (Prefix)	Ortho- is a prefix meaning straight, correct, upright, or related to orthopedic care depending on the term	orthopedics and orthostatic
Osteo- (Prefix)	Osteo- is a prefix meaning relating to bone	osteomyelitis and osteoporosis
Ot-	The term Ot- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	otitis and otalgia
Oto-	The term Oto- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	otology and otoscope
Oxy	Oxy- is a prefix relating to oxygen, sharpness, or acidity depending on the medical or chemical term	oxygen and oxyhemoglobin
Pachy- (Prefix)	A word-forming prefix meaning thick or thickness,	pachyonychia, pachyderma, and pachycephaly
Para	Para- is a prefix meaning beside, beyond, abnormal, or related to childbirth depending on the word; its exact meaning must be read in context	parathyroid and paranasal
Para-	A combining form meaning beside, beyond, abnormal, or closely related, depending on the word	paracentesis and paraesthesia
Para- (Prefix)	Para- is a medical prefix whose meaning varies by use, including beside, beyond, abnormal, or the number of births reaching a specified gestational age	parathyroid and parity in obstetric history
Patho-	The term Patho- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	pathology and pathogenesis
Peri-	The term Peri- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	pericardium and periosteum
Phago-	The term Phago- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	phagocytosis and phagocyte
Phlebo- (Prefix)	Phlebo- is a medical prefix meaning relating to a vein,	phlebitis, phlebectomy, or phlebography

Prefix	Meaning	Example of use in medical terms
Pneumo-	The term Pneumo- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	pneumothorax and pneumonia
Poly-	A combining form meaning many or much	polyuria and polyneuropathy
Post	Post- is a prefix meaning after,	post-operative, postpartum, or postprandial
Post-	A combining form meaning after or behind	postnatal and postprandial
Pre-	A combining form meaning before or in front of	prenatal and preoperative
Prefix	A prefix is a word element placed before a root to modify meaning; medical prefixes commonly indicate location, number, time, direction, or abnormality	hyper-, hypo-, peri-, and brady-
Prefixes, Medical	Word beginnings that modify medical terms by indicating location, number, time, speed, size, direction, deficiency, excess, or other meaning,	hyper-, hypo-, peri-, and brady-
Pro-	A combining form meaning before, forward, or in favor of	prolactin and prognosis
Pseudo-	A combining form meaning false or resembling but not truly	pseudocyst and pseudarthrosis
Retro-	A combining form meaning backward, behind, or posterior	retroperitoneal and retrosternal
Salpingo-	A combining form relating to a fallopian tube	salpingitis and salpingectomy
Sarco-	A combining form meaning flesh or soft tissue	sarcoma and sarcoidosis
Schizo-	A combining form relating to splitting or schizophrenia	schizophrenia and schizoid
Scler-	The term Scler- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	sclerosis and scleritis
Sclero-	The term Sclero- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	scleroderma and sclerotherapy
Sub-	A combining form meaning under, below, or less than normal	subcutaneous and subdural
Super-	A combining form meaning above, excessive, or superior	superinfection and supernumerary
Supra-	A combining form meaning above or beyond	suprarenal and suprapubic
Syn-	A combining form meaning together, with, or joined	syndactyly and synovitis
Teno-	A combining form relating to a tendon	tenosynovitis and tenodesis
Thermo-	A combining form relating to heat or temperature	thermoregulation and thermotherapy
Toc- (Prefix)	Toc- is a prefix used in some medical terms and often relates to childbirth or labor,	tocolysis; the complete word determines its meaning
Toco-	The term Toco- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	tocography and tocolysis
Toko- (Prefix)	Toko- is a prefix relating to childbirth or labor, derived from Greek terms for birth	tocolysis and tokodynamometry
Tom-	The term Tom- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	tomography and tomodensitometry

Prefix	Meaning	Example of use in medical terms
Tomo-	The term Tomo- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	tomography and tomographic
Trans- (Prefix)	The term Trans- (prefix) is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	transdermal and transcatheter
Trich- (Prefix)	The term Trich- (prefix) is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	trichiasis and trichology
Tricho-	A combining form relating to hair	trichoscopy and trichotillomania
Tricho- (Prefix)	The term Tricho- (prefix) is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	trichorrhexis and trichomycosis
Tympano-	The term Tympano- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	tympanoplasty and tympanometry
Xanth- (Prefix)	Xanth- is a medical word element meaning yellow or yellowish,	xanthoma, xanthelasma, and xanthopsia
Xen- (Prefix)	A medical word element meaning foreign, strange, or originating outside the usual organism or system,	xenograft (a tissue transplanted between different species)
Xeno- (Prefix)	Xeno- is a medical word element meaning foreign, strange, or from another species,	xenograft and xenotransplantation
Xero-	Xero- is a medical word element meaning dry or dryness,	xeroderma, xerophthalmia, and xerostomia

Complete reference tables

These categorized tables reproduce the prefix reference structure from the Pressbooks resource cited below. Examples are retained as learning aids; the meaning of a word part can vary by term.

Prefix	Meaning	Example of use in medical terms
Common prefixes		
A-, An-	Without; lacking	Anemia
Andr/o-	Male	Androgen
Anti-	Against	Anticholinergic drugs
Auto-	Self	Autocrine
Bio-	Life	Biology
Chem/o-	Chemistry	Chemotherapy
Contra-	Against	Contraception
Cyt/o-	Cell	Cytokine
Dis-	Separation; taking apart	Dissection
Dys-	Difficult; abnormal	Dyspnea
Eu-	Good; well	Eupnea
Fibr/o-	Fiber	Fibrosis
Gluco-, Glyco-	Glucose; sugar	Glycogen

Prefix	Meaning	Example of use in medical terms
Gyn/o-, Gynec-	Female	Gynecology
Hydr/o-	Water	Hydrocephalus
Idio-	Self; one's own	Idiopathic
Lyso-, Lys-	Break down; destruction; dissolving	Lysosome
Mal-	Bad; abnormal	Malignant
Myc/o-	Fungus	Mycetoma
Necr/o-	Death	Necrosis
Neo-	New	Neonate
Oxy-	Sharp; acute; oxygen	Oxytocin
Pan-, Pant/o-	All or everywhere	Pancytopenia
Pharmaco-	Drug; medicine	Pharmacist
Re-	Again; backward	Rejuvenation
Somat/o-, Somatico-	Body; bodily	Somatic cell
Body-part prefixes		
Acous/o-	Hearing	Acoustic meatus
Aden/o-	Gland	Adenoid
Adip/o-	Fat	Adipocyte
Adren/o-	Gland	Adrenal cortex
Angi/o-	Blood vessel	Angioplasty
Arteri/o-	Artery	Arteriole
Arthr/o-	Joint	Arthroplasty
Bucc/o-	Cheek	Buccal cavity
Bronch/i-	Bronchus	Bronchioles
Burs/o-	Bursa	Bursa
Carcin/o-	Cancer	Basal cell carcinoma
Cardi/o-	Heart	Cardiology
Cephal/o-	Head	Cephalic flexure
Chol-	Bile	Cholesterol
Chondri-	Cartilage	Chondrosarcoma
Coron-	Heart	Coronary arteries
Cost-	Rib	Costal cartilage
Crani/o-	Brain	Cranium
Cutane-	Skin	Cutaneous
Cyst/o-, Cysti-	Bladder or sac	Cystoscopy
Derm-, Dermat/o-	Skin	Dermatologist
Duoden/o-	Duodenum	Duodenitis
Gastr-	Stomach	Gastrectomy
Gloss-	Tongue	Glossectomy
Hem-, Hema-, Hemat-, Hemo-, Hemat/o-	Blood	Hematopoiesis
Hepat/o-, Hepatico-	Liver	Hepatic portal system
Hist/o-, Histio-	Tissue	Histology
Hyster/o-	Uterus	Hysterectomy
Ileo-	Ileum	Ileostomy
Ischi/o-	Ischium	Ischial tuberosity
Kerat/o-	Cornea (eye or skin)	Keratin
Lacrim/o-	Tear	Lacrimal fluid
Lact/o-, Lacti-	Milk	Lactose
Laryng/o-	Larynx	Laryngitis
Lingu/o-	Tongue	Lingual tonsil

Prefix	Meaning	Example of use in medical terms
Lip/o-	Fat	Lipolysis
Lymph/o-	Lymph	Lymphocyte
Mamm-, Mast/o-	Breast	Mammary glands
Mening/o-	Meninges	Meningitis
Muscul/o-	Muscle	Musculoskeletal
My/o-	Muscle	Myocardium
Myel/o-	Spinal cord or bone marrow	Myelin
Nephr/o-	Kidney	Nephron
Neur/i-, Neur/o-	Nerve	Neuron
Oculo-	Eye	Oculomotor nerve
Onco-	Tumor; bulk; volume	Oncogene
Onych/o-	Fingernail; toenail	Onychodystrophy
Oo-	Egg; ovary	Oocyte
Oophor/o-	Ovary	Oophorectomy
Op-, Opt-	Vision	Optic nerve
Ophthalm/o-	Eye	Ophthalmic artery
Orchid/o-, Orchio-	Testis	Orchidectomy
Orth/o-	Straight; normal; correct	Orthostatic
Osseo-	Bony	Osseous tissue
Ossi-	Bone	Ossicles
Ost-, Oste/o-	Bone	Osteoporosis
Ot/o-	Ear	Otolaryngologist
Ovar/i-, Ovario-, Ovi-, Ovo-	Ovary	Ovarian follicle
Phalang-	Phalanx	Phalanges
Pharyng/o-	Pharynx; throat	Pharyngeal tonsil
Phleb/o-	Vein	Phlebotomist
Phren/i-, Phreno-, Phrenico-	Diaphragm	Phrenic nerve
Pleur-, Pleur/a-, Pleur/o-	Rib; pleura	Pleural cavity
Pneum/a-, Pneumat/o-	Air; lung	Pneumonia
Proct/o-	Anus; rectum	Proctoscopy
Prostat-	Prostate	Prostatectomy
Pseudo-	False	Pseudostratified
Psych/o-, Psyche-	Mind	Psychiatrist
Radio-	Radiation; radius	Radioisotopes
Ren/o-	Kidney	Renal cortex
Retin-	Retina	Retinitis pigmentosa
Rhin/o-	Nose	Rhinoscope
Salping/o-	Tube	Salpingo-oophorectomy
Sarco-	Muscular; flesh-like	Sarcomere
Schiz/o-	Split; cleft	Schizophrenia
Sclera-, Sclero-	Hardness	Sclerosis
Sigmoid/o-	Sigmoid colon	Sigmoidoscopy
Sperma-, Spermo-, Spermato-	Sperm	Spermatocyte
Splen/o-	Spleen	Splenomegaly
Sten/o-	Narrowed; blocked	Stenosis
Stern-	Sternum	Sternoclavicular joint

Prefix	Meaning	Example of use in medical terms
Stom/a-, Stomat/o-	Mouth	Stomatitis
Thorac/o-, Thoracico-	Chest	Thoracic cavity
Thromb/o-	Blood clot	Thrombolytic
Thyr/o-	Thyroid gland	Thyroiditis
Trache/o-	Trachea	Trachealis
Tympan/o-	Eardrum	Tympanic membrane
Ur/o-	Urine	Urologist
Vagin-	Vagina	Vaginal
Varic/o-	Duct; blood vessel	Varicose veins
Vasculo-	Blood vessel	Vasculitis
Ven/o-	Vein	Venae cavae
Vertbr-	Vertebra; spine	Vertebral column
Color prefixes		
Chlor/o-	Green	Chlorophyll
Chrom-, Chromato-	Color	Chromosome
Cyano-	Blue	Cyanosis
Erythr/o-	Red	Erythrocyte
Leuk/o-	White	Leukocyte
Melan/o-	Black	Melanin
Physical property and shape prefixes		
Cry/o-	Cold	Cryotherapy
Elect-	Electrical activity	Electrocardiogram
Kin/o-, Kine-, Kinesi/o-	Movement	Kinetic energy
Kyphy/o-	Humped	Kyphosis
Rhabd/o-	Rod-shaped; striated	Rhabdomyosarcoma
Phot/o-	Light	Photoreceptor
Reticul/o-	Net	Reticulocytes
Scoli/o-	Twisted	Scoliosis
Therm/o-	Heat	Thermotherapy
Direction and position prefixes		
Ab-, Abs-	Away from	Abductor
Ad-	Towards	Adductor
Ante-	Before; forward	Antenatal
Circum-	Around	Circumcision
Cycl-	Circle; cycle	Cyclic neutropenia
De-	Away from; ending	Dehydration
Dia-	Across; through	Diagnosis
Ect/o-, Exo-	Outer; outside	Exocrine gland
End/o-, Ent-, Enter/o-	Within; inner	Endocrine gland
Epi-	Upon; outside of	Epidermis
Ex-, Extra-	Beyond	Expiration
Infra-	Beneath; below	Infratemporal fossa
Inter-	Between	Interstitial fluid
Intra-	Within	Intracellular fluid
Meso-	Middle	Mesoderm
Meta-	Beyond; change	Metabolism
Para-	Alongside; abnormal	Parathyroid glands

Prefix	Meaning	Example of use in medical terms
Path/o-	Disease	Pathologist
Peri-	Around	Pericardium
Post-	Behind; after	Postpartum
Pre-	Before; in front	Precancerous
Retro-	Backward; behind	Retroperitoneum
Sub-	Under	Subcutaneous layer
Super-	Above	Superior
Supra-	Above; upon	Supraglottis
Sy-, Syl-, Sym-, Syn-, Sys-	Together	Syndrome
Trans-	Across; through	Transdermal
Quantity prefixes		
Bi-	Two	Biceps
Brady-	Slow	Bradycardia
Diplo-	Double	Diploid
Hemi-	Half	Hemihypertrophy
Hetero-	Other; different	Heterogeneous
Homo-	Same	Homozygous genotype
Hyper-	Above; beyond; excessive	Hypertension
Hypo-	Under; deficient	Hypotension
Iso-	Equal; like	Isointense
Macro-	Large; long; big	Macrophage
Mic-, Micro-	Small	Microglia
Mon-, Mono-	One	Monocyte
Olig/o-	Few; little	Oliguria
Poly-	Many; excessive	Polyuria
Quadri-	Four	Quadriceps
Semi-	Half	Semilunar valves
Tachy-	Fast	Tachycardia
Tetra-	Four	Tetralogy of Fallot
Tri-	Three	Triceps
Uni-	One	Unicellular

Medical Suffixes

Suffix	Meaning	Example of use in medical terms
-Stomy	A suffix meaning surgical creation of an opening,	colostomy or gastrostomy
-Tomy	A suffix meaning incision or cutting into	laparotomy or tracheotomy
Cidal	A suffix meaning killing or destroying,	bactericidal or fungicidal
Cide	A suffix meaning an agent or process that kills,	pesticide, bactericide, or homicide
Cyte	A suffix meaning cell,	erythrocyte or leukocyte
Cytosis	A suffix or term indicating a condition involving cells or, in some contexts, an increase in the number of a particular type of cell	leukocytosis or erythrocytosis
Dactyl-, -Dactyl	A combining form or suffix meaning finger or toe	polydactyly or brachydactyly
Ectomy	A suffix meaning surgical removal or excision,	appendectomy or mastectomy
Emia	A suffix meaning a condition of the blood or a substance present in the blood,	anemia or bacteremia
Iatrics	A suffix or word element referring to medical treatment or a medical specialty,	geriatrics and pediatrics
Iatry	A suffix meaning medical treatment or a medical specialty,	psychiatry and podiatry
Itis	A suffix meaning inflammation,	dermatitis, bronchitis, and arthritis
Kalemia	A suffix or term referring to the concentration of potassium in the blood,	hypokalemia or hyperkalemia
MAB	Abbreviation for monoclonal antibody; the suffix -mab in a generic drug name indicates a monoclonal antibody,	adalimumab or rituximab
Oma	-oma is a suffix commonly indicating a tumor or mass, although some words ending in -oma describe non-neoplastic conditions	lipoma or carcinoma
Pathy	A suffix meaning disease, disorder, or abnormality,	neuropathy, cardiomyopathy, and nephropathy
Plegia	-plegia is a suffix meaning paralysis,	paraplegia, hemiplegia, or quadriplegia

Complete reference tables

Suffix	Meaning	Example of use in medical terms
Common suffixes		
-ac	Pertaining to	Cardiac
-blast, -blasto, -blastic	Bud; germ	Myeloblast
-cyte, -cytic	Cell	Thrombocyte
-dynia	Pain; swelling	Thoracodynia
-eal, -ial	Pertaining to	Esophageal
-ectasis	Expansion; dilation	Atelectasis
-emia	Blood condition	Anemia
-ia	Condition	Hemophilia
-iasis	Condition; formation of	Psoriasis
-ism	Condition	Hypothyroidism
-ites, -itis	Inflammation	Arthritis
-ity	Pertaining to	Immunity
-ium	Structure or tissue	Epithelium
-lysis, -lytic	Breakdown; destruction; dissolving	Osteolytic
-malacia	Softening	Osteomalacia
-megaly	Enlargement	Acromegaly
-oid	Resembling	Arachnoid trabeculae
-oma	Tumor	Angiosarcoma
-osis	Condition; usually abnormal	Endometriosis
-ous	Pertaining to	Aqueous
-pathy	Disease	Lymphadenopathy
-penia	Deficiency; lack of	Thrombocytopenia
-phagia, -phagy	Eating; swallowing	Dysphagia
-phasia	Speech	Aphasia
-plasia, -plastic	Growth	Hyperplasia
-plegia	Paralysis	Hemiplegia
-pnea	Breathing	Sleep apnea
-poiesis	Production	Hemopoiesis
-ptosis	Falling; drooping	Apoptosis
-rrhage, -rrhagic	Bleeding	Hemorrhage
-rrhea	Flow or discharge	Diarrhea
-sclerosis	Hardening	Arteriosclerosis
-sis	Condition	Agranulocytosis
-stasis	Level; unchanging	Homeostasis
-trophy	Growth	Hypertrophy
-uria	In the urine	Anuria
Procedure suffixes		
-centesis	Surgical puncture to remove fluid	Thoracentesis
-desis	Surgical binding	Pleurodesis
-ectomy	Cut out; removal	Mastectomy
-gram	Record; picture	Electrocardiogram
-graph	Instrument used to create a record or picture	Electrocardiograph
-graphy	To record or take a picture	Echocardiography
-meter	Device used for measuring	Sphygmomanometer
-opsy	Visual examination	Biopsy

Suffix	Meaning	Example of use in medical terms
-ostomy	Opening	Colostomy
-otomy	Incision	Laparotomy
-pexy	Surgical fixation	Oophoropexy
-plasty	Surgical reconstruction	Vertebroplasty
-scope	For examining	Endoscope
-scopy	Examine	Endoscopy

Alternate Names

Primary term	Alternate names
ACE	angiotensin-converting enzyme
ACE Inhibitor	angiotensin-converting enzyme inhibitor
Acquired Immunodeficiency Syndrome	AIDS
Adenosine Triphosphate	ATP
AIDS	acquired immunodeficiency syndrome
Alcoholism	alcohol dependence: A chronic
Alimentary Canal	gastrointestinal
AMD	age-related macular degeneration
Angiotensin-Converting Enzyme	ACE
Angiotensin-Converting Enzyme Inhibitor	ACE
Amyloid Precursor Protein	APP
ARB	angiotensin II receptor blockers
ATP	adenosine triphosphate
AV Node	atrioventricular node
Balloon Dilation	Balloon dilatation
BMD	bone mineral density
BMI	body-mass index
BPH	benign prostatic hyperplasia
CABG	coronary artery bypass graft
CBC	complete blood count
	mdash
CCU	coronary care unit
Cerebral Hemorrhage	hemorrhagic stroke
CFS	chronic fatigue syndrome
CK	creatine kinase
COX-2 Inhibitors	cyclooxygenase-2 inhibitors
CPAP	continuous positive airway pressure
CPR	cardiopulmonary resuscitation
CRP	C-reactive protein
DNA	deoxyribonucleic acid
DNR	do-not-resuscitate order
DRI	dietary reference intake
EBCT	electron-beam computed tomography
ECG	electrocardiogram
ED	erectile dysfunction

