Gray, yellow, or brown tooth discolouration caused by tetracycline-family antibiotics taken while teeth are developing. The colour is within the tooth and may require professional whitening, veneers, or crowns for cosmetic improvement.

## **Tetrahydrozoline Poisoning**

Poisoning from swallowing eye drops or nasal drops containing tetrahydrozoline. It can cause extreme sleepiness, slow heart rate, low blood pressure, and breathing problems, especially in children.

## **Tetralogy Of Fallot**

A heart defect present from birth with four features: a hole between the lower chambers, narrowing of the route from the right ventricle to the lungs (usually pulmonary stenosis), an aorta positioned over the hole, and thickening of the right ventricle. Reduced blood flow to the lungs can lower the oxygen level in the blood.

## **Tetraplegia**

Paralysis or severe weakness affecting both arms and both legs, usually because the spinal cord in the neck has been injured or damaged by disease. Trunk movement, sensation, breathing, and bladder or bowel control may also be affected.

## **Tet Spell**

A sudden episode of severe bluish coloring and low oxygen in a child with unrepaired tetralogy of Fallot.

Crying, feeding, or exertion may trigger it; the child may breathe rapidly, become limp, or faint. It is an emergency requiring calming, positioning, oxygen, and urgent specialist care.

### **Alternate Names:**

Hypercyanotic Spell; Paroxysmal Dyspneic Attack; Blue Spell

## **TGA**

Alternate name; see *Transient global amnesia*.

## **Th1/Th2/Th17/Tfh/Treg Balance**

A description of how several types of helper immune cells work together. They help fight infections, support antibody production, promote inflammation, or limit excessive immune activity; disruption may contribute to allergy or autoimmune disease.

## **Thalamic Pain Syndrome**

A central neuropathic pain syndrome developing weeks to months after a cerebrovascular infarct involving the ventral posterolateral (VPL) nucleus of the thalamus (posterior cerebral artery occlusion), characterized by burning, allodynic, and severe intractable contralateral hemibody pain.

### **Alternate Names:**

Dejerine-Roussy Syndrome

## **Thalamus**

A pair of structures deep within the brain that relay most sensory information, such as touch, vision, and hearing, to the outer brain. They also help regulate movement, alertness, and memory.

## **Thalassaemia**

Alternate spelling; see *Thalassemia*.

## **Thalassemia**

A group of inherited blood disorders in which the body makes too little of one part of hemoglobin, the oxygen-carrying protein in red blood cells. This causes anemia, ranging from mild to severe, and may require regular treatment.

### **Alternate Names:**

Cooley's Anemia Mediterranean Anemia

---

## Thalassemia Major

A severe inherited blood disorder in which the body makes too little hemoglobin. It causes serious anemia beginning in childhood and may require regular blood transfusions, with monitoring for iron buildup and organ damage.

## Thalidomide

A medicine that changes immune activity and is used for selected cancers and inflammatory conditions. It can cause severe birth defects, nerve damage, blood clots, sleepiness, and other harms, requiring strict safety controls.

## Thallium

Thallium is a toxic heavy metal that can cause gastrointestinal illness followed by painful nerve damage, hair loss, skin changes, kidney or liver injury, seizures, and heart or brain problems.

### Alternate Names:

Thallium Toxicity; Thallotoxicosis

## Thallium-201

A radioactive substance sometimes used in heart-blood-flow scans. Heart muscle takes it up in relation to its blood supply, and a special camera shows areas receiving less blood.

## Thallium Poisoning

Alternate name; see *Thallium*.

## Thallium Scan

A nuclear-medicine test using thallium-201 to show blood flow to heart muscle or selected tumors. It is now less common because other tracers are often preferred, but may still have specific uses.

## Thallium Toxicity

Heavy-metal poisoning that may begin with gastrointestinal symptoms and progress to painful sensorimotor neuropathy, encephalopathy, alopecia, and nail changes such as Mees lines. Blood or urine testing supports diagnosis; severe poisoning requires toxicology consultation and may be treated with Prussian blue plus supportive care.

## Thanatophoric Dysplasia

A severe inherited disorder of bone growth causing extremely short limbs, a narrow chest, a large head, and abnormal skull and spine development. The small chest can prevent adequate breathing after birth and is often life-threatening.

## Theca

A connective-tissue sheath, especially the theca surrounding an ovarian follicle.

## Theca Lutein Cyst

A usually temporary ovarian cyst caused by strong stimulation from pregnancy-related hormones or fertility treatment. It is often present in both ovaries and may cause abdominal pressure or pain; it commonly shrinks when hormone levels return to normal.

## Thecoma

A usually benign ovarian sex-cord stromal tumor composed of theca-like cells, often producing estrogen and presenting with abnormal uterine bleeding or an incidental adnexal mass.

## Thelarche

The onset of breast development, usually the first visible sign of female puberty. It commonly begins between ages 8 and 13, with substantial normal variation.

## Thenar Eminence

The fleshy mound at the base of the thumb, formed by muscles that move the thumb. Damage to the supplying nerve or muscles can weaken thumb opposition and make grasping difficult.

## Theophylline

A medicine that can relax airway muscles and improve breathing in selected lung diseases. Its safe and harmful doses are close together, so blood levels, medicine interactions, heart rhythm, and side effects need monitoring.

---

## Theophylline Toxicity

Toxicity causing persistent nausea and vomiting, tremor, agitation, tachycardia, hypokalemia, hyperglycemia, seizures, or life-threatening atrial or ventricular dysrhythmias. Measure serial serum levels and electrolytes; benzodiazepines treat seizures, repeated activated charcoal may reduce absorption, and hemodialysis is considered for severe poisoning.

## Theranostic Pair

Two related medical substances designed to find and treat the same target in the body. One helps show where the target is on an image; the other delivers treatment to cells carrying that target.

## Theranostics

A medical approach that uses one targeted substance to find abnormal cells and a related substance to treat them. In some cancers, the treatment substance carries radiation directly to cells with the target.

## Therapeutic Abortion

Intentional termination of a pregnancy because of medical, fetal, or other legally recognized indications, according to applicable law and clinical guidance.

## Therapeutic Alliance

The working relationship between a patient and a therapist. It includes trust, agreement about treatment goals, and cooperation on the steps of therapy, and can influence how well treatment works.

## Therapeutic Drug Monitoring

The clinical practice of measuring specific drug concentrations in blood at timed intervals (peak and trough levels) to individualize dosages, ensuring efficacy while preventing toxicity for drugs with narrow therapeutic windows (e.g., aminoglycosides, vancomycin, digoxin, lithium, theophylline, phenytoin).

**Alternate Names:**

TDM; Serum Drug Level Monitoring

## Therapeutic Equivalence

Two medicine products are therapeutically equivalent when they contain the same active ingredient, have the same strength and dosage form, meet quality standards, and are expected to have the same clinical effect when used as directed.

## Therapeutic Exercise

Planned physical activity used to improve strength, flexibility, balance, movement, endurance, or daily function and to reduce pain or disability. A clinician selects and gradually adjusts exercises according to the person's condition, abilities, symptoms, and goals.

## Therapeutic Hypothermia

Deliberate, closely monitored cooling of the body to reduce tissue damage in selected emergencies, such as after some cardiac arrests or in severe overheating-related illness. Cooling is used with treatment of the underlying cause and can cause abnormal heart rhythms, shivering, or electrolyte changes.

## Therapeutic Index

A measure of how close a medicine's effective dose is to a dose that causes harm. A narrow index means small dose changes may be risky and require careful monitoring.

## Therapeutics

The part of medicine concerned with treating disease and improving health. It includes medicines, procedures, surgery, rehabilitation, and other treatments used to prevent, control, or cure illness.

## Therapeutic Window

The range of medicine exposure that is high enough to work but low enough to avoid unacceptable harm. Medicines with a narrow window require careful dosing and sometimes blood-level monitoring.

## Therapy

Treatment intended to prevent, relieve, or cure disease or to improve function and quality of life.

---

## Thermal Injury

Tissue damage caused by heat. Initial care includes stopping the exposure, removing loose constricting material, cooling briefly with clean water, covering the injury, and assessing depth and extent. Larger or deeper burns require specialized evaluation, fluid management, pain control, wound care, and tetanus assessment.

### Alternate Names:

Heat Injury; Scald or Thermal Trauma

## Thermal Therapy

Treatment using heat or cold to influence pain, swelling, muscle tension, or tissue temperature. Effects and safety depend on the condition and method used.

## Thermogenesis

The production of heat by the body. It comes mainly from normal metabolism, muscle activity such as shivering, digestion, and specialized fat tissue that releases stored energy as heat.

## Thermography

Recording the pattern of heat released from the body surface with a special camera. It may show temperature differences, but these are not specific for one disease and usually require confirmation with standard examination or tests.

## Thermoluminescent Dosimeter

A small radiation-monitoring device that records accumulated exposure. When the device is heated, its detector releases light in proportion to the radiation it absorbed, allowing the exposure to be measured.

## Thermometer Scales

Numbering systems used to report temperature, such as Celsius, Fahrenheit, and Kelvin. The scale should be identified when a temperature is communicated.

## Thermoneutral Zone

The range of surrounding temperatures in which the body can maintain its normal temperature with-

out shivering or sweating. The range varies with clothing, activity, age, health, and humidity.

## Thermoplasty

A procedure for selected adults with severe asthma that uses controlled heat delivered through a bronchoscope to reduce extra muscle in the airway walls. It may reduce severe attacks but does not cure asthma and has procedural risks.

## Thermoreceptor

A nerve ending that senses warmth or cold in the skin and other tissues. Signals travel through the spinal cord to the brain, helping a person recognize temperature and helping the body control heat through sweating, shivering, and changes in skin blood flow. Damage to these nerves can reduce temperature sensation and increase the risk of burns or cold injury.

## Thermoregulation

The body's control of internal temperature by balancing heat production and heat loss. It uses sweating, shivering, changes in skin blood flow, behavior, and brain signals to keep temperature within a safe range.

## Thiabendazole

An antiparasitic medicine used for selected worm infections and, historically, some fungal infections. It can cause nausea, dizziness, liver problems, or nervous-system effects, so safer alternatives are often preferred.

## Thiamin

Alternate name; see *Thiamine*.

## Thiamine

Vitamin B1, a water-soluble vitamin required for carbohydrate metabolism and nerve function. Severe deficiency can cause beriberi or Wernicke encephalopathy.

### Alternate Names:

Vitamin B1; Aneurin

---

### Thiamine Deficiency

A lack of vitamin B1, needed to release energy from carbohydrates and for normal nerve and heart function. It results from prolonged poor intake or absorption, heavy alcohol use, or increased requirements and causes beriberi, with neuropathy, heart dysfunction, or swelling, and Wernicke encephalopathy when the brain is affected. Prompt thiamine replacement treats or prevents these consequences.

### Thiazide Diuretics

Water tablets that make the kidneys remove more salt and water in urine. They are used mainly for high blood pressure and some fluid-retention disorders and can lower sodium or potassium levels.

### Thiazide Overdose

Taking too much of a thiazide diuretic can cause dehydration, low blood pressure, abnormal sodium or potassium levels, confusion, or abnormal heart rhythms.

### Thiazides

Water tablets that make the kidneys remove more salt and water in urine. They are used mainly for high blood pressure and some fluid-retention disorders and can lower sodium or potassium levels.

### Thiazolidinedione Drugs

A group of diabetes medicines that make body tissues more sensitive to insulin by activating a protein called PPAR-gamma. Pioglitazone is the main example; possible effects include weight gain, swelling, bone fractures, and worsening heart failure.

### Thiazolidinediones

A group of diabetes medicines that make the body more sensitive to insulin, helping lower blood glucose. They can cause weight gain and swelling and may worsen heart failure or increase fracture risk.

### Thigh

The part of the lower limb between the hip and knee. It contains the femur, large muscles, major blood vessels, and nerves that help move and support the leg.

### Thimerosal

A preservative containing ethylmercury that is used in some multidose vaccines and medical products. Ethylmercury leaves the body faster than methylmercury; its safety depends on the product, amount, and applicable regulations.

### ThinPrep Pap Test

A cervical screening test in which cells collected from the cervix are placed in a liquid vial and examined for precancerous changes, cancer, or sometimes HPV-related abnormalities.

#### Alternate Names:

Liquid-Based Pap Test; Liquid-Based Cytology

### Thiopental Sodium

A very short-acting anesthetic given through a vein to start general anesthesia or, in selected critical situations, reduce brain activity and pressure. It can dangerously slow breathing, lower blood pressure, or cause allergic reactions.

### Thiopentone Sodium

A very short-acting anesthetic medicine given into a vein to start general anesthesia in selected settings. It can suppress breathing, lower blood pressure, and cause allergic reactions, so close monitoring is required.

### Thioridazine

An older antipsychotic medicine used only in selected situations because it can cause severe sleepiness, movement problems, and dangerous changes in heart rhythm, especially at high doses or with interacting medicines.

### Thioridazine Overdose

Poisoning from taking too much thioridazine, an antipsychotic medicine. It can cause severe sleepiness, low blood pressure, seizures, and dangerous heart rhythms.

### Thiotepa

A chemotherapy medicine that damages DNA and stops cells from multiplying. It is used for selected

---

cancers and sometimes before a stem-cell transplant; side effects may include low blood counts, infection, nausea, mouth sores, and organ injury.

### **Third-Degree Atrioventricular Block**

A serious heart-rhythm problem in which signals from the upper chambers do not reach the lower chambers. The chambers beat independently, often causing a very slow pulse, fainting, or heart failure. A pacemaker is often used.

#### **Alternate Names:**

Complete Heart Block; Complete AV Block

### **Third-Degree AV Block**

A severe heart-rhythm problem in which electrical signals from the upper heart chambers do not reach the lower chambers. The chambers beat independently, often causing a very slow pulse, dizziness, fainting, or collapse.

### **Third-Degree Burn**

A full-thickness burn that destroys the epidermis and dermis and may extend into subcutaneous tissue. The skin may appear white, brown, or charred and sensation may be reduced. Assessment includes burn depth, extent, inhalation injury, and associated trauma; deep or extensive burns require specialist treatment and may need grafting.

### **Third-Degree Perineal Tear**

A severe tear during vaginal birth that extends from the vaginal opening into the muscles controlling the anus. It needs prompt examination and careful repair, followed by bowel-softening treatment and follow-up; pain, infection, difficulty controlling stool, or a fistula can result.

#### **Alternate Names:**

Third-Degree Obstetric Tear; OASIS

### **Third Heart Sound**

A quiet extra sound heard right after the normal heartbeat, sounding like a gallop; it can be normal in young athletes but often signals heart strain in older adults.

### **Third Stage Of Labor**

The part of childbirth between the baby's birth and delivery of the placenta. The placenta normally separates and is delivered within minutes; heavy bleeding or a placenta that does not deliver may occur with complications.

### **Third Trimester**

The period of pregnancy from 28 weeks until birth. The fetus grows rapidly and continues developing its lungs, brain, and other organs. Prenatal visits monitor blood pressure, growth, movement, and symptoms; tests and screening are scheduled according to local guidance and individual risk.

### **Thirst**

The conscious desire to drink, regulated mainly by body-fluid concentration and circulating blood volume. Excessive thirst may occur with dehydration, diabetes, medicines, kidney problems, or other conditions and may need evaluation.

### **Thomas Test**

A physical examination manoeuvre used to assess for hip flexion contractures and tightness of the iliopsoas muscle. With the patient supine, one hip is fully flexed to flatten the lumbar lordosis; if the contralateral extended thigh lifts off the examination table, a fixed flexion deformity of that hip is present.

### **Thompson Test**

A physical examination test (Simmonds-Thompson test) used to evaluate the integrity of the Achilles tendon; with the patient prone and feet hanging off the examination table, the examiner firmly squeezes the middle third of the calf musculature; absence of involuntary plantarflexion of the foot indicates a complete rupture of the Achilles tendon.

#### **Alternate Names:**

Simmonds Test; Calf Squeeze Test

### **Thomsen Disease**

An inherited muscle disorder causing stiffness because muscles relax slowly after they contract. Symptoms often begin in childhood, affect the

---

hands, legs, eyelids, or jaw, and improve after repeated movement. Strength and life expectancy are usually preserved, although stiffness can interfere with activity.

**Alternate Names:**

Autosomal Dominant Myotonia Congenita; Myotonia Congenita (Thomsen Type)

**Thoracentesis**

A medical procedure in which a thin needle or catheter is gently inserted through the back of the chest wall into the pleural space (the narrow gap between the lungs and the inner chest wall) to withdraw accumulated excess fluid (a pleural effusion). Thoracentesis is performed for two key reasons: diagnostic (collecting a small sample of fluid for laboratory analysis to find the underlying cause, such as pneumonia, heart failure, kidney disease, tuberculosis, or cancer) and therapeutic (removing a large volume of trapped fluid, typically 1 to 1.5 liters, to relieve pressure on a collapsed lung and rapidly ease shortness of breath and chest tightness). Often guided by real-time ultrasound to identify the safest insertion spot, the procedure is carried out under local anesthesia while the patient sits upright, carrying low risks when properly monitored.

**Alternate Names:**

Pleural Tap; Pleurocentesis; Pleural Fluid Aspiration; Thoracocentesis

**Thoracic**

Thoracic means relating to the chest, the thoracic spine, or structures within the thorax such as the heart and lungs.

**Thoracic Aortic Aneurysm**

A weakened, widened area of the aorta within the chest. It may cause no symptoms, but can cause chest or back pain or press on nearby structures; dissection or rupture can cause sudden severe pain, collapse, and life-threatening bleeding. Risk is increased by hypertension, inherited disorders, a bicuspid valve, or smoking.

**Thoracic Cage**

The bony and cartilaginous framework formed by

the thoracic vertebrae, ribs, costal cartilages, and sternum. It protects thoracic organs and assists respiratory movements.

**Thoracic Cavity**

The space inside the chest, enclosed by the ribs and breathing muscles. It contains the lungs, heart, esophagus, trachea, major blood vessels, and other structures protected by the chest wall.

**Thoracic Duct**

The body's largest lymph vessel. It collects excess fluid and immune cells from most of the body and returns them to the bloodstream near the neck; injury can cause lymph fluid to leak into the chest.

**Thoracic Endometriosis**

Endometriosis involving the chest, usually around the lung. Symptoms such as chest pain, breathlessness, or coughing may recur around menstruation and can rarely result in air or blood around the lung.

**Thoracic Inlet**

The upper opening of the chest, surrounded by the first thoracic vertebra, first ribs, and upper sternum. Major nerves, blood vessels, the airway, and the food pipe pass through it.

**Thoracic Outlet**

The lower opening of the chest, bordered by the lower ribs and diaphragm. It allows structures such as the aorta, food pipe, and large veins to pass between the chest and abdomen.

**Thoracic Outlet Syndrome**

Pressure on nerves or blood vessels as they pass from the neck into the arm. It may cause neck, shoulder, or arm pain, tingling, weakness, swelling, color change, or a cold hand. Treatment depends on the cause and may include physical therapy or surgery.

**Alternate Names:**

TOS; Neurovascular Compression of Thoracic Outlet

---

## Thoracic Skeleton

The bony and cartilaginous framework of the chest, made up of the thoracic vertebrae, ribs, sternum, and costal cartilages.

## Thoracic Spine

The middle part of the spine made up of the 12 thoracic vertebrae. It supports the ribs and protects the spinal cord in the chest region.

## Thoracic Spine CT Scan

Computed tomography of the thoracic spine used to evaluate vertebral fractures, alignment, bone lesions, spinal canal narrowing, and other bony abnormalities.

## Thoracic Spine X-Ray

Plain radiographic imaging of the thoracic spine used to assess vertebral alignment, fractures, curvature, degenerative change, and selected bone lesions.

## Thoracic Surgeon

A surgeon who performs operations on organs and structures in the chest, such as the lungs, esophagus, mediastinum, and sometimes the heart.

## Thoracic Vertebrae

The twelve vertebrae of the chest region, each articulating with ribs and protecting the thoracic spinal cord while supporting the trunk and rib cage.

## Thoracolumbar Spine Trauma

Injury to the middle or lower back. Doctors assess the bones, supporting ligaments, spinal cord, and nerves to determine whether the spine is stable and whether treatment needs a brace, monitoring, or surgery.

## Thoracoscopy

A minimally invasive procedure using a camera inserted through the chest wall to examine or treat the pleura, lungs, or mediastinum.

## Thoracotomy

A surgical incision into the chest wall to access the

thoracic cavity (pleural space, lungs, heart, great vessels, esophagus, diaphragm, mediastinum).

## Thorax

The thorax is the chest region between the neck and abdomen, enclosed by ribs and containing the heart, lungs, major vessels, and mediastinal structures.

## Thought Blocking

An abrupt interruption in the train of thought before it is completed, as if the thought was removed or pushed out of the patient's mind. The patient may pause mid-sentence, appear confused, and report that the thought was "taken out" or "blocked." It is a formal thought disorder seen in schizophrenia.

## Thought Disorders

Conditions in which thinking is unusually disorganized, interrupted, fixed on false beliefs, or difficult to express. They can occur in psychosis, mood disorders, brain disease, substance effects, or other conditions and require assessment of the underlying cause.

## Threadworm

A small intestinal worm, also called a pinworm, or the infection it causes. The female worm lays eggs around the anus, commonly causing intense itching at night; infection spreads when eggs are swallowed.

## Threadworm Infection

An intestinal parasitic infection caused by *Enterobius vermicularis*, also called pinworm. Infection spreads when eggs are swallowed, often after contact with contaminated hands, bedding, food, or surfaces.

## Threadworms

Threadworms, also called pinworms, are small intestinal worms that commonly cause itching around the anus at night. Treatment usually includes an anthelmintic medicine and hygiene measures for household contacts.

---

### Threatened Miscarriage

Vaginal bleeding during early pregnancy with a closed cervix and no passage of pregnancy tissue; the pregnancy may remain viable. Evaluation commonly includes clinical assessment, serial human chorionic gonadotropin testing when indicated, and ultrasound.

#### Alternate Names:

Threatened Abortion; Early Pregnancy Bleeding

### Three-Day Measles

Alternate name; see *Rubella*.

### Three-Dimensional Ultrasound

Ultrasound that combines many sound-wave measurements to create a three-dimensional image. It is used in obstetrics, gynecology, and other settings to show anatomy from several angles.

### Three Swab Test

A diagnostic bedside test used to investigate continuous urine leakage from the vagina after pelvic surgery or childbirth. Three cotton swabs are placed inside the vagina and a colored dye (such as methylene blue) is put into the bladder; blue staining on the upper swabs indicates a bladder fistula (vesicovaginal fistula), whereas unstained urine indicates a leak from the ureter (ureterovaginal fistula).

#### Alternate Names:

Moir three-swab test; Three-swab test; Vaginal swab dye test.

### Threonine

An essential amino acid used to build proteins and other body molecules. The body cannot make enough of it, so it must come from food.

### Threshold

The lowest amount of a stimulus or measurement needed to produce a detectable response or effect.

### Thrill

A palpable vibration over the chest or a blood vessel caused by turbulent blood flow.

### Throat

The passage behind the mouth and nose that connects them with the voice box and esophagus. It carries air toward the lungs and food toward the stomach and contains the tonsils and other protective tissues.

### Throat Cancer

Cancer arising in the pharynx or nearby structures of the throat. Persistent hoarseness, difficulty or pain with swallowing, a neck lump, unexplained weight loss, or persistent sore throat requires medical evaluation, especially in people who use tobacco or alcohol.

#### Alternate Names:

Pharyngeal Cancer; Laryngeal Carcinoma

### Throat Or Larynx Cancer

Throat or larynx cancer is malignant growth in the pharynx or voice box and may cause persistent hoarseness, swallowing difficulty, pain, or a neck lump.

### Throat Swab Culture

Culture of a throat specimen to detect bacterial pathogens, especially group A Streptococcus, when evaluating pharyngitis.

#### Alternate Names:

Throat Culture; Pharyngeal Swab Culture

### Throbbing

A pulsating or beating quality of pain or another sensation. It can occur with migraine, inflammation, injury, infection, or increased awareness of a pulse.

### Throckmorton Sign

A radiographic observation (John Thomas sign) in which the shadow of the male penis on an AP pelvis radiograph points toward the side of a unilateral hip or pelvic fracture.

#### Alternate Names:

John Thomas Sign; Penile Orientation Sign

### Thrombectomy

A procedure to remove a blood clot from a blood

---

vessel and restore blood flow. A catheter may remove the clot from a blocked brain artery during some ischemic strokes; surgery is used in selected other situations.

### Thrombin

A blood-clotting substance that changes fibrinogen into fibrin, the protein threads that form a clot, and also activates platelets. The body makes thrombin after a blood vessel is injured; too much or too little clotting can cause disease.

### Thrombin Time

A coagulation assay measuring the time required for plasma to form a fibrin clot after the addition of exogenous bovine or human thrombin, evaluating the final common pathway conversion of fibrinogen to fibrin, prolonged by heparin, dabigatran, hypofibrinogenemia, or dysfibrinogenemia.

#### Alternate Names:

TT; Thrombin Clotting Time

### Thromboangiitis Obliterans

An inflammatory disease of small and medium blood vessels, strongly associated with tobacco use. It can cause pain, color changes, ulcers, or gangrene in the hands or feet. Complete tobacco cessation is essential; further treatment depends on ischemia, tissue loss, and other complications.

#### Alternate Names:

Buerger's Disease; Presenile Gangrene

### Thrombocyte

A small blood-cell fragment made in the bone marrow. Platelets stick to damaged blood vessels, become activated, and join together to form the first plug that stops bleeding. Too few platelets or poorly working platelets can cause easy bruising, tiny skin spots, nosebleeds, or other bleeding. Too many or overly active platelets can increase the risk of unwanted clots.

### Thrombocytes

Another name for platelets: small blood-cell fragments made in the bone marrow that form plugs to stop bleeding. Too few can cause bruising or

bleeding, while too many or overly active platelets can increase the risk of unwanted clots.

### Thrombocythemia

Alternate name; see *Essential Thrombocythemia*.

### Thrombocytopathy

A problem with how platelets work, even when the platelet count is normal or nearly normal. It may cause easy bruising, nosebleeds, heavy menstrual bleeding, or prolonged bleeding after an injury or procedure.

### Thrombocytopenia

A low number of platelets, the blood cells that help stop bleeding. It may result from reduced production, increased destruction, trapping in an enlarged spleen, or dilution and can cause bruising, bleeding, or no symptoms.

#### Alternate Names:

Low Platelet Count

### Thrombocytopenia in Pregnancy

A low platelet count during pregnancy or after delivery caused by gestational thrombocytopenia, immune thrombocytopenia, hypertensive disease, HELLP syndrome, infection, medicines, or another disorder. The cause and trend guide bleeding risk, treatment, anesthesia planning, and fetal evaluation.

### Thrombocytopenic

Characterized by too few circulating platelets. It may cause easy bruising, nosebleeds, heavy menstrual bleeding, or other bleeding, although some people have no symptoms.

### Thrombocytosis

A higher-than-normal number of platelets in the blood. It may be a temporary response to infection, inflammation, bleeding, or iron deficiency, or result from a bone-marrow disorder. It can increase bleeding or clotting risk depending on the cause.

---

## Thromboelastography

A blood test that shows how quickly a clot forms, how strong it becomes, and how it dissolves. It can help guide blood-product treatment during severe bleeding, major surgery, or critical illness.

## Thromboembolism

Obstruction of a blood vessel by a clot that formed elsewhere and traveled through the circulation.

## Thromboembolism in Pregnancy

A blood clot in a vein or artery that may travel to the lungs or another organ during pregnancy or postpartum. Pregnancy increases venous thromboembolism risk; new unilateral swelling, chest pain, sudden breathlessness, coughing blood, or collapse requires emergency assessment.

## Thrombolysis

The dissolution of a blood clot using a medicine such as a fibrinolytic agent. It is used only in selected conditions because it can cause serious bleeding.

## Thrombolysis For PE

Emergency treatment using a clot-dissolving medicine for a life-threatening lung clot causing low blood pressure or shock. It can restore blood flow quickly but carries a serious risk of bleeding.

## Thrombolysis For Stroke

Emergency treatment for selected strokes caused by a blood clot. A clot-dissolving medicine is given through a vein within a limited time after symptoms begin, after brain imaging excludes bleeding; serious bleeding is a possible complication.

## Thrombolytic Agents

Medicines that dissolve an established blood clot by activating the body's clot-breaking system. They are reserved for selected emergencies because they can cause serious bleeding, including bleeding in the brain.

### Alternate Names:

Thrombolytics; Clot-Dissolving Medicines

## Thrombolytic Therapy

Treatment with a medicine that breaks down a blood clot and may restore blood flow in selected emergencies such as certain strokes, heart attacks, or lung clots. The main danger is serious bleeding, including bleeding in the brain.

## Thrombophilia

A tendency for blood to form clots too easily. It may be inherited or develop with cancer, pregnancy, some medicines, inflammation, or other conditions and can increase the risk of clots in veins.

## Thrombophilias in Pregnancy

Inherited or acquired tendencies toward abnormal blood clotting that can increase maternal venous thromboembolism risk and may be associated with placental complications. Testing and anticoagulation decisions depend on personal and family history, the specific thrombophilia, and pregnancy risk.

## Thrombophilia Testing

Blood tests that look for inherited or acquired reasons a person may form blood clots too easily. Testing is considered selectively after a clot or with a strong family history because results may not change treatment.

## Thrombophlebitis

Inflammation of a vein associated with a blood clot. Superficial thrombophlebitis may cause a tender, warm, red, firm cord along a vein just beneath the skin. Thrombosis in a deep vein is deep-vein thrombosis and can break away and cause a life-threatening pulmonary embolism; sudden limb swelling, chest pain, or breathlessness requires urgent assessment.

## Thrombopoiesis

The process by which the bone marrow makes platelets. Platelets develop from large marrow cells and enter the bloodstream, where they help stop bleeding.

## Thrombosed Intracranial Aneurysm

A widened brain artery containing a blood clot. The

---

clot may partly block the aneurysm but can also press on nearby brain structures, causing headache, vision or nerve problems, or seizures.

### **Thrombosis**

Formation of a blood clot inside a blood vessel or the heart. The clot can block blood flow and damage tissue, causing problems such as deep-vein thrombosis, stroke, heart attack, or loss of blood supply to a limb.

### **Thrombosis Of The Inferior Vena Cava**

A blood clot in the large vein that returns blood from the legs and abdomen to the heart. It may cause swelling in both legs or abdominal pain and can extend from a deep-vein clot.

### **Thrombotic Microangiopathy**

A group of disorders in which tiny clots form in small blood vessels, damaging red blood cells and lowering the platelet count. The clots can injure the kidneys, brain, heart, or other organs. Causes include immune disorders, infections, medicines, pregnancy, and severe illness; urgent specialist treatment is often needed.

### **Thrombotic Thrombocytopenic Purpura**

A rare, life-threatening disorder in which small-vessel clots destroy red blood cells and use up platelets. It is usually caused by severe deficiency of ADAMTS13, a protein that helps regulate clotting. It requires urgent hospital treatment.

#### **Alternate Names:**

TTP

### **Thrombotic Thrombocytopenic Purpura Pentad**

The classic, historical clinical pentad characterizing thrombotic thrombocytopenic purpura (TTP), comprising severe microangiopathic hemolytic anemia (with prominent schistocytes), severe thrombocytopenia, fluctuating neurological deficits, acute renal insufficiency, and fever. Pathophysiologically caused by severe deficiency of the von Willebrand factor-cleaving metalloprotease ADAMTS13.

#### **Alternate Names:**

TTP Clinical Pentad; Moschcowitz Pentad

### **Thrombotic Vasculopathy**

Damage to blood vessels caused by clots forming within them. It can reduce blood flow and injure skin or organs and may occur with autoimmune disease, severe infection, cancer, or disorders that cause widespread clotting.

### **Thromboxane**

A chemical made mainly by activated platelets that makes platelets stick together and narrows blood vessels. These actions help stop bleeding but can also contribute to harmful clot formation.

### **Thrombus**

A blood clot that forms inside a blood vessel or the heart and remains attached where it formed. It may partly or completely block blood flow, or break loose and travel elsewhere as an embolus.

### **Thrombus Organization**

The gradual healing of a blood clot as it is replaced by scar tissue and sometimes channels that allow blood to pass through again. This process can make an old clot firm and attached to the vessel wall.

### **Thrush**

A Candida infection, usually of the mouth or throat, causing creamy white plaques, soreness, altered taste, or discomfort with eating or swallowing. Vaginal candidiasis is a separate condition. Risk increases with antibiotics, inhaled corticosteroids, diabetes, or immune suppression.

#### **Alternate Names:**

Oral Thrush; Pseudomembranous Candidiasis

### **Thrush in Children**

Thrush is Candida overgrowth in the mouth, producing white plaques, soreness, or feeding difficulty; Candida can also affect skin folds or diaper areas. Persistent, recurrent, severe, or immune-associated infection needs pediatric evaluation and appropriate antifungal treatment.

---

### Thrush In Newborns

Oral *Candida* infection in an infant, causing white plaques on the tongue or mouth lining that may interfere with feeding and can be passed between infant and breastfeeding parent.

### Thumb Arthritis

Degeneration or inflammation of a thumb joint, especially the joint at the base of the thumb, causing pain, stiffness, and reduced grip.

#### Alternate Names:

Basal Joint Arthritis; CMC Joint Arthritis

### Thumb Carpometacarpal Arthritis

Arthritis of the carpometacarpal joint at the base of the thumb, often due to osteoarthritis. It can cause pain with pinching or gripping, stiffness, and reduced hand function.

### Thumb CMC Arthritis

Arthritis of the joint at the base of the thumb, where the thumb meets the wrist. It causes pain with gripping or pinching, stiffness, swelling, and reduced hand strength; advanced disease may change the joint's shape.

### Thumb-Sucking

A common childhood habit of sucking the thumb; persistent habit can affect dental and facial development.

### Thymic Carcinoma

A malignant epithelial tumor of the thymus that is generally more aggressive and biologically distinct from thymoma. It may invade nearby structures or spread to other sites.

### Thymic Hyperplasia

Thymic hyperplasia is enlargement of the thymus from increased lymphoid tissue or rebound growth and may be incidental. It can be associated with autoimmune disease, infection, endocrine conditions, or stress; imaging and clinical context distinguish it from a mass.

### Thymic Neoplasm

Alternate name; see *Thymoma*.

### Thymine

Thymine is one of the four main bases in DNA. It pairs with adenine through hydrogen bonds and helps store genetic information.

### Thymocyte

An immature T lymphocyte developing in the thymus, where it undergoes selection before becoming a mature T cell.

### Thymoma

A tumor arising from the thymus, an immune-system organ behind the breastbone. It may cause chest pressure or no symptoms and is associated with conditions such as myasthenia gravis; behavior depends on whether it grows beyond the thymus.

#### Alternate Names:

Thymic Epithelial Tumor; Thymic Neoplasm

### Thymus

An immune-system organ behind the breastbone where immature T cells mature and learn not to attack the body's own tissues. It is most active in childhood and becomes smaller after puberty.

### Thymus Gland

An immune-system organ behind the breastbone where immature T lymphocytes learn to recognize harmful foreign material without attacking the body's own tissues. It is most active during childhood and gradually becomes smaller after puberty.

### Thyrocalcitonin

Another name for calcitonin, a hormone made by thyroid C cells that lowers blood calcium mainly by reducing bone resorption.

### Thyroglobulin Surveillance

Blood testing for thyroglobulin after treatment of some thyroid cancers. A rising or unexpectedly detectable level may suggest remaining or returning thyroid tissue, but results must be interpreted with

---

the treatment history and antibody testing.

### **Thyroglossal Duct Cyst**

A fluid-filled lump in the middle of the neck caused by tissue left behind as the thyroid developed before birth. It often moves when swallowing or sticking out the tongue and is usually assessed with ultrasound.

### **Thyroid**

An endocrine gland in the front of the neck that produces thyroid hormones, which regulate metabolism, growth, and development.

### **Thyroid Cancer**

A malignant tumor of the thyroid. Major types include papillary, follicular, medullary, and anaplastic carcinoma, which differ in behavior and treatment.

#### **Alternate Names:**

Thyroid Carcinoma; Malignant Thyroid Neoplasm

### **Thyroid Cancer Staging**

The process of determining how far thyroid cancer has grown or spread. Doctors consider the tumor's size, nearby lymph nodes, distant spread, cancer type, age, and other features to guide treatment and estimate outlook.

### **Thyroid Cartilage**

The largest cartilage of the larynx, formed by two plates that meet in front and create the laryngeal prominence. It protects the vocal folds and provides attachment for muscles and ligaments.

### **Thyroid Diseases**

Conditions affecting the thyroid gland, including underactivity, overactivity, inflammation, enlargement, nodules, and cancer. They may change energy, weight, temperature tolerance, heart rate, bowel habits, mood, or neck appearance and are assessed with examination and blood tests.

### **Thyroid Disorders**

Conditions affecting the thyroid gland, which makes hormones that regulate energy use, temperature,

heart rate, growth, and development. Disorders may cause an underactive or overactive gland, inflammation, enlargement, nodules, or cancer.

### **Thyroidectomy**

Surgery to remove part or all of the thyroid gland. It may treat thyroid cancer, an overactive thyroid, or a large goiter; possible complications include bleeding, voice-nerve injury, and low calcium.

### **Thyroid Eye Disease**

Alternate name; see *Dysthyroid Eye Disease*.

### **Thyroid Fine-Needle Aspiration**

A procedure that uses a thin needle, usually guided by ultrasound, to remove cells from a thyroid lump. A laboratory examines the cells to help determine whether the lump is benign or needs further treatment.

### **Thyroid Follicular Carcinoma**

A cancer arising from thyroid follicle cells and the second most common differentiated thyroid cancer. It tends to spread through blood vessels to the lungs or bones; diagnosis requires showing invasion of the capsule or blood vessels.

### **Thyroid Function Tests**

Blood tests, mainly thyroid-stimulating hormone and free T4, used to assess how well the thyroid is working. Results help identify an underactive or overactive thyroid but must be interpreted with symptoms and medicines.

### **Thyroid Gland**

A butterfly-shaped gland at the front of the neck. It makes hormones that help control energy use, temperature, heart rate, growth, and development.

### **Thyroid Gland Enlargement**

Alternate name; see *Goiter*.

### **Thyroid Gland Removal**

Surgery to remove part or all of the thyroid gland for cancer, overactivity, a large goiter, or a sus-

---

picious nodule. Possible effects include bleeding, voice changes from nerve injury, low calcium, and the need for lifelong thyroid hormone.

### Thyroid Hormone

The hormones T3 and T4, made by the thyroid gland, that help control energy use, temperature, heart rate, growth, and brain development. Too little can slow body functions, while too much can make them overactive.

### Thyroid Hormone Resistance

A rare disorder in which body tissues respond incompletely to thyroid hormones, usually because of an inherited change affecting a thyroid-hormone receptor. Blood levels of thyroid hormones are often high while TSH is not fully suppressed, and symptoms vary between people.

### Thyroid Hormones

Thyroxine (T4) and triiodothyronine (T3), hormones that regulate metabolic rate, growth, brain development, heat production, and cardiovascular and gastrointestinal activity.

### Thyroid Hormone Toxicity

Clinical toxicity caused by excessive thyroid hormone activity, often from excessive replacement or other exogenous exposure. Symptoms may include palpitations, tremor, anxiety, heat intolerance, diarrhea, weight loss, arrhythmia, or severe thyrotoxicosis.

### Thyroid Drugs

Medicines that treat thyroid disorders. Thyroid hormone replacement, usually levothyroxine, treats an underactive thyroid; antithyroid medicines such as methimazole or propylthiouracil reduce hormone production in an overactive thyroid. The choice and monitoring depend on the condition and patient factors.

#### Alternate Names:

Thyroid Medicines; Thyroid Medication

### Thyroiditis

Inflammation of the thyroid gland. It may cause

neck pain, fever, or temporary overactivity followed by underactivity; some forms are painless and autoimmune. Features vary according to the type and duration.

### Thyroiditis Classification

Thyroid inflammation is classified by its cause and pattern. Hashimoto disease is usually long-term and autoimmune; subacute thyroiditis is often painful and follows an infection; other forms may occur after childbirth, medicines, or injury.

### Thyroid Lymphoma

A lymphoma arising in the thyroid, often in the setting of chronic autoimmune thyroiditis. It may present as a rapidly enlarging neck mass with swallowing or breathing difficulty; ultrasound, tissue biopsy, and staging distinguish it from thyroid carcinoma.

### Thyroid Nodule

Alternate name; see *Thyroid Nodules*.

### Thyroid Nodule Evaluation

Assessment of a lump in the thyroid using examination, thyroid blood tests, and ultrasound. Ultrasound features help estimate cancer risk and decide whether repeat imaging or a needle sample is needed.

### Thyroid Nodules

Discrete growths within the thyroid gland that may be solid, cystic, benign, or malignant. Most are benign. They may be associated with rapid growth, hoarseness, swallowing difficulty, or breathing problems, and assessment may include thyroid-function testing, ultrasound, or selected needle biopsy.

#### Alternate Names:

Colloid Nodule; Thyroid Lump; Adenomatous Goiter

### Thyroid Papillary Carcinoma

The most common type of thyroid cancer, arising from cells that make thyroid hormone. It often grows slowly and can spread to nearby lymph nodes; outlook depends on its size, spread, and other tumor features.

---

### Thyroid Peroxidase Antibody

An immune protein directed against thyroid peroxidase, an enzyme needed to make thyroid hormones. A high level supports autoimmune thyroid disease, especially Hashimoto disease, but does not by itself show how well the thyroid is working.

### Thyroid Peroxidase Test

A blood test measuring antibodies against thyroid peroxidase, an enzyme needed to make thyroid hormones. Elevated levels support autoimmune thyroid disease but do not by themselves show how well the thyroid is working.

### Thyroid Preparation Overdose

Taking too much thyroid hormone medicine can cause a fast or irregular heartbeat, shaking, sweating, anxiety, vomiting, fever, or, in severe cases, heart failure or a dangerous thyroid crisis.

### Thyroid Scan

A nuclear-medicine test that shows how actively the thyroid or a thyroid lump takes up a small radioactive tracer. An overactive lump is rarely cancerous; a less-active lump needs assessment with other tests.

### Thyroid Scintigraphy

Another name for a thyroid scan. It uses a small radioactive tracer to show thyroid activity, lumps, or thyroid tissue in an unusual location; results are interpreted with blood tests and ultrasound.

### Thyroid Stimulating Hormone

A pituitary hormone measured in the blood as the primary screening test for thyroid gland disorders. It operates on an inverse feedback loop: when the thyroid is underactive (hypothyroidism), the pituitary releases extra TSH to prompt more hormone production, resulting in a high TSH level. Conversely, when the thyroid produces too much hormone (hyperthyroidism), pituitary TSH output drops, resulting in a low TSH level. It is commonly tested alongside free thyroxine (free T4) to evaluate fatigue, unexplained weight changes, heart rate fluctuations, and to monitor thyroid medication dosing.

### Alternate Names:

TSH; Thyrotropin; Thyroid Function Screen; TSH Blood Test; Thyroid-Stimulating Hormone

### Thyroid-Stimulating Hormone

Alternate name; see *Thyroid Stimulating Hormone*.

### Thyroid Storm

A life-threatening, sudden worsening of an overactive thyroid. It can cause very high fever, a fast or irregular heartbeat, severe agitation or confusion, vomiting, heart failure, and organ failure, often after infection, surgery, or injury.

### Thyroid Storm Diagnostic Criteria

Standardized quantitative clinical scoring criteria (Burch-Wartofsky Point Scale) assessing the likelihood of decompensated, life-threatening thyrotoxicosis based on the severity of thermoregulatory dysfunction, central nervous system effects, cardiovascular tachycardia/arrhythmias, congestive heart failure, and gastrointestinal-hepatic impairment.

### Alternate Names:

Burch-Wartofsky Score

### Thyroid Storm Following Thyroidectomy

Acute, life-threatening decompensation from thyroid hormone excess after thyroid surgery, usually in a person with inadequately controlled thyrotoxicosis. Fever, marked tachycardia, agitation or delirium, heart failure, vomiting, and shock may occur.

### Thyroid Surgery

Operations that remove part or all of the thyroid gland. They may be performed for selected cancers, enlarging or compressive nodules, goiter, hyperthyroidism, or diagnostic uncertainty; the procedure depends on the disease and its extent.

### Thyroid Ultrasound

An imaging test using sound waves to examine the thyroid, thyroid lumps, cysts, and nearby lymph nodes. It can identify features that need monitoring or a needle sample but cannot by itself confirm cancer.

---

### Thyrotoxic Myopathy

Muscle weakness caused by an overactive thyroid, usually affecting the hips, thighs, shoulders, and upper arms. Weakness may occur without pain and can improve when thyroid hormone levels return to normal; severe weakness or swallowing or breathing difficulty needs urgent care.

#### Alternate Names:

Hyperthyroid Myopathy

### Thyrotoxicosis

A condition caused by too much thyroid hormone activity in the body, whatever the source. It may cause weight loss, fast heartbeat, tremor, sweating, anxiety, diarrhea, heat intolerance, or severe illness.

### Thyrotoxic Periodic Paralysis

Repeated brief attacks of severe muscle weakness caused by an overactive thyroid, often with low blood potassium. Episodes commonly affect the hips and shoulders and may follow rest after exercise or a high-carbohydrate meal.

### Thyrotroph Adenoma

A usually noncancerous pituitary tumor arising from cells that make thyroid-stimulating hormone. It may produce too much hormone, causing an overactive thyroid, headaches, or vision problems if it presses on nearby structures.

### Thyrotrophin-Releasing Hormone

A hormone made in the hypothalamus, a part of the brain, that tells the pituitary gland to release thyroid-stimulating hormone and prolactin. It helps link brain signals with thyroid activity and some reproductive functions.

### Thyrotrophin-Stimulating Hormone

Another name for thyroid-stimulating hormone, a pituitary hormone that tells the thyroid gland to make and release thyroid hormones. Blood levels help assess whether the thyroid is underactive or overactive.

### Thyrotropin

Thyroid-stimulating hormone, a pituitary hormone that stimulates thyroid growth and thyroid-hormone production; it is also called TSH.

### Thyrotropin Alfa

A recombinant form of thyroid-stimulating hormone used to stimulate residual thyroid tissue or differentiated thyroid cancer cells during selected diagnostic or treatment protocols.

### Thyroxine

The thyroid hormone T4, which contains four iodine atoms. The thyroid releases it into the blood, and much of it is converted to the more active hormone triiodothyronine (T3).

#### Alternate Names:

T4; Tetraiodothyronine

### Thyroxine-Binding Globulin

A blood protein that carries most thyroid hormones through the bloodstream. Changes in its amount can alter measured total hormone levels without necessarily changing the amount of active, unbound hormone.

### TIA

A brief episode of stroke-like symptoms caused by temporary reduced blood flow to part of the brain, without lasting brain injury on standard assessment. It is an emergency warning of possible stroke.

#### Alternate Names:

Transient Ischemic Attack; Mini-Stroke

### Tibia

The larger, weight-bearing bone of the lower leg, extending from the knee to the ankle. It forms part of both joints and is commonly called the shinbone.

### Tibial Artery

An artery of the lower leg, chiefly the anterior and posterior tibial arteries, supplying the leg, ankle, and foot and contributing to pedal pulses.

---

### **Tibialcrural Artery**

A term describing the arteries and branching vessels near the lower leg and ankle, especially connections between the tibial and fibular arteries. These vessels supply blood to the ankle and foot.

### **Tibial Fracture**

A break in the tibia, the major weight-bearing bone of the lower leg, often caused by high-energy trauma, twisting injury, or repetitive stress.

### **Tibialis Anterior Muscle**

A muscle along the front of the shin that lifts the front of the foot and helps turn it inward. Weakness can cause foot drop and make walking difficult.

### **Tibialis Posterior Muscle**

A deep muscle behind the shin that points the foot downward, turns it inward, and helps support the foot's arch. Damage or weakness may contribute to pain or a gradually flattened foot.

### **Tibial Nerve**

A large nerve running from the back of the knee down the back of the leg and behind the inner ankle. It controls several leg and foot muscles and carries sensation from parts of the foot.

### **Tibial Shaft Fractures**

Breaks in the middle portion of the shinbone, often caused by a high-energy injury but sometimes by a twist or lower-force event. Pain, swelling, deformity, or inability to bear weight are common. Treatment depends on alignment, skin and muscle damage, and whether the fracture is open.

### **Tibia Vara**

Tibia vara is inward angulation of the upper shinbone causing bowing of the leg, classically associated with Blount disease or other growth disorders.

### **Tibiofibular Joint**

A joint between the tibia and fibula bones of the lower leg. The upper joint allows small movements, while the lower connection helps stabilize the ankle.

### **Tic**

A sudden, rapid, recurrent, nonrhythmic movement or sound that a person may feel an urge to make. Tics can be motor or vocal and may worsen with stress.

### **Ticarcillin**

A penicillin antibiotic with activity against many gram-negative bacteria, including *Pseudomonas*; it is usually given with clavulanate and can cause allergy or electrolyte disturbances.

### **Tic Disorder**

A neurologic condition causing repeated, sudden movements or sounds that are difficult to control, such as blinking, shrugging, throat clearing, or grunting. Tics may be briefly suppressed, often worsen with stress, and vary in severity.

### **Tic Douloureux**

A chronic pain condition characterized by recurrent, sudden, severe, electric shock-like pain in the distribution of the trigeminal nerve (typically V2/V3). See Trigeminal Neuralgia.

### **Tick**

A small blood-feeding arachnid that can attach to people or animals and transmit infections such as Lyme disease, rickettsial diseases, and babesiosis.

### **Tick Bite**

A bite from a tick, which may cause local irritation and can sometimes spread infections such as Lyme disease, ehrlichiosis, or Rocky Mountain spotted fever. Remove the tick promptly and watch for fever or a spreading rash.

### **Tick Bites**

Alternate name; see *Tick-borne diseases*.

### **Tick-borne Diseases**

Tick-borne diseases are infections or other illnesses transmitted by ticks, including Lyme disease, babesiosis, ehrlichiosis, and some viral diseases. Removing ticks promptly can reduce risk.

---

### Tick-Borne Encephalitis

A viral infection transmitted mainly by ticks that can cause fever, meningitis, encephalitis, or lasting neurological complications.

### Tickborne Relapsing Fever

An infection caused by certain *Borrelia* bacteria and spread by soft ticks. It causes repeated episodes of fever, headache, muscle aches, and joint pain separated by periods of feeling better.

### Tick Paralysis

Rapidly worsening weakness caused by poison released by an attached tick. Weakness often starts in the legs and moves upward; breathing can become difficult, but symptoms usually improve after prompt tick removal.

### Tick Removal

Removing an attached tick from the skin. The tick is usually grasped close to the skin and pulled steadily; burning, crushing, or covering it with chemicals can increase exposure to fluids.

### Ticks

Small arachnids that attach to skin and may transmit infections or cause tick paralysis.

#### Alternate Names:

Tick Infestation; Ixodid Bites

### Tick Typhus

A rickettsial infection transmitted by ticks, usually causing fever, headache, rash, and sometimes severe systemic illness.

### Ticlopidine

An antiplatelet medicine that reduces the blood's ability to form clots. It was used to prevent stroke or heart-related clots in selected people but is now less common because it can cause serious blood-count and bleeding problems.

### Tics

Brief, repeated movements or sounds that are difficult to control, such as blinking, shrugging, throat

clearing, or grunting. They may be held back for a short time and often worsen with stress; persistent or impairing tics need assessment.

### Tidal Volume

The amount of air breathed in or out with one normal breath. It varies with body size, activity, illness, and breathing support and can be measured during lung-function testing.

### Tidy Wound

A clean, sharply cut wound with little contamination, crushing, or dead tissue and clearly defined healthy edges. After examination and cleaning, it may often be closed immediately, depending on its depth, location, and age.

### Tietze's Syndrome

Alternate spelling; see *Tietze Syndrome*.

### Tietze Syndrome

A related but distinct chest-wall disorder causing painful, visible swelling at one or a few upper costochondral or sternocostal joints. It should not be treated as simply another name for costochondritis.

### Tigecycline

An antibiotic used in selected serious infections when other treatments are unsuitable. It stops bacteria making proteins and commonly causes nausea and vomiting; it is not appropriate for every type of infection.

### Tight Junction

A seal between neighboring lining cells that controls what can pass between them. It helps keep separate the cell surfaces facing the body cavity and the underlying tissue.

### Tilorone

Tilorone is a synthetic antiviral and immunomodulating compound used or studied in some countries; evidence and indications vary by setting.

---

### **Tilted Disc Syndrome**

A congenital appearance in which the optic disc is angled or rotated, often with an unusual shape of nearby retina and blood vessels. Vision may be normal, but some people have visual-field changes or other eye conditions.

### **Tilt Table Test**

A supervised test for unexplained fainting. A person lies secured on a table that is tilted upright while blood pressure, heart rate, and symptoms are recorded to look for fainting caused by abnormal blood-pressure or heart-rate responses.

### **Tilt Table Testing**

A supervised test in which a patient is moved from a lying to an upright or head-up tilt position while blood pressure, heart rate, and symptoms are monitored. It may help evaluate reflex syncope, orthostatic hypotension, or selected autonomic disorders when the diagnosis remains uncertain; it does not replace assessment for cardiac or neurologic causes.

### **Timed Up-And-Go Test**

A functional mobility test measuring the time required to stand from a chair, walk a short distance, turn, return, and sit. Prolonged performance suggests impaired mobility and increased fall risk but must be interpreted with gait, vision, cognition, and environment.

### **Time In Range**

Percentage of time that continuous glucose monitoring readings remain within the target glucose range of seventy to one hundred eighty milligrams per deciliter for most adults with diabetes. General target is greater than seventy percent corresponding to approximately seventeen hours per day.

### **Time Of Death**

The actual or estimated time when a person died. After death, investigators may use body temperature, stiffening, settling of blood, decomposition, insect activity, and chemical changes to estimate it, but the estimate has limits.

### **Time-Of-Flight PET**

A PET scanning method that uses the arrival times of detected radiation to better locate where it came from. This can improve image quality and help show disease more clearly.

### **Timing Of Breastfeeding**

The timing and frequency of breastfeeds, usually guided by early hunger cues and effective milk transfer rather than a rigid clock schedule, with special considerations for newborns and preterm infants.

### **TIMI Risk Score**

A clinical score estimating short-term risk in people with unstable angina or a non-ST-elevation heart attack. It uses age, risk factors, known artery disease, recent symptoms, ECG changes, and heart-injury blood tests to help guide treatment; it supports but does not replace clinical judgment.

#### **Alternate Names:**

TIMI Score; TIMI Risk Score for UA/NSTEMI; TIMI Score for STEMI

### **Timolol**

Timolol is a non-selective beta blocker used in glaucoma eye drops and for selected cardiovascular conditions; topical ocular use can still cause bradycardia, hypotension, bronchospasm, or fatigue.

### **Timolol Maleate**

The maleate salt of timolol, a beta blocker used in glaucoma and selected cardiovascular conditions.

### **Timothy Syndrome**

A rare inherited disorder affecting the heart and several body systems. It can cause a dangerously prolonged heart rhythm, heart defects, webbed fingers or toes, and developmental or immune problems.

### **Tinea**

A fungal infection of the skin, hair, or nails caused by fungi that feed on a protein called keratin. Common forms include ringworm, athlete's foot, and jock itch.

---

### **Tinea Barbae**

A fungal infection of the beard or moustache area. It can cause an itchy, scaly rash, inflamed hair follicles, pus-filled spots, or painful lumps and may spread from infected animals or people.

### **Tinea Capitis**

A fungal infection of the scalp and hair, most common in children. It may cause scaling, itching, broken or falling hair, swollen tender areas, or pus-filled sores and usually needs prescription treatment.

### **Tinea Corporis**

A fungal infection of the body skin, often causing an itchy, scaly, ring-shaped rash with a clearer center. It spreads through contact with infected people, animals, or contaminated objects.

### **Tinea Cruris**

Alternate name; see *Jock itch*.

### **Tinea Faciei**

A fungal infection of the face that can cause a red, scaly, ring-shaped or uneven rash. It may resemble eczema or rosacea and can spread from infected people, animals, or another infected body area.

### **Tinea Favosa**

A long-lasting fungal infection of the scalp or skin that causes yellow, cup-shaped crusts around hair follicles. It can lead to scarring and permanent hair loss if untreated and is now uncommon in many regions.

### **Tinea Imbricata**

A long-lasting fungal skin infection found mainly in parts of the Pacific and Southeast Asia. It causes overlapping, scaly rings that form a distinctive wood-grain pattern on the body.

### **Tinea Incognito**

A fungal skin infection whose appearance has been changed by using a steroid cream or other immune-suppressing treatment. It may become less scaly but more widespread or unusual, so testing may be

needed before targeted treatment.

### **Tinea Infection**

A fungal infection affecting skin, hair, or nails. It may cause a ring-shaped scaly rash, peeling or cracking between the toes, an itchy groin rash, scalp scaling, or thickened discolored nails.

#### **Alternate Names:**

Ringworm Infection; Dermatophyte Mycosis

### **Tinea Manuum**

A dermatophyte fungal infection of one or both hands. It may cause dry scaling, redness, itching, thickened skin, or blisters and often occurs with fungal infection of the feet or nails.

### **Tinea Nigra**

A usually harmless fungal infection causing a painless brown or black patch, most often on the palm or sole. It may resemble a mole or skin cancer and can be confirmed with a skin examination or sample.

### **Tinea Pedis**

A fungal infection of the feet, also called athlete's foot. It may cause itching, peeling or cracking between the toes, dry scaling on the soles, blisters, or sores and can spread to the nails.

### **Tinea Unguium**

A fungal infection of the nail plate, also called onychomycosis, causing thickening, discoloration, brittleness, or separation of the nail.

### **Tinea Versicolor**

A common yeast-related skin condition causing lighter or darker patches with fine scaling, usually on the chest, back, or upper arms. The patches become more noticeable after surrounding skin tans.

#### **Alternate Names:**

Pityriasis Versicolor

### **Tinel Sign**

Tingling or an electric sensation felt along a nerve when the nerve is gently tapped. It may suggest nerve irritation or recovery after injury, but it is not

---

diagnostic by itself and must be interpreted with the examination and other tests.

### **Tinidazole**

Tinidazole is a nitroimidazole antimicrobial effective against anaerobic bacteria and protozoa such as *Giardia* and *Trichomonas*; metallic taste, gastrointestinal effects, neuropathy, and an alcohol interaction may occur.

### **Tinnitus**

Tinnitus is perception of sound without an external source, often related to hearing loss, noise exposure, ear disease, medications, vascular causes, or neurologic factors.

#### **Alternate Names:**

Ringing in Ears; Tinnitus Aurium

### **Tinzaparin**

A low-molecular-weight heparin anticoagulant used for prevention or treatment of venous thromboembolism; bleeding and heparin-induced thrombocytopenia are important risks.

### **Tinzaparin Sodium**

The sodium salt of tinzaparin, a low-molecular-weight heparin used to prevent or treat venous blood clots; bleeding and heparin-induced thrombocytopenia are important risks.

### **Tiopronin**

A thiol-containing medicine used in selected cases of cystinuria to increase urinary cystine solubility; rash, proteinuria, and blood abnormalities may occur.

### **Tiotropium Bromide**

A long-acting inhaled medicine that relaxes airway muscles and keeps the airways open. It is used regularly to control COPD and sometimes asthma; it does not provide immediate relief during a sudden attack.

### **Tip Lesion Variant FSGS**

A distinct histological and clinical subtype of focal segmental glomerulosclerosis (FSGS) characterized

by the presence of at least one segmental lesion involving the tubular pole (origin of the proximal tubule) of the glomerular tuft, characterized by foam cells, podocyte hypertrophy, and endocapillary cellularity. Clinically associated with abrupt-onset full nephrotic syndrome, well-preserved baseline renal function, and favorable response to systemic corticosteroid therapy.

#### **Alternate Names:**

Glomerular Tip Lesion FSGS; Tip Variant FSGS

### **TIPS**

A procedure that creates a channel inside the liver between veins carrying blood into and out of it. The channel lowers high pressure in the portal vein and may treat repeated variceal bleeding or difficult-to-control abdominal fluid.

### **TI-RADS**

An ultrasound scoring system for thyroid lumps. It uses features such as the lump's composition, shape, edges, and calcifications to estimate cancer risk and help decide whether follow-up or needle sampling is needed.

### **Tirbanibulin**

A topical medicine used in short courses to treat actinic keratoses on the face or scalp; local redness, scaling, or irritation may occur.

### **Tired**

Feeling a lack of energy or physical or mental stamina, which may result from sleep loss, exertion, infection, anemia, endocrine disease, medication, depression, or other illness.

### **Tiredness**

Fatigue or reduced energy and endurance that can be physical, mental, or both; persistent unexplained fatigue warrants assessment for sleep, mood, systemic, medication, and metabolic causes.

### **Tirofiban**

An intravenous medicine that temporarily prevents platelets from sticking together. It is used in selected urgent heart conditions or coronary procedures to

---

reduce clotting, but can cause serious bleeding and requires close monitoring.

### **Tissue**

A group of cells and the supporting material around them that work together for a particular function. Examples include muscle, nerve, bone, connective, and lining tissues.

### **Tissue Adhesions**

Bands of fibrous scar tissue that abnormally connect surfaces or organs, often after surgery, inflammation, infection, or bleeding and potentially causing pain, infertility, or obstruction.

### **Tissue Banks**

Facilities that recover, screen, process, preserve, store, and distribute donated human tissue for transplantation, research, or reconstructive treatment under safety and traceability standards.

### **Tissue Congestion**

Accumulation of blood or fluid within tissue because of impaired venous drainage, inflammation, obstruction, or increased vascular flow, producing swelling, redness, or impaired function.

### **Tissue Distribution**

The movement of a medicine or other substance from the bloodstream into body tissues and organs. How much reaches each tissue depends on blood flow, binding, body composition, and the substance's properties.

### **Tissue Elastance**

How strongly a tissue or organ resists being stretched. In the lungs and chest wall, high elastance means more pressure is needed to expand them, which can make breathing harder.

### **Tissue Engineering**

The use of cells, supportive materials called scaffolds, and biologically active substances to create or repair tissues that restore, maintain, or improve body function.

### **Tissue Expander**

A temporary balloon placed beneath the skin and gradually filled with fluid to stretch the skin. The extra skin can later be used for breast, scalp, burn, or other reconstruction.

### **Tissue Expansion**

Gradual stretching of skin or soft tissue with an implanted or external expander so additional tissue can be created for reconstruction; it usually requires staged treatment and monitoring for infection, pain, or device problems.

### **Tissue Kallikrein**

An enzyme made in several tissues that releases chemical messengers affecting local blood flow, blood-vessel leakiness, pain, and inflammation.

### **Tissue Membrane**

A thin layer of tissue that covers a surface, surrounds an organ, or separates spaces in the body. Its structure and function depend on the type of tissue forming it.

### **Tissue Plasminogen Activator**

A natural blood protein that starts the process of breaking down clots. Manufactured forms are used in selected emergencies, such as some strokes, heart attacks, and lung clots, but can cause serious bleeding.

### **Tissue Plasminogen Activator-Associated Angioedema**

Sudden swelling of the face, lips, tongue, or throat after treatment with a clot-dissolving medicine. Throat swelling can block breathing.

### **Tissue Transglutaminase**

An enzyme found throughout the body. In celiac disease, the immune system may make antibodies against it, so a blood test for these antibodies is commonly used during evaluation.

### **Tissue Typing**

Testing tissue antigens, especially HLA, to assess

---

compatibility for transplantation.

### **Titanium**

A strong, lightweight, corrosion-resistant metal used in implants, prostheses, dental devices, and surgical instruments. Bone can form a stable connection with some titanium implant surfaces.

### **Titer**

A laboratory measure showing how much antibody or another detectable substance is present in a sample. It is often reported as the greatest dilution that still produces a measurable reaction; meaning depends on the test and timing.

### **Titration**

Gradually changing a medicine dose to find the amount that gives the desired effect with acceptable side effects, or measuring a substance by reacting it with a solution of known strength.

### **Titre**

A measure of antibody or another substance's concentration, determined by repeatedly diluting a sample until detection stops. Titres can help assess infection, immunity, or response, but interpretation depends on the test and timing.

### **Titubation**

A regular, trembling or nodding movement of the head or body. It can occur when the part of the brain that helps control balance and coordination is diseased.

### **Tizanidine**

A medicine that reduces nerve signals causing muscle tightness and spasms. It is used for selected painful spasms or spasticity but can cause sleepiness, dizziness, low blood pressure, dry mouth, and liver problems.

#### **Alternate Names:**

Zanaflex; Central Alpha-2 Agonist Muscle Relaxant

### **T-Lymphocyte**

A white blood cell that matures in the thymus and

directs cell-based immune responses. Different T cells kill infected cells, coordinate immunity, remember previous threats, or reduce excessive immune activity.

### **Tmax**

The time after a dose when a medicine reaches its highest measured concentration in blood or plasma.

### **TMD**

Alternate name; see *TMJ disorders*.

### **TMJ Disorders**

Temporomandibular joint disorders affect the jaw joints or chewing muscles and may cause jaw pain, clicking, stiffness, headaches, or limited movement.

#### **Alternate Names:**

Temporomandibular Joint Disorders; TMD

### **TNBC**

Alternate name; see *Triple-negative breast cancer*.

### **TNF Alpha**

A chemical messenger made by immune cells that promotes inflammation. It helps fight infection but excessive or prolonged activity can contribute to autoimmune disease, fever, tissue damage, and some cancers.

### **TNM Classification**

A cancer-staging system in which T describes the size or local extent of the primary tumor, N describes involvement of regional lymph nodes, and M describes distant metastasis. The combined findings estimate disease extent, guide treatment, compare outcomes, and inform prognosis; criteria vary by cancer type and staging edition.

### **TNM Classification Of Cancer Stages**

Alternate name; see *TNM Classification*.

### **TNM Staging**

Alternate name; see *TNM Classification*.

---

## **Tobacco**

A plant product containing nicotine and many toxic combustion or processing chemicals. Its use causes dependence and increases the risk of cancer, cardiovascular disease, and lung disease.

## **Tobacco Use**

Tobacco use exposes the body to nicotine and toxic combustion or aerosol chemicals, causing addiction and increased risks of cancer, vascular disease, and lung disease.

## **Tobramycin**

An aminoglycoside antibiotic used for selected serious bacterial infections, including some Gram-negative infections. It can damage the kidneys or hearing and is used with dosing and laboratory monitoring when appropriate.

## **Tocolysis**

Use of medicine to slow contractions for a short time when preterm birth may occur. The delay may allow treatment to help the baby's lungs mature or transfer to a hospital with newborn specialists; it does not usually prevent birth permanently.

## **Tocolytic Agents**

Tocolytic agents suppress uterine contractions temporarily to delay preterm birth, often allowing time for corticosteroids or transfer to specialist care.

## **Tocolytics**

Medicines that temporarily slow contractions before term. They may provide time for corticosteroids, magnesium when indicated, or transfer to specialist care, but their use depends on pregnancy duration, the cause of labor, and risks to the pregnant person or fetus.

## **Tocolytic Therapy**

Medicines used for a short time to slow contractions during threatened preterm birth. The delay may allow time for treatments that improve newborn outcomes or for transfer to a hospital with appropriate neonatal care; they do not usually stop preterm birth permanently.

## **Tocopherol**

A form of vitamin E, a fat-soluble vitamin that helps protect cell membranes. Deficiency is uncommon but may cause nerve problems, muscle weakness, or abnormal red blood cells; excessive supplements can also be harmful.

## **Toddler Feeding Patterns and Diet**

Nutritional and feeding guidance for young children from 6 months to 2 years of age, transitioning from pureed foods to family meals with diverse nutrient-rich textures, iron-rich foods, and healthy mealtime routines.

### **Alternate Names:**

Toddler Nutrition; Weaning and Complementary Feeding; Child Diet 6-24 Months

## **Toddler's Fracture**

A small spiral crack in the lower shinbone of a young child, usually after a minor twist. The child may suddenly limp or refuse to walk, even though there is little swelling or deformity. The first X-ray may look normal; a repeat X-ray after about two weeks may show healing. Treatment commonly uses a supportive boot or cast, based on examination and imaging.

### **Alternate Names:**

Cast-Tibia Fracture; Childhood Spiral Tibial Fracture

## **Toddler Test Or Procedure Preparation**

Preparing a toddler for a test or procedure uses simple explanations, play, distraction, comfort objects, caregiver support, and any required fasting or medicine instructions.

## **Todd Paralysis**

A transient, focal neurological deficit (most commonly hemiparesis, but may include aphasia or neglect) occurring immediately following a focal or secondarily generalized epileptic seizure, typically resolving completely within 15 minutes to 36 hours.

### **Alternate Names:**

Todd's Paresis; Postictal Hemiparesis

---

## Todd Paresis

A transient, focal neurological deficit (most commonly hemiparesis, monoparesis, hemihypesthesia, or aphasia) that follows a focal motor or secondarily generalized epileptic seizure. Symptoms typically resolve spontaneously within minutes to 36 hours; it is hypothesized to arise from localized neuronal metabolic exhaustion, transient lactic acidosis, or sustained Todd post-ictal inhibition.

### Alternate Names:

Todd Paralysis; Post-Ictal Paresis

## Toe-Brachial Index

The ratio between blood pressure measured at a toe and in the arm. It helps assess circulation in the legs, especially when stiff ankle arteries make ankle-pressure testing unreliable.

## Toe Joint

Any joint connecting the bones of a toe. Toe joints include the metatarsophalangeal and interphalangeal joints; they permit toe movement and may be affected by arthritis, gout, injury, or deformity.

### Alternate Names:

Metatarsophalangeal Joint; Interphalangeal Joint of Toe; MTP Joint

## Toenail

A toenail is the hard keratin plate covering the end of a toe and protecting its underlying tissue; injury, fungus, and ingrowth can cause disease.

## Toenail Fungus

Alternate name; see *Nail fungus*.

## Toe Pressure

The blood pressure measured in a toe, useful for assessing circulation in the foot. It can remain reliable when ankle arteries are too stiff to compress, as may occur with diabetes or kidney disease.

## Toes

The five digits at the end of each foot. The big toe has two bones and helps with balance and push-off; the other toes usually have three bones each. Injury,

arthritis, tight shoes, or nerve and muscle problems can cause pain or deformity.

## Togaviridae

A family of viruses that includes some mosquito-borne viruses, such as chikungunya and eastern equine encephalitis virus, which can cause fever, rash, joint pain, or brain inflammation.

## Togaviridae Infections

Infections caused by viruses in the Togaviridae family. Symptoms vary by virus and may include fever, rash, joint pain, or encephalitis.

## Tokophobia

Tokophobia is an intense fear of pregnancy or childbirth that can cause substantial distress or avoidance. Support may include psychological therapy, birth planning, and specialist maternity care.

## Tolazamide

An older sulfonylurea diabetes medicine that increases insulin release; hypoglycemia and weight gain can occur, especially in older adults or people with kidney disease.

## Tolcapone

A medicine used with levodopa for selected people with Parkinson disease to prolong levodopa's effect. It can cause diarrhea, involuntary movements, confusion, and potentially fatal liver injury, so liver monitoring is required.

## Tolerable Upper Intake Level

The highest average daily intake of a nutrient unlikely to cause harm in almost all healthy people. It includes food, drinks, and supplements and is not a recommended amount to consume.

### Alternate Names:

UL

## Tolerance

A decreased response to a drug after repeated administration, requiring dose escalation to achieve the same effect. Unlike tachyphylaxis, tolerance

---

develops over weeks to months of chronic use.

### **Toll-Like Receptor**

A protein on certain immune cells that recognizes common features of germs or damaged tissue. Activating these receptors helps start inflammation and other defenses against infection.

### **Toll-Like Receptors**

Receptors of the innate immune system that recognize characteristic molecules from microbes or damaged tissue. Their activation starts inflammatory and antimicrobial responses.

**Alternate Names:**

TLRs

### **Tolmetin**

A nonsteroidal anti-inflammatory drug used for pain and arthritis; gastrointestinal bleeding, kidney injury, and cardiovascular events are important risks.

### **Tolmetin Overdose**

Taking too much tolmetin, a nonsteroidal anti-inflammatory medicine, can cause stomach bleeding, vomiting, kidney injury, drowsiness, seizures, or other serious effects.

### **Tolnaftate**

A topical antifungal medicine used for some dermatophyte infections such as athlete's foot and ringworm; it is not effective for every type of fungal infection.

### **Tolosa-Hunt Syndrome**

A rare neuro-ophthalmic disorder characterized by severe, unremitting, painful unilateral periorbital/retro-orbital pain accompanied by ipsilateral ophthalmoplegia (palsies of cranial nerves III, IV, and VI) and sensory loss in the V1 distribution, caused by idiopathic granulomatous inflammation within the cavernous sinus or superior orbital fissure, exquisitely responsive to systemic corticosteroid therapy.

**Alternate Names:**

Painful Ophthalmoplegia; Cavernous Sinus Granu-

lomatous Syndrome

### **Tolterodine Tartrate**

Tolterodine tartrate is an antimuscarinic medicine used for overactive bladder and urinary urgency; dry mouth, constipation, and urinary retention can occur.

### **Toluene**

Toluene is a volatile solvent that can irritate tissues and, with substantial inhalation or ingestion, injure the nervous system, liver, kidneys, or heart.

### **Toluene And Xylene Poisoning**

Poisoning from solvents containing toluene or xylene, often through swallowing or inhalation. It can cause dizziness, confusion, abnormal heart rhythms, breathing problems, or organ injury.

### **Toluene Toxicity**

Solvent poisoning from inhalation or ingestion that can cause CNS depression, arrhythmias, renal tubular acidosis, hypokalemia, weakness, and altered mental status. Check electrolytes, acid-base status, renal function, and ECG; remove the exposure and provide supportive care while correcting life-threatening potassium or acid-base abnormalities.

### **Tolvaptan**

A vasopressin V2-receptor antagonist used in selected patients with hyponatremia or autosomal dominant polycystic kidney disease; thirst, rapid sodium correction, and liver injury require attention.

### **Tomogram**

A tomogram is an image of a selected cross-sectional layer of the body or another object, produced by tomography such as CT or MRI.

### **Tomography**

Imaging that produces cross-sectional views, or slices, through the body. Computed tomography uses X-rays, while other forms use ultrasound, magnetic fields, or radioactive tracers.

---

## Tomosynthesis

An imaging test that takes several low-dose X-ray pictures from different angles and combines them into thin layers. It is commonly used to examine breast tissue in three dimensions.

## Tomotherapy

Tomotherapy combines CT imaging with rotating, precisely shaped radiation beams to deliver radiation treatment while adjusting for the target and nearby tissues.

## Tongue

A muscular organ in the mouth that helps move food, form speech sounds, swallow, and detect taste. Swelling, sores, weakness, numbness, or restricted movement may result from injury, infection, inflammation, nerve disease, or cancer.

## Tongue Biopsy

A tongue biopsy removes a small tissue sample from a tongue lesion for microscopic examination of infection, inflammation, precancer, or cancer.

## Tongue Carcinoma

Tongue carcinoma is cancer of the tongue, usually squamous-cell cancer, and may cause a persistent sore, lump, pain, or difficulty speaking or swallowing.

## Tongue Disease

Any disorder affecting the tongue, such as infection, inflammation, injury, nerve disease, nutritional deficiency, or cancer. Symptoms may include pain, sores, swelling, altered taste, or difficulty speaking or swallowing.

## Tongue Neoplasm

An abnormal growth in the tongue that may be non-cancerous, precancerous, or cancerous. A persistent lump, ulcer, pain, bleeding, numbness, or difficulty speaking or swallowing needs examination and may require biopsy.

## Tongue Problems

Changes in the tongue, such as pain, swelling, sores, color change, numbness, or difficulty moving or tasting. Causes include injury, infection, inflammation, nutritional deficiency, and other disease.

## Tongue-Tie

A congenital condition characterized by an abnormally short, thick, or tight lingual frenulum that tethers the bottom of the tongue tip to the floor of the mouth, restricting tongue mobility. In infants, it can cause latching difficulty and painful breastfeeding; in older children, it may affect speech articulation, eating, or dental hygiene. Severe restriction may be treated with a simple surgical release (frenotomy).

### Alternate Names:

Ankyloglossia; Lingual Frenulum Tethering; Short Lingual Frenulum; Tongue Tie

## Tonic-Clonic Seizure

A seizure causing loss of awareness, first with stiffening of the body and then with repeated jerking movements. Sleepiness, confusion, headache, or muscle soreness commonly follows.

## Tonic Neck Reflex

A normal early-infant reflex, sometimes called the fencing posture. When the infant's head turns to one side, the arm on that side straightens and the opposite arm bends. It usually fades by about six months; marked asymmetry may suggest a neurologic problem.

### Alternate Names:

Asymmetric Tonic Neck Reflex; ATNR; Fencing Reflex

## Tonic Pupil

A pupil that reacts poorly to light but constricts slowly when focusing on something nearby. It often results from injury to nerves controlling the pupil and should be assessed with other eye and neurologic findings.

## Tonics

Preparations traditionally claimed to improve

---

strength, energy, appetite, or general health. Their ingredients, safety, and evidence vary widely, and some may interact with medicines or contain harmful amounts of active substances.

### **Tonic Seizures**

Seizures causing sustained stiffening of muscles, usually for seconds to minutes. They may affect one area or the whole body, cause falls or breathing difficulty, and require individualized seizure evaluation.

### **Tonometer**

An instrument that measures pressure inside the eye. Eye-pressure readings help detect glaucoma or monitor treatment, but they must be interpreted with the optic nerve, visual field, cornea, and other findings.

### **Tonometry**

Measurement of pressure inside the eye, usually to assess for glaucoma or monitor its treatment. Methods include applanation, noncontact air-puff, rebound, and electronic devices; results must be interpreted with corneal thickness and the clinical context.

### **Tonsil**

A small mass of immune tissue at the back of the throat. Tonsils help detect germs entering through the mouth and nose but can become enlarged or infected, causing sore throat, difficulty swallowing, or breathing problems.

#### **Alternate Names:**

Palatine Tonsil; Tonsilla

### **Tonsillar Cancer**

Cancer arising in a tonsil, most often from the surface lining cells. It may cause a persistent sore throat, pain felt in the ear, trouble swallowing, a tonsil that is larger on one side, or a lump in the neck.

### **Tonsillar Neoplasm**

A tonsillar neoplasm is an abnormal growth in a tonsil that may be benign or malignant and can cause a persistent sore throat, swallowing difficulty,

or neck swelling.

### **Tonsillectomy**

Surgery to remove the tonsils, performed for selected repeated infections, obstructive sleep apnea, or other tonsil disease after the expected benefits and risks are assessed.

### **Tonsillitis**

Inflammation or infection of the tonsils, usually caused by a virus and sometimes by group A streptococcal bacteria. It can cause sore throat, fever, swollen neck glands, painful swallowing, and white patches.

### **Tonsil Stones**

Small, hard lumps formed when food particles, mucus, dead cells, and bacteria become trapped and calcify in the folds of the tonsils. They are often harmless but may cause bad breath, throat irritation, a feeling that something is stuck in the throat, recurrent inflammation, or visible white or yellow deposits.

### **Tonus**

The normal resting tension or partial contraction of a muscle or tissue. Abnormally low or high tone can occur with nerve, muscle, brain, spinal-cord, or developmental disorders.

### **Tooth**

A hard mineralized structure anchored in the jaw, used for biting, tearing, chewing, and grinding food.

### **Tooth Abrasion**

Loss of tooth substance caused by external mechanical friction, such as aggressive brushing, abrasive products, or habits, producing grooves, notches, or sensitivity.

### **Tooth Abscess**

A tooth abscess is a localized collection of pus from bacterial infection of the tooth or surrounding tissues, causing pain, swelling, and possible spreading infection.

---

## **Toothache**

Pain arising from a tooth or nearby gum, ligament, bone, or other supporting tissue. Common causes include decay, infection, cracks, trauma, and gum disease.

## **Toothaches**

Alternate name; see *Toothache*.

## **Tooth Anatomy**

A tooth has a hard outer covering called enamel, a supporting layer called dentin, and a living center called the pulp that contains nerves and blood vessels. The root anchors it in the jaw through surrounding tissues.

## **Tooth Ankylosis**

Fusion of a tooth root to alveolar bone through loss of the periodontal ligament, preventing normal eruption and making the tooth appear infraoccluded as neighboring teeth grow.

## **Tooth Attrition**

Wear of tooth surfaces caused by tooth-to-tooth contact, commonly from chewing, bruxism, or malocclusion, producing flattened cusps and possible sensitivity.

## **Tooth Avulsion**

Complete displacement of a tooth from its socket, usually caused by an injury. The tooth, socket, periodontal ligament, and surrounding tissues may all be damaged; permanent teeth are more commonly affected.

## **Tooth Brushing**

Tooth brushing removes plaque and food from teeth and gums. Brushing twice daily with fluoride toothpaste helps prevent tooth decay and gum disease.

## **Tooth Calcification**

Deposition of mineral that forms and hardens enamel, dentin, cementum, and other tooth structures during development; abnormal timing or amount can affect tooth strength and appearance.

## **Tooth Component**

Tooth components include enamel, dentin, cementum, pulp, and supporting tissues, each contributing to tooth strength, sensation, nutrition, and attachment.

## **Tooth Crowding**

Tooth crowding occurs when teeth lack enough space to align normally, often from tooth size, jaw size, eruption pattern, or retained primary teeth.

## **Tooth Crown**

The tooth crown is the visible portion above the gum, covered mainly by hard enamel and containing underlying dentin and pulp.

## **Tooth Decay**

Gradual destruction of tooth structure caused when mouth bacteria make acids from sugars. It can cause sensitivity, pain, holes, infection, and tooth loss, but fluoride, cleaning, diet, and dental care help prevent progression.

### **Alternate Names:**

Dental Caries; Cavities

## **Tooth Discoloration**

Abnormal tooth color can result from plaque, decay, trauma, fluorosis, medicines, enamel defects, or staining, and the cause determines treatment.

## **Tooth Disease**

Any disorder affecting a tooth, including decay, infection, cracks, developmental defects, or wear. It may cause pain, sensitivity, discoloration, swelling, or difficulty chewing and should be assessed by a dental professional.

## **Tooth Enamel**

Tooth enamel is the highly mineralized outer covering of the crown that protects dentin and pulp from wear, acid, and bacteria.

## **Tooth Erosion**

Tooth erosion is the chemical loss of tooth enamel caused by acids, not by bacteria. Acidic foods,

---

drinks, reflux, and repeated vomiting can contribute to it.

### **Tooth Eruption**

The process by which a developing tooth moves through the gum into the mouth. Baby teeth usually appear from about 6 months to 3 years, and permanent teeth from about 6 years onward; timing varies and delays may need assessment.

### **Tooth Extraction**

Removal of a tooth from its socket because of severe decay, infection, periodontal disease, fracture, impaction, orthodontic planning, or another clinical indication.

### **Tooth Fracture**

A crack or break in a tooth caused by injury, biting hard material, decay, grinding, or weakened enamel. It may expose the inner nerve, causing pain, sensitivity, infection, or loss of the tooth.

### **Tooth Infection**

Infection of the tooth, its pulp, or surrounding tissues, commonly caused by untreated decay, cracks, or gum disease. It may cause toothache, sensitivity, swelling, fever, or drainage. Facial swelling, difficulty swallowing or breathing, or spreading infection requires emergency assessment.

### **Tooth Loss**

Tooth loss is absence of a tooth due to decay, gum disease, trauma, developmental absence, or extraction and can affect chewing, speech, and oral health.

### **Tooth Luxation**

Injury that loosens or moves a tooth without completely knocking it out. The tooth may be pushed inward, outward, or sideways and needs prompt dental assessment to protect the tooth and surrounding tissues.

### **Toothpaste Overdose**

Swallowing too much toothpaste can cause stomach upset, vomiting, or diarrhea. Large amounts of flu-

oride toothpaste can cause serious salt and calcium disturbances, especially in children.

### **Tooth Replantation**

Replacement of an accidentally displaced or avulsed tooth into its socket, followed by stabilization and dental follow-up.

### **Tooth Resorption**

Breakdown of part of a tooth, usually starting inside the tooth or on its root. It may follow injury, infection, orthodontic treatment, or occur without a known cause and can weaken or destroy the tooth.

### **Tooth Root**

The tooth root anchors a tooth in its socket and contains dentin, cementum, pulp, nerves, and blood vessels beneath the gum.

### **Tooth Sensibility Testing**

Dental tests using cold, heat, electricity, or touch to see whether a tooth's nerve responds. The results do not directly measure blood flow inside the tooth and must be combined with examination and dental imaging.

### **Tooth Sensitivity**

Brief pain caused by cold, heat, sweet or acidic foods, brushing, or touch. It often occurs when protective enamel or gum tissue is worn away and the inner dentin is exposed; persistent sensitivity needs dental assessment.

### **Tophaceous Gout**

Advanced, long-lasting gout in which firm lumps of uric-acid crystals build up in and around joints. These lumps, called tophi, may develop on the toes, fingers, ears, or elbows and damage nearby tissue.

### **Tophus**

A firm lump made of uric-acid crystals that collects in or around a joint or in soft tissue after long-standing gout. Tophi can cause pain, inflammation, skin breakdown, deformity, and damage to bone or cartilage.

---

## Topographic Spinal Cord Anatomy

The organization of the spinal cord into segments, gray matter, white-matter tracts, roots, enlargements, and vascular territories. This anatomy explains patterns of motor, sensory, reflex, and autonomic loss after cord injury or disease.

## Topical

Applied directly to skin or a moist lining, usually to act at the treatment site with limited whole-body exposure.

## Topical Antibiotics

Antibiotics applied to the skin to treat selected superficial bacterial infections. The choice and duration depend on the organism, site, extent of infection, resistance patterns, and local guidance. Unnecessary or prolonged use can cause irritation and antimicrobial resistance.

## Topical Antifungals

Medicines applied to the skin to treat fungal infections such as athlete's foot, ringworm, or jock itch. The product must match the fungus and body site; irritation or treatment failure can occur.

## Topical Calcineurin Inhibitors

Non-steroid creams or ointments that reduce immune inflammation in eczema, especially on the face, eyelids, or skin folds. Burning or itching may occur briefly after application.

## Topical Corticosteroid Potency

The strength of a steroid cream, ointment, lotion, or gel used on the skin. Mild products are used for sensitive areas or children, while stronger products may be needed briefly for thick or severe inflammation. Choice depends on the diagnosis, body site, age, duration, and risk of skin thinning or other effects.

## Topical Retinoids

Vitamin-A-related medicines applied to the skin for acne and some sun-related skin changes. They help prevent blocked pores and increase skin-cell turnover but may cause dryness, irritation, and increased sun

sensitivity; pregnancy precautions vary by product.

## Topiramate

An antiseizure medicine also used to prevent migraine. It may cause tingling, slowed thinking, weight loss, kidney stones, or acid imbalance and can harm a developing fetus; pregnancy planning and medicine changes require medical advice.

## Topoisomerase

An enzyme that temporarily cuts and rejoins DNA to control its twisting during replication, transcription, and chromosome separation.

## Topoisomerase II

An enzyme that cuts both DNA strands, passes another DNA segment through the break, and rejoins the strands; it is targeted by some anticancer drugs.

## Topoisomerase Inhibitors

Drugs that interfere with DNA topoisomerases; some are antibiotics and others are anticancer medicines, with toxicity depending on the drug and target enzyme.

## Topotecan

A topoisomerase-I inhibitor used for selected ovarian, small-cell lung, and cervical cancers; bone-marrow suppression is a major toxicity.

## Topotecan Hydrochloride

A salt form of topotecan, a chemotherapy medicine that interferes with DNA copying. It treats selected cancers but can cause dangerously low blood counts, infection, bleeding, diarrhea, nausea, or fatigue.

## TORCH Panel

A group of blood tests used when pregnancy or newborn findings suggest infection acquired before birth. TORCH traditionally refers to Toxoplasma, other infections, rubella, cytomegalovirus, and herpes; individual tests and antibody results need careful clinical interpretation.

---

## **TORCH Screen**

Testing for selected congenital infections—classically Toxoplasma, Other infections, Rubella, Cytomegalovirus, and Herpes—when fetal or newborn findings suggest an in-utero infection; broad panels require careful interpretation.

## **Toremifene**

A selective estrogen-receptor modulator used for metastatic breast cancer in postmenopausal women; hot flashes and, rarely, dangerous QT prolongation may occur.

## **Torn ACL**

A torn anterior cruciate ligament is a knee injury commonly caused by sudden pivoting, landing, or contact, producing a pop, swelling, instability, and difficulty changing direction. Rehabilitation, bracing, or reconstruction is selected according to activity, associated injury, and goals.

## **Torn Meniscus**

A torn meniscus is a split in the knee's shock-absorbing cartilage caused by twisting or degeneration. Pain, swelling, catching, or locking may occur; physical therapy or arthroscopic treatment depends on tear pattern, symptoms, age, and associated disease.

### **Alternate Names:**

Meniscal Tear; Torn Semilunar Cartilage

## **Torpor**

A state of greatly reduced activity, alertness, or responsiveness. In a patient, marked or new torpor may signal a serious illness, medicine effect, or metabolic problem.

## **Torsade De Pointes**

A dangerous, fast heart rhythm in which the lower chambers beat in a twisting pattern. It is often linked with a prolonged electrical recovery time, abnormal body salts, certain medicines, or inherited heart conditions and can cause collapse or cardiac arrest.

## **Torsades De Pointes**

A dangerous, fast heart rhythm arising from the lower chambers and often associated with a prolonged QT interval. It may cause dizziness, fainting, or cardiac arrest and requires urgent treatment and correction of the cause.

## **Torsemide**

A water tablet that helps the kidneys remove salt and water. It treats swelling caused by heart, kidney, or liver disease but can cause dehydration, low blood pressure, or abnormal body-salt levels.

## **Torsion**

Twisting of a body structure around its supporting axis, which may reduce or stop blood flow. Torsion of the testicle, ovary, or bowel can destroy tissue and often requires emergency surgery.

## **Torsion Dystonia**

A movement disorder in which repeated or sustained muscle contractions twist part of the body into abnormal postures. It may affect one area or many areas and can be inherited or develop after illness, injury, or medicine exposure.

## **Torsion of Appendix Testis**

Twisting of a small leftover tissue tag near the top of a testicle, usually in a child. It can cause local scrotal pain and a small blue spot, but sudden scrotal pain must be assessed urgently to rule out twisting of the testicle itself.

### **Alternate Names:**

Hydatid of Morgagni Torsion; Blue Dot Sign

## **Torsion of Testicular Appendage**

Twisting and infarction of a vestigial appendage attached to the testis or epididymis, usually in children. Localized upper-pole pain and a tender blue-dot sign may occur, but testicular torsion must be excluded.

## **Torsion Of The Appendix Testis**

Twisting of a tiny leftover structure attached to the upper part of the testicle. It is common in

---

boys before puberty and causes sudden, localized scrotal pain and tenderness; a small blue spot may be visible through the skin. The testicle usually still has normal blood flow. Rest, support, and pain medicine usually allow it to heal, but urgent assessment is needed to exclude testicular torsion.

**Alternate Names:**

Hydatid of Morgagni Torsion; Appendix Testis Torsion

**Torticollis**

A condition in which the neck muscles pull the head into a tilted or rotated position. It may be present from birth or result from pain, injury, muscle spasm, nerve disease, or another condition.

**Alternate Names:**

Cervical Dystonia; Loxia

**Torulaspora**

A genus of yeasts used in food and fermentation; human infection is rare and usually opportunistic.

**Torus Fracture**

A stable incomplete break in a child's bone caused by compression, often in the wrist after a fall. The bone bulges rather than breaking all the way through; it usually heals well with a splint or cast and follow-up as advised.

**Alternate Names:**

Buckle Fracture; Metaphyseal Buckle Fracture; Torus Fracture of Radius

**Torus Mandibularis**

A harmless, usually painless bony lump on the tongue side of the lower jaw, commonly near the premolar teeth. It usually needs no treatment unless it is repeatedly injured or interferes with dentures.

**Torus Palatinus**

A harmless, usually painless bony lump along the middle of the roof of the mouth. It grows slowly and usually needs no treatment unless it becomes irritated or interferes with eating or dentures.

**Total Abdominal Colectomy**

Surgery to remove the entire colon through an abdominal incision or keyhole approach. The small intestine may be joined to the rectum or brought through the abdominal wall as an ileostomy, depending on the disease and safety.

**Total Anomalous Pulmonary Venous Connection**

Alternate name; see *Total anomalous pulmonary venous return*.

**Total Anomalous Pulmonary Venous Return**

A birth defect in which the veins returning oxygen-rich blood from the lungs connect to the wrong side of the heart. Babies may have blue skin, rapid breathing, poor feeding, or heart failure. Severe obstruction is an emergency, and surgery is needed to reroute the veins.

**Total Artificial Heart**

A mechanical device that replaces the pumping function of both ventricles and is used in selected patients with severe biventricular heart failure, usually as a bridge to transplantation. It requires specialized center-based management and carries risks including bleeding, infection, thrombosis, and device malfunction.

**Total-Body Skin Examination**

A systematic examination of the skin, scalp, nails, and visible mucous membranes from head to toe to look for new, changing, or suspicious lesions. It may include dermoscopy and is especially useful for people at increased risk of skin cancer.

**Total Body Surface Area**

The percentage of the skin affected by a burn or another widespread process. Clinicians estimate it using the person's palm or body-area charts to judge severity and guide treatment.

**Total Breech Extraction**

A delivery procedure in which a clinician brings out a breech baby by the feet. It is mainly used for a

---

second twin in selected circumstances, not routinely for a single full-term breech baby because of injury risks.

### **Total Cholesterol**

Total cholesterol is the combined cholesterol carried in major blood lipoproteins; cardiovascular risk is assessed with HDL, LDL, triglycerides, and other factors.

### **Total Daily Energy Expenditure**

The total energy the body uses in one day, including energy needed at rest, digestion, movement, and physical activity. It varies with body size, age, muscle mass, health, and activity level.

### **Total Haemolytic Complement Test**

A blood test that measures whether a group of immune proteins can work together to destroy cells. An abnormal result may suggest immune deficiency, autoimmune disease, infection, inflammation, or a laboratory problem.

### **Total Hip Arthroplasty**

Surgery that replaces a damaged hip joint with artificial parts. It is used for severe arthritis, fractures, or other joint damage when pain and loss of movement continue despite other treatment.

### **Total Hysterectomy**

Removal of the uterus and cervix. The fallopian tubes and ovaries are not necessarily removed and should be specified separately, such as salpingectomy or oophorectomy.

### **Total Intravenous Anesthesia**

General anesthesia given entirely through medicines injected into a vein rather than inhaled gases. It produces controlled unconsciousness during surgery, while trained anesthesia staff continuously monitor breathing, blood pressure, and other vital functions.

### **Total Iron-Binding Capacity**

A clinical laboratory blood test measuring the maximum concentration of iron that can be bound by

circulating serum transferrin molecules, elevated in iron deficiency anemia and decreased in anemia of chronic disease, hemochromatosis, and malnutrition.

#### **Alternate Names:**

TIBC

### **Total Iron Binding Capacity**

A blood-test estimate of how much iron the protein transferrin can carry. It is interpreted with blood iron, ferritin, blood counts, and other findings to assess iron deficiency, inflammation, or iron overload; it does not measure stored iron directly.

### **Total Knee Arthroplasty**

Surgery that replaces damaged surfaces of the knee with artificial parts to relieve severe pain and improve movement. It may be recommended for advanced arthritis or major joint damage after other measures are inadequate; rehabilitation and monitoring help restore function and detect complications.

### **Total Knee Replacement**

Surgery that replaces damaged surfaces of the knee with artificial parts to relieve severe pain and improve function. Recovery includes exercises and gradual activity; infection, blood clots, stiffness, loosening, persistent pain, or repeat surgery may occur.

#### **Alternate Names:**

Total Knee Arthroplasty

### **Total Laryngectomy**

Total laryngectomy removes the entire voice box and creates a permanent opening in the neck for breathing, usually to treat advanced laryngeal cancer.

### **Total Lesion Glycolysis**

A PET-scan measurement combining the amount of active tumor tissue with how much radioactive sugar-like tracer it absorbs. It estimates the tumor's overall activity and may help monitor treatment, but does not determine outlook alone.

---

### Total Lung Capacity

The greatest amount of air the lungs can hold after a full breath in. Lung-volume testing measures it; the amount may be too high when lungs are overinflated or too low when the lungs or chest cannot expand normally.

### Total Pancreatectomy

Total pancreatectomy removes the entire pancreas and causes permanent loss of insulin and digestive-enzyme production, requiring lifelong replacement treatment.

### Total Parenteral Nutrition

Nutrition given through a vein when the digestive system cannot absorb enough food. The solution can provide water, sugar, protein, fat, vitamins, and minerals, but requires monitoring for infection, blood-sugar changes, and liver or electrolyte problems.

### Total Proctocolectomy And Ileal-Anal Pouch

Total proctocolectomy with an ileal-anal pouch removes the colon and rectum and creates a pouch from the ileum that is connected to the anus.

### Total Proctocolectomy With Ileostomy

Total proctocolectomy with ileostomy removes the colon and rectum and diverts the end of the small intestine through an abdominal stoma.

### Total Protein

The combined amount of albumin and other proteins in the blood. A blood test may help assess nutrition, liver or kidney disease, inflammation, or abnormal antibody production.

### Total Sleep Time

The total amount of time spent asleep during a defined sleep period or sleep study, excluding periods of wakefulness.

### Total Thyroidectomy

The complete surgical resection of both lobes and

the isthmus of the thyroid gland, indicated for aggressive thyroid malignancies, compressive multinodular goiters, or medically refractory Graves disease, carrying specific risks of recurrent laryngeal nerve injury and permanent hypoparathyroidism.

### Touch

The sensory perception of contact, pressure, texture, vibration, or movement across the skin. Signals travel through sensory nerves to the spinal cord and brain.

### Tourette Disorder

A condition beginning in childhood or adolescence that causes repeated movements and sounds, called tics, for at least one year. Tics may include blinking, shrugging, throat clearing, or words and often change over time.

### Tourette's

Alternate name; see *Tourette syndrome*.

