Medical Examination and Diagnosis Form

Water-Related Infections

Clinician-use documentation aid. This form supports history-taking and clinical documentation; it is not a diagnostic scoring tool or a substitute for clinical judgment, local protocols, or public-health reporting requirements.

1. Patient and encounter

Patient name: _____ Record / ID: _____
Date of birth: _____ Age: _____ Sex / gender as clinically relevant: _____
Encounter date / time: _____ Clinician: _____
Preferred language: _____ Interpreter / ID: _____ ☐ Interpreter not needed

2. Presenting illness

Chief concern: _____
Symptom onset (date / time): _____ Course / progression: _____
Symptoms reported (check all that apply):
☐ Diarrhea ☐ Bloody stool ☐ Vomiting / nausea ☐ Abdominal pain / cramps
☐ Fever / chills ☐ Rash ☐ Wound pain / redness / swelling / drainage ☐ Blisters
☐ Eye symptoms ☐ Ear symptoms ☐ Cough / breathing symptoms ☐ Headache / confusion / weakness
☐ Jaundice / dark urine ☐ Urinary symptoms ☐ Other: _____ ☐ None reported
Temperature at home / highest reported: _____ Stool frequency / 24 h: _____
Associated symptoms, duration, and relevant negatives: _____

3. Water and environmental exposure history

Exposure date(s) / time(s): _____
Location (site, city, region): _____
Water source / setting:
☐ Drinking water ☐ Freshwater (lake / river / stream) ☐ Saltwater ☐ Brackish water
☐ Floodwater / sewage ☐ Pool / hot tub / splash pad ☐ Well / private supply ☐ Other: _____
☐ Building plumbing / cooling tower ☐ Humidifier / nebulizer / medical water system
Source and treatment (tap, bottled, boiled, filtered, disinfected, unknown):

_____
Water advisory / testing / contamination known or suspected:

_____
Possible route(s): ☐ Swallowed ☐ Inhaled mist / aerosol ☐ Nose / aspiration
☐ Open wound / cut ☐ Eye ☐ Ear ☐ Other / unclear
Activity, duration, amount, and water conditions (if known): _____
Open wound / skin break; site, cause, and date: _____
Other relevant exposures (food / seafood, animals, soil, travel, work): _____
Others with similar illness? Names / relationship, onset, shared exposure: _____

4. Relevant health history and risk factors

☐ Chronic liver disease ☐ Diabetes ☐ Kidney disease ☐ Chronic lung disease
☐ Immunocompromising condition / therapy ☐ Cancer / transplant / HIV ☐ Pregnancy
☐ Chronic skin condition / open wound ☐ Recent surgery / piercing / tattoo ☐ Contact lenses ☐ Infant / older adult
☐ Other: _____
Relevant medical / surgical history: _____
Current medicines (include recent antimicrobials): _____
Allergies and reactions: _____
Immunization / prophylaxis relevant to exposure: _____

5. Examination and initial acuity

BP: _____ HR: _____ RR: _____ Temp: _____ SpO_2: _____ Weight: _____
Urgent findings / escalation considered:
☐ Hemodynamic instability / sepsis concern ☐ Altered mental status / neurologic deficit
☐ Respiratory compromise ☐ Severe dehydration ☐ Rapidly progressive wound / necrosis / hemorrhagic blisters
☐ Jaundice / bleeding ☐ Other: _____ ☐ None identified
Urgent action, referral / transfer, clinician notified, time: _____
Examination findings:
General appearance / hydration / perfusion: _____
Skin / wound findings (site, size, borders, warmth, tenderness, drainage, progression):
_____
Eyes / ears / nose / throat: _____ Respiratory: _____
Abdominal: _____ Neurologic: _____
Other pertinent examination: _____
_____

6. Investigations and results

Record tests selected and interpreted by the treating clinician; document specimen, collection time, and pending results.

Test / specimen	Collected	Result / interpretation	Pending / date

7. Clinical assessment

Working diagnosis / syndrome: _____ Severity: _____
Suspected organism / cause (if known): _____ Exposure route: _____
Differential diagnosis / important alternatives: _____
Exposure-to-onset interval / epidemiologic link: _____
Public-health consultation / reporting (per local rules): _____
Contact / case or outbreak reference: _____

8. Plan and follow-up

☐ Treatment / supportive care documented ☐ Specialist / emergency referral ☐ Public-health follow-up
Plan, counseling, and precautions discussed: _____
Follow-up date / responsible clinician: _____
Pending results owner and action plan: _____
Clinician name / signature: _____ Date / time: _____

Exposure prompts are informed by CDC/ATSDR's *Taking an Exposure History* and CDC's *Waterborne Disease Outbreak Investigation Toolkit*. Adapt to local reporting, privacy, and documentation requirements.
