

Medical Dictionary by Specialty

A Comprehensive Reference of Medical Terminology

Chaman Singh Verma

August 25, 2026

Preface

This dictionary is a concise reference to medical terms, diseases, investigations, treatments, anatomy, physiology, and related clinical concepts. It is intended to help students, healthcare professionals, educators, and general readers understand unfamiliar medical language.

The entries are arranged alphabetically from A to Z, with each letter presented in its own chapter. This arrangement allows a reader to locate a known term quickly while maintaining a consistent structure throughout the book. Related terms and common alternative names are included when they improve clarity or aid searching.

Definitions are written in simple, formal language and are intended to be clear, accurate, and useful for reference. Medical terminology changes as scientific knowledge and clinical guidance develop; therefore, important information should be checked against current textbooks, primary research, professional guidance, and local clinical protocols.

This book is an educational reference, not a substitute for professional medical advice, diagnosis, or treatment. Readers should seek advice from a qualified healthcare professional when making decisions about health.

Chaman Singh Verma

Medical Disclaimer

Educational and Reference Purpose Only: This publication, *Medical Dictionary by Specialty*, is prepared and compiled strictly for educational, academic, historical, and reference purposes. It is intended for medical students, healthcare professionals, educators, and researchers.

No Medical Advice: The information contained herein does not constitute professional medical advice, clinical diagnosis, treatment protocols, or formal therapeutic recommendations. It should not be used as a substitute for the professional judgment of qualified physicians, surgeons, or certified healthcare providers.

Clinical Practice Guidelines: Healthcare practitioners must always consult primary evidence-based medical literature, institutional protocols, manufacturer prescribing information, and national clinical guidelines (such as WHO, CDC, NICE, or national medical councils) when making diagnostic or therapeutic decisions for individual patients.

Limitation of Liability: Neither the author nor the publishers accept any legal responsibility or liability for any errors, omissions, or clinical outcomes resulting from the use or application of any information presented in this work.

A

5-Alpha Reductase Inhibitor

A medicine that blocks conversion of testosterone to dihydrotestosterone. It is used mainly to treat benign prostatic hyperplasia and androgen-related hair loss.

Synonyms:

Adaptive Design

A clinical-study design that permits planned changes in response to accumulating data while preserving validity. **Synonyms:**

ADME

Absorption, distribution, metabolism, and excretion: the processes governing a substance's movement through the body. **Synonyms:** Pharmacokinetics

Administration Procedure

A procedure used to deliver a medicine, fluid, vaccine, or other intervention to a patient. **Synonyms:**

Adnexal Dysplasia

Abnormal precancerous or developmental cellular changes in tissue beside the uterus, such as the ovary or tube. **Synonyms:**

Adopted Child

A child legally brought into a family other than the family of biological origin. **Synonyms:**

Adoption

The legal process by which a person becomes the parent of a child not biologically theirs. **Synonyms:**

ADP-Ribosylation

Addition of an ADP-ribose group to a protein or other molecule, altering its activity or interactions.

Synonyms:

Adrenomedullin

A peptide hormone that promotes blood-vessel dilation and helps regulate circulation and fluid balance.

Synonyms:

Adsorption

Attachment of molecules to the surface of a solid or liquid rather than absorption into its interior.

Synonyms:

Adult

A fully grown person who has completed the usual stage of physical development. **Synonyms:**

Aerobiosis

A state or process requiring the presence of oxygen.

Synonyms:

Aerosol

A suspension of fine solid particles or liquid droplets in a gas. **Synonyms:**

Affinity Chromatography

A laboratory separation method that isolates a molecule through its specific binding to an immobilized partner. **Synonyms:**

Agammaglobulinemia

A severe deficiency or absence of immunoglobulins, causing recurrent infections. **Synonyms:**

Aicardi's Syndrome

A rare developmental brain disorder characterized classically by absence of the corpus callosum, seizures, and distinctive retinal lesions. **Synonyms:** Aicardi syndrome

Ainhum

A rare disorder causing a constricting groove around a toe that may eventually lead to autoamputation. **Synonyms:** Dactylolysis spontanea

Alarmin

A molecule released by damaged or stressed cells that activates innate immune responses. **Synonyms:**

Alcoholic Hepatitis

Inflammation and liver injury caused by heavy alcohol use. **Synonyms:**

Alcoholic Intoxication

Impaired judgment, coordination, or consciousness caused by acute alcohol exposure. **Synonyms:** Alcohol intoxication

Alcoholism

A chronic disorder characterized by impaired control over alcohol use and continued use despite harm. **Synonyms:** Alcohol use disorder

Alexithymia

Difficulty identifying, describing, or distinguishing one's emotional experiences. **Synonyms:**

Alkaptonuria

An inherited disorder of tyrosine metabolism causing homogentisic-acid accumulation and darkening of urine or tissues. **Synonyms:**

Anger

An emotional response to perceived threat, frustration, injustice, or harm. **Synonyms:**

Anorectal Infection

Infection involving the anus, rectum, or surrounding

tissues. **Synonyms:**

Aortopulmonary Window

A congenital opening between the ascending aorta and pulmonary artery. **Synonyms:**

Aponeurosis

A broad, flat sheet of connective tissue that attaches muscle to bone or other tissues. **Synonyms:**

Apoptotic Body

A membrane-bound fragment of a cell undergoing programmed cell death. **Synonyms:**

Arterial Embolization

Intentional blockage of an artery, often to control bleeding or reduce blood supply to a tumor. **Synonyms:**

Arterial Injury

Damage to an artery that may cause bleeding, narrowing, clotting, or impaired blood flow. **Synonyms:**

Arterial Stenosis

Abnormal narrowing of an artery. **Synonyms:**

Arterial Thrombosis

Formation of a blood clot within an artery. **Synonyms:**

Arteritis

Inflammation of an artery. **Synonyms:**

Artery Occlusion

Complete or near-complete blockage of an artery. **Synonyms:**

Arthropod Vector

An arthropod, such as a mosquito or tick, that transmits an infectious agent between hosts. **Synonyms:** Disease vector

Arthus Reaction

A localized immune-complex reaction causing inflammation at the site of antigen exposure. **Synonyms:**

Artificial Intelligence

Computer systems designed to perform tasks requiring capabilities such as pattern recognition, prediction, or decision support. **Synonyms:** AI

Artificial Saliva

A product used to moisten the mouth and relieve symptoms of dry mouth. **Synonyms:** Saliva substitute

Assay

A laboratory procedure used to detect or measure a substance, activity, or biological response. **Synonyms:**

Asthenozoospermia

Reduced sperm motility, which may contribute to difficulty conceiving. **Synonyms:** Asthenospermia

Asymptomatic Infections

Infections present without noticeable symptoms. **Synonyms:** Subclinical infections

Atopic Rhinitis

Allergic inflammation of the nasal lining causing sneezing, itching, congestion, or discharge. **Synonyms:** Allergic rhinitis

Atrial Ablation

A procedure that destroys selected heart tissue to prevent or control an atrial arrhythmia. **Synonyms:** Cardiac ablation

Atrophoderma Maculatum

A rare skin condition causing localized, depressed patches of altered pigmentation and tissue thinning. **Synonyms:**

Attention

The ability to selectively focus mental resources on

particular information or tasks. **Synonyms:**

Attitude

A person's relatively enduring way of thinking or feeling about a subject, person, or situation. **Synonyms:**

Atypia Morphology

Abnormal cellular appearance or architecture that may be benign, reactive, precancerous, or cancerous depending on context. **Synonyms:** Cytologic atypia

Augmentation Mammoplasty

Surgery to increase breast size or alter breast shape, commonly using implants or fat transfer. **Synonyms:** Breast augmentation

Avoidance Behavior

Deliberate behavior intended to prevent contact with a feared, distressing, or threatening situation. **Synonyms:**

Axis Vertebra

The second cervical vertebra, which supports rotation of the first cervical vertebra and head. **Synonyms:** C2; axis

Axolemma

The cell membrane surrounding an axon. **Synonyms:**

Adherens Junction

A cell-to-cell connection that uses cadherin proteins to link neighboring cells through actin filaments. **Synonyms:**

Adipocyte

A cell specialized to store and release fat. **Synonyms:** Fat cell

Adipogenesis

The formation and maturation of fat cells. **Synonyms:**

Adipokine

A signaling molecule released by adipose tissue that influences metabolism or inflammation. **Synonyms:**

Adjustment Disorders

Emotional or behavioral symptoms occurring in response to an identifiable stressor and causing significant distress or impairment. **Synonyms:** Adjustment disorder

Adnexal Mass

A growth or enlargement involving structures beside the uterus, such as an ovary or fallopian tube. **Synonyms:**

Adnexitis

Inflammation of an adnexal structure, usually the fallopian tube or ovary. **Synonyms:** Salpingo-oophoritis

Adoptive Immunotherapy

Treatment in which immune cells are collected, modified or activated, and returned to the patient. **Synonyms:**

Adrenal Cancer

Cancer arising in the adrenal gland. **Synonyms:** Adrenocortical cancer

Adrenal Medulla

The inner part of the adrenal gland that produces epinephrine and norepinephrine. **Synonyms:**

Adrenergic Agent

A substance that affects receptors responsive to adrenaline-like neurotransmitters. **Synonyms:**

Adrenergic Agonist

A substance that activates adrenergic receptors. **Synonyms:** Sympathomimetic

Adrenergic Antagonists

Substances that block the effects of adrenaline-like signaling at adrenergic receptors. **Synonyms:**

Adrenergic blockers

Adrenergic Receptor

A cell receptor activated by epinephrine or norepinephrine. **Synonyms:**

Adrenoleukodystrophy

An inherited disorder causing abnormal buildup of very-long-chain fatty acids and progressive nervous-system or adrenal damage. **Synonyms:** ALD

Adult Rickets

Defective bone mineralization in adulthood, usually called osteomalacia. **Synonyms:** Osteomalacia

Adventitia

The outer connective-tissue layer of a blood vessel or hollow organ. **Synonyms:** Tunica adventitia

Adverse Reaction

An unintended, harmful response to a medicine, treatment, or other exposure. **Synonyms:** Adverse drug reaction

Aerobic Exercise

Physical activity that uses sustained oxygen-dependent energy production, such as walking or cycling. **Synonyms:** Cardio exercise

Afferent Pathway

A sensory nerve route carrying information from the body toward the brain or spinal cord. **Synonyms:** Sensory pathway

Afibrinogenemia

A rare inherited or acquired absence of fibrinogen, causing impaired blood clotting. **Synonyms:**

African Trypanosomiasis

A parasitic infection transmitted by tsetse flies and affecting the blood and nervous system. **Synonyms:** African sleeping sickness

Agglutination Test

A laboratory test in which particles visibly clump

when a specific antibody or antigen is present. **Synonyms:**

Agglutinin

An antibody or other substance that causes cells or particles to clump together. **Synonyms:**

AIDS Vaccine

A vaccine designed to prevent HIV infection or reduce its effects; no generally effective licensed vaccine currently exists. **Synonyms:**

Air Pollution

Harmful gases, particles, or biological material contaminating indoor or outdoor air. **Synonyms:**

Air Sac

A cavity or thin-walled space that contains air, such as a pulmonary alveolus or bird air sac. **Synonyms:** Air space

Air Trapping

Retention of air in the lungs because it cannot be fully exhaled, often from airway obstruction. **Synonyms:**

Alanine

An amino acid used in protein synthesis and glucose metabolism. **Synonyms:**

Albumin Clearance

The removal rate of albumin from blood or another body compartment, used in selected physiologic studies. **Synonyms:**

Alveolar Macrophage

An immune cell in the lung air sacs that removes particles, microbes, and cellular debris. **Synonyms:** Dust cell

Alzheimer's

A progressive neurodegenerative disease causing memory loss and decline in thinking and daily function. **Synonyms:** Alzheimer disease

Ambulance

A vehicle equipped to transport and provide emergency medical care to ill or injured people. **Synonyms:**

Amebic Colitis

Inflammation of the colon caused by infection with *Entamoeba histolytica*. **Synonyms:** Amoebic colitis

Amnioscope

An instrument used to inspect amniotic fluid and the membranes through the cervix. **Synonyms:**

Amyloid Protein

A normally soluble protein that has misfolded into insoluble fibrils and may accumulate in tissues. **Synonyms:** Amyloid

Anaerobic

Able to live, grow, or function without oxygen. **Synonyms:**

Anaerobic Bacteria

Bacteria that grow without oxygen; some are harmed by oxygen. **Synonyms:**

Anal Carcinoma

Cancer arising in the anus or anal canal. **Synonyms:** Anal cancer

Anal Mucositis

Inflammation and ulceration of the anal mucous membrane, often after radiation or chemotherapy. **Synonyms:**

Anal Necrosis

Death of tissue in or around the anus. **Synonyms:**

Anal Pain

Pain felt in or around the anus. **Synonyms:** Proctalgia

Angiogenesis Inhibitor

A treatment or substance that prevents or slows formation of new blood vessels. **Synonyms:** Antiangiogenic agent

Antinuclear Autoantibody

An autoantibody directed against components of a cell nucleus. **Synonyms:** ANA

Antisepsis

Use of chemical methods to reduce or eliminate harmful microorganisms on living tissue. **Synonyms:**

Antiserum

Blood serum containing antibodies against a particular antigen or toxin. **Synonyms:**

Antisocial Personality

A persistent pattern of disregard for other people's rights, social rules, and responsibilities. **Synonyms:** Antisocial personality disorder

Antitoxin

An antibody or preparation that neutralizes a toxin. **Synonyms:**

Alpha-Fetoprotein

A protein produced mainly by the fetal liver; maternal or blood levels can help assess certain fetal and adult conditions. **Synonyms:** AFP

Alpha-Globulin

A group of blood proteins that includes transport and acute-phase proteins. **Synonyms:**

Alpha-Synuclein

A neuronal protein that can accumulate abnormally in disorders such as Parkinson disease and Lewy-body dementia. **Synonyms:**

Alpha-Thalassemia

An inherited disorder in which reduced alpha-globin production impairs hemoglobin formation. **Synonyms:**

Amniotic Band

A strand of amniotic tissue that can entangle or constrict developing fetal body parts. **Synonyms:** Amniotic band sequence

Aortic Body

A small group of chemoreceptor cells near the aortic arch that helps sense blood oxygen and carbon dioxide. **Synonyms:**

Aortic Injury

Damage to the aorta, often caused by severe trauma or a medical procedure. **Synonyms:**

Aortic Rupture

A life-threatening tear through the wall of the aorta causing internal bleeding. **Synonyms:**

Anaplastic Astrocytoma

A high-grade astrocytic brain tumor with rapid growth and infiltrative behavior. **Synonyms:**

Anaplastic Ependymoma

An aggressive, high-grade tumor arising from cells lining the brain's ventricles or spinal canal. **Synonyms:**

Anatomical Conduit

A natural or surgically created passage that carries fluid, air, tissue, or another structure. **Synonyms:**

Anatomical Orifice

A natural opening into or through a body structure. **Synonyms:** Body opening

Anatomist

A specialist who studies the structure of the body. **Synonyms:**

Androgen Excess

Abnormally high androgen activity or concentration, which can cause acne, excess hair, or menstrual changes. **Synonyms:** Hyperandrogenism

Androgen Insufficiency

Inadequate androgen production or activity for a person's physiologic needs. **Synonyms:** Androgen deficiency

Androgen Receptor

A cellular protein that binds testosterone or related hormones and mediates their effects. **Synonyms:**

Androgen Suppression

Reduction of androgen production or action, used in selected hormone-sensitive conditions. **Synonyms:** Androgen deprivation

Anesthesiologist

A physician who provides anesthesia and manages pain and vital functions during procedures. **Synonyms:**

Anesthesiology

The medical specialty concerned with anesthesia, perioperative care, and pain management. **Synonyms:**

Anesthetic

A medicine or technique that causes loss of sensation, with or without loss of consciousness. **Synonyms:**

Angiocardiology

Imaging of the heart and major vessels after injection of contrast material. **Synonyms:**

Angiofibroma

A benign tumor composed of blood vessels and fibrous tissue. **Synonyms:**

Angioid Streak

Breaks in a tissue layer beneath the retina that appear as irregular dark lines. **Synonyms:**

Ankle

The joint connecting the lower leg to the foot. **Synonyms:**

Ankyloglossia

An abnormally short or tight lingual frenulum that restricts tongue movement. **Synonyms:** Tongue-tie

Ankyrin

A structural protein that links membrane proteins to the cell's internal cytoskeleton. **Synonyms:**

Anomia

Difficulty retrieving or naming familiar words. **Synonyms:**

Anorectal Fistula

An abnormal channel connecting the anus or rectum with nearby skin or another organ. **Synonyms:** Anal fistula

Antigen Receptor

A receptor on an immune cell that specifically recognizes an antigen. **Synonyms:**

Antiplatelet Agent

A medicine that reduces platelet clumping and lowers the risk of arterial clots. **Synonyms:** Antiplatelet medicine

Aortic Disease

Any disorder affecting the aorta, including aneurysm, dissection, narrowing, or inflammation. **Synonyms:**

Arthroscope

A small illuminated instrument used to view the inside of a joint. **Synonyms:**

Articular Ligament

A band of connective tissue that stabilizes a joint by connecting bone to bone. **Synonyms:** Joint ligament

Artificial Heart

A mechanical device that replaces or supports the pumping function of the heart. **Synonyms:**

Artificial Skin

A biological or synthetic material used to cover wounds and support skin regeneration. **Synonyms:** Skin substitute

Ascitic Fluid

Excess fluid collected in the abdominal cavity. **Synonyms:** Ascites

Asphyxia Neonatorum

Failure of a newborn to establish adequate breathing at or shortly after birth. **Synonyms:** Birth asphyxia

Aspirate (Substance)

Material withdrawn from a body cavity, lesion, or airway by suction. **Synonyms:** Aspirated material

Assisted Circulation

Mechanical or procedural support used to maintain blood flow when the heart cannot pump adequately. **Synonyms:** Mechanical circulatory support

Association Cortex

Cerebral cortex involved in integrating information and supporting memory, language, judgment, and complex behavior. **Synonyms:**

Astringent

A substance that contracts tissue and reduces secretions or minor bleeding. **Synonyms:**

Astrocyte

A star-shaped glial cell that supports neurons, maintains the blood-brain barrier, and regulates the nervous-system environment. **Synonyms:**

Asymptomatic

Having a disease or abnormality without noticeable symptoms. **Synonyms:**

Ataxia Telangiectasia

An inherited disorder causing progressive coordination problems, visible small blood vessels, and immune deficiency. **Synonyms:** A-T

Atrial Arrhythmia

An abnormal heart rhythm originating in the atria. **Synonyms:**

Atrial Standstill

Absence of normal electrical and mechanical activity in the atria. **Synonyms:**

Atrial Thrombosis

Formation of a blood clot within an atrium of the heart. **Synonyms:**

Atrioventricular Bundle

Conducting fibers that carry electrical impulses from the atrioventricular node to the ventricles. **Synonyms:** Bundle of His

Attenuated Vaccine

A vaccine made with a weakened microorganism that retains the ability to stimulate immunity. **Synonyms:** Live attenuated vaccine

Atypical Lymphocyte

A lymphocyte with an unusual appearance, often reflecting immune activation or infection. **Synonyms:**

Audiology

The science and clinical evaluation of hearing, balance, and related disorders. **Synonyms:**

Auditory Area

A region of the cerebral cortex that processes sound information. **Synonyms:** Auditory cortex

Auditory Fatigue

Temporary reduction in hearing sensitivity or listening performance after prolonged or intense sound exposure. **Synonyms:**

Auditory Ossicle

One of the three small middle-ear bones that transmit sound vibrations. **Synonyms:** Ear ossicle

Auditory Pathway

The neural route carrying sound information from the inner ear to the auditory cortex. **Synonyms:**

Auditory Threshold

The quietest sound intensity a person can detect at a specified frequency. **Synonyms:** Hearing threshold

Autism

A neurodevelopmental condition involving persistent differences in social communication and restricted or repetitive patterns of behavior. **Synonyms:** Autism spectrum disorder

Autoantigen

A normal body molecule mistakenly targeted by the immune system in an autoimmune disease. **Synonyms:**

Autonomic Disorder

A disorder affecting involuntary functions such as blood pressure, heart rate, sweating, digestion, or bladder control. **Synonyms:** Dysautonomia

Autonomic Ganglion

A cluster of nerve-cell bodies in the autonomic nervous system that relays signals to organs. **Synonyms:**

Autoradiography

An imaging technique that uses radioactive labels to show the location of substances in tissue. **Synonyms:**

Autosome

Any chromosome other than a sex chromosome. **Synonyms:** Non-sex chromosome

Awareness

Conscious recognition of oneself, surroundings, thoughts, or sensations. **Synonyms:** Consciousness

Axon Fasciculation

Bundling of developing axons into organized nerve

tracts. **Synonyms:**

Axon Guidance

The developmental process directing growing axons toward their correct targets. **Synonyms:**

Axon Hillock

The region of a neuron where action potentials are usually initiated. **Synonyms:**

Axonal Transport

Movement of proteins, organelles, and other materials along an axon. **Synonyms:**

Axoneme

The internal microtubule-based structure of a cilium or flagellum. **Synonyms:**

Addictive Behavior

Repeated substance use or rewarding behavior that becomes difficult to control despite harmful consequences. **Synonyms:**

AIDS-Associated Nephropathy

Kidney injury associated with advanced HIV infection. **Synonyms:** HIV-associated nephropathy

Akinetic Mutism

A state of profound lack of movement and speech despite wakefulness and preserved basic alertness. **Synonyms:**

Allergic Reaction

An immune response to an otherwise harmless substance, ranging from mild symptoms to anaphylaxis. **Synonyms:** Allergy

Amnioinfusion

Infusion of sterile fluid into the amniotic sac, often to reduce umbilical-cord compression during labor. **Synonyms:**

Amyloid Neuropathy

Peripheral nerve damage caused by deposition of abnormal amyloid protein. **Synonyms:**

Angiogenesis Inhibition

Suppression of new blood-vessel formation, a strategy used in some cancer treatments. **Synonyms:** Antiangiogenic therapy

Ankle Fracture

A break in one or more bones forming the ankle joint. **Synonyms:**

Anterior Chamber

The fluid-filled space between the cornea and iris of the eye. **Synonyms:**

Anti-Anxiety Agents

Medicines or other treatments used to reduce clinically significant anxiety. **Synonyms:** Anxiolytics

Antibody Therapy

Treatment using antibodies to block, activate, or target a specific molecule or cell. **Synonyms:** Immunotherapy

Anticonvulsant

A medicine used to prevent or control seizures; some are also used for nerve pain or mood disorders. **Synonyms:** Antiseizure medicine

Antigen Presentation

Display of antigen fragments on cell surfaces for recognition by T cells. **Synonyms:**

Antihypertensive Agent

A medicine or treatment that lowers elevated blood pressure. **Synonyms:** Blood-pressure medicine

Antipsychotic Agent

A medicine used to treat psychosis and, in some cases, bipolar disorder or severe behavioral symptoms. **Synonyms:** Antipsychotic

Apathy

Reduced motivation, emotional responsiveness, or interest in activities. **Synonyms:**

Appetite

The desire or drive to eat. **Synonyms:**

Arthropathy

Any disease or disorder affecting a joint. **Synonyms:** Joint disease

Artificial Insemination

Placement of sperm into the reproductive tract by a medical procedure to assist conception. **Synonyms:** Intrauterine insemination

Aseptic Meningitis

Inflammation of the meninges without evidence of typical bacterial meningitis, often caused by viruses or medicines. **Synonyms:**

Autoimmune Thyroiditis

Immune-mediated inflammation and damage of the thyroid gland. **Synonyms:** Hashimoto thyroiditis

Axial Skeleton

The bones of the head, neck, and trunk, including the skull, spine, ribs, and sternum. **Synonyms:**

Axillary Lymphadenectomy

Surgical removal of lymph nodes from the armpit. **Synonyms:** Axillary node dissection

Abandoned Lead

A disconnected or no-longer-used wire from an implanted cardiac or other electrical device that remains in the body. **Synonyms:** Retained device lead

Abdominal Fluid

Fluid within the abdominal cavity; excessive accumulation is called ascites. **Synonyms:** Peritoneal fluid

Abdominal Neoplasm

An abnormal tissue growth arising in an abdominal organ or structure; it may be benign or malignant. **Synonyms:** Abdominal tumor

Abdominoperineal Resection

Surgery removing the rectum and anus, usually with a permanent colostomy. **Synonyms:** APR

Ablepharon

A congenital absence or severe underdevelopment of an eyelid. **Synonyms:**

Abnormal

Not typical of healthy structure, function, or measurement. **Synonyms:**

Abnormal Color

A color change in skin, mucosa, secretions, or another tissue that differs from the expected appearance. **Synonyms:** Discoloration

Abnormal Fissure

An unusual crack, groove, or cleft in a tissue or organ. **Synonyms:**

Abnormal Virilization

Development of masculinizing physical features in a person whose expected sex development does not include them, often from excess androgens. **Synonyms:** Virilization

Abnormality

A structural, functional, or developmental difference from the usual state. **Synonyms:** Anomaly

Abomasum

The fourth and glandular compartment of the stomach in ruminant animals. **Synonyms:** True stomach

Abrin

A highly toxic plant protein from rosary pea seeds that inhibits cellular protein synthesis. **Synonyms:**

Absence Epilepsy

A generalized epilepsy characterized by brief episodes of impaired awareness, often with staring and subtle movements. **Synonyms:** Absence seizures

Absent Reflex

Failure of an expected tendon or neurologic reflex to occur when stimulated. **Synonyms:**

Absenteeism

Repeated absence from work, school, or another expected activity, sometimes related to illness or disability. **Synonyms:**

Abstract Idea

A nonconcrete concept formed through thought rather than direct sensory experience. **Synonyms:**

Acalculous Cholecystitis

Inflammation of the gallbladder without gallstones, often occurring during severe illness or after surgery. **Synonyms:**

Acanthocyte

An abnormally shaped red blood cell with irregular thorn-like projections. **Synonyms:** Spur cell

Acantholysis

Loss of attachment between epidermal cells, causing cells to separate. **Synonyms:**

Acanthoma

A benign growth composed of thickened squamous epidermal cells. **Synonyms:**

Acatalasia

A rare inherited deficiency of catalase, an enzyme that breaks down hydrogen peroxide. **Synonyms:** Catalase deficiency

Accelerated Growth

Growth occurring faster than expected for a person's age, tissue, or developmental stage. **Synonyms:**

Accelerometry

Measurement of movement or acceleration, often used to assess activity, gait, or sleep. **Synonyms:**

Accessory Nerve

The eleventh cranial nerve, which controls several neck and shoulder muscles. **Synonyms:** Cranial nerve XI; spinal accessory nerve

Accident Proneness

A tendency to experience repeated accidents, whether from environmental, behavioral, or health-related factors. **Synonyms:**

Accidental Death

Death resulting from an unintentional injury or event. **Synonyms:** Unintentional death

Accidental Fall

An unintentional descent to a lower level or the ground. **Synonyms:** Fall injury

Acclimatization

Physiological adjustment to a new environment, such as altitude, heat, or cold. **Synonyms:**

Accreditation

Formal recognition that a health-care organization, program, or laboratory meets defined quality standards. **Synonyms:**

Acephalostomia

A congenital anomaly involving absence of the head and mouth. **Synonyms:**

Achondrogenesis

A group of severe inherited disorders in which cartilage and bone development are profoundly impaired. **Synonyms:**

Achromatopsia

An inherited disorder causing absent or greatly reduced color vision, often with light sensitivity and poor visual acuity. **Synonyms:** Complete color blindness

Acid Phosphatase

An enzyme that works best in acidic conditions and is found in several tissues, including prostate and

blood cells. **Synonyms:** ACP

Acinar Cell

A secretory cell arranged in a cluster, such as a pancreatic cell that releases digestive enzymes. **Synonyms:**

Acne Keloid

A chronic inflammatory condition causing firm scar-like bumps around hair follicles, usually on the back of the neck. **Synonyms:** Acne keloidalis nuchae

Acquired Feminization

Development of typically female secondary sexual characteristics after birth in a person not expected to develop them, often from hormonal change. **Synonyms:**

Acquisition Duration

The time required to obtain or record a measurement, image, or physiologic signal. **Synonyms:**

Acrodermatitis

Inflammation affecting the skin of the hands, feet, or other distal body regions. **Synonyms:**

Acro-Osteolysis

Resorption or destruction of the ends of the fingers or toes. **Synonyms:**

Acrosin

An enzyme in sperm that helps it penetrate the egg's surrounding layers. **Synonyms:**

Acrosome

A cap-like structure on the head of a sperm cell containing enzymes needed for fertilization. **Synonyms:**

Acrosome Reaction

Release of acrosomal enzymes that enables a sperm cell to penetrate the egg's outer layers. **Synonyms:**

Actigraphy

Monitoring of movement over time to estimate sleep-

wake patterns and activity. **Synonyms:** Actigraphic monitoring

Actin Myofilament

A thin muscle filament made mainly of actin that interacts with myosin during contraction. **Synonyms:** Thin filament

Actin-Binding Protein

A protein that regulates, anchors, or cross-links actin filaments. **Synonyms:**

Acting Out

Expressing emotional conflict or distress through behavior rather than words. **Synonyms:**

Acute Disease

A condition that begins suddenly and generally lasts a limited time. **Synonyms:** Acute illness

Acute Onset Pain

Pain that begins suddenly, often over seconds, minutes, or hours. **Synonyms:** Sudden-onset pain

A-a Gradient

The difference between alveolar and arterial oxygen partial pressure. It helps assess gas exchange; an increased value suggests ventilation-perfusion mismatch, shunt, or impaired diffusion.

Synonyms:

A1c

A measure of glycated hemoglobin that estimates average blood glucose over the previous two to three months. It is used to diagnose and monitor diabetes, but some anemias and hemoglobin disorders can affect the result.

Synonyms:

AAA Repair

Surgical or endovascular treatment of an abdominal aortic aneurysm to prevent rupture or treat a rupture.

Synonyms:

Abasia

Inability to walk despite preserved strength and the ability to move the legs in other circumstances. It usually reflects a neurologic or functional gait disorder rather than paralysis.

Synonyms:

ABCDE Assessment

A systematic emergency assessment of airway, breathing, circulation, disability, and exposure. Life-threatening abnormalities are treated as they are identified, with repeated reassessment.

Synonyms:

ABCDE Rule for Melanoma

A screening mnemonic for suspicious pigmented lesions: asymmetry, border irregularity, color variation, diameter greater than about 6 mm, and evolution. It does not diagnose melanoma; suspicious lesions require clinical assessment.

Synonyms:

Abdomen

The body region between the diaphragm and pelvis. It contains most digestive organs, the kidneys, spleen, pancreas, and major blood vessels and is described clinically by four quadrants or nine regions.

Synonyms:

Abdominal Abscess

A localized collection of pus within the abdomen, usually caused by bacterial infection, inflammation, surgery, or organ perforation. It may cause fever and abdominal pain and often requires antibiotics and drainage.

Synonyms:

Abdominal Aorta

The portion of the aorta below the diaphragm that extends to its bifurcation into the common iliac arteries. It supplies the abdominal organs, pelvic organs, and lower limbs through its branches.

Synonyms:

Abdominal Aortic Aneurysm

A localized enlargement of the abdominal aorta, usually defined as an aortic diameter of at least 3 cm or more than 50 percent above normal. Enlargement can progress to rupture.

Synonyms:

Abdominal Aortic Aneurysm Screening

Ultrasound examination used to detect an abdominal aortic aneurysm before symptoms occur. Screening recommendations depend on age, sex, smoking history, and clinical risk; follow-up intervals depend on aneurysm size.

Synonyms:

Abdominal Aortic Ultrasound

Ultrasound imaging of the abdominal aorta used to detect or monitor an abdominal aortic aneurysm.

Synonyms:

Abdominal Bloating

A sensation of fullness or visible enlargement of the abdomen, commonly caused by intestinal gas, constipation, food intolerance, or functional gastrointestinal disorders. Persistent or severe bloating may require evaluation for organic disease.

Synonyms:

Abdominal Bruit

An abnormal blowing or whooshing sound heard over the abdomen with a stethoscope, usually caused by turbulent blood flow through a narrowed or enlarged artery. It may occur with renal-artery stenosis or an abdominal aortic aneurysm. Further assessment depends on symptoms and vascular risk factors.

Synonyms:

Abdominal Cavity

The cavity between the diaphragm and pelvis containing the stomach, liver, gallbladder, spleen, pancreas, kidneys, and intestines.

Synonyms:

Abdominal Circumference

The circumference of the fetal abdomen measured at a standardized level that includes the stomach, portal sinus, and spine. It is used with other ultrasound measurements to estimate fetal size and assess growth.

Synonyms:

Abdominal Colic

Cramping abdominal pain caused by contractions or obstruction of a hollow organ, such as the intestine, ureter, or bile duct. Pain often comes in waves and may be accompanied by nausea, vomiting, sweating, or altered bowel or urinary function. Severe or persistent pain requires prompt medical assessment.

Synonyms:

Abdominal Compartment Syndrome

Condition defined by sustained intra-abdominal pressure greater than twenty millimeters of mercury associated with new organ dysfunction. Causes include massive ascites, bowel distension from obstruction or ileus, hemorrhage, and post-surgical conditions particularly after large abdominal wall hernia repairs.

Synonyms:

Abdominal CT

Computed tomography of the abdomen used to evaluate selected causes of abdominal pain, trauma, bowel obstruction, inflammation, bleeding, and masses. The protocol and use of contrast depend on the suspected condition and the patient's clinical status.

Synonyms:

Abdominal Distention

Visible or subjective enlargement, tightness, or fullness of the abdomen caused by gas, fluid, stool, pregnancy, organ enlargement, mass, or bowel obstruction. Acute distention with pain, vomiting, obstipation, fever, haemodynamic instability, or peritoneal signs requires urgent evaluation.

Synonyms:

Abdominal Girth

The circumference of the abdomen measured at a standardized level. It is used to monitor abdominal distention, fetal growth, obesity, ascites, and changes in intra-abdominal volume.

Synonyms:

Abdominal Mass

A palpable or imaging-detected abnormal collection, enlargement, or lesion within the abdomen. Causes include distended bowel or bladder, organ enlargement, hernia, inflammatory collection, benign tumour, and malignancy; assessment depends on location, mobility, tenderness, systemic features, and appropriate imaging.

Synonyms:

Abdominal Pain

Discomfort within the abdomen classified as visceral (dull, midline, poorly localized), parietal (sharp, well localized, worsened by movement), or referred from a distant source.

Synonyms:

Abdominal Pregnancy

An ectopic pregnancy implanted in the peritoneal cavity rather than the uterus, fallopian tubes, or ovaries. It is rare and can cause severe internal bleeding. Diagnosis requires specialist imaging and management.

Synonyms:

Abdominal Radiography

Plain projectional X-ray imaging of the abdomen, sometimes obtained in supine, erect, or decubitus positions.

Synonyms:

Abdominal Reflex

Contraction of the abdominal muscles after stimulation of the abdominal skin. An absent or asymmetric reflex may indicate neurologic disease, although it can be absent normally in some people.

Synonyms:

Abdominal Rigidity

Involuntary tensing of the abdominal wall, usually caused by irritation of the peritoneum. It may occur with peritonitis, perforation, severe infection, or intra-abdominal bleeding and requires clinical assessment.

Synonyms:

Abdominal Swelling

Visible or felt enlargement of the abdomen caused by gas, constipation, pregnancy, fluid accumulation, organ enlargement, mass, or abdominal-wall changes. Persistent, progressive, painful, or sudden swelling—especially with vomiting, fever, bleeding, or inability to pass stool or gas—requires medical evaluation.

Synonyms:

Abdominal Wall

The layered muscular, fascial, and skin-covered boundary surrounding the abdominal cavity. It supports and protects abdominal organs and helps with posture, breathing, coughing, and straining. Weakness or defects may produce abdominal or incisional hernias; trauma, infection, and tumors may also affect the wall.

Synonyms:

Abdominal Wall Hernia

Protrusion of abdominal tissue through a weak area or opening in the abdominal wall. Common types include inguinal, umbilical, femoral, and incisional hernias. A painful, firm, or non-reducible bulge with vomiting or abdominal distension may indicate incarceration or strangulation and requires urgent assessment.

Synonyms:

Abdominal X-Ray

A plain radiograph of the abdomen used to assess selected causes of pain, obstruction, perforation, foreign bodies, or urinary stones. It has limited sensitivity for many abdominal disorders.

Synonyms:

Abducens Nerve

The sixth cranial nerve, a motor nerve that supplies the lateral rectus muscle and abducts the eye. Lesion of the nerve causes failure of lateral gaze and horizontal diplopia.

Synonyms:

Abduction

Movement of a limb or other body part away from the median plane of the body.

Synonyms:

Abetalipoproteinemia

A rare inherited disorder in which the body cannot produce normal apolipoprotein-B-containing lipoproteins. It causes fat malabsorption, deficiencies of fat-soluble vitamins, abnormal red cells, and possible neurologic or retinal disease.

Synonyms:

Abfraction

Loss of tooth structure near the gum line, possibly related to mechanical stress. It may cause tooth sensitivity and may require dental treatment.

Synonyms:

ABI

The ankle-brachial index, calculated by dividing ankle systolic blood pressure by arm systolic blood pressure. A low value suggests peripheral arterial disease.

Synonyms:

Abnormal Uterine Bleeding

Uterine bleeding that is abnormal in frequency, regularity, duration, or volume, occurring outside of normal menstruation or in women who are not pregnant.

Synonyms:

ABO Blood Group

A blood classification based on whether red blood cells carry A antigen, B antigen, both, or neither. The four groups are A, B, AB, and O.

Synonyms:

ABO Blood Typing

A laboratory test that determines a person's ABO and Rh blood groups. It is performed before transfusion, transplantation, and some obstetric procedures.

Synonyms:

ABO Incompatibility

An immune reaction caused by transfusion or pregnancy involving incompatible A, B, or O blood-group antigens. It can cause acute hemolysis, transfusion reactions, or hemolytic disease of the newborn. See also Hemolytic Disease of the Newborn.

Synonyms:

Abortion

The deliberate termination of a pregnancy by medication or a procedure. The method and clinical definition of viability vary by jurisdiction and circumstance.

Synonyms:

Abrasion

Superficial loss of tissue caused by friction or scraping. In dentistry, it commonly refers to mechanical loss of tooth structure from external forces.

Synonyms:

Abruptio Placentae

Premature separation of the placenta from the uterine wall before delivery. It can cause vaginal bleeding, abdominal pain, uterine tenderness, fetal distress, and maternal shock and requires urgent obstetric assessment.

Synonyms:

Abscess

A localized collection of pus within a tissue, organ, or cavity, typically caused by bacterial infection. Abscesses form when bacteria (most commonly *Staphylococcus aureus* including MRSA) invade tissue, triggering an intense inflammatory response with neutrophil accumulation and tissue necrosis.

Synonyms:

Abscessed Tooth

A collection of pus caused by bacterial infection of the tooth or surrounding tissues, usually arising from untreated dental decay, a cracked tooth, or periodontal disease. Pain, facial swelling, fever, and sensitivity may occur. Dental treatment and drainage are usually required; swelling that affects swallowing or breathing is an emergency.

Synonyms:

Absence Seizure

A brief generalized seizure causing sudden impaired awareness and behavioral arrest, usually followed by rapid recovery. Electroencephalography commonly shows generalized three-hertz spike-and-wave activity.

Synonyms:

Absent Breath Sounds

Lack of audible air movement over part or all of a lung. Causes include pneumothorax, pleural effusion, or airway obstruction; sudden onset requires urgent assessment.

Synonyms:

Absolute Neutrophil Count

The number of circulating neutrophils calculated from the white-cell count and differential. A low ANC indicates neutropenia; severe neutropenia greatly increases the risk of serious infection.

Synonyms:

Absorption

The process by which a drug enters the bloodstream from its site of administration, such as the digestive tract, skin, or muscle.

Synonyms:

Abusive Head Trauma

Injury to an infant or young child caused by inflicted blunt impact, violent shaking, or both. Findings may include subdural hemorrhage, retinal hemorrhage, encephalopathy, fractures, or other injuries; diagnosis requires careful multidisciplinary assessment because no single finding is diagnostic.

Synonyms:

Acalculia

An acquired inability to perform previously learned numerical operations or understand numerical relationships, commonly associated with dominant parietal or other cortical dysfunction.

Synonyms:

Acalculous Cholecystitis

Acute inflammation of the gallbladder without gallstones, usually occurring in critically ill, postoperative, traumatised, or fasting patients. Presents with fever, right-upper-quadrant pain, leukocytosis, or unexplained sepsis; diagnosis is supported by ultrasound or cholescintigraphy.

Synonyms:

Acanthamoeba Keratitis

A rare but potentially sight-threatening infection of the cornea caused by the free-living amoeba *Acanthamoeba*. It is strongly associated with contaminated contact-lens water or poor lens hygiene and may cause severe eye pain, redness, photophobia, blurred vision, and a ring-shaped corneal infiltrate. Prompt ophthalmic assessment and prolonged anti-amoebic treatment are required.

Synonyms:

Acanthocytes (Spur Cells)

Abnormal red blood cells with irregular, spiky, thorn-like membrane projections of varying length and width. Caused by alterations in membrane lipid composition (increased cholesterol-to-phospholipid ratio).

Synonyms: Spur Cells

Acanthosis Nigricans

Hyperpigmented, velvety, thickened plaques typically in skin flexures (neck, axillae, groin) and often associated with insulin resistance, obesity, type 2 diabetes mellitus, and metabolic syndrome.

Synonyms:

Acapnia

An abnormally low partial pressure of carbon dioxide in arterial blood, usually caused by excessive alveolar ventilation. It may accompany respiratory alkalosis, light-headedness, or paresthesias.

Synonyms:

Acardia

Absence or severe malformation of the fetal heart, usually occurring in the setting of a rare twin perfusion sequence. The affected fetus cannot sustain independent circulation.

Synonyms:

Acariasis

Infestation or disease caused by mites or ticks. Clinical manifestations vary with the organism and may include dermatitis, pruritus, tissue invasion, or transmission of an associated pathogen.

Synonyms:

Access Needle (Interventional)

A needle used to enter a vessel, cavity, or tissue under clinical or image guidance for sampling, drainage, infusion, or placement of another device.

Synonyms: Interventional

Accessory Nerve

The eleventh cranial nerve, formed by cranial and spinal roots. Its spinal component supplies the sternocleidomastoid and trapezius muscles; injury can cause shoulder droop and weak head rotation.

Synonyms:

ACE Inhibitor

A drug that inhibits angiotensin-converting enzyme, reducing formation of angiotensin II and degradation of bradykinin.

Synonyms:

Acetabular Labrum

A fibrocartilaginous rim attached to the margin of the acetabulum that deepens the hip socket, helps maintain a fluid seal, and contributes to hip-joint stability.

Synonyms:

Acetabular Notch

The indentation in the inferior margin of the acetabulum, bridged by the transverse ligament of the acetabulum and forming a passage for structures entering the hip joint.

Synonyms:

Acetabuloplasty

A surgical procedure that reshapes or augments the acetabular rim or socket to improve coverage of the femoral head in selected structural hip disorders.

Synonyms:

Acetabulum

The cup-shaped socket of the hip formed by the fused ilium, ischium, and pubis. It articulates with the femoral head and is deepened by the acetabular labrum.

Synonyms:

Acetaminophen (Paracetamol) Toxicity

Liver injury caused by an excessive dose of acetaminophen. Its toxic metabolite depletes glutathione and causes hepatic necrosis. N-acetylcysteine is the antidote and should be given promptly when toxicity is suspected.

Synonyms: Paracetamol

Acetyl-CoA Carboxylase

An enzyme that converts acetyl-CoA to malonyl-CoA, the first committed step in fatty-acid synthesis. Its activity is regulated by cellular energy status and hormones.

Synonyms:

Acetyl-Coenzyme A

A central metabolic intermediate consisting of an acetyl group linked to coenzyme A by a high-energy thioester bond. It enters the citric acid cycle and provides carbon for fatty-acid, cholesterol, and ketone-body synthesis.

Synonyms:

Acetylcholine

A major neurotransmitter in both the central and peripheral nervous systems. In the peripheral nervous system, it is released at the neuromuscular junction (nicotinic receptors) to excite skeletal muscle, at all autonomic ganglia (nicotinic receptors), and at parasympathetic postganglionic terminals (muscarinic receptors).

Synonyms:

Achalasia

A disorder in which the lower esophageal sphincter fails to relax normally and esophageal peristalsis is impaired, causing difficulty swallowing and regurgitation.

Synonyms:

Achenbach's syndrome

A benign condition of recurrent, painful, spontaneous hematoma formation in the pulp of a finger or thumb, typically affecting middle-aged women. It presents with sudden onset of throbbing pain and blue-black discoloration of the fingertip, resolving spontaneously over one to two weeks without treatment.

Synonyms:

Achilles Tendinopathy

Pain and structural disorder of the Achilles tendon, usually caused by repeated loading. It causes posterior heel pain and stiffness and is managed with activity modification, rehabilitation, and treatment of contributing factors.

Synonyms:

Achilles Tendon (Calcaneal Tendon)

The thickest and strongest tendon in the human body, connecting the gastrocnemius and soleus (triceps surae) muscles to the calcaneus (heel bone). It plays a crucial role in plantarflexion of the foot, enabling walking, running, and jumping.

Synonyms: Calcaneal Tendon

Achilles Tendon Rupture

A partial or complete tear of the Achilles tendon,

usually caused by sudden force. It causes posterior ankle pain, weakness in plantar flexion, and difficulty walking or standing on tiptoe.

Synonyms:

Achilles Tendonitis

A commonly used term for pain and inflammation or degeneration of the Achilles tendon. It may affect the tendon at its heel insertion or its mid-portion and is often related to repetitive loading.

Synonyms:

Achlorhydria

Absence of hydrochloric acid in gastric secretions. It may result from autoimmune gastritis, long-term acid suppression, or loss of acid-producing stomach cells.

Synonyms:

Achondroplasia

Autosomal dominant skeletal dysplasia (FGFR3 gene). Most common form of dwarfism. Features: short limbs, macrocephaly, frontal bossing, trident hand, spinal stenosis. Homozygous form lethal. Normal intelligence.

Synonyms:

Acid

A substance that donates hydrogen ions or accepts an electron pair. In water, an acid increases hydrogen-ion concentration and lowers pH.

Synonyms:

Acid Base Balance

The physiological regulation of hydrogen ion concentration in body fluids, maintaining arterial pH between 7.35 and 7.45.

Synonyms:

Acid Reflux

Backward flow of stomach contents into the esophagus, which may cause heartburn, regurgitation, or irritation.

Synonyms:

Acid-Base Analysis

Evaluation of blood pH, bicarbonate, and carbon dioxide to identify metabolic or respiratory disturbances, including those caused by poisoning.

Synonyms:

Acid-Base Disorder

Disturbance of the body's acid-base balance, classified by primary disturbance and compensation. Respiratory acidosis: hypoventilation, high PaCO₂, low pH. Respiratory alkalosis: hyperventilation, low PaCO₂, high pH.

Synonyms:

Acid-Fast Bacillus Smear

Microscopic examination of a specimen, often sputum, for acid-fast organisms using a special stain. A positive result supports mycobacterial infection but does not by itself identify the species or establish drug susceptibility; culture or molecular testing is also required.

Synonyms:

Acidosis

An acid-base disturbance in which the concentration of hydrogen ions increases, tending to lower arterial blood pH below 7.35.

Synonyms:

Acinetobacter baumannii resistance

Acinetobacter baumannii is a gram-negative coccobacillus that has emerged as a significant cause of healthcare-associated infections, particularly in intensive care units. The organism has intrinsic and acquired resistance mechanisms, including beta-lactamases, efflux pumps, and porin mutations.

Synonyms:

ACL Injuries

Sprains or tears of the anterior cruciate ligament of the knee, usually caused by twisting, sudden deceleration, or contact trauma. They may cause instability, swelling, and difficulty pivoting; examination and imaging guide management.

Synonyms:

ACL Reconstruction

Surgical reconstruction of the anterior cruciate ligament (ACL) following rupture, one of the most common knee ligament injuries. The ACL is a primary restraint to anterior tibial translation and rotatory instability, and its rupture frequently occurs during non-contact pivoting sports activities (skiing, soccer, basketball).

Synonyms:

Acne

A chronic inflammatory disorder of hair follicles and sebaceous glands. It causes comedones, papules, pustules, or nodules, most often on the face, chest, and back.

Synonyms:

Acne Rosacea Subtypes

Rosacea may present predominantly with facial flushing and persistent redness, papules and pustules, skin thickening, or eye involvement. A person may have more than one pattern.

Synonyms:

Acne Vulgaris

The common form of acne caused by follicular plugging, increased sebum production, microbial activity, and inflammation. It usually affects the face, trunk, and upper arms.

Synonyms:

Acoustic Nerve

The acoustic nerve, more properly called the auditory or vestibulocochlear nerve (cranial nerve VIII), carries hearing and balance information from the inner ear to the brainstem.

Synonyms:

Acoustic Neuroma

A benign, slow-growing tumor of the vestibular portion of the vestibulocochlear nerve. It may cause hearing loss, tinnitus, or balance problems.

Synonyms:

Acoustic Neuroma (Vestibular

Schwannoma)

A usually benign, slow-growing tumor of Schwann cells involving the vestibular portion of cranial nerve VIII. It may cause unilateral sensorineural hearing loss, tinnitus, imbalance, or facial sensory symptoms; MRI of the internal auditory canals is the preferred diagnostic study.

Synonyms: Vestibular Schwannoma

Acoustic Trauma

Acute damage to the auditory system from a brief, intense sound such as an explosion or firearm. It may cause tinnitus, temporary or permanent sensorineural hearing loss, and tympanic or ossicular injury; urgent audiologic assessment is indicated when hearing loss is sudden.

Synonyms:

Acoustic Reflex

An involuntary contraction of the stapedius muscle in response to a loud sound. It can be measured with immittance testing and helps assess the middle-ear muscles, auditory pathways, and facial nerve.

Synonyms: Stapedial reflex; stapedius reflex; middle-ear muscle reflex.

Acquisition Time

The time during which a medical imaging system collects data. The required time depends on the imaging method, body region, protocol, and patient movement.

Synonyms:

Acral lentiginous melanoma

A subtype of melanoma arising on acral skin (palms, soles, or under nails), appearing as a dark, irregularly pigmented patch or plaque. It is more common in people with darker skin tones and often presents at a later stage due to less frequent surveillance of these sites. Prognosis depends on thickness and stage at diagnosis.

Synonyms:

Acrodermatitis Enteropathica

A zinc-deficiency disorder causing periorificial and

acral dermatitis, alopecia, diarrhoea, poor wound healing, and increased susceptibility to infection. It may be inherited from impaired intestinal zinc absorption or acquired through malnutrition, malabsorption, or prolonged parenteral nutrition.

Synonyms:

Acromegaly

Chronic growth hormone (GH) excess in adulthood, typically from a pituitary somatotroph adenoma.

Synonyms:

Acromegaly Complications

Long-term growth-hormone excess may cause diabetes, hypertension, heart disease, sleep apnea, joint disease, nerve compression, visual problems, and other organ complications.

Synonyms:

Acromioclavicular Joint

A plane synovial joint between the acromion of the scapula and the lateral end of the clavicle. It permits gliding movements and is stabilized primarily by the acromioclavicular and coracoclavicular ligaments.

Synonyms:

Acromioclavicular Joint Injuries

Sprains or dislocations of the joint between the acromion and clavicle, usually caused by a fall or direct shoulder impact. Severity ranges from ligament sprain to complete displacement and is assessed clinically and with imaging.

Synonyms:

Acromion

Bony process forming the shoulder's highest point, extending laterally from the scapular spine. Articulates with the clavicle at the acromioclavicular joint and arches over the glenohumeral joint. Attachment for deltoid and trapezius. The subacromial space contains the supraspinatus tendon and subacromial bursa.

Synonyms:

ACTH Stimulation Test

A dynamic test of adrenal cortisol reserve using synthetic adrenocorticotrophic hormone, usually cosyntropin. An inadequate cortisol rise supports adrenal insufficiency, although interpretation depends on timing, assay, recent glucocorticoid exposure, and whether disease is acute or chronic.

Synonyms:

Actinic granuloma

A benign granulomatous skin condition arising on sun-damaged skin, presenting as annular or ring-shaped plaques with central atrophy and an elevated, erythematous border. It is thought to represent a foreign-body reaction to degenerated elastic tissue from chronic ultraviolet exposure.

Synonyms:

Actinic Keratosis

A rough, scaly skin lesion caused by chronic ultraviolet exposure, usually on sun-exposed skin. It can progress to squamous-cell carcinoma, so persistent, thickened, or changing lesions require clinical assessment.

Synonyms:

Actinic Keratosis Management

Actinic keratosis management requires field-directed and lesion-directed therapy. Lesion-directed: cryotherapy (liquid nitrogen, 5 to 10 second freeze-thaw cycle), curettage, electrodesiccation.

Synonyms:

Actinic Purpura

Bruising caused by fragile, sun-damaged skin and connective tissue, usually on the backs of the hands and forearms in older adults. The purple patches may appear after minor trauma and are generally harmless, although medicines such as anticoagulants can worsen them. New, widespread, or unexplained bruising warrants assessment.

Synonyms:

Actinomycetoma

A chronic, progressive granulomatous infection of

the skin and subcutaneous tissue caused by aerobic actinomycetes, characterized by swelling, draining sinuses, and dark granules in the discharge. It primarily affects the feet and is endemic in tropical regions. Diagnosis is by culture and histopathology.

Synonyms:

Actinomycosis

A chronic infection caused by branching, gram-positive anaerobic bacteria of the genus *Actinomyces*, which normally colonize the mouth, gastrointestinal tract, and genital tract. It can form infiltrative masses and draining sinuses containing sulfur granules.

Synonyms:

Action Potential

A rapid, all-or-nothing depolarization of the cell membrane that propagates along excitable membranes (neurons, muscle, some endocrine cells).

Synonyms:

Activated Charcoal

A porous form of carbon that adsorbs some substances in the gastrointestinal tract and can reduce their absorption after selected poisonings. It is not effective for every toxin and can cause aspiration or other complications.

Synonyms:

Activated Partial Thromboplastin Time

A blood test that measures clotting through the intrinsic and common coagulation pathways. It may be prolonged by unfractionated heparin, clotting-factor deficiencies, inhibitors, or some liver and systemic disorders.

Synonyms:

Active Caries

Tooth decay that is continuing to progress. The affected surface is often soft, rough, or chalky and requires dental assessment and management.

Synonyms:

Active Management of Third Stage

A set of measures used after birth to reduce postpartum hemorrhage, usually including a uterotonic medicine, controlled cord traction when appropriate, and assessment of uterine tone and bleeding.

Synonyms:

Active Phase of Labor

The part of the first stage of labor in which the cervix dilates progressively, generally beginning at about 6 cm and continuing to full dilation. Progress varies between individuals.

Synonyms:

Active Site

The specific three-dimensional region of an enzyme where substrate binding and catalysis occur. Formed by amino acid residues that may be distant in primary sequence but brought together by protein folding.

Synonyms:

Active Surveillance

Close, structured monitoring of a cancer or precancerous condition without immediate treatment. It includes scheduled examinations, laboratory tests, imaging, or biopsies, with treatment started if evidence of progression develops.

Synonyms:

Active Transport

Movement of substances across cell membranes against their concentration gradient, requiring energy input, typically from ATP hydrolysis.

Synonyms:

Activities of Daily Living

Routine tasks required for personal care and independent living, including basic activities and more complex instrumental activities. Performance is assessed to describe functional status and support care planning.

Synonyms:

Acute

Beginning suddenly or developing over a short period. The term may describe symptoms, illnesses, or complications.

Synonyms:

Acute Agitation

A state of heightened motor activity, emotional tension, irritability, and impaired behavioral control that may threaten the patient or others. Management begins with de-escalation and assessment for delirium, intoxication, withdrawal, medical illness, and psychosis.

Synonyms:

Acute Alcohol Intoxication

Neurobehavioral and physiologic impairment caused by recent ethanol exposure. Severity varies with concentration, tolerance, co-ingestants, and comorbidity; dangerous effects include respiratory depression, aspiration, hypoglycemia, hypothermia, trauma, and coma.

Synonyms:

Acute Angle-Closure Glaucoma

An ophthalmic emergency in which sudden closure of the anterior-chamber angle causes a rapid rise in intraocular pressure. Severe eye pain, blurred vision, halos, headache, nausea, vomiting, and a red eye may occur; urgent ophthalmic treatment is required to protect vision.

Synonyms:

Acute Aortic Syndrome

A spectrum of life-threatening conditions involving the thoracic aorta, including aortic dissection, intramural hematoma (IMH), and penetrating aortic ulcer (PAU). See acute aortic syndromes.

Synonyms:

Acute Bacterial Rhinosinusitis

Bacterial infection of the paranasal sinuses suspected when symptoms persist without improvement for at least 10 days, become substantially worse after initial improvement, or are severe with

high fever and purulent discharge. Treatment decisions depend on severity, complications, resistance risk, and local guidance.

Synonyms:

Acute blood loss

Rapid loss of circulating blood volume that can cause hypovolemic shock, tissue hypoxia, tachycardia, hypotension, and acute anemia.

Synonyms:

Acute Bronchitis

Acute inflammation of the tracheobronchial tree, usually caused by a viral respiratory infection and characterized by cough, with or without sputum production, lasting up to several weeks.

Synonyms:

Acute Caries

Tooth decay that progresses rapidly, often producing a soft lesion or cavity. Risk is increased by factors such as frequent sugar exposure, reduced saliva, or poor oral hygiene.

Synonyms:

Acute Cholecystitis

Acute inflammation of the gallbladder, most often caused by persistent cystic-duct obstruction by a gallstone. It commonly causes sustained right-upper-quadrant pain, fever, nausea, and a positive Murphy sign; ultrasound and timely antimicrobial and surgical assessment are standard.

Synonyms:

Acute Coronary Syndrome

A clinical spectrum caused by acute myocardial ischemia from plaque disruption, thrombosis, or less commonly coronary spasm. It includes unstable angina, NSTEMI, and STEMI and requires rapid assessment with symptoms, serial ECGs, and cardiac troponin testing.

Synonyms:

Acute Cough

A cough lasting less than three weeks. Common

causes include viral respiratory infection, acute bronchitis, and pneumonia.

Synonyms:

Acute dacryocystitis

Acute infection and inflammation of the lacrimal sac, most commonly caused by obstruction of the nasolacrimal duct leading to stasis and secondary bacterial infection. It presents with painful swelling, redness, and tenderness at the medial canthus with purulent discharge.

Synonyms:

Acute Diarrhea

Passage of loose or watery stools, usually three or more times daily, lasting less than two weeks. Infection, food-related illness, medicines, and other intestinal disorders can cause it. Oral rehydration is important; blood in stool, severe dehydration, persistent vomiting, or severe pain requires prompt assessment.

Synonyms:

Acute Disseminated Encephalomyelitis

An acute, immune-mediated demyelinating disorder, usually occurring days to weeks after an infection and less often after vaccination. It commonly causes encephalopathy with multifocal neurologic deficits, ataxia, or seizures, particularly in children.

Synonyms:

Acute esophageal necrosis

Ischemic necrosis of the esophageal mucosa, most commonly caused by low-flow states such as shock, sepsis, or thromboembolism, presenting with hematemesis and chest pain. Endoscopy shows circumferential black necrotic mucosa, typically in the distal esophagus.

Synonyms:

Acute Exacerbation of Asthma

A progressive increase in dyspnea, cough, wheezing, or chest tightness with reduced expiratory airflow compared with the patient's baseline. Severe attacks may cause exhaustion, silent chest, hypercapnia,

respiratory failure, and need for urgent treatment.

Synonyms:

Acute Fatty Liver of Pregnancy

A rare, potentially life-threatening complication of late pregnancy involving liver dysfunction and microvesicular fat accumulation. It may cause nausea, abdominal pain, jaundice, low glucose, coagulopathy, or organ failure.

Synonyms:

Acute Flaccid Myelitis

A rare but serious inflammatory disorder of the spinal cord, usually affecting the gray matter and causing sudden flaccid limb weakness, reduced reflexes, and sometimes cranial-nerve or respiratory involvement. MRI and cerebrospinal-fluid studies support the diagnosis; urgent neurologic and respiratory monitoring is required.

Synonyms:

Acute Generalized Exanthematous Pustulosis

An acute drug reaction characterised by dozens to thousands of small, sterile, nonfollicular pustules arising on an erythematous base, often with fever and neutrophilia. It usually begins rapidly after exposure to an antibiotic or other medication and resolves after withdrawal of the trigger.

Synonyms:

Acute glomerulonephritis

Acute inflammation of the renal glomeruli causing hematuria, proteinuria, reduced glomerular filtration, edema, and often hypertension.

Synonyms:

Acute Hepatitis

Acute inflammation and injury of hepatocytes, usually developing over days to months and characterized by elevated aminotransferases, with or without jaundice, nausea, right-upper-quadrant discomfort, or constitutional symptoms.

Synonyms:

Acute HIV Syndrome

The acute retroviral syndrome occurring 2-6 weeks after primary HIV infection, corresponding to high-level viremia and immune activation. Presents with fever (most common), lymphadenopathy, pharyngitis, rash (maculopapular, trunk/face), myalgia, arthralgia, headache, nausea, diarrhea, and oral ulcers.

Synonyms:

Acute Hypercapnic Respiratory Failure

Inability to eliminate carbon dioxide, producing elevated arterial PaCO₂ and often respiratory acidemia. Causes include COPD exacerbation, severe asthma, neuromuscular weakness, central respiratory depression, and chest-wall restriction.

Synonyms:

Acute Hypoxemic Respiratory Failure

Inability of the respiratory system to maintain adequate arterial oxygenation, usually manifested by low arterial oxygen or oxygen saturation despite appropriate inspired oxygen. Causes include pneumonia, pulmonary edema, ARDS, atelectasis, and pulmonary embolism.

Synonyms:

Acute Inflammation

A rapid, predominantly non-specific immune response to tissue injury or infection that typically lasts hours to days and involves vascular and cellular reactions. The cardinal signs are redness, heat, swelling, pain, and loss of function, resulting from increased blood flow, vascular permeability, and cellular infiltration.

Synonyms:

Acute Interstitial Nephritis

Inflammatory infiltrate in the renal interstitium and tubules most commonly caused by drug reactions including NSAIDs, antibiotics particularly penicillins and cephalosporins, proton pump inhibitors, and diuretics. Also caused by infections and autoimmune diseases.