Primary term	Alternate names
EEG	electroencephalogram
EKG	electrocardiogram
EMG	electromyography
	mdash
FSH	follicle-stimulating hormone
GERD	gastroesophageal reflux disease
GFR	glomerular filtration rate
Gingiva	gums: a form of oral tissue that covers the roots of teeth and surrounding bone
GnRH	gonadotropin-releasing hormone
HbA1C	hemoglobin A1c
HDL	high-density lipoprotein
HEPA Filter	high-efficiency particulate air
HIV	human immunodeficiency virus
HLA	human leukocyte antigen
HPA	hypothalamic-pituitary-adrenal axis
Human Immunodeficiency Virus	HIV
IBD	inflammatory bowel disease
ICD	implantable cardioverter defibrillator
IgE	immunoglobulin E
IU	international unit
LDL	low-density lipoprotein
LH	luteinizing hormone
LVAD	left-ventricular assist device
MAOIs	monoamine oxidase inhibitors
METs	metabolic equivalents
MHC Molecule	major histocompatibility complex molecule
Mitral Valve Prolapse	Barlow's Syndrome; Barlow Syndrome (Mitral Valve Prolapse)
MRI	magnetic resonance imaging–a scan that creates detailed pictures of internal organs
MUSE	medicated urethral system for erection
NK	natural killer cells
NMDA Receptor	N-methyl-D-aspartame receptor
NO	nitric oxide
NSAID	nonsteroidal anti-inflammatory drug
PAD	peripheral artery disease
PCOS	polycystic ovary syndrome
PDE5 Inhibitors	phosphodiesterase type 5 inhibitors
PET Scan	positron emission tomography
PSA	prostate-specific antigen
PTCA	percutaneous transluminal coronary angioplasty
PTSD	post-traumatic stress disorder
RAST	radioallergosorbent test
RCT	randomized controlled trial
RDA	recommended dietary allowance
REM	rapid eye movement
RLS	restless legs syndrome
SAD	seasonal affective disorder
SERMs	selective estrogen receptor modulators
SSRIs	selective serotonin reuptake inhibitors

Primary term	Alternate names
Steroids	corticosteroids
	mdash
T Cell	T lymphocyte
TDD	telecommunications device for the deaf
	mdash
TENS	transcutaneous electrical nerve stimulation
	mdash
TIA	transient ischemic attack
tPA	tissue plasminogen activator
TSH	thyroid-stimulating hormone
VLDL	very-low-density lipoprotein
VSD	ventricular septal defect
	mdash
ABO Blood Group System	ABO Blood Group; ABO Blood Groups; ABO Blood Types; ABO System
Absolute Neutrophil Count	ANC
Aarskog-Scott syndrome	Aarskog Syndrome
Banti Syndrome	Banti disease; Banti's syndrome
Barber itch	Barber's itch
Glycated Hemoglobin (A1C)	A1C; A1C test; Hemoglobin A1C; HbA1C

British and US Medical Terms

This table lists common differences between United States and British medical terminology. Some terms are used in both countries, and local hospitals may use additional variations.

United States term	British term
Acetaminophen	Paracetamol
Anemia	Anaemia
Anesthesia	Anaesthesia
Anesthetic	Anaesthetic
Apnea	Apnoea
Behavior	Behaviour
Cesarean section	Caesarean section
Celiac disease	Coeliac disease
Color	Colour
Diarrhea	Diarrhoea
Edema	Oedema
Epinephrine	Adrenaline
Esophagus	Oesophagus
Fetal	Foetal
Fetus	Foetus
Gynecology	Gynaecology
Hemoglobin	Haemoglobin
Hemolysis	Haemolysis
Hemorrhage	Haemorrhage
Labor	Labour
Leukocyte	Leucocyte
Maneuver	Manoeuvre
Orthopedics	Orthopaedics
Pediatric	Paediatric
Pediatrician	Paediatrician
Practice (verb)	Practise (verb)
Sulfur	Sulphur
Tumor	Tumour

Common vocabulary differences

United States term	British term
Pap test or Pap smear	Cervical smear test

United States term	**British term**
Emergency department (ED)	Accident and emergency department (A&E)
Emergency room (ER)	Accident and emergency department (A&E)
Family physician	General practitioner (GP)
Operating room (OR)	Operating theatre
Primary care physician (PCP)	General practitioner (GP)
Skilled nursing facility	Nursing home
Urgent care center	Walk-in centre or minor injuries unit, depending on the service

Common Medical Abbreviations

Abbreviation	Full form
ABG	Arterial blood gas
ACE	Angiotensin-converting enzyme
ACE inhibitor	Angiotensin-converting enzyme inhibitor
ACL	Anterior cruciate ligament
ACS	Acute coronary syndrome
ADHD	Attention-deficit/hyperactivity disorder
ADL	Activity of daily living
AED	Automated external defibrillator
AFib	Atrial fibrillation
AIDS	Acquired immunodeficiency syndrome
AKI	Acute kidney injury
ALP	Alkaline phosphatase
ALT	Alanine aminotransferase
AMI	Acute myocardial infarction
ALS	Amyotrophic lateral sclerosis; advanced life support, depending on context
ANC	Absolute neutrophil count
ANA	Antinuclear antibody
ANP	Atrial natriuretic peptide
APGAR	Appearance, pulse, grimace, activity, and respiration
ARDS	Acute respiratory distress syndrome
AST	Aspartate aminotransferase
ATN	Acute tubular necrosis
AV	Atrioventricular
AVM	Arteriovenous malformation
AVN	Atrioventricular node
BID	Twice a day; prescription shorthand that should be avoided when possible
BP	Blood pressure
BMI	Body mass index
BMR	Basal metabolic rate
BPH	Benign prostatic hyperplasia
BRCA	Breast cancer susceptibility gene; commonly referring to the BRCA1 or BRCA2 gene
BUN	Blood urea nitrogen
CABG	Coronary artery bypass graft
CA	Cancer antigen or calcium, depending on context
CA-125	Cancer antigen 125

Abbreviation	Full form
CAD	Coronary artery disease
CAT	Computed tomography; an older term for computerized axial tomography
CBC	Complete blood count
CBT	Cognitive behavioural therapy
CDC	Centers for Disease Control and Prevention
CEA	Carcinoembryonic antigen
CHF	Congestive heart failure
CHD	Congenital heart disease
CIN	Cervical intraepithelial neoplasia
CJD	Creutzfeldt–Jakob disease
CK	Creatine kinase
CMV	Cytomegalovirus
CNS	Central nervous system
COPD	Chronic obstructive pulmonary disease
CPAP	Continuous positive airway pressure
CPK	Creatine phosphokinase; an older name for creatine kinase
CPR	Cardiopulmonary resuscitation
CRF	Chronic renal failure; chronic kidney disease is preferred in current usage
CRP	C-reactive protein
CSF	Cerebrospinal fluid
CT	Computed tomography
CVS	Chorionic villus sampling
CVA	Cerebrovascular accident
CXR	Chest radiograph
D&C	Dilatation and curettage
DKA	Diabetic ketoacidosis
DJD	Degenerative joint disease
DM	Diabetes mellitus
DNA	Deoxyribonucleic acid
DTP	Diphtheria, tetanus, and pertussis
DVT	Deep-vein thrombosis
DX	Diagnosis
ECG	Electrocardiogram
EKG	Electrocardiogram
ECHO	Echocardiogram
EEG	Electroencephalogram
eGFR	Estimated glomerular filtration rate
EMG	Electromyography
ENT	Ear, nose, and throat
ERCP	Endoscopic retrograde cholangiopancreatography
ESR	Erythrocyte sedimentation rate
ESRD	End-stage renal disease
FBC	Full blood count
FEV1	Forced expiratory volume in the first second
FSH	Follicle-stimulating hormone
GABHS	Group A beta-haemolytic streptococcus
GERD	Gastroesophageal reflux disease
GFR	Glomerular filtration rate
GI	Gastrointestinal
GIST	Gastrointestinal stromal tumour
GU	Genitourinary
HbA1c	Glycated haemoglobin

Abbreviation	Full form
HDL	High-density lipoprotein
HAV	Hepatitis A virus
HBV	Hepatitis B virus
HCT	Hematocrit
HCV	Hepatitis C virus
HGB	Hemoglobin
HIV	Human immunodeficiency virus
HLA	Human leukocyte antigen
HPV	Human papillomavirus
HRT	Hormone replacement therapy
HTN	Hypertension
IBD	Inflammatory bowel disease
IBS	Irritable bowel syndrome
ICD	Implantable cardioverter-defibrillator
ICU	Intensive care unit
IDDM	Insulin-dependent diabetes mellitus; type 1 diabetes mellitus is preferred in current usage
IM	Intramuscular
IU	International unit
IUD	Intrauterine device
IV	Intravenous
IVP	Intravenous pyelography or intravenous pyelogram
LDL	Low-density lipoprotein
LH	Luteinizing hormone
LFT	Liver function test
MI	Myocardial infarction
MMR	Measles, mumps, and rubella
MRI	Magnetic resonance imaging
MRSA	Methicillin-resistant *Staphylococcus aureus*
MS	Multiple sclerosis; may have other meanings depending on context
NG	Nasogastric
NIDDM	Non-insulin-dependent diabetes mellitus; type 2 diabetes mellitus is preferred in current usage
NKDA	No known drug allergies
NSAID	Nonsteroidal anti-inflammatory drug
OCD	Obsessive-compulsive disorder
PAD	Peripheral arterial disease
PAP	Papanicolaou
PCOS	Polycystic ovary syndrome
PCR	Polymerase chain reaction
PE	Pulmonary embolism
PET	Positron emission tomography
PFT	Pulmonary function test
PID	Pelvic inflammatory disease
PMS	Premenstrual syndrome
PPD	Purified protein derivative
PRN	As needed (from the Latin *pro re nata*)
PSA	Prostate-specific antigen
PT	Prothrombin time
PTCA	Percutaneous transluminal coronary angioplasty
PTH	Parathyroid hormone
PTT	Partial thromboplastin time

Abbreviation	Full form
PUD	Peptic ulcer disease
PVC	Premature ventricular contraction
QID	Four times a day; prescription shorthand that should be avoided when possible
RA	Rheumatoid arthritis; may have other meanings depending on context
RAST	Radioallergosorbent test
RBC	Red blood cell
RCT	Randomized controlled trial
REM	Rapid eye movement
RLS	Restless legs syndrome
RNA	Ribonucleic acid
RSV	Respiratory syncytial virus
Rx	Prescription or treatment, depending on context
SaO2	Arterial oxygen saturation
SARS-CoV-2	Severe acute respiratory syndrome coronavirus 2
SIDS	Sudden infant death syndrome
SLE	Systemic lupus erythematosus
SOB	Shortness of breath
SSRI	Selective serotonin reuptake inhibitor
STD	Sexually transmitted disease; sexually transmitted infection is preferred in current usage
STI	Sexually transmitted infection
T3	Triiodothyronine
T4	Thyroxine; commonly referring to tetraiodothyronine
TAH	Total abdominal hysterectomy
TB	Tuberculosis
TIA	Transient ischemic attack
TIBC	Total iron-binding capacity
TID	Three times a day; prescription shorthand that should be avoided when possible
TMJ	Temporomandibular joint
TORCH	Toxoplasmosis, other infections, rubella, cytomegalovirus, and herpes simplex; a group of congenital-infection evaluations
TSH	Thyroid-stimulating hormone
TURP	Transurethral resection of the prostate
URI	Upper respiratory infection
UTI	Urinary tract infection
VSD	Ventricular septal defect
WBC	White blood cell
WDWN	Well-developed, well-nourished
WNL	Within normal limits; a finding is within the expected reference range or clinical appearance
WHO	World Health Organization
XRT	Radiotherapy

A.C. A prescription abbreviation meaning "before meals," from the Latin *ante cibum*.

ALA An abbreviation for alpha-linolenic acid, an essential omega-3 fatty acid, or aminolevulinic acid, a heme-pathway compound used topically in some photodynamic treatments; context determines the meaning.

AP An abbreviation commonly meaning anteroposterior, or directed from front to back; in some contexts it may have another medical expansion.

ATM An abbreviation that may mean the temporomandibular joint or ataxia-telangiectasia mutated, a protein kinase involved in DNA-damage repair; context determines the meaning.

BF Physician's shorthand for Black female; demographic abbreviations should be used cautiously and replaced with precise, patient-preferred language when possible.

BPD An abbreviation commonly meaning bronchopulmonary dysplasia, chronic lung disease after premature birth; it can also mean borderline personality disorder in psychiatric contexts.

CA A medical abbreviation that may mean cancer, carcinoma, or calcium; the intended meaning depends on the surrounding clinical context.

CKD Abbreviation for Chronic Kidney Disease: a progressive loss of kidney function over months to years, defined by a glomerular filtration rate (GFR) less than 60 mL/min/1.73m^2 or markers of kidney damage (albuminuria, haematuria, structural abnormalities) persisting for at least 3 months.

CLA An abbreviation that commonly means conjugated linoleic acid, a group of fatty-acid isomers; in other medical contexts it may have a different expansion.

CTG Abbreviation for cardiotocography; continuous electronic monitoring of fetal heart rate and uterine contractions during labour.

CVA An abbreviation for cerebrovascular accident, meaning a stroke caused by interruption of blood flow to the brain or bleeding within the brain. It may cause sudden neurologic deficits.

CVS An abbreviation that may mean cardiovascular system or chorionic-villus sampling, a prenatal diagnostic procedure; context determines the meaning.

DDAVP The abbreviation for desmopressin, a synthetic vasopressin-like medicine used for some bleeding disorders, central diabetes insipidus, and nighttime urination.

DES An abbreviation that may mean diethylstilbestrol, a synthetic estrogen, or drug-eluting stent; diethylstilbestrol exposure during pregnancy is associated with later reproductive and cancer risks.

DHHS The abbreviation for the U.S. Department of Health and Human Services.

DNR An abbreviation for do-not-resuscitate, indicating that cardiopulmonary resuscitation should not be attempted if breathing or heartbeat stops.

DNS An abbreviation that may mean deviated nasal septum or dextrose in normal saline; the intended expansion depends on the clinical context.

DPT An older abbreviation for the combined diphtheria, pertussis, and tetanus vaccine; current formulations include DTaP and Tdap.

DT An abbreviation that may mean delirium tremens or diphtheria–tetanus vaccine; the intended meaning depends on context.

DTC An abbreviation that may mean differentiated thyroid carcinoma or direct-to-consumer, such as direct-to-consumer genetic testing; the intended meaning depends on context.

DTP An older abbreviation for diphtheria, tetanus, and pertussis vaccine; current childhood formulations are generally called DTaP.

DV An abbreviation that may mean domestic violence, ductus venosus, or another context-specific term; the full expression should be specified.

DYS An abbreviation or word root related to dysplasia, dystonia, dyslexia, or another condition beginning with dys-; the intended meaning depends on context.

EC An abbreviation that may mean enteric-coated, emergency contraception, or endothelial cell; the intended meaning depends on context.

EFT An abbreviation whose medical meaning depends on context, such as endocrine-function testing or emotional freedom technique; the intended expansion should be specified.

ENT Abbreviation for ear, nose, and throat; it commonly refers to the otolaryngology specialty or an otolaryngologist.

EOS Commonly an abbreviation for eosinophils or an eosinophil count in laboratory reports; the intended meaning should be confirmed from the report's context.

EPA Abbreviation for eicosapentaenoic acid, an omega-3 polyunsaturated fatty acid found in oily fish and fish-oil supplements.

EPR Abbreviation for electrophrenic respiration, also called diaphragm pacing, in which electrical stimulation helps activate the diaphragm in selected patients with respiratory muscle paralysis.

EPT Abbreviation for estrogen/progestin therapy, treatment using both an estrogen and a progestin, commonly discussed in menopausal hormone therapy when the uterus is present.

ER Abbreviation for emergency room or emergency department, the hospital service that evaluates and treats urgent illness and injury.

FCC In medicine, an abbreviation for familial colorectal cancer; in other contexts it may have nonmedical meanings.

FFI Abbreviation for fatal familial insomnia, a rare inherited prion disease causing progressively severe insomnia, autonomic dysfunction, and neurologic decline.

FISH Abbreviation for fluorescence in situ hybridization, a test that uses fluorescent DNA probes to detect specific genes, chromosomes, or chromosomal rearrangements in cells.

FLAP Abbreviation for 5-lipoxygenase-activating protein, a protein encoded by *ALOX5AP* that helps produce leukotrienes involved in inflammation.

GALT Abbreviation for gut-associated lymphoid tissue, immune tissue in the gastrointestinal tract that samples intestinal contents and helps defend against pathogens.

GBV-C Abbreviation for GB virus C, also called human pegivirus, a blood-borne virus that can persist in people but is not established as a cause of chronic hepatitis.

GD In the RxList medical-dictionary context, abbreviation for Gaucher disease, an inherited lysosomal storage disorder caused by deficient glucocerebrosidase.

GI Abbreviation for gastrointestinal, relating to the digestive tract from the mouth through the anus and its associated organs.

GPO Abbreviation for group purchasing organization, an organization that combines buyers' purchasing power to negotiate prices and contracts for medicines, supplies, or services.

HAART Abbreviation for highly active antiretroviral therapy, an older term for combination antiretroviral treatment used to suppress HIV replication and preserve immune function.

HAPE Abbreviation for high-altitude pulmonary edema, a life-threatening accumulation of fluid in the lungs after rapid ascent; immediate descent and supplemental oxygen are urgent treatments.

HAV Abbreviation for hepatitis A virus, an RNA virus spread mainly by the fecal–oral route that causes acute hepatitis but usually does not cause chronic infection.

HBV Abbreviation for hepatitis B virus, a DNA virus transmitted through infected blood or body fluids that can cause acute or chronic hepatitis and cirrhosis or liver cancer.

HEPA Abbreviation for high-efficiency particulate air, describing a filter designed to remove a very high proportion of airborne particles of specified sizes from an air stream.

HGD Commonly an abbreviation for high-grade dysplasia, a marked abnormality of cell development that may be a precursor to invasive cancer but is not itself invasive cancer.

HNP Abbreviation for herniated nucleus pulposus, in which the inner material of an intervertebral disk protrudes through the outer ring and may compress a nerve root.

HPS Common medical abbreviations include hantavirus pulmonary syndrome, a severe respiratory illness, and Hermansky–Pudlak syndrome, an inherited disorder with oculocutaneous albinism and platelet-storage abnormalities; context determines the meaning.

HS Commonly an abbreviation for hereditary spherocytosis, an inherited hemolytic anemia; it can also mean half-strength, heart sounds, hamstrings, heparan sulfate, hernia sac, or house surgeon, so context is essential.

HSA Abbreviation that may mean a US health savings account or human serum albumin, the main plasma protein that helps maintain oncotic pressure; context determines the meaning.

ICU Abbreviation for intensive care unit, a hospital unit providing continuous monitoring and specialized support for critically ill patients.

ID A context-dependent abbreviation that may mean infectious disease, infectious diseases specialist, intellectual disability, or identification; the surrounding clinical text determines the meaning.

IFA Abbreviation for indirect fluorescent antibody, a laboratory method that detects antibodies or antigens using fluorescent labels, commonly in serologic testing.

IHS Abbreviation for the Indian Health Service, a US federal agency providing health services to American Indians and Alaska Native people and communities.

IPT Abbreviation for interpersonal therapy, a structured psychotherapy that focuses on relationships, grief, role transitions, and interpersonal difficulties.

IPV Abbreviation for inactivated polio vaccine, an injectable vaccine containing killed poliovirus and used to prevent poliomyelitis.

IQ Abbreviation for intelligence quotient, a standardized score from cognitive testing; it describes performance on specified tests and is not a complete measure of a person's abilities or worth.

ITC Abbreviation for in-the-canal, describing a hearing aid or other device positioned within the ear canal.

ITN Abbreviation for insecticide-treated bednet, a net treated with insecticide to reduce mosquito bites and malaria transmission.