### Tourette's Syndrome

A neurodevelopmental disorder involving multiple motor tics and at least one vocal tic persisting for more than one year.

### Tourette Syndrome

A neurodevelopmental disorder characterized by multiple motor tics and at least one vocal tic occurring over at least one year. Tics are sudden, rapid, recurrent, stereotyped movements or vocalizations. They are often preceded by premonitory urges. Tics typically worsen in adolescence and may improve in adulthood.

### Alternate Names:

Tourette's Disorder; Gilles de la Tourette Syndrome

### Tourniquet

A band or pneumatic device placed around a limb to temporarily occlude or greatly reduce arterial blood flow. Emergency tourniquets are designed for control of severe limb bleeding, while pneumatic surgical tourniquets create a relatively bloodless operative field. Prolonged inflation can cause nerve, muscle, or skin injury.

---

### **Tourniquet Test**

A bedside test that looks for small skin spots after brief pressure from a blood-pressure cuff. It may show increased capillary fragility or low platelets, but it is not specific and cannot diagnose dengue or another disease by itself.

#### **Alternate Names:**

Rumpel-Leede Test; Hess Test; Capillary Fragility Test

### **Towel Clamp**

A surgical clamp used to secure drapes or hold materials in place during an operation. Its sharp points must be applied carefully because they can puncture skin or damage underlying tissue.

### **Townes Syndrome**

A rare inherited birth disorder that commonly causes blockage or absence of the anal opening and unusual thumbs. Kidney, heart, hearing, foot, or genital abnormalities may also occur. The specific problems vary, so treatment is planned around each child's findings.

### **Toxaphene**

A persistent organochlorine insecticide mixture that can accumulate in soil, water, and body fat. Significant exposure may overstimulate the nervous system and cause tremors, seizures, liver injury, or other toxic effects.

### **Toxbase**

A clinical poison-information service that helps healthcare professionals assess chemical or medicine exposures. It provides evidence-based advice about expected symptoms, necessary tests, treatment, observation, and urgency for particular substances.

### **Toxic**

Poisonous or capable of harming living cells, tissues, organs, or the whole body. Toxicity depends on the substance, dose, route, duration, and individual susceptibility.

### **Toxic Adenoma**

A single, non-cancerous (benign) thyroid lump that produces too much thyroid hormone on its own, independent of the body's normal hormonal controls. This causes an overactive thyroid (hyperthyroidism) with symptoms such as a rapid or irregular heart-beat, unexplained weight loss, shaky hands, sweating, anxiety, and heat intolerance, but without the bulging eye signs seen in Graves' disease. Blood tests show very low pituitary thyroid-stimulating hormone (TSH) and high thyroid hormone levels, while a radioactive thyroid scan characteristically shows a single bright "hot nodule" that absorbs tracer while the rest of the thyroid remains quiet. Definitive treatment involves radioactive iodine therapy to destroy the overactive lump or surgery to remove the affected half of the thyroid gland (lobectomy).

#### **Alternate Names:**

Toxic Thyroid Adenoma; Autonomous Thyroid Nodule; Plummer Disease; Hot Thyroid Nodule

### **Toxic Anterior Segment Syndrome**

A sterile, noninfectious inflammatory reaction in the anterior eye after surgery, caused by toxic substances or contaminants introduced during the procedure. Severe corneal edema, anterior chamber inflammation, and elevated pressure may occur.

### **Toxic Dose**

The amount of a substance that causes harmful effects. It varies with the substance, route, duration of exposure, age, health, and individual susceptibility.

### **Toxic Effect**

Harmful change caused by a chemical, medicine, poison, radiation, or other exposure. The effect may involve one or more organs and depends on the dose, route, duration, metabolism, and individual susceptibility.

### **Toxic Encephalopathy**

Brain dysfunction caused by a poison, chemical, or medicine. It may cause confusion, unusual behavior, memory or movement problems, seizures, or reduced alertness and needs assessment for the exposure and

---

its effects.

### Toxic Epidermal Necrolysis

A rare, life-threatening reaction usually to a medicine in which widespread painful skin and moist body linings blister and peel. It can cause fluid loss, infection, and organ problems and requires emergency specialist care.

**Alternate Names:**

TEN

### Toxicity

The ability of a substance, treatment, or exposure to cause harmful effects in a living organism. Severity depends on the dose, route, duration, metabolism, target organs, and individual susceptibility; effects may be temporary or permanent.

### Toxicity Grade

A standardized rating of how severe a harmful effect is, often used for adverse effects of medicines or cancer treatment. Grades generally range from mild to life-threatening and help guide monitoring and management.

### Toxic Megacolon

A life-threatening widening of the large intestine during severe bowel inflammation or infection. It may cause severe abdominal swelling and pain, fever, rapid heart rate, dehydration, or shock and requires urgent hospital treatment.

### Toxic Metabolic Encephalopathy

Temporary or lasting brain dysfunction caused by a poison, medicine, organ failure, infection, or abnormal body chemistry. It may cause confusion, unusual sleepiness, agitation, seizures, or coma and requires treatment of the underlying problem.

### Toxic Neuropathy

Peripheral-nerve dysfunction caused by a toxic exposure, medicine, metabolic toxin, or substance-use-related injury. Symptoms may include burning pain, numbness, tingling, weakness, or impaired balance.

### Toxic Nodular Goiter

An enlarged thyroid containing one or more nodules that make too much thyroid hormone. It can cause weight loss, sweating, shaking, fast or irregular heartbeat, anxiety, or heat intolerance and is assessed with blood tests and imaging.

### Toxicodendron Dermatitis

An intensely pruritic, erythematous, papulovesicular, and linear contact dermatitis resulting from cutaneous exposure to urushiol resin found in poison ivy, poison oak, or poison sumac.

**Alternate Names:**

Urushiol Dermatitis; Rhus Dermatitis; Poison Ivy Rash

### Toxicodendron Poisoning

Urushiol-induced allergic contact dermatitis from poison ivy, poison oak, or poison sumac. An intensely pruritic, often linear vesicular eruption appears after a delayed interval and can spread through contaminated clothing, tools, or animal fur; severe facial, genital, widespread, or inhalational reactions need medical treatment.

### Toxicodendron Species

Plant species belonging to the genus *Toxicodendron* that contain the lipophilic antigenic resin urushiol, which triggers a type IV cell-mediated allergic contact dermatitis upon epidermal contact.

**Alternate Names:**

Toxicodendron Plants; Urushiol-Containing Plants; Poison Ivy Oak Sumac Species; Poison Ivy; Poison Oak; Poison Sumac

### Toxicokinetic Description

An account of how a harmful substance enters the body, is absorbed, distributed, changed by metabolism, and eliminated. These processes determine the concentration and duration of exposure at target organs.

### Toxicology

The study of poisons and harmful effects of chemicals, medicines, and other substances. It includes how exposure happens, how the body is affected,

---

how poisoning is recognized, how it can be prevented, and how it is treated.

### **Toxicology Screen**

A test of urine, blood, or another sample for medicines, drugs, alcohol, or poisons. Results must be interpreted with the person's symptoms, timing, and prescribed medicines.

### **Toxicology Specimen Preservation**

Collection, labeling, storage, and transport of biological specimens to preserve analytes and prevent contamination or degradation. Appropriate specimens may include peripheral blood, urine, vitreous humor, bile, liver, hair, or gastric contents depending on the suspected exposure and timing.

### **Toxic Shock Syndrome**

A rare, life-threatening illness caused by toxins made by certain bacteria. It can cause sudden fever, a widespread rash, low blood pressure, vomiting or diarrhea, and failure of organs such as the kidneys or heart.

### **Toxic Synovitis**

Temporary inflammation of the lining of the hip joint, usually in a child after a viral illness. It can cause hip pain and limping and must be distinguished from a serious joint infection.

### **Toxidrome**

A recognizable group of symptoms and examination findings suggesting poisoning by a particular type of substance. Examples include opioid, stimulant, sedative, and cholinergic patterns; the pattern helps guide urgent treatment but does not identify the exact poison by itself.

### **Toxin**

A poisonous substance made by a living organism, such as a bacterium, plant, animal, or fungus. Toxins can damage specific tissues or disrupt nerve, muscle, or cellular functions.

#### **Alternate Names:**

Biological Poison; Endotoxin or Exotoxin

### **Toxocara**

A genus of parasitic roundworms that commonly infect dogs and cats. People acquire infection by swallowing eggs from contaminated soil or food; migrating larvae can cause fever, enlarged organs, or eye or nervous-system disease.

### **Toxocara Canis**

A dog roundworm whose eggs can infect people. Larvae migrate through tissues and may cause toxocariasis, with fever, cough, enlarged liver, eye inflammation, or rarely nervous-system involvement.

### **Toxocara Cati**

A cat roundworm whose eggs can infect people. The larvae may migrate through organs and cause toxocariasis, including fever, cough, enlarged liver, eye inflammation, or rarely neurologic disease.

### **Toxocariasis**

Infection caused by dog or cat roundworm larvae after a person swallows eggs from contaminated soil, food, or hands. The larvae can migrate through the body and cause fever, cough, enlarged liver, eye inflammation, or rarely brain disease.

### **Toxoid**

A bacterial toxin that has been chemically or otherwise inactivated so it cannot cause its usual harm but can still stimulate protective immunity. Toxoids are used in vaccines against diseases such as tetanus and diphtheria.

### **Toxoid Vaccines**

Vaccines made from bacterial toxins that have been detoxified so they cannot cause their usual harm but can train the immune system to neutralize the toxin. Examples protect against tetanus and diphtheria.

### **Toxoplasma**

A genus of intracellular parasites; *Toxoplasma gondii* is the species that infects people. Infection is often mild, but it can seriously affect a fetus or people with weakened immunity, especially the brain and eyes.

---

### **Toxoplasma Blood Test**

A blood test detecting antibodies or genetic material related to *Toxoplasma gondii* infection, interpreted with symptoms, immune status, pregnancy, and timing of exposure.

### **Toxoplasma Chorioretinitis**

Alternate name; see *Ocular Toxoplasmosis*.

### **Toxoplasma Gondii**

A parasite that causes toxoplasmosis. Cats are its main host and can spread infective forms in their stool; people may also acquire it from undercooked meat, contaminated soil, or contaminated food and water.

### **Toxoplasma Meningoencephalitis**

Alternate name; see *Toxoplasmosis*.

### **Toxoplasmosis**

An infection caused by the single-celled parasite *Toxoplasma gondii*. People may acquire it by eating undercooked contaminated meat or shellfish, swallowing the parasite from cat feces or contaminated soil, or consuming contaminated food or water. Most people with a healthy immune system have no symptoms; others may have swollen lymph nodes, fever, tiredness, or muscle aches. Infection can cause serious disease of the eyes or brain in people with weakened immunity, may reactivate after immune suppression, and can pass from a newly infected pregnant person to the fetus. Person-to-person spread is otherwise uncommon but can occur through an infected organ or blood transfusion.

#### **Alternate Names:**

Toxoplasma Gondii Infection; Ocular Toxoplasmosis

### **Toxoplasmosis Pathology**

Tissue injury caused by *Toxoplasma gondii*, often showing necrotizing inflammation, tachyzoites, tissue cysts containing bradyzoites, and variable lymphohistiocytic or mixed inflammatory infiltrates.

### **TPA**

Tissue plasminogen activator, a natural clot-

dissolving protein or a laboratory-made medicine based on it. In selected emergencies it helps break down clots, but it can cause serious bleeding.

#### **Alternate Names:**

Tissue Plasminogen Activator; Fibrinolytic Enzyme

### **TPMT Polymorphism**

An inherited difference in the thiopurine methyltransferase enzyme, which breaks down some immune-suppressing medicines. Low enzyme activity can cause dangerously low blood counts unless dosing is reduced or another treatment is chosen.

### **TPN**

TPN, or total parenteral nutrition, supplies nutrients intravenously when the gastrointestinal tract cannot be used adequately.

### **Trabectedin**

A chemotherapy medicine that attaches to DNA and disrupts cancer-cell growth and repair. It is used for selected advanced soft-tissue sarcomas and ovarian cancers and can cause low blood counts, liver injury, nausea, or muscle damage.

### **Trabecula**

A small beam, strut, or partition of tissue, especially within spongy bone. Trabeculae form a supportive internal network that helps bones bear forces while keeping them relatively light.

### **Trabecular Bone**

Light, honeycomb-like bone found inside many bones and near their ends and joints. It supports the body, contains bone marrow, and changes quickly when weight, hormones, medicines, or diseases such as osteoporosis affect bone strength.

#### **Alternate Names:**

Spongy Bone; Cancellous Bone

### **Trabecular Meshwork**

A sieve-like tissue near the front of the eye through which the clear fluid called aqueous humor drains. If the drainage pathway becomes blocked, pressure inside the eye may rise and damage the optic nerve

---

in glaucoma.

### **Trabeculectomy**

An operation for glaucoma that creates a new drainage path for fluid inside the eye. Lowering eye pressure can protect the optic nerve, but bleeding, infection, scarring, or pressure that becomes too low can occur.

### **Trabeculoplasty**

Laser treatment for some forms of glaucoma that improves drainage of the clear fluid inside the eye. Better drainage can lower eye pressure and reduce the risk of further optic-nerve damage.

### **Trace Elements**

Minerals needed in very small amounts for normal enzyme function, blood formation, thyroid activity, and other body processes.

### **Trace Mineral**

A mineral needed in very small amounts for health. Examples include iron, zinc, copper, iodine, and selenium; too little or too much can impair blood formation, thyroid function, immunity, growth, or other body processes.

### **Tracer**

A detectable substance used to follow a biological, chemical, or physical process. Medical tracers can show blood flow, organ function, metabolism, or disease location through imaging or laboratory testing.

### **Trachea**

The windpipe connecting the larynx to the right and left main bronchi. Cartilage rings help keep it open so air can move to and from the lungs.

### **Tracheal Agenesis With Bronchoesophageal Fistula**

A very rare birth defect in which the windpipe is absent or severely underdeveloped and an abnormal passage connects the breathing system with the food pipe. Newborns have extreme breathing difficulty and need immediate specialist care.

### **Tracheal Foreign Body**

An object stuck in the windpipe. It can cause choking, noisy breathing, severe breathing difficulty, or complete blockage and is an emergency requiring immediate removal by trained clinicians.

### **Tracheal Rupture**

A tear in the windpipe caused by severe injury, surgery, a medical instrument, or pressure inside the airway. It can let air leak into the chest and cause breathing difficulty, infection, or life-threatening complications.

### **Tracheal Stenosis**

Narrowing of the windpipe, often after prolonged breathing-tube use, tracheostomy, injury, or inflammation. It may cause worsening breathlessness, noisy breathing, or wheezing and can require airway procedures or surgery.

### **Tracheal Tug**

A downward, rhythmic traction or pulling sensation on the cricoid cartilage and trachea synchronized with cardiac systole, felt by placing the examiner's fingers under the cricoid cartilage while the patient extends the neck. It is a physical sign of an aneurysm of the aortic arch downwardly displacing the left main bronchus.

#### **Alternate Names:**

Oliver Sign; Cardarelli Sign

### **Tracheitis**

Inflammation or infection of the windpipe. Mild cases may occur with a viral illness, but bacterial infection can rapidly block a child's airway and cause high fever, a harsh cough, noisy breathing, and severe illness. It requires emergency airway and antibiotic treatment.

### **Trachelectomy**

Trachelectomy is surgical removal of the cervix, sometimes with nearby tissue, used in selected cervical cancers or other conditions.

---

## Tracheobronchial Injury

Traumatic rupture or laceration of the cervical trachea or major bronchi, usually occurring within 2 cm of the carina following severe blunt thoracic deceleration trauma, presenting with massive subcutaneous emphysema, pneumomediastinum, and a continuous large air leak through a thoracostomy tube.

### Alternate Names:

TBI

## Tracheobronchomalacia

Weakness of the windpipe or larger airways that allows them to collapse during breathing. It may cause noisy breathing, chronic cough, repeated infections, or difficulty clearing mucus and may be present from birth or develop later.

## Tracheobronchomegaly

Unusual widening of the windpipe and the main airways, usually because their supporting tissue is weak. It can cause a weak cough, breathlessness, repeated chest infections, and difficulty clearing mucus.

## Tracheoesophageal Fistula

An abnormal opening between the windpipe and food pipe, usually present from birth. It can let milk enter the lungs, causing coughing, choking, blue coloring, repeated chest infections, or poor growth, and usually needs surgery.

## Tracheoesophageal Fistula And Esophageal Atresia Repair

Surgery in a newborn to close an abnormal connection between the windpipe and food pipe and join separated parts of the food pipe when possible. The operation is urgent; breathing problems, leakage, narrowing, reflux, and feeding difficulties may persist.

## Tracheomalacia

Weakness of the windpipe wall that allows it to narrow or collapse during breathing out. It may cause noisy breathing, cough, breathlessness, repeated infections, or difficulty clearing mucus and may be

present from birth or develop later.

## Tracheostomy

A surgically created artificial opening (stoma) on the front of the neck leading directly into the trachea (windpipe), through which a curved plastic or metal breathing tube (a tracheostomy tube) is placed. It allows air to enter the lungs directly, bypassing severe upper airway obstructions (such as from throat swelling, facial trauma, vocal cord paralysis, or tumors), facilitates the suctioning of deep mucus, and provides a secure route for long-term mechanical ventilation when patients cannot breathe independently. A tracheostomy may be temporary (removed once the underlying condition resolves) or permanent, and requires diligent daily care and suctioning to keep the tube patent and prevent airway obstruction or infection.

### Alternate Names:

Trach; Surgical Stoma of the Trachea; Tracheostomy Stoma

## Tracheostomy Care

Care of a breathing tube and neck opening, including cleaning the skin and tube, suctioning mucus when needed, checking airflow, and keeping emergency equipment nearby. Blockage, bleeding, infection, or accidental tube displacement requires prompt attention.

## Tracheostomy Tube

A tube inserted through a tracheostomy opening to maintain access to the airway and permit breathing, suction, or mechanical ventilation.

## Tracheotomy

A surgical procedure in which an incision (cut) is made through the skin of the neck into the windpipe (trachea) to create a direct airway. It is performed in planned or emergency situations to overcome acute upper-airway obstruction (from foreign bodies, severe infections, or head and neck trauma) or to facilitate prolonged breathing machine support. While “tracheotomy” refers to the surgical act of making the incision into the trachea, the resulting opening and airway passage created by the opera-

---

tion is called a tracheostomy.

**Alternate Names:**

Tracheal Incision; Surgical Airway Procedure

**Trachoma**

A chronic eye infection caused by certain types of *Chlamydia trachomatis*. It spreads through contact with infected eye or nose discharge, contaminated items, or, in some areas, flies. Repeated infections can scar the inside of the eyelid, turn the eyelid inward, and cause the eyelashes to rub against the eye. This can scar the cornea and lead to permanent visual impairment or blindness.

**Trachyonychia**

Rough, thin, ridged nails with many tiny pits, sometimes called twenty-nail dystrophy when most or all nails are affected. It may occur on its own or with psoriasis, alopecia areata, eczema, or lichen planus.

**Traction**

A controlled pulling force used to align or immobilize a fracture, reduce a dislocation, or relieve pressure on tissues. It may be applied manually, with weights, or through a medical device.

**Traction Alopecia**

Mechanical hair loss resulting from sustained, repetitive tension pulling on hair follicles over prolonged periods (from tight braids, ponytails, hair weaves, or extensions), initially causing reversible perifollicular erythema before progressing to irreversible follicular scarring and permanent patchy alopecia.

**Tractional Retinal Detachment**

Separation of the light-sensing retina from the back of the eye when bands of scar tissue pull it away. It commonly occurs in advanced diabetic eye disease and can cause vision loss.

**Tractotomy**

Surgery that cuts a selected nerve pathway in the brain or spinal cord, usually to reduce severe pain or another difficult neurologic symptom. It can cause permanent changes in sensation or movement.

**Traditional Medicine**

Traditional medicine includes health practices, remedies, and healing systems developed within cultural traditions. Products and practices vary in evidence and safety, so they should not replace effective care without professional advice.

**Tra Gene**

A gene involved in sex determination and sexual differentiation in some organisms, especially insects; its function and sequence vary by species.

**Trained Immunity**

A lasting change in the body's first-line immune response after an earlier infection or exposure. The later response may be stronger or altered, although this process does not provide the same specific protection as ordinary immune memory.

**Train-Of-Four Monitoring**

A test used during anesthesia that gives four brief electrical signals to a nerve and measures the muscle responses. It shows how much a muscle-relaxing medicine remains active and whether muscle strength has recovered.

**Trajectory**

The path a projectile follows in flight and, in wound ballistics, the course it traverses through tissue from entrance to exit or rest. Internal trajectory is reconstructed from entrance and exit defects, the organ track, recovered fragments, and clothing damage; angles disclose shooter position and victim posture.

**TRALI**

A rare, life-threatening lung reaction that develops during or within several hours after a blood transfusion. It causes sudden breathing difficulty and low blood oxygen from fluid leaking into the lungs, without being caused by excess fluid in the circulation.

**Tram-Track Appearance**

A double-line pattern seen under a microscope in some kidney biopsies. It reflects thickening or splitting of the kidney's filtering membranes and can

---

occur in certain types of glomerulonephritis.

### **Trance**

An altered state of awareness with unusual attention, responsiveness, or sense of surroundings. It may occur during hypnosis, seizures, intoxication, sleep-related events, or psychological states and requires context for interpretation.

### **Tranexamic Acid**

A medicine that helps control bleeding by preventing the body from breaking down blood clots too quickly. It is used for selected heavy bleeding, including some surgical, injury-related, menstrual, and postpartum bleeding.

### **Transabdominal Cerclage**

Placement of a strong band around the upper cervix through abdominal surgery, usually before pregnancy or early in pregnancy, to reduce the risk of premature opening in severe cervical weakness. It requires cesarean birth and carries surgical, bleeding, infection, and pregnancy risks.

#### **Alternate Names:**

TAC; Cervico-Isthmic Cerclage

### **Transabdominal Pelvic Ultrasound**

A non-invasive diagnostic ultrasound examination of the pelvic organs (uterus, endometrium, ovaries, fallopian tubes, and urinary bladder) performed transabdominally through a full acoustic bladder window.

#### **Alternate Names:**

Transabdominal Pelvic Sonography; TA Pelvic Ultrasound; Transabdominal Pelvic Scan

### **Transabdominal Scan**

An ultrasound scan performed by moving the probe over the abdomen. It can examine pelvic organs and, during pregnancy, assess the baby's growth and anatomy, the placenta, and the amount of fluid around the baby.

### **Transaminitis**

Higher-than-normal levels of liver-related enzymes

in the blood. This may indicate liver-cell injury, but the result does not identify the cause; medicines, infection, alcohol, fatty liver, and muscle injury can contribute.

### **Transarterial Chemoembolization**

A treatment in which a catheter delivers chemotherapy and blocks blood flow to a liver tumor. It can slow or shrink selected tumors that cannot be removed surgically, but may cause pain, fever, liver injury, or other complications.

### **Transbronchial Biopsy**

Removal of a small lung-tissue sample using a camera passed through the airways. It can investigate infection, inflammation, cancer, or rejection after transplant; bleeding and a collapsed lung are possible complications.

### **Transcatheter Aortic Valve Replacement**

Replacement of a narrowed aortic heart valve using a folded artificial valve delivered through a catheter, usually from an artery in the groin. It avoids open-heart surgery for selected people, but bleeding, stroke, blood-vessel injury, rhythm problems, leakage, or need for a pacemaker can occur.

#### **Alternate Names:**

TAVR; TAVI; Transcatheter Aortic Valve Implantation

### **Transcatheter Edge-To-Edge Repair**

A catheter procedure that joins parts of the mitral-valve leaflets to reduce leakage. It may help selected people with severe symptoms who are not good candidates for open surgery; bleeding, infection, stroke, valve narrowing, residual leakage, or device problems are possible.

#### **Alternate Names:**

TEER; MitraClip Procedure; Percutaneous Mitral Valve Repair

### **Transcatheter Pulmonary Valve**

Replacement of a diseased pulmonary valve with a prosthetic valve delivered through a catheter. It is used in selected congenital or previously operated right-ventricular outflow tracts.

---

### **Transcervical Foley Catheter For Cervical Ripening**

A soft balloon catheter placed through the cervix and inflated to help soften and open the cervix before labor induction. It is a mechanical method and may cause cramping, bleeding, infection, or accidental rupture of the membranes.

### **Transcervical Resection Of Endometrium**

A camera-guided procedure through the cervix that removes or destroys the uterine lining to reduce heavy menstrual bleeding. It is not suitable for future pregnancy and requires careful evaluation beforehand.

### **Transcranial Doppler**

An ultrasound test that measures blood-flow speed in arteries inside the skull. It can help detect narrowed vessels, spasm after brain bleeding, or increased stroke risk in selected conditions.

### **Transcranial Doppler Scanning**

An ultrasound test measuring blood-flow speed and direction in major arteries inside the skull. It can help assess narrowing, blockage, vasospasm, emboli, or circulation after certain brain injuries.

#### **Alternate Names:**

Transcranial Doppler; TCD

### **Transcranial Doppler Ultrasound**

An ultrasound test that measures blood-flow speed and direction in major arteries inside the skull. It can help assess stroke risk, vessel narrowing, bleeding-related spasm, and blood flow changes.

### **Transcranial Magnetic Stimulation**

A noninvasive treatment or brain-function test that uses magnetic pulses near the scalp to induce electrical activity in selected brain regions. Repetitive stimulation is used for some depression and other conditions; effects and risks depend on the protocol and person's health.

### **Transcription**

The process by which a cell copies information from

DNA into RNA. The RNA copy can direct protein production or help control cell activity.

### **Transcription Factor**

A protein that attaches to DNA and increases or decreases the copying of selected genes into RNA. Transcription factors help control cell growth, development, specialization, and responses to hormones or injury.

### **Transcutaneous Electrical Nerve Stimulation**

TENS: low-voltage electrical pulses delivered through electrodes on the skin to reduce pain for some people. It does not treat every cause of pain and should be used according to clinical guidance.

#### **Alternate Names:**

TENS

### **Transdermal**

Delivering a medicine through the skin, usually with a patch or gel, so it enters the bloodstream gradually. The medicine, dose, skin condition, heat, and application site affect how much is absorbed.

### **Transesophageal Echocardiography**

An ultrasound scan of the heart made with a probe passed into the esophagus. It gives close views of the heart, valves, and nearby blood vessels.

### **Trans Fat**

An unsaturated fat containing at least one trans-configured double bond. Industrial trans fats, formerly common in partially hydrogenated oils, can raise LDL cholesterol, lower HDL cholesterol, and increase cardiovascular risk; small amounts also occur naturally in some meat and dairy foods.

### **Trans Fatty Acid**

An unsaturated fat with a trans shape, often formed during industrial processing and associated with higher heart disease risk.

#### **Alternate Names:**

Trans Fat; Hydrogenated Fat

---

## Transferase

An enzyme that moves a chemical group from one molecule to another. Transferases help cells make and break down substances, and some transferase levels in blood help identify tissue injury or disease.

## Transference

Feelings or expectations that a patient developed in an earlier important relationship and now directs toward a therapist or another healthcare professional. Discussing this pattern can help explain relationship difficulties during therapy.

## Transferrin

A blood protein made mainly by the liver that carries iron to tissues. Its level and the amount of iron it carries help assess iron deficiency, inflammation, and iron overload when interpreted with other blood tests.

## Transferrin Saturation

The percentage of transferrin's iron-binding sites occupied by iron. It is calculated from iron and total iron-binding capacity and helps evaluate iron deficiency and iron overload.

### Alternate Names:

TSAT

## Transfer Training

Teaching a person how to move safely between places, such as from a bed to a chair or toilet. Training may include correct body position, assistance from another person, a transfer board, or lifting equipment.

## Transforming Growth Factor-Beta

A multifunctional cytokine superfamily that orchestrates wound healing, extracellular matrix synthesis, collagen deposition, tissue fibrosis, cell cycle arrest, and immunosuppression by inhibiting epithelial and lymphocyte proliferation while stimulating myofibroblasts.

### Alternate Names:

TGF-beta

## Transfusion

Delivery of donated blood or blood components into a person's bloodstream. It can replace lost red cells, platelets, or clotting factors but carries risks including reactions, infection, fluid overload, and lung injury.

## Transfusion Of Neonate

Administration of a blood product to a newborn for clinically significant anemia, bleeding, or another specific indication. The decision, product characteristics, volume, and rate depend on the infant's symptoms, laboratory results, gestational age, and local transfusion protocol.

## Transfusion Reaction

A harmful response to donated blood or blood components. It may cause fever, chills, rash, breathing difficulty, pain, low blood pressure, or destruction of red cells. The transfusion must be stopped and the person assessed urgently if a reaction is suspected.

## Transfusion-Related Acute Lung Injury

A life-threatening complication of blood product transfusion developing within six hours of transfusion, caused by donor anti-HLA or anti-neutrophil antibodies activating recipient neutrophils in the pulmonary microvasculature, producing non-cardiogenic pulmonary edema and acute hypoxemic respiratory failure.

### Alternate Names:

TRALI

## Transient Acantholytic Dermatitis (Grover Disease)

An itchy eruption of small red or skin-colored papules and vesicles caused by temporary loss of cohesion between epidermal cells. It commonly affects the trunk of older adults and may flare with heat, sweating, or dry skin.

## Transient Familial Hyperbilirubinemia

An inherited tendency for bilirubin, a yellow waste product, to rise temporarily in the blood and cause episodes of jaundice. It usually reflects slower processing by the liver without major liver injury and

---

may worsen during illness, fasting, or stress.

### **Transient Global Amnesia**

A sudden temporary inability to form new memories, often with repeated questions and uncertainty about recent events. The person remains awake and knows who they are; symptoms usually resolve within 24 hours, but urgent assessment is needed to exclude stroke or seizure.

#### **Alternate Names:**

TGA; Acute Amnestic Syndrome

### **Transient Hypogammaglobulinemia Of Infancy**

A temporary delay in an infant's production of antibodies, the proteins that help fight infection. Some infants have repeated ear, sinus, or chest infections, but antibody levels usually improve as the immune system matures.

#### **Alternate Names:**

THI; Transient Infantile Hypogammaglobulinemia

### **Transient Ischaemic Attack**

A brief episode of stroke-like symptoms caused by temporarily reduced blood flow to the brain, eye, or spinal cord without lasting tissue damage. Weakness, numbness, speech trouble, or vision loss needs emergency assessment because stroke may follow.

#### **Alternate Names:**

TIA; Mini-Stroke

### **Transient Ischaemic Attacks Or Episodes**

Short episodes of weakness, numbness, speech trouble, vision loss, or other neurological symptoms caused by temporarily reduced blood flow to the brain. Symptoms resolve without lasting brain injury, but a TIA is an emergency warning of possible stroke.

### **Transient Ischemic Attack**

A temporary episode of stroke-like symptoms caused by reduced blood flow to the brain, eye, or spinal cord without lasting tissue damage. It can be an early warning of a possible stroke even when symptoms resolve.

### **Transient Ischemic Attack Cross-Reference**

Alternate name; see *Transient ischemic attack*.

### **Transient Neonatal Pustular Melanosis**

A harmless newborn eruption in which superficial pustules rupture and leave small pigmented macules with a collarette of scale. It is more common in infants with darker skin and usually resolves without treatment.

### **Transient Pain**

Pain that is brief and resolves rather than continuing or recurring persistently. Even brief pain may need assessment if it is severe, recurrent, or associated with warning symptoms.

### **Transient Synovitis**

Temporary inflammation of the hip lining, usually in children ages 3 to 8 and often after a viral illness. It causes hip, groin, thigh, or knee pain and a limp, but usually little fever or illness. Rest and pain medicine generally help. Doctors must distinguish it from a dangerous joint infection, especially when fever, severe pain, or refusal to walk is present.

#### **Alternate Names:**

Toxic Synovitis; Irritable Hip; Transient Synovitis of the Hip

### **Transient Tachypnea Of The Newborn**

Temporary rapid breathing after birth, usually caused by delayed clearance of fetal lung fluid. It is more common after caesarean birth and typically improves within one to three days with supportive care.

### **Transillumination**

Transillumination shines light through a body part or structure to reveal fluid, cavities, or other differences in tissue density.

### **Transitional Care**

Coordinated healthcare when a person moves between settings or levels of care, such as from hospital to home or from children's to adult services. It in-

---

cludes sharing information, arranging medicines and follow-up, and preventing avoidable complications.

### **Transitional Epithelium**

A stretchable protective lining in the kidneys' drainage areas, ureters, bladder, and part of the urethra. It allows these organs to expand as urine collects without allowing urine to leak into surrounding tissue.

#### **Alternate Names:**

Urothelium; Transitional Urothelial Lining

### **Transjugular Intrahepatic Portosystemic Shunt**

A channel created through the liver between veins that bring blood to it and veins that carry blood away. It lowers high pressure caused by advanced liver disease and can reduce repeated bleeding or severe abdominal fluid buildup; confusion and shunt blockage are possible.

#### **Alternate Names:**

TIPS; Transjugular Portosystemic Shunt

### **Translation**

The cellular process of making a protein from instructions carried by messenger RNA. A ribosome reads the message in order, while transfer molecules bring the matching amino acids. The process starts, builds the chain, and stops at a signal; the finished chain folds into a working protein.

### **Translation Initiation**

The first stage of protein synthesis, when a ribosome recognizes messenger RNA, selects the start codon, and assembles the initiator transfer RNA and ribosomal subunits.

### **Translocation**

Movement from one place to another. In genetics, it means that a piece of one chromosome moves to another chromosome or location, which can alter genes and sometimes cause cancer or inherited disease.

### **Transmembrane Transport**

Movement of salts, nutrients, medicines, or other

substances across a cell's outer membrane. Channels and carrier proteins may allow passage directly, while pumps use energy to move substances against a concentration difference.

### **Transmission**

Passage of an infection, signal, genetic trait, force, or substance from one source to another; in infectious disease, route, dose, and host susceptibility determine risk.

### **Transmural Infarction**

A heart attack that damages the full thickness of part of the heart muscle because blood flow has been blocked for a prolonged period. It can weaken the heart and cause dangerous complications.

### **Transplacental**

Passing from the pregnant person's blood across the placenta to the fetus, or in the opposite direction. Antibodies, medicines, chemicals, and some infections can cross the placenta, with effects that depend on the substance and timing.

### **Transplant**

Transfer of cells, tissue, or an organ from one site or person to another to replace damaged tissue or restore function. Donor matching, rejection prevention, infection risk, and long-term follow-up depend on the type of transplant.

### **Transplantation**

Transfer of an organ, tissue, or cells from a donor to a recipient to replace or restore failing function. Care includes donor matching, surgery, prevention of rejection, infection monitoring, and long-term follow-up.

#### **Alternate Names:**

Organ Transplant; Allotransplantation

### **Transplantation Conditioning**

Treatment given before some stem-cell transplants to suppress the recipient's bone marrow and immune system and make room for donated cells. It may use chemotherapy, radiation, or both and can cause infection, bleeding, infertility, or organ injury.

---

## Transplant Immunology

The study of how the immune system reacts to donated organs, tissues, or cells. Blood-group and tissue matching, antibody testing, and immunosuppressive medicines help reduce rejection, but they also increase infection risk and require regular monitoring of the transplant and medicine effects.

## Transplant Rejection

An immune reaction in which the body attacks a donated organ or tissue. It may occur soon after transplantation or later and can reduce organ function; regular monitoring and medicines help prevent or treat it.

## Transplant Surgery

An operation that replaces a failing organ or tissue with a donated one. It requires careful donor and recipient assessment, medicines to reduce rejection, infection prevention, and long-term follow-up.

## Transport

Movement of a substance, cell, signal, or person from one place to another. In healthcare, the term may describe movement through the body, across a cell membrane, or safe transfer between care settings.

## Transport Protein

A protein that carries a substance through body fluids or across a cell boundary. It helps control how nutrients, medicines, salts, and waste products are absorbed, distributed, and used.

## Transport Vesicle

A transport vesicle is a membrane-bound carrier that moves proteins, lipids, or other cargo between cellular compartments.

## Transposition Of Great Vessels

Alternate name; see *Transposition of the great arteries*.

## Transposition Of The Great Arteries

A heart defect present at birth in which the two main arteries are connected to the wrong lower chambers.

Blood returning to the body may not receive oxygen; newborns usually need urgent treatment and surgery.

### Alternate Names:

Complete TGA; D-TGA; Transposition of Great Vessels

## Transposition of the Great Vessels

A cyanotic congenital heart defect resulting from embryological failure of the aorticopulmonary septum to spiral, such that the aorta arises directly from the right ventricle and the pulmonary artery originates from the left ventricle, creating two parallel, independent circulations requiring a mixing communication for survival.

### Alternate Names:

TGA; D-Transposition of the Great Arteries; d-TGA

## Transposons

Movable pieces of genetic material that can shift between locations in a cell's DNA. In bacteria, they may carry antibiotic-resistance genes and help resistance spread between bacteria.

## Transrectal Ultrasonography

Ultrasound imaging of the prostate and nearby structures using a probe placed in the rectum. It can guide biopsies and assess size or abnormalities, but may cause discomfort, bleeding, or infection.

### Alternate Names:

TRUS

## Transsphenoidal Hypophysectomy

A minimally invasive skull-base neurosurgical procedure performed to remove pituitary gland tumors (pituitary adenomas) or craniopharyngiomas located at the base of the brain. Instead of cutting open the skull or leaving visible facial scars, the surgical team passes high-definition endoscopes and micro-instruments directly through the patient's nostrils, across the nasal cavity, and through the sphenoid sinus bone into the sella turcica—the bony saddle cradling the pituitary gland. By operating from below, neurosurgeons and otolaryngologists can decompress the optic chiasm to restore threatened vi-

---

sion, normalize excessive hormone production (such as in Cushing disease or acromegaly), and remove tumors with faster recovery times, minimal brain retraction, and reduced complication rates compared to traditional open craniotomies.

**Alternate Names:**

Transsphenoidal Surgery; Endoscopic Transsphenoidal Pituitary Resection; Pituitary Adenoma Surgery; TSS

**Transthoracic Echocardiogram**

A non-invasive point-of-care or formal diagnostic ultrasound procedure utilizing a transducer placed on the anterior chest wall to evaluate cardiac chamber dimensions, ventricular systolic and diastolic function, valvular morphology, and hemodynamics via Doppler imaging.

**Alternate Names:**

TTE

**Transthoracic Echocardiography**

An ultrasound scan of the heart made with a probe placed on the chest. It shows the heart chambers, valves, pumping movement, and blood flow.

**Transthyretin Amyloidosis**

A disease in which abnormal transthyretin protein builds up in organs, especially the heart or nerves. It may be inherited or develop with age without an inherited gene change.

**Alternate Names:**

ATTR Amyloidosis; ATTR-CM; Amyloid Transthyretin Disease

**Transtracheal**

Transtracheal means passing through or relating to the trachea, such as a catheter, oxygen delivery route, or diagnostic procedure.

**Transtympanic**

Transtympanic means passing through the tympanic membrane, such as medicine delivered into the middle ear or a procedure crossing the eardrum.

**Transudate**

A thin fluid with little protein that leaks from blood vessels because of pressure or blood-protein changes rather than inflammation. It may collect around organs, such as the lungs, heart, or abdomen.

**Transudation**

Movement of relatively watery, low-protein fluid out of blood vessels when pressure or blood-protein levels change. This process can cause some types of swelling or fluid collection around organs.

**Transudative Pleural Effusion**

A buildup of relatively thin fluid around a lung caused by changes in blood pressure or protein balance, most often heart failure. Treatment focuses on the underlying condition and drainage may be needed if breathing is affected.

**Transurethral**

Performed through the urethra, the tube that carries urine out of the body. Instruments passed through it can examine the urinary tract, remove tissue, treat blockage, or place a device.

**Transurethral Incision Of The Prostate**

An operation making small cuts in the prostate through an instrument passed in the urethra. It can improve urine flow in selected people with prostate enlargement while preserving most prostate tissue.

**Alternate Names:**

TUIP

**Transurethral Microwave Thermotherapy**

A treatment for some people with an enlarged prostate in which a catheter uses microwave heat to shrink or destroy prostate tissue blocking urine flow. It is less commonly used now and can cause pain, bleeding, infection, or temporary urinary problems.

**Alternate Names:**

TUMT

**Transurethral Needle Ablation**

A treatment using needles passed through the urethra to deliver radiofrequency heat into enlarged

---

prostate tissue. The heat destroys selected tissue and may improve urine flow, but relief develops gradually and complications can occur.

**Alternate Names:**

TUNA

### **Transurethral Resection**

Removal of tissue through an instrument passed along the urethra, commonly for prostate or bladder disease.

### **Transurethral Resection of Bladder Tumor**

A procedure in which a urologist passes a camera and small cutting tool through the urethra to remove a visible bladder tumor and collect tissue for testing. The results show the type and depth of the cancer and guide further treatment. Some early tumors are treated during the same procedure, but follow-up treatment may still be needed.

**Alternate Names:**

TURBT; Transurethral Bladder Tumor Resection; Bladder Tumor Resection

### **Transurethral Resection Of The Prostate**

An endoscopic operation that removes obstructing prostate tissue to improve urine flow in selected people with benign prostatic enlargement. Alternatives and indications depend on symptoms, prostate size, complications, and patient preference.

**Alternate Names:**

TURP; Transurethral Prostate Resection

### **Transvaginal**

Performed through the vagina, commonly describing an ultrasound examination or a procedure involving the uterus, cervix, ovaries, or other pelvic structures.

### **Transvaginal Ultrasound**

Transvaginal ultrasound uses a covered probe in the vagina to produce images of the uterus, ovaries, cervix, pregnancy, or nearby pelvic structures.

### **Transverse**

Running across or perpendicular to the long axis or

midline.

### **Transverse Colon**

The section of the large intestine that crosses the upper abdomen from the right side to the left. It absorbs water and moves partly digested food toward the descending colon.

### **Transverse Lie**

A position in which the baby lies sideways across the uterus rather than head-down or bottom-down. A shoulder or arm may be closest to the birth canal; if the position persists near labor, vaginal birth is usually not possible and cesarean birth is recommended.

### **Transverse Myelitis**

Inflammation across part of the spinal cord that can develop over hours or days and cause weakness, numbness, pain, or problems controlling the bladder or bowel. It needs prompt evaluation because treatment may limit lasting disability.

### **Transverse Plane**

An imaginary horizontal slice that divides the body or an organ into upper and lower parts. Medical scans often use this view to show structures at a particular level.

### **Transverse Vaginal Septum**

A congenital band of tissue crossing the vagina and partly or completely blocking it. A complete blockage can cause absent periods and monthly pelvic pain after puberty; imaging confirms the condition, and surgery may create an open vaginal passage.

### **Transversus Abdominis Muscle**

The deepest broad muscle of the abdominal wall. It tightens the abdomen, supports the spine, and helps with coughing, breathing out, lifting, and other movements that increase pressure inside the abdomen.

### **Transvestic Disorder**

A mental-health diagnosis involving repeated sexual

---

arousal from cross-dressing that causes significant distress, interferes with life, causes harm, or involves another person without consent. Cross-dressing alone is not a disorder and is different from gender identity.

### **Tranylecypromine**

An antidepressant that increases certain brain chemicals by blocking their breakdown. It can interact dangerously with many medicines and foods high in tyramine, so careful prescribing and a medicine-free waiting period before or after some treatments are required.

### **Trapezium Bone**

A small wrist bone at the base of the thumb. It forms the thumb's highly mobile joint with the hand and can be affected by fractures or arthritis that causes pain during gripping and pinching.

### **Trapezius Muscle**

A large triangular muscle across the upper back and neck. It helps lift, lower, and draw the shoulder blades backward and supports movement and stability of the neck and shoulders.

### **Trapezoid**

A small wedge-shaped wrist bone between the trapezium and capitate. It joins mainly with the index-finger metacarpal and helps stabilize the thumb-side of the wrist; fractures are uncommon.

### **Trapezoid Bone**

A small distal-row carpal bone between the trapezium and capitate that articulates mainly with the index metacarpal and helps stabilize the radial side of the hand.

### **Trapped Lung**

A condition in which a lung cannot fully expand because a fibrous layer or another restriction prevents normal movement. It may follow long-standing pleural inflammation, infection, bleeding, or cancer and can cause persistent pleural fluid or breathlessness.

### **TRAP Sequence**

A rare complication of an identical-twin pregnancy in which one twin has a severely malformed heart or no heart and receives blood from the other twin through shared placental vessels. The healthy twin may develop heart strain and needs specialist monitoring.

### **Trastuzumab**

Trastuzumab is a monoclonal antibody targeting HER2 used for HER2-positive breast, gastric, and other cancers; infusion reactions and potentially reversible cardiomyopathy require cardiac monitoring.

### **Trauma**

Physical injury caused by an outside force, or the mental response to a deeply distressing event. Physical trauma may damage organs, bones, or blood vessels; psychological trauma can affect emotions, sleep, and daily life.

### **Trauma- And Stressor-Related Disorders**

A group of mental disorders involving exposure to a traumatic or stressful event or condition and subsequent emotional, behavioral, or physiologic symptoms. Examples include acute stress disorder, post-traumatic stress disorder, adjustment disorder, reactive attachment disorder, and disinhibited social engagement disorder.

### **Trauma Center**

A hospital organized to provide rapid, coordinated care for seriously injured people. Trauma centers differ in available specialists, equipment, surgery, intensive care, and ability to treat complex injuries.

### **Trauma Surgery**

Emergency surgery and other immediate care for seriously injured people. The team first checks and protects breathing, the neck and spine, circulation, brain function, and the whole body, while controlling bleeding and repairing damaged organs.

### **Traumatic Amputation**

Loss of a body part caused by an injury. It can cause life-threatening bleeding, shock, infection, and

---

lasting disability; emergency care controls bleeding, treats damaged tissue, preserves the separated part when possible, and begins rehabilitation and psychological support.

### **Traumatic Bleb**

A fragile, fluid-filled area that forms after glaucoma drainage surgery and is damaged by an injury. It may leak or become infected and can cause dangerously low eye pressure or vision problems.

### **Traumatic Brain Injury**

Traumatic Brain Injury (TBI) is a change in brain function or damage to the brain caused by an external force. It may result from a bump, blow, or jolt to the head or body, a fall, blast, or an object penetrating the skull. Effects range from brief confusion or headache to memory problems, seizures, loss of consciousness, permanent disability, or death. Later swelling, bleeding, low oxygen, or other complications can cause additional brain damage.

**Alternate Names:**

TBI

### **Traumatic Events And Children**

Traumatic events can affect children's safety, behavior, sleep, learning, and emotions; supportive caregivers, stable routines, and professional assessment help identify persistent trauma responses.

### **Traumatic Grief**

Alternate name; see *Complicated grief*.

### **Traumatic Hemorrhagic Shock**

Shock caused by severe blood loss after an injury. Reduced circulating blood volume limits oxygen delivery to organs and may cause fast heartbeat, pale or clammy skin, confusion, low blood pressure, and organ failure.

### **Traumatic Injury**

Damage to the body caused by an external force, such as a fall, collision, blow, cut, burn, or penetrating object. Injury may affect skin, bones, organs, blood vessels, nerves, or the brain.

### **Traumatic Bladder and Urethral Injury**

Damage to the bladder or urethra caused by an accident, surgery, or penetrating injury. Blood in the urine, inability to urinate, pelvic pain, or shock requires urgent evaluation.

### **Traumatic Shock**

A life-threatening failure of blood flow after serious injury, often because of major bleeding, but sometimes because of heart damage or another cause. It can cause pale clammy skin, confusion, rapid breathing, and collapse and requires immediate treatment.

### **Traumatology**

The medical field concerned with physical injuries and their consequences. It includes emergency assessment, control of bleeding, repair of damaged tissues, prevention of complications, surgery, and rehabilitation.

### **Traumeel S**

Traumeel S is a multi-ingredient complementary product marketed for pain and inflammation; evidence, formulation, and safety depend on the product and it should not replace needed care.

### **Travelers' Diarrhea**

Acute diarrhea occurring during or shortly after travel, usually caused by contaminated food or water and commonly involving bacterial, viral, or parasitic infection.

### **Travel Sickness**

Nausea, dizziness, sweating, or vomiting caused by conflicting signals from the eyes and balance organs during travel or other motion. Looking toward the horizon, fresh air, gradual exposure, and suitable preventive medicines may help; severe or persistent symptoms need assessment.

### **Travel Vaccinations**

Travel vaccinations are vaccines recommended or required for protection against infections encountered in particular countries or regions. Recommendations depend on the destination, activities, health conditions, and previous vaccinations.

---

### **Travoprost**

Travoprost is a prostaglandin analogue eye drop that increases uveoscleral outflow and lowers intraocular pressure in glaucoma or ocular hypertension; iris pigmentation and eyelash changes may occur.

### **Trazodone**

A prescription medicine used mainly for depression and sometimes for sleep problems. It can cause drowsiness, dizziness, low blood pressure, falls, and rare prolonged painful erection; dangerous reactions are more likely with certain medicines or substances.

### **Trazodone Overdose**

Poisoning from taking too much trazodone. It can cause severe sleepiness, vomiting, low blood pressure, seizures, abnormal heart rhythms, or a prolonged painful erection.

### **Trb Gene**

A gene involved in biological processes that vary by species; its precise identity and function must be interpreted from the organism and gene nomenclature used.

### **Trd Gene**

The gene encoding the delta chain of the T-cell receptor in humans, contributing to gamma-delta T-cell antigen recognition.

### **Treacher Collins Syndrome**

An inherited condition affecting development of the face and skull. It may cause small cheekbones and jaw, downward-slanting eyes, malformed ears, and hearing loss; breathing or feeding may also be difficult. Intelligence is usually normal. Care may include airway support, hearing treatment, and reconstructive surgery.

### **Treacle**

A thick sugar syrup with little current medical use. Older medical writing sometimes used the word for a sweetened mixture or supposed antidote; it is not a modern treatment or diagnosis.

### **Treatment-Resistant Depression**

Depression that does not improve adequately after appropriate trials of standard treatments. It requires reassessment of diagnosis, adherence, comorbidity, and treatment options.

### **Treatment-Resistant Schizophrenia**

Schizophrenia that continues to cause important symptoms or disability despite adequate trials of at least two appropriate antipsychotic medicines. The term requires careful review of the diagnosis, treatment adherence, substance use, medical causes, and the adequacy of previous treatment.

### **Treat-To-Target Strategy**

A treatment approach in which care is checked and adjusted regularly toward a clear goal, such as no disease activity, controlled blood pressure, or a safe blood-glucose range. The goal and changes are agreed with the patient and based on ongoing monitoring.

### **Trematoda**

A class of parasitic flatworms called flukes; human infections include schistosomiasis and liver or lung fluke disease.

### **Tremelimumab**

A monoclonal antibody that blocks CTLA-4 and enhances T-cell activity; it is used with durvalumab for selected unresectable hepatocellular carcinoma and other cancers, with immune-related adverse effects possible.

### **Tremor**

An involuntary, rhythmic shaking of a body part. It may occur at rest, while holding a position, or during movement and can result from medicines, caffeine, anxiety, essential tremor, Parkinson disease, or other neurologic or metabolic conditions.

### **Trench Fever**

A louse-borne infection caused by Bartonella quintana, causing recurring fever, headache, weakness, and bone pain.

---

### **Trench Foot**

An injury caused by keeping feet cold and wet for a long time. It can cause numbness, swelling, pain, skin color changes, blisters, infection, and tissue death without gradual warming and medical care.

### **Trench Mouth**

Trench mouth is acute necrotizing ulcerative gingivitis causing painful bleeding gums, foul breath, and ulceration, often associated with plaque, smoking, stress, or poor nutrition.

### **Trendelenberg Position**

A position in which the patient lies supine with the feet higher than the head; clinical uses and risks depend on context.

### **Trendelenburg**

Trendelenburg position places the body supine with the feet higher than the head; its use is procedure-specific and may affect breathing, pressure, and circulation.

### **Trendelenburg Gait**

An abnormal gait pattern characterized by a downward pelvic drop toward the unsupported side during the swing phase, or a lateral trunk lurch over the weight-bearing side to compensate for hip abductor weakness. It occurs due to weakness or paralysis of the gluteus medius and minimus muscles or superior gluteal nerve lesion.

### **Trendelenburg Position**

A position lying on the back with the head and upper body lower than the feet. It is used for selected procedures but can worsen breathing, pressure in the head, or blood pressure in some patients.

### **Trendelenburg Sign**

A physical clinical sign indicating weakness or paralysis of the hip abductor muscles (gluteus medius and minimus) innervated by the superior gluteal nerve; when the patient stands on one leg (the affected stance side), the unsupported pelvis tilts downward toward the opposite non-weight-bearing swing side.

### **Alternate Names:**

Trendelenburg Hip Abductor Sign; Positive Trendelenburg Test

### **Trendelenburg Test**

A clinical test used to evaluate the integrity and strength of the hip abductor mechanism (gluteus medius and minimus). The patient stands on one leg; a drop of the pelvis on the contralateral unsupported side indicates abductor weakness or hip instability on the stance side.

### **Treosulfan**

An alkylating chemotherapy drug used in conditioning before allogeneic hematopoietic stem-cell transplantation; infection, mucositis, infertility, and organ toxicities may occur.

### **Trephine**

A circular cutting instrument used to remove a disk of tissue or bone, such as during a bone-marrow biopsy or corneal procedure.

### **Treponema**

A group of spiral-shaped bacteria, including *Treponema pallidum*, which causes syphilis. Different species can live in people or the environment, and identifying the species helps determine whether disease and treatment are present.

### **Treponemal Infections**

Infections caused by spiral-shaped *Treponema* bacteria. They include syphilis and related diseases and may affect the skin, nerves, heart, eyes, or other organs; diagnosis usually combines clinical findings with blood or lesion tests.

### **Treponema Pallidum**

The spiral-shaped bacterium that causes syphilis. It spreads mainly through contact with an infectious sore during sex and can cross the placenta to an unborn baby. Untreated infection can later affect the skin, nerves, eyes, heart, or brain.

---

## Treponema Pallidum Infection

Infection with the bacterium *Treponema pallidum*, which causes syphilis and can affect the skin, nervous system, cardiovascular system, and other organs.

## Trepopnea

Breathlessness that occurs or becomes worse when lying on one side but not the other. It can result from disease affecting one lung, fluid around a lung, or pressure from a nearby mass and should be assessed with other symptoms.

## Tretinoin

A vitamin-A-related medicine applied to the skin for acne and sun-related skin changes, or taken by mouth for a type of acute leukemia. Skin irritation is common; oral treatment can cause serious fluid buildup, fever, and breathing problems.

## TRG Gene

A gene encoding the gamma chain of the T-cell receptor, contributing to gamma-delta T-cell development and antigen recognition.

## Triage

Sorting patients by urgency and resource needs so those at greatest risk receive timely care.

## Trial Of Labor After Cesarean

An attempt to give birth vaginally after a previous cesarean delivery. Whether it is appropriate depends on the prior uterine incision, obstetric history, current pregnancy, facility resources, and the person's preferences. Counseling includes the possibility of successful VBAC, repeat cesarean delivery, and uterine rupture.

## Triamcinolone

A corticosteroid medicine used on skin, by injection, or in other forms to reduce inflammation and itching.

## Triamcinolone Acetonide

A synthetic corticosteroid used topically, by injection, or in other preparations to reduce inflammation;

prolonged or extensive use can cause local and systemic steroid effects.

## Triamterene

A water tablet that helps the kidneys remove salt and water while conserving potassium. It is used for high blood pressure or swelling, but can cause dangerously high potassium, kidney problems, or kidney stones.

## Triangle of Doom

An essential laparoscopic anatomical region in the pelvis bounded by the vas deferens medially, the spermatic (testicular) vessels laterally, and the peritoneal reflection inferiorly, containing the external iliac artery and vein and deep circumflex iliac vein, which must be avoided during laparoscopic inguinal hernia mesh fixation to prevent catastrophic vascular injury.

### Alternate Names:

Laparoscopic Vascular Danger Triangle; Inguinal Triangle of Doom

## Triangle of Pain

A laparoscopic anatomical region in the groin bounded by the spermatic vessels medially, the iliopectic tract superolaterally, and the peritoneal reflection inferiorly, containing the femoral branch of the genitofemoral nerve, the lateral femoral cutaneous nerve, and the femoral nerve, where placement of tacks or staples must be avoided during hernia repair to prevent chronic neuropathic groin pain.

### Alternate Names:

Laparoscopic Neural Danger Triangle; Inguinal Triangle of Pain

## Triazenes

A group of chemical compounds that includes some chemotherapy medicines. Their effects and risks depend on the specific drug; possible problems include nausea, low blood counts, infection, and damage to other organs.

## Triaziquone

An older alkylating anticancer drug that cross-links DNA; its clinical use is limited by toxicity and avail-

---

ability.

### **Triazolam**

Triazolam is a short-acting benzodiazepine hypnotic for short-term insomnia; amnesia, falls, dependence, respiratory depression, and dangerous interactions with opioids or other sedatives can occur.

### **Triazole**

A five-membered nitrogen-containing chemical ring found in several antifungal medicines and other drugs; clinical effects depend on the specific compound.

### **Triazophos**

An organophosphate insecticide that blocks acetylcholinesterase, allowing nerve signals to remain active. Significant exposure can cause sweating, vomiting, diarrhea, small pupils, breathing difficulty, weakness, seizures, or life-threatening poisoning.

### **Triceps**

A muscle with three heads, especially the triceps brachii at the back of the upper arm. It straightens the elbow and helps stabilize the shoulder; injury or nerve problems can weaken pushing and lifting.

### **Triceps Brachii Muscle**

The large muscle at the back of the upper arm. It straightens the elbow and helps move and stabilize the shoulder; injury or nerve damage can weaken pushing and lifting.

### **Triceps Reflex**

A monosynaptic deep tendon stretch reflex elicited by tapping the triceps brachii tendon immediately superior to the olecranon process with a reflex hammer, stretching muscle spindles and provoking reflex forearm extension mediated through the radial nerve (evaluating spinal cord segments C7 and C8).

#### **Alternate Names:**

Triceps Tendon Reflex; C7 Reflex

### **Trichiasis**

Inward misdirection of eyelashes so they rub against

the eye.

### **Trichilemmal Carcinoma**

A rare malignant follicular tumor showing outer-root-sheath differentiation, usually occurring on sun-damaged skin of older adults as a papule or nodule; complete excision is generally required.

### **Trichilemmal Cyst (Pilar Cyst)**

A usually benign keratin-filled cyst arising from the outer root sheath of a hair follicle, most often on the scalp. It is typically a firm, mobile lump and may become inflamed, rupture, or rarely develop a proliferating pilar tumor.

### **Trichilemmoma**

A usually harmless tumor arising from a hair follicle, most often appearing as a small skin-colored bump on the face. Multiple growths can be associated with an inherited condition called Cowden syndrome.

### **Trichinellosis**

Trichinellosis is an infection caused by *Trichinella* worms, usually after eating undercooked infected meat. It may cause diarrhea followed by fever, muscle pain, and swelling around the eyes.

### **Trichiniasis**

An infection caused by *Trichinella* larvae, acquired from undercooked meat.

### **Trichinosis**

Infection with *Trichinella* worms, usually acquired by eating undercooked infected pork or wild game. It may cause diarrhea, fever, muscle pain, and swelling around the eyes.

### **Trichobezoar**

A mass of swallowed hair in the digestive tract, usually the stomach, which may cause pain, vomiting, or blockage.

### **Trichoblastoma**

A rare benign follicular tumor of the scalp or face, usually presenting as a solitary dermal or subcuta-

---

neous nodule; it can resemble basal-cell carcinoma and is diagnosed histologically.

### **Trichoepithelioma**

A rare benign follicular adnexal tumor that usually presents as a skin-coloured papule or nodule on the face or scalp; it can resemble basal-cell carcinoma and may require histopathologic confirmation.

### **Trichomonas**

A flagellated protozoan, *Trichomonas vaginalis*, that infects the urogenital tract and causes trichomoniasis. It is transmitted mainly through sexual contact and may cause discharge, irritation, or no symptoms.

### **Trichomonas Vaginalis**

A flagellated protozoan that causes trichomoniasis, a sexually transmitted infection.

### **Trichomoniasis**

A sexually transmitted infection caused by the parasite *Trichomonas vaginalis*. It may cause genital irritation and discharge or no symptoms; testing and treatment of partners help prevent reinfection.

### **Trichophyton**

A group of fungi that grow in keratin and cause ringworm infections of skin, hair, or nails. They spread through contact with infected people, animals, or objects and are treated with antifungal medicines.

### **Trichorrhexis Nodosa**

A hair-shaft defect in which weakened points split into brush-like ends, caused by inherited disease, trauma, chemicals, heat, or nutritional or metabolic disorders.

### **Trichostasis Spinulosa**

A follicular disorder in which many fine vellus hairs become retained in a dilated follicle, producing dark, rough, spiny papules often on the back, chest, or face. It is benign and may improve with topical keratolytics, retinoids, or hair-removal methods.

### **Trichothiodystrophy Syndrome**

A group of inherited disorders characterized by brittle sulfur-deficient hair with a distinctive banded appearance, often accompanied by photosensitivity, ichthyosis, developmental delay, short stature, or recurrent infection.

### **Trichotillomania**

Recurrent pulling out of one's hair, causing hair loss, distress, or impairment, together with repeated attempts to reduce or stop the behavior.

### **Trichuriasis**

Intestinal infection caused by the whipworm *Trichuris trichiura*, usually acquired by swallowing eggs from contaminated soil or food. Heavy infection can cause abdominal pain, diarrhea, anemia, or rectal prolapse.

### **Tricuspid Annular Plane Systolic Excursion**

A measurement made during an echocardiogram that shows how far part of the tricuspid valve moves as the right ventricle contracts. A low value may indicate reduced right-heart pumping and is interpreted with the complete scan and clinical findings.

#### **Alternate Names:**

TAPSE; Tricuspid Annular Excursion; RV Longitudinal Systolic Function

### **Tricuspid Atresia**

A congenital absence or complete closure of the tricuspid valve, blocking normal flow from the right atrium to the right ventricle. Survival depends on an atrial communication and usually a ventricular septal defect or patent ductus to allow blood to reach the lungs; newborns typically have cyanosis and need urgent specialist care and staged treatment.

### **Tricuspid Incompetence**

Incomplete closure of the tricuspid heart valve, allowing blood to leak backward into the right upper chamber. Severe leakage can cause swelling, liver congestion, irregular heartbeat, fatigue, and breathlessness.

---

## Tricuspid Regurgitation

Backward flow through the tricuspid valve from the right ventricle to the right atrium during systole. It may result from primary valve disease or annular enlargement caused by right-ventricular or right-atrial dilation, pulmonary hypertension, or left-sided heart disease; severe regurgitation can cause fatigue, edema, ascites, liver congestion, or right-sided heart failure.

## Tricuspid Stenosis

Narrowing of the tricuspid valve opening, making it harder for blood to move from the right upper chamber to the right lower chamber. It can cause fatigue, swelling, enlarged liver, or neck-vein fullness.

## Tricuspid Valve

The heart valve between the right upper and right lower chambers. It opens to let blood move forward and closes to prevent backflow; leakage or narrowing can strain the heart.

## Tricuspid Valve Disease

Alternate name; see *Tricuspid regurgitation* and *Tricuspid stenosis*.

## Tricyclic Antidepressant Drugs

A group of older antidepressants that increase certain chemical signals in the brain. They can also cause dry mouth, constipation, sleepiness, dangerous heart rhythms, and serious poisoning in overdose.

## Tricyclic Antidepressants

Antidepressants that block reuptake of serotonin and norepinephrine, with additional anticholinergic, antihistaminic, and alpha-adrenergic blocking effects. Examples include amitriptyline, nortriptyline, imipramine, and desipramine. They are effective for depression, neuropathic pain, and migraine prophylaxis.

### Alternate Names:

Tricyclics; First-Generation Antidepressants

## Tricyclic Antidepressant Toxicity

Rapid anticholinergic and sodium-channel toxicity causing dry skin, mydriasis, delirium, seizures, hypotension, QRS widening, ventricular dysrhythmias, and coma. Obtain an ECG early; airway support, intravenous sodium bicarbonate for QRS widening or ventricular toxicity, and benzodiazepines for seizures are key interventions.

## Trifluoperazine

A phenothiazine antipsychotic used for selected psychotic disorders. It can cause drowsiness, movement disorders, and other serious effects, so treatment requires medical supervision.

## Trigeminal Nerve

The fifth cranial nerve, carrying sensation from the face and controlling muscles used for chewing.

## Trigeminal Neuralgia

A chronic pain disorder causing sudden, repeated bursts of severe electric-shock-like, stabbing, or burning pain on one side of the face along one or more branches of the trigeminal nerve, the fifth cranial nerve. Attacks usually last from a fraction of a second to about two minutes and may occur in clusters, with pain-free periods between them. Light touch, brushing the teeth, eating, drinking, speaking, or a breeze may trigger an attack. The usual cause is pressure on the nerve near the brainstem, but multiple sclerosis, a tumor, or another nerve disorder can sometimes be responsible.

### Alternate Names:

Tic Douloureux; Fothergill Disease

## Trigger

A trigger is an event, exposure, stimulus, or condition that initiates or worsens a symptom, disease episode, behavior, or physiologic response.

## Trigger Finger

A condition in which a finger tendon catches as it moves through a tight covering. It can cause pain, clicking, stiffness, or locking and may improve with rest, injections, splinting, or surgery.

### Alternate Names:

---

Stenosing Tenosynovitis; Snapping Digit

### Trigger Finger Release

A procedure that opens the tight tunnel around a finger tendon so the finger can move more freely. It may be offered when rest, a splint, or an injection has not helped. Movement often improves, but recovery and results vary and infection, nerve injury, pain, or continued symptoms can occur.

#### Alternate Names:

A1 Pulley Release; Trigger Thumb Release; Stenosing Tenosynovitis Surgery; Percutaneous Trigger Finger Release

### Trigger Thumb

A condition in which the thumb tendon catches as it moves through a tight covering. It may cause pain, clicking, stiffness, or locking and can often be treated with rest, splinting, an injection, or surgery.

### Triglyceride

A lipid composed of glycerol and three fatty acids, transported in blood and stored in adipose tissue.

### Triglyceride Level

A triglyceride level measures a type of fat in the blood; persistently high levels can increase cardiovascular risk and, when very high, cause pancreatitis.

### Triglycerides

Triglycerides are blood fats made of glycerol and three fatty acids; elevated levels contribute to cardiovascular risk and, when very high, pancreatitis risk.

### Trigone

A triangular area, especially the smooth region at the base of the urinary bladder between the ureter openings and urine outlet. It helps direct urine flow and can be affected by inflammation or tumors.

### Triiodothyronine

The thyroid hormone T3, which contains three iodine atoms and has stronger biological activity than T4. It helps regulate metabolism, heart rate, tem-

perature, and growth.

### Trimester

One of the three approximately three-month periods of pregnancy. Each trimester has typical developmental milestones and screening or care needs.

### Trimethoprim

An antibiotic that blocks bacterial folate production and is often combined with sulfamethoxazole. It treats selected infections but can cause rash, blood-cell changes, high potassium, kidney effects, or medicine interactions.

### Trimethoprim-Sulfamethoxazole

An antibiotic combination that blocks bacteria from making folate, which they need to grow. It treats selected urinary, lung, skin, and other infections but can cause allergy, blood-count changes, high potassium, or kidney problems.

### Trimethylaminuria

A metabolic disorder in which impaired oxidation of trimethylamine causes a characteristic fish-like body odor in sweat, urine, and breath. It may be inherited or acquired and can cause substantial psychosocial distress despite limited physical illness.

### Trimipramine

A sedating tricyclic antidepressant used for depression in some countries. Its anticholinergic and cardiovascular effects can cause dry mouth, constipation, blurred vision, drowsiness, orthostatic hypotension, or dangerous toxicity in overdose; interactions and suicide risk require clinical monitoring.

### Trinitrin

Another name for glyceryl trinitrate or nitroglycerin, a nitrate vasodilator.

### Trinitrophenol

Picric acid, a corrosive and potentially explosive chemical once used in medicine, laboratories, and industry.

---

### Trinucleotide Repeat

A short DNA sequence of three building blocks repeated many times. Extra copies can interfere with genes and cause inherited disorders such as Huntington disease, fragile X syndrome, myotonic dystrophy, or Friedreich ataxia.

### Trip

A trip is a journey or an accidental stumble; in drug-related language it can also mean an episode of altered perception after a hallucinogen.

### Tripe Palms

Diffuse, velvety, thickened hyperkeratosis of the palmar skin with a cerebriform, corrugated appearance resembling the lining of a cow's stomach (tripe), which is strongly associated with underlying malignancy, most commonly gastric adenocarcinoma. It may occur alone or in conjunction with acanthosis nigricans.

### Triple-Negative Breast Cancer

Breast cancer whose cells lack three common growth-related markers: estrogen receptors, progesterone receptors, and HER2. It does not respond to treatments aimed at those markers, so treatment may include surgery, chemotherapy, immunotherapy, or other options based on the cancer's features.

### Triplets

Three offspring born from the same pregnancy or three infants born in a multiple birth.

### Triple X Syndrome

A sex-chromosome variation in which a female has an extra X chromosome. Many affected people have typical sexual development and fertility, while some have tall stature, speech or learning difficulties, coordination problems, or anxiety; severity varies widely.

#### Alternate Names:

Trisomy X; 47,XXX Syndrome

### Triploidy Syndrome

A chromosome condition in which cells have three

complete sets of chromosomes instead of two. It usually causes severe growth restriction and multiple birth defects and often prevents long-term survival; rare mosaic forms may be less severe.

### Triptan

A medicine for stopping a migraine attack. It changes signals in pain pathways and narrows certain blood vessels. It is not suitable for everyone, especially people with some heart or blood-vessel conditions.

### Triptans

A group of medicines used to stop a migraine attack. They act on serotonin receptors and pain pathways; they are not suitable for some people with heart or blood-vessel disease and can cause chest or pressure sensations.

### Triquetrum

One of the small bones on the little-finger side of the wrist. It helps stabilize the wrist and can be injured by a fall or direct blow, causing pain and swelling.

### Trismus

Difficulty opening the mouth because the jaw muscles are tight or painful. Causes include dental infection, injury, medicines, muscle disorders, and tetanus; severe or rapidly worsening restriction can interfere with eating or breathing and needs urgent assessment.

### Trisodium Phosphate Poisoning

Poisoning from swallowing or contacting trisodium phosphate, a strong alkaline cleaner. It can burn the mouth, throat, eyes, and skin and may cause vomiting or breathing problems.

### Trisomy

A chromosome condition in which cells have an extra copy of a whole chromosome or chromosome segment, giving three copies instead of the usual two. It may affect all cells or only some cells (mosaicism); effects depend on the chromosome or segment involved and may include developmental differences,

---

birth defects, or pregnancy loss.

### Trisomy 13

Patau syndrome, a chromosomal disorder caused by an extra chromosome 13 and associated with severe developmental, brain, facial, heart, kidney, and limb abnormalities.

#### Alternate Names:

D Trisomy Syndrome; Patau Syndrome

### Trisomy 18

Edwards syndrome, a chromosomal disorder caused by an extra chromosome 18 and associated with growth restriction, characteristic craniofacial and limb findings, heart disease, and severe developmental impairment.

### Trisomy 21

Down syndrome, a genetic condition caused by an extra copy of chromosome 21. It may affect learning, growth, muscle tone, the heart, hearing, vision, or other organs; the features and level of support needed vary widely.

### Trisomy 21 Syndrome

Alternate name; see *Down syndrome*.

### Trisomy X

Alternate name; see *Triple X syndrome*.

### Trocar

A pointed instrument placed inside a hollow tube to enter a body cavity or tissue. It is used in minimally invasive procedures to create an opening for cameras, instruments, or drainage tubes.

### Trochanter

A bony projection on the thigh bone, especially the larger outer or smaller inner projection. Muscles and tendons attach there, and irritation around the greater trochanter can cause outer-hip pain.

### Trochanteric Bursitis

Alternate name; see *Greater trochanteric pain syndrome*.

### Troche

A troche is a small medicated lozenge that dissolves slowly in the mouth or throat for local or systemic drug delivery.

### Trochlear Nerve

Cranial nerve IV, which supplies the superior oblique eye muscle. Injury can cause vertical or tilted double vision, often worse when looking down or inward.

### Trochlear Nerve Palsy

A cranial neuropathy involving the fourth cranial nerve (CN IV), causing paralysis of the superior oblique muscle, presenting with vertical and torsional diplopia (characteristically worse on downgaze and reading), an upward and inward hypertropia of the affected eye, and a compensatory head tilt toward the opposite contralateral shoulder (Bielschowsky head tilt test).

#### Alternate Names:

Fourth Nerve Palsy; CN IV Palsy

### Trophic

Relating to the nutrition, growth, development, or maintenance of tissue. Trophic changes may occur when nerve supply or blood flow is impaired.

### Trophoblast

The outer cell layer of an early embryo that attaches to the uterus and helps form the placenta. It supports implantation, exchanges nutrients, and produces hormones needed to maintain early pregnancy.

### Trophoderm

The outer layer of cells in a very early embryo before it attaches to the uterus. It helps the embryo implant and develops into tissues that form much of the placenta.

### Trophozoite

The active stage of a single-celled parasite. In this stage it feeds, grows, and often multiplies; it differs from the more resistant form that some parasites

---

use to survive outside the body.

### **Tropical Disease**

A tropical disease is an infection or other health condition more common in tropical and subtropical regions, often because of local climate, vectors, or living conditions. Travel history helps guide diagnosis.

### **Tropical Diseases**

Illnesses more common in warm tropical or subtropical regions, including malaria, dengue, schistosomiasis, and other neglected infections.

### **Tropical Medicine**

The medical specialty concerned with diseases common in tropical and subtropical regions and illnesses related to travel. It includes infections, parasites, insect-borne diseases, environmental hazards, prevention, diagnosis, and treatment.

### **Tropical Sprue**

A disorder causing long-lasting diarrhea and poor absorption of nutrients, reported mainly in tropical and subtropical areas. It can lead to weight loss and deficiencies of folate, iron, and vitamin B12. Testing helps exclude infection and other causes; treatment usually includes antibiotics and replacement of missing nutrients.

### **Tropical Ulcer**

A chronic ulcer occurring in tropical regions, often associated with infection, trauma, or poor wound healing.

### **Troponin**

A protein released into the blood when heart muscle is injured. A raised level can support a heart-attack diagnosis, but it may also result from other heart, lung, kidney, or severe systemic illnesses.

### **Troponin I**

An inhibitory subunit of the troponin regulatory complex of cardiac striated muscle; cardiac troponin I (cTnI) possesses an amino acid sequence unique

to myocardium, serving as an exquisitely sensitive and specific clinical blood biomarker for acute myocardial injury and infarction.

#### **Alternate Names:**

cTnI; Cardiac Troponin I

### **Troponin Test**

A troponin test measures heart-muscle proteins in the blood and helps assess possible heart injury, especially during suspected heart attack.

### **Trouble Swallowing**

Difficulty moving food or liquid from the mouth to the stomach. It may cause coughing, choking, pain, or a feeling that food is stuck in the throat or chest.

### **Trousseau Sign**

A hand cramp where the fingers stiffen and the thumb pulls inward when a blood pressure cuff is pumped up on the arm, showing low calcium in the blood.

### **Trousseau Sign Of Latent Tetany**

A hand spasm that may occur when blood flow to the arm is briefly reduced with a blood-pressure cuff. It can suggest low blood calcium, but it is not specific and must be interpreted with symptoms and blood tests.

#### **Alternate Names:**

Trousseau Sign; Carpopedal Spasm Sign

### **Trousseau Sign of Malignancy**

Spontaneous, migratory superficial thrombophlebitis characterized by recurrent tender, erythematous venous cords appearing sequentially in different superficial veins of the extremities and trunk, strongly associated with underlying visceral mucinous adenocarcinomas, particularly of the pancreas.

#### **Alternate Names:**

Trousseau Syndrome; Migratory Thrombophlebitis

### **Trousseau Syndrome**

Repeated or shifting blood clots in veins associated with active cancer, especially some cancers of the

---

pancreas, stomach, or lung. The cancer can make the blood clot too easily; it differs from the hand spasm called Trousseau sign.

## Trp

Trp is the standard abbreviation for tryptophan, an essential amino acid used in protein synthesis and serotonin and niacin pathways.

## Ovotesticular Disorder of Sex Development

A difference of sex development in which both ovarian and testicular tissue are present, either in one ovotestis or in separate gonads. Chromosomal patterns and external anatomy vary. The deprecated historical term “true hermaphroditism” may appear in older records, but current medical writing should use ovotesticular disorder of sex development or ovotesticular DSD.

### Alternate Names:

Ovotesticular DSD; True Hermaphroditism (deprecated historical term)

## True Ribs

The first seven pairs of ribs, each attached directly to the breastbone by its own flexible cartilage. They protect the heart and lungs and move with the chest during breathing.

## Truncation

A shortened or incomplete form caused by removal of part of a sequence, structure, chromosome, protein, or process; the effect depends on what was lost and where.

## Truncus Arteriosus

A birth defect in which one large blood vessel leaves the heart instead of separate vessels for the body and lungs. A large hole between the lower chambers usually allows oxygen-poor and oxygen-rich blood to mix, causing blue skin and heart failure. Early surgery is usually required.

## Trunk

The central part of the body excluding the head and limbs, or a major nerve or vessel trunk.

## Trypanosoma

A genus of protozoan parasites causing African and American trypanosomiasis.

## Trypanosoma Brucei

A protozoan parasite transmitted by tsetse flies that causes African trypanosomiasis, or sleeping sickness. The human-infecting subspecies differ in geographic distribution and typical disease course; infection can progress from fever and lymph-node enlargement to neurologic involvement.

## Trypanosomiasis

Disease caused by Trypanosoma parasites, including African sleeping sickness and Chagas disease. Infected insects spread them, and illness may affect blood, lymph nodes, the nervous system, heart, or digestive organs.

## Trypsin

A digestive enzyme made by the pancreas and activated in the small intestine. It breaks proteins in food into smaller parts and activates other pancreatic digestive enzymes.

## Trypsin And Chymotrypsin In Stool

Stool trypsin and chymotrypsin testing measures digestive enzymes and may help assess pancreatic enzyme production, although other tests are often preferred.

## Trypsinogen Test

A trypsinogen test measures a pancreatic enzyme precursor and may help evaluate pancreatic function or newborn screening for cystic fibrosis.

## Tryptophan

An amino acid the body cannot make and must obtain from food. It is used to make proteins and can be changed into serotonin, melatonin, and niacin, which help regulate mood, sleep, and other body functions.

## Tsetse Fly

A blood-feeding fly found in parts of sub-Saharan

---

Africa. Its bite can spread *Trypanosoma* parasites, which cause African sleeping sickness; infection may cause fever, headaches, behavior changes, sleep disturbance, and serious nervous-system disease.

## **TSH**

Thyroid-stimulating hormone, made by the pituitary gland to tell the thyroid to produce its hormones. A blood TSH measurement is commonly the first test for many thyroid problems.

## **TSH-Receptor Antibody**

An antibody that attaches to the thyroid's control receptor. Some antibodies overstimulate the thyroid and cause Graves disease, while others block its activity; testing can help diagnose thyroid disease and assess pregnancy-related risk.

## **TSH Test**

A TSH test measures thyroid-stimulating hormone in the blood and is a common initial test of thyroid function.

## **TSI Test**

A blood test that detects antibodies which overstimulate the thyroid. It can support the diagnosis or monitoring of Graves disease and may help assess risk to a fetus during pregnancy.

## **Tsutsugamushi Fever**

Scrub typhus, a mite-borne infection caused by *Orientia tsutsugamushi*. It may cause fever, headache, rash, an eschar, and organ complications and is treated with an appropriate antibiotic.

## **Tubal Ligation**

A permanent birth-control procedure that closes, cuts, or removes the fallopian tubes so sperm and egg cannot normally meet. It does not protect against sexually transmitted infections, and pregnancy after the procedure, though uncommon, can be ectopic.

## **Tubal Ligation Reversal**

Microsurgical reconnection of previously divided or

blocked fallopian-tube segments to restore a possible path for sperm and egg; success depends on remaining tube length, age, scarring, and original method.

## **Tubal Pregnancy**

An ectopic pregnancy that implants in a fallopian tube instead of the uterus. It can rupture and cause internal bleeding; one-sided pain, vaginal bleeding, dizziness, or fainting may occur.

## **Tubercle**

A small rounded projection or nodule; it may refer to bone anatomy or a tuberculous lesion.

## **Tuberculide**

A skin eruption caused by an immune reaction to tuberculosis elsewhere in the body. The skin lesions usually contain no bacteria and may improve when the underlying tuberculosis is treated.

## **Tuberculin**

Protein material from *Mycobacterium tuberculosis* used in a skin test for immune sensitization. A positive result suggests exposure or vaccination but does not by itself prove active tuberculosis or show when exposure occurred.

## **Tuberculin Skin Test**

A small amount of tuberculosis protein is injected into the skin. The raised, firm area is measured 2 to 3 days later; the result depends on its size and the person's risk factors and does not by itself distinguish latent from active tuberculosis.

## **Tuberculin Test**

A skin test that checks whether the immune system has reacted to tuberculosis proteins. A positive result suggests infection or previous vaccination and does not by itself prove active disease.

## **Tuberculoid Leprosy**

A form of leprosy in which the immune system keeps the number of bacteria low. It usually causes a few pale or reddish skin patches with reduced feeling

---

and can injure nearby nerves, causing weakness or numbness.

### **Tuberculosis**

An infection caused by *Mycobacterium tuberculosis* bacteria. It usually affects the lungs but can affect other parts of the body. TB infection may remain inactive, causing no symptoms and not spreading to others, or develop into active TB disease. Active TB in the lungs or throat can spread through the air. Symptoms may include a lasting cough, fever, night sweats, and weight loss.

**Alternate Names:**  
TB

### **Tuberculosis In Children**

Tuberculosis infection in a child, usually acquired by breathing air containing the bacteria from an infectious person. It may be silent or cause cough, fever, poor growth, night sweats, or swollen lymph nodes; testing and treatment depend on exposure and findings.

### **Tuberculosis (TB)**

See *Tuberculosis*.

### **Tuberculous Meningitis**

A life-threatening infection of the coverings of the brain caused by tuberculosis bacteria. It may cause persistent headache, fever, vomiting, neck stiffness, confusion, seizures, or weakness.

### **Tuberculous Pleural Effusion**

See *Pleural Tuberculosis*.

### **Tuberous Sclerosis**

A rare genetic disorder, also called tuberous sclerosis complex, that causes growths in the brain and other organs, including the skin, kidneys, heart, and lungs. It may cause seizures, developmental or behavioral problems, and skin changes; the severity varies widely.

### **Tuberous Sclerosis Complex**

An autosomal dominant genetic condition, usually

caused by a disease-causing change in the *TSC1* or *TSC2* gene, in which noncancerous growths develop in several organs, especially the brain, skin, kidneys, heart, and lungs. It may cause seizures, developmental or learning difficulties, skin changes, kidney problems, or breathing disease. Lifelong monitoring and treatment are tailored to the organs affected.

### **Tubes**

Hollow structures that carry air, fluid, food, or medical instruments. Examples include breathing tubes, fallopian tubes, drainage tubes, and blood vessels; the specific structure must be named for the term to be clinically precise.

### **Tubography**

Contrast imaging of the fallopian tubes, usually as part of hysterosalpingography, to see whether they are open. It may help assess infertility but can cause temporary cramping, bleeding, infection, or rarely injury.

### **Tubo-Ovarian Abscess**

A pocket of pus involving a fallopian tube and ovary, usually caused by a pelvic infection. It can cause pelvic pain, fever, and severe illness and may need antibiotics, drainage, or surgery.

### **Tubular Adenoma**

A benign glandular polyp, most often in the colon, that can develop dysplastic changes and is considered a precursor lesion for some colorectal cancers.

### **Tubular Maximum**

The maximum transport rate across the renal tubular epithelium for a filtered solute (such as glucose, phosphate, or amino acids), representing the point of carrier protein saturation beyond which any additional filtered load spills directly into the urine.

**Alternate Names:**

T<sub>m</sub>; Transport Maximum

### **Tubular Reabsorption**

The process by which kidney tubules return useful water and dissolved substances from filtered fluid to the blood. This prevents the loss of most water,

---

salt, glucose, and other substances in urine.

### **Tubular Secretion**

The movement of selected medicines, waste products, and extra ions from the blood into kidney tubules. This helps the kidneys remove substances from the body and regulate fluid and salt balance.

### **Tubule**

A small tube in the body. In the kidney, tubules change filtered fluid by taking useful water and substances back into the blood and leaving waste to form urine; other tubules carry fluids in different organs.

### **Tubuloglomerular Feedback**

A kidney control system that adjusts blood flow and filtration according to how much salt reaches part of a kidney tubule. It helps keep filtration and fluid balance reasonably stable.

### **Tubulointerstitial Diseases of the Kidney**

Disorders that primarily injure renal tubules and the surrounding interstitial tissue rather than the glomeruli. They may cause impaired urine concentration, electrolyte or acid-base abnormalities, sterile pyuria, mild proteinuria, and acute or chronic loss of kidney function.

### **Tubulointerstitial Nephritis**

A pattern of renal parenchymal inflammation predominantly centered on the renal interstitial compartment and tubules rather than the glomeruli, classically triggered by allergic adverse reactions to medications (beta-lactams, NSAIDs, PPIs), autoimmune diseases, or direct infections.

#### **Alternate Names:**

TIN; Interstitial Nephritis

### **Tubulointerstitial Nephropathy**

Kidney damage involving the small tubes that process urine and the tissue around them. Medicines, infections, toxins, autoimmune disease, and inherited conditions can cause it and may reduce kidney function.

### **Tularaemia**

A zoonotic infection caused by *Francisella tularensis*, acquired from animals, ticks, contaminated water, or aerosols.

### **Tularemia**

Tularemia is infection with *Francisella tularensis* acquired from ticks, animals, contaminated water, or aerosols and causing ulcer-glandular, pulmonary, or other disease.

#### **Alternate Names:**

Deerfly Fever; Rabbit Fever; *Francisella Tularensis* Infection

### **Tularemia Blood Test**

A tularemia blood test looks for antibodies or other evidence of infection with *Francisella tularensis*; antibodies may not appear early in illness.

### **Tulle Gras**

A paraffin-impregnated gauze dressing used to cover wounds and burns.

### **Tullio Phenomenon**

Dizziness, eye movements, or balance problems triggered by loud sounds. It can occur with inner-ear conditions such as superior semicircular canal dehiscence or a perilymphatic fistula, but testing is needed to find the cause.

#### **Alternate Names:**

Sound-Induced Vertigo; Acoustic Vestibular Phenomenon

### **Tumescence**

Swelling or enlargement caused by increased blood flow, fluid, or tissue growth. The term commonly describes erection but can also refer to temporary or abnormal enlargement in other body tissues.

### **Tumor**

An abnormal mass formed by cells growing more than they should or surviving when they should not. A tumor may be noncancerous and remain localized, or cancerous and invade nearby tissue or spread.

---

## **Tumor Board**

A meeting in which doctors from different specialties review a person's cancer diagnosis and test results together. They discuss the possible treatment options and coordinate a care plan.

## **Tumor Burden**

The total amount of cancer in the body, estimated from the number, size, and spread of tumor deposits. It can help doctors assess disease extent and treatment response but does not alone determine a person's outlook.

## **Tumor Differentiation**

How closely tumor cells resemble the normal cells from which they arose. Well-differentiated tumors look and behave more like normal tissue, while poorly differentiated tumors often behave more aggressively.

## **Tumor Embolism**

A blockage caused when cancer cells or a piece of a tumor travels through the bloodstream and lodges in another vessel, most often in the lungs. It can impair blood flow and may cause breathing or other organ problems.

## **Tumor Grade**

A description of how abnormal cancer cells look under a microscope compared with normal cells. Lower-grade tumors often grow more slowly, while higher-grade tumors may grow or spread more quickly; grade is different from cancer stage.

## **Tumor Grading**

The process of examining cancer cells under a microscope and assigning a grade according to how different they look from normal cells. Lower-grade tumors often grow more slowly, while higher-grade tumors may behave more aggressively; grade is different from stage.

## **Tumor Heterogeneity**

Differences between cancer cells in the same tumor or between the original tumor and its spread. These differences can affect how quickly cancer grows and

why some cells respond to treatment while others resist it.

## **Tumor-Infiltrating Lymphocyte Therapy**

A cellular cancer treatment using immune cells removed from a tumor, selected or expanded in the laboratory, and returned to the person to attack cancer cells. It is used for selected advanced cancers and requires specialized treatment because serious immune and treatment-related complications can occur.

## **Tumor Lysis Syndrome**

A medical emergency caused by rapid cancer-cell breakdown, releasing substances that disturb blood chemistry. It can damage kidneys, trigger seizures or abnormal heart rhythms, and requires prevention, monitoring, and urgent treatment.

## **Tumor Marker**

A substance found in blood, urine, tissue, or another body fluid that may be produced by cancer or by the body's response to it. Tumor markers can help monitor treatment or recurrence and sometimes guide diagnosis, but most are not specific enough to prove cancer alone.

## **Tumor Mutational Burden**

The number of gene changes found in a sample of cancer. A high number may help predict response to some immunotherapy, but the result depends on the test, cancer type, and other tumor features.

## **Tumor Necrosis Factor**

An immune-system messenger that promotes inflammation, fever, and activation of other immune cells. Helpful during infection, it can also contribute to autoimmune disease, tissue damage, and wasting when produced excessively.

## **Tumor Necrosis Factor Receptor-Associated Periodic Syndrome**

A rare inherited autoinflammatory disorder caused by variants in the TNFRSF1A gene, producing recurrent prolonged fever, muscle pain, abdominal pain, rash, and inflammation; it is also called

---

TRAPS.

### **Tumor Staging**

The process of determining how large a cancer is and whether it has spread to nearby lymph nodes or distant organs. The results help guide treatment and estimate outlook.

### **Tumor Suppressor**

A gene or protein that helps prevent abnormal cell growth by slowing cell division, repairing DNA damage, or removing damaged cells. Loss of this protection can contribute to cancer.

### **Tumor Suppressor Gene**

A gene that helps prevent uncontrolled cell growth by slowing division, repairing DNA damage, or directing abnormal cells to die. If both copies or the gene's function are lost or disabled, cells may grow abnormally and cancer risk can increase.

### **Tumor-Suppressor Gene**

A gene that helps prevent uncontrolled cell growth by slowing cell division, repairing damaged DNA, or removing abnormal cells. Loss of its protective function can increase the chance of cancer.

### **Tumour**

An abnormal mass caused by uncontrolled or inappropriate cell growth; it may be noncancerous or cancerous.

### **Tungiasis**

A skin infestation caused by the sand flea *Tunga* penetrans, producing an itchy or painful lesion, usually on the feet.

### **Tunica Adventitia**

The tough outer layer of a blood vessel. It contains supportive tissue, nerves, and small vessels and helps anchor the vessel to nearby structures.

### **Tunica Albuginea**

A tough layer of connective tissue surrounding the testis. It helps protect the testicular tissue and

sends inward partitions that divide it into lobules.

### **Tunica Media**

The middle layer of a blood-vessel wall, made mainly of muscle and elastic tissue. It can tighten or relax to change vessel width and help control blood pressure and blood flow.

### **Tunica Vaginalis**

A thin, slippery covering around most of the testis, formed from the abdominal lining during testicular descent. It allows the testis to move smoothly inside the scrotum.

### **Tunnel Vision**

Loss of peripheral visual field leaving a narrowed central field, caused by glaucoma, retinal disease, optic-nerve or brain lesions, severe hypoxia, or other conditions.

### **Turbinates**

Curved structures inside the nose that warm, moisten, and filter breathed air. They contain bone covered by soft tissue and can swell during allergies, infection, or irritation and make nasal breathing difficult.

### **Turbinates Hypertrophy**

Long-lasting enlargement of the tissues inside the nose, often from allergies, irritation, sinus disease, or hormonal changes. It can block nasal airflow and cause a stuffy nose, mouth breathing, snoring, or reduced smell.

### **Turbinate Surgery**

An operation that reduces or reshapes swollen tissues along the side walls of the nose to improve airflow. It may help persistent nasal blockage when other treatment fails; bleeding, crusting, dryness, scarring, or ongoing obstruction are possible.

### **Turcot Syndrome**

A rare inherited cancer-predisposition pattern involving colon polyps or colon cancer together with a brain tumor. It can result from mismatch-repair

---

gene changes or the APC gene change seen in familial adenomatous polyposis, so genetic counseling and screening are important.

**Alternate Names:**

Brain Tumor-Polyposis Syndrome

**Turgor**

The firmness and springiness of body tissue caused partly by its fluid content. Skin that remains tented after being gently pinched may suggest dehydration, but this sign is not reliable by itself.

**Turner Hypoplasia**

A defect in the enamel of a permanent tooth caused by infection or injury involving the baby tooth above it. The affected tooth may have a discolored, rough, or weakened area.

**Turner's Syndrome**

A chromosome condition affecting females in which one X chromosome is missing or altered. It commonly causes short stature and reduced ovarian function, with delayed or absent puberty and infertility. Heart, kidney, hearing, and thyroid problems may also occur, so lifelong medical follow-up is important.

**Turner Syndrome**

A chromosome condition affecting females in which one X chromosome is missing or altered. It commonly causes short stature and reduced ovarian function, with delayed or absent puberty and infertility. Heart, kidney, hearing, and thyroid problems may also occur, so lifelong medical follow-up is important.

**Turning Patients Over In Bed**

Repositioning a patient at planned intervals to protect skin, improve comfort and breathing, prevent pressure injuries and contractures, and reduce complications of immobility.

**Turpentine Oil Poisoning**

Poisoning from swallowing or inhaling turpentine oil. It can irritate or damage the lungs, stomach, and nervous system and may cause chemical pneumonia.

**Tussis**

Cough; a forceful reflex expiration that helps clear secretions, irritants, or foreign material from the airways.

**TVS**

TVS commonly means transvaginal sonography, an ultrasound examination using a probe in the vagina to assess pelvic organs and early pregnancy.

**T Wave**

The part of an ECG that shows the heart's lower chambers resetting electrically after each beat. Changes in its height or direction can occur with reduced blood flow, abnormal body salts, heart strain, or other conditions.

**T-Wave Alternans**

T-wave alternans is a beat-to-beat change in the size or shape of the heart's T wave and may indicate increased risk of dangerous ventricular rhythms.

**Twin**

A twin is one of two offspring from the same pregnancy, either identical from one fertilized egg or fraternal from two eggs and two sperm.

**Twin Placenta**

The number and arrangement of placentas and the sacs surrounding twins. Knowing whether twins share a placenta or a sac helps estimate risks and determines how closely the pregnancy is monitored.

**Twin Pregnancy**

A pregnancy involving two fetuses. Clinical risk depends on chorionicity and amnionicity, with increased risks including preterm birth, fetal growth problems, and hypertensive disorders.

**Twins**

Two offspring from the same pregnancy, either monozygotic or dizygotic.

**Twin-To-Twin Transfusion Syndrome**

A serious complication of an identical-twin preg-

---

nancy in which shared placental blood vessels send too much blood to one twin and too little to the other. It requires urgent specialist monitoring and treatment.

### **Twin-Twin Transfusion Syndrome**

A complication of an identical-twin pregnancy sharing one placenta, in which blood flows unevenly between the twins. One twin may receive too little blood and fluid, while the other receives too much; both need urgent specialist monitoring and treatment.

### **Twitch**

A brief involuntary muscle contraction or movement, which may be benign, medication-related, stress-related, or a sign of nerve, muscle, or brain disease.

### **Twitching**

Repeated involuntary muscle contractions or fasciculations, commonly caused by fatigue, stimulants, electrolyte disturbance, nerve irritation, medicines, or neurologic disease.

### **Tympanic**

Tympanic means relating to the eardrum or middle ear, or resembling a drum in shape or sound.

### **Tympanic Bulla**

The tympanic bulla is a hollow or expanded bony chamber surrounding the middle ear, especially prominent in many mammals.

### **Tympanic Cavity**

The air-filled chamber of the middle ear. It contains the eardrum and three tiny bones that transmit sound vibrations toward the inner ear, while a passage to the throat helps equalize air pressure.

### **Tympanic Hyperectasis**

Abnormal bulging or stretching of the eardrum, usually related to long-lasting pressure changes in the middle ear. It may cause blocked-ear sensations or reduced hearing and requires assessment for the underlying cause.

### **Tympanic Membrane**

The thin eardrum separating the outer ear canal from the middle ear. Sound makes it vibrate, and those vibrations move the middle-ear bones; infection, injury, or pressure can tear it.

### **Tympanic Membrane Perforation**

A tear or hole in the eardrum caused by infection, trauma, pressure changes, or instrumentation, potentially producing pain, drainage, or conductive hearing loss.

### **Tympanites**

Abdominal distension caused by excessive gas in the stomach or intestines, producing a drum-like sound on percussion and sometimes pain, belching, or altered bowel movements.

### **Tympanometer**

An instrument that changes pressure in the ear canal and measures movement of the tympanic membrane and middle-ear system. It is used to perform tympanometry.

### **Tympanometry**

An objective test that varies air pressure in the ear canal while measuring movement of the tympanic membrane and middle-ear pressure. It helps assess middle-ear fluid, eustachian-tube dysfunction, perforation, and ossicular or tympanic-membrane abnormalities.

### **Tympanoplasty**

Surgical repair or reconstruction of the tympanic membrane and, when necessary, the middle-ear ossicles to close a perforation or improve hearing.

### **Tympanosclerosis**

Scarring and calcification of the tympanic membrane or middle-ear lining, often following recurrent infection or previous inflammation. It may be asymptomatic or cause conductive hearing loss when the ossicles are affected.

