WDHA Syndrome; Verner-Morrison Syndrome; Pancreatic Cholera

Viraemia

The presence of viruses in the bloodstream. It may be brief or long-lasting and can allow the infection to spread from its original site to other tissues.

Viral

Caused by or relating to a virus. Viruses enter living cells to multiply and can cause illnesses ranging from mild colds to serious brain, lung, liver, or bleeding diseases; testing and treatment depend on the specific virus.

Viral Antibody

A protective protein made by the immune system after infection or vaccination that recognizes a virus. Blood tests for these antibodies may show past exposure, immune response, or selected current infections, depending on timing and test design.

Viral Arthritis

Joint inflammation caused by or associated with a viral infection. It may cause sudden pain, swelling, and stiffness in several joints and often improves as the infection resolves, although some viruses can cause prolonged symptoms.

Viral Assembly

The stage of viral reproduction when newly made viral genetic material and proteins are put together to form complete new virus particles.

Viral Attachment

The first step of infection, when proteins on a virus bind to matching molecules on a host cell. This binding helps determine which species, tissues, or cell types the virus can infect.

Viral Carcinogenesis

Cancer development caused or promoted by a viral infection. Some viruses alter cell growth directly, weaken immune protection, or cause long-lasting inflammation; examples include human papillomavirus, hepatitis B and C viruses, and Epstein-Barr virus.

Viral Conjunctivitis

Infection of the thin lining over the eye and inside the eyelids, usually causing redness, watering, irritation, and discharge. It spreads easily through contact with infected secretions or contaminated hands and surfaces.

Viral Culture

Growth of a virus in susceptible cell cultures to identify an infectious agent. It can be useful for selected viruses, but molecular and antigen-based tests are often faster or more sensitive; the appropriate method depends on the suspected infection and specimen.

Viral Encephalitis

Inflammation of the brain caused by a virus. It may cause fever, headache, confusion, behavior change, seizures, weakness, or reduced consciousness. It is an emergency requiring hospital assessment, testing, and treatment based on the suspected virus.

Viral Entry

The process by which a virus gets inside a host cell and releases its genetic material so the cell can make more virus.

Viral Exanthem

A widespread rash caused by a viral infection. It may occur with fever, tiredness, sore throat, cough, diarrhea, or other symptoms; the rash pattern and overall illness help determine the cause.

Viral Gastroenteritis

Alternate name; see *Stomach Flu*.

Viral Haemorrhagic Fever

A severe illness caused by certain viruses that can damage blood vessels, disturb clotting, and cause bleeding, shock, or organ failure. The way it spreads and its treatment depend on the virus.

Viral Hemorrhagic Fevers

Severe illnesses caused by certain viruses that can damage blood vessels, disrupt clotting, and lead to bleeding, shock, or organ failure. Many require isolation, urgent supportive care, and public-health measures.

Alternate Names:

VHF; Hemorrhagic Fevers; Viral Hemorrhagic Disease

Viral Hepatitis

Liver inflammation caused by hepatitis viruses A, B, C, D, or E. Hepatitis A and E usually spread through contaminated food or water; B, C, and D can spread through blood or body fluids and may become long-term infections that damage the liver.

Alternate Names:

Infectious Hepatitis

Viral Hepatitis Types

Five viruses that can inflame the liver. They differ in how they spread, whether infection can become long-term, the complications they cause, and whether vaccination or curative treatment is available.

Viral Immune Evasion

Ways viruses avoid or weaken the body's immune defenses, allowing them to survive, multiply, or return after infection. These methods can make infections harder to clear and vaccines or treatments less effective.

Viral Infection

An illness caused by a virus that enters body cells and uses them to make copies of itself. Because viruses cannot reproduce on their own, they take over healthy cells, which can damage tissues directly or cause inflammation as the body's immune system fights back. Viral infections range from mild, common conditions such as the common cold, stomach flu, and cold sores to serious diseases such as influenza, COVID-19, hepatitis, and HIV. Some viruses stay hidden in the body after the initial illness and can flare up years later, such as the chickenpox virus reactivating as shingles. Antibiotics kill bacteria and do not work against viruses; care focuses on resting, drinking fluids, managing symptoms, and using specific antiviral medicines or vaccines when available.

Alternate Names:

Viral Infections; Viral Disease; Viral Illness

Viral Latency

A state in which a virus remains inside cells without actively making new virus particles. Some latent viruses can become active again, especially when the

immune system is weakened or the body is under stress.

Viral Latency Mechanisms

The ways some viruses remain inactive inside cells while avoiding immune detection. Reactivation can occur when immune defenses are weakened or after other triggers, depending on the virus.

Viral Load

The amount of virus or viral genetic material in a body fluid or tissue, measured by a laboratory assay; trends can help assess disease activity or response to antiviral treatment.

Viral Meningitis

Infection and inflammation of the coverings of the brain and spinal cord caused by a virus. It may cause fever, headache, neck stiffness, vomiting, light sensitivity, or confusion; severe symptoms require urgent assessment because bacterial meningitis can look similar.

Viral Myocarditis

An acute or subacute inflammation of the myocardium resulting from direct viral invasion or post-viral autoimmune myocardial injury, commonly caused by enteroviruses (such as Coxsackievirus B), parvovirus B19, adenoviruses, human herpesvirus 6, or SARS-CoV-2. It presents across a wide spectrum ranging from mild fatigue, pleuritic chest discomfort, and palpitations to acute decompensated heart failure, cardiogenic shock, and life-threatening ventricular arrhythmias, representing a major cause of dilated cardiomyopathy in young adults.

Alternate Names:

Infectious Viral Myocarditis; Acute Viral Myocarditis

Viral Pathogenesis

The ways a virus enters the body, infects and spreads through cells, and causes illness. Damage may come directly from infected cells or from the immune system's response to the infection.

Viral Pericarditis

Acute inflammation of the fibroserous pericardial sac caused by a viral infection, representing the most common identifiable cause of acute pericarditis in clinical practice. Frequently preceded by an upper respiratory or gastrointestinal illness, it typically presents with sharp, retrosternal pleuritic chest pain that improves on sitting up and leaning forward, an audible pericardial friction rub, and diffuse concave ST-segment elevations with PR-segment depressions on electrocardiography.

Alternate Names:

Acute Viral Pericarditis; Viral Pericardial Inflammation

Viral Pharyngitis

Pharyngeal inflammation caused by viral pathogens such as adenovirus, rhinovirus, coronavirus, Epstein-Barr virus, or influenza virus. Characterized by cough, rhinorrhea, conjunctivitis, and lack of prominent tonsillar exudates, resolving with supportive care.

Alternate Names:

Viral Sore Throat; Acute Viral Pharyngotonsillitis; Viral Upper Respiratory Pharyngitis

Viral Pneumonia

Infection and inflammation of lung tissue caused by a virus, producing cough, fever, chills, breathlessness, chest discomfort, fatigue, and variable impairment of oxygenation. Severe disease can cause respiratory failure or secondary bacterial infection.

Viral Release

The stage when newly made viruses leave an infected cell and spread to other cells. Some leave by pushing through the cell membrane, while others are released when the infected cell breaks apart.

Viral Replication

The process by which a virus uses an infected cell to copy its genetic material and make viral proteins. The exact steps differ among viruses, but the result is production of new virus particles.

Viral Replication Cycle

The steps a virus uses to make more copies inside a living cell. Usually the virus attaches to the cell, enters, releases its genetic material, makes new parts, assembles new viruses, and leaves to infect other cells.

Viral Rhinitis

Acute inflammation and edema of the nasal mucous membranes caused by respiratory viral pathogens, predominantly rhinoviruses, coronaviruses, respiratory syncytial virus, or parainfluenza viruses. Clinically recognized as acute viral coryza or the common cold, it manifests with clear anterior rhinorrhea, nasal congestion, sneezing, itchy throat, low-grade malaise, and temporary hyposmia, generally resolving without antimicrobial therapy within 7 to 10 days.

Alternate Names:

Acute Viral Rhinitis; Acute Coryza; Common Cold Rhinitis

Viral Structure

The parts of a virus: genetic material made of DNA or RNA inside a protective protein coat. Some viruses also have an outer fatty covering taken from the infected cell's membrane.

Viral Uncoating

The step after a virus enters a cell when its protective outer coat comes apart and releases the genetic material. The cell can then be directed to make new viral components.

Virchow Node

A firm, non-tender, pathologically enlarged left supraclavicular lymph node (Troisier sign) located in the left supraclavicular fossa, which receives abdominal lymphatic drainage via the thoracic duct and signals metastatic spread of abdominal malignancies (particularly gastric adenocarcinoma).

Alternate Names:

Troisier Node; Left Supraclavicular Sentinel Node

Virchow Node

An enlarged, firm, non-tender left supraclavicular

lymph node that receives lymphatic drainage from the thoracic duct, representing classical physical evidence of metastatic gastrointestinal adenocarcinoma (particularly gastric carcinoma) or other pelvic/abdominal malignancies.

Alternate Names:

Signal Node; Troisier Sign

Virchow-Robin Spaces

Microscopic, fluid-filled pial perivascular channels surrounding cerebral penetrating arteries and arterioles as they plunge into the brain parenchyma from the subarachnoid space, forming a critical anatomical component of the glymphatic interstitial waste clearance system.

Alternate Names:

Perivascular Spaces

Virchow's Triad

The three main factors that cause dangerous blood clots (thrombosis) to form inside blood vessels: (1) slow blood flow (stasis, such as from long bed rest, long flights, or immobility), (2) damage to the blood vessel wall (from surgery, injury, fractures, or IV catheters), and (3) blood that clots too easily (hypercoagulability, caused by cancer, pregnancy, birth control pills, dehydration, or inherited clotting disorders). When one or more of these factors are present, the risk of developing a deep vein thrombosis (DVT) or a life-threatening lung blood clot (pulmonary embolism) increases significantly.

Alternate Names:

Virchow Triad; Triad of Virchow; Thrombogenesis Triad

Virchow Triad

The classic pathophysiological triad of primary factors that contribute to venous thrombosis and intravascular clot formation: endothelial injury (vessel wall damage), stasis of blood flow (altered hemodynamics), and hypercoagulability (altered blood composition).

Alternate Names:

Virchow's Triad; Thrombosis Pathophysiological Triad

Viremia

The presence of a virus in the bloodstream. It may be brief or persistent and can allow infection to spread to other organs. Laboratory tests may detect the virus itself or its genetic material.

Virginal Membrane

A historical term usually referring to the hymen, a variable rim or fold of tissue at the vaginal opening. Its shape or appearance cannot reliably show whether a person has had sexual activity, and it may stretch or tear for many reasons.

Viridans Streptococci

Viridans streptococci are a group of bacteria commonly found in the mouth that can cause dental infections and, after entering the blood, infect heart valves.

Virilisation

The development of male secondary sexual characteristics in females, resulting from excessive androgen production or exposure.

Virilism

Development of masculinizing features in a female, usually from excess androgen exposure or production, such as hirsutism, deep voice, acne, and menstrual disturbance.

Virilism Foetal

Prenatal or neonatal masculinization of a genetically female fetus or infant due to excess androgen exposure. Causes include congenital adrenal hyperplasia, maternal androgen-producing disease, or placental and fetal steroidogenic disorders.

Virilization

Virilization is development of typically male secondary sexual features, such as hirsutism, deep voice, acne, increased muscle mass, or clitoromegaly, from androgen excess or androgen exposure.

Virilize

To virilize is to develop or cause typically male

physical changes from androgen excess or treatment, including facial hair, voice deepening, acne, muscle change, or genital enlargement.

Virology

The study of viruses, including their structure, reproduction, spread, effects on the body, diagnosis, treatment, and prevention.

Virotherapy

Treatment that uses a virus, often modified, to attack cancer cells or deliver a useful gene into cells. It is an evolving field; the possible benefits, risks, and availability depend on the specific therapy and disease.

Virtual Colonoscopy

Virtual colonoscopy is CT colonography, which uses bowel preparation and gas or carbon-dioxide insufflation to create images of the colon; it can detect polyps and masses but cannot remove lesions or biopsy them.

Virulence

How severely a microorganism can cause disease or tissue damage. It depends on the organism's harmful properties and on the person's immune defenses and other health factors.

Virulence Factor

A feature of a microorganism that helps it survive in the body, avoid immune defenses, attach to cells, damage tissue, or cause disease. Examples include toxins, protective coatings, and enzymes.

Virulent

Capable of causing severe disease or extensive harm. Virulence describes the harmfulness of a microorganism and is different from infectivity, which describes how easily it spreads or establishes infection.

Virus

An infectious agent made of genetic material inside a protective protein coat, sometimes with an outer membrane. It can reproduce only inside living cells

and may cause illness by damaging cells or triggering inflammation.

Virus Activation

Virus activation is the switch from a dormant or inactive viral state to production of new viral components and particles.

Virus Assembly

Virus assembly is the stage of the viral life cycle when viral genetic material and proteins are packaged into new virus particles.

Virus Diseases

Illnesses caused by viruses. They range from mild infections of one area, such as a cold, to severe diseases affecting the lungs, liver, brain, blood, or several organs; prevention and treatment depend on the virus.

Viruses

Viruses are infectious particles containing DNA or RNA within a protein coat, sometimes with a lipid envelope; they replicate only inside host cells and cause disease through direct injury or immune responses.

Virus Integration

Virus integration is insertion of viral genetic material into the DNA of a host cell, a process used by some viruses and important in certain cancers.

Virus Protein

A virus protein is a protein made from viral genetic instructions that helps form the virus, enter cells, replicate, or evade immunity.

Virus Receptor

A virus receptor is a molecule on a host cell that a virus binds to in order to attach to and enter the cell.

Virus Replication

Virus replication is the process by which a virus copies its genetic material and makes proteins and

new virus particles inside a host cell.

Virus Uncoating

Virus uncoating is removal of the virus's protective outer layer after entry into a host cell, releasing its genetic material for replication.

Viscera

The internal organs of the body, particularly those within the thoracic and abdominal cavities. The thoracic viscera include the heart, lungs, esophagus, trachea, and thymus.

Visceral

Relating to the internal organs, especially those within the thorax or abdomen, rather than the body wall or limbs.

Visceral Afferents

Sensory nerve fibers that carry information from internal organs to the spinal cord and brain. They convey signals related to stretch, chemical changes, inflammation, and internal pain and help regulate autonomic and reflex responses.

Visceral Larva Migrants

A syndrome caused by migration of animal nematode larvae through human tissues, most often from *Toxocara* species. It may produce fever, eosinophilia, liver lesions, or ocular and neurologic disease.

Visceral Leishmaniasis

A severe, potentially fatal systemic protozoan infection caused by species of the *Leishmania* donovani complex (*Leishmania donovani* and *Leishmania infantum*) transmitted to humans by the bite of female phlebotomine sandflies. Characterized by the intracellular dissemination of amastigotes within the reticuloendothelial system, it presents with prolonged irregular fever, progressive massive splenomegaly, hepatomegaly, profound pancytopenia (anemia, leukopenia, and thrombocytopenia), hypergammaglobulinemia, and severe wasting, fatal in over 95% of untreated cases.

Alternate Names:

Kala-Azar; Black Fever; Dumdum Fever; Systemic

Leishmaniasis

Visceromegaly

Abnormal enlargement of one or more internal organs, such as the liver, spleen, or kidneys. It is a physical finding with causes that include infection, congestion, storage disease, inflammation, and cancer.

Viscus

An internal organ, especially one in the chest or abdomen. The plural is viscera; examples include the heart, lungs, liver, stomach, and intestines.

Vision

The sensory ability to perceive light and interpret visual information processed by the eyes and brain, enabling recognition of shapes, colors, depth, and motion. Normal vision depends on the proper function of the cornea, lens, retina, and optic nerve, as well as intact neural pathways to the visual cortex.

Alternate Names:

Eyesight; Sight; Visual Perception

Vision And Hearing

Two major senses used to understand and communicate with the world. Problems may develop separately or together because of aging, illness, injury, medicines, or inherited conditions and can affect learning, safety, communication, and daily activities.

Vision Impairment

Reduced visual acuity or visual-field function that affects daily activities. Causes include refractive error, cataract, glaucoma, retinal disease, optic-nerve injury, and neurologic disease. Evaluation and treatment depend on the cause; rehabilitation and visual aids may improve function.

Vision Loss

A decrease in the ability to see that cannot be fully corrected with eyeglasses, contact lenses, or medical treatment. It ranges from partial impairment to complete blindness and can result from conditions such as macular degeneration, glaucoma, diabetic

retinopathy, cataracts, and traumatic injury.

Vision Problems

Changes in visual acuity, field, color, or clarity caused by refractive error, eye disease, neurologic disease, or systemic illness. Sudden vision loss is an emergency.

Vision Receptors

Light-sensing cells in the retina, mainly rods and cones, that convert light into nerve signals. Rods support dim-light vision, while cones provide color and sharp detail in brighter conditions.

Vision Screening

Brief checks used to find possible eye or vision problems before symptoms are obvious. Newborn checks may detect cataracts or other serious disorders; screening in young children looks for poor vision, misaligned eyes, or risks for reduced vision and leads to a full eye examination when needed.

Vision Test

An examination that measures visual acuity, fields, color, alignment, or eye structures to detect refractive error, retinal disease, optic-nerve dysfunction, glaucoma, or other causes of visual impairment.

Visual Acuity

How clearly a person can see fine details, usually measured by reading letters or symbols at a set distance. It can be reduced by focusing problems, eye disease, or disorders affecting the visual nerves or brain.

Visual Acuity Test

A test measuring the smallest standardized detail a person can resolve at a specified distance, usually reported as a fraction or decimal.

Visual Agnosia

Inability to recognize familiar objects, faces, or symbols by sight even though the eyes may see adequately. It usually results from damage to brain areas that interpret vision, such as after a stroke or

head injury.

Visual Evoked Potential

A neurophysiological diagnostic test measuring the electrical potential recorded from the occipital scalp in response to visual stimulation (e.g., checkerboard pattern reversal), used to evaluate the functional integrity and conduction velocity of the visual pathways (optic nerve, chiasm, and optic radiations), showing delayed P100 latency in optic neuritis and multiple sclerosis.

Alternate Names:

VEP; Visual Evoked Response (VER)

Visual Field

The entire area that can be seen while the eyes remain fixed in one position. Visual-field loss may result from retinal, optic-nerve, or brain lesions and is assessed by perimetry.

Visual Field Defect

Loss or change in part of the area a person can see while looking straight ahead. It may result from disease of the retina, optic nerve, or brain, and the pattern can help identify where the problem is.

Visual Field Perimetry

A test that maps how well a person sees in different parts of the visual field while looking at a fixed point. It can detect and monitor missing areas caused by eye-nerve, retinal, or brain disease.

Visual Fields

The total area that can be seen while the eyes are fixed in one position; defects may indicate retinal, optic-nerve, or brain disease.

Visual Impairment

Reduced vision that cannot be fully corrected by ordinary glasses or contact lenses. Causes include refractive error, cataract, glaucoma, retinal disease, optic-nerve injury, and neurologic disease; new or sudden loss of vision requires urgent assessment.

Visualized Laser-Assisted Prostatectomy

A procedure that uses a laser, guided by a camera, to remove or vaporize prostate tissue blocking urine flow. It is used for some people with an enlarged prostate and may cause bleeding, infection, scar narrowing, or temporary urinary and sexual problems.

Alternate Names:

VLAP

Visual Neglect

A neurological syndrome in which a patient fails to report, respond, or orient to visual stimuli presented in the contralesional visual field, despite having intact primary sensory pathways. It is most commonly seen following acute stroke in the non-dominant (right) parietal cortex, producing left-sided spatial hemineglect.

Alternate Names:

Hemispatial Neglect; Spatial Inattention

Vital

Essential for life or relating to vital physiologic functions. Vital signs commonly include temperature, pulse, respiratory rate, blood pressure, and oxygen saturation.

Vital Capacity

The greatest amount of air a person can breathe out after filling the lungs as fully as possible. It is measured during lung-function testing and may be reduced by lung disease, weak breathing muscles, or restriction of chest movement.

Vital Signs

Basic measurements of physiologic status, commonly including temperature, pulse, respiratory rate, blood pressure, and oxygen saturation. Values vary with age, activity, illness, and measurement conditions; trends and clinical context are important.

Vitamin A

A fat-soluble vitamin needed for vision, immune function, skin and mucosal health, and growth; deficiency causes night blindness, while excess can

injure the liver and developing fetus.

Alternate Names:

Retinol; Retinoic Acid

Vitamin A Blood Test

A blood test measuring circulating retinol, used to assess suspected vitamin A deficiency or toxicity in appropriate clinical settings.

Vitamin A Deficiency

A nutritional disorder resulting from inadequate intake or absorption of vitamin A (retinol), causing dry eyes (xerophthalmia), night blindness, dry skin, and weakened immunity. Severe deficiency leads to corneal ulceration and is the leading cause of preventable childhood blindness worldwide; clinical eye stages are categorized using the WHO xerophthalmia classification.

Alternate Names:

Hypovitaminosis A; Retinol Deficiency; Vitamin A Lack

Vitamin A: Retinal

Vitamin A (retinol) is a fat-soluble vitamin essential for vision, immune function, cell differentiation, and reproduction. In the eye, retinol is oxidized to retinal (retinaldehyde), which binds to opsin in the photoreceptor outer segments forming rhodopsin (in rods) and photopsins (in cones).

Vitamin A Toxicity

Hypervitaminosis A resulting from excessive acute or chronic ingestion of retinoids, manifesting acutely with nausea, vomiting, and pseudotumor cerebri (headache, papilledema), and chronically with dry fissured skin, alopecia, hepatomegaly with fibrosis, hypercalcemia, and severe fetal teratogenicity (craniofacial and cardiac malformations).

Vitamin B

Vitamin B refers to a group of water-soluble vitamins that support energy metabolism, blood-cell formation, nerve function, and other processes. The group includes several distinct vitamins, not one single substance.

Vitamin B1

Thiamine, a water-soluble vitamin that acts as a co-factor in carbohydrate and amino-acid metabolism and supports nerve function. Severe deficiency can cause beriberi or Wernicke encephalopathy.

Alternate Names:

Thiamine; Aneurin

Vitamin B12

A vitamin needed for red-cell formation, DNA production, and normal nerve function. Deficiency can cause anemia, numbness, balance problems, or cognitive changes.

Alternate Names:

Cobalamin; Cyanocobalamin

Vitamin B12: Cobalamin

Alternate name; see *Vitamin B12*.

Vitamin B12 Deficiency

Too little vitamin B12, which can cause large abnormal red cells, tiredness, numbness, balance problems, or nerve damage. Causes include poor intake, poor absorption, autoimmune disease, stomach surgery, and medicines.

Vitamin B12 Deficiency Anemia

Anemia caused by too little vitamin B12 or poor absorption of it. It can cause tiredness, pale skin, a sore tongue, numbness, balance problems, and permanent nerve damage if untreated for a long time.

Alternate Names:

Vitamin B12 Deficiency Anaemia

Vitamin B12 Deficiency In Older Adults

Deficiency caused by inadequate intake, malabsorption, autoimmune intrinsic-factor deficiency, gastric surgery, or medications. It may cause megaloblastic anemia, neuropathy, cognitive changes, gait impairment, and glossitis; neurologic injury can occur without anemia.

Vitamin B12 Level

The amount of vitamin B12 measured in blood;

results are interpreted with symptoms and related tests because serum levels may not fully reflect tissue deficiency.

Vitamin B1: Thiamine

Alternate name; see *Vitamin B1*.

Vitamin B2

Riboflavin, a water-soluble vitamin that helps cells produce energy and supports healthy skin, eyes, and the lining of the mouth. Deficiency can cause cracks at the mouth corners, a sore tongue, skin changes, or anemia.

Alternate Names:

Riboflavin; Lactoflavin

Vitamin B2 Riboflavin

Alternate name; see *Riboflavin*.

Vitamin B3

A vitamin that helps cells use food for energy and supports the skin and nervous system. Severe deficiency causes pellagra, with diarrhea, skin inflammation, confusion, and other neurologic problems.

Alternate Names:

Nicotinic Acid; Nicotinamide

Vitamin B5

A water-soluble vitamin needed to help the body use fats, carbohydrates, and proteins and make hormones and other substances. It is found in many foods, so deficiency is rare; very large supplement doses may cause stomach upset.

Alternate Names:

Pantothenate; Calcium Pantothenate

Vitamin B6

A group of related vitamins needed for amino-acid metabolism, red-cell production, and nerve function. Excess supplements can cause sensory nerve damage.

Alternate Names:

Pyridoxine; Pyridoxal Phosphate

Vitamin B6: Pyridoxine

Alternate name; see *Vitamin B6*.

Vitamin B7

A vitamin that helps the body use fats, carbohydrates, and proteins. Deficiency is uncommon but may cause hair loss, skin rash, or neurologic symptoms; large doses can interfere with some laboratory tests.

Alternate Names:

Vitamin H; Coenzyme R

Vitamin B9

A vitamin needed for DNA production and healthy red blood cells. Deficiency can cause large-cell anemia and, during pregnancy, increases the risk of neural-tube defects; folic acid is recommended before conception and early in pregnancy.

Alternate Names:

Folic Acid; Pteroylglutamic Acid

Vitamin B Complex

A group of eight water-soluble vitamins that act mainly as coenzymes or their precursors in cell metabolism. The group includes thiamine (B1), riboflavin (B2), niacin (B3), pantothenic acid (B5), pyridoxine (B6), biotin (B7), folate (B9), and cobalamin (B12), which together support energy metabolism, red-blood-cell formation, and nervous-system function. These vitamins occur together in whole grains, meat, eggs, and legumes; individual deficiencies cause distinct disorders, and combined supplements can prevent or correct deficiency. The sequence has gaps because early candidate substances were later excluded as nonessential: B8 (inositol) is synthesized by the body, B4 (choline, adenine) is not a true vitamin, and the provisional labels B10 and B11 were abandoned once their activity was identified as folate or para-aminobenzoic acid.

Alternate Names:

B Vitamins; Vitamin B Group

Vitamin C

A water-soluble vitamin needed for collagen formation, wound healing, immune function, antioxidant

activity, and absorption of iron from plant foods. Severe deficiency causes scurvy, with bleeding gums, bruising, poor wound healing, and weakness.

Alternate Names:

Ascorbic Acid

Vitamin C Deficiency

A lack of vitamin C, a water-soluble vitamin needed for collagen formation, wound healing, iron absorption, and antioxidant activity. It follows prolonged low intake and, when severe, causes scurvy, with bleeding gums, easy bruising, poor wound healing, joint pain, and weakness. Replacement and dietary correction reverse the deficiency.

Vitamin D

Vitamin D supports calcium and phosphate balance, bone mineralization, muscle function, and immune processes; deficiency causes rickets in children and osteomalacia or bone loss in adults.

Vitamin D3

Cholecalciferol, a form of vitamin D made in skin and found in some foods and supplements. It helps the body absorb calcium and maintain healthy bones.

Vitamin D: Calcitriol

Alternate name; see *Calcitriol*.

Vitamin D Deficiency

Too little vitamin D for the body's needs. It can result from low intake or sunlight, poor absorption, or liver or kidney disease and may weaken bones, cause muscle weakness, or lead to rickets in children.

Vitamin Deficiency Anemia

Anemia caused by inadequate vitamin B-12, folate, or other nutrients needed for normal red blood cell production.

Vitamin E

Vitamin E is a group of fat-soluble compounds with antioxidant activity. It is found in foods such as nuts, seeds, and vegetable oils; high-dose supplements can

increase bleeding risk and interact with medicines.

Alternate Names:

Tocopherol; Alpha-Tocopherol

Vitamin E: Tocopherol

Alternate name; see *Vitamin E*.

Vitamin K

A fat-soluble vitamin required to activate several blood-clotting proteins and support bone metabolism; the main dietary form is phyloquinone, found especially in leafy green vegetables and some vegetable oils. Deficiency can cause bleeding and is treated or prevented with replacement.

Vitamin K Deficiency

Too little vitamin K for normal production of clotting factors, causing an increased bleeding tendency. It can result from poor intake, malabsorption, liver disease, or certain medicines; newborns receive vitamin K prophylaxis.

Vitamin K Deficiency Bleeding

Bleeding in a newborn or young infant caused by inadequate vitamin K-dependent clotting activity. It may occur early, classically, or late and can involve the brain or gastrointestinal tract.

Alternate Names:

VKDB; Neonatal Hypoprothrombinemia

Vitamin K Deficiency Bleeding Of The Newborn

Bleeding in an infant caused by inadequate vitamin K-dependent clotting factors; preventive vitamin K given at birth greatly reduces the risk.

Vitamin K: Phylloquinone

Alternate name; see *Vitamin K*.

Vitamin K Prophylaxis

Administration of vitamin K to a newborn soon after birth to prevent vitamin K deficiency

Vitamins

Organic nutrients needed in small amounts for nor-

mal metabolism, growth, and tissue maintenance; some are water-soluble and others fat-soluble, and both deficiency and excess can cause disease.

Vitiligo

Vitiligo is a condition in which areas of skin lose pigment because melanocytes are destroyed or stop functioning. It is not contagious, and treatment may include camouflage, topical medicines, or light therapy.

Vitrectomy

Eye surgery that removes some or all of the vitreous, the clear gel that fills the middle of the eye. Small instruments are inserted through the wall of the eye to remove cloudy gel, blood, scar tissue, or a foreign object and to repair problems of the retina. It may be used for retinal detachment, diabetic eye disease, macular hole, macular pucker, severe eye injury, or serious eye infection. The removed gel may be replaced with a salt solution, air or gas, or silicone oil.

Vitreous

Relating to the transparent gel filling most of the space between the lens and retina, or describing a glass-like appearance. Vitreous disorders can cause floaters, hemorrhage, detachment, or retinal traction.

Vitreous Body

The transparent gel filling the large space between the lens and retina. It helps maintain the shape of the eye and transmits light; age-related liquefaction can cause floaters or contribute to retinal traction.

Alternate Names:

Vitreous Humor; Corpus Vitreum

Vitreous Detachment

Separation of the vitreous gel from the retina, usually related to aging and often causing new floaters or flashes. Sudden symptoms require assessment for retinal tears or detachment.

Vitreous Hemorrhage

Bleeding into the vitreous cavity that causes sud-

den painless floaters, cobwebs, haze, or loss of vision. Common causes include proliferative diabetic retinopathy, retinal tear or detachment, trauma, and posterior vitreous separation.

Vitreous Humor

The clear gel that fills the space between the lens and retina. It helps maintain the shape of the eye and transmits light to the retina.

VLDL Test

A blood test that measures or estimates very-low-density lipoprotein, a particle carrying triglycerides. The result may help assess cardiovascular risk but is interpreted with the full cholesterol and triglyceride profile.

VO2 Max

The greatest amount of oxygen the body can use during intense exercise. It is a measure of aerobic fitness and is influenced by the heart, lungs, blood, muscles, age, health, and training.

Alternate Names:

Maximal Oxygen Consumption; Maximal Aerobic Capacity

Vocal-Cord Dysfunction

Older term for inducible laryngeal obstruction, in which the larynx temporarily narrows during breathing and may cause throat tightness, noisy breathing, cough, or shortness of breath.

Vocal Cord Nodules

Benign, usually paired thickened areas of the vocal folds caused by repeated voice strain or overuse. They can cause

hoarseness, vocal fatigue, and a rough or breathy voice.

Vocal Cord Paralysis

Inability of one or both vocal folds to move normally, often because of nerve damage. It may cause hoarseness, weak cough, choking, or difficulty protecting the airway; sudden breathing trouble is an emergency.

Alternate Names:

Vocal Fold Paralysis

Vocal Cord Paresis

Weakness or partial paralysis of one or both vocal cords, often from injury to the nerves that control them. It can cause a weak or breathy voice, voice fatigue, coughing during eating, or aspiration.

Vocal Cord Polyp

A usually noncancerous growth on a vocal fold, often after heavy or sudden voice use. It can cause persistent hoarseness, a rough voice, or voice fatigue and is assessed by examining the larynx.

Vocal Cords

Vocal cords, or vocal folds, are bands of tissue in the larynx that vibrate as air passes between them to produce the voice. Swelling, nodules, or injury can cause hoarseness.

Vocal-Fold Nodules

Alternate name for vocal cord nodules, benign thickened areas of the vocal folds that can cause persistent hoarseness.

Vocal Fold Paralysis

Alternate name; see *Vocal cord paralysis*.

Vocal-Fold Polyps

Alternate name for vocal cord polyps, usually non-cancerous growths on the vocal folds that can cause persistent hoarseness or voice fatigue.

Vocal Folds

Two folds inside the voice box that vibrate as air passes between them to make sound. They also close during swallowing to protect the lungs from food and liquid.

Vocal Hemorrhage

Vocal hemorrhage is bleeding into a vocal fold, often after sudden or forceful voice use. It can cause abrupt hoarseness and usually requires prompt voice rest and specialist assessment.

Vocal Resonance

The sound of a person's voice heard through the chest with a stethoscope while they speak. Changes in the sound can provide clues to pneumonia, fluid around the lung, a collapsed lung, or other lung disease.

Vogt-Koyanagi-Harada Disease

A rare, multisystem, cell-mediated autoimmune disorder directed against melanocyte-associated antigens (such as tyrosinase), occurring predominantly in pigmented ethnic populations. Characterized by chronic bilateral granulomatous panuveitis with exudative retinal detachments, accompanied by sensorineural hearing loss, tinnitus, vitiligo, poliosis (whitening of eyelashes and hair), and aseptic meningitis.

Alternate Names:

VKH Syndrome; Uveomeningoencephalitic Syndrome

Vogt-Koyanagi-Harada Syndrome

A multisystem autoimmune inflammatory disorder mediated by T-cell responses against melanocyte-associated antigens, characterized by bilateral chronic granulomatous panuveitis, exudative retinal detachments, meningismus (CSF pleocytosis), sensorineural dysacusis, poliosis, and patchy vitiligo.

Alternate Names:

VKH Syndrome; Uveomeningoencephalitic Syndrome

Voice

Sound produced by vibration of the vocal folds as air passes through the larynx, then shaped by the throat, mouth, and nose for speech.

Voice And Speech

The products of complex coordinated activity of the respiratory, laryngeal, and articulatory systems. Communication produced by coordinated breathing, voice-box vibration, and movements of the mouth, tongue, and other speech structures.

Voice Box

The larynx, an organ in the neck containing the

vocal folds and forming part of the airway. It produces voice and helps protect the lower respiratory tract during swallowing.

Voice Disorders

Conditions affecting voice quality, pitch, loudness, or ease of speaking because of problems involving the vocal folds, airway, nerves, or voice use.

Alternate Names:

Dysphonia; Vocal Cord Dysfunction

Void

To empty the urinary bladder by urinating; in other medical contexts, void may mean an empty space or absence of a substance.

Voiding Cystourethrogram

An X-ray test that fills the bladder with contrast through a catheter and records the bladder and urethra while the person urinates. It can show urine flowing backward toward the kidneys, blockage, leakage, or structural problems, especially in children with selected urinary infections.

Volar

Relating to the palm of the hand or sole of the foot, especially the surface opposite the dorsum.

Volatile Anesthetics

Inhaled medicines used to produce and maintain unconsciousness during some operations. They can lower blood pressure and breathing and rarely cause a dangerous rise in body temperature in susceptible people.

Alternate Names:

Inhalational Anesthetics; Inhalation General Anesthetics

Volkmann Contracture

A permanent, severe ischemic contracture of the forearm flexor musculature leading to a claw-like hand deformity, resulting from untreated acute compartment syndrome of the forearm following supracondylar humeral fractures, crush injuries, or tight casting.

Alternate Names:

Volkmann's Ischemic Contracture; Ischemic Myodystrophy

Alternate Names:

Volkmann contracture; Volkmann's ischaemic contracture; Volkmann claw deformity.

Volume Of Distribution

A calculated measure of how widely a medicine appears to spread through the body compared with the amount left in the blood. It helps guide dosing but does not represent a real space inside the body.

Volume Overload

Excess total body sodium and water, causing peripheral or pulmonary oedema; common causes include heart failure, kidney failure, liver disease, and excessive intravenous fluid, and treatment depends on the cause and severity.

Voluntary

Under conscious control or performed by choice, such as voluntary movement. Voluntary action is distinguished from reflex, autonomic, or involuntary activity.

Voluntary Psychiatric Admission

Admission to a hospital or psychiatric facility with the person's agreement for assessment, treatment, or safety support. Legal rules about consent, leaving, capacity, and conversion to involuntary status vary by jurisdiction.

Volutrauma

Lung injury caused by overstretching the lungs, usually when a breathing machine delivers breaths that are too large. Careful ventilator settings can reduce this risk.

Volvulus

Twisting of a loop of intestine that blocks passage through the bowel and may cut off its blood supply. It can cause severe pain, vomiting, swelling, and tissue death and often requires emergency treatment.

Vomit

To eject stomach or upper gastrointestinal contents through the mouth; the expelled material may also be called vomitus. Persistent vomiting can cause dehydration and electrolyte abnormalities.

Vomiting

Forceful emptying of stomach contents through the mouth. It may result from infection, digestive disease, medicines, pregnancy, migraine, brain disorders, or poisoning. Repeated vomiting can cause dehydration, disturbed body salts, or inhalation of vomit; treatment addresses the cause and replaces lost fluids.

Vomiting Blood

The passage of blood or coffee-ground material in vomit, usually indicating upper gastrointestinal bleeding. It is a potentially serious symptom requiring prompt medical evaluation.

Vomitus

Material expelled from the stomach or upper gastrointestinal tract during vomiting. Its color and contents can provide clues but do not by themselves establish a diagnosis.

Von Economo Encephalitis

An atypical form of epidemic encephalitis (encephalitis lethargica) characterized by pronounced lethargy, hypersomnolence, ophthalmoplegia, and a frequent late sequela of progressive post-encephalitic parkinsonism, pathologically marked by midbrain and basal ganglia inflammation.

Alternate Names:

Encephalitis Lethargica; Sleeping Sickness (Von Economo Type)

Von Gierke Disease

Glycogen storage disease type I, an inherited deficiency of glucose-6-phosphatase or its transport system that causes fasting hypoglycemia, lactic acidosis, enlarged liver, and excess uric acid or lipids.

Von Graefe Sign

An ophthalmologic physical examination sign of Graves ophthalmopathy and thyrotoxicosis characterized by 'lid lag,' in which the upper eyelid lags behind the downward movement of the globe when the patient slowly tracks an object moving from superior to inferior gaze, exposing the white sclera above the cornea.

Alternate Names:

Lid Lag Sign; Von Graefe's Lid Lag

Von Hippel-Lindau Disease

An autosomal dominant inherited condition, usually caused by a disease-causing change in the *VHL* gene, that increases the risk of tumors and cysts in several organs, including the brain, spinal cord, eyes, kidneys, adrenal glands, and pancreas. Some tumors can affect vision, blood pressure, or kidney function. Regular scans and eye, hearing, and blood-pressure checks help find problems early.

Von Hippel-Lindau Syndrome

Von Hippel-Lindau syndrome is an inherited disorder caused by changes in the *VHL* gene. It increases the risk of tumors and cysts in organs such as the brain, retina, kidneys, pancreas, and adrenal glands.

Von Meyenburg Complex

A benign congenital biliary ductal plate malformation (biliary microhamartoma) consisting of small, non-progressive clusters of dilated, cystic bile ducts embedded in a dense collagenous stroma, usually discovered incidentally on liver imaging or biopsy.

Alternate Names:

Biliary Microhamartoma; Ductal Plate Malformation

Von Recklinghausen Disease

Von Recklinghausen disease is another name for neurofibromatosis type 1, an inherited condition causing multiple café-au-lait spots, neurofibromas, and increased risk of certain nerve, bone, eye, and other problems.

Von Recklinghausen'S Disease

Alternate name; see *Neurofibromatosis type 1*.

Von Recklinghausen'S Neurofibromatosis

Alternate name; see *Neurofibromatosis type 1*.

Von Recklinghausen'S Phakomatosis

Alternate name; see *Neurofibromatosis type 1*.

Von Rosen Splint

A malleable, lightweight orthopedic abduction splint applied in neonates with developmental dysplasia of the hip (DDH) to maintain the femoral head securely centered within the acetabulum in flexion and abduction.

Alternate Names:

Von Rosen Frame; DDH Abduction Splint

Von Willebrand Disease

A bleeding disorder caused by too little or poorly working von Willebrand factor, a blood protein that helps clots form. It is often autosomal dominant, although severe type 3 and some other forms are autosomal recessive. It commonly causes nosebleeds, easy bruising, heavy menstrual bleeding, or prolonged bleeding after procedures.

Voriconazole

An antifungal medicine used for selected serious fungal infections. It stops fungi making an essential part of their outer structure; vision changes, liver problems, medicine interactions, and skin sensitivity require monitoring.

VOR Reflex

A reflex that moves the eyes opposite to head movement so vision stays steady while the head turns. Problems with this reflex can cause blurred or bouncing vision, dizziness, or imbalance.

Voyeurism

A recurrent sexual interest in observing an unsuspecting person who is naked, disrobing, or engaging in sexual activity. The interest alone is not a mental disorder; voyeuristic disorder is the diagnostic term when required criteria are met.

Voyeuristic Disorder

A paraphilic disorder involving recurrent, intense sexual arousal from observing an unsuspecting person who is naked, disrobing, or engaging in sexual activity. Diagnostic criteria include acting on the urges or clinically significant distress or impairment, with the required duration criteria.

VPCs (Ventricular Premature Contractions)

Alternate name; see *Premature ventricular contractions (PVCs)*.

VRE (Vancomycin-Resistant Enterococci)

Enterococcus bacteria that are no longer killed by vancomycin, an antibiotic. They may live harmlessly in the body or cause urinary, wound, bloodstream, or other infections that require infection-control measures and suitable treatment.

VSD (Ventricular Septal Defect)

A hole in the wall between the heart's lower chambers. Small holes may close or cause no symptoms, while larger holes can make the heart and lungs work too hard and may need treatment.

Alternate Names:

Ventricular Septal Defect

Vulnerary

A substance traditionally believed to help heal wounds. Such products may lack good evidence and can cause allergy or contamination, so wound care should follow appropriate medical advice.

Vulva

The external female genital structures, including the mons pubis, labia, clitoris, and vestibule. It protects the openings of the urinary and reproductive tracts and contains specialized sensory and glandular tissue.

Alternate Names:

Female External Genitalia; Pudendum

Vulval Intraepithelial Neoplasia

Vulval intraepithelial neoplasia is abnormal cell

growth limited to the surface layers of the vulvar skin. Some types are linked to HPV, and untreated lesions may progress to invasive cancer.

Vulvar

Relating to the vulva, the external female genital structures including the labia, clitoris, vestibule, and associated glands.

Vulvar Cancer

Vulvar cancer is cancer arising in the external female genitalia. It may appear as a persistent lump, ulcer, wart-like lesion, itching, pain, or bleeding and requires examination and biopsy for diagnosis.

Vulvar Carcinoma

Cancer of the external female genital area, most often arising from surface skin cells. It may appear as a persistent lump, sore, wart-like growth, itching, pain, or bleeding and requires examination and biopsy.

Alternate Names:

Vulvar Cancer; Squamous Cell Carcinoma of Vulva

Vulvar Inclusion Cysts

Small sacs under the skin of the vulva that contain tissue trapped from the surface lining. They may develop after childbirth tears, surgery, or other injury, or occur without an obvious cause. Most cause no symptoms, but they may become swollen, painful, infected, or uncomfortable during sexual activity. Symptomatic cysts may need removal.

Vulvar Intraepithelial Neoplasia

Abnormal cells limited to the surface layer of the vulva. Some forms can progress to invasive cancer, especially without treatment. It may cause itching, burning, sores, warty growths, or a color change, but some people have no symptoms.

Vulvar Melanoma

A rare cancer of the pigment-producing cells in the vulva. It may appear as a dark or skin-colored lump, patch, sore, or bleeding area; diagnosis requires a biopsy, and treatment depends on size and spread.

Vulvar Squamous Cell Carcinoma

The most common invasive vulvar malignancy, arising through HPV-related or HPV-independent pathways. It usually presents as a persistent mass, ulcer, plaque, or wart-like lesion and requires biopsy for diagnosis.

Vulvectomy

Surgical removal of part or all of the vulva, performed for selected cancers, precancerous lesions, or severe persistent disease.

Vulvitis

Inflammation or irritation of the external female genital area. It can cause itching, burning, redness, swelling, soreness, or discharge and may result from infection, allergy, skin disease, hormones, or friction.

Vulvodynia

Vulvodynia is chronic vulvar pain without an identifiable specific cause, often described as burning or rawness and triggered by touch, pressure, or occurring spontaneously.

Alternate Names:

Chronic Vulvar Pain

Vulvovaginal Candidiasis

A yeast infection of the vulva and vagina, usually caused by *Candida*. It commonly causes intense itching, burning, soreness, redness, and thick discharge; recurrent, severe, unusual, or treatment-resistant symptoms need testing to confirm the cause.

Vulvovaginitis

Simultaneous inflammation or infection of the vulva and vagina, commonly presenting with pruritus, burning, dysuria, dyspareunia, and abnormal vaginal discharge, resulting from infectious etiologies (such as *Candida albicans*, Bacterial vaginosis, *Trichomonas vaginalis*) or non-infectious causes (atrophic vaginitis, contact irritants).

Alternate Names:

Vaginitis and Vulvitis; Vulvovaginal Inflammation

W

Waardenburg Syndrome

A group of inherited conditions that may cause hearing loss and unusual coloring of the eyes, hair, or skin. Some forms also affect the arms or the nerves controlling the bowel; findings vary by type.

Waddell Signs

A standardized group of physical examination signs evaluated during back assessment to identify non-organic or behavioral components contributing to lower back pain. Signs include superficial tenderness, simulation testing, distraction maneuvers, regional sensory or motor deficits inconsistent with neuroanatomy, and overreaction during examination.

Alternate Names:

Waddell Non-Organic Signs; Waddell Score

WAGR Syndrome

A rare genetic condition that may cause an increased risk of Wilms kidney tumor, missing or poorly formed irises, urinary or reproductive differences, and developmental delay. Children need regular specialist monitoring, especially for kidney tumors.

Waist Circumference

The distance around the abdomen, measured at a standard level. A larger measurement can indicate more abdominal fat and a higher risk of diabetes and heart disease, but it must be interpreted with other health information.

Waist-Hip Ratio

A measurement comparing waist size with hip size.

It provides an estimate of where body fat is stored and may add information about diabetes and cardiovascular risk, but it does not diagnose disease by itself.

Wait List

A list of candidates registered to receive an organ transplant. Placement and allocation priority are determined by the applicable transplant system and may consider medical urgency, expected benefit, blood or tissue compatibility, organ size, waiting time, and other policy-based factors; it is not necessarily a simple first-come, first-served queue.

Alternate Names:

Waiting List; Transplant Waiting List; Transplant Waitlist

Wakefulness

The state of being conscious and able to respond to the surroundings. Sleep, medicines, illness, brain injury, and metabolic problems can change the level of wakefulness.

Waldenström's Macroglobulinemia

A slow-growing blood cancer in which abnormal immune cells make too much of an antibody called IgM. The blood can become unusually thick, causing blurred vision, headaches, bleeding, confusion, or numbness.

Waldenstrom Macroglobulinemia

A rare blood cancer in which abnormal immune cells build up in the bone marrow and make too much of an antibody called IgM. It may cause anemia, bleeding, vision or nerve problems, enlarged lymph

nodes, or no symptoms at first.

Alternate Names:

Lymphoplasmacytic Lymphoma

Waldenstrom's Macroglobulinemia

A lymphoplasmacytic cancer of the bone marrow that produces excess IgM and may cause anemia, enlarged lymph nodes, or hyperviscosity symptoms.

Waldeyer Ring

An annular anatomical arrangement of lymphoid tissue surrounding the opening of the pharynx and nasal cavity, consisting of the pharyngeal tonsils (adenoids), tubal tonsils, palatine tonsils, and lingual tonsils. It functions as the first line of immune defense against ingested or inhaled pathogens.

Alternate Names:

Waldeyer Lymphatic Ring; Pharyngeal Lymphoid Ring

Walker-Warburg Syndrome

A rare inherited disorder causing severe muscle weakness together with major abnormalities of the brain and eyes from birth. Babies may have low muscle tone, seizures, poor feeding, enlarged fluid spaces in the brain, and abnormal eye development; the condition is usually life-threatening in infancy.

Alternate Names:

WWS; Muscle-Eye-Brain Disease (Severe Type); HARD +/- E Syndrome

Walking Abnormalities

Walking abnormalities include changes in speed, balance, stride, posture, or coordination caused by pain, weakness, sensory loss, joint disease, or neurologic illness.

Walking Pneumonia

An informal clinical term for a mild, atypical community-acquired pneumonia (most frequently caused by *Mycoplasma pneumoniae* or *Chlamydia pneumoniae*), in which the patient presents with persistent dry cough, low-grade fever, and prominent radiographic interstitial infiltrates while remaining ambulatory and non-toxic.

Alternate Names:

Atypical Pneumonia

Walking Speed

The rate at which a person walks, often measured over a defined distance. It can provide information about mobility and function, but no single speed determines disability in every person.