Synonyms:

Acute Ischemic Stroke

Sudden neurologic dysfunction caused by focal cerebral, spinal, or retinal ischemia. Emergency evaluation distinguishes hemorrhage from ischemia and determines eligibility for reperfusion therapy while supporting airway, glucose, temperature, and blood pressure management.

Synonyms:

Acute Kidney Injury

A sudden decline in kidney function over hours or days, causing reduced filtration and possible fluid, electrolyte, or acid-base disturbances. Causes include reduced blood flow, direct kidney injury, and urinary obstruction.

Synonyms:

Acute Kidney Injury Staging

A standardized classification based on changes in serum creatinine and urine output. KDIGO stages 1 through 3 quantify the severity of abrupt kidney-function decline and support prognosis, monitoring, and treatment decisions.

Synonyms:

Acute Leukemia

A leukemia characterized by a rapid onset, clonal proliferation of immature blast cells (>20% of bone marrow cells), and rapid progression without treatment. Subtypes: acute lymphoblastic leukemia (ALL, B-cell or T-cell, most common childhood cancer, peak age 2-5) and acute myeloid leukemia (AML, more common in adults, median age 65-70).

Synonyms:

Acute Limb Ischemia

Sudden reduction in arterial blood flow to a limb that threatens tissue viability, usually caused by embolism, thrombosis, or graft occlusion. The six classic findings are pain, pallor, pulselessness, paresthesia, paralysis, and poikilothermia; urgent vascular assessment and revascularization are required.

Synonyms:

Acute Limb Ischemia Six Ps

The classic findings of acute arterial perfusion loss: pain, pallor, pulselessness, paresthesia, paralysis, and poikilothermia. Motor or sensory deficit indicates threatened limb and requires urgent vascular assessment and revascularization planning.

Synonyms:

Acute Liver Failure

Rapid deterioration of liver function in a previously healthy individual without prior liver disease. Causes include acetaminophen toxicity, viral hepatitis, drug reactions, autoimmune hepatitis, and Wilson disease. Features include coagulopathy, encephalopathy, and multiorgan failure. Presents with jaundice, confusion, and bleeding.

Synonyms:

Acute lymphangitis

Acute inflammation of lymphatic vessels, typically resulting from streptococcal or staphylococcal infection spreading from a distal wound. It presents with red, tender streaks extending proximally from the site of infection, along with fever, malaise, and regional lymphadenopathy. Treatment requires systemic antibiotics.

Synonyms:

Acute Lymphoblastic Leukemia

A clonal malignancy of lymphoid progenitor cells, most common in children (peak age 2-5 years) but also occurring in adults with a worse prognosis with increasing age.

Synonyms:

Acute lymphocytic leukemia

A malignant proliferation of immature lymphoid precursors in the bone marrow and blood, commonly presenting with cytopenias, fever, bone pain, or lymphadenopathy.

Synonyms:

Acute Megakaryoblastic Leukemia

A rare subtype of acute myeloid leukemia characterized by the proliferation of megakaryoblasts in

the bone marrow and peripheral blood.

Synonyms:

Acute mesenteric ischemia

Occlusion or reduced flow in the mesenteric arteries causing bowel ischemia, most commonly from embolism or atherosclerosis. Presents with severe abdominal pain disproportionate to physical findings. Delayed treatment leads to bowel necrosis, perforation, and high mortality.

Synonyms:

Acute Mountain Sickness

A mild altitude illness caused by rapid ascent, usually producing headache with nausea, fatigue, dizziness, or sleep disturbance. Prevention and treatment include gradual acclimatization, descent when symptoms worsen, oxygen, and appropriate medical therapy.

Synonyms:

Acute Myeloid Leukemia

A clonal hematologic malignancy characterized by proliferation of immature myeloid blasts that suppress normal hematopoiesis. Diagnosis requires the appropriate blast burden or defining genetic abnormality, and presentation commonly includes anemia, infection, and bleeding from marrow failure.

Synonyms:

Acute obstructive uropathy

Sudden impairment of urinary flow caused by obstruction of the urinary tract, potentially producing hydronephrosis, pain, infection, and acute kidney injury.

Synonyms:

Acute Otitis Media

Infection of the middle ear space with acute onset of symptoms and signs of middle ear inflammation. Diagnosis requires middle ear effusion plus acute symptoms (ear pain, fever, irritability) or signs (bulging tympanic membrane, erythema). Most common pathogen: *Streptococcus pneumoniae*.

Synonyms:

Acute Pancreatitis

Sudden inflammation of the pancreas, most often caused by gallstones or alcohol. It causes upper-abdominal pain and may cause vomiting or systemic complications; severity ranges from mild to life-threatening.

Synonyms:

Acute Promyelocytic Leukemia

A distinct subtype of acute myeloid leukemia (AML) characterized by the t(15;17)(q24;q21) translocation, which fuses the promyelocytic leukemia (PML) gene on chromosome 15 with the retinoic acid receptor alpha (RARA) gene on chromosome 17.

Synonyms:

Acute Rehabilitation

Multidisciplinary rehabilitation provided during or soon after hospitalization for conditions such as stroke, spinal-cord injury, traumatic brain injury, or major trauma. Treatment is tailored to functional needs.

Synonyms:

Acute Respiratory Distress Syndrome

A severe inflammatory lung injury causing acute hypoxemic respiratory failure and diffuse lung opacities not fully explained by heart failure. Common triggers include sepsis, pneumonia, aspiration, trauma, and pancreatitis.

Synonyms:

Acute Sinusitis

Acute inflammation of the mucosa of one or more paranasal sinuses, usually following a viral upper-respiratory infection. It causes nasal obstruction, purulent or discoloured discharge, facial pressure or pain, and reduced smell; persistent, severe, or worsening symptoms may indicate acute bacterial rhinosinusitis or a complication.

Synonyms:

Acute Stress Disorder

A trauma-related mental-health condition beginning after exposure to actual or threatened death, serious

injury, or sexual violence and lasting from three days to one month. Symptoms may include intrusive memories, avoidance, negative mood, dissociation, and increased arousal; professional assessment and support are recommended.

Synonyms:

Acute Tubular Necrosis

Most common cause of intrinsic AKI resulting from ischemic or nephrotoxic injury to tubular epithelial cells. Ischemic ATN develops from prolonged prerenal states. Nephrotoxic ATN results from direct injury by aminoglycosides, amphotericin B, cisplatin, contrast, and myoglobin.

Synonyms:

Acute viral illness

A short-duration illness caused by a virus. Symptoms depend on the affected organ system and may include fever, fatigue, cough, vomiting, diarrhea, or rash.

Synonyms:

Acute-on-Chronic Liver Failure

Acute deterioration of pre-existing chronic liver disease associated with organ failure and high short-term mortality. It is commonly precipitated by infection, alcohol-related hepatitis, bleeding, or other acute insults and requires urgent multidisciplinary management.

Synonyms:

Adam's Apple

The common name for the laryngeal prominence, the visible projection at the front of the neck formed by the angle where the two laminae of the thyroid cartilage meet.

Synonyms:

Adaptive Equipment

Devices that help individuals with disabilities perform daily activities independently. Examples: reachers, dressing sticks, button hooks, ergonomic utensils, grab bars, shower chairs, wheelchairs, walkers, canes. Selection based on individual needs

and goals. Occupational therapy assessment recommended.

Synonyms:

Adaptive Immunity

Antigen-specific immunity mediated principally by B and T lymphocytes. It develops after antigen exposure, generates immunologic memory, and includes humoral responses from B-cell antibodies and cellular responses from T cells.

Synonyms:

Addiction

A chronic, relapsing brain disorder characterized by compulsive substance use or behavior despite harmful consequences. It involves changes in brain reward, motivation, and memory circuits, leading to impaired control over the behavior. Treatment often combines medication, behavioral therapy, and social support.

Synonyms:

Addison Disease

Primary adrenal insufficiency resulting from destruction or dysfunction of the adrenal cortex, leading to deficiency of cortisol, aldosterone, and adrenal androgens.

Synonyms:

Addisonian Crisis

Life-threatening emergency resulting from acute cortisol deficiency in patients with adrenal insufficiency. Precipitated by infection, trauma, surgery, or abrupt discontinuation of chronic glucocorticoid therapy.

Synonyms:

Adduction

Movement of a body part toward the body's midline.

Synonyms:

Adductor Muscles

A group of muscles on the medial thigh that adduct (pull toward the midline) the hip: adductor longus, adductor brevis, adductor magnus, gracilis, and pectineus. Innervated by the obturator nerve (L2-

L4); adductor magnus also receives tibial nerve (sciatic). Adductor longus is a common site of athletic injury ('groin strain').

Synonyms:

Adenocarcinoma

A malignant tumor arising from glandular epithelial tissue, forming gland-like structures. The most common type of carcinoma, occurring in organs such as the colon, breast, lung, pancreas, and prostate.

Synonyms:

Adenocarcinoma of the colon

A malignant gland-forming epithelial tumor of the colon, commonly presenting with altered bowel habits, occult bleeding, anemia, or an obstructing mass.

Synonyms:

Adenoid Cystic Carcinoma

A rare malignant tumor of glandular tissue, most commonly of the salivary glands, characterized by slow growth, perineural spread, and late recurrence.

Synonyms:

Adenoidectomy

The surgical removal of the pharyngeal tonsils (adenoids), which are lymphoid tissue structures located in the nasopharynx, and it is commonly performed in children for obstructive sleep apnea, chronic nasal obstruction, recurrent otitis media, and chronic rhinosinusitis that is refractory to medical management.

Synonyms:

Adenoids

Lymphoid tissue in the posterior wall and roof of the nasopharynx, part of Waldeyer ring of pharyngeal lymphoid tissue. Enlarged adenoids (adenoidal hypertrophy) in children cause nasal obstruction, mouth breathing, snoring, obstructive sleep apnea, serous otitis media (eustachian tube obstruction), and facial changes ('adenoid facies').

Synonyms:

Adenoma

A benign tumour arising from glandular or gland-like epithelial tissue. Some adenomas, particularly certain colorectal adenomas, can develop dysplasia and progress to carcinoma.

Synonyms:

Adenoma-Carcinoma Sequence

Established model of stepwise colorectal carcinogenesis progressing from normal epithelium through adenomas to carcinoma over ten to fifteen years.

Synonyms:

Adenomatous Polyp

A benign gland-forming polyp, most commonly in the colon, that may contain dysplasia and can progress through the adenoma-carcinoma sequence. Tubular, villous, and tubulovillous types are recognized.

Synonyms:

Adenomyosis

A condition in which endometrial glands and stroma are present within the myometrium (uterine muscle). Most common in multiparous women in their 40s and 50s. Presents with heavy menstrual bleeding (menorrhagia), severe dysmenorrhea, chronic pelvic pain, and uterine enlargement.

Synonyms:

Adenovirus

A non-enveloped DNA virus that causes respiratory infections, conjunctivitis, gastroenteritis, and cystitis. Adenoviruses are highly stable in the environment and can cause outbreaks in closed populations. The virus has over 50 serotypes with different tissue tropisms. Diagnosis is made by PCR, antigen detection, or viral culture.

Synonyms:

Adenovirus Infection

Infection with an adenovirus, commonly causing sore throat, cough, fever, conjunctivitis, diarrhea, or vomiting. Most infections are self-limited, but severe respiratory or disseminated disease can oc-

cur in infants and people with weakened immunity. Treatment is usually supportive, with medical assessment for breathing difficulty, dehydration, or severe illness.

Synonyms:

Adenovirus Vaccine

A vaccine used primarily to prevent adenovirus types 4 and 7 among selected military personnel. It is an oral, live vaccine and is not part of routine vaccination for the general public. Vaccine use and eligibility depend on current public-health recommendations.

Synonyms:

ADHD

Attention-deficit/hyperactivity disorder is a neurodevelopmental disorder involving persistent inattention and/or hyperactivity and impulsivity that impair functioning. Symptoms begin in childhood, occur in more than one setting, and are classified as predominantly inattentive, predominantly hyperactive-impulsive, or combined presentation.

Synonyms:

Adherence

The extent to which a person follows an agreed treatment plan, including prescribed medicines and other care. Adherence may be affected by cost, adverse effects, treatment complexity, health beliefs, or difficulty accessing care.

Synonyms:

Adherence (Geriatric)

Adherence to an agreed treatment plan in an older adult, including medicine use, appointments, and recommended self-care. Cognitive impairment, polypharmacy, adverse effects, cost, and support needs may affect adherence.

Synonyms: Geriatric

Adhesive Capsulitis

A condition causing progressive shoulder pain and stiffness due to inflammation and fibrosis of the glenohumeral joint capsule. See Frozen Shoulder.

Synonyms:

Adhesive Tape

A material used to secure dressings, devices, or tubing to the skin. It is available in paper, cloth, plastic, and other forms.

Synonyms:

Adie Tonic Pupil

Uncommon cause of anisocoria, a benign parasympathetic denervation of the iris sphincter and ciliary muscle, typically unilateral in young women, idiopathic or associated with diabetes, herpes zoster, or autoimmune neuropathy.

Synonyms:

Adipocere (Grave Wax)

Waxy, grayish-white substance formed postmortem in warm, moist, anaerobic environments (water, damp soil) by the hydrolysis and hydrogenation of body fat into free fatty acids; retards putrefaction and preserves anatomical details for months to years.

Synonyms: Grave Wax

Adiponectin

A hormone produced mainly by adipose tissue that influences fatty-acid metabolism, insulin sensitivity, and inflammatory responses.

Synonyms:

Adipose Tissue

A specialized connective tissue composed mainly of adipocytes that store energy as triglycerides. It provides thermal insulation, cushioning for organs, and endocrine regulation through hormones and signaling molecules such as leptin and adiponectin.

Synonyms:

Adjustment Disorder

Emotional or behavioral symptoms in response to an identifiable stressor occurring within three months of the onset of the stressor. The symptoms are disproportionate to the severity of the stressor and cause significant distress or impairment. It resolves

within six months of the termination of the stressor.

Synonyms:

Adjustment Disorder with Anxiety

An emotional or behavioral response to an identifiable stressor that causes distress or impairment but does not meet criteria for another mental disorder.

Synonyms:

Adjuvant Therapy

Additional treatment after primary treatment to reduce recurrence risk. Examples: chemotherapy after surgery.

Synonyms:

ADL Training

Training for activities of daily living: dressing, bathing, grooming, feeding, toileting. Adaptive techniques, equipment.

Synonyms:

Administered Activity

The measured amount of radioactive material given to a patient for imaging or therapy, usually expressed in becquerels. It should be prescribed and recorded with the radionuclide, radiopharmaceutical, route, date, and time of administration.

Synonyms:

Adolescent Health

The health and wellbeing of young people (10-19 years), addressing the physical, psychological, and social transitions of puberty and adolescence.

Synonyms:

Adolescent Confidentiality and Consent

The principles governing private healthcare discussions with adolescents and their ability to participate in medical decisions. The exact rules for confidentiality, consent, and parental involvement depend on age, capacity, local law, and safeguarding concerns.

Synonyms:

Adoptive Cell Therapy

A personalized cellular immunotherapy in which a patient's own lymphocytes are expanded or engineered ex vivo and reinfused to attack the tumor; examples include tumor-infiltrating lymphocyte (TIL) therapy and chimeric antigen receptor (CAR) T-cell therapy.

Synonyms:

ADP (Adenosine Diphosphate)

A nucleotide composed of adenine, ribose, and two phosphate groups. Formed by hydrolysis of ATP ($\text{ATP} \rightarrow \text{ADP} + \text{P}_i$, $\Delta G^\circ = -30.5 \text{ kJ/mol}$). Serves as the immediate precursor for ATP synthesis via oxidative phosphorylation (mitochondrial ATP synthase), substrate-level phosphorylation (glycolysis, TCA cycle), and photophosphorylation.

Synonyms: Adenosine Diphosphate

Adrenal Cortex Physiology

The adrenal cortex produces steroid hormones in three zones: the zona glomerulosa produces mineralocorticoids, mainly aldosterone; the zona fasciculata produces glucocorticoids, mainly cortisol; and the zona reticularis produces adrenal androgens. Secretion is regulated by the renin-angiotensin system, plasma potassium, and the hypothalamic-pituitary-adrenal axis.

Synonyms:

Adrenal Cortical Carcinoma

A rare malignant tumor arising from the adrenal cortex. It may be functional, producing excess adrenal hormones, or nonfunctional.

Synonyms:

Adrenal Crisis

An acute, life-threatening manifestation of severe adrenal insufficiency. Causes: primary (Addison disease), secondary (pituitary failure), or tertiary (exogenous corticosteroid withdrawal). Precipitants: systemic infection, trauma, surgery, or abrupt steroid cessation.

Synonyms:

Adrenal Gland

Paired endocrine glands atop each kidney (suprarenal), composed of cortex and medulla. Cortex (three zones): zona glomerulosa (aldosterone, mineralocorticoids), zona fasciculata (cortisol, glucocorticoids), zona reticularis (androgens). Medulla: chromaffin cells secrete epinephrine and norepinephrine (catecholamines).

Synonyms:

Adrenal Hemorrhage

Bleeding into the adrenal gland most commonly occurring in critically ill patients with sepsis, coagulopathy, or anticoagulation therapy. Bilateral adrenal hemorrhage may cause acute adrenal insufficiency with circulatory collapse. Waterhouse-Friderichsen syndrome: adrenal hemorrhage associated with meningococcal sepsis.

Synonyms:

Adrenal Hyperplasia

Enlargement or overgrowth of adrenal tissue that may increase production of adrenal hormones. Causes include congenital adrenal hyperplasia, chronic stimulation by ACTH, and some adrenal tumors. Symptoms depend on the hormone affected and may include abnormal genital development, early puberty, excess body hair, high blood pressure, or electrolyte disturbances.

Synonyms:

Adrenal Insufficiency

Deficient production of cortisol by the adrenal cortex classified as primary adrenal insufficiency or Addison disease from adrenal gland destruction, secondary from pituitary ACTH deficiency, and tertiary from chronic exogenous glucocorticoid suppression of the hypothalamic-pituitary-adrenal axis.

Synonyms:

Adrenal Medulla Physiology

The adrenal medulla produces catecholamines primarily epinephrine and norepinephrine in response to sympathetic nervous system activation. Epinephrine accounts for approximately eighty percent and norepinephrine approximately twenty per-

cent of catecholamine output.

Synonyms:

Adrenal Myelolipoma

A usually benign adrenal tumor composed of mature fat and blood-forming tissue. It is often found incidentally on imaging and causes no symptoms, but larger lesions may produce mass effect or bleeding. Management depends on size, symptoms, growth, and diagnostic certainty.

Synonyms:

Adrenal Tumors

Tumors arising in the adrenal cortex or medulla may be benign or malignant and may or may not produce hormones. Evaluation uses clinical assessment, hormone testing when indicated, and imaging to assess size and appearance; treatment depends on the diagnosis, hormone secretion, symptoms, growth, and risk of malignancy.

Synonyms:

Adrenal Venous Sampling

Interventional radiology procedure for lateralizing aldosterone secretion in primary hyperaldosteronism. Catheterization of both adrenal veins allows measurement of aldosterone and cortisol levels to calculate selectivity index confirming successful cannulation and lateralization ratio.

Synonyms:

Adrenalectomy

Surgical removal of one or both adrenal glands, performed for selected adrenal tumors, severe hormone excess, or other localized disease. Removal of one gland may leave adequate hormone production; bilateral removal causes permanent adrenal insufficiency and requires lifelong hormone replacement and emergency-steroid planning.

Synonyms:

Adrenocortical Carcinoma

A rare malignant tumor of the adrenal cortex that may secrete cortisol, androgens, or aldosterone or be non-functional. Often large at diagnosis; treatment

is en bloc resection, with mitotane for advanced disease.

Synonyms:

Adrenocorticotrophic Hormone

ACTH (corticotropin): a peptide hormone from the anterior pituitary (cleaved from POMC) that stimulates the adrenal cortex to produce cortisol (zona fasciculata) and adrenal androgens; regulated by hypothalamic CRH and cortisol negative feedback (circadian).

Synonyms:

Adult Spinal Deformity

Abnormal curvature or alignment of the spine in an adult, including scoliosis, kyphosis, or loss of normal sagittal balance. It may cause back pain, nerve compression, difficulty walking, or functional disability.

Synonyms:

Adult Still's Disease

A systemic inflammatory disorder characterized by recurrent high fevers, arthritis or joint pain, a transient salmon-colored rash, sore throat, and possible involvement of other organs.

Synonyms:

Adult-Onset Still Disease

A systemic inflammatory disorder beginning in adulthood, characterized by high-spiking fevers, arthritis or joint pain, a transient salmon-pink rash, sore throat, and possible liver, spleen, heart, or blood-clotting complications.

Synonyms:

Advance Care Planning

A process of discussing and documenting a person's healthcare values and preferences for possible future illness, including designation of a surrogate decision-maker when appropriate.

Synonyms:

Advance Directive

Legal document expressing healthcare wishes. Com-

ponents: living will (treatment preferences), durable power of attorney for healthcare (surrogate decision-maker). Should be reviewed periodically, discussed with surrogate and healthcare team.

Synonyms:

Advanced Cancer

Cancer that has grown beyond its original site. It may be locally advanced when it has invaded nearby tissues or metastatic when it has spread to distant organs.

Synonyms:

Advanced Cardiovascular Life Support

A standardized set of advanced resuscitation measures for cardiac arrest and other life-threatening cardiovascular emergencies. It includes high-quality CPR, defibrillation when indicated, airway management, medicines, and treatment of reversible causes.

Synonyms:

Advanced Maternal Age

Maternal age of 35 years or older at the estimated time of delivery. It is associated with increased risks of some chromosomal conditions and pregnancy complications.

Synonyms:

Adverse Drug Event

Harm related to the use of a medication, including harm caused by an adverse drug reaction, medication error, overdose, or inappropriate use.

Synonyms:

Adverse Drug Reaction

An adverse drug reaction is any noxious or unintended response to a drug that occurs at doses used for prophylaxis, diagnosis, or therapy.

Synonyms:

Adverse Event

Any untoward medical occurrence during or after a treatment or intervention, whether or not it is considered causally related to that treatment. Severity, seriousness, expectedness, and relatedness are as-

sessed separately.

Synonyms:

Aerobe

A microorganism that requires molecular oxygen for growth or uses oxygen efficiently for energy production. Obligate aerobes are unable to grow without oxygen, whereas facultative organisms can grow with or without it.

Synonyms:

Aerobic

Requiring or involving molecular oxygen. In microbiology, aerobic organisms use oxygen for growth or energy production, either obligatorily or as one option among several; in physiology, aerobic metabolism uses oxidative phosphorylation in mitochondria to generate ATP from nutrients.

Synonyms:

Aerophagy

Excessive swallowing of air, also called aerophagia, which can lead to frequent belching, abdominal bloating, distension, and discomfort.

Synonyms: aerophagia, which can lead to frequent.

Aesthetic Dentistry

Dental care intended to improve the appearance of the teeth, gums, or smile. Procedures may include tooth-colored restorations, veneers, whitening, or selected crowns.

Synonyms:

Affective Flattening

Markedly reduced outward expression of emotion, including limited facial expression, voice modulation, and gestures. It may occur in schizophrenia and other psychiatric or neurologic conditions.

Synonyms:

AFP (Alpha-Fetoprotein)

A protein produced mainly by the fetal liver. Maternal blood AFP is used in prenatal screening, and serum AFP may help evaluate selected liver and germ-cell tumors. Results are not diagnostic by

themselves.

Synonyms: Alpha-Fetoprotein

Afterload

The resistance against which the ventricles must eject blood during systole. Left ventricular afterload is primarily determined by systemic vascular resistance (SVR); right ventricular afterload is determined by pulmonary vascular resistance (PVR). Afterload is estimated by blood pressure or calculated as wall stress.

Synonyms:

Agar

A gelatinous polysaccharide from red algae used to solidify culture media. Melting near 85°C and solidifying at 35–40°C, it remains solid at incubation temperatures and is largely undegraded by bacteria, enabling isolation of pure colonies on media such as blood, MacConkey, and Sabouraud agars.

Synonyms:

Age-Related Macular Degeneration

A degenerative disorder of the macula that can impair central vision in older adults. The dry form involves retinal and pigment-cell changes and may progress gradually; the neovascular form involves abnormal blood-vessel growth and may cause more rapid vision loss. Risk is influenced by age, smoking, family history, and other factors.

Synonyms:

Age-Standardized Rate

A rate adjusted to a specified standard population age distribution so that populations with different age structures can be compared more fairly. It is commonly used for mortality, cancer, and disease-incidence comparisons.

Synonyms:

Ageism

Stereotyping, prejudice, or discrimination directed at people because of their age, which can impair access to appropriate medical care.

Synonyms:

Agenesis of the Corpus Callosum

Complete or partial absence of the corpus callosum, the major commissural fiber bundle connecting the cerebral hemispheres. May be isolated or associated with other CNS anomalies (Dandy-Walker, Chiari, heterotopias) and genetic syndromes (Aicardi, Andermann, acrocallosal syndromes).

Synonyms:

Ageusia

Complete loss of the sense of taste. Causes include viral infections, oral or nasal disease, head injury, damage to the facial or glossopharyngeal nerves, medications, chemotherapy, zinc deficiency, and neurologic disorders.

Synonyms:

Agglutination

The visible clumping of cells or particles caused by antibodies or other binding molecules linking antigens on their surfaces. It is used in blood-grouping and crossmatching, infectious-disease serology, and some laboratory identification tests.

Synonyms:

Aggregation, Platelet

The process by which activated platelets adhere to one another to form a primary platelet plug at a site of vascular injury. Platelet agonists such as ADP, thromboxane A₂, and thrombin activate glycoprotein IIb/IIIa, which binds fibrinogen and links adjacent platelets.

Synonyms:

Aggression

Verbal or physical behavior intended to threaten, harm, or dominate another person or object. It may occur with mania, psychosis, personality disorders, dementia, delirium, substance intoxication or withdrawal, traumatic brain injury, or severe frustration.

Synonyms:

Aggressive Cancer

A cancer that grows, invades, or spreads rapidly

and may require prompt diagnosis and treatment. Aggressiveness depends on tumour biology, grade, stage, and response to therapy.

Synonyms:

Agility

The ability to move or change direction quickly while maintaining control and balance.

Synonyms:

Aging

Biological process of growing older, involving cumulative changes at molecular, cellular, tissue, organ levels.

Synonyms:

Agitation

A state of excessive motor activity, emotional excitement, and restlessness. In psychiatric settings, it may be a symptom of mania, psychosis, delirium, substance intoxication, or withdrawal.

Synonyms:

Agnathia

A rare congenital absence or severe underdevelopment of the mandible, maxilla, or both. It is usually part of a craniofacial developmental disorder and may cause profound facial deformity, airway obstruction, feeding difficulty, and impaired dentition.

Synonyms:

Agnosia

A higher-order neurological deficit characterized by the inability to recognize or process sensory stimuli (visual, auditory, tactile) despite intact primary sensory organs and pathways. Caused by focal lesions in specific cortical association areas (parietal, temporal, or occipital lobes).

Synonyms:

Agonist

A substance that binds to a receptor and activates it, producing a biological response. A full agonist can produce the receptor's maximum response, whereas a partial agonist produces a lower maximum re-

sponse even when it occupies all available receptors.

Synonyms:

Agonist-Antagonist

A drug that has mixed pharmacological activity, acting as an agonist at one receptor type and an antagonist at another, or as a partial agonist at a single receptor.

Synonyms:

Agoraphobia

Anxiety disorder characterized by fear and avoidance of situations where escape might be difficult or help unavailable during a panic-like episode. Common feared situations include public transportation, open spaces, enclosed spaces, standing in line, being in crowds, and being outside the home alone.

Synonyms:

Agranulocytosis

A severe reduction or near-absence of circulating neutrophils, usually defined as an absolute neutrophil count below $0.5 \times 10^9/L$. It may be caused by medications, chemotherapy, autoimmune disease, infections, or bone-marrow disorders and presents with fever, sore throat, oral ulcers, or recurrent serious infections.

Synonyms:

Agraphesthesia

Inability to recognize numbers or letters traced on the skin, indicating a lesion of the contralateral parietal lobe (somatosensory association cortex, post-central gyrus). Tested with a blunt object on the palm or fingertip while the patient's eyes are closed.

Synonyms:

Agraphia

An acquired inability to write or express language in written form despite adequate education and motor ability. It may result from dominant-parietal or language-network lesions, especially stroke, traumatic brain injury, dementia, or brain tumors, and may occur with aphasia, alexia, or acalculia.

Synonyms:

Aicardi-Goutieres Syndrome

Rare autosomal recessive inflammatory disorder mimicking congenital viral infection. Characterized by cerebral calcifications, white matter disease, cerebral atrophy, and cerebrospinal fluid lymphocytosis. Presents with severe neurodevelopmental impairment, seizures, and spasticity.

Synonyms:

AIDS

Acquired immunodeficiency syndrome: the advanced stage of HIV infection, defined by CD4 count <200 cells/ μL or the presence of AIDS-defining illnesses.

Synonyms:

Air Abrasion

Minimally invasive caries removal using abrasive particles. Alternative to drilling for small lesions.

Synonyms:

Air bronchogram

A radiographic sign showing air-filled bronchi visible against opacified lung parenchyma, indicating that the airways remain patent while the surrounding alveoli are filled with fluid, pus, or cells.

Synonyms:

Air Contaminants

Solid, liquid, or gaseous substances in air that may harm health, such as particulate matter, fumes, gases, allergens, or microorganisms. Effects depend on the contaminant, concentration, and duration of exposure.

Synonyms:

Air Embolism

Entry of gas into the venous or arterial circulation, where it can obstruct blood flow and injure tissues. It may occur during medical procedures, trauma, or rapid changes in environmental pressure. Symptoms and treatment depend on the amount and location of gas and require urgent clinical assessment when significant embolism is suspected.

Synonyms:

Air Polishing

Removal of stains using air-abrasive device. Glycine or erythritol powder.

Synonyms:

Air Quality

The condition of air as determined by the concentration of pollutants such as particulate matter, ozone, nitrogen dioxide, and sulfur dioxide.

Synonyms:

Airborne Disease

An infection that can spread through small suspended particles or aerosols under suitable conditions. Transmission depends on the organism, environment, ventilation, and duration of exposure.

Synonyms:

Airborne precautions

Infection control measures used for pathogens transmitted through airborne droplet nuclei. Precautions include negative pressure rooms, N95 respirators, and restricted access. Airborne precautions are used for tuberculosis, measles, varicella, and disseminated herpes zoster.

Synonyms:

Airway Clearance Techniques

Physical or mechanical methods used to mobilize and remove airway secretions. Examples include directed coughing, breathing exercises, postural drainage, positive expiratory pressure, and high-frequency chest-wall oscillation. Selection depends on the disease, secretion burden, strength, and ability to cooperate.

Synonyms:

Airway Management

Airway management encompasses techniques and devices used to maintain ventilation and oxygenation in patients with compromised airways.

Synonyms:

Airway Obstruction

Partial or complete blockage of airflow through the

upper or lower respiratory tract. It may result from a foreign body, secretions, swelling, trauma, tumor, or loss of airway muscle tone and can cause stridor, wheeze, hypoxaemia, respiratory distress, or arrest.

Synonyms:

Airway Resistance

The opposition to airflow through the conducting airways, determined largely by airway radius and flow pattern. Bronchoconstriction, mucus, edema, and reduced elastic traction increase resistance; because resistance varies strongly with radius, small changes can markedly affect work of breathing.

Synonyms:

Akathisia

Subjective feeling of inner restlessness accompanied by a compulsive need to move, most commonly an extrapyramidal side effect of antipsychotic drugs (typical and atypical neuroleptics), also seen with dopamine antagonists (metoclopramide), selective serotonin reuptake inhibitor withdrawal, and in Parkinson disease.

Synonyms:

Akinesia

Impairment or absence of voluntary movement, classically a hypokinetic feature of basal ganglia disorders such as Parkinson disease and related parkinsonian syndromes.

Synonyms:

Alagille Syndrome

An inherited disorder of Notch signaling that commonly affects the liver, heart, skeleton, eyes, and characteristic facial features. It is usually caused by a pathogenic variant in JAG1 or, less often, NOTCH2.

Synonyms:

ALARA Principle

Radiation-protection principle requiring exposure to be kept as low as reasonably achievable while obtaining the necessary diagnostic or therapeutic information. Justification, optimization, collimation,

shielding, time reduction, and increased distance support ALARA.

Synonyms:

Albinism (Oculocutaneous Albinism)

A group of inherited disorders that reduce melanin production in the skin, hair, and eyes. It may cause light pigmentation, reduced visual acuity, nystagmus, and increased sensitivity to sunlight; the severity depends on the genetic subtype.

Synonyms: Oculocutaneous Albinism

Albright's hereditary osteodystrophy

A group of inherited features associated with abnormalities of GNAS signaling, including short metacarpal bones, a round facial appearance, short stature, and subcutaneous ossification. Some associated disorders also cause resistance to parathyroid hormone or other hormones.

Synonyms:

Alanine Aminotransferase (ALT)

An enzyme found mainly in liver cells that is released into the blood when hepatocytes are injured. Serum ALT is widely used to screen for and monitor liver disease and is interpreted together with aspartate aminotransferase, alkaline phosphatase, bilirubin, and the clinical context.

Synonyms: ALT

Albumin

The main protein in blood plasma, produced by the liver. It helps maintain oncotic pressure and transports various substances, including hormones, fatty acids, and medications.

Synonyms:

Albumin-to-Creatinine Ratio

The urinary albumin concentration standardized to urinary creatinine concentration, usually measured in a spot urine sample. Persistent albuminuria is a marker of kidney damage and is categorized as A1 (<30 mg/g), A2 (30–300 mg/g), or A3 (>300 mg/g) in commonly used CKD classification.

Synonyms:

Albuminuria

Abnormally increased excretion of albumin in the urine, indicating disruption of the glomerular filtration barrier or another form of kidney disease. It is commonly detected with a urine albumin-to-creatinine ratio and classified as moderately or severely increased according to the quantity and persistence of excretion.

Synonyms:

Alcohol

Ethanol, a psychoactive substance that can impair judgment and coordination and cause intoxication or dependence.

Synonyms:

Alcohol dependency

A chronic relapsing disorder characterized by compulsive ethanol use, loss of control over intake, and negative emotional state during withdrawal, leading to tolerance, dependence, and organ damage over time.

Synonyms:

Alcohol Intoxication

Acute impairment caused by ethanol, which may produce disinhibition, impaired coordination, slurred speech, vomiting, reduced consciousness, or respiratory depression. Severe intoxication can be life-threatening and requires assessment of breathing, circulation, glucose, trauma, and other substances.

Synonyms:

Alcohol Swab

A single-use pad containing alcohol for cleaning intact skin before selected procedures. It should be used according to the product instructions and allowed to dry.

Synonyms:

Alcohol Use

Consumption of alcoholic beverages. Health effects depend on amount, frequency, pattern, and individual risk.

Synonyms:

Alcohol Use Disorder

A problematic pattern of alcohol use leading to significant impairment or distress. Severity is classified as mild (2–3 criteria), moderate (4–5 criteria), or severe (6 or more criteria).

Synonyms:

Alcohol Withdrawal

A syndrome that may occur after abrupt cessation or substantial reduction of prolonged heavy alcohol use. Symptoms can include tremor, anxiety, sweating, nausea, hallucinations, seizures, or delirium; onset and severity vary, and severe withdrawal requires urgent medical care.

Synonyms:

Alcoholic Cardiomyopathy

Dilated cardiomyopathy caused by chronic excessive alcohol consumption, one of the most common reversible causes of dilated cardiomyopathy. Direct toxic effect of ethanol and its metabolite acetaldehyde on cardiomyocytes. Presentation is identical to other dilated cardiomyopathies.

Synonyms:

Alcoholic Ketoacidosis

A high-anion-gap metabolic acidosis caused by prolonged heavy alcohol use, poor nutritional intake, and vomiting. It typically presents with abdominal pain, nausea, vomiting, dehydration, and tachypnea, often with a normal or low blood glucose concentration.

Synonyms:

Alcoholic Neuropathy

A length-dependent peripheral neuropathy associated with chronic excessive alcohol use and nutritional deficiency, especially thiamine deficiency. It causes burning pain, numbness, paraesthesia, and weakness, most prominently in the feet and lower legs.

Synonyms:

Aldosterone

A mineralocorticoid hormone produced by the zona glomerulosa of the adrenal cortex, the final effector of the renin-angiotensin-aldosterone system (RAAS).

Synonyms:

Alexia

An acquired inability to comprehend written language despite intact vision and otherwise preserved language function, usually caused by stroke or other lesions affecting the dominant-hemisphere reading networks. When reading is impaired but writing remains possible, the pattern is called alexia without agraphia.

Synonyms:

Algor Mortis

Post-mortem cooling of the body following death until it reaches ambient environmental temperature. Serves as one of the physical estimators of the post-mortem interval (time since death).

Synonyms:

Aliasing Artifact

An ultrasound display artifact in which blood flow exceeds the selected velocity scale and appears to reverse direction. It can be reduced by increasing the scale or changing the imaging settings.

Synonyms:

Alkaline phosphatase

A group of enzymes that catalyze the hydrolysis of phosphate esters at alkaline pH, found in high concentrations in the liver, bone, placenta, and intestinal mucosa. Elevated serum levels occur in obstructive liver disease, bone disorders including Paget disease and fractures, pregnancy, and certain malignancies.

Synonyms:

Alkalosis

A metabolic (elevated bicarbonate) or respiratory (low PaCO₂) disturbance that raises arterial pH above 7.45. Metabolic alkalosis: vomiting/NG suc-

tion (HCl loss), diuretics, mineralocorticoid excess, hypokalemia, and alkali ingestion—compensated by hypoventilation; chloride-responsive vs. chloride-resistant distinguishes causes.

Synonyms:

Allele

Alternative form of a gene at a particular locus. Individuals inherit two alleles for each gene (one from each parent). Alleles can be dominant, recessive, or codominant.

Synonyms:

Allergen

A substance capable of causing an allergic immune response in a susceptible person. Common allergens include proteins in foods, pollens, medicines, animal dander, insect venom, and natural rubber.

Synonyms:

Allergen Immunotherapy

Treatment that gives gradually increasing doses of a specific allergen by injection or under the tongue to reduce allergic sensitivity. It may be used for selected allergic rhinitis, conjunctivitis, asthma, or insect-venom allergy.

Synonyms:

Allergic Bronchopulmonary Aspergillosis

A hypersensitivity reaction to *Aspergillus fumigatus* in asthma or CF patients. Causes central bronchiectasis, elevated total IgE, and eosinophilia. Treatment includes corticosteroids and itraconazole.

Synonyms:

Allergic Conjunctivitis

An inflammatory condition of the conjunctiva mediated by IgE-dependent mast cell degranulation in response to environmental allergens, characterized by bilateral ocular itching, tearing, conjunctival injection, and eyelid edema.

Synonyms:

Allergic Dermatitis

An inflammatory skin reaction caused by an immune

response to an external allergen, most commonly allergic contact dermatitis. It is a delayed, T-cell-mediated hypersensitivity reaction that typically develops after prior sensitization.

Synonyms:

Allergic Reactions

Immune reactions to substances that are usually harmless, such as foods, medicines, pollens, or insect venom. They may be immediate or delayed and can range from localized symptoms to anaphylaxis.

Synonyms:

Allergic Rhinitis

An IgE-mediated inflammatory response of the nasal mucosa to inhaled allergens, causing sneezing, nasal congestion, clear rhinorrhea, nasal itching, and often conjunctival symptoms. Management may include allergen avoidance, intranasal corticosteroids, antihistamines, and allergen immunotherapy when indicated.

Synonyms:

Allergic Rhinitis (Hay Fever)

Allergies occur when the immune system overreacts to harmless environmental substances such as pollen, dust mites, mold, or pet dander. Hay fever (allergic rhinitis) specifically involves nasal symptoms like sneezing, congestion, and itchy eyes triggered by airborne allergens.

Synonyms: Hay Fever

Allergies

Immune reactions to normally harmless substances such as foods, pollens, medicines, insect venom, or animal dander. Reactions range from localized rhinitis or dermatitis to life-threatening anaphylaxis.

Synonyms:

Allergy Testing

Identification of IgE-mediated allergic sensitization. Skin prick test (SPT): allergen extract applied to skin via lancet, read after 15 min (wheal >3mm = positive). Intradermal test: more sensitive, used when SPT negative but suspicion remains.

Synonyms:

Allodynia

Pain caused by a stimulus that is normally not painful, such as light touch or gentle pressure. It may occur with neuropathic, nociplastic, or other pain conditions.

Synonyms:

Allograft

Tissue transplanted between genetically different individuals of the same species. Allografts may provoke immune rejection and require appropriate donor screening, processing, and, in some settings, immunosuppression.

Synonyms:

Allosteric Regulation

The regulation of enzyme activity by the binding of an effector molecule at a site other than the active site (allosteric site), causing a conformational change that alters the enzyme's activity. Allosteric enzymes typically have multiple subunits with cooperative binding kinetics (sigmoidal rather than hyperbolic velocity curves).

Synonyms:

Alogia

Poverty of speech or poverty of content of speech, a negative symptom of schizophrenia. It manifests as brief, empty replies to questions, reduced spontaneous speech, and lack of elaboration. It reflects dysfunction in the mesocortical dopamine pathway and is less responsive to antipsychotic medications than positive symptoms.

Synonyms:

Alopecia

Hair loss from any cause. Androgenetic alopecia (male/female pattern hair loss): most common, related to DHT sensitivity. Alopecia areata: autoimmune, patchy hair loss with potential progression to totalis (scalp) or universalis (entire body).

Synonyms:

Alopecia Areata

A common, autoimmune, non-scarring hair loss disorder affecting approximately 1 to 2 percent of the population worldwide, with a lifetime risk of 2 percent, occurring equally across sexes and ethnicities, with peak onset between 15 and 29 years.

Synonyms:

Alpha-1 Antitrypsin Deficiency

An autosomal codominant genetic disorder caused by mutations in the SERPINA1 gene. It predisposes to early-onset panlobular emphysema (lower lobes), liver disease, and panniculitis. PiZZ genotype is most severe. Treatment includes AAT augmentation therapy and smoking avoidance.

Synonyms:

Alpha-Agonists

Medicines that stimulate alpha-adrenergic receptors. Depending on the receptor and tissue, they can constrict blood vessels, alter autonomic activity, or reduce aqueous-humor production in the eye. Their uses and adverse effects depend on the specific medicine and route.

Synonyms:

Alpha-Glucosidase Inhibitors

Oral glucose-lowering medications including acarbose, miglitol, and voglibose that delay carbohydrate digestion and glucose absorption in the small intestine by inhibiting brush border alpha-glucosidase enzymes. Reduce postprandial glucose excursions without affecting fasting glucose significantly.

Synonyms:

Alpha-Ketoglutarate

A five-carbon intermediate of the citric acid cycle formed from isocitrate and converted to succinyl-CoA. It also serves as a carbon skeleton for amino acid metabolism and participates in oxidative deamination and cellular signaling.

Synonyms:

Alport Syndrome

Hereditary nephritis caused by mutations in type

four collagen genes leading to progressive sensorineural hearing loss, ocular anomalies, and renal failure. X-linked form from COL4A5 mutations is the most common. Autosomal recessive and dominant forms exist.

Synonyms:

ALS

Amyotrophic lateral sclerosis (motor neuron disease, Lou Gehrig disease): a progressive neurodegenerative disease of upper and lower motor neurons, causing muscle weakness, atrophy, fasciculations, spasticity, and eventually respiratory failure.

Synonyms:

Altitude Illness

Acute mountain sickness (AMS): headache + 1 symptom (nausea, fatigue, dizziness, insomnia) at >2500m. HACE: AMS + ataxia/altered mental status (cerebral edema). HAPE: dyspnea at rest, cough, frothy sputum, crackles, hypoxemia (noncardiogenic pulmonary edema).

Synonyms:

Aluminum Phosphide

A highly toxic fumigant that releases phosphine gas when exposed to moisture or stomach acid. Poisoning can cause severe cardiovascular, respiratory, gastrointestinal, and metabolic effects and requires immediate emergency treatment and supportive intensive care.

Synonyms:

Alvarado Score

Clinical scoring system for acute appendicitis. Components (MANTRELS): Migration of pain (1), Anorexia (1), Nausea/vomiting (1), Tenderness in RLQ (2), Rebound pain (1), Elevated temperature (1), Leukocytosis (2), Left shift (1).

Synonyms:

Alveolar Bone

Bone surrounding and supporting tooth roots. Resorbs with tooth loss. Maintained by function. Bone grafting may be needed for implants.

Synonyms:

Alveolar Gas Equation

$PAO_2 = (FiO_2 \times (P_{atm} - PH_2O)) - (PaCO_2 / R)$.
 $P_{atm} = 760$ mmHg, $PH_2O = 47$ mmHg, $R = 0.8$.
Allows calculation of A-a gradient.

Synonyms:

Alveolar Ventilation

The volume of fresh air reaching the alveoli per minute, representing the portion of minute ventilation that participates in gas exchange. Calculated as (tidal volume - dead space volume) x respiratory rate. Normal alveolar ventilation is approximately 4-5 L/min.

Synonyms:

Alveolar Ventilation Equation

The relationship between alveolar ventilation and arterial carbon-dioxide tension, approximately $PaCO_2 = 0.863$ times carbon-dioxide production divided by alveolar ventilation. It explains why reduced effective ventilation causes hypercapnia.

Synonyms:

Alveolus

The terminal air sac (200-300 microns) where gas exchange occurs. Approximately 300-500 million per lung, providing 70 m² surface area. Wall: type I pneumocytes (95% surface, thin for diffusion), type II pneumocytes (5%, secrete pulmonary surfactant reducing surface tension), alveolar macrophages (dust cells, phagocytosis).

Synonyms:

Alzheimer Disease

A progressive neurodegenerative disorder characterized pathologically by amyloid-beta plaques, tau neurofibrillary pathology, and neuronal loss. It most commonly presents with insidious impairment of episodic memory followed by broader cognitive and functional decline.

Synonyms:

Amalgam

Restorative material composed of mercury alloyed with silver, tin, copper, and other metals. Properties: strong, durable, cost-effective. Concerns: mercury toxicity debates, aesthetic limitations. Placement: requires cavity preparation, condensation, carving. Removal: sectioning, cooling to prevent mercury vapor.

Synonyms:

Amaurosis Fugax

Transient monocular vision loss lasting seconds to minutes, classically described as a curtain descending over the field, caused by retinal or optic nerve ischemia.

Synonyms:

Ambiguous Genitalia

External genital anatomy that does not have typical male or female features, usually because of a difference in sex development. Evaluation includes examination, chromosome and hormone testing, pelvic or abdominal imaging, and assessment for congenital adrenal hyperplasia.

Synonyms:

Ambulatory Blood Pressure Monitoring

Measurement of blood pressure at regular intervals, usually over twenty-four hours, with a portable cuff worn during normal activities and sleep. It detects white-coat and masked hypertension, evaluates nighttime blood-pressure patterns, and helps confirm hypertension diagnosed in the clinic.

Synonyms:

Amblyopia

A developmental reduction in vision caused by abnormal visual input during early childhood, without a sufficient structural explanation. It commonly results from misalignment, unequal focusing power, or obstruction of vision in one eye.

Synonyms:

Ambu Bag

A self-inflating manual resuscitation bag used with

a mask or airway device to provide positive-pressure ventilation.

Synonyms:

Amebiasis

Infection with the protozoan parasite *Entamoeba histolytica*, acquired mainly by ingestion of faecally contaminated food or water. It may be asymptomatic or cause amoebic colitis with abdominal pain, diarrhoea, or dysentery, and can spread through the portal circulation to produce a liver abscess.

Synonyms:

Amebic Liver Abscess

A focal collection of necrotic material in the liver caused by *Entamoeba histolytica*, usually following intestinal infection. It commonly causes fever, right-upper-quadrant pain, and tender hepatomegaly; diagnosis is supported by imaging and serology.

Synonyms:

Amelanotic melanoma

A variant of melanoma that lacks significant melanin production, presenting as a pink, red, or flesh-coloured papule or nodule rather than a typical dark lesion. Its paucity of pigment can delay diagnosis, making it a diagnostic challenge. Histopathology with immunohistochemical markers confirms the diagnosis.

Synonyms:

Amelia

A rare congenital anomaly characterized by complete absence of one or more limbs. It may occur alone or as part of a genetic or developmental syndrome. Prenatal imaging can identify the anomaly and help assess associated abnormalities.

Synonyms:

Ameloblastoma

Locally aggressive odontogenic tumor. Multicystic radiolucency in posterior mandible. High recurrence rate. Treatment: surgical resection with margins.

Synonyms:

Amelogenesis

The formation and maturation of tooth enamel by ameloblasts during tooth development.

Synonyms:

Amelogenesis Imperfecta

A group of inherited disorders in which enamel formation is abnormal, causing enamel that may be thin, poorly mineralized, weak, or easily worn on most or all teeth.

Synonyms:

Amenorrhea

Absence of menstruation. Primary amenorrhea: no menarche by age 15 with normal secondary sexual development, or by age 13 without. Secondary amenorrhea: absence of menses for three cycles or six months in women with prior menstruation.

Synonyms:

Amino Acid

An organic molecule containing an amino group, a carboxyl group, a hydrogen atom, and a variable side chain attached to a central carbon. Amino acids are the building blocks of proteins; cells use some also in energy metabolism and other biochemical pathways.

Synonyms:

Amino Acid Catabolism

The breakdown of amino acids after protein digestion, with the amino group removed and the carbon skeleton metabolized for energy or gluconeogenesis/ketogenesis. Transamination: amino groups are transferred to alpha-ketoglutarate, forming glutamate, by aminotransferases requiring pyridoxal phosphate (PLP, vitamin B6) as a cofactor.

Synonyms:

Aminoglycoside nephrotoxicity

Kidney damage caused by aminoglycoside antibiotics, characterized by acute tubular necrosis. Nephrotoxicity is caused by accumulation of aminoglycosides in the proximal tubular cells. The risk is increased with prolonged therapy, high doses, con-

current nephrotoxic drugs, and renal impairment.

Synonyms:

Aminoglycoside ototoxicity

Damage to the inner ear caused by aminoglycoside antibiotics, resulting in hearing loss and vestibular dysfunction. Ototoxicity is caused by accumulation of aminoglycosides in the inner ear, damaging hair cells. The risk is increased with prolonged therapy, high doses, concurrent ototoxic drugs, and renal impairment.

Synonyms:

Aminoglycosides

A class of bactericidal antibiotics that bind irreversibly to the 30S ribosomal subunit, causing misreading of messenger RNA and inhibiting protein synthesis. They include gentamicin, tobramycin, amikacin, and streptomycin.

Synonyms:

Amiodarone-induced skin discoloration

A slate-grey to bluish hyperpigmentation of sun-exposed skin caused by long-term amiodarone therapy, due to deposition of the drug and its metabolites in dermal macrophages. It is dose-related, more pronounced in photodistributed areas, and may be partially reversible upon drug cessation.

Synonyms:

Amiodarone-Induced Thyroid Dysfunction

Thyroid abnormalities occurring in approximately fifteen to twenty percent of patients on amiodarone due to the high iodine content of the molecule. Type one results from iodine-induced increased thyroid hormone synthesis in patients with underlying thyroid disease. Type two results from destructive thyroiditis.

Synonyms:

Amiodarone-induced vortex keratopathy

Whorl-like corneal epithelial deposits caused by amiodarone accumulation, appearing as golden-brown verticillata on slit-lamp examination, usually

asymptomatic but reversible upon drug discontinuation.

Synonyms:

Ammonia

A nitrogen-containing waste product produced during protein metabolism and normally converted to urea by the liver. Elevated blood ammonia may occur with liver failure, urea-cycle disorders, some medicines, or other metabolic conditions.

Synonyms:

Amnesia

Loss or impairment of memory that is greater than ordinary forgetting. It may affect the ability to form new memories (anterograde amnesia), recall past events (retrograde amnesia), or both.

Synonyms:

Amniocentesis

A procedure in which a needle is used to obtain amniotic fluid for genetic, chromosomal, infectious, or other prenatal testing. It is usually performed after the first trimester when clinically indicated; risks and benefits depend on the reason for testing and gestational age.

Synonyms:

Amnion

The innermost fetal membrane, lining the amniotic cavity and containing the amniotic fluid. A thin, avascular membrane composed of a single layer of cuboidal epithelium overlying a basement membrane and connective tissue. The amnion produces and resorbs amniotic fluid. It fuses with the chorion by 12-14 weeks.

Synonyms:

Amniotic Band Syndrome

A spectrum of congenital anomalies caused by strands of a ruptured amniotic membrane that constrict or entangle developing fetal parts. Effects range from ring-like limb constrictions, swelling, or loss of digits to facial and body-wall disruptions; severity varies widely, and management depends on

the structures involved.

Synonyms:

Amniotic Fluid

The clear to pale-yellow fluid surrounding the fetus within the amniotic sac. Early in pregnancy it is derived largely from maternal plasma; later, fetal urine and lung fluid are major sources, and the fetus continuously swallows and recycles it.

Synonyms:

Amniotic Fluid Embolism

A rare obstetric emergency involving sudden respiratory or cardiovascular collapse and often severe coagulopathy during labor, delivery, or shortly afterward. It requires immediate supportive and multidisciplinary treatment.

Synonyms:

Amniotic Fluid Index

An ultrasound estimate of amniotic-fluid volume obtained by dividing the uterus into four quadrants, measuring the deepest unobstructed vertical pocket in each quadrant, and adding the measurements. Interpretation uses gestational-age and practice-specific thresholds to identify unusually low or high fluid volume.

Synonyms:

Amoebiasis

Infection caused by the protozoan parasite *Entamoeba histolytica*, transmitted via the fecal-oral route (contaminated food or water).

Synonyms:

Amoxicillin rash in infectious mononucleosis

A maculopapular, non-allergic rash that develops in up to 90 percent of patients with Epstein-Barr virus infectious mononucleosis who receive amoxicillin or ampicillin. The rash is often widespread and pruritic, and its presence does not indicate true penicillin allergy.

Synonyms:

AMP (Adenosine Monophosphate)

A nucleotide composed of adenine, ribose, and a single phosphate group. Formed by hydrolysis of ADP ($\text{ADP} \rightarrow \text{AMP} + \text{Pi}$) or directly from ATP via adenylate kinase ($2 \text{ADP} \rightleftharpoons \text{ATP} + \text{AMP}$).

Synonyms: Adenosine Monophosphate

AMPK

AMP-activated protein kinase. Energy sensor. Activated by AMP. Inhibits anabolism, stimulates catabolism.

Synonyms:

Amputation

Surgical removal of a limb or part of a limb. The level may involve a digit, foot, lower leg, thigh, or hip, or a corresponding part of the upper limb. The level is selected according to tissue viability, function, and potential for rehabilitation.

Synonyms:

Amputation Stump

The remaining part of a limb after amputation. It must be monitored for wound healing, infection, poor circulation, neuroma pain, phantom-limb pain, and skin problems caused by prosthetic use. Care includes hygiene, compression or shaping when advised, progressive strengthening, and professional prosthetic and rehabilitation assessment.

Synonyms:

AMR (Antimicrobial Resistance)

The ability of a microorganism to survive or grow despite an antimicrobial medicine that would normally inhibit or kill it.

Synonyms: Antimicrobial Resistance

Amygdala

Almond-shaped nucleus cluster in the anterior medial temporal lobe, part of the limbic system, primarily processing emotions (especially fear/anxiety). Receives thalamic/cortical sensory input; projects to hypothalamus, brainstem, and cortex for autonomic/behavioral fear responses.

Synonyms:

Amylase

An enzyme that breaks down starch and is produced mainly by the salivary glands and pancreas. Blood levels may rise in several conditions, including some pancreatic disorders.

Synonyms:

Amylase and Lipase

Digestive enzymes measured in blood when pancreatic disease is suspected. Lipase is generally more specific for pancreatic injury and remains elevated longer than amylase, but neither test alone diagnoses acute pancreatitis; results must be interpreted with symptoms and imaging.

Synonyms:

Amylin Analogues

Medicines that mimic amylin, a hormone released with insulin by pancreatic beta cells. Pramlintide slows gastric emptying, reduces post-meal glucagon secretion, and may be used with insulin in selected patients with diabetes.

Synonyms:

Amyloid PET

A positron-emission tomography scan using a tracer that binds to amyloid deposits in the brain. It can support evaluation of selected cognitive disorders but is interpreted with clinical assessment and other tests.

Synonyms:

Amyloid purpura

Purpuric discoloration of the eyelids and periorbital skin (raccoon eyes) caused by cutaneous amyloid deposition, which weakens vessel walls and leads to extravasation of erythrocytes. It may be a sign of systemic amyloidosis, particularly AL amyloidosis, and warrants further workup including serum free light chains and tissue biopsy.

Synonyms:

Amyloidosis

A group of disorders characterized by the extracellular deposition of misfolded proteins that polymerize

into insoluble fibrils with a distinctive beta-pleated sheet configuration. These fibrils bind Congo red dye and show characteristic apple-green birefringence under polarized light microscopy.

Synonyms:

Amyotrophic Lateral Sclerosis

Progressive neurodegenerative disorder affecting both upper and lower motor neurons, causing weakness, atrophy, fasciculations, and eventually respiratory failure. Most cases are sporadic (90 percent); 10 percent are familial. Average age of onset 55-60 years.

Synonyms:

Anabolism

The set of metabolic pathways that construct complex molecules from simpler precursors, requiring energy input (ATP, reducing equivalents NADPH). Examples: protein synthesis from amino acids, glycogen synthesis (glycogenesis), fatty acid synthesis (lipogenesis), cholesterol synthesis, nucleotide synthesis, gluconeogenesis.

Synonyms:

Anaemia

A condition in which the number of red blood cells or the hemoglobin concentration is below the normal range, reducing the oxygen-carrying capacity of the blood.

Synonyms:

Anabolic Steroids

Synthetic derivatives of testosterone used in selected medical conditions and misused for muscle building or performance enhancement. Nonmedical use can cause acne, infertility, testicular shrinkage, breast enlargement, mood disturbance, and cardiovascular disease, and sudden cessation may produce symptoms of hormone deficiency.

Synonyms:

Anaerobe

A microorganism that grows without molecular oxygen. Obligate anaerobes may be injured or killed

by oxygen, while aerotolerant anaerobes tolerate oxygen but do not use it for energy production.

Synonyms:

Anal Abscess

Collection of pus in the perianal or ischiorectal space usually from infected anal glands. Presents with throbbing anal pain, swelling, fever, and difficulty sitting. Diagnosed clinically with tenderness and fluctuance. Treatment is incision and drainage under local anesthesia. Antibiotics are not routinely required for simple abscesses.

Synonyms:

Anal Canal

The terminal 3-4 cm of the gastrointestinal tract, extending from the anorectal junction (puborectalis/pectinate line) to the anal verge. Above the pectinate line: lined by columnar epithelium, innervated by autonomic nerves, draining to portal system, supplied by superior rectal artery.

Synonyms:

Anal Cancer

Malignant tumor of the anal canal or margin, most commonly squamous cell carcinoma associated with high-risk human papillomavirus infection. Presents with bleeding, pain, or a mass; primary treatment is chemoradiation, with surgery reserved for residual or recurrent disease.

Synonyms:

Anal Fissure

Linear tear in the distal anal mucosa usually posterior in the midline. Presents with painful defecation and bright red blood on wiping or in the toilet. Associated with constipation, hard stools, and chronic diarrhea. The internal anal sphincter spasm perpetuates the fissure by reducing blood flow to the posterior midline.

Synonyms:

Anal Fistula

Abnormal tract connecting the anal canal to the perianal skin usually following a drained abscess.

Presents with recurrent drainage, pain, and pruritus. Parks classification categorizes fistulae by relationship to the sphincter muscles. Diagnosed by examination under anesthesia and MRI.

Synonyms:

Anal Intercourse

The insertion of the penis into the anus and rectum for sexual pleasure. The anal canal is rich in nerve endings, making it a sensitive erogenous zone. The rectum lacks natural lubrication, so artificial lubricants are essential to prevent mucosal trauma.

Synonyms:

Anal Itching

Pruritus around the anus. Common causes include irritation, moisture, dermatitis, hemorrhoids, infections, and occasionally pinworms or other disease. Gentle cleansing, keeping the area dry, and avoiding irritants may help; persistent, severe, bleeding, or painful symptoms require medical evaluation.

Synonyms:

Analgesic

A drug that relieves pain without producing loss of consciousness.

Synonyms:

Analgesic Nephropathy

Chronic tubulointerstitial renal injury associated with prolonged or excessive use of analgesic medicines. It may cause impaired urinary concentration, sterile pyuria, haematuria, papillary necrosis, hypertension, and progressive chronic kidney disease.

Synonyms:

Analysis of Urine

Laboratory examination of urine for cells, blood, protein, glucose, microorganisms, and other substances.

Synonyms:

Analytic Sensitivity

The smallest amount or concentration of an ana-

lyte that a laboratory method can reliably detect. It concerns measurement performance and differs from clinical sensitivity, which describes detection of disease in affected patients.

Synonyms:

Anaphylactic Shock

A severe, potentially life-threatening systemic hypersensitivity reaction characterized by rapid onset of multisystem involvement, primarily affecting the skin, respiratory tract, cardiovascular system, and gastrointestinal tract. See Anaphylaxis.

Synonyms:

Anaphylaxis

A severe, potentially life-threatening systemic hypersensitivity reaction characterized by rapid onset of multisystem involvement, primarily affecting the skin, respiratory tract, cardiovascular system, and gastrointestinal tract.

Synonyms:

Anaphylaxis During Anesthesia

A life-threatening systemic hypersensitivity reaction that may cause sudden hypotension, bronchospasm, cardiovascular collapse, and sometimes urticaria or flushing. Common perioperative triggers include neuromuscular-blocking agents, antibiotics, chlorhexidine, and latex.

Synonyms:

Anaplasia

A lack of differentiation, describing cells that have reverted to a more primitive, embryonic phenotype with loss of the specialized structural and functional characteristics of their tissue of origin.

Synonyms:

Anaplastic Thyroid Cancer

A rare, rapidly growing, and highly aggressive thyroid cancer that often presents as a large fixed neck mass with dysphagia or airway compromise. Prognosis is poor; management is usually palliative.

Synonyms:

Anastomosis (Vascular)

A surgical or natural connection between blood vessels that permits blood to flow from one vessel to another.

Synonyms: Vascular

Anastomotic Leak

Breakdown of a surgical anastomosis in the gastrointestinal tract causing spillage of luminal contents into the peritoneal cavity. Presents with fever, tachycardia, abdominal pain, leukocytosis, and peritonitis. Diagnosed by CT with oral or rectal contrast showing extraluminal contrast or fluid collection.