#### **Alternate Names:**

Myringosclerosis; Tympanic Membrane Calcifica-

---

tion

### **Tympanostomy Tube Insertion**

The most commonly performed pediatric surgical procedure worldwide, in which a tiny cylindrical ventilation tube (grommet) is placed across the tympanic membrane (eardrum). An ear, nose, and throat (ENT) specialist makes a microscopic incision in the eardrum (myringotomy), suctions out accumulated thick, sticky fluid from the middle ear cavity, and positions the tiny tube across the incision. The tube acts as an artificial pressure-equalizing valve, providing continuous airflow ventilation to the middle ear and allowing trapped fluid to drain freely, effectively compensating for an immature or malfunctioning Eustachian tube. It is primarily indicated for persistent middle ear fluid (otitis media with effusion or “glue ear”) causing conductive hearing impairment and speech delays, or for frequent recurrent acute ear infections. Tubes typically stay in place for 6 to 18 months before naturally extruding on their own as the eardrum heals.

#### **Alternate Names:**

Ear Tube Insertion; Grommet Insertion; Myringotomy with Tube Insertion; Tympanostomy

### **Tympanostomy Tubes**

Small tubes placed through the eardrum to let air into the middle ear and help fluid drain. They may be recommended for repeated ear infections or persistent fluid causing hearing problems; drainage, blockage, scarring, or early tube loss can occur.

### **Tympanum**

The middle-ear cavity or, in some contexts, the tympanic membrane.

### **Tympany**

Tympany is a drumlike sound on percussion, often produced by gas in a hollow organ such as the stomach or intestine.

### **Tyndall Effect**

The optical scattering of light by suspended inflammatory cells and proteinaceous exudate (‘aqueous

flare’) in the anterior chamber of the eye viewed with a narrow slit-lamp biomicroscope beam against a dark background, serving as a cardinal physical sign of active anterior uveitis (iritis / iridocyclitis).

#### **Alternate Names:**

Aqueous Flare; Anterior Chamber Tyndall Phenomenon

### **Type 1 Diabetes**

A long-term disease in which the immune system destroys the pancreas cells that make insulin. Without insulin treatment, blood sugar rises dangerously and can lead to diabetic ketoacidosis.

#### **Alternate Names:**

T1D; Insulin-Dependent Diabetes Mellitus; IDDM

### **Type 1 Diabetes In Children**

Type 1 diabetes diagnosed during childhood, causing high blood sugar and requiring insulin, monitoring, nutrition planning, and education.

### **Type 1 Diabetes Mellitus**

Type 1 diabetes is an autoimmune disease in which the immune system attacks and destroys the insulin-producing beta cells of the pancreas, resulting in absolute insulin deficiency.

### **Type 2 Diabetes**

A long-term disease in which the body does not use insulin effectively and gradually makes less of it. High blood sugar can damage the eyes, kidneys, nerves, heart, and blood vessels.

#### **Alternate Names:**

T2D; Non-Insulin-Dependent Diabetes Mellitus; NIDDM

### **Type 2 Diabetes In Children**

Type 2 diabetes beginning during childhood or adolescence, often involving insulin resistance and requiring lifestyle and medical management.

### **Type 2 Diabetes Meal Planning**

Nutritional guidance focusing on consistent carbohydrate intake, portion control, dietary fiber, lean proteins, and healthy fats to maintain target blood

---

glucose and body weight.

**Alternate Names:**

Diabetic Meal Planning; Nutritional Therapy for Type 2 Diabetes; Diabetic Diet Plan

**Type 2 Diabetes Medications**

Alternate name; see *Oral Antidiabetic Agents*.

**Type 2 Diabetes Mellitus**

Type 2 diabetes is a chronic metabolic disorder characterized by insulin resistance and progressive pancreatic beta-cell dysfunction, leading to hyperglycemia.

**Type 3B Diabetes**

Type 3b diabetes is a form of diabetes caused by disease or removal of the pancreas, which can impair both insulin and digestive-enzyme production.

**Type Ia Glycogen Storage Disease**

Von Gierke disease, caused by glucose-6-phosphatase deficiency. It typically causes severe fasting hypoglycemia, lactic acidosis, hyperlipidemia, hyperuricemia, hepatomegaly, and impaired growth.

**Type Ib Glycogen Storage Disease**

A glycogen-storage disorder caused by impaired glucose-6-phosphate transport in the endoplasmic reticulum. It can cause fasting hypoglycemia, lactic acidosis, hepatomegaly, neutropenia, recurrent infections, and inflammatory bowel disease.

**Type I Hypersensitivity**

A rapid allergic reaction in which the immune system releases substances such as histamine after exposure to an allergen. It can cause hay fever, asthma symptoms, hives, food allergy, or life-threatening anaphylaxis.

**Type II Hypersensitivity**

An immune reaction in which antibodies attach to a person's cells or tissues and cause injury or destruction. It contributes to some blood-cell disorders, medicine reactions, and autoimmune diseases.

**Type III GSD (Forbes-Cori)**

An inherited glycogen-storage disorder caused by debranching-enzyme deficiency. It can cause fasting hypoglycemia, hepatomegaly, muscle weakness, elevated liver enzymes, and sometimes cardiomyopathy, with severity varying by subtype.

**Type III Hypersensitivity**

An immune reaction in which clusters of antibodies and foreign or abnormal proteins settle in tissues and trigger inflammation. It can damage the skin, joints, blood vessels, kidneys, or other organs.

**Type III Hypersensitivity Reaction**

Tissue injury caused when antigen-antibody clusters deposit in tissues and activate inflammation. This reaction can damage blood vessels, joints, kidneys, skin, or other organs, as in serum sickness or lupus.

**Type II Muscle Fiber**

A fast-contracting muscle fiber that can produce high force quickly but usually tires sooner than a type I fiber.

**Type I Muscle Fiber**

A slow-contracting muscle fiber that uses oxygen efficiently and can keep working for a long time. It is important for posture and endurance.

**Type IV GSD (Andersen)**

An inherited disorder caused by branching-enzyme deficiency, leading to abnormal glycogen accumulation. Progressive liver disease, cirrhosis, growth problems, muscle disease, or neuromuscular involvement may occur.

**Type IV Hypersensitivity**

A delayed immune reaction driven mainly by T cells rather than antibodies. It usually develops hours to days after exposure and can cause contact dermatitis, some medicine reactions, or inflammation in an organ.

**Types Of Ileostomy**

Types of ileostomy include end, loop, and continent

---

procedures, which divert stool through an opening in the abdominal wall when the colon or rectum cannot be used normally.

### **Type V Glycogen Storage Disease**

An inherited muscle disorder, also called McArdle disease, in which muscle cells cannot properly break down glycogen for energy. Exercise can cause muscle pain, cramps, and sometimes dark urine from muscle injury.

### **Type VI Glycogen Storage Disease**

Hers disease, caused by hepatic glycogen-phosphorylase deficiency. It usually causes mild fasting hypoglycemia, hepatomegaly, growth delay, and elevated liver enzymes, with symptoms often improving with age.

### **Type VII Glycogen Storage Disease**

Tarui disease, caused by phosphofructokinase deficiency in muscle and red blood cells. Exercise intolerance, muscle cramps, rhabdomyolysis, and hemolytic anemia may occur, sometimes with a second-wind phenomenon.

### **Typhlitis**

A serious infection and inflammation of the first part of the large intestine, usually in someone with very low white-cell counts after cancer treatment. It can cause right-sided abdominal pain, fever, diarrhea, and bowel damage and needs urgent care.

#### **Alternate Names:**

Neutropenic Enterocolitis; Ileocecal Syndrome; Cecitis

### **Typhoid**

Alternate name; see *Typhoid Fever*.

### **Typhoid Fever**

A severe systemic bacterial infection caused by *Salmonella* Typhi, transmitted through contaminated food or water. It causes a gradually rising step-ladder fever, headache, stomach pain, constipation or “pea-soup” diarrhea, a relatively slow heart rate, and faint pink spots on the abdomen (rose spots). Untreated infection can lead to ulcera-

tion of the small intestine with severe bleeding or bowel perforation in the third week. Diagnosis is made by blood or bone marrow culture, and treatment requires targeted antibiotics like ceftriaxone or azithromycin.

#### **Alternate Names:**

Enteric Fever; Salmonella Typhi Infection; Typhoid

### **Typhus**

A group of bacterial infections spread mainly by lice, fleas, or mites. They can cause fever, headache, rash, and serious illness affecting several organs; the type and treatment depend on the bacteria and insect involved.

### **Typhus Fever**

A group of bacterial infections spread by lice, fleas, or mites. They commonly cause sudden fever, severe headache, weakness, and sometimes rash or organ injury; the exact illness determines testing and antibiotic treatment.

### **Typical Antipsychotics**

Older antipsychotic medicines used for conditions such as psychosis, mania, or severe agitation. They can reduce hallucinations and delusions but may cause stiffness, tremor, involuntary movements, sleepiness, or other serious effects.

### **Tyramine**

A naturally occurring amine found in some aged or fermented foods. In people taking monoamine oxidase inhibitors, excessive tyramine can cause a dangerous rise in blood pressure.

### **Tyrosine**

An amino acid used to build proteins and make thyroid hormones, melanin, and adrenaline-like chemicals. The body usually makes enough from phenylalanine, but inherited metabolic disorders can disrupt this pathway.

#### **Alternate Names:**

L-Tyrosine; 4-Hydroxyphenylalanine; Tyr

---

## Tyrosine Kinase Inhibitors

A major class of targeted antineoplastic pharmacological agents that competitively inhibit the adenosine triphosphate-binding catalytic pocket of tyrosine kinase enzymes, blocking downstream oncogenic proliferative signaling cascades (e.g., imatinib for BCR-ABL, osimertinib for EGFR).

### Alternate Names:

TKIs

## Tyrosinemia

An inherited disorder in which the body cannot break down the amino acid tyrosine normally. Harmful substances can build up and damage the liver, kidneys, nerves, or eyes; severity depends on the type and treatment.

## Tzanck Smear

A microscope test of cells scraped from a blister or sore. It may suggest a herpes infection or pemphigus, but it cannot reliably identify the cause and is often replaced by more specific laboratory tests.

## Tardive Oral Dyskinesia

Involuntary repetitive movements of the mouth, tongue, jaw, or face that develop after prolonged exposure to dopamine-blocking medicines. It may persist after the medicine is stopped and needs medication review and specialist assessment.

## Tarsal Cyst

A fluid-filled or other cystic lesion in the ankle or foot region, which may cause a lump, pain, pressure, or nerve symptoms. Examination and imaging determine whether it is a ganglion, synovial cyst, or another lesion.

## TB (Tuberculosis)

Alternate name; see *Tuberculosis*.

## TBM

Abbreviation; see *Tuberculous Meningitis*.

## TCOF1

A gene in which disease-causing variants can pro-

duce Treacher Collins syndrome, a craniofacial developmental disorder. Genetic counseling and assessment of breathing, hearing, vision, feeding, and speech may be needed.

## TCS

Abbreviation; see *Treacher Collins Syndrome*.

## TENS

Abbreviation; see *Transcutaneous Electrical Nerve Stimulation*.

## TMJ Disorder

Alternate name; see *Temporomandibular Joint Disorder*.

## Tonic Pupil Syndrome

A pupil that is enlarged or irregular and reacts poorly to light but constricts slowly with near focus, usually because of damage to postganglionic parasympathetic nerves. New pupil asymmetry, headache, drooping eyelid, or neurologic symptoms requires urgent assessment.

## TORCH Syndrome

A group of congenital infections caused by Toxoplasma, Other infections, Rubella, Cytomegalovirus, and Herpes simplex, which may cause growth restriction, rash, jaundice, eye disease, hearing loss, brain abnormalities, or other newborn problems.

## Torn Rotator Cuff

A partial or complete tear of one or more rotator-cuff tendons, causing shoulder pain, weakness, night symptoms, or difficulty lifting or rotating the arm.

## Transient Acantholytic Dermatitis

A recurrent itchy papular rash caused by temporary loss of cohesion between skin cells. It often affects the trunk of older adults and may be triggered by heat, sweating, sunlight, medicines, or illness; it is also called transient acantholytic dermatosis or Grover disease.

---

### **Transient Ischemic Attack (TIA)**

Alternate name; see *Transient Ischemic Attack*.

### **Transthyretin Familial Amyloid Polyneuropathy**

An inherited transthyretin amyloidosis in which abnormal protein deposits damage peripheral and autonomic nerves. It may cause progressive numbness, pain, weakness, blood-pressure or heart-rate changes, gastrointestinal symptoms, and sometimes heart disease.

### **Transthyretin Methionine-30 Amyloidosis (Type I)**

A hereditary transthyretin amyloidosis caused by a methionine-at-position-30 transthyretin variant, classically producing progressive peripheral and autonomic neuropathy with variable cardiac, kidney, or eye involvement.

### **Traumatic Brain Injury (Concussion)**

A head injury that disrupts brain function temporarily or permanently. Concussion is a mild traumatic brain injury and may cause headache, dizziness, confusion, memory problems, or sensitivity to light; worsening headache, repeated vomiting, seizure, weakness, or reduced alertness is an emergency.

### **Traveler's Diarrhea**

Diarrhea during or shortly after travel, usually caused by contaminated food or water and commonly by bacteria, viruses, or parasites. Oral rehydration is important; blood, high fever, severe dehydration, or persistent symptoms require medical evaluation.

### **Treacher Collins-Franceschetti Syndrome 1**

A craniofacial developmental disorder, usually caused by a variant affecting TCOF1, that may cause underdeveloped cheekbones and jaw, malformed ears, hearing loss, cleft palate, and airway or feeding problems.

### **Trisomy 13 Syndrome**

Alternate name; see *Patau Syndrome*.

### **Trisomy 18 Syndrome**

Alternate name; see *Edwards Syndrome*.

### **Tuberose Sclerosis**

Historical or variant name for tuberous sclerosis complex, a genetic disorder causing benign tumors in multiple organs, including the brain, skin, kidneys, heart, lungs, or eyes.

### **Tuberous Sclerosis-1**

A form of tuberous sclerosis complex associated with pathogenic variants in the *TSC1* gene. Features may include seizures, developmental or behavioral differences, skin findings, and benign tumors in several organs.

### **Turner-Varny Syndrome**

Alternate name; see *Turner Syndrome*.

### **Twin Twin Transfusion Syndrome**

Alternate name; see *Twin-to-Twin Transfusion Syndrome*.

### **Temporary Blindness**

A transient loss of vision in one or both eyes. It can result from retinal or brain ischemia, migraine, seizures, changes in blood pressure, eye disease, or other causes; sudden new loss of vision requires emergency assessment.

# U

## UA (Urinalysis)

UA commonly means urinalysis, laboratory examination of urine for blood, protein, cells, glucose, infection, and other findings.

## Ubiquitin-Proteasome System

The primary non-lysosomal intracellular protein degradation pathway in eukaryotic cells, in which damaged, misfolded, or regulatory proteins are tagged with polyubiquitin chains by ubiquitin ligases (E1, E2, E3) and subsequently recognized and degraded by the 26S proteasome complex.

### Alternate Names:

UPS; Ubiquitination Degradation Pathway

## UBT (Urea Breath Test)

UBT commonly means urea breath test, which detects active *Helicobacter pylori* infection by measuring labeled carbon dioxide after ingested urea.

## UDP-Glucuronosyltransferase

A group of enzymes, found mainly in the liver, that helps the body process and remove bilirubin, medicines, hormones, and other substances. Inherited differences in these enzymes can cause some types of jaundice or change how medicines work.

## UDP-Glucuronosyltransferase Deficiency

Reduced activity of a liver enzyme that prepares bilirubin for removal from the body. Inherited deficiency can cause intermittent mild jaundice or, in severe forms, dangerous bilirubin buildup.

## Uhl Anomaly

A rare heart defect present from birth in which

much of the muscle of the right lower chamber is missing. The chamber may pump poorly, causing blue coloring, abnormal rhythms, or heart failure in infancy or childhood.

## Uhthoff Phenomenon

A transient, reversible worsening of pre-existing neurological symptoms or visual blurring occurring in patients with multiple sclerosis when body temperature is elevated by physical exercise, hot baths, or fever, resulting from heat-induced conduction block in chronically demyelinated axons.

### Alternate Names:

Uhthoff Sign

## Ulcer

A crater-like open sore caused by loss of the surface layers of skin or a mucous membrane, sometimes extending into deeper tissue. Causes include poor blood flow, pressure, infection, nerve damage, inflammation, injury, and cancer; the appearance and cause determine treatment.

## Ulceration

The formation of an open sore caused by loss of surface tissue, usually involving skin or a mucous membrane and sometimes extending into deeper tissue.

## Ulcerative Colitis

A long-term disease causing inflammation and open sores in the inner lining of the rectum and colon. It usually starts in the rectum and spreads continuously through part of the colon. It may cause repeated diarrhea, blood or mucus in the stool, ur-

---

gent bowel movements, abdominal cramps, tiredness, weight loss, or a feeling that the bowel has not emptied. Symptoms often flare and then improve. Severe disease may cause heavy bleeding, anemia, dehydration, or a hole in the bowel; long-standing extensive disease increases the risk of colorectal cancer.

**Alternate Names:**

UC; Idiopathic Proctocolitis

### Ulcerative Colitis Pathology

Chronic, usually continuous mucosal inflammation beginning in the rectum and extending proximally. Findings include crypt architectural distortion, cryptitis, crypt abscesses, mucosal ulceration, and inflammatory polyps in active or longstanding disease.

### Ulcerative Keratitis

An ulcerative infection or inflammatory defect of the cornea that can cause pain, redness, photophobia, and impaired vision and may threaten sight if untreated.

### Ulcerative Proctitis

Inflammation and ulceration limited to the lining of the rectum, often causing rectal bleeding, urgency, tenesmus, mucus, and diarrhea.

### Ulcer Healing Drugs

Medicines used to promote healing of gastrointestinal ulcers, usually by suppressing acid secretion or protecting the mucosa; treatment also addresses causes such as *H. pylori* infection or NSAID use.

### Ulcers

Plural of ulcer; see *Ulcer*.

### Ulerythema

A group of follicular keratinization disorders causing rough plugged follicles, redness, and sometimes atrophic scarring, most often on the cheeks, eyebrows, or upper arms. The term may refer to variants such as ulerythema ophryogenes and requires clinical distinction from eczema or acne.

### Ullrich Congenital Muscular Dystrophy

An inherited muscle disease caused by problems with collagen VI, a protein that supports muscle and connective tissue. It begins in infancy with weakness, low muscle tone, tight joints near the body, unusually loose joints in the hands and feet, and later breathing problems.

**Alternate Names:**

UCMD; Ullrich Scleroatonic Muscular Dystrophy

### Ulna

The forearm bone on the side of the little finger. Its upper end forms most of the hinge of the elbow, and its lower end helps form the wrist. Together with the radius, it supports rotation of the forearm and movement of the hand.

### Ulnar

Relating to the ulna or to the side of the forearm and hand nearest the little finger. Pressure on the ulnar nerve in this area can cause tingling or numbness in the little and ring fingers.

### Ulnar Artery

A major artery running along the little-finger side of the forearm and into the hand. It supplies blood to the forearm and hand and helps form the hand's arterial arches.

### Ulnar Claw Hand

A distinctive resting hand deformity (Duchenne claw hand) resulting from a distal ulnar nerve injury at the wrist, characterized by hyperextension of the metacarpophalangeal (MCP) joints and hyperflexion of the proximal and distal interphalangeal (PIP/DIP) joints of the fourth and fifth digits due to loss of the medial lumbricals and interossei.

**Alternate Names:**

Duchenne Claw Hand; Main en Griffe

### Ulnar Collateral Ligament

A thick triangular ligament on the medial side of the elbow joint (consisting of anterior, posterior, and transverse bands) that stabilizes against valgus stress, commonly torn in overhead throwing athletes ('Tommy John' injury).

---

**Alternate Names:**

UCL of the Elbow; Medial Collateral Ligament of Elbow

**Ulnar Deviation**

A characteristic musculoskeletal deformity of the hand in advanced chronic rheumatoid arthritis, characterized by the abnormal lateral (ulnar-directed) subluxation and drifting of the fingers at the metacarpophalangeal joints resulting from extensor tendon stretching and volar plate destruction.

**Alternate Names:**

Ulnar Drift

**Ulnar Drift**

A classic progressive hand deformity seen in chronic rheumatoid arthritis characterized by abnormal ulnar deviation of the second through fifth fingers at the metacarpophalangeal (MCP) joints, resulting from chronic synovitis, stretching of collateral ligaments, and extensor tendon subluxation.

**Alternate Names:**

Ulnar Deviation of Digits; Rheumatoid Ulnar Drift

**Ulnar Hypoplasia**

Underdevelopment or partial absence of the ulna, the forearm bone on the little-finger side. Present from birth in most cases, it may shorten or bend the forearm, limit elbow or wrist movement, and occur with finger or other body differences.

**Ulnar Nerve**

A nerve running from the neck through the inner arm and behind the elbow to the hand. It controls some hand and forearm muscles and carries feeling from the little finger and part of the ring finger.

**Ulnar Nerve Dysfunction**

Impairment of the ulnar nerve, commonly caused by compression at the elbow (cubital tunnel) or wrist (Guyon canal). Symptoms include numbness or tingling in the little and ring fingers, weakened grip, and hand-muscle wasting; severe lesions may produce an ulnar claw.

**Ulnar Nerve Entrapment**

Compression or irritation of the ulnar nerve, commonly at the elbow or wrist, causing numbness or tingling in the ring and little fingers and sometimes weakness of the hand.

**Ulnar Neuropathy**

A peripheral compression neuropathy of the ulnar nerve occurring most commonly at the elbow within the cubital tunnel (cubital tunnel syndrome) or at the wrist within Guyon canal, presenting with numbness and paresthesias in the fifth and medial half of the fourth digit, intrinsic hand weakness, and diminished grip strength.

**Alternate Names:**

Ulnar Nerve Entrapment; Cubital Tunnel Neuropathy

**Ulnar Neuropathy at Guyon Canal**

Entrapment or compressive neuropathy of the ulnar nerve as it traverses the fibro-osseous canal (pisohamate tunnel) at the wrist between the pisiform and the hook of the hamate. Subdivided into zone I (proximal trunk lesion with combined motor and sensory deficits), zone II (deep motor branch lesion with pure motor clawing and intrinsic muscle weakness sparing hypothenar sensation), and zone III (superficial sensory branch lesion with pure sensory paresthesias of the fifth and medial fourth digits).

**Alternate Names:**

Guyon Canal Syndrome; Handlebar Palsy

**Ulnar Paradox**

The apparently unexpected finding that damage to the ulnar nerve at the wrist can cause more clawing of the fingers than damage higher in the arm. The difference occurs because some finger-bending muscles remain active after a wrist injury.

**Ulnar-Sided Wrist Pain**

Alternate name; see *Ulnar wrist pain*.

**Ulnar Tunnel Syndrome**

An entrapment neuropathy of the ulnar nerve as it passes through Guyon canal (the ulnar tunnel at the wrist between the pisiform bone and hook

---

of the hamate), causing sensory loss in the medial ring and little fingers and motor weakness of the hypothenar and intrinsic hand muscles.

**Alternate Names:**

Guyon Canal Syndrome; Handlebar Palsy

**Ulnar Vein**

Veins on the little-finger side of the forearm that carry blood away from the forearm and hand. They join other deep veins near the elbow to continue toward the heart.

**Ulnar Wrist Pain**

Pain on the side of the wrist nearest the little finger, often involving the ulna or nearby tendons and ligaments.

**Alternate Names:**

Ulnar-Sided Wrist Pain

**Ultrafiltration**

A process in which pressure pushes water and small dissolved substances through a very fine filter while larger particles remain behind. The kidneys use it to begin forming urine, and dialysis uses it to remove excess fluid.

**Ultra-processed food**

Ultra-processed food is an industrially formulated product made mostly from refined ingredients and additives, often with little intact whole food. Frequent high intake is associated with poorer health outcomes, although effects vary by the food and overall diet.

**Ultrasonic Therapy**

Treatment using high-frequency sound energy to heat, move, break up, or otherwise affect tissue. It is used in selected physical-therapy procedures and some operations; benefits and risks depend on the device, body site, and condition.

**Ultrasonography**

A scan using high-frequency sound waves to create images of organs, tissues, vessels, or a fetus without radiation.

**Ultrasound**

An imaging test that uses high-frequency sound waves to show organs, blood vessels, tissues, or a developing fetus without ionizing radiation. Different examinations can assess the abdomen, pelvis, kidneys, thyroid, heart, blood flow, or testicles.

**Ultrasound Biomicroscopy**

Very high-frequency ultrasound that creates detailed images of the front part of the eye, including the cornea, iris, lens, and drainage angle when an ordinary eye examination is not enough.

**Ultrasound Contrast**

Tiny gas-filled bubbles given into a vein to improve ultrasound images of blood flow and selected organs. They are usually cleared through the lungs but can rarely cause allergic or cardiopulmonary reactions.

**Ultrasound-Guided Biopsy**

An image-guided interventional procedure in which real-time ultrasonography is utilized to continuously visualize and steer a biopsy needle (core needle or fine-needle aspiration) into a target lesion or mass (such as in the thyroid, breast, liver, or lymph nodes) for histological diagnosis.

**Ultrasound-Guided Breast Biopsy**

A percutaneous core-needle or vacuum-assisted tissue sampling procedure performed under continuous real-time sonographic guidance to biopsy solid masses, architectural abnormalities, or complex cystic breast lesions.

**Alternate Names:**

Ultrasound-Guided Breast Biopsy; Sonographically Guided Core Biopsy; Ultrasound Breast Biopsy

**Ultrasound Therapy**

Use of sound waves at therapeutic intensity to heat or mechanically affect tissue. It is used in selected rehabilitation settings, but evidence and suitability vary by condition and it is not appropriate over every body area.

---

## Ultrasound Transducer

The probe placed against the skin or inside a body opening during an ultrasound scan. It sends and receives sound waves to create images or guide a procedure; different probes are used for different body areas.

## Ultraviolet Rays

Invisible electromagnetic radiation with wavelengths shorter than visible violet light. Excess exposure can cause sunburn, photoaging, eye injury, and skin cancers; controlled ultraviolet exposure has selected therapeutic uses.

## Ultraviolet Therapy

Controlled exposure to ultraviolet light used for selected skin disorders such as psoriasis, eczema, and vitiligo; treatment requires eye and skin protection and monitoring for burns and long-term skin cancer risk.

## Umbilical

Relating to the umbilicus or navel, including structures, lesions, discharge, or abnormalities located at or connected with it.

## Umbilical Artery Catheter

A specialized vascular catheter inserted into one of the two umbilical arteries in critically ill neonates, advancing into the descending thoracic aorta (high placement, T6-T8) or infrarenal abdominal aorta (low placement, L3-L5) for continuous arterial blood pressure monitoring and arterial blood gas sampling.

### Alternate Names:

UAC

## Umbilical Artery Doppler

An ultrasound measurement of blood flow through the umbilical cord. It helps assess how well the placenta is supplying the fetus, especially when fetal growth is reduced or pregnancy complications affect placental function.

## Umbilical Catheters

Umbilical catheters provide vascular access through

a newborn's umbilical vessels for fluids, medicines, monitoring, or blood sampling while complications are monitored.

## Umbilical Cord

The connection between a fetus and the placenta. It contains blood vessels that carry oxygen, nutrients, and waste between them and is protected by a soft, cushioning tissue.

## Umbilical Cord Blood Gas

A test of blood taken from the umbilical cord after birth to assess the baby's oxygen supply and acid-base balance around delivery. Arterial and venous results provide different information and must be interpreted with the baby's condition, gestational age, and delivery circumstances.

## Umbilical Cord Complications

Problems involving the umbilical cord, including prolapse, compression, knots, abnormal insertion, short or long cord, and vascular abnormalities. They may reduce fetal oxygenation or complicate delivery and require fetal monitoring and obstetric management.

## Umbilical Cord Prolapse

The umbilical cord slips through the cervix ahead of or alongside the baby, usually after the waters break. The cord can be squeezed and reduce the baby's oxygen supply, making this an obstetric emergency.

## Umbilical Granuloma

A small moist pink or red lump of healing tissue at a baby's navel after the cord falls off. It may ooze clear fluid but should not cause spreading redness, fever, or marked tenderness; a clinician can treat it and exclude infection or another abnormal connection.

### Alternate Names:

Granuloma Umbilicale; Neonatal Umbilical Granuloma

## Umbilical Hernia

A soft bulge caused when tissue pushes through the opening at the navel. Many infant hernias close as the child grows, while adult hernias may enlarge or become trapped and painful and sometimes need

---

surgery.

### **Umbilical Region**

The central part of the abdomen around the navel. Pain, swelling, a hernia, or a lump in this area may arise from the bowel, abdominal wall, blood vessels, or other organs and is assessed with examination and, when needed, imaging.

### **Umbilical Vein**

The umbilical vein carries oxygen- and nutrient-rich blood from the placenta to the fetus during pregnancy.

### **Umbilication**

Formation of a central hollow or navel-like depression in a skin lesion or other body structure. It can occur in some infections, inflammatory lesions, tumors, or normal anatomical features and must be interpreted with the lesion's appearance.

### **Umbilicus**

The navel, a scar on the front of the abdomen left after the umbilical cord separates at birth. It may be affected by a hernia, infection, discharge, or other skin changes.

#### **Alternate Names:**

Belly Button; Omphalos

### **Uncal Herniation**

A life-threatening subtype of transtentorial herniation in which expanding supratentorial mass effect pushes the medial temporal lobe (uncus) downward over the free edge of the tentorium cerebelli, compressing the ipsilateral oculomotor nerve (CN III, causing fixed dilated 'blown' pupil), the ipsilateral cerebral peduncle (contralateral hemiparesis), and the posterior cerebral artery (occipital infarction).

#### **Alternate Names:**

Lateral Transtentorial Herniation; Uncinate Herniation

### **Uncal Transtentorial Herniation**

A life-threatening intracranial herniation syndrome in which an expanding supratentorial mass displaces

the uncus of the medial temporal lobe medially and downward across the tentorial incisura, compressing the ipsilateral oculomotor nerve (cranial nerve III; producing an unreactive dilated pupil) and the ipsilateral cerebral peduncle (producing contralateral hemiparesis).

### **Unconjugated Hyperbilirubinemia**

An elevation of circulating indirect (water-insoluble) bilirubin in blood plasma exceeding physiological limits, resulting from excessive bilirubin overproduction (hemolysis), impaired hepatic uptake (heart failure, portosystemic shunts), or defective glucuronosyltransferase conjugation (Gilbert syndrome, Crigler-Najjar syndrome, neonatal jaundice).

### **Unconscious**

Not awake and not responsive to ordinary external stimuli. Unconsciousness may result from syncope, seizure, trauma, intoxication, metabolic disease, stroke, or other emergencies.

### **Unconsciousness**

Loss of awareness and normal response to surroundings, ranging from brief fainting to prolonged coma. It can result from reduced brain blood flow, injury, seizures, low blood sugar, drugs, or serious illness.

### **Uncoupling Protein**

A family of mitochondrial inner membrane transport proteins (such as UCP1 / thermogenin) that dissipate the proton electrochemical gradient across the inner mitochondrial membrane as heat without ATP synthesis, playing a vital role in non-shivering thermogenesis in brown adipose tissue.

#### **Alternate Names:**

Thermogenin; UCP1

### **Uncover Test**

An ophthalmologic test performed following the cover test to detect latent strabismus (phoria). As the occluder is removed from an eye, the examiner observes whether that eye rapidly refixates from a deviated position back to alignment with the target.

---

## Underventilation

Breathing that is too slow or shallow to remove enough carbon dioxide. It may also lower oxygen and can result from sedatives, weak breathing muscles, severe obesity, lung disease, or brain problems.

## Underweight

Body weight that is lower than expected for a person's height, age, and build. It may be healthy for some people but can also reflect poor nutrition, illness, or unintentional weight loss and is interpreted with the whole clinical picture.

## Undescended Testicle

See *Cryptorchidism*.

## Undescended Testicle Repair

An operation that moves a testicle into the scrotum and fixes it there. It is usually performed in childhood to support fertility, allow examination, and reduce risks related to twisting, injury, and cancer.

## Undescended Testis

See *Cryptorchidism*.

## Undifferentiated

Not showing the recognizable features of a specialized cell or tissue. An undifferentiated tumor has cells that look very unlike normal tissue, so its origin and behavior may be difficult to determine.

## Undifferentiated Arthritis

Inflammatory arthritis with joint symptoms and signs that do not yet fit one specific named arthritis. The pattern may become clearer over time or remain an undifferentiated condition.

## Undifferentiated Cancer

Cancer made of cells that look very unlike normal cells and do not clearly show the tissue where they began. Special laboratory tests and imaging may be needed to identify its type and guide treatment.

## Undifferentiated Carcinoma

A high-grade carcinoma whose cells lack recogniz-

able features of a specific tissue or tumor subtype; diagnosis and treatment require pathology, immunostaining, and staging.

## Undifferentiated Connective Tissue Disease

An autoimmune connective-tissue disease with symptoms or laboratory findings suggesting systemic inflammation but not enough features for a specific diagnosis such as lupus or systemic sclerosis.

## Undifferentiated Connective-Tissue Disease

An autoimmune connective-tissue disorder with symptoms, examination findings, or laboratory abnormalities suggesting systemic autoimmunity but not meeting criteria for a defined disease such as lupus or systemic sclerosis. Features and long-term course vary.

## Undifferentiated Pleomorphic Sarcoma

An uncommon, often fast-growing cancer of soft tissue or bone whose cells vary greatly in shape and do not resemble a specific normal tissue. Treatment depends on its site, size, and spread.

### Alternate Names:

UPS; Malignant Fibrous Histiocytoma; MFH

## Undifferentiated Pleomorphic Sarcoma Of The Breast

A rare high-grade breast sarcoma formerly called malignant fibrous histiocytoma. It is a diagnosis of exclusion after other specific sarcomas and metastatic carcinoma have been ruled out histologically.

## Undifferentiated Spondyloarthritis

Inflammatory arthritis with features of the spondyloarthritis group but insufficient or atypical findings for classification as ankylosing spondylitis, psoriatic arthritis, reactive arthritis, enteropathic arthritis, or another defined subtype. Symptoms may involve the spine, sacroiliac joints, peripheral joints, entheses, skin, eyes, or bowel.

## Undulant Fever

An infection caused by *Brucella* bacteria, usually

---

acquired from infected animals or unpasteurized dairy products. It can cause repeated or fluctuating fever, sweats, tiredness, joint pain, and serious organ complications.

### **Unerupted Tooth**

A tooth that has not emerged into the oral cavity at the expected time. It may be normally developing, delayed, impacted, or prevented from erupting by obstruction or abnormal position.

### **Ungual**

Relating to a fingernail or toenail. The term may describe a finding beneath, around, or within the nail, such as a bruise, fungal infection, wart, or pigmented lesion.

### **Unicameral Bone Cyst**

A noncancerous, fluid-filled space in a bone, usually in the upper arm or thigh of a child or teenager. It may be found after a weakened bone breaks. An imaging sign called a fallen-leaf sign can support the diagnosis, but it is not specific by itself.

#### **Alternate Names:**

Simple Bone Cyst; Solitary Bone Cyst

### **Unicornuate Uterus**

A congenital condition in which only one side of the uterus develops fully, usually with one fallopian tube. Some people have no symptoms, but it can increase risks of infertility, pregnancy outside the uterus, miscarriage, or premature birth and may require specialist pregnancy care.

### **Unilateral**

Affecting, occurring on, or involving one side of the body or one paired organ, such as unilateral weakness or unilateral eye disease.

### **Unilateral Gynecomastia**

Enlargement of breast glandular tissue affecting one breast in a male patient. A new, firm, fixed, painful, or nipple-associated mass can have causes other than gynecomastia.

### **Unilateral Microphthalmos**

A congenital condition in which one eye is abnormally small. It may be associated with other ocular malformations and can cause substantial visual impairment.

### **Unilateral Spatial Neglect**

A common neurobehavioral syndrome following acute brain injury (most frequently a right-sided stroke involving the right inferior parietal lobule or temporoparietal junction) in which the patient fails to attend to, respond to, or orient toward sensory stimuli presented on the contralesional (typically left) hemispace, despite intact primary visual and sensory pathways.

#### **Alternate Names:**

Hemispatial Neglect; Left Visual Neglect; Spatial Inattention

### **Uninodular Goiter**

An enlarged thyroid containing one main lump, or nodule. Blood tests and ultrasound help assess thyroid function and the chance of cancer; some nodules need follow-up or a needle sample.

### **Unintentional Weight Loss**

Unintentional weight loss is reduction in body weight without planned dietary or activity change and may result from malignancy, endocrine disease, infection, gastrointestinal disease, medication, or mood disorder.

### **Uniparental Disomy**

A chromosome difference in which both copies of a chromosome, or part of one, come from the same parent. It can cause disease by disrupting genes that depend on parental origin or by giving a child two copies of a harmful gene variant.

### **Universal Donor**

An individual with blood group O Rh-negative (O-neg), whose red blood cells lack A, B, and Rh(D) surface antigens, making their packed red blood cells safe for emergency transfusion into recipients of any ABO and Rh blood group without immediate hemolytic transfusion reactions.

---

**Alternate Names:**

Type O Negative Donor; Universal Erythrocyte Donor

**Universal Recipient**

An individual with blood group AB Rh-positive (AB-pos), whose plasma lacks anti-A, anti-B, and anti-Rh(D) isohemagglutinins, allowing them to safely receive packed red blood cells of any ABO/Rh blood group.

**Alternate Names:**

Type AB Positive Recipient; Universal Blood Recipient

**Unloader Knee Braces**

Specialized orthotic knee braces designed to redistribute mechanical weight and load away from an osteoarthritic or damaged compartment of the knee joint (such as the medial or lateral tibiofemoral compartment) to the healthier compartment, reducing pain and improving mobility.

**Alternate Names:**

Unloader Knee Bracing; Offloader Braces; Osteoarthritis Knee Brace

**Unopposed Estrogen**

Estrogen treatment given without a progestogen to someone with a uterus. Long-term use can overstimulate the uterine lining and increase cancer risk, so protection is usually recommended when appropriate.

**Unresectable**

Describing a tumor or lesion that cannot be completely removed safely by surgery because of its location, extent, invasion of vital structures, or the patient's operative risk.

**Unresponsive Coma**

A state of profound unconsciousness in which a person cannot be awakened or follow commands. Causes include brain injury, stroke, seizures, poisoning, infection, and metabolic failure. It is a medical emergency.

**Unsaturated Fat**

A dietary fat whose fatty-acid chains contain one or more carbon-carbon double bonds. Monounsaturated and polyunsaturated fats are common in vegetable oils, nuts, seeds, and fish; replacing saturated fat with unsaturated fat generally supports healthier LDL cholesterol levels.

**Unstable Angina**

Chest pain caused by reduced blood flow to the heart that is new, worsening, lasts longer, or occurs at rest, without clear evidence of heart-muscle death. It is an emergency warning of possible heart attack.

**Unsteadiness**

Impaired balance or gait stability, which may result from vestibular disease, neurologic disorders, weakness, medication effects, visual impairment, or musculoskeletal problems.

**Untidy Wound**

An irregular or contaminated wound with crushing, devitalized tissue, tissue loss, foreign material, or associated injury to vessels, nerves, tendons, or bone. It has increased infection risk and may require exploration, irrigation, debridement, and delayed or staged closure.

**Upper Airway Biopsy**

Removal of tissue from the nasal cavity, pharynx, larynx, or related upper airway for microscopic evaluation of suspected infection, inflammation, infiltrative disease, or tumor.

**Upper Airway Cough Syndrome**

A common clinical etiology of chronic cough provoked by post-nasal drip and mechanical or chemical stimulation of upper airway sensory cough receptors, secondary to allergic rhinitis, non-allergic rhinitis, or chronic rhinosinusitis.

**Alternate Names:**

UACS; Post-Nasal Drip Syndrome

**Upper Airway Obstruction**

Narrowing or blockage of the breathing passage in

---

the nose, throat, or voice box. It can cause noisy breathing, breathlessness, voice changes, or blue lips and can become life-threatening when severe or rapidly worsening.

### **Upper Airway Resistance Syndrome**

Repeated extra effort to breathe through a partly narrowed upper airway during sleep. It can cause brief repeated awakenings, unrefreshing sleep, morning headache, and daytime sleepiness even without clearly positive standard sleep-apnea testing.

**Alternate Names:**

UARS

### **Upper Arm**

The portion of the upper limb between the shoulder and elbow, containing the humerus and muscles, nerves, and vessels that serve the arm.

### **Upper Endoscopy**

A flexible camera examination of the food pipe, stomach, and first part of the small intestine. It can identify inflammation, ulcers, bleeding, narrowing, or tumors and can allow tissue samples or treatment.

### **Upper Esophageal Sphincter**

A ring of muscle at the top of the esophagus that opens during swallowing and coordinates food passage.

**Alternate Names:**

UES

### **Upper Extremity**

The anatomic region extending from the shoulder through the arm, forearm, wrist, and hand. Disorders may involve its bones, joints, muscles, nerves, vessels, or skin.

### **Upper Extremity Deep Vein Thrombosis**

A thrombosis occurring in the deep venous system of the arm or thoracic inlet (axillary, subclavian, or brachiocephalic veins), categorized as primary (effort-induced venous thrombosis or Paget-Schroetter syndrome) or secondary (most commonly related to indwelling central venous catheters or pacemaker

leads).

**Alternate Names:**

UEDVT

### **Upper Extremity Venous Doppler**

An ultrasound examination of the arm and related veins that assesses compressibility and blood flow, commonly to evaluate suspected venous thrombosis.

### **Upper Gastrointestinal Bleeding**

Bleeding from the esophagus, stomach, or first part of the small intestine. It may cause vomiting of red or coffee-ground blood, black stools, dizziness, weakness, or fainting. Common causes include ulcers, inflammation, tears, and enlarged veins; significant bleeding can be life-threatening.

### **Upper GI And Small Bowel Series**

A fluoroscopic x-ray examination in which swallowed contrast outlines the esophagus, stomach, duodenum, and small intestine to evaluate structure and transit.

### **Upper GI Series**

An X-ray examination of the food pipe, stomach, and first part of the small intestine after swallowing contrast material. It can show narrowing, blockage, ulcers, abnormal movement, or other structural problems.

### **Upper Leg**

The portion of the lower limb between the hip and knee, containing the femur and the thigh muscles, nerves, and blood vessels.

### **Upper Limb Disorders**

Conditions affecting the shoulder, arm, elbow, forearm, wrist, or hand, including musculoskeletal, nerve, vascular, and work-related disorders.

### **Upper Motor Neuron**

A nerve cell in the brain or spinal cord that controls nerve cells supplying muscles. Damage to these pathways can cause weakness, stiffness, exaggerated reflexes, or difficulty controlling movement.

---

## Upper Motor Neuron Lesion

Damage or interruption of the corticospinal (pyramidal) or corticobulbar motor pathways within the cerebral cortex, internal capsule, brainstem, or spinal cord, characterized clinically by muscle spasticity ('clasp-knife' hypertonia), hyperreflexia, clonus, extensor plantar response (positive Babinski sign), and pronator drift without significant muscle atrophy.

### Alternate Names:

Pyramidal Tract Lesion; UMN Syndrome

## Upper Motor Neuron Syndrome

A group of findings caused by damage to movement pathways in the brain or spinal cord. It may cause weakness, stiffness, muscle spasms, exaggerated reflexes, or reduced control of movement.

## Upper Respiratory Infection

An infection of the nose, sinuses, pharynx, or larynx, most often caused by a virus and producing symptoms such as congestion, sore throat, cough, or runny nose.

## Upper Respiratory Tract Infection

An acute, typically self-limiting viral or bacterial infection of the mucosal structures of the upper aerodigestive tract above the larynx, encompassing the common cold, rhinitis, pharyngitis, tonsillitis, and acute rhinosinusitis.

### Alternate Names:

URTI; Upper Respiratory Infection; URI

## Upper-Tract Urothelial Carcinoma

A cancer arising from the urothelial lining of the renal pelvis or ureter. It may cause blood in the urine, flank pain, or blockage and is distinct from urothelial cancer arising in the bladder.

## Upright Labor Positions

Maternal positions during labor, such as walking, standing, squatting, kneeling, or sitting upright. They may improve comfort and mobility and can be used when safe and acceptable to the laboring person and clinical team.

## Upward Gaze

Elevation of both eyes to direct the visual axis upward. It depends on coordinated activity of the extraocular muscles and their brainstem control pathways.

## Urachal Abnormalities

Birth-related problems caused by incomplete closure of the urachus, the temporary fetal connection between the bladder and navel. They include a urachal cyst, sinus, or open connection and may cause infection, navel discharge, abdominal pain, or urine leakage.

## Urachal Carcinoma

A rare cancer arising from a leftover connection between the bladder and the navel, usually near the top of the bladder. It may cause blood or mucus in the urine, pelvic pain, or urinary changes.

## Urachal Cyst

A fluid-filled sac left from the temporary fetal connection between the bladder and navel. It may cause no symptoms, but infection can produce lower-abdominal pain, fever, navel discharge, or urinary symptoms.

## Urachal Fistula

A congenital anomaly resulting from complete failure of obliteration of the embryonic urachus (allantoic canal), creating a persistent patent fibrous lumen connecting the bladder dome directly to the umbilicus, presenting as continuous or intermittent urine drainage from the umbilicus.

### Alternate Names:

Patent Urachus; Persistent Urachal Canal

## Urachal Mucinous Cystic Tumor

A rare tumor arising from the urachal remnant between the bladder dome and umbilicus. It may be benign or malignant, with mucinous histology, and requires surgical excision.

## Urachus

An embryologic connection between the fetal blad-

---

der and umbilicus that normally becomes the median umbilical ligament after birth. Persistent urachal remnants can form cysts, sinuses, or other complications.

### **Uracil-DNA Glycosylase**

A DNA repair enzyme that initiates the base excision repair (BER) pathway by specifically recognizing and hydrolyzing the N-glycosidic bond of mutagenic uracil residues formed by spontaneous deamination of cytosine in DNA, generating an abasic (AP) site for downstream repair.

**Alternate Names:**

UDG

### **Uraemia**

A serious illness caused by severe kidney failure and buildup of waste products in the blood. It may cause nausea, itching, tiredness, confusion, bleeding, or inflammation around the heart.

### **Uraemic Foetor**

A distinctive, fishy, ammoniacal, or urine-like breath odor caused by the breakdown of elevated salivary urea into ammonia by oral bacterial urease in patients with advanced chronic kidney disease or acute renal failure.

**Alternate Names:**

Uremic Fetor; Ammoniacal Breath

### **Uraemic Syndrome**

The collection of symptoms and biochemical abnormalities caused by severe accumulation of uraemic waste products in advanced kidney failure.

### **Uranium**

A naturally occurring radioactive heavy metal. Internal exposure can damage the kidneys, while inhaled or retained radioactive material can also expose tissues to ionizing radiation.

### **Urate**

A form of uric acid, a waste product made when the body breaks down certain substances in food and cells. Too much urate in the blood can form

crystals in joints and cause gout.

### **Urate-Lowering Therapy**

Long-term treatment that lowers urate in the blood, helping dissolve gout crystals and prevent further attacks and joint damage. The medicine is chosen according to kidney function, other illnesses, and treatment goals.

### **Urate Nephropathy**

Acute kidney injury caused by the intratubular precipitation of needle-shaped monosodium urate and uric acid crystals within the renal collecting ducts and distal tubules, typically occurring in the setting of acute tumor lysis syndrome following cytotoxic chemotherapy for high-turnover hematological malignancies. Marked by an elevated urinary uric acid-to-creatinine ratio greater than 1.0.

**Alternate Names:**

Acute Uric Acid Nephropathy; Crystal-Induced Urate Nephropathy

### **Urates**

Salts or ions of uric acid. Monosodium urate crystals can accumulate in joints in gout, and urate crystals may contribute to urinary stones.

### **Urea**

The principal nitrogen-containing waste product of protein metabolism, formed in the liver and excreted mainly by the kidneys.

### **Urea Breath Test**

A noninvasive test for active *Helicobacter pylori* infection: the person drinks labeled urea, and labeled carbon dioxide in exhaled breath indicates bacterial urease activity.

### **Urea Cycle**

A series of chemical reactions in the liver that changes toxic ammonia, produced when the body breaks down protein, into urea. The kidneys then remove urea in urine.

---

## Urea Cycle Disorder

An inherited problem in the liver's process for removing ammonia. Ammonia can build up in the blood and cause vomiting, poor feeding, sleepiness, confusion, seizures, or brain injury, especially during illness or fasting.

## Urea Nitrogen Urine Test

A urine test measuring urea nitrogen excretion, interpreted with blood urea nitrogen, creatinine, diet, and urine volume to assess protein metabolism and renal handling.

## Ureaplasma

A genus of very small bacteria without a cell wall that can colonize the genital or urinary tract and is sometimes associated with urethritis or pregnancy complications.

## Ureaplasma Urealyticum

A cell-wall-free bacterium that can colonize the genital or urinary tract and is sometimes associated with nongonococcal urethritis, pregnancy complications, or infection in vulnerable newborns.

## Uremia

A clinical syndrome caused by advanced kidney failure and accumulation of waste products and other biologically active substances. Symptoms may include nausea, itching, fatigue, confusion, bleeding, or pericarditis; laboratory values and symptoms must be interpreted together.

## Uremic Bleeding

A qualitative hemorrhagic diathesis occurring in patients with severe acute kidney injury or end-stage renal disease, resulting from uremic toxin-induced platelet dysfunction (impaired GPIIb/IIIa activation and defective von Willebrand factor interaction), characteristically treated with desmopressin (DDAVP), cryoprecipitate, or dialysis.

## Uremic Encephalopathy

Brain dysfunction caused by the buildup of waste products in severe kidney failure. It may cause confusion, extreme sleepiness, muscle twitching,

seizures, or coma. It is a medical emergency and is often treated by addressing the kidney failure, sometimes with dialysis.

## Uremic Fetor

A characteristic fishy, ammoniacal, or urine-like odor on the breath of patients with severe end-stage renal disease (ESRD), produced by the bacterial breakdown of elevated concentrations of salivary urea into ammonia by oral urease-producing microflora.

### Alternate Names:

Ammoniacal Breath; Uremic Breath Odor

## Uremic Frost

Rare white, powdery crystals of urea that appear on the skin when severe untreated kidney failure causes very high waste levels in the blood. It indicates advanced kidney failure.

## Uremic Pericarditis

Inflammation of the sac around the heart caused by severe kidney failure and buildup of waste products. It may cause sharp chest pain, a scratchy heart sound, or fluid around the heart; fluid can sometimes compress the heart and impair its pumping.

## Uremic Platelet Dysfunction

Reduced ability of platelets to stick together and stop bleeding because of advanced kidney failure. It can cause easy bruising, nosebleeds, heavy menstrual bleeding, or bleeding from the stomach or bowel and may improve when the kidney failure is treated.

## Uremic Pruritus

A refractory, distressing cutaneous itch affecting patients with advanced chronic kidney disease and end-stage renal disease on hemodialysis or peritoneal dialysis, related to immune dysregulation, microinflammation, peripheral neuropathy, and opioid receptor imbalance.

### Alternate Names:

Chronic Kidney Disease-Associated Pruritus; CKD-aP

---

### Uremic Stomatitis

Inflammation of the mouth caused by severe kidney failure and buildup of waste products. It may cause a bad taste, mouth soreness, white patches, ulcers, or bleeding gums and tongue.

### Ureter

One of two muscular tubes that carry urine from a kidney to the bladder. A stone or narrowing can block a ureter and cause severe side pain, swelling of the kidney, infection, or kidney damage.

### Ureteral Calculi

Stones that form in or pass through a ureter, the tube carrying urine from a kidney to the bladder.

### Ureteral Catheters

Thin tubes passed into a ureter to drain urine, inject contrast, measure pressure, or guide a procedure. Possible complications include infection, bleeding, a tear, movement of the tube, or blockage.

### Ureteral Injury During Gynecologic Surgery

Damage to a ureter during pelvic surgery, including transection, ligation, thermal injury, devascularization, or obstruction. It may cause flank pain, urine leakage, hydronephrosis, fever, or delayed kidney injury and requires prompt imaging and urologic management.

### Ureteral Obstruction

A blockage that prevents urine from flowing from a kidney to the bladder. It may cause side pain, infection, kidney swelling, or reduced kidney function. Common causes include stones, scar tissue, tumors, and pressure from nearby tissues.

### Ureteral Orifice

One of two slit-like mucosal openings situated at the posterolateral angles of the trigone of the urinary bladder through which urine from the ureters enters the bladder lumen, guarded by an oblique intramural muscular tunnel that acts as a functional physiological valve to prevent vesicoureteral reflux.

### Ureteral Perforation

A tear or hole in the ureter, sometimes caused by a stone, trauma, surgery, or an endoscopic procedure. Urine may leak into surrounding tissues, causing pain, infection, or inflammation; prompt imaging and urologic assessment are required.

### Ureteral Polyp

Usually a benign fibroepithelial growth arising from the ureter. It may cause hematuria, flank pain, or obstruction and must be distinguished from urothelial malignancy when evaluated.

### Ureteral Reimplantation

Surgery that moves the lower end of a ureter to a new opening in the bladder. It may be used to correct urine flowing backward, blockage, injury, or an abnormal ureter entry.

#### Alternate Names:

Ureteroneocystostomy; Ureteral Neoimplantation

### Ureteral Retrograde Brush Biopsy

A small brush passed through a thin camera into the ureter to collect cells from its lining. A laboratory examines the cells for cancer or other abnormal changes.

### Ureteral Stenosis

Narrowing of the ureter caused by scar tissue, prior surgery, radiation, stones, inflammation, or congenital disease, impairing urine drainage and possibly causing hydronephrosis or recurrent infection.

### Ureteral Stent

A thin tube placed inside the ureter to keep urine flowing from the kidney to the bladder when a stone, narrowing, tumor, or swelling blocks the passage. It can cause urinary urgency, discomfort, blood in the urine, infection, or mineral buildup and is usually temporary.

### Ureteral Stricture

Narrowing of the ureter caused by fibrosis, surgery, instrumentation, radiation, infection, malignancy, or congenital disease. It can produce upstream

---

hydronephrosis, pain, infection, and declining renal function.

### **Ureter Duplex**

A birth variation in which one kidney has two urine tubes instead of one. It may cause no problems but can lead to urine flowing backward, blockage, repeated infections, or poor drainage.

### **Ureter Fissus**

A birth difference in which a ureter is divided lengthwise or partly duplicated. It may cause no symptoms, but abnormal urine flow can lead to urine reflux, blockage, repeated infection, or poor kidney drainage.

### **Ureteric Bud**

An embryonic epithelial outgrowth arising from the posteromedial wall of the mesonephric (Wolffian) duct that invades the metanephric blastema, branching repeatedly to form the ureter, renal pelvis, major and minor calyces, and collecting duct system.

#### **Alternate Names:**

Metanephric Diverticulum

### **Ureteric Calculi**

Kidney stones that have moved into a ureter, the tube carrying urine from a kidney to the bladder. They can cause severe wave-like side pain, blood in the urine, nausea, blockage, or infection.

### **Ureteric Colic**

Severe, paroxysmal, agonizing flank and abdominal pain radiating anteriorly and inferiorly toward the ipsilateral groin, testicle, or labium majus, caused by acute smooth muscle spasm and proximal hydronephrotic distension from an obstructing urinary calculus (nephrolithiasis) in the ureter.

#### **Alternate Names:**

Renal Colic; Ureteral Calculus Pain

### **Ureteric Perforation**

A tear or hole in the ureter that can allow urine to leak into surrounding tissue, usually after instrumentation, surgery, trauma, or a stone; it needs

prompt urologic assessment.

### **Ureteritis**

Inflammation of the ureter, usually related to infection, obstruction, stone passage, instrumentation, or adjacent inflammatory disease. It may cause flank or abdominal pain, urinary symptoms, hematuria, and fever.

### **Ureter Obstruction**

Blockage of urine flow from a kidney to the bladder, commonly caused by a stone, stricture, tumor, or external compression and potentially leading to hydronephrosis, infection, or kidney injury.

### **Ureterocele**

A balloon-like dilation of the lower ureter where it enters the bladder, usually congenital; it can obstruct urine flow and cause infection, hydronephrosis, reflux, stones, or impaired renal function.

### **Ureterolithiasis**

A kidney stone located in the ureter, the tube from the kidney to the bladder. It can block urine and cause severe wave-like side pain, blood in the urine, nausea, infection, or kidney damage.

### **Ureteropelvic Junction Obstruction**

A blockage where the kidney's urine-collecting area joins the ureter. It may be present from birth or develop later and can cause kidney swelling, side pain, infections, stones, or loss of kidney function.

### **Ureteroscope**

A thin camera instrument passed through the urinary passage to examine the ureter and kidney. It can help remove stones, take tissue samples, or place a stent.

### **Ureteroscopes**

Small endoscopes used to inspect the ureter and renal collecting system and to perform procedures such as stone removal, biopsy, or stent placement.

---

## Ureteroscopy

Ureteroscopy uses a small endoscope passed through the urinary tract to inspect, biopsy, or treat ureteral or kidney stones and other lesions.

## Ureterostomy Procedure

Surgery that creates an opening from a ureter to the skin or another urinary conduit to divert urine when normal drainage to the bladder is impossible or must be bypassed.

## Urethra

The tube that carries urine from the bladder out of the body. In people with male reproductive anatomy it also carries semen; the shorter urethra in people with female reproductive anatomy makes bladder infections more likely.

## Urethra Disorder

A condition affecting the urethra, such as infection, inflammation, stricture, trauma, congenital abnormality, or tumor, that may cause pain, discharge, weak stream, or retention.

## Urethral Cancer

Cancer arising from the urethra, usually from its lining cells. It may cause blood in the urine, a lump, discharge, pain, or difficulty passing urine.

## Urethral Carcinoma

A rare cancer arising from the urethra that may cause bleeding, a lump, discharge, pain, or difficult urination; diagnosis requires examination, imaging, and biopsy.

## Urethral Caruncle

A benign, fleshy, vascular, exophytic polypoid outgrowth of the posterior margin of the external urethral meatus occurring almost exclusively in postmenopausal women due to chronic hypoestrogenism and local urethral prolapse, presenting with spotting, dysuria, or a tender reddish meatal nodule.

### Alternate Names:

Benign Meatal Vascular Polyp; Estrogen-Deficient Urethral Lesion

## Urethral Catheter

A tube inserted through the urethra into the bladder to drain urine, obtain a specimen, instill medication, or monitor output. Urinary infection and urethral trauma are important risks.

## Urethral Diverticulum

A pocket beside the urethra that connects with the urine tube, often developing after infection or blockage of nearby glands. It may cause burning urination, urine dribbling after voiding, repeated infections, pain during sex, or a vaginal-wall lump.

## Urethral Fistula

An abnormal channel between the urethra and another epithelial surface, often the vagina or skin. It can cause continuous urine leakage, recurrent infection, and local irritation.

## Urethral Hypermobility

Excessive movement of the urethra when abdominal pressure rises, contributing to urine leakage during coughing, lifting, or exercise.

## Urethral Infection

Infection involving the urethra, commonly caused by bacteria, including sexually transmitted organisms. Symptoms may include burning urination, discharge, frequency, or pelvic discomfort; testing and appropriate treatment help prevent complications and transmission.

## Urethral Injury

Damage to the urethra caused by trauma, a pelvic fracture, a penetrating wound, or a medical instrument. It may cause blood at the urethral opening, difficulty passing urine, bruising, or urine leakage into nearby tissues.

## Urethral Meatus

The external opening of the urethra through which urine leaves the body. Its position may be abnormal in conditions such as hypospadias or epispadias.

---

## Urethral Obstruction

Partial or complete blockage of urine leaving the bladder, often from stricture, stone, prostate disease, tumor, or a congenital valve. Acute retention can damage the bladder or kidneys.

## Urethral Pressure Profile

A test using a small catheter to measure pressure along the urethra and assess how well it closes. It may help investigate certain types of urine leakage or difficulty emptying the bladder.

## Urethral Prolapse

A circumferential eversion and protrusion of the distal urethral mucosa through the external urethral meatus, presenting as a reddish, doughnut-shaped or rosette-like congestion at the vulva, typically occurring in prepubertal Black girls or frail postmenopausal women.

### Alternate Names:

Urethral Mucosal Prolapse; Meatal Eversion

## Urethral Sling

A strip of synthetic material or the person's own tissue placed beneath the urethra to support it and reduce urine leakage during coughing, lifting, or exercise. Possible complications include urgency, difficulty urinating, infection, or erosion.

## Urethral Sphincter

Muscles around the urine tube that help keep urine from leaking and relax when a person urinates. Nerve or muscle damage can weaken control and cause leakage or difficulty emptying the bladder.

## Urethral Stenosis

Scar-related narrowing of the urethral channel that restricts urinary flow and can cause spraying, weak stream, recurrent infection, retention, or bladder damage.

## Urethral Stent

A small tube placed inside the urethra to help keep a narrowed or blocked segment open and allow urine to pass. Migration, blockage, infection, pain, or

tissue injury can occur.

## Urethral Stricture

A narrowing of the urethra, the tube that carries urine out of the body, usually caused by scar tissue. The narrowing can slow or block urine flow and may cause a weak or spraying stream, straining, pain with urination, dribbling, or incomplete bladder emptying. It can lead to repeated urinary infections, urinary retention, and, if severe or prolonged, damage to the bladder or kidneys. Causes include injury, infection, surgery, radiation, or previous use of a catheter or other instrument; sometimes no cause is found.

## Urethral Syndrome

Urinary frequency, urgency, dysuria, or discomfort without a clear bacterial urinary-tract infection; causes may include irritation, pelvic-floor dysfunction, or inflammation.

## Urethral Trauma

Injury to the urethra caused by a pelvic fracture, blunt or penetrating trauma, or medical instrumentation. It may cause bleeding, difficulty passing urine, bruising, or leakage of urine into nearby tissues.

## Urethral Discharge

Fluid or pus coming from the urethral opening. It may result from urethritis, including sexually transmitted infection, but can also follow irritation or injury and warrants appropriate medical assessment and testing.

## Urethritis

Inflammation of the urethra, often caused by infection, including sexually transmitted infections, but sometimes by irritation or injury. It can cause burning urination, itching, pelvic discomfort, or discharge.

## Urethrocele

Bulging or downward displacement of the urethra, usually into the front wall of the vagina. It may cause pressure, urinary leakage, difficulty emptying

---

the bladder, discomfort, or no symptoms.

### Urethrography

An X-ray test in which contrast liquid outlines the urethra, the tube carrying urine out of the body. It can show narrowing, leaks, injury, abnormal connections, or birth differences.

### Urethroplasty

Surgery that rebuilds or widens the urine tube, most often to treat a narrowing called a stricture. It may use nearby tissue or a graft and aims to improve urine flow.

### Urethroscopy

Examination of the urethra with a thin camera passed through its opening. It can identify narrowing, injury, inflammation, stones, tumors, or other abnormalities and may allow treatment during the same procedure.

### Urge Incontinence

Involuntary leakage of urine preceded immediately by a sudden, intense, compelling desire to void that is difficult to defer, resulting from involuntary detrusor muscle contractions (detrusor overactivity / overactive bladder) during the bladder filling phase.

#### Alternate Names:

Detrusor Overactivity Incontinence; Urgency Urinary Incontinence

### Urgency

A sudden, difficult-to-delay need to urinate. It may result from a urinary infection, bladder irritation, overactive bladder, a stone, nerve disease, prostate enlargement, or pelvic-floor problems.

### Urge Urinary Incontinence

Involuntary leakage of urine that follows a sudden, difficult-to-delay need to urinate. It may occur with overactive bladder, urinary infection, bladder irritation, nerve disease, or other urinary-tract problems.

### Uric Acid

A waste product formed when the body breaks down

purines. High blood levels can cause gout or kidney stones, although many people with high levels have no symptoms.

### Uric Acid Nephrolithiasis

The formation of pure uric acid urinary stones resulting from chronic acidic urine (urine pH less than 5.5), hyperuricosuria, and low urine volume, which appear radiolucent on plain abdominal radiographs but are readily visualized as hyperdense calculi on non-contrast CT.

#### Alternate Names:

Uric Acid Calculi; Radiolucent Kidney Stones

### Uric Acid Nephropathy

Kidney injury caused when too much uric acid forms crystals in the kidney's small tubes. It can occur during rapid breakdown of cancer cells or severe uric-acid excess.

### Uric Acid Stones

Kidney stones composed primarily of uric acid. They form more readily in acidic urine and are associated with hyperuricemia, gout, high purine intake, or chronic diarrhea. Some can dissolve when urine is alkalinized.

### Uric Acid Urine Test

A urine test measuring uric acid excretion, used in evaluation of gout, kidney stones, uric-acid overproduction, and selected metabolic disorders.

### Uricosuric Drug

A medicine that increases renal excretion of uric acid, such as probenecid, used in selected patients with gout.

### Uridine Triacetate

An oral prodrug that supplies uridine and is used as an emergency antidote for severe or life-threatening toxicity from fluorouracil or related fluoropyrimidines, under specialist direction.

### Urinal

A portable container used to collect urine from

---

someone who cannot easily reach a toilet. It should be emptied, cleaned, and stored safely to reduce spills, odor, and infection risk.

## Urinalysis

Laboratory examination of urine for its appearance, acidity, blood, cells, protein, sugar, ketones, bacteria, and other substances. It can provide clues to infection, kidney disease, bleeding, diabetes, dehydration, and other illness.

## Urinary

Relating to urine or to the organs and processes involved in making, storing, and passing urine, including the kidneys, ureters, bladder, and urethra.

## Urinary Anion Gap

A calculation using urine sodium, potassium, and chloride levels. It can help doctors assess how the kidneys are handling acid during some types of blood acidosis. The result is only one part of the assessment and cannot by itself identify the cause.

### Alternate Names:

UAG; Urine Net Charge

## Urinary Bladder

A hollow muscular organ in the lower abdomen that stores urine until it is released through the urethra.

## Urinary Bladder Disorder

A disease affecting bladder storage or emptying, including infection, overactivity, pain syndrome, stones, tumor, neurologic dysfunction, or outlet obstruction.

## Urinary Bladder Squamous Cell Carcinoma Pathology

An invasive malignant squamous neoplasm of the bladder showing keratinization, intercellular bridges, or both. It may be associated with chronic irritation, infection, stones, or schistosomiasis and is assessed for depth of invasion.

## Urinary Calculi

Stones formed from crystallized minerals in the urinary tract. They may cause colicky pain, hematuria, obstruction, infection, or kidney injury depending on their size and location.

## Urinary Casts

Small tube-shaped particles formed inside kidney tubules and passed in urine. Their appearance can provide clues about kidney inflammation, bleeding, infection, or damage.

## Urinary Catheter

A hollow, flexible tube inserted through the urethra into the bladder to drain urine; it may be used intermittently or left in place.

## Urinary Catheterization

Insertion of a tube into the bladder to drain urine, measure output, obtain a specimen, or deliver treatment; infection, trauma, and blockage are possible complications.

## Urinary Catheters

Urinary catheters drain the bladder when a person cannot empty it normally or accurate urine measurement is needed, with risks including infection, trauma, blockage, and discomfort.

## Urinary Diversion

Surgical or catheter-based rerouting of urine when the normal passage from the kidneys to the urethra cannot be used, often to a stoma or bowel reservoir.

## Urinary Fistula

An abnormal connection between part of the urinary tract and another organ or the skin, allowing urine to leak outside its normal pathway. Causes include surgery, childbirth injury, inflammation, and cancer.

## Urinary Frequency

The need to urinate more often than usual, which may result from infection, bladder irritation, increased urine production, or other urinary disorders.

---

## Urinary Hesitation

Difficulty starting or maintaining urination, which may result from prostate enlargement, urethral narrowing, medications, nerve disorders, pain, or impaired bladder contraction.

## Urinary Incontinence

Unwanted leakage of urine. It may happen with coughing or exercise, a sudden strong urge, an overfull bladder, difficulty reaching the toilet, or nerve and muscle problems. More than one pattern may occur in the same person.

### Alternate Names:

Involuntary Urination; Loss of Bladder Control; Enuresis

## Urinary Lithiasis

The formation or presence of stones anywhere in the urinary tract, including the kidneys, ureters, bladder, or urethra.

## Urinary Retention

Inability to empty the bladder fully. It may be sudden and painful or develop gradually with a weak stream, frequent small amounts of urine, or leakage from an overfull bladder. Blockage, medicines, nerve problems, or weak bladder muscles can cause it.

## Urinary Retraining

Scheduled toilet visits and bladder-control techniques used to reduce urgency, frequent urination, or leakage. A clinician may combine it with pelvic-floor exercises, fluid changes, or treatment of the underlying cause.

## Urinary Stasis

Slowing or stopping of normal urine flow, which can promote urinary infection, stone formation, or obstruction-related kidney injury.

## Urinary System

The kidneys, ureters, bladder, and urethra. Together they filter blood, make and transport urine, store and remove it, and help regulate fluid volume, electrolytes, acid-base balance, blood pressure, and

hormone-related functions such as red-cell production.

## Urinary Tract

The kidneys, ureters, bladder, and urethra. Together these organs make urine, carry it to the bladder, store it, and remove it from the body.

## Urinary Tract Disorder

Any disease of the kidneys, ureters, bladder, or urethra, including infection, stones, obstruction, congenital abnormalities, cancer, and functional or neurologic disorders.

## Urinary Tract Imaging

Imaging tests used to examine the kidneys, ureters, bladder, and urethra. Methods include ultrasound, X-ray studies, computed tomography, magnetic resonance imaging, and nuclear scans, chosen according to the suspected problem.

## Urinary Tract Infection

Infection of the urinary tract, classified as lower infection such as cystitis or urethritis, or upper infection such as pyelonephritis. Symptoms vary; dysuria, frequency, urgency, fever, flank pain, or nausea may occur. *Escherichia coli* is a common cause, but organisms vary by setting and patient factors.

## Urinary Tract Infection In Adults

A urinary infection in an adult involving the bladder, urethra, kidneys, or another part of the urinary tract. Symptoms vary by site and may include painful urination, frequency, urgency, blood in the urine, fever, or flank pain.

## Urinary Tract Infection In Children

A urinary infection in a child involving the bladder, kidneys, ureters, or urethra. Symptoms may include fever, painful or frequent urination, new wetting, abdominal or back pain, vomiting, or unusual irritability.

### Alternate Names:

Pediatric UTI; Childhood Cystitis

---

## Urinary Tract Infection In Pregnancy

A urinary infection or asymptomatic bacterial growth occurring during pregnancy. Pregnancy increases the risk of upper urinary infection, so screening and treatment follow pregnancy-specific clinical guidance.

## Urinary Tract Infections in Pregnancy

Bacterial infection of the urethra, bladder, or kidneys during pregnancy. Even asymptomatic bacteriuria can progress to pyelonephritis, preterm birth, or sepsis, so screening, culture-directed pregnancy-safe treatment, and follow-up are important.

## Urinary Tract Neoplasm

A benign or malignant growth in the kidneys, ureters, bladder, or urethra; evaluation depends on its site, symptoms, tissue type, and extent of spread.

## Urinary Tract Obstruction

An anatomical or functional impediment to the normal antegrade flow of urine along the urinary tract from the renal calyces to the urethral meatus, predisposing to hydronephrosis, postrenal acute kidney injury, urinary stasis, and urosepsis.

## Urinary Urgency

A sudden, difficult-to-delay need to urinate. It may occur with urinary infection, bladder irritation, overactive bladder, stones, neurologic disease, or other conditions. Urgency with fever, flank pain, blood in the urine, or inability to urinate requires medical assessment.

## Urination

The process of releasing urine from the bladder through the urethra and out of the body.

### Alternate Names:

Micturition; Voiding

## Urination Disorder

Abnormal storage or emptying of urine causing frequency, urgency, dysuria, incontinence, hesitancy, weak stream, retention, or excessive or reduced urine

output.

## Urine

The liquid waste produced by the kidneys, containing water and dissolved substances eliminated from the blood.

## Urine 24-Hour Volume

Twenty-four-hour urine volume is the total urine produced in a day and helps assess hydration, kidney function, endocrine disease, or abnormal urine production.

## Urine Albuminuria

An abnormal amount of the blood protein albumin in urine. Persistent albumin loss can be an early sign of kidney disease and also increases the risk of worsening kidney function and cardiovascular disease.

## Urine Alkalinization

Treatment that makes urine less acidic, usually with a carefully monitored medicine, to help remove certain poisons such as salicylate. It can disturb body salts or fluid balance and is used only for selected cases.

## Urine Amylase Test

A urine test that measures the amount of amylase passed from the body. It may help assess pancreatitis, salivary-gland problems, or unusually high amylase levels in the blood.

### Alternate Names:

Urine Amylase; Urinary Amylase Test; Amylase Urine Test

## Urine Analysis

Laboratory testing of urine for blood, cells, protein, sugar, microbes, and other clues to illness. It can help assess urinary infection, kidney disease, diabetes, dehydration, and other conditions.

## Urine Bilirubin Test

A clinical urinalysis that detects conjugated (water-soluble) bilirubin in urine. A positive result indi-

---

cates hepatobiliary disease, hepatocellular injury, or biliary tract obstruction; unconjugated bilirubin is bound to albumin and does not filter into urine.

**Alternate Names:**

Urine Bilirubin; Urinary Bilirubin Test

**Urine Calcium Test**

A diagnostic urinalysis quantifying urinary calcium excretion, typically measured in a 24-hour urine collection. It is utilized in the evaluation and metabolic workup of nephrolithiasis, hyperparathyroidism, osteomalacia, and idiopathic hypercalciuria.

**Alternate Names:**

Urinary Calcium; 24-Hour Urine Calcium; Urine Calcium Excretion

**Urine Catecholamine Test**

A diagnostic biochemical assay measuring 24-hour urinary excretion of epinephrine, norepinephrine, dopamine, and their metanephrine metabolites to diagnose neuroendocrine tumors such as pheochromocytoma, paraganglioma, and neuroblastoma.

**Alternate Names:**

24-Hour Urine Catecholamines; Urinary Catecholamines; Fractionated Urinary Catecholamines

**Urine Chemistry**

Measurement of chemical constituents in urine, such as glucose, protein, electrolytes, ketones, blood, and pH, to evaluate kidney function and systemic disease.

**Urine Chloride Test**

A diagnostic urinalysis quantifying urinary chloride excretion, crucial in differentiating chloride-responsive (e.g., vomiting, diuretic use) from chloride-resistant (e.g., hyperaldosteronism) metabolic alkalosis.

**Alternate Names:**

Urinary Chloride; Urine Chloride Excretion; Spot Urine Chloride

**Urine Concentration Test**

A test of the kidney's ability to concentrate urine, assessed by urine osmolality or specific gravity after

controlled fluid conditions when appropriate.

**Urine Conductivity**

Urine conductivity measures how readily urine carries electrical current and reflects its dissolved electrolyte and solute concentration.

**Urine Culture**

A laboratory test that grows microorganisms from a urine specimen to identify urinary-tract infection and guide antimicrobial selection. Results may report the organism, quantity of growth, and antimicrobial susceptibility. Proper collection is important because contamination can produce misleading growth; results must be interpreted with symptoms and urinalysis.

**Urine Cytology**

Microscopic examination of cells shed into urine, mainly used to help detect high-grade urothelial carcinoma and some other abnormalities. A negative result does not exclude all urinary-tract cancers.

**Urine Dipstick**

A rapid, point-of-care biochemical test consisting of a plastic strip with reagent pads that undergo colorimetric changes upon chemical reaction with urine, screening for leukocytes, nitrite, urobilinogen, protein, pH, blood, specific gravity, ketones, bilirubin, and glucose.

**Urine Drainage Bags**

Urine drainage bags collect urine from a catheter or urinary diversion and require correct positioning, emptying, hygiene, and monitoring for blockage or infection.

**Urine Electrolytes Test**

A diagnostic urinalysis measuring the concentrations of sodium, potassium, and chloride in urine to evaluate acute kidney injury, dehydration, electrolyte imbalances, and acid-base disturbances.

**Alternate Names:**

Urinary Electrolytes; Spot Urine Electrolytes; 24-Hour Urine Electrolytes

---

## Urine Formation

The process by which the kidneys make urine: they filter blood, return needed water and substances to the body, and add selected wastes and extra ions to the fluid that leaves as urine.

## Urine HCG Test

A urine test that detects human chorionic gonadotropin, a hormone produced during pregnancy. Testing too early or using diluted urine can give a false-negative result; a positive result confirms pregnancy but does not show its location or health.

### Alternate Names:

Urine hCG Test; Gravidex Test

## Urine Hemoglobin

Hemoglobin detected in urine, which may reflect intravascular hemolysis or contamination with intact red blood cells. Interpretation requires comparison with urine microscopy and clinical findings.

## Urine Immunoelectrophoresis

A specialized clinical laboratory test that separates urinary proteins by agarose gel electrophoresis followed by immunodiffusion with monospecific antibodies. Primarily utilized to identify and characterize monoclonal light chains (Bence Jones proteins) in plasma cell dyscrasias such as multiple myeloma.

### Alternate Names:

Urine IEP; Urinary Protein Immunoelectrophoresis; Urine Immunofixation Electrophoresis

## Urine Immunofixation

An immunochemical laboratory technique combining high-resolution electrophoresis with specific antibody precipitation to identify and type monoclonal free light chains (kappa or lambda) and intact immunoglobulins excreted in urine.

### Alternate Names:

Urine IFE; Urinary Immunofixation Electrophoresis; Bence Jones Protein IFE

## Urine Osmolality

A measure of how concentrated urine is. It helps assess whether the kidneys can conserve or remove

water and must be interpreted with fluid intake, medicines, kidney function, and blood tests.

## Urine PH

A measurement of urine acidity or alkalinity. It varies with diet, metabolism, medications, infection, and kidney function and can influence the formation of some urinary stones.

## Urine PH Test

A test measuring urine acidity or alkalinity, useful in evaluating acid-base handling, urinary infection, kidney stones, and some metabolic conditions.

## Urine Protein Dipstick Test

A screening test using a reagent strip to detect mainly albumin in urine; positive results require confirmation and quantitative assessment when clinically indicated.

## Urine Protein Electrophoresis Test

A laboratory test that separates urine proteins by electrical charge and size to help detect abnormal proteins, including monoclonal light chains associated with plasma-cell disorders.

## Urine Retention

Alternate name; see *Urinary Retention*.

## Urine Sediment

The cells, crystals, casts, and other particles seen under a microscope after urine is concentrated. Their appearance can provide clues to bleeding, infection, stones, or kidney inflammation.

## Urine Sodium

The amount of sodium in urine. It can help assess fluid balance and kidney handling of salt, but results are strongly affected by diet, medicines, hydration, and the timing of the sample.

## Urine Specific Gravity Test

A test comparing the density of urine with the density of water. It gives a rough estimate of how concentrated the urine is and can help assess hydra-

---

tion and the kidneys' ability to conserve water.

### **Urine Toxicology**

Laboratory analysis of urine for medicines, drugs, or their metabolites. Results require interpretation because detection does not always establish impairment or the timing of exposure.

### **Urinoma**

An encapsulated or non-encapsulated extravasation of urine into the retroperitoneal space or perirenal tissues, resulting from traumatic rupture or iatrogenic instrumentation injury to the renal pelvis, calyces, or ureter.

#### **Alternate Names:**

Urine Pseudocyst

### **Urinometer**

An instrument that measures how dense urine is compared with water. The result gives an estimate of urine concentration and may help assess hydration or the kidney's ability to conserve water.

### **URI (Upper Respiratory Infection)**

URI usually means upper respiratory infection, commonly a viral infection of the nose, throat, or upper airways causing congestion, cough, and sore throat.

### **Urobilinogen**

A colourless product formed in the intestine from bilirubin and partly reabsorbed and excreted in urine; abnormal levels may provide clues to liver disease or haemolysis.

### **Urodynamics**

A group of tests that measures how the bladder stores urine, how pressure changes as it fills, and how the urethra and bladder release urine. It helps investigate leakage, urgency, weak stream, or difficulty emptying when simpler tests are inconclusive.

### **Urodynamic Testing**

A group of tests that measures how the bladder and urethra store and release urine. It can help explain leakage, urgency, difficulty emptying, or repeated

retention when simpler tests do not identify the cause.

### **Uroflow**

A test that measures how quickly and steadily urine leaves the body during urination. The result can suggest blockage, weak bladder muscles, or other emptying problems, but it is interpreted with symptoms and sometimes additional tests.

### **Uroflowmetry**

A noninvasive test measuring how fast and steadily urine leaves the body. A low or abnormal flow may reflect blockage, weak bladder contraction, or an incomplete test and must be interpreted with symptoms and other findings.

### **Urogenital**

Relating to the urinary and reproductive systems or structures involving both. The term may describe organs, infections, cancers, birth conditions, injuries, symptoms, tests, or treatments affecting these closely connected body systems.

### **Urogenital Fistula**

An abnormal connection between the urinary and genital tracts, such as a vesicovaginal or ureterovaginal fistula. It commonly causes continuous urinary leakage and requires specialist evaluation.

### **Urogenital Sinus**

A birth-related abnormality in which the urethra and vagina join into a common channel before reaching the outside of the body. It may occur with differences in the external genitalia, urinary tract, or reproductive organs.

### **Urogenital System**

The related urinary and reproductive organs and their associated ducts, vessels, and supporting tissues. The systems share developmental origins and anatomic relationships.

### **Urogenital Tract**

The combined urinary and reproductive organs and

---

passages. These include kidneys, urine tubes, bladder, urethra, reproductive organs, and connected structures that develop partly from related tissues before birth.

### **Urography**

Imaging of the urinary tract, traditionally using X-rays after contrast dye is given. It can show the kidneys, urine tubes, bladder, narrowing, stones, leaks, blockage, or other structural problems.

### **Urokinase**

A plasminogen activator produced by the body and also used as a thrombolytic medicine to help dissolve blood clots.

### **Urolithiasis**

Formation of stones in the urinary tract, including the kidneys, ureters, bladder, or urethra. Stone composition varies by population and may include calcium oxalate, calcium phosphate, uric acid, struvite, or cystine.

### **Urologic Diagnostic Yield**

The proportion of urinary-system tests or procedures that provide a clear, useful diagnosis. A test may have a low yield when the sample is too small, the disease is difficult to detect, or the result does not change care.

### **Urologist**

A doctor who specializes in the urinary system and, in many practices, the male reproductive system. Urologists diagnose and treat kidney stones, infections, urine leakage, prostate problems, cancers, infertility, and conditions requiring procedures or surgery.

### **Urology**

The medical specialty that diagnoses and treats diseases of the kidneys, urine tubes, bladder, and urethra, as well as the male reproductive organs. Treatment may include medicines, procedures, or surgery.

### **Uropathy**

Disease or damage affecting the kidneys or urinary tract. Blockage, infection, stones, urine flowing backward, medicines, and other conditions can cause it and may reduce kidney function.

### **Urosepsis**

A life-threatening whole-body response to a severe urinary infection. It may start in the bladder or kidney and cause fever or low temperature, confusion, low blood pressure, reduced urine, organ failure, or shock.

### **Urostomy Leak**

Escape of urine beneath or around a urostomy appliance or from a surgical connection. Persistent leakage can irritate the skin and may signal poor appliance fit, obstruction, infection, or a surgical complication.

### **Urostomy Procedure**

Surgery that diverts urine through a stoma into an external pouch or conduit, commonly after bladder removal or when the lower urinary tract cannot safely transport urine.

### **Urostomy Prolapse**

Protrusion of a segment of bowel used as a urostomy stoma beyond its usual level. It may cause bleeding, swelling, appliance problems, or impaired urine drainage and should be assessed clinically.

### **Urostomy Stenosis**

Narrowing of a urinary stoma or conduit that impedes drainage, causing reduced urine output, leakage, infection, or kidney-pressure changes and sometimes requiring revision.

### **Urothelial Carcinoma**

A cancer arising from the stretchable lining of the urinary tract, most often the bladder but also the kidney's drainage area, ureters, or urethra. Blood in the urine is common, and treatment depends on location, depth, grade, and spread.

---

## Upper Tract Urothelial Carcinoma

Tumors arising from the urothelial lining of the upper urinary tract. Blood in the urine, flank pain, obstruction, or incidental imaging findings may occur; urine cytology, imaging, ureteroscopy, and tissue assessment guide diagnosis and treatment.

## Urothelium

A specialized stretchable lining of the renal pelvis, ureters, bladder, and part of the urethra. It forms a protective barrier between urine and underlying tissues and allows the bladder to expand.

## Urotrauma

Injury to the urinary or genital organs, including the kidneys, ureters, bladder, urethra, or external genitalia. It may result from blunt force, penetrating wounds, fractures, surgery, or medical instruments.

## Ursodeoxycholic Acid

A hydrophilic bile acid used for primary biliary cholangitis and selected cholestatic liver diseases; it may also dissolve certain small cholesterol gallstones when bile flow is preserved.

## Urticaria

A skin reaction causing transient, itchy raised welts that change location and usually resolve within 24 hours. It may occur with angioedema, which is deeper swelling often affecting the lips, eyelids, tongue, or extremities.

## Urticarial Vasculitis

Inflammation of small blood vessels causing hive-like patches that usually last longer than 24 hours and may burn, bruise, or leave dark marks. It can be limited to the skin or linked with joint, kidney, lung, or other disease.

## Urticaria Multiforme

A short-lived allergic-type rash in children that causes widespread, ring-shaped or target-like raised patches, often with swelling of the hands, feet, or face. It may follow an infection or medicine and usually fades without scarring.

## Urticaria Pigmentosa

A skin condition in which too many mast cells collect in the skin, causing tan or brown spots or bumps that swell and itch when rubbed. Flushing or other body-wide symptoms can occur.

## Usher Syndrome

An inherited condition causing hearing loss together with gradually worsening vision from retinal disease. The age and severity vary by type; hearing, vision, balance, communication, and genetic support may all be needed.

## Ustekinumab

A biologic medicine that blocks immune signals involved in inflammation. It is used for psoriasis, psoriatic arthritis, Crohn disease, ulcerative colitis, and other approved conditions; infections and allergic reactions are important risks.

## Usual Interstitial Pneumonia

A pattern of permanent scarring in the lungs, often seen in idiopathic pulmonary fibrosis. Scarring is usually greatest near the outer and lower parts of the lungs and can form small spaces called honeycombing. It causes increasing breathlessness and cough and is assessed with lung tests and CT imaging.

## Usual Interstitial Pneumonia Pathology

A patchy, temporally heterogeneous interstitial fibrosing pattern with subpleural or paraseptal fibrosis, fibroblastic foci, architectural distortion, and honeycomb change. Clinical and radiologic correlation is required.

## Ut Dict.

An abbreviation of the Latin phrase “ut dictum,” meaning “as stated” or “as directed.” In medical notes it refers the reader to information already given or to an instruction previously specified.

## Uterine Adnexae

The structures beside and connected to the uterus, mainly the fallopian tubes, ovaries, and supporting tissues. Problems in these structures can cause pelvic pain, abnormal bleeding, infertility, or an

---

ectopic pregnancy.

### **Uterine Artery Embolization**

A minimally invasive procedure that blocks blood flow to uterine fibroids so they shrink. It can reduce heavy bleeding and pelvic pressure, but may cause pain, infection, or effects on fertility and future pregnancy.

### **Uterine Atony**

Failure of the uterus to contract effectively after childbirth, causing heavy postpartum bleeding. It is the most common cause of postpartum hemorrhage and may be managed with medicines, uterine massage, procedures, or surgery, depending on severity and response.

#### **Alternate Names:**

Postpartum Uterine Atony

### **Uterine Balloon Tamponade**

A treatment for severe bleeding after childbirth when medicines do not control bleeding. A soft balloon is placed inside the uterus and filled with sterile fluid to press against the uterine wall and slow or stop blood loss while other treatment is arranged.

### **Uterine Bleeding**

Bleeding from the uterus outside the expected menstrual pattern or in an abnormal amount. Causes include pregnancy complications, fibroids, polyps, hormonal changes, medicines, infection, and cancer; heavy or postmenopausal bleeding can have an underlying medical cause.

### **Uterine Cancer**

Cancer arising in the uterus, most commonly from the endometrium. Abnormal vaginal bleeding, bleeding after menopause, pelvic pain, or unusual discharge requires evaluation; early diagnosis often permits effective treatment.

### **Uterine Cavity**

The hollow space inside the uterus, lined by the endometrium. A fertilized egg normally implants in this lining, which thickens during the menstrual

cycle and supports pregnancy; polyps, fibroids, scar tissue, or abnormal shape may affect it.

### **Uterine Compression Suture**

A surgical hemostatic technique (exemplified by the B-Lynch, Hayman, or Cho suture) in which heavy absorbable sutures are placed through the uterine wall to mechanically compress the anterior and posterior walls of an atonic uterus, controlling refractory postpartum hemorrhage while preserving future fertility.

#### **Alternate Names:**

B-Lynch Suture; Uterine Bracing Suture

### **Uterine Contraction**

Tightening of the uterine muscle. Contractions normally occur during menstruation and labor, but painful or unusually frequent contractions can occur with pregnancy complications, dehydration, infection, or medicines and may require assessment.

### **Uterine Diseases**

Conditions affecting the womb, including fibroids, adenomyosis, endometriosis, infection, unusual bleeding, prolapse, and cancer. Symptoms may include pain, heavy periods, infertility, pressure, discharge, or bleeding after menopause.

### **Uterine Fibroid**

A benign tumor arising from the smooth muscle of the uterus. Fibroids may be submucosal, intramural, or subserosal and may cause heavy menstrual bleeding, pelvic pressure, pain, urinary symptoms, or reproductive problems.

#### **Alternate Names:**

Uterine Myoma; Fibromyoma

### **Uterine Fibroid Embolization**

A minimally invasive procedure in which particles block blood flow to uterine fibroids, causing them to shrink. It can reduce heavy bleeding and pressure symptoms but may cause pain, infection, or effects on fertility.

---

## Uterine Fibroids

Benign tumors of uterine smooth muscle, also called leiomyomas. They may cause heavy menstrual bleeding, pelvic pressure, pain, infertility, or no symptoms.

### Alternate Names:

Uterine Leiomyomata; Uterine Myomas; Fibromyomas

## Uterine Fistula

A uterine fistula is an abnormal passage connecting the uterus with another organ or the skin, often after surgery, childbirth injury, infection, or cancer.

## Uterine Fornix

One of the shallow spaces at the top of the vagina surrounding the cervix. A clinician can examine these spaces during a pelvic examination, and selected procedures may use them as an access route.

## Uterine Gland

A small gland in the lining of the uterus that produces fluid and helps support the early embryo. Its activity changes during the menstrual cycle and pregnancy.

## Uterine Growths

Uterine growths may include fibroids, polyps, adenomyosis, or rarely cancer. They can cause heavy or irregular bleeding, pelvic pressure, pain, infertility, or no symptoms; examination and imaging determine the type and treatment.

## Uterine Hemorrhage

Heavy or abnormal bleeding from the uterus, occurring during pregnancy, after childbirth, or at other times. Causes include pregnancy complications, fibroids, hormonal disorders, and malignancy; severe bleeding with dizziness or weakness is an emergency.

## Uterine Inversion

A rare, life-threatening complication of childbirth in which the uterus turns partly or completely inside out and may protrude into or beyond the vagina. It can cause severe bleeding, shock, and intense pain.

Treatment restores the uterus and controls blood loss.

## Uterine Leiomyoma

A benign tumor of uterine smooth muscle that may cause heavy menstrual bleeding, pelvic pressure, pain, or no symptoms.

### Alternate Names:

Fibroid

## Uterine Leiomyosarcoma

A rare malignant tumor of uterine smooth muscle that may cause abnormal bleeding, pelvic pain, or an enlarging mass; diagnosis is based on tissue examination and staging.

## Uterine Monitoring

Recording how often, how long, and how strongly the uterus contracts. During labor it helps assess progress, response to induction medicines, and excessive contractions that could affect the baby.

## Uterine Myomectomy

Surgical removal of uterine fibroids while preserving the uterus; it may be performed through hysteroscopy, laparoscopy, or open surgery depending on fibroid size and location.

## Uterine Obstruction

Blockage that prevents normal passage through the uterus or cervix, which may cause menstrual outflow obstruction, infertility, pregnancy complications, or retained blood or tissue.

## Uterine Perforation

A hole through the wall of the uterus, most often caused by an instrument used during a procedure such as hysteroscopy or removal of uterine tissue. It can cause internal bleeding or injury to nearby organs and may need repair.

## Uterine Polyps

Growths arising from the inner lining of the uterus that may cause irregular bleeding, heavy periods, or fertility problems.

---

**Alternate Names:**

Endometrial Polyps; Intrauterine Polyps

**Uterine Prolapse**

Descent of the uterus toward or through the vaginal opening because pelvic-floor muscles and supporting tissues have weakened. It may cause pelvic pressure, a bulge, backache, urinary or bowel problems, or discomfort during sex; childbirth and aging increase risk.

**Alternate Names:**

Descensus Uteri; Pelvic Organ Prolapse; Uterine Herniation

**Uterine Rupture**

A complete tear through the wall of the uterus, usually during pregnancy or labor. It can cause severe internal bleeding and reduce the baby's oxygen supply; previous cesarean surgery is an important risk factor.

**Uterine Rupture in Pregnancy**

A tear through the uterine wall, most often during labor in a scarred uterus but sometimes in an unscarred uterus. Sudden pain, bleeding, fetal heart-rate abnormality, loss of station, or maternal shock may occur; emergency surgery is required.

**Uterine Sarcoma**

Uterine sarcoma is a rare malignant tumor arising from uterine muscle, connective tissue, or related cells and may cause bleeding, pain, or an enlarging mass.

**Uterine Tachysystole**

More than five contractions in 10 minutes, averaged over 30 minutes during labor. Very frequent contractions can reduce the baby's oxygen supply, especially after labor medicines, and may require prompt treatment adjustment.

**Uterine Tube**

A paired muscular tube that transports the oocyte from the ovary toward the uterus and is the usual site of fertilization.

**Uterine Tumors**

Alternate name; see *Uterine fibroids*.

**Utero-Ovarian Ligament**

A band of tissue connecting each ovary to the uterus. It helps hold the ovary in position within the pelvis and lies near the fallopian tube and other pelvic supporting tissues.

**Alternate Names:**

Ovarian Ligament; Proper Ovarian Ligament

**Uteroplacental Insufficiency**

Inadequate maternal blood flow and nutrient delivery across the intervillous spaces of the placenta to the developing fetus, resulting from defective spiral artery remodeling, maternal vascular disease, or placental infarction; the primary cause of fetal growth restriction and intrapartum late decelerations.

**Alternate Names:**

Placental Insufficiency

**Uterosacral Ligament**

One of two strong bands of tissue supporting the uterus and top of the vagina by attaching them toward the sacrum at the back of the pelvis. Weakness can contribute to pelvic-organ prolapse; endometriosis can also affect or cause pain in this area.

**Uterus**

A hollow muscular organ in the pelvis between the bladder and rectum. Its inner lining thickens to prepare for pregnancy and is shed during menstruation. A fertilized egg normally implants in this lining, and a fetus develops in the uterus during pregnancy.

**Common name:** Womb

**Uterus Didelphys**

A congenital condition in which two separate uteruses develop, often with two cervixes and a dividing wall in the vagina. Many people can become pregnant, but miscarriage, premature birth, abnormal fetal position, or other pregnancy complications are more common.

**Alternate Names:**

Double Uterus; Didelphic Uterus

---

## Uterus Disorder

A condition affecting the uterus, including fibroids, adenomyosis, endometriosis, infection, abnormal bleeding, congenital anomalies, prolapse, and cancer.

## Uterus Neoplasm

A benign or malignant growth arising in the uterus, including fibroids, endometrial cancer, and sarcomas; diagnosis depends on examination, imaging, and tissue sampling.

## UTI

Alternate name; see *Urinary Tract Infection*.

## Utricle

A small balance organ in the inner ear that senses head position and movement in a straight line, such as forward, backward, or side-to-side motion.

## Uvea

The middle layer of the eye, made up of the iris, ciliary body, and choroid. It controls the amount of light entering the eye, helps focus vision, and supplies blood to eye tissues.

## Uveal Disease

A disorder of the iris, ciliary body, or choroid, including uveitis, tumors, vascular disease, and inflammation that may cause eye pain, photophobia, floaters, or visual loss.

## Uveal Melanoma

The most common primary cancer inside the adult eye. It begins in pigment-producing cells of the iris, ciliary body, or choroid and may cause visual changes or be found during an eye examination; it can spread to other organs.

## Uveal Neoplasm

A tumor arising in the uveal tract of the eye—the iris, ciliary body, or choroid; malignant melanoma may threaten vision and spread to distant organs.

## Uveitic Glaucoma

Secondary open-angle or closed-angle glaucoma caused by active intraocular inflammation (anterior uveitis); elevated intraocular pressure results from inflammatory cell and debris trabecular meshwork obstruction (trabeculitis), posterior synechiae causing pupillary block (iris bombé), or topical corticosteroid therapy.

### Alternate Names:

Inflammatory Glaucoma; Secondary Uveitic Ocular Hypertension

## Uveitis

Inflammation of the uveal tract—the iris, ciliary body, and choroid—and sometimes nearby eye tissues. It may result from infection, autoimmune or other inflammatory disease, trauma, or an unknown cause. Symptoms can include eye pain, redness, light sensitivity, floaters, blurred vision, or reduced vision; prompt eye assessment is important because untreated inflammation can damage vision.

### Alternate Names:

Intraocular Inflammation; Iritis; Cyclitis

## Uveoparotid Fever

A form of sarcoidosis causing fever, swelling of both parotid glands near the ears, and inflammation in the front of the eyes. It may also cause facial-nerve weakness; treatment depends on the organs affected and severity.

## UV Light

Ultraviolet radiation, an invisible part of sunlight or artificial light that can affect the skin and eyes and may cause sunburn, aging, or skin cancer.

## Uvula

A small, soft flap hanging from the back of the roof of the mouth. It helps with swallowing and speech; swelling can cause gagging, pain, snoring, or difficulty breathing.

## Uvulitis

Inflammation and swelling of the uvula, the small tissue hanging at the back of the throat. Infection, allergy, injury, dehydration, or irritation may

---

cause it; severe swelling or breathing difficulty can threaten the airway.

### **Uvulopalatopharyngoplasty**

An operation that removes or reshapes parts of the soft palate, the hanging uvula, and the throat to widen the breathing passage. It may help selected people with obstructive sleep apnea, but can cause pain, swallowing changes, bleeding, or recurrence.