IVC Commonly abbreviation for inferior vena cava, the large vein returning blood from the lower body to the heart; it can also mean intravenous cholangiogram, an X-ray study of the biliary system.

JIP Abbreviation for juvenile intestinal polyposis, an inherited condition in which children develop multiple hamartomatous polyps in the gastrointestinal tract and may have increased cancer risk.

KB In medical usage, an abbreviation for keratoderma blennorrhagicum or kilobase of DNA; lower-case *kb* is preferred for kilobase, so context is important.

KUB Abbreviation for kidney, ureter, and bladder, commonly referring to a plain abdominal X-ray used to assess urinary tract calculi, bowel gas patterns, or other abdominal findings.

L Abbreviation for liter, a metric unit of volume equal to 1,000 milliliters.

LAVH Abbreviation for laparoscopically assisted vaginal hysterectomy, removal of the uterus through the vagina with laparoscopic assistance.

LL Commonly an abbreviation for lower lid of the eye or lower limit; the intended meaning depends on the clinical context.

LLL Abbreviation for the left lower lobe of the lung.

LLQ Abbreviation for left lower quadrant, usually referring to the lower-left quarter of the abdomen.

LMP Abbreviation for last menstrual period, the first day of the most recent menstrual bleeding, used in estimating gestational age when the date is reliable.

LPA LPA abbreviates Little People of America and may also refer to the left pulmonary artery.

LUL Abbreviation for the left upper lobe of the lung.

LUQ Abbreviation for the left upper quadrant of the abdomen.

LVF Abbreviation for left ventricular failure, meaning failure of the left side of the heart; it may also mean left ventricular function, depending on context.

MAOI Abbreviation for monoamine oxidase inhibitor, a drug that inhibits monoamine oxidase and is used in selected treatment of depression and other disorders.

MAP Common abbreviation for *Mycobacterium avium* subspecies *paratuberculosis*, an organism of the *M. avium* complex; the abbreviation can have other meanings in different clinical contexts.

MCD An abbreviation with several medical meanings, including minimal change disease, mean corpuscular diameter, and medullary cystic disease; the intended meaning depends on context.

MCP Membrane cofactor protein, also called CD46, is a cell-surface protein that regulates complement activation and helps protect host cells from complement-mediated injury; the abbreviation can have other meanings in different contexts.

MDI An abbreviation that may mean metered-dose inhaler, multiple daily injections, or mental developmental index; the intended meaning depends on context.

MEDVAC Abbreviation for medical evacuation: the transport of ill or injured people to a medical facility or to a location providing a higher level of care.

MI Abbreviation for myocardial infarction, or heart attack: death of heart-muscle tissue caused by prolonged inadequate blood flow, usually from acute coronary artery blockage.

MM An abbreviation that may mean meningomyelocele, malignant melanoma, or multiple myeloma; in lowercase, *mm* commonly means millimeter. The intended meaning depends on context.

MP Abbreviation for mercaptopurine, a purine-antimetabolite drug, or for molecular pathology; the intended meaning depends on context.

MPS Abbreviation for mucopolysaccharidosis, a group of inherited lysosomal storage disorders caused by deficient breakdown of glycosaminoglycans.

MSG Abbreviation for monosodium glutamate, the sodium salt of glutamic acid used as a flavor enhancer and contributing umami taste.

MTX Abbreviation for methotrexate, a folate-antagonist drug used in selected cancers, autoimmune diseases, and other conditions.

MVP Abbreviation for mitral valve prolapse, in which one or both mitral-valve leaflets bow into the left atrium during ventricular systole; it is often mild but can sometimes cause mitral regurgitation or arrhythmias.

MYH MYH is a gene-family abbreviation involving myosin or DNA-repair proteins; the specific gene and variant determine the clinical meaning.

ND ND is a context-dependent abbreviation that may mean naturopathic doctor, neurodevelopmental, or another term; the full meaning should be specified.

NEP NEP is a context-dependent abbreviation that may mean neuroendocrine pancreatic tumor, nasoendotracheal procedure, or another clinical term.

NF NF is a context-dependent abbreviation, including neurofibromatosis, a group of genetic disorders causing nerve-sheath tumors and other features.

NG NG commonly means nasogastric, referring to a tube passed through the nose into the stomach, but the abbreviation has other uses.

NS NS is a context-dependent abbreviation, commonly normal saline, a sterile sodium-chloride solution, or not significant; the full term should be stated.

OB OB is an abbreviation commonly meaning obstetrics, the care of pregnancy, labor, birth, and the postpartum period, but it may have other meanings.

OBS OBS is a context-dependent abbreviation that may mean observation, obstetric service, or organic brain syndrome; the intended term should be written out.

OCG OCG is a context-dependent abbreviation that may refer to oral contraceptive guidance, oculocardiac testing, or another clinical term; the full term should be specified.

OMS An abbreviation for oral and maxillofacial surgery; the intended meaning depends on the clinical context.

PAP PAP is an abbreviation with context-dependent meanings, including Papanicolaou testing, pulmonary alveolar proteinosis, or prostatic acid phosphatase; the full term should be specified.

PAS PAS is an abbreviation that may mean periodic-acid–Schiff staining, para-aminosalicylic acid, or pulmonary-artery systolic pressure; context determines the meaning.

PAT PAT is a context-dependent abbreviation that may refer to paroxysmal atrial tachycardia, a rapid rhythm beginning in the atria, or another clinical term.

PCA PCA is a context-dependent abbreviation, commonly meaning patient-controlled analgesia, in which a patient activates prescribed doses from an infusion device.

PCT PCT is a context-dependent abbreviation that may mean procalcitonin, porphyria cutanea tarda, or patient-care technician; the full term should be specified.

PDR PDR commonly means Physicians' Desk Reference, a drug-information reference, but the abbreviation has other uses and should be interpreted in context.

PEP PEP is a context-dependent abbreviation, including post-exposure prophylaxis, a preventive medicine course after a possible infection exposure.

PHS PHS is an abbreviation whose meaning depends on context, including public health service or primary hyperhidrosis; the full term should be specified.

PI PI is a context-dependent abbreviation, including principal investigator, pulmonary insufficiency, or protease inhibitor; the intended meaning must be specified.

PLP PLP commonly means pyridoxal 5′-phosphate, the active coenzyme form of vitamin B6 required by many enzymes, but the abbreviation has other uses.

PMD PMD is a context-dependent abbreviation, including Pelizaeus–Merzbacher disease, a rare inherited disorder of central myelination, or a professional medical designation.

PON PON is a context-dependent abbreviation that may refer to postoperative nausea, paraoxonase, or another clinical term; the full meaning should be stated.

PTU PTU is the abbreviation for propylthiouracil, an antithyroid medicine used selectively because of liver toxicity and other safety considerations.

PV PV is a context-dependent abbreviation, including polycythemia vera, plasma volume, or peripheral vision; the full term should be specified.

PVB PVB is a context-dependent abbreviation that may mean paravertebral block, a regional anesthetic technique, or another medical term.

PX PX is a context-dependent abbreviation that may mean prognosis, patient, prescription, or a genetic marker; clinical documentation should spell out the intended term.

Q.2H A prescription abbreviation meaning "every 2 hours." Medication instructions should use clear wording because abbreviation misinterpretation can cause dosing errors.

Q.3H. A prescription abbreviation meaning "every 3 hours." Medication instructions should use clear wording because abbreviation misinterpretation can cause dosing errors.

Q.S. A prescription abbreviation from the Latin "quantum sufficiat," meaning "quantity sufficient" to make the required amount or concentration. The exact quantity must be specified by the formulation or prescription context.

R/O R/O is an abbreviation for rule out, indicating that a condition is being considered but has not been confirmed; clear documentation should state the actual diagnostic question.

RAD Acronym whose medical meaning depends on context, commonly radiation absorbed dose or right axis deviation on an ECG.

RBC RBC is the abbreviation for red blood cell, the cell that transports oxygen with hemoglobin and carries carbon dioxide back toward the lungs.

RF RF is a context-dependent abbreviation, including rheumatoid factor, radiofrequency, or risk factor; the complete term should be stated.

RLL RLL is the abbreviation for right lower lobe, usually referring to the lower lobe of the right lung.

RLQ RLQ is the abbreviation for right lower quadrant of the abdomen, containing structures including the appendix, cecum, and right adnexa.

RML RML is the abbreviation for right middle lobe, the middle lobe of the right lung.

RP RP is a context-dependent abbreviation, commonly retinitis pigmentosa, an inherited retinal degeneration causing night blindness and progressive visual-field loss.

RUQ RUQ is the abbreviation for right upper quadrant of the abdomen, containing the liver, gallbladder, duodenum, and portions of bowel and kidney.

SGOT SGOT is the former abbreviation for AST, an enzyme measured in blood that can rise with injury to liver, heart, muscle, or other tissues.

SGPT SGPT is the former abbreviation for ALT, a liver-associated enzyme that rises in many forms of hepatocellular injury.

SHP SHP is a context-dependent abbreviation that may refer to a healthcare professional, a gene or protein, or another clinical term; the full meaning should be specified.

SLV SLV is a context-dependent abbreviation that may mean single-lung ventilation, serum lithium value, or another term; the full meaning should be specified.

STD(S) Abbreviation for sexually transmitted disease(s), now often called sexually transmitted infections.

STS STS is a context-dependent abbreviation that may mean soft-tissue sarcoma, sodium thiosulfate, or another clinical term; the full term should be stated.

TMR TMR is a context-dependent abbreviation, including targeted muscle reinnervation, a surgical technique used to improve control of a prosthesis and reduce amputation pain.

TPA/TPA Abbreviation for tissue plasminogen activator.

TSD TSD is a context-dependent abbreviation that may mean total sleep deprivation, traumatic stress disorder, or another clinical term; the full term should be specified.

TSE TSE is a context-dependent abbreviation, including transmissible spongiform encephalopathy, the prion-disease group that includes Creutzfeldt-Jakob disease.

UL UL is a context-dependent abbreviation that may mean upper limit, ulnar or ulna-related, or another clinical term; the full meaning should be specified.

URG URG is a context-dependent abbreviation that may refer to urinary urgency or an urgent clinical priority; documentation should state the full term.

URTI Abbreviation for upper respiratory tract infection, commonly involving the nose, sinuses, pharynx, or larynx and often caused by viruses.

VD Abbreviation for venereal disease, an older term for a sexually transmitted infection.

WBS Abbreviation for Williams–Beuren syndrome, a genetic condition associated with characteristic facial features, developmental differences, and cardiovascular disease. In other clinical contexts, WBS may have a different meaning, so the full term should be specified.

Modern Terms

Old or obsolete term	Modern or preferred term
Acute renal failure	Acute kidney injury
Adult-onset diabetes mellitus	Type 2 diabetes mellitus
Ague	Malaria; a historical term for intermittent fever, usually associated with malaria
Apoplexy	Stroke or intracerebral haemorrhage, depending on the historical context
Arteriosclerosis obliterans	Peripheral arterial disease
Bright's disease	Glomerular kidney disease; the specific modern diagnosis should be stated when known
Chronic renal failure	Chronic kidney disease
Congestive heart failure	Heart failure
Consumption	Tuberculosis, especially pulmonary tuberculosis
Crippling arthritis	Disabling arthritis; describe the functional limitation specifically
Diabetic retinopathy, background	Mild or nonproliferative diabetic retinopathy, with severity stated
Dropsy	Oedema or fluid accumulation, with the affected site specified
Eclampsia toxemia	Preeclampsia or eclampsia, depending on the clinical condition
Essential hypertension	Primary hypertension
Fallopian tube	Uterine tube; fallopian tube remains an accepted anatomical term
Female hysteria	No single modern diagnosis; reassess using the presenting symptoms and an appropriate diagnosis
Gastric ulcer disease	Peptic ulcer disease, with the ulcer site specified
Heart attack	Myocardial infarction in formal medical usage
Herpes zoster	Shingles in common language; herpes zoster remains the preferred medical term
Hyperlipaemia	Hyperlipidaemia
Idiopathic thrombocytopenic purpura	Immune thrombocytopenia
Imbecile	Intellectual disability; the historical term is offensive and must not be used clinically
Insulin-dependent diabetes mellitus	Type 1 diabetes mellitus
Junkie's abscess	Injection-related abscess or skin and soft-tissue infection
Leprosy	Hansen disease; leprosy remains a recognized medical term, but person-first language is preferred

Old or obsolete term	Modern or preferred term
Manic depression	Bipolar disorder
Mongolism	Down syndrome; the historical term is unacceptable and must not be used
Multiple personality disorder	Dissociative identity disorder
Non-insulin-dependent diabetes mellitus	Type 2 diabetes mellitus
Old age dementia	Dementia or major neurocognitive disorder, with the cause specified when known
Palsy	Paralysis or the specific neurological disorder, depending on the context
Paralytic stroke	Stroke with paralysis; specify the neurological deficit and stroke type
Phthisis	Pulmonary tuberculosis; historically, progressive wasting disease
Senile dementia	Dementia or major neurocognitive disorder; age alone should not define the diagnosis
Senility	Cognitive impairment, dementia, or another specific diagnosis, after assessment
Spastic colon	Irritable bowel syndrome
Stomach flu	Acute gastroenteritis
Sunstroke	Heatstroke
Terminal illness	Advanced or life-limiting illness, with the diagnosis and prognosis specified
Toxemia of pregnancy	Preeclampsia or eclampsia
Venereal disease	Sexually transmitted infection
Wassermann reaction	A modern syphilis serologic test, such as a nontreponemal or treponemal test
Water on the brain	Hydrocephalus

Medical Specialties

Medical specialty	Principal area of practice
Allergy and Immunology	Allergic disease, asthma, immune deficiency, and immune-mediated disorders
Anesthesiology	Perioperative care, anesthesia, critical care, and pain medicine
Cardiology	Diseases of the heart and circulatory system
Cardiothoracic Surgery	Surgical treatment of diseases of the heart, lungs, and chest
Clinical Genetics	Diagnosis, counseling, and management of inherited and genomic disorders
Clinical Pharmacology	Effects, uses, interactions, and safe clinical use of medicines
Colon and Rectal Surgery	Surgical treatment of diseases of the colon, rectum, and anus
Critical Care Medicine	Assessment and treatment of life-threatening organ dysfunction
Dermatology	Diseases of the skin, hair, nails, and mucous membranes
Emergency Medicine	Immediate assessment and treatment of acute illness and injury
Endocrinology	Hormones, metabolism, diabetes, and endocrine glands
Family Medicine	Comprehensive continuing care for individuals and families of all ages
Forensic Medicine	Application of medical knowledge to legal and medicolegal questions
Gastroenterology	Diseases of the digestive tract, liver, gallbladder, and pancreas
General Practice	First-contact and continuing medical care across a broad range of conditions
General Surgery	Operative treatment of diseases involving multiple body systems
Geriatric Medicine	Health care of older adults, including multimorbidity and functional decline
Hematology	Blood cells, blood-forming organs, clotting, and blood disorders
Hepatology	Diseases of the liver and biliary system
Hospital Medicine	Comprehensive medical care of hospitalized adults
Infectious Disease Medicine	Diagnosis, treatment, and prevention of infections
Internal Medicine	Prevention, diagnosis, and treatment of adult medical disorders
Interventional Cardiology	Catheter-based diagnosis and treatment of cardiovascular disease
Interventional Radiology	Image-guided minimally invasive diagnosis and treatment
Medical Oncology	Systemic treatment and supportive care for cancer
Neonatology	Care of newborn infants, especially premature or critically ill infants
Nephrology	Diseases of the kidneys, fluid balance, electrolytes, and hypertension
Neurology	Diseases of the brain, spinal cord, peripheral nerves, and muscles

Medical specialty	Principal area of practice
Neurosurgery	Surgical treatment of disorders of the nervous system
Nuclear Medicine	Diagnosis and treatment using radioactive substances and molecular imaging
Obstetrics and Gynecology	Pregnancy, childbirth, and diseases of the female reproductive system
Occupational Medicine	Health, safety, and disease prevention in the workplace
Ophthalmology	Medical and surgical care of the eyes and visual system
Oral and Maxillofacial Surgery	Surgical treatment of diseases and injuries of the mouth, jaws, face, and neck
Orthopedic Surgery	Surgical and nonsurgical treatment of the musculoskeletal system
Otolaryngology–Head and Neck Surgery	Diseases and surgery of the ear, nose, throat, and head and neck
Pain Medicine	Assessment and treatment of acute, chronic, and cancer-related pain
Palliative Medicine	Relief of symptoms and support for people with serious or life-limiting illness
Pathology	Laboratory examination of tissues, cells, blood, and body fluids
Pediatric Surgery	Surgical care of infants, children, and adolescents
Pediatrics	Medical care of infants, children, and adolescents
Physical Medicine and Rehabilitation	Restoration of function and independence after illness or injury
Plastic and Reconstructive Surgery	Reconstruction, restoration, and alteration of body tissues
Preventive Medicine	Prevention of disease and promotion of health in individuals and populations
Psychiatry	Diagnosis and treatment of mental, emotional, and behavioral disorders
Public Health Medicine	Protection and improvement of population health
Pulmonary Medicine	Diseases of the lungs and respiratory system
Radiation Oncology	Use of ionizing radiation to treat cancer
Radiology	Diagnostic and image-guided evaluation of disease
Reproductive Endocrinology and Infertility	Hormonal and reproductive disorders and fertility care
Rheumatology	Autoimmune, inflammatory, and musculoskeletal disorders
Sleep Medicine	Sleep disorders and their effects on health
Sports Medicine	Prevention, diagnosis, treatment, and rehabilitation of activity-related conditions
Thoracic Surgery	Surgery of the chest, lungs, esophagus, and mediastinum
Transfusion Medicine	Collection, testing, processing, and clinical use of blood components
Trauma Surgery	Surgical management of serious and complex injuries
Urology	Diseases of the urinary tract and male reproductive system
Vascular Surgery	Surgical and endovascular treatment of blood-vessel disease

Human Organs

This reference maps individual organ headwords to related entries in the dictionary. Each headword is followed by a semicolon-separated list of related dictionary terms.

Adrenal Gland
Adrenal Gland; Addison's Disease; Cushing's Syndrome; Pheochromocytoma; Adrenaline.

Appendix
Appendix; Appendicitis; Appendectomy.

Bladder
Bladder; Cystitis; Urinary Retention; Bladder Cancer.

Brain
Brain; Brain Tumour; Stroke; Seizure; Meningitis; Cerebral Palsy; Parkinson's Disease.

Breast
Breast; Breast Cancer; Mastitis; Mammography.

Cervix
Cervix; Cervical Cancer; Cervicitis; Pap Smear.

Colon
Colon; Colitis; Constipation; Diarrhea; Colorectal Cancer; Colonoscopy.

Ear
Ear; Otitis Media; Tinnitus; Hearing Loss; Vertigo.

Esophagus
Esophagus; Dysphagia; Esophagitis; Achalasia; Gastroesophageal Reflux Disease.

Eye
Eye; Cataract; Glaucoma; Conjunctivitis; Retinal Detachment; Macular Degeneration.

Gallbladder
Gallbladder; Cholelithiasis; Cholecystitis; Bile Duct; Cholangiocarcinoma.

Heart
Heart; Heart Failure; Arrhythmia; Myocardial Infarction; Pericarditis; Congenital Heart Defect.

Kidney
Kidney; Acute Kidney Injury; Chronic Kidney Disease; Glomerulonephritis; Nephritis; Dialysis.

Liver
Liver; Hepatitis; Cirrhosis; Fatty Liver Disease; Jaundice; Portal Hypertension.

Lung
Lung; Asthma; COPD; Pneumonia; Bronchitis; Pulmonary Embolism; Pleural Effusion.

Mouth
Mouth; Dental Caries; Gingivitis; Periodontitis.

Nose
Nose; Sinusitis; Rhinitis; Nasal Polyps; Anosmia; Epistaxis.

Ovary
Ovary; Ovarian Cyst; Ovarian Cancer; Fallopian Tube; Ectopic Pregnancy.

Pancreas
Pancreas; Pancreatitis; Diabetes Mellitus; Pancreatic Cancer; Insulin.