Synonyms:

Anatomical Axis

An imaginary straight line around which a body part moves or rotates.

Synonyms:

Anatomical Planes

Hypothetical flat surfaces that pass through the body in anatomical position, used to slice the body for anatomical descriptions or medical imaging.

Synonyms:

Anatomical Position

The standard reference position of the body used to describe anatomy, defined as standing erect, facing forward, with arms at the sides and palms facing forward.

Synonyms:

Anatomical Snuffbox

Triangular depression on the dorsal wrist, bounded by extensor pollicis longus medially and extensor pollicis brevis/abductor pollicis longus laterally. Floor contains the scaphoid, trapezium, and radial artery. Tenderness after a fall on an outstretched hand suggests scaphoid fracture. The radial artery pulse is palpable here.

Synonyms:

Anatomy

Study of body structure. Regions: head, neck, tho-

rax, abdomen, pelvis, extremities. Systems: skeletal, muscular, nervous, circulatory, respiratory, digestive, urinary, reproductive, endocrine, immune.

Synonyms:

Anatomy Survey (Level II Ultrasound)

A comprehensive fetal ultrasound performed at 18-22 weeks to evaluate fetal anatomy and screen for structural anomalies.

Synonyms: Level II ultrasound; anatomy scan.

Anemia in Pregnancy

Anemia occurring during pregnancy, commonly because of iron deficiency or the normal plasma-volume expansion of pregnancy. Assessment considers hemoglobin, mean corpuscular volume, iron status, folate, vitamin B12, bleeding, and other causes.

Synonyms: Gestational anemia; pregnancy-associated anemia.

Apgar Score

A structured assessment of a newborn's appearance, pulse, grimace, activity, and respiration, usually recorded at 1 and 5 minutes after birth. It describes immediate adaptation after delivery and helps guide resuscitation; it is not a standalone diagnosis or long-term prognostic test.

Synonyms: Apgar assessment; newborn Apgar score.

ANCA-Associated Vasculitis

A group of small-vessel vasculitides associated with antineutrophil cytoplasmic antibodies. Includes granulomatosis with polyangiitis (c-ANCA/PR3), microscopic polyangiitis (p-ANCA/MPO), and eosinophilic granulomatosis with polyangiitis (p-ANCA/MPO with asthma/eosinophilia).

Synonyms:

Ancillary Test (Pathology)

A test performed in addition to routine morphology to refine a pathologic diagnosis. Examples include IHC, flow cytometry, cytogenetics, molecular testing, special stains, and electron microscopy.

Synonyms: Pathology

Ancylostoma (Hookworm)

Nematode infestation by *Ancylostoma duodenale* (Old World) or *Necator americanus* (New World), common in tropical and subtropical regions where sanitation is poor.

Synonyms: Hookworm

Androgen Deficiency

Hypogonadism in males: reduced testosterone production causing symptoms and signs. Causes: primary (testicular—Klinefelter, mumps orchitis, chemotherapy, trauma) and secondary (pituitary/hypothalamic—prolactinoma, iron overload, pituitary lesions, opioids, obesity, aging).

Synonyms:

Androgen Insensitivity Syndrome

A difference of sex development in which the cells of a genetically male fetus cannot respond to androgens because of a defect in the androgen receptor. Affected individuals have typical female external genitalia and breast development but no uterus, and testes that may lie in the groin or abdomen; diagnosis and care require specialist endocrine and genetic assessment.

Synonyms:

Androgenetic Alopecia

The most common cause of hair loss, caused by progressive miniaturization of genetically susceptible hair follicles under androgen influence. Male pattern commonly affects the frontal hairline and vertex; female pattern commonly causes diffuse crown thinning with relative preservation of the frontal hairline.

Synonyms:

Andropause

Age-related testosterone decline in men. Symptoms: fatigue, decreased libido, depression. Treatment controversial.

Synonyms:

Anejaculation

Absence of ejaculation. Causes: neurological, surgical, pharmacological, psychological.

Synonyms:

Anemia

A reduction in the oxygen-carrying capacity of the blood, defined by a hemoglobin concentration below the normal range for age and sex: less than 13.5 g/dL in adult males, less than 12.0 g/dL in adult females.

Synonyms:

Anemia (Cancer)

Anemia occurring in a person with cancer, caused by the cancer itself, bleeding, inflammation, nutritional deficiency, or treatment. Evaluation identifies the cause; management may include treating the underlying problem, iron or other replacement, transfusion, or selected medicines.

Synonyms: Cancer

Anemia of Chronic Disease

Anemia of inflammation. Normocytic or microcytic. Low iron, low TIBC, normal/high ferritin.

Synonyms:

Anencephaly

A fatal neural tube defect where the cerebral hemispheres and cranial vault fail to develop due to failed closure of the rostral neuropore during the fourth week of gestation. The brainstem and spinal cord are present, and reflex movements may occur, but there is no cognitive function.

Synonyms:

Anergy

State of T-lymphocyte non-responsiveness to nominal antigen despite prior sensitization, reflecting functional inactivation rather than cell death.

Synonyms:

Anesthesia

The use of medications to prevent sensation, particularly pain, during medical procedures or surgery.

Synonyms:

Anesthesia for Coagulopathy

Coagulopathy can increase bleeding risk during an operation or invasive procedure. Anesthetic planning considers the cause, bleeding history, platelet count, coagulation tests, fibrinogen, the procedure, and available correction or replacement therapies.

Synonyms:

Anesthesia for Epilepsy

Patients with epilepsy generally require continuation of antiseizure medication perioperatively because missed doses increase seizure risk. Propofol and benzodiazepines are anticonvulsant; high concentrations of some volatile agents may produce epileptiform activity.

Synonyms:

Anesthesia for Hemophilia

Hemophilia A results from factor VIII deficiency and hemophilia B from factor IX deficiency. Perioperative care is coordinated with hematology and uses factor replacement or, in selected mild hemophilia A cases, desmopressin.

Synonyms:

Anesthesia for Neurosurgery

Neuroanesthesia aims to maintain cerebral perfusion pressure (CPP = mean arterial pressure minus intracranial pressure), optimize brain relaxation, and minimize secondary brain injury. Induction agents (propofol, etomidate) reduce cerebral metabolic rate and intracranial pressure.

Synonyms:

Anesthesia for Pheochromocytoma

Anesthetic care for pheochromocytoma requires control of catecholamine effects before surgery, careful management of blood pressure and heart rate, and preparation for rapid hemodynamic changes.

Synonyms:

Anesthesia for Porphyria

Anesthetic care in acute porphyria requires avoid-

ance of medicines known to precipitate attacks and attention to nutrition, pain, and metabolic stability. The specific drug plan should be checked against a current porphyria-safety reference.

Synonyms:

Anesthesia Gas Analyzers

Anesthesia gas analyzers measure delivered and exhaled concentrations of oxygen, carbon dioxide, and volatile anesthetic agents. The oxygen analyzer measures inspired oxygen concentration; pulse oximetry measures peripheral hemoglobin oxygen saturation.

Synonyms:

Anesthesia Informatics

Anesthesia informatics integrates electronic health records, decision support systems, and data analytics into clinical practice. Automated documentation reduces charting time. Clinical decision support alerts for drug interactions and dosing errors. Big data analytics identify patterns in anesthesia outcomes.

Synonyms:

Anesthesia Machine

The anesthesia machine delivers precise mixtures of oxygen, air, and volatile anesthetics to the patient.

Synonyms:

Anesthesia Monitoring

Continuous assessment of vital functions during anesthesia, typically including oxygenation, ventilation, circulation, temperature, and depth of anesthesia as clinically indicated.

Synonyms:

Anesthesia Pharmacogenomics

Anesthesia pharmacogenomics studies genetic variations affecting drug response. Pseudocholinesterase deficiency causes prolonged succinylcholine paralysis. CYP2D6 polymorphisms affect codeine metabolism to morphine. Malignant hyperthermia susceptibility is linked to RYR1 gene mutations.

Synonyms:

Aneuploidy

The presence of an abnormal number of chromosomes in a cell, with either extra or missing copies of whole chromosomes, such as trisomy 21. It results from errors in cell division and is a major cause of miscarriage, congenital syndromes, and chromosomal disorders identified by prenatal testing.

Synonyms:

Aneurysm

A localized weakening and enlargement of a blood vessel. Aneurysms may occur in arteries or, rarely, veins and may rupture, dissect, or form emboli depending on their location and cause.

Synonyms:

Aneurysm Clip

Surgical clip occluding aneurysm neck. Materials: titanium, stainless steel. Indications: intracranial aneurysm. Placed via craniotomy. Complications: clip migration, vessel occlusion, rebleeding.

Synonyms:

Aneurysm Coils

Flexible coils, often made of platinum, placed inside an aneurysm to promote clotting and reduce blood flow into the aneurysm.

Synonyms:

Aneurysm Repair

Surgical or catheter-based treatment that excludes or replaces a weakened, dilated section of a blood vessel when the risk of rupture or other complications justifies intervention.

Synonyms:

Angelman Syndrome

A genetic disorder caused by loss of function of the UBE3A gene on chromosome 15 (maternal deletion or paternal uniparental disomy). Features: severe intellectual disability, absent speech, seizures, ataxia, and frequent laughter. Characteristic happy demeanor with hand-flapping movements.

Synonyms:

Angina Pectoris

Chest discomfort caused by myocardial ischemia without infarction. Stable angina occurs predictably with exertion and resolves with rest. Unstable angina occurs at rest or with minimal exertion and is an acute coronary syndrome. Prinzmetal (variant) angina occurs at rest due to coronary vasospasm.

Synonyms:

Angiodysplasia

Dilated, fragile blood vessels in the gastrointestinal mucosa or submucosa, often occurring in the right colon of older adults. They may cause intermittent or recurrent gastrointestinal bleeding and anemia.

Synonyms:

Angioedema

Rapid swelling of the deep dermis/subcutaneous and submucosal tissues (lips, eyelids, tongue, throat, hands, GI tract) due to mast cell mediator release (histamine—allergic/idiopathic, urticaria associated) or bradykinin-mediated (hereditary angioedema—C1 esterase inhibitor deficiency; ACE-inhibitor-induced).

Synonyms:

Angiogenesis

Formation of new blood vessels. Tumors induce angiogenesis for growth. Targeted by anti-angiogenic drugs (bevacizumab).

Synonyms:

Angiography

Invasive imaging of blood vessels by injecting contrast material under fluoroscopy. Coronary angiography (cardiac catheterization): assesses coronary artery stenosis, guides PCI. Cerebral angiography: evaluates aneurysms, AVMs, and vasculitis. Peripheral angiography: evaluates PAD and guides intervention.

Synonyms:

Angiomyolipoma

A benign renal tumor composed of blood vessels, smooth muscle, and fat; it is associated with tuber-

ous sclerosis and may cause retroperitoneal hemorrhage.

Synonyms:

Angioplasty

A procedure that widens a narrowed blood vessel, usually with a balloon and sometimes a stent. It is used most often for coronary or peripheral arterial disease.

Synonyms:

Angioplasty Balloon (Vascular)

An inflatable catheter balloon used to widen a narrowed blood vessel or expand a stent.

Synonyms: Vascular

Angiosarcoma

A rare, aggressive malignant tumor of blood vessel or lymphatic endothelial cells. Common sites include skin, breast, liver, and bone. Treatment typically involves wide surgical excision with chemotherapy and radiation.

Synonyms:

Angiotensin converting-enzyme inhibitor

A class of antihypertensive medications that block the conversion of angiotensin I to angiotensin II by inhibiting the angiotensin-converting enzyme, thereby reducing vasoconstriction and aldosterone secretion. Used to treat hypertension, heart failure, and diabetic nephropathy.

Synonyms:

Angiotensin Receptor Blockers

A class of cardiovascular drugs that selectively block the angiotensin II type 1 receptor, preventing the binding of angiotensin II and its effects including vasoconstriction, aldosterone secretion, and sympathetic activation.

Synonyms:

Anhedonia

The inability to experience pleasure from activities that were previously enjoyable. It is a core symptom of major depressive disorder and a negative

symptom of schizophrenia. It is mediated by dysfunction in the brain's reward circuitry, particularly the mesolimbic dopamine system.

Synonyms:

Anhidrosis

Absent or greatly reduced sweating. It may result from nerve damage, skin disease, dehydration, medications, or inherited conditions. Inability to sweat can cause dangerous overheating, especially during exercise or hot weather.

Synonyms:

Animal-Assisted Therapy

A structured intervention in which trained animals are incorporated into care to support defined therapeutic goals. It may be used to support engagement, mood, communication, or activity when appropriate safeguards are in place.

Synonyms:

Anion Gap

A calculated estimate of unmeasured serum anions, commonly sodium minus chloride and bicarbonate. An increased anion gap supports the presence of unmeasured acids in metabolic acidosis, but interpretation must account for albumin concentration and laboratory method.

Synonyms:

Anisocoria

Unequal pupil size. It may be physiologic or caused by disorders of the eye, autonomic nerves, or brain; sudden anisocoria with headache, eye pain, or neurologic symptoms requires urgent assessment.

Synonyms:

Anisocytosis

Increased variation in red blood cell size on a peripheral blood film (e.g., macrocytes with microcytes together), not a diagnosis in itself. Derived from the Greek "anisokytosis" (unequal cells). Quantified by an elevated red cell distribution width (RDW).

Synonyms:

Ankle Arthroplasty

Surgical replacement of the ankle joint with a prosthesis, usually for severe symptomatic ankle arthritis. Suitability depends on deformity, bone quality, infection risk, activity level, and the condition of the surrounding joints.

Synonyms:

Ankle Dislocation

Complete displacement of the ankle joint surfaces, usually resulting from a high-energy injury and often accompanied by a fracture, ligament damage, or neurovascular compromise. It causes severe pain, deformity, and inability to bear weight. The joint requires urgent reduction, imaging, and immobilization, with surgical management when instability or associated fractures demand it.

Synonyms:

Ankle Fractures

Ankle fractures: Weber classification (fibular fracture relative to syndesmosis): A (below syndesmosis, stable), B (at syndesmosis, variable stability), C (above syndesmosis, unstable). Lauge-Hansen: supination-external rotation (SER, most common), supination-adduction, pronation-external rotation, pronation-abduction.

Synonyms:

Ankle Joint

Uniaxial hinge synovial joint between distal tibia, lateral malleolus, and superior talus, allowing dorsiflexion/plantarflexion. Medial (deltoid) ligament resists eversion; lateral complex resists inversion. The ankle mortise provides bony stability.

Synonyms:

Ankle Pain

Pain in or around the ankle, commonly caused by sprain, fracture, tendinitis, arthritis, bursitis, or infection. Inability to bear weight, deformity, marked swelling, or fever requires prompt assessment.

Synonyms:

Ankle Sprain

An injury to the ligaments surrounding the ankle joint, most commonly involving the lateral ligament complex (anterior talofibular ligament [ATFL, most commonly injured], calcaneofibular ligament [CFL], and posterior talofibular ligament [PTFL]) from an inversion mechanism.

Synonyms:

Ankle Swelling

Enlargement around the ankle caused by injury, inflammation, infection, venous disease, lymphatic problems, or fluid retention. One-sided sudden swelling with pain, warmth, or shortness of breath may indicate a blood clot or infection and requires urgent assessment; swelling after trauma may require evaluation for fracture.

Synonyms:

Ankle-Brachial Index

The ratio of ankle systolic blood pressure to brachial systolic blood pressure. A low result supports peripheral arterial disease, while a very high result may indicate noncompressible arteries.

Synonyms:

Ankyloglossia (Tongue-Tie)

Short or thick lingual frenulum restricting tongue movement. May cause breastfeeding difficulties, speech problems, oral hygiene issues. Treatment: frenotomy (simple release) or frenuloplasty.

Synonyms: Tongue-Tie

Ankylosing Spondylitis

A chronic, progressive inflammatory disease primarily affecting the axial skeleton (sacroiliac joints and spine), characterized by inflammation at entheses (where tendons, ligaments, and joint capsules insert into bone), leading to new bone formation, syndesmophyte development, and eventual vertebral fusion (bamboo spine).

Synonyms:

Ankylosis

Abnormal stiffness or fusion of a joint. In dentistry,

it may refer to fusion of a tooth root to the surrounding bone.

Synonyms:

Annihilation

Positron-electron annihilation producing two 511 keV photons in opposite directions.

Synonyms:

Annular Pancreas

A congenital anomaly where a ring of pancreatic tissue completely or partially encircles the second portion of the duodenum, causing duodenal obstruction. It results from failure of the ventral pancreatic bud to completely rotate around the duodenum during embryogenesis.

Synonyms:

Anodontia

Complete absence of teeth. Rare, associated with ectodermal dysplasia.

Synonyms:

Anophthalmia

Congenital absence of the eye due to failure of optic vesicle development, often associated with syndromes (e.g., SOX2 mutations). Diagnosis by absence of globe on imaging or clinical examination; management requires early socket expansion and prosthetic fitting for orbital and facial development.

Synonyms:

Anorectal Abscess

A localized collection of pus in the tissues around the anus or rectum, usually caused by infection of an anal gland. It commonly causes severe anal pain, swelling, fever, and difficulty sitting. Prompt incision and drainage is the standard treatment.

Synonyms:

Anorectal Malformation

A congenital abnormality in which the anus or rectum does not develop normally or does not connect appropriately to the perineum. Types vary in anatomy and severity and usually require specialist

surgical assessment.

Synonyms:

Anorectal Manometry

Measurement of pressures in the anal canal and rectum to assess sphincter function and rectal sensation. A pressure-sensing catheter is inserted into the rectum and slowly withdrawn through the anal canal. Measures resting and squeeze pressures reflecting internal and external sphincter function respectively.

Synonyms:

Anorexia

Loss of appetite, distinct from anorexia nervosa (the eating disorder).

Synonyms:

Anorexia Nervosa

An eating disorder characterized by restriction of energy intake, intense fear of weight gain, and distorted body image. Highest mortality of any psychiatric disorder. Features: emaciation, lanugo, bradycardia, hypotension, amenorrhea, and electrolyte abnormalities. Diagnosis by DSM-5 criteria.

Synonyms:

Anorgasmia

Persistent or recurrent delay in, or absence of, orgasm following a normal sexual excitement phase.

Synonyms:

Anoscopy

Examination of the anal canal with a short lighted instrument called an anoscope. It is used to evaluate rectal bleeding, hemorrhoids, fissures, fistulas, and other anorectal disorders.

Synonyms:

Anosmia

Complete loss of the sense of smell. Causes include post-viral olfactory dysfunction, chronic rhinosinusitis with polyps, head trauma, neurodegenerative disease, congenital disorders such as Kallmann syndrome, medications, and toxic exposure.

Synonyms:

Anosognosia

Denial or unawareness of one's own neurologic deficit, classically hemiplegia following a nondominant (right) parietal lobe lesion. Associated with right middle cerebral artery strokes and sometimes with neglect of the left side of space.

Synonyms:

Anovulation

Failure to release an egg from the ovary during the menstrual cycle. It may cause irregular or absent periods, infertility, or abnormal bleeding and can result from hormonal disorders, excessive exercise, low body weight, stress, or polycystic ovary syndrome.

Synonyms:

Anoxia

Complete absence of oxygen supply to tissues, distinguished from hypoxia (reduced oxygen). Anoxia causes rapid cell death, particularly in highly aerobic tissues (brain, heart, kidneys).

Synonyms:

Antacids

Medications that neutralise gastric acid, providing rapid symptomatic relief in dyspepsia, gastroesophageal reflux, and peptic ulcer disease. Commonly contain aluminium hydroxide, magnesium hydroxide, calcium carbonate, or sodium bicarbonate.

Synonyms:

Antecubital Fossa

Triangular depression on the anterior elbow, bounded laterally by brachioradialis, medially by pronator teres, and superiorly by a line connecting the epicondyles. Floor formed by brachialis and supinator. Contains biceps tendon, brachial artery, and median nerve. Primary site for venipuncture and blood pressure measurement.

Synonyms:

Antemortem Injury

Injury inflicted upon a body prior to death, characterized microscopically and macroscopically by physiological tissue responses including hemorrhage, blood clotting, inflammatory cell infiltration, tissue edema, and active healing reactions (differentiating it from postmortem artifact).

Synonyms:

Antenatal

The period before birth, also called prenatal. The medical supervision and screening provided to pregnant women to monitor the health of the mother and fetus, detect complications early, and provide health education.

Synonyms: prenatal.

Antepartum Fetal Surveillance

The monitoring of fetal well-being in the third trimester for high-risk pregnancies. Methods: fetal kick counts (daily maternal counting of fetal movements), non-stress test (NST), biophysical profile (BPP, AFI, fetal tone, movement, breathing), and Doppler (umbilical artery, MCA).

Synonyms:

Antepartum Hemorrhage

Bleeding from the genital tract after the threshold of fetal viability and before birth. Important causes include placenta previa, placental abruption, vasa previa, and local cervical or vaginal lesions; maternal stabilization and fetal assessment are priorities.

Synonyms:

Anterior

Relating to the front of the body or positioned closer to the front.

Synonyms:

Anterior Chamber Angle

The anterior chamber angle is the anatomical region where the cornea and iris meet, and it contains the trabecular meshwork, the primary drainage structure for aqueous humor from the eye.

Synonyms:

Anterior Cruciate Ligament Injury

Tear of the ACL, a common sports injury (non-contact deceleration, pivoting, or hyperextension). Presents with a pop, immediate swelling (hemarthrosis), and giving way of the knee. Positive Lachman test (most sensitive), anterior drawer test, and pivot shift test.

Synonyms:

Anterior Cruciate Ligament Tear

ACL tear: common knee injury, often non-contact pivoting sports. Symptoms: popping sound, swelling, instability, inability to continue play. Diagnosis: Lachman test, anterior drawer, MRI. Treatment: surgical reconstruction (autograft/allograft), rehabilitation.

Synonyms:

Anterior Pituitary

The glandular portion of the pituitary that secretes ACTH, TSH, growth hormone, prolactin, FSH, and LH in response to hypothalamic releasing hormones. Its hormones regulate adrenal, thyroid, growth, lactation, and reproductive function.

Synonyms:

Anterior Tibial Artery

Arises from the popliteal artery, passes through the anterior intermuscular septum to the anterior compartment, continuing to the ankle as the dorsalis pedis artery. Supplies anterior leg and dorsal foot muscles. Palpable anterior to the lateral malleolus as the dorsalis pedis pulse.

Synonyms:

Anterior Uveitis

Anterior uveitis, also known as iritis or iridocyclitis when the ciliary body is involved, is inflammation of the anterior segment of the eye involving the iris and/or ciliary body, and it is the most common form of uveitis.

Synonyms: iritis or iridocyclitis when the ciliary body is.

Anterior/Posterior Drawer Test

A clinical test of knee stability. Anterior displacement assesses the anterior cruciate ligament, and posterior displacement assesses the posterior cruciate ligament.

Synonyms:

Anthrax

A serious infectious disease caused by the gram-positive bacterium *Bacillus anthracis*, which forms highly resistant spores that can persist in the environment for decades, and it is primarily a zoonotic disease of herbivores (cattle, sheep, goats) that can be transmitted to humans through contact with infected animals or their products.

Synonyms:

Anthropometry

Body measurements: weight, height, BMI, waist, hip, skinfold thickness. Assessment of nutritional status and body composition.

Synonyms:

Anti-CCP

An autoantibody against citrullinated proteins. It supports the diagnosis of rheumatoid arthritis and may be associated with a more erosive disease course, but it must be interpreted with the clinical findings.

Synonyms:

Anti-CCP Antibody

A blood antibody directed against citrullinated proteins. It can support assessment of rheumatoid arthritis and may be detectable before joint symptoms, but a positive or negative result is not diagnostic by itself.

Synonyms:

Anti-citrullinated peptide antibody

An autoantibody against citrullinated proteins that may support a diagnosis of rheumatoid arthritis. Its significance depends on the clinical context.

Synonyms:

Anti-dsDNA Antibody

An autoantibody directed against double-stranded DNA. It supports the diagnosis of systemic lupus erythematosus and may be associated with disease activity, particularly kidney involvement; results are interpreted with other findings.

Synonyms:

Anti-GBM Disease

Autoimmune disease with antibodies against alpha-3 chain of type IV collagen in glomerular and alveolar basement membranes. Presents with crescentic GN and pulmonary hemorrhage (Goodpasture syndrome). Linear IgG deposits on immunofluorescence. Treatment requires emergent plasmapheresis, cyclophosphamide, and corticosteroids.

Synonyms:

Anti-IgE Therapy

Omalizumab is a monoclonal antibody that binds free IgE, preventing it from binding to mast cells and basophils. It reduces allergic inflammation and is approved for moderate-to-severe persistent allergic asthma. It reduces exacerbations and the need for oral corticosteroids. It is administered by subcutaneous injection every 2–4 weeks.

Synonyms:

Anti-IL4 Receptor Therapy

Dupilumab is a monoclonal antibody blocking the IL-4 receptor alpha subunit, inhibiting both IL-4 and IL-13 signaling. It is approved for moderate-to-severe asthma with eosinophilic phenotype or oral corticosteroid dependence. It reduces exacerbations and improves lung function.

Synonyms:

Anti-IL5 Therapy

Treatment with monoclonal antibodies that block interleukin-5 signaling or its receptor, thereby reducing eosinophil production or survival. It is used for selected eosinophilic diseases, including some forms of severe asthma.

Synonyms:

Anti-inflammatory

A medicine or other treatment that reduces inflammation.

Synonyms:

Anti-MDA5 dermatomyositis

A clinically distinct subtype of dermatomyositis associated with anti-melanoma differentiation-associated gene 5 antibodies, characterised by skin-predominant disease, mechanic's hands, and a high risk of rapidly progressive interstitial lung disease.

Synonyms:

Anti-Mullerian Hormone

A hormone produced by granulosa cells of ovarian follicles. It is measured in selected fertility and reproductive evaluations, but it does not by itself determine fertility.

Synonyms:

Anti-Reflux Surgery

An operation intended to reduce reflux of stomach contents into the esophagus, usually by reinforcing the gastroesophageal junction. It may be considered for selected patients with gastroesophageal reflux disease or a hiatal hernia.

Synonyms:

Antianginal

A class of medications used to prevent or relieve angina pectoris (chest pain from myocardial ischemia).

Synonyms:

Antiarrhythmic

A drug used to treat or prevent abnormal cardiac rhythms. Drug classes act mainly on sodium channels, sympathetic stimulation, potassium channels, or calcium channels; selection depends on the rhythm and the patient's clinical condition.

Synonyms:

Antibiogram

A periodic summary of antimicrobial susceptibility patterns of bacterial isolates from a hospital or

laboratory. Guides empiric antibiotic therapy by showing local resistance patterns (e.g., % of *E. coli* susceptible to TMP-SMX). Updates annually.

Synonyms:

Antibiotic

A substance that kills or slows the growth of bacteria.

Synonyms:

Antibiotic cycling

A strategy in which the preferred antibiotic for a particular clinical use is changed at planned intervals. It is intended to limit selection of resistant organisms, although its benefit depends on local conditions and implementation.

Synonyms:

Antibiotic de-escalation

The process of narrowing antimicrobial spectrum based on microbiological results and clinical response. De-escalation aims to reduce selective pressure for resistance while maintaining therapeutic efficacy.

Synonyms:

Antibiotic mixing

A strategy in which different antibiotics are assigned concurrently to different patients with the same indication. It is intended to reduce uniform selection pressure for resistance in a patient population.

Synonyms:

Antibiotic Resistance

Bacteria resisting antibiotic effects. Mechanisms: enzymatic degradation, target modification, efflux pumps, membrane permeability. Driven by antibiotic overuse.

Synonyms:

Antibiotic resistance genes

Genes that encode mechanisms conferring resistance to antibiotics. These genes can be located on chromosomes, plasmids, or transposons. Major resistance genes include *mecA* (methicillin resistance

in *S. aureus*), *vanA/vanB* (vancomycin resistance in *Enterococcus*), and *blaKPC* (carbapenem resistance).

Synonyms:

Antibiotic Stewardship

Coordinated efforts to use antibiotics appropriately by selecting the right medicine, dose, route, and duration while reducing unnecessary treatment and resistance.

Synonyms:

Antibodies

Immunoglobulin proteins produced by B cells that bind to specific antigens. There are five classes: IgG (most abundant), IgM (first produced), IgA (mucosal immunity), IgE (allergic responses), and IgD. Antibodies neutralise pathogens, opsonise for phagocytosis, activate complement, and mediate antibody-dependent cellular cytotoxicity.

Synonyms:

Anticholinergic Burden

The cumulative effect of taking multiple medications with anticholinergic properties. It can cause dry mouth, constipation, urinary retention, blurred vision, confusion, and delirium, especially in elderly patients. Many psychiatric medications (TCAs, first-generation antipsychotics, some antihistamines) have anticholinergic effects.

Synonyms:

Anticholinergic Cognitive Burden Scale

A medication-review tool that estimates the total anticholinergic load of a patient's medicines. It supports risk assessment and deprescribing but does not replace individualized clinical judgment.

Synonyms:

Anticoagulant Monitoring

Laboratory assessment used to measure the effect or safety of an anticoagulant. The appropriate test depends on the drug and may include aPTT, anti-Xa activity, INR, or measurements of kidney function and blood counts.

Synonyms:

Anticoagulation

Treatment that reduces blood clot formation by inhibiting the coagulation system. It is used for conditions such as venous thromboembolism and selected cardiac or vascular disorders.

Synonyms:

Anticodon

A three-nucleotide sequence at one end of transfer RNA that base-pairs with a complementary messenger RNA codon during translation, ensuring the correct amino acid is incorporated into the growing polypeptide.

Synonyms:

Anticonvulsant Mood Stabilizers

Antiepileptic drugs used as mood stabilizers in bipolar disorder. Valproate (divalproex) is effective for acute mania and rapid cycling. Carbamazepine is effective for acute mania but has numerous drug interactions via CYP3A4 induction. Lamotrigine is effective for bipolar depression prevention but not acute mania.

Synonyms:

Anticonvulsants

Medications used to prevent or control seizures in epilepsy and other seizure disorders.

Synonyms:

Antidiabetic

A class of medications used to manage diabetes mellitus by lowering blood glucose levels through various mechanisms.

Synonyms:

Antidiarrheal

A drug that reduces the frequency or volume of diarrhea. Some antidiarrheals should be avoided when there is bloody diarrhea, high fever, suspected invasive infection, or ileus.

Synonyms:

Antidiuretic Hormone

A hypothalamic hormone released from the posterior pituitary in response to increased plasma osmolality or reduced effective circulating volume. It increases collecting-duct water permeability through V2 receptors and promotes vasoconstriction through V1 receptors.

Synonyms:

Antidiuretic Hormone Physiology

Antidiuretic hormone also known as vasopressin is synthesized in the supraoptic and paraventricular nuclei of the hypothalamus and stored in the posterior pituitary. Released in response to increased serum osmolality detected by hypothalamic osmoreceptors and decreased blood volume detected by baroreceptors.

Synonyms: vasopressin is synthesized in the supraoptic and.

Antidiuretic Hormone Resistance

Impaired renal response to vasopressin, causing excessive production of dilute urine and polydipsia. Causes include lithium, hypercalcemia, hypokalemia, chronic kidney disease, and inherited defects of the vasopressin receptor or aquaporin pathway.

Synonyms:

Antidote

Substance that counteracts poison toxicity. Specific: naloxone (opioids), flumazenil (benzodiazepines), N-acetylcysteine (acetaminophen), digoxin immune Fab (digoxin), chelators (EDTA, deferoxamine, dimercaprol), atropine + pralidoxime (organophosphates), methylene blue (methemoglobinemia), cyanide antidote kit (nitrite + thiosulfate).

Synonyms:

Antiemetic

A medication that prevents or treats nausea and vomiting.

Synonyms:

Antiepileptic Drugs

Medications used to prevent and control seizures by modulating neuronal excitability through various mechanisms. They can be classified by their primary mechanism of action.

Synonyms:

Antifungal

A drug used to treat fungal infections.

Synonyms:

Antifungal drug classes

Major classes of antifungal agents include polyenes (amphotericin B), azoles (fluconazole, voriconazole), echinocandins (caspofungin, micafungin), and allylamines (terbinafine). Polyenes bind to ergosterol in fungal cell membranes. Azoles inhibit ergosterol synthesis. Echinocandins inhibit cell wall synthesis.

Synonyms:

Antifungal prophylaxis

The use of antifungal agents to prevent invasive fungal infections in high-risk patients. Common indications include prolonged neutropenia, hematopoietic stem cell transplantation, and advanced HIV infection. Fluconazole, posaconazole, and micafungin are used for prophylaxis.

Synonyms:

Antifungal resistance

The ability of fungi to withstand the effects of antifungal agents. Resistance can be intrinsic or acquired. Azole resistance occurs through efflux pumps and target mutations. Echinocandin resistance occurs through FKS gene mutations. Amphotericin B resistance is rare.

Synonyms:

Antigen

A molecule or molecular structure specifically recognized by an antibody, B-cell receptor, or T-cell receptor. An immunogen is an antigen capable of inducing an immune response; antigenicity and immunogenicity are related but not synonymous properties.

Synonyms:

Antigen Detection Test

A diagnostic assay that identifies a pathogen-derived antigen in a clinical specimen using a specific antibody or related binding reagent. It is generally rapid but may be less sensitive than nucleic-acid amplification, especially when organism burden is low.

Synonyms:

Antigen-Presenting Cell

Specialized immune cells that process protein antigens and display peptide fragments bound to Major Histocompatibility Complex (MHC) molecules on their surface for recognition by T-cell receptors. Professional APCs: dendritic cells (most potent for naive T cells), macrophages, and B cells.

Synonyms:

Antigenic Drift

The gradual accumulation of point mutations in viral surface antigens (hemagglutinin, neuraminidase) during replication, allowing influenza viruses to evade pre-existing antibodies and cause recurrent seasonal epidemics. Drift is continuous and selected by host immunity; it is why the seasonal vaccine is updated annually.

Synonyms:

Antigenic Shift

A major, abrupt change in the antigenic structure of a virus (especially influenza A) resulting from genetic reassortment between different strains (e.g., human and avian viruses) infecting the same cell.

Synonyms:

Antigenic variation

The process by which pathogens change their surface proteins to evade immune recognition. Antigenic drift: gradual changes in surface proteins. Antigenic shift: major changes through reassortment of genome segments. Influenza virus demonstrates both mechanisms. Trypanosomes and Plasmodium also use antigenic variation.

Synonyms:

Antigout

A class of medications used to treat gout by reducing uric acid levels or controlling acute inflammation.

Synonyms:

Antihistamine

A drug that blocks histamine receptors. H1 antihistamines treat allergic rhinitis, urticaria, pruritus, and (older sedating agents) insomnia and motion sickness. First-generation (diphenhydramine, chlorpheniramine): CNS-penetrant—sedating, anticholinergic (dry mouth, urinary retention, confusion in elderly).

Synonyms:

Antihypertensive

A medicine used to lower blood pressure. Classes include ACE inhibitors, angiotensin-receptor blockers, calcium-channel blockers, thiazide-type diuretics, beta-blockers, and other agents. Selection depends on blood pressure, kidney function, cardiovascular disease, pregnancy, and other clinical factors.

Synonyms:

Antihypertensives in Pregnancy

Medications used to treat hypertension in pregnancy.

Synonyms:

Antimicrobial

A general term for antibiotics and other drugs that fight microscopic organisms in the body, such as bacteria, viruses, fungi, and parasites.

Synonyms:

Antimicrobial adverse effects

Side effects associated with antimicrobial agents. Beta-lactams can cause allergic reactions. Fluoroquinolones can cause tendon rupture and QT prolongation. Aminoglycosides can cause nephrotoxicity and ototoxicity. Azole antifungals can cause hepatotoxicity.

Synonyms:

Antimicrobial desensitization

A procedure that administers gradually increasing doses of an antimicrobial to temporarily induce tolerance in a person with a documented or strongly suspected immediate allergy. It may be considered when that antimicrobial is clinically necessary and suitable alternatives are not available.

Synonyms:

Antimicrobial dosing optimization

Strategies to ensure antimicrobial agents achieve therapeutic concentrations at the site of infection. Optimization includes appropriate drug selection, dosing interval, route of administration, and duration of therapy. Extended or continuous infusion of beta-lactams may improve outcomes. Weight-based dosing is important for many agents.

Synonyms:

Antimicrobial drug interactions

Interactions between antimicrobial agents and other medications. Fluoroquinolones chelate divalent cations. Macrolides inhibit CYP3A4. Rifampin is a potent enzyme inducer. Azole antifungals inhibit CYP3A4. Understanding drug interactions is essential for safe prescribing and preventing adverse effects.

Synonyms:

Antimicrobial hypersensitivity reactions

Immune-mediated reactions to antimicrobial agents that may range from a mild rash to life-threatening anaphylaxis. The reaction depends on the drug, the patient, and the type of immune response.

Synonyms:

Antimicrobial pharmacodynamics

The relationship between antimicrobial drug concentrations and their effect on microorganisms. Time-dependent antibiotics (beta-lactams) are most effective when concentrations remain above the MIC. Concentration-dependent antibiotics (aminoglycosides) are most effective with high peak concentrations.

Synonyms:

Antimicrobial pharmacokinetics

The absorption, distribution, metabolism, and elimination of antimicrobial agents. Pharmacokinetics varies by drug class, patient factors, and disease state. Renal impairment affects elimination of many antibiotics. Hepatic impairment affects metabolism of many antifungals.

Synonyms:

Antimicrobial Resistance

Microorganisms becoming resistant to antibiotics. Major global health threat. Prevention: appropriate antibiotic use, infection control.

Synonyms:

Antimicrobial Resistance Mechanisms

Biological processes that allow microorganisms to survive antimicrobial exposure, including drug inactivation, modification of the drug target, reduced permeability, and active drug efflux.

Synonyms:

Antimicrobial resistance surveillance

The systematic monitoring of antimicrobial resistance patterns in clinical isolates. Surveillance programmes track resistance rates over time and guide empiric therapy. National and international networks share resistance data.

Synonyms:

Antimicrobial Stewardship

Coordinated actions that promote appropriate antimicrobial selection, dose, route, and duration to improve patient outcomes and limit resistance, adverse effects, and unnecessary cost.

Synonyms:

Antimicrobial susceptibility testing

Laboratory methods used to estimate how susceptible a microorganism is to antimicrobial agents. Methods include disk diffusion, broth microdilution, and automated systems. Results are interpreted using standardized breakpoints and can help guide antimicrobial therapy.

Synonyms:

Antineoplastic

A medicine or other treatment that inhibits the growth or survival of abnormal cells, especially cancer cells.

Synonyms:

Antinuclear Antibody

ANA: autoantibodies against nuclear components (DNA, histones, ribonucleoproteins, etc.), detected by immunofluorescence (HEp-2 cells), reported with pattern (homogeneous, speckled, nucleolar, centromere) and titer.

Synonyms:

Antioxidant

A substance that limits oxidation by reacting with oxidizing molecules or free radicals.

Synonyms:

Antiparasitic

A drug used to treat infections caused by parasites (protozoa and helminths). Antiprotozoals: metronidazole (Giardia, amebiasis, trichomoniasis), tinidazole, chloroquine and artemisinin combinations (malaria), pyrimethamine (toxoplasmosis), pentamidine, and nifurtimox (Chagas).

Synonyms:

Antiparkinson

A class of medications used to manage Parkinson disease symptoms by restoring dopaminergic activity or modulating other neurotransmitter systems.

Synonyms:

Antiparkinsonian

A drug used to treat Parkinson disease and drug-induced parkinsonism.

Synonyms:

Antiphospholipid Antibodies

Include lupus anticoagulant (prolongs phospholipid-dependent coagulation tests), anticardiolipin antibodies (IgG/IgM), and anti-beta-2-glycoprotein I antibodies. Detected on ≥ 2 occasions 12 weeks apart. Clinical criteria: vascular thrombosis or preg-

nancy morbidity. Can be transient (infection, drugs) or persistent.

Synonyms:

Antiphospholipid Antibody

An autoantibody directed against phospholipid-binding proteins. Persistent antibodies may be associated with thrombosis or pregnancy complications, particularly in antiphospholipid syndrome.

Synonyms:

Antiphospholipid Syndrome

A systemic autoimmune thrombophilia characterized by arterial and venous thrombosis, pregnancy morbidity, and persistent antiphospholipid antibody positivity.

Synonyms:

Antiplatelet Therapy

Treatment with medicines that reduce platelet activation or aggregation, such as aspirin or clopidogrel, when clinically indicated to reduce arterial clotting.

Synonyms:

Antipruritic

A medication that relieves itching (pruritus).

Synonyms:

Antipsychotic

A drug used to treat psychotic disorders (schizophrenia, schizoaffective disorder, psychosis in bipolar/manic states and delirium). Typical (first-generation): haloperidol, chlorpromazine—D2 blockade, high EPS/tardive dyskinesia risk, hyperprolactinemia.

Synonyms:

Antipsychotic-Induced Parkinsonism

Drug-induced bradykinesia, rigidity, tremor, or postural instability caused by dopamine-receptor blockade, usually from antipsychotic treatment. Management involves reviewing the medication, dose, alternatives, and symptomatic treatment when appropriate.

Synonyms:

Antipyretic

A drug that reduces fever by lowering the hypothalamic set point, typically by inhibiting prostaglandin synthesis in the preoptic hypothalamus. Acetaminophen and NSAIDs (ibuprofen, aspirin) are the principal antipyretics.

Synonyms:

Antiretroviral therapy

Treatment of HIV infection with combinations of antiretroviral agents. ART targets multiple steps in the viral life cycle including entry, reverse transcription, integration, and maturation. Combination ART suppresses viral replication and restores immune function. ART is lifelong therapy.

Synonyms:

Antiseptic

Substances used on wounds to prevent or treat infection; they kill or slow the growth of diseasecausing organisms, such as bacteria, on the surface of the body.

Synonyms:

Antisocial Personality Disorder

A pattern of disregard for and violation of the rights of others occurring since age 15 years. At least three of seven criteria: failure to conform to social norms, deceitfulness, impulsivity, irritability and aggressiveness, reckless disregard for safety, consistent irresponsibility, and lack of remorse.

Synonyms:

Antispasmodic

A medication that reduces smooth muscle spasm, primarily in the gastrointestinal tract. Anticholinergic agents: hyoscyamine, dicyclomine, atropine — block muscarinic M3 receptors on GI smooth muscle, reducing contractions and peristalsis, used for irritable bowel syndrome and functional dyspepsia.

Synonyms:

Antistreptolysin O Titer

A blood test that measures antibodies against streptolysin O, a toxin produced by group A streptococci.

Rising or elevated titers support recent streptococcal infection and help evaluate suspected rheumatic fever or poststreptococcal glomerulonephritis, although a single value does not prove active infection.

Synonyms:

Antisynthetase Syndrome

An autoimmune disorder associated with antibodies against aminoacyl-tRNA synthetases, especially anti-Jo-1. It may cause interstitial lung disease, inflammatory muscle disease, arthritis, fever, Raynaud phenomenon, or mechanic's hands.

Synonyms:

Antithrombin

Natural anticoagulant. Inhibits thrombin, factor Xa. Deficiency causes thrombosis.

Synonyms:

Antithrombin Deficiency

A rare (1 in 2,000-5,000), strongly thrombophilic inherited disorder (autosomal dominant). Antithrombin (previously antithrombin III) is a serine protease inhibitor that inactivates thrombin and factors Xa, IXa, XIa, and XIIa. Heterozygous: 10-50 fold increased VTE risk, more severe than factor V Leiden.

Synonyms:

Antithrombin III deficiency

An inherited or acquired thrombophilia caused by reduced antithrombin activity, leading to increased risk of venous thromboembolism.

Synonyms:

Antithyroid

A medicine or treatment that reduces thyroid-hormone production or activity. Examples include thioamides, radioactive iodine, and medicines that reduce the effects of thyroid hormone; the choice depends on the cause and clinical situation.

Synonyms:

Antitubercular Agents

Antimicrobial drugs used to treat *Mycobacterium*

tuberculosis infections.

Synonyms:

Antitussive

A medication that suppresses the cough reflex, used for dry, non-productive cough.

Synonyms:

Antiviral

A class of drugs that inhibit viral replication, used to treat viral infections.

Synonyms:

Antiviral drug classes

Major classes of antiviral agents include nucleoside analogues (acyclovir, tenofovir), protease inhibitors (ritonavir, atazanavir), reverse transcriptase inhibitors (efavirenz, sofosbuvir), and neuraminidase inhibitors (oseltamivir). Each class targets a specific step in the viral replication cycle.

Synonyms:

Antrochoanal polyp

A benign, single nasal polyp originating from the maxillary sinus mucosa and extending through the accessory ostium into the choana and nasopharynx. It is most common in children and young adults, presenting with unilateral nasal obstruction and rhinorrhea. Treatment is endoscopic surgical removal.

Synonyms:

Anuria

Near absence of urine production, often defined in adults as less than about 100 milliliters in 24 hours.

Synonyms:

Anus

The terminal opening of the gastrointestinal tract through which feces are expelled. It is surrounded by the internal smooth-muscle sphincter and external skeletal-muscle sphincter.

Synonyms:

Anxiety

A normal emotional response to perceived danger, but anxiety disorders involve excessive, persistent worry that interferes with daily life. Symptoms can include restlessness, rapid heart rate, muscle tension, and avoidance behaviors.

Synonyms:

Anxiety Disorder

A group of psychiatric conditions characterized by excessive fear, anxiety, and related behavioral disturbances. Includes generalized anxiety disorder (GAD), panic disorder, social anxiety disorder, specific phobias, and agoraphobia.

Synonyms:

Anxiolytic

A medicine or other treatment that reduces anxiety. Choice depends on the anxiety disorder, urgency, coexisting conditions, adverse effects, and patient preference; psychological therapies and, when appropriate, antidepressant medicines are commonly used for persistent anxiety.

Synonyms:

Aorta

Largest artery, from the left ventricle distributing oxygenated blood systemically. Approximately 30 cm long, 2.5 cm diameter. Four segments: ascending aorta, aortic arch (brachiocephalic trunk, left common carotid, left subclavian), descending thoracic aorta, descending abdominal aorta (bifurcating into common iliacs at L4).

Synonyms:

Aortic Aneurysm

A permanent, localized enlargement of the aorta caused by weakening of its wall. It may occur in the thoracic or abdominal aorta and can enlarge, dissect, or rupture; management depends on its site, size, growth, symptoms, and the patient's risk.

Synonyms:

Aortic Aneurysm Rupture

Full-thickness failure of an aortic aneurysm with

bleeding into a body cavity or surrounding tissue. Ruptured aneurysm commonly causes sudden pain, shock, and collapse and requires immediate resuscitation and operative or endovascular repair.

Synonyms:

Aortic Aneurysm Screening

Evaluation of selected people for an aortic aneurysm before symptoms develop. Screening may use abdominal ultrasonography or other imaging according to the person's risk.

Synonyms:

Aortic Arch

Curves from second right sternocostal joint superiorly and left, then posteriorly and inferiorly to T4. From right to left: brachiocephalic trunk, left common carotid, left subclavian. Related to left recurrent laryngeal nerve (hooking under it), trachea, esophagus, left phrenic nerve. Arch aneurysms may cause hoarseness and SVC syndrome.

Synonyms:

Aortic Coarctation

Congenital narrowing of the aorta, usually near the insertion of the ductus arteriosus. It causes higher blood pressure and stronger pulses in the arms than in the legs, with a radio-femoral delay; severe neonatal disease may present with shock when the ductus closes.

Synonyms:

Aortic Dissection

A tear in the inner layer of the aorta that allows blood to enter the wall and form a false channel. Stanford type A involves the ascending aorta; type B does not. Treatment depends on the type, symptoms, complications, and overall clinical condition.

Synonyms:

Aortic embolism

Obstruction of a systemic artery by material originating in the aorta, such as thrombus or atheromatous debris, causing distal ischemia.

Synonyms:

Aortic Graft Infection

Infection involving a prosthetic or endovascular aortic graft, potentially causing sepsis, pseudoaneurysm, hemorrhage, or aortoenteric fistula. Management usually requires prolonged antimicrobial treatment and individualized surgical or endovascular source control.

Synonyms:

Aortic Regurgitation

Incomplete closure of the aortic valve allowing blood to flow backward from the aorta to the left ventricle during diastole. Causes include bicuspid aortic valve, endocarditis, aortic root dilation, hypertension, and connective tissue disorders. Murmur: early diastolic decrescendo murmur at the left sternal border.

Synonyms:

Aortic Regurgitation Murmur

Early diastolic decrescendo murmur heard best at the left sternal border with the patient sitting up and leaning forward in end-expiration. Wide pulse pressure, water-hammer pulses (Corrigan pulse), de Musset sign (head bobbing with each pulse), and Duroziez sign (femoral bruit with compression).

Synonyms:

Aortic Stenosis

Narrowing of the aortic valve opening, obstructing left ventricular outflow. It is the most common valvular disease in developed countries, usually caused by calcific degeneration. Symptoms include angina, syncope, and heart failure (SAD triad).

Synonyms:

Aortic Stenosis Grading

Severity grading: mild (valve area >1.5 cm², mean gradient <20 mmHg), moderate (valve area 1.0-1.5 cm², mean gradient 20-40 mmHg), severe (valve area <1.0 cm², mean gradient >40 mmHg). Very severe (valve area <0.6 cm², mean gradient >60 mmHg) indicates critical stenosis. Grading guides timing of intervention.

Synonyms:

Aortic Valve

A semilunar valve between the left ventricle and aorta, normally composed of right, left, and non-coronary cusps. It opens during systole and closes during diastole to direct blood flow. Each cusp forms a sinus of Valsalva from which coronary arteries originate. Opens during systole; closes during diastole.

Synonyms:

Aortic Valve Disease

Abnormal narrowing, leakage, or structural change of the valve between the left ventricle and aorta. It may cause chest pain, breathlessness, fatigue, fainting, or no symptoms initially. Evaluation commonly includes examination and echocardiography; severe disease may require specialist treatment.

Synonyms:

Aortography

Contrast imaging of aorta. Evaluates aneurysm, dissection, occlusion. Largely replaced by CTA/MRA.

Synonyms:

APACHE II Score

Severity scoring system for critically ill patients incorporating physiological variables, age, and chronic health status to generate scores from zero to seventy-one. Higher scores indicate greater severity and higher mortality. In acute pancreatitis, scores of eight or greater indicate severe disease.

Synonyms:

APC Tumor Suppressor

The adenomatous polyposis coli protein is a large multidomain tumor suppressor that functions as a critical negative regulator of the canonical Wnt signaling pathway.

Synonyms:

Apert Syndrome

An autosomal dominant craniosynostosis syndrome caused by FGFR2 mutations (most commonly Ser252Trp or Pro253Arg).

Synonyms:

APGAR Score

A scoring system developed by Virginia Apgar in 1952 to assess the newborn's immediate condition at 1 and 5 minutes after birth. Five components (each scored 0, 1, or 2): Appearance (skin color), Pulse (heart rate), Grimace (reflex irritability), Activity (muscle tone), and Respiration (breathing effort).

Synonyms:

Aphasia

Impairment of language comprehension or production resulting from brain damage, most commonly from stroke affecting the left hemisphere (dominant) language areas.

Synonyms:

Apheresis

A procedure that removes a selected blood component, such as plasma, platelets, or abnormal cells, and returns the remaining components to the patient or donor.

Synonyms:

Aphonia

Complete loss of the ability to phonate, distinct from dysphonia in which voice is present but abnormal. Causes are organic (bilateral vocal cord paralysis, severe laryngitis, laryngeal trauma, structural lesions) or psychogenic (conversion disorder, muscle tension dysphonia). Whispered speech and cough are usually preserved.

Synonyms:

Aphthous Stomatitis

Recurrent painful ulcers of the oral mucosa with a shallow base and erythematous border, commonly known as canker sores.

Synonyms:

Aphthous Ulcer

A recurrent, painful ulcer of the oral mucosa. See Canker Sore.

Synonyms:

Apicoectomy

Surgical removal of root tip and periapical lesion. Indication: failed root canal therapy.

Synonyms:

Aplastic Anemia

A bone marrow failure syndrome characterized by pancytopenia (anemia, leukopenia, thrombocytopenia) and a hypocellular bone marrow with replacement by fat cells, resulting from immune-mediated destruction of hematopoietic stem cells.

Synonyms:

Apnea

Temporary cessation of breathing. Clinically important apnea may cause low oxygen, carbon-dioxide retention, or bradycardia.

Synonyms:

Apnea of Prematurity

Recurrent pauses in breathing in a premature infant, sometimes accompanied by bradycardia or oxygen desaturation. It may be central, obstructive, or mixed. Management includes monitoring and, when needed, respiratory stimulation or support.

Synonyms:

Apnea-Hypopnea Index

Number of apneas plus hypopneas per hour of sleep. Apnea = airflow cessation > 10 seconds. Hypopnea = partial obstruction with desaturation or arousal. AHI < 5 normal, 5–14 mild, 15–29 moderate, ≥ 30 severe.

Synonyms:

Apneustic Breathing

A breathing pattern characterized by a prolonged inspiratory pause, seen in brainstem lesions (particularly the pons). It indicates damage to the apneustic center and is a poor prognostic sign in neurological injury. It may require mechanical ventilation.

Synonyms:

Apnoea

Temporary cessation of breathing, defined as com-

plete cessation of airflow for at least 10 seconds. Obstructive apnea: airway collapse despite respiratory effort (common in obstructive sleep apnea).

Synonyms:

Apoenzyme

The protein component of an enzyme without its required cofactor or coenzyme. Inactive or minimally active until the cofactor binds. The complete, catalytically active complex of apoenzyme + cofactor is called the holoenzyme.

Synonyms:

Apoptosis

Programmed cell death. Dysregulated in cancer (avoiding death). Pro-apoptotic genes: BAX, P53. Anti-apoptotic: BCL-2.

Synonyms:

Apoptosis Extrinsic Pathway

The extrinsic pathway of apoptosis is triggered by extracellular ligands binding to death receptors belonging to the tumor necrosis factor receptor superfamily, including Fas (CD95), TNFR1, and TRAIL receptors DR4 and DR5.

Synonyms:

Apoptosis Intrinsic Pathway

The intrinsic, or mitochondrial, pathway of apoptosis is initiated by intracellular stress signals including DNA damage, growth factor withdrawal, endoplasmic reticulum stress, and hypoxia.

Synonyms:

Apparent Mineralocorticoid Excess

Rare autosomal recessive disorder caused by deficiency of 11-beta-hydroxysteroid dehydrogenase type 2 normally converting cortisol to cortisone in the collecting duct. Cortisol activates mineralocorticoid receptors causing severe hypertension, hypokalemia, metabolic alkalosis, and low renin with low aldosterone.

Synonyms:

Appendectomy

Surgical removal of the appendix, the most common emergency surgical procedure performed worldwide. Appendectomy is indicated for acute appendicitis, the most common surgical emergency with a lifetime risk of 7-8 percent and peak incidence between 10 and 30 years.

Synonyms:

Appendiceal Tumors

Neoplasms arising in the appendix, including neuroendocrine tumors, mucinous neoplasms, and adenocarcinoma. Some are found incidentally, whereas others cause pain, obstruction, or abdominal distention. Evaluation and treatment depend on the tumor type, size, spread, and pathologic features.

Synonyms:

Appendicitis

Inflammation of the vermiform appendix, often caused by obstruction of its lumen. It may cause abdominal pain that moves to the right lower quadrant, nausea, loss of appetite, and fever; diagnosis and treatment depend on clinical assessment, laboratory tests, imaging, and complications.

Synonyms:

Appendix

A blind-ended tubular diverticulum of the cecum, typically 6-10 cm long, rich in lymphoid tissue. Its position is variable (retrocecal, pelvic, or retroileal); the base usually projects near McBurney's point, one-third of the distance from the anterior superior iliac spine to the umbilicus.

Synonyms:

Appetite Regulation

Complex control by hormones (leptin, ghrelin, insulin, CCK), neural signals, psychological factors. Leptin signals satiety, ghrelin signals hunger.

Synonyms:

Applied Behavior Analysis

A behavioral intervention based on learning principles that uses observation, measurement, and rein-

forcement to increase useful behaviors and reduce behaviors that interfere with functioning. It may be used in autism care and other settings, with goals individualized to the person.

Synonyms:

Apraxia

Inability to perform learned, skilled motor movements despite intact motor function, sensation, coordination, and comprehension.

Synonyms:

Aquagenic keratoderma

Transient, painful whitish thickening and wrinkling of the palms and soles occurring within minutes of water immersion, accompanied by a prickling or burning sensation. It is often associated with cystic fibrosis or other sweat gland disorders but can also be idiopathic or drug-induced. Symptoms resolve shortly after drying the skin.

Synonyms:

Aquatic Therapy

Exercise or rehabilitation performed in water, using buoyancy and resistance to support movement and conditioning.

Synonyms:

Aqueous Humor

A clear, watery fluid that fills the anterior and posterior chambers of the eye, maintaining intraocular pressure and providing nutrients and oxygen to the avascular cornea and lens while removing metabolic waste products.

Synonyms:

Arachnoid cyst

A congenital, benign, cerebrospinal fluid-filled cyst within the arachnoid membrane, most commonly found in the middle cranial fossa. Most are asymptomatic and discovered incidentally on imaging, but large cysts may cause headache, seizures, or focal neurological deficits.

Synonyms:

Arachnoid Mater

The middle of the three meninges, a delicate avascular membrane lying between the dura mater and pia mater. The subarachnoid space between arachnoid and pia contains cerebrospinal fluid (CSF) and major vessels. Arachnoid granulations (villi) project into the dural venous sinuses and mediate CSF reabsorption.

Synonyms:

ARB-Nepriylsin Inhibitor

Sacubitril/valsartan combines an ARB with a neprilysin inhibitor, increasing natriuretic peptide levels while blocking the renin-angiotensin system. The PARADIGM-HF trial demonstrated superior reduction in cardiovascular death and heart failure hospitalization compared to enalapril.

Synonyms:

Arbovirus

A virus transmitted by mosquitoes or other member of the arthropod phylum.

Synonyms:

ARBs

Block angiotensin II AT1 receptors providing renoprotection similar to ACE inhibitors. Alternative for ACE inhibitor cough. Do not combine ACE inhibitor and ARB due to increased adverse effects without benefit. Similar renoprotective effects to ACE inhibitors.

Synonyms:

Arcus Senilis (Corneal Arcus)

A white, gray, or bluish opaque ring in the peripheral corneal stroma separated from the limbus by a clear zone (lucid interval of Vogt). Caused by lipid (cholesterol) deposition in the peripheral cornea. Common and benign in elderly individuals (>60 years).

Synonyms: Corneal Arcus

ARDS

Acute respiratory distress syndrome is a severe inflammatory lung injury causing acute oxygenation

failure and bilateral lung opacities that are not fully explained by heart failure or fluid overload. Common causes include sepsis, pneumonia, trauma, and aspiration.

Synonyms:

Area Under the Concentration-Time Curve

The integral of a drug's plasma concentration over time. AUC estimates total systemic exposure and is used to compare bioavailability, guide dosing for selected medicines, and characterize pharmacokinetic interactions.

Synonyms:

Argininosuccinic Aciduria

Autosomal recessive urea cycle disorder caused by deficiency of argininosuccinate lyase (ASL gene, 7cen-q11.2). Biochemical hallmark: accumulation of argininosuccinic acid in blood, urine, and CSF with hyperammonemia, low citrulline, and elevated argininosuccinic acid.

Synonyms:

Argyll Robertson Pupil

A small, irregular pupil that constricts during near focusing but responds poorly or not at all to light. It is classically associated with neurosyphilis but can have other causes; the finding requires clinical evaluation.

Synonyms:

Armpit Lump

A lump or swelling in the axilla, commonly caused by an enlarged lymph node, skin infection, cyst, or benign growth. Persistent, hard, fixed, enlarging, or unexplained lumps require medical assessment.

Synonyms:

Arnold-Chiari Malformation

Herniation of cerebellar tonsils through the foramen magnum into the upper cervical spinal canal. Type II (myelomeningocele-associated) is the most common form in pediatrics. Associated with hydrocephalus, syringomyelia, and spinal cord dysfunction.

Symptoms include headache, neck pain, and lower cranial nerve palsies.

Synonyms:

Aromatase Excess Syndrome

Rare autosomal dominant condition caused by mutations in the CYP19A1 gene leading to overexpression of aromatase enzyme and excessive estrogen production. Presents in males with gynecomastia, advanced bone age, and accelerated linear growth with early epiphyseal closure. In females with precocious puberty, macroclitoris, and virilization.

Synonyms:

Aromatase Inhibitor

A class of medications that inhibit aromatase, the enzyme that converts androgens (androstenedione, testosterone) to estrogens (estrone, estradiol) in peripheral tissues (adipose, breast, muscle, bone). Used primarily in hormone receptor-positive breast cancer in postmenopausal women.

Synonyms:

Arrector Pili Muscle

A small band of involuntary smooth muscle attached to a hair follicle and the superficial dermis. Sympathetic stimulation causes it to contract, pulling the hair upright and producing temporary piloerection, commonly called goosebumps. Contraction also compresses nearby sebaceous glands and may help release sebum onto the skin.

Synonyms: goosebumps.

Arrested Caries

A carious lesion that is no longer progressing, often because the surface has become hard, smooth, and cleansable. Arrested lesions may be monitored and remineralized; treatment depends on activity, cavitation, cleansability, and patient risk.

Synonyms:

Arrhythmia

Any abnormality of cardiac rate, rhythm, or site of impulse origin, arising through enhanced automaticity, reentry, or triggered activity. Classified by rate

as tachyarrhythmia or bradyarrhythmia and by site as supraventricular or ventricular. Diagnosis rests on the 12-lead ECG and ambulatory monitoring when intermittent.

Synonyms:

Arrhythmogenic right ventricular cardiomyopathy

A genetic cardiomyopathy characterized by fibrofatty replacement of the right ventricular myocardium, predisposing to ventricular arrhythmias and sudden cardiac death, particularly during exercise. ECG shows T-wave inversions in V1-V3 and epsilon waves; diagnosis uses echocardiography, cardiac MRI, and genetic testing.

Synonyms:

Arsenic toxicity

Systemic poisoning from arsenic exposure causing gastrointestinal distress, cardiac arrhythmias, peripheral neuropathy, and characteristic Mees lines on nails, requiring chelation therapy with dimercaprol or succimer.

Synonyms:

Art Therapy

Use of art-making for therapeutic purposes. Emotional expression, coping, self-awareness.