Wallenberg Syndrome

A neurological condition caused by infarction of the lateral medulla oblongata, most commonly resulting from occlusion of the posterior inferior cerebellar artery (PICA) or vertebral artery. Manifestations include ipsilateral facial sensory loss, Horner syndrome, ataxia, dysphagia, hoarseness, and contralateral loss of pain and temperature sensation in the trunk and limbs.

Alternate Names:

Lateral Medullary Syndrome; PICA Syndrome; Posterior Inferior Cerebellar Artery Syndrome

Wallerian Degeneration

Breakdown of the part of a nerve beyond a severe injury after it loses contact with the nerve cell. The nerve may regrow slowly if the surrounding pathway remains intact, but recovery depends on the injury.

Walleyed

Walleyed describes eyes that appear misaligned or divergent; clinically, the condition may be strabismus and requires eye assessment when persistent.

Wall Stress

The strain placed on the wall of a heart chamber by the pressure inside it and the chamber's size. High wall stress makes pumping harder and may contribute to heart enlargement or failure.

Wandering Spleen

A spleen that can move unusually because its supporting bands are loose or missing. It may cause no symptoms or lead to abdominal pain, enlargement, twisting, loss of blood supply, or sudden severe illness.

Warburg Effect

A hallmark metabolic phenotype of malignant neoplastic cells in which cells preferentially convert glucose to lactate via aerobic glycolysis even in the presence of abundant oxygen, rather than utilizing mitochondrial oxidative phosphorylation, generating glycolytic intermediates for rapid cell proliferation.

Warfarin

A blood-thinning medicine that reduces production of vitamin-K-dependent clotting proteins. It prevents and treats clots but requires regular blood tests because food, illnesses, and many medicines alter its effect.

Warfarin-Induced Skin Necrosis

A rare, catastrophic thrombotic complication occurring 2 to 5 days after starting warfarin without heparin bridging, caused by the rapid initial decline in the short-half-life natural anticoagulant protein C before procoagulant factors fall, triggering microvascular thrombosis and cutaneous infarction in breasts, buttocks, and thighs.

Alternate Names:

Coumadin-Induced Skin Necrosis

Warfarin Syndrome

A pattern of fetal abnormalities caused by warfarin exposure during pregnancy, including nasal and skeletal abnormalities, eye or neurologic defects, and fetal or neonatal bleeding.

Warm and Cold Autoantibodies

Antibodies that make red blood cells clump at warmer or colder temperatures. They can interfere with laboratory testing or cause autoimmune destruction of red cells and anemia.

Warm Autoimmune Hemolytic Anemia

An illness in which the immune system makes antibodies that cause red blood cells to be destroyed too early, mainly in the spleen. It can cause tiredness, pale or yellow skin, dark urine, shortness of breath, or a fast heartbeat and requires medical evaluation.

Alternate Names:

wAIHA; Warm Antibody Hemolytic Anemia

Warm Ischemia

Lack of blood and oxygen reaching tissue while it remains at body temperature. It can quickly cause cell damage and is important during some injuries, operations, and organ transplantation.

Wart

A usually harmless rough skin growth caused by human papillomavirus. Warts may spread by contact and often disappear over time. Common types include common, plantar, and flat warts; appearance and symptoms vary by site.

Alternate Names:

Verruca

Warthin Tumor

A usually harmless tumor of a salivary gland, most often the parotid near the ear. It is strongly associated with tobacco use and may occur on both sides; evaluation distinguishes it from other growths.

Wart Remover Poisoning

Toxic exposure to a wart-removal product, often involving salicylic acid or another keratolytic. Severity depends on the substance, amount, route, symptoms, and duration of exposure.

Warty Dyskeratoma

A usually harmless skin growth, often on the head or neck, with a small central dip filled with keratin. It may look like skin cancer, so examination and sometimes a biopsy are needed.

Wasting

Abnormal loss of body weight, muscle, or other tissue, often associated with chronic disease, inadequate nutrition, inflammation, or cancer. Severe wasting may impair strength, immunity, and recovery.

Watchful Waiting

Planned observation without immediate active treatment, with clinical review and treatment if symp-

toms develop or the condition progresses. It may be used for selected cancers and other slowly progressive conditions.

Water Birth

Delivery of a baby while the birthing person remains in a tub or pool of warm water. It may reduce perceived labor pain for some people, but evidence about delivery-related benefits and risks is limited. Eligibility, monitoring, and facility policies determine whether it is offered.

Alternate Names:

Aquatic Delivery; Water Labor and Birth

Water Blister

A fluid-filled blister, usually containing clear serum, caused by friction, pressure, burns, or some skin disorders. The blister should be protected from further trauma and assessed if infected or widespread.

Waterborne Bacterial Disease

An infection acquired from water contaminated with bacteria, such as cholera, typhoid fever, or leptospirosis; prevention depends on safe water, sanitation, and food hygiene.

Water-Borne Disease

An illness acquired through water contaminated with infectious organisms or harmful chemicals. Examples include cholera, typhoid fever, and hepatitis A; prevention includes safe drinking water, sanitation, hand hygiene, and appropriate treatment of contaminated water.

Water Brash

A sudden rise of watery or salty-tasting saliva into the mouth, usually because stomach acid has refluxed into the esophagus. It may occur with heartburn, sour taste, throat irritation, or regurgitation.

Water Channel

A protein pore in a cell membrane that lets water cross quickly. These pores help the kidneys and other tissues move water and maintain the body's fluid balance.

Water Consumption

Intake of water and other fluids to replace normal losses and maintain hydration. Requirements vary with body size, diet, activity, climate, pregnancy, illness, and kidney or heart function; thirst and urine concentration can help guide intake, while excessive intake can cause dangerous hyponatremia.

Water-Deprivation Test

A supervised test that briefly limits drinking while urine concentration and blood results are monitored. It helps identify why a person produces excessive amounts of dilute urine and must be done under medical supervision because dehydration and high sodium can occur.

Water Hammer Pulse

A physical sign of severe chronic aortic regurgitation or high-output states characterized by a bounding, hyperdynamic peripheral pulse with an abrupt, forceful systolic upstroke followed by a rapid, precipitous diastolic collapse.

Alternate Names:

Corrigan Pulse; Collapsing Pulse

Water-Hammer Pulse

A pulse that feels forceful at first and then suddenly collapses. It is often associated with severe leakage of the aortic valve or other causes of a wide pulse pressure.

Alternate Names:

Corrigan's Pulse; Collapsing Pulse; Cannon Pulse

Waterhouse-Friderichsen Syndrome

Waterhouse-Friderichsen syndrome is adrenal hemorrhage and acute adrenal failure associated with overwhelming sepsis, classically meningococcal infection, causing shock and coagulopathy.

Water Intoxication

A dangerous fall in blood sodium caused by drinking or retaining more water than the body can remove. Severe cases can cause headache, confusion, seizures, or coma and need urgent treatment.

Water On The Brain

A nontechnical term usually referring to hydrocephalus, an abnormal accumulation or impaired circulation of cerebrospinal fluid that enlarges the ventricles and may increase intracranial pressure.

Water On The Knee

Alternate name; see *Swollen knee*.

Water Retention

Excess accumulation of fluid in the body's tissues or cavities, commonly causing swelling and sometimes resulting from heart, kidney, liver, venous, hormonal, or medication-related disorders.

Watershed Infarction

An ischemic cerebral or intestinal infarct occurring at the border zones between the terminal distal capillary distributions of two non-anastomosing major arterial territories (e.g., between ACA and MCA in the brain, or at the splenic flexure / Griffiths point in the colon), provoked by systemic hypoperfusion and severe hypotension.

Alternate Names:

Border-Zone Infarction

Water-Soluble Vitamin

A vitamin that dissolves in water and is stored only in limited amounts. The group includes vitamin C and the B vitamins, so regular intake is generally needed.

Waterston Shunt

A historical palliative surgical systemic-to-pulmonary shunt created between the ascending aorta and the right pulmonary artery to increase pulmonary blood flow in infants with cyanotic congenital heart defects. It has largely been replaced by the modified Blalock-Taussig shunt due to lower complication rates.

Alternate Names:

Waterston-Cooley Anastomosis; Ascending Aorta to Right Pulmonary Artery Shunt

Watery Eyes

Excessive tearing caused by irritation, allergy, infection, dry-eye reflex tearing, or blockage of the tear-drainage system. Persistent unilateral tearing or pain requires ocular assessment.

Wax

A water-resistant substance produced by ceruminous glands in the ear canal; earwax protects the canal and usually clears naturally.

Wax Poisoning

Toxic exposure to a wax product, usually causing little harm after a small accidental ingestion but potentially causing choking, aspiration, irritation, or toxicity when mixed with other chemicals.

Waxy Casts

Large, smooth, pale tube-shaped particles seen under a microscope in urine. They form in damaged kidney tubules and can suggest severe or long-standing kidney disease, especially when other urine or blood tests are abnormal.

WBC Count

A measurement of the number of white blood cells in a volume of blood, used with the differential count to evaluate infection, inflammation, immune disorders, marrow disease, or treatment effects.

Weakness

Reduced ability to generate force, which may be generalized or limited to one body region. Causes include disorders of muscle, nerve, neuromuscular junction, brain, or spinal cord, as well as metabolic illness, infection, medication effects, and deconditioning; sudden one-sided weakness or weakness with breathing, swallowing, or speech difficulty requires emergency assessment.

Weaning

Gradual reduction and eventual discontinuation of breastfeeding, bottle-feeding, or a medicine or other treatment, according to the relevant clinical context.

Wear Debris

Tiny particles produced when an artificial joint or other implant wears down. The particles can trigger inflammation, damage nearby bone, loosen the implant, and eventually cause it to fail.

Weaver's Bottom

Inflammation of the ischial bursa over the sitting bone, causing pain in the buttock that may worsen with prolonged sitting. It is also called ischial bursitis.

Weaver Syndrome

A rare genetic condition causing rapid growth before and after birth, a large head, distinctive facial features, low muscle tone, and delayed development or learning. Bone age may be advanced. Most cases involve a change in the *EZH2* gene; care is tailored to the child's needs.

Webbed Fingers

Partial or complete joining of adjacent fingers by skin or soft tissue, known as syndactyly; it may be congenital or acquired.

Webbed Neck

Extra folds of skin extending from the sides of the neck toward the shoulders. They may be present from birth and can occur with conditions such as Turner syndrome or Noonan syndrome.

Webbing Of The Fingers Or Toes

Partial or complete joining of adjacent fingers or toes by skin or other tissue. It is called syndactyly and may be congenital or acquired.

Weber

A name used in hearing assessment, especially the Weber test, in which a vibrating tuning fork is placed on the forehead or skull. It helps compare hearing between the two ears but is not a unit of measurement.

Weber-Christian Disease

Alternate name; see *Weber-Christian Disease*.

Weber Syndrome

A brainstem stroke syndrome caused by occlusion of paramedian branches of the posterior cerebral artery affecting the anterior midbrain. It is characterized by ipsilateral oculomotor (cranial nerve III) palsy and contralateral spastic hemiparesis of the upper and lower extremities.

Alternate Names:

Superior Alternating Hemiplegia; Ventral Midbrain Syndrome

Weber Test

A quick hearing test using a vibrating tuning fork placed on the middle of the forehead or skull. The examiner asks which ear hears the sound louder; the result helps distinguish blockage-related hearing loss from inner-ear or nerve-related loss.

Wedge Excision

Surgical removal of a triangular or wedge-shaped portion of tissue; commonly performed for breast biopsies, cervical lesions, and skin tumors.

Wedge Resection

Surgery that removes a small wedge-shaped piece of tissue, commonly from the lung or breast, to diagnose or treat a localized lesion. It removes less tissue than removal of an entire lobe.

Weever Fish

A venomous marine fish whose dorsal spines can cause a painful sting, local swelling, and occasionally systemic symptoms.

Wegener Granulomatosis

Alternate name; see *Granulomatosis with polyangiitis*.

Wegener's Granulomatosis

Alternate historical term; see *Granulomatosis With Polyangiitis*.

Weight-Bearing As Tolerated

An orthopaedic postoperative rehabilitation prescription allowing the patient to place as much

weight and mechanical force on an injured or operated lower extremity as is comfortable and tolerated without severe pain, typically using crutches or a walker for support.

Alternate Names:
WBAT

Weight Gain

Increase in body weight; may be intentional (muscle building, pregnancy) or unintentional (fluid retention, endocrine disorders, medication effects).

Weight Gain In Pregnancy

Recommended weight gain depends on weight before pregnancy and whether one or more babies are expected. For one baby, usual ranges are about 12.5–18 kg if underweight, 11.5–16 kg at usual weight, 7–11.5 kg if overweight, and 5–9 kg with obesity; prenatal clinicians monitor the pattern and fetal growth.

Weight Gain – Unintentional

Increase in body weight without a planned change in diet or activity, often caused by fluid retention, medicines, endocrine disease, reduced activity, or changes in eating; rapid swelling or breathlessness needs prompt assessment.

Weight Loss

A decrease in body weight that may be intentional or unintentional. Intentional loss is usually achieved through sustainable changes in eating, physical activity, and behavior; unintentional or rapid loss can indicate illness, inadequate nutrition, or medication effects and may require medical evaluation.

Weight Loss Medications

Medicines prescribed for selected people with obesity to help reduce weight, usually together with nutrition and activity changes. Choice depends on health conditions, other medicines, side effects, cost, and treatment goals.

Weight-Loss Medicines

Alternate name; see *Weight Loss Medications*.

Weight Loss Surgery

Weight-loss surgery, or bariatric surgery, changes the stomach or digestive tract to help treat severe obesity and related conditions. It requires long-term nutritional, medical, and lifestyle follow-up.

Weight-Reducing Diets

Dietary plans intended to create a sustained energy deficit and reduce excess body weight, ideally individualized with attention to nutrition, health conditions, and long-term adherence.

Weil Disease

Alternate name; see *Leptospirosis*.

Weil-Felix Reaction

A historical agglutination serological test for rickettsial infections (such as typhus and spotted fevers) that utilizes cross-reacting somatic O-antigens of *Proteus vulgaris* strains (OX-19, OX-2, and OX-K) to detect serum anti-rickettsial antibodies.

Weil-Felix Test

A classic serological agglutination assay that utilizes antigens from cross-reacting *Proteus vulgaris* strains (OX-19, OX-2, OX-K) to detect serum antibodies against various *Rickettsia* species responsible for typhus and spotted fever infections.

Alternate Names:

Weil-Felix Agglutination Reaction; Proteus Agglutination Test

Weill-Marchesani Syndrome

A rare inherited systemic connective tissue disorder characterized by the constellation of brachydactyly (short fingers and toes), short stature, joint stiffness, microspherophakia (small spherical lenses), and ectopia lentis with high predisposition to secondary pupillary block angle-closure glaucoma. Caused by autosomal recessive mutations in *ADAMTS10* or autosomal dominant mutations in *FBN1*.

Alternate Names:

WMS; Spherophakia-Brachymorphia Syndrome

Weil's Disease

A zoonotic bacterial infection caused by spirochaetes of the genus *Leptospira*, transmitted through contact with water or soil contaminated with the urine of infected animals (rodents, cattle, dogs). See *Lep-tospirosis*.

Wellens Syndrome

A specific pattern on a heart tracing that can signal severe narrowing of a major heart artery, even after chest pain stops. It indicates high heart-attack risk and needs urgent specialist assessment; exercise testing can be dangerous.

Alternate Names:

Wellens Pattern; LAD Coronary T-Wave Syndrome; Wellens Sign

Wells Score

A validated clinical prediction rule used to estimate the probability that a patient has a dangerous blood clot, specifically deep vein thrombosis (DVT) in the legs or pulmonary embolism (PE) in the lungs. By calculating points for clinical risk factors (including active cancer, recent surgery or bed rest, localized leg swelling or tenderness, fast heart rate, coughing blood, and prior clots), patients are categorized as “unlikely” (low risk) or “likely” (high risk). In low-risk patients, a normal/negative D-dimer blood test safely rules out a clot without scans; high-risk patients proceed directly to imaging (leg compression ultrasound for DVT or CT pulmonary angiography for PE).

Alternate Names:

Wells Criteria; Wells Clinical Score; Wells Rule for DVT and PE

Wells Score For Pulmonary Embolism

Alternate name; see *Wells Score*.

Welt

A raised, often itchy area of skin caused by localized swelling, commonly seen in hives or after an insect bite. A welt may fade within hours, but persistent or severe reactions need evaluation.

Wen

A common, usually harmless lump beneath the skin filled with a soft protein called keratin. It may become swollen, painful, or infected and can be removed if necessary.

Alternate Names:

Infundibular Cyst; Epidermal Inclusion Cyst; Sebaceous Wen

Wenckebach Phenomenon

A heart-rhythm pattern in which each heartbeat takes slightly longer to pass from the upper to lower chambers until one beat is missed. It may be harmless or reflect heart disease, depending on the setting.

Alternate Names:

Second-Degree AV Block Type 1; Mobitz I Block

Wens

Alternate name; see *Epidermoid cyst*.

Werdnig-Hoffmann Disease

The most severe early form of inherited spinal muscular atrophy, also called type 1 spinal muscular atrophy. It usually begins before 6 months of age and causes very weak muscles, poor head control, reduced reflexes, a weak cry, feeding difficulty, and breathing problems. Babies generally cannot sit without support. New treatments can improve survival and function, but affected infants need urgent specialist care and breathing and feeding support.

Alternate Names:

Spinal Muscular Atrophy Type 1 (SMA 1); Severe Infantile Spinal Muscular Atrophy

Wermer's Syndrome

Alternate name; see *Multiple endocrine neoplasia, type 1 (MEN 1)*.

Wermer Syndrome

Alternate name; see *Multiple endocrine neoplasia, type 1 (MEN 1)*.

Werner's Syndrome

A rare inherited condition that causes signs of aging

earlier than usual, often after puberty. It may cause early cataracts, short stature, thin skin, gray hair, diabetes, weak bones, and increased cancer risk.

Werner Syndrome

A rare inherited condition that causes signs of aging earlier than usual, often after puberty. Features may include short stature, early cataracts, thin or tight skin, gray hair, diabetes, weak bones, and increased cancer risk. Regular medical monitoring and treatment of each complication are needed.

Wernicke Aphasia

A fluent receptive aphasic syndrome resulting from an ischemic stroke or lesion in the posterior portion of the superior temporal gyrus of the dominant hemisphere (Brodmann area 22), characterized by fluent, effortless speech that lacks semantic meaning ("word salad"), accompanied by profound impairment in language comprehension and repetition.

Alternate Names:

Receptive Aphasia; Sensory Aphasia

Wernicke Area

A brain region, usually in the left temporal lobe, that helps a person understand spoken and written language. Damage can cause fluent speech that lacks meaning and poor understanding of language.

Wernicke Encephalopathy

A sudden brain disorder caused by severe vitamin B1 deficiency. It may cause confusion, difficulty walking, and abnormal eye movements and can lead to permanent damage without prompt treatment.

Wernicke-Korsakoff Encephalopathy

A spectrum of neurocognitive impairment caused by severe thiamine (vitamin B1) deficiency (most commonly in chronic alcohol use disorder), progressing from the acute reversible triad of Wernicke encephalopathy (confusion, ataxia, ophthalmoplegia) to the chronic irreversible Korsakoff syndrome (anterograde amnesia, confabulation).

Wernicke-Korsakoff Syndrome

A brain disorder caused by severe vitamin B1 de-

ficiency. It may begin with confusion and poor coordination and leave lasting memory problems, difficulty learning, and inaccurate made-up explanations; alcohol misuse, poor nutrition, and prolonged vomiting are common causes.

Wernicke's Area

A brain region important for understanding spoken and written language.

Alternate Names:

Wernicke's Speech Area; Sensory Speech Area

Wernicke's Encephalopathy

An acute neurologic disorder caused by thiamine deficiency, classically involving confusion, eye-movement abnormalities, and gait or coordination impairment. It requires prompt thiamine treatment.

Westergren Method

The reference laboratory procedure used to determine the erythrocyte sedimentation rate (ESR). Anticoagulated whole blood is placed in an upright, calibrated Westergren tube for one hour, measuring the distance in millimeters that red blood cells settle under gravity to assess systemic inflammation.

Alternate Names:

Westergren ESR; Westergren Sedimentation Technique

Westermarck Sign

An area of unusually reduced blood-vessel markings on a chest X-ray, sometimes seen beyond a clot in a lung artery. It may suggest pulmonary embolism but is not reliable enough to diagnose it alone.

Western Blot

A laboratory test that separates proteins and uses antibodies to find a specific protein. It can help study infections, immune reactions, or genetic and research problems, depending on the test.

Alternate Names:

Protein Immunoblot

Westley Croup Score

A clinical score used to estimate how severely croup

is obstructing a child's airway. It considers noisy breathing, chest retractions, air movement, bluish coloring, and alertness; a higher score suggests more severe illness and helps guide urgent treatment and observation.

Alternate Names:

Westley Clinical Scoring System for Croup; Croup Severity Score

West Nile Encephalitis

Inflammation of the brain caused by neuroinvasive West Nile virus, transmitted mainly by mosquitoes. It may cause fever, headache, confusion, tremor, weakness, seizures, or coma. There is no specific routine antiviral treatment; severe illness requires hospital-based supportive care.

West Nile Neuroinvasive Disease

A severe, potentially fatal manifestation of mosquito-borne West Nile virus infection affecting less than 1 percent of infected individuals, presenting as aseptic meningitis, encephalitis (with tremors and parkinsonism), or acute flaccid paralysis resembling poliomyelitis (anterior horn cell loss).

Alternate Names:

WNND

West Nile Virus

A mosquito-borne flavivirus that can cause asymptomatic infection, a febrile illness, or neuroinvasive disease such as meningitis, encephalitis, or acute flaccid paralysis. Risk of severe disease is higher in older adults and people with certain medical conditions.

West Nile Virus Infection

West Nile virus infection is a mosquito-borne illness ranging from fever and body aches to neuroinvasive meningitis, encephalitis, weakness, or paralysis.

West Syndrome

A serious seizure disorder beginning in infancy, with repeated sudden spasms and an abnormal brain-wave pattern. Development may slow or regress; causes include brain injury, genetic conditions, and metabolic disease, and urgent treatment is needed.

Wet Age-Related Macular Degeneration

Alternate name; see *Wet macular degeneration*.

Wet AMD

Alternate name; see *Wet macular degeneration*.

Wet Beriberi

The predominantly cardiovascular form of severe thiamine deficiency. It can cause a fast heartbeat, enlarged or weakened heart, fluid retention, swelling, and high-output heart failure.

Wet Dream

Involuntary ejaculation during sleep, usually occurring in adolescence or adulthood and generally a normal physiological event.

Wet Gangrene

Tissue death complicated by bacterial infection and tissue swelling, producing moist, discolored, rapidly spreading necrosis. It requires urgent medical assessment.

Wet Macular Degeneration

The neovascular form of age-related macular degeneration in which abnormal blood vessels grow beneath or within the retina and leak fluid or blood, causing rapid central-vision loss.

Alternate Names:

Neovascular AMD; Exudative Age-Related Macular Degeneration; Wet AMD

Wet-to-Dry Dressing

A mechanical wound debridement technique in which saline-moistened gauze is applied directly to an open wound bed, allowed to dry, and subsequently removed. Dead tissue and exudate adhering to the dried dressing are pulled away during dressing changes.

Alternate Names:

Wet-to-Dry Debridement; Mechanical Gauze Dressing

Wharton Duct

The primary excretory duct of the submandibular

salivary gland, approximately 5 cm in length, that courses anteromedially along the floor of the mouth to empty through the sublingual caruncle at the base of the lingual frenulum; the most frequent anatomical site of salivary sialolithiasis.

Alternate Names:

Submandibular Duct

Wharton Jelly

The soft, jelly-like tissue surrounding the blood vessels in the umbilical cord. It cushions the vessels and helps prevent them from being squeezed or bent during pregnancy and labor.

Wharton's Jelly

Gelatinous connective tissue within the umbilical cord that surrounds and supports the umbilical blood vessels and helps protect them from compression.

Wheal

A temporary, raised, often itchy area of skin caused by swelling in the skin. It commonly occurs with hives, an allergic reaction, or an insect bite and may move or disappear within hours.

Wheal And Flare

A temporary raised, swollen area of skin surrounded by redness. It is usually caused by release of histamine during hives, an allergy, or another immediate skin reaction.

Wheat Allergy

An immune reaction to proteins in wheat that may cause hives, stomach symptoms, vomiting, or breathing problems.

Alternate Names:

Wheat Hypersensitivity; Cereal Grain Allergy

Wheelchairs

Alternate name; see *Wheelchair*.

Wheeled Stretcher

Mobile patient transport device with wheels; used in hospitals and emergency services for moving pa-

tients who cannot walk.

Wheeze

A high-pitched whistling sound caused by narrowed airways. It often occurs with asthma, infection, allergy, or chronic lung disease; sudden wheezing after choking or with severe breathlessness needs urgent care.

Wheezing

A musical or whistling sound caused by narrowed lower airways, usually louder when breathing out. It may result from asthma, infection, chronic lung disease, allergy, airway swelling, mucus, or an inhaled object.

Whiplash

A neck injury caused by the head moving suddenly backward and forward, often in a vehicle crash but also after a fall or sports injury. Pain, stiffness, headache, dizziness, or arm tingling may appear immediately or later. Most cases improve over weeks, but weakness, numbness, trouble walking, or severe pain after major trauma needs urgent assessment.

Alternate Names:

Cervical Acceleration-Deceleration Injury; CAD Injury; Neck Sprain

Whiplash Injury

Alternate name; see *Whiplash*.

Whipple Disease

A rare bacterial infection that can damage the small intestine, joints, brain, heart, or other organs. It may cause years of joint pain followed by weight loss, persistent diarrhea, abdominal pain, and poor nutrient absorption.

Whipple Procedure

A major operation that removes the head of the pancreas and nearby parts of the small intestine, bile duct, and gallbladder, then reconnects the digestive tract. It is used for selected cancers and other serious diseases in this area.

Whipple's Disease

A rare bacterial infection caused by *Tropheryma whipplei*, damaging intestinal absorption and potentially affecting joints, brain, or heart.

Alternate Names:

Tropheryma Whipplei Infection; Whipple Disease

Whipple Triad

Three findings supporting that symptoms are caused by low blood sugar: typical symptoms occur, blood sugar is low at that time, and symptoms improve after blood sugar is raised.

Whipple Triad for Insulinoma

Three findings that support that symptoms are caused by low blood sugar: symptoms occur, blood sugar is low at the same time, and the symptoms improve when blood sugar rises. Doctors use this pattern with other tests to find the cause, including a possible insulinoma.

Whipple Triad of Hypoglycemia

The three cardinal clinical criteria required to substantiate a clinical diagnosis of genuine hypoglycemia: symptoms and signs consistent with hypoglycemia (such as diaphoresis, tremor, tachycardia, confusion); a documented low plasma glucose concentration (typically below 55 mg/dL [3.0 mmol/L]) at the exact time of symptoms; and prompt resolution of symptoms following administration of exogenous glucose.

Alternate Names:

Whipple Hypoglycemic Triad

Whipworm

A parasitic roundworm of the genus *Trichuris*, usually *Trichuris trichiura* in humans. Infection occurs by ingesting embryonated eggs and may cause abdominal pain, diarrhea, anemia, or rectal prolapse when severe.

Whipworm Infection

Intestinal infection caused by the soil-transmitted helminth *Trichuris trichiura* (whipworm), endemic in tropical and subtropical regions with poor sanitation. Humans acquire infection by ingesting em-

bryonated eggs from contaminated soil, food, or water.

Alternate Names:

Trichuris Trichiura Infection; Whipworm Infection

Whirlpool Bath

Hydrotherapy device providing agitated water for therapeutic bathing; used in wound care, physical therapy, and rehabilitation.

Whispered Pectoriloquy

An examination finding in which whispered words sound unusually clear through a stethoscope over the lung. It may suggest that air-filled lung has become solid, as in pneumonia, but it is not diagnostic alone.

White Blood Cell

A cell of the immune system that helps protect the body from infections, foreign substances, and abnormal cells. White blood cells are made mainly in the bone marrow and include neutrophils, lymphocytes, monocytes, eosinophils, and basophils. Their number or function may change with infection, inflammation, immune disorders, or bone-marrow disease.

White Blood Cell Count

A blood test measuring the number of white blood cells. A high or low result can occur with infection, inflammation, medicines, immune disorders, or bone-marrow disease and must be interpreted with the differential count and clinical findings.

White Blood Cell Labeling

A scan method in which a person's white blood cells are removed, marked with a small amount of radioactive material, and returned to the body. The cells may collect at areas of infection or inflammation, which can then be seen on images.

White Cell

Another name for a white blood cell, an immune cell made mainly in the bone marrow that helps defend the body against infection, foreign substances, and abnormal cells.

White Cell Count

A blood test measuring the number of white blood cells and often the proportion of each type. Results help assess infection, inflammation, immune disorders, and bone-marrow problems.

White Clot Syndrome

A severe arterial or venous thrombotic complication associated with heparin-induced thrombocytopenia (HIT). It is characterized by platelet-dense, fibrin-rich arterial thrombi (white thrombi) that can lead to limb ischemia, stroke, or myocardial infarction.

Alternate Names:

HIT-Associated Thrombosis; Heparin-Associated White Thrombus Syndrome

White Coat Hypertension

A clinical blood pressure pattern characterized by persistently elevated blood pressure readings recorded in a medical office or clinic setting in an individual whose out-of-office automated ambulatory or home blood pressure monitoring readings are consistently normotensive.

Alternate Names:

White Coat Effect; Isolated Clinic Hypertension

White-Coat Hypertension

Blood pressure that is high in a medical setting but normal outside it. Home or ambulatory readings help confirm the pattern, which may still predict higher future hypertension risk.

Alternate Names:

White-Coat Syndrome; Isolated Clinic Hypertension

White Finger

Episodic pallor or whitening of the fingers caused by vasospasm, commonly associated with Raynaud phenomenon or hand-arm vibration syndrome.

Whiteheads

Whiteheads are closed comedones formed when oil and dead skin block a hair follicle, producing small pale or skin-colored acne bumps.

White Infarction

Tissue death caused by loss of blood flow in a solid organ such as the heart, kidney, or spleen. The damaged area looks pale because little blood can reach it through alternate vessels.

Alternate Names:

Anemic Infarction; Pale Infarction

White Matter

Tissue in the brain and spinal cord made mainly of nerve fibers covered by a protective substance called myelin. It carries signals between different brain areas and between the brain and spinal cord.

White Matter Hyperintensities

Areas of increased signal intensity on T2-weighted and FLAIR brain magnetic resonance imaging scans located in the deep periventricular and subcortical white matter, representing microvascular lipohyalinosis, chronic ischemia, and demyelination from cerebral small vessel disease.

Alternate Names:

WMHs; Leukoaraiosis

White Matter Of The Brain

The brain tissue composed mainly of myelinated axons and supporting glial cells, connecting different brain regions and the brain with the spinal cord; disease or injury can impair cognition, sensation, coordination, or movement.

White Of The Eye

The sclera, the tough, opaque outer coat of the eye surrounding the cornea and helping maintain the shape of the globe.

White Spot Disease

Alternate name; see *Lichen sclerosus*.

White Tongue

A white coating or patches on the tongue caused by debris, dry mouth, irritation, infection, inflammation, or other oral conditions.

Whitlow

An infection of the fingertip or tissues around a finger or toenail, often involving the nail fold. It may be bacterial, fungal, or caused by herpes simplex virus; painful grouped blisters suggest herpetic whitlow, whereas pus and a localized abscess suggest bacterial infection.

Whitlows

Plural of whitlow; see *Whitlow*.

WHO Classification of Vitamin A Deficiency

A standardized clinical grading system established by the World Health Organization (WHO) to stage eye damage (xerophthalmia) caused by vitamin A deficiency:

- **XN:** Night blindness (inability to see in dim light or darkness).
- **X1A:** Conjunctival xerosis (dryness and lack of shine on the white of the eye).
- **X1B:** Bitot's spots (foamy, silvery-white patches on the white of the eye).
- **X2:** Corneal xerosis (hazy, dry surface on the clear front of the eye).
- **X3A:** Corneal ulceration or keratomalacia involving less than one-third of the cornea.
- **X3B:** Severe corneal melting (keratomalacia) involving one-third or more of the cornea, causing permanent blindness.
- **XS:** Corneal scars (permanent scarring left by healed ulcers).
- **XF:** Xerophthalmic fundus (small pale spots on the back of the eye/retina).

Alternate Names:

WHO Xerophthalmia Classification; Vitamin A Deficiency Eye Grading; WHO Vitamin A Staging

Whole-Body Irradiation

Radiation treatment directed at the entire body, most often given before a stem-cell transplant to suppress the immune system and make room for donated cells. It can affect the bone marrow, fertility, and other organs.

Whole-Body Scan

An imaging examination that surveys much or all of the body, using a technique such as PET/CT, CT, MRI, or a nuclear medicine scan. It may be used for selected cancer staging, infection localization, or evaluation of systemic disease; the coverage and usefulness depend on the test and clinical question.

Whole Bowel Irrigation

A gastrointestinal decontamination technique in acute clinical toxicology in which large volumes of an isosmotic polyethylene glycol electrolyte solution are administered orally or via nasogastric tube until the rectal effluent is clear, indicated for toxic ingestions of sustained-release medications, enteric-coated tablets, iron, or illicit drug packets ("body packers").

Alternate Names:

WBI

Whole-Bowel Irrigation

A hospital treatment that flushes the intestines with a special polyethylene-glycol drink. It is used only for selected poisonings or swallowed objects after clinicians assess the airway and risks.

Whole-Brain Radiation Therapy

Radiation treatment directed at the entire brain, used in selected people with multiple brain metastases or cancer cells around the brain. It may also be used to reduce brain-spread risk in selected cancers; side effects depend on dose and treatment plan.

Whole Breast Radiation Therapy

Whole breast radiation therapy treats remaining breast tissue after breast-conserving surgery to reduce local recurrence risk, with planned dosing and monitoring for skin and tissue effects.

Whole Exome Sequencing

A genetic test that reads most protein-coding sections of a person's DNA. It can identify changes causing some inherited disorders, but it may miss changes outside coding regions, structural changes, or causes not yet understood; results require clinical interpretation.

Whole Genome Sequencing

Laboratory analysis of nearly all of a person's nuclear DNA, including coding and noncoding regions, and sometimes mitochondrial DNA. It can identify many types of genetic variants but may produce uncertain or incidental findings and does not detect every cause of disease; results require appropriate clinical interpretation.

Whole-Genome Sequencing

Sequencing of nearly the complete nuclear genome, including coding and noncoding regions, together with mitochondrial DNA when covered by the assay. It can detect a broad range of variants but generates substantial interpretation and incidental-finding challenges.

Whooping Cough

A highly contagious respiratory infection caused by *Bordetella pertussis*. It causes prolonged bouts of rapid coughing that may be followed by a whooping sound or vomiting; infants may have pauses in breathing without the typical whoop. Also called pertussis.

Whooping-Cough

Alternate name; see *Whooping Cough*.

Whorled Pattern

A characteristic histological or clinical swirling, spiraling architectural configuration. In pathology, it describes swirling arrangements of spindle cells seen in meningiomas, fibromas, or leiomyomas; in dermatology, it describes patterns along the lines of Blaschko.

Alternate Names:

Whorled Architecture; Storiform-Whorled Pattern

Wickham Striae

Fine, lacy white reticular lines and arborizing patterns seen on the surface of papules and mucosal plaques in lichen planus, classically observed on the buccal mucosa.

Widal Reaction

An older blood test for antibodies associated with typhoid or paratyphoid fever. It is not very reliable because results may reflect past infection or vaccination, so culture or molecular testing is usually preferred.

Widal Test

A historical presumptive serological agglutination test for enteric (typhoid and paratyphoid) fever that detects agglutinating serum antibodies against the somatic O and flagellar H antigens of *Salmonella enterica* serovar Typhi.

Widely Spaced Teeth

Teeth separated by unusually large gaps, also called diastema when the gap is localized. Causes include normal development, missing teeth, tooth-size differences, habits, or jaw and gum conditions.

Widened Mediastinum

A radiographic finding on an upright posterior-anterior chest X-ray defined as mediastinal width exceeding 8 cm (or greater than twenty-five percent of thoracic width). It warrants urgent evaluation for acute aortic dissection, mediastinal hematoma, mediastinitis, or mass lesions.

Alternate Names:

Mediastinal Widening; Mediastinal Enlargement

Widened Pulse Pressure

A pulse pressure (difference between systolic and diastolic blood pressure) greater than 60 mmHg or greater than fifty percent of the systolic value. It is commonly observed in aortic regurgitation, severe arteriosclerosis, thyrotoxicosis, fever, sepsis, and arteriovenous malformations.

Wide Splitting of S2

An abnormal prolongation of the interval between the aortic (A2) and pulmonic (P2) components of the second heart sound that varies physiologically with respiration but remains distinctly separated in expiration. It occurs due to delayed right ventricular emptying (such as right bundle branch block or pulmonary stenosis) or early aortic valve closure.

Wilkie Syndrome

Vascular compression of the third (horizontal) segment of the duodenum between the abdominal aorta and the overlying superior mesenteric artery (SMA). It leads to partial or complete duodenal obstruction, characterized by postprandial abdominal pain, early satiety, nausea, and vomiting.

Alternate Names:

Superior Mesenteric Artery Syndrome; SMA Syndrome; Arteriomesenteric Duodenal Compression

Williams Syndrome

A genetic condition caused by loss of a small section of chromosome 7, including a gene important for elastic tissues. It may cause characteristic facial features, heart-vessel narrowing, high blood calcium, developmental differences, learning difficulties, and connective-tissue problems. Regular heart, calcium, hearing, and developmental checks are important.

Wilms Tumor

A malignant embryonal tumor of the kidney in children. It may present as an abdominal mass, pain, hematuria, or an incidental finding and may be associated with syndromes such as WAGR or Beckwith-Wiedemann syndrome. Treatment and prognosis depend on stage and tumor biology.

Alternate Names:

Nephroblastoma; Pediatric Renal Adenosarcoma

Wilm's Tumour

Source spelling variant of *Wilms tumor*, a malignant embryonal kidney tumor occurring mainly in young children.

Wilson Disease

An autosomal recessive disorder usually caused by disease-causing variants in the *ATP7B* gene, which encodes a protein needed to transport copper and excrete excess copper into bile. Copper accumulates in the liver and may later affect the brain, eyes, kidneys, blood, and other tissues. Manifestations include hepatitis, cirrhosis, acute or chronic liver failure, tremor, dystonia, poor coordination, speech changes, mood or behavior changes, and Kayser-Fleischer rings around the cornea.

Wilson's Disease

Alternate name; see *Wilson Disease*.

Windkessel Effect

The hemodynamic property of large elastic arteries, particularly the aorta, which expand during ventricular systole to store a portion of stroke volume and recoil during diastole. This elastic recoil sustains downstream blood flow and maintains organ perfusion throughout diastole.

Alternate Names:

Windkessel Function; Arterial Elastic Reservoir Effect

Windowing

Adjusting the brightness and contrast of a CT image so particular tissues, such as bone, lung, or soft tissue, are easier to see.

Hepatitis B Window Period

The interval during acute resolving hepatitis B virus infection between the disappearance of detectable hepatitis B surface antigen (HBsAg) and the appearance of protective anti-HBs antibodies, during which IgM antibody to hepatitis B core antigen (anti-HBc IgM) serves as the sole serological marker of acute infection.

Windpipe

The tube carrying air from the voice box to the two main airways leading to the lungs. It is supported by firm rings that help keep it open.

Winged Scapula

An abnormal musculoskeletal prominence of the medial border and inferior angle of the scapula protruding posteriorly from the thoracic cage, most commonly caused by traction injury, surgical damage, or neuropathy of the long thoracic nerve of Bell paralyzing the serratus anterior muscle.

Alternate Names:

Scapula Alata

Winterbottom Sign

Prominent enlargement of the posterior cervical

lymph nodes that serves as a classic clinical physical sign of early-stage African trypanosomiasis (sleeping sickness), caused by *Trypanosoma brucei*.

Alternate Names:

Winterbottom's Sign

Winter Formula

An established physiological mathematical equation used to assess whether respiratory compensation is appropriate in a patient with pure metabolic acidosis. Calculated as Expected $PaCO_2 = (1.5 \times [HCO_3^-]) + 8 \pm 2$; a measured $PaCO_2$ higher than the calculated expected range signifies a concomitant primary respiratory acidosis (ventilatory failure), whereas a measured $PaCO_2$ lower than expected indicates an accompanying primary respiratory alkalosis.

Alternate Names:

Winter's Compensation Formula; Acid-Base Compensation Equation

Winter's Formula

A clinical physiological equation used to calculate expected respiratory compensation (arterial partial pressure of carbon dioxide, PCO_2) in response to metabolic acidosis: $PCO_2 = (1.5 \times [HCO_3^-]) + 8 \pm 2$. If measured PCO_2 is higher or lower than calculated, a coexisting respiratory acidosis or alkalosis is present.

Alternate Names:

Winter Formula; Metabolic Acidosis Compensation Formula

Winter Vomiting Disease

An acute gastroenteritis, usually caused by norovirus, characterized by sudden vomiting, diarrhea, and abdominal cramps.

Wireless Motility Capsule

A swallowed capsule that records pressure, acidity, temperature, and movement as it travels through the digestive tract. The measurements estimate how long food takes to pass through the stomach and intestines and may help investigate unexplained constipation, diarrhea, nausea, or bloating.

Wirsung Duct

The main excretory duct of the pancreas, extending from the tail through the body and head of the gland, joining the common bile duct at the hepatopancreatic ampulla of Vater to empty digestive enzymes into the second part of the duodenum at the major duodenal papilla.

Alternate Names:

Main Pancreatic Duct

Wisdom Teeth

Wisdom teeth are the third molars that commonly emerge in late adolescence or adulthood. Impaction, infection, decay, cysts, gum disease, or crowding can cause pain and swelling; dental examination and imaging determine whether monitoring or removal is appropriate.

Wisdom Tooth

The last molar in each dental quadrant, usually erupting in late adolescence or early adulthood. Impaction may cause pain, infection, or damage to adjacent teeth.

Alternate Names:

Dens Serotinus; Wisdom Teeth

Wiskott-Aldrich Syndrome

A rare inherited immune disorder that mainly affects boys and causes eczema, repeated infections, and a low number of unusually small platelets. It can also cause bleeding and autoimmune problems and requires specialist care.

Wiskott-Aldrich Syndrome Protein

A cytoplasmic actin-regulatory protein encoded by the *WAS* gene on the X chromosome that coordinates actin cytoskeleton remodeling in hematopoietic cells and immune synapse formation; loss-of-function mutations cause Wiskott-Aldrich syndrome and X-linked thrombocytopenia.

Alternate Names:

WASP

Witch's Milk

A temporary milky breast discharge in a newborn

caused by maternal hormones crossing the placenta; it usually resolves without squeezing or treatment, which can otherwise cause infection.

Withdrawal

Physical or psychological symptoms that occur when a person who has developed dependence reduces or stops using a medicine or psychoactive substance. Symptoms vary by substance and may include anxiety, agitation, sweating, tremor, nausea, pain, insomnia, cravings, or seizures; some forms require urgent medical care.

Alternate Names:

Abstinence Syndrome; Substance Withdrawal Syndrome

Withdrawal Reflex

An automatic response in which a painful stimulus makes a limb pull away from danger. The opposite limb may straighten to help maintain balance.

Withdrawal Symptoms

Physical or psychological symptoms that occur when a person stops or reduces a substance or medicine after the body has adapted to it. The symptoms depend on the substance, duration of use, and the person's health.

Withdrawal Syndrome

A predictable set of signs and symptoms that occur when a drug is discontinued or the dose is reduced after chronic use, reflecting the physiological rebound from drug adaptation.

Wolff-Chaikoff Effect

An autoregulatory mechanism whereby exposure to high levels of inorganic iodide temporarily inhibits organification and thyroid hormone synthesis within the thyroid gland. This effect typically lasts about 10 to 14 days before escape occurs, preventing iodine-induced hyperthyroidism.

Alternate Names:

Wolff-Chaikoff Block; Iodide Organification Inhibition

Wolffian Ducts

Temporary tubes in the developing embryo that form parts of the male reproductive system, including the sperm-transport ducts. They usually shrink during typical female development, although small remnants may remain.

Wolff-Parkinson-White Accessory Pathway-Related Tachycardia

Alternate name; see *Wolff-Parkinson-White syndrome*.

Wolff-Parkinson-White Syndrome

Alternate name; see *Pre-excitation syndrome*.

Wolf-Hirschhorn Syndrome

A rare genetic disorder caused by loss of part of chromosome 4. It can cause poor growth, a small head, distinctive facial features, developmental and intellectual disability, seizures, and heart or other organ abnormalities; lifelong specialist support is usually needed.

Alternate Names:

4p- Syndrome; 4p Deletion Syndrome

Wolfram Syndrome

A rare inherited disorder that commonly causes diabetes requiring insulin and progressive loss of vision from optic-nerve damage. It may also cause excessive thirst and urination, hearing loss, bladder problems, balance difficulty, or other nerve-system problems. Treatment monitors and supports each affected function.

Wolinella

Genus of anaerobic, Gram-negative bacteria found in the oral cavity and gastrointestinal tract; associated with periodontal disease.

Wolman Disease

A severe inherited disorder in which a missing enzyme causes fats to build up in organs. It usually begins in infancy with vomiting, diarrhea, poor growth, an enlarged liver and spleen, and adrenal-gland problems. Without treatment it can be fatal

early; enzyme replacement and specialist care are required.

Wolman's Disease

A severe lysosomal acid-lipase deficiency presenting in infancy with hepatosplenomegaly, adrenal calcification, malabsorption, vomiting, diarrhea, and failure to thrive. It is a severe form of lysosomal acid-lipase deficiency and can be fatal early without treatment.

Womb

Common name for the uterus; the muscular organ where a fetus develops during pregnancy.

Alternate Names:

Uterus; Metra; Hystera

Womb Growths

Alternate name; see *Uterine fibroids*.

Women Health

Alternate name; see *Women's health*.

Women's Health

Medical specialty focusing on conditions unique to or more prevalent in females, including reproductive health, pregnancy, menopause, and gender-specific disease patterns.

Alternate Names:

Gynecological and Obstetric Health; Female Health Care

Wood Lamp Examination

Examination of the skin in a dark room using special ultraviolet light. The light can make some color changes and infections easier to see, but the finding usually needs confirmation with the examination and other tests.

Woods Corkscrew Maneuver

An emergency procedure used when a baby's shoulders become stuck during birth. A trained clinician rotates the baby's shoulders to help release them and complete delivery.

Wood's Light

A special ultraviolet light used in a darkened room to make some skin colors, scales, and infections easier to see. It can support an examination but usually cannot identify the cause by itself.

Wood Spirit

An old name for methanol, a toxic alcohol whose ingestion can cause metabolic acidosis, blindness, and death.

Woods Screw Maneuver

A rotational maneuver used during shoulder dystocia to rotate the fetal shoulders and assist delivery.

Wood-Unit

A clinical unit of vascular resistance calculated by dividing the pressure gradient across a vascular bed (in mmHg) by cardiac output (in L/min). One Wood unit equals approximately $80 \text{ dyn}\cdot\text{s}/\text{cm}^5$, commonly used in evaluating pulmonary hypertension.

Alternate Names:

Wood Resistance Unit; Hybrid Resistance Unit (HRU)

Woody Tongue

A rare long-lasting infection, usually caused by *Actinomyces*, that makes the tongue and nearby tissues hard and swollen. It can interfere with eating, speaking, or breathing.

Woolly Hair

A rare structural anomaly of scalp hair characterized by tightly coiled, fine, spiraled curls in individuals of non-African descent. It may be inherited in autosomal dominant or recessive patterns and can occur as an isolated trait or part of syndromic disorders such as Naxos disease or Carvajal syndrome.

Alternate Names:

Woolly Hair Syndrome; Hereditary Woolly Hair

Woolsorters' Disease

A form of inhaled anthrax acquired by breathing spores of *Bacillus anthracis*, historically associated with handling contaminated wool or animal prod-

ucts. It can cause severe breathing illness and requires urgent treatment.

Alternate Names:

Inhalation Anthrax; Pulmonary Anthrax; Rag-picker's Disease

Word Blindness

An older term for alexia, an acquired inability to read or recognize written words despite adequate vision and previously developed language ability, usually caused by brain dysfunction or injury.

Word Deafness

An acquired inability to understand spoken words even though ordinary hearing is intact. It usually results from damage to brain areas that connect hearing with language, such as after a stroke or head injury.

Alternate Names:

Pure Word Deafness; Auditory Agnosia for Speech

Word Recognition Scoring

A hearing test measuring how accurately a person repeats or identifies spoken words at a comfortable volume. It helps assess how well the hearing system and brain understand speech.

Word Salad

Speech made of words or phrases that have little or no logical connection, making the person difficult to understand. It can occur with severe psychosis, mania, brain disease, or intoxication and needs assessment in context.

Working Memory

The ability to hold a small amount of information briefly and use it while completing a task, such as remembering instructions while following them. Attention, stress, sleep, illness, and brain conditions can affect it.

Wound

Damage to body tissue caused by trauma, surgery, pressure, heat, chemicals, or another cause. A wound may be open or closed and can vary in depth,

contamination, bleeding, and injury to nearby nerves, vessels, or organs.