Pituitary Gland
Pituitary Gland; Pituitary Tumor; Acromegaly; Diabetes Insipidus.

Prostate
Prostate; Benign Prostatic Hyperplasia; Prostatitis; Prostate Cancer.

Rectum
Rectum; Rectal Bleeding; Proctitis; Rectal Cancer.

Skin
Skin; Dermatitis; Eczema; Psoriasis; Cellulitis; Pressure Ulcer; Melanoma.

Small Intestine
Small Intestine; Enteritis; Celiac Disease; Malabsorption; Intestinal Obstruction.

Spinal Cord
Spinal Cord; Spinal Cord Injury; Myelitis; Spinal Stenosis; Paraplegia.

Spleen
Spleen; Splenomegaly; Splenectomy; Hypersplenism.

Stomach
Stomach; Gastritis; Peptic Ulcer Disease; Gastroesophageal Reflux Disease; Gastric Cancer.

Testis
Testis; Testicular Torsion; Testicular Cancer; Epididymis.

Thymus
Thymus; Thymoma.

Thyroid Gland
Thyroid Gland; Hyperthyroidism; Hypothyroidism; Goitre; Thyroid Cancer.

Ureter
Ureter; Ureteral Calculi; Ureteral Obstruction; Ureteritis; Ureteral Stricture.

Urethra
Urethra; Urethral Stricture; Urethritis; Urethral Obstruction.

Uterus
Uterus; Endometriosis; Fibroids; Uterine Cancer; Ectopic Pregnancy.

Vagina
Vagina; Vaginitis; Vaginal Discharge; Vaginal Cancer.

Common Diseases

Scope: This reference-oriented list organizes common human diseases by organ system and clinical domain. It is a curated, high-importance list rather than a prevalence ranking, and some diseases appear under more than one heading where they are clinically relevant to several systems. It is not an exhaustive index of every term in the dictionary. Entries named as syndromes are covered in the companion appendix, Common Syndromes; conditions conventionally classified as disorders are covered in Common Disorders; and clinical findings, lesions, congenital anomalies, and injuries are covered in their own companion appendices. Individual symptoms, signs, and laboratory findings are defined as dictionary entries rather than listed here.

Cardiovascular Diseases Hypertension; Coronary Artery Disease; Stable Angina; Unstable Angina; Myocardial Infarction; Atherosclerosis; Heart Failure; Right Heart Failure; Cardiogenic Shock; Atrial Fibrillation; Atrial Flutter; Supraventricular Tachycardia; Ventricular Tachycardia; Ventricular Fibrillation; Sinus Bradycardia; Heart Block; Cardiomyopathy; Dilated Cardiomyopathy; Hypertrophic Cardiomyopathy; Restrictive Cardiomyopathy; Myocarditis; Pericarditis; Cardiac Tamponade; Endocarditis; Rheumatic Heart Disease; Aortic Stenosis; Aortic Regurgitation; Mitral Stenosis; Mitral Regurgitation; Mitral Valve Prolapse; Tricuspid Valve Disease; Pulmonary Hypertension; Peripheral Artery Disease; Aortic Aneurysm; Aortic Dissection; Deep Vein Thrombosis; Chronic Venous Insufficiency; Varicose Veins; Thrombophlebitis; Raynaud Phenomenon; Congenital Heart Disease.

Respiratory Diseases Asthma; Acute Bronchitis; Chronic Bronchitis; Emphysema; COPD; Pneumonia; Aspiration Pneumonia; Bronchopneumonia; Tuberculosis; COVID-19; Influenza; Bronchiolitis; Bronchiectasis; Cystic Fibrosis; Interstitial Lung Disease; Idiopathic Pulmonary Fibrosis; Pneumoconiosis; Silicosis; Asbestosis; Hypersensitivity Pneumonitis; Sarcoidosis; Pulmonary Edema; Pulmonary Embolism; Pulmonary Hypertension; Respiratory Failure; Pleurisy; Empyema; Lung Abscess; Occupational Lung Disease.

Gastrointestinal Diseases Gastroesophageal Reflux Disease; Esophagitis; Barrett Esophagus; Achalasia; Esophageal Spasm; Gastritis; Peptic Ulcer Disease; Gastric Ulcer; Duodenal Ulcer; Gastroenteritis; Gastroparesis; Crohn Disease; Ulcerative Colitis; Inflammatory Bowel Disease; Celiac Disease; Lactose Intolerance; Food Intolerance; Intestinal Obstruction; Ileus; Intussusception; Volvulus; Diverticulosis; Diverticulitis; Appendicitis; Peritonitis; Hemorrhoids; Anal Fissure; Anal Fistula; Rectal Prolapse; Mesenteric Ischemia.

Liver, Gallbladder & Biliary Diseases Metabolic Dysfunction-Associated Steatotic Liver Disease (MASLD); Alcoholic Liver Disease; Hepatitis A; Hepatitis B; Hepatitis C; Hepatitis D; Hepatitis E; Autoimmune Hepatitis; Acute Liver Failure; Chronic Liver Disease; Cirrhosis; Portal Hypertension; Hepatic Encephalopathy; Hemochromatosis; Wilson Disease; Primary Biliary Cholangitis; Primary Sclerosing Cholangitis; Cholelithiasis; Cholecystitis; Cholangitis.

Pancreatic Diseases Acute Pancreatitis; Chronic Pancreatitis; Autoimmune Pancreatitis; Pancreatic Insufficiency; Pancreatic Cancer; Pancreatic Neuroendocrine Tumors.

Kidney & Urinary Diseases Acute Kidney Injury; Chronic Kidney Disease; End-Stage Kidney Disease; Glomerulonephritis; Diabetic Nephropathy; Hypertensive Nephropathy; Interstitial Nephritis; Pyelonephritis; Urinary Tract Infection; Cystitis; Urethritis; Nephrolithiasis; Hydronephrosis; Polycystic Kidney Disease; Renal Tubular Acidosis; IgA Nephropathy; Minimal Change Disease; Focal Segmental Glomerulosclerosis; Membranous Nephropathy; Vesicoureteral Reflux.

Endocrine Diseases Type 1 Diabetes Mellitus; Type 2 Diabetes Mellitus; Gestational Diabetes; Diabetes Insipidus; Diabetic Ketoacidosis; Hyperosmolar Hyperglycemic State; Hypothyroidism; Hyperthyroidism; Hashimoto Thyroiditis; Graves Disease; Thyroiditis; Goiter; Addison Disease; Cushing Disease; Primary Aldosteronism; Hypoparathyroidism; Hyperparathyroidism; Pheochromocytoma; Pituitary Adenoma; Acromegaly; Gigantism; Growth Hormone Deficiency.

Metabolic Diseases Obesity; Gout; Dyslipidemia; Hypercholesterolemia; Hypertriglyceridemia; Porphyria; Amyloidosis.

Nutritional Diseases & Deficiencies Protein-Energy Malnutrition; Marasmus; Kwashiorkor; Iron Deficiency; Iron-Deficiency Anemia; Vitamin A Deficiency; Thiamine Deficiency; Beriberi; Riboflavin Deficiency; Niacin Deficiency; Pellagra; Folate Deficiency; Vitamin B12 Deficiency; Vitamin C Deficiency; Scurvy; Vitamin D Deficiency; Rickets; Osteomalacia; Vitamin K Deficiency; Iodine Deficiency; Zinc Deficiency; Copper Deficiency; Selenium Deficiency; Magnesium Deficiency.

Neurological Diseases Tension-Type Headache; Cluster Headache; Status Epilepticus; Stroke; Ischemic Stroke; Hemorrhagic Stroke; Transient Ischemic Attack; Cerebral Aneurysm; Parkinson Disease; Alzheimer Disease; Vascular Dementia; Frontotemporal Dementia; Lewy Body Dementia; Multiple Sclerosis; Amyotrophic Lateral Sclerosis; Huntington Disease; Diabetic Neuropathy; Myasthenia Gravis; Bell Palsy; Trigeminal Neuralgia; Radiculopathy; Meningitis; Encephalitis; Hydrocephalus; Cerebral Palsy.

Musculoskeletal Diseases Osteoarthritis; Osteoporosis; Osteomalacia; Rheumatoid Arthritis; Ankylosing Spondylitis; Psoriatic Arthritis; Reactive Arthritis; Septic Arthritis; Gout; Bursitis; Tendinitis; Tendinopathy; Frozen Shoulder; Tennis Elbow; Golfer's Elbow; Cervical Spondylosis; Lumbar Spondylosis; Spinal Stenosis; Herniated Disc; Scoliosis; Kyphosis; Spondylolisthesis; Fibromyalgia; Muscular Dystrophy; Myositis; Polymyositis; Dermatomyositis.

Rheumatologic & Autoimmune Diseases Rheumatoid Arthritis; Systemic Lupus Erythematosus; Polymyalgia Rheumatica; Giant Cell Arteritis; Polyarteritis Nodosa; Granulomatosis with Polyangiitis; Microscopic Polyangiitis; Behçet Disease; Inflammatory Myopathies; Ankylosing Spondylitis; Psoriatic Arthritis; Reactive Arthritis; Relapsing Polychondritis; Adult-Onset Still Disease.

Skin, Hair & Nail Diseases Acne Vulgaris; Rosacea; Atopic Dermatitis; Contact Dermatitis; Seborrheic Dermatitis; Psoriasis; Urticaria; Angioedema; Impetigo; Cellulitis; Erysipelas; Folliculitis; Boils; Carbuncle; Ringworm; Athlete's Foot; Jock Itch; Candidiasis; Scabies; Pediculosis; Wart; Molluscum Contagiosum; Herpes Simplex; Herpes Zoster; Hidradenitis Suppurativa; Pressure Ulcers; Onychomycosis.

Eye Diseases Amblyopia; Strabismus; Cataract; Open-Angle Glaucoma; Angle-Closure Glaucoma; Conjunctivitis; Keratitis; Corneal Ulcer; Dry Eye; Uveitis; Iritis; Retinal Detachment; Diabetic Retinopathy; Hypertensive Retinopathy; Macular Degeneration; Retinitis Pigmentosa; Central Retinal Artery Occlusion; Central Retinal Vein Occlusion; Optic Neuritis; Keratoconus; Blepharitis.

Ear & Hearing Diseases Otitis Externa; Acute Otitis Media; Chronic Otitis Media; Otitis Media with Effusion; Mastoiditis; Presbycusis; Meniere Disease; Labyrinthitis; Vestibular Neuritis; Benign Paroxysmal Positional Vertigo; Otosclerosis; Cholesteatoma; Acoustic Neuroma.

Nose, Sinus & Throat Diseases Allergic Rhinitis; Nonallergic Rhinitis; Acute Sinusitis; Chronic Sinusitis; Pharyngitis; Streptococcal Pharyngitis; Tonsillitis; Peritonsillar Abscess; Laryngitis; Epiglottitis; Vocal Cord Paralysis.

Oral & Dental Diseases Dental Caries; Pulpitis; Dental Abscess; Gingivitis; Periodontitis; Pericoronitis; Aphthous Ulcer; Oral Candidiasis; Leukoplakia; Oral Lichen Planus.

Blood Diseases Iron-Deficiency Anemia; Megaloblastic Anemia; Vitamin B12 Deficiency Anemia; Folate-Deficiency Anemia; Aplastic Anemia; Hemolytic Anemia; Sickle Cell Disease; Thalassemia; Hereditary Spherocytosis; Glucose-6-Phosphate Dehydrogenase Deficiency; Polycythemia Vera; Immune Thrombocytopenia; Agranulocytosis; Hemophilia A; Hemophilia B; Von Willebrand Disease; Disseminated Intravascular Coagulation (DIC); Thrombotic Thrombocytopenic Purpura (TTP).

Immune-System Diseases Primary Immunodeficiency; Severe Combined Immunodeficiency; Common Variable Immunodeficiency; Selective IgA Deficiency; AIDS (Acquired Immunodeficiency Syndrome); HIV/AIDS; Chronic Granulomatous Disease; Graft-Versus-Host Disease.

Infectious & Parasitic Diseases Common Cold; Influenza; COVID-19; Measles; Mumps; Rubella; Chickenpox; Shingles; Herpes Simplex; Infectious Mononucleosis; Cytomegalovirus Infection; Polio; Rabies; Dengue; Chikungunya; Zika; Hepatitis A; Hepatitis B; Hepatitis C; Hepatitis D; Hepatitis E; HIV; Syphilis; Gonorrhea; Chlamydia; Tuberculosis; Leprosy; Diphtheria; Pertussis; Tetanus; Typhoid Fever; Cholera; Plague; Bacterial Meningitis; Meningococcemia; Scarlet Fever; Salmonellosis; Shigellosis; Campylobacteriosis; Botulism; Brucellosis; Leptospirosis; Lyme Disease; Malaria; Amebiasis; Giardiasis; Toxoplasmosis; Leishmaniasis; Trichomoniasis; Ascariasis; Hookworm; Pinworm Infection; Schistosomiasis; Taeniasis; Echinococcosis; Candidiasis; Aspergillosis; Cryptococcosis; Histoplasmosis.

Female Reproductive & Gynecological Diseases Endometriosis; Adenomyosis; Uterine Fibroids; Ovarian Torsion; Pelvic Inflammatory Disease; Vaginitis; Bacterial Vaginosis; Vulvovaginal Candidiasis; Vulvodynia; Pelvic Organ Prolapse; Female Infertility; Premature Ovarian Insufficiency.

Male Reproductive & Urological Diseases Male Infertility; Benign Prostatic Hyperplasia; Prostatitis; Epididymitis; Orchitis; Testicular Torsion; Cryptorchidism; Phimosis; Paraphimosis; Peyronie Disease; Balanitis; Hypogonadism.

Pregnancy & Postpartum Diseases Hyperemesis Gravidarum; Gestational Diabetes; Gestational Hypertension; Preeclampsia; Eclampsia; Puerperal Infection; Postpartum Endometritis; Postpartum Depression; Mastitis.

Pediatric & Neonatal Diseases Respiratory Distress Syndrome; Neonatal Sepsis; Birth Asphyxia; Necrotizing Enterocolitis; Diaper Rash; Croup; Bronchiolitis; Cerebral Palsy; Congenital Hypothyroidism; Kawasaki Disease; Rheumatic Fever; Hand-Foot-and-Mouth Disease.

Genetic & Chromosomal Diseases Cystic Fibrosis; Sickle Cell Disease; Thalassemia; Huntington Disease; Duchenne Muscular Dystrophy; Becker Muscular Dystrophy; Neurofibromatosis; Tuberous Sclerosis; Tay-Sachs Disease; Gaucher Disease; Achondroplasia; Hemochromatosis; Wilson Disease.

Cancers & Other Neoplasms Breast Cancer; Lung Cancer; Colorectal Cancer; Prostate Cancer; Cervical Cancer; Ovarian Cancer; Endometrial Cancer; Vulvar Cancer; Vaginal Cancer; Testicular Cancer; Penile Cancer; Bladder Cancer; Kidney Cancer; Thyroid Cancer; Oral Cancer; Oropharyngeal Cancer; Laryngeal Cancer; Esophageal Cancer; Stomach Cancer; Liver Cancer; Gallbladder Cancer; Pancreatic Cancer; Small-Intestinal Cancer; Anal Cancer; Melanoma; Basal-Cell Carcinoma; Squamous-Cell Carcinoma; Osteosarcoma; Ewing Sarcoma; Soft-Tissue Sarcoma; Glioma; Glioblastoma; Meningioma; Leukemia; Hodgkin Lymphoma; Non-Hodgkin Lymphoma; Multiple Myeloma; Neuroblastoma; Retinoblastoma.

Multisystem & Systemic Diseases Fibromyalgia; Sarcoidosis; Amyloidosis; Sepsis; Septic Shock.

Common Disorders

Scope: This reference-oriented list organizes human conditions conventionally classified as clinical disorders by medical specialty and organ system. In medical nomenclature, disorders represent disruptions to regular bodily structure or function (frequently functional, metabolic, neurobehavioral, or regulatory disturbances), complementing the disease classifications in Common Diseases and clinical signs in Common Syndromes. Every entity listed corresponds to a defined medical concept in the dictionary.

Mental & Behavioral Disorders Generalized Anxiety Disorder; Panic Disorder; Social Anxiety Disorder; Agoraphobia; Specific Phobia; Major Depressive Disorder; Persistent Depressive Disorder; Bipolar Disorder; Cyclothymic Disorder; Obsessive-Compulsive Disorder; Post-Traumatic Stress Disorder; Acute Stress Disorder; Attention-Deficit/Hyperactivity Disorder; Autism Spectrum Disorder; Schizophrenia; Schizoaffective Disorder; Delusional Disorder; Brief Psychotic Disorder; Eating Disorders; Alcohol Use Disorder; Opioid Use Disorder; Substance Abuse; Dissociative Identity Disorder; Depersonalization.

Personality Disorders Borderline Personality Disorder; Antisocial Personality Disorder; Narcissistic Personality Disorder; Avoidant Personality Disorder; Dependent Personality Disorder; Obsessive-Compulsive Personality Disorder; Paranoid Personality Disorder; Schizoid Personality Disorder; Schizotypal Personality Disorder; Histrionic Personality Disorder.

Eating & Nutrition Disorders Anorexia Nervosa; Bulimia Nervosa; Binge-Eating Disorder; Avoidant/Restrictive Food Intake Disorder; Pica; Rumination.

Impulse-Control & Conduct Disorders Intermittent Explosive Disorder; Kleptomania; Pyromania; Oppositional Defiant Disorder; Conduct Disorder; Trichotillomania; Excoriation Disorder.

Somatic & Related Disorders Somatic Symptom Disorder; Illness Anxiety Disorder; Conversion Disorder; Factitious Disorder.

Sleep-Wake Disorders Insomnia; Hypersomnia; Narcolepsy; Obstructive Sleep Apnea; Central Sleep Apnea; Sleepwalking; Night Terrors; Nightmare Disorder; REM Sleep Behavior Disorder; Restless Legs Syndrome; Delayed Sleep Phase.

Neurological & Movement Disorders Migraine; Cluster Headache; Tension-Type Headache; Epilepsy; Seizure Disorder; Essential Tremor; Parkinson's Disease; Dystonia; Chorea; Myoclonus; Tic Disorder; Tourette Disorder; Ataxia; Stiff-Person Syndrome.

Neurodevelopmental & Learning Disorders Intellectual Disability; Language Disorder; Stuttering; Specific Learning Disorder; Dyslexia; Developmental Coordination Disorder; Fetal Alcohol Spectrum Disorder.

Autonomic Disorders Dysautonomia; Postural Orthostatic Tachycardia Syndrome; Orthostatic Hypotension; Neurocardiogenic Syncope; Multiple System Atrophy; Autonomic Neuropathy.

Cardiovascular & Hemodynamic Disorders Heart Arrhythmia; Atrioventricular Block; Bundle Branch Block; Microvascular Angina; Cardiac Syndrome X; Orthostatic Intolerance.

Respiratory & Ventilatory Disorders Chronic Obstructive Pulmonary Disorder; Hypoventilation; Obesity Hypoventilation Syndrome; Pulmonary Fibrosis; Upper Airway Resistance Syndrome; Hyperventilation.

Digestive & Functional GI Disorders Irritable Bowel Syndrome; Functional Dyspepsia; Functional Constipation; Functional Diarrhea; Cyclic Vomiting Syndrome; Rumination; Achalasia; Diffuse Esophageal Spasm; Pelvic Floor Dysfunction; Gastroparesis.

Endocrine & Metabolic Disorders Hypothyroidism; Hyperthyroidism; Euthyroid Sick Syndrome; Hypopituitarism; Hyperprolactinemia; Adrenal Insufficiency; Cushing Syndrome; Hypoparathyroidism; Hyperparathyroidism; Polycystic Ovary Syndrome; Precocious Puberty; Delayed Puberty; Metabolic Syndrome.

Lipid & Inborn Metabolic Disorders Dyslipidemia; Hypercholesterolemia; Hypertriglyceridemia; Familial Hypercholesterolemia; Galactosemia; Phenylketonuria; Maple Syrup Urine Disease; Glycogen Storage Disease; Lysosomal Storage Disorders; Porphyria.