Synonyms:

Arterial Blood Gas

Measurement of arterial pH, carbon-dioxide tension, oxygen tension, bicarbonate, and related acid-base variables. It helps assess ventilation, oxygenation, and metabolic or respiratory acid-base disorders.

Synonyms:

Arterial Blood Gas Analyzer

An analyzer that measures arterial pH, partial pressures of oxygen and carbon dioxide, and usually bicarbonate or calculated acid-base variables. It is used to assess ventilation, oxygenation, and metabolic or respiratory acid-base disorders.

Synonyms:

Arterial Catheter

A catheter placed in an artery, commonly the radial artery, for continuous blood-pressure monitoring and repeated arterial blood sampling. Complications include hemorrhage, thrombosis, infection, and distal ischemia.

Synonyms:

Arterial Catheterization

Placement of a catheter in an artery, usually the radial artery, for continuous blood-pressure measurement and repeated arterial blood sampling. It is used when rapid hemodynamic or gas-exchange assessment is clinically necessary and carries risks including bleeding, infection, thrombosis, and ischemia.

Synonyms:

Arterial Duplex

Ultrasound technique combining B-mode imaging and Doppler flow assessment. Used for evaluating arterial stenosis, aneurysm, graft patency. Non-invasive, widely available.

Synonyms:

Arterial insufficiency

Reduced arterial blood flow to a tissue or limb, causing ischemic symptoms such as claudication, rest pain, cool skin, delayed capillary refill, and diminished pulses. Most commonly caused by atherosclerosis; assessed by ankle-brachial index and duplex ultrasound.

Synonyms:

Arterial Line

A catheter inserted into a peripheral artery (most commonly radial, also femoral, brachial, dorsalis pedis) for continuous blood pressure monitoring and arterial blood gas sampling. Allen test: assesses ulnar collateral flow before radial artery cannulation.

Synonyms:

Arterial Ulcer

A chronic wound caused by arterial insufficiency (peripheral artery disease). Located on distal ex-

tremities: toes, heels, lateral malleolus, and sites of pressure. Presents with punched-out, deep, well-demarcated wound with pale or necrotic base, minimal exudate, and cool, hairless, shiny skin.

Synonyms:

Arteriole

A small artery that delivers blood to a capillary bed. Arteriolar smooth muscle regulates vascular resistance and controls tissue perfusion and systemic blood pressure.

Synonyms:

Arteriosclerosis

Chronic inflammatory disease of medium and large arteries characterized by accumulation of lipids, inflammatory cells, and fibrous tissue within the arterial wall, forming atherosclerotic plaques. See Atherosclerosis.

Synonyms:

Arteriovenous Fistula

A surgically created connection between an artery and a vein, usually for hemodialysis. The increased blood flow enlarges and strengthens the vein for repeated access. The site and time needed for maturation depend on the patient's vessels and clinical circumstances.

Synonyms:

Arteriovenous Graft

Synthetic conduit connecting artery to vein for dialysis. Used when veins inadequate for fistula. Thrombosis and infection more common than AVF. Can be used earlier than fistula. Declotting with thrombectomy or angioplasty.

Synonyms:

Arteriovenous Malformation

Abnormal connection between artery and vein without capillary bed. Can bleed or cause symptoms.

Synonyms:

Arthralgia

Pain in one or more joints without objective

evidence of joint inflammation such as swelling, warmth, or structural damage. Common causes include viral infections, overuse, autoimmune disease, and early degenerative change; persistent, severe, or multifocal pain warrants clinical evaluation.

Synonyms:

Artery

A blood vessel that carries oxygenated blood away from the heart to the tissues, except for the pulmonary arteries which carry deoxygenated blood to the lungs. Arteries have thick, elastic, muscular walls that withstand high pressure and distribute blood throughout the body. The aorta is the largest artery.

Synonyms:

Arthritis

Inflammation of one or more joints, characterized by joint pain, swelling, warmth, and stiffness.

Synonyms:

Arthrocentesis

Aspiration of joint fluid for diagnostic or therapeutic purposes. Indications: septic arthritis (urgent, crystals), inflammatory arthritis (gout, pseudogout), hemorrhagic effusion (trauma, coagulopathy), and therapeutic drainage for symptomatic relief.

Synonyms:

Arthrodesis

Surgical fusion of a joint by removing or preparing articular surfaces and stabilizing the bones until osseous union occurs. It relieves pain and provides stability at the cost of joint motion.

Synonyms:

Arthrography

Contrast injected into joint for imaging. Used for shoulder, knee, hip evaluation. MR arthrography more common now.

Synonyms:

Arthrogryposis

A group of congenital disorders characterized by

multiple joint contractures present at birth, caused by decreased fetal movement (fetal akinesia) during development.

Synonyms:

Arthroplasty

Surgical reconstruction or replacement of a joint to relieve pain, restore alignment, or improve function. It may be partial or total and is commonly performed for advanced degenerative joint disease, fracture, inflammatory arthritis, or other destructive joint conditions.

Synonyms:

Arthroscopy

Minimally invasive joint visualization and intervention via a rigid arthroscope inserted through small portals, used for meniscal and ligamentous repair, chondroplasty, loose body removal, and synovectomy.

Synonyms:

Articular Cartilage Injuries

Chondral/osteochondral lesions: Outerbridge grading (I: softening, II: fibrillation <50%, III: fibrillation >50%, IV: subchondral bone exposed). OCD (osteochondritis dissecans): subchondral bone necrosis, fragment separation (knee: lateral femoral condyle, elbow: capitellum, ankle: talar dome).

Synonyms:

Artifacts

Image distortions not representing true anatomy. Types: motion, beam hardening, metal, aliasing, partial volume. Recognition important for accurate interpretation.

Synonyms:

Artificial Pacemaker

An implanted device that delivers electrical impulses to maintain an appropriate heart rate when the heart's natural conduction system is inadequate.

Synonyms:

Artificial Rupture of Membranes

The intentional rupture of the amniotic sac with a small hook-like instrument (Amnihook) during a cervical exam to induce or augment labor. Indications: induction or augmentation of labor, placement of internal monitors (fetal scalp electrode, intrauterine pressure catheter), and assessment of amniotic fluid (meconium staining).

Synonyms:

Artificial Ventricle (Total Artificial Heart)

A pulsatile, pneumatically or electrically driven biventricular replacement that removes the native ventricles. Indications: end-stage heart failure bridging to transplant or destination therapy. Requirements: surgical implantation, external power source, anticoagulation.

Synonyms: Total Artificial Heart

Arytenoid Cartilage

The arytenoid cartilages are a pair of small, pyramid-shaped cartilages located on the posterior aspect of the larynx, articulating with the superior border of the cricoid cartilage lamina, and they serve as the attachment points for the vocal cords and the intrinsic laryngeal muscles that control vocal cord movement.

Synonyms:

ASA Physical Status Classification System

A system developed by the American Society of Anesthesiologists to assess and communicate a patient's pre-operative physical status and comorbidities. It ranges from ASA I (a normal healthy patient) to ASA VI (a declared brain-dead patient whose organs are being removed for donor purposes).

Synonyms:

Asbestosis

Diffuse pulmonary fibrosis caused by prolonged inhalation of asbestos fibers. It may cause progressive shortness of breath and increases the risk of lung cancer and mesothelioma.

Synonyms:

Ascariasis

Infection with the soil-transmitted roundworm *Ascaris lumbricoides*.

Synonyms:

Ascending Aorta

From left ventricle at the aortic valve to the sternal angle (approximately 5 cm), enclosed in pericardium. Gives rise to right/left coronary arteries at the aortic sinuses. Most common site of aneurysm and dissection, especially in Marfan syndrome, bicuspid aortic valve, and hypertension.

Synonyms:

Ascending aortic aneurysm

Abnormal enlargement of the ascending portion of the aorta. It may be associated with a bicuspid aortic valve, connective-tissue disease, hypertension, or atherosclerosis.

Synonyms:

Ascending Colon

Extends from cecum to hepatic flexure below the liver, approximately 15-20 cm, retroperitoneal (fixed to posterior abdominal wall). Anteriorly: abdominal wall. Posteriorly: right kidney. Absorbs water/electrolytes and compacts fecal matter. Tumors may present as a palpable right-sided mass.

Synonyms:

Ascites

Pathological accumulation of fluid within the peritoneal cavity representing the most common decompensating event in cirrhosis. The pathogenesis involves splanchnic arterial vasodilation reducing effective arterial blood volume and activating neurohormonal mechanisms leading to sodium and water retention.

Synonyms:

Aseptic Loosening

Loss of fixation of an implant without active infection, commonly caused by mechanical stress and a

biologic response to wear particles. It may cause pain, radiographic lucency, instability, and need for revision surgery.

Synonyms:

Aseptic Technique

A set of laboratory practices preventing contamination of sterile sites, cultures, and specimens by unwanted microorganisms. Key elements include hand hygiene, sterile fields and instruments, surface disinfection, and minimal exposure of sterile items to air and touch, forming the basis of reliable clinical and culture work.

Synonyms:

Asherman Syndrome

Intrauterine adhesions or scar tissue that partially or completely obliterate the uterine cavity, most often after uterine instrumentation or pregnancy-related curettage. It may cause hypomenorrhea or amenorrhea, infertility, recurrent miscarriage, or abnormal placentation.

Synonyms:

Asperger Syndrome

A former diagnostic term for a neurodevelopmental condition characterized by persistent social-communication difficulties and restricted or repetitive interests or behaviors, without the intellectual or language impairment traditionally associated with classic autism. Current diagnostic systems generally classify it within autism spectrum disorder; support is individualized.

Synonyms:

Aspergillosis

A spectrum of diseases caused by the fungus *Aspergillus* (most commonly *A. fumigatus*). Allergic forms: allergic bronchopulmonary aspergillosis (ABPA, in asthma or cystic fibrosis – wheezing, eosinophilia, pulmonary infiltrates), allergic *Aspergillus* sinusitis.

Synonyms:

Asphyxia

A life-threatening lack of oxygen due to drowning, choking, or an obstruction of the airways. Management: remove obstruction, rescue breathing, CPR if needed. Foreign body airway obstruction: Heimlich maneuver (abdominal thrusts) for conscious adults; back blows and chest thrusts for infants.

Synonyms:

Aspiration

The inhalation of foreign material (oropharyngeal secretions, gastric contents, food, liquid, or blood) into the larynx and lower respiratory tract. Aspiration pneumonitis (Mendelson syndrome) is a chemical lung injury caused by acidic gastric fluid.

Synonyms:

Aspiration Pneumonia

Infectious pneumonia from aspiration of oropharyngeal secretions. Risk factors: dysphagia, impaired consciousness, enteral feeding. Common pathogens: anaerobes, gram-negative bacilli. Treatment: antibiotics covering oral flora.

Synonyms:

Aspiration Pneumonitis

Chemical lung injury caused by inhalation of gastric contents, characterized by bronchospasm, hypoxemia, pulmonary edema, and atelectasis. Risk factors include full stomach, emergency surgery, obesity, pregnancy, gastroesophageal reflux, bowel obstruction, and decreased consciousness.

Synonyms:

Aspiration Risk

The likelihood that food, liquid, saliva, or gastric contents will enter the larynx or lower respiratory tract. Risk rises with dysphagia, delirium, stroke, neuromuscular disease, reflux, poor dentition, and reduced consciousness; assessment and prevention are multidisciplinary.

Synonyms:

Acetylsalicylic Acid

The chemical name for aspirin, a salicylate drug

with analgesic, antipyretic, anti-inflammatory, and antiplatelet effects.

Synonyms:

Acrochordon

A benign, soft, flesh-colored skin tag, usually occurring in skin folds such as the neck, axilla, or groin.

Synonyms:

Advanced Cardiac Life Support

A structured set of interventions for cardiac arrest and other life-threatening cardiovascular emergencies, including high-quality CPR, rhythm recognition, defibrillation, airway management, and medications.

Synonyms:

Allen Test

A bedside test of collateral blood flow to the hand through the radial and ulnar arteries, commonly performed before radial-artery puncture or cannulation.

Synonyms:

Anatomic Snuffbox

A triangular depression on the lateral wrist that becomes visible when the thumb is extended. Tenderness there may suggest a scaphoid fracture.

Synonyms:

Ankle-Foot Orthosis

A brace that supports the ankle and foot and helps control alignment, stability, or foot drop.

Synonyms:

Aspirin (Salicylate) Toxicity

Mixed respiratory alkalosis and metabolic acidosis. Early: tinnitus, hyperventilation, respiratory alkalosis. Late: metabolic acidosis, fever, seizures, coma. Treatment: activated charcoal, urine alkalinization (sodium bicarbonate), hemodialysis if severe (renal failure, pulmonary edema, severe acidosis, very high levels).

Synonyms: Salicylate

Aspirin-Exacerbated Respiratory Disease

A triad of asthma, nasal polyps, and aspirin sensitivity due to COX-1 inhibition. It involves overproduction of cysteinyl leukotrienes. Leukotriene receptor antagonists are specifically effective.

Synonyms:

Assist-Control Ventilation

Ventilator delivers a set tidal volume at a set rate. Every breath receives the full set volume. Guarantees minimum rate and minute ventilation. Risk of respiratory alkalosis and auto-PEEP.

Synonyms:

Assisted Breech Delivery

Vaginal breech delivery with operator assistance after spontaneous delivery to the umbilicus.

Synonyms:

Assisted Living

Residential setting with assistance for ADLs. Less intensive than nursing home.

Synonyms:

Assisted Reproductive Technology

ART: fertility treatments involving manipulation of oocytes/sperm/embryos: in vitro fertilization (IVF), intracytoplasmic sperm injection (ICSI), intrauterine insemination (IUI, some definitions), embryo cryopreservation, gamete donation, and surrogacy.

Synonyms:

Assistive Device

Equipment that helps a person perform activities, move safely, communicate, or maintain independence.

Synonyms:

Assistive Device Training

Instruction in selecting, fitting, using, and maintaining devices such as walkers, canes, or crutches, including safe walking and stair techniques.

Synonyms:

Association Study

Comparison of allele frequencies between cases and controls. Genome-wide association studies (GWAS) identify common variants with small effects on complex diseases.

Synonyms:

Astereognosis

Inability to identify an object by touch alone despite intact primary somatosensory modalities (touch, vibration, proprioception), indicating dysfunction of the contralateral parietal association cortex (typically the postcentral gyrus region or the dominant inferior parietal lobule).

Synonyms:

Asterixis

Brief, irregular, non-rhythmic lapse of sustained posture causing a flapping movement, best elicited by asking the patient to hold the arms extended with wrists dorsiflexed ("hold arms up") for 30 seconds.

Synonyms:

Asthenopia

Eye strain or visual fatigue, often experienced as aching, burning, blurred vision, headache, or difficulty focusing after prolonged visual tasks. Refractive errors, dry eye, poor lighting, and extended screen use may contribute.

Synonyms:

Asthma

A chronic inflammatory disorder of the airways characterized by recurrent episodes of wheezing, breathlessness, chest tightness, and cough. Airflow limitation is often reversible. It involves eosinophilic inflammation, mucus hypersecretion, and smooth muscle hypertrophy.

Synonyms:

Asthma exacerbation

An acute or subacute worsening of asthma symptoms and airflow limitation, typically causing increased wheeze, cough, chest tightness, or breathlessness.

Synonyms:

Asthma-COPD Overlap

Features of both asthma and COPD in the same patient. Characterized by persistent airflow limitation with features of both diseases: airway inflammation (eosinophilic and neutrophilic), bronchial hyperresponsiveness, and partially reversible obstruction. Treatment: inhaled corticosteroids plus long-acting bronchodilators.

Synonyms:

Astigmatism

A refractive error caused by an irregular curvature of the cornea or lens, resulting in light rays being focused at multiple points rather than a single point on the retina, leading to blurred or distorted vision at all distances.

Synonyms:

Astrocytoma

A glioma arising from star-shaped cells called astrocytes. Graded I-IV by the WHO; grade IV (glioblastoma) is the most aggressive and common primary malignant brain tumor in adults.

Synonyms:

Asymptomatic Bacteriuria in Pregnancy

The presence of significant bacterial growth in a pregnant person's urine without urinary symptoms. It is identified by urine culture and is treated because it increases the risk of symptomatic urinary infection and kidney infection during pregnancy.

Synonyms:

Asystole

Complete cessation of cardiac electrical activity, presenting as a flat line on the ECG with no QRS complexes, P waves, or other organized electrical activity.

Synonyms:

Ataxia

Lack of voluntary coordination of muscle movements, resulting from dysfunction of the cerebellum,

posterior columns, or peripheral nerves. Types: cerebellar (gait and limb ataxia, dysarthria, nystagmus), sensory (impaired proprioception causing sensory ataxia, positive Romberg sign), and vestibular (vertigo, nystagmus, nausea).

Synonyms:

Ataxia-Telangiectasia

An autosomal-recessive disorder usually caused by biallelic ATM variants, characterized by progressive ataxia, telangiectasias, immune deficiency, and increased cancer risk.

Synonyms:

Ataxic Breathing

An irregular, unpredictable breathing pattern with random variations in rate and depth, seen in medullary lesions. It is the most dangerous respiratory pattern and often precedes respiratory arrest. It requires mechanical ventilation.

Synonyms:

Atelectasis

Complete or partial collapse of lung tissue, resulting in loss of aeration. It may be caused by airway obstruction (resorption atelectasis), pleural disease (compressive atelectasis), surfactant dysfunction (dissolution atelectasis), or scarring (cicatization atelectasis). It impairs gas exchange and may predispose to infection.

Synonyms:

Atherectomy

Mechanical removal of atherosclerotic plaque. Types: directional, laser, rotational, orbital. Used for peripheral arterial disease.

Synonyms:

Atherectomy (Vascular)

Removal or modification of atherosclerotic plaque from inside a blood vessel, usually with a catheter-based device.

Synonyms: Vascular

Atheroembolic Renal Disease

Cholesterol crystal embolization to kidneys after vascular procedures. AKI with livedo reticularis and peripheral eosinophilia. Renal biopsy shows cholesterol clefts. Poor prognosis with progressive renal failure.

Synonyms:

Atherosclerosis

Chronic inflammatory disease of medium and large arteries characterized by accumulation of lipids, inflammatory cells, and fibrous tissue within the arterial wall, forming atherosclerotic plaques. Initiating event is endothelial dysfunction from risk factors (hypertension, smoking, diabetes, dyslipidemia).

Synonyms:

Atherosclerotic Plaque

An atherosclerotic plaque is a lesion within the arterial intima composed of a necrotic lipid core covered by a fibrous cap, representing the pathological substrate of atherosclerotic cardiovascular disease.

Synonyms:

Athetosis

Slow, involuntary, writhing, sinuous movements predominantly of the distal extremities, sometimes also affecting the face, neck, and trunk, arising from dysfunction of the basal ganglia (putamen and globus pallidus).

Synonyms:

Athlete Foot

Tinea pedis: dermatophyte infection (*Trichophyton rubrum*, *T. mentagrophytes*) of the feet, common in those who wear occlusive footwear or use communal showers. Forms: interdigital (scaly, fissured, macerated between toes—most common), moccasin (diffuse plantar scaling), vesicular.

Synonyms:

Athlete's Foot

A superficial fungal infection of the feet, usually affecting the spaces between the toes and causing itching, scaling, maceration, or fissures. It is also

called tinea pedis.

Synonyms: tinea.

Atlanto-occipital dislocation

Traumatic separation of the atlas from the occipital condyles, a highly unstable injury with high mortality often associated with spinal cord injury and requiring emergent immobilization.

Synonyms:

Atlas

First cervical vertebra articulating with occipital condyles at the atlanto-occipital joint for nodding movement. Lacks a body and spinous process; has anterior/posterior arches and lateral masses. Transverse foramina transmit vertebral arteries. The anterior arch has a facet for the axis dens.

Synonyms:

Atopic Dermatitis

A chronic, relapsing inflammatory skin disease characterized by pruritus, xerosis, and eczematous lesions. It reflects epidermal-barrier dysfunction and immune dysregulation, with flares triggered by irritants, allergens, infection, stress, or climate.

Synonyms:

Atopic eruption of pregnancy

Pruritic eczematous skin eruptions occurring in pregnancy, presenting as eczematous patches or pruritic urticarial papules and plaques, typically resolving after delivery.

Synonyms:

Atopy

The genetic predisposition to develop immediate (IgE-mediated, type I) hypersensitivity reactions to common environmental allergens (pollen, dust mites, foods, pet dander).

Synonyms:

Atovaquone–proguanil

An antimalarial combination used for prevention and treatment of *Plasmodium falciparum* malaria and selected travel-related malaria regimens.

Synonyms:

ATP (Adenosine Triphosphate)

The primary energy currency of the cell, composed of adenine, ribose, and three phosphate groups. Hydrolysis of the terminal phosphoanhydride bond releases $\Delta G^\circ = -30.5 \text{ kJ/mol}$ (-7.3 kcal/mol), driving endergonic cellular processes such as muscle contraction, active transport, and biosynthesis.

Synonyms: Adenosine Triphosphate

ATP Synthase

Complex V of electron transport chain. Uses proton gradient to synthesize ATP. Rotational catalysis mechanism.

Synonyms:

Atransferrinemia

Very rare autosomal recessive disorder of iron transport caused by mutations in the TF gene (3q22.1) leading to absence or severe deficiency of transferrin.

Synonyms:

Atrial Fibrillation

The most common sustained cardiac arrhythmia, characterized by rapid, irregular atrial activity (350-600 bpm) with irregular ventricular response. ECG shows absent P waves, irregularly irregular RR intervals, and narrow QRS complexes (unless aberrant conduction).

Synonyms:

Atrial Fibrillation Ablation

A catheter-based procedure that creates lesions, usually around the pulmonary veins, to reduce the electrical triggers of atrial fibrillation. It may be considered for symptomatic patients when medicines are ineffective, not tolerated, or not preferred. Results and the need for repeat treatment vary with the type of atrial fibrillation and the person's clinical features.

Synonyms:

Atrial Flutter

A rapid, regular atrial rhythm (typically 250-350

bpm) caused by a macro-reentrant circuit, most commonly in the right atrium. ECG shows sawtooth flutter waves best seen in leads II, III, and aVF, with regular or irregular ventricular response depending on AV conduction ratio (commonly 2:1 or 4:1).

Synonyms:

Atrial Natriuretic Peptide

A peptide hormone secreted by atrial myocytes in response to atrial stretch from volume expansion. ANP promotes natriuresis and diuresis by increasing glomerular filtration rate, inhibiting sodium reabsorption in the collecting ducts, and reducing renin and aldosterone secretion.

Synonyms:

Atrial Septal Defect

Congenital opening in the interatrial secundum allowing left-to-right shunting of blood. Small defects may close spontaneously. Larger defects cause right heart volume overload, right atrial and ventricular dilation, pulmonary hypertension, and eventually right heart failure. Paradoxical embolism may occur with right-to-left shunting.

Synonyms:

Atrial Tachycardia

Supraventricular tachycardia arising from an atrial focus outside the sinus node, often focal with rates 100-250 beats per minute with discrete P waves of different morphology from sinus P waves.

Synonyms:

Atrioventricular Node

Located in the posterior-inferior region of the interatrial septum near the coronary sinus. It receives impulses from the SA node via internodal pathways and delays them by approximately 120-200 milliseconds before transmitting them to the ventricles. This delay allows atrial contraction to complete before ventricular contraction.

Synonyms:

Atrium

One of the two upper chambers of the heart that re-

ceive blood returning to the heart. The right atrium receives deoxygenated blood from the superior and inferior venae cavae and the coronary sinus; the left atrium receives oxygenated blood from the four pulmonary veins.

Synonyms:

Atropine in Organophosphate Poisoning

A muscarinic antagonist used to reverse bronchorrhea, bronchospasm, bradycardia, and other muscarinic effects of organophosphate toxicity. Treatment is titrated to drying of respiratory secretions and improvement in ventilation, not to pupil size alone.

Synonyms:

Attachment (Dental)

Retentive device connecting denture to implant or tooth. Precision attachments preferred over bar attachments.

Synonyms: Dental

Attack Rate

The proportion of an at-risk population that develops a specified illness during a defined outbreak or exposure period. It is a cumulative incidence measure commonly used for foodborne and other localized outbreaks.

Synonyms:

Attention-Deficit/Hyperactivity Disorder

A neurodevelopmental disorder characterized by persistent patterns of inattention, hyperactivity, and impulsivity that interfere with functioning or development. Three presentations: predominantly inattentive, predominantly hyperactive-impulsive, and combined.

Synonyms:

Attenuation Correction

Compensation for photon absorption in tissue. CT-based (PET/CT), transmission source (SPECT), or MR-based (PET/MRI).

Synonyms:

Attributable Risk

Difference in risk between exposed and unexposed. $AR = \text{incidence exposed} - \text{incidence unexposed}$.

Synonyms:

Atypia

Cytologic or architectural abnormality that deviates from the expected appearance of a cell or tissue. Atypia may be reactive, degenerative, premalignant, or malignant and must be interpreted with architecture, clinical context, and ancillary studies.

Synonyms:

Atypical Antipsychotics

A class of modern psychiatric medications used to treat schizophrenia and bipolar disorder. They work by balancing dopamine and serotonin levels in the brain, which helps reduce symptoms like hallucinations and delusions with fewer movement-related side effects than older antipsychotics.

Synonyms:

Atypical Facial Pain

Chronic facial pain without identifiable cause. Psychological factors may contribute.

Synonyms:

Atypical Features

A specifier for depressive episodes characterized by mood reactivity, significant weight gain or increased appetite, hypersomnia, leaden paralysis, and a long-standing pattern of interpersonal rejection sensitivity. Atypical depression often presents in younger patients and may respond preferentially to MAOIs or SSRIs rather than TCAs.

Synonyms:

Atypical Pneumonia

Pneumonia with a gradual onset, relatively mild chest findings, and prominent systemic or extrapulmonary symptoms. Common causes include *Mycoplasma pneumoniae*, *Chlamydia pneumoniae*, and respiratory viruses.

Synonyms:

Audiogram

A chart that shows a person's ability to hear at different pitches or frequencies.

Synonyms:

Audiologist

A health professional who assesses hearing and fits hearing aids.

Synonyms:

Audiometry

Measurement of hearing sensitivity at different sound frequencies and intensities, usually using headphones or insert earphones.

Synonyms:

Aural Fullness

A sensation of pressure, blockage, or plugged feeling in the ear. Causes include eustachian-tube dysfunction, middle-ear fluid, cerumen impaction, inner-ear disorders, and temporomandibular-joint disease.

Synonyms: Ear pressure; plugged-ear sensation; blocked-ear sensation.

Auer Rods

Rod-shaped inclusions formed from fused azurophilic granules in myeloid precursor cells. They strongly support a myeloid neoplasm, especially acute myeloid leukemia, but diagnosis requires immunophenotyping, genetic studies, and clinical correlation.

Synonyms:

Auger Electrons

Low-energy electrons emitted during electron capture decay. Short range (nanometers), high linear energy transfer. Potential for targeted radiotherapy if localized near DNA.

Synonyms:

Augmentation of Labor

The stimulation of spontaneous contractions that are judged to be inadequate to achieve progressive cervical dilatation. Most commonly uses oxytocin (Pitocin) infusion. Also includes artificial rupture

of membranes (AROM, amniotomy).

Synonyms:

Auricle

The visible external portion of the ear that projects from the side of the head, designed to collect and channel sound waves into the ear canal.

Synonyms:

Auricular Hematoma

A collection of blood between the cartilage of the external ear and its perichondrium, usually after blunt trauma. Without prompt drainage and compression, it may cause cartilage necrosis and permanent cauliflower-ear deformity.

Synonyms: Pinna hematoma; subperichondrial auricular hematoma.

Auscultation

The act of listening to sounds produced within the body, typically using a stethoscope. Essential for assessing heart sounds, lung sounds, bowel sounds, and vascular bruits. Normal findings: S1 and S2 heart sounds, vesicular breath sounds, normal bowel sounds. Abnormal: murmurs, crackles, wheezes, rubs, bruits.

Synonyms:

Auscultatory Gap

A transient silence between the first and second sounds of blood pressure measurement, sometimes heard in hypertensive patients. Can lead to underestimation of systolic pressure if not recognized.

Synonyms:

Austin Flint Murmur

A mid-diastolic, low-pitched rumbling murmur heard at the apex, caused by the regurgitant jet from severe aortic regurgitation striking the anterior mitral leaflet.

Synonyms:

Autism Spectrum Disorder

Neurodevelopmental disorder characterized by persistent deficits in social communication and social

interaction across multiple contexts, restricted and repetitive patterns of behavior, interests, or activities. Symptoms present in early developmental period and cause clinically significant impairment.

Synonyms:

Autoantibody

An immunoglobulin that recognizes and binds an endogenous antigen. Autoantibodies may be pathogenic, as in autoimmune hemolytic anemia, or may serve as laboratory markers of autoimmune disease.

Synonyms:

Autoclave

Sterilization device using high-pressure steam. Parameters: 121°C, 15 psi, 15-30 minutes. Essential for infection control.

Synonyms:

Autogenic Drainage

A breathing technique using controlled breathing at different lung volumes to mobilize secretions from peripheral to central airways. It involves breathing at low lung volumes (collect), mid lung volumes (loosen), and high lung volumes (evacuate). It requires patient training and cooperation.

Synonyms:

Autograft

Tissue transplanted from one site to another within the same individual. Autografts are genetically identical to the recipient and generally avoid alloimmune rejection, although donor-site morbidity may occur.

Synonyms:

Autoimmune Disease

Autoimmune diseases result from loss of immunological self-tolerance, leading to immune-mediated attack on the body's own tissues.

Synonyms:

Autoimmune Disorder

A disease caused by an abnormal immune response against the body's own cells, tissues, or organs.

Autoimmune disorders may be organ-specific or systemic and can produce inflammation, tissue injury, functional impairment, or circulating autoantibodies.

Synonyms:

Autoimmune Enteropathy

Rare immune-mediated disease causing persistent diarrhoea and small-intestinal mucosal injury, usually with villous atrophy and crypt hyperplasia. It may occur in children or adults and can be associated with other autoimmune disorders or immune dysregulation.

Synonyms:

Autoimmune Gastritis

Chronic atrophic gastritis caused by antibodies against parietal cells leading to achlorhydria and vitamin B12 deficiency. Associated with pernicious anemia and increased risk of gastric carcinoid tumors and type 1 gastric neuroendocrine tumors. Anti-parietal cell antibodies are present in approximately ninety percent of patients.

Synonyms:

Autoimmune Hemolytic Anemia

AIHA: hemolytic anemia due to antibodies directed against red blood cells. Warm AIHA (IgG, 37C—idiopathic, SLE, CLL, drugs: methyldopa, penicillin): splenic sequestration, spherocytes, positive direct antiglobulin (DAT).

Synonyms:

Autoimmune Hepatitis

Chronic hepatitis caused by immune-mediated destruction of hepatocytes characterized by interface hepatitis with lymphoplasmacytic infiltrate, elevated transaminases, hypergammaglobulinemia, and autoantibodies.

Synonyms:

Autoimmune keratitis

Corneal inflammation associated with an immune-mediated disorder, sometimes occurring with rheumatoid arthritis, lupus, or granulomatosis with

polyangiitis. It may cause pain, redness, corneal opacity, and reduced vision and requires urgent ophthalmic assessment. Treatment is directed at the cause and may include anti-inflammatory or immunosuppressive therapy.

Synonyms:

Autoimmune Pancreatitis

Chronic inflammatory condition characterized by dense lymphoplasmacytic infiltrate with IgG4-positive plasma cells representing the pancreatic manifestation of IgG4-related disease. Type 1 is more common affecting older men with elevated serum IgG4 and extrapancreatic involvement.

Synonyms:

Autoimmune Polyendocrine Syndromes

APS-1 (APECED, AIRE mutation): autosomal recessive, chronic mucocutaneous candidiasis, hypoparathyroidism, adrenal insufficiency (Addison's), plus type 1 diabetes, autoimmune thyroiditis, vitiligo, alopecia, pernicious anemia, hepatitis, asplenia.

Synonyms:

Autoimmunity: Mechanisms

Loss of tolerance: central (thymic negative selection defects, AIRE mutation → APS-1) and peripheral (Treg dysfunction, anergy failure, ignorance loss). Molecular mimicry: cross-reactivity between pathogen and self (rheumatic fever: Strep M protein + cardiac myosin; Guillain-Barre: Campylobacter + GM1 ganglioside; reactive arthritis).

Synonyms:

Autologous Blood Donation

Autologous blood donation involves preoperative collection and storage of the patient's own blood for intraoperative or postoperative transfusion. It eliminates risks of alloimmune reactions, transfusion-transmitted infections, and immune modulation.

Synonyms:

Autonomic Dysreflexia

Acute, potentially life-threatening sympathetic dis-

charge in a person with spinal-cord injury at or above approximately T6, triggered by a noxious stimulus below the lesion. It causes sudden hypertension, headache, flushing or sweating above the lesion, and reflex bradycardia or other heart-rate changes.

Synonyms:

Autonomic Nervous System

The part of the peripheral nervous system that regulates involuntary functions, including heart rate, vascular tone, digestion, sweating, pupil size, and bladder activity.

Synonyms:

Autonomic Neuropathy

Damage to nerves that control involuntary functions such as heart rate, blood pressure, digestion, sweating, bladder function, and sexual function. Diabetes is a common cause, but other diseases, toxins, and medicines may contribute. Symptoms depend on the affected organs and require evaluation of the underlying cause.

Synonyms:

Autophagy

Cellular self-degradation process delivering cytoplasmic components to lysosomes for recycling. Macroautophagy: phagophore forms, expands to autophagosome (LC3-II on membrane), fuses with lysosome (autolysosome) for degradation. Selective autophagy: mitophagy (damaged mitochondria), xenophagy (pathogens), and aggrephagy (protein aggregates).

Synonyms:

Autopsy

A postmortem examination of a body to determine cause and manner of death, performed by a forensic pathologist (medical examiner/coroner) or, for hospital autopsies, a pathologist.

Synonyms:

Autopsy (Medicolegal)

Systematic external examination and surgical dis-

section of a deceased body performed under legal authority by a forensic pathologist to determine the Cause, Manner, and Mechanism of Death, document injuries, collect evidence, and assist judicial investigations.

Synonyms: Medicolegal

Autopsy (Post-Mortem Examination)

Specialized surgical procedure performed on a deceased body to determine the cause of death, mechanism of death, manner of death (natural, accidental, suicide, homicide, or undetermined), state of health prior to death, and to document injuries or disease processes.

Synonyms: Post-Mortem Examination

Autosomal Dominant PKD

Most common hereditary kidney disease affecting 1 in 400 to 1000. PKD1 chromosome 16 more severe with earlier ESRD than PKD2 chromosome 4. Progressive cyst growth causes hypertension, pain, hematuria, infections, and eventually ESRD. Screen family members with ultrasound. Tolvaptan may slow cyst growth.

Synonyms:

Autosomal dominant polycystic kidney disease

An inherited disorder causing progressive growth of numerous renal cysts that enlarge the kidneys and destroy parenchyma, leading to hypertension, flank pain, and eventual kidney failure. Associated with hepatic cysts and intracranial aneurysms.

Synonyms:

Autosomal Inheritance

Transmission of a genetic trait through one of the 22 non-sex chromosomes. Autosomal dominant traits may appear in successive generations, whereas autosomal recessive disease generally requires pathogenic variants on both homologous chromosomes.

Synonyms:

Autosomal Recessive PKD

Rare childhood disorder from PKHD1 mutation.

Bilateral enlarged kidneys with fusiform dilation of collecting ducts. Associated with congenital hepatic fibrosis. Severe forms cause pulmonary hypoplasia in utero. Variable severity from perinatal lethal to presentation in childhood or adolescence.

Synonyms:

Avascular Necrosis

Death of bone tissue caused by impaired blood supply. It commonly affects the hip or shoulder and may cause pain, collapse of the joint surface, and arthritis. Risk factors include corticosteroid exposure, alcohol use, trauma, sickle-cell disease, and systemic lupus erythematosus. Treatment depends on the site and stage and may include observation, joint-preserving surgery, or joint replacement.

Synonyms:

Avascular Necrosis (Osteonecrosis)

Death of bone tissue caused by impaired blood supply. It commonly affects the femoral head and may lead to subchondral collapse, secondary arthritis, and need for joint-preserving surgery or arthroplasty.

Synonyms: Osteonecrosis

Avian Influenza

Influenza caused by avian-adapted influenza A viruses, acquired mainly through contact with infected birds or contaminated environments. Human infection can cause severe pneumonia, respiratory failure, and occasionally systemic disease.

Synonyms:

Avoidant Personality Disorder

A pattern of social inhibition, feelings of inadequacy, and hypersensitivity to negative evaluation.

Synonyms:

Avolition

A severe lack of motivation to initiate and perform self-directed, purposeful activities. It is a negative symptom of schizophrenia and is seen in severe depression. It manifests as neglect of personal hygiene, inability to complete tasks, and social withdrawal.

Synonyms:

Avulsed Tooth

A tooth completely displaced from its socket by trauma. It is a dental emergency; management depends on patient age, extraoral dry time, storage medium, root development, and periodontal-ligament viability, and may require urgent replantation by a dental professional.

Synonyms:

Avulsion

An injury in which tissue is forcibly torn from the body by shearing or pulling. Common forms include dental, fingertip, nail, and degloving avulsions. Management focuses on hemorrhage control, debridement, tissue preservation, and urgent consultation.

Synonyms:

Avulsion Fracture

A fracture in which a fragment of bone is pulled away by the tendon or ligament attached to it, usually during sudden forceful contraction or injury. Common sites include the pelvis, ankle, elbow, and fingers; evaluation considers displacement, joint involvement, skeletal maturity, and associated soft-tissue injury.

Synonyms:

Awake Fiberoptic Intubation

An intubation technique performed while the patient remains responsive and breathing spontaneously, using topical airway anesthesia and a flexible bronchoscope. It is one option when difficult airway management is anticipated and maintaining oxygenation is important.

Synonyms:

Awareness Under Anesthesia

Unintended awareness or recall of events during general anesthesia. It may involve hearing, sensation, or pain and can be associated with significant psychological distress after the procedure.

Synonyms:

Axilla

Pyramidal space between the upper lateral thorax and medial arm. Bounded by anterior fold (pectoralis major/minor), posterior fold (latissimus dorsi/teres major), medial wall (ribs/serratus anterior), and lateral wall (humerus). Contains axillary artery/vein, brachial plexus cords, and lymph nodes.

Synonyms:

Axillary Artery

The continuation of the subclavian artery, running from the outer border of the first rib to the lower border of teres major, where it becomes the brachial artery. Divided into three parts by the pectoralis minor.

Synonyms:

Axillary Nerve

From posterior cord (C5-C6), passing through the quadrangular space with the posterior circumflex humeral artery. Innervates deltoid and teres minor; provides sensation to the regimental badge area (lateral deltoid skin). Vulnerable in anterior shoulder dislocations and surgical neck humeral fractures.

Synonyms:

Axis

Second cervical vertebra with the dens (odontoid process) projecting superiorly, serving as a pivot for atlas rotation, allowing approximately 50 percent of cervical rotation. Has a large spinous process and flat superior articular facets.

Synonyms:

Axon

The single long process of a neuron that conducts action potentials away from the cell body toward the axon terminal for synaptic transmission.

Synonyms:

Azole Antifungals

A class of antifungal agents that inhibit the enzyme lanosterol 14- α -demethylase, a cytochrome P450 enzyme essential for ergosterol synthesis in fungal cell membranes. The depletion of ergosterol and

accumulation of toxic methylated sterols disrupt membrane integrity and function.

Synonyms:

Azoospermia

Absence of spermatozoa in the ejaculate after appropriate centrifugation and microscopic examination. It may be obstructive, with sperm production preserved but outflow blocked, or nonobstructive, with impaired spermatogenesis.

Synonyms:

Azygos Vein

A vein that drains the posterior intercostal veins and empties into the superior vena cava. It forms an important collateral pathway when the SVC is obstructed. On chest imaging, enlargement of the azygos vein may indicate SVC obstruction, heart failure, or portal hypertension.

Synonyms:

Azygous vein

A large vein that drains the posterior thoracic wall and mediastinum, ascending along the right side of the vertebral column to empty into the superior vena cava. It provides collateral venous return when the superior or inferior vena cava is obstructed.

Synonyms:

Aarskog Syndrome

A rare inherited disorder affecting growth, facial development, the skeleton, and sometimes the genitals.

Synonyms:

Acute Kidney Failure

A sudden decline in kidney function that causes waste products and fluid to accumulate in the body.

Synonyms:

Addison's Disease

A disorder in which the adrenal glands produce too little cortisol and, often, too little aldosterone.

Synonyms:

Adrenal Cortex

The outer part of an adrenal gland that produces steroid hormones, including cortisol and aldosterone.

Synonyms:

Aortic Valve Insufficiency

Leakage of the aortic valve that allows blood to flow back into the left ventricle.

Synonyms:

Aortic Valve Stenosis

Narrowing of the aortic valve that obstructs blood flow from the left ventricle into the aorta.

Synonyms:

Aortitis

Inflammation of the aortic wall.

Synonyms:

Arachnoiditis

Inflammation and scarring of the arachnoid membrane and nearby spinal nerves, often causing chronic pain or neurological symptoms.

Synonyms:

Atrioventricular Block

Delayed or interrupted electrical conduction between the atria and ventricles of the heart.

Synonyms:

5-alpha Reductase

An enzyme that converts testosterone to dihydrotestosterone, a hormone involved in prostate growth and male sexual development.

Synonyms:

Abdominoplasty

A surgical procedure that removes excess abdominal skin and may tighten the abdominal wall. It is commonly called a tummy tuck.

Synonyms: a tummy tuck.

Ablation

Destruction or removal of a small area of abnormal tissue using methods such as heat, cold, chemicals, or electrical energy.

Synonyms:

Abutment

A tooth or implant that supports and anchors a dental prosthesis.

Synonyms:

Accommodation

The ability of the eye to change the shape of its lens so that near objects can be focused clearly.

Synonyms:

Acetaldehyde

A chemical produced when the body metabolizes alcohol. Accumulation may contribute to flushing, nausea, and vomiting.

Synonyms:

Achilles Tendon

The strong tendon connecting the calf muscles to the heel bone. It can become inflamed or rupture.

Synonyms:

Acupressure

Application of pressure to selected body points, usually to relieve symptoms such as pain or nausea.

Synonyms:

Acupuncture

A treatment in which thin needles are inserted into selected points of the body.

Synonyms:

Acute Pain

Pain that begins suddenly and usually lasts for a limited period, often because of injury, illness, or a procedure.

Synonyms:

Acute Urinary Retention

Sudden inability to empty the bladder, often causing painful lower-abdominal distension and requiring urgent assessment.

Synonyms:

Adenosine Triphosphate

A molecule that stores and transfers energy within cells. It is commonly abbreviated ATP.

Synonyms:

Adhesion

A band of scar-like tissue that abnormally connects surfaces or organs inside the body.

Synonyms:

Advance Care Directive

A legal document stating a person's preferences for medical care if the person later cannot make or communicate decisions.

Synonyms:

AIDS Dementia

A disorder of thinking, memory, behavior, or movement caused by advanced HIV-related disease affecting the brain.

Synonyms:

Accident and Emergency Medicine (A&E Medicine)

The medical specialty concerned with the immediate assessment, resuscitation, diagnosis, and initial treatment of acute illness and injury.

Synonyms: A&E Medicine

Acute Abdomen

Sudden or severe abdominal pain with clinical features suggesting a potentially serious intra-abdominal disorder that may require urgent investigation or surgery.

Synonyms:

Spontaneous Abortion (Miscarriage)

Unintentional loss of a pregnancy before fetal via-

bility. Causes include chromosomal abnormalities, uterine or cervical problems, infection, and maternal medical conditions.

Synonyms: Miscarriage

Therapeutic Abortion

Intentional termination of a pregnancy because of medical, fetal, or other legally recognized indications, according to applicable law and clinical guidance.

Synonyms:

Acetone

A volatile ketone body produced during increased fat metabolism. It may contribute to the characteristic breath odor of ketosis and ketoacidosis.

Synonyms:

Adenitis

Inflammation of a gland or lymph node, usually caused by infection or an inflammatory disorder. Lymphadenitis is a common form.

Synonyms:

Adolescence

The developmental period between childhood and adulthood, involving physical maturation, puberty, and major psychological and social changes.

Synonyms:

Adrenergic Receptors

Cell-surface receptors activated by adrenaline and noradrenaline. Alpha and beta subtypes regulate cardiovascular, respiratory, metabolic, and other physiological responses.

Synonyms:

Aetiology (Etiology)

The cause or group of causes underlying a disease, injury, or other medical condition.

Synonyms: Etiology

Afterpains

Intermittent uterine cramps occurring after child-

birth as the uterus contracts and returns toward its pre-pregnancy size. They may be more noticeable during breastfeeding.

Synonyms:

Agenesis

Complete failure of an organ or body structure to develop, usually because of a congenital developmental abnormality.

Synonyms:

HIV Infection

Infection with human immunodeficiency virus, which progressively damages CD4 T lymphocytes if untreated and may lead to acquired immunodeficiency syndrome (AIDS).

Synonyms:

Albinism

An inherited condition involving reduced or absent melanin production, affecting the skin, hair, and eyes.

Synonyms:

Alopecia Totalis

Complete loss of hair from the scalp, usually caused by an autoimmune disorder.

Synonyms:

Alopecia Universalis

Loss of hair from the entire body, including the scalp, eyebrows, eyelashes, and other hair-bearing areas.

Synonyms:

Alpha Blockers

Medicines that block alpha-adrenergic receptors and may lower blood pressure or improve urine flow in prostate enlargement.

Synonyms:

Alveoli

Microscopic air sacs in the lungs where oxygen enters the blood and carbon dioxide leaves it.

Synonyms:

Alzheimer's Disease

A progressive brain disorder causing deterioration of memory, thinking, behavior, and the ability to perform daily activities.

Synonyms:

Amsler Grid

A simple chart used to detect or monitor distortions and missing areas in central vision, especially in macular disease.

Synonyms:

Amyloid

An abnormal protein that can accumulate in tissues and impair their function in several diseases.

Synonyms:

Anagen

The active growth phase of the hair cycle.

Synonyms:

Analgesia

Absence or reduction of pain without necessarily causing loss of consciousness.

Synonyms:

Androgen

A sex hormone, such as testosterone, that contributes to male reproductive development and other body functions.

Synonyms:

Angiotensin I

An inactive precursor that is converted to angiotensin II in the renin-angiotensin system.

Synonyms:

Angiotensin II

A hormone that narrows blood vessels and promotes sodium retention, thereby increasing blood pressure.

Synonyms:

Antibody

A protein produced by the immune system that specifically binds to a foreign or abnormal substance.

Synonyms:

Anticoagulant

A medicine or substance that reduces the blood's ability to form clots.

Synonyms:

Antidepressant

A medicine used to treat depressive disorders and some other conditions involving mood, anxiety, pain, or sleep.

Synonyms:

Antiplatelet Agents

Medicines that reduce platelet activation or aggregation and thereby lower the risk of some blood clots.

Synonyms:

Apolipoproteins

Proteins associated with lipids in the blood that help transport and metabolize cholesterol and triglycerides.

Synonyms:

Articular Cartilage

Smooth cartilage covering the ends of bones within a joint, allowing low-friction movement and distributing load.

Synonyms:

Atrophy

Wasting or decrease in the size and function of a tissue, organ, or muscle.

Synonyms:

Auditory Nerve

The portion of the vestibulocochlear nerve that carries hearing signals from the inner ear to the brain.

Synonyms:

Aura

A temporary sensory, visual, or other neurological symptom that may precede a migraine or seizure.

Synonyms:

Autoantibodies

Antibodies that mistakenly react with the body's own cells or tissues.

Synonyms:

Axon Terminal

The end of a nerve-cell axon that releases chemical messengers to communicate with another cell.

Synonyms:

Achilles Tendinitis

Painful inflammation or degeneration of the Achilles tendon, usually caused by repeated loading.

Synonyms:

ACL Injury

A sprain or tear of the anterior cruciate ligament in the knee.

Synonyms:

Acute Myelogenous Leukemia

A fast-growing cancer of immature myeloid blood cells in the bone marrow and blood; also called acute myeloid leukemia.

Synonyms: acute myeloid leukemia.

Acute Radiation Sickness

Illness caused by a high dose of penetrating radiation received over a short time.

Synonyms:

Airplane Ear

Ear pain, pressure, or temporary hearing loss caused by unequal air pressure across the eardrum during flight.

Synonyms:

Alcohol Intolerance

An unpleasant reaction to alcohol caused by diffi-

culty metabolizing alcohol or one of its components.

Synonyms:

Alcohol Poisoning

A life-threatening condition caused by drinking enough alcohol to impair breathing, consciousness, and other vital functions.

Synonyms:

Alpha-Gal Syndrome

An allergy to the carbohydrate alpha-gal found in most nonhuman mammalian meat and some products derived from mammals.

Synonyms:

Ampullary Cancer

Cancer arising in the ampulla of Vater, where the bile duct and pancreatic duct empty into the small intestine.

Synonyms:

Appendix Cancer

Cancer that begins in the appendix, including neuroendocrine tumors, mucinous tumors, and adenocarcinoma.

Synonyms:

Antibiotic-Associated Diarrhea

Loose or frequent stools that occur during or soon after antibiotic treatment.

Synonyms:

Asthma Attack

A sudden worsening of asthma caused by increased airway narrowing and inflammation.

Synonyms:

Atrioventricular Canal Defect

A congenital heart defect involving abnormal development of the septum and atrioventricular valves; also called an atrioventricular septal defect.

Synonyms: an atrioventricular septal defect.

Atrioventricular Nodal Reentry

Tachycardia

A rapid regular heart rhythm caused by a reentry circuit near the atrioventricular node; commonly abbreviated AVNRT.

Synonyms:

Atypical Genitalia

External genital anatomy that does not have typical male or female features, often because of differences in sex development.

Synonyms:

Atypical Hyperplasia of the Breast

An overgrowth of abnormal cells in breast tissue that is not cancer but may increase future breast-cancer risk.

Synonyms:

Atypical Teratoid Rhabdoid Tumor

A rare, aggressive cancer of the central nervous system that occurs mainly in infants and young children.

Synonyms:

Autoimmune Encephalitis

Brain inflammation caused by antibodies or other immune responses directed against neuronal proteins.

Synonyms:

Autoimmune Epilepsy

Recurrent seizures caused by an immune attack on the brain or by inflammation associated with an autoimmune disorder.

Synonyms:

Abdominal Regions

The nine named areas used to describe locations on the abdominal wall: the right and left hypochondriac, epigastric, right and left lumbar, umbilical, right and left iliac, and hypogastric regions.

Synonyms:

Abdominopelvic Cavity

The continuous body cavity below the diaphragm that contains the abdominal and pelvic organs.

Synonyms:

Abortifacient

A drug or substance that induces abortion by ending a pregnancy.

Synonyms:

Acute Rhinitis

Sudden inflammation of the nasal lining, commonly caused by a viral infection or an irritant, producing congestion, nasal discharge, and sneezing.

Synonyms:

Adnexa

Structures adjacent to an organ; in gynecology, the uterine adnexa include the ovaries, fallopian tubes, and supporting tissues.

Synonyms:

Adrenogenital Syndrome

A group of disorders, usually caused by congenital adrenal hyperplasia, in which excess adrenal androgens cause atypical genital development or early puberty.

Synonyms:

Afferent Neuron

A sensory nerve cell that carries impulses from receptors toward the central nervous system.

Synonyms:

Agranulocytes

White blood cells without prominent cytoplasmic granules; the main types are lymphocytes and monocytes.

Synonyms:

Airway

A passage through which air moves between the outside environment and the lungs, including the nose, mouth, pharynx, larynx, trachea, and bronchi.

Synonyms:

Anastomosis

A natural or surgically created connection between two tubular structures, such as blood vessels or segments of the intestine.

Synonyms:

Allis Clamp

A toothed surgical clamp used to grasp and hold firm tissue during an operation.

Synonyms:

Aphagia

Complete inability to swallow, which may result from neurologic disease, obstruction, severe pain, or loss of swallowing-muscle function.

Synonyms:

Apical Pulse

The heart rate measured by listening over the apex of the heart, usually at the left fifth intercostal space near the midclavicular line.

Synonyms:

Areola

The pigmented circular area surrounding the nipple. It contains glands that help lubricate and protect the skin during breastfeeding.

Synonyms:

Asthenia

Abnormal lack of physical strength or energy. It is a symptom that may occur with illness, malnutrition, or medication effects.

Synonyms:

Azotemia

Accumulation of nitrogen-containing waste products in the blood, usually because the kidneys are not filtering adequately.

Synonyms:

Atrioventricular Valves

The heart valves between the atria and ventricles: the tricuspid valve on the right and the mitral valve on the left.

Synonyms:

Antimicrobial Sensitivity Test

A laboratory test that determines which antimicrobial medicines inhibit or kill a microorganism isolated from a patient.

Synonyms:

Antideformity Position

A therapeutic positioning method that places a limb or joint in an alignment that helps prevent or limit a contracture or deformity.

Synonyms:

Autosomal Dominant Inheritance

Inheritance in which one pathogenic variant on a non-sex chromosome can cause a trait or disorder. An affected heterozygous parent may transmit it to about half of the children.

Synonyms:

Autosomal Recessive Inheritance

Inheritance in which a disorder generally requires pathogenic variants in both copies of a gene. Carrier parents typically have a one-in-four chance of an affected child in each pregnancy.

Synonyms:

Abdominal Angina

Postprandial abdominal pain caused by inadequate blood flow through the arteries supplying the intestines, usually because of atherosclerotic disease.

Synonyms:

Abdominal Binder

A wide supportive garment placed around the abdomen to provide gentle compression after surgery, injury, or selected abdominal-wall conditions.

Synonyms:

Abdominal Migraine

A migraine-related disorder characterized mainly by recurrent episodes of moderate to severe midline abdominal pain, often with nausea or vomiting and little or no headache.

Synonyms:

Abdominocentesis

Surgical or needle puncture of the abdominal wall to enter the peritoneal cavity, commonly for removal or analysis of ascitic fluid.

Synonyms:

Abdominal Hernia

Protrusion of an organ or tissue through a weakness or opening in the abdominal wall. Common types include incisional, umbilical, epigastric, and ventral hernias.

Synonyms:

Ablative Surgery

Surgery that destroys or removes abnormal tissue, often using excision, heat, cold, electrical energy, or other tissue-destructive methods.

Synonyms:

Afferent Loop Syndrome

Obstruction or impaired emptying of the afferent intestinal limb created by some gastric operations, causing bile and pancreatic-secretions to accumulate with pain, nausea, vomiting, or malabsorption.

Synonyms:

Acute Chest Syndrome

A potentially life-threatening pulmonary complication of sickle cell disease characterized by a new lung infiltrate plus fever or respiratory symptoms such as chest pain, cough, hypoxemia, or breathing difficulty.

Synonyms:

Acute Inflammatory Demyelinating Polyradiculoneuropathy

The most common form of Guillain-Barré syndrome, in which immune-mediated demyelination of periph-

eral nerves causes progressive, usually symmetric weakness and reduced reflexes.

Synonyms:

Acute Nephritic Syndrome

A clinical syndrome of glomerular inflammation marked by hematuria, variable proteinuria, edema, hypertension, and reduced kidney function.

Synonyms:

Acute Retroviral Syndrome

The acute illness that may occur shortly after HIV infection, commonly involving fever, rash, sore throat, lymph-node enlargement, muscle aches, or headache.

Synonyms:

Acute Transverse Myelitis

Inflammation across a segment of the spinal cord that can cause rapidly developing weakness, sensory changes, and bladder or bowel dysfunction.

Synonyms:

Adult Polycystic Kidney Disease

An inherited disorder, usually autosomal dominant polycystic kidney disease, in which multiple kidney cysts enlarge over time and may cause hypertension, pain, hematuria, and chronic kidney failure.

Synonyms:

Alcohol Withdrawal Syndrome

A set of symptoms occurring after abrupt reduction or cessation of prolonged heavy alcohol use. Symptoms range from tremor, sweating, anxiety, and nausea to seizures and delirium tremens.

Synonyms:

Anemia of Inflammation

An anemia caused by chronic infection, inflammatory disease, or cancer, involving impaired iron availability, reduced erythropoietin response, and shortened red-cell survival.

Synonyms:

Anterior Cord Syndrome

A spinal-cord injury syndrome causing impaired motor function and loss of pain and temperature sensation below the lesion, with relative preservation of vibration and position sense.

Synonyms:

Adhesiolysis

Surgical division or removal of abnormal fibrous adhesions that bind tissues or organs together, often after inflammation, infection, surgery, or trauma.

Synonyms:

Abulia

Marked reduction in motivation, initiative, and spontaneous activity, usually caused by dysfunction of frontal-subcortical brain circuits or related neurologic disease.

Synonyms:

Acrocyanosis

Persistent, usually painless bluish discoloration and coolness of the hands or feet caused by reduced peripheral blood flow, often worsened by cold exposure.

Synonyms:

Adipsia

Absent or markedly reduced thirst, which can impair normal fluid intake and lead to dehydration or hypernatremia.

Synonyms:

Aerophagia

Excessive swallowing of air, which may cause belching, abdominal bloating, distention, or increased intestinal gas.

Synonyms:

Alpha Thalassemia

An inherited blood disorder caused by reduced production of alpha-globin chains of hemoglobin. Severity ranges from mild microcytosis or anemia to severe fetal or newborn disease.

Synonyms:

Anasarca

Severe, generalized edema involving large areas of the body, often associated with heart failure, kidney disease, liver disease, or profound hypoalbuminemia.

Synonyms:

Abdominal Muscles

The muscles forming the front and sides of the abdominal wall. They support the trunk, help with posture and breathing, and increase intra-abdominal pressure during coughing, lifting, and defecation.

Synonyms: Abdominal wall muscles.

Acceptance-Based Therapies

Psychotherapeutic approaches that help a person notice and accept thoughts, feelings, or bodily sensations while reducing unhelpful attempts to control or avoid them.

Synonyms: Acceptance-based psychotherapy; acceptance-focused therapy.

Acquisition

The process by which new information or a skill is learned and initially encoded, especially in discussions of memory and learning.

Synonyms: Learning acquisition; memory acquisition.

Actin

A structural and contractile protein found in many cells. In muscle, actin interacts with myosin to produce contraction; in other cells, it supports shape, movement, and intracellular transport.

Synonyms: Actin filament; microfilament protein.

Adequate Intake

A recommended average daily nutrient intake based on observed or experimentally determined levels in healthy people when evidence is insufficient to establish a recommended dietary allowance.

Synonyms: AI; adequate nutrient intake.

Adult Day Services

Community-based daytime programs providing supervision, social activities, health-related support,

or assistance with daily activities for adults who cannot safely remain alone throughout the day.

Synonyms: Adult day care; adult day program.

Aesthetician

A trained skin-care professional who provides non-medical cosmetic skin treatments, such as cleansing, superficial exfoliation, and selected skin-care procedures within the scope of local regulation.

Synonyms: Esthetician; skin-care specialist.

After-Cataract

Clouding of the posterior lens capsule that develops after cataract surgery and may cause blurred or hazy vision. It is also called posterior capsule opacification.

Synonyms: Posterior capsule opacification; secondary cataract.

Age-Related Cognitive Decline

A modest, age-associated change in memory, processing speed, or other cognitive abilities that does not necessarily interfere substantially with independent daily functioning.

Synonyms: Age-associated cognitive decline; normal cognitive aging.

Alcohol Abuse

A nonpreferred older term for a pattern of alcohol use that causes recurrent problems or harm. Current clinical classification generally uses alcohol use disorder and specifies its severity.

Synonyms: Problem drinking; harmful alcohol use.

Alcohol Dehydrogenase

An enzyme, found mainly in the liver, that catalyzes the first major step in ethanol metabolism by converting alcohol to acetaldehyde.

Synonyms: ADH; ethanol dehydrogenase.

Alcohol Dependence

A pattern of alcohol use characterized by impaired control, compulsive use, tolerance, withdrawal, and continued drinking despite harm. In current terminology, it is generally classified under alcohol use

disorder.

Synonyms: Alcohol use disorder; alcohol addiction; alcoholism.

Alendronate

A bisphosphonate that reduces bone resorption and is used to treat or prevent osteoporosis and selected other disorders of excessive bone turnover.

Synonyms: Alendronic acid; oral bisphosphonate therapy.

Alpha Cells

Endocrine cells in the pancreatic islets that produce and release glucagon, a hormone that raises blood glucose during fasting or low-glucose states.

Synonyms: Pancreatic alpha cells; glucagon-secreting cells.

Alpha Hydroxy Acids

A group of organic acids used in dermatology and cosmetics to exfoliate the outer skin layer and improve texture or pigmentation. Examples include glycolic and lactic acid.

Synonyms: AHAs; fruit acids.

Alpha Waves

Rhythmic electroencephalographic waves, typically around 8–13 Hz, most prominent when a relaxed, awake person has the eyes closed.

Synonyms: Alpha rhythm; posterior dominant rhythm.

Alpha-Delta Sleep

A sleep pattern in which alpha-frequency activity intrudes into delta-wave deep sleep and may be associated with nonrestorative sleep or chronic pain.

Synonyms: Alpha-delta intrusion; alpha-delta rhythm.

Amyloid Precursor Protein

A normal transmembrane protein that can be processed into amyloid-beta peptides, which may accumulate in the brain in Alzheimer disease.

Synonyms: APP; amyloid-beta precursor protein.

Anterior Myocardial Infarction

A myocardial infarction involving the anterior wall of the left ventricle, usually because of obstruction in the left anterior descending coronary artery.

Synonyms: Anterior heart attack; anterior MI.

Anti-Cyclic Citrullinated Peptide

An autoantibody directed against citrullinated proteins and used, with clinical findings and other tests, to support the diagnosis of rheumatoid arthritis.

Synonyms: Anti-CCP antibody; cyclic citrullinated peptide antibody.

Antileukotriene

A drug class that blocks leukotriene-mediated airway inflammation or bronchoconstriction and is used in selected allergic or respiratory conditions.

Synonyms: Leukotriene modifier; leukotriene pathway inhibitor.

Antispasmodic Drugs

Medicines that reduce smooth-muscle spasm or cramping in selected gastrointestinal, urinary, biliary, or other conditions. Choice and use depend on the cause and clinical context.

Synonyms: Antispasmodics; spasmolytics.

Arterial Resistance

The opposition to blood flow produced mainly by the diameter and tone of small arteries and arterioles. It contributes to systemic vascular resistance and blood pressure.

Synonyms: Vascular resistance; systemic vascular resistance.