### **U Wave**

A small wave that may appear after the T wave on an electrocardiogram. A prominent U wave can occur with low potassium, a slow heart rate, or some medicines and must be interpreted with the complete tracing and clinical findings.

### **Underactive Thyroid**

Alternate name; see *Hypothyroidism*.

### **Urinary Tract Infection (UTI)**

Alternate name; see *Urinary Tract Infection*.

### **Ureteral Stones**

Stones lodged in a ureter, the tube carrying urine from a kidney to the bladder. They may cause severe wave-like flank or groin pain, blood in the urine, nausea, blockage, or infection and sometimes need urgent treatment.

### **Uterine Polyp**

A growth arising from the inner lining of the uterus. Many are benign, but they can cause irregular or heavy bleeding, bleeding after menopause, or infertility and may require imaging, sampling, or removal.

### **Universal Precautions**

Infection-control practices that treat blood and certain body fluids as potentially infectious, regardless of a person's diagnosed condition. They include hand hygiene, appropriate gloves and protective barriers, safe sharps handling, and measures to prevent exposure to bloodborne pathogens.

### **Urostomy**

A surgically created opening that diverts urine from the urinary tract through the abdominal wall into an external pouch or appliance. It may be formed with a segment of intestine after bladder removal or when normal urinary drainage is not possible.

### **Ultrasound Scan**

Alternate name; see *Ultrasound*.

### **Ulcerative Colitis (UC)**

Alternate name; see *Ulcerative Colitis*.

# V

## **Vaccination**

Giving a vaccine to train the immune system to recognize a specific infection. Vaccination lowers the risk of illness, severe complications, and sometimes transmission; the recommended schedule depends on age, health, and local guidance.

## **Vaccination Schedule**

A time-based plan for administering vaccines according to age, previous doses, medical conditions, exposure risks, and public-health guidance. Schedules vary by country and are updated as recommendations change.

## **Vaccinations/Immunizations During Pregnancy**

Vaccines given during pregnancy are selected according to safety, disease risk, season, exposure, and local recommendations. Inactivated vaccines such as influenza and Tdap are commonly used when indicated, while some live vaccines are deferred until after pregnancy.

## **Vaccine**

A vaccine trains the immune system to recognize a specific infection or toxin and respond more effectively. Vaccination lowers the risk of severe disease and helps protect communities.

## **Vaccine Allergy**

An allergic reaction to a vaccine or one of its ingredients. Reactions may be local and mild or, rarely, involve hives, swelling, breathing difficulty, or anaphylaxis; suspected reactions are assessed to identify the responsible ingredient and guide future

vaccination.

## **Vaccine-Associated Paralytic Poliomyelitis**

An extremely rare form of polio paralysis caused by a weakened poliovirus used in the oral polio vaccine changing back to a harmful form.

### **Alternate Names:**

VAPP

## **Vaccines**

Preparations that train the immune system to recognize a particular germ or toxin before exposure. They reduce the risk of infection and severe illness and may also reduce complications and spread.

## **Vaccines and Immunizations**

Vaccines train the immune system to recognize specific pathogens or toxins and reduce the risk of infection, severe disease, complications, and transmission.

## **Vaccinia**

A virus used to make smallpox vaccines. Rare accidental infection can cause a sore at the contact site or more widespread illness, especially in people with weakened immunity.

## **Vaccinia Virus**

Vaccinia virus is a poxvirus used to make smallpox vaccines and studied in some experimental cancer treatments; accidental infection is uncommon but possible.

---

## **VACTERL Association**

A pattern of birth defects affecting several of the spine, anus, heart, food pipe, windpipe, kidneys, or limbs. There is no single test; the pattern of differences is used to identify it and rule out other conditions.

## **Vacuum-Assisted Delivery**

A vaginal birth assisted by a suction cup placed on the baby's scalp when labor is not progressing or the baby needs to be born promptly. It is used only when the cervix is fully open and the baby's position and head size are suitable. Possible complications include scalp injury, bleeding, or tears.

## **Vacuum Curettage**

A procedure that removes tissue from the uterus using suction, commonly for uterine evacuation or endometrial sampling. Risks include bleeding, infection, retained tissue, and rarely uterine injury.

## **Vacuum Delivery**

Assisted vaginal birth using a suction cup placed on the baby's scalp. It may be used when labor is not progressing or the baby needs to be born promptly and can cause scalp injury, bleeding, or tears.

## **Vacuum Erection Devices**

Devices with a cylinder and pump that draw blood into the penis to produce an erection. A flexible ring may hold the erection during sex; bruising, numbness, or discomfort can occur, especially if the ring is left on too long.

### **Alternate Names:**

Vacuum Erection Pump; Penis Pump

## **Vacuum Extractor**

A cup-shaped device applied to the fetal scalp to assist vaginal delivery when specific maternal or fetal indications are present.

## **Vagal Maneuver**

A physical action that affects the vagus nerve and can slow the heart's electrical activity. Examples include bearing down and, in clinical settings, cer-

tain pressure or cold-stimulation methods. These maneuvers may help assess or stop some fast heart rhythms.

### **Alternate Names:**

Vagal Stimulation Technique; Parasympathetic Provocative Maneuver

## **Vagal Nerve Stimulation**

A treatment that uses an implanted device to send small electrical signals to the vagus nerve in the neck. It may be used for selected cases of epilepsy or depression that have not improved with other treatments.

### **Alternate Names:**

VNS

## **Vagal Paraganglioma**

A usually slow-growing tumor arising from nerve-related cells near the vagus nerve in the neck. It may cause a neck mass, hoarseness, swallowing difficulty, or nerve symptoms and can be identified with imaging and specialist assessment.

## **Vagina**

A muscular, elastic canal connecting the cervix to the vaginal opening. It allows menstrual blood to leave the body, receives a penis or other objects during vaginal sex, and serves as the birth canal.

## **Vagina Carcinoma**

Cancer arising from the vagina. It may cause unusual bleeding, discharge, pain, or a visible sore, although early cancer may cause no symptoms; examination and tissue testing are needed for diagnosis.

## **Vaginal Agenesis**

A condition in which the vagina is absent or has not fully formed before birth. It may occur with differences in the uterus, kidneys, hearing, or spine; care is individualized and may include counseling, gradual treatment, or surgery when wanted.

## **Vaginal Atresia**

Absence or complete blockage of the vaginal canal

---

from birth. It may cause absent menstrual flow, repeated monthly pelvic pain, or difficulty with penetration.

### **Vaginal Atrophy**

Thinning, dryness, and irritation of vaginal tissues, usually caused by lower estrogen after menopause or other hormone changes. It can cause burning, itching, pain during sex, bleeding, or urinary symptoms and may improve with moisturizers, lubricants, or prescribed hormone treatment.

#### **Alternate Names:**

Atrophic Vaginitis; Vulvovaginal Atrophy; Genitourinary Syndrome of Menopause; GSM; Vaginal Dryness

### **Vaginal Bleeding**

Unexpected, unusually heavy, or prolonged bleeding from the vagina, including bleeding between periods, after sexual intercourse, during pregnancy, or after menopause. Causes include hormonal changes, infection, pregnancy-related conditions, structural lesions, medications, and cancer.

### **Vaginal Bleeding Between Periods**

Bleeding between menstrual periods may result from contraception, infection, pregnancy, polyps, fibroids, hormonal changes, or cancer. Persistent or heavy bleeding can have a serious cause.

### **Vaginal Bleeding During Early Pregnancy**

Bleeding from the vagina during the first part of pregnancy can result from cervical changes, miscarriage, ectopic pregnancy, infection, or other conditions. A small amount may occur without a serious cause, but bleeding with heavy loss, severe or one-sided pain, shoulder pain, dizziness, or fainting can indicate a serious problem.

### **Vaginal Bleeding During Late Pregnancy**

Bleeding from the vagina later in pregnancy may be caused by placenta previa, placental separation, labor, cervical disease, or other complications. Significant bleeding can be a serious pregnancy complication.

### **Vaginal Bleeding In Early Pregnancy**

Alternate name; see *Vaginal Bleeding During Early Pregnancy*.

### **Vaginal Bleeding In Late Pregnancy**

Alternate name; see *Vaginal Bleeding During Late Pregnancy*.

### **Vaginal Bleeding In Pregnancy**

Broad index label for bleeding during pregnancy; see *Vaginal Bleeding During Early Pregnancy* and *Vaginal Bleeding During Late Pregnancy*. Heavy bleeding or bleeding with pain, dizziness, fainting, or reduced fetal movement can indicate a serious pregnancy complication.

### **Vaginal Cancer**

A rare cancer of the vagina, most often arising from its surface lining. It may cause bleeding, discharge, pain, or a lump; treatment depends on its type, size, location, and spread.

#### **Alternate Names:**

Vaginal Carcinoma; Malignant Vaginal Neoplasm

### **Vaginal Candidiasis**

Alternate name; see *Yeast infection (vaginal)*.

### **Vaginal Cuff**

The upper end of the vagina that is closed with stitches after the uterus is removed during a hysterectomy.

### **Vaginal Cuff Dehiscence**

An opening of the stitched upper end of the vagina after hysterectomy. It may cause pelvic pain, bleeding, discharge, or tissue bulging through the opening.

### **Vaginal Cysts**

Vaginal cysts are fluid-filled or tissue-lined sacs in or beside the vaginal wall, commonly benign but sometimes causing pain, pressure, infection, or obstruction.

---

## Vaginal Dilator

A smooth device used to gently stretch or keep open the vaginal canal when it has become narrow or short because of scarring, surgery, radiation, or a difference present from birth.

## Vaginal Discharge

Vaginal discharge may be normal or may indicate infection, inflammation, hormonal change, or another condition. Normal discharge is usually clear to whitish and odourless and varies with the menstrual cycle, pregnancy, sexual arousal, and some contraceptives.

## Vaginal Dryness

Reduced vaginal lubrication, commonly associated with menopause, breastfeeding, hormonal changes, medications, or irritation. It may cause discomfort, itching, painful intercourse, or minor bleeding.

## Vaginal Fistula

An abnormal passage between the vagina and another organ, commonly the bladder or rectum. It may cause continuous urine or stool leakage, infection, skin irritation, and emotional distress.

## Vaginal Foreign Body

An object retained in the vagina, most often a tampon or other inserted material. It may cause discharge, odor, bleeding, pain, or infection.

## Vaginal Fornix

One of the recesses surrounding the cervix where the vagina meets the cervix. The posterior fornix is adjacent to the peritoneal cul-de-sac and is relevant in pelvic examination and some procedures.

## Vaginal Fusion And Duplication

Birth-related differences in which the vaginal canal is partly joined, divided, or duplicated. They may occur with abnormalities of the uterus, cervix, urinary tract, or external genitalia and may cause obstruction, pain, menstrual problems, or difficulty with intercourse.

## Vaginal Health

Vaginal health includes normal vaginal tissues, fluids, microorganisms, and comfort. Persistent odor, itching, pain, bleeding, or unusual discharge can indicate infection or another condition.

## Vaginal Hematoma

A collection of blood within the vaginal wall or surrounding tissues, usually caused by childbirth, trauma, or surgery and potentially producing severe pain, swelling, or blood loss.

## Vaginal Hemorrhage

Heavy or clinically significant bleeding from the vagina. Causes include childbirth, pregnancy complications, trauma, infection, structural disease, hormonal disorders, and gynecologic cancer; severe or pregnancy-related bleeding can be life-threatening.

## Vaginal Hypoplasia

Vaginal hypoplasia is underdevelopment of the vagina, usually present from birth. It may occur with other reproductive or urinary-tract differences and can affect menstruation, sexual function, or fertility.

## Vaginal Hysterectomy

Surgical removal of the uterus through the vagina. It may be used for selected benign uterine conditions and usually avoids an abdominal incision, although suitability depends on anatomy and disease.

## Vaginal Inflammation

Alternate name; see *Vaginitis*.

## Vaginal Intercourse

The insertion of the penis into the vagina for sexual pleasure or reproduction. The most common form of sexual intercourse. Vaginal intercourse can lead to pregnancy if sperm are deposited in the vagina.

## Vaginal Intraepithelial Neoplasia

Abnormal, precancerous cells in the surface lining of the vagina, often related to human papillomavirus. The changes vary from mild to severe and may

---

require monitoring, treatment, or removal.

### **Vaginal Introitus**

The entrance to the vagina. It is part of the external genital area and may be examined when assessing pain, infection, injury, scarring, or pelvic-floor problems.

### **Vaginal Itching**

Itching or irritation of the vulva or vagina caused by candidiasis, bacterial vaginosis, sexually transmitted infections, dermatitis, hormonal changes, or other conditions. It may occur with discharge, odor, soreness, or burning.

### **Vaginal Laceration**

A tear in the vaginal tissue, often caused by childbirth, sexual activity, trauma, or a medical procedure. It may cause pain, swelling, or bleeding.

### **Vaginal Lubrication**

Natural moisture made by the vaginal tissues and nearby glands. It usually increases with sexual arousal and may decrease with hormonal changes, some medicines, illness, or irritation.

### **Vaginal Membrane**

A thin fold of tissue associated with the vagina. The term may refer to the hymen at the vaginal opening or to an abnormal membrane that blocks the vaginal canal.

### **Vaginal Microbiome**

The community of microorganisms living in the vagina, commonly dominated by *Lactobacillus* species that help maintain an acidic environment. Changes in this community may contribute to bacterial vaginosis, candidiasis, or other symptoms.

### **Vaginal Mucosa**

The moist inner lining of the vagina. It contains folds that allow the vaginal canal to stretch and helps protect the tissue.

### **Vaginal Odor**

An unusual or unpleasant odor from vaginal discharge that may result from bacterial vaginosis, infection, retained material, hormonal changes, or other conditions.

### **Vaginal Opening**

The external entrance to the vagina. It is part of the vulvar vestibule and may be affected by infection, inflammation, trauma, scarring, or congenital variation.

### **Vaginal Pessary**

A removable device placed in the vagina to support the vaginal walls or nearby pelvic organs, usually for pelvic-organ prolapse or some forms of urine leakage.

### **Vaginal pH**

A measure of how acidic the vagina is. The vaginal environment is normally mildly acidic, and the pH can change with hormones, semen, blood, medicines, or infection.

### **Vaginal Prolapse**

Downward bulging of a vaginal wall because the tissues supporting the vagina have weakened. The bulge may involve the bladder, rectum, or the top of the vagina after hysterectomy.

### **Vaginal Rugae**

Soft folds in the inner lining of the vagina that allow it to stretch and return toward its usual shape.

### **Vaginal Seeding**

Placing vaginal fluid on a baby born by cesarean section in an attempt to expose the baby to the parent's vaginal microorganisms. Clear health benefits have not been established, and harmful infections may be transmitted.

### **Vaginal Speculum**

An instrument inserted into the vagina and gently opened to separate the vaginal walls and visualize the vagina and cervix. It may be used for pelvic

---

examination, cervical cytology such as a Pap test, swab collection, assessment of bleeding or discharge, and selected procedures. Size and design are chosen according to anatomy, comfort, and the clinical purpose.

### **Vaginal Stenosis**

Narrowing or shortening of the vaginal canal, which may result from surgery, radiation, scarring, inflammation, trauma, or congenital development. It can cause pain, difficult examination, or difficulty with penetration.

### **Vaginal Swab**

A sample of fluid or cells collected from the vagina for laboratory testing, often to look for infection or other changes.

### **Vaginal Trauma**

Injury to the vaginal tissues caused by childbirth, sexual activity, foreign objects, procedures, or blunt or penetrating trauma. It may cause bleeding, pain, swelling, or urinary symptoms; severe bleeding or deep injury can be serious.

### **Vaginal Ultrasound Probe**

A specialized endocavitary ultrasound transducer used through the vagina to produce images of the uterus, cervix, ovaries, nearby pelvic structures, or an early pregnancy. It sends and receives sound waves and does not use ionizing radiation.

#### **Alternate Names:**

Endovaginal Transducer Transvaginal Ultrasound Transducer

### **Vaginal Vault Prolapse**

Descent of the top of the vagina into or through the vaginal opening, usually after removal of the uterus. It may cause pelvic pressure, a bulge, backache, or difficulty emptying the bladder or bowel; pelvic-floor therapy, a support device, or surgery may help.

#### **Alternate Names:**

Post-Hysterectomy Vault Prolapse; Apical Prolapse

### **Vaginal Vestibule**

The space of the vulva between the labia minora that contains the external openings of the urethra and vagina and the ducts of the greater and lesser vestibular glands.

### **Vaginal Wall**

The layers of muscle, connective tissue, and moist lining that form the walls of the vaginal canal.

### **Vaginal Yeast Infection**

Alternate name; see *Vulvovaginal Candidiasis*.

### **Vagina Neoplasm**

An abnormal growth in the vagina that may be benign, precancerous, or cancerous. It can cause bleeding, discharge, pain, or a lump, although early growths may cause no symptoms.

### **Vaginectomy**

Surgical removal of part or all of the vagina, usually to treat selected cancers or severe disease; effects may include changes in sexual function, fertility, urination, and bowel function.

### **Vaginismus**

Alternate name; see *Genito-Pelvic Pain/Penetration Disorder*.

### **Vaginitis**

Inflammation or irritation of the vagina that may cause discharge, itching, burning, odor, pain, or discomfort with urination or sex. Causes include infections, hormones, chemicals, allergies, and tissue dryness.

### **Vaginoplasty**

Vaginoplasty is surgery to create, repair, or reshape the vagina. It may be performed for congenital differences, injury, cancer treatment, pelvic-floor problems, or gender-affirming care.

### **Vaginospasm**

Alternate name; see *Genito-Pelvic Pain/Penetration Disorder*.

---

## Vagotomy

Surgery that cuts selected branches of the vagus nerve to reduce signals that stimulate stomach acid and movement. It was once used for difficult stomach ulcers but is now uncommon because medicines and less invasive treatments are available.

## Vagus Nerve

The tenth cranial nerve, carrying signals between the brain and the heart, lungs, throat, voice box, and digestive tract. It helps regulate heart rate, breathing, swallowing, voice, and digestion.

## Vagus Nerve Stimulation

A treatment that sends regular, mild electrical pulses to the vagus nerve through an implanted device in the chest or, in some settings, a handheld device. It is used for selected epilepsy, treatment-resistant depression, and other conditions; benefits may take time and side effects can include voice change, cough, or throat discomfort.

## Valacyclovir

An antiviral medicine that the body changes into acyclovir to stop herpes viruses from multiplying. It treats cold sores, genital herpes, and shingles; the dose may need adjustment in kidney disease, and excessive levels can affect the nervous system.

## Valganciclovir

An antiviral medicine used mainly to prevent or treat cytomegalovirus infection after transplantation. The body changes it into ganciclovir, which blocks viral multiplication; it can lower blood counts, injure the kidneys, affect fertility, and harm a fetus.

## Valgus

A limb or joint deformity in which the part farther from the body bends outward, away from the body's center line. Examples include a bunion and knock-knees.

## Valgus Stress Test

A physical examination manoeuvre used to assess the structural integrity of medial collateral ligaments, most commonly at the knee or elbow. A

medial-directed force is applied to the joint while stabilizing the limb; excessive joint opening, laxity, or pain indicates a medial collateral ligament sprain or rupture.

## Valinemia

A rare inherited condition in which the body cannot process the amino acid valine normally. High valine levels may cause feeding problems, low muscle tone, developmental delay, or other nervous-system symptoms.

## Valley Fever

The common name for coccidioidomycosis, a fungal infection caused by *Coccidioides* species and acquired by inhaling airborne spores from soil. It usually causes a mild respiratory illness but can disseminate to skin, bone, joints, or meninges, especially in people at higher risk.

## Valproate

An antiseizure medicine also used for selected mood disorders. It can affect the liver, pancreas, blood cells, weight, and fetal development, so age, pregnancy possibility, other illnesses, and medicines must be considered.

### Alternate Names:

Valproic Acid; Divalproex Sodium

## Valproate Toxicity

Overdose or adverse exposure causing CNS depression, vomiting, hyperammonemic encephalopathy, hepatotoxicity, pancreatitis, thrombocytopenia, metabolic acidosis, or cerebral edema. Measure serum valproate, glucose, ammonia, liver tests, and acid-base status; L-carnitine may be considered and severe poisoning may require hemodialysis.

## Valproic Acid

A medicine used for certain seizures, bipolar disorder, and migraine prevention. It can cause liver injury, pancreatitis, birth defects, and developmental harm during pregnancy.

## Valproic Acid Toxicity

Acute overdose or adverse metabolic toxicity of the

---

broad-spectrum antiepileptic agent valproate, characterized clinically by central nervous system depression, high anion gap metabolic acidosis, hyperammonemia (due to urea cycle inhibition) with encephalopathy, and drug-induced microvesicular hepatic necrosis; treated with L-carnitine.

### Valrubicin

A chemotherapy medicine placed directly into the bladder for selected bladder cancers that have not responded adequately to other treatment. It can cause bladder irritation, blood in the urine, infection, and, rarely, effects throughout the body.

### VRE Infection

An infection caused by vancomycin-resistant enterococci, bacteria that commonly live in the intestine but can cause urinary-tract, wound, bloodstream, heart-valve, or other infections. Treatment depends on the infection site and susceptibility testing because usual antibiotics may not work.

### Visceral Pain

Pain arising from internal organs, often felt as pressure, cramping, aching, or poorly localized discomfort rather than sharp surface pain. It may result from stretching, inflammation, reduced blood flow, obstruction, or injury of an organ.

### Valsalva

Straining while trying to breathe out against a closed throat, like bearing down during a bowel movement. It changes pressure in the chest and can affect heart rate and blood pressure, so it is not safe for everyone.

### Valsalva Maneuver

Alternate name; see *Valsalva manoeuvre*.

### Valsalva Retinopathy

Preretinal (subhyaloid or sub-internal limiting membrane) hemorrhage occurring within the macula following a sudden, dramatic rise in intrathoracic or intra-abdominal pressure (such as from forceful coughing, vomiting, or heavy lifting) that transmits back through the valveless venous system into

retinal capillaries.

### Valsalva's Manoeuvre

Forceful straining while trying to breathe out against a closed airway, like bearing down during a bowel movement. It changes pressure in the chest and can affect heart rate and blood pressure; it is used in selected tests but may be unsafe for some people.

#### Alternate Names:

Valsalva Maneuver

### Valsartan

Valsartan is an angiotensin-II receptor blocker used for hypertension, heart failure, and selected cardiovascular indications; hyperkalaemia, renal-function changes, hypotension, and fetal toxicity are important risks.

### Valves

Structures that permit fluid or blood to move predominantly in one direction and prevent backward flow; cardiac valves and venous valves are important examples.

### Valvotomy

Surgical or catheter-based division of narrowed valve tissue to improve blood flow, most often performed for selected stenotic heart valves.

### Valvulae Conniventes

Large, permanent transverse circular folds of the mucous membrane and submucosa that project into the lumen of the small intestine (most prominent and numerous in the jejunum), which do not disappear with intestinal distension and act to triple the mucosal surface area for absorption.

#### Alternate Names:

Plicae Circulares; Kerckring Folds

### Valvular Disease

Alternate term; see *Heart valve disease*.

### Valvular Endocarditis

Alternate name; see *Endocarditis*.

---

## Valvular Heart Disease

A broad spectrum of structural and functional disorders affecting one or more of the four cardiac valves (aortic, mitral, tricuspid, pulmonic), classified hemodynamically as valvular stenosis (narrowing and outflow obstruction) or valvular regurgitation (insufficiency and backward flow).

### Alternate Names:

VHD

## Valvular Insufficiency

Incomplete closure of a heart valve, allowing blood to leak backward when the heart contracts or relaxes. It can affect the mitral, aortic, tricuspid, or pulmonary valve and may eventually strain the heart.

## Valvuloplasty

A procedure used to widen or repair a narrowed or abnormal heart valve, by balloon catheter or open surgery depending on the valve and condition.

## Valvulotomy

A procedure that cuts open a narrowed heart valve to improve blood flow. It may be performed with a catheter or surgery; the valve can leak afterward and narrowing may recur.

## Vancomycin

An antibiotic used for selected serious bacterial infections and, by mouth, for certain infections of the large intestine. It can cause infusion reactions, kidney injury, hearing problems, or low blood counts and requires medical monitoring.

## Vancomycin Flushing Reaction

A reaction that can occur when vancomycin is given too quickly into a vein. It may cause flushing, warmth, itching, and redness of the face, neck, and upper body.

### Alternate Names:

Red Man Syndrome; Red Neck Syndrome

## Vancomycin-Resistant Enterococcus

Enterococcus bacteria that are resistant to van-

comycin, usually because of altered cell-wall precursors. VRE can cause healthcare-associated urinary, bloodstream, wound, or other infections and may require susceptibility-guided treatment.

## Van der Woude Syndrome

An autosomal dominant congenital disorder caused by mutations in the IRF6 gene, characterized by the combination of paramedian lower-lip pits (fistulae), cleft lip, and cleft palate, representing the most frequent form of syndromic orofacial clefting.

### Alternate Names:

VWS; Lip-Pit Syndrome

## Vandetanib

A targeted cancer medicine used for selected medullary thyroid cancers. It blocks signals that help cancer cells grow and blood vessels form; diarrhea, high blood pressure, skin effects, and dangerous heart-rhythm changes require monitoring.

## Vaping

Vaping uses an electronic device to heat a liquid and produce an aerosol for inhalation. Aerosols may contain nicotine and other substances that can harm the lungs and cause dependence.

## Vaporiser

A device that converts a liquid medicine or volatile substance into a vapor for inhalation or controlled delivery, such as in anesthesia.

## Variable Decelerations

Brief drops in a baby's heart rate that vary in timing and shape, often caused by pressure on the umbilical cord during labor. Occasional drops may be harmless, but frequent or prolonged drops require assessment of the baby's oxygen supply.

## Variant Angina Pectoris

Chest pain caused by a temporary tightening of an artery supplying the heart, often occurring at rest or at night. Episodes may be severe and can disturb the heart rhythm; sudden or prolonged chest pain needs emergency care.

---

**Alternate Names:**

Prinzmetal Angina; Vasospastic Angina

**Variant CJD**

Alternate name; see *Creutzfeldt-Jakob disease*.

**Variant Classification**

The process of estimating whether a genetic change is harmless, uncertain, or likely to cause disease. Specialists use laboratory evidence, family history, population data, and the person's clinical findings.

**Varibaculum Cambriense**

A bacterial species in the genus *Varibaculum* reported from human clinical specimens. Its role may be opportunistic and requires identification with the clinical context and susceptibility data.

**Variceal Band Ligation**

A procedure using a flexible camera to place small bands around enlarged veins in the food pipe. The bands stop blood flow through the veins and are used to control or prevent bleeding.

**Alternate Names:**

Endoscopic Variceal Ligation; EVL

**Variceal Hemorrhage**

Severe bleeding from enlarged, fragile veins in the food pipe or stomach, usually caused by high pressure in the liver's blood vessels. It can cause vomiting blood, black stools, shock, and death without urgent treatment.

**Varicella**

A primary infection with varicella-zoster virus that causes fever and a generalized itchy rash. See Chickenpox.

**Alternate Names:**

Chickenpox; Varicella-Zoster Virus Infection

**Varicella-Zoster Virus**

The virus that causes chickenpox and shingles. After chickenpox, it can remain inactive in nerve tissue and reactivate years later as a painful, blistering rash called shingles.

**Varicellovirus**

Varicellovirus is a genus of herpesviruses that includes varicella-zoster virus, the cause of chickenpox and shingles.

**Varices**

Abnormally dilated and tortuous veins, commonly occurring in the legs or in the oesophagus and stomach as a result of portal hypertension.

**Varicocele**

Enlargement of veins in the scrotum, often on the left. It may cause aching, a soft "bag of worms" feeling, testicular growth differences, or reduced fertility, but many cause no symptoms.

**Varicocele Embolization**

A procedure that uses a thin tube to place coils or another material in enlarged scrotal veins. This blocks abnormal backward blood flow and reduces pressure in the veins.

**Varicose Ulcer**

An open sore near the ankle caused by long-term poor drainage through the leg veins. It may be surrounded by swelling or skin discoloration and often needs compression and treatment of the underlying vein problem.

**Varicose Veins**

Enlarged, twisted superficial veins, usually in the legs, caused by weak or damaged vein walls or valves that allow blood to pool and flow backward. They may cause visible bulging veins, aching, heaviness, itching, cramps, swelling, skin discoloration, bleeding, superficial inflammation or clotting, and difficult-to-heal venous ulcers.

**Varicose Veins and Venous Insufficiency**

Enlarged superficial veins and inadequate return of blood from the legs because venous valves or the vein wall do not work effectively. Aching, heaviness, swelling, skin discoloration, dermatitis, and ulcers may occur.

---

## Variegate Porphyria

An inherited disorder of heme production that can cause attacks of abdominal pain, vomiting, nerve symptoms, confusion, or dark urine and can also cause fragile, blistering skin after sunlight exposure.

## Variola

A highly contagious and deadly disease caused by variola virus, eradicated globally by 1980 through vaccination. See Smallpox.

## Varix

An abnormally dilated, tortuous vein; multiple varices commonly occur in portal hypertension or chronic venous disease.

## Varus

A limb or joint deformity in which the part farther from the body bends inward, toward the body's center line. Examples include bowlegs and some inward-turning foot deformities.

## Varus Stress Test

A clinical examination manoeuvre used to evaluate the lateral collateral ligaments of a joint, particularly the knee or elbow. A lateral-directed force is applied across the joint line while stabilizing the limb; increased laxity, gapping, or localized pain signifies injury to the lateral collateral ligament complex.

## Vas

A duct or vessel; in reproductive anatomy, the vas deferens transports sperm from the epididymis toward the ejaculatory duct.

## Vasa Deferentia

The paired muscular ducts that transport mature sperm from the epididymides toward the ejaculatory ducts during ejaculation.

### Alternate Names:

Ductus Deferentes; Vas Deferens

## Vasa Efferentia

Small tubes that carry sperm from the testicle's

collecting channels to the epididymis, where sperm mature. They also remove some fluid and help move sperm onward.

## Vasa Previa

A pregnancy complication in which fetal blood vessels run across or near the cervix without the usual protection of the placenta or umbilical cord. If the membranes break, the vessels can tear and cause rapid fetal blood loss, so specialist planning is essential.

## Vasa Recta

Long, hairpin-shaped blood vessels in the inner part of the kidney. They run beside the loops of Henle and help the kidneys concentrate urine.

## Vasa Vasorum

Small blood vessels in the walls of large arteries and veins. They supply oxygen and nutrients to the outer parts of these vessel walls.

## Vascular

Relating to blood vessels or, sometimes, lymphatic vessels. Vascular conditions include narrowed or blocked arteries, aneurysms, blood clots, abnormal vessel connections, and problems with veins; the term may also describe tests, surgery, or medicines involving these vessels.

## Vascular Access

A route into a blood vessel for medicines, fluids, blood tests, monitoring, or dialysis. It may be a short-term catheter, a surgically joined artery and vein, or a synthetic graft, depending on the purpose and expected duration.

## Vascular Access For Hemodialysis

A route that allows blood to leave the body and return during dialysis. It may be a joined artery and vein, a synthetic graft, or a large vein catheter; each has different risks of infection, clotting, and failure.

---

### Vascular Balloon Catheter

An inflatable balloon mounted at the distal tip of a flexible vascular catheter used to dilate stenotic or occluded blood vessels during angioplasty, deliver and expand endovascular stents, or temporarily occlude vascular flow.

#### Alternate Names:

Angioplasty Balloon; Vascular Balloon Dilator; Balloon Catheter

### Vascular Bed

The network of blood vessels supplying a particular organ or tissue. Its vessels widen or narrow to adjust blood flow according to the tissue's needs.

### Vascular Bypass

Surgery that uses a vein or artificial tube to carry blood around a blocked part of an artery and restore blood flow.

#### Alternate Names:

Surgical Bypass; Bypass Grafting; Arterial Bypass Graft

### Vascular Claudication

Alternate name; see *Claudication*.

### Vascular Clip

A small device placed during a procedure to close or control a blood vessel. It may stop bleeding, prevent blood flow to a selected area, or secure a vessel permanently.

#### Alternate Names:

Hemostatic Clip; Surgical Vessel Clip; Ligation Clip

### Vascular Compliance

The ability of a blood vessel to stretch when pressure or blood volume increases. More compliant vessels can hold more blood with a smaller rise in pressure.

#### Alternate Names:

Angiopathic Complications; Vascular Adverse Events

### Vascular Complications

Problems involving blood vessels after disease, injury, or a procedure, such as bleeding, hematoma,

thrombosis, embolism, vessel injury, or reduced blood flow to a limb. Symptoms and urgency depend on the vessel and tissue affected.

### Vascular Dementia

Problems with thinking, memory, mood, or walking caused by strokes or long-term damage to the brain's small blood vessels. Symptoms may appear suddenly or gradually, and treatment focuses on preventing further vessel damage and supporting daily function.

#### Alternate Names:

VaD; Multi-Infarct Dementia; Vascular Cognitive Impairment

### Vascular Disease

Vascular disease affects arteries, veins, or lymphatic vessels and includes atherosclerosis, aneurysm, peripheral artery disease, venous thrombosis, varicose disease, and inflammatory disorders. Symptoms and treatment depend on the vessel and may involve risk-factor control, medicines, procedures, or surgery.

### Vascular Ehlers-Danlos Syndrome

A rare inherited connective-tissue disorder that makes arteries and hollow organs unusually fragile. It may cause thin translucent skin, easy bruising, characteristic facial features, or serious spontaneous blood-vessel or bowel rupture; specialist care and genetic counseling are important.

#### Alternate Names:

vEDS; Ehlers-Danlos Syndrome Type IV

### Vascular Embolic Particles

Small materials placed in a blood vessel during a procedure to block blood flow. They may be used to control bleeding or reduce blood flow to a tumor, fibroid, or other abnormal area.

#### Alternate Names:

Vascular Embolization Particle; PVA Particles

### Vascular Embolization

Intentional blockage of a blood vessel with material delivered through a catheter. It may stop bleeding, reduce blood flow to a tumor, or close an aneurysm

---

or abnormal vessel connection.

**Alternate Names:**

Catheter Embolization; Therapeutic Embolization

**Vascular Embolization Coil**

A catheter-delivered wire device used to block selected blood vessels, often to treat aneurysms or bleeding.

**Alternate Names:**

Endovascular Coil

**Vascular Embolization Plug**

A vascular occlusion device used to block a selected vessel under image guidance. A device placed in a blood vessel to block selected blood flow during image-guided treatment.

**Alternate Names:**

Vascular Occlusion Plug; Embolization Plug; Amplatzer Plug

**Vascular Endothelial Growth Factor**

A protein that helps new blood vessels form and makes blood vessels more leaky. Some medicines block it to treat certain eye diseases and cancers.

**Alternate Names:**

VEGF; Vascular Permeability Factor

**Vascular Endothelial Growth Factor Inhibitor**

A medicine that blocks vascular endothelial growth factor, a protein that helps blood vessels grow. These medicines are used for some cancers and eye diseases involving abnormal new blood vessels.

**Alternate Names:**

Anti-VEGF Agent

**Vascular Endothelial Growth Factor Inhibitors**

Medicines that block vascular endothelial growth factor and reduce abnormal blood-vessel growth or leakage. They are used for some eye diseases and cancers.

**Alternate Names:**

Anti-VEGF Agents; VEGF Neutralizers

**Vascular Forceps**

Surgical forceps designed to handle blood vessels, clots, tissue, or medical materials during vascular procedures. Appropriate use helps avoid crushing or tearing delicate vessels.

**Alternate Names:**

Vascular Surgical Forceps; Atraumatic Clamp

**Vascular Graft**

A tube used to replace or bypass a damaged or blocked blood vessel. It may be made from a person's vein or from a synthetic material; possible problems include infection, bleeding, narrowing, or a clot blocking the graft.

**Vascular Graft Patency**

The continued openness and useful blood flow through a blood-vessel graft or bypass. A clot, narrowing, infection, or scar growth can block it, so examination and sometimes ultrasound are used for monitoring.

**Vascular Hemostat**

A surgical clamp used to temporarily occlude a blood vessel and control bleeding.

**Alternate Names:**

Vascular Clamp; Atraumatic Hemostasis Forceps

**Vascular Imaging**

Tests that show blood vessels and sometimes measure blood flow. Ultrasound, CT, MRI, or catheter-based imaging can find narrowing, blockage, aneurysm, dissection, clot, bleeding, or abnormal vessels; the safest test depends on the body area, urgency, kidney function, and contrast risks.

**Vascularity**

The amount and arrangement of blood vessels supplying a tissue or growth. A highly vascular area may heal or bleed differently and may look different on imaging; blood supply can also affect some treatments.

**Vascular Laser Therapy**

A treatment that uses laser energy to close or change

---

selected blood vessels. The laser may be applied through the skin or through a thin tube.

**Alternate Names:**

Pulsed Dye Laser; PDL; Vascular Laser Therapy

**Vascular Ligation**

Surgical tying, clipping, or sealing of a blood vessel to stop bleeding or redirect blood flow. It may be used during surgery or to treat selected abnormal vessels.

**Alternate Names:**

Vascular Occlusion; Vessel Clipping

**Vascular Malformation**

A blood-vessel or lymph-vessel structure that developed abnormally before birth. It may cause a skin mark, swelling, pain, bleeding, or pressure on nearby organs; effects depend on its type and location.

**Vascular Needle Holder**

A surgical instrument used to hold and guide fine suture needles during repair of blood vessels. It permits precise stitches while minimizing crushing or tearing of delicate vessel walls.

**Alternate Names:**

Vascular Needle Holder; Castroviejo Needle Holder

**Vascular Pain**

Pain caused by impaired blood flow, often appearing in a limb with exertion as claudication or, in more severe disease, at rest.

**Vascular Patch Graft**

A piece of biological or synthetic material sewn onto a blood vessel to widen or repair it.

**Alternate Names:**

Vascular Patch Graft; Angioplasty Patch

**Vascular Retraction**

To pull a vessel or tissue away from an operative field using a surgical retractor.

**Alternate Names:**

Vessel Retraction; Surgical Vessel Exposure

**Vascular Ring**

A birth defect in which blood vessels around the heart form a ring that can press on the windpipe or food pipe. It may cause noisy breathing, cough, repeated chest infections, swallowing difficulty, or feeding problems. Some people need no treatment; symptomatic rings may require surgery.

**Vascular Scissors**

A surgical instrument with two blades used to cut tissue, sutures, dressings, or other materials during vascular procedures.

**Alternate Names:**

Vascular Scissors; Potts Scissors

**Vascular Shunt**

A surgically created or implanted pathway that redirects blood or another fluid from one vessel or body space to another.

**Alternate Names:**

Vascular Shunt; Bypass Shunt

**Vascular Sponge**

A sterile absorbent material used during blood-vessel procedures to absorb blood, apply pressure, or protect delicate tissue.

**Alternate Names:**

Vascular Laparotomy Sponge; Surgical Cottonoid

**Vascular Staple**

A small metal or polymer device used to close tissue or join selected blood-vessel structures. It provides rapid closure but can cause narrowing, bleeding, thrombosis, or tissue injury if unsuitable or misplaced.

**Alternate Names:**

Vascular Surgical Staple; Vessel Closure Device

**Vascular Stent**

A small mesh or tube placed inside a narrowed or blocked vessel to help keep it open.

**Alternate Names:**

Endovascular Stent; Vascular Prosthesis

---

### **Vascular Stent Balloon**

A balloon on a catheter used to expand a vascular stent against the vessel wall and restore an open channel. Inflation can cause vessel injury, bleeding, clotting, or rarely rupture.

#### **Alternate Names:**

Stent-Expansion Balloon; Angioplasty Balloon

### **Vascular Stent-Graft**

A fabric-covered metal frame placed inside a blood vessel to reinforce a weak wall or seal an aneurysm, tear, or leak. Follow-up imaging checks for movement, blockage, or leakage around the graft.

#### **Alternate Names:**

Endovascular Graft; Aortic Stent-Graft

### **Vascular Suction**

A suction device used during a vascular procedure to remove blood or other fluid from the operative field.

#### **Alternate Names:**

Vascular Suction Cannula; Frazier Suction

### **Vascular Surgery**

Operations that repair, widen, replace, or reroute blood vessels to restore circulation or prevent bleeding. Procedures may treat aneurysms, blocked arteries, blood-vessel injuries, or problems with veins and dialysis access.

### **Vascular System**

The network of arteries, veins, and capillaries that carries blood throughout the body. It delivers oxygen, nutrients, and hormones to tissues and carries carbon dioxide and other waste products away. Disease may narrow, weaken, block, or inflame these vessels.

### **Vascular Thrombectomy**

Removal of a blood clot from a blood vessel using surgery or a catheter-based procedure. The aim is to restore blood flow and protect tissue from damage when a clot blocks an important artery or vein.

#### **Alternate Names:**

Vascular Thrombectomy; Clot Extraction

### **Vascular Tissue Adhesive**

A liquid material used to block selected blood vessels during image-guided embolization. Doctors inject it through a catheter to control bleeding, close an abnormal vessel, or reduce blood flow to a tumor.

#### **Alternate Names:**

Cyanoacrylate Embolization Glue; Endovascular Embolic Adhesive

### **Vascular Tone**

The usual degree of tightening in the muscle within blood-vessel walls. It helps control vessel width, blood flow, and blood pressure.

### **Vascular Trauma**

Injury to an artery or vein caused by a blunt blow, penetrating wound, crush injury, or medical procedure. It may cause severe bleeding or loss of blood flow and needs urgent assessment of circulation and nearby nerves.

### **Vascular Ulcer**

A persistent open wound caused or maintained by poor blood flow, high pressure in the veins, loss of protective feeling, or another blood-vessel problem. It usually affects the legs or feet and may heal slowly or become infected.

#### **Alternate Names:**

Vascular Ulceration; Ischemic Ulcer; Arterial Ulcer

### **Vasculitic Neuropathy**

Nerve damage caused by inflammation of the small blood vessels that supply nerves. It often causes painful, uneven numbness or weakness and may affect several limbs as the vessel inflammation continues.

### **Vasculitis**

Inflammation of blood vessels that can narrow them, reduce blood flow, or cause bleeding and tissue damage. It may affect large, medium, or small vessels and can involve the skin, nerves, kidneys, lungs, or other organs.

#### **Alternate Names:**

Angiitis; Arteritis; Blood Vessel Inflammation

---

## **Vas Deferens**

A muscular tube that carries sperm from the epididymis toward the urethra during ejaculation.

## **Vasectomy**

A permanent contraceptive procedure in which the vas deferens are divided or occluded to prevent sperm from entering the ejaculate. It does not immediately provide sterility and does not protect against sexually transmitted infections.

## **Vasectomy Reversal**

Surgery to reconnect the tubes that carry sperm after a vasectomy. It may restore sperm to the semen, but pregnancy is not guaranteed.

### **Alternate Names:**

Vasovasostomy; Vasoepididymostomy

## **Vasoactive Intestinal Peptide Test**

A blood test measuring a hormone that affects the intestine and blood vessels. It is used mainly when a rare hormone-producing tumor is suspected in someone with severe watery diarrhea, dehydration, or abnormal body salts.

## **Vasoconstriction**

Narrowing of blood vessels caused by contraction of vascular smooth muscle, which can raise blood pressure or reduce blood flow to affected tissues.

## **Vasoconstrictor**

A substance that narrows blood vessels by making their muscle walls contract. This can raise blood pressure and reduce local blood flow; vasoconstrictor medicines are used in selected emergencies or with local anesthetics and require careful monitoring.

## **Vasoconstrictors**

Substances or medicines that narrow blood vessels by making their muscular walls contract. They can raise blood pressure or reduce local blood flow and are used only for selected conditions because excessive narrowing can be harmful.

## **Vasodepressor Syncope**

Fainting caused mainly by sudden widening of blood vessels and a fall in blood pressure. It often occurs as part of a vasovagal reaction and may be preceded by nausea, sweating, warmth, or lightheadedness.

## **Vasodilatation**

Widening of blood vessels caused by relaxation of vascular smooth muscle, increasing blood flow and potentially lowering blood pressure.

## **Vasodilation**

Widening of blood vessels when their muscular walls relax. It can increase blood flow and lower blood pressure and occurs with exercise, heat, medicines, and inflammation.

## **Vasodilator**

A substance that relaxes blood-vessel walls and makes the vessels wider. It can lower blood pressure or improve blood flow and is used for selected heart, blood-pressure, or circulation problems; excessive widening may cause headache, flushing, dizziness, or fainting.

## **Vasodilators**

Medicines or substances that relax vascular smooth muscle and widen blood vessels. They are used for conditions such as hypertension, angina, heart failure, or pulmonary hypertension depending on the agent.

## **Vasodilatory Shock**

A form of distributive shock characterized by severe systemic arterial hypotension and tissue hypoperfusion resulting from profound, refractory peripheral vasodilation and loss of vascular tone despite preserved or elevated cardiac output, most frequently seen in severe sepsis, anaphylaxis, and neurogenic injury.

## **Vasomotor**

Relating to control of blood-vessel width by nerves, hormones, and local chemicals. Vasomotor changes narrow or widen vessels and help regulate blood pressure, body temperature, tissue blood flow, and

---

skin color.

### **Vasomotor Center**

A group of nerve cells in the lower brain that helps control the widening and narrowing of blood vessels and helps maintain blood pressure.

### **Vasomotor Centre**

Groups of nerve cells in the brainstem that help control blood-vessel narrowing and widening. By changing vessel tone, they influence blood pressure, heart and tissue blood flow, and the body's response to standing or stress.

### **Vasomotor Nerves**

Autonomic nerves controlling blood-vessel widening and narrowing by changing smooth-muscle activity, helping regulate blood pressure and temperature.

### **Vasomotor Rhinitis**

Common subtype term; see *Nonallergic rhinitis*.

### **Vaso-Occlusive Crisis**

The classic acute, excruciatingly painful hallmark complication of sickle cell disease, caused by the intravascular sludging and adherence of rigid, polymer-filled sickled erythrocytes in the microvasculature, producing focal tissue ischemia, infarction, and systemic inflammation in bones, joints, or viscera.

#### **Alternate Names:**

Sickle Cell Pain Crisis; VOC

### **Vasopressin**

A hormone that increases water reabsorption in the kidney and can constrict blood vessels. It is released from the posterior pituitary.

#### **Alternate Names:**

Arginine Vasopressin; AVP

### **Vasopressin Receptor**

A cell sensor that responds to the hormone vasopressin. Different types help the kidneys retain water and help blood vessels narrow, influencing body-fluid balance and blood pressure.

### **Vasopressin Receptor Antagonists**

A pharmacological class of aquaretic medications (vaptans, such as tolvaptan and conivaptan) that competitively block vasopressin V2 receptors in the renal collecting duct, promoting solute-free water excretion without electrolyte loss in euvolemic and hypervolemic hyponatremia (SIADH, heart failure, cirrhosis).

#### **Alternate Names:**

Vaptans

### **Vasopressor**

A medicine or body signal that raises blood pressure, mainly by narrowing blood vessels and sometimes by strengthening the heartbeat. These medicines are used in selected emergencies such as shock and require close monitoring.

### **Vasopressors In Anesthesia**

Medicines that increase vascular tone or cardiac output to support blood pressure during anesthesia or critical illness. The choice and dose depend on the cause of hypotension, heart rate, cardiac function, and local protocol; monitoring is required.

### **Vasospasm**

Sudden narrowing of a blood vessel caused by contraction of its muscular wall. It can temporarily reduce blood flow and cause chest pain, headache, stroke-like symptoms, or tissue injury, depending on the vessel affected.

### **Vasovagal Attack**

A transient reflex episode caused by reduced sympathetic tone and increased vagal activity, producing hypotension and often bradycardia with fainting or near-fainting. Common triggers include prolonged standing, pain, fear, heat, dehydration, or emotional stress.

### **Vasovagal Reaction**

A reflex that slows the heart and widens blood vessels, briefly lowering blood pressure and sometimes causing fainting; triggers include pain, fear, prolonged standing, heat, or blood exposure.

---

## Vasovagal Syncope

A common faint caused by a reflex that briefly slows the heart or widens blood vessels, lowering blood pressure and brain blood flow. Triggers include standing still, heat, pain, fear, or seeing blood; warning symptoms often occur first.

### Alternate Names:

Neurocardiogenic Syncope

## Vater-Pacini Corpuscles

Large, rapidly adapting, encapsulated mechanoreceptors located deep in the dermis, subcutaneous tissue, periosteum, and joint capsules. Morphologically composed of a central unmyelinated nerve axon surrounded by multiple concentric lamellae of flattened Schwann-like cells separated by fluid; specialized physiologically to detect high-frequency mechanical vibration (200 to 300 Hz) and transient acceleration.

### Alternate Names:

Pacinian Corpuscles; Lamellar Corpuscles

## VATS

Alternate name; see *Video-Assisted Thoracoscopic Surgery*.

## Vaughan Williams Classification

A system that groups medicines used for abnormal heart rhythms according to their main effect on the heart's electrical activity. It helps describe treatment but does not replace patient-specific prescribing.

## VCJD

Alternate name; see *Creutzfeldt-Jakob disease*.

## VDRL Test

A blood or spinal-fluid test that looks for an immune reaction associated with syphilis. A reactive result needs a more specific confirmatory test and may help monitor response to treatment.

## Vector

A living carrier, usually an insect or tick, that spreads an infection between people or animals.

Some vectors allow the germ to develop inside them; others transfer it mechanically without the germ changing.

## Vector-Borne Disease

An infection spread by a living carrier such as a mosquito, tick, flea, or sandfly. Examples include malaria, dengue, Lyme disease, and some forms of viral encephalitis; prevention focuses on avoiding bites and controlling the carrier.

## Vector Control

Measures that reduce insects or other animals that spread infection. Examples include removing standing water, using insecticides, treating breeding areas, improving buildings, wearing protective clothing, and using repellents or bed nets.

## Vegetarian

Vegetarian describes a diet that avoids meat and may include dairy products, eggs, or both. Nutritional needs can usually be met with varied foods, but iron, vitamin B12, protein, and other nutrients may need attention.

## Vegetation

A mass that can form on a heart valve during infective endocarditis. It may contain bacteria, blood-clotting material, and immune cells and can damage the valve or break off and travel to other organs.

## Vein

A blood vessel that carries blood toward the heart. Most veins carry oxygen-poor blood, but veins from the lungs and placenta carry oxygen-rich blood. Veins often contain valves that help prevent backward flow.

## Vein-Graft Aneurysms

An abnormal widening of a vein used to bypass a blocked heart artery. It may contain a clot, block blood flow, press on nearby structures, or rupture and therefore needs specialist assessment.

---

## **Vein of Galen Malformation**

A rare congenital intracranial vascular anomaly resulting from an embryonic arteriovenous fistula that drains directly into the primitive median prosencephalic vein (the precursor of the great cerebral vein of Galen), presenting in neonates with high-output congestive heart failure and hydrocephalus.

### **Alternate Names:**

VGM; Vein of Galen Aneurysmal Malformation

## **VeIP Regimen**

A cancer-treatment combination of vinblastine, ifosfamide, and cisplatin, used mainly for selected germ-cell tumors. It can lower blood counts and damage the kidneys, nerves, or bladder, so specialist monitoring is required.

## **Velamentous Cord Insertion**

An abnormal attachment in which the umbilical blood vessels travel through the membranes before reaching the placenta without the usual protective tissue. The vessels can be compressed or torn, increasing risks of poor fetal growth, bleeding, or vasa previa and requiring specialist pregnancy monitoring.

### **Alternate Names:**

Velamentous Insertion of the Umbilical Cord

## **Velocardiofacial Syndrome**

Alternate name; see *DiGeorge syndrome (22q11.2 deletion syndrome)*.

## **Velopharyngeal Insufficiency**

A structural or functional anatomical failure of the soft palate (velum) and posterior pharyngeal wall to achieve complete closure during speech and deglutition, resulting in hypernasal speech resonance, nasal air emission, and nasal regurgitation of fluids.

### **Alternate Names:**

VPI; Velopharyngeal Incompetence

## **Vemurafenib**

A targeted cancer medicine for tumors with a specific BRAF V600 gene change, including some melanomas. It can cause joint pain, sun sensitiv-

ity, abnormal heart rhythm, new skin cancers, or treatment resistance.

## **Vena Cava**

Either of the two largest veins returning blood to the right side of the heart. The superior vena cava drains the upper body, and the inferior vena cava drains the abdomen, pelvis, and legs.

### **Alternate Names:**

Venae Cavae; Superior and Inferior Vena Cava

## **Vena Cava Filter**

A small device placed in the large vein leading to the heart to trap blood clots traveling from the legs toward the lungs. It may be used when blood-thinning medicines cannot be used or have not worked.

### **Alternate Names:**

IVC Filter; Greenfield Filter

## **Venepuncture**

Inserting a needle into a vein to collect blood or place intravenous access. It may cause brief pain, bruising, bleeding, infection, or fainting, and clean technique reduces complications.

## **Venereal Disease Research Laboratory Test**

A blood test that looks for antibodies associated with syphilis. It is used for screening and monitoring treatment, but a reactive result needs confirmation with a treponemal test.

## **Venesection**

The controlled removal of blood from a vein, used diagnostically or therapeutically, for example in selected cases of hemochromatosis or polycythemia.

## **Venipuncture**

Puncture of a vein with a needle to obtain blood, administer fluids or medicines, or establish intravenous access. Bruising, infection, bleeding, and nerve or artery injury are uncommon complications.

## **Venogram**

Contrast imaging of veins used to detect thrombosis,

---

obstruction, abnormal anatomy, or selected venous flow disorders.

### **Venography**

Imaging of veins, usually after contrast material is administered, to assess venous anatomy, obstruction, thrombosis, or malformation.

### **Venom**

A poisonous substance delivered by an animal through a bite, sting, or similar structure. Its effects vary by species and may include pain, swelling, nerve problems, bleeding, or dangerous changes in breathing or blood pressure.

### **Venomous Bite**

A bite that injects venom from an animal such as a snake, spider, or arthropod. Effects range from local pain and swelling to bleeding, paralysis, or systemic toxicity.

### **Veno-Occlusive Disease**

Blockage and injury of small veins in the liver, especially after some chemotherapy or stem-cell transplantation. It can cause painful liver enlargement, rapid weight gain, fluid retention, and jaundice and can be life-threatening.

### **Veno-occlusive Hepatic Disease (Sinusoidal Obstruction Syndrome)**

A potentially severe liver injury caused by narrowing or blockage of hepatic sinusoids, classically after hematopoietic-cell transplantation or certain chemotherapy. Painful liver enlargement, weight gain, fluid retention, jaundice, and rising bilirubin may occur.

### **Venous**

Relating to veins, which usually carry blood back toward the heart. Vein problems include blood clots, varicose veins, poor return of blood, and ulcers; pulmonary veins are an exception because they carry oxygen-rich blood from the lungs to the heart.

### **Venous Air Embolism**

Obstruction of the venous circulation by intravascular gas, usually after procedures, trauma, or pressure changes. It can impair pulmonary or cardiac function and, if gas reaches the arterial circulation, cause neurologic or systemic ischemia.

### **Venous Aneurysm**

A localized abnormal dilatation of a vein. It may be asymptomatic or present as a soft mass, pain, thrombosis, embolism, or bleeding depending on its location and size.

### **Venous Blood Gas**

The clinical laboratory measurement of pH, partial pressure of carbon dioxide ( $p\text{CO}_2$ ), bicarbonate ( $\text{HCO}_3^-$ ), and base excess in a peripheral or central venous blood sample to assess systemic acid-base balance, ventilatory status, and tissue perfusion.

#### **Alternate Names:**

Venous Blood Gas; VBG; Central Venous Blood Gas

### **Venous Capacitance**

The physical and physiological capacity of the systemic venous circulation to accommodate large changes in blood volume with minimal alterations in venous pressure, functioning as the primary high-capacitance, low-resistance reservoir holding approximately 60 to 70 percent of total blood volume at rest.

### **Venous Diseases**

Conditions affecting veins, including blood clots, varicose veins, poor return of blood, inflammation, ulcers, injuries, and birth-related malformations. They may cause pain, swelling, skin changes, bleeding, or dangerous clots traveling to the lungs.

### **Venous Hum**

A harmless continuous humming sound heard over the neck veins, most often in healthy children. It changes or disappears with body position or gentle pressure on the vein, helping distinguish it from heart murmurs that need further evaluation.

#### **Alternate Names:**

---

Cervical Venous Hum; Innocent Venous Hum

### **Venous Insufficiency**

Impaired return of blood through the veins, usually in the legs, because valves allow backward flow, veins are blocked, or the calf-muscle pump is ineffective. Blood may pool and cause aching, heaviness, swelling, varicose veins, itching, darkened or hardened skin, stasis dermatitis, and difficult-to-heal ulcers near the ankle.

### **Venous Leak**

Difficulty maintaining an erection because blood leaves the penis too readily during erection. It may reflect vascular, nerve, hormonal, or medication-related problems and should be evaluated as erectile dysfunction.

#### **Alternate Names:**

Veno-Occlusive Dysfunction; Cavernous Venous Leakage

### **Venous Pressure**

The pressure of blood inside the veins. It depends on blood volume, vein width, gravity, and how well the right side of the heart pumps; abnormally high pressure can cause swelling, enlarged veins, or fluid buildup.

### **Venous Return**

The flow of blood through the veins back to the heart. It is helped by vein valves, muscle movement, breathing, and pressure changes in the chest.

### **Venous Stasis Dermatitis**

Inflammation of the skin of the lower legs caused by chronic swelling and pooling of blood and fluid, usually from chronic venous insufficiency. It may cause itching, redness, scaling, skin darkening, thickening, or ulcers; treatment addresses the swelling and protects the skin.

### **Venous Stasis Ulcer**

A long-lasting wound near the ankle caused by poor blood return through the leg veins. The leg may also be swollen, painful, or have darkened, thickened skin; compression and treatment of the vein problem

may help.

### **Venous Thromboembolism**

A blood clot that forms in a vein, usually deep in the leg, and may travel to the lungs. A clot in the lungs can cause sudden breathlessness, chest pain, collapse, or death.

### **Venous Thromboembolism In Pregnancy**

A blood clot in a deep vein or lungs during pregnancy or after birth. Pregnancy increases clot risk, and symptoms such as one-sided leg swelling, chest pain, sudden breathlessness, or coughing blood can indicate a serious clot.

### **Venous Thromboembolism Prophylaxis**

Measures used to prevent dangerous vein clots, especially around surgery or hospitalization. They may include walking early, compression devices or stockings, and blood-thinning medicine when bleeding risk is acceptable.

### **Venous Thrombosis**

The formation of a blood clot (thrombus) within a vein, most commonly in the deep veins of the lower extremities (deep vein thrombosis, DVT).

### **Venous Ulcer**

A slow-healing sore caused by poor blood return through the leg veins, usually near the ankle. It may occur with leg swelling, varicose veins, or skin discoloration. Arterial circulation should be assessed because it affects whether compression treatment is safe.

### **Ventilation**

Movement of air into and out of the lungs; effective ventilation brings oxygen to the alveoli and removes carbon dioxide.

### **Ventilation-Perfusion Mismatch**

A mismatch between air reaching parts of the lungs and blood reaching those same parts. It can lower blood oxygen and occur with pneumonia, COPD, asthma, heart failure, or a lung clot.

---

## Ventilation-Perfusion Ratio

The relationship between air reaching the lungs and blood reaching the lung tissues. Good matching allows efficient oxygen exchange; poor matching can cause low blood oxygen.

## Ventilation-Perfusion Scan

A nuclear-medicine scan that compares air movement in the lungs with blood flow through them. Areas with blood flow blocked but preserved air movement may suggest a pulmonary embolism. The test uses a breathed tracer and an injected tracer and is interpreted with symptoms and other findings.

## Ventilator

A machine that supports or replaces spontaneous breathing by delivering air, oxygen, or an air-oxygen mixture under positive pressure. Noninvasive ventilators deliver support through a mask, while invasive ventilators connect through an endotracheal or tracheostomy tube. Ventilators can provide different patterns and levels of pressure or volume according to the device and clinical purpose.

### Alternate Names:

Mechanical Ventilator Breathing Machine

## Ventilator-Associated Pneumonia

A lung infection that develops after a person has used a breathing machine for at least two days. It may cause fever, worsening oxygen levels, cough, or abnormal lung findings and requires prompt evaluation and treatment.

## Ventilator-Induced Lung Injury

Lung damage caused or worsened by a breathing machine when pressure, volume, or oxygen levels are excessive. Clinicians use protective settings and close monitoring to support breathing while limiting further injury.

## Ventouse

A vacuum extractor placed on the baby's scalp to assist a vaginal birth when delivery needs help. It is used only when specific safety conditions are met and can cause temporary scalp swelling or bruising.

## Ventral

Relating to the belly or front side of the body; synonym for anterior in human anatomy.

## Ventral Body Cavity

The body cavity toward the front. It includes the thoracic cavity and the abdominopelvic cavity, which contain many of the body's major organs.

## Ventral Hernia

Protrusion of abdominal tissue through a weakness in the front abdominal wall, including incisional and umbilical hernias. It may cause a bulge or pain and requires urgent assessment if incarceration or strangulation is suspected.

## Ventral Root

The front root of a spinal nerve. It carries movement and other outgoing signals from the spinal cord.

## Ventricle

One of the two lower chambers of the heart that pump blood out of it. The right ventricle sends blood to the lungs to receive oxygen; the left ventricle sends oxygen-rich blood to the rest of the body.

## Ventricular

Relating to a ventricle. In the heart, it concerns one of the lower pumping chambers; in the brain, it concerns the fluid-filled spaces that contain cerebrospinal fluid. The organ gives the term its specific meaning.

## Ventricular Aneurysm

A localized, thin, fibrous, dyskinetic or akinetic bulging outpouching of the scarred left ventricular wall developing as a late mechanical complication of transmural myocardial infarction (typically anterior MI), predisposing to heart failure, refractory ventricular arrhythmias, and apical mural thrombus formation.

## Ventricular Arrhythmia

An abnormal heart rhythm arising from the ventri-

---

cles. It may cause palpitations, dizziness, fainting, chest discomfort, or sudden cardiac arrest; fainting or severe symptoms require emergency care.

### **Ventricular Arrhythmias**

Abnormal heart rhythms arising from the ventricles. They range from premature ventricular contractions to ventricular tachycardia and fibrillation, which can cause sudden cardiac arrest.

### **Ventricular Assist Device**

A mechanical pump that helps a weakened heart move blood. It may support the left side, right side, or both and can be temporary or long-term, but bleeding, infection, stroke, and clots are important risks.

### **Ventricular Bigeminy**

A cardiac rhythm pattern on electrocardiogram in which every normal sinus beat is consistently followed by a premature ventricular complex (PVC) in a regular alternating 1:1 sequence, commonly provoked by electrolyte derangements, digitalis toxicity, or underlying ischemic heart disease.

### **Ventricular Fibrillation**

A chaotic, disorganized ventricular rhythm in which the ventricles quiver rather than contract, producing no effective cardiac output and cardiac arrest. It is a shockable rhythm; immediate CPR and unsynchronized defibrillation are required, with treatment of the underlying cause.

**Alternate Names:**

V-Fib

### **Ventricular Hypertrophy**

Thickening of the wall of one of the heart's lower chambers. It may develop from long-term high blood pressure, valve disease, inherited heart muscle disease, or intense training and can lead to stiffness, abnormal rhythms, or heart failure.

### **Ventricular Myocardium**

The heart muscle forming the walls of the ventricles. Its contraction pumps blood to the lungs and the rest of the body.

### **Ventricular Non-Compaction**

A primary genetic cardiomyopathy characterized by a thickened myocardial wall with a non-compacted endocardial layer displaying prominent, deep intertrabecular recesses and deep trabeculations, typically affecting the left ventricular apex and lateral wall.

**Alternate Names:**

LVNC; Non-Compaction Cardiomyopathy

### **Ventricular Premature Contraction**

Alternate name; see *Premature ventricular contractions (PVCs)*.

### **Ventricular Remodeling**

Progressive alterations in left ventricular geometry, mass, chamber volume, and spherical shape occurring after acute myocardial infarction or chronic pressure/volume overload, driven by neurohormonal activation, cardiomyocyte hypertrophy, and interstitial fibrosis.

**Alternate Names:**

Post-Infarction Remodeling; Cardiac Remodeling

### **Ventricular Rupture**

A tear in a wall of one of the heart's lower chambers, often after a heart attack. It can cause life-threatening bleeding around the heart.

### **Ventricular Septal Defect**

A hole in the wall between the heart's lower chambers. Blood may flow from the stronger left side to the right and increase blood flow to the lungs. Small holes may cause no problems; larger ones can cause heart failure or lung-vessel damage.

### **Ventricular Septal Defect Cross-Reference**

Alternate name; see *Ventricular septal defect*.

### **Ventricular Tachycardia**

A rapid heart rhythm that starts in the lower chambers of the heart. It may cause palpitations, dizziness, fainting, shock, or cardiac arrest and can be life-threatening.

---

## Ventriculoatrial

Relating to a connection between a ventricle and an atrium. In brain surgery, a ventriculoatrial shunt is a tube that drains extra fluid from a brain cavity into the right upper chamber of the heart.

## Ventriculography

Imaging used to measure how well the heart's ventricles pump blood. A radionuclide scan or cardiac MRI can estimate the amount of blood ejected with each heartbeat and show abnormal wall movement; the method is chosen for the clinical question.

## Ventriculoperitoneal Shunt

A surgically implanted system that drains cerebrospinal fluid from a brain ventricle into the abdominal cavity, where the fluid can be absorbed.

## Ventrosuspension

Surgical fixation of a displaced or prolapsed uterus to the anterior abdominal wall or nearby supporting tissues.

## Venturi Mask

A high-flow oxygen delivery device that uses the Venturi principle to supply a precise, fixed fraction of inspired oxygen ( $\text{FiO}_2$ , typically 24% to 50%). Oxygen passing through a calibrated narrow jet nozzle creates a pressure drop that draws in a predictable volume of room air through color-coded entrainment ports. Because the total gas flow meets or exceeds the patient's peak inspiratory flow rate, the delivered oxygen concentration remains constant regardless of the patient's breathing rate or depth, making it vital for managing hypoxemia in patients with chronic obstructive pulmonary disease at risk of hypercapnic respiratory failure.

### Alternate Names:

Air-Entrainment Mask; Venturi Oxygen Mask; High-Flow Oxygen Mask

## Venturi Principle

A physical principle in fluid dynamics stating that as a fluid or gas flows through a constricted section of a pipe or nozzle, its velocity increases and its static lateral pressure decreases. In medicine, this

localized pressure drop creates suction that entrains ambient air or fluids, forming the operational basis for air-entrainment oxygen masks (Venturi masks), jet nebulizers, suction aspirators, and explaining hemodynamic phenomena such as systolic anterior motion of the mitral valve in hypertrophic obstructive cardiomyopathy.

### Alternate Names:

Venturi Effect; Bernoulli-Venturi Principle; Air-Entrainment Principle

## Venule

A small blood vessel that collects blood from capillaries and carries it into larger veins. Venules also allow white blood cells and fluid to leave the bloodstream during inflammation.

## Venules

Small blood vessels that collect blood from capillaries and join to form veins. Their walls also participate in inflammation by allowing white blood cells to leave the bloodstream.

## Verapamil

A non-dihydropyridine calcium-channel blocker used for selected hypertension, angina, and supraventricular tachyarrhythmias; it can cause bradycardia and constipation.

## Verapamil Toxicity

Acute severe poisoning from the non-dihydropyridine calcium channel blocker verapamil, characterized by profound peripheral vasodilation, profound myocardial depression, high-grade atrioventricular block, refractory bradycardia, and cardiogenic shock; managed with intravenous calcium, high-dose insulin euglycemia therapy, and lipid emulsion.

## Vermicides

Medicines or chemicals that kill parasitic worms. The correct treatment depends on the worm, the body site affected, the person's age, and other health conditions.

---

### Vernal Keratoconjunctivitis

A severe, recurrent allergic eye inflammation that primarily affects young boys in warm, sunny climates and often flares up during the spring and summer (spring catarrh). It causes intense eye itching, light sensitivity, watering, and thick, stringy mucus. Characteristic findings include large, cobblestone-like bumps on the underside of the upper eyelid (giant papillae) and small white dots along the border of the cornea (Horner-Trantas dots). In severe cases, inflammation and eye-rubbing can create a non-healing sore on the clear front of the eye (a shield ulcer), which can lead to corneal scarring and vision changes. The condition typically improves on its own after puberty.

#### Alternate Names:

VKC; Spring Catarrh; Vernal Catarrh; Vernal Conjunctivitis

### Verner-Morrison Syndrome

A rare neuroendocrine tumor syndrome (WDHA syndrome) caused by a vasoactive intestinal peptide-secreting pancreatic islet cell tumor (VIPoma), characterized by the tetrad of severe watery diarrhea ('pancreatic cholera'), hypokalemia, achlorhydria (hypochlorhydria), and metabolic acidosis.

#### Alternate Names:

VIPoma Syndrome; WDHA Syndrome

### Vernix

A white, greasy protective coating on the skin of a fetus or newborn, composed mainly of water, lipids, and shed skin cells.

### Vernix Caseosa

A white, greasy protective coating on the skin of a fetus or newborn, composed mainly of water, lipids, and shed skin cells.

### Verruca

Alternate name; see *Wart*.

### Verruca Plana

Small, smooth, relatively flat warts caused by HPV, often occurring in groups on the face, hands, or legs.

#### Alternate Names:

Flat Warts; Juvenile Warts

### Verrucas

Verrucas are rough skin growths on the feet caused by human papillomavirus. They may be painful with pressure and often resolve without treatment, although treatment can reduce discomfort or spread.

### Verruca Vulgaris

A common, benign, hyperkeratotic, exophytic cutaneous papilloma with a rough, verrucous ('warty') surface and thrombosed capillary black dots, caused by localized epidermal infection by human papillomavirus (HPV types 2, 4, 7, and 1).

#### Alternate Names:

Common Wart; Viral Verruca

### Verruciform Xanthoma

A rare, noncancerous growth usually found in the mouth or genital area. It may look like a wart, so examination and sometimes a tissue sample are needed to distinguish it from cancer.

### Verrucose

Having a rough, thickened, wart-like, or finger-like surface. It is a descriptive term for a skin, mucosal, or other lesion and does not by itself identify whether the lesion is benign, infectious, or cancerous.

### Verrucous

Having a rough, thickened, irregular, or wart-like surface. The appearance can occur in benign growths, infections, chronic inflammation, or some cancers.

### Verrucous Carcinoma

A low-grade, well-differentiated variant of squamous cell carcinoma with a warty, exophytic appearance. It is locally invasive but rarely metastasizes, commonly affecting the oral cavity, skin, or genitalia.

### Version

A change in the position or presentation of a body

---

structure. In pregnancy, fetal version is a procedure or movement that changes the baby's position, often to place the head downward before birth.

### **Vertebra**

One of the bones forming the spinal column. Each vertebra helps support the body, allows movement, provides attachment for muscles, and surrounds and protects the spinal cord.

### **Vertebrae**

Vertebrae are the bones of the spinal column that protect the spinal cord, support the body, allow movement, and provide attachment for muscles and ligaments.

### **Vertebral Artery**

One of two arteries that travel through the neck and join to supply the brainstem, cerebellum, and back of the brain. Narrowing or blockage can cause dizziness, imbalance, or stroke.

### **Vertebral Artery Dissection**

A tear in the inner lining of a vertebral artery that lets blood enter the vessel wall, forming an intramural hematoma and possibly narrowing the artery or creating a pseudoaneurysm. It may occur spontaneously or after neck injury and can cause sudden neck or occipital headache, dizziness, imbalance, or a posterior-circulation transient ischemic attack or stroke.

#### **Alternate Names:**

VAD; Spontaneous Vertebral Artery Dissection

### **Vertebral Canal**

The passage formed by the stacked spinal bones that surrounds and protects the spinal cord. Narrowing, bleeding, tumors, fractures, or disc disease inside it can compress nerves and cause weakness or pain.

### **Vertebral Column**

The chain of bones running from the neck to the pelvis. It supports the head and trunk, protects the spinal cord, allows bending and twisting, and provides attachment for muscles and ribs.

### **Vertebral Compression Fracture**

Collapse or cracking of one of the bones in the spine, often from osteoporosis, injury, or cancer. It may cause sudden or gradual back pain, loss of height, or a rounded back and can sometimes press on nerves.

### **Vertebral Hemangioma**

Alternate name; see *Spinal hemangioma*.

### **Vertebral Tumor**

A growth arising in or near a spinal bone. It may be benign or cancerous, start in the spine or spread there, and cause pain, fracture, nerve compression, weakness, or paralysis.

### **Vertebrobasilar Circulatory Disorders**

Conditions that reduce blood flow through the vertebral or basilar arteries supplying the brainstem, cerebellum, and posterior brain; symptoms may include vertigo, double vision, imbalance, weakness, or stroke.

### **Vertebrobasilar Insufficiency**

Reduced blood flow through arteries supplying the back of the brain. It may cause dizziness, double vision, imbalance, weakness, trouble speaking, or stroke-like symptoms and can be serious when sudden.

### **Vertebrobasilar Insufficiency**

Source spelling variant of *vertebrobasilar insufficiency*, reduced blood flow in the vertebral or basilar circulation supplying the brainstem, cerebellum, and posterior brain.

### **Vertebroplasty**

A procedure in which medical cement is injected into a collapsed spinal bone to help stabilize it and sometimes reduce pain. It is used selectively because cement leakage, infection, nerve injury, or other complications can occur.

### **Vertical**

Oriented from superior to inferior or perpendicular to a horizontal plane. In medicine, it may describe

---

position, transmission from parent to child, or a body-oriented imaging or movement axis.

### **Vertical Talus**

A stiff flatfoot present from birth in which one of the ankle bones points downward and the middle of the foot is bent upward. It may occur alone or with other conditions and usually needs early orthopedic treatment.

### **Vertical Transmission**

Passage of an infection or genetic condition from parent to child during pregnancy, delivery, or breastfeeding.

### **Vertigo**

A false feeling that you or your surroundings are moving, spinning, tilting, or shifting when they are not. It is a symptom rather than a disease and often comes from the inner ear, but brain and other conditions can also cause it.

### **Vertigo-Associated Disorders**

Vertigo-associated disorders cause an illusion of movement from vestibular, neurologic, visual, medication-related, or systemic dysfunction and may be accompanied by imbalance, nausea, or hearing symptoms.

#### **Alternate Names:**

Vestibular Disorders; Peripheral Vestibulopathy; Labyrinthine Disorders

### **Very Long-Chain Acyl-CoA Dehydrogenase Deficiency**

A rare inherited disorder in which cells cannot use certain long-chain fats for energy, especially during fasting or illness. Infants may develop low blood sugar, heart disease, or liver problems; older children or adults may have exercise-triggered muscle breakdown and dark urine.

#### **Alternate Names:**

VLCAD Deficiency; VLCADD

### **Very-Low-Density Lipoprotein**

A particle made by the liver that carries mainly

triglycerides through the blood. High levels can contribute to fatty deposits in artery walls and increase cardiovascular risk, although the result is interpreted with the full lipid profile.

#### **Alternate Names:**

VLDL

### **Vesical**

Relating to the urinary bladder. For example, vesical inflammation affects the bladder lining, a vesical tumor is a bladder growth, and the vesical neck is the bladder outlet leading toward the urethra.

### **Vesicant**

A substance that causes blistering and tissue injury on contact. In oncology, vesicant drugs can cause severe extravasation injury if they escape from a vein into surrounding tissue.

### **Vesicants**

Substances that can cause severe blistering and tissue damage when they touch skin or escape from a vein. Some chemotherapy medicines and industrial chemicals are vesicants.

### **Vesicle**

A small, circumscribed, raised skin lesion containing clear, serous, or sometimes bloody fluid, usually less than 1 cm in diameter. A vesicle is a small blister; causes include viral infection, contact irritation, eczema, burns, friction, and immune-mediated skin disease.

### **Vesicles**

Plural of vesicle; see *Vesicle*.

### **Vesicoureteral Reflux**

Backward flow of urine from the bladder toward the kidneys because the valve where a ureter enters the bladder does not work normally. It can cause repeated kidney infections and scarring, especially in children.

#### **Alternate Names:**

VUR; Urinary Reflux

---

### **Vesico-Ureteric Reflux**

Backward flow of urine from the bladder into one or both ureters and sometimes the kidneys, increasing the risk of recurrent urinary infection and renal scarring.

### **Vesicovaginal and Ureterovaginal Fistula**

Abnormal connections between the urinary tract and vagina: a vesicovaginal fistula connects bladder to vagina, while a ureterovaginal fistula connects ureter to vagina. Both commonly cause continuous urine leakage and require imaging and reconstructive urologic or gynecologic care.

### **Vesicovaginal Fistula**

An abnormal connection between the bladder and vagina that causes continuous or frequent leakage of urine through the vagina. It may follow childbirth injury, pelvic surgery, radiation, or advanced infection and usually requires specialist repair.

### **Vesicular**

Describing or containing small, fluid-filled blisters. A vesicular rash may occur with viral infection, allergy, eczema, burns, or other conditions; its appearance alone does not establish the cause.

### **Vesicular Breathing**

The normal soft, gentle breath sound heard over most outer lung areas with a stethoscope. Changes in loudness or quality may suggest fluid, collapse, blockage, infection, or other lung disease.

### **Vesicular Palmoplantar Eczema**

An itchy eczema affecting the palms or soles with small, deep-seated fluid-filled vesicles, followed by peeling, scaling, or fissures. Triggers include sweating, irritants, allergy, stress, and fungal infection elsewhere; persistent disease may need specialist treatment.

### **Vesiculobullous Dermatoses**

A group of skin diseases that cause small or large fluid-filled blisters. Causes include infection, allergy, autoimmune disease, inherited conditions, medicines, and injury; examination and sometimes

a biopsy identify the cause.

### **Vessel**

A vessel is a tube carrying blood, lymph, air, urine, bile, or another fluid through the body, depending on context.

### **Vestibular**

Relating to the vestibular system of the inner ear and brain, which detects head motion and position and helps maintain balance and gaze stability.

### **Vestibular Disorder**

A problem affecting the inner-ear balance organs or the brain pathways that process balance signals. It may cause dizziness, vertigo, unsteadiness, nausea, abnormal eye movements, or difficulty walking. Causes include inner-ear disease, infection, head injury, medicines, migraine, reduced blood flow, or disorders of the brain or nerves.

#### **Alternate Names:**

Vestibular Balance Disorder

### **Vestibular Migraine**

Repeated attacks of dizziness or vertigo related to migraine, with or without headache. Episodes may include sensitivity to movement, light, sound, or visual patterns; other inner-ear and brain causes must be considered.

### **Vestibular Neuritis**

Sudden inflammation or dysfunction of the balance nerve, causing severe spinning, nausea, vomiting, and unsteadiness that may last for days. Hearing is usually unaffected, but urgent assessment may be needed to exclude a stroke.

### **Vestibular Papillomatosis**

A harmless normal variation in which several soft, small, finger-like bumps occur on the inner vulvar folds. It can resemble genital warts but is not caused by an infection and usually needs no treatment.

### **Vestibular Rehabilitation**

Exercise-based therapy that improves balance, gaze

---

stability, and adaptation in people with vestibular disorders or dizziness.

### **Vestibular Schwannoma**

A benign, slow-growing tumor of the vestibular portion of the eighth cranial nerve. See Acoustic Neuroma.

### **Vestibular System**

The inner-ear sensors and connected brain pathways that detect head movement and position and help maintain balance, posture, and steady vision. Problems can cause vertigo, unsteadiness, nausea, or blurred vision during movement.

### **Vestibule**

A balance area of the inner ear between the cochlea and semicircular canals. It contains sensors that detect head position and straight-line movement and send this information to the brain.

### **Vestibulocochlear Nerve**

The eighth cranial nerve, carrying information for hearing and balance from the inner ear to the brain.

### **Vestibulodynia**

Persistent burning, stinging, or tenderness at the entrance to the vagina, often triggered by touch, penetration, or inserting a tampon. Examination rules out infection and other causes; care may include pelvic-floor therapy, pain treatment, and support for sexual and emotional health.

#### **Alternate Names:**

Provoked Vestibulodynia; Vulvar Vestibulitis Syndrome; PVD

### **Vestibulo-Ocular Reflex**

An automatic response that moves the eyes opposite to head movement so vision stays steady while a person turns or walks. Problems with it can cause blurred vision, dizziness, or imbalance.

### **Vestigial**

Describing a structure or feature that has become greatly reduced through evolution and has little or

no apparent original function.

### **VEXAS Syndrome**

A serious inflammatory illness that begins in adulthood because of a gene change acquired in blood-forming cells. It can cause persistent fever, painful joints, skin rashes, inflamed blood vessels or cartilage, anemia, and other blood abnormalities.

### **V-Fib**

Alternate name; see *Ventricular fibrillation*.

### **Viable**

Capable of surviving or developing under suitable conditions. In clinical contexts it may describe a viable pregnancy, tissue, organism, cell, or treatment option.

### **Vibration Problem**

Symptoms or injury caused by repeated exposure to vibrating tools or equipment, which may affect nerves, blood vessels, muscles, and joints in the hands or arms.

### **Vibrator**

A device that produces mechanical vibration and may be used for sexual stimulation, therapeutic massage, or selected rehabilitation purposes.

### **Vibrio**

A genus of curved, Gram-negative bacteria; species include *V. cholerae*, which causes cholera, and *V. vulnificus*, which can cause severe wound or blood-stream infection.

### **Vibrio Cholerae**

A bacterium that causes cholera, a severe diarrheal illness spread mainly through contaminated water or food. It can cause sudden, large-volume watery diarrhea, dehydration, shock, and death without rapid fluid replacement.

### **Vibrio Infection**

Infection caused by *Vibrio* bacteria, acquired through contaminated seafood or exposure of

---

wounds to warm seawater. It may cause watery diarrhea, wound infection, or rapidly worsening bloodstream infection, especially in people with liver disease or weakened immunity. Severe wound pain, blistering, fever, or shock can occur.

**Alternate Names:**

Vibriosis; Vibrio Bacteremia

### **Vibrio Parahaemolyticus Infection**

An acute halophilic bacterial gastroenteritis acquired through ingestion of raw or undercooked marine seafood, particularly shellfish. It typically manifests with explosive watery diarrhea, abdominal cramps, nausea, vomiting, low-grade fever, and headache within 12 to 24 hours of exposure, usually resolving spontaneously within 3 to 5 days without antibiotics.

**Alternate Names:**

Vibrio Parahaemolyticus Gastroenteritis; Halophilic Vibrio Infection

### **Vibrios**

Comma-shaped bacteria, usually Gram-negative, that include species capable of causing cholera and wound or gastrointestinal infections.

### **Vibrio vulnificus Infection**

Infection caused by a saltwater-associated bacterium that can produce rapidly progressive wound infection, sepsis, or severe gastroenteritis. Risk is higher with liver disease, iron overload, or immune suppression; raw oysters and seawater exposure are important sources.

### **Vibrio Vulnificus Infections**

Infections caused by *Vibrio vulnificus*, a gram-negative bacterium found in warm seawater and raw seafood. It can cause wound infection, bloodstream infection, or gastroenteritis, with particularly severe disease in people with chronic liver disease or other risk factors.

### **Video-Assisted Thoracoscopic Surgery**

A chest operation performed through several small openings using a camera and long instruments rather than a large incision between the ribs. It may be

used for lung or pleural biopsy, removing part of a lung, or other chest procedures and often allows faster recovery, though bleeding, air leakage, infection, or conversion to open surgery can occur.

**Alternate Names:**

VATS; Video Thoracoscopy; Thoracoscopic Surgery

### **Videofluoroscopic Swallow Study**

A moving X-ray test that records swallowing after small amounts of food or liquid containing contrast are taken. It shows whether food enters the airway, where swallowing is delayed, and which textures or techniques may be safer.

### **Video Laryngoscope**

An airway device with a small camera that shows the entrance to the windpipe on a screen. It helps clinicians place a breathing tube, especially when a direct view is difficult, but does not remove the risks of the procedure.

### **Video Laryngoscopy**

A technique for viewing the entrance to the windpipe with a camera on a blade connected to a screen. It can help clinicians place a breathing tube when a direct view is difficult.

### **Videostroboscopy**

A voice examination that uses a camera and flashing light to create a slow-motion view of the vocal cords as they vibrate. It helps investigate hoarseness, voice strain, and vocal-cord injury.

### **Vildagliptin**

An oral dipeptidyl-peptidase-4 inhibitor used in some countries for type 2 diabetes, alone or with other medicines. It improves glucose-dependent insulin secretion; liver function and pancreatitis symptoms may require attention.

### **Villi**

Tiny finger-like projections lining the small intestine that greatly increase the area available to absorb nutrients. Similar projections in the placenta help exchange substances between the pregnant person and fetus.

---

## **Villous Adenoma**

A high-risk subtype of neoplastic colonic adenomatous polyp characterized histologically by long, finger-like, frond-like epithelial projections covering more than 75

### **Alternate Names:**

Villous Colonic Polyp; Papillary Adenoma

## **Villous Atrophy**

Flattening or loss of the tiny projections lining the small intestine. This reduces nutrient absorption and may occur in celiac disease, some infections, immune disorders, or other intestinal conditions.

## **Villus**

A small finger-like projection, especially one of the intestinal mucosa that increases absorptive surface area; chorionic villi mediate exchange between placenta and fetus.

## **Villus Atrophy**

The histopathological flattening, blunting, and loss of the microscopic finger-like villi lining the small intestinal mucosa, accompanied by crypt hyperplasia and intraepithelial lymphocytosis, classically observed in celiac disease, tropical sprue, and autoimmune enteropathy.

## **Vinca Alkaloids**

Cancer medicines including vincristine and vinblastine that disrupt microtubules, structures needed for cell division. They can treat several cancers but may cause nerve damage, low blood counts, constipation, or other toxicity.

## **Vincent Angina**

An acute necrotizing infection of the gums and oropharynx associated with fusobacteria and spirochetes. It causes painful ulceration, bleeding, foul breath, and gingival necrosis and requires dental or medical treatment.

## **Vincent Disease**

Acute necrotizing ulcerative gingivitis associated with fusospirochetal bacteria, causing painful bleed-

ing gums, ulceration, and foul breath.

## **Vincent Infection**

Vincent infection is acute necrotizing ulcerative gingivitis caused by mixed oral bacteria, producing painful bleeding gums, ulcers, and foul breath.

## **Vincent's Angina**

Acute necrotizing ulcerative gingivitis or tonsillitis associated with fusiform bacteria and spirochetes, causing painful ulcers, bleeding, and fetid breath.

## **Vincent Stomatitis**

A painful necrotizing infection of the gums caused by mixed anaerobic bacteria, producing foul breath, bleeding, ulceration, and gray necrotic tissue; it is also called acute necrotizing ulcerative gingivitis.

## **Vinorelbine**

A chemotherapy medicine that interferes with cell division. It is used for selected lung and breast cancers and can cause low blood counts, infection, constipation, nerve symptoms, nausea, or irritation if it leaks outside a vein.

## **Viomycin**

An older aminoglycoside antibiotic related to capreomycin that was used against tuberculosis and other mycobacterial infections; kidney and hearing toxicity limit its use.

## **VIPoma**

A rare functioning neuroendocrine tumor arising from the non-beta islet cells of the pancreas (or occasionally extra-pancreatic sympathetic ganglia in children) that hypersecretes vasoactive intestinal peptide (VIP), causing refractory secretory diarrhea and hypokalemia.

### **Alternate Names:**

Vasoactive Intestinal Peptide Tumor; Verner-Morrison Neoplasm

## **VIPoma Syndrome**

A rare neuroendocrine tumor syndrome arising predominantly from the non-beta islet cells of the

---

pancreas that hypersecretes vasoactive intestinal peptide (VIP). Clinically characterized by massive, secretory, watery diarrhea persisting during fasting, severe hypokalemia, and hypochlorhydria or achlorhydria (the WDHA syndrome), accompanied by dehydration and metabolic acidosis.

**Alternate Names:**

WDHA Syndrome; Verner-Morrison Syndrome; Pancreatic Cholera

**Viraemia**

The presence of viruses in the bloodstream. It may be brief or long-lasting and can allow the infection to spread from its original site to other tissues.

**Viral**

Caused by or relating to a virus. Viruses enter living cells to multiply and can cause illnesses ranging from mild colds to serious brain, lung, liver, or bleeding diseases; testing and treatment depend on the specific virus.

**Viral Antibody**

A protective protein made by the immune system after infection or vaccination that recognizes a virus. Blood tests for these antibodies may show past exposure, immune response, or selected current infections, depending on timing and test design.

**Viral Arthritis**

Joint inflammation caused by or associated with a viral infection. It may cause sudden pain, swelling, and stiffness in several joints and often improves as the infection resolves, although some viruses can cause prolonged symptoms.

**Viral Assembly**

The stage of viral reproduction when newly made viral genetic material and proteins are put together to form complete new virus particles.

**Viral Attachment**

The first step of infection, when proteins on a virus bind to matching molecules on a host cell. This binding helps determine which species, tissues, or cell types the virus can infect.

**Viral Carcinogenesis**

Cancer development caused or promoted by a viral infection. Some viruses alter cell growth directly, weaken immune protection, or cause long-lasting inflammation; examples include human papillomavirus, hepatitis B and C viruses, and Epstein-Barr virus.

**Viral Conjunctivitis**

Infection of the thin lining over the eye and inside the eyelids, usually causing redness, watering, irritation, and discharge. It spreads easily through contact with infected secretions or contaminated hands and surfaces.

**Viral Culture**

Growth of a virus in susceptible cell cultures to identify an infectious agent. It can be useful for selected viruses, but molecular and antigen-based tests are often faster or more sensitive; the appropriate method depends on the suspected infection and specimen.

**Viral Encephalitis**

Inflammation of the brain caused by a virus. It may cause fever, headache, confusion, behavior change, seizures, weakness, or reduced consciousness. Severe cases can be life-threatening.

**Viral Entry**

The process by which a virus gets inside a host cell and releases its genetic material so the cell can make more virus.

**Viral Exanthem**

A widespread rash caused by a viral infection. It may occur with fever, tiredness, sore throat, cough, diarrhea, or other symptoms; the rash pattern and overall illness help determine the cause.

**Viral Gastroenteritis**

Alternate name; see *Stomach Flu*.

**Viral Haemorrhagic Fever**

A severe illness caused by certain viruses that can

---

damage blood vessels, disturb clotting, and cause bleeding, shock, or organ failure. The way it spreads and its treatment depend on the virus.

### **Viral Hemorrhagic Fevers**

Severe illnesses caused by certain viruses that can damage blood vessels, disrupt clotting, and lead to bleeding, shock, or organ failure. Some spread easily and may require special infection-control measures.

#### **Alternate Names:**

VHF; Hemorrhagic Fevers; Viral Hemorrhagic Disease

### **Viral Hepatitis**

Liver inflammation caused by hepatitis viruses A, B, C, D, or E. Hepatitis A and E usually spread through contaminated food or water; B, C, and D can spread through blood or body fluids and may become long-term infections that damage the liver.

#### **Alternate Names:**

Infectious Hepatitis

### **Viral Hepatitis Types**

Five viruses that can inflame the liver. They differ in how they spread, whether infection can become long-term, the complications they cause, and whether vaccination or curative treatment is available.

### **Viral Immune Evasion**

Ways viruses avoid or weaken the body's immune defenses, allowing them to survive, multiply, or return after infection. These methods can make infections harder to clear and vaccines or treatments less effective.

### **Viral Infection**

An illness caused by a virus entering body cells and making copies of itself. Viruses can damage cells directly or cause inflammation as the immune system responds. Viral infections range from mild illnesses such as colds and cold sores to serious diseases such as influenza, COVID-19, hepatitis, and HIV. Some viruses remain inactive in the body and can become active again later, such as the chickenpox virus causing shingles.

#### **Alternate Names:**

Viral Infections; Viral Disease; Viral Illness

### **Viral Infections and Pregnancy**

Viral infections during pregnancy may affect maternal illness, fetal development, placenta, or newborn health. Evaluation considers the virus, gestational age, symptoms, immunity, exposure, testing, treatment, vaccination, and measures to reduce perinatal transmission.

### **Viral Infections of the Mouth**

Infections of oral skin or mucosa caused by viruses such as herpes simplex, varicella-zoster, enteroviruses, HPV, or EBV. They may cause blisters, ulcers, warts, sore throat, or systemic symptoms, and treatment depends on the virus and host risk.

### **Viral Latency**

A state in which a virus remains inside cells without actively making new virus particles. Some latent viruses can become active again, especially when the immune system is weakened or the body is under stress.

### **Viral Latency Mechanisms**

The ways some viruses remain inactive inside cells while avoiding immune detection. Reactivation can occur when immune defenses are weakened or after other triggers, depending on the virus.

### **Viral Load**

The amount of virus or viral genetic material in a body fluid or tissue, measured by a laboratory assay; trends can help assess disease activity or response to antiviral treatment.

### **Viral Meningitis**

Infection and inflammation of the coverings of the brain and spinal cord caused by a virus. It may cause fever, headache, neck stiffness, vomiting, light sensitivity, or confusion. Bacterial meningitis can cause similar symptoms and is more dangerous.

### **Viral Myocarditis**

Inflammation of the heart muscle caused by a vi-

---

ral infection or by the immune response after an infection. It may cause tiredness, chest discomfort, palpitations, heart failure, shock, or dangerous abnormal heart rhythms.

**Alternate Names:**

Infectious Viral Myocarditis; Acute Viral Myocarditis

**Viral Pathogenesis**

The ways a virus enters the body, infects and spreads through cells, and causes illness. Damage may come directly from infected cells or from the immune system's response to the infection.

**Viral Pericarditis**

Inflammation of the sac around the heart caused by a viral infection. It often follows a respiratory or stomach illness and may cause sharp chest pain that changes with breathing or position.

**Alternate Names:**

Acute Viral Pericarditis; Viral Pericardial Inflammation

**Viral Pharyngitis**

Pharyngeal inflammation caused by viral pathogens such as adenovirus, rhinovirus, coronavirus, Epstein-Barr virus, or influenza virus. Characterized by cough, rhinorrhea, conjunctivitis, and lack of prominent tonsillar exudates, resolving with supportive care.

**Alternate Names:**

Viral Sore Throat; Acute Viral Pharyngotonsillitis; Viral Upper Respiratory Pharyngitis

**Viral Pneumonia**

Infection and inflammation of lung tissue caused by a virus, producing cough, fever, chills, breathlessness, chest discomfort, fatigue, and variable impairment of oxygenation. Severe disease can cause respiratory failure or secondary bacterial infection.

**Viral Release**

The stage when newly made viruses leave an infected cell and spread to other cells. Some leave by pushing through the cell membrane, while others are released when the infected cell breaks apart.

**Viral Replication**

The process by which a virus uses an infected cell to copy its genetic material and make viral proteins. The exact steps differ among viruses, but the result is production of new virus particles.

**Viral Replication Cycle**

The steps a virus uses to make more copies inside a living cell. Usually the virus attaches to the cell, enters, releases its genetic material, makes new parts, assembles new viruses, and leaves to infect other cells.

**Viral Rhinitis**

Acute inflammation and edema of the nasal mucous membranes caused by respiratory viral pathogens, predominantly rhinoviruses, coronaviruses, respiratory syncytial virus, or parainfluenza viruses. Clinically recognized as acute viral coryza or the common cold, it manifests with clear anterior rhinorrhea, nasal congestion, sneezing, itchy throat, low-grade malaise, and temporary hyposmia, generally resolving without antimicrobial therapy within 7 to 10 days.

**Alternate Names:**

Acute Viral Rhinitis; Acute Coryza; Common Cold Rhinitis

**Viral Structure**

The parts of a virus: genetic material made of DNA or RNA inside a protective protein coat. Some viruses also have an outer fatty covering taken from the infected cell's membrane.

**Viral Uncoating**

The step after a virus enters a cell when its protective outer coat comes apart and releases the genetic material. The cell can then be directed to make new viral components.

**Virchow Node**

A firm, non-tender, pathologically enlarged left supraclavicular lymph node (Troisier sign) located in the left supraclavicular fossa, which receives abdominal lymphatic drainage via the thoracic duct and signals metastatic spread of abdominal malignancies

---

(particularly gastric adenocarcinoma).

**Alternate Names:**

Troisier Node; Left Supraclavicular Sentinel Node

**Virchow-Robin Spaces**

Small fluid-filled spaces around blood vessels as they pass through the brain. They are a normal part of the spaces that surround and support these vessels.

**Alternate Names:**

Perivascular Spaces

**Virchow's Triad**

Three factors that increase the chance of a blood clot forming: slow blood flow, injury to the inside of a blood vessel, and blood that clots too easily. These factors can contribute to clots in deep veins or clots that travel to the lungs.

**Alternate Names:**

Virchow Triad; Triad of Virchow; Thrombogenesis Triad

**Virchow Triad**

Three factors that increase the chance of a blood clot forming: injury to the inside of a blood vessel, slow blood flow, and blood that clots too easily.

**Alternate Names:**

Virchow's Triad; Thrombosis Pathophysiological Triad

**Viremia**

The presence of a virus in the bloodstream. It may be brief or persistent and can allow infection to spread to other organs. Laboratory tests may detect the virus itself or its genetic material.

**Viridans Streptococci**

Viridans streptococci are a group of bacteria commonly found in the mouth that can cause dental infections and, after entering the blood, infect heart valves.

**Virilisation**

The development of male secondary sexual characteristics in females, resulting from excessive androgen production or exposure.

**Virilism**

Development of masculinizing features in a female, usually from excess androgen exposure or production, such as hirsutism, deep voice, acne, and menstrual disturbance.

**Virilism Foetal**

Prenatal or neonatal masculinization of a genetically female fetus or infant due to excess androgen exposure. Causes include congenital adrenal hyperplasia, maternal androgen-producing disease, or placental and fetal steroidogenic disorders.

**Virilization**

Virilization is development of typically male secondary sexual features, such as hirsutism, deep voice, acne, increased muscle mass, or clitoromegaly, from androgen excess or androgen exposure.

**Virilize**

To virilize is to develop or cause typically male physical changes from androgen excess or treatment, including facial hair, voice deepening, acne, muscle change, or genital enlargement.