Electrolyte & Acid–Base Disorders Hyponatremia; Hypernatremia; Hypokalemia; Hyperkalemia; Hypocalcemia; Hypercalcemia; Hypomagnesemia; Hypermagnesemia; Hypophosphatemia; Hyperphosphatemia; Metabolic Acidosis; Metabolic Alkalosis; Respiratory Acidosis; Respiratory Alkalosis.

Bone Mineral Density Disorders Osteopenia; Osteoporosis; Osteomalacia; Renal Osteodystrophy; Fibrous Dysplasia; Paget Disease of Bone.

Musculoskeletal & Soft-Tissue Disorders Temporomandibular Joint Disorders; Rotator Cuff Tear; Rotator Cuff Injury; Herniated Disc; Degenerative Disc Disease; Myofascial Pain Syndrome; Tendinitis; Tendinopathy; Carpal Tunnel Syndrome; Cubital Tunnel Syndrome; Hypermobility Syndrome.

Blood & Coagulation Disorders Hemophilia A; Hemophilia B; Von Willebrand Disease; Thrombophilia; Glanzmann Thrombasthenia; Immune Thrombocytopenic Purpura; Aplastic Anemia; Myelodysplastic Syndrome.

Immune, Allergic & Eosinophilic Disorders Autoimmune Disease; Primary Immunodeficiency; Anaphylaxis; Angioedema; Mastocytosis; Eosinophilic Esophagitis; Eosinophilic Gastroenteritis.

Sexual Disorders Male Hypoactive Sexual Desire Disorder; Erectile Dysfunction; Premature Ejaculation; Delayed Ejaculation; Female Sexual Dysfunction; Female Orgasmic Disorder; Vaginismus; Dyspareunia; Gender Dysphoria.

Menstrual & Reproductive Disorders Dysmenorrhea; Amenorrhea; Abnormal Uterine Bleeding; Menorrhagia; Premenstrual Syndrome; Premenstrual Dysphoric Disorder; Anovulation; Premature Ovarian Insufficiency; Androgen Insensitivity Syndrome.

Urinary & Micturition Disorders Overactive Bladder; Urinary Incontinence; Stress Incontinence; Neurogenic Bladder; Urinary Retention; Bladder Outlet Obstruction.

Vision & Ocular Motility Disorders Refractive Disorder; Myopia; Hyperopia; Astigmatism; Presbyopia; Amblyopia; Strabismus; Color Vision Deficiency; Nystagmus; Dry Eye.

Hearing, Balance & Auditory Disorders Conductive Hearing Loss; Sensorineural Hearing Loss; Tinnitus; Auditory Processing Disorder; Benign Paroxysmal Positional Vertigo; Meniere Disease.

Speech, Language & Voice Disorders Language Disorder; Speech Disorder; Stuttering; Dysarthria; Apraxia; Aphasia; Voice Disorders; Dysphonia; Vocal Cord Dysfunction.

Hair, Nail & Pigmentation Disorders Alopecia; Alopecia Areata; Androgenetic Alopecia; Telogen Effluvium; Cicatricial Alopecia; Melasma; Vitiligo; Albinism.

Connective Tissue & Fascial Disorders Ehlers-Danlos Syndrome; Marfan Syndrome; Loeys-Dietz Syndrome; Mixed Connective Tissue Disease; Dupuytren Contracture; Plantar Fasciitis.

Mental Health Terms

Scope: This appendix groups commonly used mental-health terms for quick reference. It is an index, not a diagnostic or treatment guide. Preferred modern terms are used where an older or informal term may be misleading.

Foundations and assessment Acute; Affect; Chronic; Cognition; Diagnosis; Disorder; Distress; Functional Impairment; Mental Disorder; Mental Health; Mental Illness; Mood; Risk Factor; Syndrome.

Brain and nervous-system structures Amygdala; Axon; Brain; Brain Stem; Cerebellum; Cerebrum; Dendrite; Frontal Lobe; Gray Matter; Hippocampus; Hypothalamus; Limbic System; Locus Coeruleus; Myelin; Neuron; Neurotransmission; Neurotransmitter; Occipital Lobe; Parietal Lobe; Postsynaptic Membrane; Presynaptic Terminals; Receptor; Serotonin; Synapse; Temporal Lobe; Thalamus.

Common psychological and behavioral symptoms Anhedonia; Anxiety; Avolition; Cognitive Symptoms; Compulsions; Delusion; Euphoria; Obsessions; Panic Attack; Psychomotor Agitation; Psychomotor Retardation; Psychosis; Self-Harm; Stress; Trauma.

Anxiety, trauma, and obsessive-compulsive disorders Anxiety Disorders; Generalized Anxiety Disorder; Panic Disorder; Specific Phobia; Social Anxiety Disorder (Social Phobia); Separation Anxiety Disorder; Post-Traumatic Stress Disorder; Obsessive-Compulsive Disorder; Trichotillomania.

Mood disorders Bipolar Disorder; Bipolar II Disorder; Cyclothymic Disorder; Depression; Major Depressive Disorder; Major Depressive Episode; Persistent Depressive Disorder; Postpartum Depression; Seasonal Affective Disorder.

Psychotic and personality disorders Antisocial Personality Disorder; Borderline Personality Disorder; Narcissistic Personality Disorder; Personality Disorders; Brief Psychotic Disorder; Schizoaffective Disorder; Schizophrenia.

Neurodevelopmental and related conditions Conduct Disorder; Neurodevelopmental Disorders; Intellectual Disability; Neurocognitive Disorder; Functional Neurologic Disorder.

Psychiatric and psychological treatments Antidepressants; Antipsychotic Medicine; Atypical Antipsychotics; Benzodiazepine; Cognitive Behavioral Therapy; Dialectical Behavior Therapy; Electroconvulsive Therapy; Psychotherapy; Systematic Desensitization; Transcranial Magnetic Stimulation.

Care settings and professionals Community Mental-Health Treatment; Hospitalization; Psychiatry; Psychiatrist; Clinical Psychologist; Social Worker; Voluntary Psychiatric Admission.

Investigations and brain imaging Computed Tomography (CT); Electroencephalography; Functional MRI; Positron Emission Tomography; Single-Photon Emission Computed Tomography.

Suicide and safety terminology Suicidality; Suicide; Suicide Attempt; Suicidal Ideation; Suicidal Intent; Suicidal Plan; Suicide Risk Assessment.

Related scientific concepts Evidence-Based Practice; Neurosciences; Tolerance; Withdrawal.

Common Syndromes

Scope: This reference-oriented list organizes clinically significant medical syndromes by organ system and medical specialty. In medical terminology, a syndrome represents a characteristic constellation of concurrent signs, symptoms, or anatomical features that consistently occur together and point toward a common pathophysiological mechanism or etiology.

Cardiovascular Syndromes Acute Coronary Syndrome; Acute Aortic Syndrome; Sick Sinus Syndrome; Wolff–Parkinson–White Syndrome; Long QT Syndrome; Short QT Syndrome; Brugada Syndrome; Takotsubo Syndrome (Stress Cardiomyopathy); Eisenmenger Syndrome; Postural Orthostatic Tachycardia Syndrome (POTS); Postpericardiotomy Syndrome; Dressler Syndrome; Cardiac Syndrome X; Cardiorenal Syndrome.

Respiratory Syndromes Acute Respiratory Distress Syndrome (ARDS); Infant Respiratory Distress Syndrome; Obesity Hypoventilation Syndrome; Upper Airway Resistance Syndrome; Hepatopulmonary Syndrome; Acute Chest Syndrome; Kartagener Syndrome.

Gastrointestinal Syndromes Irritable Bowel Syndrome (IBS); Malabsorption Syndrome; Short Bowel Syndrome; Dumping Syndrome; Cyclic Vomiting Syndrome; Rumination Syndrome; Mallory–Weiss Syndrome; Zollinger–Ellison Syndrome; Boerhaave Syndrome; Afferent Loop Syndrome; Cannabinoid Hyperemesis Syndrome; Superior Mesenteric Artery Syndrome; Ogilvie Syndrome.

Liver & Biliary Syndromes Hepatorenal Syndrome; Hepatopulmonary Syndrome; Budd–Chiari Syndrome; Gilbert Syndrome; Crigler–Najjar Syndrome; Dubin–Johnson Syndrome; Rotor Syndrome; Reye Syndrome; Mirizzi Syndrome.

Kidney & Urinary Syndromes Nephrotic Syndrome; Nephritic Syndrome; Hemolytic Uremic Syndrome (HUS); Alport Syndrome; Fanconi Syndrome; Goodpasture Syndrome; Hepatorenal Syndrome; Nutcracker Syndrome.

Endocrine Syndromes Cushing Syndrome; Metabolic Syndrome; Syndrome of Inappropriate Antidiuretic Hormone Secretion (SIADH); Polycystic Ovary Syndrome (PCOS); Carcinoid Syndrome; Empty Sella Syndrome; Androgen Insensitivity Syndrome; Sheehan Syndrome; Nelson Syndrome; Polyglandular Autoimmune Syndromes (PAPS Type 1 and 2); Insulin Resistance Syndrome.

Neurological Syndromes Guillain–Barré Syndrome; Miller Fisher Syndrome; Lambert–Eaton Myasthenic Syndrome (LEMS); Restless Legs Syndrome; Locked-In Syndrome; Post-Concussion Syndrome; Cauda Equina Syndrome; Conus Medullaris Syndrome; Anterior Cord Syndrome; Central Cord Syndrome; Central Pain Syndrome; Alien Hand Syndrome; CADASIL Syndrome; Foix–Alajouanine Syndrome; Horner Syndrome; Tourette Syndrome; Lennox–Gastaut Syndrome; West Syndrome; Wernicke–Korsakoff Syndrome; Brown-Séquard Syndrome; Wallenberg Syndrome (Lateral Medullary Syndrome); Isaacs Syndrome.

Pain & Neuromuscular Syndromes Carpal Tunnel Syndrome; Cubital Tunnel Syndrome; Complex Regional Pain Syndrome (CRPS); Myofascial Pain Syndrome; Piriformis Syndrome; Compartment Syndrome; Thoracic Outlet Syndrome; Burning Mouth Syndrome; Tarsal Tunnel Syndrome; Greater Trochanteric Pain Syndrome.

Psychiatric & Behavioral Syndromes Serotonin Syndrome; Neuroleptic Malignant Syndrome; Capgras Syndrome; Cotard Syndrome; Münchausen Syndrome (Factitious Disorder); Korsakoff Syndrome; Amotivational Syndrome; Ekbom Syndrome (Delusional Parasitosis); Ganser Syndrome.

Rheumatologic & Autoimmune Syndromes Sjögren Syndrome; Antiphospholipid Syndrome; CREST Syndrome; Felty Syndrome; Behçet Syndrome; SAPHO Syndrome; Reactive Arthritis (formerly Reiter Syndrome); Churg–Strauss Syndrome (EGPA); Caplan Syndrome.

Hematological Syndromes Myelodysplastic Syndromes; Antiphospholipid Syndrome; Evans Syndrome; Hyperviscosity Syndrome; Tumor Lysis Syndrome; Hemophagocytic Syndrome (HLH); Acute Chest Syndrome; Thrombotic Thrombocytopenic Purpura (TTP).

Immunological Syndromes Severe Combined Immunodeficiency Syndrome; Acquired Immunodeficiency Syndrome (AIDS); Alpha-Gal Syndrome; Antisynthetase Syndrome; Capillary Leak Syndrome; Hyper-IgE Syndrome (Job Syndrome); Autoimmune Lymphoproliferative Syndrome (ALPS); Cytokine Release Syndrome (CRS); Immune Reconstitution Inflammatory Syndrome; Wiskott–Aldrich Syndrome.

Infectious & Postinfectious Syndromes Toxic Shock Syndrome (TSS); Post-COVID-19 Condition; Post-Polio Syndrome; Congenital Rubella Syndrome; Congenital Zika Syndrome; Waterhouse–Friderichsen Syndrome; Lemierre Syndrome.

Genetic & Chromosomal Syndromes Down Syndrome; Turner Syndrome; Klinefelter Syndrome; Edwards Syndrome; Patau Syndrome; DiGeorge Syndrome (22q11.2 Deletion); Fragile X Syndrome; Williams Syndrome; Prader–Willi Syndrome; Angelman Syndrome; Noonan Syndrome; Rett Syndrome; Cri-du-Chat Syndrome; Beckwith–Wiedemann Syndrome; McCune–Albright Syndrome.

Connective Tissue Syndromes Ehlers–Danlos Syndromes; Marfan Syndrome; Loeys–Dietz Syndrome; Stickler Syndrome; Joint Hypermobility Syndrome.

Pediatric Syndromes Down Syndrome; Fetal Alcohol Syndrome; Sudden Infant Death Syndrome (SIDS); Reye Syndrome; DiGeorge Syndrome; Beckwith–Wiedemann Syndrome; Nephrotic Syndrome; Hand-Foot-and-Mouth Syndrome.

Obstetric Syndromes HELLP Syndrome; Antiphospholipid Syndrome; Twin-to-Twin Transfusion Syndrome (TTTS); Amniotic Band Syndrome; Fetal Alcohol Syndrome.

Gynecological Syndromes Polycystic Ovary Syndrome; Premenstrual Syndrome (PMS); Asherman Syndrome; Genitourinary Syndrome of Menopause; Mayer–Rokitansky–Küster–Hauser (MRKH) Syndrome.

Male Reproductive Syndromes Klinefelter Syndrome; Androgen Insensitivity Syndrome; Kallmann Syndrome; Post-Vasectomy Pain Syndrome.

Cancer-Predisposition & Paraneoplastic Syndromes Lynch Syndrome (HNPCC); Li–Fraumeni Syndrome; Von Hippel–Lindau Syndrome; Multiple Endocrine Neoplasia (MEN 1 and 2); Carcinoid Syndrome; Tumor Lysis Syndrome; Superior Vena Cava Syndrome; Paraneoplastic Neurological Syndromes; Cancer Cachexia Syndrome.

Metabolic & Nutritional Syndromes Metabolic Syndrome; Refeeding Syndrome; Wernicke–Korsakoff Syndrome; Milk-Alkali Syndrome; Hungry Bone Syndrome; Fanconi–Bickel Syndrome.

Toxicological Syndromes (Toxidromes) Serotonin Syndrome; Neuroleptic Malignant Syndrome; Anticholinergic Syndrome; Cholinergic Syndrome; Sympathomimetic Syndrome; Sedative-Hypnotic Syndrome; Opioid Withdrawal Syndrome; Alcohol Withdrawal Syndrome.

Critical Care Syndromes Systemic Inflammatory Response Syndrome (SIRS); Multiple Organ Dysfunction Syndrome (MODS); Acute Respiratory Distress Syndrome (ARDS); Abdominal Compartment Syndrome; Fat Embolism Syndrome.

Sleep Syndromes Obstructive Sleep Apnea Syndrome; Central Sleep Apnea Syndromes; Restless Legs Syndrome; Kleine–Levin Syndrome; Delayed Sleep Phase Syndrome.

Eye & Cranial Nerve Syndromes Horner Syndrome; Adie Syndrome; Brown Syndrome; Duane Retraction Syndrome; Charles Bonnet Syndrome; Dry Eye Syndrome; Tolosa–Hunt Syndrome.

ENT & Otolaryngologic Syndromes Ramsay Hunt Syndrome; Eagle Syndrome; Empty Nose Syndrome; Gradenigo Syndrome; Samter Triad (Aspirin-Exacerbated Respiratory Disease).

Dermatological Syndromes Stevens–Johnson Syndrome; Toxic Epidermal Necrolysis; Staphylococcal Scalded Skin Syndrome; Sweet Syndrome; Gorlin Syndrome; Peutz–Jeghers Syndrome; DRESS Syndrome (Drug Reaction with Eosinophilia and Systemic Symptoms).

Vascular Syndromes Raynaud Syndrome; Superior Vena Cava Syndrome; Thoracic Outlet Syndrome; Subclavian Steal Syndrome; Leriche Syndrome; May–Thurner Syndrome; Nutcracker Syndrome.

Multisystem Syndromes Chronic Fatigue Syndrome (ME/CFS); Postural Orthostatic Tachycardia Syndrome (POTS); Ehlers–Danlos Syndromes; Metabolic Syndrome; Antiphospholipid Syndrome; Behcet Syndrome.

Rare Diseases

Scope: This reference-oriented list organizes clinically significant rare diseases (orphan diseases) by organ system and clinical domain. A rare disease is typically defined as one affecting fewer than 1 in 2,000 individuals (EU criteria) or fewer than 200,000 people in the United States. It highlights high-importance benchmark conditions characterized by distinct genetic, metabolic, or autoimmune etiologies.

Genetic & Chromosomal Diseases Turner Syndrome; Klinefelter Syndrome; Fragile X Syndrome; Williams Syndrome; Prader–Willi Syndrome; Angelman Syndrome; Noonan Syndrome; 22q11.2 Deletion Syndrome; Cri-du-Chat Syndrome; Hutchinson–Gilford Progeria Syndrome; Cornelia de Lange Syndrome.

Neurological & Neurogenetic Diseases Huntington Disease; Amyotrophic Lateral Sclerosis (ALS); Spinal Muscular Atrophy (SMA); Friedreich Ataxia; Ataxia–Telangiectasia; Rett Syndrome; Batten Disease (Neuronal Ceroid Lipofuscinosis); Creutzfeldt–Jakob Disease; Fatal Familial Insomnia; Progressive Supranuclear Palsy; Multiple System Atrophy; Stiff-Person Syndrome.

Neuromuscular & Peripheral Nerve Diseases Duchenne Muscular Dystrophy; Becker Muscular Dystrophy; Facioscapulohumeral Muscular Dystrophy; Limb-Girdle Muscular Dystrophies; Congenital Muscular Dystrophies; Myasthenia Gravis; Charcot–Marie–Tooth Disease; Amyloid Polyneuropathy.

Inborn Errors of Metabolism & Storage Diseases Gaucher Disease; Fabry Disease; Pompe Disease; Tay–Sachs Disease; Niemann–Pick Disease; Krabbe Disease; Metachromatic Leukodystrophy; X-Linked Adrenoleukodystrophy; Alkaptonuria; Homocystinuria; Phenylketonuria; Maple Syrup Urine Disease; Von Gierke Disease (GSD I); Mucopolysaccharidoses (Hurler, Hunter, Sanfilippo Syndromes).

Blood & Bone Marrow Diseases Hemophilia A; Hemophilia B; Paroxysmal Nocturnal Hemoglobinuria (PNH); Fanconi Anemia; Diamond–Blackfan Anemia; Pure Red Cell Aplasia; Thrombotic Thrombocytopenic Purpura (TTP); Atypical Hemolytic Uremic Syndrome; Cryoglobulinemia; Castleman Disease.

Immune, Autoinflammatory & Histiocytic Diseases Severe Combined Immunodeficiency (SCID); Common Variable Immunodeficiency; Chronic Granulomatous Disease; Wiskott–Aldrich Syndrome; Familial Mediterranean Fever; Cryopyrin-Associated Periodic Syndromes (CAPS); Hemophagocytic Lymphohistiocytosis (HLH); Histiocytosis X (Langerhans Cell Histiocytosis).

Rheumatologic & Autoimmune Diseases Systemic Sclerosis (Scleroderma); Granulomatosis with Polyangiitis; Microscopic Polyangiitis; Polyarteritis Nodosa; Behçet Disease; Takayasu Arteritis; Eosinophilic Granulomatosis with Polyangiitis (Churg–Strauss); Relapsing Polychondritis; Adult-Onset Still Disease.

Connective Tissue & Dermatological Genetic Diseases Ehlers–Danlos Syndromes (Vascular and Classic Types); Marfan Syndrome; Loeys–Dietz Syndrome; Osteogenesis Imperfecta; Pseudoxanthoma Elasticum; Epidermolysis Bullosa; Ichthyosis; Xeroderma Pigmentosum; Pemphigus Vulgaris; Bullous Pemphigoid.