Arterioles

Small branches of arteries that regulate blood flow into capillary beds through contraction and relaxation of their smooth muscle.

Synonyms: Resistance vessels; small arteries.

Atheroma

A localized accumulation of lipid, inflammatory cells, and fibrous tissue within an arterial wall, forming part of an atherosclerotic plaque.

Synonyms: Atheromatous plaque; arterial plaque.

Atherothrombotic Stroke

An ischemic stroke caused by thrombosis or artery-to-artery embolism arising from atherosclerotic disease in a large artery supplying the brain.

Synonyms: Large-artery atherosclerotic stroke; atherothrombotic ischemic stroke.

Autologous Fat Transplant

A procedure that removes a person's own fat from one body area and transfers it to another area for soft-tissue volume restoration or contouring.

Synonyms: Autologous fat grafting; fat transfer; lipofilling.

Axillary

Relating to the armpit or to structures located in the axilla, including axillary lymph nodes and vessels.

Synonyms: Armpit-related; pertaining to the axilla.

B

B Cell (B Lymphocyte)

A key cellular component of adaptive humoral immunity that matures in the bone marrow. Upon antigen recognition via B-cell receptor (BCR/surface IgM) and T-cell help (CD40/CD40L interaction), B cells proliferate and differentiate into antibody-secreting plasma cells and long-lived memory B cells.

Synonyms: B Lymphocyte

B Chromosome

A supernumerary chromosome that is not part of the standard chromosome complement and is not required for normal development. It may occur in certain plants, animals, or tumors and varies in number between cells.

Synonyms:

B-Cell Receptor

The membrane-bound immunoglobulin complex on a B lymphocyte that recognizes native antigen. BCR signaling, with appropriate co-stimulation, promotes B-cell activation, proliferation, differentiation, and antibody production.

Synonyms:

B-Lynch Suture

A surgical technique for controlling postpartum hemorrhage due to uterine atony unresponsive to medical management. A compressive suture placed around the uterus to mechanically compress the uterine walls and reduce blood flow. The suture creates a brace-like effect. Can be combined with other compression sutures (Cho, Hayman).

Synonyms:

Babesiosis

A tick-borne malaria-like illness caused by Babesia species (B. microti in the US, B. divergens in Europe), transmitted by Ixodes ticks (same vector as Lyme disease). Parasites infect red blood cells, causing hemolytic anemia.

Synonyms:

Babinski Reflex

An extensor plantar response present from birth to approximately 2 years. When the lateral sole is stroked, the great toe dorsiflexes and other toes fan outward. Disappears as the corticospinal tract myelinates. Persistence beyond age 2 may indicate neurologic abnormality.

Synonyms:

Babinski Sign

The Babinski sign is a pathological reflex elicited by stroking the lateral aspect of the sole of the foot from the heel to the metatarsal heads with a blunt object. A normal response (flexor plantar response) is plantar flexion (curling downward) of all toes.

Synonyms:

Bacillary Angiomatosis

A vascular proliferative disease caused by Bartonella henselae or B. quintana, occurring in immunocompromised patients (HIV/AIDS, transplant). Presents with erythematous papules, nodules, or pedunculated lesions resembling Kaposi sarcoma or pyogenic granuloma. Can involve skin, liver (peliosis hepatis), spleen, bone, and lymph nodes.

Synonyms:

Bacilluria

The presence of bacilli in the urine, usually referring to rod-shaped bacteria detected by microscopy or culture. Its clinical significance depends on symptoms, quantitative culture, and the organism identified.

Synonyms:

Back Injury

Damage to the muscles, ligaments, joints, discs, vertebrae, or nerves of the back caused by trauma, lifting, or repetitive strain. Pain and stiffness are common; weakness, numbness, loss of bladder or bowel control, or severe pain after major trauma requires urgent assessment.

Synonyms:

Back Pain

One of the most common medical complaints, affecting up to 80 percent of the population at some point in life, and the leading cause of disability worldwide. Back pain is classified by duration: acute (less than 4 weeks), subacute (4-12 weeks), and chronic (greater than 12 weeks).

Synonyms:

Backache

Pain or discomfort located anywhere in the posterior trunk from neck to buttocks, a symptom rather than a disease. Causes include musculoskeletal strain (most common), disc herniation, spinal stenosis, facet arthropathy, sacroiliac joint dysfunction, and referred pain from renal, pancreatic, or vascular sources.

Synonyms:

Bacteremia

The presence of viable bacteria in the bloodstream, a serious condition that can be transient (after dental procedures, toothbrushing), intermittent (undrained abscess), or continuous (endovascular infection like endocarditis). Bacteremia triggers systemic inflammatory responses ranging from fever and leukocytosis to septic shock.

Synonyms:

Bacteria

Single-celled microscopic organisms lacking a nucleus, which can exist independently or in colonies; some are beneficial to health (microbiome) while others cause infectious disease.

Synonyms:

Bacterial adherence

The process by which bacteria attach to host cell surfaces, a critical first step in colonisation and infection. Adherence is mediated by adhesins, which are surface structures that bind to specific receptors on host cells. Adhesins include pili, fimbriae, outer membrane proteins, and capsules.

Synonyms:

Bacterial biofilms

Structured communities of bacteria attached to surfaces and embedded in a self-produced matrix of extracellular polymeric substances. Biofilms are a major cause of chronic infections, particularly on medical devices including catheters, prosthetic joints, and heart valves.

Synonyms:

Bacterial capsule

A polysaccharide layer surrounding the bacterial cell wall that protects against phagocytosis and complement-mediated killing. Capsules are major virulence factors for many pathogens including *Streptococcus pneumoniae*, *Haemophilus influenzae*, and *Klebsiella pneumoniae*.

Synonyms:

Bacterial cell wall

The rigid outer layer of bacteria that provides structural integrity and determines cell shape. The cell wall is composed primarily of peptidoglycan, a polymer of sugars cross-linked by short peptides.

Synonyms:

Bacterial classification

The organisation of bacteria into taxonomic groups based on genetic, phenotypic, and evolutionary relationships. Bacteria are classified using a hierarchical

system: domain, phylum, class, order, family, genus, and species.

Synonyms:

Bacterial conjugation

The transfer of genetic material between bacteria through direct cell-to-cell contact via a pilus. Conjugation is mediated by conjugative plasmids that encode the genes for transfer. The donor cell (F+) forms a conjugative pilus that attaches to the recipient cell (F-).

Synonyms:

Bacterial Conjunctivitis

An infection of the conjunctival mucous membrane caused by various bacterial pathogens, presenting with a purulent or mucopurulent discharge that causes the eyelids to become matted together, particularly upon waking, conjunctival injection, and a gritty or foreign body sensation.

Synonyms:

Bacterial dermatitis

Inflammation of the skin caused by bacterial infection, typically presenting with erythema, edema, warmth, pain, and purulent discharge. Common causative organisms include *Staphylococcus aureus* and *Streptococcus pyogenes*, and the condition may arise de novo or as a superinfection of pre-existing dermatitis.

Synonyms:

Bacterial dormancy

A state of reduced metabolic activity that allows bacteria to survive unfavourable conditions. Dormant forms include spores, persisters, and viable but non-culturable cells. Spores are highly resistant structures formed by *Bacillus* and *Clostridium*. Persisters are phenotypic variants that are tolerant to antibiotics.

Synonyms:

Bacterial Endocarditis

Infection of the heart's inner lining or valves by bacteria, usually producing fever and a new or changing

heart murmur. It can cause valve damage and embolic complications.

Synonyms:

Bacterial Endocarditis Vegetations

Vegetations in bacterial endocarditis are complex masses composed of bacteria, fibrin, and platelets that form on heart valve surfaces or endocardium. The pathogenesis begins with bacteremia seeding a site of endothelial damage or a previously abnormal valve surface.

Synonyms:

Bacterial endospores

Highly resistant dormant structures formed by certain gram-positive bacteria including *Bacillus* and *Clostridium* species. Endospores form during nutrient deprivation and can survive for decades. They are resistant to heat, radiation, chemicals, and desiccation.

Synonyms:

Bacterial flagella

Thread-like appendages composed of flagellin protein that provide motility to bacteria. Flagella are composed of three parts: the filament, hook, and basal body. The basal body is embedded in the cell wall and functions as a rotary motor.

Synonyms:

Bacterial Gastroenteritis

Acute inflammation of the stomach and intestines caused by pathogenic bacteria such as *Salmonella*, *Campylobacter*, *Shigella*, or pathogenic *Escherichia coli*. It commonly causes diarrhea, abdominal cramps, fever, and sometimes bloody stools or vomiting.

Synonyms:

Bacterial genetics

The study of genes and genetic processes in bacteria. Bacteria have a single circular chromosome and may contain plasmids, which are extrachromosomal DNA elements. Bacterial genes are organized into operons, which are clusters of genes regulated as a

unit.

Synonyms:

Bacterial growth phases

The stages of bacterial growth in culture. The lag phase is when bacteria adapt to their environment. The log (exponential) phase is when bacteria multiply at their maximum rate. The stationary phase is when nutrient depletion and waste accumulation limit growth. The death phase is when bacteria die.

Synonyms:

Bacterial Infections

Illnesses caused by pathogenic bacteria proliferating in the body, ranging from mild sore throats and ear infections to life-threatening sepsis and meningitis. They are diagnosed through cultures, PCR testing, or other microbiological methods.

Synonyms:

Bacterial Meningitis

Infection of the meninges by bacteria, a medical emergency. In neonates: Group B Streptococcus, *E. coli*, *Listeria*. In older children: *Neisseria meningitidis*, *Streptococcus pneumoniae*. Presents with fever, headache, neck stiffness, altered consciousness, and Kernig/Brudzinski signs. Diagnosis by lumbar puncture.

Synonyms:

Bacterial metabolism

The chemical processes that occur within bacteria to maintain life. Bacteria have diverse metabolic capabilities including aerobic and anaerobic respiration, fermentation, and photosynthesis. Metabolic pathways are targets for antimicrobial drugs.

Synonyms:

Bacterial morphology

The shape and arrangement of bacteria as observed under microscopy. Basic shapes include cocci (spheres), bacilli (rods), and spirilla (spirals). Cocci can be arranged in pairs (diplococci), chains (streptococci), clusters (staphylococci), or tetrads. Bacilli can be single, paired, or arranged in chains.

Synonyms:

Bacterial Overgrowth

Excessive proliferation of bacteria in the small intestine, commonly called small-intestinal bacterial overgrowth. It may result from impaired intestinal motility, anatomical stasis, blind loops, strictures, diverticula, or loss of the normal ileocaecal barrier.

Synonyms: small-intestinal bacterial overgrowth.

Bacterial pathogenesis

The mechanisms by which bacteria cause disease. Pathogenesis involves adhesion, invasion, toxin production, and immune evasion. Adhesins mediate attachment to host cells. Invasins allow penetration of tissues. Toxins damage host cells. Immune evasion mechanisms include capsules, biofilms, and intracellular survival.

Synonyms:

Bacterial pili

Hair-like appendages on the bacterial surface composed of pilin protein. Pili are shorter and thicker than flagella. Type I pili mediate adherence to host cells and are important virulence factors. Type IV pili are involved in twitching motility and DNA uptake during transformation.

Synonyms:

Bacterial Pneumonia

Infection of the lung tissue by bacteria, causing inflammation and air-space filling. It may cause fever, cough, sputum, chest pain, and shortness of breath.

Synonyms:

Bacterial Spore

A metabolically dormant, highly resistant structure produced by certain bacteria, notably *Bacillus* and *Clostridioides* species, in response to environmental stress. Spores resist desiccation, heat, and many disinfectants and require validated sterilization for reliable destruction.

Synonyms:

Bacterial toxins

Substances produced by bacteria that cause damage to host cells. There are two major categories: exotoxins and endotoxins. Exotoxins are proteins secreted by bacteria that have specific toxic effects. Endotoxins are lipopolysaccharide components of gram-negative bacterial outer membranes released during cell lysis.

Synonyms:

Bacterial Tracheitis

Bacterial infection and inflammation of the trachea, often causing fever, a harsh cough, noisy breathing, and potentially rapid airway obstruction.

Synonyms:

Bacterial transduction

The transfer of bacterial DNA from one bacterium to another through bacteriophages (bacterial viruses).

Synonyms:

Bacterial transformation

The uptake of free DNA from the environment by competent bacteria. Transformation occurs naturally in some bacterial species including *Streptococcus pneumoniae*, *Haemophilus influenzae*, and *Neisseria*. Competence is the ability to take up DNA and is regulated by specific genes.

Synonyms:

Bacterial Vaginosis

BV: replacement of normal vaginal lactobacilli by an overgrowth of mixed anaerobes (*Gardnerella vaginalis*, *Mobiluncus*, etc.), the most common cause of vaginal discharge in reproductive-age women. Risk: new/multiple partners, douching, smoking.

Synonyms:

Bacterial virulence factors

Molecules produced by bacteria that contribute to their ability to cause disease. Virulence factors include adhesins, invasins, toxins, capsules, and enzymes. Adhesins mediate attachment to host cells. Toxins damage host cells directly. Capsules protect against phagocytosis. Enzymes degrade host

tissues.

Synonyms:

Bactericide

An agent that kills bacteria rather than merely inhibiting their growth (bacteriostatic). Bactericidal antibiotics include beta-lactams (penicillins, cephalosporins, carbapenems), aminoglycosides, fluoroquinolones, metronidazole, and vancomycin.

Synonyms:

Bacteriology

The branch of microbiology concerned with the study of bacteria, including their morphology, genetics, physiology, ecology, and clinical significance.

Synonyms:

Bacteriophage

A virus that infects and replicates within bacteria.

Synonyms:

Bacteriophage therapy

The investigational use of bacteriophages, viruses that infect bacteria, to treat selected bacterial infections. Their activity is usually limited to susceptible bacterial strains.

Synonyms:

Bacterium

A unicellular prokaryote lacking a nucleus and membrane-bound organelles, possessing a single circular chromosome and typically a peptidoglycan cell wall.

Synonyms:

Bacteriuria

The presence of bacteria in urine, detected by urinalysis or culture. It may occur with urinary symptoms, as in a urinary-tract infection, or without symptoms, as in asymptomatic bacteriuria; interpretation depends on specimen quality, bacterial quantity, patient context, and the presence of inflammation or symptoms.

Synonyms:

Bag-Mask Ventilation

Manual ventilation of a non-breathing or inadequately breathing patient using a self-inflating bag (AMBU) attached to a mask sealed over the face. Effective technique: correct mask size, jaw thrust/head extension, two-person technique (two-hand seal), adequate tidal volumes with ETCO₂ monitoring.

Synonyms:

Bagassosis

An occupational hypersensitivity pneumonitis (extrinsic allergic alveolitis) caused by inhalation of dust from moldy bagasse—the fibrous residue of sugarcane after extraction. Caused by thermophilic actinomycetes (*Saccharopolyspora rectivirgula*) that colonize stored bagasse.

Synonyms:

Bainbridge Reflex

An increase in heart rate produced by stretch of the atrial walls, especially during increased venous return. The reflex helps limit venous congestion by adjusting cardiac output.

Synonyms:

Baker Cyst

A fluid-filled cyst in the popliteal fossa, resulting from herniation of the synovial membrane through the posterior knee joint capsule or from a communication between the knee joint and the gastrocnemius-semimembranosus bursa.

Synonyms:

Baker's cyst

A fluid-filled synovial cyst arising from the gastrocnemius-semimembranosus bursa posterior to the knee, typically caused by chronic knee joint effusion from conditions such as osteoarthritis, rheumatoid arthritis, or meniscal tears. It presents as a palpable, tender mass in the popliteal fossa that may rupture causing calf swelling.

Synonyms:

Balamuthia mandrillaris Infection

A rare, usually fatal infection caused by the free-living amoeba *Balamuthia mandrillaris*. It may begin as a skin lesion and progress to granulomatous amoebic encephalitis with headache, confusion, seizures, or focal neurologic deficits. Diagnosis is difficult and requires specialized testing; urgent infectious-disease and neurologic evaluation is essential.

Synonyms:

Balance

The ability to maintain the body's center of mass over its base of support, relying on input from the vestibular system, vision, and proprioception. It is essential for walking, standing, and performing daily activities without falling. Age-related decline, medications, and neurological disorders can impair balance, increasing fall risk.

Synonyms:

Balance Assessment

An evaluation of steadiness and the ability to maintain safe posture during standing and movement. It may include standardized tests and helps identify mobility or fall risk.

Synonyms:

Balance Disorders and Vertigo

Balance disorders encompass conditions that cause dizziness, unsteadiness, or a sensation of motion, often arising from dysfunction in the inner ear, brain, or sensory pathways.

Synonyms:

Balance Impairment

The ability to maintain the body's center of mass over its base of support, relying on input from the vestibular system, vision, and proprioception. See balance.

Synonyms:

Balance Training

Exercises improving postural stability and preventing falls. Components: static balance, dynamic

balance, reactive balance. Techniques: weight shifting, tandem stance, single-leg stance, perturbations, balance boards. Essential for elderly, neurological conditions.

Synonyms:

Balanitis

Inflammation of the glans penis, often involving the prepuce (balanoposthitis). Causes include poor hygiene, irritants, infection, and dermatologic conditions such as lichen planus, psoriasis, and lichen sclerosus. It may cause erythema, swelling, discharge, pruritus, and discomfort; treatment depends on the cause.

Synonyms:

Balanoposthitis

Inflammation of both the glans penis and the prepuce. It may cause pain, erythema, swelling, discharge, or difficulty retracting the foreskin and can result from infection, irritation, or inflammatory skin disease.

Synonyms:

Baldness

Commonly used term for substantial hair loss, especially androgenetic alopecia, also called pattern hair loss. In this condition, genetically susceptible hair follicles gradually become smaller under the influence of androgens.

Synonyms: pattern.

Ballard Score

Clinical assessment of gestational age in newborns using 6 physical and 6 neuromuscular maturity criteria. Physical parameters: skin texture, ear form and recoil, eye appearance, breast tissue, and genitalia. Neuromuscular: posture, arm and leg recoil, popliteal angle, scarf sign, and heel-to-ear.

Synonyms:

Ballism

A hyperkinetic movement disorder characterized by sudden, involuntary, large-amplitude, flinging movements of a limb or limbs. It is often related to

dysfunction of the subthalamic region or connected basal-ganglia circuits.

Synonyms:

Ballistocardiography

The graphic recording of repetitive body movements produced by the ejection of blood with each heartbeat. It has been used to study cardiac mechanical activity and circulation.

Synonyms:

Balloon (Vascular)

An inflatable catheter component used to widen a narrowed blood vessel or expand a vascular stent.

Synonyms: Vascular

Balloon Aortic Valvuloplasty

Catheter-based procedure using balloon inflation to dilate a stenotic aortic valve. Provides temporary hemodynamic improvement in severe AS but restenosis is common within 6-12 months. Used as a bridge to TAVR or surgical AVR in hemodynamically unstable patients, or as palliation in patients not eligible for definitive valve replacement.

Synonyms:

Balloon Catheter

A catheter with an inflatable tip used to widen a narrowed vessel, expand a stent, or dilate another body passage.

Synonyms:

Band Keratopathy

A horizontal band of calcium deposition in the superficial cornea, typically across the interpalpebral area. It may occur with chronic ocular inflammation, hypercalcemia, renal disease, or longstanding eye disease and can impair vision.

Synonyms:

Bandage

Material applied to cover, protect, compress, or support an injured body part. Examples include gauze, adhesive, elastic, and tubular bandages.

Synonyms:

Bandage Scissors

Blunt-tipped scissors for cutting bandages.

Synonyms:

Bankart Lesion

A tear of the anterior-inferior glenoid labrum, usually caused by anterior shoulder dislocation and associated with recurrent instability.

Synonyms:

Bannayan-Riley-Ruvalcaba Syndrome

Autosomal dominant PTEN hamartoma tumor syndrome (PHTS) caused by loss-of-function mutations in PTEN (10q23), allelic to Cowden syndrome.

Synonyms:

Banti Disease

A historical term for congestive splenomegaly associated with portal hypertension and hypersplenism. Modern evaluation usually identifies the underlying hepatic, portal-venous, or hematologic cause.

Synonyms:

Banti Syndrome

A historical term for portal hypertension with splenomegaly and hypersplenism. Modern evaluation usually identifies an underlying hepatic, portal-venous, or hematologic disorder.

Synonyms:

Barbiturate

A class of CNS depressants derived from barbituric acid that enhance GABA-A receptor activity by increasing the duration of chloride channel opening (as opposed to benzodiazepines, which increase the frequency). At low doses: anxiolysis and sedation. At moderate doses: hypnosis and anesthesia.

Synonyms:

Bare Stent (Vascular)

A metal mesh tube placed inside a narrowed vessel without a drug coating to keep the vessel open.

Synonyms: Vascular

Bariatric Surgery

Weight loss procedures and surgery, collectively known as bariatric surgery, are invasive interventions for severe obesity that produce substantial and sustained weight loss by altering gastrointestinal anatomy and physiology.

Synonyms:

Barium

A metallic element (atomic number 56, symbol Ba) whose sulfate salt (barium sulfate) is used as a radiocontrast agent due to its high atomic number, which effectively absorbs X-rays.

Synonyms:

Barium Enema

Fluoroscopic imaging of the large intestine after retrograde filling with barium contrast. Double-contrast (barium + air) provides better mucosal detail. Indications: colorectal cancer screening (historical, now CT colonography preferred), evaluation of colonic obstruction, diverticulosis, and postsurgical anatomy.

Synonyms:

Barium Study

X-ray imaging using barium sulfate contrast. Barium swallow, barium enema, upper GI series. Evaluates GI tract morphology and function.

Synonyms:

Barium Swallow

Fluoroscopic examination of the esophagus after ingestion of barium contrast. Used to evaluate esophageal anatomy, motility, strictures, and structural abnormalities. The study demonstrates mucosal detail, filling defects, strictures, and motility disorders. A barium follow-through extends the examination to the small bowel.

Synonyms:

Barium-133

Calibration source. Half-life 10.5 years. Used for energy calibration.

Synonyms:

Barognosis

The ability to recognize and distinguish the weight of objects by handling them, with intact primary sensation. Impaired barognosis indicates a cortical sensory deficit.

Synonyms:

Baroreceptor Reflex

The rapid neural mechanism for short-term blood pressure regulation, involving baroreceptors (mechanoreceptors) in the carotid sinus (innervated by CN IX) and aortic arch (innervated by CN X). When blood pressure rises, baroreceptors increase their firing rate, signaling the cardiovascular center in the medulla.

Synonyms:

ABO Blood Types

The major blood-group system based on the presence or absence of A and B antigens on red blood cells and corresponding antibodies in plasma.

Synonyms:

Bouchard Nodes

Bony enlargements of the proximal interphalangeal joints, usually associated with osteoarthritis.

Synonyms:

Buffy Coat

The thin layer of white blood cells and platelets that forms between plasma and red blood cells after centrifugation of whole blood.

Synonyms:

Barotrauma

Lung injury from excessive pressure during ventilation, causing alveolar rupture (pneumothorax, pneumomediastinum). Risk factors: high pressures, high PEEP. Prevented by lung-protective ventilation.

Synonyms:

Barrel Chest

A rounded, enlarged appearance of the chest caused by increased lung volume or changes in the chest wall. It may occur with chronic obstructive pul-

monary disease, severe asthma, or other long-standing lung conditions.

Synonyms:

Barrett Esophagus

Metaplastic transformation of the normal stratified squamous epithelium of the distal esophagus to specialized intestinal-type columnar epithelium containing goblet cells, occurring as a consequence of chronic gastroesophageal reflux disease.

Synonyms:

Barrett Esophagus Surveillance

Periodic endoscopic evaluation of Barrett esophagus to detect dysplasia or early esophageal adenocarcinoma. The interval and biopsy protocol depend on the presence and grade of dysplasia and current clinical guidelines.

Synonyms:

Barrier Creams

Topical preparations applied to the skin to create a physical protective layer against irritants, moisture, and pathogens. Common formulations include zinc oxide, petrolatum, dimethicone, and titanium dioxide.

Synonyms:

Barthel Index

A standardized scale that measures assistance needed for activities of daily living, including feeding, bathing, dressing, toileting, transfers, mobility, and stair use. Scores are interpreted according to the version of the scale and the clinical setting.

Synonyms:

Bartholin Cyst

A cyst of the Bartholin gland (paired mucus-secreting glands at the posterolateral introitus) due to obstruction of the duct; if infected, a Bartholin abscess.

Synonyms:

Bartholin Gland

One of two small glands near the vaginal opening

that produce lubricating mucus. Blockage of its duct can cause a painless cyst; infection can produce a painful abscess with swelling, redness, and difficulty walking or sitting. Recurrent or atypical masses require gynecologic assessment.

Synonyms:

Bartonellosis

A group of infections caused by *Bartonella* species, including cat-scratch disease, bacillary angiomatosis, and, in some regions, bloodstream infection with fever and anemia. The clinical features depend on the species and the patient's immune status.

Synonyms:

Bartter Syndrome

Inherited autosomal recessive disorder of the thick ascending limb of the loop of Henle causing salt wasting, hypokalemic metabolic alkalosis, and hypercalciuria. Results from mutations in genes encoding the NKCC2 transporter or its regulatory subunits. Presents in childhood with failure to thrive, polyuria, and polydipsia.

Synonyms:

Basal Cell Carcinoma

The most common malignant skin tumor, arising from basal keratinocyte-lineage cells and associated with cumulative ultraviolet exposure and Hedgehog-pathway abnormalities. It commonly presents as a pearly papule or nodule with telangiectasia, ulceration, or a rolled border.

Synonyms:

Basal Ganglia

Deep gray matter nuclei in the cerebral hemispheres for motor control, cognition, and emotion. Key structures: caudate nucleus, putamen, globus pallidus (internal/external segments), subthalamic nucleus, substantia nigra. Direct pathway facilitates movement; indirect inhibits it.

Synonyms:

Basal Ganglia Dysfunction

Abnormal function of the deep cerebral nuclei that

regulate movement, cognition, and procedural learning. It may cause tremor, rigidity, bradykinesia, chorea, dystonia, or abnormal involuntary movements, as in Parkinson disease and Huntington disease.

Synonyms:

Basal Metabolic Rate

Energy expenditure at rest for basic physiological functions. Accounts for 60-75% of total energy expenditure. Affected by age, sex, body composition, thyroid status, genetics. Measured by indirect calorimetry.

Synonyms:

Base

A substance that accepts protons (H⁺) or donates electron pairs (Lewis base). In aqueous solution, bases increase OH⁻ concentration (pH >7). Strong bases (NaOH, KOH) dissociate completely; weak bases (NH₃, HCO₃⁻, protein side chains) partially.

Synonyms:

Base Excision Repair

The repair pathway for small, non-helix-distorting base lesions including oxidized bases (8-oxoguanine), deaminated bases (uracil from cytosine deamination), alkylated bases, and abasic (AP) sites.

Synonyms:

Basement Membrane

A thin, delicate layer of extracellular matrix that anchors epithelial tissue to the underlying connective tissue.

Synonyms:

Basic Life Support

Immediate care for a person with cardiac arrest or respiratory failure, including recognition, emergency activation, chest compressions, ventilation, and defibrillation when indicated.

Synonyms:

Basic Metabolic Panel

A panel of blood tests measuring serum glucose,

sodium, potassium, chloride, bicarbonate, BUN, and creatinine. Also includes calcium in some institutions. Uses: assess hydration status, renal function, acid-base balance, and glucose control.

Synonyms:

Basic Reproduction Number

The expected number of secondary infections generated by one typical infectious person in a completely susceptible population, under specified conditions. It is a population and context parameter, not a fixed biological constant.

Synonyms:

Basilar artery aneurysm

Dilation of the basilar artery, most commonly fusiform, often associated with atherosclerosis or hypertension. May compress cranial nerves or brainstem structures causing facial pain, double vision, or hemiparesis. Rupture causes subarachnoid hemorrhage with high morbidity.

Synonyms:

Basophil

A rare (<1 percent of leukocytes) granulocyte with large, basophilic granules containing histamine, heparin, and leukotrienes. Basophils bear high-affinity IgE receptors (Fc-epsilon-RI) and, like mast cells, release histamine and mediators during immediate hypersensitivity (allergic) reactions.

Synonyms:

Bath Salts Abuse and Addiction

Misuse of synthetic cathinones, stimulant drugs that may cause agitation, paranoia, hallucinations, seizures, dangerously high temperature, cardiovascular complications, and dependence. Severe agitation, chest pain, seizure, hyperthermia, or altered consciousness requires emergency care. Treatment is supportive and may require addiction and mental-health services.

Synonyms:

Battered Child Syndrome

A pattern of repeated, non-accidental physical in-

jury inflicted on a child by a caregiver, formally described by Kempe in 1962. Features include fractures of differing ages, subdural and retinal hemorrhages, inconsistent histories, and delayed presentation; mandatory reporting is required in most jurisdictions.

Synonyms:

Bauhin Valve

The ileocecal valve, a mucosal sphincter at the junction of the terminal ileum and cecum that helps regulate passage of intestinal contents and limits reflux from the colon.

Synonyms:

BCG Vaccine

A live attenuated vaccine derived from *Mycobacterium bovis* that helps prevent severe forms of tuberculosis, especially in children. Its use depends on national tuberculosis-risk policies.

Synonyms:

Beals Syndrome

A congenital connective-tissue disorder characterized by congenital contractures, arachnodactyly, kyphoscoliosis, and crumpled ears. It is usually associated with pathogenic variants affecting fibrillin-2.

Synonyms:

Beam Hardening Artifact

CT artifact from dense structures. Reduced by beam hardening correction algorithms.

Synonyms:

Beau Lines

Transverse depressions or grooves across the nail plate caused by temporary interruption of nail-matrix growth. They may follow severe illness, fever, trauma, malnutrition, chemotherapy, or systemic inflammatory disease.

Synonyms:

Beau's Lines

Transverse grooves or depressions across a fingernail or toenail caused by temporary interruption of

nail-matrix growth. They may follow severe illness, injury, high fever, nutritional stress, or local trauma; the timing of the groove can help estimate when the event occurred.

Synonyms:

Bechterew Disease

Historical eponym for ankylosing spondylitis (also known as Marie-Strümpell disease), describing the chronic inflammatory arthritis of the axial skeleton first reported by Vladimir Bekhterev (Russian, 1892) and Adolf Strümpell (German, 1884).

Synonyms: Marie-Strümpell disease),.

Beck Triad

Classic diagnostic clinical triad of Cardiac Tamponade: (1) Hypotension, (2) Distended neck veins (elevated JVP), and (3) Muffled / distant heart sounds. See Cardiac Tamponade.

Synonyms:

Becker Muscular Dystrophy

An X-linked recessive neuromuscular disorder caused by mutations in the dystrophin gene, similar to Duchenne muscular dystrophy (DMD), but with in-frame mutations that allow production of some functional dystrophin protein, albeit reduced in quantity or abnormal in size. The result is a milder clinical phenotype compared to DMD.

Synonyms:

Becker's nevus

A benign hamartomatous lesion appearing as a unilateral, hyperpigmented, often hairy patch, typically developing in adolescence on the shoulder or upper trunk of males. It results from a localized androgen-dependent increase in dermal smooth muscle and pigmentation. It is cosmetically concerning but carries no malignant potential.

Synonyms:

Beckwith-Wiedemann Syndrome

An overgrowth disorder associated with 11p15.5 imprinting defects. Features: macrosomia, macroglossia, omphalocele, visceromegaly, and neonatal hy-

poglycemia. Increased risk of embryonal tumors (Wilms tumor, hepatoblastoma).

Synonyms:

Becquerel (Bq)

The SI unit of radioactive activity, equal to one nuclear transformation per second. Administered activity is commonly reported in megabecquerels or gigabecquerels in nuclear medicine.

Synonyms: Bq

Bedbug Bites

Cutaneous reactions to bites of *Cimex lectularius* (bedbugs), nocturnal blood-feeding insects. Bites are painless but cause erythematous, pruritic papules, often in a linear arrangement (breakfast, lunch, dinner sign) or clusters on exposed skin (face, neck, arms, hands). Delayed hypersensitivity develops over days.

Synonyms:

Bedpan

A receptacle used by a person who cannot safely leave bed to urinate or pass stool.

Synonyms:

Bedsore

Pressure ulcer (decubitus): localized skin/soft tissue injury from prolonged pressure over bony prominences (sacrum, heels, occiput, trochanters), usually in immobile patients.

Synonyms:

Bedwetting

Involuntary urination during sleep after the age at which nighttime bladder control is usually established. It may be primary or secondary to urinary infection, constipation, diabetes, sleep disorders, stress, or other medical conditions and should be assessed when persistent, new, or accompanied by daytime symptoms.

Synonyms:

Beers Criteria

A regularly updated list of medicines that may pose

increased risks for some older adults. It supports medication review but does not replace individualized clinical judgment.

Synonyms:

Behavioral Rehabilitation

Behavioral interventions for chronic conditions: pain management, addiction, adjustment.

Synonyms:

Behcet Disease

A chronic, relapsing systemic vasculitis characterized by recurrent oral ulcers, genital ulcers, and ocular inflammation, with a distribution along the ancient Silk Road from the Mediterranean to East Asia.

Synonyms:

Belching

The release of swallowed air or gas from the stomach through the mouth. Frequent belching may occur with aerophagia, gastroesophageal reflux, functional dyspepsia, or carbonated-drink consumption.

Synonyms:

Bell Palsy

Acute, idiopathic, unilateral facial nerve (CN VII) paralysis of lower motor neuron type, with an incidence of approximately 20-30 per 100,000 person-years.

Synonyms:

Bell's Palsy

Acute peripheral facial-nerve weakness of uncertain cause, usually affecting one side of the face. Eye protection and timely clinical assessment are important; treatment is individualized.

Synonyms:

Bence Jones Protein

Monoclonal immunoglobulin light chains (free kappa or lambda) detectable in urine of patients with monoclonal gammopathies, most characteristically multiple myeloma but also Waldenstrom macroglobulinemia, MGUS, and primary amyloidosis (AL).

Synonyms:

Bence-Jones Protein

A monoclonal immunoglobulin light chain found in urine or blood, classically associated with plasma-cell disorders such as multiple myeloma. Detection contributes to evaluation of monoclonal gammopathy and kidney injury.

Synonyms:

Bends

A manifestation of decompression sickness caused by gas bubbles forming in tissues or blood after a rapid reduction in ambient pressure. It commonly produces deep joint or muscle pain but may also involve the nervous system or lungs.

Synonyms:

Beneficence and Non-Maleficence

Core biomedical ethical principles guiding clinical practice and medical research. Beneficence requires healthcare providers to act in the best interest of the patient, taking positive steps to promote health, prevent harm, and relieve suffering.

Synonyms:

Benign Intracranial Hypertension

An older term for idiopathic intracranial hypertension, a disorder of raised intracranial pressure without an intracranial mass or hydrocephalus. Headache and papilledema are typical, and untreated disease may threaten vision.

Synonyms:

Benign Mixed Tumor

A benign salivary-gland tumor containing epithelial and connective-tissue components, usually called a pleomorphic adenoma.

Synonyms:

Benign Neoplasm

Benign neoplasms are proliferations of cells that remain confined to their site of origin, grow by expansion rather than invasion, and do not metastasize to distant sites. They typically grow slowly, pushing

aside adjacent normal tissue and often becoming enclosed by a fibrous pseudocapsule formed from compressed connective tissue.

Synonyms:

Benign Paroxysmal Positional Vertigo

A common peripheral vertigo from dislodged otoliths (canalithiasis) within the semicircular canals, most often the posterior canal. Brief episodes of rotational vertigo lasting under one minute provoked by changes in head position.

Synonyms:

Benign Positional Vertigo

Brief episodes of spinning dizziness triggered by changes in head position, usually caused by displaced calcium carbonate crystals in a semicircular canal. It is also called benign paroxysmal positional vertigo or BPPV.

Synonyms:

Benign Prostatic Hyperplasia

Noncancerous enlargement of the prostate that may obstruct urine flow and cause hesitancy, weak stream, urgency, frequency, nocturia, or incomplete emptying. Assessment uses the symptoms, examination, and selected tests.

Synonyms:

Benign Prostatic Obstruction

Bladder-outlet obstruction caused by benign prostatic enlargement or increased prostatic smooth-muscle tone. It can produce weak stream, hesitancy, intermittency, straining, incomplete emptying, retention, infection, and upper-tract deterioration.

Synonyms:

Benign Tumor

Non-cancerous growth, slow-growing, well-differentiated, localized, does not invade or metastasize. Examples: lipoma, fibroma, adenoma. May cause problems by compression or hormone secretion.

Synonyms:

Bent Spine Syndrome

A marked, usually reducible forward flexion of the trunk caused by weakness or abnormal contraction of axial extensor muscles. It is also called camptocormia and may accompany neuromuscular or movement disorders.

Synonyms: camptocormia and may accompany.

Benzene

Solvent, industrial chemical. Chronic exposure: aplastic anemia, leukemia (especially AML). Acute: CNS depression, arrhythmias. Prevention: substitution, ventilation, monitoring.

Synonyms:

Benzo(a)pyrene

Polycyclic aromatic hydrocarbon from combustion. Carcinogenic (lung, skin cancer). Found in tobacco smoke, charred meat, air pollution.

Synonyms: a

Benzodiazepine Use Disorder

A problematic pattern of benzodiazepine use leading to significant impairment. Benzodiazepines include alprazolam, clonazepam, diazepam, and lorazepam. Dependence can develop rapidly with regular use. Withdrawal can be life-threatening, presenting with anxiety, insomnia, tremor, seizures, and psychosis.

Synonyms:

Benzodiazepine Withdrawal

Symptoms from cessation or reduction of prolonged benzodiazepine use. Early symptoms include anxiety, insomnia, tremor, and diaphoresis. Severe withdrawal can include seizures, psychosis, and delirium. Withdrawal severity depends on the half-life of the benzodiazepine, duration of use, and dose.

Synonyms:

Benzodiazepines

A class of drugs that enhance the effect of the inhibitory neurotransmitter gamma-aminobutyric acid at the GABA-A receptor, increasing the frequency of chloride channel opening and producing anxiolytic, sedative, anticonvulsant, and muscle re-

laxant effects.

Synonyms:

Bereavement

Natural grief response to the death of a loved one, marked by sadness, yearning, and preoccupation with the deceased, experienced in waves that diminish over weeks to months with preserved self-esteem. Distinct from major depression by its wave-like quality and preserved self-worth.

Synonyms:

Bereavement reaction

A normal emotional response to the death of a loved one, involving grief that generally follows a variable course without necessarily indicating a mental disorder.

Synonyms:

Berger Disease

Historical name for IgA nephropathy named after Jean Berger who first characterized mesangial IgA deposition in 1968. Characterized by recurrent gross hematuria triggered by mucosal infections with intervals of microscopic hematuria and proteinuria. Generally benign course in most patients but subset progresses to CKD.

Synonyms:

Beriberi

A nutritional deficiency disease caused by inadequate thiamine (vitamin B1), occurring in two forms. Wet beriberi presents with high-output heart failure, peripheral vasodilation, edema, and tachycardia due to impaired cardiac energy metabolism.

Synonyms:

Bernard–Soulier syndrome

An inherited platelet-adhesion disorder caused by deficiency or dysfunction of the glycoprotein Ib-IX-V complex, producing mucocutaneous bleeding and giant platelets.

Synonyms:

Berry Aneurysm

A small, rounded saccular aneurysm arising at an arterial branch point in the circle of Willis. Rupture is a major cause of nontraumatic subarachnoid hemorrhage.

Synonyms:

Berylliosis

A granulomatous lung disease from beryllium exposure. Chronic berylliosis resembles sarcoidosis. Diagnosis requires beryllium lymphocyte proliferation test.

Synonyms:

Beta Blockers

A class of medications that block the effects of adrenaline on the body's beta receptors. They slow down the heart rate and reduce blood pressure, making them widely used for treating heart conditions, high blood pressure, and anxiety.

Synonyms:

Beta-Adrenergic Blocker

A drug that antagonizes beta-adrenergic receptors, reducing heart rate, myocardial contractility, and renin release. It is used in selected patients with hypertension, angina, arrhythmias, post-myocardial infarction disease, and heart failure; abrupt withdrawal may worsen ischemia.

Synonyms:

Beta-Blocker Overdose

Toxic exposure to a beta-adrenergic blocker that may cause slow heart rate, low blood pressure, low blood glucose, bronchospasm, seizures, or altered consciousness. It requires urgent poison-control and medical management.

Synonyms:

Beta-Blockers

Beta-adrenergic blocking agents, commonly known as beta-blockers, are topical medications used in the treatment of glaucoma that lower intraocular pressure by reducing the production of aqueous humor by the ciliary body, primarily through blockade of

beta-2 adrenergic receptors.

Synonyms:

Beta-Lactam Antibiotics

A large class of antimicrobial agents characterized by a beta-lactam ring in their molecular structure, which is essential for their bactericidal activity.

Synonyms:

Beta-lactamase inhibitor combinations

Combinations of beta-lactam antibiotics with beta-lactamase inhibitors that extend activity against beta-lactamase producing organisms. The major combinations include amoxicillin-clavulanate, ampicillin-sulbactam, piperacillin-tazobactam, cefoperazone-sulbactam, and ceftolozane-tazobactam.

Synonyms:

Beta-Oxidation

The catabolic process by which fatty acid molecules are broken down in the mitochondria (and peroxisomes) to generate acetyl-CoA, NADH, and FADH₂.

Synonyms:

Beta-thalassemia

An inherited hemoglobin disorder with deficient or absent beta-globin chain synthesis, ranging from mild trait to transfusion-dependent major disease with iron overload, extramedullary hematopoiesis, and skeletal changes.

Synonyms:

Bezoar

A mass of indigestible material retained in the gastrointestinal tract, commonly composed of hair, plant fiber, or medication material.

Synonyms:

BI-RADS

Breast Imaging-Reporting and Data System. Standardizes mammography reporting. Categories: 0 (incomplete), 1 (negative), 2 (benign), 3 (probably benign), 4 (suspicious), 5 (highly suggestive of malignancy), 6 (known biopsy-proven malignancy).

Synonyms:

Bicarbonate

The principal extracellular buffer anion, formed from carbon dioxide and water and regulated chiefly by the lungs and kidneys. The bicarbonate-carbonic-acid system helps maintain arterial pH; serum bicarbonate is commonly used to assess metabolic components of acid-base disorders.

Synonyms:

Biceps Brachii Muscle

Two-headed anterior arm muscle. Long head from supraglenoid tubercle, short head from coracoid process, both inserting on the radial tuberosity. Innervated by musculocutaneous nerve (C5-C6). Most powerful elbow flexor in supination; supinates forearm; weakly flexes shoulder. Distal rupture causes Popeye deformity.

Synonyms:

Biceps Reflex

A tendon reflex produced by tapping the biceps tendon, causing elbow flexion through the musculocutaneous nerve and predominantly C5-C6 spinal segments. It helps assess the corresponding peripheral and central pathways.

Synonyms:

Bicipital Groove

The intertubercular groove of the humerus that transmits the tendon of the long head of the biceps brachii, with the transverse humeral ligament and adjacent rotator-cuff structures contributing to tendon stability.

Synonyms:

Bicipital Tuberosity

The radial tuberosity, a roughened prominence on the proximal radius where the biceps brachii tendon inserts and produces flexion and supination of the forearm.

Synonyms:

Bicuspid Aortic Valve

A congenital aortic valve with two leaflets instead of the usual three. It can lead to aortic stenosis, aortic regurgitation, enlargement of the aorta, or other congenital heart abnormalities.

Synonyms:

Bicuspid Valve

A heart valve with two leaflets rather than the usual three. The term most often refers to congenital bicuspid aortic valve, which can cause aortic stenosis, regurgitation, infective endocarditis, or ascending-aortic disease.

Synonyms:

Bietti's Crystalline Dystrophy

A rare autosomal recessive chorioretinal dystrophy characterized by tiny crystalline deposits in the retina and cornea with progressive chorioretinal atrophy, presenting with night blindness and progressive visual field loss beginning in early adulthood.

Synonyms:

Biguanide

A class of medicines that lower blood glucose by reducing hepatic glucose production and improving insulin sensitivity. Metformin is the principal biguanide in current clinical use; its use depends on kidney function, tolerability, and the person's treatment goals.

Synonyms:

Bilateral peritonsillar abscesses

Suppurative infection in the peritonsillar space on both sides, a rare complication of acute tonsillitis presenting with severe sore throat, dysphagia, trismus, and muffled hot potato voice. Bilateral involvement risks acute upper airway obstruction and requires urgent needle aspiration or incision and drainage.

Synonyms:

Bile Acids

Substances produced by the liver that aid digestion and absorption of fats and fat-soluble vitamins.

They are also measured when a hepatobiliary disorder, including intrahepatic cholestasis of pregnancy, is suspected.

Synonyms:

Bile Duct

A channel that carries bile from the liver and gallbladder to the duodenum. The right and left hepatic ducts unite as the common hepatic duct; union with the cystic duct forms the common bile duct, which usually joins the pancreatic duct before entering the duodenum at the major duodenal papilla.

Synonyms:

Bile Reflux

Reflux of duodenal contents (bile acids, lysolecithin, pancreatic enzymes) into the stomach and esophagus, caused by incompetence of the pyloric sphincter, prior gastric surgery (Billroth II, Roux-en-Y, vagotomy with pyloroplasty), cholecystectomy, or functional gastroparesis.

Synonyms:

Bile Salt Emulsification

Bile salts (derived from cholesterol in the liver) are amphipathic molecules with hydrophobic and hydrophilic regions that act as biological detergents, emulsifying dietary lipids into smaller droplets (micelles). This increases the surface area of lipid substrate available for pancreatic lipase action.

Synonyms:

Bile Salt Malabsorption

Condition characterized by impaired reabsorption of bile acids in the terminal ileum leading to excessive bile acids entering the colon where they stimulate water and electrolyte secretion causing chronic watery diarrhea.

Synonyms:

Bilharzia

A parasitic infection caused by *Schistosoma* species. See Schistosomiasis.

Synonyms:

Biliary Atresia

A progressive, obliterative cholangiopathy of the extrahepatic bile ducts in neonates, leading to biliary obstruction, cholestasis, and ultimately biliary cirrhosis if untreated.

Synonyms:

Biliary Cirrhosis

Chronic liver scarring associated with long-standing injury to the bile ducts. The term is often used for primary biliary cholangitis, an autoimmune small-duct disease.

Synonyms:

Biliary Colic

Episodic right-upper-quadrant or epigastric pain caused by transient obstruction of the cystic duct, usually by a gallstone. Pain is typically steady, may follow meals, and resolves when the obstruction passes; fever and persistent inflammatory findings suggest a complication.

Synonyms:

Biliary Dyskinesia

A functional gallbladder disorder causing biliary-type pain without gallstones or another clear structural cause. A hepatobiliary scan may show abnormal gallbladder emptying, but no single ejection-fraction cutoff establishes the diagnosis; other causes must be considered.

Synonyms:

Biliary Fever

Fever associated with infection or inflammation of the biliary tract, classically acute ascending cholangitis. It may occur with right-upper-quadrant pain and jaundice and can progress rapidly to sepsis.

Synonyms:

Biliary Stent

A tube placed in a bile duct to maintain drainage when the duct is narrowed or blocked. Stents may be plastic or metal, and complications include migration, blockage, infection, and pancreatitis.

Synonyms:

Biliary Tract

The network of ducts that carries bile from the liver and gallbladder to the small intestine. Blockage or inflammation can cause abdominal pain, jaundice, infection, or pancreatitis.

Synonyms:

Biliary Tract Injuries

Damage to the gallbladder, bile ducts, or adjacent biliary structures, often occurring after abdominal surgery or trauma. It may cause bile leakage, obstruction, jaundice, infection, or later biliary narrowing.

Synonyms:

Bilious Vomiting

Vomiting of green/yellow, bilious material in the newborn or infant, defined as emerald green or yellow vomitus that contains bile.

Synonyms:

Bilirubin

A yellow pigment formed mainly from heme breakdown. Unconjugated bilirubin is transported bound to albumin to the liver, where it is conjugated with glucuronic acid and excreted in bile; accumulation causes jaundice.

Synonyms:

Bilirubin Encephalopathy

Neurologic injury caused by deposition of unconjugated bilirubin in the brain, especially the basal ganglia. Severe neonatal hyperbilirubinemia can produce acute lethargy, abnormal tone, feeding difficulty, seizures, and permanent kernicterus.

Synonyms:

Bilirubin Metabolism

Bilirubin is the breakdown product of heme from senescent red blood cells, metabolized primarily by the liver through a series of enzymatic steps. Heme is converted to biliverdin by heme oxygenase, then to unconjugated bilirubin by biliverdin reductase. Unconjugated bilirubin is lipophilic and transported bound to albumin to the liver.

Synonyms:

Bilirubinuria

The presence of conjugated bilirubin in urine. It indicates that water-soluble bilirubin has entered the circulation, often because of hepatocellular disease or biliary obstruction.

Synonyms:

Binet-Simon Scale

An early developmental assessment used to estimate intellectual functioning in children by comparing performance with age-based tasks. Modern evaluation uses standardized, validated developmental and cognitive instruments.

Synonyms:

Binge Eating Disorder

Recurrent episodes of eating large quantities of food with a sense of lack of control, without regular compensatory behavior. Associated with obesity, depression, and anxiety. Diagnosis by DSM-5 criteria. Treatment: cognitive behavioral therapy, interpersonal therapy, and SSRIs. Weight management with dietary counseling and exercise.

Synonyms:

Binocular visual loss

Reduction in vision affecting both eyes simultaneously, typically resulting from bilateral optic neuropathy, chiasmal lesions, or diffuse bilateral retinal disease rather than monocular ocular pathology. Evaluation requires neuroimaging and visual field testing to localise the lesion along the visual pathway.

Synonyms:

Bioabsorbable Stent (Vascular)

A vascular scaffold designed to provide temporary support and gradually break down after its function is completed.

Synonyms: Vascular

Bioavailability

The fraction of an administered drug that reaches

the systemic circulation in its unchanged active form. It is expressed as a percentage and is determined by the route of administration and the extent of first-pass metabolism. For intravenous administration, bioavailability is 100 percent by definition.

Synonyms:

Bioburden

The number and type of viable microorganisms contaminating a surface, medical device, tissue, or pharmaceutical product; a measure of contamination. Bioburden testing assesses the level of microbial contamination (total viable count) before sterilization or in quality control.

Synonyms:

Biochemical Assessment

Blood tests: albumin, prealbumin, transferrin, electrolytes, vitamins, minerals, glucose, lipids. Reflect nutritional status and metabolic function.

Synonyms:

Biocompatibility

Ability of material to function without adverse response. ISO 10993 standards for biocompatibility testing.

Synonyms:

Biodegradable Implant

An implant designed to perform a temporary function and then degrade into products that can be metabolized or eliminated by the body. Degradation rate, local tissue response, and mechanical strength must be matched to the intended clinical use.

Synonyms:

Biodistribution

The time-dependent distribution of a radiopharmaceutical among organs, tissues, blood, and excretory pathways. It determines image quality, target-to-background contrast, therapeutic delivery, and radiation exposure to normal organs.

Synonyms:

Bioequivalence

The property of two drug products (brand-name and generic) that have the same rate and extent of absorption when administered at the same molar dose under similar conditions, resulting in comparable bioavailability and therapeutic effect.

Synonyms:

Bioethics

Interdisciplinary study of the ethical, legal, philosophical, and social implications of advancements in medicine, biology, healthcare technology, and biotechnology.

Synonyms:

Bioethics (Geriatric)

Ethical considerations in elderly care: autonomy vs. paternalism, informed consent capacity, end-of-life decisions, resource allocation, elder abuse. Principles: respect for autonomy, beneficence, non-maleficence, justice. Advance directives: living will, durable power of attorney for healthcare.

Synonyms: Geriatric

Biofilm

An organized community of microorganisms attached to a surface and embedded in a self-produced extracellular polymeric matrix (polysaccharides, proteins, DNA).

Synonyms:

Biofilm-associated infections

Infections caused by bacteria growing in biofilms on medical devices or tissues. Biofilms are structured communities of bacteria embedded in extracellular polymeric substances. Bacteria in biofilms are more resistant to antibiotics and host immune responses.

Synonyms:

Biologic Therapy

Treatment with biologic agents targeting specific immune pathways, used in autoimmune and inflammatory disease.

Synonyms:

Biologic Therapy in Dermatology

Treatment with targeted biological agents, usually monoclonal antibodies or receptor proteins, that inhibit selected immune pathways. Biologics are used for diseases such as psoriasis, atopic dermatitis, hidradenitis suppurativa, and urticaria; infection risk, vaccination status, screening, and monitoring must be considered.

Synonyms:

Biologic Variation

Natural fluctuation in a measurable analyte within an individual over time and variation between individuals. It should be considered when interpreting serial results and deciding whether a change is clinically meaningful.

Synonyms:

Biological Half-Life

Time required for the human body to eliminate half the administered quantity of a drug or radiopharmaceutical through metabolic and excretory processes. Different from physical half-life (radioactive decay) and effective half-life (combined biological and physical elimination). Formula: $1/T_{\text{effective}} = 1/T_{\text{physical}} + 1/T_{\text{biological}}$.

Synonyms:

Biomarker

Measurable indicator of disease. Cancer biomarkers: diagnostic, prognostic, predictive.

Synonyms:

Biomarker Testing

Laboratory analysis of biological features, such as genes, proteins, or metabolites, that may help diagnose disease, estimate prognosis, or guide treatment.

Synonyms:

Biomechanics

Study of movement mechanics. Gait analysis, joint forces, muscle activation. Applied to rehabilitation device design.

Synonyms:

Biomolecule

Any organic molecule produced by living organisms, essential for structure, function, and regulation of biological processes.

Synonyms:

Biomonitoring

Measurement of substances in body. Examples: blood glucose, drug levels, toxicants.

Synonyms:

Biophysical Profile

A non-stress test combined with ultrasound assessment of five fetal parameters, each scored 0 or 2 for a total of 0-10. Parameters include non-stress test (fetal heart rate reactivity), fetal breathing movements, fetal tone, fetal movement, and amniotic fluid volume.

Synonyms:

Biopsy

Removal of tissue for histological examination to diagnose disease. Types: needle biopsy (fine needle aspiration, core needle), excisional, incisional, punch, endoscopic. Sites: breast, lung, liver, lymph node, bone marrow. Complications: bleeding, infection, seeding (rare).

Synonyms:

Biopsy Needle

A needle designed to obtain cells or tissue for cytologic or histopathologic examination. Fine-needle aspiration retrieves cells, whereas core biopsy obtains a tissue cylinder that preserves architecture.

Synonyms:

Biosensor

A device that combines a biological recognition element with a physical or chemical transducer to detect and measure an analyte. Medical examples include sensors for glucose, pathogens, hormones, and cardiac biomarkers.

Synonyms:

Biosimilar

A biologic medicine highly similar to an approved reference biologic, with no clinically meaningful differences in safety, purity, or potency for its approved uses. Because biologics are complex, biosimilarity is established through a comparative evidence program rather than simple chemical identity.

Synonyms:

Biot Breathing

An irregular breathing pattern with random periods of normal breathing interspersed with apneic episodes, seen in brainstem lesions. It is less organized than Cheyne-Stokes breathing and indicates medullary damage.

Synonyms:

Biotelemetry

The remote measurement and transmission of physiologic data from a person or animal. Clinical applications include ambulatory cardiac rhythm monitoring, temperature monitoring, and intensive-care observation.

Synonyms:

Bioterrorism Agents

Category A: anthrax (*Bacillus anthracis*), smallpox (*variola*), botulism (*Clostridium botulinum*), plague (*Yersinia pestis*), tularemia (*Francisella tularensis*), viral hemorrhagic fevers (Ebola, Marburg, Lassa, Machupo). Anthrax: inhalational (mediastinal widening, hemorrhagic mediastinitis), cutaneous (eschar), GI.

Synonyms:

Biotinidase Deficiency

An autosomal recessive inborn error of biotin recycling caused by BTB gene mutations, resulting in inability to cleave biotin from biocytin (proteolytic degradation product of biotin-dependent carboxylases).

Synonyms:

Biotransformation

The process by which drugs and other xenobiotics

are chemically modified by metabolic enzymes, primarily in the liver, to facilitate elimination from the body. Biotransformation occurs in two phases.

Synonyms:

Biotrauma

Inflammatory response to ventilator-induced lung injury with systemic cytokine release. Can lead to multi-organ dysfunction. Minimized by lung-protective ventilation strategies.

Synonyms:

BiPAP

Bilevel Positive Airway Pressure, a form of non-invasive ventilation delivering two levels of pressure: IPAP (inspiratory) for ventilation and EPAP (expiratory) for alveolar recruitment. It is particularly effective for COPD exacerbations with hypercapnic respiratory failure. It reduces work of breathing and improves gas exchange.

Synonyms:

BiPAP Machine

A device that provides two levels of positive airway pressure, commonly a higher pressure during inhalation and a lower pressure during exhalation.

Synonyms:

Biparietal Diameter

The transverse diameter of the fetal skull measured at the level of the thalami and cavum septum pellucidum. Used for dating (14-26 weeks, $\pm 7-10$ days) and assessing growth. Normal growth: 2-4 mm per week. BPD is less reliable after 26 weeks and in abnormal fetal head shapes (dolichocephaly, brachycephaly).

Synonyms:

Bipolar Disorder

A mood disorder characterized by episodes of mania/hypomania and depression. Bipolar I: at least one manic episode (elevated mood, grandiosity, decreased need for sleep, pressured speech, increased goal-directed activity, risky behavior) lasting ≥ 1 week or requiring hospitalization.

Synonyms:

Bipolar I Disorder

A mood disorder defined by at least one manic episode lasting at least seven days or requiring hospitalization. A manic episode is a distinct period of abnormally elevated, expansive, or irritable mood and increased goal-directed activity or energy.

Synonyms:

Bipolar II Disorder

A mood disorder characterized by at least one hypomanic episode and at least one major depressive episode, with no history of a full manic episode. The depressive episodes in bipolar II tend to be more frequent and longer-lasting than in bipolar I, leading to greater cumulative disability.

Synonyms:

Bird Fancier's Lung

HP from avian proteins in bird droppings or feathers. Common among pigeon breeders. Chronic exposure leads to progressive fibrosis.

Synonyms:

Bird Flu

Influenza caused by avian-adapted influenza A viruses. Human infection is uncommon but may cause severe respiratory disease, and public-health assessment depends on exposure history, testing, and infection-control measures.

Synonyms:

Birt-Hogg-Dube Syndrome

Autosomal dominant disorder caused by mutations in the FLCN gene (17p11.2) encoding folliculin.

Synonyms:

Birth Control

Methods used to prevent pregnancy, including barrier, hormonal, intrauterine, behavioral, and permanent methods.

Synonyms:

Birthmarks

Congenital or early-appearing marks on the skin, including vascular lesions such as hemangiomas and port-wine stains and pigmented lesions such as nevi and café-au-lait macules. Most are benign, but changes in appearance warrant assessment.

Synonyms:

Bishop Score

A clinical score used before labor induction to describe cervical readiness. It incorporates cervical dilation, effacement, consistency, position, and fetal-head station; a more favorable cervix generally indicates a greater likelihood of successful induction.

Synonyms:

Bisphenol A

Endocrine disruptor in plastics. Estrogenic effects, associated with reproductive disorders, obesity, diabetes. Avoid BPA-containing products, especially for children.

Synonyms:

Bitemporal Hemianopia

Loss of vision in the temporal (lateral) half of both visual fields due to lesions that cross the optic chiasm, damaging the decussating fibers from the nasal retina of each eye (which carry temporal field information).

Synonyms:

Bitewing

A dental radiograph that records the crowns of the upper and lower teeth and the adjacent alveolar bone in one image. It is particularly useful for detecting interproximal caries and assessing crestal bone levels.

Synonyms:

Bitewing Radiograph

An intraoral radiograph showing the crowns of the maxillary and mandibular posterior teeth and the alveolar crest. It is particularly useful for detecting interproximal caries and assessing crestal bone levels.

Synonyms:

Bitot's Spots

Foamy, whitish, triangular patches on the conjunctiva, usually near the temporal limbus, associated classically with vitamin A deficiency. They may accompany night blindness and xerosis of the conjunctiva or cornea.

Synonyms:

BK Virus Nephropathy

Polyomavirus infection in transplant recipients. Viral cytopathic changes on biopsy. Reduce immunosuppression as primary treatment. Can lead to graft loss. Monitor viral loads in blood for early detection.

Synonyms:

Black Eye

Bruising and swelling around the eye, usually caused by blunt trauma. Vision may remain normal, but eye pain, double vision, reduced vision, an irregular pupil, severe headache, vomiting, or loss of consciousness can indicate an eye or orbital injury and requires urgent assessment.

Synonyms:

Black Hairy Tongue

A benign elongation and dark discoloration of the filiform papillae on the dorsal tongue caused by impaired desquamation and trapping of debris or pigment. Predisposing factors include smoking, poor oral hygiene, dry mouth, and some exposures.

Synonyms:

Black Lung

Coal workers' pneumoconiosis caused by prolonged inhalation of coal-mine dust. It ranges from simple anthracosis to progressive massive fibrosis and may cause cough, breathlessness, and permanent lung impairment.

Synonyms:

Black Stain

Dark discoloration on the tooth surface, often near

the gumline, caused by external deposits or chromogenic bacteria. Dental assessment determines the cause and appropriate removal.

Synonyms:

Black Triangle

Triangular space between teeth at gumline. Caused by papilla loss, tooth shape, bone level. Treatment: orthodontics, restorative, papilla reconstruction.

Synonyms:

Blackheads

Open comedones formed when a hair follicle becomes blocked with sebum and keratin and the surface material oxidizes. They are a common non-inflammatory lesion of acne, especially on the face, chest, and back.

Synonyms:

Bladder Cancer

A malignant tumor arising in the urinary bladder, most often from the urothelial lining. Blood in the urine is a common presenting feature, although symptoms vary.

Synonyms:

Bladder Carcinoma

A malignant tumor arising in the urinary bladder, most often from the urothelial lining. Blood in the urine is a common presenting sign; smoking and certain occupational chemical exposures increase risk.

Synonyms:

Bladder diverticula

Outpouchings of the bladder mucosa through the muscular wall, often acquired from chronic bladder outlet obstruction or congenital in origin. Acquired diverticula are associated with benign prostatic hyperplasia and may cause urinary stasis, recurrent infections, and stone formation.

Synonyms:

Bladder Diverticulum

Outpouching of bladder wall. Congenital or ac-

quired (obstruction). Asymptomatic or causes urinary stasis, stones, infection. Treatment: address obstruction, diverticulectomy if symptomatic.