**Virology**

The study of viruses, including their structure, reproduction, spread, effects on the body, diagnosis, treatment, and prevention.

**Virotherapy**

Treatment that uses a virus, often modified, to attack cancer cells or deliver a useful gene into cells. It is an evolving field; the possible benefits, risks, and availability depend on the specific therapy and disease.

**Virtual Colonoscopy**

Virtual colonoscopy is CT colonography, which uses bowel preparation and gas or carbon-dioxide insufflation to create images of the colon; it can detect polyps and masses but cannot remove lesions or biopsy them.

---

## Virulence

How severely a microorganism can cause disease or tissue damage. It depends on the organism's harmful properties and on the person's immune defenses and other health factors.

## Virulence Factor

A feature of a microorganism that helps it survive in the body, avoid immune defenses, attach to cells, damage tissue, or cause disease. Examples include toxins, protective coatings, and enzymes.

## Virulent

Capable of causing severe disease or extensive harm. Virulence describes the harmfulness of a microorganism and is different from infectivity, which describes how easily it spreads or establishes infection.

## Virus

An infectious agent made of genetic material inside a protective protein coat, sometimes with an outer membrane. It can reproduce only inside living cells and may cause illness by damaging cells or triggering inflammation.

## Virus Activation

Virus activation is the switch from a dormant or inactive viral state to production of new viral components and particles.

## Virus Assembly

Virus assembly is the stage of the viral life cycle when viral genetic material and proteins are packaged into new virus particles.

## Virus Diseases

Illnesses caused by viruses. They range from mild infections of one area, such as a cold, to severe diseases affecting the lungs, liver, brain, blood, or several organs; prevention and treatment depend on the virus.

## Viruses

Viruses are infectious particles containing DNA or RNA within a protein coat, sometimes with a lipid

envelope; they replicate only inside host cells and cause disease through direct injury or immune responses.

## Virus Integration

Virus integration is insertion of viral genetic material into the DNA of a host cell, a process used by some viruses and important in certain cancers.

## Virus Protein

A virus protein is a protein made from viral genetic instructions that helps form the virus, enter cells, replicate, or evade immunity.

## Virus Receptor

A virus receptor is a molecule on a host cell that a virus binds to in order to attach to and enter the cell.

## Virus Replication

Virus replication is the process by which a virus copies its genetic material and makes proteins and new virus particles inside a host cell.

## Virus Uncoating

Virus uncoating is removal of the virus's protective outer layer after entry into a host cell, releasing its genetic material for replication.

## Viscera

The internal organs of the body, particularly those within the thoracic and abdominal cavities. The thoracic viscera include the heart, lungs, esophagus, trachea, and thymus.

## Visceral

Relating to the internal organs, especially those within the thorax or abdomen, rather than the body wall or limbs.

## Visceral Afferents

Sensory nerve fibers that carry information from internal organs to the spinal cord and brain. They convey signals related to stretch, chemical changes, inflammation, and internal pain and help regulate

---

autonomic and reflex responses.

### **Visceral Larva Migrans**

A syndrome caused by migration of animal nematode larvae through human tissues, most often from *Toxocara* species. It may produce fever, eosinophilia, liver lesions, or ocular and neurologic disease.

### **Visceral Leishmaniasis**

A severe, potentially fatal systemic protozoan infection caused by species of the *Leishmania* donovani complex (*Leishmania donovani* and *Leishmania infantum*) transmitted to humans by the bite of female phlebotomine sandflies. Characterized by the intracellular dissemination of amastigotes within the reticuloendothelial system, it presents with prolonged irregular fever, progressive massive splenomegaly, hepatomegaly, profound pancytopenia (anemia, leukopenia, and thrombocytopenia), hypergammaglobulinemia, and severe wasting, fatal in over 95% of untreated cases.

#### **Alternate Names:**

Kala-Azar; Black Fever; Dumdum Fever; Systemic Leishmaniasis

### **Visceromegaly**

Abnormal enlargement of one or more internal organs, such as the liver, spleen, or kidneys. It is a physical finding with causes that include infection, congestion, storage disease, inflammation, and cancer.

### **Viscus**

An internal organ, especially one in the chest or abdomen. The plural is viscera; examples include the heart, lungs, liver, stomach, and intestines.

### **Vision**

The sensory ability to perceive light and interpret visual information processed by the eyes and brain, enabling recognition of shapes, colors, depth, and motion. Normal vision depends on the proper function of the cornea, lens, retina, and optic nerve, as well as intact neural pathways to the visual cortex.

#### **Alternate Names:**

Eyesight; Sight; Visual Perception

### **Vision And Hearing**

Two major senses used to understand and communicate with the world. Problems may develop separately or together because of aging, illness, injury, medicines, or inherited conditions and can affect learning, safety, communication, and daily activities.

### **Vision Impairment**

Reduced visual acuity or visual-field function that affects daily activities. Causes include refractive error, cataract, glaucoma, retinal disease, optic-nerve injury, and neurologic disease. Evaluation and treatment depend on the cause; rehabilitation and visual aids may improve function.

### **Vision Loss**

A decrease in the ability to see that cannot be fully corrected with eyeglasses, contact lenses, or medical treatment. It ranges from partial impairment to complete blindness and can result from conditions such as macular degeneration, glaucoma, diabetic retinopathy, cataracts, and traumatic injury.

### **Vision Problems**

Changes in visual acuity, field, color, or clarity caused by refractive error, eye disease, neurologic disease, or systemic illness. Sudden vision loss is an emergency.

### **Vision Receptors**

Light-sensing cells in the retina, mainly rods and cones, that convert light into nerve signals. Rods support dim-light vision, while cones provide color and sharp detail in brighter conditions.

### **Vision Screening**

Brief checks used to find possible eye or vision problems before symptoms are obvious. Newborn checks may detect cataracts or other serious disorders; screening in young children looks for poor vision, misaligned eyes, or risks for reduced vision and leads to a full eye examination when needed.

### **Vision Test**

An examination that measures visual acuity, fields,

---

color, alignment, or eye structures to detect refractive error, retinal disease, optic-nerve dysfunction, glaucoma, or other causes of visual impairment.

### **Visual Acuity**

How clearly a person can see fine details, usually measured by reading letters or symbols at a set distance. It can be reduced by focusing problems, eye disease, or disorders affecting the visual nerves or brain.

### **Visual Acuity Test**

A test measuring the smallest standardized detail a person can resolve at a specified distance, usually reported as a fraction or decimal.

### **Visual Agnosia**

Inability to recognize familiar objects, faces, or symbols by sight even though the eyes may see adequately. It usually results from damage to brain areas that interpret vision, such as after a stroke or head injury.

### **Visual Evoked Potential**

A test that records the brain's electrical response to flashes or changing visual patterns. It helps assess the nerve pathways that carry visual signals from the eyes to the brain.

#### **Alternate Names:**

VEP; Visual Evoked Response (VER)

### **Visual Field**

The entire area that can be seen while the eyes remain fixed in one position. Visual-field loss may result from retinal, optic-nerve, or brain lesions and is assessed by perimetry.

### **Visual Field Defect**

Loss or change in part of the area a person can see while looking straight ahead. It may result from disease of the retina, optic nerve, or brain, and the pattern can help identify where the problem is.

### **Visual Field Perimetry**

A test that maps how well a person sees in different

parts of the visual field while looking at a fixed point. It can detect and monitor missing areas caused by eye-nerve, retinal, or brain disease.

### **Visual Fields**

The total area that can be seen while the eyes are fixed in one position; defects may indicate retinal, optic-nerve, or brain disease.

### **Visual Field Test**

A test that measures central and side vision and maps areas that are missing or less sensitive.

### **Visual Impairment**

Reduced vision that cannot be fully corrected by ordinary glasses or contact lenses. Causes include refractive error, cataract, glaucoma, retinal disease, optic-nerve injury, and disorders of the brain or nervous system.

### **Visualized Laser-Assisted Prostatectomy**

A procedure that uses a laser, guided by a camera, to remove or vaporize prostate tissue blocking urine flow. It is used for some people with an enlarged prostate and may cause bleeding, infection, scar narrowing, or temporary urinary and sexual problems.

#### **Alternate Names:**

VLAP

### **Visual Neglect**

A brain disorder in which a person fails to notice or respond to things on one side, even though the eyes may work normally. It often follows a stroke affecting the right side of the brain and causes neglect of the left side.

#### **Alternate Names:**

Hemispatial Neglect; Spatial Inattention

### **Vital**

Essential for life or relating to vital physiologic functions. Vital signs commonly include temperature, pulse, respiratory rate, blood pressure, and oxygen saturation.

---

## Vital Capacity

The greatest amount of air a person can breathe out after filling the lungs as fully as possible. It is measured during lung-function testing and may be reduced by lung disease, weak breathing muscles, or restriction of chest movement.

## Vital Signs

Basic measurements of physiologic status, commonly including temperature, pulse, respiratory rate, blood pressure, and oxygen saturation. Values vary with age, activity, illness, and measurement conditions; trends and clinical context are important.

## Vitamin A

A fat-soluble vitamin needed for vision, immune function, skin and mucosal health, and growth; deficiency causes night blindness, while excess can injure the liver and developing fetus.

### Alternate Names:

Retinol; Retinoic Acid

## Vitamin A Blood Test

A blood test measuring circulating retinol, used to assess suspected vitamin A deficiency or toxicity in appropriate clinical settings.

## Vitamin A Deficiency

A nutritional disorder resulting from inadequate intake or absorption of vitamin A (retinol), causing dry eyes (xerophthalmia), night blindness, dry skin, and weakened immunity. Severe deficiency leads to corneal ulceration and is the leading cause of preventable childhood blindness worldwide; clinical eye stages are categorized using the WHO xerophthalmia classification.

### Alternate Names:

Hypovitaminosis A; Retinol Deficiency; Vitamin A Lack

## Vitamin A: Retinal

Vitamin A (retinol) is a fat-soluble vitamin essential for vision, immune function, cell differentiation, and reproduction. In the eye, retinol is oxidized to retinal (retinaldehyde), which binds to opsin in the

photoreceptor outer segments forming rhodopsin (in rods) and photopsins (in cones).

## Vitamin A Toxicity

Harm caused by taking too much vitamin A or related medicines. It may cause nausea, vomiting, headache, dry skin, hair loss, liver injury, high calcium levels, and serious fetal abnormalities during pregnancy.

## Vitamin B

Vitamin B refers to a group of water-soluble vitamins that support energy metabolism, blood-cell formation, nerve function, and other processes. The group includes several distinct vitamins, not one single substance.

## Vitamin B1

Thiamine, a water-soluble vitamin that acts as a co-factor in carbohydrate and amino-acid metabolism and supports nerve function. Severe deficiency can cause beriberi or Wernicke encephalopathy.

### Alternate Names:

Thiamine; Aneurin

## Vitamin B12

A vitamin needed for red-cell formation, DNA production, and normal nerve function. Deficiency can cause anemia, numbness, balance problems, or cognitive changes.

### Alternate Names:

Cobalamin; Cyanocobalamin

## Vitamin B12: Cobalamin

Alternate name; see *Vitamin B12*.

## Vitamin B12 Deficiency

Too little vitamin B12, which can cause large abnormal red cells, tiredness, numbness, balance problems, or nerve damage. Causes include poor intake, poor absorption, autoimmune disease, stomach surgery, and medicines.

## Vitamin B12 Deficiency Anemia

Anemia caused by too little vitamin B12 or poor

---

absorption of it. It can cause tiredness, pale skin, a sore tongue, numbness, balance problems, and permanent nerve damage if untreated for a long time.

**Alternate Names:**

Vitamin B12 Deficiency Anaemia

**Vitamin B12 Deficiency In Older Adults**

Deficiency caused by inadequate intake, malabsorption, autoimmune intrinsic-factor deficiency, gastric surgery, or medications. It may cause megaloblastic anemia, neuropathy, cognitive changes, gait impairment, and glossitis; neurologic injury can occur without anemia.

**Vitamin B12 Level**

The amount of vitamin B12 measured in blood; results are interpreted with symptoms and related tests because serum levels may not fully reflect tissue deficiency.

**Vitamin B1: Thiamine**

Alternate name; see *Vitamin B1*.

**Vitamin B2**

Riboflavin, a water-soluble vitamin that helps cells produce energy and supports healthy skin, eyes, and the lining of the mouth. Deficiency can cause cracks at the mouth corners, a sore tongue, skin changes, or anemia.

**Alternate Names:**

Riboflavin; Lactoflavin

**Vitamin B2 Riboflavin**

Alternate name; see *Riboflavin*.

**Vitamin B3**

A vitamin that helps cells use food for energy and supports the skin and nervous system. Severe deficiency causes pellagra, with diarrhea, skin inflammation, confusion, and other neurologic problems.

**Alternate Names:**

Nicotinic Acid; Nicotinamide

**Vitamin B5**

A water-soluble vitamin needed to help the body use fats, carbohydrates, and proteins and make hormones and other substances. It is found in many foods, so deficiency is rare; very large supplement doses may cause stomach upset.

**Alternate Names:**

Pantothenate; Calcium Pantothenate

**Vitamin B6**

A group of related vitamins needed for amino-acid metabolism, red-cell production, and nerve function. Excess supplements can cause sensory nerve damage.

**Alternate Names:**

Pyridoxine; Pyridoxal Phosphate

**Vitamin B6: Pyridoxine**

Alternate name; see *Vitamin B6*.

**Vitamin B7**

A vitamin that helps the body use fats, carbohydrates, and proteins. Deficiency is uncommon but may cause hair loss, skin rash, or neurologic symptoms; large doses can interfere with some laboratory tests.

**Alternate Names:**

Vitamin H; Coenzyme R

**Vitamin B9**

A vitamin needed for DNA production and healthy red blood cells. Deficiency can cause large-cell anemia and, during pregnancy, increases the risk of neural-tube defects; folic acid is recommended before conception and early in pregnancy.

**Alternate Names:**

Folic Acid; Pteroylglutamic Acid

**Vitamin B Complex**

A group of eight water-soluble vitamins that act mainly as coenzymes or their precursors in cell metabolism. The group includes thiamine (B1), riboflavin (B2), niacin (B3), pantothenic acid (B5), pyridoxine (B6), biotin (B7), folate (B9), and cobalamin (B12), which together support energy

---

metabolism, red-blood-cell formation, and nervous-system function. These vitamins occur together in whole grains, meat, eggs, and legumes; individual deficiencies cause distinct disorders, and combined supplements can prevent or correct deficiency. The sequence has gaps because early candidate substances were later excluded as nonessential: B8 (inositol) is synthesized by the body, B4 (choline, adenine) is not a true vitamin, and the provisional labels B10 and B11 were abandoned once their activity was identified as folate or para-aminobenzoic acid.

**Alternate Names:**

B Vitamins; Vitamin B Group

**Vitamin C**

A water-soluble vitamin needed for collagen formation, wound healing, immune function, antioxidant activity, and absorption of iron from plant foods. Severe deficiency causes scurvy, with bleeding gums, bruising, poor wound healing, and weakness.

**Alternate Names:**

Ascorbic Acid

**Vitamin C Deficiency**

A lack of vitamin C, a water-soluble vitamin needed for collagen formation, wound healing, iron absorption, and antioxidant activity. It follows prolonged low intake and, when severe, causes scurvy, with bleeding gums, easy bruising, poor wound healing, joint pain, and weakness. Replacement and dietary correction reverse the deficiency.

**Vitamin D**

Vitamin D supports calcium and phosphate balance, bone mineralization, muscle function, and immune processes; deficiency causes rickets in children and osteomalacia or bone loss in adults.

**Vitamin D3**

Cholecalciferol, a form of vitamin D made in skin and found in some foods and supplements. It helps the body absorb calcium and maintain healthy bones.

**Vitamin D: Calcitriol**

Alternate name; see *Calcitriol*.

**Vitamin D Deficiency**

Too little vitamin D for the body's needs. It can result from low intake or sunlight, poor absorption, or liver or kidney disease and may weaken bones, cause muscle weakness, or lead to rickets in children.

**Vitamin Deficiency Anemia**

Anemia caused by inadequate vitamin B-12, folate, or other nutrients needed for normal red blood cell production.

**Vitamin E**

Vitamin E is a group of fat-soluble compounds with antioxidant activity. It is found in foods such as nuts, seeds, and vegetable oils; high-dose supplements can increase bleeding risk and interact with medicines.

**Alternate Names:**

Tocopherol; Alpha-Tocopherol

**Vitamin E Deficiency**

Deficiency of a fat-soluble antioxidant vitamin, usually caused by fat-malabsorption disorders or rare inherited conditions. Severe deficiency can cause peripheral neuropathy, ataxia, muscle weakness, retinal dysfunction, or hemolytic anemia.

**Vitamin E: Tocopherol**

Alternate name; see *Vitamin E*.

**Vitamin K**

A fat-soluble vitamin required to activate several blood-clotting proteins and support bone metabolism; the main dietary form is phylloquinone, found especially in leafy green vegetables and some vegetable oils. Deficiency can cause bleeding and is treated or prevented with replacement.

**Vitamin K Deficiency**

Too little vitamin K for normal production of clotting factors, causing an increased bleeding tendency. It can result from poor intake, malabsorption, liver disease, or certain medicines; newborns receive vi-

---

tamin K prophylaxis.

### **Vitamin K Deficiency Bleeding**

Bleeding in a newborn or young infant caused by inadequate vitamin K-dependent clotting activity. It may occur early, classically, or late and can involve the brain or gastrointestinal tract.

#### **Alternate Names:**

VKDB; Neonatal Hypoprothrombinemia

### **Vitamin K: Phylloquinone**

Alternate name; see *Vitamin K*.

### **Vitamin K Prophylaxis**

Giving vitamin K to a newborn soon after birth to prevent bleeding caused by vitamin K deficiency.

### **Vitamins**

Organic nutrients needed in small amounts for normal metabolism, growth, and tissue maintenance; some are water-soluble and others fat-soluble, and both deficiency and excess can cause disease.

### **Vitamin Toxicity**

Harm from excessive vitamin intake, most often involving fat-soluble vitamins that accumulate in the body. Vitamin A can cause headache, liver injury, and bone effects; vitamin D can cause hypercalcemia; and high-dose vitamin E can increase bleeding risk. Stop the source and treat the affected organ or metabolic abnormality.

### **Vitiligo**

Vitiligo is a condition in which areas of skin lose pigment because melanocytes are destroyed or stop functioning. It is not contagious, and treatment may include camouflage, topical medicines, or light therapy.

### **Vitrectomy**

Eye surgery that removes some or all of the vitreous, the clear gel that fills the middle of the eye. Small instruments are inserted through the wall of the eye to remove cloudy gel, blood, scar tissue, or a foreign object and to repair problems of the retina.

It may be used for retinal detachment, diabetic eye disease, macular hole, macular pucker, severe eye injury, or serious eye infection. The removed gel may be replaced with a salt solution, air or gas, or silicone oil.

### **Vitreous**

Relating to the transparent gel filling most of the space between the lens and retina, or describing a glass-like appearance. Vitreous disorders can cause floaters, hemorrhage, detachment, or retinal traction.

### **Vitreous Body**

The transparent gel filling the large space between the lens and retina. It helps maintain the shape of the eye and transmits light; age-related liquefaction can cause floaters or contribute to retinal traction.

#### **Alternate Names:**

Vitreous Humor; Corpus Vitreum

### **Vitreous Detachment**

Separation of the vitreous gel from the retina, usually related to aging and often causing new floaters or flashes. Sudden symptoms can occur with a retinal tear or detachment.

### **Vitreous Hemorrhage**

Bleeding into the vitreous cavity that causes sudden painless floaters, cobwebs, haze, or loss of vision. Common causes include proliferative diabetic retinopathy, retinal tear or detachment, trauma, and posterior vitreous separation.

### **Vitreous Humor**

The clear gel that fills the space between the lens and retina. It helps maintain the shape of the eye and transmits light to the retina.

### **VKORC1 Polymorphism**

An inherited variation in the vitamin K epoxide reductase complex subunit 1 gene that can alter sensitivity to warfarin. Genotype may contribute to dose selection, but clinical factors, interacting medicines, diet, and INR monitoring remain important.

---

## **VLDL Test**

A blood test that measures or estimates very-low-density lipoprotein, a particle carrying triglycerides. The result may help assess cardiovascular risk but is interpreted with the full cholesterol and triglyceride profile.

## **VO2 Max**

The greatest amount of oxygen the body can use during intense exercise. It is a measure of aerobic fitness and is influenced by the heart, lungs, blood, muscles, age, health, and training.

### **Alternate Names:**

Maximal Oxygen Consumption; Maximal Aerobic Capacity

## **Vocal-Cord Dysfunction**

Older term; see *Inducible Laryngeal Obstruction*.

## **Vocal Cord Nodules**

Benign, usually paired thickened areas of the vocal folds caused by repeated voice strain or overuse. They can cause hoarseness, vocal fatigue, and a rough or breathy voice.

## **Vocal Cord Paralysis**

Inability of one or both vocal folds to move normally, often because of nerve damage. It may cause hoarseness, weak cough, choking, or difficulty protecting the airway; sudden breathing trouble is an emergency.

### **Alternate Names:**

Vocal Fold Paralysis

## **Vocal Cord Paresis**

Weakness or partial paralysis of one or both vocal cords, often from injury to the nerves that control them. It can cause a weak or breathy voice, voice fatigue, coughing during eating, or aspiration.

## **Vocal Cord Polyp**

A usually noncancerous growth on a vocal fold, often after heavy or sudden voice use. It can cause persistent hoarseness, a rough voice, or voice fatigue

and is assessed by examining the larynx.

## **Vocal Cords**

Vocal cords, or vocal folds, are bands of tissue in the larynx that vibrate as air passes between them to produce the voice. Swelling, nodules, or injury can cause hoarseness.

## **Vocal-Fold Nodules**

Alternate name for vocal cord nodules, benign thickened areas of the vocal folds that can cause persistent hoarseness.

## **Vocal Fold Paralysis**

Alternate name; see *Vocal cord paralysis*.

## **Vocal-Fold Polyps**

Alternate name for vocal cord polyps, usually non-cancerous growths on the vocal folds that can cause persistent hoarseness or voice fatigue.

## **Vocal Folds**

Two folds inside the voice box that vibrate as air passes between them to make sound. They also close during swallowing to protect the lungs from food and liquid.

## **Vocal Hemorrhage**

Vocal hemorrhage is bleeding into a vocal fold, often after sudden or forceful voice use. It can cause abrupt hoarseness.

## **Vocal Resonance**

The sound of a person's voice heard through the chest with a stethoscope while they speak. Changes in the sound can provide clues to pneumonia, fluid around the lung, a collapsed lung, or other lung disease.

## **Vogt-Koyanagi-Harada Disease**

A rare, multisystem, cell-mediated autoimmune disorder directed against melanocyte-associated antigens (such as tyrosinase), occurring predominantly in pigmented ethnic populations. Characterized by chronic bilateral granulomatous panuveitis with

---

exudative retinal detachments, accompanied by sensorineural hearing loss, tinnitus, vitiligo, poliosis (whitening of eyelashes and hair), and aseptic meningitis.

**Alternate Names:**

VKH Syndrome; Uveomeningoencephalitic Syndrome

**Vogt-Koyanagi-Harada Syndrome**

A multisystem autoimmune inflammatory disorder mediated by T-cell responses against melanocyte-associated antigens, characterized by bilateral chronic granulomatous panuveitis, exudative retinal detachments, meningismus (CSF pleocytosis), sensorineural dysacusis, poliosis, and patchy vitiligo.

**Alternate Names:**

VKH Syndrome; Uveomeningoencephalitic Syndrome

**Vohwinkel Syndrome**

A rare inherited palmoplantar keratoderma causing thick skin on the palms and soles, constricting bands around fingers or toes, and sometimes hearing loss or other features. Severe constriction can threaten circulation and requires specialist care.

**Voice**

Sound produced by vibration of the vocal folds as air passes through the larynx, then shaped by the throat, mouth, and nose for speech.

**Voice And Speech**

The products of complex coordinated activity of the respiratory, laryngeal, and articulatory systems. Communication produced by coordinated breathing, voice-box vibration, and movements of the mouth, tongue, and other speech structures.

**Voice Box**

The larynx, an organ in the neck containing the vocal folds and forming part of the airway. It produces voice and helps protect the lower respiratory tract during swallowing.

**Voice Disorders**

Conditions affecting voice quality, pitch, loudness, or ease of speaking because of problems involving the vocal folds, airway, nerves, or voice use.

**Alternate Names:**

Dysphonia; Vocal Cord Dysfunction

**Void**

To empty the urinary bladder by urinating; in other medical contexts, void may mean an empty space or absence of a substance.

**Voiding Cystourethrogram**

An X-ray test that fills the bladder with contrast through a catheter and records the bladder and urethra while the person urinates. It can show urine flowing backward toward the kidneys, blockage, leakage, or structural problems, especially in children with selected urinary infections.

**Volar**

Relating to the palm of the hand or sole of the foot, especially the surface opposite the dorsum.

**Volatile Anesthetics**

Inhaled medicines used to produce and maintain unconsciousness during some operations. They can lower blood pressure and breathing and rarely cause a dangerous rise in body temperature in susceptible people.

**Alternate Names:**

Inhalational Anesthetics; Inhalation General Anesthetics

**Volkmann Contracture**

A permanent, severe ischemic contracture of the forearm flexor musculature leading to a claw-like hand deformity, resulting from untreated acute compartment syndrome of the forearm following supracondylar humeral fractures, crush injuries, or tight casting.

**Alternate Names:**

Volkmann's Ischemic Contracture; Ischemic Myodystrophy

**Alternate Names:**

---

Volkmann contracture; Volkmann's ischaemic contracture; Volkmann claw deformity.

### **Volume Of Distribution**

A calculated measure of how widely a medicine appears to spread through the body compared with the amount left in the blood. It helps guide dosing but does not represent a real space inside the body.

### **Volume Overload**

Excess total body sodium and water, causing peripheral or pulmonary oedema; common causes include heart failure, kidney failure, liver disease, and excessive intravenous fluid, and treatment depends on the cause and severity.

### **Voluntary**

Under conscious control or performed by choice, such as voluntary movement. Voluntary action is distinguished from reflex, autonomic, or involuntary activity.

### **Voluntary Psychiatric Admission**

Admission to a hospital or psychiatric facility with the person's agreement for assessment, treatment, or safety support. Legal rules about consent, leaving, capacity, and conversion to involuntary status vary by jurisdiction.

### **Volutrauma**

Lung injury caused by overstretching the lungs, usually when a breathing machine delivers breaths that are too large. Careful ventilator settings can reduce this risk.

### **Volvulus**

Twisting of a loop of intestine that blocks passage through the bowel and may cut off its blood supply. It can cause severe pain, vomiting, swelling, and tissue death and can be life-threatening.

### **Vomit**

To eject stomach or upper gastrointestinal contents through the mouth; the expelled material may also be called vomitus. Persistent vomiting can cause

dehydration and electrolyte abnormalities.

### **Vomiting**

Forceful emptying of stomach contents through the mouth. It may result from infection, digestive disease, medicines, pregnancy, migraine, brain disorders, or poisoning. Repeated vomiting can cause dehydration, disturbed body salts, or inhalation of vomit.

### **Vomiting Blood**

The passage of blood or coffee-ground material in vomit, usually indicating bleeding in the upper digestive tract. It can be a serious symptom.

### **Vomitus**

Material expelled from the stomach or upper gastrointestinal tract during vomiting. Its color and contents can provide clues but do not by themselves establish a diagnosis.

### **Von Economo Encephalitis**

An atypical form of epidemic encephalitis (encephalitis lethargica) characterized by pronounced lethargy, hypersomnolence, ophthalmoplegia, and a frequent late sequela of progressive post-encephalitic parkinsonism, pathologically marked by midbrain and basal ganglia inflammation.

#### **Alternate Names:**

Encephalitis Lethargica; Sleeping Sickness (Von Economo Type)

### **Von Gierke Disease**

Glycogen storage disease type I, an inherited deficiency of glucose-6-phosphatase or its transport system that causes fasting hypoglycemia, lactic acidosis, enlarged liver, and excess uric acid or lipids.

### **Von Graefe Sign**

A delay of the upper eyelid as the eyes look downward, leaving a strip of white visible above the iris. It can occur with an overactive thyroid and related eye disease.

#### **Alternate Names:**

Lid Lag Sign; Von Graefe's Lid Lag

---

### Von Hippel-Lindau Disease

An inherited condition, usually caused by a change in the *VHL* gene, that increases the risk of tumors and cysts in the brain, spinal cord, eyes, kidneys, adrenal glands, and pancreas. These growths can affect vision, blood pressure, or kidney function.

### Von Hippel-Lindau Syndrome

Von Hippel-Lindau syndrome is an inherited disorder caused by changes in the *VHL* gene. It increases the risk of tumors and cysts in organs such as the brain, retina, kidneys, pancreas, and adrenal glands.

### Von Meyenburg Complex

A benign congenital biliary ductal plate malformation (biliary microhamartoma) consisting of small, non-progressive clusters of dilated, cystic bile ducts embedded in a dense collagenous stroma, usually discovered incidentally on liver imaging or biopsy.

#### Alternate Names:

Biliary Microhamartoma; Ductal Plate Malformation

### Von Recklinghausen Disease

Von Recklinghausen disease is another name for neurofibromatosis type 1, an inherited condition causing multiple café-au-lait spots, neurofibromas, and increased risk of certain nerve, bone, eye, and other problems.

### Von Recklinghausen'S Disease

Alternate name; see *Neurofibromatosis type 1*.

### Von Recklinghausen'S Neurofibromatosis

Alternate name; see *Neurofibromatosis type 1*.

### Von Recklinghausen'S Phakomatosis

Alternate name; see *Neurofibromatosis type 1*.

### Von Rosen Splint

A malleable, lightweight orthopedic abduction splint applied in neonates with developmental dysplasia of the hip (DDH) to maintain the femoral head securely centered within the acetabulum in flexion and abduction.

#### Alternate Names:

Von Rosen Frame; DDH Abduction Splint

### Von Willebrand Disease

A bleeding disorder caused by too little or poorly working von Willebrand factor, a blood protein that helps clots form. It is often autosomal dominant, although severe type 3 and some other forms are autosomal recessive. It commonly causes nosebleeds, easy bruising, heavy menstrual bleeding, or prolonged bleeding after procedures.

### Voriconazole

An antifungal medicine used for selected serious fungal infections. It stops fungi making an essential part of their outer structure; vision changes, liver problems, medicine interactions, and skin sensitivity require monitoring.

### VOR Reflex

A reflex that moves the eyes opposite to head movement so vision stays steady while the head turns. Problems with this reflex can cause blurred or bouncing vision, dizziness, or imbalance.

### Voyeurism

A recurrent sexual interest in observing an unsuspecting person who is naked, disrobing, or engaging in sexual activity. The interest alone is not a mental disorder; voyeuristic disorder is the diagnostic term when required criteria are met.

### Voyeuristic Disorder

A paraphilic disorder involving recurrent, intense sexual arousal from observing an unsuspecting person who is naked, disrobing, or engaging in sexual activity. Diagnostic criteria include acting on the urges or clinically significant distress or impairment, with the required duration criteria.

### VPCs (Ventricular Premature Contractions)

Alternate name; see *Premature ventricular contractions (PVCs)*.

---

### **VRE (Vancomycin-Resistant Enterococci)**

Enterococcus bacteria that are no longer killed by vancomycin, an antibiotic. They may live harmlessly in the body or cause urinary, wound, bloodstream, or other infections that require infection-control measures and suitable treatment.

### **VSD (Ventricular Septal Defect)**

A hole in the wall between the heart's lower chambers. Small holes may close or cause no symptoms, while larger holes can make the heart and lungs work too hard and may need treatment.

#### **Alternate Names:**

Ventricular Septal Defect

### **Vulnerable**

A substance traditionally believed to help heal wounds. Such products may lack good evidence and can cause allergy or contamination.

### **Vulva**

The external female genital structures, including the mons pubis, labia, clitoris, and vestibule. It protects the openings of the urinary and reproductive tracts and contains specialized sensory and glandular tissue.

#### **Alternate Names:**

Female External Genitalia; Pudendum

### **Vulval Intraepithelial Neoplasia**

Vulval intraepithelial neoplasia is abnormal cell growth limited to the surface layers of the vulvar skin. Some types are linked to HPV, and untreated lesions may progress to invasive cancer.

### **Vulvar**

Relating to the vulva, the external female genital structures including the labia, clitoris, vestibule, and associated glands.

### **Vulvar Cancer**

Cancer arising in the external female genitalia. It may appear as a persistent lump, ulcer, wart-like lesion, itching, pain, or bleeding.

### **Vulvar Carcinoma**

Cancer of the external female genital area, most often arising from surface skin cells. It may appear as a persistent lump, sore, wart-like growth, itching, pain, or bleeding.

#### **Alternate Names:**

Vulvar Cancer; Squamous Cell Carcinoma of Vulva

### **Vulvar Inclusion Cysts**

Small sacs under the skin of the vulva that contain tissue trapped from the surface lining. They may develop after childbirth tears, surgery, or other injury, or occur without an obvious cause. Most cause no symptoms, but they may become swollen, painful, infected, or uncomfortable during sexual activity. Symptomatic cysts may need removal.

### **Vulvar Intraepithelial Neoplasia**

Abnormal cells limited to the surface layer of the vulva. Some forms can progress to invasive cancer, especially without treatment. It may cause itching, burning, sores, warty growths, or a color change, but some people have no symptoms.

### **Vulvar Melanoma**

A rare cancer of the pigment-producing cells in the vulva. It may appear as a dark or skin-colored lump, patch, sore, or bleeding area; diagnosis requires a biopsy, and treatment depends on size and spread.

### **Vulvar Squamous Cell Carcinoma**

The most common invasive vulvar malignancy, arising through HPV-related or HPV-independent pathways. It usually presents as a persistent mass, ulcer, plaque, or wart-like lesion and requires biopsy for diagnosis.

### **Vulvectomy**

Surgical removal of part or all of the vulva, performed for selected cancers, precancerous lesions, or severe persistent disease.

### **Vulvitis**

Inflammation or irritation of the external female genital area. It can cause itching, burning, redness,

---

swelling, soreness, or discharge and may result from infection, allergy, skin disease, hormones, or friction.

### **Vulvodynia**

Persistent or recurring pain in the vulva without an identifiable cause or specific disorder. The pain may be localized or widespread, triggered by touch or pressure, or occur without touch; it is often described as burning, rawness, or soreness.

#### **Alternate Names:**

Chronic Vulvar Pain

### **Vulvovaginal Candidiasis**

A yeast infection of the vulva and vagina, usually caused by *Candida*. It commonly causes intense itching, burning, soreness, redness, and thick discharge; recurrent, severe, unusual, or treatment-resistant symptoms need testing to confirm the cause.

### **Vulvovaginitis**

Simultaneous inflammation or infection of the vulva and vagina, commonly presenting with pruritus, burning, dysuria, dyspareunia, and abnormal vaginal discharge, resulting from infectious etiologies (such as *Candida albicans*, Bacterial vaginosis, *Trichomonas vaginalis*) or non-infectious causes (atrophic vaginitis, contact irritants).

#### **Alternate Names:**

Vaginitis and Vulvitis; Vulvovaginal Inflammation

### **Vocal Cord Disorders**

Disorders affecting the vocal folds or their nerves, including nodules, polyps, cysts, inflammation, paralysis, spasmodic dysphonia, and paradoxical vocal-fold movement. They may cause hoarseness, voice loss, throat discomfort, noisy breathing, or difficulty breathing and swallowing.

### **Vocal Cord Dysfunction**

Inappropriate closing or narrowing of the vocal folds, especially during inhalation, causing sudden throat tightness, noisy breathing, cough, or shortness of breath that can resemble asthma. It is also called inducible laryngeal obstruction and needs assessment when breathing is difficult.

### **Vocal Nodules**

Benign callus-like growths on the vocal folds caused by repeated voice strain. They can produce hoarseness, a rough or breathy voice, vocal fatigue, and loss of range; voice therapy and reducing strain are common treatments.

### **Varicose Veins (Spider Veins)**

Alternate name; see *Varicose Veins* and *Spider Veins*.

# W

## Waardenburg Syndrome

A group of inherited conditions that may cause hearing loss and unusual coloring of the eyes, hair, or skin. Some forms also affect the arms or the nerves controlling the bowel; findings vary by type.

## Waddell Signs

A standardized group of physical examination signs evaluated during back assessment to identify non-organic or behavioral components contributing to lower back pain. Signs include superficial tenderness, simulation testing, distraction maneuvers, regional sensory or motor deficits inconsistent with neuroanatomy, and overreaction during examination.

### Alternate Names:

Waddell Non-Organic Signs; Waddell Score

## WAGR Syndrome

A rare genetic condition that may cause an increased risk of Wilms kidney tumor, missing or poorly formed irises, urinary or reproductive differences, and developmental delay. Children need regular specialist monitoring, especially for kidney tumors.

## Waist Circumference

The distance around the abdomen, measured at a standard level. A larger measurement can indicate more abdominal fat and a higher risk of diabetes and heart disease, but it must be interpreted with other health information.

## Waist-Hip Ratio

A measurement comparing waist size with hip size.

It provides an estimate of where body fat is stored and may add information about diabetes and cardiovascular risk, but it does not diagnose disease by itself.

## Wait List

A list of candidates registered to receive an organ transplant. Placement and allocation priority are determined by the applicable transplant system and may consider medical urgency, expected benefit, blood or tissue compatibility, organ size, waiting time, and other policy-based factors; it is not necessarily a simple first-come, first-served queue.

### Alternate Names:

Waiting List; Transplant Waiting List; Transplant Waitlist

## Wakefulness

The state of being conscious and able to respond to the surroundings. Sleep, medicines, illness, brain injury, and metabolic problems can change the level of wakefulness.

## Waldenström's Macroglobulinemia

A slow-growing blood cancer in which abnormal immune cells make too much of an antibody called IgM. The blood can become unusually thick, causing blurred vision, headaches, bleeding, confusion, or numbness.

## Waldenstrom Macroglobulinemia

A rare blood cancer in which abnormal immune cells build up in the bone marrow and make too much of an antibody called IgM. It may cause anemia, bleeding, vision or nerve problems, enlarged lymph

---

nodes, or no symptoms at first.

**Alternate Names:**

Lymphoplasmacytic Lymphoma

**Waldenstrom's Macroglobulinemia**

A lymphoplasmacytic cancer of the bone marrow that produces excess IgM and may cause anemia, enlarged lymph nodes, or hyperviscosity symptoms.

**Waldeyer Ring**

An annular anatomical arrangement of lymphoid tissue surrounding the opening of the pharynx and nasal cavity, consisting of the pharyngeal tonsils (adenoids), tubal tonsils, palatine tonsils, and lingual tonsils. It functions as the first line of immune defense against ingested or inhaled pathogens.

**Alternate Names:**

Waldeyer Lymphatic Ring; Pharyngeal Lymphoid Ring

**Walker-Warburg Syndrome**

A rare inherited disorder causing severe muscle weakness together with major abnormalities of the brain and eyes from birth. Babies may have low muscle tone, seizures, poor feeding, enlarged fluid spaces in the brain, and abnormal eye development; the condition is usually life-threatening in infancy.

**Alternate Names:**

WWS; Muscle-Eye-Brain Disease (Severe Type); HARD +/- E Syndrome

**Walking Abnormalities**

Walking abnormalities include changes in speed, balance, stride, posture, or coordination caused by pain, weakness, sensory loss, joint disease, or neurologic illness.

**Walking Pneumonia**

An informal clinical term for a mild, atypical community-acquired pneumonia (most frequently caused by *Mycoplasma pneumoniae* or *Chlamydia pneumoniae*), in which the patient presents with persistent dry cough, low-grade fever, and prominent radiographic interstitial infiltrates while remaining ambulatory and non-toxic.

**Alternate Names:**

Atypical Pneumonia

**Walking Speed**

The rate at which a person walks, often measured over a defined distance. It can provide information about mobility and function, but no single speed determines disability in every person.

**Wallenberg Syndrome**

A neurological condition caused by infarction of the lateral medulla oblongata, most commonly resulting from occlusion of the posterior inferior cerebellar artery (PICA) or vertebral artery. Manifestations include ipsilateral facial sensory loss, Horner syndrome, ataxia, dysphagia, hoarseness, and contralateral loss of pain and temperature sensation in the trunk and limbs.

**Alternate Names:**

Lateral Medullary Syndrome; PICA Syndrome; Posterior Inferior Cerebellar Artery Syndrome

**Wallerian Degeneration**

Breakdown of the part of a nerve beyond a severe injury after it loses contact with the nerve cell. The nerve may regrow slowly if the surrounding pathway remains intact, but recovery depends on the injury.

**Walleyed**

Walleyed describes eyes that appear misaligned or divergent; clinically, the condition may be strabismus and requires eye assessment when persistent.

**Wall Stress**

The strain placed on the wall of a heart chamber by the pressure inside it and the chamber's size. High wall stress makes pumping harder and may contribute to heart enlargement or failure.

**Wandering Spleen**

A spleen that can move unusually because its supporting bands are loose or missing. It may cause no symptoms or lead to abdominal pain, enlargement, twisting, loss of blood supply, or sudden severe illness.

---

## Warburg Effect

A hallmark metabolic phenotype of malignant neoplastic cells in which cells preferentially convert glucose to lactate via aerobic glycolysis even in the presence of abundant oxygen, rather than utilizing mitochondrial oxidative phosphorylation, generating glycolytic intermediates for rapid cell proliferation.

## Warfarin

A blood-thinning medicine that reduces production of vitamin-K-dependent clotting proteins. It prevents and treats clots but requires regular blood tests because food, illnesses, and many medicines alter its effect.

## Warfarin and Superwarfarin Toxicity

Excess anticoagulation from warfarin or long-acting rodenticides, causing an elevated INR and potentially delayed bleeding, including gastrointestinal or intracranial hemorrhage. Serial coagulation testing is essential; vitamin K reverses the effect, while life-threatening bleeding may require four-factor prothrombin complex concentrate and prolonged treatment for superwarfarins.

## Warfarin-Induced Skin Necrosis

A rare, catastrophic thrombotic complication occurring 2 to 5 days after starting warfarin without heparin bridging, caused by the rapid initial decline in the short-half-life natural anticoagulant protein C before procoagulant factors fall, triggering microvascular thrombosis and cutaneous infarction in breasts, buttocks, and thighs.

### Alternate Names:

Coumadin-Induced Skin Necrosis

## Warfarin Syndrome

A pattern of fetal abnormalities caused by warfarin exposure during pregnancy, including nasal and skeletal abnormalities, eye or neurologic defects, and fetal or neonatal bleeding.

## Warm and Cold Autoantibodies

Antibodies that make red blood cells clump at warmer or colder temperatures. They can inter-

fere with laboratory testing or cause autoimmune destruction of red cells and anemia.

## Warm Autoimmune Hemolytic Anemia

An illness in which the immune system makes antibodies that cause red blood cells to be destroyed too early, mainly in the spleen. It can cause tiredness, pale or yellow skin, dark urine, shortness of breath, or a fast heartbeat and requires medical evaluation.

### Alternate Names:

wAIHA; Warm Antibody Hemolytic Anemia

## Warm Ischemia

Lack of blood and oxygen reaching tissue while it remains at body temperature. It can quickly cause cell damage and is important during some injuries, operations, and organ transplantation.

## Wart

A usually harmless rough skin growth caused by human papillomavirus. Warts may spread by contact and often disappear over time. Common types include common, plantar, and flat warts; appearance and symptoms vary by site.

### Alternate Names:

Verruca

## Warthin Tumor

A usually harmless tumor of a salivary gland, most often the parotid near the ear. It is strongly associated with tobacco use and may occur on both sides; evaluation distinguishes it from other growths.

## Wart Remover Poisoning

Toxic exposure to a wart-removal product, often involving salicylic acid or another keratolytic. Severity depends on the substance, amount, route, symptoms, and duration of exposure.

## Warty Dyskeratoma

A usually harmless skin growth, often on the head or neck, with a small central dip filled with keratin. It may look like skin cancer, so examination and sometimes a biopsy are needed.

---

## Wasting

Abnormal loss of body weight, muscle, or other tissue, often associated with chronic disease, inadequate nutrition, inflammation, or cancer. Severe wasting may impair strength, immunity, and recovery.

## Watchful Waiting

Planned observation without immediate active treatment, with clinical review and treatment if symptoms develop or the condition progresses. It may be used for selected cancers and other slowly progressive conditions.

## Water Birth

Delivery of a baby while the birthing person remains in a tub or pool of warm water. It may reduce perceived labor pain for some people, but evidence about delivery-related benefits and risks is limited. Eligibility, monitoring, and facility policies determine whether it is offered.

### Alternate Names:

Aquatic Delivery; Water Labor and Birth

## Water Blister

A fluid-filled blister, usually containing clear serum, caused by friction, pressure, burns, or some skin disorders. The blister should be protected from further trauma and assessed if infected or widespread.

## Waterborne Bacterial Disease

An infection acquired from water contaminated with bacteria, such as cholera, typhoid fever, or leptospirosis; prevention depends on safe water, sanitation, and food hygiene.

## Water-Borne Disease

An illness acquired through water contaminated with infectious organisms or harmful chemicals. Examples include cholera, typhoid fever, and hepatitis A; prevention includes safe drinking water, sanitation, hand hygiene, and appropriate treatment of contaminated water.

## Water Brash

A sudden rise of watery or salty-tasting saliva into the mouth, usually because stomach acid has refluxed into the esophagus. It may occur with heartburn, sour taste, throat irritation, or regurgitation.

## Water Channel

A protein pore in a cell membrane that lets water cross quickly. These pores help the kidneys and other tissues move water and maintain the body's fluid balance.

## Water Consumption

Intake of water and other fluids to replace normal losses and maintain hydration. Requirements vary with body size, diet, activity, climate, pregnancy, illness, and kidney or heart function; thirst and urine concentration can help guide intake, while excessive intake can cause dangerous hyponatremia.

## Water-Deprivation Test

A supervised test that briefly limits drinking while urine concentration and blood results are monitored. It helps identify why a person produces excessive amounts of dilute urine and must be done under medical supervision because dehydration and high sodium can occur.

## Water Hammer Pulse

A physical sign of severe chronic aortic regurgitation or high-output states characterized by a bounding, hyperdynamic peripheral pulse with an abrupt, forceful systolic upstroke followed by a rapid, precipitous diastolic collapse.

### Alternate Names:

Corrigan Pulse; Collapsing Pulse

## Water-Hammer Pulse

A pulse that feels forceful at first and then suddenly collapses. It is often associated with severe leakage of the aortic valve or other causes of a wide pulse pressure.

### Alternate Names:

Corrigan's Pulse; Collapsing Pulse; Cannon Pulse

---

### Waterhouse-Friderichsen Syndrome

Waterhouse-Friderichsen syndrome is adrenal hemorrhage and acute adrenal failure associated with overwhelming sepsis, classically meningococcal infection, causing shock and coagulopathy.

### Water Intoxication

A dangerous fall in blood sodium caused by drinking or retaining more water than the body can remove. Severe cases can cause headache, confusion, seizures, or coma and need urgent treatment.

### Water On The Brain

A nontechnical term usually referring to hydrocephalus, an abnormal accumulation or impaired circulation of cerebrospinal fluid that enlarges the ventricles and may increase intracranial pressure.

### Water On The Knee

Alternate name; see *Swollen knee*.

### Water Retention

Excess accumulation of fluid in the body's tissues or cavities, commonly causing swelling and sometimes resulting from heart, kidney, liver, venous, hormonal, or medication-related disorders.

### Watershed Infarction

An ischemic cerebral or intestinal infarct occurring at the border zones between the terminal distal capillary distributions of two non-anastomosing major arterial territories (e.g., between ACA and MCA in the brain, or at the splenic flexure / Griffiths point in the colon), provoked by systemic hypoperfusion and severe hypotension.

#### Alternate Names:

Border-Zone Infarction

### Water-Soluble Vitamin

A vitamin that dissolves in water and is stored only in limited amounts. The group includes vitamin C and the B vitamins, so regular intake is generally needed.

### Waterston Shunt

A historical palliative surgical systemic-to-pulmonary shunt created between the ascending aorta and the right pulmonary artery to increase pulmonary blood flow in infants with cyanotic congenital heart defects. It has largely been replaced by the modified Blalock-Taussig shunt due to lower complication rates.

#### Alternate Names:

Waterston-Cooley Anastomosis; Ascending Aorta to Right Pulmonary Artery Shunt

### Watery Eyes

Excessive tearing caused by irritation, allergy, infection, dry-eye reflex tearing, or blockage of the tear-drainage system. Persistent unilateral tearing or pain requires ocular assessment.

### Wax

A water-resistant substance produced by ceruminous glands in the ear canal; earwax protects the canal and usually clears naturally.

### Wax Poisoning

Toxic exposure to a wax product, usually causing little harm after a small accidental ingestion but potentially causing choking, aspiration, irritation, or toxicity when mixed with other chemicals.

### Waxy Casts

Large, smooth, pale tube-shaped particles seen under a microscope in urine. They form in damaged kidney tubules and can suggest severe or long-standing kidney disease, especially when other urine or blood tests are abnormal.

### WBC Count

A measurement of the number of white blood cells in a volume of blood, used with the differential count to evaluate infection, inflammation, immune disorders, marrow disease, or treatment effects.

### Weakness

Reduced ability to generate force, which may be generalized or limited to one body region. Causes

---

include disorders of muscle, nerve, neuromuscular junction, brain, or spinal cord, as well as metabolic illness, infection, medication effects, and deconditioning; sudden one-sided weakness or weakness with breathing, swallowing, or speech difficulty requires emergency assessment.

### Weaning

Gradual reduction and eventual discontinuation of breastfeeding, bottle-feeding, or a medicine or other treatment, according to the relevant clinical context.

### Wear Debris

Tiny particles produced when an artificial joint or other implant wears down. The particles can trigger inflammation, damage nearby bone, loosen the implant, and eventually cause it to fail.

### Weaver's Bottom

Inflammation of the ischial bursa over the sitting bone, causing pain in the buttock that may worsen with prolonged sitting. It is also called ischial bursitis.

### Weaver Syndrome

A rare genetic condition causing rapid growth before and after birth, a large head, distinctive facial features, low muscle tone, and delayed development or learning. Bone age may be advanced. Most cases involve a change in the *EZH2* gene; care is tailored to the child's needs.

### Webbed Fingers

Partial or complete joining of adjacent fingers by skin or soft tissue, known as syndactyly; it may be congenital or acquired.

### Webbed Neck

Extra folds of skin extending from the sides of the neck toward the shoulders. They may be present from birth and can occur with conditions such as Turner syndrome or Noonan syndrome.

### Webbing Of The Fingers Or Toes

Partial or complete joining of adjacent fingers or

toes by skin or other tissue. It is called syndactyly and may be congenital or acquired.

### Weber

A name used in hearing assessment, especially the Weber test, in which a vibrating tuning fork is placed on the forehead or skull. It helps compare hearing between the two ears but is not a unit of measurement.

### Weber-Christian Disease

Alternate name; see *Weber-Christian Disease*.

### Weber Syndrome

A brainstem stroke syndrome caused by occlusion of paramedian branches of the posterior cerebral artery affecting the anterior midbrain. It is characterized by ipsilateral oculomotor (cranial nerve III) palsy and contralateral spastic hemiparesis of the upper and lower extremities.

#### Alternate Names:

Superior Alternating Hemiplegia; Ventral Midbrain Syndrome

### Weber Test

A quick hearing test using a vibrating tuning fork placed on the middle of the forehead or skull. The examiner asks which ear hears the sound louder; the result helps distinguish blockage-related hearing loss from inner-ear or nerve-related loss.

### Wedge Excision

Surgical removal of a triangular or wedge-shaped portion of tissue; commonly performed for breast biopsies, cervical lesions, and skin tumors.

### Wedge Resection

Surgery that removes a small wedge-shaped piece of tissue, commonly from the lung or breast, to diagnose or treat a localized lesion. It removes less tissue than removal of an entire lobe.

### Weever Fish

A venomous marine fish whose dorsal spines can cause a painful sting, local swelling, and occasionally

---

systemic symptoms.

### Weight-Bearing As Tolerated

An orthopaedic postoperative rehabilitation prescription allowing the patient to place as much weight and mechanical force on an injured or operated lower extremity as is comfortable and tolerated without severe pain, typically using crutches or a walker for support.

**Alternate Names:**  
WBAT

### Weight Gain

Increase in body weight; may be intentional (muscle building, pregnancy) or unintentional (fluid retention, endocrine disorders, medication effects).

### Weight Gain In Pregnancy

Recommended weight gain depends on weight before pregnancy and whether one or more babies are expected. For one baby, usual ranges are about 12.5–18 kg if underweight, 11.5–16 kg at usual weight, 7–11.5 kg if overweight, and 5–9 kg with obesity; prenatal clinicians monitor the pattern and fetal growth.

### Weight Gain – Unintentional

Increase in body weight without a planned change in diet or activity, often caused by fluid retention, medicines, endocrine disease, reduced activity, or changes in eating; rapid swelling or breathlessness needs prompt assessment.

### Weight Loss

A decrease in body weight that may be intentional or unintentional. Intentional loss is usually achieved through sustainable changes in eating, physical activity, and behavior; unintentional or rapid loss can indicate illness, inadequate nutrition, or medication effects and may require medical evaluation.

### Weight Loss Medications

Medicines prescribed for selected people with obesity to help reduce weight, usually together with nutrition and activity changes. Choice depends on health conditions, other medicines, side effects, cost,

and treatment goals.

### Weight-Loss Medicines

Alternate name; see *Weight Loss Medications*.

### Weight Loss Surgery

Weight-loss surgery, or bariatric surgery, changes the stomach or digestive tract to help treat severe obesity and related conditions. It requires long-term nutritional, medical, and lifestyle follow-up.

### Weight-Reducing Diets

Dietary plans intended to create a sustained energy deficit and reduce excess body weight, ideally individualized with attention to nutrition, health conditions, and long-term adherence.

### Weil Disease

Alternate name; see *Leptospirosis*.

### Weil-Felix Reaction

A historical agglutination serological test for rickettsial infections (such as typhus and spotted fevers) that utilizes cross-reacting somatic O-antigens of *Proteus vulgaris* strains (OX-19, OX-2, and OX-K) to detect serum anti-rickettsial antibodies.

### Weil-Felix Test

A classic serological agglutination assay that utilizes antigens from cross-reacting *Proteus vulgaris* strains (OX-19, OX-2, OX-K) to detect serum antibodies against various *Rickettsia* species responsible for typhus and spotted fever infections.

**Alternate Names:**

Weil-Felix Agglutination Reaction; Proteus Agglutination Test

### Weill-Marchesani Syndrome

A rare inherited systemic connective tissue disorder characterized by the constellation of brachydactyly (short fingers and toes), short stature, joint stiffness, microspherophakia (small spherical lenses), and ectopia lentis with high predisposition to secondary pupillary block angle-closure glaucoma. Caused by autosomal recessive mutations in *ADAMTS10* or

---

autosomal dominant mutations in *FBN1*.

**Alternate Names:**

WMS; Spherophakia-Brachymorphia Syndrome

**Weil's Disease**

A zoonotic bacterial infection caused by spirochaetes of the genus *Leptospira*, transmitted through contact with water or soil contaminated with the urine of infected animals (rodents, cattle, dogs). See *Lep-tospirosis*.

**Wellens Syndrome**

A specific pattern on a heart tracing that can signal severe narrowing of a major heart artery, even after chest pain stops. It indicates high heart-attack risk and needs urgent specialist assessment; exercise testing can be dangerous.

**Alternate Names:**

Wellens Pattern; LAD Coronary T-Wave Syndrome; Wellens Sign

**Wells Score**

A validated clinical prediction rule used to estimate the probability that a patient has a dangerous blood clot, specifically deep vein thrombosis (DVT) in the legs or pulmonary embolism (PE) in the lungs. By calculating points for clinical risk factors (including active cancer, recent surgery or bed rest, localized leg swelling or tenderness, fast heart rate, coughing blood, and prior clots), patients are categorized as “unlikely” (low risk) or “likely” (high risk). In low-risk patients, a normal/negative D-dimer blood test safely rules out a clot without scans; high-risk patients proceed directly to imaging (leg compression ultrasound for DVT or CT pulmonary angiography for PE).

**Alternate Names:**

Wells Criteria; Wells Clinical Score; Wells Rule for DVT and PE

**Wells Score For Pulmonary Embolism**

Alternate name; see *Wells Score*.

**Wells Syndrome (Eosinophilic Cellulitis)**

A recurrent inflammatory skin disorder with itchy or burning red plaques, swelling, and tissue eosinophils

that can mimic bacterial cellulitis. It is not usually an infection; biopsy helps diagnosis and systemic corticosteroids may be used for severe flares.

**Welt**

A raised, often itchy area of skin caused by localized swelling, commonly seen in hives or after an insect bite. A welt may fade within hours, but persistent or severe reactions need evaluation.

**Wen**

A common, usually harmless lump beneath the skin filled with a soft protein called keratin. It may become swollen, painful, or infected and can be removed if necessary.

**Alternate Names:**

Infundibular Cyst; Epidermal Inclusion Cyst; Sebaceous Wen

**Wenckebach Phenomenon**

A heart-rhythm pattern in which each heartbeat takes slightly longer to pass from the upper to lower chambers until one beat is missed. It may be harmless or reflect heart disease, depending on the setting.

**Alternate Names:**

Second-Degree AV Block Type 1; Mobitz I Block

**Wens**

Alternate name; see *Epidermoid cyst*.

**Werdnig-Hoffmann Disease**

The most severe early form of inherited spinal muscular atrophy, also called type 1 spinal muscular atrophy. It usually begins before 6 months of age and causes very weak muscles, poor head control, reduced reflexes, a weak cry, feeding difficulty, and breathing problems. Babies generally cannot sit without support. New treatments can improve survival and function, but affected infants need urgent specialist care and breathing and feeding support.

**Alternate Names:**

Spinal Muscular Atrophy Type 1 (SMA 1); Severe Infantile Spinal Muscular Atrophy

---

### Wermer's Syndrome

Alternate name; see *Multiple endocrine neoplasia, type 1 (MEN 1)*.

### Wermer Syndrome

Alternate name; see *Multiple endocrine neoplasia, type 1 (MEN 1)*.

### Werner's Syndrome

A rare inherited condition that causes signs of aging earlier than usual, often after puberty. It may cause early cataracts, short stature, thin skin, gray hair, diabetes, weak bones, and increased cancer risk.

### Werner Syndrome

A rare inherited condition that causes signs of aging earlier than usual, often after puberty. Features may include short stature, early cataracts, thin or tight skin, gray hair, diabetes, weak bones, and increased cancer risk. Regular medical monitoring and treatment of each complication are needed.

### Wernicke Aphasia

A fluent receptive aphasic syndrome resulting from an ischemic stroke or lesion in the posterior portion of the superior temporal gyrus of the dominant hemisphere (Brodmann area 22), characterized by fluent, effortless speech that lacks semantic meaning ("word salad"), accompanied by profound impairment in language comprehension and repetition.

#### Alternate Names:

Receptive Aphasia; Sensory Aphasia

### Wernicke Area

A brain region, usually in the left temporal lobe, that helps a person understand spoken and written language. Damage can cause fluent speech that lacks meaning and poor understanding of language.

### Wernicke Encephalopathy

A sudden brain disorder caused by severe vitamin B1 deficiency. It may cause confusion, difficulty walking, and abnormal eye movements and can lead to permanent damage without prompt treatment.

### Wernicke-Korsakoff Encephalopathy

A spectrum of neurocognitive impairment caused by severe thiamine (vitamin B1) deficiency (most commonly in chronic alcohol use disorder), progressing from the acute reversible triad of Wernicke encephalopathy (confusion, ataxia, ophthalmoplegia) to the chronic irreversible Korsakoff syndrome (anterograde amnesia, confabulation).

### Wernicke-Korsakoff Syndrome

A brain disorder caused by severe vitamin B1 deficiency. It may begin with confusion and poor coordination and leave lasting memory problems, difficulty learning, and inaccurate made-up explanations; alcohol misuse, poor nutrition, and prolonged vomiting are common causes.

### Wernicke's Area

A brain region important for understanding spoken and written language.

#### Alternate Names:

Wernicke's Speech Area; Sensory Speech Area

### Wernicke's Encephalopathy

An acute neurologic disorder caused by thiamine deficiency, classically involving confusion, eye-movement abnormalities, and gait or coordination impairment. It requires prompt thiamine treatment.

### Westergren Method

The reference laboratory procedure used to determine the erythrocyte sedimentation rate (ESR). Anticoagulated whole blood is placed in an upright, calibrated Westergren tube for one hour, measuring the distance in millimeters that red blood cells settle under gravity to assess systemic inflammation.

#### Alternate Names:

Westergren ESR; Westergren Sedimentation Technique

### Westermark Sign

An area of unusually reduced blood-vessel markings on a chest X-ray, sometimes seen beyond a clot in a lung artery. It may suggest pulmonary embolism but is not reliable enough to diagnose it alone.

---

## Western Blot

A laboratory test that separates proteins and uses antibodies to find a specific protein. It can help study infections, immune reactions, or genetic and research problems, depending on the test.

### Alternate Names:

Protein Immunoblot

## Westley Croup Score

A clinical score used to estimate how severely croup is obstructing a child's airway. It considers noisy breathing, chest retractions, air movement, bluish coloring, and alertness; a higher score suggests more severe illness and helps guide urgent treatment and observation.

### Alternate Names:

Westley Clinical Scoring System for Croup; Croup Severity Score

## West Nile Encephalitis

Inflammation of the brain caused by neuroinvasive West Nile virus, transmitted mainly by mosquitoes. It may cause fever, headache, confusion, tremor, weakness, seizures, or coma. There is no specific routine antiviral treatment; severe illness requires hospital-based supportive care.

## West Nile Neuroinvasive Disease

A severe, potentially fatal manifestation of mosquito-borne West Nile virus infection affecting less than 1 percent of infected individuals, presenting as aseptic meningitis, encephalitis (with tremors and parkinsonism), or acute flaccid paralysis resembling poliomyelitis (anterior horn cell loss).

### Alternate Names:

WNND

## West Nile Virus

A mosquito-borne flavivirus that can cause asymptomatic infection, a febrile illness, or neuroinvasive disease such as meningitis, encephalitis, or acute flaccid paralysis. Risk of severe disease is higher in older adults and people with certain medical conditions.

## West Nile Virus Infection

West Nile virus infection is a mosquito-borne illness ranging from fever and body aches to neuroinvasive meningitis, encephalitis, weakness, or paralysis.

## West Syndrome

A serious seizure disorder beginning in infancy, with repeated sudden spasms and an abnormal brain-wave pattern. Development may slow or regress; causes include brain injury, genetic conditions, and metabolic disease, and urgent treatment is needed.

## Wet Age-Related Macular Degeneration

Alternate name; see *Wet macular degeneration*.

## Wet AMD

Alternate name; see *Wet macular degeneration*.

## Wet Beriberi

The predominantly cardiovascular form of severe thiamine deficiency. It can cause a fast heartbeat, enlarged or weakened heart, fluid retention, swelling, and high-output heart failure.

## Wet Dream

Involuntary ejaculation during sleep, usually occurring in adolescence or adulthood and generally a normal physiological event.

## Wet Gangrene

Tissue death complicated by bacterial infection and tissue swelling, producing moist, discolored, rapidly spreading necrosis. It requires urgent medical assessment.

## Wet Macular Degeneration

The neovascular form of age-related macular degeneration in which abnormal blood vessels grow beneath or within the retina and leak fluid or blood, causing rapid central-vision loss.

### Alternate Names:

Neovascular AMD; Exudative Age-Related Macular Degeneration; Wet AMD

---

### Wet-to-Dry Dressing

A mechanical wound debridement technique in which saline-moistened gauze is applied directly to an open wound bed, allowed to dry, and subsequently removed. Dead tissue and exudate adhering to the dried dressing are pulled away during dressing changes.

#### Alternate Names:

Wet-to-Dry Debridement; Mechanical Gauze Dressing

### Wharton Duct

The primary excretory duct of the submandibular salivary gland, approximately 5 cm in length, that courses anteromedially along the floor of the mouth to empty through the sublingual caruncle at the base of the lingual frenulum; the most frequent anatomical site of salivary sialolithiasis.

#### Alternate Names:

Submandibular Duct

### Wharton Jelly

The soft, jelly-like tissue surrounding the blood vessels in the umbilical cord. It cushions the vessels and helps prevent them from being squeezed or bent during pregnancy and labor.

### Wharton's Jelly

Gelatinous connective tissue within the umbilical cord that surrounds and supports the umbilical blood vessels and helps protect them from compression.

### Wheal

A temporary, raised, often itchy area of skin caused by swelling in the skin. It commonly occurs with hives, an allergic reaction, or an insect bite and may move or disappear within hours.

### Wheal And Flare

A temporary raised, swollen area of skin surrounded by redness. It is usually caused by release of histamine during hives, an allergy, or another immediate skin reaction.

### Wheat Allergy

An immune reaction to proteins in wheat that may cause hives, stomach symptoms, vomiting, or breathing problems.

#### Alternate Names:

Wheat Hypersensitivity; Cereal Grain Allergy

### Wheelchairs

Alternate name; see *Wheelchair*.

### Wheeled Stretcher

Mobile patient transport device with wheels; used in hospitals and emergency services for moving patients who cannot walk.

### Wheeze

A high-pitched whistling sound caused by narrowed airways. It often occurs with asthma, infection, allergy, or chronic lung disease; sudden wheezing after choking or with severe breathlessness needs urgent care.

### Wheezing

A musical or whistling sound caused by narrowed lower airways, usually louder when breathing out. It may result from asthma, infection, chronic lung disease, allergy, airway swelling, mucus, or an inhaled object.

### Whiplash

A neck injury caused by the head moving suddenly backward and forward, often in a vehicle crash but also after a fall or sports injury. Pain, stiffness, headache, dizziness, or arm tingling may appear immediately or later. Most cases improve over weeks, but weakness, numbness, trouble walking, or severe pain after major trauma needs urgent assessment.

#### Alternate Names:

Cervical Acceleration-Deceleration Injury; CAD Injury; Neck Sprain

### Whiplash Injury

Alternate name; see *Whiplash*.

---

## Whipple Disease

A rare bacterial infection that can damage the small intestine, joints, brain, heart, or other organs. It may cause years of joint pain followed by weight loss, persistent diarrhea, abdominal pain, and poor nutrient absorption.

## Whipple Procedure

A major operation that removes the head of the pancreas and nearby parts of the small intestine, bile duct, and gallbladder, then reconnects the digestive tract. It is used for selected cancers and other serious diseases in this area.

## Whipple's Disease

A rare bacterial infection caused by *Tropheryma whipplei*, damaging intestinal absorption and potentially affecting joints, brain, or heart.

### Alternate Names:

*Tropheryma Whipplei* Infection; Whipple Disease

## Whipple Triad

Three findings supporting that symptoms are caused by low blood sugar: typical symptoms occur, blood sugar is low at that time, and symptoms improve after blood sugar is raised.

## Whipple Triad for Insulinoma

Three findings that support that symptoms are caused by low blood sugar: symptoms occur, blood sugar is low at the same time, and the symptoms improve when blood sugar rises. Doctors use this pattern with other tests to find the cause, including a possible insulinoma.

## Whipple Triad of Hypoglycemia

The three cardinal clinical criteria required to substantiate a clinical diagnosis of genuine hypoglycemia: symptoms and signs consistent with hypoglycemia (such as diaphoresis, tremor, tachycardia, confusion); a documented low plasma glucose concentration (typically below 55 mg/dL [3.0 mmol/L]) at the exact time of symptoms; and prompt resolution of symptoms following administration of exogenous glucose.

### Alternate Names:

## Whipple Hypoglycemic Triad

## Whipworm

A parasitic roundworm of the genus *Trichuris*, usually *Trichuris trichiura* in humans. Infection occurs by ingesting embryonated eggs and may cause abdominal pain, diarrhea, anemia, or rectal prolapse when severe.

## Whipworm Infection

Intestinal infection caused by the soil-transmitted helminth *Trichuris trichiura* (whipworm), endemic in tropical and subtropical regions with poor sanitation. Humans acquire infection by ingesting embryonated eggs from contaminated soil, food, or water.

### Alternate Names:

*Trichuris Trichiura* Infection; Whipworm Infection

## Whirlpool Bath

Hydrotherapy device providing agitated water for therapeutic bathing; used in wound care, physical therapy, and rehabilitation.

## Whispered Pectoriloquy

An examination finding in which whispered words sound unusually clear through a stethoscope over the lung. It may suggest that air-filled lung has become solid, as in pneumonia, but it is not diagnostic alone.

## White Blood Cell

A cell of the immune system that helps protect the body from infections, foreign substances, and abnormal cells. White blood cells are made mainly in the bone marrow and include neutrophils, lymphocytes, monocytes, eosinophils, and basophils. Their number or function may change with infection, inflammation, immune disorders, or bone-marrow disease.

## White Blood Cell Count

A blood test measuring the number of white blood cells. A high or low result can occur with infection, inflammation, medicines, immune disorders, or bone-marrow disease and must be interpreted with the

---

differential count and clinical findings.

### **White Blood Cell Labeling**

A scan method in which a person's white blood cells are removed, marked with a small amount of radioactive material, and returned to the body. The cells may collect at areas of infection or inflammation, which can then be seen on images.

### **White Cell**

Another name for a white blood cell, an immune cell made mainly in the bone marrow that helps defend the body against infection, foreign substances, and abnormal cells.

### **White Cell Count**

A blood test measuring the number of white blood cells and often the proportion of each type. Results help assess infection, inflammation, immune disorders, and bone-marrow problems.

### **White Clot Syndrome**

A severe arterial or venous thrombotic complication associated with heparin-induced thrombocytopenia (HIT). It is characterized by platelet-dense, fibrin-rich arterial thrombi (white thrombi) that can lead to limb ischemia, stroke, or myocardial infarction.

#### **Alternate Names:**

HIT-Associated Thrombosis; Heparin-Associated White Thrombus Syndrome

### **White Coat Hypertension**

A clinical blood pressure pattern characterized by persistently elevated blood pressure readings recorded in a medical office or clinic setting in an individual whose out-of-office automated ambulatory or home blood pressure monitoring readings are consistently normotensive.

#### **Alternate Names:**

White Coat Effect; Isolated Clinic Hypertension

### **White-Coat Hypertension**

Blood pressure that is high in a medical setting but normal outside it. Home or ambulatory readings help confirm the pattern, which may still predict

higher future hypertension risk.

#### **Alternate Names:**

White-Coat Syndrome; Isolated Clinic Hypertension

### **White Finger**

Episodic pallor or whitening of the fingers caused by vasospasm, commonly associated with Raynaud phenomenon or hand-arm vibration syndrome.

### **Whiteheads**

Whiteheads are closed comedones formed when oil and dead skin block a hair follicle, producing small pale or skin-colored acne bumps.

### **White Infarction**

Tissue death caused by loss of blood flow in a solid organ such as the heart, kidney, or spleen. The damaged area looks pale because little blood can reach it through alternate vessels.

#### **Alternate Names:**

Anemic Infarction; Pale Infarction

### **White Matter**

Tissue in the brain and spinal cord made mainly of nerve fibers covered by a protective substance called myelin. It carries signals between different brain areas and between the brain and spinal cord.

### **White Matter Hyperintensities**

Areas of increased signal intensity on T2-weighted and FLAIR brain magnetic resonance imaging scans located in the deep periventricular and subcortical white matter, representing microvascular lipohyalinosis, chronic ischemia, and demyelination from cerebral small vessel disease.

#### **Alternate Names:**

WMHs; Leukoaraiosis

### **White Matter Of The Brain**

The brain tissue composed mainly of myelinated axons and supporting glial cells, connecting different brain regions and the brain with the spinal cord; disease or injury can impair cognition, sensation, coordination, or movement.

---

## White Of The Eye

The sclera, the tough, opaque outer coat of the eye surrounding the cornea and helping maintain the shape of the globe.

## White Spot Disease

Alternate name; see *Lichen sclerosus*.

## White Tongue

A white coating or patches on the tongue caused by debris, dry mouth, irritation, infection, inflammation, or other oral conditions.

## Whitlow

An infection of the fingertip or tissues around a finger or toenail, often involving the nail fold. It may be bacterial, fungal, or caused by herpes simplex virus; painful grouped blisters suggest herpetic whitlow, whereas pus and a localized abscess suggest bacterial infection.

## Whitlows

Plural of whitlow; see *Whitlow*.

## WHO Classification of Vitamin A Deficiency

A standardized clinical grading system established by the World Health Organization (WHO) to stage eye damage (xerophthalmia) caused by vitamin A deficiency:

- **XN:** Night blindness (inability to see in dim light or darkness).
- **X1A:** Conjunctival xerosis (dryness and lack of shine on the white of the eye).
- **X1B:** Bitot's spots (foamy, silvery-white patches on the white of the eye).
- **X2:** Corneal xerosis (hazy, dry surface on the clear front of the eye).
- **X3A:** Corneal ulceration or keratomalacia involving less than one-third of the cornea.
- **X3B:** Severe corneal melting (keratomalacia) involving one-third or more of the cornea, causing permanent blindness.
- **XS:** Corneal scars (permanent scarring left by healed ulcers).

- **XF:** Xerophthalmic fundus (small pale spots on the back of the eye/retina).

### Alternate Names:

WHO Xerophthalmia Classification; Vitamin A Deficiency Eye Grading; WHO Vitamin A Staging

## Whole-Body Irradiation

Radiation treatment directed at the entire body, most often given before a stem-cell transplant to suppress the immune system and make room for donated cells. It can affect the bone marrow, fertility, and other organs.

## Whole-Body Magnetic Resonance Imaging

An MRI examination that produces images of much or all of the body without using X-rays. It is used in selected cases to look for widespread disease, tumors, or problems affecting several body areas.

## Whole-Body Scan

An imaging examination that surveys much or all of the body, using a technique such as PET/CT, CT, MRI, or a nuclear medicine scan. It may be used for selected cancer staging, infection localization, or evaluation of systemic disease; the coverage and usefulness depend on the test and clinical question.

## Whole Bowel Irrigation

A gastrointestinal decontamination technique in acute clinical toxicology in which large volumes of an isosmotic polyethylene glycol electrolyte solution are administered orally or via nasogastric tube until the rectal effluent is clear, indicated for toxic ingestions of sustained-release medications, enteric-coated tablets, iron, or illicit drug packets ("body packers").

### Alternate Names:

WBI

## Whole-Bowel Irrigation

A hospital treatment that flushes the intestines with a special polyethylene-glycol drink. It is used only for selected poisonings or swallowed objects after clinicians assess the airway and risks.

---

### Whole-Brain Radiation Therapy

Radiation treatment directed at the entire brain, used in selected people with multiple brain metastases or cancer cells around the brain. It may also be used to reduce brain-spread risk in selected cancers; side effects depend on dose and treatment plan.

### Whole Breast Radiation Therapy

Whole breast radiation therapy treats remaining breast tissue after breast-conserving surgery to reduce local recurrence risk, with planned dosing and monitoring for skin and tissue effects.

### Whole Exome Sequencing

A genetic test that reads most protein-coding sections of a person's DNA. It can identify changes causing some inherited disorders, but it may miss changes outside coding regions, structural changes, or causes not yet understood; results require clinical interpretation.

### Whole Genome Sequencing

Laboratory analysis of nearly all of a person's nuclear DNA, including coding and noncoding regions, and sometimes mitochondrial DNA. It can identify many types of genetic variants but may produce uncertain or incidental findings and does not detect every cause of disease; results require appropriate clinical interpretation.

### Whole-Genome Sequencing

Sequencing of nearly the complete nuclear genome, including coding and noncoding regions, together with mitochondrial DNA when covered by the assay. It can detect a broad range of variants but generates substantial interpretation and incidental-finding challenges.

### Whooping Cough

A highly contagious respiratory infection caused by *Bordetella pertussis*. It causes prolonged bouts of rapid coughing that may be followed by a whooping sound or vomiting; infants may have pauses in breathing without the typical whoop. Also called pertussis.

### Whooping-Cough

Alternate name; see *Whooping Cough*.

### Whorled Pattern

A characteristic histological or clinical swirling, spiraling architectural configuration. In pathology, it describes swirling arrangements of spindle cells seen in meningiomas, fibromas, or leiomyomas; in dermatology, it describes patterns along the lines of Blaschko.

#### Alternate Names:

Whorled Architecture; Storiform-Whorled Pattern

### Wickham Striae

Fine, lacy white reticular lines and arborizing patterns seen on the surface of papules and mucosal plaques in lichen planus, classically observed on the buccal mucosa.

### Widal Reaction

An older blood test for antibodies associated with typhoid or paratyphoid fever. It is not very reliable because results may reflect past infection or vaccination, so culture or molecular testing is usually preferred.

### Widal Test

A historical presumptive serological agglutination test for enteric (typhoid and paratyphoid) fever that detects agglutinating serum antibodies against the somatic O and flagellar H antigens of *Salmonella enterica* serovar Typhi.

### Widely Spaced Teeth

Teeth separated by unusually large gaps, also called diastema when the gap is localized. Causes include normal development, missing teeth, tooth-size differences, habits, or jaw and gum conditions.

### Widened Mediastinum

A radiographic finding on an upright posterior-anterior chest X-ray defined as mediastinal width exceeding 8 cm (or greater than twenty-five percent of thoracic width). It warrants urgent evaluation for acute aortic dissection, mediastinal hematoma,

---

mediastinitis, or mass lesions.

**Alternate Names:**

Mediastinal Widening; Mediastinal Enlargement

**Widened Pulse Pressure**

A pulse pressure (difference between systolic and diastolic blood pressure) greater than 60 mmHg or greater than fifty percent of the systolic value. It is commonly observed in aortic regurgitation, severe arteriosclerosis, thyrotoxicosis, fever, sepsis, and arteriovenous malformations.

**Wide Splitting of S2**

An abnormal prolongation of the interval between the aortic (A2) and pulmonic (P2) components of the second heart sound that varies physiologically with respiration but remains distinctly separated in expiration. It occurs due to delayed right ventricular emptying (such as right bundle branch block or pulmonary stenosis) or early aortic valve closure.

**Wilkie Syndrome**

Vascular compression of the third (horizontal) segment of the duodenum between the abdominal aorta and the overlying superior mesenteric artery (SMA). It leads to partial or complete duodenal obstruction, characterized by postprandial abdominal pain, early satiety, nausea, and vomiting.

**Alternate Names:**

Superior Mesenteric Artery Syndrome; SMA Syndrome; Arteriomesenteric Duodenal Compression

**Williams Syndrome**

A genetic condition caused by loss of a small section of chromosome 7, including a gene important for elastic tissues. It may cause characteristic facial features, heart-vessel narrowing, high blood calcium, developmental differences, learning difficulties, and connective-tissue problems. Regular heart, calcium, hearing, and developmental checks are important.

**Wilms Tumor**

A malignant embryonal tumor of the kidney in children. It may present as an abdominal mass, pain, hematuria, or an incidental finding and may be associated with syndromes such as WAGR or Beckwith-

Wiedemann syndrome. Treatment and prognosis depend on stage and tumor biology.

**Alternate Names:**

Nephroblastoma; Pediatric Renal Adenosarcoma

**Wilm's Tumour**

Source spelling variant of *Wilms tumor*, a malignant embryonal kidney tumor occurring mainly in young children.

**Wilson Disease**

An autosomal recessive disorder usually caused by disease-causing variants in the *ATP7B* gene, which encodes a protein needed to transport copper and excrete excess copper into bile. Copper accumulates in the liver and may later affect the brain, eyes, kidneys, blood, and other tissues. Manifestations include hepatitis, cirrhosis, acute or chronic liver failure, tremor, dystonia, poor coordination, speech changes, mood or behavior changes, and Kayser-Fleischer rings around the cornea.

**Wilson's Disease**

Alternate name; see *Wilson Disease*.

**Winchester Syndrome**

A very rare inherited skeletal dysplasia with progressive osteolysis, short stature, joint contractures, and characteristic facial or skin findings. It requires genetic, orthopedic, and multidisciplinary evaluation.

**Windkessel Effect**

The hemodynamic property of large elastic arteries, particularly the aorta, which expand during ventricular systole to store a portion of stroke volume and recoil during diastole. This elastic recoil sustains downstream blood flow and maintains organ perfusion throughout diastole.

**Alternate Names:**

Windkessel Function; Arterial Elastic Reservoir Effect

**Windowing**

Adjusting the brightness and contrast of a CT image

---

so particular tissues, such as bone, lung, or soft tissue, are easier to see.

### Windpipe

The tube carrying air from the voice box to the two main airways leading to the lungs. It is supported by firm rings that help keep it open.

### Winged Scapula

An abnormal musculoskeletal prominence of the medial border and inferior angle of the scapula protruding posteriorly from the thoracic cage, most commonly caused by traction injury, surgical damage, or neuropathy of the long thoracic nerve of Bell paralyzing the serratus anterior muscle.

#### Alternate Names:

Scapula Alata

### Winterbottom Sign

Prominent enlargement of the posterior cervical lymph nodes that serves as a classic clinical physical sign of early-stage African trypanosomiasis (sleeping sickness), caused by *Trypanosoma brucei*.

#### Alternate Names:

Winterbottom's Sign

### Winter Formula

An established physiological mathematical equation used to assess whether respiratory compensation is appropriate in a patient with pure metabolic acidosis. Calculated as  $\text{Expected } PaCO_2 = (1.5 \times [HCO_3^-]) + 8 \pm 2$ ; a measured  $PaCO_2$  higher than the calculated expected range signifies a concomitant primary respiratory acidosis (ventilatory failure), whereas a measured  $PaCO_2$  lower than expected indicates an accompanying primary respiratory alkalosis.

#### Alternate Names:

Winter's Compensation Formula; Acid-Base Compensation Equation

### Winter's Formula

A clinical physiological equation used to calculate expected respiratory compensation (arterial partial pressure of carbon dioxide,  $PCO_2$ ) in response to metabolic acidosis:  $PCO_2 = (1.5 \times [HCO_3^-]) + 8 \pm 2$ .

If measured  $PCO_2$  is higher or lower than calculated, a coexisting respiratory acidosis or alkalosis is present.

#### Alternate Names:

Winter Formula; Metabolic Acidosis Compensation Formula

### Winter Vomiting Disease

An acute gastroenteritis, usually caused by norovirus, characterized by sudden vomiting, diarrhea, and abdominal cramps.

### Wireless Motility Capsule

A swallowed capsule that records pressure, acidity, temperature, and movement as it travels through the digestive tract. The measurements estimate how long food takes to pass through the stomach and intestines and may help investigate unexplained constipation, diarrhea, nausea, or bloating.

### Wirsung Duct

The main excretory duct of the pancreas, extending from the tail through the body and head of the gland, joining the common bile duct at the hepatopancreatic ampulla of Vater to empty digestive enzymes into the second part of the duodenum at the major duodenal papilla.

#### Alternate Names:

Main Pancreatic Duct

### Wisdom Teeth

Wisdom teeth are the third molars that commonly emerge in late adolescence or adulthood. Impaction, infection, decay, cysts, gum disease, or crowding can cause pain and swelling; dental examination and imaging determine whether monitoring or removal is appropriate.

### Wisdom Tooth

The last molar in each dental quadrant, usually erupting in late adolescence or early adulthood. Impaction may cause pain, infection, or damage to adjacent teeth.

#### Alternate Names:

Dens Serotinus; Wisdom Teeth

---

### Wiskott-Aldrich Syndrome

A rare inherited immune disorder that mainly affects boys and causes eczema, repeated infections, and a low number of unusually small platelets. It can also cause bleeding and autoimmune problems and requires specialist care.

### Wiskott-Aldrich Syndrome Protein

A cytoplasmic actin-regulatory protein encoded by the *WAS* gene on the X chromosome that coordinates actin cytoskeleton remodeling in hematopoietic cells and immune synapse formation; loss-of-function mutations cause Wiskott-Aldrich syndrome and X-linked thrombocytopenia.

#### Alternate Names:

WASP

### Witch's Milk

A temporary milky breast discharge in a newborn caused by maternal hormones crossing the placenta; it usually resolves without squeezing or treatment, which can otherwise cause infection.

### Withdrawal

Physical or psychological symptoms that occur when a person who has developed dependence reduces or stops using a medicine or psychoactive substance. Symptoms vary by substance and may include anxiety, agitation, sweating, tremor, nausea, pain, insomnia, cravings, or seizures; some forms require urgent medical care.

#### Alternate Names:

Abstinence Syndrome; Substance Withdrawal Syndrome

### Withdrawal Reflex

An automatic response in which a painful stimulus makes a limb pull away from danger. The opposite limb may straighten to help maintain balance.

### Withdrawal Symptoms

Physical or psychological symptoms that occur when a person stops or reduces a substance or medicine after the body has adapted to it. The symptoms depend on the substance, duration of use, and the person's health.

### Withdrawal Syndrome

A predictable set of signs and symptoms that occur when a drug is discontinued or the dose is reduced after chronic use, reflecting the physiological rebound from drug adaptation.

### Withdrawal Syndromes

Physical and psychological symptoms that occur when regular exposure to an addictive substance is reduced or stopped. Severity and treatment depend on the substance, duration of use, comorbidities, and risk of seizures, delirium, or autonomic instability.

### Wolff-Chaikoff Effect

An autoregulatory mechanism whereby exposure to high levels of inorganic iodide temporarily inhibits organification and thyroid hormone synthesis within the thyroid gland. This effect typically lasts about 10 to 14 days before escape occurs, preventing iodine-induced hyperthyroidism.

#### Alternate Names:

Wolff-Chaikoff Block; Iodide Organification Inhibition

### Wolffian Ducts

Temporary tubes in the developing embryo that form parts of the male reproductive system, including the sperm-transport ducts. They usually shrink during typical female development, although small remnants may remain.

### Wolff-Parkinson-White Accessory Pathway-Related Tachycardia

Alternate name; see *Wolff-Parkinson-White syndrome*.

### Wolf-Hirschhorn Syndrome

A rare genetic disorder caused by loss of part of chromosome 4. It can cause poor growth, a small head, distinctive facial features, developmental and intellectual disability, seizures, and heart or other organ abnormalities; lifelong specialist support is usually needed.

#### Alternate Names:

4p- Syndrome; 4p Deletion Syndrome

---

## Wolfram Syndrome

A rare inherited disorder that commonly causes diabetes requiring insulin and progressive loss of vision from optic-nerve damage. It may also cause excessive thirst and urination, hearing loss, bladder problems, balance difficulty, or other nerve-system problems. Treatment monitors and supports each affected function.

## Wolinella

Genus of anaerobic, Gram-negative bacteria found in the oral cavity and gastrointestinal tract; associated with periodontal disease.

## Wolman Disease

A severe inherited disorder in which a missing enzyme causes fats to build up in organs. It usually begins in infancy with vomiting, diarrhea, poor growth, an enlarged liver and spleen, and adrenal-gland problems. Without treatment it can be fatal early; enzyme replacement and specialist care are required.

## Wolman's Disease

A severe lysosomal acid-lipase deficiency presenting in infancy with hepatosplenomegaly, adrenal calcification, malabsorption, vomiting, diarrhea, and failure to thrive. It is a severe form of lysosomal acid-lipase deficiency and can be fatal early without treatment.

## Womb

Common name for the uterus; the muscular organ where a fetus develops during pregnancy.

### Alternate Names:

Uterus; Metra; Hystera

## Womb Growths

Alternate name; see *Uterine fibroids*.

## Women Health

Alternate name; see *Women's health*.

## Women's Health

Medical specialty focusing on conditions unique to

or more prevalent in females, including reproductive health, pregnancy, menopause, and gender-specific disease patterns.

### Alternate Names:

Gynecological and Obstetric Health; Female Health Care

## Wood Lamp Examination

Examination of the skin in a dark room using special ultraviolet light. The light can make some color changes and infections easier to see, but the finding usually needs confirmation with the examination and other tests.

## Woods Corkscrew Maneuver

An emergency procedure used when a baby's shoulders become stuck during birth. A trained clinician rotates the baby's shoulders to help release them and complete delivery.

## Wood's Light

A special ultraviolet light used in a darkened room to make some skin colors, scales, and infections easier to see. It can support an examination but usually cannot identify the cause by itself.

## Wood Spirit

An old name for methanol, a toxic alcohol whose ingestion can cause metabolic acidosis, blindness, and death.

## Woods Screw Maneuver

A rotational maneuver used during shoulder dystocia to rotate the fetal shoulders and assist delivery.

## Wood-Unit

A clinical unit of vascular resistance calculated by dividing the pressure gradient across a vascular bed (in mmHg) by cardiac output (in L/min). One Wood unit equals approximately 80 dyn·s/cm<sup>5</sup>, commonly used in evaluating pulmonary hypertension.

### Alternate Names:

Wood Resistance Unit; Hybrid Resistance Unit (HRU)

---

### Woody Tongue

A rare long-lasting infection, usually caused by *Actinomyces*, that makes the tongue and nearby tissues hard and swollen. It can interfere with eating, speaking, or breathing.

### Woolly Hair

A rare structural anomaly of scalp hair characterized by tightly coiled, fine, spiraled curls in individuals of non-African descent. It may be inherited in autosomal dominant or recessive patterns and can occur as an isolated trait or part of syndromic disorders such as Naxos disease or Carvajal syndrome.

#### Alternate Names:

Woolly Hair Syndrome; Hereditary Woolly Hair

### Woolsorters' Disease

A form of inhaled anthrax acquired by breathing spores of *Bacillus anthracis*, historically associated with handling contaminated wool or animal products. It can cause severe breathing illness and requires urgent treatment.

#### Alternate Names:

Inhalation Anthrax; Pulmonary Anthrax; Rag-picker's Disease

### Word Blindness

Older term; see *Alexia*.

### Word Deafness

An acquired inability to understand spoken words even though ordinary hearing is intact. It usually results from damage to brain areas that connect hearing with language, such as after a stroke or head injury.

#### Alternate Names:

Pure Word Deafness; Auditory Agnosia for Speech

### Word Recognition Scoring

A hearing test measuring how accurately a person repeats or identifies spoken words at a comfortable volume. It helps assess how well the hearing system and brain understand speech.

### Word Salad

Speech made of words or phrases that have little or no logical connection, making the person difficult to understand. It can occur with severe psychosis, mania, brain disease, or intoxication and needs assessment in context.

### Working Memory

The ability to hold a small amount of information briefly and use it while completing a task, such as remembering instructions while following them. Attention, stress, sleep, illness, and brain conditions can affect it.

### Wound

Damage to body tissue caused by trauma, surgery, pressure, heat, chemicals, or another cause. A wound may be open or closed and can vary in depth, contamination, bleeding, and injury to nearby nerves, vessels, or organs.

### Wound Care

Assessment and treatment of a wound through cleansing, bleeding control, removal of dead or contaminated tissue when indicated, appropriate closure or dressing, pain control, and follow-up. Care also includes tetanus prevention, pressure relief, and treatment of infection or underlying conditions; antibiotics are reserved for selected contaminated wounds, bites, or infections.

### Wound Classification

A description of common injury types: an abrasion is a scrape, a laceration is a torn cut, a contusion is a bruise from blunt force, and an incised wound is a clean cut from a sharp object.

### Wound Complication

A problem that develops during healing, such as infection, separation of wound edges, bleeding, fluid collection, tissue death, or excessive scarring. Increasing pain, redness, swelling, drainage, fever, or wound opening should be assessed promptly.

### Wound Debridement

The surgical, enzymatic, autolytic, or mechanical re-

---

removal of foreign material, necrotic non-viable tissue, cellular debris, and infected slough from a wound bed to eliminate bacterial burden, reduce infection risk, and promote healthy granulation tissue formation.

### **Wound Dehiscence**

Partial or complete reopening of a surgical wound after it has been closed. It may follow infection, poor blood supply, diabetes, increased pressure, or strain on the wound. New separation, drainage, fever, severe pain, or visible deeper tissue needs prompt medical assessment.

### **Wound Evisceration**

Separation of a surgical wound with protrusion of internal organs or tissue through the opening. It is a surgical emergency requiring protection of the exposed tissue and urgent medical evaluation.

### **Wound Healing**

The body's process of stopping bleeding, controlling inflammation, replacing damaged tissue, covering the surface, and strengthening the repair. Blood supply, infection, nutrition, diabetes, medicines, smoking, wound depth, and movement can affect healing.

### **Wound Healing Phases**

Wound healing has overlapping stages: stopping bleeding, inflammation, building new tissue and skin, and strengthening the repair. The timing and result depend on the wound, blood supply, infection, nutrition, and general health.

### **Wound Infection**

Infection of a wound by microorganisms, causing findings such as increasing pain, redness, warmth, swelling, pus, fever, or delayed healing.

### **Wound Management**

Assessment and treatment of acute or chronic wounds through cleansing, debridement when indicated, moisture and exudate control, infection management, pressure relief, nutrition, and correction of underlying disease.

### **Wounds**

Injuries in which tissue is damaged by trauma, surgery, pressure, heat, chemicals, or other causes; wounds may be open or closed and may require cleansing, closure, or debridement.

### **Wound VAC**

A negative-pressure wound treatment in which a sealed dressing is connected to a pump that gently removes fluid and reduces swelling. It can support new tissue growth in selected complex wounds, but requires proper application and monitoring for bleeding, infection, or skin damage.

### **Wound Vacuum**

A therapeutic wound management system that applies localized controlled subatmospheric (negative) pressure to a sealed wound dressing via an open-cell polyurethane foam sponge, facilitating continuous fluid drainage, reducing tissue edema, increasing microvascular blood flow, and accelerating granulation tissue formation.

#### **Alternate Names:**

Negative Pressure Wound Therapy; NPWT; Vacuum-Assisted Closure; VAC

### **Wright Hyperabduction Test**

A clinical physical examination maneuver used to assess neurovascular compression in thoracic outlet syndrome, specifically involving the pectoralis minor space and retropectoral tunnel. With the patient seated, the examiner palpates the radial pulse while passively hyperabducting and externally rotating the arm beyond 90 degrees; a substantial diminution or complete obliteration of the radial pulse accompanied by paresthesias constitutes a positive test.

#### **Alternate Names:**

Wright Test; Hyperabduction Maneuver

### **Wright Stain**

A laboratory dye applied to a blood sample so different blood cells and abnormal cell changes can be seen and identified under a microscope.

---

### Wright Test

A clinical physical examination maneuver used in the assessment of thoracic outlet syndrome. The examiner palpates the radial pulse while the patient's arm is hyperabducted and externally rotated overhead; a marked diminution or obliteration of the radial pulse suggests neurovascular compression under the pectoralis minor tendon.

#### Alternate Names:

Wright Maneuver; Hyperabduction Test

### Wrinkle Test

A simple clinical bedside test to evaluate peripheral sympathetic autonomic nerve function in the digits. Denervated skin fails to develop normal physiological wrinkling when submerged in warm water for 10 to 30 minutes, indicating loss of sympathetic vasoconstrictor tone.

#### Alternate Names:

Digital Wrinkling Test; Water Immersion Wrinkle Test

### Wrisberg Ganglion

A small cluster of nerve cells connected with the facial nerve. It helps relay taste signals from part of the tongue and sensory signals from nearby areas of the ear.

### Wrist

The joint connecting the hand to the forearm. It contains eight small wrist bones, ligaments, tendons, nerves, and blood vessels and allows the hand to bend, turn, and move from side to side.

### Wrist Arthroscopy

A procedure using a small camera and instruments inserted through tiny wrist openings to examine or treat damaged cartilage, ligaments, joint lining, or other wrist problems.

### Wrist Drop

Inability to lift the wrist and fingers, usually caused by injury or compression of the radial nerve. It may cause weakness, numbness, or difficulty using the hand and needs assessment for the cause.

### Wrist Fracture

A break in one or more bones near the wrist, most commonly the distal radius or ulna, usually caused by a fall, direct trauma, or weakened bone.

### Wrist Injury

Damage to the bones, ligaments, tendons, nerves, or vessels of the wrist from a fall, twist, impact, or overuse; fracture, instability, severe swelling, or neurovascular symptoms require assessment.

### Wrist Joint

The joint where the forearm bones meet the small bones of the hand. It allows bending, straightening, side-to-side movement, and limited rotation while ligaments and cartilage provide stability.

### Wrist Pain

Pain in or around the wrist, commonly caused by sprain, fracture, tendinitis, arthritis, or nerve compression such as carpal tunnel syndrome. Persistent pain, deformity, numbness, or weakness requires assessment.

#### Alternate Names:

Carpal Pain; Radiocarpal Joint Discomfort

### Wrist Sprain

Stretching or tearing of one or more ligaments supporting the wrist, causing pain, swelling, bruising, and reduced movement after injury.

### Writer's Cramp

A movement disorder in which involuntary muscle tightening causes abnormal hand or arm positions while writing. It may also affect other closely related fine hand movements.

### Written Documentation

Formal recording of patient information, clinical decisions, and treatment plans; essential for continuity of care and medicolegal purposes.

### Wry-Neck

Torticollis, an abnormal tilt or rotation of the head caused by involuntary contraction, shortening, or

---

dysfunction of neck muscles.

### **Wt**

A medical abbreviation commonly meaning weight. Its meaning should be confirmed from the surrounding documentation because abbreviations can be ambiguous.

### **Wuchereria**

A genus of filarial nematodes that includes *Wuchereria bancrofti*, a major cause of lymphatic filariasis. Infection is transmitted by mosquitoes and may cause lymphangitis, chronic lymphedema, hydrocele, and elephantiasis.

### **Wuchereria Bancrofti**

A parasitic roundworm spread by mosquitoes and the main cause of lymphatic filariasis. Long-term infection can block lymph drainage and cause swelling of the limbs or genitals, sometimes becoming severe and permanent.

### **Wuhan Coronavirus**

Alternate name; see *SARS-CoV-2*.

### **Wandering Rash Tongue**

A common name for geographic tongue, a benign inflammatory condition in which smooth red patches with pale borders move across the tongue. It is not contagious and may cause sensitivity to spicy or acidic foods.

### **Warts and Plantar Warts**

Warts are noncancerous skin growths caused by human papillomavirus. Plantar warts occur on the soles of the feet and may be painful when standing or walking because pressure pushes them inward.

### **WBS**

Abbreviation for Williams-Beuren syndrome, a genetic disorder associated with characteristic facial features, developmental differences, cardiovascular disease, and sometimes high blood calcium.