Endocrine Diseases Addison Disease; Congenital Adrenal Hyperplasia; Acromegaly; Cushing Disease (Pituitary-Dependent); Hypoparathyroidism; Multiple Endocrine Neoplasia (MEN 1 and 2); Pheochromocytoma; Autoimmune Polyglandular Syndromes.

Hepatic & Biliary Diseases Wilson Disease; Alpha-1 Antitrypsin Deficiency; Primary Biliary Cholangitis; Primary Sclerosing Cholangitis; Biliary Atresia; Progressive Familial Intrahepatic Cholestasis; Caroli Disease.

Renal & Urinary Diseases Alport Syndrome; Cystinosis; Primary Hyperoxaluria; Bartter Syndrome; Gitelman Syndrome; Polycystic Kidney Disease (Autosomal Recessive Type); Medullary Cystic Kidney Disease.

Pulmonary Diseases Idiopathic Pulmonary Fibrosis; Pulmonary Arterial Hypertension; Lymphangioleiomyomatosis (LAM); Pulmonary Alveolar Proteinosis; Primary Ciliary Dyskinesia.

Cardiovascular Diseases Brugada Syndrome; Long QT Syndrome; Short QT Syndrome; Arrhythmogenic Right Ventricular Cardiomyopathy; Fibromuscular Dysplasia; Takayasu Arteritis.

Gastrointestinal Diseases Hirschsprung Disease; Achalasia; Eosinophilic Esophagitis; Short Bowel Syndrome; Hereditary Pancreatitis; Microvillus Inclusion Disease.

Eye & Visual Pathway Diseases Retinitis Pigmentosa; Stargardt Disease; Leber Hereditary Optic Neuropathy; Leber Congenital Amaurosis; Retinoblastoma; Aniridia; Best Disease.

Bone, Skeletal & Cartilage Diseases Achondroplasia; Fibrodysplasia Ossificans Progressiva (FOP); Hypophosphatasia; Osteopetrosis (Marble Bone Disease); Cleidocranial Dysplasia; Thanatophoric Dysplasia.

Rare Infectious & Prion Diseases Creutzfeldt–Jakob Disease; Variant CJD; Kuru; Whipple Disease; Progressive Multifocal Leukoencephalopathy (PML); Ebola Virus Disease; Marburg Virus Disease; Lassa Fever.

Rare Cancers & Neoplasms Malignant Mesothelioma; Gastrointestinal Stromal Tumor (GIST); Neuroendocrine Tumors; Ewing Sarcoma; Osteosarcoma; Retinoblastoma; Uveal Melanoma; Adrenocortical Carcinoma; Thymoma; Merkel Cell Carcinoma; Kaposi Sarcoma; Burkitt Lymphoma.

Multisystem & Inflammatory Diseases Erdheim–Chester Disease; POEMS Syndrome; VEXAS Syndrome; IgG4-Related Disease; Systemic Amyloidosis; Castleman Disease.

Genetic Diseases

Scope: This reference-oriented list organizes human genetic diseases by mode of inheritance, cytogenetic classification, and molecular pathophysiological mechanism. Genetic diseases result from alterations in DNA sequences, ranging from single-nucleotide variants to gross chromosomal rearrangements and non-Mendelian mechanisms, providing a focused reference complementing Common Diseases and Rare Diseases.

Autosomal Dominant Diseases Huntington Disease; Marfan Syndrome; Neurofibromatosis Type 1 (von Recklinghausen Disease); Neurofibromatosis Type 2; Familial Hypercholesterolemia; Polycystic Kidney Disease (Autosomal Dominant, ADPKD); Achondroplasia; Tuberous Sclerosis Complex; Hereditary Spherocytosis; Von Hippel–Lindau Syndrome; Li–Fraumeni Syndrome; Multiple Endocrine Neoplasia (MEN 1 and 2); Myotonic Dystrophy (Type 1 and 2); Hereditary Non-Polyposis Colorectal Cancer (Lynch Syndrome); Familial Adenomatous Polyposis (FAP); Osteogenesis Imperfecta (Type I); Ehlers–Danlos Syndrome (Hypermobile and Classic Types).

Autosomal Recessive Diseases Cystic Fibrosis; Sickle-Cell Disease; Beta-Thalassemia; Alpha-Thalassemia; Phenylketonuria (PKU); Gaucher Disease; Tay–Sachs Disease; Niemann–Pick Disease; Wilson Disease; Hereditary Hemochromatosis; Alpha-1 Antitrypsin Deficiency; Spinal Muscular Atrophy (SMA); Friedreich Ataxia; Alkaptonuria; Homocystinuria; Maple Syrup Urine Disease; Congenital Adrenal Hyperplasia; Galactosemia; Glycogen Storage Diseases (von Gierke, Pompe, Cori); Ataxia–Telangiectasia; Fanconi Anemia; Xeroderma Pigmentosum; Bloom Syndrome; Ellis–van Creveld Syndrome; Kartagener Syndrome.

X-Linked Recessive Diseases Duchenne Muscular Dystrophy; Becker Muscular Dystrophy; Hemophilia A (Factor VIII Deficiency); Hemophilia B (Factor IX Deficiency); Glucose-6-Phosphate Dehydrogenase (G6PD) Deficiency; Red-Green Color Blindness; Fragile X Syndrome; Lesch–Nyhan Syndrome; Wiskott–Aldrich Syndrome; X-Linked Agammaglobulinemia (Bruton Tyrosine Kinase Deficiency); X-Linked Adrenoleukodystrophy; Hunter Syndrome (MPS II); Fabry Disease; Menkes Disease; Alport Syndrome (X-Linked Type); Chronic Granulomatous Disease (X-Linked Form).

X-Linked Dominant Diseases Rett Syndrome (MECP2 Mutation); Incontinentia Pigmenti; X-Linked Hypophosphatemic Rickets; Aicardi Syndrome; Focal Dermal Hypoplasia (Goltz Syndrome); Fragile X-Associated Tremor/Ataxia Syndrome (FXTAS).

Y-Linked (Holandric) Conditions Y-Chromosome Infertility (AZF Deletions); SRY Gene Deletions/Mutations; Swyer Syndrome (46,XY Gonadal Dysgenesis); Retinitis Pigmentosa (Y-Linked Form); Hypertrichosis Pinnae Auris.

Mitochondrial (Maternal) Genetic Diseases Leber Hereditary Optic Neuropathy (LHON); Mitochondrial Encephalomyopathy, Lactic Acidosis, and Stroke-Like Episodes (MELAS); Myoclonic Epilepsy with Ragged Red Fibers (MERRF); Neuropathy, Ataxia, and Retinitis Pigmentosa (NARP); Leigh Syndrome (Subacute Necrotizing Encephalomyelopathy); Kearns–Sayre Syndrome; Pearson Syndrome; Chronic Progressive External Ophthalmoplegia (CPEO).

Chromosomal Aneuploidies (Autosomal) Trisomy 21 (Down Syndrome); Trisomy 18 (Edwards Syndrome); Trisomy 13 (Patau Syndrome); Trisomy 8 (Warkany Syndrome 2); Trisomy 9 Mosaicism.

Sex Chromosome Aneuploidies 45,X (Turner Syndrome); 47,XXY (Klinefelter Syndrome); 47,XXX (Triple X Syndrome); 47,XYY (Jacob Syndrome); 48,XXYY Syndrome; 48,XXXY Syndrome; Tetrasomy X.

Microdeletion & Microduplication Syndromes 22q11.2 Deletion Syndrome (DiGeorge Syndrome, Velocardiofacial Syndrome); 5p Deletion Syndrome (Cri-du-Chat Syndrome); 4p Deletion Syndrome (Wolf–Hirschhorn Syndrome); 7q11.23 Deletion Syndrome (Williams Syndrome); 17p11.2 Deletion Syndrome (Smith–Magenis Syndrome); 17p11.2 Duplication Syndrome (Potocki–Lupski Syndrome); 1p36 Deletion Syndrome; 15q11–q13 Deletion; Rubinstein–Taybi Syndrome.

Genomic Imprinting Disorders Prader–Willi Syndrome (Maternal Imprinting / Paternal 15q11–q13 Loss); Angelman Syndrome (Paternal Imprinting / Maternal UBE3A Loss); Beckwith–Wiedemann Syndrome (11p15.5 Alteration); Silver–Russell Syndrome; Pseudohypoparathyroidism (Albright Hereditary Osteodystrophy); Uniparental Disomy Syndromes.

Trinucleotide Repeat Expansion Diseases Huntington Disease (CAG Repeat); Fragile X Syndrome (CGG Repeat); Myotonic Dystrophy Type 1 (CTG Repeat); Friedreich Ataxia (GAA Repeat); Spinocerebellar Ataxias (SCA Types 1, 2, 3, 6, 7); Dentatorubral-Pallidoluysian Atrophy (DRPLA); Spinal and Bulbar Muscular Atrophy (Kennedy Disease).

Lysosomal Storage Diseases Gaucher Disease (Glucocerebrosidase Deficiency); Tay–Sachs Disease (Hexosaminidase A Deficiency); Niemann–Pick Disease (Types A, B, C); Fabry Disease (Alpha-Galactosidase A Deficiency); Pompe Disease (Acid Alpha-Glucosidase Deficiency); Krabbe Disease; Metachromatic Leukodystrophy; Mucopolysaccharidoses (Hurler, Scheie, Hunter, Sanfilippo, Morquio, Maroteaux–Lamy, Sly Syndromes); Fucosidosis; Sialidosis.

Connective Tissue Genetic Disorders Marfan Syndrome (FBN1 Mutation); Ehlers–Danlos Syndromes; Loeys–Dietz Syndrome; Osteogenesis Imperfecta (Brittle Bone Disease); Cutis Laxa; Stickler Syndrome; Pseudoxanthoma Elasticum; Alport Syndrome.

Hereditary Cancer Predisposition Syndromes Hereditary Breast and Ovarian Cancer Syndrome (BRCA1, BRCA2); Lynch Syndrome (MLH1, MSH2, MSH6, PMS2); Familial Adenomatous Polyposis (APC Mutation); Li–Fraumeni Syndrome (TP53 Mutation); Multiple Endocrine Neoplasia Types 1, 2A, 2B; Von Hippel–Lindau Disease; Cowden Syndrome (PTEN Hamartoma Tumor Syndrome); Peutz–Jeghers Syndrome; Nevoid Basal Cell Carcinoma Syndrome (Gorlin Syndrome); Retinoblastoma (RB1 Mutation); Wilms Tumor Predisposition (WT1).

Inherited Diseases

Classification: The first groups show the most common inheritance pattern. The later clinical categories overlap, and several conditions have rare alternate patterns or genetically heterogeneous forms.

Autosomal Dominant Achondroplasia; Autosomal Dominant Polycystic Kidney Disease (ADPKD); Familial Adenomatous Polyposis; Familial Hypercholesterolemia; Hereditary Angioedema (most forms); Huntington Disease; Marfan Syndrome; Multiple Endocrine Neoplasia; Neurofibromatosis Type 1; Neurofibromatosis Type 2; Tuberous Sclerosis Complex; Von Hippel–Lindau Disease.

Autosomal Recessive Alpha-Thalassemia; Beta-Mannosidosis; Beta-Thalassemia; Congenital Adrenal Hyperplasia; Cystic Fibrosis; Familial Mediterranean Fever; Gaucher Disease; Hemochromatosis; Phenylketonuria (PKU); Sickle-Cell Disease; Spinal Muscular Atrophy; Tay–Sachs Disease; Wilson Disease.

X-Linked Becker Muscular Dystrophy; Duchenne Muscular Dystrophy; Fragile X Syndrome; Glucose-6-Phosphate Dehydrogenase (G6PD) Deficiency; Hemophilia A; Hemophilia B; X-Linked Agammaglobulinemia.

Variable or Genetically Heterogeneous Alport Syndrome (X-linked, autosomal dominant, or autosomal recessive); Charcot–Marie–Tooth Disease (multiple inheritance patterns); Hereditary Spherocytosis (usually autosomal dominant, sometimes autosomal recessive); Retinitis Pigmentosa (autosomal dominant, autosomal recessive, X-linked, or mitochondrial); Von Willebrand Disease (usually autosomal dominant, with some autosomal recessive forms).

Mitochondrial MELAS; MERRF; Leber Hereditary Optic Neuropathy (LHON).

Inherited Metabolic Disorders Maple Syrup Urine Disease; Galactosemia; Homocystinuria; Glycogen Storage Diseases; Lysosomal Storage Diseases; Urea-Cycle Disorders.

Inherited Neurological or Neuromuscular Disorders Charcot–Marie–Tooth Disease; Spinal Muscular Atrophy; Hereditary Spastic Paraplegia; Friedreich Ataxia.

Inherited Blood Disorders Sickle-Cell Disease; Alpha-Thalassemia; Beta-Thalassemia; Hereditary Spherocytosis; Hemophilia A; Hemophilia B; some forms of Von Willebrand Disease.

Inherited Connective-Tissue or Skeletal Disorders Osteogenesis Imperfecta; Ehlers–Danlos Syndromes; Marfan Syndrome; Achondroplasia.

Inherited Renal Disorders Alport Syndrome; Autosomal Dominant Polycystic Kidney Disease (ADPKD); Autosomal Recessive Polycystic Kidney Disease (ARPKD); Cystinuria.

Inherited Eye Disorders Retinitis Pigmentosa; Stargardt Disease; congenital color-vision deficiencies; some forms of congenital cataract.

Hereditary Cancer Syndromes Lynch Syndrome; Familial Adenomatous Polyposis; Hereditary Breast and Ovarian Cancer Syndrome; Multiple Endocrine Neoplasia (MEN) Syndromes; Li–Fraumeni Syndrome; Von Hippel–Lindau Disease.

Common Symptoms

Scope: For a medical dictionary or disease-reference project, symptoms are best organized by body system, because a flat alphabetical list quickly becomes difficult to use. Here is a broad list of common medical symptoms.

General / Systemic Fatigue; Weakness; Malaise; Fever; Chills; Night Sweats; Excessive Sweating; Hot Flashes; Flushing; Loss of Appetite; Increased Appetite; Unexplained Weight Loss; Unexplained Weight Gain; Excessive Thirst; Dehydration; Exercise Intolerance; Lethargy; Generalized Body Aches.

Pain Headache; Chest Pain; Pleuritic Chest Pain; Abdominal Pain; Cramping or Colicky Pain; Back Pain; Neck Pain; Joint Pain; Muscle Pain; Bone Pain; Pelvic Pain; Flank Pain; Facial Pain; Eye Pain; Earache; Sore Throat; Toothache; Painful Urination; Rectal Pain; Burning Pain; Radiating Pain; Throbbing Pain.

Neurological Dizziness; Vertigo; Fainting; Light-Headedness; Orthostatic Lightheadedness; Numbness; Tingling; Burning Sensation; Electric Shock Sensations; Tremor; Muscle Weakness; Paralysis; Seizures; Confusion; Memory Problems; Forgetfulness; Difficulty Concentrating; Brain Fog; Loss of Balance; Poor Coordination; Slurred Speech; Altered Consciousness; Aura.

Eye / Vision Blurred Vision; Double Vision; Loss of Vision; Reduced Visual Acuity; Night Blindness; Eye Redness; Watery Eyes; Dry Eyes; Gritty or Foreign-Body Sensation; Eye Strain; Itchy Eyes; Photophobia; Floaters; Flashes of Light; Halos Around Lights; Sensitivity to Glare.

Ear / Hearing Hearing Loss; Tinnitus; Ear Discharge; Ear Fullness; Ear Pain; Sensitivity to Sound; Popping or Clicking in Ears.

Nose / Sinus Runny Nose; Nasal Congestion; Sneezing; Nosebleed; Loss of Smell; Reduced Smell; Sinus Pressure; Postnasal Drip; Frequent Throat Clearing.

Mouth / Throat Dry Mouth; Mouth Ulcers; Bad Breath; Altered Taste; Loss of Taste; Bleeding Gums; Hoarseness; Sore Throat; Difficulty Swallowing; Painful Swallowing; Lump in Throat; Burning Mouth Sensation.

Respiratory Cough; Dry Cough; Productive Cough; Coughing up Blood; Shortness of Breath; Shortness of Breath on Exertion; Wheezing; Rapid Breathing; Noisy Breathing; Sputum Production; Chest Tightness; Air Hunger; Choking Sensation; Inability to Take a Deep Breath.

Cardiovascular Palpitations; Rapid Heartbeat; Slow Heartbeat; Irregular Heartbeat; Heart Fluttering; Chest Pressure; Chest Squeezing; Shortness of Breath on Exertion; Orthopnea; Paroxysmal Nocturnal Dyspnea; Fainting; Ankle or Leg Swelling; Cold Extremities; Intermittent Claudication; Cyanosis.

Gastrointestinal Nausea; Vomiting; Vomiting Blood; Heartburn; Acid Regurgitation; Indigestion; Bloating; Abdominal Distension; Abdominal Cramps; Excessive Gas; Belching; Difficulty Passing Gas; Diarrhea; Constipation; Straining at Stool; Tenesmus; Blood in Stool; Black or Tarry Stool; Mucus in Stool; Fecal Urgency; Fecal Incontinence; Early Satiety; Anal Itching.

Urinary Frequent Urination; Urinary Urgency; Painful Urination; Excessive Urination; Reduced Urination; Inability to Urinate; Urinary Hesitancy; Post-Void Dribbling; Nighttime Urination; Blood in Urine; Urinary Incontinence; Weak Urinary Stream; Bladder Spasms; Foamy Urine.

Musculoskeletal Joint Stiffness; Morning Stiffness; Joint Swelling; Reduced Range of Motion; Joint Clicking or Grating; Joint Instability or Giving Way; Muscle Cramps; Muscle Spasms; Muscle Stiffness; Muscle Twitches; Restless Legs Sensation; Limb Pain; Difficulty Walking; Limping.

Skin Itching; Rash; Redness; Dry Skin; Scaling or Flaking; Skin Discoloration; Bruising; Easy Bruisability; Swelling; Hives; Blisters; Skin Ulcers; Lumps; Excessive Sweating; Reduced Sweating; Hair Loss; Hair Shedding; Brittle Nails; Crawling Sensation on Skin; Skin Tenderness.

Endocrine / Metabolic Excessive Thirst; Excessive Hunger; Frequent Urination; Heat Intolerance; Cold Intolerance; Unexplained Weight Change; Excessive Sweating; Hot Flashes.

Sleep-Related Insomnia; Difficulty Falling Asleep; Difficulty Staying Asleep; Frequent Awakening; Early Morning Awakening; Non-Restorative Sleep; Excessive Daytime Sleepiness; Snoring; Gasping in Sleep; Restless Sleep; Nightmares; Sleepwalking.

Psychological / Behavioral Anxiety; Depressed Mood; Irritability; Agitation; Mood Changes; Loss of Interest or Pleasure; Poor Concentration; Racing Thoughts; Restlessness; Sleep Disturbance; Appetite Changes; Feeling Detached.

Reproductive / Gynecological Pelvic Pain; Painful Menstruation; Heavy Menstrual Bleeding; Irregular Menstruation; Missed Periods; Vaginal Discharge; Vaginal Bleeding; Bleeding Between Periods; Vaginal Itching; Painful Intercourse; Hot Flashes.

Male Reproductive Erectile Dysfunction; Reduced Libido; Testicular Pain; Testicular Swelling; Penile Discharge; Painful Ejaculation; Scrotal Heaviness.

Blood / Lymphatic Easy Bruising; Prolonged Bleeding; Pale Skin; Swollen Lymph Nodes; Recurrent Infections; Petechiae.

Allergic Itching; Sneezing; Watery Eyes; Nasal Congestion; Hives; Facial Swelling; Lip or Tongue Swelling; Wheezing; Shortness of Breath; Anaphylactic Reactions Sensation.

Clinical Note: For a comprehensive medical dictionary, it is essential to distinguish symptoms (subjective experiences reported by the patient, such as nausea or pain) from clinical signs (objectively observed physical findings detected on examination, such as jaundice, edema, or tachycardia). Mixing them is common in general health lists, but an authoritative reference maintains clear separation among Symptoms, Clinical Signs, Syndromes, and Diseases/Disorders categories.