Wound Care

Assessment and treatment of a wound through cleansing, bleeding control, removal of dead or contaminated tissue when indicated, appropriate closure or dressing, pain control, and follow-up. Care also includes tetanus prevention, pressure relief, and treatment of infection or underlying conditions; antibiotics are reserved for selected contaminated wounds, bites, or infections.

Wound Classification

A description of common injury types: an abrasion is a scrape, a laceration is a torn cut, a contusion is a bruise from blunt force, and an incised wound is a clean cut from a sharp object.

Wound Complication

A problem that develops during healing, such as infection, separation of wound edges, bleeding, fluid collection, tissue death, or excessive scarring. Increasing pain, redness, swelling, drainage, fever, or wound opening should be assessed promptly.

Wound Debridement

The surgical, enzymatic, autolytic, or mechanical removal of foreign material, necrotic non-viable tissue, cellular debris, and infected slough from a wound bed to eliminate bacterial burden, reduce infection risk, and promote healthy granulation tissue formation.

Wound Dehiscence

Partial or complete reopening of a surgical wound after it has been closed. It may follow infection, poor blood supply, diabetes, increased pressure, or strain on the wound. New separation, drainage, fever, severe pain, or visible deeper tissue needs prompt medical assessment.

Wound Evisceration

Separation of a surgical wound with protrusion of internal organs or tissue through the opening. It is a surgical emergency requiring protection of the

exposed tissue and urgent medical evaluation.

Wound Healing

The body's process of stopping bleeding, controlling inflammation, replacing damaged tissue, covering the surface, and strengthening the repair. Blood supply, infection, nutrition, diabetes, medicines, smoking, wound depth, and movement can affect healing.

Wound Healing Phases

Wound healing has overlapping stages: stopping bleeding, inflammation, building new tissue and skin, and strengthening the repair. The timing and result depend on the wound, blood supply, infection, nutrition, and general health.

Wound Infection

Infection of a wound by microorganisms, causing findings such as increasing pain, redness, warmth, swelling, pus, fever, or delayed healing.

Wound Management

Assessment and treatment of acute or chronic wounds through cleansing, debridement when indicated, moisture and exudate control, infection management, pressure relief, nutrition, and correction of underlying disease.

Wounds

Injuries in which tissue is damaged by trauma, surgery, pressure, heat, chemicals, or other causes; wounds may be open or closed and may require cleansing, closure, or debridement.

Wound VAC

A negative-pressure wound treatment in which a sealed dressing is connected to a pump that gently removes fluid and reduces swelling. It can support new tissue growth in selected complex wounds, but requires proper application and monitoring for bleeding, infection, or skin damage.

Wound Vacuum

A therapeutic wound management system that applies localized controlled subatmospheric (negative)

pressure to a sealed wound dressing via an open-cell polyurethane foam sponge, facilitating continuous fluid drainage, reducing tissue edema, increasing microvascular blood flow, and accelerating granulation tissue formation.

Alternate Names:

Negative Pressure Wound Therapy; NPWT; Vacuum-Assisted Closure; VAC

Wright Hyperabduction Test

A clinical physical examination maneuver used to assess neurovascular compression in thoracic outlet syndrome, specifically involving the pectoralis minor space and retropectoral tunnel. With the patient seated, the examiner palpates the radial pulse while passively hyperabducting and externally rotating the arm beyond 90 degrees; a substantial diminution or complete obliteration of the radial pulse accompanied by paresthesias constitutes a positive test.

Alternate Names:

Wright Test; Hyperabduction Maneuver

Wright Stain

A laboratory dye applied to a blood sample so different blood cells and abnormal cell changes can be seen and identified under a microscope.

Wright Test

A clinical physical examination maneuver used in the assessment of thoracic outlet syndrome. The examiner palpates the radial pulse while the patient's arm is hyperabducted and externally rotated overhead; a marked diminution or obliteration of the radial pulse suggests neurovascular compression under the pectoralis minor tendon.

Alternate Names:

Wright Maneuver; Hyperabduction Test

Wrinkle Test

A simple clinical bedside test to evaluate peripheral sympathetic autonomic nerve function in the digits. Denervated skin fails to develop normal physiological wrinkling when submerged in warm water for 10 to 30 minutes, indicating loss of sympathetic vasoconstrictor tone.

Alternate Names:

Digital Wrinkling Test; Water Immersion Wrinkle Test

Wrisberg Ganglion

A small cluster of nerve cells connected with the facial nerve. It helps relay taste signals from part of the tongue and sensory signals from nearby areas of the ear.

Wrist

The joint connecting the hand to the forearm. It contains eight small wrist bones, ligaments, tendons, nerves, and blood vessels and allows the hand to bend, turn, and move from side to side.

Wrist Arthroscopy

A procedure using a small camera and instruments inserted through tiny wrist openings to examine or treat damaged cartilage, ligaments, joint lining, or other wrist problems.

Wrist Drop

Inability to lift the wrist and fingers, usually caused by injury or compression of the radial nerve. It may cause weakness, numbness, or difficulty using the hand and needs assessment for the cause.

Wrist Fracture

A break in one or more bones near the wrist, most commonly the distal radius or ulna, usually caused by a fall, direct trauma, or weakened bone.

Wrist Injury

Damage to the bones, ligaments, tendons, nerves, or vessels of the wrist from a fall, twist, impact, or overuse; fracture, instability, severe swelling, or neurovascular symptoms require assessment.

Wrist Joint

The joint where the forearm bones meet the small bones of the hand. It allows bending, straightening, side-to-side movement, and limited rotation while ligaments and cartilage provide stability.

Wrist Pain

Pain in or around the wrist, commonly caused by sprain, fracture, tendinitis, arthritis, or nerve compression such as carpal tunnel syndrome. Persistent pain, deformity, numbness, or weakness requires assessment.

Alternate Names:

Carpal Pain; Radiocarpal Joint Discomfort

Wrist Sprain

Stretching or tearing of one or more ligaments supporting the wrist, causing pain, swelling, bruising, and reduced movement after injury.

Writer's Cramp

A movement disorder in which involuntary muscle tightening causes abnormal hand or arm positions while writing. It may also affect other closely related fine hand movements.

Written Documentation

Formal recording of patient information, clinical decisions, and treatment plans; essential for continuity of care and medicolegal purposes.

Wry-Neck

Torticollis, an abnormal tilt or rotation of the head caused by involuntary contraction, shortening, or dysfunction of neck muscles.

Wt

A medical abbreviation commonly meaning weight. Its meaning should be confirmed from the surrounding documentation because abbreviations can be ambiguous.

Wuchereria

A genus of filarial nematodes that includes *Wuchereria bancrofti*, a major cause of lymphatic filariasis. Infection is transmitted by mosquitoes and may cause lymphangitis, chronic lymphedema, hydrocele, and elephantiasis.

Wuchereria Bancrofti

A parasitic roundworm spread by mosquitoes and

the main cause of lymphatic filariasis. Long-term infection can block lymph drainage and cause swelling of the limbs or genitals, sometimes becoming severe and permanent.

Wuhan Coronavirus

Alternate name; see *SARS-CoV-2*.

X

Xanthelasma

A benign, sharply demarcated, yellowish-orange subcutaneous plaque composed of lipid-laden, foamy histiocytes (macrophages containing esterified and free cholesterol) located within the superficial dermis of the eyelid, most commonly around the medial canthus of the upper and lower lids (xanthelasma palpebrarum). It is the most frequent form of cutaneous xanthoma. While approximately 50% of affected individuals have normal plasma lipid levels, xanthelasma is an independent clinical marker of dyslipidemia (such as familial hypercholesterolemia), elevated LDL and ApoB levels, and an increased long-term risk of ischemic heart disease and systemic atherosclerosis. Management begins with cardiovascular risk and lipid profile evaluation, with cosmetic removal options including topical trichloroacetic acid (TCA) chemical peels, surgical excision, cryotherapy, or laser ablation (CO2 or pulsed-dye laser).

Alternate Names:

Xanthelasma Palpebrarum; Eyelid Xanthoma; Palpebral Xanthoma

Xanthine

A natural breakdown product of substances found in cells and foods. It normally changes into uric acid, but can build up when a rare enzyme disorder blocks this pathway and may then contribute to kidney or urinary stones.

Xanthine Oxidase

An enzyme that helps convert cell and food breakdown products into uric acid. Medicines used for gout can block this enzyme, lowering uric-acid production and helping prevent urate crystal deposits.

Xanthine Oxidase Inhibitors

A major pharmacological class of uric acid-lowering medications (including allopurinol and febuxostat) that selectively inhibit the enzyme xanthine oxidase, blocking the sequential conversion of hypoxanthine to xanthine and xanthine to uric acid, serving as first-line maintenance therapy for chronic gout and tumor lysis syndrome prophylaxis.

Alternate Names:

XOIs

Xanthinuria

A rare autosomal recessive inborn error of purine catabolism caused by deficiency of the enzyme xanthine dehydrogenase (type I) or molybdenum cofactor (type II), characterized by extremely low serum and urine uric acid concentrations and excessive accumulation of xanthine, predisposing to radiolucent xanthine urolithiasis and myopathy.

Xanthochromia

Yellow or amber color in the fluid around the brain and spinal cord. It can occur when blood has broken down in the fluid, including after bleeding around the brain, but other causes are possible and the result must be interpreted with the timing and other tests.

Alternate Names:

CSF Xanthochromia; Cerebrospinal Fluid Yellowing

Xanthogranulomatous

Describing inflammation in which tissue contains many immune cells filled with fat. This pattern can occur in long-lasting infections and other inflammatory conditions.

Xanthogranulomatous Cholecystitis

An uncommon, aggressive pseudotumoral chronic destructive inflammatory disorder of the gallbladder characterized by marked mural thickening, intramural nodular xanthogranulomas containing lipid-laden foamy histiocytes, and extensive fibrous adhesion to adjacent organs (duodenum, colon, liver), frequently mimicking advanced gallbladder adenocarcinoma.

Alternate Names:

XGC

Xanthogranulomatous Oophoritis

A rare long-lasting inflammation of an ovary, often linked to infection or endometriosis. It can form a mass that resembles ovarian cancer on scans and may cause pelvic pain, fever, or abnormal bleeding.

Xanthogranulomatous Pyelonephritis

A severe, long-lasting kidney infection that destroys normal kidney tissue and replaces it with inflamed tissue. It is often associated with blockage or stones and may require antibiotics, drainage, or removal of the damaged kidney.

Xanthoma

A yellow-orange papule, nodule, or plaque formed by deposits of fat-filled immune cells in the skin, tissue beneath the skin, or tendons. It may occur with high blood lipids, diabetes, cholestatic liver disease, or an inherited lipid disorder and warrants assessment of the underlying cause.

Xanthoma Disseminatum

A rare, benign, non-Langerhans cell histiocytic disorder characterized by widespread, symmetric red-brown to yellow-orange papules and nodules localized to flexural and intertriginous skin, mucous membranes of the upper respiratory and gastrointestinal tracts, and sometimes involving the central nervous system to cause diabetes insipidus.

Alternate Names:

Montgomery Syndrome; Disseminate Xanthoma

Xanthoma Eruptivum

A cutaneous manifestation of severe hypertriglyceridemia (often serum triglycerides > 1000 mg/dL)

characterized by the sudden appearance of crops of small (1–5 mm), yellow-orange papules on an erythematous base, located primarily over the buttocks, extensor surfaces of the limbs, and shoulders.

Alternate Names:

Eruptive Xanthoma; Eruptive Xanthomatosis

Xanthoma Planum

Flat or slightly raised yellow skin patches caused by the buildup of fat inside immune cells. They may occur in skin folds, the palms, or more widely on the body and can be linked to high blood fats or some blood disorders.

Alternate Names:

Plane Xanthoma; Xanthoma Striatum Palmare

Xanthoma Striatum Palmare

Yellow or orange lines or patches in the creases of the palms caused by fat deposits in the skin. They are strongly linked to some inherited blood-fat disorders, especially type III dysbetalipoproteinemia, but blood tests are needed.

Alternate Names:

Palmar Crease Xanthoma; Planar Palmar Xanthoma

Xanthoma Tendinosum

Firm, slowly enlarging, non-tender subcutaneous nodules composed of lipid-laden macrophages embedded in tendons or ligaments, most commonly affecting the Achilles tendon and the extensor tendons of the hand and fingers. It is a classic clinical physical hallmark of severe heterozygous or homozygous familial hypercholesterolemia.

Alternate Names:

Tendon Xanthoma; Tendinous Xanthoma

Xanthomatosis

A disorder in which fatty deposits called xanthomas develop in the skin, tendons, or organs. It may be associated with inherited or acquired lipid disorders and can signal increased cardiovascular or organ-specific risk requiring medical evaluation.

Xanthoma Tuberosum

Slowly enlarging, painless, firm, yellowish-red nodular lipid deposits occurring over extensor pressure areas, particularly the elbows, knees, heels, and buttocks. They are strongly associated with familial hypercholesterolemia and type III hyperlipoproteinemia.

Alternate Names:

Tuberous Xanthoma; Tuberous Xanthomatosis

Xanthopsia

A visual disturbance in which objects appear yellow or yellowish. It can occur with certain eye disorders, medication toxicity such as digoxin toxicity, or other neurologic or retinal conditions and warrants evaluation when new or persistent.

Xanthosis

Yellow discoloration of skin or other tissues caused by carotene or another yellow substance. Unlike jaundice, it does not usually make the whites of the eyes yellow; the cause is assessed from the person's diet and health.

X Chromosome

One of the two types of human sex chromosomes. It carries genes involved in sex development as well as many other body functions. Most people have one or two X chromosomes.

Xenobiotic

A chemical that does not naturally belong in the body, such as a medicine, pollutant, pesticide, or industrial compound. The body changes and removes it, but some resulting chemicals can be harmful.

Xenobiotic Metabolism

The body's processing of foreign chemicals, including medicines, pollutants, and toxins. Enzymes, especially in the liver, change them so they can be removed; the changed substances may remain active or become harmful.

Xenobiotic Resistance

The cellular or organismal capacity to withstand

the cytotoxic or therapeutic effects of foreign chemical substances, medications, or toxins. Mechanisms include enhanced metabolic breakdown (e.g., cytochrome P450 upregulation), increased cellular efflux (e.g., ATP-binding cassette transporters such as P-glycoprotein), or alteration of intracellular molecular targets.

Alternate Names:

Multidrug Resistance; Xenobiotic Tolerance

Xenograft

Tissue, cells, or a biological material transplanted between different species, such as animal tissue used in a human. Rejection and infection are important risks, although some materials are used temporarily as tissue coverings or substitutes.

Xenon Anesthesia

An inhalational general anesthetic technique utilizing the inert noble gas xenon, which produces profound surgical anesthesia and analgesia predominantly via non-competitive antagonism of N-methyl-D-aspartate (NMDA) receptors, characterized by remarkable hemodynamic stability, absence of hepatic/renal metabolism, and extremely rapid induction and emergence.

Xenotransplantation

Transplanting living cells, tissues, or organs between different species, usually from an animal to a human. It may increase the supply of transplant material but carries major risks of immune rejection, infection, and poor organ function.

Xerochilia

Abnormal, persistent dryness, scaling, and superficial vertical cracking or fissuring of the lips, resulting from environmental dehydration, persistent lip-licking (cheilitis simplex), chronic mouth breathing, or systemic therapy with oral retinoids (such as isotretinoin).

Alternate Names:

Dry Lips

Xeroderma

Alternate name; see *Dry skin*.

Xeroderma Pigmentosum

A rare inherited disorder in which cells cannot properly repair DNA damage caused by ultraviolet (UV) light. Children may develop severe sun sensitivity, sunburn, dry skin, and unusual freckling or changes in skin color after little exposure. The disorder greatly increases the risk of skin and eye-surface cancers and may cause painful light sensitivity, eye damage, or reduced vision. Some people also develop progressive nervous-system problems such as hearing loss, poor coordination, seizures, or difficulty speaking and swallowing. Most forms are inherited in an autosomal recessive pattern.

Xeroderma Pigmentosum Complementation Groups

A genetic classification system dividing xeroderma pigmentosum into eight distinct complementation groups (XP-A through XP-G, plus XP variant), each resulting from biallelic germline mutations in specific nucleotide excision repair (NER) pathway genes or DNA polymerase eta (*POLH*). Affected patients display extreme cutaneous photosensitivity, severe solar elastosis, freckling, and a greater than 1,000-fold increased risk of ultraviolet-induced cutaneous malignancies.

Alternate Names:

XP Complementation Groups; NER Defect Groups

Xerophthalmia

Dryness and damage of the eye caused by severe vitamin A deficiency. It may begin with poor night vision and dry eyes and can progress to corneal damage and permanent sight loss. Urgent medical treatment with vitamin A and care for the eye can prevent worsening, but treatment must be guided by a clinician.

Alternate Names:

Vitamin A Deficiency Eye Disease; Ocular Xerosis; Keratomalacia

Xerophthalmic Ulceration

Severe progressive ulceration of the cornea resulting from severe vitamin A deficiency (classified as WHO stage X3A when involving less than one-third of the corneal area, and stage X3B when involving more).

Untreated, it rapidly causes corneal liquefactive necrosis (keratomalacia) and permanent blindness.

Alternate Names:

Vitamin A Corneal Ulcer; Keratomalacic Ulceration

Xerosis

Alternate name; see *Dry skin*.

Xerostomia

The sensation of dry mouth caused by reduced or altered saliva production. It may result from medicines, dehydration, salivary-gland disease, radiation, or systemic illness and can impair speaking, swallowing, taste, and dental health.

Xerotic Eczema

A common, intensely pruritic inflammatory dermatosis occurring predominantly on the pretibial lower extremities of elderly individuals during cold, dry winter months, characterized by profound epidermal dehydration, scaling, and fine superficial erythematous fissures resembling "cracked porcelain" or a "dry riverbed."

Alternate Names:

Asteatotic Eczema; Eczema Craquele; Winter Itch

X-Inactivation

A process in early development that switches off most genes on one of two X chromosomes in each cell. It helps balance gene activity, although some genes remain active and the pattern can differ between cells.

Xiphisternal Joint

The synchondrosis articulation connecting the inferior border of the sternal body to the superior margin of the xiphoid process. It typically ossifies during middle to late adulthood and lies at the level of the ninth thoracic vertebra and the lower border of the thoracic cavity anteriorly.

Alternate Names:

Xiphisternal Synchondrosis; Xiphisternal Articulation

Xiphoidalgia

A painful musculoskeletal syndrome characterized by localized tenderness and discomfort over the xiphoid process and xiphisternal joint, often radiating to the epigastrium, anterior chest wall, back, or shoulders. Symptoms are exacerbated by light palpation, forward bending, heavy lifting, or coughing.

Alternate Names:

Xiphoidodynia; Hypersensitive Xiphoid Syndrome; Xiphoid Syndrome

Xiphoidectomy

The surgical excision or resection of the xiphoid process of the sternum, indicated for intractable, refractory xiphodynia (hypersensitive xiphoid syndrome) unresponsive to local injections, or performed to enhance exposure during upper midline laparotomies or diaphragmatic hernia repairs.

Xiphoid Process

The small pointed lower part of the breastbone. Its shape varies between people and it provides attachment for some muscles and ligaments.

X-Linked

Describing a gene or condition caused by a change on the X chromosome. The pattern differs between people with one X chromosome and those with two; fathers pass their X chromosome to daughters, not sons.

X-Linked Adrenoleukodystrophy

An inherited disorder, usually affecting boys, in which certain fats build up and damage the adrenal glands and nervous system. It can cause behavior or learning changes, movement problems, seizures, or adrenal failure.

X-Linked Agammaglobulinemia

An inherited immune disorder, usually affecting boys, in which the body cannot make enough antibodies. Repeated bacterial infections often begin in infancy or early childhood and are treated with antibody replacement and infection care.

X-Linked Chronic Granulomatous Disease

The most common form of chronic granulomatous disease, caused by disease-causing variants in the *CYBB* gene on the X chromosome that impair the phagocyte NADPH oxidase complex (gp91phox subunit). Phagocytes fail to generate reactive oxygen species (superoxide), predisposing boys to recurrent severe infections by catalase-positive bacteria and fungi, and inflammatory granuloma formation.

Alternate Names:

X-Linked CGD; CYBB Deficiency; Cytochrome b-245 Beta Deficiency

X-Linked Dominant Inheritance

A pattern of genetic transmission in which a single mutant allele on the X chromosome is sufficient to cause the phenotypic expression of the trait or disease in both hemizygous males and heterozygous females (e.g., fragile X syndrome, hypophosphatemic rickets, Alport syndrome); affected fathers transmit the trait to all daughters but no sons.

X-Linked Emery-Dreifuss Muscular Dystrophy

A hereditary muscle disorder caused by mutations in the *EMD* gene on the X chromosome, encoding the nuclear membrane protein emerin. It is characterized by the classic clinical triad of early-onset joint contractures (elbows, Achilles tendons, postcervical spine), slowly progressive humeroperoneal muscle weakness, and cardiac conduction abnormalities requiring pacemaker implantation.

Alternate Names:

EDMD1; Emerin Deficiency Muscular Dystrophy

X-Linked Hyper-IgM Syndrome

A primary immunodeficiency disorder caused by mutations in the *CD40LG* gene on chromosome Xq26, which encodes CD40 ligand (CD154) expressed on activated CD4+ T helper cells. Defective interaction with CD40 on B cells prevents immunoglobulin class-switch recombination and somatic hypermutation, resulting in severely depressed serum IgG, IgA, and IgE with normal or elevated serum IgM, accompanied by recurrent sinopulmonary bacterial infections and opportunistic infections (such as *Pneumocystis*

jirovecii pneumonia).

Alternate Names:

HIGM1; CD40L Deficiency; Hyper-IgM Syndrome Type 1

X-Linked Hypophosphatemia

An inherited disorder that causes the kidneys to lose too much phosphate. Low phosphate can lead to soft or poorly growing bones, bone pain, bowed legs, dental problems, and reduced height.

X-Linked Ichthyosis

An inherited, usually X-linked recessive skin disorder caused by a variant or deletion affecting the STS gene and deficiency of steroid sulfatase. It usually affects males and causes widespread dry, dark, plate-like scales that often begin in infancy or early childhood.

X-Linked Inheritance

Inheritance of a gene change located on the X chromosome. The effects depend on the gene, the type of change, and whether a person has one or two X chromosomes; fathers do not pass an X chromosome to sons.

X-Linked Lymphoproliferative Disease Type 1

A primary immunodeficiency disorder caused by mutations in the *SH2D1A* gene on the X chromosome, encoding the signaling lymphocyte activation molecule-associated protein (SAP). Hemizygous males exhibit inappropriate and uncontrolled immune responses to Epstein-Barr virus (EBV), resulting in fulminant infectious mononucleosis, hemophagocytic lymphohistiocytosis (HLH), hypogammaglobulinemia, and malignant lymphoma.

Alternate Names:

XLP1; Duncan Disease; SAP Deficiency

X-Linked Lymphoproliferative Syndrome

An inherited immune disorder, usually affecting boys, in which the body reacts abnormally to infections. Severe Epstein-Barr virus illness, persistent fever, liver or blood problems, lymphoma, and intestinal inflammation may occur.

X-Linked Myotubular Myopathy

A rare inherited muscle disease, usually affecting boys, that causes severe weakness and low muscle tone from birth. Babies may have drooping eyelids, feeding difficulty, and dangerous weakness of the breathing muscles.

Alternate Names:

XLMTM; Myotubularin Deficiency

X-Linked Recessive Inheritance

A pattern of genetic transmission in which a mutation in a gene located on the X chromosome causes phenotype manifestation in hemizygous males (who possess only one X chromosome) and in homozygous females (e.g., hemophilia A and B, Duchenne muscular dystrophy, G6PD deficiency); carrier females transmit the mutant allele to 50 percent of sons (affected) and 50 percent of daughters (carriers).

X-Linked Retinitis Pigmentosa

A severe hereditary dystrophy of the retina caused most frequently by pathogenic variants in the *RPGR* gene on the X chromosome. It causes early progressive nyctalopia (night blindness), constriction of visual fields (tunnel vision), attenuated retinal vessels, and bone-spicule retinal pigmentation, often progressing to legal blindness by early adulthood.

Alternate Names:

XLRP; X-Linked Pigmentary Retinopathy

X-Linked Retinoschisis

An inherited eye disorder, usually affecting boys, in which layers of the retina separate. It can cause blurred central or distance vision, crossed eyes, bleeding, or retinal detachment in severe cases.

X-Linked Severe Combined Immunodeficiency

A severe inherited immune disorder, usually affecting boys, in which T cells do not develop normally and antibody protection is poor. Babies are highly vulnerable to serious infections and need urgent specialist treatment.

X-Linked Sideroblastic Anemia

An inherited microcytic, hypochromic anemia

caused by mutations in the erythroid-specific delta-aminolevulinate synthase gene (*ALAS2*) on the X chromosome. Defective heme synthesis leads to mitochondrial iron accumulation in developing red cell precursors, seen on bone marrow biopsy as ring sideroblasts stained with Prussian blue.

Alternate Names:

XLSA; ALAS2 Deficiency; Hereditary Sideroblastic Anemia

X-Linked Spinal and Bulbar Muscular Atrophy

An adult-onset, slowly progressive lower motor neuron disease caused by an expanded CAG trinucleotide repeat in the androgen receptor (*AR*) gene on the X chromosome. Affected males experience proximal muscle weakness, fasciculations (especially perioral and lingual), bulbar dysfunction (dysarthria, dysphagia), and signs of partial androgen insensitivity (gynecomastia, reduced fertility).

Alternate Names:

Kennedy Disease; SBMA; Bulbo-Spinal Muscular Atrophy

X-Ray

An imaging test that uses a small amount of radiation to create a picture of structures inside the body. It is especially useful for bones, lungs, teeth, and some other tissues.

X-Ray Attenuation

The reduction in strength of an X-ray beam as it passes through the body. Bone, soft tissue, and air reduce the beam by different amounts, creating the differences seen in the image.

X-Ray Crystallography

An analytical biophysical technique that determines the three-dimensional atomic structure of crystallized biomolecules, such as proteins, nucleic acids, and macromolecular complexes. A beam of incident X-rays strikes the crystal, and the resulting diffraction pattern of scattered rays is measured to calculate electron density maps at atomic resolution.

Alternate Names:

X-Ray Crystal Diffraction Analysis; Macromolecular

Crystallography

X-Ray Shield

Protective material, usually lead or another radiation-attenuating substance, used to reduce exposure to scattered X-rays during imaging; shielding is applied according to the procedure and current radiation-safety guidance.

X-Ray Therapy

Treatment that uses carefully aimed X-ray radiation to damage abnormal cells or relieve symptoms. It is used mainly for cancer and may be given from a machine outside the body or near the target.

XX Male Syndrome

A difference in sex development in which a person with two X chromosomes develops typically male physical features, usually because a sex-development gene has moved onto an X chromosome. Infertility is common, and care is individualized.

XXX Syndrome

Alternate name; see *Triple X syndrome*, a sex-chromosome variation in which a female has an additional X chromosome.

XXXX Syndrome

XXXX syndrome is a rare sex-chromosome variation in which a female has four X chromosomes; it may cause developmental or learning difficulties, distinctive physical features, and ovarian dysfunction, with severity varying widely.

Xylitol

A sugar alcohol used as a sweetener and in some oral-care products. Large human ingestions may cause gastrointestinal symptoms; it is highly toxic to dogs.

Xylose

A simple sugar found in some plants. A form called D-xylose has been used in tests of how well the small intestine absorbs nutrients and is also used in laboratory studies.

Xylose Absorption Test

A specialized clinical diagnostic test used to evaluate the functional absorptive integrity of the proximal small bowel mucosa (duodenum and jejunum). A standard oral dose of D-xylose (a pentose absorbed passively without requiring pancreatic enzymes) is administered; low serum levels and reduced 5-hour urinary excretion indicate mucosal malabsorption (e.g., celiac disease, tropical sprue), whereas normal excretion in a patient with fat malabsorption points toward pancreatic exocrine insufficiency.

Alternate Names:

D-Xylose Absorption Test; D-Xylose Tolerance Test

XYY Syndrome

A sex-chromosome variation in which a male has an extra Y chromosome. Many affected individuals have few or no obvious symptoms, though some have tall stature, learning difficulties, or developmental differences.

Y

YAG Capsulotomy

A laser procedure that makes a small opening in the cloudy membrane behind an artificial lens after cataract surgery. It can restore vision when this clouding causes blurring or glare and is usually done without another incision.

YAG Laser Capsulotomy

Alternate name; see *YAG Capsulotomy*.

YAG Laser Surgery

Treatment using a focused laser to make a precise opening or alter tissue without a conventional surgical incision. It is used mainly for selected eye conditions, and risks depend on the part of the eye treated.

Yawn

An involuntary behavior consisting of a deep inhalation followed by a slower exhalation, often with stretching of the jaw and facial muscles. Yawning is common with fatigue but excessive or unusual yawning can occur with some medications or neurologic conditions.

Yawning

Alternate name; see *Yawn*.

Yaws

Yaws is a chronic infection caused by *Treponema pallidum* subsp. *pertenue* and spread mainly through close skin contact. It can cause an initial papilloma or ulcer and later destructive lesions of skin, bone, and cartilage; antibiotics can cure the infection.

Yaws Papilloma

The primary clinical cutaneous lesion of early yaws (*Treponema pallidum* subsp. *pertenue* infection), also termed a mother yaw or frambesioma. It presents as an initial painless, raised, yellow-crust, raspberry-like papule or ulcer at the site of cutaneous inoculation.

Alternate Names:

Mother Yaw; Frambesioma; Primary Yaws Lesion

Y-Box Binding Protein

A multifunctional conserved nucleic acid-binding regulatory protein (most notably YB-1) that binds the inverted CCAAT box (Y-box) within promoter regions and messenger RNAs. It plays essential regulatory roles in DNA repair, transcriptional regulation, mRNA translation, cellular stress adaptation, and oncogenic multidrug resistance.

Alternate Names:

YB-1; Y-Box Transcription Factor; Nuclease-Sensitive Element-Binding Protein 1

Y Chromosome

One of the two human sex chromosomes. It usually carries genes involved in testis development and is passed by a biological father to a child who inherits it; chromosome patterns and body development can vary.

Y-Chromosome Microdeletion

Submicroscopic deletions in the azoospermia factor (AZF) region on the long arm of the Y chromosome (encompassing AZFa, AZFb, and AZFc subregions), representing the second most frequent genetic cause of male infertility (causing non-obstructive azoosper-

mia or severe oligozoospermia).

Alternate Names:

AZF Microdeletion

Yeast

A type of fungus made of single cells. Some yeasts normally live on or in the body, while others can cause infections of the mouth, skin, vagina, lungs, blood, or other organs.

Yeast Infection

An infection caused by Candida yeast that may affect the mouth, skin, vagina, penis, or other tissues. Symptoms depend on the site and may include itching, soreness, redness, white plaques, discharge, or rash. Candida may also be present without causing disease, so the significance of a finding depends on the site, symptoms, and evidence of tissue invasion.

Yeast Infection In Women And Men

Genital Candida infection may affect the vulva or vagina in women and the glans penis or foreskin in men. Symptoms can include itching, soreness, redness, discharge, or rash.

Yeast Present

A laboratory report indicating that yeast forms were detected in a specimen. The finding may represent colonization, contamination, or infection and must be interpreted with symptoms, specimen type, and organism identification.

Yeast Vulvitis

Inflammation of the vulva associated with vulvovaginal candidiasis, usually caused by Candida species. It may cause itching, burning, redness, swelling, and soreness and should be distinguished from other causes of vulvar symptoms.

Yellow Cartilage

A specialized subtype of cartilage rich in dense branching networks of elastic fibers in addition to type II collagen fibers, imparting high flexibility and elastic recoil. It is found anatomically in the external ear (auricle/pinna), external auditory meatus, epiglottis, corniculate and cuneiform cartilages of

the larynx, and the Eustachian tube.

Alternate Names:

Elastic Cartilage; Cartilago Elastica

Yellow Fever

Yellow fever is an acute mosquito-borne infection caused by yellow fever virus. Fever, headache, muscle aches, nausea, and vomiting may be followed by jaundice, bleeding, shock, and organ failure; vaccination is the main preventive measure.

Yellow Fever Vaccine

A live-attenuated viral vaccine (17D strain) administered as a single subcutaneous dose providing lifelong protective neutralizing antibody immunity against yellow fever virus, carrying rare, age-associated risks of vaccine-associated neurotropic disease (YEL-AND) and viscerotropic disease (YEL-AVD).

Alternate Names:

17D Vaccine

Yellow Fever Virus

A flavivirus transmitted mainly by infected mosquitoes that can cause yellow fever, ranging from a mild febrile illness to jaundice, bleeding, shock, and organ failure.

Yellow Ligament

The ligamentum flavum, a series of paired, elastic connective tissue ligaments that connect the laminae of adjacent vertebrae from the second cervical vertebra (C2) down to the first sacral vertebra (S1). Rich in yellow elastin fibers, it maintains upright spinal posture, preserves interlaminar tension, and protects the spinal cord during forward spinal flexion.

Alternate Names:

Ligamentum Flavum; Flavum Ligament

Yellow Marrow

Bone marrow characterized by a predominance of adipose tissue (fat cells) rather than active hematopoietic stem cells. In adults, yellow marrow occupies the central medullary cavities of long bones (such as the femur and humerus), retaining

the potential to revert to red hematopoietic marrow during severe, prolonged anemia or blood loss.

Alternate Names:

Fatty Bone Marrow; Medulla Ossium Flava

Yellow Nail Syndrome

Alternate name; see *Yellow-Nail Syndrome*.

Yellow-Nail Syndrome

A rare disorder causing yellow, thickened, slowly growing nails together with swelling from lymph fluid, usually in the legs, and lung problems such as repeated infections or fluid around the lungs. The cause is not fully understood.

Yellow Nail Syndrome Triad

The defining clinical triad of yellow nail syndrome, an uncommon disorder characterized by the simultaneous or sequential occurrence of dystrophic, slow-growing, thickened, pale yellow-to-green nails with loss of the cuticle and increased transverse curvature; chronic primary lymphedema (predominantly bilateral lower extremities); and chronic respiratory manifestations (including recurring bronchiectasis, chronic sinusitis, and persistent exudative pleural effusions).

Alternate Names:

YNS Triad; Lymphedema-Pleural Effusion-Yellow Nails

Yellow Spot

The anatomical macula lutea, an oval yellowish pigmented area situated near the center of the posterior retina lateral to the optic disc. It contains high concentrations of the carotenoid pigments lutein and zeaxanthin, surrounding the central fovea centralis to afford maximum visual acuity and color discrimination.

Alternate Names:

Macula Lutea; Anatomical Macula

Yellow Tongue

Yellow discoloration or coating of the tongue that may result from oral hygiene, smoking, dry mouth, diet, medicines, or an underlying illness.

Yergason Test

A shoulder examination in which a person turns the palm upward and rotates the arm outward against resistance. Pain or a snapping sensation near the front of the shoulder may suggest a problem involving the biceps tendon, but the test is not diagnostic by itself.

Yersinia

A group of bacteria that can cause intestinal illness, swollen lymph nodes in the abdomen, or plague. Different species spread through contaminated food or water, infected animals, or fleas.

Yersinia Enterocolitica

A bacterium that can cause diarrhea, fever, and abdominal pain, sometimes mimicking appendicitis. People usually acquire it from contaminated food, water, or contact with infected animals.

**Yersinia Enterocolitica
Pseudoappendicitis**

An acute inflammatory infectious syndrome occurring primarily in children and young adults following ingestion of contaminated food (particularly undercooked pork) infected with *Yersinia enterocolitica*. The pathogen invades the gut-associated lymphoid tissue, causing acute terminal ileitis and prominent mesenteric lymphadenitis that produces right lower quadrant abdominal pain, fever, diarrhea, and rebound tenderness clinically indistinguishable from acute appendicitis.

Alternate Names:

Yersinia Mesenteric Adenitis; Pseudoappendiceal Syndrome

Yersinia Infection

Infection caused by *Yersinia* bacteria, usually producing diarrhea, abdominal pain, fever, or vomiting. Some cases resemble appendicitis; bloody diarrhea, dehydration, severe illness, or persistent symptoms require medical assessment.

Yersinia Outer Proteins

A group of potent bacterial virulence proteins (Yops) synthesized by pathogenic *Yersinia* species (*Y.*

pestis, *Y. pseudotuberculosis*, and *Y. enterocolitica*) and injected directly into host phagocytes via a type III secretion needle apparatus. Yops disrupt the host actin cytoskeleton, inhibit phagocytosis, induce macrophage apoptosis, and suppress proinflammatory cytokine synthesis.

Alternate Names:

Yops; Yersinia Effector Proteins; Yop Virulence Factors

Yersinia Pestis

The bacterium that causes plague, a severe infection usually spread by infected fleas or animals. It may cause painful swollen lymph nodes, bloodstream infection, or lung disease and requires urgent treatment and public-health measures.

Yersinia Pestis Pneumonic Plague

The most severe, rapidly fatal clinical form of plague, caused by inhalation of aerosolized droplets containing *Yersinia pestis* (primary pneumonic plague) or by hematogenous dissemination to the lungs from a primary bubo (secondary pneumonic plague). Characterized by high fever, acute dyspnea, pleuritic chest pain, productive cough with watery or blood-tinged sputum, and rapid progression to respiratory failure, septic shock, and death within 24 to 48 hours without prompt antimicrobial therapy.

Alternate Names:

Pneumonic Plague; Pulmonary Yersiniosis

Yersinia Pseudotuberculosis

A bacterium usually acquired from contaminated food or water. It can cause fever, diarrhea, and pain from swollen lymph nodes in the abdomen, sometimes resembling appendicitis.

Yersinia Reactive Arthritis

An acute, sterile inflammatory asymmetric oligoarthritis affecting predominantly the lower extremities, developing one to four weeks following acute gastrointestinal enteritis caused by *Yersinia enterocolitica* or *Yersinia pseudotuberculosis*, strongly associated with HLA-B27 positivity.

Yersiniosis

Infection caused by Yersinia bacteria, most often *Y. enterocolitica* or *Y. pseudotuberculosis*, producing diarrhea, abdominal pain, fever, or pseudoappendicitis.

Yew Poisoning

Poisoning after eating parts of the yew plant, especially its leaves or seeds. The toxins can cause vomiting, dizziness, seizures, dangerous heart rhythms, collapse, and death and require urgent poison-control or emergency advice.

Y-Linked Gene

A gene located specifically on the non-recombining region of the Y chromosome (such as the *SRY* gene, *ZFY*, or *AZF* azoospermia factor region). These genes are transmitted strictly from biological fathers to sons and are essential for testicular differentiation, gonadal development, and male spermatogenesis.

Alternate Names:

Holandric Gene; Y-Chromosomal Gene

Y-Linked Inheritance

Inheritance of a condition caused by a gene on the Y chromosome. A biological father passes a Y-linked gene to sons who inherit his Y chromosome, but not to daughters who inherit his X chromosome.

Y-Maze Test

A behavioral neuroscience and neuropharmacological test used in laboratory models to evaluate spatial learning, exploratory behavior, and short-term working memory. It measures spontaneous alternation between three symmetrical arms without requiring positive food reinforcement or negative footshock stimuli.

Alternate Names:

Y-Maze Spontaneous Alternation; Y-Maze Behavioral Paradigm

Yolk Sac

A temporary structure that supports an early embryo before the placenta is fully working. It helps form the first blood cells and part of the early intestine and can be seen on early pregnancy ultrasound.

Yolk Sac Carcinoma

An aggressive germ-cell cancer that often produces high levels of alpha-fetoprotein (AFP). AFP can support the diagnosis and help track treatment, but it is interpreted with examination, imaging, and tissue testing.

Alternate Names:

Endodermal Sinus Tumor; Yolk Sac Germ Cell Tumor

Yolk Sac Tumor

A malignant ovarian germ-cell tumor that often occurs in children or young adults and produces alpha-fetoprotein; it requires prompt treatment.

Yolk-Sac Tumor

Alternate name; see *Yolk Sac Tumor*.

Yolk Sac Tumor Schiller-Duval Bodies

A characteristic microscope finding in yolk sac tumors. It looks somewhat like a tiny kidney filter, with tumor cells arranged around a small blood vessel. The finding helps confirm the diagnosis when considered with other test results.

Alternate Names:

Schiller-Duval Bodies; Glomeruloid Endodermal Bodies

Yolk Stalk

A temporary connection between the early yolk sac and the developing intestine. It normally disappears before birth; a remaining portion can form an abnormal intestinal pouch or other problem.

Young-Burgess Classification

A widely utilized orthopedic radiological classification system for traumatic pelvic ring disruptions based on the underlying injury vector mechanism and associated mechanical instability: Lateral Compression (LC I, II, III), Anteroposterior Compression (APC I, II, III, including open-book pelvis), Vertical Shear (VS), and Combined Mechanical (CM) patterns.

Alternate Names:

Young-Burgess Pelvic Fracture Classification;

Burgess Pelvic Injury Scale

Young Syndrome

A rare congenital clinical syndrome characterized by the classic clinical triad of obstructive azoospermia with epididymal obstruction, chronic sinopulmonary disease (recurrent sinusitis), and bronchiectasis. It clinically mimics cystic fibrosis and primary ciliary dyskinesia, but patients exhibit normal sweat chloride concentrations, normal CFTR genetics, and structurally normal ciliary axonemes on electron microscopy.

Alternate Names:

Sinopulmonary-Infertility Syndrome; Barry-Perkins-Young Syndrome

Y-Plate Osteosynthesis

A specialized orthopedic surgical internal fixation method employing a Y-shaped contoured metallic plate to provide rigid stability for complex periarticular or comminuted fractures, particularly of the distal humerus, distal radius, and calcaneus.

Alternate Names:

Y-Plate Fixation; Y-Shaped Contoured Bone Plate

Yttrium-90

A radioactive substance used in selected treatments to deliver radiation to abnormal tissue, such as some liver tumors or inflamed joints. Its use requires specialist planning and radiation-safety measures.

Yttrium-90 Microspheres

Therapeutic resin or glass microspheres containing the pure beta-emitting radioisotope yttrium-90 (⁹⁰Y), administered through hepatic transarterial catheters for selective internal radiation therapy (SIRT or radioembolization). They deliver targeted high-dose ionizing radiation directly to unresectable primary hepatocellular carcinoma or hepatic metastases.

Alternate Names:

Y-90 Radioembolization Microspheres; TheraSphere; SIR-Spheres

Yttrium-90 Radioembolization

A catheter-directed selective internal radiation ther-

apy (SIRT) in which millions of microscopic glass or resin microspheres embedded with beta-emitting yttrium-90 are infused into hepatic arterial branches supplying primary hepatocellular carcinomas or metastatic liver tumors.

Alternate Names:

SIRT; Y-90 SIRT; Y-90 Transarterial Radioembolization

Yttrium-Aluminum-Garnet Laser

A synthetic solid-state laser system utilizing neodymium-doped yttrium-aluminum-garnet crystals (Nd:YAG) emitting coherent light in the near-infrared spectrum at a wavelength of 1064 nanometers. Widely used in ophthalmology to perform photodisruptive posterior capsulotomy for posterior capsule opacification following cataract extraction and peripheral iridotomy for narrow-angle glaucoma.

Alternate Names:

Nd:YAG Laser; Neodymium:YAG Laser

Yuzpe Regimen

A historical emergency postcoital contraception protocol consisting of two doses of combined oral contraceptives (each containing 100 mcg of ethinyl estradiol and 0.5 mg of levonorgestrel) taken exactly 12 hours apart within 72 hours of unprotected intercourse, largely superseded by levonorgestrel alone or ulipristal acetate.

Y-V Plasty

A surgical plastic and reconstructive flap technique in which a Y-shaped skin incision is closed in a V-shaped configuration. This advances the apex flap into the stem to lengthen tissue along the line of tension, release linear cicatricial contractures, or widen strictures such as bladder neck contractures or webbed scars.

Alternate Names:

Y-V Advancement Flap; Y-V Lengthening Procedure

Z

Zafirlukast

A leukotriene-receptor antagonist used for long-term control and prevention of asthma symptoms. It is taken orally and is not a rescue treatment for an acute asthma attack; liver injury and drug interactions are important safety considerations.

Alternate Names:

Accolate

Zahn Lines

Macroscopic and microscopic alternating pale and dark laminations characteristic of thrombi formed in rapid, pulsatile blood flow (arteries and cardiac chambers). The pale layers consist of aggregated platelets and fibrin meshes, while the darker layers contain trapped red blood cells, confirming that thrombosis occurred antemortem.

Alternate Names:

Lines of Zahn; Striae of Zahn

Zanamivir

An inhaled neuraminidase inhibitor used to treat or prevent influenza A and B when started appropriately. It may cause bronchospasm and is used cautiously in people with underlying airway disease.

Alternate Names:

Relenza

ZAP-70 Deficiency

A rare inherited immune disorder in which T cells cannot develop or work properly. Affected children may have repeated, severe infections and need specialist immune treatment and genetic evaluation.

Zavanelli Maneuver

An emergency procedure for severe shoulder dystocia that does not respond to other measures. The clinician gently returns the baby's head to the birth canal, followed by immediate cesarean delivery.

Alternate Names:

Cephalic Replacement Maneuver

Z-Disc

A dark, narrow proteinaceous transverse band or line that anchors the actin thin filaments and titin molecules via alpha-actinin, defining the lateral structural boundary of an individual contractile sarcomere in striated skeletal and cardiac muscle fibers.

Alternate Names:

Z-Line; Z-Band; Zwischenscheibe

Zellweger Syndrome

A severe inherited disorder in which cells cannot make peroxisomes, structures that help process fats and other substances. It begins in infancy and may cause weak muscle tone, feeding problems, seizures, liver disease, and impaired brain development.

Alternate Names:

ZSD; Cerebrohepatorenal Syndrome

Zenker Degeneration

A severe form of hyaline waxy degeneration and coagulative necrosis affecting striated skeletal muscle fibers (classically the rectus abdominis and diaphragm), occurring during severe infectious toxemias such as typhoid fever or septicemia.

Alternate Names:

Zenker's Hyaline Necrosis; Waxy Muscle Degenera-

tion

Zenker Diverticulum

An acquired, false (pulsion) outpouching of the pharyngeal mucosa and submucosa through Killian's triangle, an area of anatomical muscular weakness between the thyropharyngeus and cricopharyngeus muscles in the posterior hypopharynx. It develops secondary to increased swallowing pressure caused by uncoordinated relaxation or spasm of the cricopharyngeus muscle (upper esophageal sphincter). Most commonly affecting elderly individuals, symptoms include progressive difficulty swallowing (dysphagia), regurgitation of undigested food hours after eating, foul breath (halitosis), a compressible neck lump, and cough or recurrent aspiration pneumonia. Diagnosis is established by a barium swallow study; blind endoscopy or nasogastric tube placement is avoided due to the high risk of puncturing the pouch. Treatment involves cricopharyngeal myotomy with surgical or endoscopic diverticular division.

Alternate Names:

Zenker's Diverticulum; Pharyngoesophageal Diverticulum; Hypopharyngeal Diverticulum; Pulsion Diverticulum

Zenker Peroral Endoscopic Myotomy

A procedure that treats a pouch in the upper swallowing tube called a Zenker diverticulum. A flexible camera is passed through the mouth and the tight muscle between the pouch and swallowing tube is divided so food can pass more easily. Symptoms can return and the procedure has risks such as bleeding or a tear.

Alternate Names:

Z-POEM; Endoscopic Zenker Myotomy

Ziconotide

A strong pain medicine delivered continuously into the fluid around the spinal cord for selected severe chronic pain. It can cause dizziness, confusion, hallucinations, and other serious nervous-system or mental-health effects.

Alternate Names:

Prialt

Zidovudine

An HIV medicine that interferes with the virus's ability to copy itself. It may be used in selected treatment plans and to reduce transmission around childbirth; important risks include anemia, low white-cell counts, muscle problems, and other toxicity.

Alternate Names:

Azidothymidine; AZT; Retrovir

Ziehl-Neelsen Stain

A laboratory stain used to find bacteria with a waxy coating that resists removal by acid, especially the bacteria that cause tuberculosis. These bacteria appear red against a contrasting background under a microscope.

Alternate Names:

Acid-Fast Stain; AFB Stain

Zieve Syndrome

A temporary complication of heavy alcohol use and sudden liver injury. It causes early breakdown of red blood cells, yellowing of the skin or eyes, and increased blood fats. Treatment includes stopping alcohol and managing liver complications.

Alternate Names:

Hemolytic Anemia with Hyperlipidemia and Jaundice

Zika

An infection caused by Zika virus. It often causes no symptoms or a mild fever, rash, red eyes, joint pain, and muscle pain. Infection during pregnancy can harm the developing baby, and it can rarely trigger Guillain-Barré syndrome.

Alternate Names:

Zika Virus Disease; ZVD; Congenital Zika Syndrome

Zika Virus

A virus spread mainly by infected *Aedes* mosquitoes and also through sexual contact and, less commonly, blood or pregnancy-related transmission. Infection is often mild or symptom-free but can injure a developing fetus.

Alternate Names:

ZIKV

Zileuton

A 5-lipoxygenase inhibitor used for prevention and chronic control of asthma. It does not relieve acute bronchospasm; liver-enzyme elevations and interactions with other medicines require monitoring.