### **Weight Management**

Long-term care of body weight through nutrition, physical activity, behavior change, medicines, or bariatric procedures when appropriate. Goals should account for health, function, metabolic risk, and sustainable habits rather than weight alone.

### **Weir-Mitchell Disease**

An older name for restless legs syndrome, a neurologic disorder causing an urge to move the legs with uncomfortable sensations that are worse at rest and in the evening and improve temporarily with movement.

### **Werlhof Disease**

An older name for immune thrombocytopenia (immune thrombocytopenic purpura), in which immune destruction of platelets can cause bruising, petechiae, nosebleeds, heavy menstrual bleeding, or other bleeding.

### **West Nile Fever**

A febrile illness caused by West Nile virus, usually transmitted by mosquitoes. Most infections cause no symptoms or a flu-like illness; a small proportion causes neuroinvasive disease such as meningitis, encephalitis, or acute flaccid paralysis.

### **Whooping Cough (Pertussis)**

Alternate name for whooping cough, a highly contagious respiratory infection caused by *Bordetella pertussis*. Prolonged coughing fits may cause vomiting or a whoop; infants may instead have pauses in breathing.

### **WHS**

Abbreviation for Wolf-Hirschhorn syndrome, a rare chromosome 4 deletion disorder that may cause poor growth, distinctive facial features, developmental disability, seizures, and congenital abnormalities.

### **Williams-Beuren Syndrome**

Alternate name for Williams syndrome, a chromosome 7 microdeletion disorder associated with characteristic facial features, supravalvular aortic stenosis and other cardiovascular findings, developmental

---

differences, and hypercalcemia in some people.

### **Wisdom Tooth Problems**

Problems involving third molars, including impaction, infection, gum inflammation, decay, cysts, or damage to nearby teeth. Pain, swelling, fever, difficulty opening the mouth, or trouble swallowing needs dental assessment.

### **Wisdom Tooth Removal**

Dental extraction of one or more third molars, commonly performed when they are impacted, repeatedly infected, decayed, or damaging adjacent teeth. Risks include pain, infection, bleeding, dry socket, and temporary or rarely persistent nerve symptoms.

### **Wolf Hirschhorn Syndrome**

Alternate spelling of Wolf-Hirschhorn syndrome, a rare disorder caused by deletion of part of chromosome 4 and associated with growth restriction, seizures, developmental disability, and distinctive facial features.

### **Wolf Syndrome**

Alternate name for Wolf-Hirschhorn syndrome, a chromosome 4 deletion disorder affecting growth, development, and multiple organ systems.

### **WPW Syndrome**

Abbreviation for Wolff-Parkinson-White syndrome, a pre-excitation disorder in which an extra electrical pathway can cause episodes of supraventricular tachycardia. Palpitations, fainting, chest pain, or severe breathlessness require prompt assessment.

### **Wells Syndrome**

Eosinophilic cellulitis, an uncommon inflammatory skin disorder causing itchy or burning red plaques, swelling, blisters, or a cellulitis-like eruption without typical bacterial infection. Blood eosinophilia and a skin biopsy may support the diagnosis, and recurrences are possible.

### **Wolff-Parkinson-White Syndrome**

A heart-rhythm disorder caused by an extra elec-

trical connection between the atria and ventricles. It can produce episodes of supraventricular tachycardia, palpitations, dizziness, fainting, or, rarely, dangerous ventricular rhythms; catheter ablation can often eliminate the pathway.

# X

## **Xanthelasma**

A harmless yellowish patch or bump caused by fat deposits in the skin of the eyelids, usually near the inner corners of the eyes. It can occur with high blood fats but may also occur when blood-fat levels are normal.

### **Alternate Names:**

Xanthelasma Palpebrarum; Eyelid Xanthoma; Palpebral Xanthoma

## **Xanthine**

A natural breakdown product of substances found in cells and foods. It normally changes into uric acid, but can build up when a rare enzyme disorder blocks this pathway and may then contribute to kidney or urinary stones.

## **Xanthine Oxidase**

An enzyme that helps convert cell and food breakdown products into uric acid. Medicines used for gout can block this enzyme, lowering uric-acid production and helping prevent urate crystal deposits.

## **Xanthine Oxidase Inhibitors**

Medicines such as allopurinol and febuxostat that lower uric acid by blocking an enzyme involved in its production. They are used for selected people with gout or to prevent high uric acid during some cancer treatments. Choice and timing depend on the person's condition.

### **Alternate Names:**

XOIs

## **Xanthinuria**

A rare inherited disorder in which the body cannot

properly change xanthine into uric acid. Xanthine can build up and form kidney or urinary stones; muscle problems may also occur.

## **Xanthochromia**

Yellow or amber color in the fluid around the brain and spinal cord. It can occur when blood has broken down in the fluid, including after bleeding around the brain, but other causes are possible and the meaning depends on timing and other test results.

### **Alternate Names:**

CSF Xanthochromia; Cerebrospinal Fluid Yellowing

## **Xanthogranulomatous**

Describing inflammation in which tissue contains many immune cells filled with fat. This pattern can occur in long-lasting infections and other inflammatory conditions.

## **Xanthogranulomatous Cholecystitis**

A rare, long-lasting inflammation of the gallbladder that can thicken and damage its wall. It may spread to nearby tissues and can look like gallbladder cancer on scans.

### **Alternate Names:**

XGC

## **Xanthogranulomatous Oophoritis**

A rare long-lasting inflammation of an ovary, often linked to infection or endometriosis. It can form a mass that resembles ovarian cancer on scans and may cause pelvic pain, fever, or abnormal bleeding.

## **Xanthogranulomatous Pyelonephritis**

A severe, long-lasting kidney infection that destroys

---

normal kidney tissue and replaces it with inflamed tissue. It is often associated with blockage or stones and may require antibiotics, drainage, or removal of the damaged kidney.

### **Xanthoma**

A yellow-orange spot, bump, or patch formed by fat deposits in the skin, tissue beneath the skin, or tendons. It may occur with high blood fats, diabetes, some liver diseases, or an inherited lipid disorder.

### **Xanthoma Disseminatum**

A rare disorder in which many yellow, red-brown, or orange bumps develop on the skin, especially in body folds. The mouth, throat, or other organs may also be affected, and some people develop problems controlling water balance.

#### **Alternate Names:**

Montgomery Syndrome; Disseminate Xanthoma

### **Xanthoma Eruptivum**

A sudden outbreak of many small yellow-orange bumps, usually on the buttocks, arms, legs, or shoulders. It is often linked to very high blood triglyceride levels.

#### **Alternate Names:**

Eruptive Xanthoma; Eruptive Xanthomatosis

### **Xanthoma Planum**

Flat or slightly raised yellow skin patches caused by the buildup of fat inside immune cells. They may occur in skin folds, the palms, or more widely on the body and can be linked to high blood fats or some blood disorders.

#### **Alternate Names:**

Plane Xanthoma; Xanthoma Striatum Palmare

### **Xanthomas**

Yellowish papules, plaques, or nodules caused by lipid accumulation in skin immune cells. They may reflect high cholesterol or triglycerides, diabetes, cholestatic liver disease, or an inherited lipid disorder and should prompt appropriate evaluation.

### **Xanthoma Striatum Palmare**

Yellow or orange lines or patches in the creases of the palms caused by fat deposits in the skin. They are strongly linked to some inherited blood-fat disorders, especially type III dysbetalipoproteinemia, but blood tests are needed.

#### **Alternate Names:**

Palmar Crease Xanthoma; Planar Palmar Xanthoma

### **Xanthoma Tendinosum**

Firm, usually painless fat deposits in tendons or ligaments, most often in the Achilles tendon or tendons of the hands. They are strongly linked to inherited high cholesterol.

#### **Alternate Names:**

Tendon Xanthoma; Tendinous Xanthoma

### **Xanthomatosis**

A disorder in which fatty deposits called xanthomas develop in the skin, tendons, or organs. It may be linked to inherited or acquired problems with blood fats.

### **Xanthoma Tuberosum**

Slowly enlarging, painless, firm, yellowish-red nodular lipid deposits occurring over extensor pressure areas, particularly the elbows, knees, heels, and buttocks. They are strongly associated with familial hypercholesterolemia and type III hyperlipoproteinemia.

#### **Alternate Names:**

Tuberous Xanthoma; Tuberous Xanthomatosis

### **Xanthopsia**

A visual disturbance in which objects appear yellow or yellowish. It can occur with some eye disorders, medicine toxicity such as digoxin toxicity, or disorders of the nerves or retina.

### **Xanthosis**

Yellow discoloration of skin or other tissues caused by carotene or another yellow substance. Unlike jaundice, it does not usually make the whites of the eyes yellow; the cause is assessed from the person's

---

diet and health.

### **X Chromosome**

One of the two types of human sex chromosomes. It carries genes involved in sex development as well as many other body functions. Most people have one or two X chromosomes.

### **Xenobiotic**

A chemical that does not naturally belong in the body, such as a medicine, pollutant, pesticide, or industrial compound. The body changes and removes it, but some resulting chemicals can be harmful.

### **Xenobiotic Metabolism**

The body's processing of foreign chemicals, including medicines, pollutants, and toxins. Enzymes, especially in the liver, change them so they can be removed; the changed substances may remain active or become harmful.

### **Xenobiotic Resistance**

The ability of cells or organisms to withstand the effects of foreign chemicals, medicines, or toxins. It may result from breaking down the substance faster, pumping it out of cells, or changing the substance's target.

#### **Alternate Names:**

Multidrug Resistance; Xenobiotic Tolerance

### **Xenograft**

Tissue, cells, or a biological material transplanted between different species, such as animal tissue used in a human. Rejection and infection are important risks, although some materials are used temporarily as tissue coverings or substitutes.

### **Xenon Anesthesia**

Use of xenon gas to cause unconsciousness and prevent pain during an operation. Xenon acts on brain signaling and is cleared mainly through breathing.

### **Xenotransplantation**

Transplanting living cells, tissues, or organs between different species, usually from an animal to a human.

It may increase the supply of transplant material but carries major risks of immune rejection, infection, and poor organ function.

### **Xerochilia**

Abnormal, persistent dryness, scaling, and superficial vertical cracking or fissuring of the lips, resulting from environmental dehydration, persistent lip-licking (cheilitis simplex), chronic mouth breathing, or systemic therapy with oral retinoids (such as isotretinoin).

#### **Alternate Names:**

Dry Lips

### **Xeroderma**

Alternate name; see *Dry skin*.

### **Xeroderma Pigmentosum**

A rare usually autosomal-recessive disorder of nucleotide-excision DNA repair, with a variant form affecting translesion synthesis. Minimal ultraviolet exposure can cause severe sunburn or persistent redness, early freckle-like pigmentation, and rapid photoaging; skin and ocular-surface cancers occur at a young age, and some people develop progressive neurologic disease. Strict ultraviolet protection, regular skin and eye examinations, and early treatment of suspicious lesions are essential.

### **Xeroderma Pigmentosum Complementation Groups**

Genetic subtypes of xeroderma pigmentosum. Each subtype results from a change in a different gene involved in repairing damage caused by ultraviolet light. All subtypes can cause extreme sun sensitivity, freckling, and a very high risk of skin cancer.

#### **Alternate Names:**

XP Complementation Groups; NER Defect Groups

### **Xerophthalmia**

Dryness and damage of the eye caused by severe vitamin A deficiency. It may begin with poor night vision and dry eyes and can progress to corneal damage and permanent sight loss.

#### **Alternate Names:**

Vitamin A Deficiency Eye Disease; Ocular Xerosis;

---

Keratomalacia

### Xerophthalmic Ulceration

Severe progressive ulceration of the cornea resulting from severe vitamin A deficiency (classified as WHO stage X3A when involving less than one-third of the corneal area, and stage X3B when involving more). Untreated, it rapidly causes corneal liquefactive necrosis (keratomalacia) and permanent blindness.

#### Alternate Names:

Vitamin A Corneal Ulcer; Keratomalacic Ulceration

### Xerosis

Alternate name; see *Dry skin*.

### Xerostomia

Alternate name; see *Dry Mouth*.

### Xerotic Eczema

A common, intensely pruritic inflammatory dermatosis occurring predominantly on the pretibial lower extremities of elderly individuals during cold, dry winter months, characterized by profound epidermal dehydration, scaling, and fine superficial erythematous fissures resembling "cracked porcelain" or a "dry riverbed."

#### Alternate Names:

Asteatotic Eczema; Eczema Craquele; Winter Itch

### X-Inactivation

A process in early development that switches off most genes on one of two X chromosomes in each cell. It helps balance gene activity, although some genes remain active and the pattern can differ between cells.

### Xiphisternal Joint

The joint between the lower part of the breastbone and the xiphoid process. It often becomes partly or fully hardened with age.

#### Alternate Names:

Xiphisternal Synchondrosis; Xiphisternal Articulation

### Xiphoidalgia

Pain or tenderness over the xiphoid process, the small lower part of the breastbone. Pain may spread to the upper abdomen, chest, back, or shoulders and may worsen with touch, bending, lifting, or coughing.

#### Alternate Names:

Xiphoidodynia; Hypersensitive Xiphoid Syndrome; Xiphoid Syndrome

### Xiphoidectomy

Surgery to remove the xiphoid process, the small lower part of the breastbone. It may be done for persistent pain in this area or to provide access during some chest or abdominal operations.

### Xiphoid Process

The small pointed lower part of the breastbone. Its shape varies between people and it provides attachment for some muscles and ligaments.

### X-Linked

Describing a gene or condition caused by a change on the X chromosome. The pattern differs between people with one X chromosome and those with two; fathers pass their X chromosome to daughters, not sons.

### X-Linked Adrenoleukodystrophy

An inherited disorder, usually affecting boys, in which certain fats build up and damage the adrenal glands and nervous system. It can cause behavior or learning changes, movement problems, seizures, or adrenal failure.

### X-Linked Agammaglobulinemia

An inherited immune disorder, usually affecting boys, in which the body cannot make enough antibodies. Repeated bacterial infections often begin in infancy or early childhood and are treated with antibody replacement and infection care.

### X-Linked Chronic Granulomatous Disease

An inherited immune disorder, usually affecting boys, caused by a change in the *CYBB* gene. Cer-

---

tain white blood cells cannot kill some bacteria and fungi normally, leading to repeated serious infections and areas of ongoing inflammation.

**Alternate Names:**

X-Linked CGD; CYBB Deficiency; Cytochrome b-245 Beta Deficiency

**X-Linked Dominant Inheritance**

A pattern in which one changed gene on the X chromosome can cause a condition. An affected father passes the changed X chromosome to all daughters and no sons.

**X-Linked Emery-Dreifuss Muscular Dystrophy**

An inherited muscle disorder, usually affecting boys, that causes stiff joints, slowly worsening muscle weakness, and problems with the heart's electrical rhythm.

**Alternate Names:**

EDMD1; Emerin Deficiency Muscular Dystrophy

**X-Linked Hyper-IgM Syndrome**

An inherited immune disorder, usually affecting boys, in which the body cannot change one type of protective antibody into other types. It causes repeated lung and sinus infections and may cause infections by organisms that usually do not cause illness.

**Alternate Names:**

HIGM1; CD40L Deficiency; Hyper-IgM Syndrome Type 1

**X-Linked Hypophosphatemia**

An inherited disorder that causes the kidneys to lose too much phosphate. Low phosphate can lead to soft or poorly growing bones, bone pain, bowed legs, dental problems, and reduced height.

**X-Linked Ichthyosis**

An inherited, usually X-linked recessive skin disorder caused by a variant or deletion affecting the STS gene and deficiency of steroid sulfatase. It usually affects males and causes widespread dry, dark, plate-like scales that often begin in infancy or early childhood.

**X-Linked Inheritance**

Inheritance of a gene change located on the X chromosome. The effects depend on the gene, the type of change, and whether a person has one or two X chromosomes; fathers do not pass an X chromosome to sons.

**X-Linked Lymphoproliferative Disease Type 1**

An inherited immune disorder, usually affecting boys, in which the body can react severely to Epstein-Barr virus. It may cause severe glandular fever, very high inflammation, low antibody levels, or lymphoma.

**Alternate Names:**

XLP1; Duncan Disease; SAP Deficiency

**X-Linked Lymphoproliferative Syndrome**

An inherited immune disorder, usually affecting boys, in which the body reacts abnormally to infections. Severe Epstein-Barr virus illness, persistent fever, liver or blood problems, lymphoma, and intestinal inflammation may occur.

**X-Linked Myotubular Myopathy**

A rare inherited muscle disease, usually affecting boys, that causes severe weakness and low muscle tone from birth. Babies may have drooping eyelids, feeding difficulty, and dangerous weakness of the breathing muscles.

**Alternate Names:**

XLMTM; Myotubularin Deficiency

**X-Linked Recessive Inheritance**

A pattern in which a changed gene on the X chromosome usually causes a condition in people with one X chromosome. People with two X chromosomes are often unaffected carriers, although they can sometimes have symptoms. An affected father does not pass the changed X chromosome to sons.

**X-Linked Retinitis Pigmentosa**

An inherited disorder in which the retina slowly loses its ability to sense light. It usually causes night blindness followed by narrowing of the field of vision and worsening sight.

---

**Alternate Names:**

XLRP; X-Linked Pigmentary Retinopathy

**X-Linked Retinoschisis**

An inherited eye disorder, usually affecting boys, in which layers of the retina separate. It can cause blurred central or distance vision, crossed eyes, bleeding, or retinal detachment in severe cases.

**X-Linked Severe Combined Immunodeficiency**

A severe inherited immune disorder, usually affecting boys, in which important immune cells do not develop normally and antibody protection is poor. Babies are highly vulnerable to serious infections.

**X-Linked Sideroblastic Anemia**

An inherited form of anemia, usually affecting boys, in which red blood cells cannot make hemoglobin normally. Iron builds up in developing blood cells, causing small, pale red blood cells and anemia.

**Alternate Names:**

XLSA; ALAS2 Deficiency; Hereditary Sideroblastic Anemia

**X-Linked Spinal and Bulbar Muscular Atrophy**

An inherited muscle and nerve disorder that usually begins in adulthood and slowly causes weakness. It may also cause muscle twitching, trouble speaking or swallowing, breast enlargement, and reduced fertility.

**Alternate Names:**

Kennedy Disease; SBMA; Bulbo-Spinal Muscular Atrophy

**X-Ray**

An imaging test that uses a small amount of radiation to create a picture of structures inside the body. It is especially useful for bones, lungs, teeth, and some other tissues.

**X-Ray Attenuation**

The reduction in strength of an X-ray beam as it passes through the body. Bone, soft tissue, and air

reduce the beam by different amounts, creating the differences seen in the image.

**X-Ray Crystallography**

A laboratory method that uses X-rays to work out the three-dimensional structure of molecules such as proteins. The molecule is made into a crystal, and the pattern produced by the X-rays is analyzed.

**Alternate Names:**

X-Ray Crystal Diffraction Analysis; Macromolecular Crystallography

**X-Ray Shield**

Protective material, often lead or another dense substance, used to reduce exposure to scattered X-rays during imaging.

**X-Ray Therapy**

Treatment that uses carefully aimed X-ray radiation to damage abnormal cells or relieve symptoms. It is used mainly for cancer and may be given from a machine outside the body or near the target.

**XX Male Syndrome**

A difference in sex development in which a person with two X chromosomes develops typically male physical features, usually because a sex-development gene has moved onto an X chromosome. Infertility is common, and care is individualized.

**XXX Syndrome**

Alternate name; see *Triple X syndrome*, a sex-chromosome variation in which a female has an additional X chromosome.

**XXXX Syndrome**

XXXX syndrome is a rare sex-chromosome variation in which a female has four X chromosomes; it may cause developmental or learning difficulties, distinctive physical features, and ovarian dysfunction, with severity varying widely.

**Xylitol**

A sugar alcohol used as a sweetener and in some oral-care products. Large human ingestions may

---

cause gastrointestinal symptoms; it is highly toxic to dogs.

### **Xylose**

A simple sugar found in some plants. A form called D-xylose has been used in tests of how well the small intestine absorbs nutrients and is also used in laboratory studies.

### **Xylose Absorption Test**

A test of how well the small intestine absorbs a simple sugar called D-xylose. Low amounts in the blood or urine may suggest poor absorption from the intestine; normal results with other signs of poor absorption may suggest a problem with the pancreas.

#### **Alternate Names:**

D-Xylose Absorption Test; D-Xylose Tolerance Test

### **XXY Syndrome**

A sex-chromosome variation in which a male has an extra Y chromosome. Many affected individuals have few or no obvious symptoms, though some have tall stature, learning difficulties, or developmental differences.

### **X-linked Juvenile Retinoschisis**

An inherited retinal disorder, usually affecting boys, in which layers of the retina separate during childhood. It can cause reduced central vision, difficulty seeing in dim light, crossed eyes, or retinal complications.

### **X-linked Adult Spinal Muscular Atrophy**

Alternate name for Kennedy disease, or X-linked spinal and bulbar muscular atrophy. It is an inherited androgen-receptor disorder that gradually causes weakness, muscle wasting, twitching, swallowing or speech difficulty, and sometimes breast enlargement.

### **X-linked Intellectual Disability**

Intellectual disability caused by a change in a gene on the X chromosome. Features vary widely and may include developmental delay, learning difficulty, behavior differences, seizures, or associated physical

findings.

### **XO Syndrome**

A form of Turner syndrome caused by complete or partial absence of one X chromosome. It may cause short stature, ovarian insufficiency, infertility, characteristic physical findings, and heart, kidney, hearing, or thyroid problems.

### **XP**

Abbreviation for xeroderma pigmentosum, a rare DNA-repair disorder causing extreme sensitivity to ultraviolet light and a markedly increased risk of early skin and eye cancers.

### **XXY Males**

People with a typically male pattern of development and an extra X chromosome, usually 47,XXY. This is commonly called Klinefelter syndrome and may cause small testes, low testosterone, infertility, tall stature, or learning and language difficulties.

### **XXY Syndrome**

Alternate name for Klinefelter syndrome, a sex-chromosome variation in which a typically male individual has an extra X chromosome. Effects vary and may include low testosterone, infertility, small testes, tall stature, and developmental or language differences.

# Y

## YAG Capsulotomy

A laser procedure that makes a small opening in the cloudy membrane behind an artificial lens after cataract surgery. It can restore vision when this clouding causes blurring or glare and is usually done without another incision.

## YAG Laser Capsulotomy

Alternate name; see *YAG Capsulotomy*.

## YAG Laser Surgery

Treatment using a focused laser to make a precise opening or alter tissue without a conventional surgical incision. It is used mainly for selected eye conditions, and risks depend on the part of the eye treated.

## Yawn

An involuntary behavior consisting of a deep inhalation followed by a slower exhalation, often with stretching of the jaw and facial muscles. Yawning is common with fatigue but excessive or unusual yawning can occur with some medications or neurologic conditions.

## Yawning

Alternate name; see *Yawn*.

## Yaws

Yaws is a chronic infection caused by *Treponema pallidum* subsp. *pertenue* and spread mainly through close skin contact. It can cause an initial papilloma or ulcer and later destructive lesions of skin, bone, and cartilage; antibiotics can cure the infection.

## Yaws Papilloma

The primary clinical cutaneous lesion of early yaws (*Treponema pallidum* subsp. *pertenue* infection), also termed a mother yaw or frambesioma. It presents as an initial painless, raised, yellow-crust, raspberry-like papule or ulcer at the site of cutaneous inoculation.

### Alternate Names:

Mother Yaw; Frambesioma; Primary Yaws Lesion

## Y-Box Binding Protein

A protein that attaches to DNA and RNA and helps control which genes are active and how proteins are made. It also helps cells respond to stress and repair damaged DNA.

### Alternate Names:

YB-1; Y-Box Transcription Factor; Nuclease-Sensitive Element-Binding Protein 1

## Y Chromosome

One of the two human sex chromosomes. It usually carries genes involved in testis development and is passed by a biological father to a child who inherits it; chromosome patterns and body development can vary.

## Y-Chromosome Microdeletion

A small missing section of the Y chromosome that can interfere with sperm production and cause very low or absent sperm counts.

### Alternate Names:

AZF Microdeletion

## Yeast

A type of fungus made of single cells. Some yeasts

---

normally live on or in the body, while others can cause infections of the mouth, skin, vagina, lungs, blood, or other organs.

### **Yeast Infection**

An infection caused by *Candida* yeast that may affect the mouth, skin, vagina, penis, or other tissues. Symptoms depend on the site and may include itching, soreness, redness, white plaques, discharge, or rash. *Candida* may also be present without causing disease, so the significance of a finding depends on the site, symptoms, and evidence of tissue invasion.

### **Yeast Infection In Women And Men**

Genital *Candida* infection may affect the vulva or vagina in women and the glans penis or foreskin in men. Symptoms can include itching, soreness, redness, discharge, or rash.

### **Yeast Present**

A laboratory report showing yeast in a specimen. This may mean harmless colonization, contamination, or infection; the meaning depends on the symptoms, specimen, and type of yeast.

### **Yeast Vulvitis**

Inflammation of the vulva associated with a *Candida* yeast infection. It may cause itching, burning, redness, swelling, and soreness; other conditions can cause similar symptoms.

### **Yellow Cartilage**

A flexible type of cartilage containing many elastic fibers. It is found in the outer ear, the epiglottis, parts of the voice box, and the tube connecting the middle ear to the throat.

#### **Alternate Names:**

Elastic Cartilage; Cartilago Elastica

### **Yellow Fever**

Yellow fever is an acute mosquito-borne infection caused by yellow fever virus. Fever, headache, muscle aches, nausea, and vomiting may be followed by jaundice, bleeding, shock, and organ failure; vaccination is the main preventive measure.

### **Yellow Fever Vaccine**

A vaccine made from a weakened yellow fever virus. It gives long-lasting protection, but rare serious reactions can affect the brain or internal organs.

#### **Alternate Names:**

17D Vaccine

### **Yellow Fever Virus**

A flavivirus transmitted mainly by infected mosquitoes that can cause yellow fever, ranging from a mild febrile illness to jaundice, bleeding, shock, and organ failure.

### **Yellow Ligament**

A series of elastic bands connecting the back parts of neighboring bones in the spine. They help support the spine and surround the spinal canal.

#### **Alternate Names:**

Ligamentum Flavum; Flavum Ligament

### **Yellow Marrow**

Bone marrow containing mostly fat instead of blood-forming cells. It is common in the hollow centers of adult long bones and can change back toward blood-forming marrow when the body needs more blood cells.

#### **Alternate Names:**

Fatty Bone Marrow; Medulla Ossium Flava

### **Yellow Nail Syndrome**

Alternate name; see *Yellow-Nail Syndrome*.

### **Yellow-Nail Syndrome**

A rare disorder causing yellow, thickened, slowly growing nails together with swelling from lymph fluid, usually in the legs, and lung problems such as repeated infections or fluid around the lungs. The cause is not fully understood.

### **Yellow Nail Syndrome Triad**

The three main features of yellow nail syndrome: slow-growing yellow or thickened nails, swelling from lymph-fluid buildup, and long-term breathing or lung problems.

#### **Alternate Names:**

---

YNS Triad; Lymphedema-Pleural Effusion-Yellow Nails

### **Yellow Spot**

The macula, a small yellowish area near the center of the retina at the back of the eye. It provides the sharp central vision used for reading and seeing fine detail.

#### **Alternate Names:**

Macula Lutea; Anatomical Macula

### **Yellow Tongue**

Yellow discoloration or coating of the tongue that may result from oral hygiene, smoking, dry mouth, diet, medicines, or an underlying illness.

### **Yergason Test**

A shoulder examination in which a person turns the palm upward and rotates the arm outward against resistance. Pain or a snapping sensation near the front of the shoulder may suggest a problem involving the biceps tendon, but the test is not diagnostic by itself.

### **Yersinia**

A group of bacteria that can cause intestinal illness, swollen lymph nodes in the abdomen, or plague. Different species spread through contaminated food or water, infected animals, or fleas.

### **Yersinia Enterocolitica**

A bacterium that can cause diarrhea, fever, and abdominal pain, sometimes mimicking appendicitis. People usually acquire it from contaminated food, water, or contact with infected animals.

### **Yersinia Enterocolitica Pseudoappendicitis**

A Yersinia infection that causes pain in the lower right abdomen and swollen lymph nodes near the intestine, making it resemble appendicitis. It can also cause fever and diarrhea, often after contaminated food such as undercooked pork.

#### **Alternate Names:**

Yersinia Mesenteric Adenitis; Pseudoappendiceal

Syndrome

### **Yersinia Infection**

Infection caused by Yersinia bacteria, usually producing diarrhea, abdominal pain, fever, or vomiting. Some cases resemble appendicitis; bloody diarrhea, dehydration, or severe or persistent illness can occur.

### **Yersinia Outer Proteins**

Proteins made by disease-causing Yersinia bacteria that are injected into human cells. They weaken the immune response and help the bacteria avoid being destroyed.

#### **Alternate Names:**

Yops; Yersinia Effector Proteins; Yop Virulence Factors

### **Yersinia Pestis**

The bacterium that causes plague, a severe infection usually spread by infected fleas or animals. It may cause painful swollen lymph nodes, bloodstream infection, or lung disease and can be life-threatening.

### **Yersinia Pestis Pneumonic Plague**

A severe form of plague affecting the lungs. It can spread through breathing in infected droplets or when plague spreads from another part of the body. It may cause high fever, breathing difficulty, chest pain, cough, shock, and rapidly worsening lung failure.

#### **Alternate Names:**

Pneumonic Plague; Pulmonary Yersiniosis

### **Yersinia Pseudotuberculosis**

A bacterium usually acquired from contaminated food or water. It can cause fever, diarrhea, and pain from swollen lymph nodes in the abdomen, sometimes resembling appendicitis.

### **Yersinia Reactive Arthritis**

Joint inflammation that develops after a Yersinia intestinal infection, usually one to four weeks later. It often affects a few joints, especially in the legs, without bacteria being present inside the joints.

---

## Yersiniosis

Infection caused by *Yersinia* bacteria, most often *Y. enterocolitica* or *Y. pseudotuberculosis*, producing diarrhea, abdominal pain, fever, or pseudoappendicitis.

## Yew Poisoning

Poisoning after eating parts of the yew plant, especially its leaves or seeds. The toxins can cause vomiting, dizziness, seizures, dangerous heart rhythms, collapse, and death.

## Y-Linked Gene

A gene located specifically on the non-recombining region of the Y chromosome (such as the *SRY* gene, *ZFY*, or *AZF* azoospermia factor region). These genes are transmitted strictly from biological fathers to sons and are essential for testicular differentiation, gonadal development, and male spermatogenesis.

### Alternate Names:

Holandric Gene; Y-Chromosomal Gene

## Y-Linked Inheritance

Inheritance of a condition caused by a gene on the Y chromosome. A biological father passes a Y-linked gene to sons who inherit his Y chromosome, but not to daughters who inherit his X chromosome.

## Y-Maze Test

A test used mainly in laboratory animals to study movement, exploration, and short-term memory. The animal moves through three arms of a Y-shaped maze, and the pattern of movement is recorded.

### Alternate Names:

Y-Maze Spontaneous Alternation; Y-Maze Behavioral Paradigm

## Yolk Sac

A temporary structure that supports an early embryo before the placenta is fully working. It helps form the first blood cells and part of the early intestine and can be seen on early pregnancy ultrasound.

## Yolk Sac Carcinoma

An aggressive germ-cell cancer that often produces

high levels of alpha-fetoprotein (AFP). AFP can support the diagnosis and help track treatment, but it is interpreted with examination, imaging, and tissue testing.

### Alternate Names:

Endodermal Sinus Tumor; Yolk Sac Germ Cell Tumor

## Yolk Sac Tumor

A cancer of germ cells that often occurs in the ovary or testicle in children or young adults and produces alpha-fetoprotein. It can also occur outside the reproductive organs.

## Yolk-Sac Tumor

Alternate name; see *Yolk Sac Tumor*.

## Yolk Sac Tumor Pathology

A malignant germ-cell tumor with variable reticular, microcystic, papillary, glandular, or solid patterns. Schiller-Duval bodies, hyaline globules, and alpha-fetoprotein expression may support the diagnosis.

## Yolk Sac Tumor Schiller-Duval Bodies

A characteristic microscope finding in yolk sac tumors. It looks somewhat like a tiny kidney filter, with tumor cells arranged around a small blood vessel. The finding helps confirm the diagnosis when considered with other test results.

### Alternate Names:

Schiller-Duval Bodies; Glomeruloid Endodermal Bodies

## Yolk Stalk

A temporary connection between the early yolk sac and the developing intestine. It normally disappears before birth; a remaining portion can form an abnormal intestinal pouch or other problem.

## Young-Burgess Classification

A system used to describe pelvic-ring fractures according to how the injury happened and how stable the pelvis is. Groups include side-to-side compression, front-to-back compression, vertical separation, and mixed injuries.

---

**Alternate Names:**

Young-Burgess Pelvic Fracture Classification;  
Burgess Pelvic Injury Scale

**Young Syndrome**

A rare condition, usually affecting males, that combines blockage of sperm transport with repeated sinus and lung infections. It may also cause bronchiectasis, a long-term widening and damage of the airways.

**Alternate Names:**

Sinopulmonary-Infertility Syndrome; Barry-Perkins-Young Syndrome

**Y-Plate Osteosynthesis**

Surgical repair of a complex broken bone using a metal plate shaped like the letter Y. The plate holds the bone pieces in place while they heal.

**Alternate Names:**

Y-Plate Fixation; Y-Shaped Contoured Bone Plate

**Yttrium-90**

A radioactive substance used in selected treatments to deliver radiation to abnormal tissue, such as some liver tumors or inflamed joints.

**Yttrium-90 Microspheres**

Tiny glass or resin beads containing radioactive yttrium-90. They are delivered through blood vessels to selected liver tumors, where they release radiation.

**Alternate Names:**

Y-90 Radioembolization Microspheres; TheraSphere; SIR-Spheres

**Yttrium-90 Radioembolization**

A treatment in which tiny beads containing radioactive yttrium-90 are delivered through liver blood vessels to release radiation inside liver tumors.

**Alternate Names:**

SIRT; Y-90 SIRT; Y-90 Transarterial Radioembolization

**Yttrium-Aluminum-Garnet Laser**

A laser that uses a crystal to produce a focused

beam of light. It is used in eye care for procedures such as opening a cloudy membrane after cataract surgery and making a small opening for some types of glaucoma.

**Alternate Names:**

Nd:YAG Laser; Neodymium:YAG Laser

**Yuzpe Regimen**

An older form of emergency contraception using two doses of combined birth-control hormones. It has largely been replaced by emergency contraception containing levonorgestrel or ulipristal.

**Y-V Plasty**

A surgical technique in which a Y-shaped cut is closed as a V. This lengthens or widens nearby tissue and may help release a tight scar or other narrowing.

**Alternate Names:**

Y-V Advancement Flap; Y-V Lengthening Procedure

**Yeast Infections**

Infections caused by an overgrowth of yeast, most often *Candida*. They commonly affect the vagina, mouth, skin, or bloodstream; symptoms and treatment depend on the site and the person's risk factors.

## Z

### Zafirlukast

A leukotriene-receptor antagonist used for long-term control and prevention of asthma symptoms. It is taken orally and is not a rescue treatment for an acute asthma attack; liver injury and drug interactions are important safety considerations.

#### Alternate Names:

Accolate

### Zahn Lines

Alternating light and dark layers seen in a blood clot that formed while blood was flowing. The light layers contain platelets and fibrin, while the dark layers contain more red blood cells.

#### Alternate Names:

Lines of Zahn; Striae of Zahn

### Zanamivir

An inhaled neuraminidase inhibitor used to treat or prevent influenza A and B when started appropriately. It may cause bronchospasm and is used cautiously in people with underlying airway disease.

#### Alternate Names:

Relenza

### ZAP-70 Deficiency

A rare inherited immune disorder in which important immune cells do not work properly. Children may have repeated, serious infections.

### Zavanelli Maneuver

An emergency procedure for severe shoulder dystocia that does not respond to other measures. The clinician gently returns the baby's head to the birth canal, followed by immediate cesarean delivery.

#### Alternate Names:

Cephalic Replacement Maneuver

### Z-Disc

A thin structure inside muscle fibers that anchors the protein strands involved in muscle contraction. It marks the boundary of each repeating unit of a muscle fiber.

#### Alternate Names:

Z-Line; Z-Band; Zwischenscheibe

### Zellweger Syndrome

A severe inherited disorder in which cells cannot make peroxisomes, structures that help process fats and other substances. It begins in infancy and may cause weak muscle tone, feeding problems, seizures, liver disease, and impaired brain development.

#### Alternate Names:

ZSD; Cerebrohepatorenal Syndrome

### Zenker Degeneration

Severe damage and death of skeletal muscle fibers, formerly described in serious infections such as typhoid fever or widespread blood infection.

#### Alternate Names:

Zenker's Hyaline Necrosis; Waxy Muscle Degeneration

### Zenker Diverticulum

A pouch that forms in the upper swallowing tube near the throat, usually because the nearby muscle does not relax normally. It may cause difficulty swallowing, return of undigested food, bad breath, a neck lump, cough, or repeated lung infections.

#### Alternate Names:

---

Zenker's Diverticulum; Pharyngoesophageal Diverticulum; Hypopharyngeal Diverticulum; Pulsion Diverticulum

### **Zenker Peroral Endoscopic Myotomy**

A procedure that treats a pouch in the upper swallowing tube called a Zenker diverticulum. A flexible camera is passed through the mouth and the tight muscle between the pouch and swallowing tube is divided so food can pass more easily. Symptoms can return and the procedure has risks such as bleeding or a tear.

#### **Alternate Names:**

Z-POEM; Endoscopic Zenker Myotomy

### **Ziconotide**

A strong pain medicine delivered continuously into the fluid around the spinal cord for selected severe chronic pain. It can cause dizziness, confusion, hallucinations, and other serious nervous-system or mental-health effects.

#### **Alternate Names:**

Prialt

### **Zidovudine**

An HIV medicine that interferes with the virus's ability to copy itself. It may be used in selected treatment plans and to reduce transmission around childbirth; important risks include anemia, low white-cell counts, muscle problems, and other toxicity.

#### **Alternate Names:**

Azidothymidine; AZT; Retrovir

### **Ziehl-Neelsen Stain**

A laboratory stain used to find bacteria with a waxy coating that resists removal by acid, especially the bacteria that cause tuberculosis. These bacteria appear red against a contrasting background under a microscope.

#### **Alternate Names:**

Acid-Fast Stain; AFB Stain

### **Zieve Syndrome**

A temporary complication of heavy alcohol use and sudden liver injury. It causes breakdown of red

blood cells, yellowing of the skin or eyes, and increased blood fats.

#### **Alternate Names:**

Hemolytic Anemia with Hyperlipidemia and Jaundice

### **Zika**

An infection caused by Zika virus. It often causes no symptoms or a mild fever, rash, red eyes, joint pain, and muscle pain. Infection during pregnancy can harm the developing baby, and it can rarely trigger Guillain-Barré syndrome.

#### **Alternate Names:**

Zika Virus Disease; ZVD; Congenital Zika Syndrome

### **Zika Virus**

A virus spread mainly by infected *Aedes* mosquitoes and also through sexual contact and, less commonly, blood or pregnancy-related transmission. Infection is often mild or symptom-free but can injure a developing fetus.

#### **Alternate Names:**

ZIKV

### **Zileuton**

A medicine used for long-term prevention and control of asthma. It does not relieve a sudden asthma attack and can cause liver problems or interact with other medicines.

#### **Alternate Names:**

Zyflo

### **Zinc**

An essential mineral needed for many body reactions, normal growth, immunity, reproduction, and wound healing. Too little can cause deficiency; excessive supplements can cause stomach symptoms and copper deficiency.

#### **Alternate Names:**

Zn

### **Zinc Acetate**

A zinc salt used to treat zinc deficiency and, in some forms, to reduce copper absorption in Wilson

---

disease. It may cause nausea or stomach irritation.

### **Zinc Deficiency**

A state of inadequate available zinc caused by insufficient intake, malabsorption, excessive losses, or increased requirements. Manifestations may include impaired growth, dermatitis, alopecia, diarrhea, altered taste, delayed wound healing, and increased infection susceptibility.

#### **Alternate Names:**

Hypozincemia; Zinc Depletion

### **Zinc Finger Motif**

A small part of a protein held in shape by a zinc atom. It often helps the protein attach to DNA and control gene activity.

### **Zinc Oxide**

An insoluble zinc compound used topically as a skin protectant and barrier, including in preparations for diaper dermatitis and minor irritation. It can reduce contact with moisture and irritants but does not treat every cause of a rash.

#### **Alternate Names:**

ZnO

### **Zinc Oxide Ointment**

A topical preparation containing zinc oxide that forms a protective barrier over irritated or moist skin. It is commonly used for diaper dermatitis and minor skin irritation.

#### **Alternate Names:**

Topical Zinc Barrier Cream; Zinc Oxide Paste

### **Zinc Protoporphyrin**

A substance made in developing red blood cells when zinc is used instead of iron during hemoglobin production. High levels can occur with iron deficiency or long-term lead exposure.

#### **Alternate Names:**

ZPP; Erythrocyte Zinc Protoporphyrin

### **Zinc Sulfate**

An oral or parenteral zinc salt used to prevent or treat zinc deficiency when clinically indicated. Gas-

trointestinal upset is common with oral therapy, and prolonged excessive use can cause copper deficiency.

### **Zinc Toxicity**

Adverse effects caused by excessive zinc ingestion or exposure. Acute toxicity may cause nausea, vomiting, abdominal pain, and diarrhea; chronic excess can impair copper absorption and lead to anemia or neurologic and immune abnormalities.

#### **Alternate Names:**

Hyperzincemia; Zinc Poisoning

### **Zinner Syndrome**

A rare condition present from birth in which one kidney is absent, a nearby seminal-vesicle cyst forms, and the sperm-carrying duct is blocked. It may cause pelvic pain, painful urination, or infertility after puberty.

#### **Alternate Names:**

Mesonephric Duct Malformation Syndrome; Seminal Vesicle Cyst with Renal Agenesis

### **Zirconia**

A zirconium-oxide ceramic used in dentistry for crowns, bridges, implants, and other restorations. Its strength and tissue compatibility make it useful, although restoration design, surface treatment, and clinical indication affect performance.

#### **Alternate Names:**

Zirconium Dioxide; Ceramic Biomaterial

### **Zoledronic Acid**

A potent intravenous bisphosphonate used for osteoporosis and certain cancer-related conditions, including hypercalcemia of malignancy and skeletal complications of bone metastases. Renal injury, hypocalcemia, acute-phase reactions, and rare osteonecrosis of the jaw are important risks.

#### **Alternate Names:**

Zoledronate; Zometa; Reclast

### **Zollinger-Ellison Secretin Stimulation Test**

A test used when a gastrin-producing tumor is suspected but a blood gastrin result is unclear. Secretin

---

is given through a vein and blood gastrin levels are measured more than once.

**Alternate Names:**

Secretin Provocation Test; Secretin Gastrinoma Test

**Zollinger-Ellison Syndrome**

A rare condition in which a hormone-producing tumor makes too much gastrin, causing the stomach to produce excess acid. It can lead to repeated ulcers, severe reflux, abdominal pain, and diarrhea.

**Zolpidem**

A nonbenzodiazepine sedative-hypnotic used for short-term treatment of insomnia. It can cause next-day impairment, complex sleep behaviors, dependence, and respiratory or central-nervous-system depression, especially with other sedatives.

**Alternate Names:**

Ambien

**Zona Fasciculata**

The middle and largest layer of the outer part of the adrenal gland. It makes glucocorticoid hormones, including cortisol.

**Alternate Names:**

Adrenal Zona Fasciculata; Fascicular Zone

**Zona Glomerulosa**

The outer layer of the adrenal gland. It makes mineralocorticoid hormones, mainly aldosterone, which helps control salt, water, and blood pressure.

**Alternate Names:**

Adrenal Zona Glomerulosa; Glomerular Zone

**Zona Pellucida**

A protective layer of proteins surrounding an egg cell. It helps sperm attach to the egg and changes after fertilization to prevent more than one sperm from entering.

**Alternate Names:**

Oocyte Glycoprotein Coat; Pellucid Zone

**Zona Reticularis**

The inner layer of the outer part of the adrenal gland. It makes some hormones related to sex hormones,

including adrenal androgens.

**Alternate Names:**

Adrenal Zona Reticularis; Reticular Zone

**Zonisamide**

An antiseizure medicine used mainly for focal seizures. It can cause sleepiness, thinking problems, kidney stones, reduced sweating with overheating, acid imbalance, severe rash, or other serious reactions.

**Alternate Names:**

Zonegran

**Zonula Adherens**

A belt-like connection between neighboring cells that helps hold them together. It is especially important in sheets of lining cells.

**Alternate Names:**

Belt Desmosome; Intermediate Junction; Adherens Junction

**Zonula Occludens**

A tight connection between neighboring lining cells that helps prevent substances from passing freely between them.

**Alternate Names:**

Tight Junction

**Zonule**

Fine fibers that hold the eye's lens in place. They transfer tension from the ciliary muscle so the lens changes shape and the eye can focus at different distances.

**Alternate Names:**

Zonule of Zinn; Ciliary Zonule; Suspensory Ligament of Lens

**Zoon Balanitis**

A chronic benign inflammation of the glans penis, usually seen in uncircumcised men. It commonly appears as a sharply demarcated shiny orange-red or rust-colored patch; diagnosis is clinical, with biopsy used when the diagnosis is uncertain.

**Alternate Names:**

Plasma Cell Balanitis; Balanitis Circumscripta Plas-

---

macellularis

### Zoonosis

An infection that naturally spreads between animals with backbones and people. Examples include rabies, brucellosis, leptospirosis, toxoplasmosis, and some influenza infections; spread may involve bites, food, water, droplets, or direct contact.

#### Alternate Names:

Zoonotic Infection; Zoonotic Disease

### Zoonotic Spillover

The spread of a germ from an animal or insect carrier to a person. If the germ then spreads easily between people, it can cause an outbreak or epidemic.

#### Alternate Names:

Zoonotic Transmission Event; Cross-Species Spillover

### Zoster

A painful, usually unilateral vesicular eruption caused by reactivation of latent varicella-zoster virus in a sensory nerve ganglion. It may be complicated by postherpetic neuralgia, ocular disease, or neurologic involvement.

#### Alternate Names:

Herpes Zoster; Shingles; Zona

### Zoster Ophthalmicus

Shingles affecting the nerve that supplies the forehead, upper eyelid, and eye. It causes a painful one-sided rash around the eye and can damage vision.

#### Alternate Names:

Herpes Zoster Ophthalmicus; HZO

### Z-Plasty

A reconstructive operation that rearranges nearby skin in a Z-shaped pattern. It can lengthen a tight scar, change the direction of a scar, and improve movement or appearance.

### Z-Score (DEXA)

A statistical bone mineral density (BMD) score obtained from dual-energy X-ray absorptiometry

that compares a patient's measured BMD to the mean BMD of an age-, sex-, and ethnicity-matched reference population. A Z-score of  $-2.0$  or lower is defined as "below the expected range for age" in children, premenopausal women, and men younger than 50 years.

#### Alternate Names:

Age-Matched Bone Density Z-Score; DEXA Z-Score

### Z-Score (Echocardiography)

A number that compares the size of a child's heart or blood-vessel structure with the expected size for children of a similar body size. It can help describe unusually small or large structures.

#### Alternate Names:

Pediatric Echo Z-Score; Cardiovascular Z-Score

### Z-Thumb Deformity

A characteristic deformity of the thumb in which fixed flexion occurs at the metacarpophalangeal (MCP) joint accompanied by hyperextension at the interphalangeal (IP) joint, resembling the letter Z. It is a hallmark joint manifestation of advanced rheumatoid arthritis.

#### Alternate Names:

Boutonniere-Type Thumb Deformity; Hitchhiker's Thumb Deformity

### Z-Tracking Technique

An injection method in which the skin is moved to one side before an injection and allowed to return afterward. This creates a zigzag path that helps keep the medicine in the muscle.

#### Alternate Names:

Z-Track Injection Method; Z-Track Technique

### Zygapophyseal Joint

One of the small joints at the back of the spine that connects neighboring vertebrae. These facet joints guide spinal movement and can become painful with arthritis.

#### Alternate Names:

Facet Joint; Z-Joint; Spinal Articular Facet

---

### Zygapophyseal Joint Arthropathy

Arthritis of the small facet joints at the back of the spine. It can cause local or nearby neck or back pain and stiffness.

#### Alternate Names:

Facet Joint Arthropathy; Spinal Facet Osteoarthritis

### Zygomatic Arch

A prominent horizontal bony bridge on the lateral aspect of the skull formed by the articulation of the temporal process of the zygomatic bone with the zygomatic process of the temporal bone, providing the origin for the masseter muscle and transmitting the temporalis muscle tendon beneath it.

#### Alternate Names:

Cheekbone Arch

### Zygomatic Bone

A paired facial bone that forms the prominence of the cheek and part of the lateral orbital wall and floor. It articulates with the frontal, sphenoid, temporal, and maxillary bones.

#### Alternate Names:

Cheekbone; Malar Bone

### Zygomatic Fracture

A break in the cheekbone or the group of bones joining it to the eye socket, usually caused by facial trauma. It may flatten the cheek, numb the skin below the eye, cause double vision, limit mouth opening, or injure the eye socket.

#### Alternate Names:

ZMC Fracture; Malar Fracture; Tripod Fracture

### Zygomaxillary Complex Fracture

A break involving the cheekbone and its connections to the eye socket, upper jaw, and skull. It may flatten the cheek and cause double vision, numbness below the eye, or difficulty opening the mouth.

#### Alternate Names:

ZMC Fracture; Tetrapod Fracture; Tripod Fracture of the Face

### Zygomycosis

A serious infection caused by molds called Mucorales. It mainly affects people with weakened immunity or poorly controlled diabetes and can rapidly damage the nose, brain, lungs, skin, or other tissues.

#### Alternate Names:

Mucormycosis; Invasive Mucorales Infection

### Zygote

The first cell formed when a sperm joins an egg. It contains genetic material from both parents, divides repeatedly, and develops into an embryo.

#### Alternate Names:

Fertilized Oocyte; Conceptus

### Zymogen

An inactive form of an enzyme that becomes active after a chemical change. Examples include pepsinogen, trypsinogen, and some blood-clotting proteins.

#### Alternate Names:

Proenzyme; Inactive Enzyme Precursor

### Zymogen Granule

A small storage sac inside certain gland cells, such as cells in the pancreas. It stores inactive digestive enzymes until the cell releases them.

#### Alternate Names:

Zymogenic Secretory Vesicle; Proenzyme Granule

### Zika Virus Infection

Infection caused by Zika virus, usually spread by infected *Aedes* mosquitoes and sometimes through sexual or pregnancy-related transmission. It is often mild or asymptomatic but can cause congenital infection and neurologic complications.

### Zika Fever

The usually mild febrile illness caused by Zika virus. It may include rash, red eyes, joint pain, muscle pain, headache, and fever; infection during pregnancy can harm the developing fetus.

### Zinc Poisoning

Illness caused by excessive zinc ingestion or exposure. It may cause nausea, vomiting, abdominal pain, and

---

diarrhea acutely; prolonged excess can interfere with copper absorption and cause anemia or neurologic problems.

### **Zoster (Shingles)**

A painful rash caused by reactivation of varicella-zoster virus in a sensory nerve. It typically affects one side of the body and may lead to postherpetic neuralgia or eye and neurologic complications.

# Drugs

## Generic Medicines and Medication Terms

### 5-Alpha Reductase Inhibitor

A medicine that lowers production of dihydrotestosterone, a hormone that affects the prostate and hair follicles. It is used mainly for an enlarged prostate and selected types of hair loss.

### Abortifacient

A medicine or substance used to end a pregnancy. Some block progesterone, others cause uterine contractions and cervical opening, and certain medicines stop rapidly dividing pregnancy tissue in selected ectopic pregnancies.

### Abortion - Medication

Medication abortion uses prescribed medicines, commonly mifepristone followed by misoprostol or misoprostol alone, to end an early intrauterine pregnancy; confirmation of completion and assessment for ectopic pregnancy are important.

### Abuse Steroid (Anabolic Steroid Abuse)

Alternate index label for Anabolic Steroid Abuse.

### A&E Medicine

The medical specialty concerned with the immediate assessment, resuscitation, diagnosis, and initial treatment of acute illness and injury.

### Alternate Names:

A&E Medicine

### ACE Inhibitor

A medicine that relaxes blood vessels and reduces strain on the heart by lowering production of angiotensin II. It treats high blood pressure, heart failure, and some kidney disease; cough, high potassium, kidney problems, or swelling can occur.

### Acitretin

An oral retinoid used mainly for severe psoriasis and selected keratinization disorders. It is highly teratogenic and requires strict pregnancy precautions and monitoring for adverse effects.

### Adenovirus Vaccine

A vaccine used primarily to prevent adenovirus types 4 and 7 among selected military personnel. It is an oral, live vaccine and is not part of routine vaccination for the general public. Vaccine use and eligibility depend on current public-health recommendations.

### Adverse Drug Event

Harm related to the use of a medication, including harm caused by an adverse drug reaction, medication error, overdose, or inappropriate use.

### Adverse Drug Reaction

An unwanted and harmful response to a medicine taken at a usual dose for prevention, testing, or treatment. It may result from the medicine's expected effects, an allergy, an interaction, or an unusual individual response.

### Agent, Tocolytic

A medicine that reduces uterine contractions, used

---

selectively to delay preterm birth long enough for corticosteroids, transfer, or other preparations to take effect.

### **Agonist-Antagonist**

A medicine that activates some receptors while blocking others, or activates a receptor only partly. Its mixed action can produce a desired effect while limiting another effect; examples include some opioid medicines.

### **AIDS Vaccine**

A vaccine designed to prevent HIV infection or reduce its effects; no generally effective licensed vaccine currently exists.

### **Alendronate**

A bisphosphonate that reduces bone resorption and is used to treat or prevent osteoporosis and selected other disorders of excessive bone turnover.

#### **Alternate Names:**

Alendronic acid; oral bisphosphonate therapy.

### **Anabolic Steroid Abuse**

Anabolic-androgenic steroid misuse can cause infertility, testicular shrinkage, acne, mood changes, high blood pressure, adverse cholesterol changes, liver injury, and cardiovascular events. Stopping may produce withdrawal symptoms and is safest with medical support.

#### **Alternate Names:**

Abuse Steroid (Anabolic Steroid Abuse)

### **Analgesic**

A medicine that relieves pain without necessarily causing loss of consciousness. Analgesics include nonopioid medicines, opioids, and other medicines chosen according to the type and severity of pain.

### **Analgesic Nephropathy**

Chronic tubulointerstitial renal injury associated with prolonged or excessive use of analgesic medicines. It may cause impaired urinary concentration, sterile pyuria, haematuria, papillary necrosis, hypertension, and progressive chronic kidney dis-

ease.

### **Anesthetic**

A medicine or technique that numbs part or all of the body. Depending on the method, a person may remain awake or become unconscious during a procedure; breathing, blood pressure, and other vital functions may need monitoring.

### **Angiotensin Converting-Enzyme Inhibitor**

A medicine that lowers the production of angiotensin II, a hormone that narrows blood vessels and promotes salt retention. It can treat high blood pressure, heart failure, and some kidney disease but may cause cough, high potassium, kidney problems, or swelling.

### **Angiotensin Receptor Blocker**

A medicine that blocks angiotensin II at the AT1 receptor, reducing vasoconstriction and aldosterone effects; it is used for hypertension, heart failure, and selected kidney disease.

### **Antibiotic**

A medicine that kills bacteria or stops them from multiplying. Antibiotics do not treat viral infections and should be selected for the suspected bacteria, infection site, allergies, and resistance risk.

### **Antibiotic-Associated Colitis**

Alternate Mayo Clinic label; see *Pseudomembranous colitis*.

### **Antibiotic-Associated Diarrhea**

Loose or frequent stools that occur during or soon after antibiotic treatment.

#### **Alternate Names:**

Diarrhea, Antibiotic-Associated

### **Antibiotic Cycling**

A strategy in which the preferred antibiotic for a particular clinical use is changed at planned intervals. It is intended to limit selection of resistant organisms, although its benefit depends on local

---

conditions and implementation.

### **Antibiotic De-Escalation**

The process of narrowing antimicrobial spectrum based on microbiological results and clinical response. De-escalation aims to reduce selective pressure for resistance while maintaining therapeutic efficacy.

### **Antibiotic Mixing**

A strategy in which different antibiotics are assigned concurrently to different patients with the same indication. It is intended to reduce uniform selection pressure for resistance in a patient population.

### **Antibiotic Resistance**

The ability of bacteria to survive or grow despite an antibiotic that would normally kill them or stop their growth. It can result from genetic changes and the spread of resistance genes; unnecessary or incorrect antibiotic use can accelerate it.

#### **Alternate Names:**

Resistance Antibiotic (Antibiotic Resistance)

### **Antibiotic Resistance Genes**

Genes that help bacteria survive antibiotics. They may change the antibiotic's target, destroy or modify the medicine, or remove it from the cell. Bacteria can inherit these genes or acquire them from other bacteria.

### **Antibiotic Stewardship**

Coordinated efforts to use antibiotics appropriately by selecting the right medicine, dose, route, and duration while reducing unnecessary treatment and resistance.

### **Anticholinergic Cognitive Burden Scale**

A medication-review tool that estimates the total anticholinergic load of a patient's medicines. It supports risk assessment and deprescribing but does not replace individualized clinical judgment.

### **Anticoagulant**

A medicine that slows the body's blood-clotting

process. It helps prevent or treat clots in veins, lungs, heart, or arteries but can cause bruising or serious bleeding.

#### **Alternate Names:**

Anticoagulants; Blood Thinners

### **Anticoagulant Agent**

See *Anticoagulant*.

### **Anticoagulant Monitoring**

Laboratory assessment used to measure the effect or safety of an anticoagulant. The appropriate test depends on the drug and may include aPTT, anti-Xa activity, INR, or measurements of kidney function and blood counts.

### **Anticoagulant Rodenticides Poisoning**

Poisoning from rat or mouse bait that interferes with blood clotting. Symptoms such as easy bruising, nosebleeds, blood in urine or stool, or weakness may appear later; suspected exposure requires immediate poison-control or emergency advice.

### **Anticonvulsant**

A medicine used to prevent or control seizures. Some are also used for nerve pain, migraine prevention, or mood disorders; choice depends on the condition, other medicines, pregnancy, and side effects.

#### **Alternate Names:**

Antiseizure medicine

### **Anticonvulsant Mood Stabilizers**

Antiepileptic drugs used as mood stabilizers in bipolar disorder. Valproate (divalproex) is effective for acute mania and rapid cycling. Carbamazepine is effective for acute mania but has numerous drug interactions via CYP3A4 induction. Lamotrigine is effective for bipolar depression prevention but not acute mania.

### **Antidepressant**

A medicine used to treat depressive disorders and some other conditions involving mood, anxiety, pain, or sleep.

---

## Antidiabetic Agent

See *Antidiabetic Drugs*.

## Antidiarrheal

A medicine that reduces the frequency or amount of diarrhea. It may be unsafe when stools contain blood, there is high fever or severe infection, or the bowel is blocked, so the cause should be considered first.

### Alternate Names:

Antidiarrheals; Antidiarrheal Medicines

## Antidiarrheal Medicine Overdose

Toxic effects caused by excessive exposure to Antidiarrheal medicine. Severity depends on the dose, route, timing, coexisting conditions, and clinical findings; suspected poisoning requires prompt assessment.

## Antiemetic

A medicine that prevents or reduces nausea and vomiting. The choice depends on the cause, such as infection, migraine, pregnancy, surgery, or cancer treatment, and some medicines can cause sleepiness or movement problems.

### Alternate Names:

Antiemetics; Antiemetic Medicines

## Anti estrogen

A drug that blocks estrogen effects or reduces estrogen production; it may be used in hormone-sensitive breast cancer or to alter reproductive hormone signaling.

## Antifungal

A medicine that kills fungi or stops them from growing. It may be applied to the skin or given by mouth or injection; the choice depends on the fungus, the body site, and the severity of infection.

## Antifungal Agent

A drug or chemical that kills fungi or inhibits their growth, used to treat fungal infections of the skin, mucosa, or internal organs.

## Antifungal Drug Classes

Major classes of antifungal agents include polyenes (amphotericin B), azoles (fluconazole, voriconazole), echinocandins (caspofungin, micafungin), and allylamines (terbinafine). Polyenes bind to ergosterol in fungal cell membranes. Azoles inhibit ergosterol synthesis. Echinocandins inhibit cell wall synthesis.

## Antifungal Medication

A medicine used to treat fungal infection; the choice and route depend on the organism and site, and examples include azoles, terbinafine, polyenes, and echinocandins.

### Alternate Names:

Antifungals; Antifungal Medicines; Antifungal Drugs

## Antihistamine

A medicine that blocks histamine, a chemical involved in allergies. It can relieve sneezing, itching, hives, or watery eyes; older types may cause sleepiness, dry mouth, blurred vision, urinary retention, or confusion.

## Antihypertensive

A medicine used to lower blood pressure. Classes include ACE inhibitors, angiotensin-receptor blockers, calcium-channel blockers, thiazide-type diuretics, beta-blockers, and other agents. Selection depends on blood pressure, kidney function, cardiovascular disease, pregnancy, and other clinical factors.

### Alternate Names:

Antihypertensives; Blood Pressure-Lowering Medicines

## Antihypertensive Agent

See *Antihypertensive*.

### Alternate Names:

Blood-pressure medicine

## Anti-Infective

A medicine or other agent used to prevent or treat an infection. The choice depends on whether the cause is a bacterium, virus, fungus, or parasite, as well as the infection site and the person's health.

---

### Antimalarial

A drug used to prevent or treat malaria caused by Plasmodium parasites; selection depends on species, disease severity, resistance, and geographic exposure.

### Antimicrobial Drug

A medicine used to treat infection by bacteria, viruses, fungi, or parasites; the drug is selected according to the organism, infection site, and patient factors.

### Antimicrobial Drug Interactions

Changes in the effect or level of an infection medicine caused by another medicine, food, or supplement. Some combinations reduce treatment effectiveness or increase toxicity, so the full medicine list should be checked.

### Antiparasitic

A medicine used to prevent or treat infection caused by parasites. The choice depends on the parasite, body site, disease severity, resistance patterns, pregnancy status, and other patient factors.

#### Alternate Names:

Antiparasitics; Antiparasitic Medicines; Antiparasitic Drugs

### Antiparkinsonian

A medicine used to improve movement or other symptoms of Parkinson disease. Medicines may replace dopamine, imitate its effects, or alter other brain signals; benefits and adverse effects vary with the drug and the person.

### Antiplatelet Agent

A medicine that makes blood platelets less likely to clump together. It lowers the risk of clots in arteries but can increase bruising and serious bleeding.

#### Alternate Names:

Antiplatelet medicine

### Antiprotozoal Drug

A medicine used to prevent or treat disease caused by protozoa, including drugs directed against

malaria, intestinal protozoa, or tissue parasites.

### Antipruritic

A medicine or skin treatment that relieves itching. It may work by reducing inflammation, blocking allergy signals, numbing the skin, or changing nerve signals; treatment should also address the cause of the itching.

### Antipsychotic

A medicine used to reduce hallucinations, delusions, severe agitation, or mania and to treat some mood disorders. Possible effects include sleepiness, movement problems, weight or blood-sugar changes, and rarely a dangerous fever-and-stiffness reaction.

#### Alternate Names:

Antipsychotics; Antipsychotic Medicines

### Antipsychotic Agent

See *Antipsychotic*.

### Antipsychotic-Induced Parkinsonism

Drug-induced bradykinesia, rigidity, tremor, or postural instability caused by dopamine-receptor blockade, usually from antipsychotic treatment. Management involves reviewing the medication, dose, alternatives, and symptomatic treatment when appropriate.

### Antispasmodic

A medicine that relaxes involuntary muscle and may reduce cramping in the intestine, bladder, or other organs. Some types can cause dry mouth, blurred vision, constipation, urinary retention, or confusion.

#### Alternate Names:

Antispasmodics

### Antithyroid

See *Antithyroid Drug*.

### Antithyroid Drug

A medicine that reduces thyroid hormone production, used to treat some forms of hyperthyroidism. Examples include methimazole and propylthiouracil. Radioactive iodine is a separate treatment, not an

---

antithyroid drug.

**Alternate Names:**

Antithyroid Medicines; Antithyroid Drugs

**Antiviral**

A medicine that slows or stops viruses from multiplying. It works only against certain viruses and is chosen according to the infection, timing, resistance, and the patient's health.

**Alternate Names:**

Antivirals; Antiviral Medicines; Antiviral Drugs

**Antiviral Drug Classes**

Groups of antiviral medicines classified by the step of viral growth they block. Some stop copying of viral genetic material, some block viral proteins or entry into cells, and others prevent newly formed viruses from being released.

**Anxiolytic**

A medicine used to reduce anxiety. Different medicines work in different ways and have different risks; choice depends on the condition, urgency, other health problems, and patient factors. Psychotherapy is a separate, non-medicine treatment for anxiety.

**Alternate Names:**

Anxiolytics; Anti-Anxiety Medicines

**ARB-Nepriylsin Inhibitor**

Sacubitril/valsartan combines an ARB with a neprilysin inhibitor, increasing natriuretic peptide levels while blocking the renin-angiotensin system. The PARADIGM-HF trial demonstrated superior reduction in cardiovascular death and heart failure hospitalization compared to enalapril.

**Aromatase Inhibitor**

A class of medications that inhibit aromatase, the enzyme that converts androgens (androstenedione, testosterone) to estrogens (estrone, estradiol) in peripheral tissues (adipose, breast, muscle, bone). Used primarily in hormone receptor-positive breast cancer in postmenopausal women.

**Attenuated Vaccine**

A vaccine made with a weakened microorganism that retains the ability to stimulate immunity.

**Alternate Names:**

Live attenuated vaccine

**Bacterial Vaccine**

A vaccine made from killed bacteria, weakened bacteria, purified bacterial parts, or bacterial toxins. It trains the immune system to prevent specific infections; protection and dosing depend on the vaccine and age group.

**BCG Vaccine**

A vaccine made from a weakened relative of the tuberculosis bacterium. It helps protect children from severe tuberculosis, especially meningitis, but protection against lung tuberculosis varies; use depends on local risk and policy.

**Behavioral Medicine**

An interdisciplinary field integrating behavioral science with medical practice to prevent, diagnose, and treat illness. It addresses psychological factors such as stress, coping, adherence, and health behaviors that influence disease outcomes.

**Benzodiazepines**

Medicines that strengthen the brain's main calming signal. They can reduce anxiety, stop some seizures, relax muscles, or cause sleepiness, but can also cause dependence, falls, confusion, and dangerously slow breathing, especially with opioids or alcohol.

**Beta-Adrenergic Blocker**

A drug that antagonizes beta-adrenergic receptors, reducing heart rate, myocardial contractility, and renin release. It is used in selected patients with hypertension, angina, arrhythmias, post-myocardial infarction disease, and heart failure; abrupt withdrawal may worsen ischemia.

**Alternate Names:**

Beta-Adrenergic Antagonist

---

## Beta Agonists

Drugs that activate beta-adrenergic receptors, producing effects such as relaxation of airway smooth muscle or increased cardiac stimulation depending on receptor selectivity.

### Alternate Names:

Beta-adrenergic agonists; beta-agonist drugs.

## Beta Blocker

See *Beta Blockers*.

## Beta-Blocker Overdose

Toxic exposure to a beta-adrenergic blocker that may cause slow heart rate, low blood pressure, low blood glucose, bronchospasm, seizures, or altered consciousness. It requires urgent poison-control and medical management.

## Beta Blockers

Medicines that block some effects of adrenaline at beta receptors. They commonly slow the heart rate and lower blood pressure and are used for several heart conditions and other problems. Some types can worsen asthma or mask warning signs of low blood sugar.

## Beta-Lactamase Inhibitor Combinations

Combinations of beta-lactam antibiotics with beta-lactamase inhibitors that extend activity against beta-lactamase producing organisms. The major combinations include amoxicillin-clavulanate, ampicillin-sulbactam, piperacillin-tazobactam, cefoperazone-sulbactam, and ceftolozane-tazobactam.

## C1 Esterase Inhibitor

A blood protein that helps control inflammation, swelling, and clotting reactions. Too little or abnormal activity can cause hereditary angioedema, with repeated attacks of swelling in the skin, bowel, or airway.

## Calcium Channel Blocker

A medicine that reduces calcium movement into heart and blood-vessel muscle cells. It may relax

arteries, lower blood pressure, reduce chest pain, or slow some abnormal heart rhythms; ankle swelling, constipation, dizziness, or a slow heartbeat may occur.

## Calcium Channel Blocker Overdose

Toxic exposure to a calcium-channel blocker that may cause low blood pressure, slow heart rate, conduction abnormalities, high blood glucose, or shock. It requires urgent medical and poison-control management.

## Calcium Channel Blockers

Medicines that reduce the movement of calcium into heart and blood-vessel muscle cells. Dihydropyridines, such as amlodipine and nifedipine, mainly relax arteries and are used for high blood pressure and angina. Other calcium channel blockers, such as diltiazem and verapamil, also slow the heart rate and electrical conduction and may be used for certain abnormal heart rhythms.

## Camptothecin Analogue

A cancer medicine related to camptothecin that blocks an enzyme cancer cells need to copy DNA. It can damage rapidly dividing cells and commonly causes low blood counts, diarrhea, nausea, or other gastrointestinal effects.

## Cancer Vaccine

A vaccine designed either to prevent infections that can cause cancer or to help the immune system attack an existing cancer. Its use depends on the specific vaccine and cancer; it does not replace other cancer treatment when needed.

## Cardiotonic Agent

A drug or substance that increases the force or efficiency of cardiac contraction, used selectively in heart failure or shock because benefits must be balanced against arrhythmia and other risks.

## Carvedilol Phosphate

The phosphate formulation of carvedilol, a medicine that blocks beta and alpha-1 receptors. It lowers heart rate and blood pressure and is used for heart

---

failure and hypertension; dizziness, slow heartbeat, and worsening fluid retention can occur.

### **Cebocephaly**

A rare birth defect in which the middle part of the face is severely underdeveloped, sometimes with a single nostril or a nose-like structure between closely spaced eyes. It usually occurs with major brain and facial-development abnormalities.

### **Celecoxib**

A selective COX-2 anti-inflammatory medicine used for pain and arthritis. It can cause stomach, kidney, blood-pressure, and heart problems and may increase cardiovascular risk, especially with long-term use or in people with existing risk factors.

### **Cholesterol - Drug Treatment**

Medicines used to lower harmful blood cholesterol or triglycerides and reduce cardiovascular risk. Statins are used most often; other options may be added when needed, according to cholesterol levels, overall risk, other illnesses, and treatment tolerance.

### **Cholinesterase Inhibitor**

A medicine that slows the breakdown of acetylcholine, a chemical used for nerve signalling. It can improve nerve communication in selected conditions but may cause nausea, diarrhoea, slow heartbeat, sweating, or muscle cramps.

### **Cold/Cough Medicines in Children**

Many nonprescription cold and cough medicines are unsafe or ineffective for young children and can cause sedation, agitation, abnormal heart rate, overdose, or breathing problems. Age-appropriate fluids, saline, humidification, and clinician-guided treatment are safer approaches.

### **Conjugate Vaccine**

A vaccine that joins a bacterial sugar to a carrier protein so the immune system makes a stronger, longer-lasting response. This design is especially useful in infants and young children.

#### **Alternate Names:**

Protein-conjugate vaccine; conjugated polysaccha-

ride vaccine.

### **Conscious Sedation**

Medicine given to make a person relaxed and drowsy during a procedure while allowing them to respond to voice or touch and usually breathe independently. Breathing, blood pressure, and alertness must be monitored because deeper sedation can occur.

### **Controlled Substance**

A medicine or chemical whose production, supply, possession, or use is restricted by law because it may cause dependence, misuse, overdose, or other serious harm. Rules differ between countries and substances.

### **Cox-1 Inhibitor**

A medicine that blocks cyclooxygenase-1, an enzyme involved in pain, stomach protection, kidney function, and platelet clotting. Blocking it may relieve pain but can increase stomach irritation, bleeding, or kidney problems.

### **COX Inhibitor**

A class of medicines that reduce production of chemicals involved in pain, fever, and inflammation. They can irritate the stomach, affect kidney function, raise blood pressure, or increase bleeding and cardiovascular risk.

### **Crack (Drug)**

A smokable, rapidly acting form of cocaine; it can cause dependence, severe cardiovascular effects, seizures, stroke, psychiatric symptoms, and overdose.

### **Cutaneous Drug Eruptions**

Skin rashes or other skin reactions caused by medicines. They may appear as a widespread red rash, hives, sun-sensitive areas, or a lichen-planus-like eruption. Blisters, skin peeling, mouth sores, fever, or facial swelling require urgent assessment.

### **Cyclooxygenase Inhibitor**

A medicine that reduces production of

---

prostaglandins and may relieve pain and inflammation.

### Designer Steroid

A chemically modified anabolic-androgenic steroid created to produce performance-enhancing effects or evade detection; products may be unapproved, contaminated, and medically dangerous.

### Diarrhea, Antibiotic-Associated

Alternate index label; see *Antibiotic-associated diarrhea*.

### Digitalis

A group of heart medicines from foxglove plants, including digoxin. They can strengthen heart contraction and slow some heart rhythms but have a narrow safety range and may cause dangerous toxicity.

### Diphtheria Vaccine

A vaccine containing an inactivated form of diphtheria toxin. It trains the immune system to neutralize the toxin and is usually given in combination vaccines with protection against tetanus and pertussis.

### Disease-Modifying Antirheumatic Drug

A medicine used for inflammatory rheumatic diseases to reduce disease activity and help prevent lasting joint or organ damage, rather than only relieving symptoms. Different types are chosen according to the disease, severity, other conditions, and monitoring needs.

#### Alternate Names:

DMARD; DMARDs; Disease-Modifying Antirheumatic Drugs

### Disulfiram

A medicine used as an adjunct for alcohol-use disorder that inhibits aldehyde dehydrogenase and can cause an unpleasant reaction if alcohol is consumed.

### Diuretic

A medicine that helps the kidneys remove extra salt and water in urine. It can treat swelling, high

blood pressure, heart failure, or selected kidney and liver conditions but may disturb salts or cause dehydration.

#### Alternate Names:

Diuretics; Water Pills

### Doctor Of Osteopathic Medicine

A physician who has completed an accredited osteopathic medical degree and residency training and is licensed to diagnose, prevent, and treat disease.

### Drug Administration Route

The pathway by which a medicine enters the body, such as oral, intravenous, intramuscular, inhaled, topical, or subcutaneous administration.

### Drug Allergies

Drug allergies are immune-mediated reactions to a medicine, ranging from rash to anaphylaxis; they must be distinguished from predictable side effects and nonimmune intolerance.

### Drug Allergy

An adverse immune-mediated reaction to a medication, representing a hypersensitivity response that is distinct from side effects, toxicities, and idiosyncratic reactions.

### Drug Antagonism

An interaction where one drug blocks or decreases the effectiveness of another, such as when an antidote blocks a poison.

### Drug Bioavailability

The proportion of a dose that reaches the bloodstream in an active form. It depends on how the medicine is given, how well it is absorbed, and how much is broken down before reaching the blood; intravenous doses enter the bloodstream completely.

### Drug Classification Systems

Systems that group medicines according to properties such as their chemical structure, mechanism of action, therapeutic use, or effects on the body.

---

## Drug Clearance

The body's ability to remove a medicine from the bloodstream, mainly through the liver and kidneys. Clearance affects how long a medicine works and how often it should be taken; liver or kidney disease may require dose adjustment.

## Drug Dependence

A state of physiological or psychological adaptation to a drug, characterized by a withdrawal syndrome upon discontinuation or dose reduction. Physical dependence: the body has adapted to the presence of the drug, and abrupt cessation produces a predictable withdrawal syndrome specific to the drug class.

## Drug-Drug Interactions

Changes in the effect or amount of one medicine caused by another medicine. The combination may make treatment less effective or increase side effects, so all prescription, nonprescription, and supplement use should be reviewed.

## Drug-Eluting Balloon (Vascular)

A vascular balloon catheter that delivers a medicine to the vessel wall during dilation, without leaving a permanent implant.

### Alternate Names:

Vascular

## Drug Emulsion

A medicine made by dispersing tiny droplets of one liquid throughout another liquid that normally would not mix with it. An added stabilizer keeps the mixture uniform so the medicine can be given safely.

## Drug Eruption

A skin eruption caused by a medication, ranging from a mild morbilliform rash to severe reactions such as Stevens–Johnson syndrome or toxic epidermal necrolysis.

## Drug-Facilitated Sexual Assault

Sexual contact occurring when a person's capacity to

consent or resist is impaired by alcohol, medication, or another drug, whether administered covertly or knowingly consumed. Medical care includes urgent safety assessment, treatment of injuries, toxicology sampling when indicated, prophylaxis, and trauma-informed support.

## Drug Hypersensitivity Reactions

Immune-mediated adverse reactions to medicines. They may be immediate or delayed and can range from a mild rash to severe systemic illness.

## Drug Hypersensitivity Syndrome

A serious delayed reaction to a medicine, usually beginning two to eight weeks after it is started. It may cause fever, widespread rash, facial swelling, enlarged lymph nodes, abnormal blood cells, and injury to the liver, kidneys, lungs, or heart.

## Drug-Induced Autoimmunity

An immune reaction caused by a medicine in which the body attacks its own tissues. It may resemble lupus, cause joint pain, fever, rash, or organ inflammation, and often improves after the responsible medicine is stopped under medical guidance.

## Drug-Induced Diarrhea

Diarrhea caused by a medicine or drug interaction. Common causes include antibiotics, laxatives, metformin, and medicines that alter intestinal motility.

## Drug-Induced Immune Hemolytic Anemia

An uncommon immune-mediated destruction of red blood cells triggered by a medication; evaluation includes blood tests and review of exposures, with specialist management.

## Drug Induced Liver Disease

Drug-induced liver injury occurs when a medicine, supplement, or toxin damages liver cells or bile flow. It may cause fatigue, nausea, itching, dark urine, jaundice, or no symptoms; identifying and stopping the responsible exposure under medical guidance is central to care.

---

### **Drug-Induced Low Blood Sugar**

Low blood glucose caused by a medicine, most often insulin or an insulin secretagogue. Symptoms may include sweating, tremor, confusion, seizure, or loss of consciousness.

### **Drug-Induced Pulmonary Disease**

Lung injury caused by a medicine or treatment. It may produce cough, breathlessness, fever, or abnormal lung imaging; the medicine, timing, and other possible causes must be reviewed promptly because some cases can progress to respiratory failure.

### **Drug-Induced Thrombocytopenia**

A low platelet count caused by a medicine through immune destruction, reduced production, or other mechanisms, increasing bleeding risk.

### **Drug-Induced Tremor**

Tremor caused or worsened by a medicine, stimulant, or toxin. Assessment considers timing, dose, other causes, and whether the medicine can be changed.

### **Drug Interaction**

A change in the effect or concentration of one medicine caused by another medicine, food, substance, or disease.

### **Drug Metabolism**

The enzymatic conversion of medicines into metabolites, mainly in the liver but also in the intestine, kidneys, lungs, and other tissues.

### **Drug Metabolism Pharmacogenomics**

The study of how inherited genetic differences change the way a person breaks down medicines. This information can sometimes help clinicians choose a safer or more effective medicine or dose.

### **Drug Overdose**

Harm caused by taking too much medicine or taking it by the wrong route. Effects range from sleepiness, vomiting, and confusion to seizures, organ damage, or stopped breathing. Suspected overdose requires urgent poison-control or emergency advice.

### **Drug Packaging**

The container, labeling, and protective materials used to preserve a medicine and support correct identification, storage, and use.

### **Drug, Prescription**

A medicine legally supplied under the order of an authorized prescriber, with its indication, dose, duration, interactions, and risks specified for the patient.

### **Drug Resistance**

The ability of microorganisms, cancer cells, or parasites to survive and proliferate despite exposure to drugs that were previously effective.

### **Drug, Sulfa**

A sulfonamide drug; some are antibacterial medicines, while others are used as diuretics or for other indications, and sulfonamide reactions vary by drug and patient.

### **Drug Therapeutics**

The use of medicines to prevent, diagnose, or treat disease while balancing expected benefit and potential harm.

### **Drug Tolerance**

A decreased pharmacological response to a drug after repeated administration, requiring dose escalation to achieve the same effect.

### **Drug Toxicity**

Harmful effects caused by a medicine or its metabolites. Toxicity may result from excessive exposure, accumulation, interactions, or an unpredictable individual reaction.

### **Drug Use First Aid**

Immediate care for suspected drug intoxication, including assessment of breathing and responsiveness, emergency activation, overdose-specific support, and naloxone when opioid toxicity is suspected.

---

## Drug Vehicle

An inactive substance or carrier used to deliver an active drug ingredient in a formulation.

## Drug Withdrawal

A clinically significant syndrome or return of symptoms caused by abrupt reduction or cessation of a drug after physiologic adaptation or dependence has developed. Tapering is required for some medications to reduce withdrawal and rebound effects.

## DTaP Vaccine

A vaccine against diphtheria, tetanus, and pertussis (whooping cough), given mainly to infants and young children in a multi-dose series. It reduces severe illness, complications, and spread; schedules vary by country.

## Eflornithine

A medicine that slows cell growth by blocking an enzyme needed to make certain cell components. A skin cream can reduce unwanted facial hair; an intravenous form has been used for selected African trypanosome infections.

## Enzyme Inhibitor

A substance that slows or blocks an enzyme, a protein that helps chemical reactions occur in the body. Medicines use this action to change processes such as blood pressure, inflammation, infection, hormone production, or cancer-cell growth.

## Estrogen Inhibitor

A medicine that reduces estrogen production or blocks estrogen's effects. It may treat selected hormone-sensitive cancers or other conditions; side effects can include hot flashes, bone loss, joint symptoms, or blood clots.

## Etidronate

A bisphosphonate medicine that slows the breakdown and rebuilding of bone. It is used selectively for some disorders of abnormal bone remodeling; treatment depends on the condition and can affect the stomach, kidneys, or minerals.

## Evidence-Based Medicine

The use of reliable research together with clinical expertise and the patient's values and circumstances to make healthcare decisions. It supports, but does not replace, discussion between patient and clinician.

## Expectorant

A medicine intended to loosen or thin mucus so it is easier to cough up. Benefit varies with the cause of cough and the product; persistent breathlessness, fever, chest pain, or blood needs medical assessment.

## Extensively Drug-Resistant TB

Tuberculosis caused by bacteria resistant to rifampicin and usually isoniazid, at least one fluoroquinolone, and at least one of the key drugs bedaquiline or linezolid. Diagnosis requires drug-susceptibility testing and specialist treatment.

## Family Medicine

A medical specialty providing comprehensive continuing care for people of all ages, including prevention, acute illness, chronic disease, and coordination of referrals.

## Fentanyl

A potent synthetic opioid analgesic used for severe pain and anesthesia. It can cause respiratory depression, sedation, constipation, nausea, tolerance, dependence, and fatal overdose, especially when combined with alcohol or other sedatives.

## Fertility Agent

A medicine or biologic intervention intended to improve the chance of conception by inducing ovulation, supporting sperm production, or treating a reproductive mechanism.

## Fidaxomicin

A narrow-spectrum oral macrocyclic antibiotic used to treat *Clostridioides difficile* infection. It has minimal systemic absorption and reduces disruption of normal intestinal flora compared with many alternatives, but recurrence can still occur.

---

## Filgrastim

A recombinant granulocyte colony-stimulating factor that increases production and release of neutrophils from bone marrow. It is used to reduce or treat selected forms of chemotherapy-related neutropenia; bone pain and rare splenic complications can occur.

## Finasteride

A medicine that lowers the conversion of testosterone to dihydrotestosterone. It can shrink an enlarged prostate and help some types of hair loss but may reduce libido, affect sexual function, or alter prostate-test results.

## Fixed Drug Eruption

A medicine-related skin reaction that returns in the same place whenever the person takes the responsible medicine. It may appear as a sharply outlined red or dark patch, sometimes with a blister or sore, and can leave lasting discoloration.

## Fluticasone

A corticosteroid available in inhaled, nasal, topical, and other formulations to reduce inflammation. Adverse effects depend on route and may include local irritation, oral candidiasis, skin thinning, adrenal suppression, or growth effects with prolonged exposure.

## Food-Drug Interaction

A change in how a medicine works or is absorbed because of food, drink, nutrients, or supplements. Examples include grapefruit affecting some medicines, vitamin K changing warfarin's effect, and calcium reducing absorption of some antibiotics.

## Forensic Medicine

Application of medical knowledge to legal questions, including injury interpretation, cause of death, toxicology, identification, sexual assault evaluation, and documentation.

## Forensic Medicine (Legal Medicine)

Branch of medicine that applies medical, biological, and scientific knowledge to legal questions and the

administration of justice.

## Alternate Names:

Legal Medicine

## Foscarnet

An intravenous antiviral agent used for selected cytomegalovirus or herpesvirus infections, especially when resistance or intolerance limits other treatment. Important toxicities include kidney injury and disturbances of calcium, magnesium, potassium, or phosphate.

## Furosemide

A diuretic that makes the kidneys remove more salt and water in urine. It treats swelling and some blood-pressure or heart conditions but may cause dehydration, abnormal body salts, kidney problems, or hearing damage.

## Ganglionic Blocker

A medicine that interrupts nerve signals at switching points controlling automatic body functions. It can affect blood pressure, heart rate, digestion, sweating, vision, and bladder function, so these medicines are rarely used clinically.

## Generic Drug

A medicine equivalent to a brand-name medicine in active ingredient, strength, dosage form, and intended use, usually sold under a nonproprietary name.

## Alternate Names:

Generic medicine

## Generic Medicine

A medicine with the same active ingredient, strength, form, route, and intended effect as an approved reference medicine. It may look different or have different inactive ingredients but must meet regulatory quality and performance requirements.

## Generic Name, Drug

The official nonproprietary name of a medicine's active ingredient, used consistently across manufacturers and countries. It identifies the medicine itself

---

rather than a company's brand name and helps prevent confusion when products have different trade names.

### **Genomic Medicine**

Use of a person's genetic or genomic information to guide disease diagnosis, risk assessment, prevention, or treatment.

### **Geriatric Medicine**

The medical specialty focused on the health, function, diseases, medications, and goals of older adults, often using comprehensive and coordinated care.

### **Growth Inhibitor**

A medicine or biological substance that slows or stops cell growth. In cancer treatment, it may block cell division or a growth signal, but it can also affect healthy cells and cause side effects.

### **Haemophilus Vaccine**

A vaccine that protects against serious disease caused by *Haemophilus influenzae* type b, including meningitis, pneumonia, and bloodstream infection. It is given mainly in infancy according to the recommended immunization schedule.

### **Hepatic Drug Metabolism**

The liver changes medicines into forms that the body can use or remove. This may stop a medicine's effect, activate a medicine that works after conversion, or produce a harmful product; age, illness, genetics, and other medicines can alter the process.

### **Hepatitis B Vaccine**

A recombinant vaccine that prevents hepatitis B infection, which can cause chronic liver disease, cirrhosis, and liver cancer. It is given in a series beginning at birth in many schedules; infants exposed at birth may also need hepatitis B immune globulin.

### **Hepatitis B Vaccine (Birth Dose)**

The first hepatitis B vaccine dose, given soon after birth, helps prevent infection passed from a parent to the newborn. If the birth parent has hepatitis B,

the infant also needs hepatitis B immune globulin promptly; local schedules determine later doses.

### **Alternate Names:**

Birth Dose

### **HER2 Inhibitor**

A targeted cancer treatment that blocks signaling through human epidermal growth factor receptor 2 in cancers with HER2 overexpression or amplification.

### **High Blood Pressure - Medicine-Related**

Hypertension caused or worsened by a medicine or substance, such as NSAIDs, steroids, decongestants, stimulants, oral contraceptives, or immunosuppressants; review and substitution may improve control.

### **Histamine-2 Receptor Antagonist**

A medicine that reduces stomach-acid production by blocking histamine signals in the stomach. It may treat reflux, indigestion, or ulcers; headache, diarrhea, confusion, and medicine interactions can occur.

### **Hormone Inhibitor**

A medicine or biologic that blocks hormone synthesis, release, receptor binding, or downstream signaling, used in selected endocrine disorders and hormone-sensitive cancers.

### **HPV Vaccine**

A vaccine that prevents infection with human papillomavirus types that cause several cancers and genital warts. It is routinely offered in early adolescence, can start from age 9, and may require two or three doses depending on age and immune status; it does not treat existing HPV infection.

### **Hypoglycemic Agent**

A medicine that lowers blood glucose, including insulin, insulin secretagogues, insulin sensitizers, incretin-based drugs, and sodium-glucose cotransporter inhibitors; choice depends on diabetes type and patient risks.

---

### **Hypolipidemic Agent**

A medicine that lowers fats in the blood, such as LDL cholesterol or triglycerides. It helps reduce cardiovascular risk when combined with appropriate diet, activity, and treatment of other risk factors.

### **Immunosuppressant**

A medicine that reduces immune-system activity. It may be used to prevent organ transplant rejection or treat autoimmune and inflammatory diseases; effects and infection risks vary by medicine and dose.

### **Immunosuppressant Drug**

A medicine that reduces immune-system activity, often to prevent transplant rejection or treat autoimmune disease.

### **Immunosuppressive Drug**

A drug that suppresses immune responses, used for organ transplantation, graft-versus-host disease, and autoimmune/inflammatory diseases.

### **Inactivated Polio Vaccine**

An injected vaccine made from killed polioviruses. It trains the immune system to prevent poliomyelitis and is used in routine childhood immunization programs; the schedule and use of other polio vaccines vary by country.

### **Influenza Vaccine**

A seasonal vaccine that reduces the risk of influenza and its complications. It is updated as needed and is offered each year to most people from early infancy; some young children need two doses in their first vaccinated season, according to local recommendations.

### **Inotrope**

A drug that changes myocardial contractility; positive inotropes increase the force of contraction. Dobutamine and milrinone may be used short term under specialist monitoring for cardiogenic shock or selected cases of acute decompensated heart failure with low output. Dopamine, epinephrine, and norepinephrine are primarily vasopressors or emer-

gency agents with additional inotropic effects, while digoxin is a separate cardiac glycoside used in selected chronic heart-failure or rate-control settings. These medicines can cause arrhythmias, ischemia, or other serious effects and are not routine long-term treatment for chronic heart failure.

### **Intensive Care Medicine**

Specialty managing critically ill patients. Components: monitoring, ventilatory support, hemodynamic support, infection control, nutrition, sedation, pain management. Common conditions: sepsis, ARDS, traumatic brain injury, post-cardiac arrest, multiorgan failure.

### **Internal Medicine**

The medical specialty focused on prevention, diagnosis, and nonsurgical treatment of diseases in adults, including complex multisystem illness.

### **Japanese Encephalitis Vaccine**

A vaccine that protects against Japanese encephalitis, a mosquito-borne viral infection of the central nervous system. Vaccine type, schedule, and eligibility depend on age, destination or exposure risk, and local recommendations.

### **Laxative**

See *Laxatives*.

### **Legal Medicine**

The application of medical knowledge to legal questions, including forensic examination, injury assessment, death investigation, and issues of capacity or consent.

### **Liquid Medication Administration**

Giving a medicine in liquid form by mouth, feeding tube, injection, or another prescribed route. The dose must be measured accurately with the supplied device because liquid strengths differ; household spoons can cause dosing errors.

### **Local Anesthetic**

A medicine that temporarily numbs a specific area

---

without usually causing loss of consciousness. It blocks pain signals in nearby nerves and is used for procedures, dental work, wound repair, and some forms of regional pain relief.

**Alternate Names:**

Local Anesthetics

**Luteinizing Hormone-Releasing Hormone Agonist**

A medicine that first stimulates and then, with continued use, suppresses signals from the pituitary gland that control the ovaries or testes. It is used for selected cancers, endometriosis, fibroids, and puberty disorders.

**Alternate Names:**

GnRH agonist; LHRH agonist

**Macrolide Antibiotic**

An antibiotic of the macrolide class that binds the bacterial 50S ribosomal subunit and usually inhibits protein synthesis; activity and resistance vary by organism and drug.

**Malaria Vaccine**

A vaccine intended to reduce malaria caused by *Plasmodium* parasites, especially *P. falciparum*; the RTS,S/AS01 and R21/Matrix-M vaccines are used in recommended childhood immunization programs in some endemic settings, alongside other preventive measures.

**MAO Inhibitor**

A medicine that slows breakdown of certain brain chemicals and is used for selected depression or Parkinson disease. It can interact dangerously with other medicines and some foods, so it requires careful prescribing and instructions.

**Measles-Rubella Vaccine**

A combined live attenuated vaccine containing measles and rubella antigens without the mumps component, widely used in countries where mumps is not a significant public health burden, including India's Universal Immunization Schedule.

**Measles Vaccine**

Measles vaccine is a live attenuated vaccine that induces active immunity against measles virus. It is usually given as part of the measles–mumps–rubella (MMR) or measles–mumps–rubella–varicella (MMRV) vaccine.

**Medication**

A substance or biological product used to prevent, diagnose, treat, or control a disease or symptom. Medicines may be prescribed, bought without a prescription, applied to the body, inhaled, swallowed, or given by injection.

**Medication Adherence**

The extent to which a patient's medication-taking behavior corresponds with the agreed treatment plan. Adherence is influenced by understanding, adverse effects, cost, access, regimen complexity, beliefs, and cognitive or social factors.

**Medication Adverse-Effect Profile**

The clinically relevant pattern of predictable pharmacologic effects and harmful reactions associated with a medication. It includes common dose-related effects, serious rare events, organ-specific toxicity, interactions, and monitoring requirements.

**Medication Cascade**

A prescribing sequence in which an adverse drug effect is misinterpreted as a new medical condition and another drug is prescribed to treat it. Recognizing cascades is an important goal of medication reconciliation and deprescribing.

**Medication Deprescribing**

A planned, supervised process of reducing the dose or stopping a medicine when its current or future harms outweigh its benefits or when treatment goals change. Tapering may be required to prevent withdrawal or rebound disease.

**Medication Error**

A preventable event that may cause or lead to inappropriate medication use or patient harm while the medication is in the control of a healthcare pro-

---

fessional, patient, or consumer. Errors can occur during prescribing, transcribing, dispensing, administration, or monitoring.

### **Medication Management**

The systematic process of optimizing pharmacotherapy to achieve therapeutic goals while minimizing adverse effects, encompassing prescribing, dispensing, administration, monitoring, and deprescribing.

### **Medication Overuse Headaches**

Frequent headaches caused or worsened by regular overuse of headache medicines.

**Alternate Names:**

Rebound Headache

### **Medication Reconciliation**

A structured process of obtaining and comparing the most accurate medication list with current prescriptions at transitions of care. It identifies omissions, duplications, incorrect doses, interactions, and unintended changes.

### **Medication Review**

Systematic examination of all medications for appropriateness. Components: indication, efficacy, safety, adherence, interactions. Tools: Beers Criteria, STOPP/START. Goals: deprescribing, optimizing therapy, reducing adverse effects.

### **Medication Safety**

Practices that reduce medication errors and prevent avoidable harm during prescribing, dispensing, administration, and use.

### **Medication Side Effects**

Unintended harmful responses to medications occurring at standard doses, ranging from mild (nausea, rash, dry mouth) to severe (anaphylaxis, Stevens-Johnson syndrome, QT prolongation, hepatotoxicity).

### **Meningococcal Vaccine**

Conjugate vaccine (MenACWY) and serogroup B vaccine (MenB) given at 11-12 years with booster

at 16 years. Protects against *Neisseria meningitidis*, causing meningitis and septicemia. MenACWY booster at 16 years covers the high-risk period for serogroup C and Y disease.

### **Mineralocorticoid Receptor Antagonist**

A medicine that blocks aldosterone, a hormone that makes the body retain salt and water. It is used for selected heart failure, high blood pressure, and hormone disorders but can raise blood potassium and worsen kidney problems.

### **MMR Vaccine**

A live attenuated vaccine against measles, mumps, and rubella. It is given according to the immunization schedule and is generally avoided during pregnancy and in people with certain severe immune deficiencies.

### **Molecular Medicine**

Molecular medicine applies molecular and cellular biology to understand, diagnose, prevent, and treat disease. It includes genomics, precision oncology, molecular biomarkers, targeted therapy, and other mechanism-based approaches.

### **Monoamine Oxidase Inhibitor**

A medicine that blocks monoamine oxidase, an enzyme that breaks down certain brain chemicals. It can treat selected depression or neurologic disorders but has important interactions with other medicines and some foods.

### **MRNA Vaccine**

A vaccine that gives cells temporary instructions to make a harmless piece of a germ. The immune system learns to recognize that piece and respond later; the messenger RNA does not enter the cell nucleus or change DNA.

### **Multi-Drug Resistance**

Multidrug resistance is resistance of a microorganism, cancer, or other disease process to multiple drugs that would otherwise be active. Mechanisms include target changes, drug inactivation, reduced uptake, efflux, and altered repair or survival path-

---

ways.

### **Multidrug-Resistant Extensively Drug-Resistant TB**

Multidrug-resistant tuberculosis is resistant to key first-line drugs, while extensively drug-resistant TB has additional resistance that greatly limits options. Diagnosis requires molecular or culture testing, and treatment uses prolonged individualized combinations with public-health oversight.

### **Neuropathy Secondary To Drugs**

Drug-induced neuropathy is peripheral nerve damage caused by a medicine or toxin, often producing numbness, burning pain, weakness, or altered reflexes; management may require dose reduction, withdrawal, and treatment of symptoms.

### **Nonsteroidal Anti-Inflammatory Drug**

A medicine that inhibits cyclooxygenase enzymes and reduces prostaglandin production, producing analgesic, anti-inflammatory, and fever-reducing effects. NSAIDs can cause gastrointestinal, kidney, cardiovascular, or other adverse effects.

### **NSAIDs**

See *Nonsteroidal Anti-Inflammatory Drug*.

### **Occupational Medicine**

The medical specialty concerned with the effects of work on health, prevention of work-related illness and injury, and safe return to work.