Clinical Signs

Scope: A clinical sign is an objective abnormality that can be observed, measured, elicited, or detected by a clinician, unlike a symptom, which is experienced and reported by the patient. For a medical dictionary, the following system-based classification is useful.

General / Vital Signs Fever; Hypothermia; Tachycardia; Bradycardia; Tachypnea; Bradypnea; Hypertension; Hypotension; Orthostatic Hypotension; Pulsus Paradoxus; Wide Pulse Pressure; Narrow Pulse Pressure; Hypoxemia; Central Cyanosis; Peripheral Cyanosis; Altered Level of Consciousness; Cachexia; Pallor; Jaundice; Dehydration; Pitting Edema; Non-Pitting Edema; Generalized Lymphadenopathy; Clubbing.

Skin Signs Erythema; Pallor; Cyanosis; Jaundice; Petechiae; Purpura; Ecchymosis; Spider Angiomas; Palmar Erythema; Splinter Hemorrhages; Osler Nodes; Janeway Lesions; Rash; Urticaria; Vesicles; Bullae; Pustules; Papules; Nodules; Ulcers; Scaling; Excoriations; Lichenification; Skin Thickening; Hyperpigmentation; Hypopigmentation; Alopecia; Diaphoresis; Reduced Skin Turgor.

Head & Face Signs Facial Asymmetry; Facial Edema; Ptosis; Proptosis; Moon Facies; Mask-Like Facies; Temporal Wasting; Kayser-Fleischer Rings; Arcus Senilis; Xanthelasma; Subconjunctival Hemorrhage.

Eye Signs Conjunctival Pallor; Conjunctival Injection; Scleral Icterus; Anisocoria; Nystagmus; Strabismus; Ptosis; Proptosis; Papilledema; Absent Pupillary Reflex; Abnormal Red Reflex; Corneal Opacity; Roth Spots; Argyll Robertson Pupil.

Ear, Nose & Throat Signs Tympanic Membrane Erythema; Tympanic Membrane Perforation; Otorrhea; Nasal Polyps; Epistaxis; Tonsillar Enlargement; Tonsillar Exudate; Pharyngeal Erythema; Oral Ulcers; Oral Thrush; Strawberry Tongue; Coated Tongue; Koplik Spots; Gingival Hyperplasia; Peritonsillar Bulge; Deviated Uvula.

Neck Signs Cervical Lymphadenopathy; Goiter; Thyroid Nodule; Neck Stiffness; Elevated Jugular Venous Pressure; Carotid Bruit; Tracheal Deviation; Pemberton Sign.

Cardiovascular Signs Tachycardia; Bradycardia; Irregular Pulse; Weak Pulse; Bounding Pulse; Pulsus Alternans; Corrigan Pulse; Water-Hammer Pulse; Pulse Deficit; Displaced Apex Beat; Heart Murmur; Systolic Murmur; Diastolic Murmur; Gallop Rhythm; Third Heart Sound; Fourth Heart Sound; Pericardial Friction Rub; Cardiac Thrill; Ventricular Heave; Elevated Jugular Venous Pressure; Peripheral Edema; Delayed Capillary Refill.

Respiratory Signs Tachypnea; Bradypnea; Apnea; Cyanosis; Accessory-Muscle Use; Nasal Flaring; Chest Retractions; Barrel Chest; Pectus Excavatum; Pectus Carinatum; Asymmetric Chest Expansion; Subcutaneous Emphysema; Reduced Air Entry; Wheezing; Crackles; Rhonchi; Stridor; Bronchial Breath Sounds; Dullness to Percussion; Hyperresonance; Pleural Friction Rub.

Abdominal & Gastrointestinal Signs Abdominal Distension; Abdominal Tenderness; Guarding; Rigidity; Rebound Tenderness; Shifting Dullness; Fluid Wave; Caput Medusae; Palpable Abdominal Mass; Hepatomegaly; Splenomegaly; Ascites; Succussion Splash; Abnormal Bowel Sounds; Abdominal Bruit; Visible Peristalsis; Rectal Bleeding; Melena.

Neurological Signs Altered Consciousness; Disorientation; Abnormal Gait; Festinating Gait; Spastic Hemiplegic Gait; Ataxia; Tremor; Asterixis; Fasciculations; Muscle Wasting; Pronator Drift; Cogwheel Rigidity; Lead-Pipe Rigidity; Abnormal Muscle Tone; Hyperreflexia; Hyporeflexia; Areflexia; Pathological Reflexes; Clonus; Dysmetria; Dysdiadochokinesia; Sensory Deficit; Motor Weakness on Examination; Cranial Nerve Deficit; Nystagmus; Neck Rigidity.

Musculoskeletal Signs Joint Swelling; Joint Deformity; Joint Effusion; Restricted Range of Motion; Crepitus; Muscle Wasting; Muscle Spasm; Heberden Nodes; Bouchard Nodes; Swan-Neck Deformity; Boutonniere Deformity; Baker Cyst; Limb Deformity; Abnormal Posture; Scoliosis; Kyphosis; Lordosis; Abnormal Gait.

Renal & Urinary Signs Bladder Distension; Costovertebral-Angle Tenderness; Peripheral Edema; Hematuria on Testing; Proteinuria; Oliguria; Anuria.

Endocrine Signs Goiter; Exophthalmos; Tremor; Abnormal Hair Distribution; Hirsutism; Striae; Acanthosis Nigricans; Moon Facies; Buffalo Hump; Peripheral Edema.

Hematological Signs Pallor; Petechiae; Purpura; Ecchymoses; Generalized Lymphadenopathy; Splenomegaly; Hepatomegaly; Active Bleeding.

Peripheral Vascular Signs Peripheral Edema; Pitting Edema; Varicose Veins; Absent or Diminished Peripheral Pulses; Cool Extremities; Delayed Capillary Refill; Venous Ulcers; Arterial Ulcers; Peripheral Cyanosis.

Gynecological Signs Abnormal Vaginal Bleeding on Examination; Vaginal or Cervical Discharge; Cervical Lesions; Pelvic Mass; Uterine Enlargement; Adnexal Mass; Cervical-Motion Tenderness; Chandelier Sign.

Male Genital Signs Testicular Swelling; Testicular Mass; Scrotal Edema; Penile Discharge; Genital Ulceration; Phimosis; Hydrocele; Varicocele.

Pediatric & Neonatal Signs Poor Weight Gain on Growth Charts; Growth Retardation; Bulging Fontanelle; Sunken Fontanelle; Neonatal Jaundice; Central Cyanosis; Chest Retractions; Abnormal Primitive Reflexes; Gowers Sign.

Named Clinical Signs Babinski Sign; Murphy Sign; Kernig Sign; Brudzinski Sign; Rovsing Sign; Cullen Sign; Grey Turner Sign; Trousseau Sign; Chvostek Sign; Romberg Sign; Hoffmann Sign; Courvoisier Sign; Kussmaul Sign; Battle Sign; Nikolsky Sign; Auspitz Sign; Ortolani Sign; Barlow Sign; Trendelenburg Sign; McBurney Sign; Tinel Sign; Phalen Sign; Lhermitte Sign; Blumberg Sign; Kehr Sign; Hamman Sign; Homans Sign; Psoas Sign; Obturator Sign; Lachman Sign; Anterior Drawer Sign.

Clinical Note: A comprehensive medical reference can contain 500–1,000+ clinical signs, encompassing physical examination findings, named signs, dermatological signs, radiological signs, and laboratory markers.

Common Congenital Anomalies

Scope: A congenital anomaly is a structural abnormality present at birth, whether genetic, chromosomal, or environmental in origin. This list complements the appendices of Common Diseases, Common Disorders, and Common Syndromes.

Orofacial & Head Anomalies Cleft Lip; Cleft Palate.

Neural Tube & Brain Anomalies Spina Bifida; Anencephaly; Encephalocele; Hydrocephalus.

Thorax & Abdominal Wall Anomalies Congenital Diaphragmatic Hernia; Omphalocele; Gastroschisis.

Digestive System Anomalies Imperforate Anus; Hirschsprung Disease.

Urinary & Genital Anomalies Hypospadias; Epispadias.

Limb & Skeletal Anomalies Clubfoot; Developmental Dysplasia of the Hip; Polydactyly; Syndactyly.

Eye Anomalies Congenital Cataract.

Heart & Great-Vessel Anomalies Congenital Heart Defects; Ventricular Septal Defect; Atrial Septal Defect; Patent Ductus Arteriosus; Tetralogy of Fallot; Coarctation of the Aorta.

Common Findings, Lesions & Conditions

Scope: This companion list collects clinical findings, structural lesions, symptom patterns, and obstetric events that are not diseases in themselves but are frequently encountered in clinical work, imaging, and laboratory testing. It complements the appendices of Common Diseases, Common Disorders, and Common Syndromes.

Cardiovascular & Respiratory Findings Pericardial Effusion; Pleural Effusion; Pneumothorax; Hemothorax; Atelectasis.

Abdominal & Pancreatic Findings Esophageal Varices; Gallstones; Biliary Obstruction; Cholestasis; Pancreatic Pseudocyst; Pancreatic Cysts; Pancreatic Necrosis.

Renal & Urinary Findings Kidney Stones; Hydronephrosis.

Head, Neck & Airway Findings Thyroid Nodules; Nasal Polyps; Deviated Nasal Septum; Vocal-Cord Nodules; Earwax Impaction; Tympanic Membrane Perforation.

Oral & Dental Findings Tooth Erosion; Impacted Teeth; Malocclusion; Geographic Tongue.

Eye & Skin Findings Chalazion; Stye; Keloids; Ingrown Toenail.

Genital & Reproductive Findings Ovarian Cysts; Bartholin Cyst; Varicocele; Hydrocele; Spermatocele.

Pain & Symptom Conditions Low-Back Pain; Sciatica.

Metabolic Risk & Allergic States Prediabetes; Anaphylaxis.

Obstetric & Labor Events Ectopic Pregnancy; Miscarriage; Recurrent Pregnancy Loss; Placenta Previa; Placental Abruption; Placenta Accreta Spectrum; Premature Rupture of Membranes; Preterm Labor; Fetal Growth Restriction; Obstructed Labor; Postpartum Hemorrhage.

Common Injuries, Poisoning & Environmental Conditions

Scope: This companion list covers injuries (trauma), poisoning and envenomation, and adverse effects of environmental exposure and extremes. These are events or conditions rather than diseases; it complements the appendices of Common Diseases, Common Disorders, and Common Syndromes.

Bone, Joint & Muscle Injuries Fracture; Dislocation; Sprain; Strain.

Skin & Soft-Tissue Injuries Contusion; Laceration; Abrasion; Crush Injury.

Nervous-System Injuries Traumatic Brain Injury; Concussion; Spinal-Cord Injury.

Thermal & Electrical Injuries Burns; Electrical Injury; Hypothermia; Frostbite; Heat Exhaustion; Heatstroke.

Environmental Conditions Drowning; Dehydration; Altitude Sickness; Motion Sickness.

Poisoning & Envenomation Carbon Monoxide Poisoning; Lead Poisoning; Mercury Poisoning; Arsenic Poisoning; Pesticide Poisoning; Snakebite; Scorpion Sting.

Drug & Alcohol Overdose Drug Overdose; Alcohol Poisoning.

Conditions That May Be Asymptomatic

Scope: This reference list groups diseases, infections, and other conditions that may be present without noticeable symptoms, particularly during early, latent, or compensated stages. Being asymptomatic is a clinical state or mode of presentation rather than a separate category of disease, so every condition here also belongs under its usual organ-system or specialty heading, and "May be asymptomatic" is best treated as an attribute or tag in addition to that classification. Many of these conditions cause symptoms in some people and none in others, and some come to attention only through screening or when a complication appears. The list is a curated, high-importance reference rather than a prevalence ranking, and some conditions appear under more than one heading where they are clinically relevant to several systems. Individual symptoms, signs, and laboratory findings are defined as dictionary entries rather than listed here.

Important distinction: "Asymptomatic disease" is not a distinct disease; it describes how a disease presents. Hypertension is a cardiovascular disease that is often asymptomatic, chlamydia is an infection that is frequently asymptomatic, osteoporosis is a skeletal disease that is typically asymptomatic until a fracture, and open-angle glaucoma is an eye disease that is often asymptomatic in its early stages.

Cardiovascular Hypertension; Atherosclerosis; Coronary Artery Disease; Peripheral Artery Disease; Some Arrhythmias; Early Valvular Heart Disease

Metabolic & Endocrine Prediabetes; Early Type 2 Diabetes; Dyslipidemia; Subclinical Hypothyroidism; Subclinical Hyperthyroidism; Hyperuricemia

Kidney & Urinary Early Chronic Kidney Disease; Diabetic Kidney Disease; Mild Proteinuria; Microscopic Hematuria; Some Kidney Stones

Liver Metabolic Dysfunction-Associated Steatotic Liver Disease (MASLD); Chronic Hepatitis B; Chronic Hepatitis C; Early Cirrhosis; Hemochromatosis

Infectious HIV Infection During Clinical Latency; Hepatitis B; Hepatitis C; Chlamydia; Gonorrhea; HPV Infection; Latent Tuberculosis Infection; Some COVID-19 Infections

Cancer & Precancer Early Colorectal Cancer; Cervical Precancer; Early Cervical Cancer; Early Prostate Cancer; Early Kidney Cancer; Some Thyroid Cancers; Early Breast Cancer

Gynecological HPV Infection; Some Ovarian Cysts; Uterine Fibroids; Early Cervical Abnormalities; Some Sexually Transmitted Infections

Male Reproductive Early Prostate Cancer; Some Sexually Transmitted Infections; Varicocele; Some Cases of Benign Prostatic Enlargement

Blood Mild Anemia; Monoclonal Gammopathy of Undetermined Significance (MGUS); Early Chronic Leukemia; Mild Thrombocytopenia

Bone Osteoporosis; Osteopenia

Eye Open-Angle Glaucoma; Early Diabetic Retinopathy; Early Age-Related Macular Degeneration

Neurological & Vascular Silent Cerebral Infarction; Asymptomatic Carotid Stenosis; Some Unruptured Intracranial Aneurysms

Gastrointestinal Diverticulosis; Colon Polyps; Some Gallstones; Some Hiatal Hernias

Gallbladder Asymptomatic Gallstones ("Silent Gallstones"); Gallbladder Polyps

Genetic Hemochromatosis Before Organ Damage; Some Inherited Thrombophilias; Some Genetic Carrier States

Parasitic & Latent Infections Some Malaria Infections; Intestinal Parasitic Infections; Toxoplasmosis and Other Latent Infections

Lay Language Medical Terms

Lay term	Medical term	Lay-language explanation
Belly area	ABDOMEN/ABDOMINAL	The body cavity below the diaphragm containing the stomach, intestines, liver, and other organs.
Take in	ABSORB	To take up or take in a substance, such as fluid.
Too much acid in blood	ACIDOSIS	A condition in which the blood is more acidic than normal.
Sharpness or clarity	ACUITY	The clearness or keenness of a sense, especially vision.
Recent or sudden	ACUTE	New, recent, sudden, or requiring urgent attention.
Swollen glands	ADENOPATHY	Enlarged or swollen lymph nodes.
Helpful added treatment	ADJUVANT	Something that supports or assists the main treatment.
Added treatment	ADJUVANT TREATMENT	Treatment given in addition to the main or standard treatment.
Germ-killing drug	ANTIBIOTIC	A drug used to kill or control bacteria and some other germs.
Germ-killing treatment	ANTIMICROBIAL	A substance or treatment that acts against microorganisms such as bacteria, fungi, or parasites.
Antiviral drug	ANTIRETROVIRAL	A drug that slows or stops the growth of certain viruses.
Side effect	ADVERSE EFFECT	An unwanted or harmful response to a treatment or medicine.
Walking	AMBULATE/AMBULATION/ AMBULATORY	To walk, or to be able to walk.
Severe allergy	ANAPHYLAXIS	A serious, potentially life-threatening allergic reaction.
Low red-cell count	ANEMIA	A reduced number of red blood cells or a low red-cell blood count.
Numbing medicine	ANESTHETIC	A drug or agent that reduces or removes the feeling of pain, sometimes by causing sleep.
Heart pain	ANGINA	Chest pain caused by inadequate blood flow to the heart muscle.
Heart pain	ANGINA PECTORIS	Another medical term for chest pain caused by reduced blood flow to the heart.
Loss of appetite	ANOREXIA	Lack of appetite or, in some contexts, a disorder involving refusal to eat.

Lay term	Medical term	Lay-language explanation
Inner elbow area	ANTECUBITAL	Relating to the inner side of the elbow or forearm.
Protective protein	ANTIBODY	A protein made by the body in response to a foreign substance.
Seizure-prevention drug	ANTICONVULSANT	A medicine used to prevent or control seizures.
Cholesterol-lowering drug	ANTILIPEMIC	A drug that lowers fat or cholesterol levels in the blood.
Cough medicine	ANTITUSSIVE	A medicine used to reduce coughing.
Irregular heartbeat	ARRHYTHMIA	Any abnormal change in the normal heartbeat or rhythm.
Breathing material into the lungs	ASPIRATION	Entry of fluid, food, or other material into the lungs, often after vomiting.
Laboratory test	ASSAY	A laboratory test used to measure or identify something.
Check or evaluate	ASSESS	To examine, measure, evaluate, or look at something carefully.
Asthma	ASTHMA	A lung disease in which narrowed or tightened airways make breathing difficult.
Without symptoms	ASYMPTOMATIC	Having no noticeable symptoms.
Armpit	AXILLA	The armpit area.
Not cancerous	BENIGN	Not malignant and generally not cancerous.
Twice daily	BID	Prescription shorthand meaning twice a day.
Carried or stuck together	BINDING/BOUND	Carried by something, or made to stick or join together.
Drug availability	BIOAVAILABILITY	The amount or proportion of a drug that becomes available for the body to use.
Series of blood tests	BLOOD PROFILE	A group or panel of blood tests.
Large dose at once	BOLUS	A relatively large amount given all at one time.
Amount of mineral in bone	BONE MASS	The amount of calcium and other minerals in a given amount of bone.
Slow irregular heartbeats	BRADYARRHYTHMIAS	Slow heart rhythms that may also be irregular.
Slow heartbeat	BRADYCARDIA	A slower-than-usual heartbeat.
Narrowed airways	BRONCHOSPASM	Breathing difficulty caused by tightening of the airway muscles.
Cancer-causing	CARCINOGENIC	Capable of causing cancer.
Cancer type	CARCINOMA	A cancer that begins in lining or covering cells of the body.
Related to the heart	CARDIAC	Relating to the heart.
Resetting the heartbeat	CARDIOVERSION	Restoring a normal heart rhythm, often with a controlled electrical shock.
Tube	CATHETER	A thin tube used to give or remove fluids, or to perform certain medical procedures.
Epidural tube	CATHETER	A catheter placed near the spinal cord to deliver anesthesia during surgery.
Brain and spinal cord	CENTRAL NERVOUS SYSTEM (CNS)	The brain and spinal cord.
Brain injury	CEREBRAL TRAUMA	Damage to the brain caused by an injury.
Stopping	CESSATION	The act of stopping something.
Coronary heart disease	CHD	Disease of the blood vessels that supply the heart.
Cancer drug treatment	CHEMOTHERAPY	Treatment of disease, usually cancer, with chemical medicines.