Synonyms:

Bladder Exstrophy

A rare congenital abdominal wall defect where the bladder is exposed on the outside of the body due to failure of the lower abdominal wall and bladder to close during embryonic development. Part of the exstrophy-epispadias complex. Associated with pubic bone diastasis, external genital anomalies, and potential bladder dysfunction.

Synonyms:

Bladder Fistula

An abnormal connection between the bladder and another organ or the skin, most often the vagina, bowel, or uterus. It may cause continuous urine leakage, recurrent infections, gas or stool in the urine, or unusual vaginal wetness. Treatment depends on the cause and may require catheter drainage and surgical repair.

Synonyms:

Bladder Health and Disorders

Bladder health involves the proper storage and voluntary release of urine through coordinated function of the detrusor muscle and sphincters. Common disorders include urinary tract infections, overactive bladder, stress incontinence, and interstitial cystitis.

Synonyms:

Bladder Outlet Obstruction

Blockage of urine flow at the bladder neck or urethra, commonly caused by benign prostatic enlargement, urethral stricture, stones, tumors, or pelvic-organ prolapse. It may cause weak stream, hesitancy, retention, hydronephrosis, infection, and renal impairment.

Synonyms:

Bladder Pain Syndrome

Chronic bladder-related pain, pressure, or discomfort associated with urinary symptoms in the ab-

sence of infection or another identifiable cause. It is a diagnosis of exclusion and is managed with multimodal, patient-centered treatment.

Synonyms:

Bladder Perforation

A tear or hole in the bladder wall caused by trauma, pelvic surgery, instrumentation, severe inflammation, or obstruction. Urine may leak into surrounding tissues, causing abdominal pain, distention, blood in the urine, or infection. It requires urgent medical assessment and may need catheter drainage or surgical repair.

Synonyms:

Bladder Problems

A range of conditions affecting urine storage and voiding, including incontinence, overactive bladder, urinary retention, and recurrent infections. Causes may include neurological damage, pelvic floor weakness, prostate enlargement, or bladder outlet obstruction.

Synonyms:

Bladder Retraining

Scheduled voiding and gradual increases in the time between voids to improve bladder control.

Synonyms:

Bladder Spasm

An involuntary contraction of the bladder muscle that can cause sudden urgency, cramping, urine leakage, or pain. It may occur with infection, catheter use, bladder irritation, neurological conditions, or after surgery. Treatment addresses the cause and may include bladder training or medicines.

Synonyms:

Bladder Stone

A mineral deposit formed in or entering the urinary bladder. It may cause painful urination, blood in the urine, interrupted flow, or recurrent infection; treatment addresses the stone and its cause.

Synonyms:

Blalock-Taussig Operation

A surgical systemic-to-pulmonary shunt that increases pulmonary blood flow in selected cyanotic congenital heart disease. The modern modified procedure commonly uses a prosthetic conduit rather than direct sacrifice of a subclavian artery.

Synonyms:

Blast Crisis

Aggressive, terminal phase of myeloid (chiefly CML) or, less commonly, lymphoid malignancies in which immature blasts dominate the marrow and peripheral blood, behaving like acute leukemia. CML blast crisis is defined by 20% blasts in peripheral blood or bone marrow or by the presence of extramedullary blastic infiltrates (chloromas).

Synonyms:

Blast Injury

Tissue injury caused by an explosion, classified as primary injury from the pressure wave, secondary injury from projectiles, tertiary injury from displacement or impact, and quaternary injury from burns, inhalation, toxins, or crush. Multiple mechanisms may coexist.

Synonyms:

Blastic plasmacytoid dendritic-cell neoplasm

A rare, aggressive hematologic malignancy derived from plasmacytoid dendritic cells. It often involves skin, bone marrow, lymph nodes, and central nervous system, with a poor prognosis.

Synonyms:

Blastocyst

An early stage in embryonic development, consisting of a hollow sphere of cells that implants into the uterine wall.

Synonyms:

Blastoma

Generic descriptor for embryonal (primitive) malignant tumors arising from precursor ("blast") cells that fail to differentiate normally.

Synonyms:

Blastomyces dermatitidis

A dimorphic fungus that causes blastomycosis, a systemic pyogranulomatous infection acquired by inhalation of conidia from soil in endemic regions such as the Ohio and Mississippi River valleys. Cutaneous manifestations include verrucous or ulcerated plaques, and pulmonary involvement is common.

Synonyms:

Blastomycosis

A fungal infection caused by *Blastomyces dermatitidis*, endemic to the Ohio and Mississippi River valleys and Great Lakes region. Inhalation of conidia causes pulmonary infection. Pulmonary: acute pneumonia (often misdiagnosed as bacterial), chronic pneumonia with nodules and cavitation.

Synonyms:

Bleeding

The escape of blood from the vascular system, which may be external (visible hemorrhage from a wound, orifice, or natural opening) or internal (bleeding into a body cavity, organ, or tissue).

Synonyms:

Bleeding Disorders

A heterogeneous group of conditions characterized by abnormal hemostasis, resulting from defects in blood vessels, platelets, or coagulation factors.

Synonyms:

Bleeding Esophageal Varices

Life-threatening hemorrhage from dilated submucosal veins in the lower esophagus, occurring as a complication of portal hypertension, most commonly from cirrhosis. Varices form when the portal venous pressure gradient exceeds 10 mmHg (the threshold for variceal development).

Synonyms:

Bleeding Gums

Bleeding from the gum tissue, often caused by plaque-related gingivitis, periodontitis, trauma, or

vigorous brushing. It can also occur with blood disorders or medicines that affect clotting. Persistent bleeding, swelling, loose teeth, or spontaneous bleeding requires dental or medical evaluation.

Synonyms:

Bleeding into a thyroid nodule

Hemorrhage within a thyroid nodule, presenting with sudden onset of neck pain and rapid enlargement of a pre-existing or new thyroid mass. It may mimic thyroid malignancy clinically and on imaging. Ultrasound shows a complex cystic lesion with internal echoes. Fine needle aspiration confirms the benign nature of the hemorrhagic cyst.

Synonyms:

Blennorrhea

A mucopurulent discharge from a mucous membrane, especially the urethra or conjunctiva. The finding requires clinical assessment for infectious and noninfectious causes rather than treatment based on the symptom alone.

Synonyms:

Blepharitis

Chronic inflammation of the eyelid margins, one of the most common ophthalmic conditions, classified into anterior blepharitis (affecting the eyelash follicle and base) and posterior blepharitis (affecting the meibomian glands).

Synonyms:

Blepharoconjunctivitis

Inflammation involving the eyelid margins and conjunctiva. It may cause crusting, itching, redness, tearing, irritation, and recurrent symptoms associated with infection, allergy, or eyelid-gland dysfunction.

Synonyms:

Blepharoplasty

Surgical reconstruction or reshaping of the eyelids, often involving removal or repositioning of excess skin, muscle, or orbital fat. It may be functional, cosmetic, or reconstructive.

Synonyms:

Band Cell

An immature neutrophil with a curved, unsegmented nucleus. An increased number in blood may occur during acute infection or inflammation.

Synonyms:

Blepharospasm

Involuntary spasms of the muscles around the eyes that cause repeated or sustained eyelid closure. It may be primary or associated with eye irritation, medications, or a neurologic disorder.

Synonyms:

Blind Loop Syndrome

Malabsorption syndrome due to stasis and bacterial overgrowth (SIBO) in a non-propulsive ("blind") segment of small bowel, classically caused by surgical bypass loops (Billroth II, end-to-side anastomosis), strictures (Crohn disease, radiation, adhesions), diverticulosis, or impaired motility (diabetes, scleroderma).

Synonyms:

Blinding

Concealing group assignment. Single-blind: participants. Double-blind: participants and investigators. Triple-blind: participants, investigators, analysts.

Synonyms:

Blindness

Severe or complete loss of vision in one or both eyes, caused by disease or injury affecting the cornea, lens, retina, optic nerve, visual pathways, or visual cortex. It may be congenital or acquired, sudden or progressive, and reversible or permanent; sudden visual loss is an ophthalmic emergency.

Synonyms:

Blood Alcohol Concentration

The concentration of ethanol in blood, commonly expressed as mass per volume or as a percentage. Interpretation depends on sampling, timing, metabolism, tolerance, co-ingestants, and local standards; clinical

impairment cannot be inferred from a single value without context.

Synonyms:

Blood Alcohol Level

Measurement of ethanol concentration in blood. The clinical effects depend on the concentration, timing, tolerance, co-ingestants, and individual factors; a single level does not by itself determine impairment or prognosis.

Synonyms:

Blood Clot

A mass of coagulated blood within a blood vessel or body cavity. A clot may be protective when it stops bleeding, but an abnormal thrombus can obstruct blood flow or embolize to the lungs, brain, heart, or other organs.

Synonyms:

Blood Coagulation

The cascade of enzymatic reactions converting circulating fibrinogen into an insoluble fibrin clot.

Synonyms:

Blood Coagulation Disorder

A disorder in which clot formation is deficient, excessive, or inappropriately regulated, causing abnormal bleeding or thrombosis. Causes include inherited factor deficiencies, platelet disorders, liver disease, vitamin deficiencies, immune conditions, and acquired systemic disease.

Synonyms:

Blood Culture

A laboratory test in which blood is placed in culture bottles to detect bacteria or fungi in the bloodstream. It is used when bloodstream infection, sepsis, or infective endocarditis is suspected.

Synonyms:

Blood Culture Contamination

Introduction of skin or environmental microorganisms into a blood-culture bottle during collection or handling rather than true bloodstream infection.

It can lead to unnecessary antimicrobial treatment and should be assessed using the organism, number of positive sets, time to positivity, and clinical findings.

Synonyms:

Blood Film (Peripheral Blood Smear)

A stained microscopic preparation of peripheral blood used to assess erythrocyte, leukocyte, and platelet morphology and to detect abnormal cells, parasites, blasts, and red-cell fragments.

Synonyms: Peripheral Blood Smear

Blood Flow

The volume of blood passing through a vessel, organ, or the systemic circulation per unit time, typically expressed in mL/min. Governed by the hemodynamic equivalent of Ohm's law: flow = pressure gradient / resistance. Total cardiac output (5 L/min at rest) equals systemic blood flow.

Synonyms:

Blood Gas (Venous)

Sampling of venous blood (typically from a peripheral vein or central line) for pH, PvCO₂, HCO₃, and base excess. Less painful than ABG, avoids arterial puncture risks. Limitations: no PaO₂ or SpO₂ data; peripheral venous gases in shock may not reflect arterial pH. VBG pH is typically 0.03-0.05 lower than ABG; PvCO₂ is 3-8 mmHg higher.

Synonyms: Venous

Blood Glucose Monitoring

Blood sugar monitoring involves measuring glucose levels in the blood to manage diabetes, typically using a glucometer with finger-stick testing or continuous glucose monitors that track interstitial glucose in real time.

Synonyms:

Blood Group

The classification of blood based on the presence or absence of specific antigens (agglutinogens) on the surface of red blood cells. The ABO system has four groups: A (A antigen), B (B antigen), AB (both A

and B), and O (neither A nor B). The Rh system: RhD-positive (85% of population) or RhD-negative (15%).

Synonyms:

Blood in Semen

Hematospermia, or the presence of blood in the ejaculate. It is often temporary and related to inflammation, infection, recent urologic procedures, or trauma, but persistent or recurrent bleeding, pain, fever, urinary symptoms, or bleeding in older men warrants medical evaluation.

Synonyms:

Blood Loss

The volume of blood lost during surgery or trauma, estimated by weighing swabs, suction contents, and hemodynamic monitoring, guiding fluid and transfusion management.

Synonyms:

Blood Pressure

The force exerted by blood against arterial walls, measured in millimeters of mercury (mmHg). Systolic pressure (peak during ventricular ejection, normally approximately 120 mmHg) and diastolic pressure (minimum during ventricular relaxation, normally approximately 80 mmHg).

Synonyms:

Blood Products

Components prepared from donated blood for transfusion, including red blood cells, platelets, plasma, and cryoprecipitate. Each component has specific indications, benefits, and risks; selection depends on the patient's clinical condition and laboratory findings.

Synonyms:

Blood Smear

Peripheral blood film: a thin blood smear on a slide stained (Wright/Giemsa) and examined microscopically for cell morphology, aiding diagnosis.

Synonyms:

Blood Spatter Analysis

The forensic interpretation of bloodstain patterns to reconstruct events surrounding a violent incident. Types: passive (drops, pools, flows), transfer (contact patterns), and impact/expirated spatter.

Synonyms:

Blood Sugar Test

Measurement of blood glucose to detect or monitor diabetes and other disorders of glucose regulation. Testing may be performed fasting, randomly, or after a glucose load, using a laboratory sample or a point-of-care meter.

Synonyms:

Blood Transfusion

The administration of whole blood or blood components (packed red blood cells, platelets, fresh frozen plasma, cryoprecipitate) to restore or maintain adequate circulating blood volume and oxygen-carrying capacity.

Synonyms:

Blood Urea Nitrogen

BUN: serum urea, the end product of protein catabolism, filtered and partially reabsorbed by the tubules. Used with creatinine to assess renal function and volume status.

Synonyms:

Blood Viscosity

The internal friction of blood that resists flow, determined primarily by hematocrit (red cell concentration), with smaller contributions from plasma proteins and temperature. Normal whole-blood viscosity is approximately 3-4 times that of water.

Synonyms:

Blood-Borne Disease

An infection that can spread through contact with infected blood or other body fluids. Examples include HIV and hepatitis B and C.

Synonyms:

Blood-Brain Barrier

The blood-brain barrier is a highly selective semipermeable membrane that separates the circulating blood from the brain extracellular fluid, consisting of endothelial cells connected by tight junctions, astrocyte foot processes, and a basement membrane.

Synonyms:

Bloom Syndrome

Rare autosomal recessive chromosomal instability syndrome caused by biallelic mutations in BLM (15q26.1) encoding a RecQ helicase.

Synonyms:

Blount Disease

A growth disorder of the proximal tibia causing progressive bowing of the legs, usually involving the medial tibial physis. It may occur in infants or adolescents and can lead to gait abnormality, limb-length discrepancy, and early knee degeneration.

Synonyms:

Blue Baby

Generic term for an infant with cyanosis (bluish skin, lips, nail beds) from arterial oxygen desaturation.

Synonyms:

Blue Bloater

A clinical phenotype of chronic bronchitis in COPD. Patients present with chronic cough, sputum production, cyanosis, right heart failure, and airway-centric inflammation. They tend to be younger, have more hypercapnia, and less emphysema on imaging.

Synonyms:

Blunt Abdominal Trauma

Trauma to the abdomen without penetrating injury. Mechanisms: motor vehicle collisions (most common), falls, assaults. Commonly injured organs: spleen (most common, left upper quadrant), liver (right upper quadrant), kidneys (flank), bowel (seatbelt sign, delayed perforation), and pancreas (epigastric).

Synonyms:

Blunt Force Trauma

Injury produced when a blunt object strikes the body, or the body strikes a blunt surface, without a sharp edge penetrating the skin. Patterns include abrasions, contusions, lacerations with tissue bridging, and fractures; patterned injuries may reproduce the impacting object.

Synonyms:

BMI (Body Mass Index)

Weight in kg divided by height in meters squared. Screening tool for weight categories: underweight (<18.5), normal (18.5-24.9), overweight (25-29.9), obese (≥ 30). Limitations: does not distinguish muscle from fat, may misclassify athletes, elderly, certain ethnic groups.

Synonyms: Body Mass Index

BNP

B-type natriuretic peptide. Marker of heart failure. Released from ventricles in response to stretch.

Synonyms:

Bocavirus Infection

Infection caused by human bocavirus, a respiratory virus that most often affects young children. It may cause cough, wheezing, fever, runny nose, bronchiolitis, or pneumonia and can occur with other respiratory infections. Treatment is generally supportive; breathing difficulty, dehydration, or marked lethargy requires prompt assessment.

Synonyms:

Bochdalek Hernia

A congenital diaphragmatic hernia (CDH) occurring through the posterolateral foramen of Bochdalek, resulting from failure of the pleuroperitoneal membrane to close by the 8th week of gestation. The left side is affected in 85% of cases (the right pleuroperitoneal canal closes earlier).

Synonyms:

Body Aches

Generalized muscle or body pain that may occur with viral infections, fever, exertion, inflammation,

medication effects, or other systemic illness. Severe pain with weakness, dark urine, breathing difficulty, chest pain, or high fever requires prompt medical assessment.

Synonyms:

Body Dysmorphic Disorder

Preoccupation with one or more perceived defects or flaws in physical appearance that are not observable or appear slight to others. The individual performs repetitive behaviors in response to appearance concerns such as mirror checking, excessive grooming, skin picking, reassurance seeking, and comparing.

Synonyms:

Body Identification

The process of establishing the identity of a deceased person, essential in forensic and mass-disaster contexts.

Synonyms:

Body Lice

Infestation of clothing and skin by the human body louse, causing intense itching, excoriations, and sometimes secondary bacterial infection. Treatment requires hygiene, laundering or heat treatment of clothing and bedding, and appropriate antiparasitic measures.

Synonyms:

Body Plethysmography

Technique for measuring lung volumes (TLC, RV, FRC) using a sealed chamber. Gold standard for TLC measurement. Useful for diagnosing restriction and hyperinflation.

Synonyms:

Body Ringworm

Dermatophyte infection of the glabrous skin, also called tinea corporis. It typically produces an expanding annular scaly lesion with a more active border and central clearing.

Synonyms: tinea corporis.

Body Temperature

The balance between heat production (metabolism, muscle activity) and heat loss (radiation, conduction, convection, evaporation). See Temperature (Body Temperature).

Synonyms:

Boeck's Sarcoid

An older eponym for sarcoidosis, a multisystem granulomatous disease characterized by noncaseating granulomas and commonly involving the lungs, intrathoracic lymph nodes, skin, or eyes.

Synonyms:

Boerhaave Syndrome

Transmural spontaneous rupture of the esophagus typically occurring after forceful vomiting in the setting of a full stomach. Most commonly involves the left posterolateral wall of the distal esophagus. Presents with severe chest pain, subcutaneous emphysema, mediastinal emphysema, and rapidly progressive sepsis.

Synonyms:

Bohn Nodules

Small, benign keratin-filled cysts on the gums or palate of a newborn that usually resolve without treatment.

Synonyms:

Bohr Effect

The decrease in hemoglobin's oxygen affinity (right shift of the dissociation curve) caused by decreased pH (increased H⁺) and increased PCO₂. In metabolically active tissues, CO₂ production and lactic acid accumulation lower the local pH, causing hemoglobin to release more oxygen precisely where it is needed most.

Synonyms:

Boil

Furuncle: an acute, deep infection of a hair follicle (folliculitis that extends to the dermis) by *Staphylococcus aureus*, forming a painful, red, swollen nodule with central purulent core that may spontaneously

drain.

Synonyms:

Boil (Furuncle)

A painful, deep-seated infection of a hair follicle caused most commonly by *Staphylococcus aureus*, extending into the surrounding subcutaneous tissue. Presents as a tender, erythematous, fluctuant nodule that eventually discharges pus. When multiple adjacent follicles coalesce, it forms a carbuncle, often with systemic symptoms.

Synonyms: Furuncle

Bone

A rigid, mineralised connective tissue that forms the skeleton, providing structural support, protection of vital organs, hematopoiesis (bone marrow), and mineral storage (calcium, phosphate). Bone composition: organic matrix (90% type I collagen) and inorganic mineral (hydroxyapatite, calcium phosphate).

Synonyms:

Bone Cancer

Cancer that begins in bone, such as osteosarcoma or chondrosarcoma, or cancer that has spread to bone from another organ. Possible features include persistent localized bone pain, swelling, or a fracture after minor trauma. Diagnosis requires imaging and tissue evaluation; treatment depends on the type and extent of disease.

Synonyms:

Bone Cement (Polymethylmethacrylate—PMMA)

Acrylic polymer used to fix prosthetic joints to bone. Mixes as dough, cures exothermically. Used in hip/knee arthroplasty, vertebroplasty, cranial reconstruction. Complications: cement implantation syndrome (hypotension, hypoxia), infection, loosening.

Synonyms: Polymethylmethacrylate—PMMA

Bone Densitometry

Dual-energy X-ray absorptiometry measures bone

mineral density at the lumbar spine and hip. Results are expressed as T-score comparing to young adult mean and Z-score comparing to age-matched controls. T-score of minus 1.0 to minus 2.5 indicates osteopenia. T-score of minus 2.5 or less indicates osteoporosis.

Synonyms:

Bone Density

The amount of mineral in bone, commonly estimated by dual-energy X-ray absorptiometry. Lower density is associated with increased fracture risk, and interpretation depends on the person's age, sex, and clinical context.

Synonyms:

Bone Density Screening

Testing, usually with DXA, that measures bone mineral density and helps estimate fracture risk or assess osteoporosis.

Synonyms:

Bone Fracture

A partial or complete break in a bone caused by injury, repeated stress, or weakened bone. Pain, swelling, bruising, deformity, and inability to use the limb may occur. Open fractures, loss of circulation or sensation, or major deformity require emergency care.

Synonyms:

Bone Graft

Bone tissue or a bone-substitute material used to fill a defect, promote fusion, support reconstruction, or enhance fracture healing. Autograft provides osteogenic cells and biologic signals; allograft and synthetic substitutes provide variable osteoconductive and osteoinductive properties.

Synonyms:

Bone Graft (Dental)

Material placed to augment alveolar bone. Types: autograft, allograft, xenograft, alloplast. Used for implants, ridge preservation.

Synonyms: Dental

Bone Health

The strength and condition of the skeleton, influenced by bone density, structure, nutrition, hormones, activity, medicines, and disease.

Synonyms:

Bone Infection

Infection of bone, usually caused by bacteria and called osteomyelitis. It may arise from bloodstream spread, nearby tissue, surgery, or an open injury.

Synonyms:

Bone Marrow

Vascular tissue within the medullary cavities and cancellous bone. Red marrow produces blood cells, whereas yellow marrow primarily stores fat and can revert to red marrow when demand increases.

Synonyms:

Bone Marrow Aspiration

A procedure that withdraws liquid marrow, usually from the posterior iliac crest, for cytologic, flow-cytometric, cytogenetic, molecular, and microbiologic evaluation. It complements the core biopsy, which assesses marrow architecture.

Synonyms:

Bone Marrow Aspiration and Biopsy

Sampling of bone marrow, typically from the posterior iliac crest. Aspiration: liquid marrow for cytology (differential, morphology), flow cytometry, cytogenetics, and MRD. Biopsy: core of bone for cellularity, architecture, fibrosis, and infiltrative disease (lymphoma, metastatic cancer, granulomas).

Synonyms:

Bone Marrow Biopsy

A procedure sampling bone marrow (typically posterior iliac crest) via aspiration (cytology, flow cytometry, cultures) and trephine core biopsy (histology, architecture, fibrosis, cellularity).

Synonyms:

Bone Marrow Depression

Reduced production of blood cells by the bone mar-

row, causing anemia, low white-cell counts, low platelet counts, or combinations of these findings.

Synonyms:

Bone marrow hyperplasia

Increased cellularity of the bone marrow resulting from accelerated hematopoiesis, typically compensating for chronic hemolytic anemia, hemorrhage, or systemic hypoxia.

Synonyms:

Bone marrow necrosis

Death of hematopoietic and stromal cells within the bone marrow, often associated with sickle cell crisis, malignancy, or infections, presenting with severe bone pain and cytopenias.

Synonyms:

Bone Metastases

Cancer deposits that have spread to bone from another primary site. They may cause pain, fracture, high blood calcium, or spinal-cord compression.

Synonyms:

Bone Metastasis

A deposit of cancer that has spread to bone from another primary site. It may cause pain, fracture, high blood calcium, or spinal-cord compression, and treatment depends on the cancer and clinical context.

Synonyms:

Bone Scan

Skeletal imaging using Tc-99m MDP. Detects osteoblastic activity. Sensitivity: high; specificity: low. Used for metastasis detection, fracture, infection, metabolic bone disease. "Hot spots" indicate increased uptake; "cold spots" indicate decreased uptake.

Synonyms:

Bone Scan (Nuclear Scintigraphy)

Nuclear medicine imaging using Tc-99m MDP (methylene diphosphonate) that accumulates in areas of increased bone turnover. Three phases: perfu-

sion (immediate), blood pool (5 min), and delayed (2-3 hours).

Synonyms: Nuclear Scintigraphy

Bone Turnover Markers

Biochemical markers reflecting the rate of bone remodeling. Formation markers include bone-specific alkaline phosphatase, osteocalcin, and N-terminal and C-terminal propeptides of type I procollagen. Resorption markers include C-terminal and N-terminal telopeptides of type I collagen and deoxypyridinoline.

Synonyms:

Bones and Joints

Bones and joints form the skeletal system, providing structural support, protection of organs, and enabling movement through articulations between bones. Joints are classified as fibrous, cartilaginous, or synovial, with synovial joints offering the greatest range of motion.

Synonyms:

Bony Exostosis

A benign localized bony protuberance, including torus palatinus of the palate and torus mandibularis of the mandible. Treatment is usually unnecessary unless the lesion causes trauma, interferes with speech or prosthesis, or requires diagnostic clarification.

Synonyms:

Borderline Personality Disorder

A pattern of instability in interpersonal relationships, self-image, and affects, with marked impulsivity.

Synonyms:

Bordetella pertussis

A Gram-negative coccobacillus and the causative agent of whooping cough, a highly contagious respiratory infection. It produces pertussis toxin, which inhibits G-protein signaling in respiratory epithelial cells, and tracheal cytotoxin, which damages ciliated epithelium.

Synonyms:

Bornholm Disease

An acute epidemic pleurodynia caused most often by coxsackieviruses. It produces sudden attacks of severe chest or upper-abdominal muscle pain, fever, and sometimes headache or vomiting.

Synonyms:

Borrelia

A genus of spiral-shaped bacteria (spirochetes) transmitted by arthropod vectors, most notably ticks and lice. The major human pathogen is *Borrelia burgdorferi* sensu lato, the causative agent of Lyme disease, transmitted by Ixodes ticks.

Synonyms:

Borrelia burgdorferi

A spirochete bacterium transmitted by Ixodes ticks and the principal cause of Lyme disease in North America and Europe.

Synonyms:

Borreliosis

Infection caused by bacteria of the genus *Borrelia*. Human disease includes Lyme borreliosis and relapsing fever, with manifestations varying according to species, stage, and organ involvement.

Synonyms:

Bosniak Classification

System classifying renal cysts by CT features. Categories I-II benign, IIF follow-up, III-IV likely malignant.

Synonyms:

Bot fly

A parasitic fly of the family Oestridae whose larvae cause myiasis in humans and animals. *Dermobia hominis*, the human bot fly, deposits eggs on blood-sucking insects; larvae penetrate the skin and develop subcutaneously, causing a painful boil-like lesion with a central breathing pore. Treatment is manual extraction of the larva.

Synonyms:

Botryomycosis

A chronic bacterial infection characterized by granule-forming lesions that can resemble a fungal infection. It most often affects skin and subcutaneous tissue but may involve viscera in susceptible patients.

Synonyms:

Botulism

A rare, potentially fatal neuroparalytic disease caused by botulinum toxin, a potent presynaptic neurotoxin produced by *Clostridium botulinum*, an anaerobic, spore-forming, gram-positive bacillus.

Synonyms:

Bouchard's Node

A hard, palpable enlargement of the proximal interphalangeal joint caused by osteoarthritis. It reflects osteophyte formation and may be associated with pain, stiffness, and reduced finger motion.

Synonyms:

Bougienage

The use of a bougie to dilate or explore a narrowed tubular structure, such as the esophagus or urethra. It is a procedure that requires assessment of the cause and risks of the stricture.

Synonyms:

Bourbon Virus

A rare tick-borne viral infection associated with fever, fatigue, anorexia, nausea, and a low white-cell or platelet count. There is no established specific antiviral treatment or vaccine; management is supportive and requires exclusion of other serious tick-borne infections.

Synonyms:

Boutonneuse Fever

A tick-borne rickettsial infection, usually caused by *Rickettsia conorii*, characterized by fever, headache, rash, and often a dark inoculation eschar called a tache noire.

Synonyms:

Bouveret Syndrome

Rare variant of gallstone ileus where a large gallstone erodes through a cholecystoduodenal fistula and impacts in the duodenum or pylorus causing gastric outlet obstruction. Represents approximately two to three percent of gallstone ileus cases. Presents with nausea, vomiting, epigastric pain, and anorexia.

Synonyms:

Bovine Spongiform Encephalopathy

A fatal transmissible prion disease of cattle causing progressive neurologic degeneration. It is related to variant Creutzfeldt–Jakob disease in humans through exposure to contaminated tissue.

Synonyms:

Bowel Incontinence

The involuntary loss of solid or liquid stool through the anus, also known as fecal incontinence, affecting approximately 2-15 percent of the general population and increasing in prevalence with age.

Synonyms: fecal.

Bowel infarction

Ischemic necrosis of bowel tissue from occlusive or non-occlusive mesenteric ischemia, presenting with severe abdominal pain out of proportion to examination, bloody stools, and peritoneal signs. Causes include mesenteric arterial embolism or thrombosis, venous thrombosis, and low-flow states.

Synonyms:

Bowel ischemia

Reduced blood flow to the intestines causing mucosal injury, most commonly from mesenteric atherosclerosis, low-flow states, or mesenteric venous thrombosis. Presents with abdominal pain, bloody stools, and elevated lactate. Severe cases progress to transmural necrosis.

Synonyms:

Bowel Obstruction

Blockage of intestinal lumen. X-ray, CT diagnosis. Differentiate small vs. large bowel obstruction. Mechanical vs. paralytic ileus.

Synonyms:

Bowel Program

A planned routine using diet, fluids, medicines, and scheduled toileting to promote regular bowel movements and manage constipation or bowel dysfunction.

Synonyms:

Bowenoid papulosis

A low-grade squamous intraepithelial neoplasia of the anogenital skin caused by human papillomavirus infection, typically types 16 and 18, presenting as multiple pigmented papules on the genital mucosa. Histologically it resembles squamous cell carcinoma in situ but follows a benign clinical course.

Synonyms:

Bowlegs

Outward bowing of the legs causing the knees to remain apart when the feet and ankles are together, also called genu varum. It is common in early childhood but requires assessment when severe, asymmetric, painful, or persistent beyond the expected age.

Synonyms: genu varum.

Bowman Capsule

Double-walled epithelial cup surrounding the glomerular capillaries forming the beginning of the nephron. The visceral layer is composed of podocytes whose foot processes interdigitate to form filtration slits. The parietal layer is composed of simple squamous epithelium.

Synonyms:

Bowman's Gland

A serous gland in the olfactory mucosa whose secretion helps dissolve odorant molecules and cleanse the olfactory surface. It is located in the lamina propria beneath the olfactory epithelium.

Synonyms:

Boxed Warning

The most prominent safety warning required in pre-

scribing information for a medicine when there is a serious or life-threatening risk. It communicates major hazards and does not necessarily mean that the medication is never appropriate.

Synonyms:

BPH

Abbreviation for benign prostatic hyperplasia, a noncancerous enlargement of the prostate that may obstruct urine flow.

Synonyms:

Brachial Artery

The continuation of the axillary artery, running from the lower border of teres major to the cubital fossa, where it divides into radial and ulnar arteries. Lies medial to the biceps; palpated for blood pressure and brachial pulse. Branches: profunda brachii (deep brachial), superior/inferior ulnar collaterals.

Synonyms:

Brachial Plexopathy

Dysfunction of the brachial plexus causing pain, weakness, sensory loss, or paralysis in the shoulder and upper limb. Causes include trauma, compression, tumors, inflammation, and radiation injury.

Synonyms:

Brachial Plexus

Nerve network (C5-T1) formed by roots, trunks, divisions, and cords, giving rise to upper limb nerves. Roots unite into superior/middle/inferior trunks, dividing into anterior/posterior divisions, recombining into lateral/posterior/medial cords. Major branches: musculocutaneous, axillary, radial, median, ulnar.

Synonyms:

Brachial Plexus Cords

Formed by divisions recombining behind the pectoralis minor. Lateral cord (anterior divisions of upper/middle trunks), posterior cord (all three posterior divisions), medial cord (anterior division of lower trunk). Named for relationship to the axillary artery. Lateral cord: lateral pectoral nerve, contributes to median nerve.

Synonyms:

Brachial Plexus Injuries

Injuries to the network of nerves supplying the shoulder and upper limb, caused by traction, compression, or penetrating trauma. They may produce pain, weakness, sensory loss, or paralysis; the pattern and severity depend on which roots, trunks, or cords are affected.

Synonyms:

Brachial Plexus Injury

Damage to the brachial plexus nerves during birth, most commonly from shoulder dystocia or excessive traction. Erb's palsy (C5-C6) presents with waiter's tip position (arm adducted, elbow extended, forearm pronated). Klumpke's palsy (C8-T1) affects the hand and may cause Horner syndrome. Most cases resolve spontaneously.

Synonyms:

Brachial Plexus Roots

Ventral rami of C5-T1 emerging from intervertebral foramina, passing between anterior and middle scalene muscles (interscalene triangle). C5-C6 form the upper trunk, C7 continues as middle trunk, C8-T1 form the lower trunk. Root injuries cause specific dermatome/myotome deficits. C5 avulsion causes loss of deltoid/biceps function.

Synonyms:

Brachial Plexus Trunks

Formed in the posterior neck triangle. Upper (C5-C6), middle (C7), and lower (C8-T1) trunks each divide into anterior/posterior divisions behind the clavicle. Upper trunk is most commonly injured in birth injuries (Erb-Duchenne palsy), causing waiter's tip position.

Synonyms:

Brachialis Muscle

Flat strong muscle deep to the biceps, from distal anterior humerus to ulnar tuberosity and coronoid process. Innervated by musculocutaneous nerve (C5-C6). Primary elbow flexor regardless of forearm

position ("workhorse" of elbow flexion). Less visible than biceps but significantly contributes to arm strength.

Synonyms:

Brachiocephalic Trunk

The first and largest branch of the aortic arch. It ascends to the right sternoclavicular joint, where it divides into the right common carotid and right subclavian arteries.

Synonyms:

Brachytherapy

Radiation treatment in which a radioactive source is placed inside or near a tumor to deliver a concentrated dose.

Synonyms:

Brachytherapy Seed

Radioactive source implanted directly into tumor. I-125 or Pd-103 seeds for prostate cancer. Permanent or temporary implantation.

Synonyms:

Bradycardia

A heart rate <60 beats per minute. May be physiologic (athletes) or pathologic due to sinus node dysfunction, AV block, or medication effects. Symptomatic bradycardia causes fatigue, dizziness, syncope, or heart failure. Evaluation includes ECG, Holter monitoring, and assessment of reversible causes.

Synonyms:

Bradycardia of Prematurity

Heart rate less than 100 beats per minute in a premature infant, often associated with apnea and oxygen desaturation. May be caused by vagal stimulation, reflux, or immaturity of the cardiac conduction system. Treatment: gentle stimulation, caffeine, and addressing underlying causes.

Synonyms:

Bradykinesia

Slowness and reduced amplitude of voluntary move-

ment, often accompanied by difficulty initiating or sustaining repetitive actions. It is a cardinal feature of parkinsonism and may be associated with rigidity, resting tremor, postural instability, reduced arm swing, masked facial expression, and a shuffling gait.

Synonyms:

Bradypnea

Abnormally slow respiratory rate (adult <12 breaths/min). Causes: opioid/benzodiazepine/sedative overdose, central nervous system depression (stroke, trauma, increased ICP), hypothyroidism, hypothermia, and metabolic (e.g., hypokalemia). May lead to hypoventilation, hypercapnia, and respiratory failure.

Synonyms:

Brain

The central organ of the nervous system, enclosed in the cranial cavity and composed of the cerebrum, cerebellum, and brainstem. The brain receives, processes, and integrates sensory information; initiates and coordinates motor responses; and serves as the seat of cognition, emotion, memory, and consciousness.

Synonyms:

Brain Abscess

A focal, purulent infection within the brain parenchyma, most commonly occurring in the frontal or temporal lobes.

Synonyms:

Brain Concussion

A mild traumatic brain injury caused by a blow, jolt, or force that temporarily changes brain function. Symptoms may include headache, dizziness, confusion, memory difficulty, nausea, and sensitivity to light or noise, sometimes without loss of consciousness. Worsening headache, repeated vomiting, seizure, weakness, or increasing drowsiness requires urgent assessment.

Synonyms:

Brain Death

The irreversible cessation of all brain and brain-stem function, including consciousness and brain-stem reflexes, with absent respiratory drive—a legal definition of death.

Synonyms:

Brain Edema

Swelling caused by excess fluid in brain tissue, which can raise pressure inside the skull. Causes include head injury, stroke, infection, tumor, bleeding, and severe metabolic disturbances. Symptoms may include headache, vomiting, confusion, seizures, weakness, or reduced consciousness; severe cases are medical emergencies.

Synonyms:

Brain Health

Brain health encompasses the ability to perform cognitive functions such as memory, learning, decision-making, and emotional regulation across the lifespan. Key factors include cardiovascular health, nutrition, sleep, social engagement, cognitive stimulation, and management of chronic conditions like hypertension and diabetes.

Synonyms:

Brain Herniation

Displacement of brain tissue across rigid intracranial compartments or through the foramen magnum due to mass effect or raised ICP. It can compress the brainstem and cranial nerves and is a life-threatening neurosurgical emergency.

Synonyms:

Brain Injuries

Brain injuries range from mild concussions to severe traumatic brain injury caused by falls, motor vehicle accidents, sports impacts, or penetrating trauma. Symptoms depend on injury location and severity, including headache, confusion, memory loss, seizures, and altered consciousness.

Synonyms:

Brain Injury

Damage to the brain caused by trauma, lack of oxygen, stroke, infection, toxins, or other disease. Effects depend on the location and severity of injury.

Synonyms:

Brain Metastases

Cancer deposits that have spread to the brain from another primary site. They may cause headache, seizures, or focal neurologic deficits.

Synonyms:

Brain Metastasis

A deposit of cancer that has spread to the brain from another primary site. It may cause headache, seizures, or focal neurologic deficits; treatment depends on the number, location, and biology of the lesions.

Synonyms:

Brain Monitoring

Brain monitoring during anesthesia assesses the depth of hypnosis and neurological function. Bispectral index (BIS) processes the frontal EEG into a number from 0 (isoelectric) to 100 (fully awake), with 40 to 60 recommended for general anesthesia. BIS monitoring reduces awareness risk and may reduce anesthetic requirements.

Synonyms:

Brain Natriuretic Peptide

A hormone released mainly by the heart ventricles in response to myocardial wall stress. BNP and NT-proBNP can support the assessment of suspected heart failure, but results are affected by age, kidney function, body size, rhythm, and other illnesses and must be interpreted with the clinical findings.

Synonyms:

Brain SPECT

Cerebral perfusion imaging using Tc-99m HMPAO or ECD. Used for epilepsy localization, dementia differentiation, cerebrovascular disease.

Synonyms:

Brain Tumor

An abnormal growth of cells within the brain or its surrounding structures, classified as primary (originating from brain tissue or its coverings) or secondary/metastatic (spread from a cancer elsewhere in the body, which are more common, accounting for approximately 50 percent of all brain tumors).

Synonyms:

Brain Ventricles

The four interconnected fluid-filled cavities within the brain that produce and contain cerebrospinal fluid (CSF).

Synonyms:

Brainstem

Connects cerebrum to spinal cord, with midbrain (superior), pons (middle), and medulla oblongata (inferior). Contains cranial nerve nuclei (III-XII), ascending/descending tracts, and vital autonomic centers for cardiac, respiratory, and vasomotor function. Reticular formation regulates consciousness and sleep-wake cycles.

Synonyms:

Branchial Arch

One of the paired embryonic arches that contribute to development of facial, pharyngeal, laryngeal, muscular, skeletal, vascular, and neural structures of the head and neck.

Synonyms:

Branchial Cleft

An embryonic groove between adjacent branchial arches. Persistence of cleft remnants can produce congenital branchial cysts, sinuses, or fistulas, most commonly along the lateral neck.

Synonyms:

Branchial Cleft Anomaly

A congenital remnant of the branchial apparatus presenting as a cyst, sinus, or fistula in the head and neck. Recurrent infection or drainage from a persistent opening warrants imaging and specialist management.

Synonyms:

Branchial Cleft Cyst

Congenital cystic mass arising from incomplete obliteration of branchial cleft apparatus during embryogenesis.

Synonyms:

Braxton Hicks Contractions

Irregular, painless uterine contractions occurring throughout pregnancy, becoming more frequent in the third trimester. Usually last 30-60 seconds and are felt as a tightening of the abdomen. Distinguished from true labour contractions by their irregularity, lack of cervical change, and resolution with rest or hydration.

Synonyms:

BRCA

BRCA1 and BRCA2 are tumor-suppressor genes involved in repair of DNA double-strand breaks. Pathogenic variants increase susceptibility to breast, ovarian, fallopian-tube, primary peritoneal, prostate, and pancreatic cancers.

Synonyms:

BRCA1 and BRCA2

Tumor-suppressor genes involved in homologous-recombination DNA repair. Germline pathogenic variants increase susceptibility to breast, ovarian, fallopian-tube, primary peritoneal, prostate, and pancreatic cancers and may guide surveillance and treatment.

Synonyms:

Breakbone Fever

A traditional name for dengue fever, reflecting the severe myalgia and arthralgia that may accompany the acute viral illness.

Synonyms:

Breast Abscess

A localized collection of pus within the breast tissue, most commonly a complication of lactational mastitis. Presents as a fluctuant, painful mass with

overlying erythema and systemic symptoms. Diagnosis by ultrasound. Treatment requires incision and drainage plus antibiotics.

Synonyms:

Breast Cancer

A malignant tumor arising in breast tissue. Risk, screening, and treatment depend on age, inherited and acquired biology, stage, and the person's circumstances.

Synonyms:

Breast Density

The relative proportion of fibroglandular tissue compared with fat in a breast on mammography. Higher density can make small cancers harder to see and is associated with an increased risk of breast cancer.

Synonyms:

Breast Cancer Genetics

The study of inherited variants that increase breast-cancer risk. Important genes and syndromes include BRCA1, BRCA2, PALB2, TP53, PTEN, and CHEK2. Genetic counseling can help determine whether testing is appropriate.

Synonyms:

Breast Cyst

A fluid-filled sac within breast tissue, usually benign and sometimes tender or larger before menstruation. Examination and imaging distinguish a cyst from a solid lesion; persistent, growing, bloody, or newly discovered breast lumps should be assessed by a clinician.

Synonyms:

Breast Discharge

Fluid released from the nipple without breastfeeding. It may be caused by hormonal changes, infection, benign duct disease, or cancer. Bloody, clear, spontaneous, one-sided, or persistent discharge, especially with a lump or skin change, requires prompt breast evaluation.

Synonyms:

Breast Engorgement

Overfilling of the breasts with milk, causing bilateral pain, firmness, warmth, and nipple flattening. Occurs 3-5 days postpartum. Pathophysiology: vascular congestion and edema before milk secretion is established.

Synonyms:

Breast Health

Breast health involves routine self-awareness, clinical examinations, and mammographic screening to detect abnormalities such as lumps, pain, or skin changes that may indicate benign conditions or breast cancer. Risk factors include genetics, age, hormone exposure, and lifestyle factors.

Synonyms:

Breast Infection

Infection and inflammation of breast tissue, most commonly mastitis during breastfeeding. It causes localized pain, warmth, redness, swelling, and sometimes fever; an untreated infection may progress to a breast abscess.

Synonyms:

Breast Lump

A localized thickening, mass, or swelling in breast tissue caused by a cyst, fibroadenoma, infection, trauma, or malignancy. New, persistent, hard, fixed, or changing lumps require clinical and often imaging assessment.

Synonyms:

Breast MRI

Magnetic resonance imaging used to evaluate breast tissue. Contrast may be administered when clinically indicated.

Synonyms:

Breast Pain

Pain or tenderness in one or both breasts, caused by hormonal changes, cysts, infection, trauma, medications, or musculoskeletal disease. Persistent focal pain or an associated lump requires assessment.

Synonyms:

Breast Surgery

Breast cancer surgery: breast-conserving therapy (BCT: lumpectomy + radiation) equivalent survival to mastectomy for early stage. Margins: "no ink on tumor" for invasive cancer; 2mm for DCIS.

Synonyms:

Breast Ultrasound

Ultrasound imaging of the breast. Indications: evaluating palpable masses (distinguishing solid vs. cystic), characterizing mammographic abnormalities, guiding biopsy (core needle, fine needle, or vacuum-assisted), evaluating implant integrity, and imaging young/dense breast tissue.

Synonyms:

Breastfeeding

The feeding of an infant with breast milk, recommended exclusively for the first 6 months and continued with complementary foods to 2 years and beyond. Benefits: infant (nutrition, immune protection—IgA, reduced infection/allergy/obesity, bonding) and maternal (uterine involution, contraception, reduced breast/ovarian cancer).

Synonyms:

Breath Sounds

The sounds produced by airflow through the respiratory tract during breathing, assessed by auscultation with a stethoscope over the chest wall.

Synonyms:

Breath Stacking

A technique using a manual resuscitation bag or glosopharyngeal breathing to deliver successive breaths without exhaling, stacking tidal volumes to achieve higher lung volumes. It improves cough effectiveness and secretion clearance in patients with weak respiratory muscles.

Synonyms:

Breath-Holding Spells

A benign paroxysmal phenomenon in young children (6 months to 6 years), provoked by frustration, pain, or fear. Cyanotic type (more common): child cries,

forcefully exhales, becomes cyanotic, and may lose consciousness briefly.

Synonyms:

Breech Delivery

Vaginal delivery of a breech presentation. Types: assisted breech (the baby delivers spontaneously to the umbilicus, then the operator assists delivery of the shoulders and head) and total breech extraction (the operator delivers the entire baby by grasping the feet and pulling).

Synonyms:

Breech Presentation

A fetal presentation where the buttocks or feet are positioned to deliver first. Types include frank breech (hips flexed, knees extended, most common), complete breech (hips and knees flexed), and footling breech (one or both feet presenting). Associated with increased risk of cord prolapse, head entrapment, and birth trauma.

Synonyms:

Bremsstrahlung

Braking radiation produced when beta particles decelerate in matter. Continuous spectrum. Detected in I-131 imaging (poor quality). Used for Y-90 bremsstrahlung SPECT.

Synonyms:

Brenner Tumor

Rare ovarian epithelial neoplasm (1-2% of ovarian tumors) composed of nests of transitional (urothelial-like) epithelial cells embedded in a dense fibromatous stroma. Most are unilateral, small (< 2 cm), benign (90%) and incidental; borderline (proliferative) and malignant variants are uncommon.

Synonyms:

Breslow Thickness

Microstaging measurement of melanoma invasion depth from the top of the granular layer of the epidermis to the deepest point of tumor invasion, in millimeters. Most important prognostic factor in primary cutaneous melanoma, used in the AJCC

TNM staging system (T category).

Synonyms:

Bridge (Dental)

Fixed prosthetic replacing missing teeth. Retained by adjacent teeth (abutments). Requires preparation of abutments.

Synonyms: Dental

Brief Psychotic Disorder

A disturbance characterized by the sudden onset of at least one psychotic symptom: delusions, hallucinations, disorganized speech, or grossly disorganized or catatonic behavior. The disturbance lasts at least one day but less than one month, after which the individual fully returns to premorbid functioning.

Synonyms:

Brief Resolved Unexplained Event

A sudden, brief, and now-resolved episode in an infant involving abnormal breathing, skin color, muscle tone, or responsiveness, with no explanation after the initial evaluation. Risk assessment is based on age, history, examination findings, and recurrence; higher-risk events require targeted investigation.

Synonyms:

Bright's Disease

A historical term encompassing several forms of kidney disease, particularly glomerular disorders associated with proteinuria, edema, and altered urinary findings. Modern diagnosis specifies the underlying renal lesion.

Synonyms:

Brill's Disease

A recrudescent form of epidemic typhus caused by reactivation of latent *Rickettsia prowazekii* infection years after the original illness. It is usually milder than the initial infection but can transmit to body lice.

Synonyms:

Brittle Asthma

An uncommon term for severe asthma with unusu-

ally unpredictable and difficult-to-control airflow or attacks despite appropriate treatment. The term is not a universally standardized diagnostic category; specialist assessment is required to identify triggers, alternative diagnoses, and effective management.

Synonyms:

Brittle Diabetes

Labile, unstable type 1 diabetes mellitus characterized by unpredictable, large, recurrent swings in blood glucose between severe hyperglycemia and recurrent hypoglycemia (often with ketoacidosis) despite optimal adherence, significantly disrupting quality of life.

Synonyms:

Broca Aphasia

Acquired language disorder of expressive speech (motor aphasia) caused by lesion of the posterior inferior frontal gyrus (Broca area, Brodmann area 44/45) of the dominant (usually left) hemisphere, most commonly from middle cerebral artery (MCA) superior division infarction.

Synonyms:

Broca's Aphasia

A nonfluent language disorder caused by dysfunction of the dominant inferior frontal language region. Speech is effortful and reduced, while comprehension is relatively preserved compared with repetition and fluent language production.

Synonyms:

Broca's Area

A language-related region of the dominant inferior frontal gyrus involved in speech production, language formulation, and aspects of syntax. Lesions may cause expressive aphasia.

Synonyms:

Broken Finger

A fracture of one of the finger bones caused by trauma, crushing, or twisting. Pain, swelling, bruising, deformity, and reduced movement may occur. Assessment should check alignment, tendon func-

tion, sensation, and circulation; some fractures require reduction, splinting, or surgery.

Synonyms:

Broken Foot

A fracture of one or more bones of the foot, commonly caused by a fall, direct impact, twisting injury, or repetitive stress. Pain, swelling, bruising, and difficulty bearing weight are typical. Deformity, an open wound, numbness, or inability to walk requires urgent evaluation and imaging.

Synonyms:

Broken Heart Syndrome

A temporary weakening of the heart muscle, often triggered by severe emotional or physical stress. It can resemble a heart attack but usually occurs without an obstructing coronary clot.

Synonyms:

Broken Toe

A fracture of a toe bone, usually after direct impact or crushing. Pain, swelling, bruising, and tenderness are common; deformity, an open injury, numbness, or impaired circulation requires prompt assessment. Treatment may include protection and immobilization, with reduction or surgery for displaced or unstable fractures.

Synonyms:

Bromhidrosis

Excessive or unpleasant body odor produced when microbial metabolism acts on sweat or skin secretions. It is often prominent in the axillae or feet and may be associated with hyperhidrosis or local skin disease.

Synonyms:

Bromoderma

A skin eruption or dermatitis attributed to exposure to bromine or bromide compounds. It may present with acneiform, pustular, or other inflammatory lesions.

Synonyms:

Bronchi

The major airways conducting air from the trachea into the lungs. The trachea bifurcates at the carina (T4-T5) into right and left main bronchi. The right main bronchus is wider, shorter, and more vertical—aspirated foreign bodies preferentially lodge here.

Synonyms:

Bronchial Artery

An artery arising from the systemic circulation that supplies the walls of the bronchi, connective tissue of the lungs, and visceral pleura. It differs from the pulmonary arteries, which carry blood for gas exchange.

Synonyms:

Bronchial Biopsy

Tissue sampling of the bronchial wall during bronchoscopy. It is used to diagnose inflammatory conditions (sarcoidosis, eosinophilic bronchitis), infections, and malignancy. Endobronchial biopsy of visible lesions and transbronchial biopsy of parenchymal lesions provide complementary diagnostic information.

Synonyms:

Bronchial Carcinoid

Pulmonary neuroendocrine tumor arising from Kulchitsky cells of the bronchial mucosa; subclassified as typical carcinoid (TC, generally lower grade, with fewer mitoses and no necrosis) and atypical carcinoid (AC, generally higher grade, with more mitoses or necrosis and greater risk of recurrence or metastasis).

Synonyms:

Bronchial Stenosis

Narrowing of a bronchus from trauma, infection, inflammation, or prior intervention. It causes localized wheezing, recurrent infections, and impaired secretion clearance. Diagnosis is by bronchoscopy. Treatment includes balloon dilation, stenting, or surgical resection.

Synonyms:

Bronchial Tree

The branching airway system formed by the trachea, main bronchi, lobar and segmental bronchi, bronchioles, and terminal airways leading toward the alveoli.

Synonyms:

Bronchial Vein

A vein draining portions of the bronchial walls and larger airways. It empties partly into the azygos system and partly into pulmonary veins, creating a small physiologic venous admixture.

Synonyms:

Bronchiectasis

Permanent, abnormal dilation of bronchi caused by destruction of the bronchial wall from chronic airway inflammation and infection. Causes include CF, immune deficiency, primary ciliary dyskinesia, and post-infectious damage. Features include chronic cough, copious purulent sputum, and recurrent hemoptysis.

Synonyms:

Bronchiole

Small airways (less than 2 mm diameter) without cartilage, branching from segmental bronchi to terminal bronchioles (conducting zone) to respiratory bronchioles (transitional, alveoli bud from walls) to alveolar ducts to alveolar sacs to alveoli.

Synonyms:

Bronchiolectasis

Permanent abnormal dilation of bronchioles, usually caused by chronic inflammation, infection, or obstruction. It may accompany bronchiectasis and contribute to impaired mucus clearance and recurrent infection.

Synonyms:

Bronchiolitis

Lower respiratory tract infection causing inflammation and obstruction of small airways. Most common cause is respiratory syncytial virus. Affects infants under 12 months. Presents with wheezing,

tachypnea, nasal flaring, and retractions. Diagnosis is clinical.

Synonyms:

Bronchiolitis Obliterans

An uncommon, often irreversible obstructive small-airway disease caused by inflammation and fibrotic narrowing or obliteration of the bronchioles. Causes include severe infection, inhalational injury, autoimmune disease, and complications after lung or bone-marrow transplantation.

Synonyms:

Bronchitis

Inflammation of the bronchial mucosa. Acute bronchitis is typically viral, presents with cough (often productive), and resolves spontaneously. Cough with sputum production for at least 3 months in 2 consecutive years, often due to smoking.

Synonyms:

Bronchoalveolar Lavage

Diagnostic procedure during bronchoscopy where saline is instilled and aspirated. Analyzed for cell counts, microbiology, and cytology. Useful for *Pneumocystis pneumonia*, pulmonary alveolar proteinosis, and sarcoidosis diagnosis.

Synonyms:

Bronchodilator Response

The change in spirometric airflow after administration of a short-acting bronchodilator. A significant response can support variable airflow limitation, but a negative response does not exclude asthma and a positive response is not specific to one disease.

Synonyms:

Bronchodilator Reversibility

Improvement in airflow measurements after an inhaled bronchodilator. A measurable increase may support variable airway obstruction, but no single response proves or excludes asthma or chronic obstructive pulmonary disease.

Synonyms:

Bronchoesophageal fistula

Abnormal communication between the bronchial tree and the esophagus, most commonly acquired from malignancy, mediastinal infection, or tuberculous lymphadenitis. Congenital forms are associated with esophageal atresia.

Synonyms:

Bronchogenic Cyst

A congenital cyst derived from abnormal budding of the ventral foregut. It is typically found in the middle mediastinum or near the carina. It is usually asymptomatic but may cause compression of adjacent structures. Treatment is surgical resection if symptomatic.

Synonyms:

Bronchophony

Increased transmission of spoken sounds to the stethoscope over consolidated lung tissue. It is normally heard over the central airways. Excessive bronchophony over peripheral lung fields indicates consolidation. It is part of the constellation of physical examination findings in pneumonia.

Synonyms:

Bronchopleural Fistula

An abnormal communication between the bronchial tree and pleural space. It is a complication of pneumonectomy, lung surgery, or empyema. It causes persistent air leak, subcutaneous emphysema, and respiratory compromise. Treatment includes chest tube drainage, bronchoscopic intervention, and surgical repair.

Synonyms:

Bronchopneumonia

Patchy consolidation centered on bronchioles across multiple lobes. Caused by *S. aureus*, gram-negative bacteria, and *Pseudomonas*.

Synonyms:

Bronchopulmonary Dysplasia

A chronic lung disease of premature infants, resulting from lung injury from mechanical ventilation,

oxygen toxicity, and inflammation. Most commonly occurs in infants born at less than 28 weeks gestation with birth weight less than 1500 grams.

Synonyms:

Bronchoscopy

Endoscopic examination of the tracheobronchial tree. Flexible bronchoscopy: most common, for diagnosis (lung mass, persistent cough, hemoptysis, suspected infection, ILD) and therapy (foreign body removal, bronchial washing, biopsy, BAL). Rigid bronchoscopy: for massive hemoptysis, large foreign bodies, and stent placement.

Synonyms:

Bronchospasm

Involuntary constriction of bronchial smooth muscle causing airway obstruction, wheezing, and increased airway pressures. Triggers include airway manipulation, volatile anesthetics (sevoflurane is bronchodilating; desflurane can cause bronchospasm), histamine-releasing drugs (morphine, atracurium), and reactive airway disease.

Synonyms:

Bronchostenosis

Narrowing of a bronchus that restricts airflow. Causes include scarring, tumors, foreign bodies, inflammation, external compression, or postinfectious and postprocedural changes.

Synonyms:

Bronchus

One of the two main branches of the trachea that conduct air into the lungs. The right main bronchus is wider, shorter, and more vertical than the left, making it more susceptible to aspiration. Each main bronchus divides into lobar bronchi (secondary), segmental bronchi (tertiary), and progressively smaller branches (bronchioles).

Synonyms:

Bronze Diabetes

Historical eponym for hereditary hemochromatosis (HFE-related HH, C282Y homozygous mutation),

characterized by the classic triad of skin pigmentation ("bronze"), cirrhosis, and diabetes mellitus from pancreatic iron deposition. Also known as "Troisier syndrome" or pigment cirrhosis.

Synonyms: "Troisier syndrome" or pigment cirrhosis.

Brow Presentation

A fetal presentation where the fetal head is in a military position between full flexion (vertex) and hyperextension (face). The presenting diameter is the largest (occipitofrontal, 13.5 cm). Incidence: 1:1000-1:2000. Vaginal delivery is impossible with a persistent brow in a term fetus unless it converts to vertex or face.

Synonyms:

Brown Lung Disease

An occupational airway disease associated with inhalation of cotton, flax, or hemp dust, classically causing byssinosis. Symptoms may include chest tightness, cough, wheezing, and work-related airflow limitation.

Synonyms:

Brown Sequard Syndrome

Brown-Sequard syndrome (hemisection of the spinal cord) results from a lesion affecting one half of the spinal cord, producing a characteristic pattern of ipsilateral and contralateral neurological deficits.

Synonyms:

Brown Stain

Extrinsic staining from chromogenic bacteria, diet, tobacco. Removed by prophylaxis.

Synonyms:

Brucellosis

A zoonotic infection caused by *Brucella* bacteria, transmitted through contact with infected animals or consumption of unpasteurized animal products. It commonly causes fever, sweats, fatigue, and joint or muscle pain.

Synonyms:

Brudzinski Sign

Flexion of the hips and knees that occurs involuntarily when the neck is passively flexed. It is a meningeal irritation sign that may occur in meningitis but lacks sufficient sensitivity or specificity to establish the diagnosis alone.

Synonyms:

Brugada Syndrome

A genetic channelopathy causing abnormal sodium channel function (SCN5A mutation). ECG pattern: coved ST elevation >2mm in V1-V3 (type 1) followed by negative T wave. Patients are at risk for ventricular fibrillation and sudden cardiac death, often at rest or during sleep. More common in young Southeast Asian men.

Synonyms:

Bruise

A contusion: localized hemorrhage into tissues due to blunt force trauma rupturing small blood vessels, with intact skin.

Synonyms:

Bruising

Ecchymosis/contusion: a purplish-blue discoloration from blood extravasation into skin/subcutaneous tissue following trauma; color changes with age (red-blue purple green/yellow—bilirubin breakdown).

Synonyms:

Brunner's Gland

A mucus-secreting gland in the submucosa of the duodenum. Its alkaline secretion helps protect the mucosa from gastric acid and provides conditions favorable for intestinal enzymes.

Synonyms:

Bruxism

Grinding or clenching teeth, often during sleep. Causes: stress, occlusion, sleep disorders. Consequences: tooth wear, fractures, muscle pain, TMJ disorders. Treatment: occlusal guard, stress management, behavior modification.

Synonyms:

Buccal Gland

A minor salivary gland located in the cheek. It secretes mucus into the oral cavity to lubricate the buccal mucosa and assist formation and handling of the food bolus.

Synonyms:

Budd-Chiari Syndrome

Obstruction of hepatic venous outflow at any level from small hepatic venules to the inferior vena cava junction with the right atrium. The most common predisposing condition is myeloproliferative disorders accounting for forty to fifty percent of cases. Other risk factors include thrombophilia and oral contraceptive use.

Synonyms:

Buerger Disease

An inflammatory disorder of small and medium arteries and veins, strongly associated with tobacco use, that can cause limb ischemia and tissue loss.

Synonyms:

Buerger's Disease

Thromboangiitis obliterans, a nonatherosclerotic inflammatory disease of small and medium arteries and veins, strongly associated with tobacco exposure. It causes distal ischemia, pain, ulcers, and sometimes gangrene.

Synonyms:

Buffer

A solution that resists pH change upon addition of acid or base, composed of a weak acid and its conjugate base (or weak base and conjugate acid). Buffer capacity is maximal when $\text{pH} = \text{pK}_a \pm 1$.

Synonyms:

Bulbar Conjunctiva

The bulbar conjunctiva is the portion of the conjunctival membrane that covers the anterior surface of the sclera, extending from the limbus (the junction of the cornea and sclera) to the fornices where it

reflects onto the inner surface of the eyelids.

Synonyms:

Bulbar Paralysis

Weakness or paralysis of muscles supplied by the lower cranial nerves, causing dysarthria, dysphagia, impaired gag or cough, and sometimes respiratory compromise. Causes include brainstem disease, motor-neuron disease, and neuromuscular disorders.

Synonyms:

Bulimia Nervosa

An eating disorder characterized by recurrent episodes of binge eating followed by compensatory behaviors (purging, laxatives, excessive exercise). Self-esteem overly influenced by body shape and weight.

Synonyms:

Bullae

Large, fluid-filled blisters that form within or beneath the skin or mucous membrane. Causes include friction, burns, infection, allergy, and autoimmune disease.

Synonyms:

Bullet Track

The path a projectile traverses through the body, defined by the entry wound, internal course (through organs, vessels, bones), and exit wound (or retained bullet).

Synonyms:

Bullous Impetigo

A superficial staphylococcal skin infection caused by exfoliative toxins that produce fragile, flaccid bullae and honey-coloured or varnish-like crusts, especially in infants and young children.