### **Opioid Analgesics**

Strong pain medicines that act on opioid receptors in the brain, spinal cord, and other tissues. They can relieve severe pain but may cause sleepiness, constipation, dependence, and dangerously slow breathing or overdose.

### **Opioid Antagonist**

A medicine that blocks opioid receptors and can reverse opioid effects such as respiratory depression. Naloxone is a commonly used example.

### **Oral Hypoglycemic**

A medicine taken by mouth to lower blood glucose, used mainly in type 2 diabetes. Different medicines improve insulin sensitivity, increase insulin release, slow glucose absorption, or increase glucose loss in urine; choice depends on the patient's risks and kidney function.

### **Oral Medicine**

Specialty diagnosing oral mucosal diseases, dental causes of facial pain, oral manifestations of systemic disease.

### **Oral Polio Vaccine**

A live attenuated poliovirus vaccine administered by mouth. Its formulation and use depend on the public-health program and circulating poliovirus strains; it has played an important role in polio control.

### **Orphan Drug**

A pharmaceutical agent developed specifically to treat a rare medical condition (affecting fewer than 200,000 people in the United States, as defined by the Orphan Drug Act of 1983).

### **Over-The-Counter Drug**

A medication that can be purchased without a prescription, deemed safe and effective for self-medication when used according to label instructions. OTC drugs have established safety profiles, low toxicity, and clear dosing guidelines suitable for consumer use.

### **Over-The-Counter (OTC) Drug**

A medicine sold without a prescription for uses and doses described on its label. "Over the counter" does not mean risk-free; incorrect use, interactions, or excessive doses can still cause serious harm.

### **P2Y<sub>12</sub> Inhibitor**

An antiplatelet drug that blocks the platelet P2Y<sub>12</sub> ADP receptor, reducing activation and aggregation. Clopidogrel, prasugrel, and ticagrelor are used in selected acute coronary syndrome and percutaneous coronary intervention settings, with bleeding and

---

drug-specific contraindications considered.

### **Palifermin**

A laboratory-made form of a natural growth factor that helps mouth and throat lining cells repair themselves. It is used in selected people receiving intensive treatment before blood-forming stem-cell transplantation to reduce severe mouth sores.

### **Palonosetron**

A long-acting anti-nausea medicine that blocks serotonin signals involved in vomiting. It is used to prevent nausea and vomiting from chemotherapy or surgery; headache, constipation, and rare heart-rhythm changes can occur.

### **Parasympatholytic**

A medicine that blocks some signals of the parasympathetic nervous system. It may widen the airways, relax the bladder, reduce motion sickness, or speed a slow heartbeat, but can cause dry mouth, blurred vision, constipation, urinary retention, or confusion.

### **Parasympathomimetic**

A drug that mimics or enhances parasympathetic (cholinergic) activity. Direct agonists: muscarinic (pilocarpine—glaucoma, dry mouth) and nicotinic agonists.

### **Paroxetine**

Paroxetine is a selective serotonin-reuptake inhibitor used for depression, anxiety disorders, obsessive-compulsive disorder, PTSD, and some other conditions; sexual dysfunction, withdrawal symptoms, serotonin syndrome, and pregnancy-related risks require consideration.

### **Pediatric Nuclear Medicine**

Special considerations for children: lower doses, sedation often needed, distraction techniques. Dose reduction: weight-based activity, optimized protocols.

### **Pefloxacin**

A fluoroquinolone antibiotic that blocks bacterial

enzymes needed to copy and repair DNA. Its use is limited by resistance and potentially serious effects involving tendons, nerves, the heart, and the nervous system.

### **PEG**

An abbreviation that may refer to polyethylene glycol, a laxative that draws water into stool, or to a polyethylene-glycol chemical group used to modify medicines. The exact meaning depends on the clinical context.

### **Pegaspargase**

A long-acting enzyme medicine used in combination treatment for some acute lymphoblastic leukemias. It lowers asparagine needed by leukemia cells; allergic reactions, pancreatitis, liver injury, clotting problems, and bleeding are important risks.

### **Pegfilgrastim**

A long-acting growth factor that stimulates the bone marrow to make neutrophils. It helps prevent infection caused by chemotherapy-related low white-cell counts; bone pain and rare spleen rupture or serious inflammation can occur.

### **Penicillamine**

A medicine that binds certain metals and can also reduce immune activity. It is used selectively for copper overload and some autoimmune or connective-tissue disorders; serious blood, kidney, skin, or allergic reactions can occur.

### **Pentavalent Vaccine**

A WHO-prequalified five-in-one combination vaccine containing Diphtheria toxoid, Tetanus toxoid, whole-cell Pertussis antigen, Hepatitis B (HBsAg), and Haemophilus influenzae type b (Hib) conjugate, administered as a single intramuscular injection.

### **Pentobarbital**

A barbiturate medicine that depresses brain activity and can cause sedation or control seizures. It has a high risk of slowed breathing, coma, dependence, and fatal overdose, especially with alcohol or other sedatives.

---

### Perioperative Antibiotic Prophylaxis

Administration of an appropriate antimicrobial within a defined interval before incision to reduce infection risk for selected procedures. Choice, timing, redosing, and discontinuation depend on procedure, organisms, patient factors, and local guidance.

### Pertussis Vaccine

A vaccine containing selected antigens from *Bordetella pertussis*, given in combination vaccines to prevent whooping cough and reduce severe disease and transmission.

### Pharmaceutical

Relating to medicines, including their development, preparation, manufacture, testing, storage, or use.

### Pharmacodynamic Interaction

A drug interaction in which one drug changes the effect of another at its site of action without necessarily changing its concentration. Effects may be additive, synergistic, or antagonistic, such as combined respiratory depression or bleeding risk.

### Pharmacokinetic Interaction

A drug interaction that changes absorption, distribution, metabolism, or excretion of another drug, thereby altering its concentration over time. Enzyme inhibition, enzyme induction, transporter effects, and altered gastric pH are common mechanisms.

### Phosphodiesterase Inhibitor

A medicine that blocks enzymes which normally break down chemical signals inside cells. Different types relax airways or blood vessels, improve heart pumping, or treat erectile dysfunction; effects and risks depend on the specific type.

### Pneumococcal Conjugate Vaccine

A vaccine that joins parts of the pneumococcus bacterium to a carrier protein so the immune system can build lasting protection. It helps prevent pneumonia, meningitis, bloodstream infection, and other disease; product and schedule depend on age and risk.

### Pneumococcal Vaccine

A vaccine that protects against selected serotypes of *Streptococcus pneumoniae* (pneumococcus), which can cause pneumonia, meningitis, bloodstream infection, sinusitis, and otitis media. Available products include pneumococcal conjugate vaccines and pneumococcal polysaccharide vaccine; the product and schedule depend on age, previous doses, and medical risk.

### Poliovirus Vaccine

A vaccine that trains the immune system to prevent poliovirus infection and paralysis. Inactivated injectable and live oral forms are used in different programs; the schedule and product depend on age, health, and local public-health guidance.

### Prazosin

An alpha-1 blocker that relaxes blood vessels and may relax the bladder outlet. It is used for high blood pressure and, in selected patients, trauma-related nightmares or urinary symptoms; dizziness and fainting are most likely after starting or increasing the dose.

### Pre-Medication

Medicine given before a procedure, treatment, or exposure to prevent a predictable problem such as pain, nausea, allergy, infection, or anxiety.

### Prescription Drug

A medication whose dispensing or use is subject to prescription requirements under the applicable law. It requires professional oversight because of its risks, complexity, or need for monitoring; regulatory approval and prescribing rules vary by country and product.

### Procalcitonin-Guided Antibiotic Therapy

Use of blood procalcitonin measurements, together with examination and other tests, to help decide whether to start or stop antibiotics in selected infections. The result cannot by itself confirm bacterial infection or safely replace clinical judgment.

---

### Prostaglandin Antagonist

A drug that blocks a prostaglandin receptor or pathway, reducing selected prostaglandin-mediated effects such as inflammation, pain, uterine contraction, or gastric secretion.

### Protease Inhibitor

An antiviral medicine that blocks a virus enzyme needed to cut newly made proteins into working parts. In HIV treatment, it prevents formation of mature infectious virus and is used with other medicines.

### Proton Pump Inhibitor

See *Proton Pump Inhibitors*.

### Psychotropic Drug

A medicine that affects brain function and may change mood, thinking, behavior, sleep, or perception. The term includes antidepressants, antipsychotics, mood stabilizers, stimulants, and some medicines for anxiety or sleep.

### Psychotropic Medication

A medicine that changes brain activity and may affect mood, thoughts, behaviour, sleep, or perception. Examples include antidepressants, antipsychotics, mood stabilizers, and some medicines for anxiety or attention disorders.

### Rabies Vaccine

A vaccine containing inactivated rabies virus used for preexposure protection or postexposure prophylaxis after a possible rabies exposure, together with wound care and immune globulin when indicated.

### Rehabilitation Medicine

The medical specialty that helps people restore or adapt movement, communication, thinking, work, and daily activities after illness or injury. It is also called physiatry.

**Alternate Names:**  
physiatry.

### Renal Drug Excretion

Removal of medicines from the body by the kidneys into urine. Kidney disease can slow this process, allowing some medicines to build up and requiring dose changes or closer monitoring.

### Renin Inhibitor

A blood-pressure medicine that blocks renin, an enzyme involved in narrowing blood vessels and retaining salt. It lowers blood pressure but can raise potassium, affect kidney function, and harm a developing fetus.

### Resistance Antibiotic (Antibiotic Resistance)

Alternate index label for Antibiotic Resistance.

### Rock (Drug)

A street term commonly used for crack cocaine, a smokeable form of cocaine. It produces intense, short-lived stimulation but can cause dependence, dangerous heart rhythms, heart attack, stroke, seizures, overheating, or severe agitation.

### Scabicide

A medicine applied to the skin or taken by mouth to kill scabies mites. Treatment usually includes all close household or sexual contacts and washing or isolating recently used clothing and bedding to prevent reinfection.

### Selective Serotonin Reuptake Inhibitor

A medicine that increases serotonin signalling between nerve cells by slowing serotonin reuptake. It treats depression and several anxiety-related disorders; nausea, sexual difficulties, withdrawal symptoms, and rarely serotonin toxicity can occur.

### SGLT2 Inhibitor

A medicine that makes the kidneys pass more glucose and salt into the urine. It lowers blood sugar and can protect the heart and kidneys in selected people, but may cause dehydration, genital infections, or rarely ketoacidosis.

---

## Skeletal Muscle Relaxant

A medicine that reduces excessive contraction of skeletal muscles. It may relieve short-term muscle spasm or longer-term spasticity, but sleepiness, weakness, dizziness, and impaired breathing can occur with some drugs.

## Sleep Drug

A medicine used to help a person fall asleep, stay asleep, or maintain a regular sleep pattern. Benefits and risks vary widely; drowsiness, falls, impaired thinking, dependence, and interactions with alcohol or sedatives are important concerns.

## Steroid

A group of chemicals with a characteristic structure. In medicine, steroids include corticosteroids that reduce inflammation and natural or replacement hormones such as cortisol, estrogen, progesterone, and testosterone.

## Steroid Abuse

Steroid misuse is non-prescribed or excessive use of corticosteroids or anabolic-androgenic steroids, which can cause endocrine suppression, psychiatric effects, infection, metabolic disease, liver injury, cardiovascular harm, or tissue damage.

## Steroid Hormones

Lipid-soluble hormones derived from cholesterol, including cortisol, aldosterone, estrogen, progesterone, and testosterone.

## Steroid Injections - Tendon, Bursa, Joint

Injection of a corticosteroid, often with local anesthetic, into or around a joint, bursa, or tendon sheath to reduce inflammation and pain; injections directly into tendons are generally avoided because of rupture risk.

## Tamsulosin

Tamsulosin is a selective alpha-1A blocker that relaxes prostate and bladder-neck smooth muscle to improve urinary symptoms of benign prostatic hyperplasia; dizziness, postural hypotension, and ejaculatory dysfunction may occur.

## TCAs

Tricyclic antidepressants are medicines that increase the effects of certain brain chemicals. They can treat depression, nerve pain, and some other conditions but may cause sleepiness, dry mouth, constipation, low blood pressure, abnormal heart rhythms, or overdose toxicity.

## Tdap Vaccine

Tetanus, Diphtheria, and acellular Pertussis booster given at 11-12 years and during each pregnancy (27-36 weeks gestation). Replaces one dose of Td. Important for pertussis protection, particularly for protecting newborns through maternal antibody transfer. Also given to adolescents and adults to maintain tetanus and diphtheria immunity.

## Terazosin

An alpha-blocking medicine that relaxes the prostate and blood vessels. It can improve urine flow in prostate enlargement and lower blood pressure, but dizziness or fainting may occur, especially after the first dose or dose increases.

## Therapeutic Drug Levels

The range of medicine concentrations in blood associated with benefit while limiting toxicity for a particular drug. A measured level must be interpreted with the dose, timing, symptoms, kidney or liver function, and the person's response.

## Thrombolytic

A medicine that helps dissolve a blood clot by changing plasminogen into plasmin, which breaks down fibrin. It may be used urgently for selected strokes, heart attacks, or other life-threatening clots when benefits outweigh bleeding risk.

## Thrombolytic Drugs For Heart Attack

Medicines that dissolve a clot blocking a coronary artery during selected heart attacks. They can restore blood flow when urgent artery-opening procedures are unavailable or delayed, but may cause dangerous bleeding and are not suitable for everyone.

---

### Transfusion Medicine

The medical specialty that selects, prepares, tests, and gives blood or blood components such as red cells, platelets, plasma, and cryoprecipitate. It includes matching, preventing transfusion reactions, and monitoring patients.

### Travel Medicine

Medical care concerned with prevention and treatment of health problems related to travel.

### Tricyclic Antidepressant Overdose

Poisoning with a tricyclic antidepressant can cause drowsiness, confusion, dry mouth, seizures, low blood pressure, and dangerous heart rhythms. It is an emergency requiring immediate poison-control or hospital treatment.

### Tumor Necrosis Factor Inhibitor

A biological medicine that blocks tumor-necrosis factor, an immune signal involved in inflammation. It treats selected arthritis, psoriasis, and bowel diseases but can increase serious infection risk, so screening and monitoring are important.

### Tyrosine Kinase Inhibitor

A targeted medicine that blocks enzymes carrying growth signals inside cells. It can slow cancers driven by abnormal signaling, but side effects vary and may include diarrhea, skin changes, liver injury, high blood pressure, or heart problems.

### Uricosuric Agent

A medicine that increases renal excretion of uric acid, lowering serum urate in selected patients with gout. Adequate kidney function and hydration are important, and urinary uric-acid stones may be a concern.

### Urine Drug Screen

A preliminary urine test that looks for selected medicines or recreational drugs and their breakdown products. Results can be falsely positive or negative and may need confirmation with a more specific laboratory test.

### Uterotonic

A medicine that makes the uterus contract. It is used under medical supervision to start or strengthen labor, prevent or treat heavy bleeding after birth, or complete selected pregnancy-related procedures; excessive contraction can harm the mother or fetus.

### Vaccine Adjuvant

A substance added to some vaccines to enhance and prolong the immune response to the antigen. Examples include aluminum salts and newer adjuvant systems.

### Vaccine Therapy

Treatment that uses a vaccine to stimulate an immune response against a disease. It may prevent infection or, in selected cancer treatments, help the immune system recognize abnormal cells; its benefits depend on the specific vaccine and condition.

### Varicella Vaccine

A live attenuated vaccine that prevents or reduces the severity of chickenpox. The number and timing of doses depend on age, vaccination history, immune status, pregnancy, and local recommendations. It is generally avoided during pregnancy and in people with certain immune deficiencies.

### Xanthine Oxidase Inhibitor

A medicine that lowers uric-acid production by blocking an enzyme involved in breaking down substances from cells and food. It is used mainly to prevent gout attacks and, in selected cases, complications from rapid cancer-cell breakdown.

## Brand Medicines

# Medical Prefix

| Prefix          | Meaning                                                                                                                    | Example of use in medical terms                                                            |
|-----------------|----------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|
| Ab-             | A medical prefix meaning away from, off, or separating from,                                                               | abduction (movement away from the midline) and ablation (removal or destruction of tissue) |
| Acou-           | A medical combining form referring to hearing or sound,                                                                    | acoustic nerve, audiology, and acoumeter                                                   |
| Acro-           | Acro- is a medical word element meaning extremity, tip, or highest part,                                                   | acromegaly and acrocyanosis                                                                |
| Acu-            | A combining form meaning sharp, pointed, or related to acuity; in medical terms it may refer to sharp sensation or vision, | acuity, acute, or acupuncture, depending on the word formed                                |
| Ad-             | A medical prefix meaning toward, to, or near,                                                                              | adduction (movement toward the midline) and adrenal (near the kidney)                      |
| Aden-<br>Adeno- | A combining form meaning gland or glandular tissue,<br>A combining form referring to a gland or glandular tissue,          | adenitis and adenoma<br>adenovirus, adenoid, and adenocarcinoma                            |
| Aer-, Aero-     | A combining form meaning air or gas,                                                                                       | aerobic, aerosol, and aerophagia                                                           |
| Alb-<br>Amyl-   | A prefix derived from the Latin albus, meaning white,<br>A combining form referring to starch or a starch-like substance,  | albino and albinism<br>amylase and amyloid                                                 |
| Amylo-          | A combining form referring to starch-like material or amyloid protein deposits                                             | amyloidosis and amyloidoma                                                                 |
| An-             | A prefix meaning without, lacking, or not,                                                                                 | anoxia, anesthesia, and anencephaly                                                        |
| Aniso-          | A combining form meaning unequal or unequal in size, number, or degree                                                     | anisocytosis and anisometropia                                                             |
| Antero-         | A combining form meaning anterior or toward the front                                                                      | anteroposterior and anterolateral                                                          |
| Anti-           | A prefix meaning against, opposed to, or preventing a specified process or condition                                       | antibiotic and anticoagulant                                                               |
| Arthro-<br>Bi-  | A combining form meaning joint<br>A prefix meaning two, twice, or involving two sides or components                        | arthritis and arthroscopy<br>bilateral and bicuspid                                        |

| Prefix                             | Meaning                                                                                                                                    | Example of use in medical terms                                   |
|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------|
| Bio-                               | A combining form meaning life or living organisms                                                                                          | biochemistry and biopsy                                           |
| Brachy-                            | A combining form meaning short or abnormally short                                                                                         | brachycephaly and brachydactyly                                   |
| Cephal-                            | A combining form meaning head                                                                                                              | cephalic and cephalalgia                                          |
| Cholangi-                          | A combining form meaning bile duct or bile vessel                                                                                          | cholangitis and cholangiography                                   |
| Circum-                            | A combining form meaning around or surrounding                                                                                             | circumcision and circumoral                                       |
| Colpo-                             | A combining form meaning vagina                                                                                                            | colposcopy and colpotomy                                          |
| Cranio-                            | A combining form meaning skull or cranium                                                                                                  | craniotomy and craniostylosis                                     |
| Cyto-                              | A combining form meaning cell                                                                                                              | cytology and cytotoxic                                            |
| Dacryo-                            | A combining form meaning tear or tear duct                                                                                                 | dacryocystitis and dacryostenosis                                 |
| Dactyl-, -Dactyl                   | A combining form or suffix meaning finger or toe                                                                                           | polydactyly and brachydactyly                                     |
| Dextro-                            | A combining form meaning right, toward the right, or sometimes clockwise                                                                   | dextrocardia and dextroposition                                   |
| Di-                                | A combining form meaning two, twice, or double                                                                                             | diplopia and diplegia                                             |
| Dia-                               | A combining form with meanings including through, across, apart, or complete, depending on the word                                        | dialysis and diagnosis                                            |
| Disto-                             | A combining form meaning distal, distant, or away from a point of attachment or origin                                                     | distal and distobuccal                                            |
| Dys-                               | A prefix meaning abnormal, difficult, painful, or impaired,                                                                                | dysphagia (difficulty swallowing) and dysuria (painful urination) |
| Entero-                            | A combining form meaning intestine or bowel,                                                                                               | enteropathy and enteroscopy                                       |
| Epi-                               | A prefix meaning on, upon, over, or above,                                                                                                 | epidermis and epigastric                                          |
| Extra-                             | A clinical condition or finding involving extra-. Its defining features, causes, evaluation, and management depend on the clinical context | extraocular and extracellular                                     |
| Gyne-                              | A combining form meaning woman or female,                                                                                                  | gynecology                                                        |
| Haem- / Haema- / Haemato- / Haemo- | Prefixes derived from the Greek word haima (blood), used in medical terminology to denote blood-related conditions and procedures          | hematology, hematoma, and hemoglobin                              |
| (Prefixes Relating To Blood)       |                                                                                                                                            |                                                                   |
| Hemi-                              | A prefix meaning half or one side,                                                                                                         | hemiplegia and hemithorax                                         |
| Hepat-                             | A combining form meaning liver,                                                                                                            | hepatic and hepatocellular                                        |
| Hepato-                            | A combining form meaning liver,                                                                                                            | hepatobiliary and hepatomegaly                                    |
| Hetero-                            | A prefix meaning different, other, or unequal,                                                                                             | heterozygous and heterogeneous                                    |
| Histo-                             | A combining form meaning tissue,                                                                                                           | histology and histopathology                                      |
| Homo-                              | A prefix meaning same or alike,                                                                                                            | homozygous and homologous                                         |
| Hyper-                             | A prefix meaning excessive, above normal, or increased,                                                                                    | hyperglycemia and hypertension                                    |
| Hypo-                              | A prefix meaning below, deficient, reduced, or less than normal,                                                                           | hypoglycemia and hypothermia                                      |

| Prefix          | Meaning                                                                                                                                                     | Example of use in medical terms                                                             |
|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| Iatr-           | A combining form meaning medical treatment or physician,                                                                                                    | iatrogenic and iatrogeny                                                                    |
| Infra-          | A medical term referring to infra-. Its precise meaning and clinical importance depend on the context in which it is used                                   | infrapatellar and infraorbital                                                              |
| Intra-          | Intra- is an anatomical structure, tissue relationship, physiologic process, or body function; its location and mechanism explain its clinical significance | intraocular and intravenous                                                                 |
| Iso-            | A prefix meaning equal, same, or uniform,                                                                                                                   | isotonic and isometric                                                                      |
| Juxta-          | A prefix meaning next to, beside, or adjoining,                                                                                                             | juxtaglomerular                                                                             |
| Kerato-         | A combining form relating to the cornea or to horny or keratinized tissue,                                                                                  | keratitis and keratosis                                                                     |
| Leuk-           | A combining form meaning white, especially in terms relating to white blood cells,                                                                          | leukocyte                                                                                   |
| Leuko-          | A combining form meaning white,                                                                                                                             | leukoderma or leukopenia                                                                    |
| Levo-           | A prefix meaning left or turning toward the left, often used in chemistry or to describe spatial orientation                                                | levocardia and levodopa                                                                     |
| Lieno-          | A combining form meaning relating to the spleen                                                                                                             | lienorenal and lienectomy                                                                   |
| Lipo-           | A combining form meaning relating to fat or lipids                                                                                                          | lipoma and lipoprotein                                                                      |
| Litho-          | A combining form meaning stone,                                                                                                                             | lithotripsy and nephrolithiasis                                                             |
| Macro- (Prefix) | A prefix meaning large, abnormally large, or on a large scale,                                                                                              | macrocytic, meaning involving abnormally large cells                                        |
| Medical Prefix  | A prefix used in medical terminology to modify a word's meaning                                                                                             | hyper- (above or excessive), hypo- (below or deficient), macro- (large), and micro- (small) |
| Mega-           | A combining form meaning large, great, or abnormally enlarged                                                                                               | megacolon and megakaryocyte                                                                 |
| Mega- (Prefix)  | A prefix derived from Greek meaning large, great, or abnormally enlarged,                                                                                   | megacolon, megacardia, and megaloccephaly                                                   |
| Melan- (Prefix) | A combining form meaning dark or black, derived from the Greek melas; it refers especially to melanin or dark pigmentation,                                 | melanoma and melanocyte                                                                     |
| Mes-            | A combining form meaning middle                                                                                                                             | mesencephalon and mesoderm                                                                  |
| Meso-           | A combining form meaning middle                                                                                                                             | mesothelioma and mesocolon                                                                  |
| Mi-             | A combining form meaning small or relating to muscle, depending on the word in which it appears                                                             | micturition and miosis                                                                      |
| Micro-          | A combining form meaning small or millionth, depending on context                                                                                           | microscopy and microcephaly                                                                 |
| Myc-            | A combining form meaning fungus or pertaining to fungi, derived from the Greek mykes                                                                        | mycosis and mycology                                                                        |
| Myco-           | The term Myco- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used                        | mycosis and mycology                                                                        |
| Myel-           | A combining form relating to bone marrow or the spinal cord, depending on the word                                                                          | myelitis and myelopathy                                                                     |

| Prefix           | Meaning                                                                                                                                                 | Example of use in medical terms             |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| Myo- (Prefix)    | A medical term referring to myo- (prefix). Its clinical meaning depends on the context in which it is used                                              | myopathy and myocarditis                    |
| Naso-            | The term Naso- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used                    | nasogastric and nasopharyngeal              |
| Neo- (Prefix)    | Neo- is a prefix meaning new or recently formed                                                                                                         | neoplasm and neonatal                       |
| Nephro-          | The term Nephro- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used                  | nephritis and nephrectomy                   |
| Oligo-           | A combining form meaning few, scanty, or deficient                                                                                                      | oliguria and oligospermia                   |
| Oligo- (Prefix)  | Oligo- is a prefix meaning few, scanty, or small in number or amount                                                                                    | oliguria and oligospermia                   |
| Onco-            | A combining form relating to tumors or cancer                                                                                                           | oncology and oncogenesis                    |
| Onycho-          | A combining form relating to the nail                                                                                                                   | onychomycosis and onycholysis               |
| Onycho- (Prefix) | Onycho- is a prefix meaning relating to a nail or claw                                                                                                  | onychomycosis and onycholysis               |
| Ortho- (Prefix)  | Ortho- is a prefix meaning straight, correct, upright, or related to orthopedic care depending on the term                                              | orthopedics and orthostatic                 |
| Osteo- (Prefix)  | Osteo- is a prefix meaning relating to bone                                                                                                             | osteomyelitis and osteoporosis              |
| Ot-              | The term Ot- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used                      | otitis and otalgia                          |
| Oto-             | The term Oto- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used                     | otology and otoscope                        |
| Oxy              | Oxy- is a prefix relating to oxygen, sharpness, or acidity depending on the medical or chemical term                                                    | oxygen and oxyhemoglobin                    |
| Pachy- (Prefix)  | A word-forming prefix meaning thick or thickness,                                                                                                       | pachyonychia, pachyderma, and pachycephaly  |
| Para             | Para- is a prefix meaning beside, beyond, abnormal, or related to childbirth depending on the word; its exact meaning must be read in context           | parathyroid and paranasal                   |
| Para-            | A combining form meaning beside, beyond, abnormal, or closely related, depending on the word                                                            | paracentesis and paraesthesia               |
| Para- (Prefix)   | Para- is a medical prefix whose meaning varies by use, including beside, beyond, abnormal, or the number of births reaching a specified gestational age | parathyroid and parity in obstetric history |
| Patho-           | The term Patho- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used                   | pathology and pathogenesis                  |
| Peri-            | The term Peri- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used                    | pericardium and periosteum                  |
| Phago-           | The term Phago- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used                   | phagocytosis and phagocyte                  |
| Phlebo- (Prefix) | Phlebo- is a medical prefix meaning relating to a vein,                                                                                                 | phlebitis, phlebectomy, or phlebography     |

| Prefix            | Meaning                                                                                                                                                 | Example of use in medical terms                     |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------|
| Pneumo-           | The term Pneumo- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used                  | pneumothorax and pneumonia                          |
| Poly-             | A combining form meaning many or much                                                                                                                   | polyuria and polyneuropathy                         |
| Post              | Post- is a prefix meaning after,                                                                                                                        | post-operative, postpartum, or postprandial         |
| Post-             | A combining form meaning after or behind                                                                                                                | postnatal and postprandial                          |
| Pre-              | A combining form meaning before or in front of                                                                                                          | prenatal and preoperative                           |
| Prefix            | A prefix is a word element placed before a root to modify meaning; medical prefixes commonly indicate location, number, time, direction, or abnormality | hyper-, hypo-, peri-, and brady-                    |
| Prefixes, Medical | Word beginnings that modify medical terms by indicating location, number, time, speed, size, direction, deficiency, excess, or other meaning,           | hyper-, hypo-, peri-, and brady-                    |
| Pro-              | A combining form meaning before, forward, or in favor of                                                                                                | prolactin and prognosis                             |
| Pseudo-           | A combining form meaning false or resembling but not truly                                                                                              | pseudocyst and pseudarthrosis                       |
| Retro-            | A combining form meaning backward, behind, or posterior                                                                                                 | retroperitoneal and retrosternal                    |
| Salpingo-         | A combining form relating to a fallopian tube                                                                                                           | salpingitis and salpingectomy                       |
| Sarco-            | A combining form meaning flesh or soft tissue                                                                                                           | sarcoma and sarcoidosis                             |
| Schizo-           | A combining form relating to splitting or schizophrenia                                                                                                 | schizophrenia and schizoid                          |
| Scler-            | The term Scler- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used                   | sclerosis and scleritis                             |
| Sclero-           | The term Sclero- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used                  | scleroderma and sclerotherapy                       |
| Sub-              | A combining form meaning under, below, or less than normal                                                                                              | subcutaneous and subdural                           |
| Super-            | A combining form meaning above, excessive, or superior                                                                                                  | superinfection and supernumerary                    |
| Supra-            | A combining form meaning above or beyond                                                                                                                | suprarenal and suprapubic                           |
| Syn-              | A combining form meaning together, with, or joined                                                                                                      | syndactyly and synovitis                            |
| Teno-             | A combining form relating to a tendon                                                                                                                   | tenosynovitis and tenodesis                         |
| Thermo-           | A combining form relating to heat or temperature                                                                                                        | thermoregulation and thermotherapy                  |
| Toc- (Prefix)     | Toc- is a prefix used in some medical terms and often relates to childbirth or labor,                                                                   | tocolysis; the complete word determines its meaning |
| Toco-             | The term Toco- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used                    | tocography and tocolysis                            |
| Toko- (Prefix)    | Toko- is a prefix relating to childbirth or labor, derived from Greek terms for birth                                                                   | tocolysis and tokodynamometry                       |
| Tom-              | The term Tom- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used                     | tomography and tomodensitometry                     |

| Prefix           | Meaning                                                                                                                                         | Example of use in medical terms                             |
|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------|
| Tomo-            | The term Tomo- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used            | tomography and tomographic                                  |
| Trans- (Prefix)  | The term Trans- (prefix) is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used  | transdermal and transcatheter                               |
| Trich- (Prefix)  | The term Trich- (prefix) is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used  | trichiasis and trichology                                   |
| Tricho-          | A combining form relating to hair                                                                                                               | trichoscopy and trichotillomania                            |
| Tricho- (Prefix) | The term Tricho- (prefix) is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used | trichorrhexis and trichomycosis                             |
| Tympano-         | The term Tympano- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used         | tympanoplasty and tympanometry                              |
| Xanth- (Prefix)  | Xanth- is a medical word element meaning yellow or yellowish,                                                                                   | xanthoma, xanthelasma, and xanthopsia                       |
| Xen- (Prefix)    | A medical word element meaning foreign, strange, or originating outside the usual organism or system,                                           | xenograft (a tissue transplanted between different species) |
| Xeno- (Prefix)   | Xeno- is a medical word element meaning foreign, strange, or from another species,                                                              | xenograft and xenotransplantation                           |
| Xero-            | Xero- is a medical word element meaning dry or dryness,                                                                                         | xeroderma, xerophthalmia, and xerostomia                    |

## Complete reference tables

These categorized tables reproduce the prefix reference structure from the Pressbooks resource cited below. Examples are retained as learning aids; the meaning of a word part can vary by term.

| Prefix                 | Meaning                  | Example of use in medical terms |
|------------------------|--------------------------|---------------------------------|
| <b>Common prefixes</b> |                          |                                 |
| A-, An-                | Without; lacking         | Anemia                          |
| Andr/o-                | Male                     | Androgen                        |
| Anti-                  | Against                  | Anticholinergic drugs           |
| Auto-                  | Self                     | Autocrine                       |
| Bio-                   | Life                     | Biology                         |
| Chem/o-                | Chemistry                | Chemotherapy                    |
| Contra-                | Against                  | Contraception                   |
| Cyt/o-                 | Cell                     | Cytokine                        |
| Dis-                   | Separation; taking apart | Dissection                      |
| Dys-                   | Difficult; abnormal      | Dyspnea                         |
| Eu-                    | Good; well               | Eupnea                          |
| Fibr/o-                | Fiber                    | Fibrosis                        |

| Sperma-, Sperm-, Spermato-   | Sperm                      | Spermatocyte                    |
| Splen/o-                     | Spleen                     | Splenomegaly                    |
| Sten/o-                      | Narrowed; blocked          | Stenosis                        |
| Stern-                       | Sternum                    | Sternoclavicular joint          |

| Prefix                                      | Meaning              | Example of use in medical terms |
|---------------------------------------------|----------------------|---------------------------------|
| Stom/a-, Stomat/o-                          | Mouth                | Stomatitis                      |
| Thorac/o-, Thoracico-                       | Chest                | Thoracic cavity                 |
| Thromb/o-                                   | Blood clot           | Thrombolytic                    |
| Thyr/o-                                     | Thyroid gland        | Thyroiditis                     |
| Trache/o-                                   | Trachea              | Trachealis                      |
| Tympan/o-                                   | Eardrum              | Tympanic membrane               |
| Ur/o-                                       | Urine                | Urologist                       |
| Vagin-                                      | Vagina               | Vaginal                         |
| Varic/o-                                    | Duct; blood vessel   | Varicose veins                  |
| Vasculo-                                    | Blood vessel         | Vasculitis                      |
| Ven/o-                                      | Vein                 | Venae cavae                     |
| Vertbr-                                     | Vertebra; spine      | Vertebral column                |
| <b>Color prefixes</b>                       |                      |                                 |
| Chlor/o-                                    | Green                | Chlorophyll                     |
| Chrom-, Chromato-                           | Color                | Chromosome                      |
| Cyano-                                      | Blue                 | Cyanosis                        |
| Erythr/o-                                   | Red                  | Erythrocyte                     |
| Leuk/o-                                     | White                | Leukocyte                       |
| Melan/o-                                    | Black                | Melanin                         |
| <b>Physical property and shape prefixes</b> |                      |                                 |
| Cry/o-                                      | Cold                 | Cryotherapy                     |
| Elect-                                      | Electrical activity  | Electrocardiogram               |
| Kin/o-, Kine-, Kinesi/o-                    | Movement             | Kinetic energy                  |
| Kyphy/o-                                    | Humped               | Kyphosis                        |
| Rhabd/o-                                    | Rod-shaped; striated | Rhabdomyosarcoma                |
| Phot/o-                                     | Light                | Photoreceptor                   |
| Reticul/o-                                  | Net                  | Reticulocytes                   |
| Scoli/o-                                    | Twisted              | Scoliosis                       |
| Therm/o-                                    | Heat                 | Thermotherapy                   |
| <b>Direction and position prefixes</b>      |                      |                                 |
| Ab-, Abs-                                   | Away from            | Abductor                        |
| Ad-                                         | Towards              | Adductor                        |
| Ante-                                       | Before; forward      | Antenatal                       |
| Circum-                                     | Around               | Circumcision                    |
| Cycl-                                       | Circle; cycle        | Cyclic neutropenia              |
| De-                                         | Away from; ending    | Dehydration                     |
| Dia-                                        | Across; through      | Diagnosis                       |
| Ect/o-, Exo-                                | Outer; outside       | Exocrine gland                  |
| End/o-, Ent-, Enter/o-                      | Within; inner        | Endocrine gland                 |
| Epi-                                        | Upon; outside of     | Epidermis                       |
| Ex-, Extra-                                 | Beyond               | Expiration                      |
| Infra-                                      | Beneath; below       | Infratemporal fossa             |
| Inter-                                      | Between              | Interstitial fluid              |
| Intra-                                      | Within               | Intracellular fluid             |
| Meso-                                       | Middle               | Mesoderm                        |
| Meta-                                       | Beyond; change       | Metabolism                      |
| Para-                                       | Alongside; abnormal  | Parathyroid glands              |

# Medical Suffixes

| Suffix           | Meaning                                                                                                                              | Example of use in medical terms             |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| -Stomy           | A suffix meaning surgical creation of an opening,                                                                                    | colostomy or gastrostomy                    |
| -Tomy            | A suffix meaning incision or cutting into                                                                                            | laparotomy or tracheotomy                   |
| Cidal            | A suffix meaning killing or destroying,                                                                                              | bactericidal or fungicidal                  |
| Cide             | A suffix meaning an agent or process that kills,                                                                                     | pesticide, bactericide, or homicide         |
| Cyte             | A suffix meaning cell,                                                                                                               | erythrocyte or leukocyte                    |
| Cytosis          | A suffix or term indicating a condition involving cells or, in some contexts, an increase in the number of a particular type of cell | leukocytosis or erythrocytosis              |
| Dactyl-, -Dactyl | A combining form or suffix meaning finger or toe                                                                                     | polydactyly or brachydactyly                |
| Ectomy           | A suffix meaning surgical removal or excision,                                                                                       | appendectomy or mastectomy                  |
| Emia             | A suffix meaning a condition of the blood or a substance present in the blood,                                                       | anemia or bacteremia                        |
| Iatrics          | A suffix or word element referring to medical treatment or a medical specialty,                                                      | geriatrics and pediatrics                   |
| Iatry            | A suffix meaning medical treatment or a medical specialty,                                                                           | psychiatry and podiatry                     |
| Itis             | A suffix meaning inflammation,                                                                                                       | dermatitis, bronchitis, and arthritis       |
| Kalemia          | A suffix or term referring to the concentration of potassium in the blood,                                                           | hypokalemia or hyperkalemia                 |
| MAB              | Abbreviation for monoclonal antibody; the suffix -mab in a generic drug name indicates a monoclonal antibody,                        | adalimumab or rituximab                     |
| Oma              | -oma is a suffix commonly indicating a tumor or mass, although some words ending in -oma describe non-neoplastic conditions          | lipoma or carcinoma                         |
| Pathy            | A suffix meaning disease, disorder, or abnormality,                                                                                  | neuropathy, cardiomyopathy, and nephropathy |
| Plegia           | -plegia is a suffix meaning paralysis,                                                                                               | paraplegia, hemiplegia, or quadriplegia     |

|---------------------------|-----------------------------------------------|---------------------------------|
| <b>Common suffixes</b>    |                                               |                                 |
| -ac                       | Pertaining to                                 | Cardiac                         |
| -blast, -blasto, -blastic | Bud; germ                                     | Myeloblast                      |
| -cyte, -cytic             | Cell                                          | Thrombocyte                     |
| -dynia                    | Pain; swelling                                | Thoracodynia                    |
| -eal, -ial                | Pertaining to                                 | Esophageal                      |
| -ectasis                  | Expansion; dilation                           | Atelectasis                     |
| -emia                     | Blood condition                               | Anemia                          |
| -ia                       | Condition                                     | Hemophilia                      |
| -iasis                    | Condition; formation of                       | Psoriasis                       |
| -ism                      | Condition                                     | Hypothyroidism                  |
| -ites, -itis              | Inflammation                                  | Arthritis                       |
| -ity                      | Pertaining to                                 | Immunity                        |
| -ium                      | Structure or tissue                           | Epithelium                      |
| -lysis, -lytic            | Breakdown; destruction; dissolving            | Osteolytic                      |
| -malacia                  | Softening                                     | Osteomalacia                    |
| -megaly                   | Enlargement                                   | Acromegaly                      |
| -oid                      | Resembling                                    | Arachnoid trabeculae            |
| -oma                      | Tumor                                         | Angiosarcoma                    |
| -osis                     | Condition; usually abnormal                   | Endometriosis                   |
| -ous                      | Pertaining to                                 | Aqueous                         |
| -pathy                    | Disease                                       | Lymphadenopathy                 |
| -penia                    | Deficiency; lack of                           | Thrombocytopenia                |
| -phagia, -phagy           | Eating; swallowing                            | Dysphagia                       |
| -phasia                   | Speech                                        | Aphasia                         |
| -plasia, -plastic         | Growth                                        | Hyperplasia                     |
| -plegia                   | Paralysis                                     | Hemiplegia                      |
| -pnea                     | Breathing                                     | Sleep apnea                     |
| -poiesis                  | Production                                    | Hemopoiesis                     |
| -ptosis                   | Falling; drooping                             | Apoptosis                       |
| -rrhage, -rrhagic         | Bleeding                                      | Hemorrhage                      |
| -rrhea                    | Flow or discharge                             | Diarrhea                        |
| -sclerosis                | Hardening                                     | Arteriosclerosis                |
| -sis                      | Condition                                     | Agranulocytosis                 |
| -stasis                   | Level; unchanging                             | Homeostasis                     |
| -trophy                   | Growth                                        | Hypertrophy                     |
| -uria                     | In the urine                                  | Anuria                          |
| <b>Procedure suffixes</b> |                                               |                                 |
| -centesis                 | Surgical puncture to remove fluid             | Thoracentesis                   |
| -desis                    | Surgical binding                              | Pleurodesis                     |
| -ectomy                   | Cut out; removal                              | Mastectomy                      |
| -gram                     | Record; picture                               | Electrocardiogram               |
| -graph                    | Instrument used to create a record or picture | Electrocardiograph              |
| -graphy                   | To record or take a picture                   | Echocardiography                |
| -meter                    | Device used for measuring                     | Sphygmomanometer                |
| -opsy                     | Visual examination                            | Biopsy                          |

---

| Suffix  | Meaning                 | Example of use in medical terms |
|---------|-------------------------|---------------------------------|
| -ostomy | Opening                 | Colostomy                       |
| -otomy  | Incision                | Laparotomy                      |
| -pexy   | Surgical fixation       | Oophoropexy                     |
| -plasty | Surgical reconstruction | Vertebroplasty                  |
| -scope  | For examining           | Endoscope                       |
| -scopy  | Examine                 | Endoscopy                       |

# Alternate Names

| Primary term                            | Alternate names                         |
|-----------------------------------------|-----------------------------------------|
| ACE                                     | angiotensin-converting enzyme           |
| ACE Inhibitor                           | angiotensin-converting enzyme inhibitor |
| Acquired Immunodeficiency Syndrome      | AIDS                                    |
| Adenosine Triphosphate                  | ATP                                     |
| AIDS                                    | acquired immunodeficiency syndrome      |
| Alcoholism                              | alcohol dependence: A chronic           |
| Alimentary Canal                        | gastrointestinal                        |
| AMD                                     | age-related macular degeneration        |
| Angiotensin-Converting Enzyme           | ACE                                     |
| Angiotensin-Converting Enzyme Inhibitor | ACE                                     |
| Amyloid Precursor Protein               | APP                                     |
| ARB                                     | angiotensin II receptor blockers        |
| ATP                                     | adenosine triphosphate                  |
| AV Node                                 | atrioventricular node                   |
| Balloon Dilation                        | Balloon dilatation                      |
| BMD                                     | bone mineral density                    |
| BMI                                     | body-mass index                         |
| BPH                                     | benign prostatic hyperplasia            |
| CABG                                    | coronary artery bypass graft            |
| CBC                                     | complete blood count                    |
|                                         | mdash                                   |
| CCU                                     | coronary care unit                      |
| Cerebral Hemorrhage                     | hemorrhagic stroke                      |
| CFS                                     | chronic fatigue syndrome                |
| CK                                      | creatine kinase                         |
| COX-2 Inhibitors                        | cyclooxygenase-2 inhibitors             |
| CPAP                                    | continuous positive airway pressure     |
| CPR                                     | cardiopulmonary resuscitation           |
| CRP                                     | C-reactive protein                      |
| DNA                                     | deoxyribonucleic acid                   |
| DNR                                     | do-not-resuscitate order                |
| DRI                                     | dietary reference intake                |
| EBCT                                    | electron-beam computed tomography       |
| ECG                                     | electrocardiogram                       |
| ED                                      | erectile dysfunction                    |

| FSH                          | follicle-stimulating hormone                                                        |
| GERD                         | gastroesophageal reflux disease                                                     |
| GFR                          | glomerular filtration rate                                                          |
| Gingiva                      | gums: a form of oral tissue that covers the roots of teeth and surrounding bone     |
| GnRH                         | gonadotropin-releasing hormone                                                      |
| HbA1C                        | hemoglobin A1c                                                                      |
| HDL                          | high-density lipoprotein                                                            |
| HEPA Filter                  | high-efficiency particulate air                                                     |
| HIV                          | human immunodeficiency virus                                                        |
| HLA                          | human leukocyte antigen                                                             |
| HPA                          | hypothalamic-pituitary-adrenal axis                                                 |
| Human Immunodeficiency Virus | HIV                                                                                 |
| IBD                          | inflammatory bowel disease                                                          |
| ICD                          | implantable cardioverter defibrillator                                              |
| IgE                          | immunoglobulin E                                                                    |
| IU                           | international unit                                                                  |
| LDL                          | low-density lipoprotein                                                             |
| LH                           | luteinizing hormone                                                                 |
| LVAD                         | left-ventricular assist device                                                      |
| MAOIs                        | monoamine oxidase inhibitors                                                        |
| METs                         | metabolic equivalents                                                               |
| MHC Molecule                 | major histocompatibility complex molecule                                           |
| Mitral Valve Prolapse        | Barlow's Syndrome; Barlow Syndrome (Mitral Valve Prolapse)                          |
| MRI                          | magnetic resonance imaging—a scan that creates detailed pictures of internal organs |
| MUSE                         | medicated urethral system for erection                                              |
| NK                           | natural killer cells                                                                |
| NMDA Receptor                | N-methyl-D-aspartame receptor                                                       |
| NO                           | nitric oxide                                                                        |
| NSAID                        | nonsteroidal anti-inflammatory drug                                                 |
| PAD                          | peripheral artery disease                                                           |
| PCOS                         | polycystic ovary syndrome                                                           |
| PDE5 Inhibitors              | phosphodiesterase type 5 inhibitors                                                 |
| PET Scan                     | positron emission tomography                                                        |
| PSA                          | prostate-specific antigen                                                           |
| PTCA                         | percutaneous transluminal coronary angioplasty                                      |
| PTSD                         | post-traumatic stress disorder                                                      |
| RAST                         | radioallergosorbent test                                                            |
| RCT                          | randomized controlled trial                                                         |
| RDA                          | recommended dietary allowance                                                       |
| REM                          | rapid eye movement                                                                  |
| RLS                          | restless legs syndrome                                                              |
| SAD                          | seasonal affective disorder                                                         |
| SERMs                        | selective estrogen receptor modulators                                              |
| SSRIs                        | selective serotonin reuptake inhibitors                                             |

| Primary term              | Alternate names                                                         |
|---------------------------|-------------------------------------------------------------------------|
| Steroids                  | corticosteroids                                                         |
| T Cell                    | mdash<br>T lymphocyte                                                   |
| TDD                       | telecommunications device for the deaf                                  |
| TENS                      | mdash<br>transcutaneous electrical nerve stimulation                    |
| TIA                       | mdash<br>transient ischemic attack                                      |
| tPA                       | tissue plasminogen activator                                            |
| TSH                       | thyroid-stimulating hormone                                             |
| VLDL                      | very-low-density lipoprotein                                            |
| VSD                       | ventricular septal defect                                               |
| ABO Blood Group System    | mdash<br>ABO Blood Group; ABO Blood Groups; ABO Blood Types; ABO System |
| Absolute Neutrophil Count | ANC                                                                     |
| Aarskog-Scott syndrome    | Aarskog Syndrome                                                        |
| Banti Syndrome            | Banti disease; Banti's syndrome                                         |
| Barber itch               | Barber's itch                                                           |
| Glycated Hemoglobin (A1C) | A1C; A1C test; Hemoglobin A1C; HbA1C                                    |

# British and US Medical Terms

This table lists common differences between United States and British medical terminology. Some terms are used in both countries, and local hospitals may use additional variations.

| United States term | British term      |
|--------------------|-------------------|
| Acetaminophen      | Paracetamol       |
| Anemia             | Anaemia           |
| Anesthesia         | Anaesthesia       |
| Anesthetic         | Anaesthetic       |
| Apnea              | Apnoea            |
| Behavior           | Behaviour         |
| Cesarean section   | Caesarean section |
| Celiac disease     | Coeliac disease   |
| Color              | Colour            |
| Diarrhea           | Diarrhoea         |
| Edema              | Oedema            |
| Epinephrine        | Adrenaline        |
| Esophagus          | Oesophagus        |
| Fetal              | Foetal            |
| Fetus              | Foetus            |
| Gynecology         | Gynaecology       |
| Hemoglobin         | Haemoglobin       |
| Hemolysis          | Haemolysis        |
| Hemorrhage         | Haemorrhage       |
| Labor              | Labour            |
| Leukocyte          | Leucocyte         |
| Maneuver           | Manoeuvre         |
| Orthopedics        | Orthopaedics      |
| Pediatric          | Paediatric        |
| Pediatrician       | Paediatrician     |
| Practice (verb)    | Practise (verb)   |
| Sulfur             | Sulphur           |
| Tumor              | Tumour            |

## Common vocabulary differences

| United States term    | British term        |
|-----------------------|---------------------|
| Pap test or Pap smear | Cervical smear test |

---

| United States term           | British term                                                    |
|------------------------------|-----------------------------------------------------------------|
| Emergency department (ED)    | Accident and emergency department (A&E)                         |
| Emergency room (ER)          | Accident and emergency department (A&E)                         |
| Family physician             | General practitioner (GP)                                       |
| Operating room (OR)          | Operating theatre                                               |
| Primary care physician (PCP) | General practitioner (GP)                                       |
| Skilled nursing facility     | Nursing home                                                    |
| Urgent care center           | Walk-in centre or minor injuries unit, depending on the service |

# Common Medical Abbreviations

| Abbreviation  | Full form                                                                        |
|---------------|----------------------------------------------------------------------------------|
| ABG           | Arterial blood gas                                                               |
| ACE           | Angiotensin-converting enzyme                                                    |
| ACE inhibitor | Angiotensin-converting enzyme inhibitor                                          |
| ACL           | Anterior cruciate ligament                                                       |
| ACS           | Acute coronary syndrome                                                          |
| ADHD          | Attention-deficit/hyperactivity disorder                                         |
| ADL           | Activity of daily living                                                         |
| AED           | Automated external defibrillator                                                 |
| AFib          | Atrial fibrillation                                                              |
| AIDS          | Acquired immunodeficiency syndrome                                               |
| AKI           | Acute kidney injury                                                              |
| ALP           | Alkaline phosphatase                                                             |
| ALT           | Alanine aminotransferase                                                         |
| AMI           | Acute myocardial infarction                                                      |
| ALS           | Amyotrophic lateral sclerosis; advanced life support, depending on context       |
| ANC           | Absolute neutrophil count                                                        |
| ANA           | Antinuclear antibody                                                             |
| ANP           | Atrial natriuretic peptide                                                       |
| APGAR         | Appearance, pulse, grimace, activity, and respiration                            |
| ARDS          | Acute respiratory distress syndrome                                              |
| AST           | Aspartate aminotransferase                                                       |
| ATN           | Acute tubular necrosis                                                           |
| AV            | Atrioventricular                                                                 |
| AVM           | Arteriovenous malformation                                                       |
| AVN           | Atrioventricular node                                                            |
| BID           | Twice a day; prescription shorthand that should be avoided when possible         |
| BP            | Blood pressure                                                                   |
| BMI           | Body mass index                                                                  |
| BMR           | Basal metabolic rate                                                             |
| BPH           | Benign prostatic hyperplasia                                                     |
| BRCA          | Breast cancer susceptibility gene; commonly referring to the BRCA1 or BRCA2 gene |
| BUN           | Blood urea nitrogen                                                              |
| CABG          | Coronary artery bypass graft                                                     |
| CA            | Cancer antigen or calcium, depending on context                                  |
| CA-125        | Cancer antigen 125                                                               |

|--------------|-----------------------------------------------------------------------------|
| CAD          | Coronary artery disease                                                     |
| CAT          | Computed tomography; an older term for computerized axial tomography        |
| CBC          | Complete blood count                                                        |
| CBT          | Cognitive behavioural therapy                                               |
| CDC          | Centers for Disease Control and Prevention                                  |
| CEA          | Carcinoembryonic antigen                                                    |
| CHF          | Congestive heart failure                                                    |
| CHD          | Congenital heart disease                                                    |
| CIN          | Cervical intraepithelial neoplasia                                          |
| CJD          | Creutzfeldt–Jakob disease                                                   |
| CK           | Creatine kinase                                                             |
| CMV          | Cytomegalovirus                                                             |
| CNS          | Central nervous system                                                      |
| COPD         | Chronic obstructive pulmonary disease                                       |
| CPAP         | Continuous positive airway pressure                                         |
| CPK          | Creatine phosphokinase; an older name for creatine kinase                   |
| CPR          | Cardiopulmonary resuscitation                                               |
| CRF          | Chronic renal failure; chronic kidney disease is preferred in current usage |
| CRP          | C-reactive protein                                                          |
| CSF          | Cerebrospinal fluid                                                         |
| CT           | Computed tomography                                                         |
| CVS          | Chorionic villus sampling                                                   |
| CVA          | Cerebrovascular accident                                                    |
| CXR          | Chest radiograph                                                            |
| D&C          | Dilatation and curettage                                                    |
| DKA          | Diabetic ketoacidosis                                                       |
| DJD          | Degenerative joint disease                                                  |
| DM           | Diabetes mellitus                                                           |
| DNA          | Deoxyribonucleic acid                                                       |
| DTP          | Diphtheria, tetanus, and pertussis                                          |
| DVT          | Deep-vein thrombosis                                                        |
| DX           | Diagnosis                                                                   |
| ECG          | Electrocardiogram                                                           |
| EKG          | Electrocardiogram                                                           |
| ECHO         | Echocardiogram                                                              |
| EEG          | Electroencephalogram                                                        |
| eGFR         | Estimated glomerular filtration rate                                        |
| EMG          | Electromyography                                                            |
| ENT          | Ear, nose, and throat                                                       |
| ERCP         | Endoscopic retrograde cholangiopancreatography                              |
| ESR          | Erythrocyte sedimentation rate                                              |
| ESRD         | End-stage renal disease                                                     |
| FBC          | Full blood count                                                            |
| FEV1         | Forced expiratory volume in the first second                                |
| FSH          | Follicle-stimulating hormone                                                |
| GABHS        | Group A beta-haemolytic streptococcus                                       |
| GERD         | Gastroesophageal reflux disease                                             |
| GFR          | Glomerular filtration rate                                                  |
| GI           | Gastrointestinal                                                            |
| GIST         | Gastrointestinal stromal tumour                                             |
| GU           | Genitourinary                                                               |
| HbA1c        | Glycated haemoglobin                                                        |

| IBD          | Inflammatory bowel disease                                                                      |
| IBS          | Irritable bowel syndrome                                                                        |
| ICD          | Implantable cardioverter-defibrillator                                                          |
| ICU          | Intensive care unit                                                                             |
| IDDM         | Insulin-dependent diabetes mellitus; type 1 diabetes mellitus is preferred in current usage     |
| IM           | Intramuscular                                                                                   |
| IU           | International unit                                                                              |
| IUD          | Intrauterine device                                                                             |
| IV           | Intravenous                                                                                     |
| IVP          | Intravenous pyelography or intravenous pyelogram                                                |
| LDL          | Low-density lipoprotein                                                                         |
| LH           | Luteinizing hormone                                                                             |
| LFT          | Liver function test                                                                             |
| MI           | Myocardial infarction                                                                           |
| MMR          | Measles, mumps, and rubella                                                                     |
| MRI          | Magnetic resonance imaging                                                                      |
| MRSA         | Methicillin-resistant <i>Staphylococcus aureus</i>                                              |
| MS           | Multiple sclerosis; may have other meanings depending on context                                |
| NG           | Nasogastric                                                                                     |
| NIDDM        | Non-insulin-dependent diabetes mellitus; type 2 diabetes mellitus is preferred in current usage |
| NKDA         | No known drug allergies                                                                         |
| NSAID        | Nonsteroidal anti-inflammatory drug                                                             |
| OCD          | Obsessive-compulsive disorder                                                                   |
| PAD          | Peripheral arterial disease                                                                     |
| PAP          | Papanicolaou                                                                                    |
| PCOS         | Polycystic ovary syndrome                                                                       |
| PCR          | Polymerase chain reaction                                                                       |
| PE           | Pulmonary embolism                                                                              |
| PET          | Positron emission tomography                                                                    |
| PFT          | Pulmonary function test                                                                         |
| PID          | Pelvic inflammatory disease                                                                     |
| PMS          | Premenstrual syndrome                                                                           |
| PPD          | Purified protein derivative                                                                     |
| PRN          | As needed (from the Latin <i>pro re nata</i> )                                                  |
| PSA          | Prostate-specific antigen                                                                       |
| PT           | Prothrombin time                                                                                |
| PTCA         | Percutaneous transluminal coronary angioplasty                                                  |
| PTH          | Parathyroid hormone                                                                             |
| PTT          | Partial thromboplastin time                                                                     |

| Abbreviation     | Full form                                                                                                                  |
|------------------|----------------------------------------------------------------------------------------------------------------------------|
| PUD              | Peptic ulcer disease                                                                                                       |
| PVC              | Premature ventricular contraction                                                                                          |
| QID              | Four times a day; prescription shorthand that should be avoided when possible                                              |
| RA               | Rheumatoid arthritis; may have other meanings depending on context                                                         |
| RAST             | Radioallergosorbent test                                                                                                   |
| RBC              | Red blood cell                                                                                                             |
| RCT              | Randomized controlled trial                                                                                                |
| REM              | Rapid eye movement                                                                                                         |
| RLS              | Restless legs syndrome                                                                                                     |
| RNA              | Ribonucleic acid                                                                                                           |
| RSV              | Respiratory syncytial virus                                                                                                |
| Rx               | Prescription or treatment, depending on context                                                                            |
| SaO <sub>2</sub> | Arterial oxygen saturation                                                                                                 |
| SARS-CoV-2       | Severe acute respiratory syndrome coronavirus 2                                                                            |
| SIDS             | Sudden infant death syndrome                                                                                               |
| SLE              | Systemic lupus erythematosus                                                                                               |
| SOB              | Shortness of breath                                                                                                        |
| SSRI             | Selective serotonin reuptake inhibitor                                                                                     |
| STD              | Sexually transmitted disease; sexually transmitted infection is preferred in current usage                                 |
| STI              | Sexually transmitted infection                                                                                             |
| T <sub>3</sub>   | Triiodothyronine                                                                                                           |
| T <sub>4</sub>   | Thyroxine; commonly referring to tetraiodothyronine                                                                        |
| TAH              | Total abdominal hysterectomy                                                                                               |
| TB               | Tuberculosis                                                                                                               |
| TIA              | Transient ischemic attack                                                                                                  |
| TIBC             | Total iron-binding capacity                                                                                                |
| TID              | Three times a day; prescription shorthand that should be avoided when possible                                             |
| TMJ              | Temporomandibular joint                                                                                                    |
| TORCH            | Toxoplasmosis, other infections, rubella, cytomegalovirus, and herpes simplex; a group of congenital-infection evaluations |
| TSH              | Thyroid-stimulating hormone                                                                                                |
| TURP             | Transurethral resection of the prostate                                                                                    |
| URI              | Upper respiratory infection                                                                                                |
| UTI              | Urinary tract infection                                                                                                    |
| VSD              | Ventricular septal defect                                                                                                  |
| WBC              | White blood cell                                                                                                           |
| WDWN             | Well-developed, well-nourished                                                                                             |
| WNL              | Within normal limits; a finding is within the expected reference range or clinical appearance                              |
| WHO              | World Health Organization                                                                                                  |
| XRT              | Radiotherapy                                                                                                               |

---

**A.C.** A prescription abbreviation meaning “before meals,” from the Latin *ante cibum*.

**ALA** An abbreviation for alpha-linolenic acid, an essential omega-3 fatty acid, or aminolevulinic acid, a heme-pathway compound used topically in some photodynamic treatments; context determines the meaning.

**AP** An abbreviation commonly meaning anteroposterior, or directed from front to back; in some contexts it may have another medical expansion.

**ATM** An abbreviation that may mean the temporomandibular joint or ataxia-telangiectasia mutated, a protein kinase involved in DNA-damage repair; context determines the meaning.

- 
- BF** Physician's shorthand for Black female; demographic abbreviations should be used cautiously and replaced with precise, patient-preferred language when possible.
- BPD** An abbreviation commonly meaning bronchopulmonary dysplasia, chronic lung disease after premature birth; it can also mean borderline personality disorder in psychiatric contexts.
- CA** A medical abbreviation that may mean cancer, carcinoma, or calcium; the intended meaning depends on the surrounding clinical context.
- CKD** Abbreviation for Chronic Kidney Disease: a progressive loss of kidney function over months to years, defined by a glomerular filtration rate (GFR) less than 60 mL/min/1.73m<sup>2</sup> or markers of kidney damage (albuminuria, haematuria, structural abnormalities) persisting for at least 3 months.
- CLA** An abbreviation that commonly means conjugated linoleic acid, a group of fatty-acid isomers; in other medical contexts it may have a different expansion.
- CTG** Abbreviation for cardiotocography; continuous electronic monitoring of fetal heart rate and uterine contractions during labour.
- CVA** An abbreviation for cerebrovascular accident, meaning a stroke caused by interruption of blood flow to the brain or bleeding within the brain. It may cause sudden neurologic deficits.
- CVS** An abbreviation that may mean cardiovascular system or chorionic-villous sampling, a prenatal diagnostic procedure; context determines the meaning.
- DDAVP** The abbreviation for desmopressin, a synthetic vasopressin-like medicine used for some bleeding disorders, central diabetes insipidus, and nighttime urination.
- DES** An abbreviation that may mean diethylstilbestrol, a synthetic estrogen, or drug-eluting stent; diethylstilbestrol exposure during pregnancy is associated with later reproductive and cancer risks.
- DHHS** The abbreviation for the U.S. Department of Health and Human Services.
- DNR** An abbreviation for do-not-resuscitate, indicating that cardiopulmonary resuscitation should not be attempted if breathing or heartbeat stops.
- DNS** An abbreviation that may mean deviated nasal septum or dextrose in normal saline; the intended expansion depends on the clinical context.
- DPT** An older abbreviation for the combined diphtheria, pertussis, and tetanus vaccine; current formulations include DTaP and Tdap.
- DT** An abbreviation that may mean delirium tremens or diphtheria–tetanus vaccine; the intended meaning depends on context.
- DTC** An abbreviation that may mean differentiated thyroid carcinoma or direct-to-consumer, such as direct-to-consumer genetic testing; the intended meaning depends on context.
- DTP** An older abbreviation for diphtheria, tetanus, and pertussis vaccine; current childhood formulations are generally called DTaP.
- DV** An abbreviation that may mean domestic violence, ductus venosus, or another context-specific term; the full expression should be specified.
- DYS** An abbreviation or word root related to dysplasia, dystonia, dyslexia, or another condition beginning with dys-; the intended meaning depends on context.
- EC** An abbreviation that may mean enteric-coated, emergency contraception, or endothelial cell; the intended meaning depends on context.
- EFT** An abbreviation whose medical meaning depends on context, such as endocrine-function testing or emotional freedom technique; the intended expansion should be specified.
- ENT** Abbreviation for ear, nose, and throat; it commonly refers to the otolaryngology specialty or an otolaryngologist.
-

---

**EOS** Commonly an abbreviation for eosinophils or an eosinophil count in laboratory reports; the intended meaning should be confirmed from the report's context.

**EPA** Abbreviation for eicosapentaenoic acid, an omega-3 polyunsaturated fatty acid found in oily fish and fish-oil supplements.

**EPR** Abbreviation for electrophrenic respiration, also called diaphragm pacing, in which electrical stimulation helps activate the diaphragm in selected patients with respiratory muscle paralysis.

**EPT** Abbreviation for estrogen/progestin therapy, treatment using both an estrogen and a progestin, commonly discussed in menopausal hormone therapy when the uterus is present.

**ER** Abbreviation for emergency room or emergency department, the hospital service that evaluates and treats urgent illness and injury.

**FCC** In medicine, an abbreviation for familial colorectal cancer; in other contexts it may have nonmedical meanings.

**FFI** Abbreviation for fatal familial insomnia, a rare inherited prion disease causing progressively severe insomnia, autonomic dysfunction, and neurologic decline.

**FISH** Abbreviation for fluorescence in situ hybridization, a test that uses fluorescent DNA probes to detect specific genes, chromosomes, or chromosomal rearrangements in cells.

**FLAP** Abbreviation for 5-lipoxygenase-activating protein, a protein encoded by *ALOX5AP* that helps produce leukotrienes involved in inflammation.

**GALT** Abbreviation for gut-associated lymphoid tissue, immune tissue in the gastrointestinal tract that samples intestinal contents and helps defend against pathogens.

**GBV-C** Abbreviation for GB virus C, also called human pegivirus, a blood-borne virus that can persist in people but is not established as a cause of chronic hepatitis.

**GD** In the RxList medical-dictionary context, abbreviation for Gaucher disease, an inherited lysosomal storage disorder caused by deficient glucocerebrosidase.

**GI** Abbreviation for gastrointestinal, relating to the digestive tract from the mouth through the anus and its associated organs.

**GPO** Abbreviation for group purchasing organization, an organization that combines buyers' purchasing power to negotiate prices and contracts for medicines, supplies, or services.

**HAART** Abbreviation for highly active antiretroviral therapy, an older term for combination antiretroviral treatment used to suppress HIV replication and preserve immune function.

**HAPE** Abbreviation for high-altitude pulmonary edema, a life-threatening accumulation of fluid in the lungs after rapid ascent; immediate descent and supplemental oxygen are urgent treatments.

**HAV** Abbreviation for hepatitis A virus, an RNA virus spread mainly by the fecal-oral route that causes acute hepatitis but usually does not cause chronic infection.

**HBV** Abbreviation for hepatitis B virus, a DNA virus transmitted through infected blood or body fluids that can cause acute or chronic hepatitis and cirrhosis or liver cancer.

**HEPA** Abbreviation for high-efficiency particulate air, describing a filter designed to remove a very high proportion of airborne particles of specified sizes from an air stream.

**HGD** Commonly an abbreviation for high-grade dysplasia, a marked abnormality of cell development that may be a precursor to invasive cancer but is not itself invasive cancer.

**HNP** Abbreviation for herniated nucleus pulposus, in which the inner material of an intervertebral disk protrudes through the outer ring and may compress a nerve root.

**HPS** Common medical abbreviations include hantavirus pulmonary syndrome, a severe respiratory illness, and Hermansky-Pudlak syndrome, an inherited disorder with oculocutaneous albinism and platelet-storage abnormalities; context determines the meaning.

---

- 
- HS** Commonly an abbreviation for hereditary spherocytosis, an inherited hemolytic anemia; it can also mean half-strength, heart sounds, hamstrings, heparan sulfate, hernia sac, or house surgeon, so context is essential.
- HSA** Abbreviation that may mean a US health savings account or human serum albumin, the main plasma protein that helps maintain oncotic pressure; context determines the meaning.
- ICU** Abbreviation for intensive care unit, a hospital unit providing continuous monitoring and specialized support for critically ill patients.
- ID** A context-dependent abbreviation that may mean infectious disease, infectious diseases specialist, intellectual disability, or identification; the surrounding clinical text determines the meaning.
- IFA** Abbreviation for indirect fluorescent antibody, a laboratory method that detects antibodies or antigens using fluorescent labels, commonly in serologic testing.
- IHS** Abbreviation for the Indian Health Service, a US federal agency providing health services to American Indians and Alaska Native people and communities.
- IPT** Abbreviation for interpersonal therapy, a structured psychotherapy that focuses on relationships, grief, role transitions, and interpersonal difficulties.
- IPV** Abbreviation for inactivated polio vaccine, an injectable vaccine containing killed poliovirus and used to prevent poliomyelitis.
- IQ** Abbreviation for intelligence quotient, a standardized score from cognitive testing; it describes performance on specified tests and is not a complete measure of a person's abilities or worth.
- ITC** Abbreviation for in-the-canal, describing a hearing aid or other device positioned within the ear canal.
- ITN** Abbreviation for insecticide-treated bednet, a net treated with insecticide to reduce mosquito bites and malaria transmission.
- IVC** Commonly abbreviation for inferior vena cava, the large vein returning blood from the lower body to the heart; it can also mean intravenous cholangiogram, an X-ray study of the biliary system.
- JIP** Abbreviation for juvenile intestinal polyposis, an inherited condition in which children develop multiple hamartomatous polyps in the gastrointestinal tract and may have increased cancer risk.
- KB** In medical usage, an abbreviation for keratoderma blennorrhagicum or kilobase of DNA; lower-case *kb* is preferred for kilobase, so context is important.
- KUB** Abbreviation for kidney, ureter, and bladder, commonly referring to a plain abdominal X-ray used to assess urinary tract calculi, bowel gas patterns, or other abdominal findings.
- L** Abbreviation for liter, a metric unit of volume equal to 1,000 milliliters.
- LAVH** Abbreviation for laparoscopically assisted vaginal hysterectomy, removal of the uterus through the vagina with laparoscopic assistance.
- LL** Commonly an abbreviation for lower lid of the eye or lower limit; the intended meaning depends on the clinical context.
- LLL** Abbreviation for the left lower lobe of the lung.
- LLQ** Abbreviation for left lower quadrant, usually referring to the lower-left quarter of the abdomen.
- LMP** Abbreviation for last menstrual period, the first day of the most recent menstrual bleeding, used in estimating gestational age when the date is reliable.
- LPA** LPA abbreviates Little People of America and may also refer to the left pulmonary artery.
- LUL** Abbreviation for the left upper lobe of the lung.
- LUQ** Abbreviation for the left upper quadrant of the abdomen.
- LVF** Abbreviation for left ventricular failure, meaning failure of the left side of the heart; it may also mean left ventricular function, depending on context.
-

- 
- MAOI** Abbreviation for monoamine oxidase inhibitor, a drug that inhibits monoamine oxidase and is used in selected treatment of depression and other disorders.
- MAP** Common abbreviation for *Mycobacterium avium* subspecies *paratuberculosis*, an organism of the *M. avium* complex; the abbreviation can have other meanings in different clinical contexts.
- MCD** An abbreviation with several medical meanings, including minimal change disease, mean corpuscular diameter, and medullary cystic disease; the intended meaning depends on context.
- MCP** Membrane cofactor protein, also called CD46, is a cell-surface protein that regulates complement activation and helps protect host cells from complement-mediated injury; the abbreviation can have other meanings in different contexts.
- MDI** An abbreviation that may mean metered-dose inhaler, multiple daily injections, or mental developmental index; the intended meaning depends on context.
- MEDVAC** Abbreviation for medical evacuation: the transport of ill or injured people to a medical facility or to a location providing a higher level of care.
- MI** Abbreviation for myocardial infarction, or heart attack: death of heart-muscle tissue caused by prolonged inadequate blood flow, usually from acute coronary artery blockage.
- MM** An abbreviation that may mean meningomyelocele, malignant melanoma, or multiple myeloma; in lowercase, *mm* commonly means millimeter. The intended meaning depends on context.
- MP** Abbreviation for mercaptopurine, a purine-antimetabolite drug, or for molecular pathology; the intended meaning depends on context.
- MPS** Abbreviation for mucopolysaccharidosis, a group of inherited lysosomal storage disorders caused by deficient breakdown of glycosaminoglycans.
- MSG** Abbreviation for monosodium glutamate, the sodium salt of glutamic acid used as a flavor enhancer and contributing umami taste.
- MTX** Abbreviation for methotrexate, a folate-antagonist drug used in selected cancers, autoimmune diseases, and other conditions.
- MVP** Abbreviation for mitral valve prolapse, in which one or both mitral-valve leaflets bow into the left atrium during ventricular systole; it is often mild but can sometimes cause mitral regurgitation or arrhythmias.
- MYH** MYH is a gene-family abbreviation involving myosin or DNA-repair proteins; the specific gene and variant determine the clinical meaning.
- ND** ND is a context-dependent abbreviation that may mean naturopathic doctor, neurodevelopmental, or another term; the full meaning should be specified.
- NEP** NEP is a context-dependent abbreviation that may mean neuroendocrine pancreatic tumor, nasoendotracheal procedure, or another clinical term.
- NF** NF is a context-dependent abbreviation, including neurofibromatosis, a group of genetic disorders causing nerve-sheath tumors and other features.
- NG** NG commonly means nasogastric, referring to a tube passed through the nose into the stomach, but the abbreviation has other uses.
- NS** NS is a context-dependent abbreviation, commonly normal saline, a sterile sodium-chloride solution, or not significant; the full term should be stated.
- OB** OB is an abbreviation commonly meaning obstetrics, the care of pregnancy, labor, birth, and the postpartum period, but it may have other meanings.
- OBS** OBS is a context-dependent abbreviation that may mean observation, obstetric service, or organic brain syndrome; the intended term should be written out.

- 
- OCG** OCG is a context-dependent abbreviation that may refer to oral contraceptive guidance, oculocardiac testing, or another clinical term; the full term should be specified.
- OMS** An abbreviation for oral and maxillofacial surgery; the intended meaning depends on the clinical context.
- PAP** PAP is an abbreviation with context-dependent meanings, including Papanicolaou testing, pulmonary alveolar proteinosis, or prostatic acid phosphatase; the full term should be specified.
- PAS** PAS is an abbreviation that may mean periodic-acid–Schiff staining, para-aminosalicylic acid, or pulmonary-artery systolic pressure; context determines the meaning.
- PAT** PAT is a context-dependent abbreviation that may refer to paroxysmal atrial tachycardia, a rapid rhythm beginning in the atria, or another clinical term.
- PCA** PCA is a context-dependent abbreviation, commonly meaning patient-controlled analgesia, in which a patient activates prescribed doses from an infusion device.
- PCT** PCT is a context-dependent abbreviation that may mean prolactin, porphyria cutanea tarda, or patient-care technician; the full term should be specified.
- PDR** PDR commonly means Physicians' Desk Reference, a drug-information reference, but the abbreviation has other uses and should be interpreted in context.
- PEP** PEP is a context-dependent abbreviation, including post-exposure prophylaxis, a preventive medicine course after a possible infection exposure.
- PHS** PHS is an abbreviation whose meaning depends on context, including public health service or primary hyperhidrosis; the full term should be specified.
- PI** PI is a context-dependent abbreviation, including principal investigator, pulmonary insufficiency, or protease inhibitor; the intended meaning must be specified.
- PLP** PLP commonly means pyridoxal 5'-phosphate, the active coenzyme form of vitamin B6 required by many enzymes, but the abbreviation has other uses.
- PMD** PMD is a context-dependent abbreviation, including Pelizaeus–Merzbacher disease, a rare inherited disorder of central myelination, or a professional medical designation.
- PON** PON is a context-dependent abbreviation that may refer to postoperative nausea, paraoxonase, or another clinical term; the full meaning should be stated.
- PTU** PTU is the abbreviation for propylthiouracil, an antithyroid medicine used selectively because of liver toxicity and other safety considerations.
- PV** PV is a context-dependent abbreviation, including polycythemia vera, plasma volume, or peripheral vision; the full term should be specified.
- PVB** PVB is a context-dependent abbreviation that may mean paravertebral block, a regional anesthetic technique, or another medical term.
- PX** PX is a context-dependent abbreviation that may mean prognosis, patient, prescription, or a genetic marker; clinical documentation should spell out the intended term.
- Q.2H** A prescription abbreviation meaning “every 2 hours.” Medication instructions should use clear wording because abbreviation misinterpretation can cause dosing errors.
- Q.3H.** A prescription abbreviation meaning “every 3 hours.” Medication instructions should use clear wording because abbreviation misinterpretation can cause dosing errors.
- Q.S.** A prescription abbreviation from the Latin “quantum sufficit,” meaning “quantity sufficient” to make the required amount or concentration. The exact quantity must be specified by the formulation or prescription context.
- R/O** R/O is an abbreviation for rule out, indicating that a condition is being considered but has not been confirmed; clear documentation should state the actual diagnostic question.
-

---

**RAD** Acronym whose medical meaning depends on context, commonly radiation absorbed dose or right axis deviation on an ECG.

**RBC** RBC is the abbreviation for red blood cell, the cell that transports oxygen with hemoglobin and carries carbon dioxide back toward the lungs.

**RF** RF is a context-dependent abbreviation, including rheumatoid factor, radiofrequency, or risk factor; the complete term should be stated.

**RLL** RLL is the abbreviation for right lower lobe, usually referring to the lower lobe of the right lung.

**RLQ** RLQ is the abbreviation for right lower quadrant of the abdomen, containing structures including the appendix, cecum, and right adnexa.

**RML** RML is the abbreviation for right middle lobe, the middle lobe of the right lung.

**RP** RP is a context-dependent abbreviation, commonly retinitis pigmentosa, an inherited retinal degeneration causing night blindness and progressive visual-field loss.

**RUQ** RUQ is the abbreviation for right upper quadrant of the abdomen, containing the liver, gallbladder, duodenum, and portions of bowel and kidney.

**SGOT** SGOT is the former abbreviation for AST, an enzyme measured in blood that can rise with injury to liver, heart, muscle, or other tissues.

**SGPT** SGPT is the former abbreviation for ALT, a liver-associated enzyme that rises in many forms of hepatocellular injury.

**SHP** SHP is a context-dependent abbreviation that may refer to a healthcare professional, a gene or protein, or another clinical term; the full meaning should be specified.

**SLV** SLV is a context-dependent abbreviation that may mean single-lung ventilation, serum lithium value, or another term; the full meaning should be specified.

**STD(S)** Abbreviation for sexually transmitted disease(s), now often called sexually transmitted infections.

**STS** STS is a context-dependent abbreviation that may mean soft-tissue sarcoma, sodium thiosulfate, or another clinical term; the full term should be stated.

**TMR** TMR is a context-dependent abbreviation, including targeted muscle reinnervation, a surgical technique used to improve control of a prosthesis and reduce amputation pain.

**TPA/TPA** Abbreviation for tissue plasminogen activator.

**TSD** TSD is a context-dependent abbreviation that may mean total sleep deprivation, traumatic stress disorder, or another clinical term; the full term should be specified.

**TSE** TSE is a context-dependent abbreviation, including transmissible spongiform encephalopathy, the prion-disease group that includes Creutzfeldt-Jakob disease.

**UL** UL is a context-dependent abbreviation that may mean upper limit, ulnar or ulna-related, or another clinical term; the full meaning should be specified.

**URG** URG is a context-dependent abbreviation that may refer to urinary urgency or an urgent clinical priority; documentation should state the full term.

**URTI** Abbreviation for upper respiratory tract infection, commonly involving the nose, sinuses, pharynx, or larynx and often caused by viruses.

**VD** Abbreviation for venereal disease, an older term for a sexually transmitted infection.

**WBS** Abbreviation for Williams–Beuren syndrome, a genetic condition associated with characteristic facial features, developmental differences, and cardiovascular disease. In other clinical contexts, WBS may have a different meaning, so the full term should be specified.

# Modern Terms

| Old or obsolete term                | Modern or preferred term                                                                          |
|-------------------------------------|---------------------------------------------------------------------------------------------------|
| Acute renal failure                 | Acute kidney injury                                                                               |
| Adult-onset diabetes mellitus       | Type 2 diabetes mellitus                                                                          |
| Ague                                | Malaria; a historical term for intermittent fever, usually associated with malaria                |
| Apoplexy                            | Stroke or intracerebral haemorrhage, depending on the historical context                          |
| Arteriosclerosis obliterans         | Peripheral arterial disease                                                                       |
| Bright's disease                    | Glomerular kidney disease; the specific modern diagnosis should be stated when known              |
| Chronic renal failure               | Chronic kidney disease                                                                            |
| Congestive heart failure            | Heart failure                                                                                     |
| Consumption                         | Tuberculosis, especially pulmonary tuberculosis                                                   |
| Crippling arthritis                 | Disabling arthritis; describe the functional limitation specifically                              |
| Diabetic retinopathy, background    | Mild or nonproliferative diabetic retinopathy, with severity stated                               |
| Dropsy                              | Oedema or fluid accumulation, with the affected site specified                                    |
| Eclampsia toxemia                   | Preeclampsia or eclampsia, depending on the clinical condition                                    |
| Essential hypertension              | Primary hypertension                                                                              |
| Fallopian tube                      | Uterine tube; fallopian tube remains an accepted anatomical term                                  |
| Female hysteria                     | No single modern diagnosis; reassess using the presenting symptoms and an appropriate diagnosis   |
| Gastric ulcer disease               | Peptic ulcer disease, with the ulcer site specified                                               |
| Heart attack                        | Myocardial infarction in formal medical usage                                                     |
| Herpes zoster                       | Shingles in common language; herpes zoster remains the preferred medical term                     |
| Hyperlipaemia                       | Hyperlipidaemia                                                                                   |
| Idiopathic thrombocytopenic purpura | Immune thrombocytopenia                                                                           |
| Imbecile                            | Intellectual disability; the historical term is offensive and must not be used clinically         |
| Insulin-dependent diabetes mellitus | Type 1 diabetes mellitus                                                                          |
| Junkie's abscess                    | Injection-related abscess or skin and soft-tissue infection                                       |
| Leprosy                             | Hansen disease; leprosy remains a recognized medical term, but person-first language is preferred |

---

| Old or obsolete term                    | Modern or preferred term                                                             |
|-----------------------------------------|--------------------------------------------------------------------------------------|
| Manic depression                        | Bipolar disorder                                                                     |
| Mongolism                               | Down syndrome; the historical term is unacceptable and must not be used              |
| Multiple personality disorder           | Dissociative identity disorder                                                       |
| Non-insulin-dependent diabetes mellitus | Type 2 diabetes mellitus                                                             |
| Old age dementia                        | Dementia or major neurocognitive disorder, with the cause specified when known       |
| Palsy                                   | Paralysis or the specific neurological disorder, depending on the context            |
| Paralytic stroke                        | Stroke with paralysis; specify the neurological deficit and stroke type              |
| Phthisis                                | Pulmonary tuberculosis; historically, progressive wasting disease                    |
| Senile dementia                         | Dementia or major neurocognitive disorder; age alone should not define the diagnosis |
| Senility                                | Cognitive impairment, dementia, or another specific diagnosis, after assessment      |
| Spastic colon                           | Irritable bowel syndrome                                                             |
| Stomach flu                             | Acute gastroenteritis                                                                |
| Sunstroke                               | Heatstroke                                                                           |
| Terminal illness                        | Advanced or life-limiting illness, with the diagnosis and prognosis specified        |
| Toxemia of pregnancy                    | Preeclampsia or eclampsia                                                            |
| Venereal disease                        | Sexually transmitted infection                                                       |
| Wassermann reaction                     | A modern syphilis serologic test, such as a nontreponemal or treponemal test         |
| Water on the brain                      | Hydrocephalus                                                                        |

---

# Medical Specialties

| Medical specialty           | Principal area of practice                                                   |
|-----------------------------|------------------------------------------------------------------------------|
| Allergy and Immunology      | Allergic disease, asthma, immune deficiency, and immune-mediated disorders   |
| Anesthesiology              | Perioperative care, anesthesia, critical care, and pain medicine             |
| Cardiology                  | Diseases of the heart and circulatory system                                 |
| Cardiothoracic Surgery      | Surgical treatment of diseases of the heart, lungs, and chest                |
| Clinical Genetics           | Diagnosis, counseling, and management of inherited and genomic disorders     |
| Clinical Pharmacology       | Effects, uses, interactions, and safe clinical use of medicines              |
| Colon and Rectal Surgery    | Surgical treatment of diseases of the colon, rectum, and anus                |
| Critical Care Medicine      | Assessment and treatment of life-threatening organ dysfunction               |
| Dermatology                 | Diseases of the skin, hair, nails, and mucous membranes                      |
| Emergency Medicine          | Immediate assessment and treatment of acute illness and injury               |
| Endocrinology               | Hormones, metabolism, diabetes, and endocrine glands                         |
| Family Medicine             | Comprehensive continuing care for individuals and families of all ages       |
| Forensic Medicine           | Application of medical knowledge to legal and medicolegal questions          |
| Gastroenterology            | Diseases of the digestive tract, liver, gallbladder, and pancreas            |
| General Practice            | First-contact and continuing medical care across a broad range of conditions |
| General Surgery             | Operative treatment of diseases involving multiple body systems              |
| Geriatric Medicine          | Health care of older adults, including multimorbidity and functional decline |
| Hematology                  | Blood cells, blood-forming organs, clotting, and blood disorders             |
| Hepatology                  | Diseases of the liver and biliary system                                     |
| Hospital Medicine           | Comprehensive medical care of hospitalized adults                            |
| Infectious Disease Medicine | Diagnosis, treatment, and prevention of infections                           |
| Internal Medicine           | Prevention, diagnosis, and treatment of adult medical disorders              |
| Interventional Cardiology   | Catheter-based diagnosis and treatment of cardiovascular disease             |
| Interventional Radiology    | Image-guided minimally invasive diagnosis and treatment                      |
| Medical Oncology            | Systemic treatment and supportive care for cancer                            |
| Neonatology                 | Care of newborn infants, especially premature or critically ill infants      |
| Nephrology                  | Diseases of the kidneys, fluid balance, electrolytes, and hypertension       |
| Neurology                   | Diseases of the brain, spinal cord, peripheral nerves, and muscles           |

---

| Medical specialty                          | Principal area of practice                                                          |
|--------------------------------------------|-------------------------------------------------------------------------------------|
| Neurosurgery                               | Surgical treatment of disorders of the nervous system                               |
| Nuclear Medicine                           | Diagnosis and treatment using radioactive substances and molecular imaging          |
| Obstetrics and Gynecology                  | Pregnancy, childbirth, and diseases of the female reproductive system               |
| Occupational Medicine                      | Health, safety, and disease prevention in the workplace                             |
| Ophthalmology                              | Medical and surgical care of the eyes and visual system                             |
| Oral and Maxillofacial Surgery             | Surgical treatment of diseases and injuries of the mouth, jaws, face, and neck      |
| Orthopedic Surgery                         | Surgical and nonsurgical treatment of the musculoskeletal system                    |
| Otolaryngology–Head and Neck Surgery       | Diseases and surgery of the ear, nose, throat, and head and neck                    |
| Pain Medicine                              | Assessment and treatment of acute, chronic, and cancer-related pain                 |
| Palliative Medicine                        | Relief of symptoms and support for people with serious or life-limiting illness     |
| Pathology                                  | Laboratory examination of tissues, cells, blood, and body fluids                    |
| Pediatric Surgery                          | Surgical care of infants, children, and adolescents                                 |
| Pediatrics                                 | Medical care of infants, children, and adolescents                                  |
| Physical Medicine and Rehabilitation       | Restoration of function and independence after illness or injury                    |
| Plastic and Reconstructive Surgery         | Reconstruction, restoration, and alteration of body tissues                         |
| Preventive Medicine                        | Prevention of disease and promotion of health in individuals and populations        |
| Psychiatry                                 | Diagnosis and treatment of mental, emotional, and behavioral disorders              |
| Public Health Medicine                     | Protection and improvement of population health                                     |
| Pulmonary Medicine                         | Diseases of the lungs and respiratory system                                        |
| Radiation Oncology                         | Use of ionizing radiation to treat cancer                                           |
| Radiology                                  | Diagnostic and image-guided evaluation of disease                                   |
| Reproductive Endocrinology and Infertility | Hormonal and reproductive disorders and fertility care                              |
| Rheumatology                               | Autoimmune, inflammatory, and musculoskeletal disorders                             |
| Sleep Medicine                             | Sleep disorders and their effects on health                                         |

# Human Organs

This reference maps individual organ headwords to related entries in the dictionary. Each headword is followed by a semicolon-separated list of related dictionary terms.

## **Adrenal Gland**

Adrenal Gland; Addison's Disease; Cushing's Syndrome; Pheochromocytoma; Adrenaline.

## **Appendix**

Appendix; Appendicitis; Appendectomy.

## **Bladder**

Bladder; Cystitis; Urinary Retention; Bladder Cancer.

## **Brain**

Brain; Brain Tumour; Stroke; Seizure; Meningitis; Cerebral Palsy; Parkinson's Disease.

## **Breast**

Breast; Breast Cancer; Mastitis; Mammography.

## **Cervix**

Cervix; Cervical Cancer; Cervicitis; Pap Smear.

## **Colon**

Colon; Colitis; Constipation; Diarrhea; Colorectal Cancer; Colonoscopy.

## **Ear**

Ear; Otitis Media; Tinnitus; Hearing Loss; Vertigo.

## **Esophagus**

Esophagus; Dysphagia; Esophagitis; Achalasia; Gastroesophageal Reflux Disease.

## **Eye**

Eye; Cataract; Glaucoma; Conjunctivitis; Retinal Detachment; Macular Degeneration.

## **Gallbladder**

Gallbladder; Cholelithiasis; Cholecystitis; Bile Duct; Cholangiocarcinoma.

## **Heart**

Heart; Heart Failure; Arrhythmia; Myocardial Infarction; Pericarditis; Congenital Heart Defect.

## **Kidney**

Kidney; Acute Kidney Injury; Chronic Kidney Disease; Glomerulonephritis; Nephritis; Dialysis.

## **Liver**

Liver; Hepatitis; Cirrhosis; Fatty Liver Disease; Jaundice; Portal Hypertension.

## **Lung**

Lung; Asthma; COPD; Pneumonia; Bronchitis; Pulmonary Embolism; Pleural Effusion.

---

**Mouth**

Mouth; Dental Caries; Gingivitis; Periodontitis.

**Nose**

Nose; Sinusitis; Rhinitis; Nasal Polyps; Anosmia; Epistaxis.

**Ovary**

Ovary; Ovarian Cyst; Ovarian Cancer; Fallopian Tube; Ectopic Pregnancy.

**Pancreas**

Pancreas; Pancreatitis; Diabetes Mellitus; Pancreatic Cancer; Insulin.

**Pituitary Gland**

Pituitary Gland; Pituitary Tumor; Acromegaly; Diabetes Insipidus.

**Prostate**

Prostate; Benign Prostatic Hyperplasia; Prostatitis; Prostate Cancer.

**Rectum**

Rectum; Rectal Bleeding; Proctitis; Rectal Cancer.

**Skin**

Skin; Dermatitis; Eczema; Psoriasis; Cellulitis; Pressure Ulcer; Melanoma.

**Small Intestine**

Small Intestine; Enteritis; Celiac Disease; Malabsorption; Intestinal Obstruction.

**Spinal Cord**

Spinal Cord; Spinal Cord Injury; Myelitis; Spinal Stenosis; Paraplegia.

**Spleen**

Spleen; Splenomegaly; Splenectomy; Hypersplenism.

**Stomach**

Stomach; Gastritis; Peptic Ulcer Disease; Gastroesophageal Reflux Disease; Gastric Cancer.

**Testis**

Testis; Testicular Torsion; Testicular Cancer; Epididymis.

**Thymus**

Thymus; Thymoma.

**Thyroid Gland**

Thyroid Gland; Hyperthyroidism; Hypothyroidism; Goitre; Thyroid Cancer.

**Ureter**

Ureter; Ureteral Calculi; Ureteral Obstruction; Ureteritis; Ureteral Stricture.

**Urethra**

Urethra; Urethral Stricture; Urethritis; Urethral Obstruction.

**Uterus**

Uterus; Endometriosis; Fibroids; Uterine Cancer; Ectopic Pregnancy.

**Vagina**

Vagina; Vaginitis; Vaginal Discharge; Vaginal Cancer.

# Common Diseases

*Scope:* This reference-oriented list organizes common human diseases by organ system and clinical domain. It is a curated, high-importance list rather than a prevalence ranking, and some diseases appear under more than one heading where they are clinically relevant to several systems. It is not an exhaustive index of every term in the dictionary. Entries named as syndromes are covered in the companion appendix, Common Syndromes; conditions conventionally classified as disorders are covered in Common Disorders; and clinical findings, lesions, congenital anomalies, and injuries are covered in their own companion appendices. Individual symptoms, signs, and laboratory findings are defined as dictionary entries rather than listed here.

**Cardiovascular Diseases** Hypertension; Coronary Artery Disease; Stable Angina; Unstable Angina; Myocardial Infarction; Atherosclerosis; Heart Failure; Right Heart Failure; Cardiogenic Shock; Atrial Fibrillation; Atrial Flutter; Supraventricular Tachycardia; Ventricular Tachycardia; Ventricular Fibrillation; Sinus Bradycardia; Heart Block; Cardiomyopathy; Dilated Cardiomyopathy; Hypertrophic Cardiomyopathy; Restrictive Cardiomyopathy; Myocarditis; Pericarditis; Cardiac Tamponade; Endocarditis; Rheumatic Heart Disease; Aortic Stenosis; Aortic Regurgitation; Mitral Stenosis; Mitral Regurgitation; Mitral Valve Prolapse; Tricuspid Valve Disease; Pulmonary Hypertension; Peripheral Artery Disease; Aortic Aneurysm; Aortic Dissection; Deep Vein Thrombosis; Chronic Venous Insufficiency; Varicose Veins; Thrombophlebitis; Raynaud Phenomenon; Congenital Heart Disease.

**Respiratory Diseases** Asthma; Acute Bronchitis; Chronic Bronchitis; Emphysema; COPD; Pneumonia; Aspiration Pneumonia; Bronchopneumonia; Tuberculosis; COVID-19; Influenza; Bronchiolitis; Bronchiectasis; Cystic Fibrosis; Interstitial Lung Disease; Idiopathic Pulmonary Fibrosis; Pneumoconiosis; Silicosis; Asbestosis; Hypersensitivity Pneumonitis; Sarcoidosis; Pulmonary Edema; Pulmonary Embolism; Pulmonary Hypertension; Respiratory Failure; Pleurisy; Empyema; Lung Abscess; Occupational Lung Disease.

**Gastrointestinal Diseases** Gastroesophageal Reflux Disease; Esophagitis; Barrett Esophagus; Achalasia; Esophageal Spasm; Gastritis; Peptic Ulcer Disease; Gastric Ulcer; Duodenal Ulcer; Gastroenteritis; Gastroparesis; Crohn Disease; Ulcerative Colitis; Inflammatory Bowel Disease; Celiac Disease; Lactose Intolerance; Food Intolerance; Intestinal Obstruction; Ileus; Intussusception; Volvulus; Diverticulosis; Diverticulitis; Appendicitis; Peritonitis; Hemorrhoids; Anal Fissure; Anal Fistula; Rectal Prolapse; Mesenteric Ischemia.

**Liver, Gallbladder & Biliary Diseases** Metabolic Dysfunction-Associated Steatotic Liver Disease (MASLD); Alcoholic Liver Disease; Hepatitis A; Hepatitis B; Hepatitis C; Hepatitis D; Hepatitis E; Autoimmune Hepatitis; Acute Liver Failure; Chronic Liver Disease; Cirrhosis; Portal Hypertension; Hepatic Encephalopathy; Hemochromatosis; Wilson Disease; Primary Biliary Cholangitis; Primary Sclerosing Cholangitis; Cholelithiasis; Cholecystitis; Cholangitis.

**Pancreatic Diseases** Acute Pancreatitis; Chronic Pancreatitis; Autoimmune Pancreatitis; Pancreatic Insufficiency; Pancreatic Cancer; Pancreatic Neuroendocrine Tumors.

**Kidney & Urinary Diseases** Acute Kidney Injury; Chronic Kidney Disease; End-Stage Kidney Disease; Glomerulonephritis; Diabetic Nephropathy; Hypertensive Nephropathy; Interstitial Nephritis; Pyelonephritis; Urinary Tract Infection; Cystitis; Urethritis; Nephrolithiasis; Hydronephrosis; Polycystic Kidney Disease; Renal Tubular Acidosis; IgA Nephropathy; Minimal Change Disease; Focal Segmental Glomerulosclerosis; Membranous Nephropathy; Vesicoureteral Reflux.

---

**Endocrine Diseases** Type 1 Diabetes Mellitus; Type 2 Diabetes Mellitus; Gestational Diabetes; Diabetes Insipidus; Diabetic Ketoacidosis; Hyperosmolar Hyperglycemic State; Hypothyroidism; Hyperthyroidism; Hashimoto Thyroiditis; Graves Disease; Thyroiditis; Goiter; Addison Disease; Cushing Disease; Primary Aldosteronism; Hypoparathyroidism; Hyperparathyroidism; Pheochromocytoma; Pituitary Adenoma; Acromegaly; Gigantism; Growth Hormone Deficiency.

**Metabolic Diseases** Obesity; Gout; Dyslipidemia; Hypercholesterolemia; Hypertriglyceridemia; Porphyria; Amyloidosis.

**Nutritional Diseases & Deficiencies** Protein-Energy Malnutrition; Marasmus; Kwashiorkor; Iron Deficiency; Iron-Deficiency Anemia; Vitamin A Deficiency; Thiamine Deficiency; Beriberi; Riboflavin Deficiency; Niacin Deficiency; Pellagra; Folate Deficiency; Vitamin B12 Deficiency; Vitamin C Deficiency; Scurvy; Vitamin D Deficiency; Rickets; Osteomalacia; Vitamin K Deficiency; Iodine Deficiency; Zinc Deficiency; Copper Deficiency; Selenium Deficiency; Magnesium Deficiency.

**Neurological Diseases** Tension-Type Headache; Cluster Headache; Status Epilepticus; Stroke; Ischemic Stroke; Hemorrhagic Stroke; Transient Ischemic Attack; Cerebral Aneurysm; Parkinson Disease; Alzheimer Disease; Vascular Dementia; Frontotemporal Dementia; Lewy Body Dementia; Multiple Sclerosis; Amyotrophic Lateral Sclerosis; Huntington Disease; Diabetic Neuropathy; Myasthenia Gravis; Bell Palsy; Trigeminal Neuralgia; Radiculopathy; Meningitis; Encephalitis; Hydrocephalus; Cerebral Palsy.