Lay term	Medical term	Lay-language explanation
Long-lasting	CHRONIC	Continuing for a long time or ongoing.
Related to patient care	CLINICAL	Pertaining to medical care or the care of patients.
Human research study	CLINICAL TRIAL	A research study involving human participants.
Unconscious state	COMA	A prolonged state of unconsciousness in which a person cannot be awakened normally.
All disease gone	COMPLETE RESPONSE	Total disappearance of the detectable disease being treated.
Present from birth	CONGENITAL	Present before or at birth.
Pink, irritated eye	CONJUNCTIVITIS	Redness and irritation of the thin membrane covering the eye.
Treatment to keep improvement	CONSOLIDATION PHASE	A treatment phase intended to make a remission last, usually after initial treatment.
Comparison study	CONTROLLED TRIAL	A study comparing an experimental treatment with a standard or control treatment.
Research partnership	COOPERATIVE GROUP	An association of institutions that work together on clinical research.
Related to heart arteries	CORONARY	Relating to the heart or the blood vessels that supply it.
Computerized X-ray scan	CT SCAN (CAT)	A series of computer-processed X-ray images that show sections of the body.
Germ-growth test	CULTURE	A test that grows or detects organisms that may cause infection.
Added together	CUMULATIVE	Added up from the beginning.
Related to the skin	CUTANEOUS	Relating to the skin.
Stroke	CVA	A stroke, also called a cerebrovascular accident.
Related to the skin	DERMATOLOGIC	Pertaining to the skin.
Lower blood-pressure number	DIASTOLIC	Relating to the lower blood-pressure number, when the heart relaxes.
Farther away	DISTAL	Toward the end or away from the center of the body.
Water pill	DIURETIC	A drug that increases urination.
Sound-wave blood-flow test	DOPPLER	A device or test using sound waves to assess blood flow.
Masked study	DOUBLE BLIND	A study in which neither the participants nor investigators know which treatment is being given.
Improper function	DYSFUNCTION	A state in which something does not work normally.
Abnormal cells	DYSPLASIA	Abnormal changes in the size, shape, or organization of cells.
Heart sound-wave test	ECHOCARDIOGRAM	An ultrasound test that creates pictures of the heart.
Swelling from fluid	EDEMA	Excess fluid collecting in body tissues.
Brain-wave test	EEG	A recording of the brain's electrical activity.
Effectiveness	EFFICACY	How well a treatment works under specified conditions.
Heart electrical tracing	ELECTROCARDIOGRAM	A tracing of the heart's electrical activity, also called an ECG or EKG.
Mineral imbalance	ELECTROLYTE IMBALANCE	An abnormal level or balance of minerals in the blood.
Vomiting	EMESIS	The act of vomiting.

Lay term	Medical term	Lay-language explanation
Based on experience	EMPIRIC	Based on experience or likely cause rather than definitive test results.
Viewing inside the body	ENDOSCOPIC EXAMINATION	Looking inside the body with a lighted tube or camera.
Through the intestines	ENTERAL	Given through or involving the digestive tract.
Outside the spinal cord	EPIDURAL	Located outside the spinal cord covering, or medicine given into that space.
Remove completely	ERADICATE	To get rid of a disease, infection, or other problem.
Examined	EVALUATED, ASSESSED	Examined or checked for a medical condition.
Fast ethics review	EXPEDITED REVIEW	A rapid research-protocol review allowed for certain lower-risk studies.
Outside the body	EXTERNAL	Located or occurring outside the body.
Leak out	EXTRAVASATE	To leak outside the intended area, such as from a blood vessel into nearby tissue.
U.S. drug agency	FDA	The U.S. Food and Drug Administration, which regulates medicines and medical products.
Scar-like	FIBROUS	Containing many fibers, often resembling scar tissue.
Irregular quivering	FIBRILLATION	Very rapid, uncoordinated activity of the heart or another muscle.
Being put fully to sleep	GENERAL ANESTHESIA	Use of medicines to cause unconsciousness and prevent pain during a procedure.
Related to pregnancy	GESTATIONAL	Pertaining to pregnancy.
Red-cell percentage	HEMATOCRIT	The proportion of blood made up of red blood cells.
Bruise or blood collection	HEMATOMA	A collection of blood under the skin or in a tissue, often appearing as a bruise.
Blood-flow measurement	HEMODYNAMIC MEASURING	Measuring blood flow and circulation.
Red-cell breakdown	HEMOLYSIS	Breakdown or destruction of red blood cells.
Heparin tube or port	HEPARIN LOCK	An intravenous access device kept open with a prescribed solution, sometimes containing heparin.
Liver tumor	HEPATOMA	A tumor of the liver, often referring to hepatocellular carcinoma.
Inherited disease	HERITABLE DISEASE	A disease that can be passed through genes to future children.
Tissue-disease examination	HISTOPATHOLOGIC	Relating to examination of tissues or cells for disease.
Portable heart monitor	HOLTER MONITOR	A portable device that records heartbeats, usually for a day or longer.
High blood calcium	HYPERCALCEMIA	An abnormally high calcium level in the blood.
High blood potassium	HYPERKALEMIA	An abnormally high potassium level in the blood.
High blood sodium	HYPERNATREMIA	An abnormally high sodium level in the blood.
High blood pressure	HYPERTENSION	Blood pressure that is higher than recommended.
Low blood calcium	HYPOCALCEMIA	An abnormally low calcium level in the blood.
Low blood potassium	HYPOKALEMIA	An abnormally low potassium level in the blood.
Low blood sodium	HYPONATREMIA	An abnormally low sodium level in the blood.
Low blood pressure	HYPOTENSION	Blood pressure that is lower than expected.
Low blood oxygen	HYPOXEMIA	A low level of oxygen in the blood.
Low tissue oxygen	HYPOXIA	Too little oxygen reaching body tissues.

Lay term	Medical term	Lay-language explanation
Removal of the uterus	HYSTERECTOMY	Surgical removal of the uterus; the ovaries and other structures may or may not also be removed.
Treatment-caused	IATROGENIC	Caused by medical treatment or a healthcare procedure.
Device research permission	IDE	Permission to study an unapproved medical device in people.
Cause unknown	IDIOPATHIC	Having no known cause.
Body protection	IMMUNITY	The body's defense against infection or other foreign substances.
Antibody protein	IMMUNOGLOBIN	A protein involved in making antibodies and immune defense; the standard spelling is immunoglobulin.
Immune-suppressing	IMMUNOSUPPRESSIVE	A drug or treatment that reduces the body's immune response.
Immune-based treatment	IMMUNOTHERAPY	Treatment that uses or changes the immune system, often against cancer or immune disease.
Abnormal function	IMPAIRED FUNCTION	Function that is reduced or not working normally.
Placed inside the body	IMPLANTED	Surgically or otherwise placed inside the body.
New-drug research permission	IND	Authorization to test an unapproved new drug in people.
Hardening	INDURATION	An area that has become unusually firm or hard.
Left in place	INDWELLING	Remaining in a particular location, such as a catheter.
Dead tissue from poor blood flow	INFARCT	Death of tissue caused by inadequate blood supply.
Disease that can spread	INFECTIOUS DISEASE	An illness caused by organisms that may spread between people or through other routes.
Swelling and irritation	INFLAMMATION	The body's response to injury or infection, often causing swelling, warmth, redness, or pain.
Slow delivery into the body	INFUSION	Slow delivery of a substance, usually through a vein or catheter.
Taking by mouth	INGESTION	Eating, drinking, or taking something into the body by mouth.
Antiviral immune protein	INTERFERON	A medicine or natural protein that helps the body act against viruses.
On and off	INTERMITTENT	Occurring repeatedly with pauses between episodes.
Inside the body	INTERNAL	Located or occurring within the body.
Inside	INTERIOR	Located on the inside.
Into a muscle	INTRAMUSCULAR	Given into a muscle.
Into the abdomen	INTRAPERITONEAL	Given into or located within the abdominal cavity.
Into spinal fluid	INTRATHECAL	Given into the fluid space around the spinal cord.
Into a vein	INTRAVENOUS (IV)	Given through a vein.
Into the bladder	INTRAVESICAL	Given into the bladder.
Place a breathing tube	INTUBATE	To place a tube into the airway.
Breaking the skin	INVASIVE PROCEDURE	A procedure that punctures, opens, or cuts the skin or enters the body.
Unapproved-drug study	INVESTIGATIONAL NEW DRUG (IND)	A new drug being studied before it has full approval for general use.

Lay term	Medical term	Lay-language explanation
Unproven treatment method	INVESTIGATIONAL METHOD	A treatment method still being studied and not established as standard care.
Reduced blood flow	ISCHEMIA	Too little blood and oxygen reaching a tissue, usually because blood flow is reduced.
Open abdominal surgery	LAPAROTOMY	Surgery using an incision in the abdominal wall to reach the organs inside.
Abnormal area	LESION	A wound, injury, or area of abnormal tissue.
Very tired or sleepy	LETHARGY	Sleepiness, tiredness, or reduced energy.
Low white-cell count	LEUKOPENIA	A lower-than-normal number of white blood cells.
Fat	LIPID	A fat or fat-like substance.
Amount of fat	LIPID CONTENT	The amount of fat in a substance, tissue, or blood sample.
Cholesterol and fat panel	LIPID PROFILE (PANEL)	Blood tests measuring fats and cholesterol.
Numbing a small area	LOCAL ANESTHESIA	Numbing medicine used to prevent pain in a limited area.
Limited to one area	LOCALIZED	Restricted to one area.
Inner space	LUMEN	The hollow space inside a tube or organ, such as a blood vessel.
Lymph-vessel X-ray	LYMPHANGIOGRAPHY	An X-ray study of lymph vessels or nodes after contrast dye is injected.
Immune white blood cell	LYMPHOCYTE	A type of white blood cell that helps protect against infection.
Lymph-node cancer	LYMPHOMA	A cancer of lymph nodes or related lymphatic tissue.
Feeling unwell	MALAISE	A vague feeling of illness or bodily discomfort.
Not working correctly	MALFUNCTION	A condition in which a device, organ, or system does not work properly.
Cancerous growth	MALIGNANCY	A cancer or other tumor capable of growing and spreading.
Brain tumor	MEDULLABLASTOMA	A type of tumor that begins in the brain.
Abnormal red-cell development	MEGALOBLASTOSIS	A change in blood-forming cells that produces unusually large, abnormal red-cell precursors.
Break down in the body	METABOLIZE	To chemically process or break down a substance in the body.
Cancer spread	METASTASIS	Spread of cancer cells from one body part to another.
Antibiotic medicine	METRONIDAZOLE	A medicine used for certain bacterial and parasitic infections.
Heart attack	MI	Myocardial infarction, or death of heart muscle from blocked blood flow.
Small or slight	MINIMAL	Very small or slight.
Reduce	MINIMIZE	To reduce something as much as possible.
Check or watch	MONITOR	To observe, measure, or keep track of something over time.
Ease of movement	MOBILITY	The ability to move easily.
Illness or complication	MORBIDITY	Illness, disability, or an unwanted result of disease or treatment.
Death rate or death	MORTALITY	Death, or the rate of death in a population.
Ability to move	MOTILITY	The ability of a body part, cell, or organism to move.
Magnetic body scan	MRI	Pictures of the inside of the body made with magnets and radio waves rather than X-rays.

Lay term	Medical term	Lay-language explanation
Moist body lining	MUCOSA, MUCOUS MEMBRANE	The moist lining of the digestive, respiratory, reproductive, and urinary passages.
Muscle aches	MYALGIA	Pain or aching in the muscles.
Related to heart muscle	MYOCARDIAL	Pertaining to the muscle of the heart.
Heart attack	MYOCARDIAL INFARCTION	Death of heart muscle caused by inadequate blood flow.
Nose-to-stomach tube	NASOGASTRIC TUBE	A tube passed through the nose into the stomach.
U.S. health institute	NCI	The National Cancer Institute.
Tissue death	NECROSIS	Death of cells or tissue.
Tumor	NEOPLASIA/NEOPLASM	An abnormal new growth that may be benign or malignant.
Nerve-tissue cancer	NEUROBLASTOMA	A cancer that develops from immature nerve tissue.
Related to the nervous system	NEUROLOGICAL	Pertaining to the brain, spinal cord, or nerves.
Low infection-fighting cells	NEUTROPENIA	A decrease in neutrophils, a major type of infection-fighting white blood cell.
U.S. health agency	NIH	The National Institutes of Health.
Not entering the body	NONINVASIVE	Not breaking, cutting, or entering the skin or body.
Hospital-acquired	NOSOCOMIAL	Acquired during a stay in a healthcare facility.
Blockage	OCCLUSION	Closing, blockage, or obstruction.
Cancer specialty	ONCOLOGY	The study and treatment of cancer and tumors.
Related to the eye	OPHTHALMIC	Pertaining to the eye.
Best choice	OPTIMAL	Best, most favorable, or most suitable.
By mouth	ORAL ADMINISTRATION	Giving a medicine through the mouth.
Related to bones	ORTHOPEDIC	Pertaining to bones, joints, muscles, or related structures.
Rare dense-bone disorder	OSTEOPETROSIS	A rare disorder in which bones become unusually dense but may be fragile.
Weak bones	OSTEOPOROSIS	A condition in which bones lose strength and become more likely to break.
Female sex glands	OVARIES	The organs that produce eggs and reproductive hormones.
Given by injection	PARENTERAL	Given by injection rather than through the digestive tract.
Open passage	PATENCY	The condition of being open and unobstructed.
How a disease develops	PATHOGENESIS	The process by which a disease or unhealthy condition develops.
Through the skin	PERCUTANEOUS	Done through or across the skin.
Away from the center	PERIPHERAL	At or toward the outer part rather than the center.
By mouth	PER OS (PO)	A prescription direction meaning by mouth.
How the body handles a drug	PHARMACOKINETICS	The study of how the body absorbs, distributes, changes, and removes a drug.
First drug-study phase	PHASE I	The first human study phase, usually focused on safety, effects, and dosing.
Early effectiveness study	PHASE II	A study phase examining safety and early evidence of benefit in people with a condition.
Large confirmation study	PHASE III	A larger study phase used to confirm safety and effectiveness and identify common side effects.

Lay term	Medical term	Lay-language explanation
After-approval study	PHASE IV	A study performed after approval to monitor safety or examine additional uses.
Vein irritation	PHLEBITIS	Irritation or inflammation of a vein.
Inactive treatment	PLACEBO	An inactive substance or treatment that looks like the real treatment.
Improvement from expectation	PLACEBO EFFECT	An improvement that occurs after an inactive treatment, often because of expectation or context.
Clotting blood particles	PLATELETS	Small blood components that help stop bleeding by forming clots.
Possible	POTENTIAL	Possible or capable of happening.
Make stronger	POTENTIATE	To increase or multiply the effect of a drug, treatment, or substance.
Effect booster	POTENTIATOR	An agent that helps another agent work more strongly.
Before birth	PRENATAL	Occurring before birth.
Preventive treatment	PROPHYLAXIS	A medicine or action used to prevent disease or infection.
As needed	PRN	Prescription shorthand meaning when needed.
Expected outlook	PROGNOSIS	The expected course and outcome of a disease.
Lying face down	PRONE	Lying on the stomach or front.
Study looking forward	PROSPECTIVE STUDY	A study that follows participants forward in time.
Artificial body part	PROSTHESIS	An artificial replacement for a body part.
Study plan	PROTOCOL	The written plan for a study or treatment.
Closer to the center	PROXIMAL	Closer to the center of the body or point of attachment.
Related to the lungs	PULMONARY	Pertaining to the lungs.
Every day	QD	Prescription shorthand meaning every day; clearer wording is preferred.
Four times daily	QID	Prescription shorthand meaning four times a day.
Radiation treatment	RADIATION THERAPY	Treatment using high-energy radiation to damage or destroy abnormal cells.
By chance	RANDOM	Selected or occurring by chance.
Chance assignment	RANDOMIZATION	Assigning participants to groups by chance.
Red blood cell	RBC	A red blood cell.
Genetically combined	RECOMBINANT	Made by combining genetic material from different sources.
Put back together	RECONSTITUTION	Restoring something by putting its parts back together or adding a liquid.
Happen again	RECUR	To happen again.
Not responding	REFRACTORY	Not responding adequately to treatment.
Regrowth or repair	REGENERATION	Growth again or replacement of lost or damaged tissue.
Treatment schedule	REGIMEN	The planned pattern, dose, and timing of treatment.
Return of disease	RELAPSE	Return of a disease after improvement or remission.
No detectable disease	REMISSION	Disappearance or reduction of evidence of disease; it may be partial or complete.
Related to kidneys	RENAL	Pertaining to the kidneys.
Can be repeated	REPLICABLE	Able to be repeated with similar results.

Lay term	Medical term	Lay-language explanation
Remove surgically	RESECT	To remove part or all of an organ or tissue by surgery.
Study looking back	RETROSPECTIVE STUDY	A study that examines past records or past events.
Connective-tissue cancer	SARCOMA	A cancer arising from connective, bone, muscle, fat, or related tissues.
Calming medicine	SEDATIVE	A medicine that calms or makes a person sleepy.
Testicular cancer	SEMINOMA	A type of cancer arising in the testicle.
In order	SEQUENTIALLY	Happening one after another in order.
Sleepiness	SOMNOLENCE	Unusual sleepiness or a tendency to fall asleep.
Air-measuring instrument	SPIROMETER	An instrument that measures the amount of air moved into and out of the lungs.
Extent of disease	STAGING	Assessment of how far a disease has progressed or spread.
Usual accepted treatment	STANDARD OF CARE	A treatment plan generally accepted by the medical community as appropriate.
Narrowing	STENOSIS	Narrowing of a passage, duct, or blood vessel.
Mouth inflammation	STOMATITIS	Sores or inflammation inside the mouth.
Group for comparison	STRATIFY	To arrange people or results into groups for analysis.
Barely responsive state	STUPOR	A greatly reduced level of alertness in which a person is difficult to awaken or respond to.
Under the collarbone	SUBCLAVIAN	Located beneath the collarbone.
Under the skin	SUBCUTANEOUS	Beneath the skin.
Lying on the back	SUPINE	Lying face up on the back.
Care focused on comfort	SUPPORTIVE CARE	General care that relieves symptoms and supports the person without directly curing the underlying disease.
Having symptoms	SYMPTOMATIC	Showing or having symptoms.
Group of related findings	SYNDROME	A condition identified by a characteristic group of symptoms and signs.
Upper blood-pressure number	SYSTOLIC	Relating to the upper blood-pressure number when the heart contracts.
Birth-defect-causing	TERATOGENIC	Capable of causing abnormalities in a developing fetus.
Male sex glands	TESTES/TESTICLES	The organs that produce sperm and male reproductive hormones.
Clot formation	THROMBOSIS	Formation of a blood clot inside a blood vessel or other location.
Blood clot	THROMBUS	A blood clot formed within a blood vessel or the heart.
Three times daily	TID	Prescription shorthand meaning three times a day.
Gradual dose adjustment	TITRATION	Gradually changing a dose or solution to reach a desired effect.
Immune white blood cells	T-LYMPHOCYTES	White blood cells that help coordinate or carry out immune responses.
On the surface	TOPICAL	Applied to the surface, usually the skin or a mucous membrane.
Surface numbing medicine	TOPICAL ANESTHETIC	A numbing medicine applied to a particular surface area.

Lay term	Medical term	Lay-language explanation
Harmful effects	TOXICITY	Harmful or unwanted effects caused by a drug, chemical, or treatment.
Through the skin	TRANSDERMAL	Delivered through the skin.
Temporarily	TRANSIENTLY	For a short time or temporarily.
Injury	TRAUMA	Physical injury or wound.
Walking exercise machine	TREADMILL	A moving walking surface used for exercise or heart testing.
Absorption into tissue	UPTAKE	Absorbing or taking in a substance by living tissue.
Heart-valve repair	VALVULOPLASTY	A procedure that repairs or widens a heart valve.
Enlarged veins	VARICES	Abnormally enlarged or twisted veins.
Blood-vessel spasm	VASOSPASM	Sudden narrowing of blood vessels.
Disease carrier	VECTOR	An organism or carrier that can transmit a disease-causing microorganism.
Blood draw	VENIPUNCTURE	Puncturing a vein with a needle to draw blood or give treatment.
Parent-to-child spread	VERTICAL TRANSMISSION	Spread of an infection from a parent to a child, often during pregnancy, birth, or breastfeeding.
White blood cell	WBC	A white blood cell involved in immune defense.

Source and adaptation: Terms and concepts were checked against the University of Iowa Human Subjects Office, "Medical Terms in Lay Language," available at https://hso.research.uiowa.edu/get-started/guides-and-standard-operating-procedures-sops/medical-terms-lay-language. The explanations in this appendix are paraphrased for this dictionary and are not the only acceptable plain-language alternatives.