Alternate Names:

Zyflo

Zinc

An essential mineral needed for many body reactions, normal growth, immunity, reproduction, and wound healing. Too little can cause deficiency; excessive supplements can cause stomach symptoms and copper deficiency.

Alternate Names:

Zn

Zinc Acetate

An oral zinc salt used to treat zinc deficiency and, in specific formulations, to reduce intestinal copper absorption in Wilson disease. Dose and monitoring depend on the indication; nausea and gastrointestinal irritation may occur.

Zinc Deficiency

A state of inadequate available zinc caused by insufficient intake, malabsorption, excessive losses, or increased requirements. Manifestations may include impaired growth, dermatitis, alopecia, diarrhea, altered taste, delayed wound healing, and increased infection susceptibility.

Alternate Names:

Hypozincemia; Zinc Depletion

Zinc Finger Motif

A small, stable protein structural microdomain characterized by the coordination of one or more zinc ions by conserved cysteine and histidine amino acid residues (e.g., Cys2His2), functioning as sequence-specific DNA-binding domains in eukaryotic transcription factors (such as steroid hormone receptors).

Zinc Oxide

An insoluble zinc compound used topically as a skin protectant and barrier, including in preparations for diaper dermatitis and minor irritation. It can reduce contact with moisture and irritants but does not treat every cause of a rash.

Alternate Names:

ZnO

Zinc Oxide Ointment

A topical preparation containing zinc oxide that forms a protective barrier over irritated or moist skin. It is commonly used for diaper dermatitis and minor skin irritation.

Alternate Names:

Topical Zinc Barrier Cream; Zinc Oxide Paste

Zinc Protoporphyrin

An endogenous metabolite formed in developing erythroblasts when zinc is substituted for iron into the protoporphyrin ring by ferrochelatase in the absence of adequate bioavailable iron. Elevated whole-blood zinc protoporphyrin levels serve as a sensitive biomarker for iron deficiency erythropoiesis and chronic occupational or environmental lead toxicity.

Alternate Names:

ZPP; Erythrocyte Zinc Protoporphyrin

Zinc Sulfate

An oral or parenteral zinc salt used to prevent or treat zinc deficiency when clinically indicated. Gastrointestinal upset is common with oral therapy, and prolonged excessive use can cause copper deficiency.

Zinc Toxicity

Adverse effects caused by excessive zinc ingestion or exposure. Acute toxicity may cause nausea, vomiting, abdominal pain, and diarrhea; chronic excess can impair copper absorption and lead to anemia or neurologic and immune abnormalities.

Alternate Names:

Hyperzincemia; Zinc Poisoning

Zinner Syndrome

A rare congenital urological anomaly triad resulting from abnormal embryological development of the distal mesonephric (Wolffian) duct. It is characterized by unilateral renal agenesis, an ipsilateral seminal vesicle cyst, and ejaculatory duct obstruction, often presenting post-puberty with pelvic pain, dysuria, or male infertility.

Alternate Names:

Mesonephric Duct Malformation Syndrome; Seminal Vesicle Cyst with Renal Agenesis

Zirconia

A zirconium-oxide ceramic used in dentistry for crowns, bridges, implants, and other restorations. Its strength and tissue compatibility make it useful, although restoration design, surface treatment, and clinical indication affect performance.

Alternate Names:

Zirconium Dioxide; Ceramic Biomaterial

Gastroesophageal Z-Line

The anatomical and endoscopic squamocolumnar mucosal junction where the pale, smooth stratified squamous epithelium of the distal esophagus transitions abruptly into the reddish, velvety simple columnar glandular mucosa of the gastric cardia; proximal displacement indicates Barrett esophagus.

Alternate Names:

Squamocolumnar Junction; SCJ; Ora Serrata of the Esophagus

Zoledronic Acid

A potent intravenous bisphosphonate used for osteoporosis and certain cancer-related conditions, including hypercalcemia of malignancy and skeletal complications of bone metastases. Renal injury, hypocalcemia, acute-phase reactions, and rare osteonecrosis of the jaw are important risks.

Alternate Names:

Zoledronate; Zometa; Reclast

Zollinger-Ellison Secretin Stimulation Test

A specialist test used when a gastrin-producing tumor is suspected but the fasting gastrin level is

unclear. Secretin is given through a vein and blood gastrin levels are measured several times. The result is interpreted with medicines, symptoms, imaging, and other tests rather than used alone.

Alternate Names:

Secretin Provocation Test; Secretin Gastrinoma Test

Zollinger-Ellison Syndrome

A rare condition in which a hormone-producing tumor makes too much gastrin, causing the stomach to produce excess acid. It can lead to repeated ulcers, severe reflux, abdominal pain, and diarrhea.

Zolpidem

A nonbenzodiazepine sedative-hypnotic used for short-term treatment of insomnia. It can cause next-day impairment, complex sleep behaviors, dependence, and respiratory or central-nervous-system depression, especially with other sedatives.

Alternate Names:

Ambien

Zona Fasciculata

The intermediate and thickest histological zone of the adrenal cortex, comprising approximately 75 percent of cortical volume. Its lipid-rich cells (spongiocytes) arranged in straight radial cords synthesize and secrete glucocorticoids (primarily cortisol and corticosterone) under the primary regulation of adrenocorticotrophic hormone (ACTH).

Alternate Names:

Adrenal Zona Fasciculata; Fascicular Zone

Zona Glomerulosa

The outermost, thin histological layer of the adrenal cortex located immediately beneath the renal capsule. Its cells, arranged in rounded clusters and arched cords, synthesize and secrete mineralocorticoids (principally aldosterone) in response to stimulation by angiotensin II and elevated serum potassium concentrations.

Alternate Names:

Adrenal Zona Glomerulosa; Glomerular Zone

Zona Pellucida

A thick, specialized extracellular glycoprotein matrix surrounding the mammalian plasma membrane of the oocyte. Composed of sulfated glycoproteins (ZP1, ZP2, ZP3, ZP4), it binds spermatozoa to trigger the acrosome reaction and undergoes cortical reaction-induced biochemical modification following fertilization to prevent polyspermy.

Alternate Names:

Oocyte Glycoprotein Coat; Pellucid Zone

Zona Reticularis

The innermost layer of the adrenal cortex situated between the zona fasciculata and the adrenal medulla. Its anastomosing cords of compact, pigmented cells produce adrenal androgens, predominantly dehydroepiandrosterone (DHEA) and DHEA sulfate (DHEAS), under ACTH and cortical regulatory control.

Alternate Names:

Adrenal Zona Reticularis; Reticular Zone

Zonisamide

An antiseizure medicine used mainly for focal seizures. It can cause sleepiness, thinking problems, kidney stones, reduced sweating with overheating, acid imbalance, severe rash, or other serious reactions.

Alternate Names:

Zonegran

Zonula Adherens

A continuous, belt-like anchoring intercellular junction situated immediately basal to the tight junction in epithelial and endothelial cell sheets, where transmembrane classical cadherins link to the intracellular actin cytoskeleton via alpha- and beta-catenins to maintain mechanical tissue integrity.

Alternate Names:

Belt Desmosome; Intermediate Junction; Adherens Junction

Zonula Occludens

An apical, belt-like intercellular junctional complex formed by the anastomosing strands of transmembrane proteins (claudins, occludins, and junctional

adhesion molecules) that seals adjacent epithelial or endothelial plasma membranes, regulating paracellular transport and maintaining cell polarity.

Alternate Names:

Tight Junction

Zonule

Fine fibers that hold the eye's lens in place. They transfer tension from the ciliary muscle so the lens changes shape and the eye can focus at different distances.

Alternate Names:

Zonule of Zinn; Ciliary Zonule; Suspensory Ligament of Lens

Zoon Balanitis

A chronic benign inflammation of the glans penis, usually seen in uncircumcised men. It commonly appears as a sharply demarcated shiny orange-red or rust-colored patch; diagnosis is clinical, with biopsy used when the diagnosis is uncertain.

Alternate Names:

Plasma Cell Balanitis; Balanitis Circumscripta Plasmacellularis

Zoonosis

An infection that naturally spreads between animals with backbones and people. Examples include rabies, brucellosis, leptospirosis, toxoplasmosis, and some influenza infections; spread may involve bites, food, water, droplets, or direct contact.

Alternate Names:

Zoonotic Infection; Zoonotic Disease

Zoonotic Spillover

The transmission of a pathogen (virus, bacterium, fungus, or parasite) from an animal reservoir or vector species into a human host. If the pathogen acquires the capacity for efficient human-to-human transmission, spillover events can initiate localized outbreaks, epidemics, or global pandemics.

Alternate Names:

Zoonotic Transmission Event; Cross-Species Spillover

Zoster

A painful, usually unilateral vesicular eruption caused by reactivation of latent varicella-zoster virus in a sensory nerve ganglion. It may be complicated by postherpetic neuralgia, ocular disease, or neurologic involvement.

Alternate Names:

Herpes Zoster; Shingles; Zona

Zoster Ophthalmicus

Reactivation of latent varicella-zoster virus involving the ophthalmic division of the trigeminal nerve (cranial nerve V1), presenting with a painful, unilateral vesicular periorbital rash, Hutchinson sign (vesicles on the tip of the nose), dendritic pseudokeratitis, anterior uveitis, and potential vision loss.

Alternate Names:

Herpes Zoster Ophthalmicus; HZO

Z-Plasty

A reconstructive operation that rearranges nearby skin in a Z-shaped pattern. It can lengthen a tight scar, change the direction of a scar, and improve movement or appearance.

Z-Score (DEXA)

A statistical bone mineral density (BMD) score obtained from dual-energy X-ray absorptiometry that compares a patient's measured BMD to the mean BMD of an age-, sex-, and ethnicity-matched reference population. A Z-score of -2.0 or lower is defined as "below the expected range for age" in children, premenopausal women, and men younger than 50 years.

Alternate Names:

Age-Matched Bone Density Z-Score; DEXA Z-Score

Z-Score (Echocardiography)

A standardized statistical measure widely used in pediatric cardiology to express the dimensions of cardiac and vascular structures (such as coronary artery diameters or heart valve annuli) in terms of standard deviations from the population mean adjusted for body surface area (BSA). It is essential for diagnosing coronary aneurysms in Kawasaki disease.

Alternate Names:

Pediatric Echo Z-Score; Cardiovascular Z-Score

Z-Thumb Deformity

A characteristic deformity of the thumb in which fixed flexion occurs at the metacarpophalangeal (MCP) joint accompanied by hyperextension at the interphalangeal (IP) joint, resembling the letter Z. It is a hallmark joint manifestation of advanced rheumatoid arthritis.

Alternate Names:

Boutonniere-Type Thumb Deformity; Hitchhiker's Thumb Deformity

Z-Tracking Technique

A specialized intramuscular injection method in which the overlying cutaneous and subcutaneous tissues are pulled laterally or displaced by approximately one inch prior to inserting the needle at a 90-degree angle. Upon needle withdrawal, the displaced tissue planes slide back over the injection track, creating a zigzag path that prevents backflow or leakage of irritating or staining medications (such as iron dextran) into subcutaneous fat.

Alternate Names:

Z-Track Injection Method; Z-Track Technique

Zygapophyseal Joint

A paired synovial plane joint formed between the superior articular process of one vertebra and the inferior articular process of the adjacent superior vertebra throughout the cervical, thoracic, and lumbar spine. It guides and limits spinal flexion, extension, and rotation, and is a frequent source of chronic axial back or neck pain from osteoarthritis.

Alternate Names:

Facet Joint; Z-Joint; Spinal Articular Facet

Zygapophyseal Joint Arthropathy

Degenerative osteoarthritis of the synovial facet (zygapophyseal) joints of the cervical, thoracic, or lumbar spine. Driven by mechanical wear and disc height loss, leading to cartilage erosion, osteophyte formation, and facet hypertrophy; clinically causes focal or referred non-radicular axial back pain that characteristically worsens with spinal extension, lat-

eral bending, and prolonged standing, and improves with spinal flexion.

Alternate Names:

Facet Joint Arthropathy; Spinal Facet Osteoarthritis

Zygomatic Arch

A prominent horizontal bony bridge on the lateral aspect of the skull formed by the articulation of the temporal process of the zygomatic bone with the zygomatic process of the temporal bone, providing the origin for the masseter muscle and transmitting the temporalis muscle tendon beneath it.

Alternate Names:

Cheekbone Arch

Zygomatic Bone

A paired facial bone that forms the prominence of the cheek and part of the lateral orbital wall and floor. It articulates with the frontal, sphenoid, temporal, and maxillary bones.

Alternate Names:

Cheekbone; Malar Bone

Zygomatic Fracture

A break in the cheekbone or the group of bones joining it to the eye socket, usually caused by facial trauma. It may flatten the cheek, numb the skin below the eye, cause double vision, limit mouth opening, or injure the eye socket.

Alternate Names:

ZMC Fracture; Malar Fracture; Tripod Fracture

Zygomaticomaxillary Complex Fracture

A common traumatic midface fracture pattern (historically termed a tripod fracture) involving disruption of four principal bony structural articulations of the zygoma: the frontozygomatic suture, zygomaticomaxillary buttress, zygomatic arch, and infraorbital orbital rim. Manifestations include malar flattening, trismus, diplopia, and infraorbital nerve hypoesthesia.

Alternate Names:

ZMC Fracture; Tetrapod Fracture; Tripod Fracture of the Face

Zygomycosis

A destructive opportunistic angioinvasive fungal infection caused by molds within the order Mucorales (such as *Rhizopus*, *Mucor*, and *Lichtheimia*). It characteristically affects immunocompromised individuals or patients with poorly controlled diabetes mellitus and ketoacidosis, producing rapid tissue necrosis, black eschars, rhinocerebral invasion, or pulmonary cavitation.

Alternate Names:

Mucormycosis; Invasive Mucorales Infection

Zygote

The first cell formed when a sperm joins an egg. It contains genetic material from both parents, divides repeatedly, and develops into an embryo.

Alternate Names:

Fertilized Oocyte; Conceptus

Zymogen

An inactive enzymatic precursor (proenzyme) that requires a specific biochemical modification—typically proteolytic cleavage of an inhibitory peptide segment—to unmask its catalytic active site and convert it into an active, functional enzyme. Examples include pepsinogen, trypsinogen, and blood-coagulation factors.

Alternate Names:

Proenzyme; Inactive Enzyme Precursor

Zymogen Granule

A specialized membrane-bound intracellular storage organelle located in the apical cytoplasm of exocrine secretory cells (such as pancreatic acinar cells and gastric chief cells). It packages and concentrates newly synthesized zymogens and digestive enzymes in an inactive, condensed state prior to stimulus-triggered exocytosis.

Alternate Names:

Zymogenic Secretory Vesicle; Proenzyme Granule

Drugs

Generic Medicines and Medication Terms

5-Alpha Reductase Inhibitor

A medicine that lowers production of dihydrotestosterone, a hormone that affects the prostate and hair follicles. It is used mainly for an enlarged prostate and selected types of hair loss.

Abortifacient

A medicine or substance used to end a pregnancy. Some block progesterone, others cause uterine contractions and cervical opening, and certain medicines stop rapidly dividing pregnancy tissue in selected ectopic pregnancies.

Abortion - Medication

Medication abortion uses prescribed medicines, commonly mifepristone followed by misoprostol or misoprostol alone, to end an early intrauterine pregnancy; confirmation of completion and assessment for ectopic pregnancy are important.

Abuse Steroid (Anabolic Steroid Abuse)

Alternate index label for Anabolic Steroid Abuse.

Accident And Emergency Medicine (A&E Medicine)

The medical specialty concerned with the immediate assessment, resuscitation, diagnosis, and initial treatment of acute illness and injury.

Alternate Names:

A&E Medicine

ACE Inhibitor

A medicine that relaxes blood vessels and reduces strain on the heart by lowering production of angiotensin II. It treats high blood pressure, heart failure, and some kidney disease; cough, high potassium, kidney problems, or swelling can occur.

Acitretin

An oral retinoid used mainly for severe psoriasis and selected keratinization disorders. It is highly teratogenic and requires strict pregnancy precautions and monitoring for adverse effects.

Adenovirus Vaccine

A vaccine used primarily to prevent adenovirus types 4 and 7 among selected military personnel. It is an oral, live vaccine and is not part of routine vaccination for the general public. Vaccine use and eligibility depend on current public-health recommendations.

Adverse Drug Event

Harm related to the use of a medication, including harm caused by an adverse drug reaction, medication error, overdose, or inappropriate use.

Adverse Drug Reaction

An unwanted and harmful response to a medicine taken at a usual dose for prevention, testing, or treatment. It may result from the medicine's expected effects, an allergy, an interaction, or an unusual individual response.

Agent, Tocolytic

A medicine that reduces uterine contractions, used

selectively to delay preterm birth long enough for corticosteroids, transfer, or other preparations to take effect.

Agonist-Antagonist

A medicine that activates some receptors while blocking others, or activates a receptor only partly. Its mixed action can produce a desired effect while limiting another effect; examples include some opioid medicines.

AIDS Vaccine

A vaccine designed to prevent HIV infection or reduce its effects; no generally effective licensed vaccine currently exists.

Alendronate

A bisphosphonate that reduces bone resorption and is used to treat or prevent osteoporosis and selected other disorders of excessive bone turnover.

Alternate Names:

Alendronic acid; oral bisphosphonate therapy.

Anabolic Steroid Abuse

Anabolic-androgenic steroid misuse can cause infertility, testicular shrinkage, acne, mood changes, high blood pressure, adverse cholesterol changes, liver injury, and cardiovascular events. Stopping may produce withdrawal symptoms and is safest with medical support.

Alternate Names:

Abuse Steroid (Anabolic Steroid Abuse)

Analgesic

A medicine that relieves pain without necessarily causing loss of consciousness. Analgesics include nonopioid medicines, opioids, and other medicines chosen according to the type and severity of pain.

Analgesic Nephropathy

Chronic tubulointerstitial renal injury associated with prolonged or excessive use of analgesic medicines. It may cause impaired urinary concentration, sterile pyuria, haematuria, papillary necrosis, hypertension, and progressive chronic kidney dis-

ease.

Analgesics

Medicines used to relieve pain. They include nonopioid analgesics, opioid analgesics, and adjuvant medicines used for selected pain conditions.

Alternate Names:

Painkillers

Anesthetic

A medicine or technique that numbs part or all of the body. Depending on the method, a person may remain awake or become unconscious during a procedure; breathing, blood pressure, and other vital functions may need monitoring.

Angiogenesis Inhibitor

A medicine that slows the growth of new blood vessels. It may be used in selected cancers or eye diseases, where abnormal blood-vessel growth helps the disease progress; bleeding, high blood pressure, and other effects may occur.

Alternate Names:

Antiangiogenic agent

Angiotensin Converting-Enzyme Inhibitor

A medicine that lowers the production of angiotensin II, a hormone that narrows blood vessels and promotes salt retention. It can treat high blood pressure, heart failure, and some kidney disease but may cause cough, high potassium, kidney problems, or swelling.

Angiotensin Receptor Blocker

A medicine that blocks angiotensin II at the AT1 receptor, reducing vasoconstriction and aldosterone effects; it is used for hypertension, heart failure, and selected kidney disease.

Anti-Infective

A medicine or other agent used to prevent or treat an infection. The choice depends on whether the cause is a bacterium, virus, fungus, or parasite, as well as the infection site and the person's health.

Anti-Inflammatory

A medicine or treatment that reduces inflammation, which is the body's response to injury or illness. Different types work in different ways and may have important effects on the stomach, kidneys, heart, or immune system.

Antiarrhythmic

A medicine used to prevent or treat an abnormal heart rhythm. Different medicines alter the heart's electrical signals in different ways, and the choice depends on the rhythm, heart condition, kidney function, and other risks.

Antibiotic

A medicine that kills bacteria or stops them from multiplying. Antibiotics do not treat viral infections and should be selected for the suspected bacteria, infection site, allergies, and resistance risk.

Antibiotic Cycling

A strategy in which the preferred antibiotic for a particular clinical use is changed at planned intervals. It is intended to limit selection of resistant organisms, although its benefit depends on local conditions and implementation.

Antibiotic De-Escalation

The process of narrowing antimicrobial spectrum based on microbiological results and clinical response. De-escalation aims to reduce selective pressure for resistance while maintaining therapeutic efficacy.

Antibiotic Mixing

A strategy in which different antibiotics are assigned concurrently to different patients with the same indication. It is intended to reduce uniform selection pressure for resistance in a patient population.

Antibiotic Resistance

The ability of bacteria to survive or grow despite an antibiotic that would normally kill them or stop their growth. It can result from genetic changes and the spread of resistance genes; unnecessary or incorrect antibiotic use can accelerate it.

Alternate Names:

Resistance Antibiotic (Antibiotic Resistance)

Antibiotic Resistance Genes

Genes that help bacteria survive antibiotics. They may change the antibiotic's target, destroy or modify the medicine, or remove it from the cell. Bacteria can inherit these genes or acquire them from other bacteria.

Antibiotic Stewardship

Coordinated efforts to use antibiotics appropriately by selecting the right medicine, dose, route, and duration while reducing unnecessary treatment and resistance.

Antibiotic-Associated Colitis

Alternate Mayo Clinic label; see *Pseudomembranous colitis*.

Antibiotic-Associated Diarrhea

Loose or frequent stools that occur during or soon after antibiotic treatment.

Alternate Names:

Diarrhea, Antibiotic-Associated

Anticholinergic Cognitive Burden Scale

A medication-review tool that estimates the total anticholinergic load of a patient's medicines. It supports risk assessment and deprescribing but does not replace individualized clinical judgment.

Anticoagulant

A medicine that slows the body's blood-clotting process. It helps prevent or treat clots in veins, lungs, heart, or arteries but can cause bruising or serious bleeding.

Anticoagulant Agent

A drug that reduces blood clot formation by interfering with the coagulation cascade; examples include heparin, warfarin, and direct oral anticoagulants.

Anticoagulant Monitoring

Laboratory assessment used to measure the effect

or safety of an anticoagulant. The appropriate test depends on the drug and may include aPTT, anti-Xa activity, INR, or measurements of kidney function and blood counts.

Anticoagulant Rodenticides Poisoning

Poisoning from rat or mouse bait that interferes with blood clotting. Symptoms such as easy bruising, nosebleeds, blood in urine or stool, or weakness may appear later; suspected exposure requires immediate poison-control or emergency advice.

Anticonvulsant

A medicine used to prevent or control seizures. Some are also used for nerve pain, migraine prevention, or mood disorders; choice depends on the condition, other medicines, pregnancy, and side effects.

Alternate Names:

Antiseizure medicine

Anticonvulsant Mood Stabilizers

Antiepileptic drugs used as mood stabilizers in bipolar disorder. Valproate (divalproex) is effective for acute mania and rapid cycling. Carbamazepine is effective for acute mania but has numerous drug interactions via CYP3A4 induction. Lamotrigine is effective for bipolar depression prevention but not acute mania.

Antidepressant

A medicine used to treat depressive disorders and some other conditions involving mood, anxiety, pain, or sleep.

Antidiabetic Agent

A medicine that lowers blood glucose or improves glucose regulation in diabetes, such as insulin, metformin, sulfonylureas, or GLP-1 receptor agonists.

Antidiarrheal

A medicine that reduces the frequency or amount of diarrhea. It may be unsafe when stools contain blood, there is high fever or severe infection, or the bowel is blocked, so the cause should be considered first.

Antidiarrheal Medicine Overdose

Toxic effects caused by excessive exposure to Antidiarrheal medicine. Severity depends on the dose, route, timing, coexisting conditions, and clinical findings; suspected poisoning requires prompt assessment.

Antiemetic

A medicine that prevents or reduces nausea and vomiting. The choice depends on the cause, such as infection, migraine, pregnancy, surgery, or cancer treatment, and some medicines can cause sleepiness or movement problems.

Antiestrogen

A drug that blocks estrogen effects or reduces estrogen production; it may be used in hormone-sensitive breast cancer or to alter reproductive hormone signaling.

Antifungal

A medicine that kills fungi or stops them from growing. It may be applied to the skin or given by mouth or injection; the choice depends on the fungus, the body site, and the severity of infection.

Antifungal Agent

A drug or chemical that kills fungi or inhibits their growth, used to treat fungal infections of the skin, mucosa, or internal organs.

Antifungal Drug Classes

Major classes of antifungal agents include polyenes (amphotericin B), azoles (fluconazole, voriconazole), echinocandins (caspofungin, micafungin), and allylamines (terbinafine). Polyenes bind to ergosterol in fungal cell membranes. Azoles inhibit ergosterol synthesis. Echinocandins inhibit cell wall synthesis.

Antifungal Medication

A medicine used to treat fungal infection; the choice and route depend on the organism and site, and examples include azoles, terbinafine, polyenes, and echinocandins.

Antihistamine

A medicine that blocks histamine, a chemical involved in allergies. It can relieve sneezing, itching, hives, or watery eyes; older types may cause sleepiness, dry mouth, blurred vision, urinary retention, or confusion.

Antihypertensive

A medicine used to lower blood pressure. Classes include ACE inhibitors, angiotensin-receptor blockers, calcium-channel blockers, thiazide-type diuretics, beta-blockers, and other agents. Selection depends on blood pressure, kidney function, cardiovascular disease, pregnancy, and other clinical factors.

Antihypertensive Agent

A medicine or treatment that lowers high blood pressure. The choice depends on age, kidney function, heart disease, pregnancy, other medicines, and how high the pressure is.

Alternate Names:

Blood-pressure medicine

Antimalarial

A drug used to prevent or treat malaria caused by Plasmodium parasites; selection depends on species, disease severity, resistance, and geographic exposure.

Antimicrobial Drug

A medicine used to treat infection by bacteria, viruses, fungi, or parasites; the drug is selected according to the organism, infection site, and patient factors.

Antimicrobial Drug Interactions

Changes in the effect or level of an infection medicine caused by another medicine, food, or supplement. Some combinations reduce treatment effectiveness or increase toxicity, so the full medicine list should be checked.

Antineoplastic

A medicine or treatment that kills cancer cells or slows their growth. It may be used alone or with

surgery, radiation, immunotherapy, or other treatment and can also affect healthy fast-growing cells.

Antiparasitic

A medicine used to prevent or treat infection caused by parasites. The choice depends on the parasite, body site, disease severity, resistance patterns, pregnancy status, and other patient factors.

Antiparkinsonian

A medicine used to improve movement or other symptoms of Parkinson disease. Medicines may replace dopamine, imitate its effects, or alter other brain signals; benefits and adverse effects vary with the drug and the person.

Antiplatelet Agent

A medicine that makes blood platelets less likely to clump together. It lowers the risk of clots in arteries but can increase bruising and serious bleeding.

Alternate Names:

Antiplatelet medicine

Antiprotozoal Drug

A medicine used to prevent or treat disease caused by protozoa, including drugs directed against malaria, intestinal protozoa, or tissue parasites.

Antipruritic

A medicine or skin treatment that relieves itching. It may work by reducing inflammation, blocking allergy signals, numbing the skin, or changing nerve signals; treatment should also address the cause of the itching.

Antipsychotic

A medicine used to reduce hallucinations, delusions, severe agitation, or mania and to treat some mood disorders. Possible effects include sleepiness, movement problems, weight or blood-sugar changes, and rarely a dangerous fever-and-stiffness reaction.

Antipsychotic Agent

A medicine used to reduce hallucinations, fixed false beliefs, severe agitation, or disorganized think-

ing. Some are also used for bipolar disorder or selected behavioral symptoms and can cause sleepiness, movement problems, or metabolic effects.

Alternate Names:

Antipsychotic

Antipsychotic-Induced Parkinsonism

Drug-induced bradykinesia, rigidity, tremor, or postural instability caused by dopamine-receptor blockade, usually from antipsychotic treatment. Management involves reviewing the medication, dose, alternatives, and symptomatic treatment when appropriate.

Antipyretic

A medicine that lowers fever by reducing the brain's temperature-setting response. It may also relieve pain, but it does not treat every cause of fever; the cause and warning symptoms still need attention.

Antispasmodic

A medicine that relaxes involuntary muscle and may reduce cramping in the intestine, bladder, or other organs. Some types can cause dry mouth, blurred vision, constipation, urinary retention, or confusion.

Alternate Names:

Antispasmodics

Antithyroid

A medicine that lowers thyroid-hormone production or release, or reduces the effects of thyroid hormone. Treatment is selected according to the cause of hyperthyroidism, disease severity, pregnancy status, and other clinical factors.

Antithyroid Drug

A medicine that reduces thyroid hormone production or release, used to treat hyperthyroidism; examples include methimazole, propylthiouracil, and radioactive iodine.

Antitussive

A medicine that reduces the urge or reflex to cough. It may help a troublesome dry cough, but suppressing a productive cough can be unhelpful and serious

causes of cough still need assessment.

Antiviral

A medicine that slows or stops viruses from multiplying. It works only against certain viruses and is chosen according to the infection, timing, resistance, and the patient's health.

Antiviral Drug Classes

Groups of antiviral medicines classified by the step of viral growth they block. Some stop copying of viral genetic material, some block viral proteins or entry into cells, and others prevent newly formed viruses from being released.

Anxiolytic

A medicine or other treatment that reduces anxiety. Choice depends on the anxiety disorder, urgency, coexisting conditions, adverse effects, and patient preference; psychological therapies and, when appropriate, antidepressant medicines are commonly used for persistent anxiety.

ARB-Neprilysin Inhibitor

Sacubitril/valsartan combines an ARB with a neprilysin inhibitor, increasing natriuretic peptide levels while blocking the renin-angiotensin system. The PARADIGM-HF trial demonstrated superior reduction in cardiovascular death and heart failure hospitalization compared to enalapril.

Aromatase Inhibitor

A class of medications that inhibit aromatase, the enzyme that converts androgens (androstenedione, testosterone) to estrogens (estrone, estradiol) in peripheral tissues (adipose, breast, muscle, bone). Used primarily in hormone receptor-positive breast cancer in postmenopausal women.

Aspirin

Acetylsalicylic acid, a salicylate that relieves pain and fever, reduces inflammation, and irreversibly inhibits platelet aggregation; it can cause gastrointestinal bleeding and is generally avoided in children with viral illness.

Attenuated Vaccine

A vaccine made with a weakened microorganism that retains the ability to stimulate immunity.

Alternate Names:

Live attenuated vaccine

Bacterial Vaccine

A vaccine made from killed bacteria, weakened bacteria, purified bacterial parts, or bacterial toxins. It trains the immune system to prevent specific infections; protection and dosing depend on the vaccine and age group.

BCG Vaccine

A vaccine made from a weakened relative of the tuberculosis bacterium. It helps protect children from severe tuberculosis, especially meningitis, but protection against lung tuberculosis varies; use depends on local risk and policy.

Behavioral Medicine

An interdisciplinary field integrating behavioral science with medical practice to prevent, diagnose, and treat illness. It addresses psychological factors such as stress, coping, adherence, and health behaviors that influence disease outcomes.

Benzodiazepines

Medicines that strengthen the brain's main calming signal. They can reduce anxiety, stop some seizures, relax muscles, or cause sleepiness, but can also cause dependence, falls, confusion, and dangerously slow breathing, especially with opioids or alcohol.

Beta Agonists

Drugs that activate beta-adrenergic receptors, producing effects such as relaxation of airway smooth muscle or increased cardiac stimulation depending on receptor selectivity.

Alternate Names:

Beta-adrenergic agonists; beta-agonist drugs.

Beta Blocker

A drug that blocks beta-adrenergic receptors, lowering sympathetic effects such as heart rate and

contractility; beta blockers are used for conditions including hypertension, angina, arrhythmias, and heart failure.

Beta Blockers

A class of medicines that block the effects of adrenaline and related hormones at beta receptors. They usually slow the heart rate, reduce the force of heart contraction, and lower blood pressure. Depending on the medicine, they may be used for high blood pressure, angina, abnormal heart rhythms, heart failure, migraine prevention, tremor, or some symptoms of anxiety.

Beta-Adrenergic Blocker

A drug that antagonizes beta-adrenergic receptors, reducing heart rate, myocardial contractility, and renin release. It is used in selected patients with hypertension, angina, arrhythmias, post-myocardial infarction disease, and heart failure; abrupt withdrawal may worsen ischemia.

Alternate Names:

Beta-Adrenergic Antagonist

Beta-Agonist

A medicine that stimulates beta receptors. Beta-2 agonists relax airway muscles to improve breathing, while other types increase heart activity; possible effects include tremor, fast heartbeat, or low potassium.

Beta-Blocker Overdose

Toxic exposure to a beta-adrenergic blocker that may cause slow heart rate, low blood pressure, low blood glucose, bronchospasm, seizures, or altered consciousness. It requires urgent poison-control and medical management.

Beta-Lactamase Inhibitor Combinations

Combinations of beta-lactam antibiotics with beta-lactamase inhibitors that extend activity against beta-lactamase producing organisms. The major combinations include amoxicillin-clavulanate, ampicillin-sulbactam, piperacillin-tazobactam, cefoperazone-sulbactam, and ceftolozane-tazobactam.

C1 Esterase Inhibitor

A blood protein that helps control inflammation, swelling, and clotting reactions. Too little or abnormal activity can cause hereditary angioedema, with repeated attacks of swelling in the skin, bowel, or airway.

Calcium Channel Blocker

A medicine that reduces calcium movement into heart and blood-vessel muscle cells. It may relax arteries, lower blood pressure, reduce chest pain, or slow some abnormal heart rhythms; ankle swelling, constipation, dizziness, or a slow heartbeat may occur.

Calcium Channel Blocker Overdose

Toxic exposure to a calcium-channel blocker that may cause low blood pressure, slow heart rate, conduction abnormalities, high blood glucose, or shock. It requires urgent medical and poison-control management.

Calcium Channel Blockers

Medicines that reduce the movement of calcium into heart and blood-vessel muscle cells. Dihydropyridines, such as amlodipine and nifedipine, mainly relax arteries and are used for high blood pressure and angina. Other calcium channel blockers, such as diltiazem and verapamil, also slow the heart rate and electrical conduction and may be used for certain abnormal heart rhythms.

Camptothecin Analogue

A cancer medicine related to camptothecin that blocks an enzyme cancer cells need to copy DNA. It can damage rapidly dividing cells and commonly causes low blood counts, diarrhea, nausea, or other gastrointestinal effects.

Cancer Vaccine

A vaccine designed either to prevent infections that can cause cancer or to help the immune system attack an existing cancer. Its use depends on the specific vaccine and cancer; it does not replace other cancer treatment when needed.

Cardiotonic Agent

A drug or substance that increases the force or efficiency of cardiac contraction, used selectively in heart failure or shock because benefits must be balanced against arrhythmia and other risks.

Carvedilol Phosphate

The phosphate formulation of carvedilol, a medicine that blocks beta and alpha-1 receptors. It lowers heart rate and blood pressure and is used for heart failure and hypertension; dizziness, slow heartbeat, and worsening fluid retention can occur.

Cebocephaly

A rare birth defect in which the middle part of the face is severely underdeveloped, sometimes with a single nostril or a nose-like structure between closely spaced eyes. It usually occurs with major brain and facial-development abnormalities.

Celecoxib

A selective COX-2 anti-inflammatory medicine used for pain and arthritis. It can cause stomach, kidney, blood-pressure, and heart problems and may increase cardiovascular risk, especially with long-term use or in people with existing risk factors.

Checkpoint Inhibitor

A medicine that blocks an inhibitory immune-checkpoint pathway, helping selected immune cells recognize and attack tumor cells. Examples target PD-1, PD-L1, or CTLA-4.

Cholesterol - Drug Treatment

Medicines used to lower harmful blood cholesterol or triglycerides and reduce cardiovascular risk. Statins are used most often; other options may be added when needed, according to cholesterol levels, overall risk, other illnesses, and treatment tolerance.

Cholinesterase Inhibitor

A medicine that slows the breakdown of acetylcholine, a chemical used for nerve signalling. It can improve nerve communication in selected conditions but may cause nausea, diarrhoea, slow heartbeat, sweating, or muscle cramps.

Cold And Cough Medicine For Infants And Children

Many nonprescription cold and cough medicines are unsafe or ineffective for young children and can cause sedation, agitation, abnormal heart rate, overdose, or breathing problems. Age-appropriate fluids, saline, humidification, and clinician-guided treatment are safer approaches.

Conjugate Vaccine

A vaccine that joins a bacterial sugar to a carrier protein so the immune system makes a stronger, longer-lasting response. This design is especially useful in infants and young children.

Alternate Names:

Protein-conjugate vaccine; conjugated polysaccharide vaccine.

Conscious Sedation

Medicine given to make a person relaxed and drowsy during a procedure while allowing them to respond to voice or touch and usually breathe independently. Breathing, blood pressure, and alertness must be monitored because deeper sedation can occur.

Controlled Substance

A medicine or chemical whose production, supply, possession, or use is restricted by law because it may cause dependence, misuse, overdose, or other serious harm. Rules differ between countries and substances.

COX Inhibitor

A class of medicines that reduce production of chemicals involved in pain, fever, and inflammation. They can irritate the stomach, affect kidney function, raise blood pressure, or increase bleeding and cardiovascular risk.

Cox-1 Inhibitor

A medicine that blocks cyclooxygenase-1, an enzyme involved in pain, stomach protection, kidney function, and platelet clotting. Blocking it may relieve pain but can increase stomach irritation, bleeding, or kidney problems.

Crack (Drug)

A smokable, rapidly acting form of cocaine; it can cause dependence, severe cardiovascular effects, seizures, stroke, psychiatric symptoms, and overdose.

Cutaneous Drug Eruptions

Skin rashes or other skin reactions caused by medicines. They may appear as a widespread red rash, hives, sun-sensitive areas, or a lichen-planus-like eruption. Blisters, skin peeling, mouth sores, fever, or facial swelling require urgent assessment.

Cyclooxygenase Inhibitor

A medicine that reduces production of prostaglandins and may relieve pain and inflammation.

Designer Steroid

A chemically modified anabolic-androgenic steroid created to produce performance-enhancing effects or evade detection; products may be unapproved, contaminated, and medically dangerous.

Diarrhea, Antibiotic-Associated

Alternate index label; see *Antibiotic-associated diarrhea*.

Digitalis

A group of heart medicines from foxglove plants, including digoxin. They can strengthen heart contraction and slow some heart rhythms but have a narrow safety range and may cause dangerous toxicity.

Diphtheria Vaccine

A vaccine containing an inactivated form of diphtheria toxin. It trains the immune system to neutralize the toxin and is usually given in combination vaccines with protection against tetanus and pertussis.

Disease-Modifying Antirheumatic Drug

A medicine that reduces immune-driven inflammation and helps prevent lasting joint or organ damage, rather than only relieving symptoms. Different

types are chosen according to the disease, severity, other conditions, and monitoring needs.

Disulfiram

A medicine used as an adjunct for alcohol-use disorder that inhibits aldehyde dehydrogenase and can cause an unpleasant reaction if alcohol is consumed.

Diuretic

A medicine that helps the kidneys remove extra salt and water in urine. It can treat swelling, high blood pressure, heart failure, or selected kidney and liver conditions but may disturb salts or cause dehydration.

Doctor Of Osteopathic Medicine

A physician who has completed an accredited osteopathic medical degree and residency training and is licensed to diagnose, prevent, and treat disease.

Drug Addiction (Substance Use Disorder)

A chronic disorder involving compulsive substance use despite harmful consequences, with impaired control, cravings, tolerance, or withdrawal.

Alternate Names:

Chemical Dependency Substance Abuse Disorder

Drug Administration Route

The pathway by which a medicine enters the body, such as oral, intravenous, intramuscular, inhaled, topical, or subcutaneous administration.

Drug Allergies

Drug allergies are immune-mediated reactions to a medicine, ranging from rash to anaphylaxis; they must be distinguished from predictable side effects and nonimmune intolerance.

Drug Allergy

An adverse immune-mediated reaction to a medication, representing a hypersensitivity response that is distinct from side effects, toxicities, and idiosyncratic reactions.

Drug Antagonism

An interaction where one drug blocks or decreases the effectiveness of another, such as when an antidote blocks a poison.

Drug Bioavailability

The proportion of a dose that reaches the bloodstream in an active form. It depends on how the medicine is given, how well it is absorbed, and how much is broken down before reaching the blood; intravenous doses enter the bloodstream completely.

Drug Classification Systems

Systems that group medicines according to properties such as their chemical structure, mechanism of action, therapeutic use, or effects on the body.

Drug Clearance

The body's ability to remove a medicine from the bloodstream, mainly through the liver and kidneys. Clearance affects how long a medicine works and how often it should be taken; liver or kidney disease may require dose adjustment.

Drug Dependence

A state of physiological or psychological adaptation to a drug, characterized by a withdrawal syndrome upon discontinuation or dose reduction. Physical dependence: the body has adapted to the presence of the drug, and abrupt cessation produces a predictable withdrawal syndrome specific to the drug class.

Drug Emulsion

A medicine made by dispersing tiny droplets of one liquid throughout another liquid that normally would not mix with it. An added stabilizer keeps the mixture uniform so the medicine can be given safely.

Drug Eruption

A skin eruption caused by a medication, ranging from a mild morbilliform rash to severe reactions such as Stevens–Johnson syndrome or toxic epidermal necrolysis.

Drug Hypersensitivity Reactions

Immune-mediated adverse reactions to medicines. They may be immediate or delayed and can range from a mild rash to severe systemic illness.

Drug Hypersensitivity Syndrome

A serious delayed reaction to a medicine, usually beginning two to eight weeks after it is started. It may cause fever, widespread rash, facial swelling, enlarged lymph nodes, abnormal blood cells, and injury to the liver, kidneys, lungs, or heart.

Drug Induced Liver Disease

Drug-induced liver injury occurs when a medicine, supplement, or toxin damages liver cells or bile flow. It may cause fatigue, nausea, itching, dark urine, jaundice, or no symptoms; identifying and stopping the responsible exposure under medical guidance is central to care.

Drug Interaction

A change in the effect or concentration of one medicine caused by another medicine, food, substance, or disease.

Drug Metabolism

The enzymatic conversion of medicines into metabolites, mainly in the liver but also in the intestine, kidneys, lungs, and other tissues.

Drug Metabolism Pharmacogenomics

The study of how inherited genetic differences change the way a person breaks down medicines. This information can sometimes help clinicians choose a safer or more effective medicine or dose.

Drug Overdose

Harm caused by taking too much medicine or taking it by the wrong route. Effects range from sleepiness, vomiting, and confusion to seizures, organ damage, or stopped breathing. Suspected overdose requires urgent poison-control or emergency advice.

Drug Packaging

The container, labeling, and protective materials

used to preserve a medicine and support correct identification, storage, and use.

Drug Resistance

The ability of microorganisms, cancer cells, or parasites to survive and proliferate despite exposure to drugs that were previously effective.

Drug Therapeutics

The use of medicines to prevent, diagnose, or treat disease while balancing expected benefit and potential harm.

Drug Tolerance

A decreased pharmacological response to a drug after repeated administration, requiring dose escalation to achieve the same effect.

Drug Toxicity

Harmful effects caused by a medicine or its metabolites. Toxicity may result from excessive exposure, accumulation, interactions, or an unpredictable individual reaction.

Drug Use First Aid

Immediate care for suspected drug intoxication, including assessment of breathing and responsiveness, emergency activation, overdose-specific support, and naloxone when opioid toxicity is suspected.

Drug Vehicle

An inactive substance or carrier used to deliver an active drug ingredient in a formulation.

Drug Withdrawal

A clinically significant syndrome or return of symptoms caused by abrupt reduction or cessation of a drug after physiologic adaptation or dependence has developed. Tapering is required for some medications to reduce withdrawal and rebound effects.

Drug, Prescription

A medicine legally supplied under the order of an authorized prescriber, with its indication, dose, duration, interactions, and risks specified for the pa-

tient.

Drug, Sulfa

A sulfonamide drug; some are antibacterial medicines, while others are used as diuretics or for other indications, and sulfonamide reactions vary by drug and patient.

Drug-Drug Interactions

Changes in the effect or amount of one medicine caused by another medicine. The combination may make treatment less effective or increase side effects, so all prescription, nonprescription, and supplement use should be reviewed.

Drug-Eluting Balloon (Vascular)

A vascular balloon catheter that delivers a medicine to the vessel wall during dilation, without leaving a permanent implant.

Alternate Names:

Vascular

Drug-Facilitated Sexual Assault

Sexual contact occurring when a person's capacity to consent or resist is impaired by alcohol, medication, or another drug, whether administered covertly or knowingly consumed. Medical care includes urgent safety assessment, treatment of injuries, toxicology sampling when indicated, prophylaxis, and trauma-informed support.

Drug-Induced Autoimmunity

An immune reaction caused by a medicine in which the body attacks its own tissues. It may resemble lupus, cause joint pain, fever, rash, or organ inflammation, and often improves after the responsible medicine is stopped under medical guidance.

Drug-Induced Diarrhea

Diarrhea caused by a medicine or drug interaction. Common causes include antibiotics, laxatives, metformin, and medicines that alter intestinal motility.

Drug-Induced Immune Hemolytic

Anemia

An uncommon immune-mediated destruction of red blood cells triggered by a medication; evaluation includes blood tests and review of exposures, with specialist management.

Drug-Induced Liver Injury

Liver damage caused by a medicine, herbal product, or dietary supplement. It may produce abnormal liver tests, hepatitis, cholestasis, or liver failure; evaluation requires considering the exposure, timing, competing causes, and severity.

Drug-Induced Low Blood Sugar

Low blood glucose caused by a medicine, most often insulin or an insulin secretagogue. Symptoms may include sweating, tremor, confusion, seizure, or loss of consciousness.

Drug-Induced Lupus Erythematosus

A lupus-like autoimmune syndrome caused by certain medicines. Symptoms commonly include joint pain, muscle pain, and fever and usually improve after the causative medicine is stopped.

Drug-Induced Pulmonary Disease

Lung injury caused by a medicine or treatment. It may produce cough, breathlessness, fever, or abnormal lung imaging; the medicine, timing, and other possible causes must be reviewed promptly because some cases can progress to respiratory failure.

Drug-Induced Thrombocytopenia

A low platelet count caused by a medicine through immune destruction, reduced production, or other mechanisms, increasing bleeding risk.

Drug-Induced Tremor

Tremor caused or worsened by a medicine, stimulant, or toxin. Assessment considers timing, dose, other causes, and whether the medicine can be changed.

DTaP Vaccine

A vaccine against diphtheria, tetanus, and pertussis (whooping cough), given mainly to infants and

young children in a multi-dose series. It reduces severe illness, complications, and spread; schedules vary by country.

Eflornithine

A medicine that slows cell growth by blocking an enzyme needed to make certain cell components. A skin cream can reduce unwanted facial hair; an intravenous form has been used for selected African trypanosome infections.

Enzyme Inhibitor

A substance that slows or blocks an enzyme, a protein that helps chemical reactions occur in the body. Medicines use this action to change processes such as blood pressure, inflammation, infection, hormone production, or cancer-cell growth.

Estrogen Inhibitor

A medicine that reduces estrogen production or blocks estrogen's effects. It may treat selected hormone-sensitive cancers or other conditions; side effects can include hot flashes, bone loss, joint symptoms, or blood clots.

Etidronate

A bisphosphonate medicine that slows the breakdown and rebuilding of bone. It is used selectively for some disorders of abnormal bone remodeling; treatment depends on the condition and can affect the stomach, kidneys, or minerals.

Evidence-Based Medicine

The use of reliable research together with clinical expertise and the patient's values and circumstances to make healthcare decisions. It supports, but does not replace, discussion between patient and clinician.

Expectorant

A medicine intended to loosen or thin mucus so it is easier to cough up. Benefit varies with the cause of cough and the product; persistent breathlessness, fever, chest pain, or blood needs medical assessment.

Extensively Drug-Resistant TB

Tuberculosis caused by bacteria resistant to rifampicin and usually isoniazid, at least one fluoroquinolone, and at least one of the key drugs bedaquiline or linezolid. Diagnosis requires drug-susceptibility testing and specialist treatment.

Family Medicine

A medical specialty providing comprehensive continuing care for people of all ages, including prevention, acute illness, chronic disease, and coordination of referrals.

Fentanyl

A potent synthetic opioid analgesic used for severe pain and anesthesia. It can cause respiratory depression, sedation, constipation, nausea, tolerance, dependence, and fatal overdose, especially when combined with alcohol or other sedatives.

Fertility Agent

A medicine or biologic intervention intended to improve the chance of conception by inducing ovulation, supporting sperm production, or treating a reproductive mechanism.

Fidaxomicin

A narrow-spectrum oral macrocyclic antibiotic used to treat *Clostridioides difficile* infection. It has minimal systemic absorption and reduces disruption of normal intestinal flora compared with many alternatives, but recurrence can still occur.

Filgrastim

A recombinant granulocyte colony-stimulating factor that increases production and release of neutrophils from bone marrow. It is used to reduce or treat selected forms of chemotherapy-related neutropenia; bone pain and rare splenic complications can occur.

Finasteride

A medicine that lowers the conversion of testosterone to dihydrotestosterone. It can shrink an enlarged prostate and help some types of hair loss but may reduce libido, affect sexual function, or

alter prostate-test results.

Fixed Drug Eruption

A medicine-related skin reaction that returns in the same place whenever the person takes the responsible medicine. It may appear as a sharply outlined red or dark patch, sometimes with a blister or sore, and can leave lasting discoloration.