**Musculoskeletal Diseases** Osteoarthritis; Osteoporosis; Osteomalacia; Rheumatoid Arthritis; Ankylosing Spondylitis; Psoriatic Arthritis; Reactive Arthritis; Septic Arthritis; Gout; Bursitis; Tendinitis; Tendinopathy; Frozen Shoulder; Tennis Elbow; Golfer's Elbow; Cervical Spondylosis; Lumbar Spondylosis; Spinal Stenosis; Herniated Disc; Scoliosis; Kyphosis; Spondylolisthesis; Fibromyalgia; Muscular Dystrophy; Myositis; Polymyositis; Dermatomyositis.

**Rheumatologic & Autoimmune Diseases** Rheumatoid Arthritis; Systemic Lupus Erythematosus; Polymyalgia Rheumatica; Giant Cell Arteritis; Polyarteritis Nodosa; Granulomatosis with Polyangiitis; Microscopic Polyangiitis; Behçet Disease; Inflammatory Myopathies; Ankylosing Spondylitis; Psoriatic Arthritis; Reactive Arthritis; Relapsing Polychondritis; Adult-Onset Still Disease.

**Skin, Hair & Nail Diseases** Acne Vulgaris; Rosacea; Atopic Dermatitis; Contact Dermatitis; Seborrheic Dermatitis; Psoriasis; Urticaria; Angioedema; Impetigo; Cellulitis; Erysipelas; Folliculitis; Boils; Carbuncle; Ringworm; Athlete's Foot; Jock Itch; Candidiasis; Scabies; Pediculosis; Wart; Molluscum Contagiosum; Herpes Simplex; Herpes Zoster; Hidradenitis Suppurativa; Pressure Ulcers; Onychomycosis.

**Eye Diseases** Amblyopia; Strabismus; Cataract; Open-Angle Glaucoma; Angle-Closure Glaucoma; Conjunctivitis; Keratitis; Corneal Ulcer; Dry Eye; Uveitis; Iritis; Retinal Detachment; Diabetic Retinopathy; Hypertensive Retinopathy; Macular Degeneration; Retinitis Pigmentosa; Central Retinal Artery Occlusion; Central Retinal Vein Occlusion; Optic Neuritis; Keratoconus; Blepharitis.

**Ear & Hearing Diseases** Otitis Externa; Acute Otitis Media; Chronic Otitis Media; Otitis Media with Effusion; Mastoiditis; Presbycusis; Meniere Disease; Labyrinthitis; Vestibular Neuritis; Benign Paroxysmal Positional Vertigo; Otosclerosis; Cholesteatoma; Acoustic Neuroma.

**Nose, Sinus & Throat Diseases** Allergic Rhinitis; Nonallergic Rhinitis; Acute Sinusitis; Chronic Sinusitis; Pharyngitis; Streptococcal Pharyngitis; Tonsillitis; Peritonsillar Abscess; Laryngitis; Epiglottitis; Vocal Cord Paralysis.

**Oral & Dental Diseases** Dental Caries; Pulpitis; Dental Abscess; Gingivitis; Periodontitis; Pericoronitis; Aphthous Ulcer; Oral Candidiasis; Leukoplakia; Oral Lichen Planus.

**Blood Diseases** Iron-Deficiency Anemia; Megaloblastic Anemia; Vitamin B12 Deficiency Anemia; Folate-Deficiency Anemia; Aplastic Anemia; Hemolytic Anemia; Sick Cell Disease; Thalassemia; Hereditary Spherocytosis; Glucose-6-Phosphate Dehydrogenase Deficiency; Polycythemia Vera; Immune Thrombocytopenia; Agranulocytosis; Hemophilia A; Hemophilia B; Von Willebrand Disease; Disseminated Intravascular Coagulation (DIC); Thrombotic Thrombocytopenic Purpura (TTP).

**Immune-System Diseases** Primary Immunodeficiency; Severe Combined Immunodeficiency; Common Variable Immunodeficiency; Selective IgA Deficiency; AIDS (Acquired Immunodeficiency Syndrome); HIV/AIDS; Chronic Granulomatous Disease; Graft-Versus-Host Disease.

---

---

**Infectious & Parasitic Diseases** Common Cold; Influenza; COVID-19; Measles; Mumps; Rubella; Chickenpox; Shingles; Herpes Simplex; Infectious Mononucleosis; Cytomegalovirus Infection; Polio; Rabies; Dengue; Chikungunya; Zika; Hepatitis A; Hepatitis B; Hepatitis C; Hepatitis D; Hepatitis E; HIV; Syphilis; Gonorrhea; Chlamydia; Tuberculosis; Leprosy; Diphtheria; Pertussis; Tetanus; Typhoid Fever; Cholera; Plague; Bacterial Meningitis; Meningococcemia; Scarlet Fever; Salmonellosis; Shigellosis; Campylobacteriosis; Botulism; Brucellosis; Leptospirosis; Lyme Disease; Malaria; Amebiasis; Giardiasis; Toxoplasmosis; Leishmaniasis; Trichomoniasis; Ascariasis; Hookworm; Pinworm Infection; Schistosomiasis; Taeniasis; Echinococcosis; Candidiasis; Aspergillosis; Cryptococcosis; Histoplasmosis.

**Female Reproductive & Gynecological Diseases** Endometriosis; Adenomyosis; Uterine Fibroids; Ovarian Torsion; Pelvic Inflammatory Disease; Vaginitis; Bacterial Vaginosis; Vulvovaginal Candidiasis; Vulvodynia; Pelvic Organ Prolapse; Female Infertility; Premature Ovarian Insufficiency.

**Male Reproductive & Urological Diseases** Male Infertility; Benign Prostatic Hyperplasia; Prostatitis; Epididymitis; Orchitis; Testicular Torsion; Cryptorchidism; Phimosis; Paraphimosis; Peyronie Disease; Balanitis; Hypogonadism.

**Pregnancy & Postpartum Diseases** Hyperemesis Gravidarum; Gestational Diabetes; Gestational Hypertension; Preeclampsia; Eclampsia; Puerperal Infection; Postpartum Endometritis; Postpartum Depression; Mastitis.

**Pediatric & Neonatal Diseases** Respiratory Distress Syndrome; Neonatal Sepsis; Birth Asphyxia; Necrotizing Enterocolitis; Diaper Rash; Croup; Bronchiolitis; Cerebral Palsy; Congenital Hypothyroidism; Kawasaki Disease; Rheumatic Fever; Hand-Foot-and-Mouth Disease.

**Genetic & Chromosomal Diseases** Cystic Fibrosis; Sickle Cell Disease; Thalassemia; Huntington Disease; Duchenne Muscular Dystrophy; Becker Muscular Dystrophy; Neurofibromatosis; Tuberous Sclerosis; Tay-Sachs Disease; Gaucher Disease; Achondroplasia; Hemochromatosis; Wilson Disease.

**Cancers & Other Neoplasms** Breast Cancer; Lung Cancer; Colorectal Cancer; Prostate Cancer; Cervical Cancer; Ovarian Cancer; Endometrial Cancer; Vulvar Cancer; Vaginal Cancer; Testicular Cancer; Penile Cancer; Bladder Cancer; Kidney Cancer; Thyroid Cancer; Oral Cancer; Oropharyngeal Cancer; Laryngeal Cancer; Esophageal Cancer; Stomach Cancer; Liver Cancer; Gallbladder Cancer; Pancreatic Cancer; Small-Intestinal Cancer; Anal Cancer; Melanoma; Basal-Cell Carcinoma; Squamous-Cell Carcinoma; Osteosarcoma; Ewing Sarcoma; Soft-Tissue Sarcoma; Glioma; Glioblastoma; Meningioma; Leukemia; Hodgkin Lymphoma; Non-Hodgkin Lymphoma; Multiple Myeloma; Neuroblastoma; Retinoblastoma.

**Multisystem & Systemic Diseases** Fibromyalgia; Sarcoidosis; Amyloidosis; Sepsis; Septic Shock.

# Common Disorders

*Scope:* This reference-oriented list organizes human conditions conventionally classified as clinical disorders by medical specialty and organ system. In medical nomenclature, disorders represent disruptions to regular bodily structure or function (frequently functional, metabolic, neurobehavioral, or regulatory disturbances), complementing the disease classifications in Common Diseases and clinical signs in Common Syndromes. Every entity listed corresponds to a defined medical concept in the dictionary.

**Mental & Behavioral Disorders** Generalized Anxiety Disorder; Panic Disorder; Social Anxiety Disorder; Agoraphobia; Specific Phobia; Major Depressive Disorder; Persistent Depressive Disorder; Bipolar Disorder; Cyclothymic Disorder; Obsessive-Compulsive Disorder; Post-Traumatic Stress Disorder; Acute Stress Disorder; Attention-Deficit/Hyperactivity Disorder; Autism Spectrum Disorder; Schizophrenia; Schizoaffective Disorder; Delusional Disorder; Brief Psychotic Disorder; Eating Disorders; Alcohol Use Disorder; Opioid Use Disorder; Substance Abuse; Dissociative Identity Disorder; Depersonalization.

**Personality Disorders** Borderline Personality Disorder; Antisocial Personality Disorder; Narcissistic Personality Disorder; Avoidant Personality Disorder; Dependent Personality Disorder; Obsessive-Compulsive Personality Disorder; Paranoid Personality Disorder; Schizoid Personality Disorder; Schizotypal Personality Disorder; Histrionic Personality Disorder.

**Eating & Nutrition Disorders** Anorexia Nervosa; Bulimia Nervosa; Binge-Eating Disorder; Avoidant/Restrictive Food Intake Disorder; Pica; Rumination.

**Impulse-Control & Conduct Disorders** Intermittent Explosive Disorder; Kleptomania; Pyromania; Oppositional Defiant Disorder; Conduct Disorder; Trichotillomania; Excoriation Disorder.

**Somatic & Related Disorders** Somatic Symptom Disorder; Illness Anxiety Disorder; Conversion Disorder; Factitious Disorder.

**Sleep-Wake Disorders** Insomnia; Hypersomnia; Narcolepsy; Obstructive Sleep Apnea; Central Sleep Apnea; Sleepwalking; Night Terrors; Nightmare Disorder; REM Sleep Behavior Disorder; Restless Legs Syndrome; Delayed Sleep Phase.

**Neurological & Movement Disorders** Migraine; Cluster Headache; Tension-Type Headache; Epilepsy; Seizure Disorder; Essential Tremor; Parkinson's Disease; Dystonia; Chorea; Myoclonus; Tic Disorder; Tourette Disorder; Ataxia; Stiff-Person Syndrome.

**Neurodevelopmental & Learning Disorders** Intellectual Disability; Language Disorder; Stuttering; Specific Learning Disorder; Dyslexia; Developmental Coordination Disorder; Fetal Alcohol Spectrum Disorder.

**Autonomic Disorders** Dysautonomia; Postural Orthostatic Tachycardia Syndrome; Orthostatic Hypotension; Neurocardiogenic Syncope; Multiple System Atrophy; Autonomic Neuropathy.

**Cardiovascular & Hemodynamic Disorders** Heart Arrhythmia; Atrioventricular Block; Bundle Branch Block; Microvascular Angina; Cardiac Syndrome X; Orthostatic Intolerance.

---

**Respiratory & Ventilatory Disorders** Chronic Obstructive Pulmonary Disorder; Hypoventilation; Obesity Hypoventilation Syndrome; Pulmonary Fibrosis; Upper Airway Resistance Syndrome; Hyperventilation.

**Digestive & Functional GI Disorders** Irritable Bowel Syndrome; Functional Dyspepsia; Functional Constipation; Functional Diarrhea; Cyclic Vomiting Syndrome; Rumination; Achalasia; Diffuse Esophageal Spasm; Pelvic Floor Dysfunction; Gastroparesis.

**Endocrine & Metabolic Disorders** Hypothyroidism; Hyperthyroidism; Euthyroid Sick Syndrome; Hypopituitarism; Hyperprolactinemia; Adrenal Insufficiency; Cushing Syndrome; Hypoparathyroidism; Hyperparathyroidism; Polycystic Ovary Syndrome; Precocious Puberty; Delayed Puberty; Metabolic Syndrome.

**Lipid & Inborn Metabolic Disorders** Dyslipidemia; Hypercholesterolemia; Hypertriglyceridemia; Familial Hypercholesterolemia; Galactosemia; Phenylketonuria; Maple Syrup Urine Disease; Glycogen Storage Disease; Lysosomal Storage Disorders; Porphyria.

**Electrolyte & Acid–Base Disorders** Hyponatremia; Hypernatremia; Hypokalemia; Hyperkalemia; Hypocalcemia; Hypercalcemia; Hypomagnesemia; Hypermagnesemia; Hypophosphatemia; Hyperphosphatemia; Metabolic Acidosis; Metabolic Alkalosis; Respiratory Acidosis; Respiratory Alkalosis.

**Bone Mineral Density Disorders** Osteopenia; Osteoporosis; Osteomalacia; Renal Osteodystrophy; Fibrous Dysplasia; Paget Disease of Bone.

**Musculoskeletal & Soft-Tissue Disorders** Temporomandibular Joint Disorders; Rotator Cuff Tear; Rotator Cuff Injury; Herniated Disc; Degenerative Disc Disease; Myofascial Pain Syndrome; Tendinitis; Tendinopathy; Carpal Tunnel Syndrome; Cubital Tunnel Syndrome; Hypermobility Syndrome.

**Blood & Coagulation Disorders** Hemophilia A; Hemophilia B; Von Willebrand Disease; Thrombophilia; Glanzmann Thrombasthenia; Immune Thrombocytopenic Purpura; Aplastic Anemia; Myelodysplastic Syndrome.

**Immune, Allergic & Eosinophilic Disorders** Autoimmune Disease; Primary Immunodeficiency; Anaphylaxis; Angioedema; Mastocytosis; Eosinophilic Esophagitis; Eosinophilic Gastroenteritis.

**Sexual Disorders** Male Hypoactive Sexual Desire Disorder; Erectile Dysfunction; Premature Ejaculation; Delayed Ejaculation; Female Sexual Dysfunction; Female Orgasmic Disorder; Vaginismus; Dyspareunia; Gender Dysphoria.

**Menstrual & Reproductive Disorders** Dysmenorrhea; Amenorrhea; Abnormal Uterine Bleeding; Menorrhagia; Premenstrual Syndrome; Premenstrual Dysphoric Disorder; Anovulation; Premature Ovarian Insufficiency; Androgen Insensitivity Syndrome.

**Urinary & Micturition Disorders** Overactive Bladder; Urinary Incontinence; Stress Incontinence; Neurogenic Bladder; Urinary Retention; Bladder Outlet Obstruction.

**Vision & Ocular Motility Disorders** Refractive Disorder; Myopia; Hyperopia; Astigmatism; Presbyopia; Amblyopia; Strabismus; Color Vision Deficiency; Nystagmus; Dry Eye.

**Hearing, Balance & Auditory Disorders** Conductive Hearing Loss; Sensorineural Hearing Loss; Tinnitus; Auditory Processing Disorder; Benign Paroxysmal Positional Vertigo; Meniere Disease.

**Speech, Language & Voice Disorders** Language Disorder; Speech Disorder; Stuttering; Dysarthria; Apraxia; Aphasia; Voice Disorders; Dysphonia; Vocal Cord Dysfunction.

**Hair, Nail & Pigmentation Disorders** Alopecia; Alopecia Areata; Androgenetic Alopecia; Telogen Effluvium; Cicatricial Alopecia; Melasma; Vitiligo; Albinism.

**Connective Tissue & Fascial Disorders** Ehlers-Danlos Syndrome; Marfan Syndrome; Loeys-Dietz Syndrome; Mixed Connective Tissue Disease; Dupuytren Contracture; Plantar Fasciitis.

---

# Mental Health Terms

*Scope:* This appendix groups commonly used mental-health terms for quick reference. It is an index, not a diagnostic or treatment guide. Preferred modern terms are used where an older or informal term may be misleading.

**Foundations and assessment** Acute; Affect; Chronic; Cognition; Diagnosis; Disorder; Distress; Functional Impairment; Mental Disorder; Mental Health; Mental Illness; Mood; Risk Factor; Syndrome.

**Brain and nervous-system structures** Amygdala; Axon; Brain; Brain Stem; Cerebellum; Cerebrum; Dendrite; Frontal Lobe; Gray Matter; Hippocampus; Hypothalamus; Limbic System; Locus Coeruleus; Myelin; Neuron; Neurotransmission; Neurotransmitter; Occipital Lobe; Parietal Lobe; Postsynaptic Membrane; Presynaptic Terminals; Receptor; Serotonin; Synapse; Temporal Lobe; Thalamus.

**Common psychological and behavioral symptoms** Anhedonia; Anxiety; Avolition; Cognitive Symptoms; Compulsions; Delusion; Euphoria; Obsessions; Panic Attack; Psychomotor Agitation; Psychomotor Retardation; Psychosis; Self-Harm; Stress; Trauma.

**Anxiety, trauma, and obsessive-compulsive disorders** Anxiety Disorders; Generalized Anxiety Disorder; Panic Disorder; Specific Phobia; Social Anxiety Disorder (Social Phobia); Separation Anxiety Disorder; Post-Traumatic Stress Disorder; Obsessive-Compulsive Disorder; Trichotillomania.

**Mood disorders** Bipolar Disorder; Bipolar II Disorder; Cyclothymic Disorder; Depression; Major Depressive Disorder; Major Depressive Episode; Persistent Depressive Disorder; Postpartum Depression; Seasonal Affective Disorder.

**Psychotic and personality disorders** Antisocial Personality Disorder; Borderline Personality Disorder; Narcissistic Personality Disorder; Personality Disorders; Brief Psychotic Disorder; Schizoaffective Disorder; Schizophrenia.

**Neurodevelopmental and related conditions** Conduct Disorder; Neurodevelopmental Disorders; Intellectual Disability; Neurocognitive Disorder; Functional Neurologic Disorder.

**Psychiatric and psychological treatments** Antidepressants; Antipsychotic Medicine; Atypical Antipsychotics; Benzodiazepine; Cognitive Behavioral Therapy; Dialectical Behavior Therapy; Electroconvulsive Therapy; Psychotherapy; Systematic Desensitization; Transcranial Magnetic Stimulation.

**Care settings and professionals** Community Mental-Health Treatment; Hospitalization; Psychiatry; Psychiatrist; Clinical Psychologist; Social Worker; Voluntary Psychiatric Admission.

**Investigations and brain imaging** Computed Tomography (CT); Electroencephalography; Functional MRI; Positron Emission Tomography; Single-Photon Emission Computed Tomography.

**Suicide and safety terminology** Suicidality; Suicide; Suicide Attempt; Suicidal Ideation; Suicidal Intent; Suicidal Plan; Suicide Risk Assessment.

**Related scientific concepts** Evidence-Based Practice; Neurosciences; Tolerance; Withdrawal.

# Common Syndromes

*Scope:* This reference-oriented list organizes clinically significant medical syndromes by organ system and medical specialty. In medical terminology, a syndrome represents a characteristic constellation of concurrent signs, symptoms, or anatomical features that consistently occur together and point toward a common pathophysiological mechanism or etiology.

**Cardiovascular Syndromes** Acute Coronary Syndrome; Acute Aortic Syndrome; Sick Sinus Syndrome; Wolff–Parkinson–White Syndrome; Long QT Syndrome; Short QT Syndrome; Brugada Syndrome; Takotsubo Syndrome (Stress Cardiomyopathy); Eisenmenger Syndrome; Postural Orthostatic Tachycardia Syndrome (POTS); Postpericardiotomy Syndrome; Dressler Syndrome; Cardiac Syndrome X; Cardiorenal Syndrome.

**Respiratory Syndromes** Acute Respiratory Distress Syndrome (ARDS); Infant Respiratory Distress Syndrome; Obesity Hypoventilation Syndrome; Upper Airway Resistance Syndrome; Hepatopulmonary Syndrome; Acute Chest Syndrome; Kartagener Syndrome.

**Gastrointestinal Syndromes** Irritable Bowel Syndrome (IBS); Malabsorption Syndrome; Short Bowel Syndrome; Dumping Syndrome; Cyclic Vomiting Syndrome; Rumination Syndrome; Mallory–Weiss Syndrome; Zollinger–Ellison Syndrome; Boerhaave Syndrome; Afferent Loop Syndrome; Cannabinoid Hyperemesis Syndrome; Superior Mesenteric Artery Syndrome; Ogilvie Syndrome.

**Liver & Biliary Syndromes** Hepatorenal Syndrome; Hepatopulmonary Syndrome; Budd–Chiari Syndrome; Gilbert Syndrome; Crigler–Najjar Syndrome; Dubin–Johnson Syndrome; Rotor Syndrome; Reye Syndrome; Mirizzi Syndrome.

**Kidney & Urinary Syndromes** Nephrotic Syndrome; Nephritic Syndrome; Hemolytic Uremic Syndrome (HUS); Alport Syndrome; Fanconi Syndrome; Goodpasture Syndrome; Hepatorenal Syndrome; Nutcracker Syndrome.

**Endocrine Syndromes** Cushing Syndrome; Metabolic Syndrome; Syndrome of Inappropriate Antidiuretic Hormone Secretion (SIADH); Polycystic Ovary Syndrome (PCOS); Carcinoid Syndrome; Empty Sella Syndrome; Androgen Insensitivity Syndrome; Sheehan Syndrome; Nelson Syndrome; Polyglandular Autoimmune Syndromes (PAPS Type 1 and 2); Insulin Resistance Syndrome.

**Neurological Syndromes** Guillain–Barré Syndrome; Miller Fisher Syndrome; Lambert–Eaton Myasthenic Syndrome (LEMS); Restless Legs Syndrome; Locked-In Syndrome; Post-Concussion Syndrome; Cauda Equina Syndrome; Conus Medullaris Syndrome; Anterior Cord Syndrome; Central Cord Syndrome; Central Pain Syndrome; Alien Hand Syndrome; CADASIL Syndrome; Foix–Alajouanine Syndrome; Horner Syndrome; Tourette Syndrome; Lennox–Gastaut Syndrome; West Syndrome; Wernicke–Korsakoff Syndrome; Brown–Séquard Syndrome; Wallenberg Syndrome (Lateral Medullary Syndrome); Isaacs Syndrome.

**Pain & Neuromuscular Syndromes** Carpal Tunnel Syndrome; Cubital Tunnel Syndrome; Complex Regional Pain Syndrome (CRPS); Myofascial Pain Syndrome; Piriformis Syndrome; Compartment Syndrome; Thoracic Outlet Syndrome; Burning Mouth Syndrome; Tarsal Tunnel Syndrome; Greater Trochanteric Pain Syndrome.

**Psychiatric & Behavioral Syndromes** Serotonin Syndrome; Neuroleptic Malignant Syndrome; Capgras Syndrome; Cotard Syndrome; Münchausen Syndrome (Factitious Disorder); Korsakoff Syndrome; Amotivational Syndrome; Ekblom Syndrome (Delusional Parasitosis); Ganser Syndrome.

---

**Rheumatologic & Autoimmune Syndromes** Sjögren Syndrome; Antiphospholipid Syndrome; CREST Syndrome; Felty Syndrome; Behçet Syndrome; SAPHO Syndrome; Reactive Arthritis (formerly Reiter Syndrome); Churg–Strauss Syndrome (EGPA); Caplan Syndrome.

**Hematological Syndromes** Myelodysplastic Syndromes; Antiphospholipid Syndrome; Evans Syndrome; Hyperviscosity Syndrome; Tumor Lysis Syndrome; Hemophagocytic Syndrome (HLH); Acute Chest Syndrome; Thrombotic Thrombocytopenic Purpura (TTP).

**Immunological Syndromes** Severe Combined Immunodeficiency Syndrome; Acquired Immunodeficiency Syndrome (AIDS); Alpha-Gal Syndrome; Antisynthetase Syndrome; Capillary Leak Syndrome; Hyper-IgE Syndrome (Job Syndrome); Autoimmune Lymphoproliferative Syndrome (ALPS); Cytokine Release Syndrome (CRS); Immune Reconstitution Inflammatory Syndrome; Wiskott–Aldrich Syndrome.

**Infectious & Postinfectious Syndromes** Toxic Shock Syndrome (TSS); Post-COVID-19 Condition; Post-Polio Syndrome; Congenital Rubella Syndrome; Congenital Zika Syndrome; Waterhouse–Friderichsen Syndrome; Lemierre Syndrome.

**Genetic & Chromosomal Syndromes** Down Syndrome; Turner Syndrome; Klinefelter Syndrome; Edwards Syndrome; Patau Syndrome; DiGeorge Syndrome (22q11.2 Deletion); Fragile X Syndrome; Williams Syndrome; Prader–Willi Syndrome; Angelman Syndrome; Noonan Syndrome; Rett Syndrome; Cri-du-Chat Syndrome; Beckwith–Wiedemann Syndrome; McCune–Albright Syndrome.

**Connective Tissue Syndromes** Ehlers–Danlos Syndromes; Marfan Syndrome; Loeys–Dietz Syndrome; Stickler Syndrome; Joint Hypermobility Syndrome.

**Pediatric Syndromes** Down Syndrome; Fetal Alcohol Syndrome; Sudden Infant Death Syndrome (SIDS); Reye Syndrome; DiGeorge Syndrome; Beckwith–Wiedemann Syndrome; Nephrotic Syndrome; Hand-Foot-and-Mouth Syndrome.

**Obstetric Syndromes** HELLP Syndrome; Antiphospholipid Syndrome; Twin-to-Twin Transfusion Syndrome (TTTS); Amniotic Band Syndrome; Fetal Alcohol Syndrome.

**Gynecological Syndromes** Polycystic Ovary Syndrome; Premenstrual Syndrome (PMS); Asherman Syndrome; Genitourinary Syndrome of Menopause; Mayer–Rokitansky–Küster–Hauser (MRKH) Syndrome.

**Male Reproductive Syndromes** Klinefelter Syndrome; Androgen Insensitivity Syndrome; Kallmann Syndrome; Post-Vasectomy Pain Syndrome.

**Cancer-Predisposition & Paraneoplastic Syndromes** Lynch Syndrome (HNPCC); Li–Fraumeni Syndrome; Von Hippel–Lindau Syndrome; Multiple Endocrine Neoplasia (MEN 1 and 2); Carcinoid Syndrome; Tumor Lysis Syndrome; Superior Vena Cava Syndrome; Paraneoplastic Neurological Syndromes; Cancer Cachexia Syndrome.

**Metabolic & Nutritional Syndromes** Metabolic Syndrome; Refeeding Syndrome; Wernicke–Korsakoff Syndrome; Milk–Alkali Syndrome; Hungry Bone Syndrome; Fanconi–Bickel Syndrome.

**Toxicological Syndromes (Toxidromes)** Serotonin Syndrome; Neuroleptic Malignant Syndrome; Anticholinergic Syndrome; Cholinergic Syndrome; Sympathomimetic Syndrome; Sedative-Hypnotic Syndrome; Opioid Withdrawal Syndrome; Alcohol Withdrawal Syndrome.

**Critical Care Syndromes** Systemic Inflammatory Response Syndrome (SIRS); Multiple Organ Dysfunction Syndrome (MODS); Acute Respiratory Distress Syndrome (ARDS); Abdominal Compartment Syndrome; Fat Embolism Syndrome.

**Sleep Syndromes** Obstructive Sleep Apnea Syndrome; Central Sleep Apnea Syndromes; Restless Legs Syndrome; Kleine–Levin Syndrome; Delayed Sleep Phase Syndrome.

**Eye & Cranial Nerve Syndromes** Horner Syndrome; Adie Syndrome; Brown Syndrome; Duane Retraction Syndrome; Charles Bonnet Syndrome; Dry Eye Syndrome; Tolosa–Hunt Syndrome.

**ENT & Otolaryngologic Syndromes** Ramsay Hunt Syndrome; Eagle Syndrome; Empty Nose Syndrome; Gradenigo Syndrome; Samter Triad (Aspirin-Exacerbated Respiratory Disease).

---

---

**Dermatological Syndromes** Stevens–Johnson Syndrome; Toxic Epidermal Necrolysis; Staphylococcal Scalded Skin Syndrome; Sweet Syndrome; Gorlin Syndrome; Peutz–Jeghers Syndrome; DRESS Syndrome (Drug Reaction with Eosinophilia and Systemic Symptoms).

**Vascular Syndromes** Raynaud Syndrome; Superior Vena Cava Syndrome; Thoracic Outlet Syndrome; Subclavian Steal Syndrome; Leriche Syndrome; May–Thurner Syndrome; Nutcracker Syndrome.

**Multisystem Syndromes** Chronic Fatigue Syndrome (ME/CFS); Postural Orthostatic Tachycardia Syndrome (POTS); Ehlers–Danlos Syndromes; Metabolic Syndrome; Antiphospholipid Syndrome; Behcet Syndrome.

# Rare Diseases

*Scope:* This reference-oriented list organizes clinically significant rare diseases (orphan diseases) by organ system and clinical domain. A rare disease is typically defined as one affecting fewer than 1 in 2,000 individuals (EU criteria) or fewer than 200,000 people in the United States. It highlights high-importance benchmark conditions characterized by distinct genetic, metabolic, or autoimmune etiologies.

**Genetic & Chromosomal Diseases** Turner Syndrome; Klinefelter Syndrome; Fragile X Syndrome; Williams Syndrome; Prader–Willi Syndrome; Angelman Syndrome; Noonan Syndrome; 22q11.2 Deletion Syndrome; Cri-du-Chat Syndrome; Hutchinson–Gilford Progeria Syndrome; Cornelia de Lange Syndrome.

**Neurological & Neurogenetic Diseases** Huntington Disease; Amyotrophic Lateral Sclerosis (ALS); Spinal Muscular Atrophy (SMA); Friedreich Ataxia; Ataxia–Telangiectasia; Rett Syndrome; Batten Disease (Neuronal Ceroid Lipofuscinosis); Creutzfeldt–Jakob Disease; Fatal Familial Insomnia; Progressive Supranuclear Palsy; Multiple System Atrophy; Stiff-Person Syndrome.

**Neuromuscular & Peripheral Nerve Diseases** Duchenne Muscular Dystrophy; Becker Muscular Dystrophy; Facioscapulohumeral Muscular Dystrophy; Limb-Girdle Muscular Dystrophies; Congenital Muscular Dystrophies; Myasthenia Gravis; Charcot–Marie–Tooth Disease; Amyloid Polyneuropathy.

**Inborn Errors of Metabolism & Storage Diseases** Gaucher Disease; Fabry Disease; Pompe Disease; Tay–Sachs Disease; Niemann–Pick Disease; Krabbe Disease; Metachromatic Leukodystrophy; X-Linked Adrenoleukodystrophy; Alkaptonuria; Homocystinuria; Phenylketonuria; Maple Syrup Urine Disease; Von Gierke Disease (GSD I); Mucopolysaccharidoses (Hurler, Hunter, Sanfilippo Syndromes).

**Blood & Bone Marrow Diseases** Hemophilia A; Hemophilia B; Paroxysmal Nocturnal Hemoglobinuria (PNH); Fanconi Anemia; Diamond–Blackfan Anemia; Pure Red Cell Aplasia; Thrombotic Thrombocytopenic Purpura (TTP); Atypical Hemolytic Uremic Syndrome; Cryoglobulinemia; Castleman Disease.

**Immune, Autoinflammatory & Histiocytic Diseases** Severe Combined Immunodeficiency (SCID); Common Variable Immunodeficiency; Chronic Granulomatous Disease; Wiskott–Aldrich Syndrome; Familial Mediterranean Fever; Cryopyrin-Associated Periodic Syndromes (CAPS); Hemophagocytic Lymphohistiocytosis (HLH); Histiocytosis X (Langerhans Cell Histiocytosis).

**Rheumatologic & Autoimmune Diseases** Systemic Sclerosis (Scleroderma); Granulomatosis with Polyangiitis; Microscopic Polyangiitis; Polyarteritis Nodosa; Behçet Disease; Takayasu Arteritis; Eosinophilic Granulomatosis with Polyangiitis (Churg–Strauss); Relapsing Polychondritis; Adult-Onset Still Disease.

**Connective Tissue & Dermatological Genetic Diseases** Ehlers–Danlos Syndromes (Vascular and Classic Types); Marfan Syndrome; Loeys–Dietz Syndrome; Osteogenesis Imperfecta; Pseudoxanthoma Elasticum; Epidermolysis Bullosa; Ichthyosis; Xeroderma Pigmentosum; Pemphigus Vulgaris; Bullous Pemphigoid.

**Endocrine Diseases** Addison Disease; Congenital Adrenal Hyperplasia; Acromegaly; Cushing Disease (Pituitary-Dependent); Hypoparathyroidism; Multiple Endocrine Neoplasia (MEN 1 and 2); Pheochromocytoma; Autoimmune Polyglandular Syndromes.

---

**Hepatic & Biliary Diseases** Wilson Disease; Alpha-1 Antitrypsin Deficiency; Primary Biliary Cholangitis; Primary Sclerosing Cholangitis; Biliary Atresia; Progressive Familial Intrahepatic Cholestasis; Caroli Disease.

**Renal & Urinary Diseases** Alport Syndrome; Cystinosis; Primary Hyperoxaluria; Bartter Syndrome; Gitelman Syndrome; Polycystic Kidney Disease (Autosomal Recessive Type); Medullary Cystic Kidney Disease.

**Pulmonary Diseases** Idiopathic Pulmonary Fibrosis; Pulmonary Arterial Hypertension; Lymphangioleiomyomatosis (LAM); Pulmonary Alveolar Proteinosis; Primary Ciliary Dyskinesia.

**Cardiovascular Diseases** Brugada Syndrome; Long QT Syndrome; Short QT Syndrome; Arrhythmogenic Right Ventricular Cardiomyopathy; Fibromuscular Dysplasia; Takayasu Arteritis.

**Gastrointestinal Diseases** Hirschsprung Disease; Achalasia; Eosinophilic Esophagitis; Short Bowel Syndrome; Hereditary Pancreatitis; Microvillus Inclusion Disease.

**Eye & Visual Pathway Diseases** Retinitis Pigmentosa; Stargardt Disease; Leber Hereditary Optic Neuropathy; Leber Congenital Amaurosis; Retinoblastoma; Aniridia; Best Disease.

**Bone, Skeletal & Cartilage Diseases** Achondroplasia; Fibrodysplasia Ossificans Progressiva (FOP); Hypophosphatasia; Osteopetrosis (Marble Bone Disease); Cleidocranial Dysplasia; Thanatophoric Dysplasia.

**Rare Infectious & Prion Diseases** Creutzfeldt–Jakob Disease; Variant CJD; Kuru; Whipple Disease; Progressive Multifocal Leukoencephalopathy (PML); Ebola Virus Disease; Marburg Virus Disease; Lassa Fever.

**Rare Cancers & Neoplasms** Malignant Mesothelioma; Gastrointestinal Stromal Tumor (GIST); Neuroendocrine Tumors; Ewing Sarcoma; Osteosarcoma; Retinoblastoma; Uveal Melanoma; Adrenocortical Carcinoma; Thymoma; Merkel Cell Carcinoma; Kaposi Sarcoma; Burkitt Lymphoma.

**Multisystem & Inflammatory Diseases** Erdheim–Chester Disease; POEMS Syndrome; VEXAS Syndrome; IgG4-Related Disease; Systemic Amyloidosis; Castleman Disease.

# Genetic Diseases

*Scope:* This reference-oriented list organizes human genetic diseases by mode of inheritance, cytogenetic classification, and molecular pathophysiological mechanism. Genetic diseases result from alterations in DNA sequences, ranging from single-nucleotide variants to gross chromosomal rearrangements and non-Mendelian mechanisms, providing a focused reference complementing Common Diseases and Rare Diseases.

**Autosomal Dominant Diseases** Huntington Disease; Marfan Syndrome; Neurofibromatosis Type 1 (von Recklinghausen Disease); Neurofibromatosis Type 2; Familial Hypercholesterolemia; Polycystic Kidney Disease (Autosomal Dominant, ADPKD); Achondroplasia; Tuberous Sclerosis Complex; Hereditary Spherocytosis; Von Hippel–Lindau Syndrome; Li–Fraumeni Syndrome; Multiple Endocrine Neoplasia (MEN 1 and 2); Myotonic Dystrophy (Type 1 and 2); Hereditary Non-Polyposis Colorectal Cancer (Lynch Syndrome); Familial Adenomatous Polyposis (FAP); Osteogenesis Imperfecta (Type I); Ehlers–Danlos Syndrome (Hypermobile and Classic Types).

**Autosomal Recessive Diseases** Cystic Fibrosis; Sickle-Cell Disease; Beta-Thalassemia; Alpha-Thalassemia; Phenylketonuria (PKU); Gaucher Disease; Tay–Sachs Disease; Niemann–Pick Disease; Wilson Disease; Hereditary Hemochromatosis; Alpha-1 Antitrypsin Deficiency; Spinal Muscular Atrophy (SMA); Friedreich Ataxia; Alkaptonuria; Homocystinuria; Maple Syrup Urine Disease; Congenital Adrenal Hyperplasia; Galactosemia; Glycogen Storage Diseases (von Gierke, Pompe, Cori); Ataxia–Telangiectasia; Fanconi Anemia; Xeroderma Pigmentosum; Bloom Syndrome; Ellis–van Creveld Syndrome; Kartagener Syndrome.

**X-Linked Recessive Diseases** Duchenne Muscular Dystrophy; Becker Muscular Dystrophy; Hemophilia A (Factor VIII Deficiency); Hemophilia B (Factor IX Deficiency); Glucose-6-Phosphate Dehydrogenase (G6PD) Deficiency; Red-Green Color Blindness; Fragile X Syndrome; Lesch–Nyhan Syndrome; Wiskott–Aldrich Syndrome; X-Linked Agammaglobulinemia (Bruton Tyrosine Kinase Deficiency); X-Linked Adrenoleukodystrophy; Hunter Syndrome (MPS II); Fabry Disease; Menkes Disease; Alport Syndrome (X-Linked Type); Chronic Granulomatous Disease (X-Linked Form).

**X-Linked Dominant Diseases** Rett Syndrome (MECP2 Mutation); Incontinentia Pigmenti; X-Linked Hypophosphatemic Rickets; Aicardi Syndrome; Focal Dermal Hypoplasia (Goltz Syndrome); Fragile X-Associated Tremor/Ataxia Syndrome (FXTAS).

**Y-Linked (Holandric) Conditions** Y-Chromosome Infertility (AZF Deletions); SRY Gene Deletions/Mutations; Swyer Syndrome (46,XY Gonadal Dysgenesis); Retinitis Pigmentosa (Y-Linked Form); Hypertrichosis Pinnarum.

**Mitochondrial (Maternal) Genetic Diseases** Leber Hereditary Optic Neuropathy (LHON); Mitochondrial Encephalomyopathy, Lactic Acidosis, and Stroke-Like Episodes (MELAS); Myoclonic Epilepsy with Ragged Red Fibers (MERRF); Neuropathy, Ataxia, and Retinitis Pigmentosa (NARP); Leigh Syndrome (Subacute Necrotizing Encephalomyelopathy); Kearns–Sayre Syndrome; Pearson Syndrome; Chronic Progressive External Ophthalmoplegia (CPEO).

**Chromosomal Aneuploidies (Autosomal)** Trisomy 21 (Down Syndrome); Trisomy 18 (Edwards Syndrome); Trisomy 13 (Patau Syndrome); Trisomy 8 (Warkany Syndrome 2); Trisomy 9 Mosaicism.

---

**Sex Chromosome Aneuploidies** 45,X (Turner Syndrome); 47,XXY (Klinefelter Syndrome); 47,XXX (Triple X Syndrome); 47,XYY (Jacob Syndrome); 48,XXYY Syndrome; 48,XXXY Syndrome; Tetrasomy X.

**Microdeletion & Microduplication Syndromes** 22q11.2 Deletion Syndrome (DiGeorge Syndrome, Velocardio-facial Syndrome); 5p Deletion Syndrome (Cri-du-Chat Syndrome); 4p Deletion Syndrome (Wolf–Hirschhorn Syndrome); 7q11.23 Deletion Syndrome (Williams Syndrome); 17p11.2 Deletion Syndrome (Smith–Magenis Syndrome); 17p11.2 Duplication Syndrome (Potocki–Lupski Syndrome); 1p36 Deletion Syndrome; 15q11–q13 Deletion; Rubinstein–Taybi Syndrome.

**Genomic Imprinting Disorders** Prader–Willi Syndrome (Maternal Imprinting / Paternal 15q11–q13 Loss); Angelman Syndrome (Paternal Imprinting / Maternal UBE3A Loss); Beckwith–Wiedemann Syndrome (11p15.5 Alteration); Silver–Russell Syndrome; Pseudohypoparathyroidism (Albright Hereditary Osteodystrophy); Uniparental Disomy Syndromes.

**Trinucleotide Repeat Expansion Diseases** Huntington Disease (CAG Repeat); Fragile X Syndrome (CGG Repeat); Myotonic Dystrophy Type 1 (CTG Repeat); Friedreich Ataxia (GAA Repeat); Spinocerebellar Ataxias (SCA Types 1, 2, 3, 6, 7); Dentatorubral–Pallidoluysian Atrophy (DRPLA); Spinal and Bulbar Muscular Atrophy (Kennedy Disease).

**Lysosomal Storage Diseases** Gaucher Disease (Glucocerebrosidase Deficiency); Tay–Sachs Disease (Hexosaminidase A Deficiency); Niemann–Pick Disease (Types A, B, C); Fabry Disease (Alpha-Galactosidase A Deficiency); Pompe Disease (Acid Alpha-Glucosidase Deficiency); Krabbe Disease; Metachromatic Leukodystrophy; Mucopolysaccharidoses (Hurler, Scheie, Hunter, Sanfilippo, Morquio, Maroteaux–Lamy, Sly Syndromes); Fucosidosis; Sialidosis.

**Connective Tissue Genetic Disorders** Marfan Syndrome (FBN1 Mutation); Ehlers–Danlos Syndromes; Loeys–Dietz Syndrome; Osteogenesis Imperfecta (Brittle Bone Disease); Cutis Laxa; Stickler Syndrome; Pseudoxanthoma Elasticum; Alport Syndrome.

**Hereditary Cancer Predisposition Syndromes** Hereditary Breast and Ovarian Cancer Syndrome (BRCA1, BRCA2); Lynch Syndrome (MLH1, MSH2, MSH6, PMS2); Familial Adenomatous Polyposis (APC Mutation); Li–Fraumeni Syndrome (TP53 Mutation); Multiple Endocrine Neoplasia Types 1, 2A, 2B; Von Hippel–Lindau Disease; Cowden Syndrome (PTEN Hamartoma Tumor Syndrome); Peutz–Jeghers Syndrome; Nevoid Basal Cell Carcinoma Syndrome (Gorlin Syndrome); Retinoblastoma (RB1 Mutation); Wilms Tumor Predisposition (WT1).

# Inherited Diseases

*Classification:* The first groups show the most common inheritance pattern. The later clinical categories overlap, and several conditions have rare alternate patterns or genetically heterogeneous forms.

**Autosomal Dominant** Achondroplasia; Autosomal Dominant Polycystic Kidney Disease (ADPKD); Familial Adenomatous Polyposis; Familial Hypercholesterolemia; Hereditary Angioedema (most forms); Huntington Disease; Marfan Syndrome; Multiple Endocrine Neoplasia; Neurofibromatosis Type 1; Neurofibromatosis Type 2; Tuberous Sclerosis Complex; Von Hippel–Lindau Disease.

**Autosomal Recessive** Alpha-Thalassemia; Beta-Mannosidosis; Beta-Thalassemia; Congenital Adrenal Hyperplasia; Cystic Fibrosis; Familial Mediterranean Fever; Gaucher Disease; Hemochromatosis; Phenylketonuria (PKU); Sickle-Cell Disease; Spinal Muscular Atrophy; Tay–Sachs Disease; Wilson Disease.

**X-Linked** Becker Muscular Dystrophy; Duchenne Muscular Dystrophy; Fragile X Syndrome; Glucose-6-Phosphate Dehydrogenase (G6PD) Deficiency; Hemophilia A; Hemophilia B; X-Linked Agammaglobulinemia.

**Variable or Genetically Heterogeneous** Alport Syndrome (X-linked, autosomal dominant, or autosomal recessive); Charcot–Marie–Tooth Disease (multiple inheritance patterns); Hereditary Spherocytosis (usually autosomal dominant, sometimes autosomal recessive); Retinitis Pigmentosa (autosomal dominant, autosomal recessive, X-linked, or mitochondrial); Von Willebrand Disease (usually autosomal dominant, with some autosomal recessive forms).

**Mitochondrial** MELAS; MERRF; Leber Hereditary Optic Neuropathy (LHON).

**Inherited Metabolic Disorders** Maple Syrup Urine Disease; Galactosemia; Homocystinuria; Glycogen Storage Diseases; Lysosomal Storage Diseases; Urea-Cycle Disorders.

**Inherited Neurological or Neuromuscular Disorders** Charcot–Marie–Tooth Disease; Spinal Muscular Atrophy; Hereditary Spastic Paraplegia; Friedreich Ataxia.

**Inherited Blood Disorders** Sickle-Cell Disease; Alpha-Thalassemia; Beta-Thalassemia; Hereditary Spherocytosis; Hemophilia A; Hemophilia B; some forms of Von Willebrand Disease.

**Inherited Connective-Tissue or Skeletal Disorders** Osteogenesis Imperfecta; Ehlers–Danlos Syndromes; Marfan Syndrome; Achondroplasia.

**Inherited Renal Disorders** Alport Syndrome; Autosomal Dominant Polycystic Kidney Disease (ADPKD); Autosomal Recessive Polycystic Kidney Disease (ARPKD); Cystinuria.

**Inherited Eye Disorders** Retinitis Pigmentosa; Stargardt Disease; congenital color-vision deficiencies; some forms of congenital cataract.

**Hereditary Cancer Syndromes** Lynch Syndrome; Familial Adenomatous Polyposis; Hereditary Breast and Ovarian Cancer Syndrome; Multiple Endocrine Neoplasia (MEN) Syndromes; Li–Fraumeni Syndrome; Von Hippel–Lindau Disease.

# Common Symptoms

*Scope:* For a medical dictionary or disease-reference project, symptoms are best organized by body system, because a flat alphabetical list quickly becomes difficult to use. Here is a broad list of common medical symptoms.

**General / Systemic** Fatigue; Weakness; Malaise; Fever; Chills; Night Sweats; Excessive Sweating; Hot Flashes; Flushing; Loss of Appetite; Increased Appetite; Unexplained Weight Loss; Unexplained Weight Gain; Excessive Thirst; Dehydration; Exercise Intolerance; Lethargy; Generalized Body Aches.

**Pain** Headache; Chest Pain; Pleuritic Chest Pain; Abdominal Pain; Cramping or Colicky Pain; Back Pain; Neck Pain; Joint Pain; Muscle Pain; Bone Pain; Pelvic Pain; Flank Pain; Facial Pain; Eye Pain; Earache; Sore Throat; Toothache; Painful Urination; Rectal Pain; Burning Pain; Radiating Pain; Throbbing Pain.

**Neurological** Dizziness; Vertigo; Fainting; Light-Headedness; Orthostatic Lightheadedness; Numbness; Tingling; Burning Sensation; Electric Shock Sensations; Tremor; Muscle Weakness; Paralysis; Seizures; Confusion; Memory Problems; Forgetfulness; Difficulty Concentrating; Brain Fog; Loss of Balance; Poor Coordination; Slurred Speech; Altered Consciousness; Aura.

**Eye / Vision** Blurred Vision; Double Vision; Loss of Vision; Reduced Visual Acuity; Night Blindness; Eye Redness; Watery Eyes; Dry Eyes; Gritty or Foreign-Body Sensation; Eye Strain; Itchy Eyes; Photophobia; Floaters; Flashes of Light; Halos Around Lights; Sensitivity to Glare.

**Ear / Hearing** Hearing Loss; Tinnitus; Ear Discharge; Ear Fullness; Ear Pain; Sensitivity to Sound; Popping or Clicking in Ears.

**Nose / Sinus** Runny Nose; Nasal Congestion; Sneezing; Nosebleed; Loss of Smell; Reduced Smell; Sinus Pressure; Postnasal Drip; Frequent Throat Clearing.

**Mouth / Throat** Dry Mouth; Mouth Ulcers; Bad Breath; Altered Taste; Loss of Taste; Bleeding Gums; Hoarseness; Sore Throat; Difficulty Swallowing; Painful Swallowing; Lump in Throat; Burning Mouth Sensation.

**Respiratory** Cough; Dry Cough; Productive Cough; Coughing up Blood; Shortness of Breath; Shortness of Breath on Exertion; Wheezing; Rapid Breathing; Noisy Breathing; Sputum Production; Chest Tightness; Air Hunger; Choking Sensation; Inability to Take a Deep Breath.

**Cardiovascular** Palpitations; Rapid Heartbeat; Slow Heartbeat; Irregular Heartbeat; Heart Fluttering; Chest Pressure; Chest Squeezing; Shortness of Breath on Exertion; Orthopnea; Paroxysmal Nocturnal Dyspnea; Fainting; Ankle or Leg Swelling; Cold Extremities; Intermittent Claudication; Cyanosis.

**Gastrointestinal** Nausea; Vomiting; Vomiting Blood; Heartburn; Acid Regurgitation; Indigestion; Bloating; Abdominal Distension; Abdominal Cramps; Excessive Gas; Belching; Difficulty Passing Gas; Diarrhea; Constipation; Straining at Stool; Tenesmus; Blood in Stool; Black or Tarry Stool; Mucus in Stool; Fecal Urgency; Fecal Incontinence; Early Satiety; Anal Itching.

**Urinary** Frequent Urination; Urinary Urgency; Painful Urination; Excessive Urination; Reduced Urination; Inability to Urinate; Urinary Hesitancy; Post-Void Dribbling; Nighttime Urination; Blood in Urine; Urinary Incontinence; Weak Urinary Stream; Bladder Spasms; Foamy Urine.

---

**Musculoskeletal** Joint Stiffness; Morning Stiffness; Joint Swelling; Reduced Range of Motion; Joint Clicking or Grating; Joint Instability or Giving Way; Muscle Cramps; Muscle Spasms; Muscle Stiffness; Muscle Twitches; Restless Legs Sensation; Limb Pain; Difficulty Walking; Limping.

**Skin** Itching; Rash; Redness; Dry Skin; Scaling or Flaking; Skin Discoloration; Bruising; Easy Bruisability; Swelling; Hives; Blisters; Skin Ulcers; Lumps; Excessive Sweating; Reduced Sweating; Hair Loss; Hair Shedding; Brittle Nails; Crawling Sensation on Skin; Skin Tenderness.

**Endocrine / Metabolic** Excessive Thirst; Excessive Hunger; Frequent Urination; Heat Intolerance; Cold Intolerance; Unexplained Weight Change; Excessive Sweating; Hot Flashes.

**Sleep-Related** Insomnia; Difficulty Falling Asleep; Difficulty Staying Asleep; Frequent Awakening; Early Morning Awakening; Non-Restorative Sleep; Excessive Daytime Sleepiness; Snoring; Gasping in Sleep; Restless Sleep; Nightmares; Sleepwalking.

**Psychological / Behavioral** Anxiety; Depressed Mood; Irritability; Agitation; Mood Changes; Loss of Interest or Pleasure; Poor Concentration; Racing Thoughts; Restlessness; Sleep Disturbance; Appetite Changes; Feeling Detached.

**Reproductive / Gynecological** Pelvic Pain; Painful Menstruation; Heavy Menstrual Bleeding; Irregular Menstruation; Missed Periods; Vaginal Discharge; Vaginal Bleeding; Bleeding Between Periods; Vaginal Itching; Painful Intercourse; Hot Flashes.

**Male Reproductive** Erectile Dysfunction; Reduced Libido; Testicular Pain; Testicular Swelling; Penile Discharge; Painful Ejaculation; Scrotal Heaviness.

**Blood / Lymphatic** Easy Bruising; Prolonged Bleeding; Pale Skin; Swollen Lymph Nodes; Recurrent Infections; Petechiae.

**Allergic** Itching; Sneezing; Watery Eyes; Nasal Congestion; Hives; Facial Swelling; Lip or Tongue Swelling; Wheezing; Shortness of Breath; Anaphylactic Reactions Sensation.

*Clinical Note:* For a comprehensive medical dictionary, it is essential to distinguish symptoms (subjective experiences reported by the patient, such as nausea or pain) from clinical signs (objectively observed physical findings detected on examination, such as jaundice, edema, or tachycardia). Mixing them is common in general health lists, but an authoritative reference maintains clear separation among Symptoms, Clinical Signs, Syndromes, and Diseases/Disorders categories.

# Clinical Signs

*Scope:* A clinical sign is an objective abnormality that can be observed, measured, elicited, or detected by a clinician, unlike a symptom, which is experienced and reported by the patient. For a medical dictionary, the following system-based classification is useful.

**General / Vital Signs** Fever; Hypothermia; Tachycardia; Bradycardia; Tachypnea; Bradypnea; Hypertension; Hypotension; Orthostatic Hypotension; Pulsus Paradoxus; Wide Pulse Pressure; Narrow Pulse Pressure; Hypoxemia; Central Cyanosis; Peripheral Cyanosis; Altered Level of Consciousness; Cachexia; Pallor; Jaundice; Dehydration; Pitting Edema; Non-Pitting Edema; Generalized Lymphadenopathy; Clubbing.

**Skin Signs** Erythema; Pallor; Cyanosis; Jaundice; Petechiae; Purpura; Ecchymosis; Spider Angiomas; Palmar Erythema; Splinter Hemorrhages; Osler Nodes; Janeway Lesions; Rash; Urticaria; Vesicles; Bullae; Pustules; Papules; Nodules; Ulcers; Scaling; Excoriations; Lichenification; Skin Thickening; Hyperpigmentation; Hypopigmentation; Alopecia; Diaphoresis; Reduced Skin Turgor.

**Head & Face Signs** Facial Asymmetry; Facial Edema; Ptosis; Proptosis; Moon Facies; Mask-Like Facies; Temporal Wasting; Kayser-Fleischer Rings; Arcus Senilis; Xanthelasma; Subconjunctival Hemorrhage.

**Eye Signs** Conjunctival Pallor; Conjunctival Injection; Scleral Icterus; Anisocoria; Nystagmus; Strabismus; Ptosis; Proptosis; Papilledema; Absent Pupillary Reflex; Abnormal Red Reflex; Corneal Opacity; Roth Spots; Argyll Robertson Pupil.

**Ear, Nose & Throat Signs** Tympanic Membrane Erythema; Tympanic Membrane Perforation; Otorrhea; Nasal Polyps; Epistaxis; Tonsillar Enlargement; Tonsillar Exudate; Pharyngeal Erythema; Oral Ulcers; Oral Thrush; Strawberry Tongue; Coated Tongue; Koplik Spots; Gingival Hyperplasia; Peritonsillar Bulge; Deviated Uvula.

**Neck Signs** Cervical Lymphadenopathy; Goiter; Thyroid Nodule; Neck Stiffness; Elevated Jugular Venous Pressure; Carotid Bruit; Tracheal Deviation; Pemberton Sign.

**Cardiovascular Signs** Tachycardia; Bradycardia; Irregular Pulse; Weak Pulse; Bounding Pulse; Pulsus Alternans; Corrigan Pulse; Water-Hammer Pulse; Pulse Deficit; Displaced Apex Beat; Heart Murmur; Systolic Murmur; Diastolic Murmur; Gallop Rhythm; Third Heart Sound; Fourth Heart Sound; Pericardial Friction Rub; Cardiac Thrill; Ventricular Heave; Elevated Jugular Venous Pressure; Peripheral Edema; Delayed Capillary Refill.

**Respiratory Signs** Tachypnea; Bradypnea; Apnea; Cyanosis; Accessory-Muscle Use; Nasal Flaring; Chest Retractions; Barrel Chest; Pectus Excavatum; Pectus Carinatum; Asymmetric Chest Expansion; Subcutaneous Emphysema; Reduced Air Entry; Wheezing; Crackles; Rhonchi; Stridor; Bronchial Breath Sounds; Dullness to Percussion; Hyperresonance; Pleural Friction Rub.

**Abdominal & Gastrointestinal Signs** Abdominal Distension; Abdominal Tenderness; Guarding; Rigidity; Rebound Tenderness; Shifting Dullness; Fluid Wave; Caput Medusae; Palpable Abdominal Mass; Hepatomegaly; Splenomegaly; Ascites; Succussion Splash; Abnormal Bowel Sounds; Abdominal Bruit; Visible Peristalsis; Rectal Bleeding; Melena.

---

**Neurological Signs** Altered Consciousness; Disorientation; Abnormal Gait; Festinating Gait; Spastic Hemiplegic Gait; Ataxia; Tremor; Asterixis; Fasciculations; Muscle Wasting; Pronator Drift; Cogwheel Rigidity; Lead-Pipe Rigidity; Abnormal Muscle Tone; Hyperreflexia; Hyporeflexia; Areflexia; Pathological Reflexes; Clonus; Dysmetria; Dysdiadochokinesia; Sensory Deficit; Motor Weakness on Examination; Cranial Nerve Deficit; Nystagmus; Neck Rigidity.

**Musculoskeletal Signs** Joint Swelling; Joint Deformity; Joint Effusion; Restricted Range of Motion; Crepitus; Muscle Wasting; Muscle Spasm; Heberden Nodes; Bouchard Nodes; Swan-Neck Deformity; Boutonniere Deformity; Baker Cyst; Limb Deformity; Abnormal Posture; Scoliosis; Kyphosis; Lordosis; Abnormal Gait.

**Renal & Urinary Signs** Bladder Distension; Costovertebral-Angle Tenderness; Peripheral Edema; Hematuria on Testing; Proteinuria; Oliguria; Anuria.

**Endocrine Signs** Goiter; Exophthalmos; Tremor; Abnormal Hair Distribution; Hirsutism; Striae; Acanthosis Nigricans; Moon Facies; Buffalo Hump; Peripheral Edema.

**Hematological Signs** Pallor; Petechiae; Purpura; Ecchymoses; Generalized Lymphadenopathy; Splenomegaly; Hepatomegaly; Active Bleeding.

**Peripheral Vascular Signs** Peripheral Edema; Pitting Edema; Varicose Veins; Absent or Diminished Peripheral Pulses; Cool Extremities; Delayed Capillary Refill; Venous Ulcers; Arterial Ulcers; Peripheral Cyanosis.

**Gynecological Signs** Abnormal Vaginal Bleeding on Examination; Vaginal or Cervical Discharge; Cervical Lesions; Pelvic Mass; Uterine Enlargement; Adnexal Mass; Cervical-Motion Tenderness; Chandelier Sign.

**Male Genital Signs** Testicular Swelling; Testicular Mass; Scrotal Edema; Penile Discharge; Genital Ulceration; Phimosis; Hydrocele; Varicocele.

**Pediatric & Neonatal Signs** Poor Weight Gain on Growth Charts; Growth Retardation; Bulging Fontanelle; Sunken Fontanelle; Neonatal Jaundice; Central Cyanosis; Chest Retractions; Abnormal Primitive Reflexes; Gowers Sign.

**Named Clinical Signs** Babinski Sign; Murphy Sign; Kernig Sign; Brudzinski Sign; Rovsing Sign; Cullen Sign; Grey Turner Sign; Trousseau Sign; Chvostek Sign; Romberg Sign; Hoffmann Sign; Courvoisier Sign; Kussmaul Sign; Battle Sign; Nikolsky Sign; Auspitz Sign; Ortolani Sign; Barlow Sign; Trendelenburg Sign; McBurney Sign; Tinel Sign; Phalen Sign; Lhermitte Sign; Blumberg Sign; Kehr Sign; Hamman Sign; Homans Sign; Psoas Sign; Obturator Sign; Lachman Sign; Anterior Drawer Sign.

*Clinical Note:* A comprehensive medical reference can contain 500–1,000+ clinical signs, encompassing physical examination findings, named signs, dermatological signs, radiological signs, and laboratory markers.

# Common Congenital Anomalies

*Scope:* A congenital anomaly is a structural abnormality present at birth, whether genetic, chromosomal, or environmental in origin. This list complements the appendices of Common Diseases, Common Disorders, and Common Syndromes.

**Orofacial & Head Anomalies** Cleft Lip; Cleft Palate.

**Neural Tube & Brain Anomalies** Spina Bifida; Anencephaly; Encephalocele; Hydrocephalus.

**Thorax & Abdominal Wall Anomalies** Congenital Diaphragmatic Hernia; Omphalocele; Gastroschisis.

**Digestive System Anomalies** Imperforate Anus; Hirschsprung Disease.

**Urinary & Genital Anomalies** Hypospadias; Epispadias.

**Limb & Skeletal Anomalies** Clubfoot; Developmental Dysplasia of the Hip; Polydactyly; Syndactyly.

**Eye Anomalies** Congenital Cataract.

**Heart & Great-Vessel Anomalies** Congenital Heart Defects; Ventricular Septal Defect; Atrial Septal Defect; Patent Ductus Arteriosus; Tetralogy of Fallot; Coarctation of the Aorta.

# Common Findings, Lesions & Conditions

*Scope:* This companion list collects clinical findings, structural lesions, symptom patterns, and obstetric events that are not diseases in themselves but are frequently encountered in clinical work, imaging, and laboratory testing. It complements the appendices of Common Diseases, Common Disorders, and Common Syndromes.

**Cardiovascular & Respiratory Findings** Pericardial Effusion; Pleural Effusion; Pneumothorax; Hemothorax; Atelectasis.

**Abdominal & Pancreatic Findings** Esophageal Varices; Gallstones; Biliary Obstruction; Cholestasis; Pancreatic Pseudocyst; Pancreatic Cysts; Pancreatic Necrosis.

**Renal & Urinary Findings** Kidney Stones; Hydronephrosis.

**Head, Neck & Airway Findings** Thyroid Nodules; Nasal Polyps; Deviated Nasal Septum; Vocal-Cord Nodules; Earwax Impaction; Tympanic Membrane Perforation.

**Oral & Dental Findings** Tooth Erosion; Impacted Teeth; Malocclusion; Geographic Tongue.

**Eye & Skin Findings** Chalazion; Stye; Keloids; Ingrown Toenail.

**Genital & Reproductive Findings** Ovarian Cysts; Bartholin Cyst; Varicocele; Hydrocele; Spermatocoele.

**Pain & Symptom Conditions** Low-Back Pain; Sciatica.

**Metabolic Risk & Allergic States** Prediabetes; Anaphylaxis.

**Obstetric & Labor Events** Ectopic Pregnancy; Miscarriage; Recurrent Pregnancy Loss; Placenta Previa; Placental Abruption; Placenta Accreta Spectrum; Premature Rupture of Membranes; Preterm Labor; Fetal Growth Restriction; Obstructed Labor; Postpartum Hemorrhage.

# Common Injuries, Poisoning & Environmental Conditions

*Scope:* This companion list covers injuries (trauma), poisoning and envenomation, and adverse effects of environmental exposure and extremes. These are events or conditions rather than diseases; it complements the appendices of Common Diseases, Common Disorders, and Common Syndromes.

**Bone, Joint & Muscle Injuries** Fracture; Dislocation; Sprain; Strain.

**Skin & Soft-Tissue Injuries** Contusion; Laceration; Abrasion; Crush Injury.

**Nervous-System Injuries** Traumatic Brain Injury; Concussion; Spinal-Cord Injury.

**Thermal & Electrical Injuries** Burns; Electrical Injury; Hypothermia; Frostbite; Heat Exhaustion; Heatstroke.

**Environmental Conditions** Drowning; Dehydration; Altitude Sickness; Motion Sickness.

**Poisoning & Envenomation** Carbon Monoxide Poisoning; Lead Poisoning; Mercury Poisoning; Arsenic Poisoning; Pesticide Poisoning; Snakebite; Scorpion Sting.

**Drug & Alcohol Overdose** Drug Overdose; Alcohol Poisoning.

# Conditions That May Be Asymptomatic

*Scope:* This reference list groups diseases, infections, and other conditions that may be present without noticeable symptoms, particularly during early, latent, or compensated stages. Being asymptomatic is a clinical state or mode of presentation rather than a separate category of disease, so every condition here also belongs under its usual organ-system or specialty heading, and “May be asymptomatic” is best treated as an attribute or tag in addition to that classification. Many of these conditions cause symptoms in some people and none in others, and some come to attention only through screening or when a complication appears. The list is a curated, high-importance reference rather than a prevalence ranking, and some conditions appear under more than one heading where they are clinically relevant to several systems. Individual symptoms, signs, and laboratory findings are defined as dictionary entries rather than listed here.

**Important distinction:** “Asymptomatic disease” is not a distinct disease; it describes how a disease presents. Hypertension is a cardiovascular disease that is often asymptomatic, chlamydia is an infection that is frequently asymptomatic, osteoporosis is a skeletal disease that is typically asymptomatic until a fracture, and open-angle glaucoma is an eye disease that is often asymptomatic in its early stages.

**Cardiovascular** Hypertension; Atherosclerosis; Coronary Artery Disease; Peripheral Artery Disease; Some Arrhythmias; Early Valvular Heart Disease

**Metabolic & Endocrine** Prediabetes; Early Type 2 Diabetes; Dyslipidemia; Subclinical Hypothyroidism; Subclinical Hyperthyroidism; Hyperuricemia

**Kidney & Urinary** Early Chronic Kidney Disease; Diabetic Kidney Disease; Mild Proteinuria; Microscopic Hematuria; Some Kidney Stones

**Liver** Metabolic Dysfunction-Associated Steatotic Liver Disease (MASLD); Chronic Hepatitis B; Chronic Hepatitis C; Early Cirrhosis; Hemochromatosis

**Infectious** HIV Infection During Clinical Latency; Hepatitis B; Hepatitis C; Chlamydia; Gonorrhea; HPV Infection; Latent Tuberculosis Infection; Some COVID-19 Infections

**Cancer & Precancer** Early Colorectal Cancer; Cervical Precancer; Early Cervical Cancer; Early Prostate Cancer; Early Kidney Cancer; Some Thyroid Cancers; Early Breast Cancer

**Gynecological** HPV Infection; Some Ovarian Cysts; Uterine Fibroids; Early Cervical Abnormalities; Some Sexually Transmitted Infections

**Male Reproductive** Early Prostate Cancer; Some Sexually Transmitted Infections; Varicocele; Some Cases of Benign Prostatic Enlargement

**Blood** Mild Anemia; Monoclonal Gammopathy of Undetermined Significance (MGUS); Early Chronic Leukemia; Mild Thrombocytopenia

**Bone** Osteoporosis; Osteopenia

**Eye** Open-Angle Glaucoma; Early Diabetic Retinopathy; Early Age-Related Macular Degeneration

---

**Neurological & Vascular** Silent Cerebral Infarction; Asymptomatic Carotid Stenosis; Some Unruptured Intracranial Aneurysms

**Gastrointestinal** Diverticulosis; Colon Polyps; Some Gallstones; Some Hiatal Hernias

**Gallbladder** Asymptomatic Gallstones (“Silent Gallstones”); Gallbladder Polyps

**Genetic** Hemochromatosis Before Organ Damage; Some Inherited Thrombophilias; Some Genetic Carrier States

**Parasitic & Latent Infections** Some Malaria Infections; Intestinal Parasitic Infections; Toxoplasmosis and Other Latent Infections

# Lay Language Medical Terms

| Lay term                | Medical term                       | Lay-language explanation                                                                         |
|-------------------------|------------------------------------|--------------------------------------------------------------------------------------------------|
| Belly area              | ABDOMEN/ABDOMINAL                  | The body cavity below the diaphragm containing the stomach, intestines, liver, and other organs. |
| Take in                 | ABSORB                             | To take up or take in a substance, such as fluid.                                                |
| Too much acid in blood  | ACIDOSIS                           | A condition in which the blood is more acidic than normal.                                       |
| Sharpness or clarity    | ACUITY                             | The clearness or keenness of a sense, especially vision.                                         |
| Recent or sudden        | ACUTE                              | New, recent, sudden, or requiring urgent attention.                                              |
| Swollen glands          | ADENOPATHY                         | Enlarged or swollen lymph nodes.                                                                 |
| Helpful added treatment | ADJUVANT                           | Something that supports or assists the main treatment.                                           |
| Added treatment         | ADJUVANT TREATMENT                 | Treatment given in addition to the main or standard treatment.                                   |
| Germ-killing drug       | ANTIBIOTIC                         | A drug used to kill or control bacteria and some other germs.                                    |
| Germ-killing treatment  | ANTIMICROBIAL                      | A substance or treatment that acts against microorganisms such as bacteria, fungi, or parasites. |
| Antiviral drug          | ANTIRETROVIRAL                     | A drug that slows or stops the growth of certain viruses.                                        |
| Side effect             | ADVERSE EFFECT                     | An unwanted or harmful response to a treatment or medicine.                                      |
| Walking                 | AMBULATE/AMBULATION/<br>AMBULATORY | To walk, or to be able to walk.                                                                  |
| Severe allergy          | ANAPHYLAXIS                        | A serious, potentially life-threatening allergic reaction.                                       |
| Low red-cell count      | ANEMIA                             | A reduced number of red blood cells or a low red-cell blood count.                               |
| Numbing medicine        | ANESTHETIC                         | A drug or agent that reduces or removes the feeling of pain, sometimes by causing sleep.         |
| Heart pain              | ANGINA                             | Chest pain caused by inadequate blood flow to the heart muscle.                                  |
| Heart pain              | ANGINA PECTORIS                    | Another medical term for chest pain caused by reduced blood flow to the heart.                   |
| Loss of appetite        | ANOREXIA                           | Lack of appetite or, in some contexts, a disorder involving refusal to eat.                      |

| Lay term                          | Medical term                 | Lay-language explanation                                                             |
|-----------------------------------|------------------------------|--------------------------------------------------------------------------------------|
| Inner elbow area                  | ANTECUBITAL                  | Relating to the inner side of the elbow or forearm.                                  |
| Protective protein                | ANTIBODY                     | A protein made by the body in response to a foreign substance.                       |
| Seizure-prevention drug           | ANTICONVULSANT               | A medicine used to prevent or control seizures.                                      |
| Cholesterol-lowering drug         | ANTILIPEMIC                  | A drug that lowers fat or cholesterol levels in the blood.                           |
| Cough medicine                    | ANTITUSSIVE                  | A medicine used to reduce coughing.                                                  |
| Irregular heartbeat               | ARRHYTHMIA                   | Any abnormal change in the normal heartbeat or rhythm.                               |
| Breathing material into the lungs | ASPIRATION                   | Entry of fluid, food, or other material into the lungs, often after vomiting.        |
| Laboratory test                   | ASSAY                        | A laboratory test used to measure or identify something.                             |
| Check or evaluate                 | ASSESS                       | To examine, measure, evaluate, or look at something carefully.                       |
| Asthma                            | ASTHMA                       | A lung disease in which narrowed or tightened airways make breathing difficult.      |
| Without symptoms                  | ASYMPTOMATIC                 | Having no noticeable symptoms.                                                       |
| Armpit                            | AXILLA                       | The armpit area.                                                                     |
| Not cancerous                     | BENIGN                       | Not malignant and generally not cancerous.                                           |
| Twice daily                       | BID                          | Prescription shorthand meaning twice a day.                                          |
| Carried or stuck together         | BINDING/BOUND                | Carried by something, or made to stick or join together.                             |
| Drug availability                 | BIOAVAILABILITY              | The amount or proportion of a drug that becomes available for the body to use.       |
| Series of blood tests             | BLOOD PROFILE                | A group or panel of blood tests.                                                     |
| Large dose at once                | BOLUS                        | A relatively large amount given all at one time.                                     |
| Amount of mineral in bone         | BONE MASS                    | The amount of calcium and other minerals in a given amount of bone.                  |
| Slow irregular heartbeats         | BRADYARRHYTHMIAS             | Slow heart rhythms that may also be irregular.                                       |
| Slow heartbeat                    | BRADYCARDIA                  | A slower-than-usual heartbeat.                                                       |
| Narrowed airways                  | BRONCHOSPASM                 | Breathing difficulty caused by tightening of the airway muscles.                     |
| Cancer-causing                    | CARCINOGENIC                 | Capable of causing cancer.                                                           |
| Cancer type                       | CARCINOMA                    | A cancer that begins in lining or covering cells of the body.                        |
| Related to the heart              | CARDIAC                      | Relating to the heart.                                                               |
| Resetting the heartbeat           | CARDIOVERSION                | Restoring a normal heart rhythm, often with a controlled electrical shock.           |
| Tube                              | CATHETER                     | A thin tube used to give or remove fluids, or to perform certain medical procedures. |
| Epidural tube                     | CATHETER                     | A catheter placed near the spinal cord to deliver anesthesia during surgery.         |
| Brain and spinal cord             | CENTRAL NERVOUS SYSTEM (CNS) | The brain and spinal cord.                                                           |
| Brain injury                      | CEREBRAL TRAUMA              | Damage to the brain caused by an injury.                                             |
| Stopping                          | CESSATION                    | The act of stopping something.                                                       |
| Coronary heart disease            | CHD                          | Disease of the blood vessels that supply the heart.                                  |
| Cancer drug treatment             | CHEMOTHERAPY                 | Treatment of disease, usually cancer, with chemical medicines.                       |

| Lay term                      | Medical term          | Lay-language explanation                                                                         |
|-------------------------------|-----------------------|--------------------------------------------------------------------------------------------------|
| Long-lasting                  | CHRONIC               | Continuing for a long time or ongoing.                                                           |
| Related to patient care       | CLINICAL              | Pertaining to medical care or the care of patients.                                              |
| Human research study          | CLINICAL TRIAL        | A research study involving human participants.                                                   |
| Unconscious state             | COMA                  | A prolonged state of unconsciousness in which a person cannot be awakened normally.              |
| All disease gone              | COMPLETE RESPONSE     | Total disappearance of the detectable disease being treated.                                     |
| Present from birth            | CONGENITAL            | Present before or at birth.                                                                      |
| Pink, irritated eye           | CONJUNCTIVITIS        | Redness and irritation of the thin membrane covering the eye.                                    |
| Treatment to keep improvement | CONSOLIDATION PHASE   | A treatment phase intended to make a remission last, usually after initial treatment.            |
| Comparison study              | CONTROLLED TRIAL      | A study comparing an experimental treatment with a standard or control treatment.                |
| Research partnership          | COOPERATIVE GROUP     | An association of institutions that work together on clinical research.                          |
| Related to heart arteries     | CORONARY              | Relating to the heart or the blood vessels that supply it.                                       |
| Computerized X-ray scan       | CT SCAN (CAT)         | A series of computer-processed X-ray images that show sections of the body.                      |
| Germ-growth test              | CULTURE               | A test that grows or detects organisms that may cause infection.                                 |
| Added together                | CUMULATIVE            | Added up from the beginning.                                                                     |
| Related to the skin           | CUTANEOUS             | Relating to the skin.                                                                            |
| Stroke                        | CVA                   | A stroke, also called a cerebrovascular accident.                                                |
| Related to the skin           | DERMATOLOGIC          | Pertaining to the skin.                                                                          |
| Lower blood-pressure number   | DIASTOLIC             | Relating to the lower blood-pressure number, when the heart relaxes.                             |
| Farther away                  | DISTAL                | Toward the end or away from the center of the body.                                              |
| Water pill                    | DIURETIC              | A drug that increases urination.                                                                 |
| Sound-wave blood-flow test    | DOPPLER               | A device or test using sound waves to assess blood flow.                                         |
| Masked study                  | DOUBLE BLIND          | A study in which neither the participants nor investigators know which treatment is being given. |
| Improper function             | DYSFUNCTION           | A state in which something does not work normally.                                               |
| Abnormal cells                | DYSPLASIA             | Abnormal changes in the size, shape, or organization of cells.                                   |
| Heart sound-wave test         | ECHOCARDIOGRAM        | An ultrasound test that creates pictures of the heart.                                           |
| Swelling from fluid           | EDEMA                 | Excess fluid collecting in body tissues.                                                         |
| Brain-wave test               | EEG                   | A recording of the brain's electrical activity.                                                  |
| Effectiveness                 | EFFICACY              | How well a treatment works under specified conditions.                                           |
| Heart electrical tracing      | ELECTROCARDIOGRAM     | A tracing of the heart's electrical activity, also called an ECG or EKG.                         |
| Mineral imbalance             | ELECTROLYTE IMBALANCE | An abnormal level or balance of minerals in the blood.                                           |
| Vomiting                      | EMESIS                | The act of vomiting.                                                                             |

| Lay term                   | Medical term          | Lay-language explanation                                                                         |
|----------------------------|-----------------------|--------------------------------------------------------------------------------------------------|
| Based on experience        | EMPIRIC               | Based on experience or likely cause rather than definitive test results.                         |
| Viewing inside the body    | ENDOSCOPIC            | Looking inside the body with a lighted tube or camera.                                           |
| Through the intestines     | ENTERAL               | Given through or involving the digestive tract.                                                  |
| Outside the spinal cord    | EPIDURAL              | Located outside the spinal cord covering, or medicine given into that space.                     |
| Remove completely          | ERADICATE             | To get rid of a disease, infection, or other problem.                                            |
| Examined                   | EVALUATED, ASSESSED   | Examined or checked for a medical condition.                                                     |
| Fast ethics review         | EXPEDITED REVIEW      | A rapid research-protocol review allowed for certain lower-risk studies.                         |
| Outside the body           | EXTERNAL              | Located or occurring outside the body.                                                           |
| Leak out                   | EXTRAVASATE           | To leak outside the intended area, such as from a blood vessel into nearby tissue.               |
| U.S. drug agency           | FDA                   | The U.S. Food and Drug Administration, which regulates medicines and medical products.           |
| Scar-like                  | FIBROUS               | Containing many fibers, often resembling scar tissue.                                            |
| Irregular quivering        | FIBRILLATION          | Very rapid, uncoordinated activity of the heart or another muscle.                               |
| Being put fully to sleep   | GENERAL ANESTHESIA    | Use of medicines to cause unconsciousness and prevent pain during a procedure.                   |
| Related to pregnancy       | GESTATIONAL           | Pertaining to pregnancy.                                                                         |
| Red-cell percentage        | HEMATOCRIT            | The proportion of blood made up of red blood cells.                                              |
| Bruise or blood collection | HEMATOMA              | A collection of blood under the skin or in a tissue, often appearing as a bruise.                |
| Blood-flow measurement     | HEMODYNAMIC MEASURING | Measuring blood flow and circulation.                                                            |
| Red-cell breakdown         | HEMOLYSIS             | Breakdown or destruction of red blood cells.                                                     |
| Heparin tube or port       | HEPARIN LOCK          | An intravenous access device kept open with a prescribed solution, sometimes containing heparin. |
| Liver tumor                | HEPATOMA              | A tumor of the liver, often referring to hepatocellular carcinoma.                               |
| Inherited disease          | HERITABLE DISEASE     | A disease that can be passed through genes to future children.                                   |
| Tissue-disease examination | HISTOPATHOLOGIC       | Relating to examination of tissues or cells for disease.                                         |
| Portable heart monitor     | HOLTER MONITOR        | A portable device that records heartbeats, usually for a day or longer.                          |
| High blood calcium         | HYPERCALCEMIA         | An abnormally high calcium level in the blood.                                                   |
| High blood potassium       | HYPERKALEMIA          | An abnormally high potassium level in the blood.                                                 |
| High blood sodium          | HYPERNATREMIA         | An abnormally high sodium level in the blood.                                                    |
| High blood pressure        | HYPERTENSION          | Blood pressure that is higher than recommended.                                                  |
| Low blood calcium          | HYPOCALCEMIA          | An abnormally low calcium level in the blood.                                                    |
| Low blood potassium        | HYPOKALEMIA           | An abnormally low potassium level in the blood.                                                  |
| Low blood sodium           | HYPONATREMIA          | An abnormally low sodium level in the blood.                                                     |
| Low blood pressure         | HYPOTENSION           | Blood pressure that is lower than expected.                                                      |
| Low blood oxygen           | HYPOXEMIA             | A low level of oxygen in the blood.                                                              |
| Low tissue oxygen          | HYPOXIA               | Too little oxygen reaching body tissues.                                                         |

| Lay term                         | Medical term                   | Lay-language explanation                                                                             |
|----------------------------------|--------------------------------|------------------------------------------------------------------------------------------------------|
| Removal of the uterus            | HYSTERECTOMY                   | Surgical removal of the uterus; the ovaries and other structures may or may not also be removed.     |
| Treatment-caused                 | IATROGENIC                     | Caused by medical treatment or a healthcare procedure.                                               |
| Device research permission       | IDE                            | Permission to study an unapproved medical device in people.                                          |
| Cause unknown                    | IDIOPATHIC                     | Having no known cause.                                                                               |
| Body protection                  | IMMUNITY                       | The body's defense against infection or other foreign substances.                                    |
| Antibody protein                 | IMMUNOGLOBIN                   | A protein involved in making antibodies and immune defense; the standard spelling is immunoglobulin. |
| Immune-suppressing               | IMMUNOSUPPRESSIVE              | A drug or treatment that reduces the body's immune response.                                         |
| Immune-based treatment           | IMMUNOTHERAPY                  | Treatment that uses or changes the immune system, often against cancer or immune disease.            |
| Abnormal function                | IMPAIRED FUNCTION              | Function that is reduced or not working normally.                                                    |
| Placed inside the body           | IMPLANTED                      | Surgically or otherwise placed inside the body.                                                      |
| New-drug research permission     | IND                            | Authorization to test an unapproved new drug in people.                                              |
| Hardening                        | INDURATION                     | An area that has become unusually firm or hard.                                                      |
| Left in place                    | INDWELLING                     | Remaining in a particular location, such as a catheter.                                              |
| Dead tissue from poor blood flow | INFARCT                        | Death of tissue caused by inadequate blood supply.                                                   |
| Disease that can spread          | INFECTIOUS DISEASE             | An illness caused by organisms that may spread between people or through other routes.               |
| Swelling and irritation          | INFLAMMATION                   | The body's response to injury or infection, often causing swelling, warmth, redness, or pain.        |
| Slow delivery into the body      | INFUSION                       | Slow delivery of a substance, usually through a vein or catheter.                                    |
| Taking by mouth                  | INGESTION                      | Eating, drinking, or taking something into the body by mouth.                                        |
| Antiviral immune protein         | INTERFERON                     | A medicine or natural protein that helps the body act against viruses.                               |
| On and off                       | INTERMITTENT                   | Occurring repeatedly with pauses between episodes.                                                   |
| Inside the body                  | INTERNAL                       | Located or occurring within the body.                                                                |
| Inside                           | INTERIOR                       | Located on the inside.                                                                               |
| Into a muscle                    | INTRAMUSCULAR                  | Given into a muscle.                                                                                 |
| Into the abdomen                 | INTRAPERITONEAL                | Given into or located within the abdominal cavity.                                                   |
| Into spinal fluid                | INTRATHECAL                    | Given into the fluid space around the spinal cord.                                                   |
| Into a vein                      | INTRAVENOUS (IV)               | Given through a vein.                                                                                |
| Into the bladder                 | INTRAVESICAL                   | Given into the bladder.                                                                              |
| Place a breathing tube           | INTUBATE                       | To place a tube into the airway.                                                                     |
| Breaking the skin                | INVASIVE PROCEDURE             | A procedure that punctures, opens, or cuts the skin or enters the body.                              |
| Unapproved-drug study            | INVESTIGATIONAL NEW DRUG (IND) | A new drug being studied before it has full approval for general use.                                |

| Lay term                      | Medical term           | Lay-language explanation                                                                     |
|-------------------------------|------------------------|----------------------------------------------------------------------------------------------|
| Unproven treatment method     | INVESTIGATIONAL METHOD | A treatment method still being studied and not established as standard care.                 |
| Reduced blood flow            | ISCHEMIA               | Too little blood and oxygen reaching a tissue, usually because blood flow is reduced.        |
| Open abdominal surgery        | LAPAROTOMY             | Surgery using an incision in the abdominal wall to reach the organs inside.                  |
| Abnormal area                 | LESION                 | A wound, injury, or area of abnormal tissue.                                                 |
| Very tired or sleepy          | LETHARGY               | Sleepiness, tiredness, or reduced energy.                                                    |
| Low white-cell count          | LEUKOPENIA             | A lower-than-normal number of white blood cells.                                             |
| Fat                           | LIPID                  | A fat or fat-like substance.                                                                 |
| Amount of fat                 | LIPID CONTENT          | The amount of fat in a substance, tissue, or blood sample.                                   |
| Cholesterol and fat panel     | LIPID PROFILE (PANEL)  | Blood tests measuring fats and cholesterol.                                                  |
| Numbing a small area          | LOCAL ANESTHESIA       | Numbing medicine used to prevent pain in a limited area.                                     |
| Limited to one area           | LOCALIZED              | Restricted to one area.                                                                      |
| Inner space                   | LUMEN                  | The hollow space inside a tube or organ, such as a blood vessel.                             |
| Lymph-vessel X-ray            | LYMPHANGIOGRAPHY       | An X-ray study of lymph vessels or nodes after contrast dye is injected.                     |
| Immune white blood cell       | LYMPHOCYTE             | A type of white blood cell that helps protect against infection.                             |
| Lymph-node cancer             | LYMPHOMA               | A cancer of lymph nodes or related lymphatic tissue.                                         |
| Feeling unwell                | MALAISE                | A vague feeling of illness or bodily discomfort.                                             |
| Not working correctly         | MALFUNCTION            | A condition in which a device, organ, or system does not work properly.                      |
| Cancerous growth              | MALIGNANCY             | A cancer or other tumor capable of growing and spreading.                                    |
| Brain tumor                   | MEDULLABLASTOMA        | A type of tumor that begins in the brain.                                                    |
| Abnormal red-cell development | MEGALOBLASTOSIS        | A change in blood-forming cells that produces unusually large, abnormal red-cell precursors. |
| Break down in the body        | METABOLIZE             | To chemically process or break down a substance in the body.                                 |
| Cancer spread                 | METASTASIS             | Spread of cancer cells from one body part to another.                                        |
| Antibiotic medicine           | METRONIDAZOLE          | A medicine used for certain bacterial and parasitic infections.                              |
| Heart attack                  | MI                     | Myocardial infarction, or death of heart muscle from blocked blood flow.                     |
| Small or slight               | MINIMAL                | Very small or slight.                                                                        |
| Reduce                        | MINIMIZE               | To reduce something as much as possible.                                                     |
| Check or watch                | MONITOR                | To observe, measure, or keep track of something over time.                                   |
| Ease of movement              | MOBILITY               | The ability to move easily.                                                                  |
| Illness or complication       | MORBIDITY              | Illness, disability, or an unwanted result of disease or treatment.                          |
| Death rate or death           | MORTALITY              | Death, or the rate of death in a population.                                                 |
| Ability to move               | MOTILITY               | The ability of a body part, cell, or organism to move.                                       |
| Magnetic body scan            | MRI                    | Pictures of the inside of the body made with magnets and radio waves rather than X-rays.     |

| Lay term                      | Medical term            | Lay-language explanation                                                                        |
|-------------------------------|-------------------------|-------------------------------------------------------------------------------------------------|
| Moist body lining             | MUCOSA, MUCOUS MEMBRANE | The moist lining of the digestive, respiratory, reproductive, and urinary passages.             |
| Muscle aches                  | MYALGIA                 | Pain or aching in the muscles.                                                                  |
| Related to heart muscle       | MYOCARDIAL              | Pertaining to the muscle of the heart.                                                          |
| Heart attack                  | MYOCARDIAL INFARCTION   | Death of heart muscle caused by inadequate blood flow.                                          |
| Nose-to-stomach tube          | NASOGASTRIC TUBE        | A tube passed through the nose into the stomach.                                                |
| U.S. health institute         | NCI                     | The National Cancer Institute.                                                                  |
| Tissue death                  | NECROSIS                | Death of cells or tissue.                                                                       |
| Tumor                         | NEOPLASIA/NEOPLASM      | An abnormal new growth that may be benign or malignant.                                         |
| Nerve-tissue cancer           | NEUROBLASTOMA           | A cancer that develops from immature nerve tissue.                                              |
| Related to the nervous system | NEUROLOGICAL            | Pertaining to the brain, spinal cord, or nerves.                                                |
| Low infection-fighting cells  | NEUTROPENIA             | A decrease in neutrophils, a major type of infection-fighting white blood cell.                 |
| U.S. health agency            | NIH                     | The National Institutes of Health.                                                              |
| Not entering the body         | NONINVASIVE             | Not breaking, cutting, or entering the skin or body.                                            |
| Hospital-acquired             | NOSOCOMIAL              | Acquired during a stay in a healthcare facility.                                                |
| Blockage                      | OCCLUSION               | Closing, blockage, or obstruction.                                                              |
| Cancer specialty              | ONCOLOGY                | The study and treatment of cancer and tumors.                                                   |
| Related to the eye            | OPHTHALMIC              | Pertaining to the eye.                                                                          |
| Best choice                   | OPTIMAL                 | Best, most favorable, or most suitable.                                                         |
| By mouth                      | ORAL ADMINISTRATION     | Giving a medicine through the mouth.                                                            |
| Related to bones              | ORTHOPEDIC              | Pertaining to bones, joints, muscles, or related structures.                                    |
| Rare dense-bone disorder      | OSTEOPETROSIS           | A rare disorder in which bones become unusually dense but may be fragile.                       |
| Weak bones                    | OSTEOPOROSIS            | A condition in which bones lose strength and become more likely to break.                       |
| Female sex glands             | OVARIES                 | The organs that produce eggs and reproductive hormones.                                         |
| Given by injection            | PARENTERAL              | Given by injection rather than through the digestive tract.                                     |
| Open passage                  | PATENCY                 | The condition of being open and unobstructed.                                                   |
| How a disease develops        | PATHOGENESIS            | The process by which a disease or unhealthy condition develops.                                 |
| Through the skin              | PERCUTANEOUS            | Done through or across the skin.                                                                |
| Away from the center          | PERIPHERAL              | At or toward the outer part rather than the center.                                             |
| By mouth                      | PER OS (PO)             | A prescription direction meaning by mouth.                                                      |
| How the body handles a drug   | PHARMACOKINETICS        | The study of how the body absorbs, distributes, changes, and removes a drug.                    |
| First drug-study phase        | PHASE I                 | The first human study phase, usually focused on safety, effects, and dosing.                    |
| Early effectiveness study     | PHASE II                | A study phase examining safety and early evidence of benefit in people with a condition.        |
| Large confirmation study      | PHASE III               | A larger study phase used to confirm safety and effectiveness and identify common side effects. |

| Lay term                     | Medical term      | Lay-language explanation                                                                         |
|------------------------------|-------------------|--------------------------------------------------------------------------------------------------|
| After-approval study         | PHASE IV          | A study performed after approval to monitor safety or examine additional uses.                   |
| Vein irritation              | PHLEBITIS         | Irritation or inflammation of a vein.                                                            |
| Inactive treatment           | PLACEBO           | An inactive substance or treatment that looks like the real treatment.                           |
| Improvement from expectation | PLACEBO EFFECT    | An improvement that occurs after an inactive treatment, often because of expectation or context. |
| Clotting blood particles     | PLATELETS         | Small blood components that help stop bleeding by forming clots.                                 |
| Possible                     | POTENTIAL         | Possible or capable of happening.                                                                |
| Make stronger                | POTENTIATE        | To increase or multiply the effect of a drug, treatment, or substance.                           |
| Effect booster               | POTENTIATOR       | An agent that helps another agent work more strongly.                                            |
| Before birth                 | PRENATAL          | Occurring before birth.                                                                          |
| Preventive treatment         | PROPHYLAXIS       | A medicine or action used to prevent disease or infection.                                       |
| As needed                    | PRN               | Prescription shorthand meaning when needed.                                                      |
| Expected outlook             | PROGNOSIS         | The expected course and outcome of a disease.                                                    |
| Lying face down              | PRONE             | Lying on the stomach or front.                                                                   |
| Study looking forward        | PROSPECTIVE STUDY | A study that follows participants forward in time.                                               |
| Artificial body part         | PROSTHESIS        | An artificial replacement for a body part.                                                       |
| Study plan                   | PROTOCOL          | The written plan for a study or treatment.                                                       |
| Closer to the center         | PROXIMAL          | Closer to the center of the body or point of attachment.                                         |
| Related to the lungs         | PULMONARY         | Pertaining to the lungs.                                                                         |
| Every day                    | QD                | Prescription shorthand meaning every day; clearer wording is preferred.                          |
| Four times daily             | QID               | Prescription shorthand meaning four times a day.                                                 |
| Radiation treatment          | RADIATION THERAPY | Treatment using high-energy radiation to damage or destroy abnormal cells.                       |
| By chance                    | RANDOM            | Selected or occurring by chance.                                                                 |
| Chance assignment            | RANDOMIZATION     | Assigning participants to groups by chance.                                                      |
| Red blood cell               | RBC               | A red blood cell.                                                                                |
| Genetically combined         | RECOMBINANT       | Made by combining genetic material from different sources.                                       |
| Put back together            | RECONSTITUTION    | Restoring something by putting its parts back together or adding a liquid.                       |
| Happen again                 | RECUR             | To happen again.                                                                                 |
| Not responding               | REFRACTORY        | Not responding adequately to treatment.                                                          |
| Regrowth or repair           | REGENERATION      | Growth again or replacement of lost or damaged tissue.                                           |
| Treatment schedule           | REGIMEN           | The planned pattern, dose, and timing of treatment.                                              |
| Return of disease            | RELAPSE           | Return of a disease after improvement or remission.                                              |
| No detectable disease        | REMISSION         | Disappearance or reduction of evidence of disease; it may be partial or complete.                |
| Related to kidneys           | RENAL             | Pertaining to the kidneys.                                                                       |
| Can be repeated              | REPLICABLE        | Able to be repeated with similar results.                                                        |

| Lay term                    | Medical term        | Lay-language explanation                                                                                    |
|-----------------------------|---------------------|-------------------------------------------------------------------------------------------------------------|
| Remove surgically           | RESECT              | To remove part or all of an organ or tissue by surgery.                                                     |
| Study looking back          | RETROSPECTIVE STUDY | A study that examines past records or past events.                                                          |
| Connective-tissue cancer    | SARCOMA             | A cancer arising from connective, bone, muscle, fat, or related tissues.                                    |
| Calming medicine            | SEDATIVE            | A medicine that calms or makes a person sleepy.                                                             |
| Testicular cancer           | SEMINOMA            | A type of cancer arising in the testicle.                                                                   |
| In order                    | SEQUENTIALLY        | Happening one after another in order.                                                                       |
| Sleepiness                  | SOMNOLENCE          | Unusual sleepiness or a tendency to fall asleep.                                                            |
| Air-measuring instrument    | SPIROMETER          | An instrument that measures the amount of air moved into and out of the lungs.                              |
| Extent of disease           | STAGING             | Assessment of how far a disease has progressed or spread.                                                   |
| Usual accepted treatment    | STANDARD OF CARE    | A treatment plan generally accepted by the medical community as appropriate.                                |
| Narrowing                   | STENOSIS            | Narrowing of a passage, duct, or blood vessel.                                                              |
| Mouth inflammation          | STOMATITIS          | Sores or inflammation inside the mouth.                                                                     |
| Group for comparison        | STRATIFY            | To arrange people or results into groups for analysis.                                                      |
| Barely responsive state     | STUPOR              | A greatly reduced level of alertness in which a person is difficult to awaken or respond to.                |
| Under the collarbone        | SUBCLAVIAN          | Located beneath the collarbone.                                                                             |
| Under the skin              | SUBCUTANEOUS        | Beneath the skin.                                                                                           |
| Lying on the back           | SUPINE              | Lying face up on the back.                                                                                  |
| Care focused on comfort     | SUPPORTIVE CARE     | General care that relieves symptoms and supports the person without directly curing the underlying disease. |
| Having symptoms             | SYMPTOMATIC         | Showing or having symptoms.                                                                                 |
| Group of related findings   | SYNDROME            | A condition identified by a characteristic group of symptoms and signs.                                     |
| Upper blood-pressure number | SYSTOLIC            | Relating to the upper blood-pressure number when the heart contracts.                                       |
| Birth-defect-causing        | TERATOGENIC         | Capable of causing abnormalities in a developing fetus.                                                     |
| Male sex glands             | TESTES/TESTICLES    | The organs that produce sperm and male reproductive hormones.                                               |
| Clot formation              | THROMBOSIS          | Formation of a blood clot inside a blood vessel or other location.                                          |
| Blood clot                  | THROMBUS            | A blood clot formed within a blood vessel or the heart.                                                     |
| Three times daily           | TID                 | Prescription shorthand meaning three times a day.                                                           |
| Gradual dose adjustment     | TITRATION           | Gradually changing a dose or solution to reach a desired effect.                                            |
| Immune white blood cells    | T-LYMPHOCYTES       | White blood cells that help coordinate or carry out immune responses.                                       |
| On the surface              | TOPICAL             | Applied to the surface, usually the skin or a mucous membrane.                                              |
| Surface numbing medicine    | TOPICAL ANESTHETIC  | A numbing medicine applied to a particular surface area.                                                    |

---

| Lay term                 | Medical term          | Lay-language explanation                                                                          |
|--------------------------|-----------------------|---------------------------------------------------------------------------------------------------|
| Harmful effects          | TOXICITY              | Harmful or unwanted effects caused by a drug, chemical, or treatment.                             |
| Through the skin         | TRANSDERMAL           | Delivered through the skin.                                                                       |
| Temporarily              | TRANSIENTLY           | For a short time or temporarily.                                                                  |
| Injury                   | TRAUMA                | Physical injury or wound.                                                                         |
| Walking exercise machine | TREADMILL             | A moving walking surface used for exercise or heart testing.                                      |
| Absorption into tissue   | UPTAKE                | Absorbing or taking in a substance by living tissue.                                              |
| Heart-valve repair       | VALVULOPLASTY         | A procedure that repairs or widens a heart valve.                                                 |
| Enlarged veins           | VARICES               | Abnormally enlarged or twisted veins.                                                             |
| Blood-vessel spasm       | VASOSPASM             | Sudden narrowing of blood vessels.                                                                |
| Disease carrier          | VECTOR                | An organism or carrier that can transmit a disease-causing microorganism.                         |
| Blood draw               | VENIPUNCTURE          | Puncturing a vein with a needle to draw blood or give treatment.                                  |
| Parent-to-child spread   | VERTICAL TRANSMISSION | Spread of an infection from a parent to a child, often during pregnancy, birth, or breastfeeding. |
| White blood cell         | WBC                   | A white blood cell involved in immune defense.                                                    |