Synonyms:

Bullous Pemphigoid

An autoimmune subepidermal blistering disease affecting elderly patients. It presents with tense blisters on erythematous or normal-appearing skin, often preceded by pruritic urticarial plaques. Autoan-

tibodies target BP180 and BP230 (hemidesmosome proteins).

Synonyms:

Bumetanide

A potent loop diuretic inhibiting the Na-K-2Cl co-transporter in the thick ascending limb of the loop of Henle. Used for edema in heart failure, cirrhosis, and renal disease, and for hypertension in renal impairment. Approximately 40 times more potent than furosemide; more bioavailable orally, so equivalent IV-to-oral dosing is possible.

Synonyms:

Bundle Branch Block

Delay or block in the electrical conduction through the bundle branches. Left Bundle Branch Block (LBBB): QRS >120 ms, broad notched R waves in lateral leads (I, V5-V6), deep S waves in V1-V2. Right Bundle Branch Block (RBBB): QRS >120 ms, rSR' pattern in V1-V2, wide S waves in I, V5-V6.

Synonyms:

Bundle of His

A narrow band of specialized cardiac tissue that conducts electrical impulses from the AV node through the fibrous cardiac skeleton to the interventricular septum. It divides into the right and left bundle branches. The bundle of His is the only electrical connection between atria and ventricles through the fibrous skeleton.

Synonyms:

Bunion

A bony prominence (exostosis) at the medial aspect of the first metatarsal head, causing lateral deviation of the great toe (hallux valgus). The deformity is characterized by a structural abnormality at the first metatarsophalangeal joint, with the first metatarsal deviating medially and the proximal phalanx deviating laterally.

Synonyms:

Bunionectomy

Surgical correction of hallux valgus (bunion) deformity,

indicated for symptomatic bunions refractory to conservative measures (proper footwear, orthoses, toe spacers, NSAIDs). Procedure chosen based on severity (hallux valgus angle and intermetatarsal angle) and patient factors (age, activity, comorbidities).

Synonyms:

Buphthalmos

Enlargement of the eye caused by elevated intraocular pressure during early childhood, when the ocular coats are still distensible. It is classically associated with congenital or infantile glaucoma.

Synonyms:

Burkitt Lymphoma

A highly aggressive B-cell lymphoma characterized by MYC translocation (t(8;14) IGH-MYC, t(8;22) IGL-MYC, t(2;8) IGK-MYC) and a "starry sky" morphology (tingible body macrophages). Three variants: endemic (African, EBV+, jaw/facial bones), sporadic (abdominal, ileocecal), immunodeficiency-associated (HIV).

Synonyms:

Burn

An injury to skin or deeper tissue caused by heat, chemicals, electricity, radiation, or friction. Severity depends on depth, extent, location, and associated injury.

Synonyms:

Burn (Oral)

Thermal or chemical injury to the lining of the mouth, often causing pain, redness, or ulceration. Severity depends on the substance, temperature, depth, and extent of injury.

Synonyms: Oral

Burn Surgery

Burn assessment: rule of 9s (adult), Lund-Browder (children). Depth: superficial (epidermis), superficial partial (dermis, blanch, blister, painful), deep partial (deeper dermis, white, sluggish capillary refill, less painful), full thickness (all dermis,

white/charred, anesthetic).

Synonyms:

Burning Mouth Syndrome

A chronic oral pain disorder characterized by burning, scalding, or tingling discomfort of the mouth, often involving the tongue, lips, or palate, without a sufficient visible mucosal abnormality.

Synonyms:

Bursectomy

Surgical excision of a bursa, usually performed for persistent painful bursitis, recurrent infection, or another structural problem that has not responded to appropriate conservative management.

Synonyms:

Bursitis

Inflammation of a bursa, a fluid-filled sac that reduces friction between tendons, muscles, bones, and skin. Bursae are lined by synovial cells and normally contain a thin layer of lubricating synovial fluid.

Synonyms:

Button magnets in the nasal cavity

Ingestion or insertion of small magnets into the nose, posing a risk of nasal septal perforation or necrosis if multiple magnets are involved, requiring urgent removal.

Synonyms:

Bypass

Surgical creation of alternative route around blocked vessel. Uses vein or prosthetic graft.

Synonyms:

Bypass (Vascular)

Surgical procedure creating detour around blocked vessel using autologous vein (saphenous) or prosthetic graft (PTFE, Dacron). See Bypass Graft.

Synonyms: Vascular

Bypass Graft

Surgical procedure creating detour around blocked

vessel using autologous vein (saphenous) or prosthetic graft (PTFE, Dacron). Indications: peripheral arterial disease, coronary artery disease, aortic aneurysm. Long-term patency depends on graft type, inflow/outflow, patient factors.

Synonyms:

Bypass Surgery

A surgical conduit that reroutes flow around an obstructed or diseased segment, applied to coronary arteries (CABG), peripheral arteries (autologous vein or prosthetic bypass), and the gastrointestinal tract (gastric bypass). Principal long-term concerns are conduit patency, graft infection, and anastomotic stenosis.

Synonyms:

Byssinosis

An occupational obstructive airway disease caused by inhalation of textile fibers, especially cotton, flax, or hemp dust. It may cause chest tightness and cough that worsen during or after work exposure.

Synonyms:

Chigger Bites

Itchy inflammatory skin reactions caused by the larvae of trombiculid mites. Small red bumps or blisters often occur around areas where clothing fits tightly and may itch intensely for several days. Washing the skin and clothing, topical antipruritics, and avoiding scratching can help; persistent or infected lesions require assessment.

Synonyms:

Dog Bite

A puncture, laceration, or crush injury caused by a dog. Wounds may damage deeper tissue and become infected with organisms such as *Pasteurella* or *Capnocytophaga*. Thorough cleansing, assessment for repair, tetanus prevention, rabies-risk evaluation, and antibiotics when indicated are important.

Synonyms:

Sleep-Related Breathing Disorders

Conditions in which breathing becomes abnormal

during sleep, including obstructive or central sleep apnea, sleep-related hypoventilation, and sleep-related hypoxemia. Snoring, witnessed pauses, gasping, morning headache, and daytime sleepiness are common clues. Diagnosis generally requires sleep evaluation and treatment of the specific breathing disorder.

Synonyms:

Snake Bite

A bite wound from a snake, which may cause local tissue injury or systemic envenomation with swelling, bruising, bleeding, weakness, paralysis, or respiratory failure. Keep the person still, avoid cutting or sucking the wound, and obtain emergency medical care immediately for assessment and possible antivenom.

Synonyms:

Baroreflex

A rapid reflex that helps regulate blood pressure by adjusting heart rate and blood-vessel tone in response to changes in arterial pressure.

Synonyms:

Bartter Disease

A group of inherited kidney disorders that cause excessive loss of salt and potassium in the urine.

Synonyms:

Behcet Syndrome

A chronic inflammatory disorder that can cause recurrent mouth and genital ulcers, eye inflammation, and other organ involvement.

Synonyms:

Beta Thalassemia

An inherited blood disorder in which reduced production of beta-globin causes anemia.

Synonyms:

Brachial Plexus Neuropathies

Disorders caused by injury or dysfunction of the network of nerves supplying the shoulder and arm.

Synonyms:

Brain Stem Glioma

A tumor arising from glial cells in the brainstem.

Synonyms:

Breakthrough Pain

A temporary flare of severe pain that occurs despite otherwise controlled persistent pain.

Synonyms:

Bundle-Branch Block

Delayed or interrupted electrical conduction through one of the heart's ventricular bundle branches.

Synonyms:

Burkitt's Lymphoma

A rapidly growing type of non-Hodgkin lymphoma arising from B lymphocytes.

Synonyms:

Beach Chair Position

A semisitting position in which the patient's back is elevated and the hips and knees are flexed; it is commonly used for shoulder surgery.

Synonyms:

Balloon Angioplasty

A procedure that uses an inflatable balloon catheter to widen a narrowed artery, often followed by stent placement.

Synonyms:

Barrett's Esophagus

A change in the lower esophageal lining caused by chronic reflux and associated with an increased risk of esophageal adenocarcinoma.

Synonyms:

Basilar Artery

The artery formed by the union of the vertebral arteries that supplies the brainstem, cerebellum, and posterior brain.

Synonyms:

Beta Cells

Pancreatic cells that produce and release insulin.

Synonyms:

Bile

A fluid produced by the liver that helps digest and absorb dietary fats.

Synonyms:

Bilevel Positive Airway Pressure

Noninvasive ventilation that provides different pressures during inhalation and exhalation to support breathing.

Synonyms:

Bisphosphonate

A medicine that reduces bone breakdown and is used to prevent or treat osteoporosis and some other bone disorders.

Synonyms:

Blood Urea Nitrogen Test

A blood test that measures urea nitrogen and helps assess kidney function and hydration.

Synonyms:

Brain Stem

The lower part of the brain connecting the cerebrum with the spinal cord and controlling essential functions such as breathing and consciousness.

Synonyms:

Bronchodilator

A medicine that relaxes airway muscle and widens the airways to improve breathing.

Synonyms:

Bruit

An abnormal sound heard over a blood vessel, usually with a stethoscope, caused by turbulent blood flow.

Synonyms:

Bursa

A small fluid-filled sac that reduces friction between moving tissues near a joint.

Synonyms:

Baby Acne

Small red or white bumps on an infant's skin, usually caused by temporary hormonal effects and often resolving without treatment.

Synonyms:

Bad Breath

An unpleasant odor of the breath, medically called halitosis.

Synonyms:

Bags Under Eyes

Mild swelling or fullness beneath the eyes, commonly related to aging, fluid retention, or inherited anatomy.

Synonyms:

Balance Problems

Difficulty maintaining body stability while standing or moving, often caused by disorders of the inner ear, nervous system, vision, or muscles.

Synonyms:

Bardet-Biedl Syndrome

A rare inherited disorder that may cause retinal degeneration, obesity, extra fingers or toes, kidney disease, and reproductive abnormalities.

Synonyms:

Bartholin's Cyst

A fluid-filled cyst caused by blockage of a Bartholin gland near the vaginal opening.

Synonyms:

Bile Duct Cancer

Cancer arising in the bile ducts; also called cholangiocarcinoma.

Synonyms: cholangiocarcinoma.

Binge-Eating Disorder

A disorder marked by recurrent episodes of eating unusually large amounts of food with a sense of loss of control and without regular compensatory behaviors.

Synonyms:

Blastocystis Hominis

A microscopic organism that can inhabit the intestinal tract; its role in causing gastrointestinal symptoms is variable and sometimes uncertain.

Synonyms:

Blocked Tear Duct

Partial or complete blockage of the passage that drains tears from the eye into the nose.

Synonyms:

Boils and Carbuncles

Painful skin infections caused by pus-filled inflammation around hair follicles; a carbuncle is a connected group of boils.

Synonyms:

Bone Spurs

Bony projections that form along the edges of bones, usually near joints, often because of long-term wear or arthritis.

Synonyms:

B-Cell Lymphoma

A group of lymphatic cancers arising from B lymphocytes.

Synonyms:

Brainstem Tumor

A tumor arising in the brainstem, the part of the brain that connects the cerebrum with the spinal cord.

Synonyms:

Knee Bursitis

Inflammation of a fluid-filled sac near the knee, causing localized pain, swelling, or tenderness.

Synonyms:

Babcock Clamp

An atraumatic surgical clamp with fenestrated jaws used to hold delicate tubular tissue.

Synonyms:

Bone Saw

A surgical saw used to cut bone during procedures such as amputation or orthopedic reconstruction.

Synonyms:

Body Surface Area

An estimate of the total external surface area of the body, calculated from height and weight and used in some medication dosing and physiologic calculations.

Synonyms:

Bolus

A discrete amount of medication or fluid given over a short period, usually by injection or infusion. In digestion, a bolus is chewed food ready to be swallowed.

Synonyms:

Bougie

A slender, flexible instrument used to examine or gradually dilate a narrowed tubular structure, such as the esophagus or urethra.

Synonyms:

Bronchoscope

A thin, lighted instrument used to examine the trachea and bronchi and, when needed, obtain tissue or fluid samples.

Synonyms:

Bacillary Dysentery

Acute inflammatory diarrhea caused by *Shigella* species, typically producing fever, abdominal cramps, and frequent stools that may contain blood or mucus.

Synonyms:

Bacillus Anthracis

The spore-forming bacterium that causes anthrax. Infection may be cutaneous, gastrointestinal, or inhalational.

Synonyms:

Bacillus Cereus

A spore-forming bacterium that can cause food poisoning, usually through a rapid-onset vomiting syndrome or a diarrheal syndrome after ingestion of contaminated food.

Synonyms:

Bacteriostasis

Inhibition of bacterial growth and reproduction without necessarily killing the bacteria.

Synonyms:

Bacteriostatic

Describing an agent or condition that inhibits bacterial growth rather than directly killing bacteria.

Synonyms:

Bartonella

A genus of bacteria that includes organisms causing cat-scratch disease, trench fever, bacillary angiomatosis, and other infections.

Synonyms:

Batten Disease

An inherited group of neuronal ceroid lipofuscinoses causing progressive neurodegeneration, seizures, vision loss, and cognitive or motor decline, usually beginning in childhood.

Synonyms:

Bednar Aphthae

Traumatic ulcers on the posterior palate of an infant, often associated with pressure or irritation during feeding.

Synonyms:

Balloon Tamponade

Temporary control of bleeding or obstruction using

an inflatable balloon catheter to apply pressure or occlude a passage. Examples include tamponade of variceal bleeding, postpartum hemorrhage, or selected vascular injuries.

Synonyms:

Bacterial Pharyngitis

Infection and inflammation of the pharynx caused by bacteria, most commonly group A Streptococcus. Symptoms may include sore throat, fever, painful swallowing, and tender cervical lymph nodes.

Synonyms:

Bacterial Peritonitis

Infection of the peritoneal cavity, which may occur spontaneously in patients with ascites or secondarily after perforation, surgery, or another intra-abdominal infection. It requires prompt evaluation and antimicrobial treatment.

Synonyms:

Bacillus

A rod-shaped bacterium. The term may refer broadly to bacterial shape or specifically to members of the genus *Bacillus*, some of which form resistant spores and cause human disease.

Synonyms:

Baroreceptor

A pressure-sensitive sensory receptor, mainly in the carotid sinus and aortic arch, that detects arterial-wall stretch and helps regulate blood pressure through autonomic reflexes.

Synonyms:

Barrier Nursing (Isolation Nursing)

Nursing care arranged to reduce the spread of infection between a patient, healthcare workers, and other patients by using appropriate hand hygiene, protective equipment, and isolation measures.

Synonyms: Isolation Nursing

Basilic Vein

A superficial vein of the upper limb that ascends along the medial side of the arm and joins the

brachial veins to form the axillary vein. It is used for venous access in selected settings.

Synonyms:

Basophilia

An abnormally increased number of basophils in the blood. It may occur with myeloproliferative disorders, allergic or inflammatory conditions, and some infections.

Synonyms:

Biochemistry

The study of the chemical substances and reactions occurring in living organisms. Clinical biochemistry uses laboratory measurements to assess health and disease.

Synonyms:

Biofeedback

A technique that provides information about a physiological process, such as muscle activity, heart rate, or breathing, to help a person learn voluntary control of it.

Synonyms:

Biological Warfare

The deliberate use of microorganisms, toxins, or other biological agents to cause disease or death in humans, animals, or plants.

Synonyms:

Birth Defect (Congenital Anomaly)

A structural, functional, or metabolic abnormality present at birth, caused by genetic, environmental, nutritional, infectious, or multifactorial factors.

Synonyms: Congenital Anomaly

Birth Asphyxia

Inadequate oxygenation or ventilation around the time of birth, potentially causing respiratory failure, metabolic acidosis, organ injury, or hypoxic-ischaemic encephalopathy. It requires immediate neonatal assessment and resuscitation.

Synonyms:

Birth Rate

The number of live births in a population during a specified period, usually expressed per 1,000 people per year.

Synonyms:

Blackwater Fever

A severe form of malaria, classically associated with *Plasmodium falciparum*, characterized by intravascular hemolysis, hemoglobinuria, anemia, and possible kidney failure.

Synonyms:

Blood Donor

A person who voluntarily gives blood or blood components for transfusion or medical use. Donors are screened to protect both donor health and recipient safety.

Synonyms:

Blood Poisoning (Septicaemia)

An older term commonly used for serious bloodstream infection or sepsis. Sepsis is life-threatening organ dysfunction caused by a dysregulated response to infection.

Synonyms: Septicaemia

Blood Vessels

Tubular structures that transport blood through the body, including arteries, arterioles, capillaries, venules, and veins.

Synonyms:

B-Mode Ultrasound

Brightness-mode ultrasonography, which produces a two-dimensional image from echoes returning from tissues. It is the standard imaging mode for many organs and soft tissues.

Synonyms:

Borborygmi

Rumbling or gurgling sounds produced by the movement of gas and fluid through the intestines. They may be normal or altered in gastrointestinal obstruction and other disorders.

Synonyms:

Bow Legs (Genu Varum)

Outward curvature of the legs so that the knees remain apart when the ankles are together. It may be a normal developmental stage in young children or result from bone disease.

Synonyms: Genu Varum

Breast Examination

Systematic inspection and palpation of the breasts and regional lymph nodes to assess masses, skin or nipple changes, pain, or other abnormalities.

Synonyms:

Breast Milk

Milk produced by the mammary glands after childbirth, providing nutrients, immune factors, and other substances important for infant growth and development.

Synonyms:

Breast Reconstruction

Surgical restoration of breast shape after mastectomy or trauma, using an implant, the patient's own tissue, or a combination of techniques.

Synonyms:

Breast Screening

Examination of people without breast symptoms to detect breast cancer at an earlier stage, most commonly using mammography according to age and risk-based programs.

Synonyms:

Breathlessness (Dyspnoea)

The uncomfortable awareness of difficult, labored, or insufficient breathing. Causes include respiratory, cardiac, metabolic, and psychological disorders.

Synonyms: Dyspnoea

Bubo

A tender, enlarged lymph node, usually in the groin, armpit, or neck, caused by infection. Buboes are classically associated with plague but occur in other

infections.

Synonyms:

B Cell

A lymphocyte that develops in the bone marrow and can differentiate into antibody-producing plasma cells or memory B cells after activation.

Synonyms: B lymphocyte; B-cell.

Balloon Dilation

A procedure that widens a narrowed body passage or vessel by inflating a balloon at the affected site.

Synonyms: Balloon dilatation; balloon angioplasty when performed in a blood vessel.

Baseline EKG

An electrocardiogram obtained for comparison with later tracings or before a treatment, procedure, or change in clinical status.

Synonyms: Baseline ECG; reference electrocardiogram.

Benign

Not malignant and not expected to invade nearby tissue or spread to distant sites, although a benign lesion can still cause problems because of its size or location.

Synonyms: Nonmalignant; noncancerous.

Benign Orgasmic Headache

A sudden severe headache occurring during sexual activity or at orgasm after dangerous secondary causes have been excluded.

Synonyms: Primary headache associated with sexual activity; sexual-activity headache.

Bernstein Test

A historical provocative test in which acid is introduced into the esophagus to reproduce heartburn symptoms; it has largely been replaced by more direct evaluation of reflux.

Synonyms: Acid perfusion test; Bernstein acid perfusion test.

Beta Agonists

Drugs that activate beta-adrenergic receptors, producing effects such as relaxation of airway smooth muscle or increased cardiac stimulation depending on receptor selectivity.

Synonyms: Beta-adrenergic agonists; beta-agonist drugs.

Beta Amyloid

Peptides generated from amyloid precursor protein that can accumulate as plaques in the brain in Alzheimer disease.

Synonyms: Amyloid-beta; A-beta peptide.

Beta Carotene

A carotenoid pigment found in plants that can be converted by the body into vitamin A.

Synonyms: Beta-carotene; provitamin A carotenoid.

Biguanides

A class of glucose-lowering medicines that reduce hepatic glucose production and improve insulin sensitivity; metformin is the principal example.

Synonyms: Biguanide drugs; biguanide antidiabetics.

Binge Drinking

A pattern of consuming enough alcohol over a short period to produce a high blood alcohol concentration and increased risk of injury or acute toxicity.

Synonyms: Episodic heavy drinking; heavy episodic drinking.

Binocular Vision

Vision that uses both eyes together to produce a single image and support depth perception.

Synonyms: Two-eyed vision; binocular visual function.

Binswanger's Dementia

A form of vascular cognitive impairment caused by diffuse small-vessel disease affecting the brain's deep white matter.

Synonyms: Subcortical ischemic vascular disease;

subcortical arteriosclerotic encephalopathy.

Biochanin A

A naturally occurring isoflavone found mainly in legumes and other plants. It is studied for biologic effects but is not established as a treatment for disease.

Synonyms: Biochanin A isoflavone; 5,7-dihydroxy-4'-methoxyisoflavone.

Biochemical Recurrence

A rise in a disease-specific laboratory marker after treatment, suggesting recurrent or persistent disease before clinical or imaging findings become apparent.

Synonyms: Biochemical relapse; biochemical failure.

Biological Variability

Natural variation in a measured biologic quantity within the same person over time or between people, independent of measurement error.

Synonyms: Biologic variation; physiologic variability.

Blackout

A period of partial or complete memory loss, commonly associated with alcohol or other causes of impaired consciousness.

Synonyms: Amnestic episode; alcohol-related amnesia when caused by alcohol.

Bladder Neck

The narrow lower part of the urinary bladder where it connects to the urethra and contributes to urinary continence.

Synonyms: Vesical neck; bladder outlet.

Blister

A fluid-filled elevation between or within layers of skin or mucosa, caused by friction, burns, infection, allergy, or an autoimmune blistering disorder.

Synonyms: Bulla; vesicle when small.

Blocking Agent

A substance that prevents or reduces a biologic

process by blocking a receptor, channel, enzyme, or other target.

Synonyms: Blocker; antagonist when it acts by receptor antagonism.

BMD

A measurement of bone mineral content adjusted for area, used to assess bone strength and help diagnose osteoporosis.

Synonyms: Bone mineral density; bone density.

BMI

A weight-to-height index calculated as weight in kilograms divided by height in meters squared. It is used as a population-level measure related to body size, not as a complete individual health assessment.

Synonyms: Body mass index; Quetelet index.

Body Mass Index

A weight-to-height index calculated as weight in kilograms divided by height in meters squared. It is used to classify weight categories in populations and clinical screening.

Synonyms: BMI; Quetelet index.

Bone Mass

The amount of mineralized bone tissue in the skeleton or in a specified region.

Synonyms: Bone mineral content; skeletal bone mass.

Bone Mineral Density

The concentration of mineral in bone, usually measured by dual-energy X-ray absorptiometry to assess fracture risk and osteoporosis.

Synonyms: BMD; bone density.

Bouchard's Nodes

Firm bony enlargements of the proximal interphalangeal joints, most commonly caused by hand osteoarthritis.

Synonyms: Proximal interphalangeal osteophytes; PIP-joint nodes.

Bowel

The small and large intestines, which receive digested food, absorb nutrients and water, and form and transport stool.

Synonyms: Intestine; intestinal tract.

Brain Imaging

Medical imaging used to examine brain structure or function, including CT, MRI, vascular imaging, and selected nuclear medicine techniques.

Synonyms: Neuroimaging; cerebral imaging.

Brain Waves

Electrical activity generated by the coordinated firing of neurons and recorded by electroencephalography.

Synonyms: Cerebral electrical activity; EEG rhythms.

Breast Augmentation

Surgery or another procedure intended to increase breast volume or alter breast shape, commonly using an implant or transferred tissue.

Synonyms: Breast enlargement; augmentation mammoplasty.

Breath Focus

A mindfulness or relaxation practice that uses attention to breathing to stabilize awareness and reduce physiological or emotional arousal.

Synonyms: Breath-focused meditation; breathing-focused mindfulness.

Bronchial Tubes

The right and left main bronchi and their branches that conduct air from the trachea into the lungs.

Synonyms: Bronchi; bronchial tree when referring to the branching airway system.

Bunionette

A painful prominence at the outer side of the fifth metatarsophalangeal joint, often associated with footwear pressure or altered foot mechanics.

Synonyms: Tailor's bunion; bunion of the fifth toe.

Babesia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Babesia divergens

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Babesia microti

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bacillaceae

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bacillus lentus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacillus licheniformis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacillus megaterium

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacillus mycoides

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacillus pumilus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacillus subtilis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacitracin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Back

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Baclofen

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bacteria present

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacterial protein

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacterial toxemia

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacterial toxin

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacterial typing

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacterial vaccine

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteriocin

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteriophage lambda

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteriophage t4

A named microorganism, microbial group, or

infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteriophages

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteriorhodopsin

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroidaceae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides caccae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides dorei

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides eggerthii

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides faecis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides fragilis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides gingivalis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides heparinolyticus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides intestinalis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides nordii

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides ovatus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides pyogenes

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides salyersiae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides stercoris

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides thetaiotaomicron

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides uniformis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides ureolyticus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides vulgatus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroides xylanisolvens

A named microorganism, microbial group, or

infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bacteroidete

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Baculoviridae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bad protein

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Bak protein

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Balamuthia

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Balamuthia mandrillaris

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Balanced study

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Balantidiasis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Balantidium

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Balantidium coli

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Balbani body

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Balloon brachytherapy

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Balloon dilatation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Barakat syndrome

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Barbiturates

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Barium sulfate

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Barlow test

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Bartonella elizabethae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bartonella henselae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bartonella infections

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bartonella quintana

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bartonellaceae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bart's hemoglobinopathy

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Basal

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Basal body

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Basal cell

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Basal lamina

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Basal tear

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Base pair

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Base pairing

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Base sequence

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Baseline

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Basic fuchsin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Basic research

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Basidiomycota

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Basilar membrane

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Basiliximab

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Basis pontis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Basophil adenoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Basophilic focus

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Basosquamous carcinoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Batabulin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Batimastat

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Batrachotoxin

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Batracylin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Batroxobin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Battey bacillus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bax protein

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

B-cell activation

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bcgosis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Beacopp regimen

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Beat number

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Becaplermin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Becatecarin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Beclomethasone

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Becquerel

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bed rest

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Behavior

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Behavior disorder

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Behavior test

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Behavior therapy

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Behavioral abnormality

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Behavioral genetics

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Behavioral medicine

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Behenic acid

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Behr syndrome

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Belinostat

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Belotecan hydrochloride

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Benchmarking

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bendamustine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bendamustine hydrochloride

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bendiocarb

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bendroflumethiazide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Benfuracarb

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Benign ameloblastoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Benign epithelioma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context.

Synonyms:

Benign hemangiopericytoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Benign meningioma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Benign mesenchymoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Benign myoepithelioma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Benign paraganglioma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Benign prostate hyperplasia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Benzaldehyde

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Benzazepines

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Benzoates

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Benzocaine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Benzopyran

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Benzopyrene

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Benzopyrenes

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

appropriate use depend on the specific agent and clinical context.

Synonyms:

Benzoyl peroxide

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Benzoylphenylurea

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Benzphetamine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Benztropine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Benzydamine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Benzylamines

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

BEP regimen

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Berberine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bergeyella

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bergeyella zoohelcum

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Beryllium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Best practice

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Beta 2-microglobulin

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Beta globulin

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Beta particle

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Beta radiation

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Beta tocopherol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Beta-chemokines

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Betacoronavirus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Beta-endorphin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Beta-glucans

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Betaherpesvirinae

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Betaine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Beta-lactamase

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Beta-mannosidosis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Betamethasone

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Betamethasone valerate

A medicinal, pharmacologic, or chemical substance

studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Betaretrovirus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Beta-sheet

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Betaxolol

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Betazole

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bevacizumab

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bexarotene

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bezafibrate

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Bibliotherapy

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Bicalutamide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bicuculline

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bicuspid

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bid protein

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Bifidobacterium

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bifidobacterium adolescentis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bifidobacterium animalis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bifidobacterium bifidum

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bifidobacterium breve

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bifidobacterium dentium

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bifidobacterium longum

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Biglycan

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bilateral

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bilateral microphthalmos

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bilateral oophorectomy

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bile pigment

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Biliary

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biliary calculi

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biliary fistula

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or

research context.

Synonyms:

Bilophila

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bilophila wadsworthia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bimatoprost

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Binder excipient

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Binding protein

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Binding site

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Binomial distribution

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Binswanger disease

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Bioaccumulation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bioassay

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Biochemical reaction

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bioengineering

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bio-informatics

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or

research context.

Synonyms:

Biological

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biological availability

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biological clock

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biological model

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biological process

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biological relative

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biological therapy

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Biological transport

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biology

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bioluminescence

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biomaterial

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biomechanical compliance

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biomedical cement

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or

research context.

Synonyms:

Biomedical research

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Biomedical tape

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biomedicine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biometry

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biomimetics

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biomphalaria

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biophysics

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biopolymer

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Biopsy lung

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biopsy site

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biopsy specimen

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bioreactor

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biospecimen

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or

research context.

Synonyms:

Biotechnology

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biotin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biotinylation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bipartite ossification

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Biphenyl compounds

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Bipolar neuron

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bipolaris

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Birth

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Birth injury

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Birth order

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Birth weight

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Bisacodyl

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bisbenzimidazole

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bisexuality

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bismuth

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bisoprolol

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bizelesin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

BK virus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bladder neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Bladder pain

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blast cell

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blast phase

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Blastocystis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Blautia producta

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bleeding tendency

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Bleeding time

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Bleomycin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bleomycin sulfate

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Blepharophimosis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Blepharoptosis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Blinded

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bloating

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Blocking antibody

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blood

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blood bank

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blood cell

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blood circulation

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blood glucose

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blood preservation

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blood product

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blood protein

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Blood sedimentation

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blood substitutes

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blood treatment

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blood vessel

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blood volume

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Blue nevus

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Blunted affect

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Blurred vision

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

B-lymphocyte

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bocavirus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bodily secretion

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Body cavity

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Body composition

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Body fluid

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Body height

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Body image

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Body odor

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Body piercing

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Body position

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Body region

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Body space

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Body substance

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Body surface

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Body wall

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Body weight

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bohring syndrome

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and

severity.

Synonyms:

Bolt device

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bolus infusion

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bombesin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bombesin receptor

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Bone callus

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bone cement

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bone cyst

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bone development

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bone disease

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Bone marrow disorder

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Bone marrow transplantation

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bone matrix

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bone necrosis

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bone neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Bone pain

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bone plate

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bone regeneration

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bone remodeling

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bone resorption

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bone screws

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bone transplantation

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bony labyrinth

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Boranes

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Border definition

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Borderline

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Bordetella

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bordetella avium

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bordetella bronchiseptica

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bordetella hinzii

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bordetella parapertussis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bordetella petrii

A named microorganism, microbial group, or

infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Boric acid

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Boron

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Borrelia infection

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Borrelia miyamotoi

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bortezomib

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bosentan

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Botany

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bottle feeding

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Botulinum toxin

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Bouin's solution

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bovine anaplasmosis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bovine papillomavirus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bowel burn

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Bowel urgency

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bowen's disease

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Bowman membrane

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Brachycephaly

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Brachydactyly

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bradykinin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Brain disorder

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Brain fornix

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Brain mapping

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Brain neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Brain wave

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Branchioma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Branchio-Oto-Renal syndrome

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Brassicasterol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Brassicidic acid

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Breast

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Breast carcinoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Breast duct

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Breast feed

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Breast finding

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Breast lobe

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Breast lobule

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Breast neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Breast self-examination

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Breath test

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept.

Synonyms:

Brefeldin A

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bretylium tosylate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Brevibacillus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Brevibacterium

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Brevibacterium casei

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Brevundimonas

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Brevundimonas diminuta

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Brevundimonas vesicularis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Brimonidine tartrate

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Brivanib

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Brivanib alaninate

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Brivudine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Broad ligament

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bromelain

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bromhexine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bromine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bromobenzenes

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bromocriptine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bromodeoxyuridine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bromophos

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bromouracil

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bromovirus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bromthymol blue

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bronchial

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bronchial fistula

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bronchial hemorrhage

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bronchial obstruction

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bronchial stricture

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bronchoconstriction

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bronchoconstrictor agents

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bronchogenic carcinoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Bronchomalacia

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bronchus disease

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Bronchus neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Brown fat

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Brucella

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Brucella abortus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Brucella canis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Brucella melitensis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Brucella suis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Brucellaceae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Brunner gland

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Brush

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bryostatin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Buccal mucosa

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Buccalmucosa

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Budesonide

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Budvicia

A biomedical dictionary term used in medical, bio-

logical, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Budvicia aquatica

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bufonidae

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Buformin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bulbourethral glands

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

Bulimia

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Bulla

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bully

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Bungarotoxins

A biological molecule, chemical substance, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Bunyaviridae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bupivacaine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bupivacaine hydrochloride

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Buprenorphine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Bupropion

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Burkholderia

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Burkholderia cenocepacia

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Burkholderia cepacia

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Burkholderia gladioli

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Burkholderia mallei

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Burkholderia pseudomallei

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Burkholderiaceae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Bursa of fabricius

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Buruli ulcer

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity.

Synonyms:

Buserelin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Buspirone

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Busulfan

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context.

Synonyms:

Butanol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Buthionine sulfoximine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context.

Synonyms:

Butocarboxim

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context.

Synonyms:

Buttiauxella

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Buttiauxella agrestis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Buttiauxella ferragutiae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Buttiauxella gaviniae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Buttiauxella noackiae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

Synonyms:

Buttocks

An anatomic, physiologic, or clinical term referring to a body structure or function.

Synonyms:

C

C-Peptide

A peptide released in equimolar amounts with endogenous insulin when proinsulin is cleaved. Measurement helps estimate endogenous beta-cell insulin secretion and distinguish endogenous from injected insulin, with interpretation affected by renal function and glucose level.

Synonyms:

C-Reactive Protein

An acute-phase reactant produced by the liver in response to inflammation (IL-6). CRP rises within 4-6 hours of inflammatory stimulus and peaks at 36-50 hours. Uses: monitoring inflammatory disease activity (RA, vasculitis), detecting infection post-operatively, and cardiovascular risk stratification (hs-CRP: high-sensitivity).

Synonyms:

C-Section

Cesarean section, surgical delivery of a fetus through incisions in the abdominal wall and uterus.

Synonyms:

C. difficile

Clostridioides difficile, a gram-positive, spore-forming bacterium that causes antibiotic-associated diarrhea and colitis. *C. difficile* produces toxins A and B that cause colonic inflammation. Risk factors include antibiotic exposure, proton pump inhibitor use, and advanced age. Treatment includes vancomycin or fidaxomicin.

Synonyms:

C282Y Mutation

Most common genetic cause of hereditary hemochro-

matosis, a C to T transition in the HFE gene resulting in cysteine to tyrosine substitution at position 282. Homozygosity occurs in approximately one in two hundred individuals of Northern European descent.

Synonyms:

CA 19-9

A blood marker that may be elevated in pancreatic and other gastrointestinal cancers as well as in benign biliary or inflammatory conditions. It is not sufficiently specific for cancer screening or diagnosis by itself.

Synonyms:

CA-125

A blood marker used mainly to assess some ovarian cancers and to monitor selected patients. It can also rise in benign gynecologic, inflammatory, liver, and other malignant conditions, so it is not sufficient by itself to screen for or diagnose ovarian cancer.

Synonyms:

CA125

Cancer Antigen 125, a protein tumor marker used primarily in the evaluation of ovarian cancer.

Synonyms:

CABG (Coronary Artery Bypass Grafting)

Open heart surgery to bypass stenotic coronary arteries using autologous grafts. On-pump: cardiopulmonary bypass, cardioplegic arrest. Off-pump (OPCAB): beating heart, no bypass machine.

Synonyms: Coronary Artery Bypass Grafting

Cabot Ring

A threadlike or ring-shaped inclusion in a red blood cell, sometimes seen in severe anemia or disorders of erythropoiesis. It represents residual nuclear material or mitotic spindle remnants.

Synonyms:

Cachexia

A multifactorial syndrome of involuntary weight loss, skeletal-muscle wasting, and systemic inflammation associated with chronic diseases such as cancer, heart failure, COPD, and advanced kidney disease.

Synonyms:

Cacosmia

A distorted or unpleasant perception of smell, in which odors may seem foul or disagreeable. It can occur with sinonasal disease, infection, seizures, trauma, or other neurologic disorders.

Synonyms:

Cadaver

A dead human body used for anatomical dissection, surgical training, and medical research. Cadavers are preserved through embalming (arterial injection of formaldehyde-based fixatives) to prevent decomposition and maintain tissue integrity.

Synonyms:

Cadaveric Spasm

Rare form of instantaneous post-mortem stiffening of a specific group of voluntary muscles at the exact moment of death, without an intervening period of muscle relaxation.

Synonyms:

Caecitis

Inflammation of the cecum. Causes include infection, inflammatory bowel disease, ischemia, neutropenic enterocolitis, and extension of adjacent inflammatory disease.

Synonyms:

Caecopexy

Surgical fixation of the cecum to the abdominal wall or retroperitoneum, performed to prevent or treat abnormal cecal mobility or recurrent cecal volvulus.

Synonyms:

Caecostomy

Surgical creation of an opening from the cecum to the abdominal wall for decompression or diversion of intestinal contents. It may be temporary or part of treatment for selected distal obstruction.

Synonyms:

Caecotomy

Surgical incision into the cecum, usually to remove a foreign body, access the bowel, or facilitate another abdominal procedure.

Synonyms:

Caesarean Birth

An operative procedure in which a baby is delivered through an incision in the abdominal wall and uterus. Indications: fetal distress, failure to progress in labor, breech presentation, placenta praevia, multiple pregnancy, previous cesarean, and maternal request.

Synonyms:

Cafe-au-lait Macules

Flat, uniformly hyperpigmented, light-brown to dark-brown (cafe-au-lait, "coffee with milk") macules, > 5 mm in prepubertal children or > 15 mm in postpubertal individuals.

Synonyms:

Caffeine

A naturally occurring xanthine alkaloid and central nervous system stimulant found in coffee, tea, chocolate, and many soft drinks and energy beverages. Mechanism: adenosine receptor antagonist (primarily A1 and A2A subtypes), increasing neuronal activity and promoting catecholamine release.

Synonyms:

Caffeine Withdrawal

A syndrome occurring after abrupt cessation or reduction of caffeine use. Symptoms include headache, fatigue, depressed mood, difficulty concentrating, and flu-like symptoms. Onset is typically 12–24 hours after last caffeine intake, peak at 20–51 hours, and duration of 2–9 days.

Synonyms:

Café au Lait Spot

A flat, sharply demarcated, light-brown skin macule caused by increased melanin. Multiple lesions may be a feature of neurofibromatosis type 1 or other genetic disorders.

Synonyms:

Caisson Disease

Decompression sickness caused by formation of inert-gas bubbles after a rapid reduction in ambient pressure. It can cause joint pain, neurologic injury, respiratory symptoms, or circulatory collapse.

Synonyms:

Calcaneus

Largest tarsal bone forming the heel. Articulates with talus proximally and cuboid anteriorly. Lever for the calf muscles via the Achilles tendon on its posterior tuberosity. Predominantly trabecular bone, the most commonly fractured tarsal bone from falls from height. Bohler's angle assesses fractures on lateral radiographs.

Synonyms:

Calciferol

Vitamin D is a fat-soluble vitamin (actually a prohormone) essential for calcium and phosphorus homeostasis and bone health. See Vitamin D: Calcitriol.

Synonyms:

Calcific Uremic Arteriopathy

A rare disorder, usually associated with advanced kidney disease, in which small blood vessels calcify and cause painful skin and soft-tissue injury or necrosis.

Synonyms:

Calcification

Deposition of calcium salts in tissue. It may occur in damaged tissue or in otherwise normal tissue when calcium or phosphate metabolism is abnormal.

Synonyms:

Calcinosis

Cutaneous calcinosis, the deposition of insoluble calcium phosphate salts within the skin and subcutaneous tissues, occurring in connective tissue diseases such as scleroderma and dermatomyositis, or as a localized phenomenon. Lesions present as firm, white, subcutaneous nodules that may ulcerate and extrude chalky material.

Synonyms:

Calcinosis

The pathological deposition of calcium salts in cutaneous and subcutaneous tissues, presenting as firm, white to yellowish nodules or plaques that may ulcerate and extrude chalky material.

Synonyms:

Calciphylaxis

Calcific uremic arteriopathy causing painful skin necrosis in CKD. Risk factors include warfarin use, elevated calcium-phosphorus product, and obesity. High mortality rate. Treat with sodium thiosulfate, wound care, and discontinuation of warfarin. Avoid calcium-based binders.

Synonyms:

Calcitonin

A 32-amino-acid peptide hormone secreted by the parafollicular C-cells of the thyroid gland in response to elevated serum calcium. It lowers blood calcium by inhibiting osteoclast-mediated bone resorption and increasing renal calcium excretion.

Synonyms:

Calcitriol and Analogues

Active vitamin D forms suppressing PTH. Calcitriol, paricalcitol, doxercalciferol. Monitor calcium and

phosphorus to avoid hypercalcemia and hyperphosphatemia. Part of CKD-MBD management.

Synonyms:

Calcium

A mineral and intracellular second messenger required for bone mineralization, muscle contraction, neurotransmitter release, blood coagulation, and enzyme regulation. Plasma calcium is present as ionized, protein-bound, and complexed fractions.

Synonyms:

Calcium Blood Test

Measurement of calcium in the blood, usually reported as total calcium and interpreted with albumin; ionized calcium may be measured directly when the biologically active fraction is needed. It helps evaluate parathyroid disorders, bone disease, kidney disease, and abnormal calcium levels.

Synonyms:

Calcium Channel Blocker Overdose

Toxic exposure to a calcium-channel blocker that may cause low blood pressure, slow heart rate, conduction abnormalities, high blood glucose, or shock. It requires urgent medical and poison-control management.

Synonyms:

Calcium Channel Blockers

Agents that block L-type calcium channels, reducing calcium influx into cardiac and smooth muscle cells. Dihydropyridines (amlodipine, nifedipine) cause vasodilation and are used for hypertension and angina.

Synonyms:

Calcium phosphate

The principal mineral constituent of bone and teeth, existing as hydroxyapatite crystals. In pathological states, calcium phosphate deposits form in soft tissues through dystrophic calcification in damaged tissue or metastatic calcification in hypercalcemic conditions.

Synonyms:

Calcium Pyrophosphate Arthritis

Acute or chronic inflammatory arthritis caused by deposition of calcium pyrophosphate crystals in cartilage and joints. Acute attacks, often called pseudogout, commonly affect the knee or wrist and are diagnosed by identifying weakly positively birefringent crystals in synovial fluid.

Synonyms:

Calcium Pyrophosphate Deposition Disease

A crystal arthropathy caused by deposition of calcium pyrophosphate dihydrate crystals in articular cartilage (chondrocalcinosis). Presents with acute pseudogout (most common): acute monoarticular inflammation of the knee or wrist, mimicking gout but less painful.

Synonyms:

Calcium Sensing Receptor

G-protein coupled receptor expressed primarily on parathyroid glands and renal tubular cells that senses extracellular ionized calcium levels. On parathyroid glands activation suppresses PTH secretion. On renal tubular cells activation increases calcium excretion and decreases phosphate reabsorption.

Synonyms:

Calcium Stones

Most common kidney stone type composed of calcium oxalate or calcium phosphate. Risk factors include hypercalciuria, hyperoxaluria, hypocitraturia, and low urine volume. Treat with thiazides for hypercalciuria, dietary modification, and hydration. Potassium citrate for hypocitraturia.

Synonyms:

Calculus (Tartar)

Mineralized dental plaque. Cannot be removed by brushing. Requires professional scaling. Retains plaque, promotes inflammation.

Synonyms: Tartar

Calculus Removal

Professional cleaning to remove hardened plaque. Scaling and root planing. Ultrasonic and hand instruments.

Synonyms:

Caldwell-Luc Operation

A surgical approach to the maxillary sinus through the canine fossa of the anterior maxilla. It is used selectively for access to maxillary sinus disease, lesions, or foreign bodies.

Synonyms:

Caloric Restriction

Reduced calorie intake without malnutrition. Associated with longevity, reduced chronic disease risk. Requires careful planning.

Synonyms:

Calorie

A unit of energy measurement used in nutrition to quantify the energy content of foods and energy expenditure of the body. One kilocalorie (kcal, commonly called a Calorie with capital C) equals the energy required to raise 1 kilogram of water by 1 degree Celsius.

Synonyms: a Calorie.

Cambridge Classification

ERCP-based grading system for chronic pancreatitis severity evaluating the main pancreatic duct, branches, and common bile duct. Normal pancreas shows smooth duct without abnormalities. Equivocal shows fewer than three abnormal side branches. Mild shows three or more abnormal side branches. Moderate shows abnormal main duct.

Synonyms:

Cameron Lesions

Linear gastric erosions or ulcers found on the mucosal folds at the diaphragmatic hiatus in patients with large hiatal hernias. They result from mechanical trauma as the gastric mucosa prolapses through the diaphragmatic crura during respiration and movement.

Synonyms:

Campimetry

Measurement and mapping of the visual field, usually by presenting stimuli at different locations while the patient maintains fixation. It helps detect and characterize defects from retinal, optic-nerve, or retrochiasmal disease.

Synonyms:

Camptocormia

A marked forward flexion of the trunk that increases while standing or walking and improves when lying down. It can occur with axial myopathy, Parkinsonian disorders, dystonia, or other neuromuscular disease.

Synonyms:

Camptodactyly

A congenital or acquired flexion deformity of one or more fingers, usually caused by shortening or abnormality of tendons, muscles, fascia, or joints. It often affects the proximal interphalangeal joints.

Synonyms:

Campylobacter Infection

Bacterial gastroenteritis caused most often by *Campylobacter jejuni* or *C. coli*, usually acquired from contaminated poultry, food, water, or unpasteurized milk. It causes fever, abdominal cramps, and diarrhea that may be bloody and can rarely precede Guillain-Barre syndrome.

Synonyms:

Campylobacteriosis

Infection caused by *Campylobacter* species, commonly producing fever, abdominal pain, and inflammatory diarrhea that may be bloody. Complications can include dehydration, bacteremia, reactive arthritis, or Guillain-Barré syndrome.

Synonyms:

Canal of Schlemm

A circular endothelial-lined channel at the corneoscleral junction that drains aqueous humor from

the anterior chamber into the episcleral venous circulation. Impaired outflow contributes to glaucoma.

Synonyms:

Canalith Repositioning Maneuver

A series of head movements used to move displaced inner-ear crystals out of a semicircular canal, commonly to treat posterior-canal benign positional vertigo.

Synonyms:

Canavan Disease

An autosomal-recessive leukodystrophy caused by aspartoacylase deficiency, leading to accumulation of N-acetylaspartate and progressive spongy degeneration of cerebral white matter. It typically presents in infancy with hypotonia followed by developmental impairment and macrocephaly.

Synonyms:

Cancer

A group of diseases in which abnormal cells grow uncontrollably, invade nearby tissues, or spread to distant sites. Cancer may arise in any tissue and is classified by its site and cell type. Early detection and treatment improve outcomes.

Synonyms:

Cancer Care Team

The multidisciplinary group of health professionals involved in cancer care, which may include oncologists, surgeons, radiologists, pathologists, nurses, pharmacists, rehabilitation specialists, psychologists, and palliative-care professionals.

Synonyms:

Cancer Cell

A cell that has acquired genetic and epigenetic abnormalities allowing uncontrolled growth, impaired normal differentiation, resistance to cell death, invasion of surrounding tissues, or spread to distant sites.

Synonyms:

Cancer Genetics

Inherited cancer syndromes. Examples: BRCA1/2 (breast, ovarian), Lynch syndrome (colon), Li-Fraumeni (various).

Synonyms:

Cancer Nutrition

Malnutrition common in cancer. Hypermetabolism, cachexia, treatment side effects. Nutritional support improves outcomes. High protein, high calorie.

Synonyms:

Cancer of Unknown Primary

Metastatic cancer in which the primary site cannot be identified despite investigation. Workup includes histology, immunohistochemistry, and molecular profiling to guide treatment.

Synonyms:

Cancer Pain

Pain caused by a tumor, its spread, or cancer treatment. It may be continuous or episodic and can involve bone, nerves, or internal organs. Management may include treating the cancer, non-opioid medicines, opioids, nerve-directed treatments, and supportive care.

Synonyms:

Cancer Registry

System for collecting cancer data. Used for epidemiology, quality improvement, research.

Synonyms:

Cancer Screening

Testing people without symptoms to detect certain cancers or precancerous changes early, when treatment may be more effective.

Synonyms:

Cancer Staging

Classification of cancer extent. TNM system: T (tumor size/extent), N (nodal involvement), M (metastasis). Stages: 0 (in situ), I (early), II-III (advanced), IV (metastatic). Guides treatment and prognosis.

Synonyms:

Cancer Surveillance

The systematic, ongoing collection and analysis of information about cancer incidence, stage, treatment, survival, recurrence, and mortality for patient follow-up, research, and public-health planning.

Synonyms:

Cancer Survivor

Person living with cancer from diagnosis through end of life and beyond.

Synonyms:

Cancer Susceptibility Genes

Genes in which inherited pathogenic variants increase a person's risk of developing one or more cancers. Examples include BRCA1, BRCA2, APC, and mismatch-repair genes; a susceptibility variant does not guarantee that cancer will develop.

Synonyms:

Cancer Vaccine

A vaccine intended either to prevent cancer-causing infections or to stimulate an immune response against cancer cells. Preventive examples target oncogenic infections, while therapeutic vaccines are designed for selected established cancers.

Synonyms:

Cancer-Associated Thrombosis

Venous or arterial thrombosis occurring in the setting of active malignancy or its treatment. Tumor biology, immobilization, surgery, central venous devices, and systemic therapy contribute to risk; anti-coagulation is individualized according to bleeding risk and cancer factors.

Synonyms:

Cancrum Oris

Noma, a rapidly destructive gangrenous infection of the mouth and face that occurs mainly in severely malnourished or immunocompromised children. It begins with gingival or mucosal necrosis and can extend through facial tissues.

Synonyms:

Candida albicans infection

Infection caused by the yeast *Candida albicans*, ranging from mucosal disease to invasive bloodstream or organ infection in vulnerable patients.

Synonyms:

Candida Auris

A multidrug-resistant yeast that can colonize skin and cause invasive bloodstream, wound, or ear infections, especially in hospitalized or immunocompromised patients. It spreads readily in healthcare settings and requires laboratory identification and strict infection-control measures.

Synonyms:

Candidal Intertrigo

A *Candida* infection of skin folds (axillae, inframammary, inguinal, intergluteal, pannus) characterized by erythematous, macerated plaques with satellite pustules at the periphery. Most common in obese, diabetic, and immunocompromised patients, and with prolonged antibiotic use. Presents with itching, burning, and soreness.

Synonyms:

Candidemia

The presence of *Candida* species in the bloodstream. It is an invasive fungal infection associated with intravascular devices, surgery, intensive care, immunosuppression, and substantial risk of organ dissemination.

Synonyms:

Candidiasis

Fungal infection caused by *Candida* species, most commonly *C. albicans*. Mucocutaneous: oral thrush (white plaques on oral mucosa), esophagitis, vulvovaginitis (itching, discharge), and intertrigo. Invasive candidiasis: candidemia and deep organ infection, typically in immunocompromised or ICU patients. Diagnosis: culture, histopathology.

Synonyms:

Cane

Walking aid for balance. Types: quad (four-base), single-point. Held on opposite side of injury.

Synonyms:

Canicola Fever

A form of leptospirosis associated particularly with *Leptospira interrogans* serovar canicola. It may cause fever, headache, myalgia, conjunctival suffusion, and renal or hepatic involvement.

Synonyms:

Canker Sore

A common aphthous ulcer of the oral mucosa, appearing as a painful, shallow, round or oval ulcer with an erythematous border. Most heal spontaneously, but recurrent, severe, or atypical ulcers require assessment.

Synonyms:

Cannabis Use Disorder

A problematic pattern of cannabis use leading to significant impairment. Criteria include tolerance and withdrawal (irritability, anger, decreased appetite, restlessness, anxiety, sleep disturbance). Cannabis intoxication includes euphoria, impaired judgment, and time distortion.

Synonyms:

Cannot Intubate Cannot Oxygenate

The most critical airway emergency — inability to intubate the trachea and inability to oxygenate the patient by face mask or supraglottic airway despite optimal efforts. CICO is a life-threatening situation requiring immediate surgical airway access. Signs: SpO₂ decreasing despite 100% O₂, absent end-tidal CO₂, no chest rise.

Synonyms:

Cannulation

The insertion of a cannula into a blood vessel, body cavity, duct, or other anatomical passage to permit drainage, infusion, monitoring, sampling, or access for a procedure.

Synonyms:

Cantlie Line

Functional liver division extending from the gallbladder fossa to the IVC, corresponding to the middle hepatic vein plane. Unlike the falciform ligament (anatomical division), it represents the true functional blood supply/biliary drainage division. Right hepatic artery and portal vein supply the right half; left supply the left.

Synonyms:

Capacity

Autonomous voluntary authorization given by a competent patient to undergo a specific medical intervention, procedure, or clinical trial. See informed consent.

Synonyms:

Capacity and Competence

Decision-making capacity is a clinical evaluation performed by a physician to determine whether a patient understands the nature, consequences, risks, and alternatives of a specific proposed medical decision at a given time.

Synonyms:

Capgras Syndrome

A delusional misidentification syndrome in which a person believes that someone familiar has been replaced by an identical impostor. It can occur in neurodegenerative disease, psychosis, brain injury, or other neurologic conditions.

Synonyms:

Capillaroscopy

Examination of the small vessels in the nail-fold or another accessible surface using magnification. It can reveal capillary dilation, hemorrhage, avascular areas, and abnormal architecture in connective-tissue and microvascular disease.

Synonyms:

Capillary

The smallest blood vessel in the body, forming a microscopic network (capillary bed) that connects arterioles to venules.

Synonyms:

Capillary Bed

A network of interconnected capillaries that links arterioles to venules within a tissue. It provides a large surface area for exchange of oxygen, carbon dioxide, nutrients, hormones, and metabolic waste between blood and interstitial fluid.

Synonyms:

Capillary Leak Syndrome

A disorder of increased capillary permeability in which plasma and proteins move from the intravascular space into surrounding tissues. It may cause hypotension, haemoconcentration, hypoalbuminaemia, oedema, and shock; causes include severe infection, immune-mediated disease, toxins, and rare idiopathic episodes.

Synonyms:

Capillary Refill

A bedside assessment of peripheral perfusion performed by briefly pressing a nail bed or skin and measuring the time for normal color to return. Delayed refill may indicate poor circulation, shock, hypothermia, or vascular disease.

Synonyms:

Capillary Refill Time

The time required for color to return after pressure briefly blanches a nail bed or area of skin. A delayed result may suggest impaired peripheral perfusion, but interpretation depends on age, temperature, technique, and the clinical setting.

Synonyms:

Capitate

Largest carpal bone, centrally located in the distal row as the carpal keystone. Rounded head articulates with scaphoid and lunate; distal surface with the third metacarpal. Last carpal bone to ossify. Wrist joint axis, bearing significant axial load. Avascular necrosis may occur with fractures similar to scaphoid injuries.

Synonyms:

Capnocytophaga canimorsus

A Gram-negative, capnophilic bacillus found in the oral flora of dogs and cats that causes severe sepsis, meningitis, and cellulitis in humans, particularly the immunocompromised, asplenic, or elderly. Infection typically follows dog or cat bites. It is a fastidious organism requiring prolonged incubation for culture.

Synonyms:

Capnography

Continuous measurement and graphical display of exhaled carbon dioxide during anesthesia and sedation. The waveform and end-tidal value help assess ventilation, airway patency, circulation, and confirmation of tracheal tube placement.

Synonyms:

Capsular Contracture

Abnormal tightening and hardening of the fibrous capsule around an implanted device, especially a breast implant. It may cause pain, distortion, firmness, or displacement.

Synonyms:

Capsule Endoscopy

Non-invasive diagnostic technique using a swallowable wireless endoscopic device to capture images of the small intestinal mucosa. The capsule contains a miniature video camera and transmitter that sends images to a receiver worn on the patient's belt.

Synonyms:

Capsule of Glisson

The connective-tissue capsule surrounding the liver, which sends fibrous septa inward along portal tracts and supports the organ's vessels, ducts, and nerves.

Synonyms:

Capsule of Tenon

A fascial sheath surrounding the globe of the eye and separating it from orbital fat. It contributes to eye movement and forms a potential space used in some ophthalmic procedures.

Synonyms:

Capsulectomy

Surgical removal of part or all of a fibrous capsule surrounding an organ, implant, or other structure. The indication depends on contracture, infection, pathology, or the need to revise a reconstruction.

Synonyms:

Caput Medusae

Dilated periumbilical veins radiating outward from the umbilicus, seen in portal hypertension with recanalization of the umbilical vein. Not strictly a cardiac finding but relevant in right heart failure causing hepatic congestion and portal hypertension. It must be distinguished from caval collateral circulation.

Synonyms:

Caput Succedaneum

Edema of the scalp presenting as a soft, boggy swelling that crosses suture lines. Caused by pressure of the vaginal walls on the fetal head during labor. Resolves within hours to days. Differentiated from cephalohematoma (subperiosteal, does not cross suture lines) and subgaleal hemorrhage (life-threatening, crosses suture lines).

Synonyms:

CAR T-Cell

Chimeric antigen receptor T-cells. Engineered immune cells targeting cancer.

Synonyms:

Carbapenem-Resistant Enterobacteriaceae Infection

Infection caused by Enterobacteriaceae bacteria resistant to carbapenem antibiotics, often involving the urinary tract, lungs, bloodstream, or wounds. These infections are difficult to treat and may spread in healthcare settings. Culture and susceptibility testing guide therapy, with strict infection-control measures needed to prevent transmission.

Synonyms:

Carbapenem-resistant organisms

Bacteria that are resistant to carbapenem antibi-

otics, typically through production of carbapenemases. The most important carbapenemases include KPC (Klebsiella pneumoniae carbapenemase), NDM (New Delhi metallo-beta-lactamase), and OXA-48-like enzymes. CRO are a major public health threat due to limited treatment options.

Synonyms:

Carbidopa

A peripheral dopa decarboxylase inhibitor that does not cross the blood-brain barrier; combined with levodopa to prevent its peripheral conversion to dopamine, reducing side effects (nausea, hypotension) and increasing CNS levodopa delivery.

Synonyms:

Carbohydrate

A class of organic compounds composed of carbon, hydrogen, and oxygen (general formula $C_m(H_2O)_n$), serving as the primary energy source for the body.

Synonyms:

Carbohydrate Counting

Method for diabetes management. Matching insulin to carbohydrate intake. Education essential.

Synonyms:

Carbolic Acid (Phenol)

An aromatic organic compound (C_6H_5OH) with antiseptic, disinfectant, and caustic properties. Historically significant as the first surgical antiseptic introduced by Joseph Lister in 1867, dramatically reducing post-operative infection and mortality. Mechanism: denatures bacterial proteins and disrupts cell membranes.

Synonyms: Phenol

Carbon Dioxide Absorber

A safety device used in anesthesia breathing circuits that filters out carbon dioxide from a patient's exhaled breath, allowing the remaining anesthetic gases to be safely recycled and rebreathed.

Synonyms:

Carbon Dioxide Transport

The movement of CO₂ from tissues to lungs. CO₂ is carried in blood in three forms: dissolved (approximately 10 percent), bound to hemoglobin as carbamino compounds (approximately 20 percent), and as bicarbonate (approximately 70 percent).

Synonyms:

Carbon Ion Therapy

Radiation using carbon ions. Higher biological effectiveness. Limited availability.

Synonyms:

Carbon Monoxide Poisoning

Inhibits hemoglobin oxygen binding (affinity 200x oxygen). Causes headache, dizziness, nausea, cherry-red skin, syncope, death. Diagnosis: carboxyhemoglobin level (not routine). Treatment: 100% oxygen, hyperbaric oxygen if severe (neurological symptoms, COHb >25%, pregnancy).

Synonyms:

Carbonic Anhydrase Inhibitors

Medicines that inhibit carbonic anhydrase and reduce formation of aqueous humor. They are used mainly to lower intraocular pressure and, in some circumstances, to treat edema or metabolic disorders.

Synonyms:

Carboxyhemoglobin

Toxicity from inhalation of carbon monoxide (CO), a colorless, odorless gas binding hemoglobin 200-300 times more avidly than oxygen, forming carboxyhemoglobin (COHb) and reducing oxygen delivery. See carbon monoxide poisoning.

Synonyms:

Carbuncle

A deep, coalescent infection of multiple adjacent hair follicles by *Staphylococcus aureus* (usually MRSA), forming a larger, swollen, erythematous, painful mass with multiple draining sinuses, most often on the neck, back, or thighs; more serious than a furuncle, commonly with fever, malaise, and systemic

infection.

Synonyms:

Carcinogen

Substance causing cancer. Types: chemical (benzene, asbestos, aflatoxin), physical (radiation), biological (HPV, HBV, HCV). Mechanisms: DNA damage, mutations, epigenetic changes. IARC classifications: Group 1 (carcinogenic), Group 2A (probably carcinogenic), Group 2B (possibly carcinogenic), Group 3 (not classifiable).

Synonyms:

Carcinoid Heart Disease

Cardiac complication of carcinoid syndrome occurring in approximately fifty percent of patients with hepatic metastases. Serotonin and other vasoactive substances bypass hepatic metabolism and cause endocardial fibrosis affecting the right-sided heart valves particularly the tricuspid and pulmonary valves.

Synonyms:

Carcinoid Syndrome

Serotonin-secreting neuroendocrine tumor causing flushing, diarrhea, bronchospasm, and right-sided heart disease. Occurs when vasoactive substances bypass hepatic metabolism through venous drainage or liver metastases. Diagnosis is with twenty-four hour urine 5-hydroxyindoleacetic acid or serum chromogranin A.

Synonyms:

Carcinoid Tumor

Carcinoid tumors are well-differentiated neuroendocrine neoplasms that arise from enterochromaffin cells throughout the gastrointestinal tract and bronchial system. The most common primary sites are the appendix, small intestine, and rectum.

Synonyms:

Carcinoma

Malignant tumor of epithelial origin. Types: squamous cell carcinoma, adenocarcinoma, basal cell carcinoma, transitional cell carcinoma. Most common

cancer type (80-90% of malignancies). Examples: lung carcinoma, breast carcinoma, colon carcinoma.

Synonyms:

Carcinoma en cuirasse

An unusual form of breast cancer characterized by diffuse, firm, indurated skin that resembles armor. It results from extensive dermal lymphatic invasion by tumor cells.