Fluticasone

A corticosteroid available in inhaled, nasal, topical, and other formulations to reduce inflammation. Adverse effects depend on route and may include local irritation, oral candidiasis, skin thinning, adrenal suppression, or growth effects with prolonged exposure.

Food-Drug Interaction

A change in how a medicine works or is absorbed because of food, drink, nutrients, or supplements. Examples include grapefruit affecting some medicines, vitamin K changing warfarin's effect, and calcium reducing absorption of some antibiotics.

Forensic Medicine

Application of medical knowledge to legal questions, including injury interpretation, cause of death, toxicology, identification, sexual assault evaluation, and documentation.

Forensic Medicine (Legal Medicine)

Branch of medicine that applies medical, biological, and scientific knowledge to legal questions and the administration of justice.

Alternate Names:

Legal Medicine

Foscarnet

An intravenous antiviral agent used for selected cytomegalovirus or herpesvirus infections, especially when resistance or intolerance limits other treatment. Important toxicities include kidney injury and disturbances of calcium, magnesium, potassium, or phosphate.

Furosemide

A diuretic that makes the kidneys remove more salt and water in urine. It treats swelling and some blood-pressure or heart conditions but may cause dehydration, abnormal body salts, kidney problems, or hearing damage.

Ganglionic Blocker

A medicine that interrupts nerve signals at switching points controlling automatic body functions. It can affect blood pressure, heart rate, digestion, sweating, vision, and bladder function, so these medicines are rarely used clinically.

Generic Drug

A medicine equivalent to a brand-name medicine in active ingredient, strength, dosage form, and intended use, usually sold under a nonproprietary name.

Alternate Names:

Generic medicine

Generic Medicine

A medicine with the same active ingredient, strength, form, route, and intended effect as an approved reference medicine. It may look different or have different inactive ingredients but must meet regulatory quality and performance requirements.

Generic Name, Drug

The official nonproprietary name of a medicine's active ingredient, used consistently across manufacturers and countries. It identifies the medicine itself rather than a company's brand name and helps prevent confusion when products have different trade names.

Genomic Medicine

Use of a person's genetic or genomic information to guide disease diagnosis, risk assessment, prevention, or treatment.

Geriatric Medicine

The medical specialty focused on the health, function, diseases, medications, and goals of older adults,

often using comprehensive and coordinated care.

Growth Inhibitor

A medicine or biological substance that slows or stops cell growth. In cancer treatment, it may block cell division or a growth signal, but it can also affect healthy cells and cause side effects.

Haemophilus Vaccine

A vaccine that protects against serious disease caused by *Haemophilus influenzae* type b, including meningitis, pneumonia, and bloodstream infection. It is given mainly in infancy according to the recommended immunization schedule.

Hepatic Drug Metabolism

The liver changes medicines into forms that the body can use or remove. This may stop a medicine's effect, activate a medicine that works after conversion, or produce a harmful product; age, illness, genetics, and other medicines can alter the process.

Hepatitis B Vaccine

A recombinant vaccine that prevents hepatitis B infection, which can cause chronic liver disease, cirrhosis, and liver cancer. It is given in a series beginning at birth in many schedules; infants exposed at birth may also need hepatitis B immune globulin.

Hepatitis B Vaccine (Birth Dose)

The first hepatitis B vaccine dose, given soon after birth, helps prevent infection passed from a parent to the newborn. If the birth parent has hepatitis B, the infant also needs hepatitis B immune globulin promptly; local schedules determine later doses.

Alternate Names:

Birth Dose

HER2 Inhibitor

A targeted cancer treatment that blocks signaling through human epidermal growth factor receptor 2 in cancers with HER2 overexpression or amplification.

High Blood Pressure - Medicine-Related

Hypertension caused or worsened by a medicine or substance, such as NSAIDs, steroids, decongestants, stimulants, oral contraceptives, or immunosuppressants; review and substitution may improve control.

Histamine-2 Receptor Antagonist

A medicine that reduces stomach-acid production by blocking histamine signals in the stomach. It may treat reflux, indigestion, or ulcers; headache, diarrhea, confusion, and medicine interactions can occur.

Hormone Inhibitor

A medicine or biologic that blocks hormone synthesis, release, receptor binding, or downstream signaling, used in selected endocrine disorders and hormone-sensitive cancers.

HPV Vaccine

A vaccine that prevents infection with human papillomavirus types that cause several cancers and genital warts. It is routinely offered in early adolescence, can start from age 9, and may require two or three doses depending on age and immune status; it does not treat existing HPV infection.

Hypoglycemic Agent

A medicine that lowers blood glucose, including insulin, insulin secretagogues, insulin sensitizers, incretin-based drugs, and sodium-glucose cotransporter inhibitors; choice depends on diabetes type and patient risks.

Hypolipidemic Agent

A medicine that lowers fats in the blood, such as LDL cholesterol or triglycerides. It helps reduce cardiovascular risk when combined with appropriate diet, activity, and treatment of other risk factors.

Immunosuppressant

A drug that reduces immune system activity, used to prevent organ transplant rejection and to treat autoimmune and inflammatory diseases.

Immunosuppressant Drug

A medicine that reduces immune-system activity, often to prevent transplant rejection or treat autoimmune disease.

Immunosuppressive Drug

A drug that suppresses immune responses, used for organ transplantation, graft-versus-host disease, and autoimmune/inflammatory diseases.

Inactivated Polio Vaccine

An injected vaccine made from killed polioviruses. It trains the immune system to prevent poliomyelitis and is used in routine childhood immunization programs; the schedule and use of other polio vaccines vary by country.

Influenza Vaccine

A seasonal vaccine that reduces the risk of influenza and its complications. It is updated as needed and is offered each year to most people from early infancy; some young children need two doses in their first vaccinated season, according to local recommendations.

Inotrope

A drug that changes myocardial contractility; positive inotropes increase the force of contraction. Dobutamine and milrinone may be used short term under specialist monitoring for cardiogenic shock or selected cases of acute decompensated heart failure with low output. Dopamine, epinephrine, and norepinephrine are primarily vasopressors or emergency agents with additional inotropic effects, while digoxin is a separate cardiac glycoside used in selected chronic heart-failure or rate-control settings. These medicines can cause arrhythmias, ischemia, or other serious effects and are not routine long-term treatment for chronic heart failure.

Intensive Care Medicine

Specialty managing critically ill patients. Components: monitoring, ventilatory support, hemodynamic support, infection control, nutrition, sedation, pain management. Common conditions: sepsis, ARDS, traumatic brain injury, post-cardiac arrest,

multiorgan failure.

Internal Medicine

The medical specialty focused on prevention, diagnosis, and nonsurgical treatment of diseases in adults, including complex multisystem illness.

Japanese Encephalitis Vaccine

A vaccine that protects against Japanese encephalitis, a mosquito-borne viral infection of the central nervous system. Vaccine type, schedule, and eligibility depend on age, destination or exposure risk, and local recommendations.

Laxative

A medicine that helps empty the bowel and is used for constipation or bowel preparation. Some add fiber, some draw water into stool, and others stimulate bowel movement; the best choice depends on the cause, other medicines, and the person's health.

Legal Medicine

The application of medical knowledge to legal questions, including forensic examination, injury assessment, death investigation, and issues of capacity or consent.

Liquid Medication Administration

Giving a medicine in liquid form by mouth, feeding tube, injection, or another prescribed route. The dose must be measured accurately with the supplied device because liquid strengths differ; household spoons can cause dosing errors.

Local Anesthetic

A medicine that temporarily numbs a specific area without usually causing loss of consciousness. It blocks pain signals in nearby nerves and is used for procedures, dental work, wound repair, and some forms of regional pain relief.

Luteinizing Hormone-Releasing Hormone Agonist

A medicine that first stimulates and then, with continued use, suppresses signals from the pituitary

gland that control the ovaries or testes. It is used for selected cancers, endometriosis, fibroids, and puberty disorders.

Alternate Names:

GnRH agonist; LHRH agonist

Macrolide Antibiotic

An antibiotic of the macrolide class that binds the bacterial 50S ribosomal subunit and usually inhibits protein synthesis; activity and resistance vary by organism and drug.

Malaria Vaccine

A vaccine intended to reduce malaria caused by *Plasmodium* parasites, especially *P. falciparum*; the RTS,S/AS01 and R21/Matrix-M vaccines are used in recommended childhood immunization programs in some endemic settings, alongside other preventive measures.

MAO Inhibitor

A medicine that slows breakdown of certain brain chemicals and is used for selected depression or Parkinson disease. It can interact dangerously with other medicines and some foods, so it requires careful prescribing and instructions.

Measles Vaccine

Measles vaccine is a live attenuated vaccine that induces active immunity against measles virus. It is usually given as part of the measles–mumps–rubella (MMR) or measles–mumps–rubella–varicella (MMRV) vaccine.

Measles-Rubella Vaccine

A combined live attenuated vaccine containing measles and rubella antigens without the mumps component, widely used in countries where mumps is not a significant public health burden, including India's Universal Immunization Schedule.

Medication

A substance or biological product used to prevent, diagnose, treat, or control a disease or symptom. Medicines may be prescribed, bought without a prescription, applied to the body, inhaled, swallowed,

or given by injection.

Medication Adherence

The extent to which a patient's medication-taking behavior corresponds with the agreed treatment plan. Adherence is influenced by understanding, adverse effects, cost, access, regimen complexity, beliefs, and cognitive or social factors.

Medication Adverse-Effect Profile

The clinically relevant pattern of predictable pharmacologic effects and harmful reactions associated with a medication. It includes common dose-related effects, serious rare events, organ-specific toxicity, interactions, and monitoring requirements.

Medication Cascade

A prescribing sequence in which an adverse drug effect is misinterpreted as a new medical condition and another drug is prescribed to treat it. Recognizing cascades is an important goal of medication reconciliation and deprescribing.

Medication Deprescribing

A planned, supervised process of reducing the dose or stopping a medicine when its current or future harms outweigh its benefits or when treatment goals change. Tapering may be required to prevent withdrawal or rebound disease.

Medication Error

A preventable event that may cause or lead to inappropriate medication use or patient harm while the medication is in the control of a healthcare professional, patient, or consumer. Errors can occur during prescribing, transcribing, dispensing, administration, or monitoring.

Medication Management

The systematic process of optimizing pharmacotherapy to achieve therapeutic goals while minimizing adverse effects, encompassing prescribing, dispensing, administration, monitoring, and deprescribing.

Medication Overuse Headaches

Frequent headaches caused or worsened by regular overuse of headache medicines.

Alternate Names:

Rebound Headache

Medication Reconciliation

A structured process of obtaining and comparing the most accurate medication list with current prescriptions at transitions of care. It identifies omissions, duplications, incorrect doses, interactions, and unintended changes.

Medication Review

Systematic examination of all medications for appropriateness. Components: indication, efficacy, safety, adherence, interactions. Tools: Beers Criteria, STOPP/START. Goals: deprescribing, optimizing therapy, reducing adverse effects.

Medication Safety

Practices that reduce medication errors and prevent avoidable harm during prescribing, dispensing, administration, and use.

Medication Side Effects

Unintended harmful responses to medications occurring at standard doses, ranging from mild (nausea, rash, dry mouth) to severe (anaphylaxis, Stevens-Johnson syndrome, QT prolongation, hepatotoxicity).

Meningococcal Vaccine

Conjugate vaccine (MenACWY) and serogroup B vaccine (MenB) given at 11-12 years with booster at 16 years. Protects against *Neisseria meningitidis*, causing meningitis and septicemia. MenACWY booster at 16 years covers the high-risk period for serogroup C and Y disease.

Mineralocorticoid Receptor Antagonist

A medicine that blocks aldosterone, a hormone that makes the body retain salt and water. It is used for selected heart failure, high blood pressure, and hormone disorders but can raise blood potassium

and worsen kidney problems.

MMR Vaccine

A live attenuated vaccine against measles, mumps, and rubella. It is given according to the immunization schedule and is generally avoided during pregnancy and in people with certain severe immune deficiencies.

Molecular Medicine

Molecular medicine applies molecular and cellular biology to understand, diagnose, prevent, and treat disease. It includes genomics, precision oncology, molecular biomarkers, targeted therapy, and other mechanism-based approaches.

Monoamine Oxidase Inhibitor

A medicine that blocks monoamine oxidase, an enzyme that breaks down certain brain chemicals. It can treat selected depression or neurologic disorders but has important interactions with other medicines and some foods.

MRNA Vaccine

A vaccine that gives cells temporary instructions to make a harmless piece of a germ. The immune system learns to recognize that piece and respond later; the messenger RNA does not enter the cell nucleus or change DNA.

Multi-Drug Resistance

Multidrug resistance is resistance of a microorganism, cancer, or other disease process to multiple drugs that would otherwise be active. Mechanisms include target changes, drug inactivation, reduced uptake, efflux, and altered repair or survival pathways.

Multidrug-Resistant Extensively Drug-Resistant TB

Multidrug-resistant tuberculosis is resistant to key first-line drugs, while extensively drug-resistant TB has additional resistance that greatly limits options. Diagnosis requires molecular or culture testing, and treatment uses prolonged individualized combinations with public-health oversight.

Neuropathy Secondary To Drugs

Drug-induced neuropathy is peripheral nerve damage caused by a medicine or toxin, often producing numbness, burning pain, weakness, or altered reflexes; management may require dose reduction, withdrawal, and treatment of symptoms.

Nonsteroidal Anti-Inflammatory Drug

A medicine that inhibits cyclooxygenase enzymes and reduces prostaglandin production, producing analgesic, anti-inflammatory, and fever-reducing effects. NSAIDs can cause gastrointestinal, kidney, cardiovascular, or other adverse effects.

NSAIDs

Nonsteroidal anti-inflammatory drugs are a class of drugs that inhibit cyclooxygenase enzymes, COX-1 and COX-2, reducing the synthesis of prostaglandins and thromboxanes from arachidonic acid. They produce analgesic, anti-inflammatory, antipyretic, and antiplatelet effects.

Occupational Medicine

The medical specialty concerned with the effects of work on health, prevention of work-related illness and injury, and safe return to work.

Opioid Analgesics

Strong pain medicines that act on opioid receptors in the brain, spinal cord, and other tissues. They can relieve severe pain but may cause sleepiness, constipation, dependence, and dangerously slow breathing or overdose.

Opioid Antagonist

A medicine that blocks opioid receptors and can reverse opioid effects such as respiratory depression. Naloxone is a commonly used example.

Oral Hypoglycemic

A medicine taken by mouth to lower blood glucose, used mainly in type 2 diabetes. Different medicines improve insulin sensitivity, increase insulin release, slow glucose absorption, or increase glucose loss in urine; choice depends on the patient's risks and kidney function.

Oral Medicine

Specialty diagnosing oral mucosal diseases, dental causes of facial pain, oral manifestations of systemic disease.

Oral Polio Vaccine

A live attenuated poliovirus vaccine administered by mouth. Its formulation and use depend on the public-health program and circulating poliovirus strains; it has played an important role in polio control.

Orphan Drug

A pharmaceutical agent developed specifically to treat a rare medical condition (affecting fewer than 200,000 people in the United States, as defined by the Orphan Drug Act of 1983).

Over-The-Counter (OTC) Drug

A medicine sold without a prescription for uses and doses described on its label. "Over the counter" does not mean risk-free; incorrect use, interactions, or excessive doses can still cause serious harm.

Over-The-Counter Drug

A medication that can be purchased without a prescription, deemed safe and effective for self-medication when used according to label instructions. OTC drugs have established safety profiles, low toxicity, and clear dosing guidelines suitable for consumer use.

P2Y₁₂ Inhibitor

An antiplatelet drug that blocks the platelet P2Y₁₂ ADP receptor, reducing activation and aggregation. Clopidogrel, prasugrel, and ticagrelor are used in selected acute coronary syndrome and percutaneous coronary intervention settings, with bleeding and drug-specific contraindications considered.

Palifermin

A laboratory-made form of a natural growth factor that helps mouth and throat lining cells repair themselves. It is used in selected people receiving intensive treatment before blood-forming stem-cell transplantation to reduce severe mouth sores.

Palonosetron

A long-acting anti-nausea medicine that blocks serotonin signals involved in vomiting. It is used to prevent nausea and vomiting from chemotherapy or surgery; headache, constipation, and rare heart-rhythm changes can occur.

Parasympatholytic

A medicine that blocks some signals of the parasympathetic nervous system. It may widen the airways, relax the bladder, reduce motion sickness, or speed a slow heartbeat, but can cause dry mouth, blurred vision, constipation, urinary retention, or confusion.

Parasympathomimetic

A drug that mimics or enhances parasympathetic (cholinergic) activity. Direct agonists: muscarinic (pilocarpine—glaucoma, dry mouth) and nicotinic agonists.

Paroxetine

Paroxetine is a selective serotonin-reuptake inhibitor used for depression, anxiety disorders, obsessive-compulsive disorder, PTSD, and some other conditions; sexual dysfunction, withdrawal symptoms, serotonin syndrome, and pregnancy-related risks require consideration.

Pediatric Nuclear Medicine

Special considerations for children: lower doses, sedation often needed, distraction techniques. Dose reduction: weight-based activity, optimized protocols.

Pefloxacin

A fluoroquinolone antibiotic that blocks bacterial enzymes needed to copy and repair DNA. Its use is limited by resistance and potentially serious effects involving tendons, nerves, the heart, and the nervous system.

PEG

An abbreviation that may refer to polyethylene glycol, a laxative that draws water into stool, or to a polyethylene-glycol chemical group used to modify medicines. The exact meaning depends on

the clinical context.

Pegaspargase

A long-acting enzyme medicine used in combination treatment for some acute lymphoblastic leukemias. It lowers asparagine needed by leukemia cells; allergic reactions, pancreatitis, liver injury, clotting problems, and bleeding are important risks.

Pegfilgrastim

A long-acting growth factor that stimulates the bone marrow to make neutrophils. It helps prevent infection caused by chemotherapy-related low white-cell counts; bone pain and rare spleen rupture or serious inflammation can occur.

Penicillamine

A medicine that binds certain metals and can also reduce immune activity. It is used selectively for copper overload and some autoimmune or connective-tissue disorders; serious blood, kidney, skin, or allergic reactions can occur.

Pentavalent Vaccine

A WHO-prequalified five-in-one combination vaccine containing Diphtheria toxoid, Tetanus toxoid, whole-cell Pertussis antigen, Hepatitis B (HBsAg), and Haemophilus influenzae type b (Hib) conjugate, administered as a single intramuscular injection.

Pentobarbital

A barbiturate medicine that depresses brain activity and can cause sedation or control seizures. It has a high risk of slowed breathing, coma, dependence, and fatal overdose, especially with alcohol or other sedatives.

Perioperative Antibiotic Prophylaxis

Administration of an appropriate antimicrobial within a defined interval before incision to reduce infection risk for selected procedures. Choice, timing, redosing, and discontinuation depend on procedure, organisms, patient factors, and local guidance.

Pertussis Vaccine

A vaccine containing selected antigens from *Bordetella pertussis*, given in combination vaccines to prevent whooping cough and reduce severe disease and transmission.

Pharmaceutical

Relating to medicines, including their development, preparation, manufacture, testing, storage, or use.

Pharmacodynamic Interaction

A drug interaction in which one drug changes the effect of another at its site of action without necessarily changing its concentration. Effects may be additive, synergistic, or antagonistic, such as combined respiratory depression or bleeding risk.

Pharmacokinetic Interaction

A drug interaction that changes absorption, distribution, metabolism, or excretion of another drug, thereby altering its concentration over time. Enzyme inhibition, enzyme induction, transporter effects, and altered gastric pH are common mechanisms.

Phosphodiesterase Inhibitor

A medicine that blocks enzymes which normally break down chemical signals inside cells. Different types relax airways or blood vessels, improve heart pumping, or treat erectile dysfunction; effects and risks depend on the specific type.

Pneumococcal Conjugate Vaccine

A vaccine that joins parts of the pneumococcus bacterium to a carrier protein so the immune system can build lasting protection. It helps prevent pneumonia, meningitis, bloodstream infection, and other disease; product and schedule depend on age and risk.

Pneumococcal Vaccine

A vaccine that protects against selected serotypes of *Streptococcus pneumoniae* (pneumococcus), which can cause pneumonia, meningitis, bloodstream infection, sinusitis, and otitis media. Available products include pneumococcal conjugate vaccines and pneu-

mococcal polysaccharide vaccine; the product and schedule depend on age, previous doses, and medical risk.

Poliovirus Vaccine

A vaccine that trains the immune system to prevent poliovirus infection and paralysis. Inactivated injectable and live oral forms are used in different programs; the schedule and product depend on age, health, and local public-health guidance.

Prazosin

An alpha-1 blocker that relaxes blood vessels and may relax the bladder outlet. It is used for high blood pressure and, in selected patients, trauma-related nightmares or urinary symptoms; dizziness and fainting are most likely after starting or increasing the dose.

Pre-Medication

Medicine given before a procedure, treatment, or exposure to prevent a predictable problem such as pain, nausea, allergy, infection, or anxiety.

Prescription Drug

A medication whose dispensing or use is subject to prescription requirements under the applicable law. It requires professional oversight because of its risks, complexity, or need for monitoring; regulatory approval and prescribing rules vary by country and product.

Procalcitonin-Guided Antibiotic Therapy

Use of blood procalcitonin measurements, together with examination and other tests, to help decide whether to start or stop antibiotics in selected infections. The result cannot by itself confirm bacterial infection or safely replace clinical judgment.

Prostaglandin Antagonist

A drug that blocks a prostaglandin receptor or pathway, reducing selected prostaglandin-mediated effects such as inflammation, pain, uterine contraction, or gastric secretion.

Protease Inhibitor

An antiviral medicine that blocks a virus enzyme needed to cut newly made proteins into working parts. In HIV treatment, it prevents formation of mature infectious virus and is used with other medicines.

Proton Pump Inhibitor

A medicine that strongly reduces stomach-acid production by blocking the acid pump in stomach cells. It treats reflux and ulcers; long-term or unnecessary use can cause diarrhea, infections, low magnesium, or vitamin deficiencies.

Psychotropic Drug

A medicine that affects brain function and may change mood, thinking, behavior, sleep, or perception. The term includes antidepressants, antipsychotics, mood stabilizers, stimulants, and some medicines for anxiety or sleep.

Psychotropic Medication

A medicine that changes brain activity and may affect mood, thoughts, behaviour, sleep, or perception. Examples include antidepressants, antipsychotics, mood stabilizers, and some medicines for anxiety or attention disorders.

Rabies Vaccine

A vaccine containing inactivated rabies virus used for preexposure protection or postexposure prophylaxis after a possible rabies exposure, together with wound care and immune globulin when indicated.

Rehabilitation Medicine

The medical specialty that helps people restore or adapt movement, communication, thinking, work, and daily activities after illness or injury. It is also called physiatry.

Alternate Names:
physiatry.

Renal Drug Excretion

Removal of medicines from the body by the kidneys into urine. Kidney disease can slow this process,

allowing some medicines to build up and requiring dose changes or closer monitoring.

Renin Inhibitor

A blood-pressure medicine that blocks renin, an enzyme involved in narrowing blood vessels and retaining salt. It lowers blood pressure but can raise potassium, affect kidney function, and harm a developing fetus.

Resistance Antibiotic (Antibiotic Resistance)

Alternate index label for Antibiotic Resistance.

Rock (Drug)

A street term commonly used for crack cocaine, a smokeable form of cocaine. It produces intense, short-lived stimulation but can cause dependence, dangerous heart rhythms, heart attack, stroke, seizures, overheating, or severe agitation.

Rotavirus Vaccine

An oral live attenuated vaccine that protects infants and young children against severe rotavirus gastroenteritis. The product, schedule, and age limits depend on the immunization program; mild fever or diarrhea may occur.

Scabicide

A medicine applied to the skin or taken by mouth to kill scabies mites. Treatment usually includes all close household or sexual contacts and washing or isolating recently used clothing and bedding to prevent reinfection.

Selective Serotonin Reuptake Inhibitor

A medicine that increases serotonin signalling between nerve cells by slowing serotonin reuptake. It treats depression and several anxiety-related disorders; nausea, sexual difficulties, withdrawal symptoms, and rarely serotonin toxicity can occur.

SGLT2 Inhibitor

A medicine that makes the kidneys pass more glucose and salt into the urine. It lowers blood sugar

and can protect the heart and kidneys in selected people, but may cause dehydration, genital infections, or rarely ketoacidosis.

Skeletal Muscle Relaxant

A medicine that reduces excessive contraction of skeletal muscles. It may relieve short-term muscle spasm or longer-term spasticity, but sleepiness, weakness, dizziness, and impaired breathing can occur with some drugs.

Sleep Drug

A medicine used to help a person fall asleep, stay asleep, or maintain a regular sleep pattern. Benefits and risks vary widely; drowsiness, falls, impaired thinking, dependence, and interactions with alcohol or sedatives are important concerns.

Steroid

A group of chemicals with a characteristic structure. In medicine, steroids include corticosteroids that reduce inflammation and natural or replacement hormones such as cortisol, estrogen, progesterone, and testosterone.

Steroid Abuse

Steroid misuse is non-prescribed or excessive use of corticosteroids or anabolic-androgenic steroids, which can cause endocrine suppression, psychiatric effects, infection, metabolic disease, liver injury, cardiovascular harm, or tissue damage.

Steroid Hormones

Lipid-soluble hormones derived from cholesterol, including cortisol, aldosterone, estrogen, progesterone, and testosterone.

Steroid Injections - Tendon, Bursa, Joint

Injection of a corticosteroid, often with local anesthetic, into or around a joint, bursa, or tendon sheath to reduce inflammation and pain; injections directly into tendons are generally avoided because of rupture risk.

Tamsulosin

Tamsulosin is a selective alpha-1A blocker that relaxes prostate and bladder-neck smooth muscle to improve urinary symptoms of benign prostatic hyperplasia; dizziness, postural hypotension, and ejaculatory dysfunction may occur.

TCAs

Tricyclic antidepressants are medicines that increase the effects of certain brain chemicals. They can treat depression, nerve pain, and some other conditions but may cause sleepiness, dry mouth, constipation, low blood pressure, abnormal heart rhythms, or overdose toxicity.

Tdap Vaccine

Tetanus, Diphtheria, and acellular Pertussis booster given at 11-12 years and during each pregnancy (27-36 weeks gestation). Replaces one dose of Td. Important for pertussis protection, particularly for protecting newborns through maternal antibody transfer. Also given to adolescents and adults to maintain tetanus and diphtheria immunity.

Terazosin

An alpha-blocking medicine that relaxes the prostate and blood vessels. It can improve urine flow in prostate enlargement and lower blood pressure, but dizziness or fainting may occur, especially after the first dose or dose increases.

Therapeutic Drug Levels

The range of medicine concentrations in blood associated with benefit while limiting toxicity for a particular drug. A measured level must be interpreted with the dose, timing, symptoms, kidney or liver function, and the person's response.

Therapeutic Drug Monitoring

Measuring selected medicine levels in blood to adjust the dose for the best balance of benefit and safety. It is most useful when small changes in level can cause treatment failure or serious toxicity.

Thrombolytic

A medicine that helps dissolve a blood clot by chang-

ing plasminogen into plasmin, which breaks down fibrin. It may be used urgently for selected strokes, heart attacks, or other life-threatening clots when benefits outweigh bleeding risk.

Thrombolytic Drugs For Heart Attack

Medicines that dissolve a clot blocking a coronary artery during selected heart attacks. They can restore blood flow when urgent artery-opening procedures are unavailable or delayed, but may cause dangerous bleeding and are not suitable for everyone.

Transfusion Medicine

The medical specialty that selects, prepares, tests, and gives blood or blood components such as red cells, platelets, plasma, and cryoprecipitate. It includes matching, preventing transfusion reactions, and monitoring patients.

Travel Medicine

Medical care concerned with prevention and treatment of health problems related to travel.

Tricyclic Antidepressant Overdose

Poisoning with a tricyclic antidepressant can cause drowsiness, confusion, dry mouth, seizures, low blood pressure, and dangerous heart rhythms. It is an emergency requiring immediate poison-control or hospital treatment.

Tumor Necrosis Factor Inhibitor

A biological medicine that blocks tumor-necrosis factor, an immune signal involved in inflammation. It treats selected arthritis, psoriasis, and bowel diseases but can increase serious infection risk, so screening and monitoring are important.

Tyrosine Kinase Inhibitor

A targeted medicine that blocks enzymes carrying growth signals inside cells. It can slow cancers driven by abnormal signaling, but side effects vary and may include diarrhea, skin changes, liver injury, high blood pressure, or heart problems.

Uricosuric Agent

A medicine that increases renal excretion of uric acid, lowering serum urate in selected patients with gout. Adequate kidney function and hydration are important, and urinary uric-acid stones may be a concern.

Urine Drug Screen

A preliminary urine test that looks for selected medicines or recreational drugs and their breakdown products. Results can be falsely positive or negative and may need confirmation with a more specific laboratory test.

Uterotonic

A medicine that makes the uterus contract. It is used under medical supervision to start or strengthen labor, prevent or treat heavy bleeding after birth, or complete selected pregnancy-related procedures; excessive contraction can harm the mother or fetus.

Vaccine Adjuvant

A substance added to some vaccines to enhance and prolong the immune response to the antigen. Examples include aluminum salts and newer adjuvant systems.

Vaccine Therapy

Treatment that uses a vaccine to stimulate an immune response against a disease. It may prevent infection or, in selected cancer treatments, help the immune system recognize abnormal cells; its benefits depend on the specific vaccine and condition.

Varicella Vaccine

A live attenuated vaccine that prevents or reduces the severity of chickenpox. The number and timing of doses depend on age, vaccination history, immune status, pregnancy, and local recommendations. It is generally avoided during pregnancy and in people with certain immune deficiencies.

Xanthine Oxidase Inhibitor

A medicine that lowers uric-acid production by blocking an enzyme involved in breaking down sub-

stances from cells and food. It is used mainly to prevent gout attacks and, in selected cases, complications from rapid cancer-cell breakdown.

Brand Medicines

Medical Prefix

Prefix	Meaning	Example of use in medical terms
Ab-	A medical prefix meaning away from, off, or separating from,	abduction (movement away from the midline) and ablation (removal or destruction of tissue)
Acou-	A medical combining form referring to hearing or sound,	acoustic nerve, audiology, and acoumeter
Acro-	Acro- is a medical word element meaning extremity, tip, or highest part,	acromegaly and acrocyanosis
Acu-	A combining form meaning sharp, pointed, or related to acuity; in medical terms it may refer to sharp sensation or vision,	acuity, acute, or acupuncture, depending on the word formed
Ad-	A medical prefix meaning toward, to, or near,	adduction (movement toward the midline) and adrenal (near the kidney)
Aden- Adeno-	A combining form meaning gland or glandular tissue, A combining form referring to a gland or glandular tissue,	adenitis and adenoma adenovirus, adenoid, and adenocarcinoma
Aer-, Aero-	A combining form meaning air or gas,	aerobic, aerosol, and aerophagia
Alb- Amyl-	A prefix derived from the Latin albus, meaning white, A combining form referring to starch or a starch-like substance,	albino and albinism amylase and amyloid
Amylo-	A combining form referring to starch-like material or amyloid protein deposits	amyloidosis and amyloidoma
An-	A prefix meaning without, lacking, or not,	anoxia, anesthesia, and anencephaly
Aniso-	A combining form meaning unequal or unequal in size, number, or degree	anisocytosis and anisometropia
Antero-	A combining form meaning anterior or toward the front	anteroposterior and anterolateral
Anti-	A prefix meaning against, opposed to, or preventing a specified process or condition	antibiotic and anticoagulant
Arthro- Bi-	A combining form meaning joint A prefix meaning two, twice, or involving two sides or components	arthritis and arthroscopy bilateral and bicuspid

Prefix	Meaning	Example of use in medical terms
Bio-	A combining form meaning life or living organisms	biochemistry and biopsy
Brachy-	A combining form meaning short or abnormally short	brachycephaly and brachydactyly
Cephal-	A combining form meaning head	cephalic and cephalalgia
Cholangi-	A combining form meaning bile duct or bile vessel	cholangitis and cholangiography
Circum-	A combining form meaning around or surrounding	circumcision and circumoral
Colpo-	A combining form meaning vagina	colposcopy and colpotomy
Cranio-	A combining form meaning skull or cranium	craniotomy and craniosynostosis
Cyto-	A combining form meaning cell	cytology and cytotoxic
Dacryo-	A combining form meaning tear or tear duct	dacryocystitis and dacryostenosis
Dactyl-, -Dactyl	A combining form or suffix meaning finger or toe	polydactyly and brachydactyly
Dextro-	A combining form meaning right, toward the right, or sometimes clockwise	dextrocardia and dextroposition
Di-	A combining form meaning two, twice, or double	diplopia and diplegia
Dia-	A combining form with meanings including through, across, apart, or complete, depending on the word	dialysis and diagnosis
Disto-	A combining form meaning distal, distant, or away from a point of attachment or origin	distal and distobuccal
Dys-	A prefix meaning abnormal, difficult, painful, or impaired,	dysphagia (difficulty swallowing) and dysuria (painful urination)
Entero-	A combining form meaning intestine or bowel,	enteropathy and enteroscopy
Epi-	A prefix meaning on, upon, over, or above,	epidermis and epigastric
Extra-	A clinical condition or finding involving extra-. Its defining features, causes, evaluation, and management depend on the clinical context	extraocular and extracellular
Gyne-	A combining form meaning woman or female,	gynecology
Haem- / Haema- / Haemato- / Haemo-	Prefixes derived from the Greek word haima (blood), used in medical terminology to denote blood-related conditions and procedures	hematology, hematoma, and hemoglobin
(Prefixes Relating To Blood)		
Hemi-	A prefix meaning half or one side,	hemiplegia and hemithorax
Hepat-	A combining form meaning liver,	hepatic and hepatocellular
Hepato-	A combining form meaning liver,	hepatobiliary and hepatomegaly
Hetero-	A prefix meaning different, other, or unequal,	heterozygous and heterogeneous
Histo-	A combining form meaning tissue,	histology and histopathology
Homo-	A prefix meaning same or alike,	homozygous and homologous
Hyper-	A prefix meaning excessive, above normal, or increased,	hyperglycemia and hypertension
Hypo-	A prefix meaning below, deficient, reduced, or less than normal,	hypoglycemia and hypothermia

Prefix	Meaning	Example of use in medical terms
Iatr-	A combining form meaning medical treatment or physician,	iatrogenic and iatrogeny
Infra-	A medical term referring to infra-. Its precise meaning and clinical importance depend on the context in which it is used	infrapatellar and infraorbital
Intra-	Intra- is an anatomical structure, tissue relationship, physiologic process, or body function; its location and mechanism explain its clinical significance	intraocular and intravenous
Iso-	A prefix meaning equal, same, or uniform,	isotonic and isometric
Juxta-	A prefix meaning next to, beside, or adjoining,	juxtaglomerular
Kerato-	A combining form relating to the cornea or to horny or keratinized tissue,	keratitis and keratosis
Leuk-	A combining form meaning white, especially in terms relating to white blood cells,	leukocyte
Leuko-	A combining form meaning white,	leukoderma or leukopenia
Levo-	A prefix meaning left or turning toward the left, often used in chemistry or to describe spatial orientation	levocardia and levodopa
Lieno-	A combining form meaning relating to the spleen	lienorenal and lienectomy
Lipo-	A combining form meaning relating to fat or lipids	lipoma and lipoprotein
Litho-	A combining form meaning stone,	lithotripsy and nephrolithiasis
Macro- (Prefix)	A prefix meaning large, abnormally large, or on a large scale,	macrocytic, meaning involving abnormally large cells
Medical Prefix	A prefix used in medical terminology to modify a word's meaning	hyper- (above or excessive), hypo- (below or deficient), macro- (large), and micro- (small)
Mega-	A combining form meaning large, great, or abnormally enlarged	megacolon and megakaryocyte
Mega- (Prefix)	A prefix derived from Greek meaning large, great, or abnormally enlarged,	megacolon, megacardia, and megaloccephaly
Melan- (Prefix)	A combining form meaning dark or black, derived from the Greek melas; it refers especially to melanin or dark pigmentation,	melanoma and melanocyte
Mes-	A combining form meaning middle	mesencephalon and mesoderm
Meso-	A combining form meaning middle	mesothelioma and mesocolon
Mi-	A combining form meaning small or relating to muscle, depending on the word in which it appears	micturition and miosis
Micro-	A combining form meaning small or millionth, depending on context	microscopy and microcephaly
Myc-	A combining form meaning fungus or pertaining to fungi, derived from the Greek mykes	mycosis and mycology
Myco-	The term Myco- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	mycosis and mycology
Myel-	A combining form relating to bone marrow or the spinal cord, depending on the word	myelitis and myelopathy

Prefix	Meaning	Example of use in medical terms
Myo- (Prefix)	A medical term referring to myo- (prefix). Its clinical meaning depends on the context in which it is used	myopathy and myocarditis
Naso-	The term Naso- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	nasogastric and nasopharyngeal
Neo- (Prefix)	Neo- is a prefix meaning new or recently formed	neoplasm and neonatal
Nephro-	The term Nephro- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	nephritis and nephrectomy
Oligo-	A combining form meaning few, scanty, or deficient	oliguria and oligospermia
Oligo- (Prefix)	Oligo- is a prefix meaning few, scanty, or small in number or amount	oliguria and oligospermia
Onco-	A combining form relating to tumors or cancer	oncology and oncogenesis
Onycho-	A combining form relating to the nail	onychomycosis and onycholysis
Onycho- (Prefix)	Onycho- is a prefix meaning relating to a nail or claw	onychomycosis and onycholysis
Ortho- (Prefix)	Ortho- is a prefix meaning straight, correct, upright, or related to orthopedic care depending on the term	orthopedics and orthostatic
Osteo- (Prefix)	Osteo- is a prefix meaning relating to bone	osteomyelitis and osteoporosis
Ot-	The term Ot- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	otitis and otalgia
Oto-	The term Oto- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	otology and otoscope
Oxy	Oxy- is a prefix relating to oxygen, sharpness, or acidity depending on the medical or chemical term	oxygen and oxyhemoglobin
Pachy- (Prefix)	A word-forming prefix meaning thick or thickness,	pachyonychia, pachyderma, and pachycephaly
Para	Para- is a prefix meaning beside, beyond, abnormal, or related to childbirth depending on the word; its exact meaning must be read in context	parathyroid and paranasal
Para-	A combining form meaning beside, beyond, abnormal, or closely related, depending on the word	paracentesis and paraesthesia
Para- (Prefix)	Para- is a medical prefix whose meaning varies by use, including beside, beyond, abnormal, or the number of births reaching a specified gestational age	parathyroid and parity in obstetric history
Patho-	The term Patho- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	pathology and pathogenesis
Peri-	The term Peri- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	pericardium and periosteum
Phago-	The term Phago- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	phagocytosis and phagocyte
Phlebo- (Prefix)	Phlebo- is a medical prefix meaning relating to a vein,	phlebitis, phlebectomy, or phlebography

Prefix	Meaning	Example of use in medical terms
Pneumo-	The term Pneumo- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	pneumothorax and pneumonia
Poly-	A combining form meaning many or much	polyuria and polyneuropathy
Post	Post- is a prefix meaning after,	post-operative, postpartum, or postprandial
Post-	A combining form meaning after or behind	postnatal and postprandial
Pre-	A combining form meaning before or in front of	prenatal and preoperative
Prefix	A prefix is a word element placed before a root to modify meaning; medical prefixes commonly indicate location, number, time, direction, or abnormality	hyper-, hypo-, peri-, and brady-
Prefixes, Medical	Word beginnings that modify medical terms by indicating location, number, time, speed, size, direction, deficiency, excess, or other meaning,	hyper-, hypo-, peri-, and brady-
Pro-	A combining form meaning before, forward, or in favor of	prolactin and prognosis
Pseudo-	A combining form meaning false or resembling but not truly	pseudocyst and pseudarthrosis
Retro-	A combining form meaning backward, behind, or posterior	retroperitoneal and retrosternal
Salpingo-	A combining form relating to a fallopian tube	salpingitis and salpingectomy
Sarco-	A combining form meaning flesh or soft tissue	sarcoma and sarcoidosis
Schizo-	A combining form relating to splitting or schizophrenia	schizophrenia and schizoid
Scler-	The term Scler- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	sclerosis and scleritis
Sclero-	The term Sclero- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	scleroderma and sclerotherapy
Sub-	A combining form meaning under, below, or less than normal	subcutaneous and subdural
Super-	A combining form meaning above, excessive, or superior	superinfection and supernumerary
Supra-	A combining form meaning above or beyond	suprarenal and suprapubic
Syn-	A combining form meaning together, with, or joined	syndactyly and synovitis
Teno-	A combining form relating to a tendon	tenosynovitis and tenodesis
Thermo-	A combining form relating to heat or temperature	thermoregulation and thermotherapy
Toc- (Prefix)	Toc- is a prefix used in some medical terms and often relates to childbirth or labor,	tocolysis; the complete word determines its meaning
Toco-	The term Toco- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	tocography and tocolysis
Toko- (Prefix)	Toko- is a prefix relating to childbirth or labor, derived from Greek terms for birth	tocolysis and tokodynamometry
Tom-	The term Tom- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	tomography and tomodensitometry

Prefix	Meaning	Example of use in medical terms
Tomo-	The term Tomo- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	tomography and tomographic
Trans- (Prefix)	The term Trans- (prefix) is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	transdermal and transcatheter
Trich- (Prefix)	The term Trich- (prefix) is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	trichiasis and trichology
Tricho-	A combining form relating to hair	trichoscopy and trichotillomania
Tricho- (Prefix)	The term Tricho- (prefix) is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	trichorrhexis and trichomycosis
Tympano-	The term Tympano- is a medical word element or prefix whose precise meaning depends on the word or clinical context in which it is used	tympanoplasty and tympanometry
Xanth- (Prefix)	Xanth- is a medical word element meaning yellow or yellowish,	xanthoma, xanthelasma, and xanthopsia
Xen- (Prefix)	A medical word element meaning foreign, strange, or originating outside the usual organism or system,	xenograft (a tissue transplanted between different species)
Xeno- (Prefix)	Xeno- is a medical word element meaning foreign, strange, or from another species,	xenograft and xenotransplantation
Xero-	Xero- is a medical word element meaning dry or dryness,	xeroderma, xerophthalmia, and xerostomia

Complete reference tables

These categorized tables reproduce the prefix reference structure from the Pressbooks resource cited below. Examples are retained as learning aids; the meaning of a word part can vary by term.

Prefix	Meaning	Example of use in medical terms
Common prefixes		
A-, An-	Without; lacking	Anemia
Andr/o-	Male	Androgen
Anti-	Against	Anticholinergic drugs
Auto-	Self	Autocrine
Bio-	Life	Biology
Chem/o-	Chemistry	Chemotherapy
Contra-	Against	Contraception
Cyt/o-	Cell	Cytokine
Dis-	Separation; taking apart	Dissection
Dys-	Difficult; abnormal	Dyspnea
Eu-	Good; well	Eupnea
Fibr/o-	Fiber	Fibrosis
Gluco-, Glyco-	Glucose; sugar	Glycogen

Prefix	Meaning	Example of use in medical terms
Gyn/o-, Gynec-	Female	Gynecology
Hydr/o-	Water	Hydrocephalus
Idio-	Self; one's own	Idiopathic
Lyso-, Lys-	Break down; destruction; dissolving	Lysosome
Mal-	Bad; abnormal	Malignant
Myc/o-	Fungus	Mycetoma
Necr/o-	Death	Necrosis
Neo-	New	Neonate
Oxy-	Sharp; acute; oxygen	Oxytocin
Pan-, Pant/o-	All or everywhere	Pancytopenia
Pharmaco-	Drug; medicine	Pharmacist
Re-	Again; backward	Rejuvenation
Somat/o-, Somatico-	Body; bodily	Somatic cell
Body-part prefixes		
Acous/o-	Hearing	Acoustic meatus
Aden/o-	Gland	Adenoid
Adip/o-	Fat	Adipocyte
Adren/o-	Gland	Adrenal cortex
Angi/o-	Blood vessel	Angioplasty
Arteri/o-	Artery	Arteriole
Arthr/o-	Joint	Arthroplasty
Bucc/o-	Cheek	Buccal cavity
Bronch/i-	Bronchus	Bronchioles
Burs/o-	Bursa	Bursa
Carcin/o-	Cancer	Basal cell carcinoma
Cardi/o-	Heart	Cardiology
Cephal/o-	Head	Cephalic flexure
Chol-	Bile	Cholesterol
Chondri-	Cartilage	Chondrosarcoma
Coron-	Heart	Coronary arteries
Cost-	Rib	Costal cartilage
Crani/o-	Brain	Cranium
Cutane-	Skin	Cutaneous
Cyst/o-, Cysti-	Bladder or sac	Cystoscopy
Derm-, Dermat/o-	Skin	Dermatologist
Duoden/o-	Duodenum	Duodenitis
Gastr-	Stomach	Gastrectomy
Gloss-	Tongue	Glossectomy
Hem-, Hema-, Hemat-, Hemo-, Hemat/o-	Blood	Hematopoiesis
Hepat/o-, Hepatico-	Liver	Hepatic portal system
Hist/o-, Histio-	Tissue	Histology
Hyster/o-	Uterus	Hysterectomy
Ileo-	Ileum	Ileostomy
Ischi/o-	Ischium	Ischial tuberosity
Kerat/o-	Cornea (eye or skin)	Keratin
Lacrim/o-	Tear	Lacrimal fluid
Lact/o-, Lacti-	Milk	Lactose
Laryng/o-	Larynx	Laryngitis
Lingu/o-	Tongue	Lingual tonsil

Prefix	Meaning	Example of use in medical terms
Lip/o-	Fat	Lipolysis
Lymph/o-	Lymph	Lymphocyte
Mamm-, Mast/o-	Breast	Mammary glands
Mening/o-	Meninges	Meningitis
Muscul/o-	Muscle	Musculoskeletal
My/o-	Muscle	Myocardium
Myel/o-	Spinal cord or bone marrow	Myelin
Nephr/o-	Kidney	Nephron
Neur/i-, Neur/o-	Nerve	Neuron
Oculo-	Eye	Oculomotor nerve
Onco-	Tumor; bulk; volume	Oncogene
Onych/o-	Fingernail; toenail	Onychodystrophy
Oo-	Egg; ovary	Oocyte
Oophor/o-	Ovary	Oophorectomy
Op-, Opt-	Vision	Optic nerve
Ophthalm/o-	Eye	Ophthalmic artery
Orchid/o-, Orchio-	Testis	Orchidectomy
Orth/o-	Straight; normal; correct	Orthostatic
Osseo-	Bony	Osseous tissue
Ossi-	Bone	Ossicles
Ost-, Oste/o-	Bone	Osteoporosis
Ot/o-	Ear	Otolaryngologist
Ovar/i-, Ovario-, Ovi-, Ovo-	Ovary	Ovarian follicle
Phalang-	Phalanx	Phalanges
Pharyng/o-	Pharynx; throat	Pharyngeal tonsil
Phleb/o-	Vein	Phlebotomist
Phren/i-, Phreno-, Phrenico-	Diaphragm	Phrenic nerve
Pleur-, Pleur/a-, Pleur/o-	Rib; pleura	Pleural cavity
Pneum/a-, Pneumat/o-	Air; lung	Pneumonia
Proct/o-	Anus; rectum	Proctoscopy
Prostat-	Prostate	Prostatectomy
Pseudo-	False	Pseudostratified
Psych/o-, Psyche-	Mind	Psychiatrist
Radio-	Radiation; radius	Radioisotopes
Ren/o-	Kidney	Renal cortex
Retin-	Retina	Retinitis pigmentosa
Rhin/o-	Nose	Rhinoscope
Salping/o-	Tube	Salpingo-oophorectomy
Sarco-	Muscular; flesh-like	Sarcomere
Schiz/o-	Split; cleft	Schizophrenia
Sclera-, Sclero-	Hardness	Sclerosis
Sigmoid/o-	Sigmoid colon	Sigmoidoscopy
Sperma-, Sperm-, Spermato-	Sperm	Spermatocyte
Splen/o-	Spleen	Splenomegaly
Sten/o-	Narrowed; blocked	Stenosis
Stern-	Sternum	Sternoclavicular joint

Prefix	Meaning	Example of use in medical terms
Stom/a-, Stomat/o-	Mouth	Stomatitis
Thorac/o-, Thoracico-	Chest	Thoracic cavity
Thromb/o-	Blood clot	Thrombolytic
Thyr/o-	Thyroid gland	Thyroiditis
Trache/o-	Trachea	Trachealis
Tympan/o-	Eardrum	Tympanic membrane
Ur/o-	Urine	Urologist
Vagin-	Vagina	Vaginal
Varic/o-	Duct; blood vessel	Varicose veins
Vasculo-	Blood vessel	Vasculitis
Ven/o-	Vein	Venae cavae
Vertbr-	Vertebra; spine	Vertebral column
Color prefixes		
Chlor/o-	Green	Chlorophyll
Chrom-, Chromato-	Color	Chromosome
Cyano-	Blue	Cyanosis
Erythr/o-	Red	Erythrocyte
Leuk/o-	White	Leukocyte
Melan/o-	Black	Melanin
Physical property and shape prefixes		
Cry/o-	Cold	Cryotherapy
Elect-	Electrical activity	Electrocardiogram
Kin/o-, Kine-, Kinesi/o-	Movement	Kinetic energy
Kyphy/o-	Humped	Kyphosis
Rhabd/o-	Rod-shaped; striated	Rhabdomyosarcoma
Phot/o-	Light	Photoreceptor
Reticul/o-	Net	Reticulocytes
Scoli/o-	Twisted	Scoliosis
Therm/o-	Heat	Thermotherapy
Direction and position prefixes		
Ab-, Abs-	Away from	Abductor
Ad-	Towards	Adductor
Ante-	Before; forward	Antenatal
Circum-	Around	Circumcision
Cycl-	Circle; cycle	Cyclic neutropenia
De-	Away from; ending	Dehydration
Dia-	Across; through	Diagnosis
Ect/o-, Exo-	Outer; outside	Exocrine gland
End/o-, Ent-, Enter/o-	Within; inner	Endocrine gland
Epi-	Upon; outside of	Epidermis
Ex-, Extra-	Beyond	Expiration
Infra-	Beneath; below	Infratemporal fossa
Inter-	Between	Interstitial fluid
Intra-	Within	Intracellular fluid
Meso-	Middle	Mesoderm
Meta-	Beyond; change	Metabolism
Para-	Alongside; abnormal	Parathyroid glands

Prefix	Meaning	Example of use in medical terms
Path/o-	Disease	Pathologist
Peri-	Around	Pericardium
Post-	Behind; after	Postpartum
Pre-	Before; in front	Precancerous
Retro-	Backward; behind	Retroperitoneum
Sub-	Under	Subcutaneous layer
Super-	Above	Superior
Supra-	Above; upon	Supraglottis
Sy-, Syl-, Sym-, Syn-, Sys-	Together	Syndrome
Trans-	Across; through	Transdermal
Quantity prefixes		
Bi-	Two	Biceps
Brady-	Slow	Bradycardia
Diplo-	Double	Diploid
Hemi-	Half	Hemihypertrophy
Hetero-	Other; different	Heterogeneous
Homo-	Same	Homozygous genotype
Hyper-	Above; beyond; excessive	Hypertension
Hypo-	Under; deficient	Hypotension
Iso-	Equal; like	Isointense
Macro-	Large; long; big	Macrophage
Mic-, Micro-	Small	Microglia
Mon-, Mono-	One	Monocyte
Olig/o-	Few; little	Oliguria
Poly-	Many; excessive	Polyuria
Quadri-	Four	Quadriceps
Semi-	Half	Semilunar valves
Tachy-	Fast	Tachycardia
Tetra-	Four	Tetralogy of Fallot
Tri-	Three	Triceps
Uni-	One	Unicellular

Medical Suffixes

Suffix	Meaning	Example of use in medical terms
-Stomy	A suffix meaning surgical creation of an opening,	colostomy or gastrostomy
-Tomy	A suffix meaning incision or cutting into	laparotomy or tracheotomy
Cidal	A suffix meaning killing or destroying,	bactericidal or fungicidal
Cide	A suffix meaning an agent or process that kills,	pesticide, bactericide, or homicide
Cyte	A suffix meaning cell,	erythrocyte or leukocyte
Cytosis	A suffix or term indicating a condition involving cells or, in some contexts, an increase in the number of a particular type of cell	leukocytosis or erythrocytosis
Dactyl-, -Dactyl	A combining form or suffix meaning finger or toe	polydactyly or brachydactyly
Ectomy	A suffix meaning surgical removal or excision,	appendectomy or mastectomy
Emia	A suffix meaning a condition of the blood or a substance present in the blood,	anemia or bacteremia
Iatrics	A suffix or word element referring to medical treatment or a medical specialty,	geriatrics and pediatrics
Iatry	A suffix meaning medical treatment or a medical specialty,	psychiatry and podiatry
Itis	A suffix meaning inflammation,	dermatitis, bronchitis, and arthritis
Kalemia	A suffix or term referring to the concentration of potassium in the blood,	hypokalemia or hyperkalemia
MAB	Abbreviation for monoclonal antibody; the suffix -mab in a generic drug name indicates a monoclonal antibody,	adalimumab or rituximab
Oma	-oma is a suffix commonly indicating a tumor or mass, although some words ending in -oma describe non-neoplastic conditions	lipoma or carcinoma
Pathy	A suffix meaning disease, disorder, or abnormality,	neuropathy, cardiomyopathy, and nephropathy
Plegia	-plegia is a suffix meaning paralysis,	paraplegia, hemiplegia, or quadriplegia

Complete reference tables

Suffix	Meaning	Example of use in medical terms
Common suffixes		
-ac	Pertaining to	Cardiac
-blast, -blasto, -blastic	Bud; germ	Myeloblast
-cyte, -cytic	Cell	Thrombocyte
-dynia	Pain; swelling	Thoracodynia
-eal, -ial	Pertaining to	Esophageal
-ectasis	Expansion; dilation	Atelectasis
-emia	Blood condition	Anemia
-ia	Condition	Hemophilia
-iasis	Condition; formation of	Psoriasis
-ism	Condition	Hypothyroidism
-ites, -itis	Inflammation	Arthritis
-ity	Pertaining to	Immunity
-ium	Structure or tissue	Epithelium
-lysis, -lytic	Breakdown; destruction; dissolving	Osteolytic
-malacia	Softening	Osteomalacia
-megaly	Enlargement	Acromegaly
-oid	Resembling	Arachnoid trabeculae
-oma	Tumor	Angiosarcoma
-osis	Condition; usually abnormal	Endometriosis
-ous	Pertaining to	Aqueous
-pathy	Disease	Lymphadenopathy
-penia	Deficiency; lack of	Thrombocytopenia
-phagia, -phagy	Eating; swallowing	Dysphagia
-phasia	Speech	Aphasia
-plasia, -plastic	Growth	Hyperplasia
-plegia	Paralysis	Hemiplegia
-pnea	Breathing	Sleep apnea
-poiesis	Production	Hemopoiesis
-ptosis	Falling; drooping	Apoptosis
-rrhage, -rrhagic	Bleeding	Hemorrhage
-rrhea	Flow or discharge	Diarrhea
-sclerosis	Hardening	Arteriosclerosis
-sis	Condition	Agranulocytosis
-stasis	Level; unchanging	Homeostasis
-trophy	Growth	Hypertrophy
-uria	In the urine	Anuria
Procedure suffixes		
-centesis	Surgical puncture to remove fluid	Thoracentesis
-desis	Surgical binding	Pleurodesis
-ectomy	Cut out; removal	Mastectomy
-gram	Record; picture	Electrocardiogram
-graph	Instrument used to create a record or picture	Electrocardiograph
-graphy	To record or take a picture	Echocardiography
-meter	Device used for measuring	Sphygmomanometer
-opsy	Visual examination	Biopsy

Suffix	Meaning	Example of use in medical terms
-ostomy	Opening	Colostomy
-otomy	Incision	Laparotomy
-pexy	Surgical fixation	Oophoropexy
-plasty	Surgical reconstruction	Vertebroplasty
-scope	For examining	Endoscope
-scopy	Examine	Endoscopy

Alternate Names

Primary term	Alternate names
ACE	angiotensin-converting enzyme
ACE Inhibitor	angiotensin-converting enzyme inhibitor
Acquired Immunodeficiency Syndrome	AIDS
Adenosine Triphosphate	ATP
AIDS	acquired immunodeficiency syndrome
Alcoholism	alcohol dependence: A chronic
Alimentary Canal	gastrointestinal
AMD	age-related macular degeneration
Angiotensin-Converting Enzyme	ACE
Angiotensin-Converting Enzyme Inhibitor	ACE
Amyloid Precursor Protein	APP
ARB	angiotensin II receptor blockers
ATP	adenosine triphosphate
AV Node	atrioventricular node
Balloon Dilation	Balloon dilatation
BMD	bone mineral density
BMI	body-mass index
BPH	benign prostatic hyperplasia
CABG	coronary artery bypass graft
CBC	complete blood count
	mdash
CCU	coronary care unit
Cerebral Hemorrhage	hemorrhagic stroke
CFS	chronic fatigue syndrome
CK	creatine kinase
COX-2 Inhibitors	cyclooxygenase-2 inhibitors
CPAP	continuous positive airway pressure
CPR	cardiopulmonary resuscitation
CRP	C-reactive protein
DNA	deoxyribonucleic acid
DNR	do-not-resuscitate order
DRI	dietary reference intake
EBCT	electron-beam computed tomography
ECG	electrocardiogram
ED	erectile dysfunction

Primary term	Alternate names
EEG	electroencephalogram
EKG	electrocardiogram
EMG	electromyography
	mdash
FSH	follicle-stimulating hormone
GERD	gastroesophageal reflux disease
GFR	glomerular filtration rate
Gingiva	gums: a form of oral tissue that covers the roots of teeth and surrounding bone
GnRH	gonadotropin-releasing hormone
HbA1C	hemoglobin A1c
HDL	high-density lipoprotein
HEPA Filter	high-efficiency particulate air
HIV	human immunodeficiency virus
HLA	human leukocyte antigen
HPA	hypothalamic-pituitary-adrenal axis
Human Immunodeficiency Virus	HIV
IBD	inflammatory bowel disease
ICD	implantable cardioverter defibrillator
IgE	immunoglobulin E
IU	international unit
LDL	low-density lipoprotein
LH	luteinizing hormone
LVAD	left-ventricular assist device
MAOIs	monoamine oxidase inhibitors
METs	metabolic equivalents
MHC Molecule	major histocompatibility complex molecule
Mitral Valve Prolapse	Barlow's Syndrome; Barlow Syndrome (Mitral Valve Prolapse)
MRI	magnetic resonance imaging—a scan that creates detailed pictures of internal organs
MUSE	medicated urethral system for erection
NK	natural killer cells
NMDA Receptor	N-methyl-D-aspartame receptor
NO	nitric oxide
NSAID	nonsteroidal anti-inflammatory drug
PAD	peripheral artery disease
PCOS	polycystic ovary syndrome
PDE5 Inhibitors	phosphodiesterase type 5 inhibitors
PET Scan	positron emission tomography
PSA	prostate-specific antigen
PTCA	percutaneous transluminal coronary angioplasty
PTSD	post-traumatic stress disorder
RAST	radioallergosorbent test
RCT	randomized controlled trial
RDA	recommended dietary allowance
REM	rapid eye movement
RLS	restless legs syndrome
SAD	seasonal affective disorder
SERMs	selective estrogen receptor modulators
SSRIs	selective serotonin reuptake inhibitors

Primary term	Alternate names
Steroids	corticosteroids
T Cell	mdash T lymphocyte
TDD	telecommunications device for the deaf
TENS	mdash transcutaneous electrical nerve stimulation
TIA	mdash transient ischemic attack
tPA	tissue plasminogen activator
TSH	thyroid-stimulating hormone
VLDL	very-low-density lipoprotein
VSD	ventricular septal defect
ABO Blood Group System	mdash ABO Blood Group; ABO Blood Groups; ABO Blood Types; ABO System
Absolute Neutrophil Count	ANC
Aarskog-Scott syndrome	Aarskog Syndrome
Banti Syndrome	Banti disease; Banti's syndrome
Barber itch	Barber's itch
Glycated Hemoglobin (A1C)	A1C; A1C test; Hemoglobin A1C; HbA1C

British and US Medical Terms

This table lists common differences between United States and British medical terminology. Some terms are used in both countries, and local hospitals may use additional variations.

United States term	British term
Acetaminophen	Paracetamol
Anemia	Anaemia
Anesthesia	Anaesthesia
Anesthetic	Anaesthetic
Apnea	Apnoea
Behavior	Behaviour
Cesarean section	Caesarean section
Celiac disease	Coeliac disease
Color	Colour
Diarrhea	Diarrhoea
Edema	Oedema
Epinephrine	Adrenaline
Esophagus	Oesophagus
Fetal	Foetal
Fetus	Foetus
Gynecology	Gynaecology
Hemoglobin	Haemoglobin
Hemolysis	Haemolysis
Hemorrhage	Haemorrhage
Labor	Labour
Leukocyte	Leucocyte
Maneuver	Manoeuvre
Orthopedics	Orthopaedics
Pediatric	Paediatric
Pediatrician	Paediatrician
Practice (verb)	Practise (verb)
Sulfur	Sulphur
Tumor	Tumour

Common vocabulary differences

United States term	British term
Pap test or Pap smear	Cervical smear test

United States term	British term
Emergency department (ED)	Accident and emergency department (A&E)
Emergency room (ER)	Accident and emergency department (A&E)
Family physician	General practitioner (GP)
Operating room (OR)	Operating theatre
Primary care physician (PCP)	General practitioner (GP)
Skilled nursing facility	Nursing home
Urgent care center	Walk-in centre or minor injuries unit, depending on the service

Common Medical Abbreviations

Abbreviation	Full form
ABG	Arterial blood gas
ACE	Angiotensin-converting enzyme
ACE inhibitor	Angiotensin-converting enzyme inhibitor
ACL	Anterior cruciate ligament
ACS	Acute coronary syndrome
ADHD	Attention-deficit/hyperactivity disorder
ADL	Activity of daily living
AED	Automated external defibrillator
AFib	Atrial fibrillation
AIDS	Acquired immunodeficiency syndrome
AKI	Acute kidney injury
ALP	Alkaline phosphatase
ALT	Alanine aminotransferase
AMI	Acute myocardial infarction
ALS	Amyotrophic lateral sclerosis; advanced life support, depending on context
ANC	Absolute neutrophil count
ANA	Antinuclear antibody
ANP	Atrial natriuretic peptide
APGAR	Appearance, pulse, grimace, activity, and respiration
ARDS	Acute respiratory distress syndrome
AST	Aspartate aminotransferase
ATN	Acute tubular necrosis
AV	Atrioventricular
AVM	Arteriovenous malformation
AVN	Atrioventricular node
BID	Twice a day; prescription shorthand that should be avoided when possible
BP	Blood pressure
BMI	Body mass index
BMR	Basal metabolic rate
BPH	Benign prostatic hyperplasia
BRCA	Breast cancer susceptibility gene; commonly referring to the BRCA1 or BRCA2 gene
BUN	Blood urea nitrogen
CABG	Coronary artery bypass graft
CA	Cancer antigen or calcium, depending on context
CA-125	Cancer antigen 125

Abbreviation	Full form
CAD	Coronary artery disease
CAT	Computed tomography; an older term for computerized axial tomography
CBC	Complete blood count
CBT	Cognitive behavioural therapy
CDC	Centers for Disease Control and Prevention
CEA	Carcinoembryonic antigen
CHF	Congestive heart failure
CHD	Congenital heart disease
CIN	Cervical intraepithelial neoplasia
CJD	Creutzfeldt–Jakob disease
CK	Creatine kinase
CMV	Cytomegalovirus
CNS	Central nervous system
COPD	Chronic obstructive pulmonary disease
CPAP	Continuous positive airway pressure
CPK	Creatine phosphokinase; an older name for creatine kinase
CPR	Cardiopulmonary resuscitation
CRF	Chronic renal failure; chronic kidney disease is preferred in current usage
CRP	C-reactive protein
CSF	Cerebrospinal fluid
CT	Computed tomography
CVS	Chorionic villus sampling
CVA	Cerebrovascular accident
CXR	Chest radiograph
D&C	Dilatation and curettage
DKA	Diabetic ketoacidosis
DJD	Degenerative joint disease
DM	Diabetes mellitus
DNA	Deoxyribonucleic acid
DTP	Diphtheria, tetanus, and pertussis
DVT	Deep-vein thrombosis
DX	Diagnosis
ECG	Electrocardiogram
EKG	Electrocardiogram
ECHO	Echocardiogram
EEG	Electroencephalogram
eGFR	Estimated glomerular filtration rate
EMG	Electromyography
ENT	Ear, nose, and throat
ERCP	Endoscopic retrograde cholangiopancreatography
ESR	Erythrocyte sedimentation rate
ESRD	End-stage renal disease
FBC	Full blood count
FEV1	Forced expiratory volume in the first second
FSH	Follicle-stimulating hormone
GABHS	Group A beta-haemolytic streptococcus
GERD	Gastroesophageal reflux disease
GFR	Glomerular filtration rate
GI	Gastrointestinal
GIST	Gastrointestinal stromal tumour
GU	Genitourinary
HbA1c	Glycated haemoglobin

Abbreviation	Full form
HDL	High-density lipoprotein
HAV	Hepatitis A virus
HBV	Hepatitis B virus
HCT	Hematocrit
HCV	Hepatitis C virus
HGB	Hemoglobin
HIV	Human immunodeficiency virus
HLA	Human leukocyte antigen
HPV	Human papillomavirus
HRT	Hormone replacement therapy
HTN	Hypertension
IBD	Inflammatory bowel disease
IBS	Irritable bowel syndrome
ICD	Implantable cardioverter-defibrillator
ICU	Intensive care unit
IDDM	Insulin-dependent diabetes mellitus; type 1 diabetes mellitus is preferred in current usage
IM	Intramuscular
IU	International unit
IUD	Intrauterine device
IV	Intravenous
IVP	Intravenous pyelography or intravenous pyelogram
LDL	Low-density lipoprotein
LH	Luteinizing hormone
LFT	Liver function test
MI	Myocardial infarction
MMR	Measles, mumps, and rubella
MRI	Magnetic resonance imaging
MRSA	Methicillin-resistant <i>Staphylococcus aureus</i>
MS	Multiple sclerosis; may have other meanings depending on context
NG	Nasogastric
NIDDM	Non-insulin-dependent diabetes mellitus; type 2 diabetes mellitus is preferred in current usage
NKDA	No known drug allergies
NSAID	Nonsteroidal anti-inflammatory drug
OCD	Obsessive-compulsive disorder
PAD	Peripheral arterial disease
PAP	Papanicolaou
PCOS	Polycystic ovary syndrome
PCR	Polymerase chain reaction
PE	Pulmonary embolism
PET	Positron emission tomography
PFT	Pulmonary function test
PID	Pelvic inflammatory disease
PMS	Premenstrual syndrome
PPD	Purified protein derivative
PRN	As needed (from the Latin <i>pro re nata</i>)
PSA	Prostate-specific antigen
PT	Prothrombin time
PTCA	Percutaneous transluminal coronary angioplasty
PTH	Parathyroid hormone
PTT	Partial thromboplastin time

Abbreviation	Full form
PUD	Peptic ulcer disease
PVC	Premature ventricular contraction
QID	Four times a day; prescription shorthand that should be avoided when possible
RA	Rheumatoid arthritis; may have other meanings depending on context
RAST	Radioallergosorbent test
RBC	Red blood cell
RCT	Randomized controlled trial
REM	Rapid eye movement
RLS	Restless legs syndrome
RNA	Ribonucleic acid
RSV	Respiratory syncytial virus
Rx	Prescription or treatment, depending on context
SaO ₂	Arterial oxygen saturation
SARS-CoV-2	Severe acute respiratory syndrome coronavirus 2
SIDS	Sudden infant death syndrome
SLE	Systemic lupus erythematosus
SOB	Shortness of breath
SSRI	Selective serotonin reuptake inhibitor
STD	Sexually transmitted disease; sexually transmitted infection is preferred in current usage
STI	Sexually transmitted infection
T ₃	Triiodothyronine
T ₄	Thyroxine; commonly referring to tetraiodothyronine
TAH	Total abdominal hysterectomy
TB	Tuberculosis
TIA	Transient ischemic attack
TIBC	Total iron-binding capacity
TID	Three times a day; prescription shorthand that should be avoided when possible
TMJ	Temporomandibular joint
TORCH	Toxoplasmosis, other infections, rubella, cytomegalovirus, and herpes simplex; a group of congenital-infection evaluations
TSH	Thyroid-stimulating hormone
TURP	Transurethral resection of the prostate
URI	Upper respiratory infection
UTI	Urinary tract infection
VSD	Ventricular septal defect
WBC	White blood cell
WDWN	Well-developed, well-nourished
WNL	Within normal limits; a finding is within the expected reference range or clinical appearance
WHO	World Health Organization
XRT	Radiotherapy

A.C. A prescription abbreviation meaning “before meals,” from the Latin *ante cibum*.

ALA An abbreviation for alpha-linolenic acid, an essential omega-3 fatty acid, or aminolevulinic acid, a heme-pathway compound used topically in some photodynamic treatments; context determines the meaning.

AP An abbreviation commonly meaning anteroposterior, or directed from front to back; in some contexts it may have another medical expansion.

ATM An abbreviation that may mean the temporomandibular joint or ataxia-telangiectasia mutated, a protein kinase involved in DNA-damage repair; context determines the meaning.

-
- BF** Physician's shorthand for Black female; demographic abbreviations should be used cautiously and replaced with precise, patient-preferred language when possible.
- BPD** An abbreviation commonly meaning bronchopulmonary dysplasia, chronic lung disease after premature birth; it can also mean borderline personality disorder in psychiatric contexts.
- CA** A medical abbreviation that may mean cancer, carcinoma, or calcium; the intended meaning depends on the surrounding clinical context.
- CKD** Abbreviation for Chronic Kidney Disease: a progressive loss of kidney function over months to years, defined by a glomerular filtration rate (GFR) less than 60 mL/min/1.73m² or markers of kidney damage (albuminuria, haematuria, structural abnormalities) persisting for at least 3 months.
- CLA** An abbreviation that commonly means conjugated linoleic acid, a group of fatty-acid isomers; in other medical contexts it may have a different expansion.
- CTG** Abbreviation for cardiotocography; continuous electronic monitoring of fetal heart rate and uterine contractions during labour.
- CVA** An abbreviation for cerebrovascular accident, meaning a stroke caused by interruption of blood flow to the brain or bleeding within the brain. It may cause sudden neurologic deficits.
- CVS** An abbreviation that may mean cardiovascular system or chorionic-villus sampling, a prenatal diagnostic procedure; context determines the meaning.
- DDAVP** The abbreviation for desmopressin, a synthetic vasopressin-like medicine used for some bleeding disorders, central diabetes insipidus, and nighttime urination.
- DES** An abbreviation that may mean diethylstilbestrol, a synthetic estrogen, or drug-eluting stent; diethylstilbestrol exposure during pregnancy is associated with later reproductive and cancer risks.
- DHHS** The abbreviation for the U.S. Department of Health and Human Services.
- DNR** An abbreviation for do-not-resuscitate, indicating that cardiopulmonary resuscitation should not be attempted if breathing or heartbeat stops.
- DNS** An abbreviation that may mean deviated nasal septum or dextrose in normal saline; the intended expansion depends on the clinical context.
- DPT** An older abbreviation for the combined diphtheria, pertussis, and tetanus vaccine; current formulations include DTaP and Tdap.
- DT** An abbreviation that may mean delirium tremens or diphtheria–tetanus vaccine; the intended meaning depends on context.
- DTC** An abbreviation that may mean differentiated thyroid carcinoma or direct-to-consumer, such as direct-to-consumer genetic testing; the intended meaning depends on context.
- DTP** An older abbreviation for diphtheria, tetanus, and pertussis vaccine; current childhood formulations are generally called DTaP.
- DV** An abbreviation that may mean domestic violence, ductus venosus, or another context-specific term; the full expression should be specified.
- DYS** An abbreviation or word root related to dysplasia, dystonia, dyslexia, or another condition beginning with dys-; the intended meaning depends on context.
- EC** An abbreviation that may mean enteric-coated, emergency contraception, or endothelial cell; the intended meaning depends on context.
- EFT** An abbreviation whose medical meaning depends on context, such as endocrine-function testing or emotional freedom technique; the intended expansion should be specified.
- ENT** Abbreviation for ear, nose, and throat; it commonly refers to the otolaryngology specialty or an otolaryngologist.
-

EOS Commonly an abbreviation for eosinophils or an eosinophil count in laboratory reports; the intended meaning should be confirmed from the report's context.

EPA Abbreviation for eicosapentaenoic acid, an omega-3 polyunsaturated fatty acid found in oily fish and fish-oil supplements.

EPR Abbreviation for electrophrenic respiration, also called diaphragm pacing, in which electrical stimulation helps activate the diaphragm in selected patients with respiratory muscle paralysis.

EPT Abbreviation for estrogen/progestin therapy, treatment using both an estrogen and a progestin, commonly discussed in menopausal hormone therapy when the uterus is present.

ER Abbreviation for emergency room or emergency department, the hospital service that evaluates and treats urgent illness and injury.

FCC In medicine, an abbreviation for familial colorectal cancer; in other contexts it may have nonmedical meanings.

FFI Abbreviation for fatal familial insomnia, a rare inherited prion disease causing progressively severe insomnia, autonomic dysfunction, and neurologic decline.

FISH Abbreviation for fluorescence in situ hybridization, a test that uses fluorescent DNA probes to detect specific genes, chromosomes, or chromosomal rearrangements in cells.

FLAP Abbreviation for 5-lipoxygenase-activating protein, a protein encoded by *ALOX5AP* that helps produce leukotrienes involved in inflammation.

GALT Abbreviation for gut-associated lymphoid tissue, immune tissue in the gastrointestinal tract that samples intestinal contents and helps defend against pathogens.

GBV-C Abbreviation for GB virus C, also called human pegivirus, a blood-borne virus that can persist in people but is not established as a cause of chronic hepatitis.

GD In the RxList medical-dictionary context, abbreviation for Gaucher disease, an inherited lysosomal storage disorder caused by deficient glucocerebrosidase.

GI Abbreviation for gastrointestinal, relating to the digestive tract from the mouth through the anus and its associated organs.

GPO Abbreviation for group purchasing organization, an organization that combines buyers' purchasing power to negotiate prices and contracts for medicines, supplies, or services.

HAART Abbreviation for highly active antiretroviral therapy, an older term for combination antiretroviral treatment used to suppress HIV replication and preserve immune function.

HAPE Abbreviation for high-altitude pulmonary edema, a life-threatening accumulation of fluid in the lungs after rapid ascent; immediate descent and supplemental oxygen are urgent treatments.

HAV Abbreviation for hepatitis A virus, an RNA virus spread mainly by the fecal-oral route that causes acute hepatitis but usually does not cause chronic infection.

HBV Abbreviation for hepatitis B virus, a DNA virus transmitted through infected blood or body fluids that can cause acute or chronic hepatitis and cirrhosis or liver cancer.

HEPA Abbreviation for high-efficiency particulate air, describing a filter designed to remove a very high proportion of airborne particles of specified sizes from an air stream.

HGD Commonly an abbreviation for high-grade dysplasia, a marked abnormality of cell development that may be a precursor to invasive cancer but is not itself invasive cancer.

HNP Abbreviation for herniated nucleus pulposus, in which the inner material of an intervertebral disk protrudes through the outer ring and may compress a nerve root.

HPS Common medical abbreviations include hantavirus pulmonary syndrome, a severe respiratory illness, and Hermansky-Pudlak syndrome, an inherited disorder with oculocutaneous albinism and platelet-storage abnormalities; context determines the meaning.

-
- HS** Commonly an abbreviation for hereditary spherocytosis, an inherited hemolytic anemia; it can also mean half-strength, heart sounds, hamstrings, heparan sulfate, hernia sac, or house surgeon, so context is essential.
- HSA** Abbreviation that may mean a US health savings account or human serum albumin, the main plasma protein that helps maintain oncotic pressure; context determines the meaning.
- ICU** Abbreviation for intensive care unit, a hospital unit providing continuous monitoring and specialized support for critically ill patients.
- ID** A context-dependent abbreviation that may mean infectious disease, infectious diseases specialist, intellectual disability, or identification; the surrounding clinical text determines the meaning.
- IFA** Abbreviation for indirect fluorescent antibody, a laboratory method that detects antibodies or antigens using fluorescent labels, commonly in serologic testing.
- IHS** Abbreviation for the Indian Health Service, a US federal agency providing health services to American Indians and Alaska Native people and communities.
- IPT** Abbreviation for interpersonal therapy, a structured psychotherapy that focuses on relationships, grief, role transitions, and interpersonal difficulties.
- IPV** Abbreviation for inactivated polio vaccine, an injectable vaccine containing killed poliovirus and used to prevent poliomyelitis.
- IQ** Abbreviation for intelligence quotient, a standardized score from cognitive testing; it describes performance on specified tests and is not a complete measure of a person's abilities or worth.
- ITC** Abbreviation for in-the-canal, describing a hearing aid or other device positioned within the ear canal.
- ITN** Abbreviation for insecticide-treated bednet, a net treated with insecticide to reduce mosquito bites and malaria transmission.
- IVC** Commonly abbreviation for inferior vena cava, the large vein returning blood from the lower body to the heart; it can also mean intravenous cholangiogram, an X-ray study of the biliary system.
- JIP** Abbreviation for juvenile intestinal polyposis, an inherited condition in which children develop multiple hamartomatous polyps in the gastrointestinal tract and may have increased cancer risk.
- KB** In medical usage, an abbreviation for keratoderma blennorrhagicum or kilobase of DNA; lower-case *kb* is preferred for kilobase, so context is important.
- KUB** Abbreviation for kidney, ureter, and bladder, commonly referring to a plain abdominal X-ray used to assess urinary tract calculi, bowel gas patterns, or other abdominal findings.
- L** Abbreviation for liter, a metric unit of volume equal to 1,000 milliliters.
- LAVH** Abbreviation for laparoscopically assisted vaginal hysterectomy, removal of the uterus through the vagina with laparoscopic assistance.
- LL** Commonly an abbreviation for lower lid of the eye or lower limit; the intended meaning depends on the clinical context.
- LLL** Abbreviation for the left lower lobe of the lung.
- LLQ** Abbreviation for left lower quadrant, usually referring to the lower-left quarter of the abdomen.
- LMP** Abbreviation for last menstrual period, the first day of the most recent menstrual bleeding, used in estimating gestational age when the date is reliable.
- LPA** LPA abbreviates Little People of America and may also refer to the left pulmonary artery.
- LUL** Abbreviation for the left upper lobe of the lung.
- LUQ** Abbreviation for the left upper quadrant of the abdomen.
- LVF** Abbreviation for left ventricular failure, meaning failure of the left side of the heart; it may also mean left ventricular function, depending on context.
-

-
- MAOI** Abbreviation for monoamine oxidase inhibitor, a drug that inhibits monoamine oxidase and is used in selected treatment of depression and other disorders.
- MAP** Common abbreviation for *Mycobacterium avium* subspecies *paratuberculosis*, an organism of the *M. avium* complex; the abbreviation can have other meanings in different clinical contexts.
- MCD** An abbreviation with several medical meanings, including minimal change disease, mean corpuscular diameter, and medullary cystic disease; the intended meaning depends on context.
- MCP** Membrane cofactor protein, also called CD46, is a cell-surface protein that regulates complement activation and helps protect host cells from complement-mediated injury; the abbreviation can have other meanings in different contexts.
- MDI** An abbreviation that may mean metered-dose inhaler, multiple daily injections, or mental developmental index; the intended meaning depends on context.
- MEDVAC** Abbreviation for medical evacuation: the transport of ill or injured people to a medical facility or to a location providing a higher level of care.
- MI** Abbreviation for myocardial infarction, or heart attack: death of heart-muscle tissue caused by prolonged inadequate blood flow, usually from acute coronary artery blockage.
- MM** An abbreviation that may mean meningomyelocele, malignant melanoma, or multiple myeloma; in lowercase, *mm* commonly means millimeter. The intended meaning depends on context.
- MP** Abbreviation for mercaptopurine, a purine-antimetabolite drug, or for molecular pathology; the intended meaning depends on context.
- MPS** Abbreviation for mucopolysaccharidosis, a group of inherited lysosomal storage disorders caused by deficient breakdown of glycosaminoglycans.
- MSG** Abbreviation for monosodium glutamate, the sodium salt of glutamic acid used as a flavor enhancer and contributing umami taste.
- MTX** Abbreviation for methotrexate, a folate-antagonist drug used in selected cancers, autoimmune diseases, and other conditions.
- MVP** Abbreviation for mitral valve prolapse, in which one or both mitral-valve leaflets bow into the left atrium during ventricular systole; it is often mild but can sometimes cause mitral regurgitation or arrhythmias.
- MYH** MYH is a gene-family abbreviation involving myosin or DNA-repair proteins; the specific gene and variant determine the clinical meaning.
- ND** ND is a context-dependent abbreviation that may mean naturopathic doctor, neurodevelopmental, or another term; the full meaning should be specified.
- NEP** NEP is a context-dependent abbreviation that may mean neuroendocrine pancreatic tumor, nasoendotracheal procedure, or another clinical term.
- NF** NF is a context-dependent abbreviation, including neurofibromatosis, a group of genetic disorders causing nerve-sheath tumors and other features.
- NG** NG commonly means nasogastric, referring to a tube passed through the nose into the stomach, but the abbreviation has other uses.
- NS** NS is a context-dependent abbreviation, commonly normal saline, a sterile sodium-chloride solution, or not significant; the full term should be stated.
- OB** OB is an abbreviation commonly meaning obstetrics, the care of pregnancy, labor, birth, and the postpartum period, but it may have other meanings.
- OBS** OBS is a context-dependent abbreviation that may mean observation, obstetric service, or organic brain syndrome; the intended term should be written out.

-
- OCG** OCG is a context-dependent abbreviation that may refer to oral contraceptive guidance, oculocardiac testing, or another clinical term; the full term should be specified.
- OMS** An abbreviation for oral and maxillofacial surgery; the intended meaning depends on the clinical context.
- PAP** PAP is an abbreviation with context-dependent meanings, including Papanicolaou testing, pulmonary alveolar proteinosis, or prostatic acid phosphatase; the full term should be specified.
- PAS** PAS is an abbreviation that may mean periodic-acid–Schiff staining, para-aminosalicylic acid, or pulmonary-artery systolic pressure; context determines the meaning.
- PAT** PAT is a context-dependent abbreviation that may refer to paroxysmal atrial tachycardia, a rapid rhythm beginning in the atria, or another clinical term.
- PCA** PCA is a context-dependent abbreviation, commonly meaning patient-controlled analgesia, in which a patient activates prescribed doses from an infusion device.
- PCT** PCT is a context-dependent abbreviation that may mean procalcitonin, porphyria cutanea tarda, or patient-care technician; the full term should be specified.
- PDR** PDR commonly means Physicians' Desk Reference, a drug-information reference, but the abbreviation has other uses and should be interpreted in context.
- PEP** PEP is a context-dependent abbreviation, including post-exposure prophylaxis, a preventive medicine course after a possible infection exposure.
- PHS** PHS is an abbreviation whose meaning depends on context, including public health service or primary hyperhidrosis; the full term should be specified.
- PI** PI is a context-dependent abbreviation, including principal investigator, pulmonary insufficiency, or protease inhibitor; the intended meaning must be specified.
- PLP** PLP commonly means pyridoxal 5'-phosphate, the active coenzyme form of vitamin B6 required by many enzymes, but the abbreviation has other uses.
- PMD** PMD is a context-dependent abbreviation, including Pelizaeus–Merzbacher disease, a rare inherited disorder of central myelination, or a professional medical designation.
- PON** PON is a context-dependent abbreviation that may refer to postoperative nausea, paraoxonase, or another clinical term; the full meaning should be stated.
- PTU** PTU is the abbreviation for propylthiouracil, an antithyroid medicine used selectively because of liver toxicity and other safety considerations.
- PV** PV is a context-dependent abbreviation, including polycythemia vera, plasma volume, or peripheral vision; the full term should be specified.
- PVB** PVB is a context-dependent abbreviation that may mean paravertebral block, a regional anesthetic technique, or another medical term.
- PX** PX is a context-dependent abbreviation that may mean prognosis, patient, prescription, or a genetic marker; clinical documentation should spell out the intended term.
- Q.2H** A prescription abbreviation meaning “every 2 hours.” Medication instructions should use clear wording because abbreviation misinterpretation can cause dosing errors.
- Q.3H.** A prescription abbreviation meaning “every 3 hours.” Medication instructions should use clear wording because abbreviation misinterpretation can cause dosing errors.
- Q.S.** A prescription abbreviation from the Latin “quantum sufficiat,” meaning “quantity sufficient” to make the required amount or concentration. The exact quantity must be specified by the formulation or prescription context.
- R/O** R/O is an abbreviation for rule out, indicating that a condition is being considered but has not been confirmed; clear documentation should state the actual diagnostic question.
-

RAD Acronym whose medical meaning depends on context, commonly radiation absorbed dose or right axis deviation on an ECG.

RBC RBC is the abbreviation for red blood cell, the cell that transports oxygen with hemoglobin and carries carbon dioxide back toward the lungs.

RF RF is a context-dependent abbreviation, including rheumatoid factor, radiofrequency, or risk factor; the complete term should be stated.

RLL RLL is the abbreviation for right lower lobe, usually referring to the lower lobe of the right lung.

RLQ RLQ is the abbreviation for right lower quadrant of the abdomen, containing structures including the appendix, cecum, and right adnexa.

RML RML is the abbreviation for right middle lobe, the middle lobe of the right lung.

RP RP is a context-dependent abbreviation, commonly retinitis pigmentosa, an inherited retinal degeneration causing night blindness and progressive visual-field loss.

RUQ RUQ is the abbreviation for right upper quadrant of the abdomen, containing the liver, gallbladder, duodenum, and portions of bowel and kidney.

SGOT SGOT is the former abbreviation for AST, an enzyme measured in blood that can rise with injury to liver, heart, muscle, or other tissues.

SGPT SGPT is the former abbreviation for ALT, a liver-associated enzyme that rises in many forms of hepatocellular injury.

SHP SHP is a context-dependent abbreviation that may refer to a healthcare professional, a gene or protein, or another clinical term; the full meaning should be specified.

SLV SLV is a context-dependent abbreviation that may mean single-lung ventilation, serum lithium value, or another term; the full meaning should be specified.

STD(S) Abbreviation for sexually transmitted disease(s), now often called sexually transmitted infections.

STS STS is a context-dependent abbreviation that may mean soft-tissue sarcoma, sodium thiosulfate, or another clinical term; the full term should be stated.

TMR TMR is a context-dependent abbreviation, including targeted muscle reinnervation, a surgical technique used to improve control of a prosthesis and reduce amputation pain.

TPA/TPA Abbreviation for tissue plasminogen activator.

TSD TSD is a context-dependent abbreviation that may mean total sleep deprivation, traumatic stress disorder, or another clinical term; the full term should be specified.

TSE TSE is a context-dependent abbreviation, including transmissible spongiform encephalopathy, the prion-disease group that includes Creutzfeldt-Jakob disease.

UL UL is a context-dependent abbreviation that may mean upper limit, ulnar or ulna-related, or another clinical term; the full meaning should be specified.

URG URG is a context-dependent abbreviation that may refer to urinary urgency or an urgent clinical priority; documentation should state the full term.

URTI Abbreviation for upper respiratory tract infection, commonly involving the nose, sinuses, pharynx, or larynx and often caused by viruses.

VD Abbreviation for venereal disease, an older term for a sexually transmitted infection.

WBS Abbreviation for Williams–Beuren syndrome, a genetic condition associated with characteristic facial features, developmental differences, and cardiovascular disease. In other clinical contexts, WBS may have a different meaning, so the full term should be specified.

Modern Terms

Old or obsolete term	Modern or preferred term
Acute renal failure	Acute kidney injury
Adult-onset diabetes mellitus	Type 2 diabetes mellitus
Ague	Malaria; a historical term for intermittent fever, usually associated with malaria
Apoplexy	Stroke or intracerebral haemorrhage, depending on the historical context
Arteriosclerosis obliterans	Peripheral arterial disease
Bright's disease	Glomerular kidney disease; the specific modern diagnosis should be stated when known
Chronic renal failure	Chronic kidney disease
Congestive heart failure	Heart failure
Consumption	Tuberculosis, especially pulmonary tuberculosis
Crippling arthritis	Disabling arthritis; describe the functional limitation specifically
Diabetic retinopathy, background	Mild or nonproliferative diabetic retinopathy, with severity stated
Dropsy	Oedema or fluid accumulation, with the affected site specified
Eclampsia toxemia	Preeclampsia or eclampsia, depending on the clinical condition
Essential hypertension	Primary hypertension
Fallopian tube	Uterine tube; fallopian tube remains an accepted anatomical term
Female hysteria	No single modern diagnosis; reassess using the presenting symptoms and an appropriate diagnosis
Gastric ulcer disease	Peptic ulcer disease, with the ulcer site specified
Heart attack	Myocardial infarction in formal medical usage
Herpes zoster	Shingles in common language; herpes zoster remains the preferred medical term
Hyperlipaemia	Hyperlipidaemia
Idiopathic thrombocytopenic purpura	Immune thrombocytopenia
Imbecile	Intellectual disability; the historical term is offensive and must not be used clinically
Insulin-dependent diabetes mellitus	Type 1 diabetes mellitus
Junkie's abscess	Injection-related abscess or skin and soft-tissue infection
Leprosy	Hansen disease; leprosy remains a recognized medical term, but person-first language is preferred

Old or obsolete term	Modern or preferred term
Manic depression	Bipolar disorder
Mongolism	Down syndrome; the historical term is unacceptable and must not be used
Multiple personality disorder	Dissociative identity disorder
Non-insulin-dependent diabetes mellitus	Type 2 diabetes mellitus
Old age dementia	Dementia or major neurocognitive disorder, with the cause specified when known
Palsy	Paralysis or the specific neurological disorder, depending on the context
Paralytic stroke	Stroke with paralysis; specify the neurological deficit and stroke type
Phthisis	Pulmonary tuberculosis; historically, progressive wasting disease
Senile dementia	Dementia or major neurocognitive disorder; age alone should not define the diagnosis
Senility	Cognitive impairment, dementia, or another specific diagnosis, after assessment
Spastic colon	Irritable bowel syndrome
Stomach flu	Acute gastroenteritis
Sunstroke	Heatstroke
Terminal illness	Advanced or life-limiting illness, with the diagnosis and prognosis specified
Toxemia of pregnancy	Preeclampsia or eclampsia
Venereal disease	Sexually transmitted infection
Wassermann reaction	A modern syphilis serologic test, such as a nontreponemal or treponemal test
Water on the brain	Hydrocephalus

Medical Specialties

Medical specialty	Principal area of practice
Allergy and Immunology	Allergic disease, asthma, immune deficiency, and immune-mediated disorders
Anesthesiology	Perioperative care, anesthesia, critical care, and pain medicine
Cardiology	Diseases of the heart and circulatory system
Cardiothoracic Surgery	Surgical treatment of diseases of the heart, lungs, and chest
Clinical Genetics	Diagnosis, counseling, and management of inherited and genomic disorders
Clinical Pharmacology	Effects, uses, interactions, and safe clinical use of medicines
Colon and Rectal Surgery	Surgical treatment of diseases of the colon, rectum, and anus
Critical Care Medicine	Assessment and treatment of life-threatening organ dysfunction
Dermatology	Diseases of the skin, hair, nails, and mucous membranes
Emergency Medicine	Immediate assessment and treatment of acute illness and injury
Endocrinology	Hormones, metabolism, diabetes, and endocrine glands
Family Medicine	Comprehensive continuing care for individuals and families of all ages
Forensic Medicine	Application of medical knowledge to legal and medicolegal questions
Gastroenterology	Diseases of the digestive tract, liver, gallbladder, and pancreas
General Practice	First-contact and continuing medical care across a broad range of conditions
General Surgery	Operative treatment of diseases involving multiple body systems
Geriatric Medicine	Health care of older adults, including multimorbidity and functional decline
Hematology	Blood cells, blood-forming organs, clotting, and blood disorders
Hepatology	Diseases of the liver and biliary system
Hospital Medicine	Comprehensive medical care of hospitalized adults
Infectious Disease Medicine	Diagnosis, treatment, and prevention of infections
Internal Medicine	Prevention, diagnosis, and treatment of adult medical disorders
Interventional Cardiology	Catheter-based diagnosis and treatment of cardiovascular disease
Interventional Radiology	Image-guided minimally invasive diagnosis and treatment
Medical Oncology	Systemic treatment and supportive care for cancer
Neonatology	Care of newborn infants, especially premature or critically ill infants
Nephrology	Diseases of the kidneys, fluid balance, electrolytes, and hypertension
Neurology	Diseases of the brain, spinal cord, peripheral nerves, and muscles

Medical specialty	Principal area of practice
Neurosurgery	Surgical treatment of disorders of the nervous system
Nuclear Medicine	Diagnosis and treatment using radioactive substances and molecular imaging
Obstetrics and Gynecology	Pregnancy, childbirth, and diseases of the female reproductive system
Occupational Medicine	Health, safety, and disease prevention in the workplace
Ophthalmology	Medical and surgical care of the eyes and visual system
Oral and Maxillofacial Surgery	Surgical treatment of diseases and injuries of the mouth, jaws, face, and neck
Orthopedic Surgery	Surgical and nonsurgical treatment of the musculoskeletal system
Otolaryngology–Head and Neck Surgery	Diseases and surgery of the ear, nose, throat, and head and neck
Pain Medicine	Assessment and treatment of acute, chronic, and cancer-related pain
Palliative Medicine	Relief of symptoms and support for people with serious or life-limiting illness
Pathology	Laboratory examination of tissues, cells, blood, and body fluids
Pediatric Surgery	Surgical care of infants, children, and adolescents
Pediatrics	Medical care of infants, children, and adolescents
Physical Medicine and Rehabilitation	Restoration of function and independence after illness or injury
Plastic and Reconstructive Surgery	Reconstruction, restoration, and alteration of body tissues
Preventive Medicine	Prevention of disease and promotion of health in individuals and populations
Psychiatry	Diagnosis and treatment of mental, emotional, and behavioral disorders
Public Health Medicine	Protection and improvement of population health
Pulmonary Medicine	Diseases of the lungs and respiratory system
Radiation Oncology	Use of ionizing radiation to treat cancer
Radiology	Diagnostic and image-guided evaluation of disease
Reproductive Endocrinology and Infertility	Hormonal and reproductive disorders and fertility care
Rheumatology	Autoimmune, inflammatory, and musculoskeletal disorders
Sleep Medicine	Sleep disorders and their effects on health
Sports Medicine	Prevention, diagnosis, treatment, and rehabilitation of activity-related conditions
Thoracic Surgery	Surgery of the chest, lungs, esophagus, and mediastinum
Transfusion Medicine	Collection, testing, processing, and clinical use of blood components
Trauma Surgery	Surgical management of serious and complex injuries
Urology	Diseases of the urinary tract and male reproductive system
Vascular Surgery	Surgical and endovascular treatment of blood-vessel disease

Human Organs

This reference maps individual organ headwords to related entries in the dictionary. Each headword is followed by a semicolon-separated list of related dictionary terms.

Adrenal Gland

Adrenal Gland; Addison's Disease; Cushing's Syndrome; Pheochromocytoma; Adrenaline.

Appendix

Appendix; Appendicitis; Appendectomy.

Bladder

Bladder; Cystitis; Urinary Retention; Bladder Cancer.

Brain

Brain; Brain Tumour; Stroke; Seizure; Meningitis; Cerebral Palsy; Parkinson's Disease.

Breast

Breast; Breast Cancer; Mastitis; Mammography.

Cervix

Cervix; Cervical Cancer; Cervicitis; Pap Smear.

Colon

Colon; Colitis; Constipation; Diarrhea; Colorectal Cancer; Colonoscopy.

Ear

Ear; Otitis Media; Tinnitus; Hearing Loss; Vertigo.

Esophagus

Esophagus; Dysphagia; Esophagitis; Achalasia; Gastroesophageal Reflux Disease.

Eye

Eye; Cataract; Glaucoma; Conjunctivitis; Retinal Detachment; Macular Degeneration.

Gallbladder

Gallbladder; Cholelithiasis; Cholecystitis; Bile Duct; Cholangiocarcinoma.

Heart

Heart; Heart Failure; Arrhythmia; Myocardial Infarction; Pericarditis; Congenital Heart Defect.

Kidney

Kidney; Acute Kidney Injury; Chronic Kidney Disease; Glomerulonephritis; Nephritis; Dialysis.

Liver

Liver; Hepatitis; Cirrhosis; Fatty Liver Disease; Jaundice; Portal Hypertension.

Lung

Lung; Asthma; COPD; Pneumonia; Bronchitis; Pulmonary Embolism; Pleural Effusion.

Mouth

Mouth; Dental Caries; Gingivitis; Periodontitis.

Nose

Nose; Sinusitis; Rhinitis; Nasal Polyps; Anosmia; Epistaxis.

Ovary

Ovary; Ovarian Cyst; Ovarian Cancer; Fallopian Tube; Ectopic Pregnancy.

Pancreas

Pancreas; Pancreatitis; Diabetes Mellitus; Pancreatic Cancer; Insulin.

Pituitary Gland

Pituitary Gland; Pituitary Tumor; Acromegaly; Diabetes Insipidus.

Prostate

Prostate; Benign Prostatic Hyperplasia; Prostatitis; Prostate Cancer.

Rectum

Rectum; Rectal Bleeding; Proctitis; Rectal Cancer.

Skin

Skin; Dermatitis; Eczema; Psoriasis; Cellulitis; Pressure Ulcer; Melanoma.

Small Intestine

Small Intestine; Enteritis; Celiac Disease; Malabsorption; Intestinal Obstruction.

Spinal Cord

Spinal Cord; Spinal Cord Injury; Myelitis; Spinal Stenosis; Paraplegia.

Spleen

Spleen; Splenomegaly; Splenectomy; Hypersplenism.

Stomach

Stomach; Gastritis; Peptic Ulcer Disease; Gastroesophageal Reflux Disease; Gastric Cancer.

Testis

Testis; Testicular Torsion; Testicular Cancer; Epididymis.

Thymus

Thymus; Thymoma.

Thyroid Gland

Thyroid Gland; Hyperthyroidism; Hypothyroidism; Goitre; Thyroid Cancer.

Ureter

Ureter; Ureteral Calculi; Ureteral Obstruction; Ureteritis; Ureteral Stricture.

Urethra

Urethra; Urethral Stricture; Urethritis; Urethral Obstruction.

Uterus

Uterus; Endometriosis; Fibroids; Uterine Cancer; Ectopic Pregnancy.

Vagina

Vagina; Vaginitis; Vaginal Discharge; Vaginal Cancer.

Common Diseases

Scope: This reference-oriented list organizes common human diseases by organ system and clinical domain. It is a curated, high-importance list rather than a prevalence ranking, and some diseases appear under more than one heading where they are clinically relevant to several systems. It is not an exhaustive index of every term in the dictionary. Entries named as syndromes are covered in the companion appendix, Common Syndromes; conditions conventionally classified as disorders are covered in Common Disorders; and clinical findings, lesions, congenital anomalies, and injuries are covered in their own companion appendices. Individual symptoms, signs, and laboratory findings are defined as dictionary entries rather than listed here.

Cardiovascular Diseases Hypertension; Coronary Artery Disease; Stable Angina; Unstable Angina; Myocardial Infarction; Atherosclerosis; Heart Failure; Right Heart Failure; Cardiogenic Shock; Atrial Fibrillation; Atrial Flutter; Supraventricular Tachycardia; Ventricular Tachycardia; Ventricular Fibrillation; Sinus Bradycardia; Heart Block; Cardiomyopathy; Dilated Cardiomyopathy; Hypertrophic Cardiomyopathy; Restrictive Cardiomyopathy; Myocarditis; Pericarditis; Cardiac Tamponade; Endocarditis; Rheumatic Heart Disease; Aortic Stenosis; Aortic Regurgitation; Mitral Stenosis; Mitral Regurgitation; Mitral Valve Prolapse; Tricuspid Valve Disease; Pulmonary Hypertension; Peripheral Artery Disease; Aortic Aneurysm; Aortic Dissection; Deep Vein Thrombosis; Chronic Venous Insufficiency; Varicose Veins; Thrombophlebitis; Raynaud Phenomenon; Congenital Heart Disease.

Respiratory Diseases Asthma; Acute Bronchitis; Chronic Bronchitis; Emphysema; COPD; Pneumonia; Aspiration Pneumonia; Bronchopneumonia; Tuberculosis; COVID-19; Influenza; Bronchiolitis; Bronchiectasis; Cystic Fibrosis; Interstitial Lung Disease; Idiopathic Pulmonary Fibrosis; Pneumoconiosis; Silicosis; Asbestosis; Hypersensitivity Pneumonitis; Sarcoidosis; Pulmonary Edema; Pulmonary Embolism; Pulmonary Hypertension; Respiratory Failure; Pleurisy; Empyema; Lung Abscess; Occupational Lung Disease.

Gastrointestinal Diseases Gastroesophageal Reflux Disease; Esophagitis; Barrett Esophagus; Achalasia; Esophageal Spasm; Gastritis; Peptic Ulcer Disease; Gastric Ulcer; Duodenal Ulcer; Gastroenteritis; Gastroparesis; Crohn Disease; Ulcerative Colitis; Inflammatory Bowel Disease; Celiac Disease; Lactose Intolerance; Food Intolerance; Intestinal Obstruction; Ileus; Intussusception; Volvulus; Diverticulosis; Diverticulitis; Appendicitis; Peritonitis; Hemorrhoids; Anal Fissure; Anal Fistula; Rectal Prolapse; Mesenteric Ischemia.

Liver, Gallbladder & Biliary Diseases Metabolic Dysfunction-Associated Steatotic Liver Disease (MASLD); Alcoholic Liver Disease; Hepatitis A; Hepatitis B; Hepatitis C; Hepatitis D; Hepatitis E; Autoimmune Hepatitis; Acute Liver Failure; Chronic Liver Disease; Cirrhosis; Portal Hypertension; Hepatic Encephalopathy; Hemochromatosis; Wilson Disease; Primary Biliary Cholangitis; Primary Sclerosing Cholangitis; Cholelithiasis; Cholecystitis; Cholangitis.

Pancreatic Diseases Acute Pancreatitis; Chronic Pancreatitis; Autoimmune Pancreatitis; Pancreatic Insufficiency; Pancreatic Cancer; Pancreatic Neuroendocrine Tumors.

Kidney & Urinary Diseases Acute Kidney Injury; Chronic Kidney Disease; End-Stage Kidney Disease; Glomerulonephritis; Diabetic Nephropathy; Hypertensive Nephropathy; Interstitial Nephritis; Pyelonephritis; Urinary Tract Infection; Cystitis; Urethritis; Nephrolithiasis; Hydronephrosis; Polycystic Kidney Disease; Renal Tubular Acidosis; IgA Nephropathy; Minimal Change Disease; Focal Segmental Glomerulosclerosis; Membranous Nephropathy; Vesicoureteral Reflux.

Endocrine Diseases Type 1 Diabetes Mellitus; Type 2 Diabetes Mellitus; Gestational Diabetes; Diabetes Insipidus; Diabetic Ketoacidosis; Hyperosmolar Hyperglycemic State; Hypothyroidism; Hyperthyroidism; Hashimoto Thyroiditis; Graves Disease; Thyroiditis; Goiter; Addison Disease; Cushing Disease; Primary Aldosteronism; Hypoparathyroidism; Hyperparathyroidism; Pheochromocytoma; Pituitary Adenoma; Acromegaly; Gigantism; Growth Hormone Deficiency.

Metabolic Diseases Obesity; Gout; Dyslipidemia; Hypercholesterolemia; Hypertriglyceridemia; Porphyria; Amyloidosis.

Nutritional Diseases & Deficiencies Protein-Energy Malnutrition; Marasmus; Kwashiorkor; Iron Deficiency; Iron-Deficiency Anemia; Vitamin A Deficiency; Thiamine Deficiency; Beriberi; Riboflavin Deficiency; Niacin Deficiency; Pellagra; Folate Deficiency; Vitamin B12 Deficiency; Vitamin C Deficiency; Scurvy; Vitamin D Deficiency; Rickets; Osteomalacia; Vitamin K Deficiency; Iodine Deficiency; Zinc Deficiency; Copper Deficiency; Selenium Deficiency; Magnesium Deficiency.

Neurological Diseases Tension-Type Headache; Cluster Headache; Status Epilepticus; Stroke; Ischemic Stroke; Hemorrhagic Stroke; Transient Ischemic Attack; Cerebral Aneurysm; Parkinson Disease; Alzheimer Disease; Vascular Dementia; Frontotemporal Dementia; Lewy Body Dementia; Multiple Sclerosis; Amyotrophic Lateral Sclerosis; Huntington Disease; Diabetic Neuropathy; Myasthenia Gravis; Bell Palsy; Trigeminal Neuralgia; Radiculopathy; Meningitis; Encephalitis; Hydrocephalus; Cerebral Palsy.

Musculoskeletal Diseases Osteoarthritis; Osteoporosis; Osteomalacia; Rheumatoid Arthritis; Ankylosing Spondylitis; Psoriatic Arthritis; Reactive Arthritis; Septic Arthritis; Gout; Bursitis; Tendinitis; Tendinopathy; Frozen Shoulder; Tennis Elbow; Golfer's Elbow; Cervical Spondylosis; Lumbar Spondylosis; Spinal Stenosis; Herniated Disc; Scoliosis; Kyphosis; Spondylolisthesis; Fibromyalgia; Muscular Dystrophy; Myositis; Polymyositis; Dermatomyositis.

Rheumatologic & Autoimmune Diseases Rheumatoid Arthritis; Systemic Lupus Erythematosus; Polymyalgia Rheumatica; Giant Cell Arteritis; Polyarteritis Nodosa; Granulomatosis with Polyangiitis; Microscopic Polyangiitis; Behçet Disease; Inflammatory Myopathies; Ankylosing Spondylitis; Psoriatic Arthritis; Reactive Arthritis; Relapsing Polychondritis; Adult-Onset Still Disease.

Skin, Hair & Nail Diseases Acne Vulgaris; Rosacea; Atopic Dermatitis; Contact Dermatitis; Seborrheic Dermatitis; Psoriasis; Urticaria; Angioedema; Impetigo; Cellulitis; Erysipelas; Folliculitis; Boils; Carbuncle; Ringworm; Athlete's Foot; Jock Itch; Candidiasis; Scabies; Pediculosis; Wart; Molluscum Contagiosum; Herpes Simplex; Herpes Zoster; Hidradenitis Suppurativa; Pressure Ulcers; Onychomycosis.

Eye Diseases Amblyopia; Strabismus; Cataract; Open-Angle Glaucoma; Angle-Closure Glaucoma; Conjunctivitis; Keratitis; Corneal Ulcer; Dry Eye; Uveitis; Iritis; Retinal Detachment; Diabetic Retinopathy; Hypertensive Retinopathy; Macular Degeneration; Retinitis Pigmentosa; Central Retinal Artery Occlusion; Central Retinal Vein Occlusion; Optic Neuritis; Keratoconus; Blepharitis.

Ear & Hearing Diseases Otitis Externa; Acute Otitis Media; Chronic Otitis Media; Otitis Media with Effusion; Mastoiditis; Presbycusis; Meniere Disease; Labyrinthitis; Vestibular Neuritis; Benign Paroxysmal Positional Vertigo; Otosclerosis; Cholesteatoma; Acoustic Neuroma.

Nose, Sinus & Throat Diseases Allergic Rhinitis; Nonallergic Rhinitis; Acute Sinusitis; Chronic Sinusitis; Pharyngitis; Streptococcal Pharyngitis; Tonsillitis; Peritonsillar Abscess; Laryngitis; Epiglottitis; Vocal Cord Paralysis.

Oral & Dental Diseases Dental Caries; Pulpitis; Dental Abscess; Gingivitis; Periodontitis; Pericoronitis; Aphthous Ulcer; Oral Candidiasis; Leukoplakia; Oral Lichen Planus.

Blood Diseases Iron-Deficiency Anemia; Megaloblastic Anemia; Vitamin B12 Deficiency Anemia; Folate-Deficiency Anemia; Aplastic Anemia; Hemolytic Anemia; Sick Cell Disease; Thalassemia; Hereditary Spherocytosis; Glucose-6-Phosphate Dehydrogenase Deficiency; Polycythemia Vera; Immune Thrombocytopenia; Agranulocytosis; Hemophilia A; Hemophilia B; Von Willebrand Disease; Disseminated Intravascular Coagulation (DIC); Thrombotic Thrombocytopenic Purpura (TTP).

Immune-System Diseases Primary Immunodeficiency; Severe Combined Immunodeficiency; Common Variable Immunodeficiency; Selective IgA Deficiency; AIDS (Acquired Immunodeficiency Syndrome); HIV/AIDS; Chronic Granulomatous Disease; Graft-Versus-Host Disease.

Infectious & Parasitic Diseases Common Cold; Influenza; COVID-19; Measles; Mumps; Rubella; Chickenpox; Shingles; Herpes Simplex; Infectious Mononucleosis; Cytomegalovirus Infection; Polio; Rabies; Dengue; Chikungunya; Zika; Hepatitis A; Hepatitis B; Hepatitis C; Hepatitis D; Hepatitis E; HIV; Syphilis; Gonorrhea; Chlamydia; Tuberculosis; Leprosy; Diphtheria; Pertussis; Tetanus; Typhoid Fever; Cholera; Plague; Bacterial Meningitis; Meningococemia; Scarlet Fever; Salmonellosis; Shigellosis; Campylobacteriosis; Botulism; Brucellosis; Leptospirosis; Lyme Disease; Malaria; Amebiasis; Giardiasis; Toxoplasmosis; Leishmaniasis; Trichomoniasis; Ascariasis; Hookworm; Pinworm Infection; Schistosomiasis; Taeniasis; Echinococcosis; Candidiasis; Aspergillosis; Cryptococcosis; Histoplasmosis.

Female Reproductive & Gynecological Diseases Endometriosis; Adenomyosis; Uterine Fibroids; Ovarian Torsion; Pelvic Inflammatory Disease; Vaginitis; Bacterial Vaginosis; Vulvovaginal Candidiasis; Vulvodynia; Pelvic Organ Prolapse; Female Infertility; Premature Ovarian Insufficiency.

Male Reproductive & Urological Diseases Male Infertility; Benign Prostatic Hyperplasia; Prostatitis; Epididymitis; Orchitis; Testicular Torsion; Cryptorchidism; Phimosis; Paraphimosis; Peyronie Disease; Balanitis; Hypogonadism.

Pregnancy & Postpartum Diseases Hyperemesis Gravidarum; Gestational Diabetes; Gestational Hypertension; Preeclampsia; Eclampsia; Puerperal Infection; Postpartum Endometritis; Postpartum Depression; Mastitis.

Pediatric & Neonatal Diseases Respiratory Distress Syndrome; Neonatal Sepsis; Birth Asphyxia; Necrotizing Enterocolitis; Diaper Rash; Croup; Bronchiolitis; Cerebral Palsy; Congenital Hypothyroidism; Kawasaki Disease; Rheumatic Fever; Hand-Foot-and-Mouth Disease.

Genetic & Chromosomal Diseases Cystic Fibrosis; Sickle Cell Disease; Thalassemia; Huntington Disease; Duchenne Muscular Dystrophy; Becker Muscular Dystrophy; Neurofibromatosis; Tuberous Sclerosis; Tay-Sachs Disease; Gaucher Disease; Achondroplasia; Hemochromatosis; Wilson Disease.

Cancers & Other Neoplasms Breast Cancer; Lung Cancer; Colorectal Cancer; Prostate Cancer; Cervical Cancer; Ovarian Cancer; Endometrial Cancer; Vulvar Cancer; Vaginal Cancer; Testicular Cancer; Penile Cancer; Bladder Cancer; Kidney Cancer; Thyroid Cancer; Oral Cancer; Oropharyngeal Cancer; Laryngeal Cancer; Esophageal Cancer; Stomach Cancer; Liver Cancer; Gallbladder Cancer; Pancreatic Cancer; Small-Intestinal Cancer; Anal Cancer; Melanoma; Basal-Cell Carcinoma; Squamous-Cell Carcinoma; Osteosarcoma; Ewing Sarcoma; Soft-Tissue Sarcoma; Glioma; Glioblastoma; Meningioma; Leukemia; Hodgkin Lymphoma; Non-Hodgkin Lymphoma; Multiple Myeloma; Neuroblastoma; Retinoblastoma.

Multisystem & Systemic Diseases Fibromyalgia; Sarcoidosis; Amyloidosis; Sepsis; Septic Shock.

Common Disorders

Scope: This reference-oriented list organizes human conditions conventionally classified as clinical disorders by medical specialty and organ system. In medical nomenclature, disorders represent disruptions to regular bodily structure or function (frequently functional, metabolic, neurobehavioral, or regulatory disturbances), complementing the disease classifications in Common Diseases and clinical signs in Common Syndromes. Every entity listed corresponds to a defined medical concept in the dictionary.

Mental & Behavioral Disorders Generalized Anxiety Disorder; Panic Disorder; Social Anxiety Disorder; Agoraphobia; Specific Phobia; Major Depressive Disorder; Persistent Depressive Disorder; Bipolar Disorder; Cyclothymic Disorder; Obsessive-Compulsive Disorder; Post-Traumatic Stress Disorder; Acute Stress Disorder; Attention-Deficit/Hyperactivity Disorder; Autism Spectrum Disorder; Schizophrenia; Schizoaffective Disorder; Delusional Disorder; Brief Psychotic Disorder; Eating Disorders; Alcohol Use Disorder; Opioid Use Disorder; Substance Abuse; Dissociative Identity Disorder; Depersonalization.

Personality Disorders Borderline Personality Disorder; Antisocial Personality Disorder; Narcissistic Personality Disorder; Avoidant Personality Disorder; Dependent Personality Disorder; Obsessive-Compulsive Personality Disorder; Paranoid Personality Disorder; Schizoid Personality Disorder; Schizotypal Personality Disorder; Histrionic Personality Disorder.

Eating & Nutrition Disorders Anorexia Nervosa; Bulimia Nervosa; Binge-Eating Disorder; Avoidant/Restrictive Food Intake Disorder; Pica; Rumination.

Impulse-Control & Conduct Disorders Intermittent Explosive Disorder; Kleptomania; Pyromania; Oppositional Defiant Disorder; Conduct Disorder; Trichotillomania; Excoriation Disorder.

Somatic & Related Disorders Somatic Symptom Disorder; Illness Anxiety Disorder; Conversion Disorder; Factitious Disorder.

Sleep-Wake Disorders Insomnia; Hypersomnia; Narcolepsy; Obstructive Sleep Apnea; Central Sleep Apnea; Sleepwalking; Night Terrors; Nightmare Disorder; REM Sleep Behavior Disorder; Restless Legs Syndrome; Delayed Sleep Phase.

Neurological & Movement Disorders Migraine; Cluster Headache; Tension-Type Headache; Epilepsy; Seizure Disorder; Essential Tremor; Parkinson's Disease; Dystonia; Chorea; Myoclonus; Tic Disorder; Tourette Disorder; Ataxia; Stiff-Person Syndrome.

Neurodevelopmental & Learning Disorders Intellectual Disability; Language Disorder; Stuttering; Specific Learning Disorder; Dyslexia; Developmental Coordination Disorder; Fetal Alcohol Spectrum Disorder.

Autonomic Disorders Dysautonomia; Postural Orthostatic Tachycardia Syndrome; Orthostatic Hypotension; Neurocardiogenic Syncope; Multiple System Atrophy; Autonomic Neuropathy.

Cardiovascular & Hemodynamic Disorders Heart Arrhythmia; Atrioventricular Block; Bundle Branch Block; Microvascular Angina; Cardiac Syndrome X; Orthostatic Intolerance.

Respiratory & Ventilatory Disorders Chronic Obstructive Pulmonary Disorder; Hypoventilation; Obesity Hypoventilation Syndrome; Pulmonary Fibrosis; Upper Airway Resistance Syndrome; Hyperventilation.

Digestive & Functional GI Disorders Irritable Bowel Syndrome; Functional Dyspepsia; Functional Constipation; Functional Diarrhea; Cyclic Vomiting Syndrome; Rumination; Achalasia; Diffuse Esophageal Spasm; Pelvic Floor Dysfunction; Gastroparesis.

Endocrine & Metabolic Disorders Hypothyroidism; Hyperthyroidism; Euthyroid Sick Syndrome; Hypopituitarism; Hyperprolactinemia; Adrenal Insufficiency; Cushing Syndrome; Hypoparathyroidism; Hyperparathyroidism; Polycystic Ovary Syndrome; Precocious Puberty; Delayed Puberty; Metabolic Syndrome.

Lipid & Inborn Metabolic Disorders Dyslipidemia; Hypercholesterolemia; Hypertriglyceridemia; Familial Hypercholesterolemia; Galactosemia; Phenylketonuria; Maple Syrup Urine Disease; Glycogen Storage Disease; Lysosomal Storage Disorders; Porphyria.

Electrolyte & Acid–Base Disorders Hyponatremia; Hypernatremia; Hypokalemia; Hyperkalemia; Hypocalcemia; Hypercalcemia; Hypomagnesemia; Hypermagnesemia; Hypophosphatemia; Hyperphosphatemia; Metabolic Acidosis; Metabolic Alkalosis; Respiratory Acidosis; Respiratory Alkalosis.

Bone Mineral Density Disorders Osteopenia; Osteoporosis; Osteomalacia; Renal Osteodystrophy; Fibrous Dysplasia; Paget Disease of Bone.

Musculoskeletal & Soft-Tissue Disorders Temporomandibular Joint Disorders; Rotator Cuff Tear; Rotator Cuff Injury; Herniated Disc; Degenerative Disc Disease; Myofascial Pain Syndrome; Tendinitis; Tendinopathy; Carpal Tunnel Syndrome; Cubital Tunnel Syndrome; Hypermobility Syndrome.

Blood & Coagulation Disorders Hemophilia A; Hemophilia B; Von Willebrand Disease; Thrombophilia; Glanzmann Thrombasthenia; Immune Thrombocytopenic Purpura; Aplastic Anemia; Myelodysplastic Syndrome.

Immune, Allergic & Eosinophilic Disorders Autoimmune Disease; Primary Immunodeficiency; Anaphylaxis; Angioedema; Mastocytosis; Eosinophilic Esophagitis; Eosinophilic Gastroenteritis.

Sexual Disorders Male Hypoactive Sexual Desire Disorder; Erectile Dysfunction; Premature Ejaculation; Delayed Ejaculation; Female Sexual Dysfunction; Female Orgasmic Disorder; Vaginismus; Dyspareunia; Gender Dysphoria.

Menstrual & Reproductive Disorders Dysmenorrhea; Amenorrhea; Abnormal Uterine Bleeding; Menorrhagia; Premenstrual Syndrome; Premenstrual Dysphoric Disorder; Anovulation; Premature Ovarian Insufficiency; Androgen Insensitivity Syndrome.

Urinary & Micturition Disorders Overactive Bladder; Urinary Incontinence; Stress Incontinence; Neurogenic Bladder; Urinary Retention; Bladder Outlet Obstruction.

Vision & Ocular Motility Disorders Refractive Disorder; Myopia; Hyperopia; Astigmatism; Presbyopia; Amblyopia; Strabismus; Color Vision Deficiency; Nystagmus; Dry Eye.

Hearing, Balance & Auditory Disorders Conductive Hearing Loss; Sensorineural Hearing Loss; Tinnitus; Auditory Processing Disorder; Benign Paroxysmal Positional Vertigo; Meniere Disease.

Speech, Language & Voice Disorders Language Disorder; Speech Disorder; Stuttering; Dysarthria; Apraxia; Aphasia; Voice Disorders; Dysphonia; Vocal Cord Dysfunction.

Hair, Nail & Pigmentation Disorders Alopecia; Alopecia Areata; Androgenetic Alopecia; Telogen Effluvium; Cicatricial Alopecia; Melasma; Vitiligo; Albinism.

Connective Tissue & Fascial Disorders Ehlers-Danlos Syndrome; Marfan Syndrome; Loeys-Dietz Syndrome; Mixed Connective Tissue Disease; Dupuytren Contracture; Plantar Fasciitis.

Mental Health Terms

Scope: This appendix groups commonly used mental-health terms for quick reference. It is an index, not a diagnostic or treatment guide. Preferred modern terms are used where an older or informal term may be misleading.

Foundations and assessment Acute; Affect; Chronic; Cognition; Diagnosis; Disorder; Distress; Functional Impairment; Mental Disorder; Mental Health; Mental Illness; Mood; Risk Factor; Syndrome.

Brain and nervous-system structures Amygdala; Axon; Brain; Brain Stem; Cerebellum; Cerebrum; Dendrite; Frontal Lobe; Gray Matter; Hippocampus; Hypothalamus; Limbic System; Locus Coeruleus; Myelin; Neuron; Neurotransmission; Neurotransmitter; Occipital Lobe; Parietal Lobe; Postsynaptic Membrane; Presynaptic Terminals; Receptor; Serotonin; Synapse; Temporal Lobe; Thalamus.

Common psychological and behavioral symptoms Anhedonia; Anxiety; Avolition; Cognitive Symptoms; Compulsions; Delusion; Euphoria; Obsessions; Panic Attack; Psychomotor Agitation; Psychomotor Retardation; Psychosis; Self-Harm; Stress; Trauma.

Anxiety, trauma, and obsessive-compulsive disorders Anxiety Disorders; Generalized Anxiety Disorder; Panic Disorder; Specific Phobia; Social Anxiety Disorder (Social Phobia); Separation Anxiety Disorder; Post-Traumatic Stress Disorder; Obsessive-Compulsive Disorder; Trichotillomania.

Mood disorders Bipolar Disorder; Bipolar II Disorder; Cyclothymic Disorder; Depression; Major Depressive Disorder; Major Depressive Episode; Persistent Depressive Disorder; Postpartum Depression; Seasonal Affective Disorder.

Psychotic and personality disorders Antisocial Personality Disorder; Borderline Personality Disorder; Narcissistic Personality Disorder; Personality Disorders; Brief Psychotic Disorder; Schizoaffective Disorder; Schizophrenia.

Neurodevelopmental and related conditions Conduct Disorder; Neurodevelopmental Disorders; Intellectual Disability; Neurocognitive Disorder; Functional Neurologic Disorder.

Psychiatric and psychological treatments Antidepressants; Antipsychotic Medicine; Atypical Antipsychotics; Benzodiazepine; Cognitive Behavioral Therapy; Dialectical Behavior Therapy; Electroconvulsive Therapy; Psychotherapy; Systematic Desensitization; Transcranial Magnetic Stimulation.

Care settings and professionals Community Mental-Health Treatment; Hospitalization; Psychiatry; Psychiatrist; Clinical Psychologist; Social Worker; Voluntary Psychiatric Admission.

Investigations and brain imaging Computed Tomography (CT); Electroencephalography; Functional MRI; Positron Emission Tomography; Single-Photon Emission Computed Tomography.

Suicide and safety terminology Suicidality; Suicide; Suicide Attempt; Suicidal Ideation; Suicidal Intent; Suicidal Plan; Suicide Risk Assessment.

Related scientific concepts Evidence-Based Practice; Neurosciences; Tolerance; Withdrawal.

Common Syndromes

Scope: This reference-oriented list organizes clinically significant medical syndromes by organ system and medical specialty. In medical terminology, a syndrome represents a characteristic constellation of concurrent signs, symptoms, or anatomical features that consistently occur together and point toward a common pathophysiological mechanism or etiology.

Cardiovascular Syndromes Acute Coronary Syndrome; Acute Aortic Syndrome; Sick Sinus Syndrome; Wolff–Parkinson–White Syndrome; Long QT Syndrome; Short QT Syndrome; Brugada Syndrome; Takotsubo Syndrome (Stress Cardiomyopathy); Eisenmenger Syndrome; Postural Orthostatic Tachycardia Syndrome (POTS); Postpericardiotomy Syndrome; Dressler Syndrome; Cardiac Syndrome X; Cardiorenal Syndrome.

Respiratory Syndromes Acute Respiratory Distress Syndrome (ARDS); Infant Respiratory Distress Syndrome; Obesity Hypoventilation Syndrome; Upper Airway Resistance Syndrome; Hepatopulmonary Syndrome; Acute Chest Syndrome; Kartagener Syndrome.

Gastrointestinal Syndromes Irritable Bowel Syndrome (IBS); Malabsorption Syndrome; Short Bowel Syndrome; Dumping Syndrome; Cyclic Vomiting Syndrome; Rumination Syndrome; Mallory–Weiss Syndrome; Zollinger–Ellison Syndrome; Boerhaave Syndrome; Afferent Loop Syndrome; Cannabinoid Hyperemesis Syndrome; Superior Mesenteric Artery Syndrome; Ogilvie Syndrome.

Liver & Biliary Syndromes Hepatorenal Syndrome; Hepatopulmonary Syndrome; Budd–Chiari Syndrome; Gilbert Syndrome; Crigler–Najjar Syndrome; Dubin–Johnson Syndrome; Rotor Syndrome; Reye Syndrome; Mirizzi Syndrome.

Kidney & Urinary Syndromes Nephrotic Syndrome; Nephritic Syndrome; Hemolytic Uremic Syndrome (HUS); Alport Syndrome; Fanconi Syndrome; Goodpasture Syndrome; Hepatorenal Syndrome; Nutcracker Syndrome.

Endocrine Syndromes Cushing Syndrome; Metabolic Syndrome; Syndrome of Inappropriate Antidiuretic Hormone Secretion (SIADH); Polycystic Ovary Syndrome (PCOS); Carcinoid Syndrome; Empty Sella Syndrome; Androgen Insensitivity Syndrome; Sheehan Syndrome; Nelson Syndrome; Polyglandular Autoimmune Syndromes (PAPS Type 1 and 2); Insulin Resistance Syndrome.

Neurological Syndromes Guillain–Barré Syndrome; Miller Fisher Syndrome; Lambert–Eaton Myasthenic Syndrome (LEMS); Restless Legs Syndrome; Locked-In Syndrome; Post-Concussion Syndrome; Cauda Equina Syndrome; Conus Medullaris Syndrome; Anterior Cord Syndrome; Central Cord Syndrome; Central Pain Syndrome; Alien Hand Syndrome; CADASIL Syndrome; Foix–Alajouanine Syndrome; Horner Syndrome; Tourette Syndrome; Lennox–Gastaut Syndrome; West Syndrome; Wernicke–Korsakoff Syndrome; Brown–Séquard Syndrome; Wallenberg Syndrome (Lateral Medullary Syndrome); Isaacs Syndrome.

Pain & Neuromuscular Syndromes Carpal Tunnel Syndrome; Cubital Tunnel Syndrome; Complex Regional Pain Syndrome (CRPS); Myofascial Pain Syndrome; Piriformis Syndrome; Compartment Syndrome; Thoracic Outlet Syndrome; Burning Mouth Syndrome; Tarsal Tunnel Syndrome; Greater Trochanteric Pain Syndrome.

Psychiatric & Behavioral Syndromes Serotonin Syndrome; Neuroleptic Malignant Syndrome; Capgras Syndrome; Cotard Syndrome; Münchausen Syndrome (Factitious Disorder); Korsakoff Syndrome; Amotivational Syndrome; Ekblom Syndrome (Delusional Parasitosis); Ganser Syndrome.

Rheumatologic & Autoimmune Syndromes Sjögren Syndrome; Antiphospholipid Syndrome; CREST Syndrome; Felty Syndrome; Behçet Syndrome; SAPHO Syndrome; Reactive Arthritis (formerly Reiter Syndrome); Churg–Strauss Syndrome (EGPA); Caplan Syndrome.

Hematological Syndromes Myelodysplastic Syndromes; Antiphospholipid Syndrome; Evans Syndrome; Hyperviscosity Syndrome; Tumor Lysis Syndrome; Hemophagocytic Syndrome (HLH); Acute Chest Syndrome; Thrombotic Thrombocytopenic Purpura (TTP).

Immunological Syndromes Severe Combined Immunodeficiency Syndrome; Acquired Immunodeficiency Syndrome (AIDS); Alpha-Gal Syndrome; Antisynthetase Syndrome; Capillary Leak Syndrome; Hyper-IgE Syndrome (Job Syndrome); Autoimmune Lymphoproliferative Syndrome (ALPS); Cytokine Release Syndrome (CRS); Immune Reconstitution Inflammatory Syndrome; Wiskott–Aldrich Syndrome.

Infectious & Postinfectious Syndromes Toxic Shock Syndrome (TSS); Post-COVID-19 Condition; Post-Polio Syndrome; Congenital Rubella Syndrome; Congenital Zika Syndrome; Waterhouse–Friderichsen Syndrome; Lemierre Syndrome.

Genetic & Chromosomal Syndromes Down Syndrome; Turner Syndrome; Klinefelter Syndrome; Edwards Syndrome; Patau Syndrome; DiGeorge Syndrome (22q11.2 Deletion); Fragile X Syndrome; Williams Syndrome; Prader–Willi Syndrome; Angelman Syndrome; Noonan Syndrome; Rett Syndrome; Cri-du-Chat Syndrome; Beckwith–Wiedemann Syndrome; McCune–Albright Syndrome.

Connective Tissue Syndromes Ehlers–Danlos Syndromes; Marfan Syndrome; Loeys–Dietz Syndrome; Stickler Syndrome; Joint Hypermobility Syndrome.

Pediatric Syndromes Down Syndrome; Fetal Alcohol Syndrome; Sudden Infant Death Syndrome (SIDS); Reye Syndrome; DiGeorge Syndrome; Beckwith–Wiedemann Syndrome; Nephrotic Syndrome; Hand-Foot-and-Mouth Syndrome.

Obstetric Syndromes HELLP Syndrome; Antiphospholipid Syndrome; Twin-to-Twin Transfusion Syndrome (TTTS); Amniotic Band Syndrome; Fetal Alcohol Syndrome.

Gynecological Syndromes Polycystic Ovary Syndrome; Premenstrual Syndrome (PMS); Asherman Syndrome; Genitourinary Syndrome of Menopause; Mayer–Rokitansky–Küster–Hauser (MRKH) Syndrome.

Male Reproductive Syndromes Klinefelter Syndrome; Androgen Insensitivity Syndrome; Kallmann Syndrome; Post-Vasectomy Pain Syndrome.

Cancer-Predisposition & Paraneoplastic Syndromes Lynch Syndrome (HNPCC); Li–Fraumeni Syndrome; Von Hippel–Lindau Syndrome; Multiple Endocrine Neoplasia (MEN 1 and 2); Carcinoid Syndrome; Tumor Lysis Syndrome; Superior Vena Cava Syndrome; Paraneoplastic Neurological Syndromes; Cancer Cachexia Syndrome.

Metabolic & Nutritional Syndromes Metabolic Syndrome; Refeeding Syndrome; Wernicke–Korsakoff Syndrome; Milk–Alkali Syndrome; Hungry Bone Syndrome; Fanconi–Bickel Syndrome.

Toxicological Syndromes (Toxidromes) Serotonin Syndrome; Neuroleptic Malignant Syndrome; Anticholinergic Syndrome; Cholinergic Syndrome; Sympathomimetic Syndrome; Sedative-Hypnotic Syndrome; Opioid Withdrawal Syndrome; Alcohol Withdrawal Syndrome.

Critical Care Syndromes Systemic Inflammatory Response Syndrome (SIRS); Multiple Organ Dysfunction Syndrome (MODS); Acute Respiratory Distress Syndrome (ARDS); Abdominal Compartment Syndrome; Fat Embolism Syndrome.

Sleep Syndromes Obstructive Sleep Apnea Syndrome; Central Sleep Apnea Syndromes; Restless Legs Syndrome; Kleine–Levin Syndrome; Delayed Sleep Phase Syndrome.

Eye & Cranial Nerve Syndromes Horner Syndrome; Adie Syndrome; Brown Syndrome; Duane Retraction Syndrome; Charles Bonnet Syndrome; Dry Eye Syndrome; Tolosa–Hunt Syndrome.

ENT & Otolaryngologic Syndromes Ramsay Hunt Syndrome; Eagle Syndrome; Empty Nose Syndrome; Gradenigo Syndrome; Samter Triad (Aspirin-Exacerbated Respiratory Disease).

Dermatological Syndromes Stevens–Johnson Syndrome; Toxic Epidermal Necrolysis; Staphylococcal Scalded Skin Syndrome; Sweet Syndrome; Gorlin Syndrome; Peutz–Jeghers Syndrome; DRESS Syndrome (Drug Reaction with Eosinophilia and Systemic Symptoms).

Vascular Syndromes Raynaud Syndrome; Superior Vena Cava Syndrome; Thoracic Outlet Syndrome; Subclavian Steal Syndrome; Leriche Syndrome; May–Thurner Syndrome; Nutcracker Syndrome.

Multisystem Syndromes Chronic Fatigue Syndrome (ME/CFS); Postural Orthostatic Tachycardia Syndrome (POTS); Ehlers–Danlos Syndromes; Metabolic Syndrome; Antiphospholipid Syndrome; Behcet Syndrome.

Rare Diseases

Scope: This reference-oriented list organizes clinically significant rare diseases (orphan diseases) by organ system and clinical domain. A rare disease is typically defined as one affecting fewer than 1 in 2,000 individuals (EU criteria) or fewer than 200,000 people in the United States. It highlights high-importance benchmark conditions characterized by distinct genetic, metabolic, or autoimmune etiologies.

Genetic & Chromosomal Diseases Turner Syndrome; Klinefelter Syndrome; Fragile X Syndrome; Williams Syndrome; Prader–Willi Syndrome; Angelman Syndrome; Noonan Syndrome; 22q11.2 Deletion Syndrome; Cri-du-Chat Syndrome; Hutchinson–Gilford Progeria Syndrome; Cornelia de Lange Syndrome.

Neurological & Neurogenetic Diseases Huntington Disease; Amyotrophic Lateral Sclerosis (ALS); Spinal Muscular Atrophy (SMA); Friedreich Ataxia; Ataxia–Telangiectasia; Rett Syndrome; Batten Disease (Neuronal Ceroid Lipofuscinosis); Creutzfeldt–Jakob Disease; Fatal Familial Insomnia; Progressive Supranuclear Palsy; Multiple System Atrophy; Stiff-Person Syndrome.

Neuromuscular & Peripheral Nerve Diseases Duchenne Muscular Dystrophy; Becker Muscular Dystrophy; Facioscapulohumeral Muscular Dystrophy; Limb-Girdle Muscular Dystrophies; Congenital Muscular Dystrophies; Myasthenia Gravis; Charcot–Marie–Tooth Disease; Amyloid Polyneuropathy.

Inborn Errors of Metabolism & Storage Diseases Gaucher Disease; Fabry Disease; Pompe Disease; Tay–Sachs Disease; Niemann–Pick Disease; Krabbe Disease; Metachromatic Leukodystrophy; X-Linked Adrenoleukodystrophy; Alkaptonuria; Homocystinuria; Phenylketonuria; Maple Syrup Urine Disease; Von Gierke Disease (GSD I); Mucopolysaccharidoses (Hurler, Hunter, Sanfilippo Syndromes).

Blood & Bone Marrow Diseases Hemophilia A; Hemophilia B; Paroxysmal Nocturnal Hemoglobinuria (PNH); Fanconi Anemia; Diamond–Blackfan Anemia; Pure Red Cell Aplasia; Thrombotic Thrombocytopenic Purpura (TTP); Atypical Hemolytic Uremic Syndrome; Cryoglobulinemia; Castleman Disease.

Immune, Autoinflammatory & Histiocytic Diseases Severe Combined Immunodeficiency (SCID); Common Variable Immunodeficiency; Chronic Granulomatous Disease; Wiskott–Aldrich Syndrome; Familial Mediterranean Fever; Cryopyrin-Associated Periodic Syndromes (CAPS); Hemophagocytic Lymphohistiocytosis (HLH); Histiocytosis X (Langerhans Cell Histiocytosis).

Rheumatologic & Autoimmune Diseases Systemic Sclerosis (Scleroderma); Granulomatosis with Polyangiitis; Microscopic Polyangiitis; Polyarteritis Nodosa; Behçet Disease; Takayasu Arteritis; Eosinophilic Granulomatosis with Polyangiitis (Churg–Strauss); Relapsing Polychondritis; Adult-Onset Still Disease.

Connective Tissue & Dermatological Genetic Diseases Ehlers–Danlos Syndromes (Vascular and Classic Types); Marfan Syndrome; Loeys–Dietz Syndrome; Osteogenesis Imperfecta; Pseudoxanthoma Elasticum; Epidermolysis Bullosa; Ichthyosis; Xeroderma Pigmentosum; Pemphigus Vulgaris; Bullous Pemphigoid.

Endocrine Diseases Addison Disease; Congenital Adrenal Hyperplasia; Acromegaly; Cushing Disease (Pituitary-Dependent); Hypoparathyroidism; Multiple Endocrine Neoplasia (MEN 1 and 2); Pheochromocytoma; Autoimmune Polyglandular Syndromes.

Hepatic & Biliary Diseases Wilson Disease; Alpha-1 Antitrypsin Deficiency; Primary Biliary Cholangitis; Primary Sclerosing Cholangitis; Biliary Atresia; Progressive Familial Intrahepatic Cholestasis; Caroli Disease.

Renal & Urinary Diseases Alport Syndrome; Cystinosis; Primary Hyperoxaluria; Bartter Syndrome; Gitelman Syndrome; Polycystic Kidney Disease (Autosomal Recessive Type); Medullary Cystic Kidney Disease.

Pulmonary Diseases Idiopathic Pulmonary Fibrosis; Pulmonary Arterial Hypertension; Lymphangioleiomyomatosis (LAM); Pulmonary Alveolar Proteinosis; Primary Ciliary Dyskinesia.

Cardiovascular Diseases Brugada Syndrome; Long QT Syndrome; Short QT Syndrome; Arrhythmogenic Right Ventricular Cardiomyopathy; Fibromuscular Dysplasia; Takayasu Arteritis.

Gastrointestinal Diseases Hirschsprung Disease; Achalasia; Eosinophilic Esophagitis; Short Bowel Syndrome; Hereditary Pancreatitis; Microvillus Inclusion Disease.

Eye & Visual Pathway Diseases Retinitis Pigmentosa; Stargardt Disease; Leber Hereditary Optic Neuropathy; Leber Congenital Amaurosis; Retinoblastoma; Aniridia; Best Disease.

Bone, Skeletal & Cartilage Diseases Achondroplasia; Fibrodysplasia Ossificans Progressiva (FOP); Hypophosphatasia; Osteopetrosis (Marble Bone Disease); Cleidocranial Dysplasia; Thanatophoric Dysplasia.

Rare Infectious & Prion Diseases Creutzfeldt–Jakob Disease; Variant CJD; Kuru; Whipple Disease; Progressive Multifocal Leukoencephalopathy (PML); Ebola Virus Disease; Marburg Virus Disease; Lassa Fever.

Rare Cancers & Neoplasms Malignant Mesothelioma; Gastrointestinal Stromal Tumor (GIST); Neuroendocrine Tumors; Ewing Sarcoma; Osteosarcoma; Retinoblastoma; Uveal Melanoma; Adrenocortical Carcinoma; Thymoma; Merkel Cell Carcinoma; Kaposi Sarcoma; Burkitt Lymphoma.

Multisystem & Inflammatory Diseases Erdheim–Chester Disease; POEMS Syndrome; VEXAS Syndrome; IgG4-Related Disease; Systemic Amyloidosis; Castleman Disease.

Genetic Diseases

Scope: This reference-oriented list organizes human genetic diseases by mode of inheritance, cytogenetic classification, and molecular pathophysiological mechanism. Genetic diseases result from alterations in DNA sequences, ranging from single-nucleotide variants to gross chromosomal rearrangements and non-Mendelian mechanisms, providing a focused reference complementing Common Diseases and Rare Diseases.

Autosomal Dominant Diseases Huntington Disease; Marfan Syndrome; Neurofibromatosis Type 1 (von Recklinghausen Disease); Neurofibromatosis Type 2; Familial Hypercholesterolemia; Polycystic Kidney Disease (Autosomal Dominant, ADPKD); Achondroplasia; Tuberous Sclerosis Complex; Hereditary Spherocytosis; Von Hippel–Lindau Syndrome; Li–Fraumeni Syndrome; Multiple Endocrine Neoplasia (MEN 1 and 2); Myotonic Dystrophy (Type 1 and 2); Hereditary Non-Polyposis Colorectal Cancer (Lynch Syndrome); Familial Adenomatous Polyposis (FAP); Osteogenesis Imperfecta (Type I); Ehlers–Danlos Syndrome (Hypermobile and Classic Types).

Autosomal Recessive Diseases Cystic Fibrosis; Sickle-Cell Disease; Beta-Thalassemia; Alpha-Thalassemia; Phenylketonuria (PKU); Gaucher Disease; Tay–Sachs Disease; Niemann–Pick Disease; Wilson Disease; Hereditary Hemochromatosis; Alpha-1 Antitrypsin Deficiency; Spinal Muscular Atrophy (SMA); Friedreich Ataxia; Alkaptonuria; Homocystinuria; Maple Syrup Urine Disease; Congenital Adrenal Hyperplasia; Galactosemia; Glycogen Storage Diseases (von Gierke, Pompe, Cori); Ataxia–Telangiectasia; Fanconi Anemia; Xeroderma Pigmentosum; Bloom Syndrome; Ellis–van Creveld Syndrome; Kartagener Syndrome.

X-Linked Recessive Diseases Duchenne Muscular Dystrophy; Becker Muscular Dystrophy; Hemophilia A (Factor VIII Deficiency); Hemophilia B (Factor IX Deficiency); Glucose-6-Phosphate Dehydrogenase (G6PD) Deficiency; Red-Green Color Blindness; Fragile X Syndrome; Lesch–Nyhan Syndrome; Wiskott–Aldrich Syndrome; X-Linked Agammaglobulinemia (Bruton Tyrosine Kinase Deficiency); X-Linked Adrenoleukodystrophy; Hunter Syndrome (MPS II); Fabry Disease; Menkes Disease; Alport Syndrome (X-Linked Type); Chronic Granulomatous Disease (X-Linked Form).

X-Linked Dominant Diseases Rett Syndrome (MECP2 Mutation); Incontinentia Pigmenti; X-Linked Hypophosphatemic Rickets; Aicardi Syndrome; Focal Dermal Hypoplasia (Goltz Syndrome); Fragile X-Associated Tremor/Ataxia Syndrome (FXTAS).

Y-Linked (Holandric) Conditions Y-Chromosome Infertility (AZF Deletions); SRY Gene Deletions/Mutations; Swyer Syndrome (46,XY Gonadal Dysgenesis); Retinitis Pigmentosa (Y-Linked Form); Hypertrichosis Pinnae Auris.

Mitochondrial (Maternal) Genetic Diseases Leber Hereditary Optic Neuropathy (LHON); Mitochondrial Encephalomyopathy, Lactic Acidosis, and Stroke-Like Episodes (MELAS); Myoclonic Epilepsy with Ragged Red Fibers (MERRF); Neuropathy, Ataxia, and Retinitis Pigmentosa (NARP); Leigh Syndrome (Subacute Necrotizing Encephalomyelopathy); Kearns–Sayre Syndrome; Pearson Syndrome; Chronic Progressive External Ophthalmoplegia (CPEO).

Chromosomal Aneuploidies (Autosomal) Trisomy 21 (Down Syndrome); Trisomy 18 (Edwards Syndrome); Trisomy 13 (Patau Syndrome); Trisomy 8 (Warkany Syndrome 2); Trisomy 9 Mosaicism.

Sex Chromosome Aneuploidies 45,X (Turner Syndrome); 47,XXY (Klinefelter Syndrome); 47,XXX (Triple X Syndrome); 47,XYY (Jacob Syndrome); 48,XXYY Syndrome; 48,XXXY Syndrome; Tetrasomy X.

Microdeletion & Microduplication Syndromes 22q11.2 Deletion Syndrome (DiGeorge Syndrome, Velocardio-facial Syndrome); 5p Deletion Syndrome (Cri-du-Chat Syndrome); 4p Deletion Syndrome (Wolf–Hirschhorn Syndrome); 7q11.23 Deletion Syndrome (Williams Syndrome); 17p11.2 Deletion Syndrome (Smith–Magenis Syndrome); 17p11.2 Duplication Syndrome (Potocki–Lupski Syndrome); 1p36 Deletion Syndrome; 15q11–q13 Deletion; Rubinstein–Taybi Syndrome.

Genomic Imprinting Disorders Prader–Willi Syndrome (Maternal Imprinting / Paternal 15q11–q13 Loss); Angelman Syndrome (Paternal Imprinting / Maternal UBE3A Loss); Beckwith–Wiedemann Syndrome (11p15.5 Alteration); Silver–Russell Syndrome; Pseudohypoparathyroidism (Albright Hereditary Osteodystrophy); Uniparental Disomy Syndromes.

Trinucleotide Repeat Expansion Diseases Huntington Disease (CAG Repeat); Fragile X Syndrome (CGG Repeat); Myotonic Dystrophy Type 1 (CTG Repeat); Friedreich Ataxia (GAA Repeat); Spinocerebellar Ataxias (SCA Types 1, 2, 3, 6, 7); Dentatorubral–Pallidoluysian Atrophy (DRPLA); Spinal and Bulbar Muscular Atrophy (Kennedy Disease).

Lysosomal Storage Diseases Gaucher Disease (Glucocerebrosidase Deficiency); Tay–Sachs Disease (Hexosaminidase A Deficiency); Niemann–Pick Disease (Types A, B, C); Fabry Disease (Alpha-Galactosidase A Deficiency); Pompe Disease (Acid Alpha-Glucosidase Deficiency); Krabbe Disease; Metachromatic Leukodystrophy; Mucopolysaccharidoses (Hurler, Scheie, Hunter, Sanfilippo, Morquio, Maroteaux–Lamy, Sly Syndromes); Fucosidosis; Sialidosis.

Connective Tissue Genetic Disorders Marfan Syndrome (FBN1 Mutation); Ehlers–Danlos Syndromes; Loeys–Dietz Syndrome; Osteogenesis Imperfecta (Brittle Bone Disease); Cutis Laxa; Stickler Syndrome; Pseudoxanthoma Elasticum; Alport Syndrome.

Hereditary Cancer Predisposition Syndromes Hereditary Breast and Ovarian Cancer Syndrome (BRCA1, BRCA2); Lynch Syndrome (MLH1, MSH2, MSH6, PMS2); Familial Adenomatous Polyposis (APC Mutation); Li–Fraumeni Syndrome (TP53 Mutation); Multiple Endocrine Neoplasia Types 1, 2A, 2B; Von Hippel–Lindau Disease; Cowden Syndrome (PTEN Hamartoma Tumor Syndrome); Peutz–Jeghers Syndrome; Nevroid Basal Cell Carcinoma Syndrome (Gorlin Syndrome); Retinoblastoma (RB1 Mutation); Wilms Tumor Predisposition (WT1).

Inherited Diseases

Classification: The first groups show the most common inheritance pattern. The later clinical categories overlap, and several conditions have rare alternate patterns or genetically heterogeneous forms.

Autosomal Dominant Achondroplasia; Autosomal Dominant Polycystic Kidney Disease (ADPKD); Familial Adenomatous Polyposis; Familial Hypercholesterolemia; Hereditary Angioedema (most forms); Huntington Disease; Marfan Syndrome; Multiple Endocrine Neoplasia; Neurofibromatosis Type 1; Neurofibromatosis Type 2; Tuberous Sclerosis Complex; Von Hippel–Lindau Disease.

Autosomal Recessive Alpha-Thalassemia; Beta-Mannosidosis; Beta-Thalassemia; Congenital Adrenal Hyperplasia; Cystic Fibrosis; Familial Mediterranean Fever; Gaucher Disease; Hemochromatosis; Phenylketonuria (PKU); Sickle-Cell Disease; Spinal Muscular Atrophy; Tay–Sachs Disease; Wilson Disease.

X-Linked Becker Muscular Dystrophy; Duchenne Muscular Dystrophy; Fragile X Syndrome; Glucose-6-Phosphate Dehydrogenase (G6PD) Deficiency; Hemophilia A; Hemophilia B; X-Linked Agammaglobulinemia.

Variable or Genetically Heterogeneous Alport Syndrome (X-linked, autosomal dominant, or autosomal recessive); Charcot–Marie–Tooth Disease (multiple inheritance patterns); Hereditary Spherocytosis (usually autosomal dominant, sometimes autosomal recessive); Retinitis Pigmentosa (autosomal dominant, autosomal recessive, X-linked, or mitochondrial); Von Willebrand Disease (usually autosomal dominant, with some autosomal recessive forms).

Mitochondrial MELAS; MERRF; Leber Hereditary Optic Neuropathy (LHON).

Inherited Metabolic Disorders Maple Syrup Urine Disease; Galactosemia; Homocystinuria; Glycogen Storage Diseases; Lysosomal Storage Diseases; Urea-Cycle Disorders.

Inherited Neurological or Neuromuscular Disorders Charcot–Marie–Tooth Disease; Spinal Muscular Atrophy; Hereditary Spastic Paraplegia; Friedreich Ataxia.

Inherited Blood Disorders Sickle-Cell Disease; Alpha-Thalassemia; Beta-Thalassemia; Hereditary Spherocytosis; Hemophilia A; Hemophilia B; some forms of Von Willebrand Disease.

Inherited Connective-Tissue or Skeletal Disorders Osteogenesis Imperfecta; Ehlers–Danlos Syndromes; Marfan Syndrome; Achondroplasia.

Inherited Renal Disorders Alport Syndrome; Autosomal Dominant Polycystic Kidney Disease (ADPKD); Autosomal Recessive Polycystic Kidney Disease (ARPKD); Cystinuria.

Inherited Eye Disorders Retinitis Pigmentosa; Stargardt Disease; congenital color-vision deficiencies; some forms of congenital cataract.

Hereditary Cancer Syndromes Lynch Syndrome; Familial Adenomatous Polyposis; Hereditary Breast and Ovarian Cancer Syndrome; Multiple Endocrine Neoplasia (MEN) Syndromes; Li–Fraumeni Syndrome; Von Hippel–Lindau Disease.

Common Symptoms

Scope: For a medical dictionary or disease-reference project, symptoms are best organized by body system, because a flat alphabetical list quickly becomes difficult to use. Here is a broad list of common medical symptoms.

General / Systemic Fatigue; Weakness; Malaise; Fever; Chills; Night Sweats; Excessive Sweating; Hot Flashes; Flushing; Loss of Appetite; Increased Appetite; Unexplained Weight Loss; Unexplained Weight Gain; Excessive Thirst; Dehydration; Exercise Intolerance; Lethargy; Generalized Body Aches.

Pain Headache; Chest Pain; Pleuritic Chest Pain; Abdominal Pain; Cramping or Colicky Pain; Back Pain; Neck Pain; Joint Pain; Muscle Pain; Bone Pain; Pelvic Pain; Flank Pain; Facial Pain; Eye Pain; Earache; Sore Throat; Toothache; Painful Urination; Rectal Pain; Burning Pain; Radiating Pain; Throbbing Pain.

Neurological Dizziness; Vertigo; Fainting; Light-Headedness; Orthostatic Lightheadedness; Numbness; Tingling; Burning Sensation; Electric Shock Sensations; Tremor; Muscle Weakness; Paralysis; Seizures; Confusion; Memory Problems; Forgetfulness; Difficulty Concentrating; Brain Fog; Loss of Balance; Poor Coordination; Slurred Speech; Altered Consciousness; Aura.

Eye / Vision Blurred Vision; Double Vision; Loss of Vision; Reduced Visual Acuity; Night Blindness; Eye Redness; Watery Eyes; Dry Eyes; Gritty or Foreign-Body Sensation; Eye Strain; Itchy Eyes; Photophobia; Floaters; Flashes of Light; Halos Around Lights; Sensitivity to Glare.

Ear / Hearing Hearing Loss; Tinnitus; Ear Discharge; Ear Fullness; Ear Pain; Sensitivity to Sound; Popping or Clicking in Ears.

Nose / Sinus Runny Nose; Nasal Congestion; Sneezing; Nosebleed; Loss of Smell; Reduced Smell; Sinus Pressure; Postnasal Drip; Frequent Throat Clearing.

Mouth / Throat Dry Mouth; Mouth Ulcers; Bad Breath; Altered Taste; Loss of Taste; Bleeding Gums; Hoarseness; Sore Throat; Difficulty Swallowing; Painful Swallowing; Lump in Throat; Burning Mouth Sensation.

Respiratory Cough; Dry Cough; Productive Cough; Coughing up Blood; Shortness of Breath; Shortness of Breath on Exertion; Wheezing; Rapid Breathing; Noisy Breathing; Sputum Production; Chest Tightness; Air Hunger; Choking Sensation; Inability to Take a Deep Breath.

Cardiovascular Palpitations; Rapid Heartbeat; Slow Heartbeat; Irregular Heartbeat; Heart Fluttering; Chest Pressure; Chest Squeezing; Shortness of Breath on Exertion; Orthopnea; Paroxysmal Nocturnal Dyspnea; Fainting; Ankle or Leg Swelling; Cold Extremities; Intermittent Claudication; Cyanosis.

Gastrointestinal Nausea; Vomiting; Vomiting Blood; Heartburn; Acid Regurgitation; Indigestion; Bloating; Abdominal Distension; Abdominal Cramps; Excessive Gas; Belching; Difficulty Passing Gas; Diarrhea; Constipation; Straining at Stool; Tenesmus; Blood in Stool; Black or Tarry Stool; Mucus in Stool; Fecal Urgency; Fecal Incontinence; Early Satiety; Anal Itching.

Urinary Frequent Urination; Urinary Urgency; Painful Urination; Excessive Urination; Reduced Urination; Inability to Urinate; Urinary Hesitancy; Post-Void Dribbling; Nighttime Urination; Blood in Urine; Urinary Incontinence; Weak Urinary Stream; Bladder Spasms; Foamy Urine.

Musculoskeletal Joint Stiffness; Morning Stiffness; Joint Swelling; Reduced Range of Motion; Joint Clicking or Grating; Joint Instability or Giving Way; Muscle Cramps; Muscle Spasms; Muscle Stiffness; Muscle Twitches; Restless Legs Sensation; Limb Pain; Difficulty Walking; Limping.

Skin Itching; Rash; Redness; Dry Skin; Scaling or Flaking; Skin Discoloration; Bruising; Easy Bruisability; Swelling; Hives; Blisters; Skin Ulcers; Lumps; Excessive Sweating; Reduced Sweating; Hair Loss; Hair Shedding; Brittle Nails; Crawling Sensation on Skin; Skin Tenderness.

Endocrine / Metabolic Excessive Thirst; Excessive Hunger; Frequent Urination; Heat Intolerance; Cold Intolerance; Unexplained Weight Change; Excessive Sweating; Hot Flashes.

Sleep-Related Insomnia; Difficulty Falling Asleep; Difficulty Staying Asleep; Frequent Awakening; Early Morning Awakening; Non-Restorative Sleep; Excessive Daytime Sleepiness; Snoring; Gasping in Sleep; Restless Sleep; Nightmares; Sleepwalking.

Psychological / Behavioral Anxiety; Depressed Mood; Irritability; Agitation; Mood Changes; Loss of Interest or Pleasure; Poor Concentration; Racing Thoughts; Restlessness; Sleep Disturbance; Appetite Changes; Feeling Detached.

Reproductive / Gynecological Pelvic Pain; Painful Menstruation; Heavy Menstrual Bleeding; Irregular Menstruation; Missed Periods; Vaginal Discharge; Vaginal Bleeding; Bleeding Between Periods; Vaginal Itching; Painful Intercourse; Hot Flashes.

Male Reproductive Erectile Dysfunction; Reduced Libido; Testicular Pain; Testicular Swelling; Penile Discharge; Painful Ejaculation; Scrotal Heaviness.

Blood / Lymphatic Easy Bruising; Prolonged Bleeding; Pale Skin; Swollen Lymph Nodes; Recurrent Infections; Petechiae.

Allergic Itching; Sneezing; Watery Eyes; Nasal Congestion; Hives; Facial Swelling; Lip or Tongue Swelling; Wheezing; Shortness of Breath; Anaphylactic Reactions Sensation.

Clinical Note: For a comprehensive medical dictionary, it is essential to distinguish symptoms (subjective experiences reported by the patient, such as nausea or pain) from clinical signs (objectively observed physical findings detected on examination, such as jaundice, edema, or tachycardia). Mixing them is common in general health lists, but an authoritative reference maintains clear separation among Symptoms, Clinical Signs, Syndromes, and Diseases/Disorders categories.

Clinical Signs

Scope: A clinical sign is an objective abnormality that can be observed, measured, elicited, or detected by a clinician, unlike a symptom, which is experienced and reported by the patient. For a medical dictionary, the following system-based classification is useful.

General / Vital Signs Fever; Hypothermia; Tachycardia; Bradycardia; Tachypnea; Bradypnea; Hypertension; Hypotension; Orthostatic Hypotension; Pulsus Paradoxus; Wide Pulse Pressure; Narrow Pulse Pressure; Hypoxemia; Central Cyanosis; Peripheral Cyanosis; Altered Level of Consciousness; Cachexia; Pallor; Jaundice; Dehydration; Pitting Edema; Non-Pitting Edema; Generalized Lymphadenopathy; Clubbing.

Skin Signs Erythema; Pallor; Cyanosis; Jaundice; Petechiae; Purpura; Ecchymosis; Spider Angiomas; Palmar Erythema; Splinter Hemorrhages; Osler Nodes; Janeway Lesions; Rash; Urticaria; Vesicles; Bullae; Pustules; Papules; Nodules; Ulcers; Scaling; Excoriations; Lichenification; Skin Thickening; Hyperpigmentation; Hypopigmentation; Alopecia; Diaphoresis; Reduced Skin Turgor.

Head & Face Signs Facial Asymmetry; Facial Edema; Ptosis; Proptosis; Moon Facies; Mask-Like Facies; Temporal Wasting; Kayser-Fleischer Rings; Arcus Senilis; Xanthelasma; Subconjunctival Hemorrhage.

Eye Signs Conjunctival Pallor; Conjunctival Injection; Scleral Icterus; Anisocoria; Nystagmus; Strabismus; Ptosis; Proptosis; Papilledema; Absent Pupillary Reflex; Abnormal Red Reflex; Corneal Opacity; Roth Spots; Argyll Robertson Pupil.

Ear, Nose & Throat Signs Tympanic Membrane Erythema; Tympanic Membrane Perforation; Otorrhea; Nasal Polyps; Epistaxis; Tonsillar Enlargement; Tonsillar Exudate; Pharyngeal Erythema; Oral Ulcers; Oral Thrush; Strawberry Tongue; Coated Tongue; Koplik Spots; Gingival Hyperplasia; Peritonsillar Bulge; Deviated Uvula.

Neck Signs Cervical Lymphadenopathy; Goiter; Thyroid Nodule; Neck Stiffness; Elevated Jugular Venous Pressure; Carotid Bruit; Tracheal Deviation; Pemberton Sign.

Cardiovascular Signs Tachycardia; Bradycardia; Irregular Pulse; Weak Pulse; Bounding Pulse; Pulsus Alternans; Corrigan Pulse; Water-Hammer Pulse; Pulse Deficit; Displaced Apex Beat; Heart Murmur; Systolic Murmur; Diastolic Murmur; Gallop Rhythm; Third Heart Sound; Fourth Heart Sound; Pericardial Friction Rub; Cardiac Thrill; Ventricular Heave; Elevated Jugular Venous Pressure; Peripheral Edema; Delayed Capillary Refill.

Respiratory Signs Tachypnea; Bradypnea; Apnea; Cyanosis; Accessory-Muscle Use; Nasal Flaring; Chest Retractions; Barrel Chest; Pectus Excavatum; Pectus Carinatum; Asymmetric Chest Expansion; Subcutaneous Emphysema; Reduced Air Entry; Wheezing; Crackles; Rhonchi; Stridor; Bronchial Breath Sounds; Dullness to Percussion; Hyperresonance; Pleural Friction Rub.

Abdominal & Gastrointestinal Signs Abdominal Distension; Abdominal Tenderness; Guarding; Rigidity; Rebound Tenderness; Shifting Dullness; Fluid Wave; Caput Medusae; Palpable Abdominal Mass; Hepatomegaly; Splenomegaly; Ascites; Succussion Splash; Abnormal Bowel Sounds; Abdominal Bruit; Visible Peristalsis; Rectal Bleeding; Melena.

Neurological Signs Altered Consciousness; Disorientation; Abnormal Gait; Festinating Gait; Spastic Hemiplegic Gait; Ataxia; Tremor; Asterixis; Fasciculations; Muscle Wasting; Pronator Drift; Cogwheel Rigidity; Lead-Pipe Rigidity; Abnormal Muscle Tone; Hyperreflexia; Hyporeflexia; Areflexia; Pathological Reflexes; Clonus; Dysmetria; Dysdiadochokinesia; Sensory Deficit; Motor Weakness on Examination; Cranial Nerve Deficit; Nystagmus; Neck Rigidity.

Musculoskeletal Signs Joint Swelling; Joint Deformity; Joint Effusion; Restricted Range of Motion; Crepitus; Muscle Wasting; Muscle Spasm; Heberden Nodes; Bouchard Nodes; Swan-Neck Deformity; Boutonniere Deformity; Baker Cyst; Limb Deformity; Abnormal Posture; Scoliosis; Kyphosis; Lordosis; Abnormal Gait.

Renal & Urinary Signs Bladder Distension; Costovertebral-Angle Tenderness; Peripheral Edema; Hematuria on Testing; Proteinuria; Oliguria; Anuria.

Endocrine Signs Goiter; Exophthalmos; Tremor; Abnormal Hair Distribution; Hirsutism; Striae; Acanthosis Nigricans; Moon Facies; Buffalo Hump; Peripheral Edema.

Hematological Signs Pallor; Petechiae; Purpura; Ecchymoses; Generalized Lymphadenopathy; Splenomegaly; Hepatomegaly; Active Bleeding.

Peripheral Vascular Signs Peripheral Edema; Pitting Edema; Varicose Veins; Absent or Diminished Peripheral Pulses; Cool Extremities; Delayed Capillary Refill; Venous Ulcers; Arterial Ulcers; Peripheral Cyanosis.

Gynecological Signs Abnormal Vaginal Bleeding on Examination; Vaginal or Cervical Discharge; Cervical Lesions; Pelvic Mass; Uterine Enlargement; Adnexal Mass; Cervical-Motion Tenderness; Chandelier Sign.

Male Genital Signs Testicular Swelling; Testicular Mass; Scrotal Edema; Penile Discharge; Genital Ulceration; Phimosis; Hydrocele; Varicocele.

Pediatric & Neonatal Signs Poor Weight Gain on Growth Charts; Growth Retardation; Bulging Fontanelle; Sunken Fontanelle; Neonatal Jaundice; Central Cyanosis; Chest Retractions; Abnormal Primitive Reflexes; Gowers Sign.

Named Clinical Signs Babinski Sign; Murphy Sign; Kernig Sign; Brudzinski Sign; Rovsing Sign; Cullen Sign; Grey Turner Sign; Trousseau Sign; Chvostek Sign; Romberg Sign; Hoffmann Sign; Courvoisier Sign; Kussmaul Sign; Battle Sign; Nikolsky Sign; Auspitz Sign; Ortolani Sign; Barlow Sign; Trendelenburg Sign; McBurney Sign; Tinel Sign; Phalen Sign; Lhermitte Sign; Blumberg Sign; Kehr Sign; Hamman Sign; Homans Sign; Psoas Sign; Obturator Sign; Lachman Sign; Anterior Drawer Sign.

Clinical Note: A comprehensive medical reference can contain 500–1,000+ clinical signs, encompassing physical examination findings, named signs, dermatological signs, radiological signs, and laboratory markers.

Common Congenital Anomalies

Scope: A congenital anomaly is a structural abnormality present at birth, whether genetic, chromosomal, or environmental in origin. This list complements the appendices of Common Diseases, Common Disorders, and Common Syndromes.

Orofacial & Head Anomalies Cleft Lip; Cleft Palate.

Neural Tube & Brain Anomalies Spina Bifida; Anencephaly; Encephalocele; Hydrocephalus.

Thorax & Abdominal Wall Anomalies Congenital Diaphragmatic Hernia; Omphalocele; Gastroschisis.

Digestive System Anomalies Imperforate Anus; Hirschsprung Disease.

Urinary & Genital Anomalies Hypospadias; Epispadias.

Limb & Skeletal Anomalies Clubfoot; Developmental Dysplasia of the Hip; Polydactyly; Syndactyly.

Eye Anomalies Congenital Cataract.

Heart & Great-Vessel Anomalies Congenital Heart Defects; Ventricular Septal Defect; Atrial Septal Defect; Patent Ductus Arteriosus; Tetralogy of Fallot; Coarctation of the Aorta.

Common Findings, Lesions & Conditions

Scope: This companion list collects clinical findings, structural lesions, symptom patterns, and obstetric events that are not diseases in themselves but are frequently encountered in clinical work, imaging, and laboratory testing. It complements the appendices of Common Diseases, Common Disorders, and Common Syndromes.

Cardiovascular & Respiratory Findings Pericardial Effusion; Pleural Effusion; Pneumothorax; Hemothorax; Atelectasis.

Abdominal & Pancreatic Findings Esophageal Varices; Gallstones; Biliary Obstruction; Cholestasis; Pancreatic Pseudocyst; Pancreatic Cysts; Pancreatic Necrosis.

Renal & Urinary Findings Kidney Stones; Hydronephrosis.

Head, Neck & Airway Findings Thyroid Nodules; Nasal Polyps; Deviated Nasal Septum; Vocal-Cord Nodules; Earwax Impaction; Tympanic Membrane Perforation.

Oral & Dental Findings Tooth Erosion; Impacted Teeth; Malocclusion; Geographic Tongue.

Eye & Skin Findings Chalazion; Stye; Keloids; Ingrown Toenail.

Genital & Reproductive Findings Ovarian Cysts; Bartholin Cyst; Varicocele; Hydrocele; Spermatocoele.

Pain & Symptom Conditions Low-Back Pain; Sciatica.

Metabolic Risk & Allergic States Prediabetes; Anaphylaxis.

Obstetric & Labor Events Ectopic Pregnancy; Miscarriage; Recurrent Pregnancy Loss; Placenta Previa; Placental Abruption; Placenta Accreta Spectrum; Premature Rupture of Membranes; Preterm Labor; Fetal Growth Restriction; Obstructed Labor; Postpartum Hemorrhage.

Common Injuries, Poisoning & Environmental Conditions

Scope: This companion list covers injuries (trauma), poisoning and envenomation, and adverse effects of environmental exposure and extremes. These are events or conditions rather than diseases; it complements the appendices of Common Diseases, Common Disorders, and Common Syndromes.

Bone, Joint & Muscle Injuries Fracture; Dislocation; Sprain; Strain.

Skin & Soft-Tissue Injuries Contusion; Laceration; Abrasion; Crush Injury.

Nervous-System Injuries Traumatic Brain Injury; Concussion; Spinal-Cord Injury.

Thermal & Electrical Injuries Burns; Electrical Injury; Hypothermia; Frostbite; Heat Exhaustion; Heatstroke.

Environmental Conditions Drowning; Dehydration; Altitude Sickness; Motion Sickness.

Poisoning & Envenomation Carbon Monoxide Poisoning; Lead Poisoning; Mercury Poisoning; Arsenic Poisoning; Pesticide Poisoning; Snakebite; Scorpion Sting.

Drug & Alcohol Overdose Drug Overdose; Alcohol Poisoning.

Conditions That May Be Asymptomatic

Scope: This reference list groups diseases, infections, and other conditions that may be present without noticeable symptoms, particularly during early, latent, or compensated stages. Being asymptomatic is a clinical state or mode of presentation rather than a separate category of disease, so every condition here also belongs under its usual organ-system or specialty heading, and “May be asymptomatic” is best treated as an attribute or tag in addition to that classification. Many of these conditions cause symptoms in some people and none in others, and some come to attention only through screening or when a complication appears. The list is a curated, high-importance reference rather than a prevalence ranking, and some conditions appear under more than one heading where they are clinically relevant to several systems. Individual symptoms, signs, and laboratory findings are defined as dictionary entries rather than listed here.

Important distinction: “Asymptomatic disease” is not a distinct disease; it describes how a disease presents. Hypertension is a cardiovascular disease that is often asymptomatic, chlamydia is an infection that is frequently asymptomatic, osteoporosis is a skeletal disease that is typically asymptomatic until a fracture, and open-angle glaucoma is an eye disease that is often asymptomatic in its early stages.

Cardiovascular Hypertension; Atherosclerosis; Coronary Artery Disease; Peripheral Artery Disease; Some Arrhythmias; Early Valvular Heart Disease

Metabolic & Endocrine Prediabetes; Early Type 2 Diabetes; Dyslipidemia; Subclinical Hypothyroidism; Subclinical Hyperthyroidism; Hyperuricemia

Kidney & Urinary Early Chronic Kidney Disease; Diabetic Kidney Disease; Mild Proteinuria; Microscopic Hematuria; Some Kidney Stones

Liver Metabolic Dysfunction-Associated Steatotic Liver Disease (MASLD); Chronic Hepatitis B; Chronic Hepatitis C; Early Cirrhosis; Hemochromatosis

Infectious HIV Infection During Clinical Latency; Hepatitis B; Hepatitis C; Chlamydia; Gonorrhea; HPV Infection; Latent Tuberculosis Infection; Some COVID-19 Infections

Cancer & Precancer Early Colorectal Cancer; Cervical Precancer; Early Cervical Cancer; Early Prostate Cancer; Early Kidney Cancer; Some Thyroid Cancers; Early Breast Cancer

Gynecological HPV Infection; Some Ovarian Cysts; Uterine Fibroids; Early Cervical Abnormalities; Some Sexually Transmitted Infections

Male Reproductive Early Prostate Cancer; Some Sexually Transmitted Infections; Varicocele; Some Cases of Benign Prostatic Enlargement

Blood Mild Anemia; Monoclonal Gammopathy of Undetermined Significance (MGUS); Early Chronic Leukemia; Mild Thrombocytopenia

Bone Osteoporosis; Osteopenia

Eye Open-Angle Glaucoma; Early Diabetic Retinopathy; Early Age-Related Macular Degeneration

Neurological & Vascular Silent Cerebral Infarction; Asymptomatic Carotid Stenosis; Some Unruptured Intracranial Aneurysms

Gastrointestinal Diverticulosis; Colon Polyps; Some Gallstones; Some Hiatal Hernias

Gallbladder Asymptomatic Gallstones (“Silent Gallstones”); Gallbladder Polyps

Genetic Hemochromatosis Before Organ Damage; Some Inherited Thrombophilias; Some Genetic Carrier States

Parasitic & Latent Infections Some Malaria Infections; Intestinal Parasitic Infections; Toxoplasmosis and Other Latent Infections

Lay Language Medical Terms

Lay term	Medical term	Lay-language explanation
Belly area	ABDOMEN/ABDOMINAL	The body cavity below the diaphragm containing the stomach, intestines, liver, and other organs.
Take in	ABSORB	To take up or take in a substance, such as fluid.
Too much acid in blood	ACIDOSIS	A condition in which the blood is more acidic than normal.
Sharpness or clarity	ACUITY	The clearness or keenness of a sense, especially vision.
Recent or sudden	ACUTE	New, recent, sudden, or requiring urgent attention.
Swollen glands	ADENOPATHY	Enlarged or swollen lymph nodes.
Helpful added treatment	ADJUVANT	Something that supports or assists the main treatment.
Added treatment	ADJUVANT TREATMENT	Treatment given in addition to the main or standard treatment.
Germ-killing drug	ANTIBIOTIC	A drug used to kill or control bacteria and some other germs.
Germ-killing treatment	ANTIMICROBIAL	A substance or treatment that acts against microorganisms such as bacteria, fungi, or parasites.
Antiviral drug	ANTIRETROVIRAL	A drug that slows or stops the growth of certain viruses.
Side effect	ADVERSE EFFECT	An unwanted or harmful response to a treatment or medicine.
Walking	AMBULATE/AMBULATION/ AMBULATORY	To walk, or to be able to walk.
Severe allergy	ANAPHYLAXIS	A serious, potentially life-threatening allergic reaction.
Low red-cell count	ANEMIA	A reduced number of red blood cells or a low red-cell blood count.
Numbing medicine	ANESTHETIC	A drug or agent that reduces or removes the feeling of pain, sometimes by causing sleep.
Heart pain	ANGINA	Chest pain caused by inadequate blood flow to the heart muscle.
Heart pain	ANGINA PECTORIS	Another medical term for chest pain caused by reduced blood flow to the heart.
Loss of appetite	ANOREXIA	Lack of appetite or, in some contexts, a disorder involving refusal to eat.

Lay term	Medical term	Lay-language explanation
Inner elbow area	ANTECUBITAL	Relating to the inner side of the elbow or forearm.
Protective protein	ANTIBODY	A protein made by the body in response to a foreign substance.
Seizure-prevention drug	ANTICONVULSANT	A medicine used to prevent or control seizures.
Cholesterol-lowering drug	ANTILIPEMIC	A drug that lowers fat or cholesterol levels in the blood.
Cough medicine	ANTITUSSIVE	A medicine used to reduce coughing.
Irregular heartbeat	ARRHYTHMIA	Any abnormal change in the normal heartbeat or rhythm.
Breathing material into the lungs	ASPIRATION	Entry of fluid, food, or other material into the lungs, often after vomiting.
Laboratory test	ASSAY	A laboratory test used to measure or identify something.
Check or evaluate	ASSESS	To examine, measure, evaluate, or look at something carefully.
Asthma	ASTHMA	A lung disease in which narrowed or tightened airways make breathing difficult.
Without symptoms	ASYMPTOMATIC	Having no noticeable symptoms.
Armpit	AXILLA	The armpit area.
Not cancerous	BENIGN	Not malignant and generally not cancerous.
Twice daily	BID	Prescription shorthand meaning twice a day.
Carried or stuck together	BINDING/BOUND	Carried by something, or made to stick or join together.
Drug availability	BIOAVAILABILITY	The amount or proportion of a drug that becomes available for the body to use.
Series of blood tests	BLOOD PROFILE	A group or panel of blood tests.
Large dose at once	BOLUS	A relatively large amount given all at one time.
Amount of mineral in bone	BONE MASS	The amount of calcium and other minerals in a given amount of bone.
Slow irregular heartbeats	BRADYARRHYTHMIAS	Slow heart rhythms that may also be irregular.
Slow heartbeat	BRADYCARDIA	A slower-than-usual heartbeat.
Narrowed airways	BRONCHOSPASM	Breathing difficulty caused by tightening of the airway muscles.
Cancer-causing	CARCINOGENIC	Capable of causing cancer.
Cancer type	CARCINOMA	A cancer that begins in lining or covering cells of the body.
Related to the heart	CARDIAC	Relating to the heart.
Resetting the heartbeat	CARDIOVERSION	Restoring a normal heart rhythm, often with a controlled electrical shock.
Tube	CATHETER	A thin tube used to give or remove fluids, or to perform certain medical procedures.
Epidural tube	CATHETER	A catheter placed near the spinal cord to deliver anesthesia during surgery.
Brain and spinal cord	CENTRAL NERVOUS SYSTEM (CNS)	The brain and spinal cord.
Brain injury	CEREBRAL TRAUMA	Damage to the brain caused by an injury.
Stopping	CESSATION	The act of stopping something.
Coronary heart disease	CHD	Disease of the blood vessels that supply the heart.
Cancer drug treatment	CHEMOTHERAPY	Treatment of disease, usually cancer, with chemical medicines.

Lay term	Medical term	Lay-language explanation
Long-lasting	CHRONIC	Continuing for a long time or ongoing.
Related to patient care	CLINICAL	Pertaining to medical care or the care of patients.
Human research study	CLINICAL TRIAL	A research study involving human participants.
Unconscious state	COMA	A prolonged state of unconsciousness in which a person cannot be awakened normally.
All disease gone	COMPLETE RESPONSE	Total disappearance of the detectable disease being treated.
Present from birth	CONGENITAL	Present before or at birth.
Pink, irritated eye	CONJUNCTIVITIS	Redness and irritation of the thin membrane covering the eye.
Treatment to keep improvement	CONSOLIDATION PHASE	A treatment phase intended to make a remission last, usually after initial treatment.
Comparison study	CONTROLLED TRIAL	A study comparing an experimental treatment with a standard or control treatment.
Research partnership	COOPERATIVE GROUP	An association of institutions that work together on clinical research.
Related to heart arteries	CORONARY	Relating to the heart or the blood vessels that supply it.
Computerized X-ray scan	CT SCAN (CAT)	A series of computer-processed X-ray images that show sections of the body.
Germ-growth test	CULTURE	A test that grows or detects organisms that may cause infection.
Added together	CUMULATIVE	Added up from the beginning.
Related to the skin	CUTANEOUS	Relating to the skin.
Stroke	CVA	A stroke, also called a cerebrovascular accident.
Related to the skin	DERMATOLOGIC	Pertaining to the skin.
Lower blood-pressure number	DIASTOLIC	Relating to the lower blood-pressure number, when the heart relaxes.
Farther away	DISTAL	Toward the end or away from the center of the body.
Water pill	DIURETIC	A drug that increases urination.
Sound-wave blood-flow test	DOPPLER	A device or test using sound waves to assess blood flow.
Masked study	DOUBLE BLIND	A study in which neither the participants nor investigators know which treatment is being given.
Improper function	DYSFUNCTION	A state in which something does not work normally.
Abnormal cells	DYSPLASIA	Abnormal changes in the size, shape, or organization of cells.
Heart sound-wave test	ECHOCARDIOGRAM	An ultrasound test that creates pictures of the heart.
Swelling from fluid	EDEMA	Excess fluid collecting in body tissues.
Brain-wave test	EEG	A recording of the brain's electrical activity.
Effectiveness	EFFICACY	How well a treatment works under specified conditions.
Heart electrical tracing	ELECTROCARDIOGRAM	A tracing of the heart's electrical activity, also called an ECG or EKG.
Mineral imbalance	ELECTROLYTE IMBALANCE	An abnormal level or balance of minerals in the blood.
Vomiting	EMESIS	The act of vomiting.

Lay term	Medical term	Lay-language explanation
Based on experience	EMPIRIC	Based on experience or likely cause rather than definitive test results.
Viewing inside the body	ENDOSCOPIC	Looking inside the body with a lighted tube or camera.
Through the intestines	ENTERAL	Given through or involving the digestive tract.
Outside the spinal cord	EPIDURAL	Located outside the spinal cord covering, or medicine given into that space.
Remove completely	ERADICATE	To get rid of a disease, infection, or other problem.
Examined	EVALUATED, ASSESSED	Examined or checked for a medical condition.
Fast ethics review	EXPEDITED REVIEW	A rapid research-protocol review allowed for certain lower-risk studies.
Outside the body	EXTERNAL	Located or occurring outside the body.
Leak out	EXTRAVASATE	To leak outside the intended area, such as from a blood vessel into nearby tissue.
U.S. drug agency	FDA	The U.S. Food and Drug Administration, which regulates medicines and medical products.
Scar-like	FIBROUS	Containing many fibers, often resembling scar tissue.
Irregular quivering	FIBRILLATION	Very rapid, uncoordinated activity of the heart or another muscle.
Being put fully to sleep	GENERAL ANESTHESIA	Use of medicines to cause unconsciousness and prevent pain during a procedure.
Related to pregnancy	GESTATIONAL	Pertaining to pregnancy.
Red-cell percentage	HEMATOCRIT	The proportion of blood made up of red blood cells.
Bruise or blood collection	HEMATOMA	A collection of blood under the skin or in a tissue, often appearing as a bruise.
Blood-flow measurement	HEMODYNAMIC MEASURING	Measuring blood flow and circulation.
Red-cell breakdown	HEMOLYSIS	Breakdown or destruction of red blood cells.
Heparin tube or port	HEPARIN LOCK	An intravenous access device kept open with a prescribed solution, sometimes containing heparin.
Liver tumor	HEPATOMA	A tumor of the liver, often referring to hepatocellular carcinoma.
Inherited disease	HERITABLE DISEASE	A disease that can be passed through genes to future children.
Tissue-disease examination	HISTOPATHOLOGIC	Relating to examination of tissues or cells for disease.
Portable heart monitor	HOLTER MONITOR	A portable device that records heartbeats, usually for a day or longer.
High blood calcium	HYPERCALCEMIA	An abnormally high calcium level in the blood.
High blood potassium	HYPERKALEMIA	An abnormally high potassium level in the blood.
High blood sodium	HYPERNATREMIA	An abnormally high sodium level in the blood.
High blood pressure	HYPERTENSION	Blood pressure that is higher than recommended.
Low blood calcium	HYPOCALCEMIA	An abnormally low calcium level in the blood.
Low blood potassium	HYPOKALEMIA	An abnormally low potassium level in the blood.
Low blood sodium	HYPONATREMIA	An abnormally low sodium level in the blood.
Low blood pressure	HYPOTENSION	Blood pressure that is lower than expected.
Low blood oxygen	HYPOXEMIA	A low level of oxygen in the blood.
Low tissue oxygen	HYPOXIA	Too little oxygen reaching body tissues.

Lay term	Medical term	Lay-language explanation
Removal of the uterus	HYSTERECTOMY	Surgical removal of the uterus; the ovaries and other structures may or may not also be removed.
Treatment-caused	IATROGENIC	Caused by medical treatment or a healthcare procedure.
Device research permission	IDE	Permission to study an unapproved medical device in people.
Cause unknown	IDIOPATHIC	Having no known cause.
Body protection	IMMUNITY	The body's defense against infection or other foreign substances.
Antibody protein	IMMUNOGLOBIN	A protein involved in making antibodies and immune defense; the standard spelling is immunoglobulin.
Immune-suppressing	IMMUNOSUPPRESSIVE	A drug or treatment that reduces the body's immune response.
Immune-based treatment	IMMUNOTHERAPY	Treatment that uses or changes the immune system, often against cancer or immune disease.
Abnormal function	IMPAIRED FUNCTION	Function that is reduced or not working normally.
Placed inside the body	IMPLANTED	Surgically or otherwise placed inside the body.
New-drug research permission	IND	Authorization to test an unapproved new drug in people.
Hardening	INDURATION	An area that has become unusually firm or hard.
Left in place	INDWELLING	Remaining in a particular location, such as a catheter.
Dead tissue from poor blood flow	INFARCT	Death of tissue caused by inadequate blood supply.
Disease that can spread	INFECTIOUS DISEASE	An illness caused by organisms that may spread between people or through other routes.
Swelling and irritation	INFLAMMATION	The body's response to injury or infection, often causing swelling, warmth, redness, or pain.
Slow delivery into the body	INFUSION	Slow delivery of a substance, usually through a vein or catheter.
Taking by mouth	INGESTION	Eating, drinking, or taking something into the body by mouth.
Antiviral immune protein	INTERFERON	A medicine or natural protein that helps the body act against viruses.
On and off	INTERMITTENT	Occurring repeatedly with pauses between episodes.
Inside the body	INTERNAL	Located or occurring within the body.
Inside	INTERIOR	Located on the inside.
Into a muscle	INTRAMUSCULAR	Given into a muscle.
Into the abdomen	INTRAPERITONEAL	Given into or located within the abdominal cavity.
Into spinal fluid	INTRATHECAL	Given into the fluid space around the spinal cord.
Into a vein	INTRAVENOUS (IV)	Given through a vein.
Into the bladder	INTRAVESICAL	Given into the bladder.
Place a breathing tube	INTUBATE	To place a tube into the airway.
Breaking the skin	INVASIVE PROCEDURE	A procedure that punctures, opens, or cuts the skin or enters the body.
Unapproved-drug study	INVESTIGATIONAL NEW DRUG (IND)	A new drug being studied before it has full approval for general use.

Lay term	Medical term	Lay-language explanation
Unproven treatment method	INVESTIGATIONAL METHOD	A treatment method still being studied and not established as standard care.
Reduced blood flow	ISCHEMIA	Too little blood and oxygen reaching a tissue, usually because blood flow is reduced.
Open abdominal surgery	LAPAROTOMY	Surgery using an incision in the abdominal wall to reach the organs inside.
Abnormal area	LESION	A wound, injury, or area of abnormal tissue.
Very tired or sleepy	LETHARGY	Sleepiness, tiredness, or reduced energy.
Low white-cell count	LEUKOPENIA	A lower-than-normal number of white blood cells.
Fat	LIPID	A fat or fat-like substance.
Amount of fat	LIPID CONTENT	The amount of fat in a substance, tissue, or blood sample.
Cholesterol and fat panel	LIPID PROFILE (PANEL)	Blood tests measuring fats and cholesterol.
Numbing a small area	LOCAL ANESTHESIA	Numbing medicine used to prevent pain in a limited area.
Limited to one area	LOCALIZED	Restricted to one area.
Inner space	LUMEN	The hollow space inside a tube or organ, such as a blood vessel.
Lymph-vessel X-ray	LYMPHANGIOGRAPHY	An X-ray study of lymph vessels or nodes after contrast dye is injected.
Immune white blood cell	LYMPHOCYTE	A type of white blood cell that helps protect against infection.
Lymph-node cancer	LYMPHOMA	A cancer of lymph nodes or related lymphatic tissue.
Feeling unwell	MALAISE	A vague feeling of illness or bodily discomfort.
Not working correctly	MALFUNCTION	A condition in which a device, organ, or system does not work properly.
Cancerous growth	MALIGNANCY	A cancer or other tumor capable of growing and spreading.
Brain tumor	MEDULLABLASTOMA	A type of tumor that begins in the brain.
Abnormal red-cell development	MEGALOBLASTOSIS	A change in blood-forming cells that produces unusually large, abnormal red-cell precursors.
Break down in the body	METABOLIZE	To chemically process or break down a substance in the body.
Cancer spread	METASTASIS	Spread of cancer cells from one body part to another.
Antibiotic medicine	METRONIDAZOLE	A medicine used for certain bacterial and parasitic infections.
Heart attack	MI	Myocardial infarction, or death of heart muscle from blocked blood flow.
Small or slight	MINIMAL	Very small or slight.
Reduce	MINIMIZE	To reduce something as much as possible.
Check or watch	MONITOR	To observe, measure, or keep track of something over time.
Ease of movement	MOBILITY	The ability to move easily.
Illness or complication	MORBIDITY	Illness, disability, or an unwanted result of disease or treatment.
Death rate or death	MORTALITY	Death, or the rate of death in a population.
Ability to move	MOTILITY	The ability of a body part, cell, or organism to move.
Magnetic body scan	MRI	Pictures of the inside of the body made with magnets and radio waves rather than X-rays.

Lay term	Medical term	Lay-language explanation
Moist body lining	MUCOSA, MUCOUS MEMBRANE	The moist lining of the digestive, respiratory, reproductive, and urinary passages.
Muscle aches	MYALGIA	Pain or aching in the muscles.
Related to heart muscle	MYOCARDIAL	Pertaining to the muscle of the heart.
Heart attack	MYOCARDIAL INFARCTION	Death of heart muscle caused by inadequate blood flow.
Nose-to-stomach tube	NASOGASTRIC TUBE	A tube passed through the nose into the stomach.
U.S. health institute	NCI	The National Cancer Institute.
Tissue death	NECROSIS	Death of cells or tissue.
Tumor	NEOPLASIA/NEOPLASM	An abnormal new growth that may be benign or malignant.
Nerve-tissue cancer	NEUROBLASTOMA	A cancer that develops from immature nerve tissue.
Related to the nervous system	NEUROLOGICAL	Pertaining to the brain, spinal cord, or nerves.
Low infection-fighting cells	NEUTROPENIA	A decrease in neutrophils, a major type of infection-fighting white blood cell.
U.S. health agency	NIH	The National Institutes of Health.
Not entering the body	NONINVASIVE	Not breaking, cutting, or entering the skin or body.
Hospital-acquired	NOSOCOMIAL	Acquired during a stay in a healthcare facility.
Blockage	OCCLUSION	Closing, blockage, or obstruction.
Cancer specialty	ONCOLOGY	The study and treatment of cancer and tumors.
Related to the eye	OPHTHALMIC	Pertaining to the eye.
Best choice	OPTIMAL	Best, most favorable, or most suitable.
By mouth	ORAL ADMINISTRATION	Giving a medicine through the mouth.
Related to bones	ORTHOPEDIC	Pertaining to bones, joints, muscles, or related structures.
Rare dense-bone disorder	OSTEOPETROSIS	A rare disorder in which bones become unusually dense but may be fragile.
Weak bones	OSTEOPOROSIS	A condition in which bones lose strength and become more likely to break.
Female sex glands	OVARIES	The organs that produce eggs and reproductive hormones.
Given by injection	PARENTERAL	Given by injection rather than through the digestive tract.
Open passage	PATENCY	The condition of being open and unobstructed.
How a disease develops	PATHOGENESIS	The process by which a disease or unhealthy condition develops.
Through the skin	PERCUTANEOUS	Done through or across the skin.
Away from the center	PERIPHERAL	At or toward the outer part rather than the center.
By mouth	PER OS (PO)	A prescription direction meaning by mouth.
How the body handles a drug	PHARMACOKINETICS	The study of how the body absorbs, distributes, changes, and removes a drug.
First drug-study phase	PHASE I	The first human study phase, usually focused on safety, effects, and dosing.
Early effectiveness study	PHASE II	A study phase examining safety and early evidence of benefit in people with a condition.
Large confirmation study	PHASE III	A larger study phase used to confirm safety and effectiveness and identify common side effects.

Lay term	Medical term	Lay-language explanation
After-approval study	PHASE IV	A study performed after approval to monitor safety or examine additional uses.
Vein irritation	PHLEBITIS	Irritation or inflammation of a vein.
Inactive treatment	PLACEBO	An inactive substance or treatment that looks like the real treatment.
Improvement from expectation	PLACEBO EFFECT	An improvement that occurs after an inactive treatment, often because of expectation or context.
Clotting blood particles	PLATELETS	Small blood components that help stop bleeding by forming clots.
Possible	POTENTIAL	Possible or capable of happening.
Make stronger	POTENTIATE	To increase or multiply the effect of a drug, treatment, or substance.
Effect booster	POTENTIATOR	An agent that helps another agent work more strongly.
Before birth	PRENATAL	Occurring before birth.
Preventive treatment	PROPHYLAXIS	A medicine or action used to prevent disease or infection.
As needed	PRN	Prescription shorthand meaning when needed.
Expected outlook	PROGNOSIS	The expected course and outcome of a disease.
Lying face down	PRONE	Lying on the stomach or front.
Study looking forward	PROSPECTIVE STUDY	A study that follows participants forward in time.
Artificial body part	PROSTHESIS	An artificial replacement for a body part.
Study plan	PROTOCOL	The written plan for a study or treatment.
Closer to the center	PROXIMAL	Closer to the center of the body or point of attachment.
Related to the lungs	PULMONARY	Pertaining to the lungs.
Every day	QD	Prescription shorthand meaning every day; clearer wording is preferred.
Four times daily	QID	Prescription shorthand meaning four times a day.
Radiation treatment	RADIATION THERAPY	Treatment using high-energy radiation to damage or destroy abnormal cells.
By chance	RANDOM	Selected or occurring by chance.
Chance assignment	RANDOMIZATION	Assigning participants to groups by chance.
Red blood cell	RBC	A red blood cell.
Genetically combined	RECOMBINANT	Made by combining genetic material from different sources.
Put back together	RECONSTITUTION	Restoring something by putting its parts back together or adding a liquid.
Happen again	RECUR	To happen again.
Not responding	REFRACTORY	Not responding adequately to treatment.
Regrowth or repair	REGENERATION	Growth again or replacement of lost or damaged tissue.
Treatment schedule	REGIMEN	The planned pattern, dose, and timing of treatment.
Return of disease	RELAPSE	Return of a disease after improvement or remission.
No detectable disease	REMISSION	Disappearance or reduction of evidence of disease; it may be partial or complete.
Related to kidneys	RENAL	Pertaining to the kidneys.
Can be repeated	REPLICABLE	Able to be repeated with similar results.

Lay term	Medical term	Lay-language explanation
Remove surgically	RESECT	To remove part or all of an organ or tissue by surgery.
Study looking back	RETROSPECTIVE STUDY	A study that examines past records or past events.
Connective-tissue cancer	SARCOMA	A cancer arising from connective, bone, muscle, fat, or related tissues.
Calming medicine	SEDATIVE	A medicine that calms or makes a person sleepy.
Testicular cancer	SEMINOMA	A type of cancer arising in the testicle.
In order	SEQUENTIALLY	Happening one after another in order.
Sleepiness	SOMNOLENCE	Unusual sleepiness or a tendency to fall asleep.
Air-measuring instrument	SPIROMETER	An instrument that measures the amount of air moved into and out of the lungs.
Extent of disease	STAGING	Assessment of how far a disease has progressed or spread.
Usual accepted treatment	STANDARD OF CARE	A treatment plan generally accepted by the medical community as appropriate.
Narrowing	STENOSIS	Narrowing of a passage, duct, or blood vessel.
Mouth inflammation	STOMATITIS	Sores or inflammation inside the mouth.
Group for comparison	STRATIFY	To arrange people or results into groups for analysis.
Barely responsive state	STUPOR	A greatly reduced level of alertness in which a person is difficult to awaken or respond to.
Under the collarbone	SUBCLAVIAN	Located beneath the collarbone.
Under the skin	SUBCUTANEOUS	Beneath the skin.
Lying on the back	SUPINE	Lying face up on the back.
Care focused on comfort	SUPPORTIVE CARE	General care that relieves symptoms and supports the person without directly curing the underlying disease.
Having symptoms	SYMPTOMATIC	Showing or having symptoms.
Group of related findings	SYNDROME	A condition identified by a characteristic group of symptoms and signs.
Upper blood-pressure number	SYSTOLIC	Relating to the upper blood-pressure number when the heart contracts.
Birth-defect-causing	TERATOGENIC	Capable of causing abnormalities in a developing fetus.
Male sex glands	TESTES/TESTICLES	The organs that produce sperm and male reproductive hormones.
Clot formation	THROMBOSIS	Formation of a blood clot inside a blood vessel or other location.
Blood clot	THROMBUS	A blood clot formed within a blood vessel or the heart.
Three times daily	TID	Prescription shorthand meaning three times a day.
Gradual dose adjustment	TITRATION	Gradually changing a dose or solution to reach a desired effect.
Immune white blood cells	T-LYMPHOCYTES	White blood cells that help coordinate or carry out immune responses.
On the surface	TOPICAL	Applied to the surface, usually the skin or a mucous membrane.
Surface numbing medicine	TOPICAL ANESTHETIC	A numbing medicine applied to a particular surface area.

Lay term	Medical term	Lay-language explanation
Harmful effects	TOXICITY	Harmful or unwanted effects caused by a drug, chemical, or treatment.
Through the skin	TRANSDERMAL	Delivered through the skin.
Temporarily	TRANSIENTLY	For a short time or temporarily.
Injury	TRAUMA	Physical injury or wound.
Walking exercise machine	TREADMILL	A moving walking surface used for exercise or heart testing.
Absorption into tissue	UPTAKE	Absorbing or taking in a substance by living tissue.
Heart-valve repair	VALVULOPLASTY	A procedure that repairs or widens a heart valve.
Enlarged veins	VARICES	Abnormally enlarged or twisted veins.
Blood-vessel spasm	VASOSPASM	Sudden narrowing of blood vessels.
Disease carrier	VECTOR	An organism or carrier that can transmit a disease-causing microorganism.
Blood draw	VENIPUNCTURE	Puncturing a vein with a needle to draw blood or give treatment.
Parent-to-child spread	VERTICAL TRANSMISSION	Spread of an infection from a parent to a child, often during pregnancy, birth, or breastfeeding.
White blood cell	WBC	A white blood cell involved in immune defense.

Source and adaptation: Terms and concepts were checked against the University of Iowa Human Subjects Office, “Medical Terms in Lay Language,” available at <https://hso.research.uiowa.edu/get-started/guides-and-standard-operating-procedures-sops/medical-terms-lay-language>. The explanations in this appendix are paraphrased for this dictionary and are not the only acceptable plain-language alternatives.