Synonyms:

Carcinoma in Situ

Full-thickness dysplasia without invasion through basement membrane. Stage 0 cancer.

Synonyms:

Carcinosarcoma

A malignant tumor containing both carcinomatous and sarcomatous elements, most commonly of the uterus (malignant mixed Müllerian tumor), with an aggressive course.

Synonyms:

Cardiac allograft

A donor heart transplanted into a recipient with end-stage heart failure. The procedure requires lifelong immunosuppression to prevent rejection. Complications include rejection, cardiac allograft vasculopathy, infection, and malignancy; monitored by endomyocardial biopsy and echocardiography.

Synonyms:

Cardiac Amyloidosis

Deposition of amyloid protein in the heart, causing stiff ventricular walls, impaired filling, arrhythmias, or heart failure. Important types include immunoglobulin light-chain (AL) and transthyretin (ATTR) amyloidosis; treatment depends on the type and organ involvement.

Synonyms:

Cardiac Amyloidosis Diagnosis

Diagnosis involves a combination of clinical suspicion, imaging, and tissue biopsy. Non-invasive diagnosis using Tc-99m pyrophosphate (PYP) or DPD

scintigraphy for ATTR cardiac amyloidosis (with negative serum/urine free light chains to exclude AL amyloidosis).

Synonyms:

Cardiac Amyloidosis Staging

Mayo Clinic staging system for ATTR cardiac amyloidosis: Stage I (NT-proBNP <3000 pg/mL), Stage II (NT-proBNP 3000-8499), Stage III (NT-proBNP ≥8500). Median survival: Stage I: 69 months, Stage II: 47 months, Stage III: 14 months. Treatment with tafamidis (TTR stabilizer) improves survival and functional capacity.

Synonyms:

Cardiac Arrest

Sudden loss of effective heart pumping, causing unresponsiveness, absent normal breathing, and no detectable pulse. Initial rhythms may be shockable or nonshockable; treatment requires immediate cardiopulmonary resuscitation, defibrillation when indicated, and advanced resuscitation care.

Synonyms:

Cardiac Arrest Survival

Outcome after cardiac arrest depends on the cause, location, initial rhythm, time to CPR and defibrillation, and post-arrest care. Early recognition, high-quality CPR, rapid defibrillation when indicated, advanced life support, and appropriate post-arrest treatment improve the chance of survival.

Synonyms:

Cardiac Axis

The mean direction of ventricular depolarization in the frontal plane, estimated from the QRS complex on a 12-lead ECG. Left or right axis deviation may reflect conduction disease, ventricular hypertrophy, infarction, or altered cardiac position.

Synonyms:

Cardiac Biomarkers

Blood measurements used to assess myocardial injury. Cardiac troponins I and T are the preferred specific biomarkers; CK-MB may assist in selected

situations, while myoglobin is sensitive but nonspecific. Results must be interpreted with symptoms, electrocardiography, and serial testing.

Synonyms:

Cardiac Catheterization

Invasive procedure involving insertion of catheters into the heart via peripheral arteries or veins. Diagnostic catheterization measures intracardiac pressures, saturations, and performs coronary angiography. Indications include evaluation of CAD, valvular disease, cardiomyopathy, and congenital heart disease.

Synonyms:

Cardiac Conduction System

The specialized tissue responsible for generating and conducting electrical impulses through the heart. Components include the sinoatrial (SA) node, internodal pathways, atrioventricular (AV) node, bundle of His, right and left bundle branches, and Purkinje fibers.

Synonyms:

Cardiac CT

CT imaging of heart and coronary arteries. Coronary calcium scoring, coronary CT angiography, cardiac function assessment.

Synonyms:

Cardiac CT Angiography

Noninvasive imaging using CT to visualize coronary arteries and cardiac structures. It has high negative predictive value for excluding coronary artery disease, making it useful for low-to-intermediate risk patients with chest pain. Calcium scoring quantifies coronary artery calcification as a marker of atherosclerosis.

Synonyms:

Cardiac Cycle

The sequence of events occurring during one complete heartbeat, consisting of systole (contraction) and diastole (relaxation). During diastole, the ventricles fill with blood; during systole, they contract

and eject blood.

Synonyms:

Cardiac Defibrillation

Delivery of an unsynchronized electrical shock for ventricular fibrillation or pulseless ventricular tachycardia. It is combined with high-quality CPR and advanced life support according to the cardiac-arrest rhythm and protocol.

Synonyms:

Cardiac Device Infections

Infection involving a pacemaker, implantable defibrillator, generator pocket, or lead. Findings may include local inflammation, drainage, bacteremia, or endocarditis. Evaluation uses clinical examination, blood cultures, and imaging when indicated; treatment may require antimicrobial therapy and removal of infected hardware.

Synonyms:

Cardiac Diet

A dietary pattern emphasizing vegetables, fruits, whole grains, legumes, fish, unsaturated fats, and limited sodium, added sugars, and saturated or trans fats. It supports cardiovascular risk reduction but should be individualized for heart failure, kidney disease, diabetes, and nutritional adequacy.

Synonyms:

Cardiac Gated SPECT

SPECT imaging synchronized with ECG. Assess ventricular function, wall motion, viability.

Synonyms:

Cardiac Index

Cardiac output normalized to body surface area (BSA), calculated as CO / BSA . Normal cardiac index is 2.5-4.2 L/min/m². It provides a more accurate assessment of cardiac function than cardiac output alone, accounting for body size. A cardiac index below 2.2 L/min/m² indicates cardiogenic shock.

Synonyms:

Cardiac Metastases

More common than primary cardiac tumors. Most frequent sources: lung cancer, breast cancer, melanoma, lymphoma, and renal cell carcinoma. Most commonly involve the pericardium (effusion, tamponade), but can affect myocardium and endocardium.

Synonyms:

Cardiac MRI

Magnetic-resonance imaging of the heart that characterizes ventricular function, myocardial tissue, perfusion, scar, edema, infiltration, and congenital anatomy without ionizing radiation. Gadolinium contrast is avoided or used cautiously in selected patients with severe renal dysfunction.

Synonyms:

Cardiac Muscle

Involuntary, striated muscle forming the myocardium. Cardiac muscle cells are electrically connected by intercalated discs, allowing coordinated contraction of the heart.

Synonyms:

Cardiac Output

The volume of blood pumped by the heart per minute, calculated as the heart rate multiplied by the stroke volume.

Synonyms:

Cardiac Output Measurement

Methods include: thermodilution via pulmonary artery catheter (bolus of cold saline and temperature change measurement), Fick principle (O_2 consumption / arteriovenous O_2 difference), echocardiographic Doppler (flow velocity time integral $\times$ valve area $\times$ heart rate), and non-invasive cardiac output monitors (bioimpedance, bioreactance).

Synonyms:

Cardiac Pacemaker Types

Single-chamber: pacing one chamber (atrium or ventricle). Dual-chamber (DDD): paces and senses both atrium and ventricle, maintaining AV syn-

chrony. Biventricular (CRT): paces both ventricles for resynchronization in heart failure.

Synonyms:

Cardiac PET

Viability, perfusion, amyloidosis. Quantitative perfusion measurement.

Synonyms:

Cardiac PET Imaging

Positron emission tomography using radiotracers ($Rb-82$, $N-13$ ammonia, $O-15$ water) for quantitative myocardial perfusion assessment. Advantages over SPECT: superior resolution, shorter scan time, attenuation correction, and absolute myocardial blood flow quantification ($mL/g/min$).

Synonyms:

Cardiac Radiation Injury

Late complication of mediastinal radiation therapy (Hodgkin lymphoma, breast cancer, lung cancer). Manifestations include pericardial disease (constrictive pericarditis, effusion), coronary artery disease (accelerated atherosclerosis), valvular disease (fibrosis), myocardial fibrosis, and conduction abnormalities.

Synonyms:

Cardiac Rehab Outcomes

Cardiac rehabilitation can improve exercise capacity, cardiovascular risk-factor control, quality of life, and psychological well-being after selected cardiac conditions. The benefits and participation rates vary among populations and programs.

Synonyms:

Cardiac Rehabilitation

Supervised program for cardiac patients post-MI, PCI, CABG, heart failure. Phases: inpatient (early mobilization), outpatient (supervised exercise, education), maintenance. Components: exercise training, risk factor modification, psychological support, return to work counseling. Reduces mortality, hospitalizations.

Synonyms:

Cardiac Resynchronization Therapy

Biventricular pacing that synchronizes contraction of the left and right ventricles in patients with heart failure, reduced EF, and prolonged QRS duration (especially LBBB). CRT improves symptoms, exercise capacity, and quality of life, and reduces heart failure hospitalizations and mortality.

Synonyms:

Cardiac Sarcoidosis

Infiltrative disease characterized by non-caseating granulomas in the myocardium, affecting 25-30% of patients with systemic sarcoidosis. Presentation includes conduction abnormalities (AV block), ventricular arrhythmias, and heart failure.

Synonyms:

Cardiac Skeleton

A dense connective tissue framework composed of four fibrous rings that surround the heart valves and provide structural support. The cardiac skeleton includes the annuli fibrosi (valve rings), the membranous septum, and the left and right fibrous trigones.

Synonyms:

Cardiac SPECT

A nuclear-imaging method that evaluates myocardial perfusion and can help identify ischemia, infarction, or viable myocardium. When synchronized with the heartbeat, gated images can also assess ventricular motion and function.

Synonyms:

Cardiac Stress Test

Evaluation of cardiac function and ischemia under increased cardiac workload. Exercise stress test (treadmill, Bruce protocol): ECG monitoring for ST-segment changes, symptoms, BP response, and arrhythmias. Sensitivity 65-75% for CAD.

Synonyms:

Cardiac Stress Testing

Assessment of cardiac function under physiological or pharmacological stress to detect ischemia. Ex-

ercise stress testing involves treadmill or bicycle exercise with continuous ECG monitoring. Pharmacological stress (dobutamine, adenosine, regadenoson) is used when patients cannot exercise.

Synonyms:

Cardiac tamponade

Compression of the heart by fluid, blood, or gas in the pericardial space, impairing cardiac filling and causing reduced circulation. It is a medical emergency.

Synonyms:

Cardiac Tamponade Physiology

Accumulation of pericardial fluid causing compression of cardiac chambers, impairing diastolic filling and reducing cardiac output. Hemodynamic consequences include equalization of diastolic pressures (RA = RV diastolic = PCWP), pulsus paradoxus, and decreased cardiac output.

Synonyms:

Cardiac Tumors

Tumors involving the heart may be primary or metastatic. Primary tumors are rare; myxoma is a common benign primary tumor and angiosarcoma is a recognized malignant type. Symptoms and treatment depend on the tumor's location, tissue type, obstruction, embolic risk, and spread.

Synonyms:

Cardiac Tumors Management

Myxoma: surgical excision is curative, with low recurrence rate. Benign tumors (rhabdomyoma, fibroma) may be observed if asymptomatic but require surgery if causing obstruction or arrhythmia. Malignant tumors: prognosis is poor; treatment may include surgery, chemotherapy, and radiation depending on tumor type.

Synonyms:

Cardio-Oncology

The subspecialty focusing on cardiovascular care of cancer patients, addressing cancer therapy-related cardiac dysfunction, prevention, and management.

Key concerns include anthracycline cardiotoxicity, trastuzumab-related cardiomyopathy, immune checkpoint inhibitor myocarditis, and radiation-induced heart disease.

Synonyms:

Cardiogenic Shock

A state of inadequate tissue perfusion caused by severe cardiac dysfunction. It may produce low blood pressure, altered mental status, cool extremities, reduced urine output, metabolic acidosis, or other signs of organ hypoperfusion.

Synonyms:

Cardiogenic Shock Management

Emergency management of shock caused by severe cardiac dysfunction. It includes support of oxygenation and circulation, treatment of the underlying cause, and selected use of vasopressors, inotropes, mechanical support, or revascularization.

Synonyms:

Cardiology

The branch of medicine devoted to the study, diagnosis, and treatment of disorders of the heart and circulatory system. Cardiologists manage conditions including coronary artery disease, heart failure, valvular heart disease, arrhythmias, cardiomyopathy, pericardial disease, congenital heart disease, and hypertension.

Synonyms:

Cardiomegaly

Abnormal enlargement of the heart, identified clinically, on chest radiography, or with cardiac imaging. It may reflect chamber dilatation, myocardial hypertrophy, pericardial effusion, or a combination of these; causes include hypertension, valvular disease, cardiomyopathy, congenital heart disease, and high-output states.

Synonyms:

Cardiomyopathy

Diseases of the myocardium that result in cardiac dysfunction, excluding coronary artery disease,

valvular disease, and congenital heart disease as primary causes. The three main types are dilated, hypertrophic, and restrictive cardiomyopathy.

Synonyms:

Cardiomyopathy Classification

The MOGE(S) classification system provides phenotypic and genotypic description: M (morpho-functional phenotype), O (organ/system involvement), G (genetic inheritance), E (etiology), S (functional status/NYHA class).

Synonyms:

Cardioplegia

Deliberate temporary arrest and protection of the heart during cardiac surgery, usually achieved with a cold or blood-based solution that alters myocardial electrical and metabolic activity.

Synonyms:

Cardiopulmonary Exercise Testing

Comprehensive assessment of cardiovascular and pulmonary function during graded exercise on a treadmill or cycle ergometer. Measures: VO₂ max, anaerobic threshold, ventilatory efficiency (VE/VCO₂ slope), and hemodynamic responses.

Synonyms:

Cardiopulmonary Resuscitation

A sequence of chest compressions, ventilation, defibrillation when indicated, and advanced life-support interventions for cardiac arrest. Its purpose is to maintain circulation and oxygen delivery until spontaneous circulation is restored or definitive treatment is provided.

Synonyms:

Cardiorenal Syndrome

Dysfunction of the heart and kidneys where acute or chronic failure of one organ contributes to dysfunction of the other. Type 1: acute cardiac dysfunction causing acute kidney injury (e.g., cardiogenic shock). Type 2: chronic cardiac dysfunction causing progressive CKD. Type 3: acute kidney injury causing cardiac dysfunction.

Synonyms:

Cardioselective Beta-Blockers

Cardioselective beta-blockers selectively block beta-1 adrenergic receptors, which are predominant in the heart, while having minimal effects on beta-2 receptors in the bronchial smooth muscle and peripheral vasculature at therapeutic doses. Common cardioselective beta-blockers include metoprolol, atenolol, bisoprolol, and nebivolol.

Synonyms:

Cardiospasm

Spasm or impaired relaxation of the lower esophageal sphincter, historically used as a term for achalasia. It causes dysphagia, regurgitation, and sometimes chest discomfort.

Synonyms:

Cardiotocography

A continuous electronic recording of the fetal heart rate and uterine contractions used to assess fetal well-being during pregnancy and labor. The CTG machine uses two transducers placed on the maternal abdomen: an ultrasound transducer records the fetal heart rate, and a tocodynamometer records uterine contractions.

Synonyms:

Cardiotoxicity

Injury or functional impairment of the heart caused by a toxic exposure, systemic disease, or treatment. Manifestations include arrhythmia, myocardial dysfunction, ischemia, or heart failure.

Synonyms:

Cardiotoxicity from Chemotherapy

Chemotherapy agents that damage the myocardium, most commonly anthracyclines (doxorubicin, daunorubicin). Cardiotoxicity presents as dilated cardiomyopathy with reduced ejection fraction. Risk is dose-dependent (doxorubicin cumulative dose >550 mg/m²).

Synonyms:

Cardiovascular Changes in Pregnancy

Plasma volume increases 40-50% (total volume 5 L), red cell mass increases 20-30% (physiologic anemia of pregnancy due to dilution). Cardiac output increases 30-50% by 32 weeks (stroke volume increases initially, then heart rate).

Synonyms:

Cardiovascular disease

Disease affecting the heart or blood vessels, including coronary artery disease, heart failure, arrhythmias, valvular disease, and vascular disorders.

Synonyms:

Cardiovascular Health

Cardio is shorthand for cardiovascular health or exercise that elevates heart rate and respiratory effort to strengthen the heart, lungs, and circulatory system. Aerobic activities such as walking, running, cycling, and swimming improve cardiac output, lower blood pressure, and enhance metabolic efficiency.

Synonyms:

Cardiovascular Screening

Evaluation of cardiovascular risk or disease in people with or without symptoms. It may include blood-pressure measurement, lipid testing, diabetes assessment, and targeted testing based on age and risk.

Synonyms:

Cardiovascular System

The organ system comprising the heart and blood vessels (arteries, arterioles, capillaries, venules, veins) responsible for circulating blood throughout the body.

Synonyms:

Cardioversion

Restoration of a normal cardiac rhythm from an arrhythmia by synchronized electrical shock or, in some contexts, a planned pharmacologic intervention. Synchronized shock avoids delivery during vulnerable ventricular repolarization.

Synonyms:

Cardioversion (Synchronized)

Delivery of an electrical shock synchronized with the QRS complex to restore a more organized cardiac rhythm. It is used for selected tachyarrhythmias, with energy, sedation, anticoagulation, and monitoring determined by the rhythm and the patient's clinical condition.

Synonyms: Synchronized

Carditis

Inflammation of the heart or one of its layers, including the myocardium, endocardium, or pericardium. It may result from infection, immune-mediated disease, or systemic inflammation.

Synonyms:

Care Coordination

Deliberate organization and communication of healthcare activities among professionals, services, patients, and caregivers to support safe, continuous, and appropriate care across settings.

Synonyms:

Caregiver

A person who provides assistance with another person's health care, daily activities, or support. A caregiver may be a family member, friend, or paid professional.

Synonyms:

Caregiver Burden

The emotional, physical, social, or financial strain associated with providing ongoing care for another person.

Synonyms:

Caregiver Stress

Emotional, physical, social, or financial strain associated with providing ongoing care for another person.

Synonyms:

Caries

Progressive destruction of calcified tooth tissue caused by acid-producing microbial biofilm acting

on fermentable carbohydrates. Untreated disease can extend from enamel into dentin and pulp.

Synonyms:

Caries (Dental)

A biofilm-mediated, sugar-driven, multifactorial disease causing net demineralization of enamel, dentin, or cementum. Risk is influenced by fermentable-carbohydrate frequency, fluoride exposure, saliva, oral hygiene, tooth anatomy, and previous disease.

Synonyms: Dental

Caries Risk Assessment

Systematic evaluation of an individual's likelihood of developing dental caries. Low risk: no active caries, good oral hygiene, regular fluoride exposure. Moderate risk: one or more active lesions in past 3 years, fair oral hygiene.

Synonyms:

Carina

The ridge at the base of the trachea where it bifurcates into the right and left main bronchi. It is a landmark for endotracheal tube placement and bronchoscopy. The right main bronchus is wider, shorter, and more vertical than the left, making it the preferred path for aspirated foreign bodies.

Synonyms:

Cariogenic

Capable of promoting dental caries, especially by producing acid from fermentable carbohydrates or supporting a plaque environment that demineralizes tooth structure.

Synonyms:

Cariogram

A computer-based program that illustrates the interaction of caries-related factors and provides an overall caries risk assessment. Factors: diet (content, frequency), bacteria (mutans streptococci, lactobacilli), fluoride exposure, saliva (flow rate, buffering capacity), plaque amount, and clinical/social history.

Synonyms:

Carney Complex

Autosomal dominant multiple endocrine neoplasia syndrome (NAME syndrome / LAMB syndrome), caused by PRKAR1A (17q22-24, protein kinase A regulatory subunit type 1A, 70% of cases) or PRKACA locus.

Synonyms:

Carnitine

Transports long-chain fatty acids into mitochondria for beta-oxidation. Deficiency causes hypoketotic hypoglycemia.

Synonyms:

Caroli Disease

Congenital, autosomal recessive fibropolycystic liver disease (PKHD1 gene, encodes fibrocystin/polyductin; same gene as infantile polycystic kidney disease) characterized by non-obstructive, segmental, saccular dilation of the larger intrahepatic bile ducts.

Synonyms:

Carotid Artery

The paired arterial system supplying the head and neck. Each common carotid artery divides into internal and external carotid arteries; the internal carotid supplies the brain and orbit, while the external carotid supplies most external head and neck structures.

Synonyms:

Carotid Artery Disease

Narrowing or blockage of the carotid arteries, most often caused by atherosclerotic plaque. It can reduce cerebral blood flow or release emboli and is an important cause of transient ischemic attack and ischemic stroke.

Synonyms:

Carotid Artery Stenting

Endovascular placement of a stent across a carotid stenosis, usually with embolic-protection strategies, to improve cerebral blood flow and reduce stroke risk in selected patients. Antiplatelet therapy and

peri-procedural neurologic monitoring are required.

Synonyms:

Carotid Bruit

An audible sound over a carotid artery caused by turbulent blood flow. It may occur with carotid atherosclerosis but does not reliably indicate the severity of stenosis; suspected disease is assessed with appropriate vascular imaging and risk evaluation.

Synonyms:

Carotid cavernous fistula

An abnormal communication between the carotid artery or its branches and the cavernous sinus, most commonly traumatic but also spontaneous. Clinical features include pulsatile proptosis, chemosis, bruit over the orbit, and cranial nerve palsies. Diagnosis is by CT or MR angiography.

Synonyms:

Carotid cavernous sinus fistula

An abnormal connection between the carotid arterial system and the cavernous sinus, which may cause eye redness, pulsation, proptosis, or impaired vision.

Synonyms:

Carotid Duplex

Ultrasound combining B-mode and Doppler imaging of carotid arteries. Assesses stenosis, plaque characterization.

Synonyms:

Carotid Duplex Ultrasound

Ultrasound evaluation of the carotid arteries for atherosclerotic plaque and stenosis. Measures peak systolic velocity (PSV) and end-diastolic velocity (EDV) in the internal carotid artery (ICA).

Synonyms:

Carotid Endarterectomy

Surgical removal of atherosclerotic plaque from a carotid artery to reduce stroke risk in selected patients. Suitability depends on symptoms, degree of narrowing, operative risk, life expectancy, and

current clinical guidance.

Synonyms:

Carotid Stenosis

Narrowing of a carotid artery, usually caused by atherosclerosis. It can reduce blood flow to the brain or serve as a source of emboli. Evaluation and treatment depend on symptoms, degree of narrowing, imaging, and overall stroke risk.

Synonyms:

Carpal Tunnel

Narrow passageway on the palmar wrist, bounded by carpal bones dorsally and the flexor retinaculum as the roof. Transmits the median nerve and flexor tendons. Carpal tunnel syndrome causes numbness in the lateral 3.5 digits and thenar weakness.

Synonyms:

Carpal Tunnel Syndrome

The most common entrapment neuropathy, caused by compression of the median nerve as it passes through the carpal tunnel, a narrow fibro-osseous canal bounded by the carpal bones and the flexor retinaculum (transverse carpal ligament) at the wrist.

Synonyms:

Carpal Tunnel Syndrome Tests

Provocative tests for diagnosing carpal tunnel syndrome. Tinel sign: percuss over median nerve at the carpal tunnel tingling in median distribution. Phalen sign: hold wrists in full flexion for 60 seconds reproduces symptoms. Durkan test (carpal compression): direct compression over carpal tunnel for 30 seconds paresthesias.

Synonyms:

Carrier

Individual heterozygous for a recessive genetic disorder. Typically asymptomatic but can pass mutant allele to offspring. Carrier screening recommended for certain populations (e.g., Ashkenazi Jewish for Tay-Sachs).

Synonyms:

Carrier State

Asymptomatic infection with pathogen capable of transmission. Examples: typhoid carrier, hepatitis B carrier, meningococcal carrier. Importance: public health control, screening, treatment.

Synonyms:

Cartilage

A tough, flexible avascular connective tissue found in joints, the ear, nose, rib cage, and intervertebral discs. Composed of chondrocytes embedded in an extracellular matrix of collagen fibers, proteoglycans, and water, providing resilience and compressive strength.

Synonyms:

Carvedilol

A nonselective beta-blocker with additional alpha-1 adrenergic blockade and antioxidant properties, producing vasodilation with balanced reduction of heart rate, contractility, and afterload.

Synonyms:

Case Definition

Standardized clinical, laboratory, and epidemiologic criteria used to classify a person as a suspected, probable, or confirmed case for surveillance or outbreak investigation. It may differ from the criteria used for individual clinical diagnosis.

Synonyms:

Case Fatality Rate

Proportion of cases dying from disease. Measures severity.

Synonyms:

Case Management

Coordinated planning and follow-up of health and social services to help a person obtain appropriate care, avoid duplication, and meet clinical and functional goals.

Synonyms:

Case-Control Study

Observational study comparing cases with disease

to controls without. Looks back at exposures.

Synonyms:

Case-Fatality Rate

Proportion of cases dying from disease. Formula: deaths / cases. Measures severity.

Synonyms:

Caseous Necrosis

A distinctive form of cell death that characteristically occurs in granulomatous infections, most notably tuberculosis. The term derives from the cheese-like, friable, whitish-yellow appearance of the necrotic tissue on gross examination.

Synonyms:

Castleman Disease

Heterogeneous group of lymphoproliferative disorders (angiofollicular lymph node hyperplasia, giant lymph node hyperplasia) sharing lymph node histopathology.

Synonyms:

Cat Scratch Disease

A regional lymphadenitis caused by *Bartonella henselae*, a gram-negative bacillus transmitted to humans through cat scratches, bites, or licks on broken skin, particularly from kittens (which carry higher bacterial loads).

Synonyms:

Cat-Scratch Disease

An infection caused by *Bartonella henselae*, usually transmitted by a scratch or bite from an infected cat. It commonly causes a papule followed by regional lymph-node enlargement, fever, and fatigue; atypical disease may affect the eye, liver, spleen, or nervous system.

Synonyms:

Cat-Scratch Fever

A usually self-limited infection caused by *Bartonella henselae*, commonly producing a papule at the inoculation site and regional lymph-node enlargement.

Synonyms:

Catabolism

The set of metabolic pathways that break down complex molecules into simpler units, releasing energy captured as ATP, NADH, FADH₂, NADPH. Examples: glycolysis, beta-oxidation, proteolysis, glycogenolysis, nucleotide catabolism.

Synonyms:

Catalepsy

A state of markedly reduced movement and responsiveness in which a person may maintain an imposed posture. It can occur in catatonia and other neurologic or psychiatric conditions.

Synonyms:

Catalyst

A substance that increases the rate of a chemical reaction without being consumed, by lowering the activation energy (providing an alternative reaction pathway). Enzymes are biological catalysts (proteins or ribozymes). Catalysts do not alter the reaction equilibrium (ΔG), only the kinetics.

Synonyms:

Cataract

A cataract is an opacity or clouding of the crystalline lens that impairs the transmission of light to the retina, resulting in blurred vision, glare, decreased contrast sensitivity, and progressive vision loss, and it is the leading cause of preventable blindness worldwide.

Synonyms:

Catastrophic Aging

Rapid functional decline after stressor (illness, surgery, fall). Elderly have decreased reserve, less ability to recover. Prevention: comprehensive assessment, optimization, early intervention.

Synonyms:

Catatonia

A neuropsychiatric syndrome characterized by motor abnormalities including immobility, mutism, posturing, waxy flexibility, stereotypy, mannerisms, grunting, echolalia, and echopraxia. It can occur in

mood disorders, psychotic disorders, medical conditions, or as catatonia due to another medical condition.

Synonyms:

Catch-Up Immunization

Vaccination of a person who is behind the recommended schedule using age- and risk-appropriate intervals. Doses generally do not need to be restarted because of delay, but minimum ages and intervals must be respected.

Synonyms:

Catecholamine Crisis

Acute life-threatening elevation of catecholamines causing severe hypertension, tachycardia, and multi-organ dysfunction. Occurs in pheochromocytoma and paraganglioma precipitated by anesthesia, surgery, trauma, or medications that stimulate catecholamine release.

Synonyms:

Catecholamines (Urine/Plasma)

Measurement of catecholamines or their metabolites in blood or urine. These tests help evaluate suspected pheochromocytoma or paraganglioma, but results must be interpreted with medications, stress, sampling conditions, and clinical findings.

Synonyms: Urine/Plasma

Category I Fetal Heart Tracing

A normal fetal heart rate tracing by NICHD 2008 criteria. All three characteristics present: baseline 110-160 bpm, moderate variability (6-25 bpm), and no late or variable decelerations. May have accelerations. Category I tracings are associated with normal fetal acid-base status.

Synonyms:

Category II Fetal Heart Tracing

An indeterminate fetal heart rate tracing that falls between Category I and III.

Synonyms:

Category III Fetal Heart Tracing

An abnormal fetal heart rate tracing indicating potential fetal hypoxia or acidosis. Two specific patterns: (1) absent baseline variability with recurrent late decelerations, (2) absent baseline variability with recurrent variable decelerations, and (3) sinusoidal pattern.

Synonyms:

Catheter

Flexible tube for drainage or infusion. Types: urinary (Foley), intravenous, central venous, arterial. Materials: silicone, latex, PVC.

Synonyms:

Catheter-Associated UTI

Urinary tract infection related to indwelling urinary catheter. Most common healthcare-associated infection. Risk: prolonged catheterization, female sex, diabetes, immunosuppression. Prevention: avoid unnecessary catheters, aseptic insertion, closed drainage, daily hygiene, early removal.

Synonyms:

Catheter-Related Infections

Infections caused by microorganisms entering along or contaminating an intravascular or other indwelling catheter. They may cause local inflammation or bloodstream infection; removal or replacement and antimicrobial treatment depend on the catheter and severity.

Synonyms:

Catheterization (Urinary)

Insertion of a flexible tube (catheter) through the urethra or suprapubically into the urinary bladder to drain urine. Types: Foley catheter (indwelling balloon catheter), intermittent (in-out) catheter, and suprapubic catheter.

Synonyms: Urinary

Cauda Equina Syndrome

A neurosurgical emergency caused by compression of the cauda equina nerve roots below the level of the conus medullaris (typically at L1-L2 and below),

resulting in bilateral lower extremity weakness, sensory loss, and bladder and bowel dysfunction.

Synonyms:

Caudal

Positioned toward the tail or lower part of the body.

Synonyms:

Cauliflower Ear

A permanent deformity of the outer ear caused by blood or fluid collecting between the cartilage and its covering, usually after blunt trauma or repeated friction. Untreated separation can deprive cartilage of blood supply and produce a thickened, irregular ear. Prompt drainage and compression reduce the risk of deformity.

Synonyms:

Cause of Death

The specific disease, injury, or toxic agent responsible for initiating the lethal physiological sequence leading directly to death (e.g., Gunshot wound to the head, Acute myocardial infarction).

Synonyms:

Cavernous Sinus Thrombosis

Life-threatening septic thrombosis of the cavernous sinus, usually a complication of mid-face, nasal, paranasal sinus (sphenoid, ethmoid), dental, or orbital infection spreading through the valveless ophthalmic veins.

Synonyms:

CD4 Count

The number of CD4-positive T-helper lymphocytes in a blood sample. It helps assess immune function and risk of opportunistic infection in people with HIV, but interpretation depends on trends, viral load, clinical findings, and current treatment guidance.

Synonyms:

CD4-Positive T Cell

A T lymphocyte that recognizes peptide presented by major histocompatibility complex class

II molecules. Its differentiated subsets coordinate immune responses, including macrophage activation, B-cell help, mucosal defense, and immune regulation.

Synonyms:

CD8-Positive T Cell

A T lymphocyte that recognizes peptide presented by major histocompatibility complex class I molecules. Cytotoxic CD8-positive cells can induce apoptosis in infected, malignant, or otherwise altered target cells.

Synonyms:

CEA (Carcinoembryonic Antigen)

A blood tumor marker used mainly to monitor selected colorectal and other cancers. Levels can be affected by smoking, benign disease, and other malignancies; changes are interpreted with imaging, symptoms, and the clinical context rather than a single cutoff.

Synonyms: Carcinoembryonic Antigen

Cecal volvulus

Axial twisting of the cecum and ascending colon around its mesentery, accounting for approximately one-third of colonic volvulus cases. It presents with acute or subacute large bowel obstruction, abdominal pain, and distension. Diagnosis is by CT scan showing the characteristic whirl sign and a massively dilated cecum.

Synonyms:

Cecum

First and widest large intestinal part in the right iliac fossa below the ileocecal valve, a blind-ended pouch approximately 6 cm long. Appendix arises from its posteromedial wall approximately 2 cm below the valve, containing abundant lymphoid tissue. Cecal volvulus causes large bowel obstruction.

Synonyms:

Ceftazidime-avibactam

A combination of the third-generation cephalosporin ceftazidime with the non-beta-lactam beta-

lactamase inhibitor avibactam. Avibactam inhibits class A, class C, and some class D beta-lactamases, including KPC carbapenemases. This combination has activity against many carbapenem-resistant Enterobacteriaceae and *Pseudomonas aeruginosa*.

Synonyms:

Celiac Artery

The first major ventral branch of the abdominal aorta at T12, arising from the aorta just below the diaphragm and supplying the foregut (stomach, proximal duodenum, liver, gallbladder, spleen, pancreas). It trifurcates into the left gastric, splenic, and common hepatic arteries, with rich collateral circulation between these branches.

Synonyms:

Celiac Crisis

Acute life-threatening presentation of celiac disease characterized by severe dehydration, electrolyte imbalances, metabolic acidosis, hypocalcemic tetany, and hypovolemic shock. Most commonly occurs in infants and young children after a viral illness or introduction of gluten-containing foods.

Synonyms:

Celiac Disease

An immune-mediated enteropathy triggered by gluten ingestion in genetically predisposed individuals (HLA-DQ2/DQ8). Gliadin peptides from wheat, barley, and rye activate an autoimmune response against tissue transglutaminase (tTG), causing villous atrophy, crypt hyperplasia, and intraepithelial lymphocytosis in the small intestine.

Synonyms:

Celiac Trunk

First major abdominal aortic branch at T12-L1, the foregut artery. Divides into left gastric (lesser curvature), splenic (spleen, pancreas, greater curvature), and common hepatic (proper hepatic/gastroduodenal) arteries. Surrounded by the celiac plexus.

Synonyms:

Celiac Trunk Stenosis

Narrowing of the celiac trunk typically caused by extrinsic compression from the median arcuate ligament of the diaphragm, known as median arcuate ligament syndrome or celiac artery compression syndrome. Causes chronic abdominal pain particularly after eating and weight loss due to postprandial mesenteric ischemia.

Synonyms:

Cell

The fundamental structural and functional unit of all living organisms. Human cells are eukaryotic, characterized by a nucleus containing DNA and membrane-bound organelles.

Synonyms:

Cell-Free Fetal DNA Screening

A prenatal screening test that analyzes placental cell-free DNA in maternal blood to estimate the chance of selected chromosomal conditions. It is usually offered from early pregnancy onward. It is a screening test, not a diagnostic test, and a positive or inconclusive result requires appropriate counseling and follow-up.

Synonyms:

Cell-mediated immunity

An immune response mediated mainly by T lymphocytes and other cells rather than by antibodies. It is important in defense against intracellular pathogens and in immune surveillance.

Synonyms:

Cellular Adaptation

Cellular adaptations are reversible changes in cell morphology and function that occur in response to altered physiological demands or mild pathological conditions.

Synonyms:

Cellular Swelling

An early manifestation of reversible injury caused by failure of ATP-dependent ion pumps and intracellular accumulation of sodium and water. It is also

called hydropic change and is often most apparent in cells exposed to ischemia or toxins.

Synonyms: hydropic change.

Cellulitis

An acute, spreading bacterial infection of the deep dermis and subcutaneous tissue, most commonly caused by beta-hemolytic streptococci (particularly *Streptococcus pyogenes*) or *Staphylococcus aureus*.

Synonyms:

Cemento-Enamel Junction

Junction between enamel and cementum. Three relationships: butt junction, enamel overlapping cementum, cementum overlapping enamel.

Synonyms:

Cementum

A mineralized connective tissue covering the tooth root. It provides attachment for periodontal-ligament fibers and is thinner near the cemento-enamel junction and thicker toward the root apex.

Synonyms:

Centenarian

Person aged 100 or older. 100,000 worldwide. More women than men (4:1). Often maintain functional independence, cognitive function. Models for healthy aging research.

Synonyms:

Central

Located near or toward the middle of the body or an organ.

Synonyms:

Central Auditory Processing Disorder

Impaired processing of auditory information by the central nervous system despite adequate peripheral hearing. It may cause difficulty understanding speech, especially in noise, and can affect learning and communication.

Synonyms:

Central Deafness

Loss or severe impairment of hearing caused by disease of the auditory pathways or auditory cortex in the brain, rather than by a disorder of the external, middle, or inner ear.

Synonyms:

Central Diabetes Insipidus

Excessive urination and thirst caused by deficient secretion of antidiuretic hormone from the hypothalamus or posterior pituitary. The kidneys cannot appropriately concentrate urine, producing hypernatremia if water intake is insufficient.

Synonyms:

Central Line Placement

Insertion of a catheter into a central vein (internal jugular, subclavian, or femoral), with the tip in the superior (or inferior) vena cava. Ultrasound guidance is standard. Indications: administration of vasopressors, TPN, chemotherapy, long-term antibiotics, central venous pressure monitoring, hemodialysis, and plasmapheresis.

Synonyms:

Central Line-Associated Bloodstream Infection

Bloodstream infection associated with central venous catheter. Prevention: maximal sterile barriers, chlorhexidine skin preparation, optimal site selection (subclavian preferred), daily review of line necessity. Diagnosis: paired blood cultures (peripheral and line). Treatment: antibiotics, catheter removal if possible.

Synonyms:

Central Nervous System

The part of the nervous system comprising the brain and spinal cord, enclosed within the skull and vertebral column.

Synonyms:

Central pontine myelinolysis

A form of osmotic demyelination syndrome caused by overly rapid correction of hyponatremia, lead-

ing to demyelination of the central pons. Clinical features include flaccid quadriparesis, pseudobulbar palsy, dysarthria, dysphagia, and in severe cases locked-in syndrome.

Synonyms:

Central Retinal Artery Occlusion

Acute obstruction of the central retinal artery causing sudden, usually painless, severe monocular visual loss. It is an ocular stroke and requires urgent systemic and vascular evaluation because it may signal a high risk of cerebral ischemia.

Synonyms:

Central Serous Chorioretinopathy

Accumulation of serous fluid beneath the neurosensory retina, usually in the macular region, due to altered choroidal vascular permeability and retinal pigment-epithelium dysfunction. It often causes acute or subacute central visual distortion and may be associated with corticosteroid exposure.

Synonyms:

Central Sleep Apnea

Apneas from variability in respiratory effort without airway obstruction. Associated with heart failure (Cheyne-Stokes respiration), high altitude, and opioid use.

Synonyms:

Central Venous Catheter

A catheter whose tip terminates in a central vein, usually the lower superior vena cava or cavoatrial junction. It provides reliable access for vasoactive drugs, irritating infusions, hemodynamic monitoring, and prolonged therapy, but may cause bloodstream infection, thrombosis, or mechanical complications.

Synonyms:

Central Venous Pressure

Pressure measured in or near the right atrium, usually through a central venous catheter. It reflects right-sided filling conditions but is affected by ventilation, heart function, vascular tone, and measure-

ment technique; it should not be used alone to guide fluid treatment.

Synonyms:

Centriacinar Emphysema

A subtype of emphysema in which destruction begins in the respiratory bronchioles and extends peripherally. It predominantly affects the upper lobes and is strongly associated with cigarette smoking. It is the most common form of emphysema and often coexists with chronic bronchitis.

Synonyms:

Centrifuge

Spins samples to separate components by density. Used for blood processing, urine analysis, tissue preparation. Speed: RPM or RCF.

Synonyms:

Cephalalgia

Headache or pain in the head, including pain arising from cranial or related structures. It is a symptom with many possible primary and secondary causes.

Synonyms:

Cephalhaematoma

A collection of blood between the periosteum and the skull bone, caused by rupture of blood vessels during childbirth, most commonly associated with ventouse (vacuum) delivery. Unlike caput succedaneum, a cephalhaematoma does not cross suture lines and is limited by the periosteal attachments.

Synonyms:

Cephalohematoma

A collection of blood beneath the periosteum of a newborn's skull, usually caused by birth trauma. It is confined by suture lines and generally resolves gradually.

Synonyms:

Cephalopelvic Disproportion

A mismatch between the size or shape of the maternal pelvis and the fetal head that prevents or impedes vaginal delivery. It may be suspected from

clinical assessment but cannot always be diagnosed reliably before labor.

Synonyms:

Cephalosporin

A class of beta-lactam antibiotics derived from the fungus *Cephalosporium acremonium*, with a mechanism identical to penicillins — inhibition of bacterial cell wall synthesis by binding to penicillin-binding proteins and inhibiting transpeptidase. Cephalosporins are classified into five generations based on their antimicrobial spectrum.

Synonyms:

Ceramide

A sphingolipid composed of a sphingoid base linked to a fatty acid. Ceramides are structural components of cell membranes and the epidermal permeability barrier and also participate in cell signaling.

Synonyms:

Cerclage

A surgical placement of a suture around the cervix to prevent preterm delivery in patients with cervical insufficiency. Types include transvaginal (McDonald or Shirodkar) and transabdominal. Usually placed at 12-14 weeks gestation and removed at 36-37 weeks.

Synonyms:

Cerebellar Ataxia

A neurological sign characterized by impaired coordination of voluntary movements, resulting from dysfunction of the cerebellum or its connections. The cerebellum coordinates the timing, force, and accuracy of movements, and cerebellar dysfunction produces a characteristic constellation of findings.

Synonyms:

Cerebellar tumor

A neoplasm involving the cerebellum that may cause ataxia, dysmetria, nystagmus, vomiting, or hydrocephalus.

Synonyms:

Cerebellitis

Inflammation of the cerebellum, often after infection and sometimes associated with an autoimmune response. It may produce ataxia, dysarthria, nystagmus, headache, and altered consciousness.

Synonyms:

Cerebellopontine Angle

The angle-shaped region at the junction of the cerebellum, pons, and petrous temporal bone. Lesions in this space may affect cranial nerves and commonly include vestibular schwannoma.

Synonyms:

Cerebellopontine Angle Tumor

Lesion at the cerebellopontine angle (CPA), an anatomic space between the cerebellum and pons, medial to the temporal lobe and lateral to the brainstem, containing CN V (trigeminal), VII (facial), VIII (vestibulocochlear), and the anterior inferior cerebellar artery (AICA).

Synonyms:

Cerebellum

Largest brain portion (approximately 10 percent of volume but over 50 percent of neurons) in the posterior cranial fossa behind the brainstem. Two hemispheres and a vermis, divided into vestibulocerebellum (balance, eye movements), spinocerebellum (posture, gait, coordination), and cerebrocerebellum (motor planning, cognition).

Synonyms:

Cerebral Amyloid Angiopathy

Deposition of amyloid beta in the walls of small and medium cerebral and leptomeningeal arteries. It commonly causes recurrent lobar intracerebral hemorrhage in older adults and may also cause transient focal neurological episodes or cognitive decline.

Synonyms:

Cerebral Aneurysm

An abnormal focal enlargement of an artery in or around the brain. It may remain asymptomatic or

rupture and cause subarachnoid hemorrhage. Risk factors include hypertension, smoking, certain inherited disorders, and family history.

Synonyms:

Cerebral Angiography

Contrast imaging of cerebral vessels. Evaluates aneurysms, AVMs, stenosis. Invasive procedure.

Synonyms:

Cerebral Arteriovenous Malformation

An abnormal direct connection between cerebral arteries and veins without a normal capillary bed. It may cause intracranial hemorrhage, seizures, headache, or focal neurological deficits and is evaluated with brain imaging and angiography.

Synonyms:

Cerebral Autoregulation

The intrinsic ability of cerebral arterioles to maintain relatively stable cerebral blood flow across a range of perfusion pressures. It may be impaired by severe brain injury, ischemia, hypercapnia, or anesthetic and vasoactive drugs.

Synonyms:

Cerebral cavernous malformations

Low-flow vascular malformations composed of dilated, thin-walled capillaries without intervening brain parenchyma, often multiple and familial (autosomal dominant with mutations in CCM1, CCM2, or CCM3 genes). They may present with seizures, focal neurological deficits, or intracerebral hemorrhage.

Synonyms:

Cerebral Cortex

The outermost layer of the cerebrum, composed of gray matter (neuronal cell bodies) folded into gyri (ridges) and sulci (grooves), greatly increasing surface area.

Synonyms:

Cerebral Edema

The accumulation of excess fluid within the brain

parenchyma, leading to increased intracranial pressure and potentially fatal brain herniation. There are three main types with different pathophysiological mechanisms.

Synonyms:

Cerebral Hemorrhage

Bleeding within the brain parenchyma, a type of hemorrhagic stroke causing mass effect, edema, and neurological deficits. Causes: hypertension (most common—basal ganglia, thalamus), cerebral amyloid angiopathy (lobar, elderly), arteriovenous malformation, aneurysm, anticoagulants, trauma, tumors.

Synonyms:

Cerebral Hypoxia

Insufficient oxygen delivery to the brain, caused by cardiac arrest, respiratory failure, severe hypotension, or another interruption of oxygen supply. Prolonged hypoxia can produce permanent neuronal injury and hypoxic-ischemic encephalopathy.

Synonyms:

Cerebral Infarction

Cerebral infarction, or ischemic stroke, results from occlusion of a cerebral artery causing irreversible neuronal damage. The most common cause is thromboembolism from atherosclerotic carotid or intracranial arteries, or cardioembolism from atrial fibrillation or cardiac thrombus.

Synonyms:

Cerebral Lobes

Four lobes divided by sulci. Frontal (anterior to central sulcus): executive function, motor control (precentral gyrus), Broca's area. Parietal (between central and parieto-occipital sulci): somatosensory (postcentral gyrus), spatial awareness. Temporal (below lateral sulcus): auditory processing, memory (hippocampus), Wernicke's area.

Synonyms:

Cerebral Palsy

A group of permanent disorders of movement and

posture development causing activity limitation, attributed to non-progressive disturbances occurring in the developing fetal or infant brain. It is the most common motor disability in childhood, affecting approximately 1 in 500 live births.

Synonyms:

Cerebral Peduncle

Paired structures of the ventral midbrain carrying descending motor tracts (corticospinal, corticobulbar, corticopontine) connecting the cerebrum to the pons and below. Lesions produce contralateral hemiparesis; Weber syndrome (peduncle + CN III) causes ipsilateral CN III palsy with contralateral hemiparesis.

Synonyms:

Cerebral Perfusion Pressure

The pressure gradient driving blood flow through the brain, approximated as mean arterial pressure minus intracranial pressure. CPP falls when systemic pressure decreases or ICP rises and must be interpreted with the clinical context.

Synonyms:

Cerebral Salt Wasting

Renal sodium wasting causing hyponatremia and volume depletion occurring after intracranial surgery or in setting of intracranial disease. Distinguished from SIADH by the presence of volume depletion with negative sodium balance and compensatory elevation of renin and aldosterone.

Synonyms:

Cerebral tumor

A neoplasm arising within or involving the brain, producing symptoms according to its location, growth rate, and effect on intracranial pressure.

Synonyms:

Cerebral Venous Sinus Thrombosis

Thrombosis of the cerebral venous sinuses (most commonly the superior sagittal sinus; also transverse, sigmoid, straight; or cortical veins), with resultant venous hypertension, intracranial hyper-

tension, hemorrhagic cortical infarcts, and venous congestion.

Synonyms:

Cerebral Visual Impairment

Visual impairment caused by damage to the brain's visual pathways or occipital cortex rather than the eye itself; the leading cause of childhood visual impairment in developed countries. Features include poor visual attention, difficulty recognizing faces or objects, and variable vision; management is educational and rehabilitative.

Synonyms:

Cerebriform nevus sebaceous

A variant of nevus sebaceous presenting as a soft, cerebriform (brain-like), pedunculated or sessile nodule, often found on the scalp or face. It is a benign adnexal hamartoma composed of sebaceous glands, but like other nevus sebaceous lesions, it carries a low risk of secondary neoplasms and may warrant monitoring or excision.

Synonyms:

Cerebritis

Inflammatory process in brain parenchyma without abscess formation. May precede abscess. Causes: bacterial, fungal, parasitic infections. Diagnosis: MRI with contrast showing enhancement. Treatment: antibiotics/antifungals, surgical drainage if abscess forms.

Synonyms:

Cerebroplacental Ratio

The ratio of the middle cerebral artery (MCA) pulsatility index to the umbilical artery (UA) pulsatility index. CPR <5th percentile (or <1.0-1.1) suggests fetal brain-sparing effect (vasodilation of cerebral vessels in response to hypoxemia) due to placental insufficiency.

Synonyms:

Cerebrospinal Fluid

A clear, colorless fluid that fills the ventricles of the brain, the central canal of the spinal cord, and

the subarachnoid space around the brain and spinal cord. Produced primarily by the choroid plexus of the lateral, third, and fourth ventricles (500 mL/day, total volume 150 mL in adults).

Synonyms:

Cerebrospinal Fluid Analysis

Laboratory examination of cerebrospinal fluid, usually obtained by lumbar puncture. It may assess infection, bleeding, inflammation, demyelinating disease, or malignant cells. Analysis can include opening pressure, appearance, cell counts, protein, glucose, microbiology, and other tests selected for the clinical question.

Synonyms:

Cerebrovascular Accident

An acute neurological deficit caused by interruption of blood flow to the brain or bleeding within the brain. See Stroke.

Synonyms:

Cerebrovascular Accident (Stroke)

Sudden brain dysfunction caused by interrupted blood flow or bleeding in the brain. See Stroke.

Synonyms: Stroke

Cerebrum

The largest part of the brain, comprising two cerebral hemispheres connected by the corpus callosum. Each hemisphere has four lobes: frontal (executive function, motor, Broca's area), parietal (somatosensory, spatial awareness), temporal (auditory, memory, Wernicke's area), occipital (visual processing).

Synonyms:

Ceruloplasmin

The principal copper-carrying protein in blood, synthesized mainly by the liver. Its concentration and copper-binding function are clinically relevant in disorders such as Wilson disease.

Synonyms:

Cerumen

A substance that helps keep dirt out of the ear

and lubricates the skin in the ear. More commonly known as earwax.

Synonyms:

Cerumen Impaction

Accumulation of earwax in the external auditory canal that causes symptoms or prevents visualization of the tympanic membrane. It may cause aural fullness, conductive hearing loss, tinnitus, itching, or pain.

Synonyms:

Cervical Cancer

A malignant tumour arising from the cervix, most commonly caused by persistent infection with high-risk human papillomavirus. It may be asymptomatic early or cause abnormal vaginal bleeding, discharge, or pelvic pain; prevention and early detection rely on HPV vaccination, screening, and assessment of abnormal results.

Synonyms:

Cervical carcinoma

A malignant tumor of the uterine cervix, most commonly associated with persistent high-risk human papillomavirus infection.

Synonyms:

Cervical Cerclage

Surgical placement of a non-absorbable suture around the cervix to provide mechanical support and prevent preterm delivery in patients with cervical insufficiency.

Synonyms:

Cervical Dilatation

Progressive opening of the cervical os during labor, measured in centimeters from 0 (closed) to 10 cm (fully dilated). The cervix must also efface (thin out) before significant dilatation occurs. Cervical status assessed by digital vaginal examination during labor.

Synonyms:

Cervical Dilation

The opening of the cervical canal during labor, mea-

sured in centimeters from closed (0 cm) to fully dilated (10 cm); required for vaginal delivery. Occurs with effacement (thinning/shortening of the cervix) during the first stage of labor, driven by effective uterine contractions.

Synonyms:

Cervical Disc Herniation

A common cause of neck pain and radiculopathy, occurring when the nucleus pulposus of an intervertebral disc in the cervical spine herniates through the annulus fibrosus, compressing adjacent nerve roots or the spinal cord.

Synonyms:

Cervical Dysplasia

Abnormal growth of cervical epithelial cells, representing a premalignant condition that may progress to cervical cancer if untreated. Also known as cervical intraepithelial neoplasia (CIN). CIN is caused by persistent infection with high-risk human papillomavirus (HPV) types, most commonly HPV 16 and 18.

Synonyms: cervical intraepithelial.

Cervical Dystonia

A focal movement disorder causing involuntary contractions of neck muscles and abnormal positioning of the head. It may produce pain, tremor, and sustained or intermittent twisting of the neck.

Synonyms:

Cervical Effacement

Thinning and shortening of the cervix during labor, measured as a percentage from 0% (thick, normal length) to 100% (paper thin). Effacement precedes and accompanies cervical dilatation. Nulliparous women often efface before dilating; multiparous women may efface and dilate simultaneously.

Synonyms:

Cervical Exam in Labor

A digital vaginal examination used to assess cervical dilation, effacement, consistency, and position, together with the station and position of the fetal head.

Serial examinations help assess labor progress.

Synonyms:

Cervical Incompetence

The inability of the cervix to maintain pregnancy in the second trimester due to painless cervical dilatation. Results in recurrent second trimester pregnancy loss or preterm delivery. Risk factors include prior cervical trauma, cone biopsy, and congenital anomalies.

Synonyms:

Cervical Length Screening

Transvaginal ultrasound measurement of the cervix between 18-24 weeks to assess risk of spontaneous preterm birth. Normal cervix measures greater than 25 mm. Short cervix (less than 25 mm) increases preterm delivery risk. Cervical funneling and dilatation are additional concerning findings.

Synonyms:

Cervical Mucus

Secretions from the cervical glands that change throughout the menstrual cycle under hormonal influence. Estrogen produces thin, clear, stretchy mucus favorable for sperm transport around ovulation (spinnbarkeit). Progesterone produces thick, sticky, opaque mucus that forms a plug in the cervical canal during pregnancy.

Synonyms:

Cervical Polyps

Usually benign, finger-like growths arising from the endocervical canal or cervix. They may cause irregular bleeding, postcoital bleeding, or vaginal discharge and are often found during a pelvic examination. Symptomatic or atypical polyps are removed and sent for pathology.

Synonyms:

Cervical Pregnancy

A rare ectopic pregnancy (0.1-1%) implanted in the cervical canal. Presents with painless vaginal bleeding in the first trimester. Diagnosis: ultrasound (hourglass-shaped uterus, gestational sac in

the cervix with absent sliding sign, empty uterine cavity). High risk of severe hemorrhage.

Synonyms:

Cervical Radiculopathy

A condition caused by compression, irritation, or inflammation of a spinal nerve root in the cervical spine, resulting in pain, numbness, tingling, and weakness in the distribution of the affected nerve root.

Synonyms:

Cervical Rib

An extra rib arising from a cervical vertebra, usually the seventh. It may be asymptomatic or contribute to thoracic outlet syndrome by compressing the brachial plexus or subclavian vessels.

Synonyms:

Cervical Ripening Agents

Medicines or mechanical devices used to soften and prepare the cervix before labor induction. Options include prostaglandins and cervical balloons; selection and dosing depend on the cervix, pregnancy, contraindications, and local obstetric protocol.

Synonyms:

Cervical Screening (Pap Smear)

Screening for cervical cancer by collecting cells from the transformation zone of the cervix. Liquid-based cytology (ThinPrep) or conventional Pap smear. HPV co-testing (high-risk HPV 16, 18, others) improves sensitivity.

Synonyms: Pap Smear

Cervical Spine

The upper segment of the vertebral column consisting of seven cervical vertebrae, C1 through C7, supporting the head and protecting the cervical spinal cord. It permits substantial flexion, extension, rotation, and lateral flexion while transmitting the vertebral arteries through the transverse foramina of C1-C6.

Synonyms:

Cervical Spine Trauma

Injury to the cervical spine that may affect the vertebrae, discs, ligaments, spinal cord, or nerve roots. Evaluation includes the mechanism, examination, and appropriate imaging; classification systems can help guide treatment, which depends on stability and neurologic findings.

Synonyms:

Cervical spondyloarthropathy

A degenerative condition of the cervical spine involving disc degeneration, osteophyte formation, and facet joint arthropathy that may compress nerve roots or the spinal cord. It can cause neck pain, radiculopathy, or myelopathy, and is a common cause of cervical spinal stenosis in older adults.

Synonyms:

Cervical Spondylosis

Age-related degenerative changes of the cervical spine—disc degeneration, osteophyte formation, facet joint arthritis, and ligament hypertrophy—affecting the intervertebral discs, vertebrae, and joints.

Synonyms:

Cervical Vertebrae

The seven vertebrae of the neck. Typical cervical vertebrae have small bodies, bifid spinous processes, and transverse foramina transmitting the vertebral vessels; C1, C2, and C7 are specialized.

Synonyms:

Cervicitis

Inflammation of the uterine cervix, most commonly caused by sexually transmitted infections (*Chlamydia trachomatis* and *Neisseria gonorrhoeae*) but also by other organisms (*Mycoplasma genitalium*, *Trichomonas vaginalis*, herpes simplex virus), or non-infectious causes (chemical irritation, foreign body, allergy).

Synonyms:

Cervix

The lower, narrow part of the uterus that opens

into the vagina. The cervix is approximately 3-4 cm long in the non-pregnant state and consists of two parts: the ectocervix (visible portion protruding into the vagina, covered by stratified squamous epithelium) and the endocervical canal (lined by columnar epithelium).

Synonyms:

Cesarean Delivery

Surgical delivery of the fetus through abdominal and uterine incisions. Performed when vaginal delivery is contraindicated or fails. Indications include malpresentation, placenta previa, previous cesarean, fetal distress, and failed induction. Most common uterine incision is low transverse (classical for very preterm or transverse lie).

Synonyms:

Cesarean Section

C-section: surgical delivery of the infant through incisions in the abdominal wall and uterus. Indications: fetal distress, failure to progress, malpresentation (breech, transverse), placenta previa, abruption, previous cesarean (some), multiple pregnancy, preeclampsia, cord prolapse, and maternal conditions.

Synonyms:

Cesarean Section (C-section)

Surgical delivery of a fetus through incisions in the abdominal wall (laparotomy) and uterus (hysterotomy).

Synonyms: C-section

Cestodiasis

Infection or infestation caused by cestodes, commonly called tapeworms. Disease may involve the intestine or tissues, depending on the species and life-cycle stage.

Synonyms: tapeworms.

CFTR Modulator Therapy

Targeted therapies correcting the defective CFTR protein. Elexacaftor-tezacaftor-ivacaftor (Trikafta) is the most effective combination for patients with

at least one F508del mutation. These therapies have dramatically changed CF prognosis.

Synonyms:

Chagas Disease

A parasitic infection caused by *Trypanosoma cruzi*, transmitted by reduviid bugs (kissing bugs), endemic in Latin America. Acute phase: fever, swelling at bite site (chagoma), Romana sign (peri-orbital edema). Chronic phase (years later): Chagas cardiomyopathy (most common and serious), megaeosophagus, and megacolon.

Synonyms:

Chagoma

A localized inflammatory lesion at the site where *Trypanosoma cruzi* enters the body. It is an early manifestation of Chagas disease and may be accompanied by regional lymphadenopathy.

Synonyms:

Chain of Custody

Meticulous paper trail and chronological documentation tracking the seizure, custody, control, transfer, analysis, and disposition of physical and electronic evidence in medico-legal investigations (e.g., blood samples for toxicology, bullets, sexual assault kits, biological fluids).

Synonyms:

Chalazion

A chronic, non-infectious granulomatous inflammation of a meibomian gland caused by duct obstruction. Presents as a firm, painless, well-circumscribed nodule in the eyelid, usually away from the lid margin. Different from a sty (which is acute and tender). Most resolve spontaneously over weeks to months.

Synonyms:

Chancre

A usually painless ulcer at the site of inoculation of an infection, especially the primary lesion of syphilis. It may be accompanied by regional lymph-node enlargement and heals without treatment, although

infection persists.

Synonyms:

Chancroid

A sexually transmitted infection caused by *Haemophilus ducreyi*, characterized by painful genital ulcers and tender inguinal lymphadenopathy (bubo). Ulcers are ragged, non-indurated, with purulent exudate and surrounding erythema. More common in men and in resource-limited settings. Associated with increased HIV transmission.

Synonyms:

Channelopathy

A disorder caused by abnormal structure or function of an ion channel or its regulatory proteins. Channelopathies can affect excitable tissues and cause neurologic, muscular, or cardiac disease.

Synonyms:

Charcoal

Fine black powder produced by controlled pyrolysis of organic materials, processed to yield a massive micro-porous surface area (500-1500 m²/g). See activated charcoal.

Synonyms:

Charcot Arthropathy

Progressive destruction and deformity of a joint caused by loss of protective pain or proprioceptive sensation. It is most often associated with peripheral neuropathy, particularly diabetic neuropathy.

Synonyms:

Charcot Foot

A progressive destructive arthropathy of the foot and ankle, usually occurring in people with peripheral neuropathy, especially diabetes. Repeated unnoticed trauma causes warmth, swelling, deformity, instability, and an increased risk of ulceration and amputation.

Synonyms:

Charcot Joint

Progressive, neurotrophic arthropathy caused by

loss of sensation (proprioception and pain) leading to joint destruction with bone fragmentation, joint dislocation, deformity, and loss of normal pain and proprioceptive sensation in the affected limb.

Synonyms:

Charcot Triad

Clinical constellation of fever, right upper quadrant pain, and jaundice representing the classic presentation of ascending cholangitis, infection of the biliary tree from common bile duct obstruction by a gallstone. The full triad is found in approximately fifty to seventy percent of patients.

Synonyms:

Charcot Triad (Cholangitis)

Classic diagnostic triad of acute ascending cholangitis: (1) Fever, (2) Right Upper Quadrant abdominal pain, and (3) Jaundice. Reynolds Pentad adds Hypotension and Altered Mental Status. See Acute Cholangitis.

Synonyms: Cholangitis

Charcot-Marie-Tooth Disease

Group of inherited peripheral neuropathies (hereditary motor and sensory neuropathy, HMSN), the most common inherited neuromuscular disorder (prevalence 1 in 2,500). More than 100 causative genes (PMP22, MPZ, GJB1, MFN2, NEFL).

Synonyms:

CHARGE Syndrome

A genetic disorder caused by CHD7 gene mutations (autosomal dominant, most cases de novo) affecting multiple organ systems.

Synonyms:

Checkpoint Inhibitor

A medicine that blocks an inhibitory immune-checkpoint pathway, helping selected immune cells recognize and attack tumor cells. Examples target PD-1, PD-L1, or CTLA-4.

Synonyms:

Checkpoints

Immune regulatory molecules. Cancer exploits checkpoints. Inhibitors block checkpoints.

Synonyms:

Chediak-Higashi Syndrome

Autosomal recessive (LYST mutation, lysosomal trafficking regulator). Giant lysosomal granules in neutrophils, melanocytes, neurons. Partial oculocutaneous albinism, silvery hair, photophobia, nystagmus.

Synonyms:

Cheilectropion

An eversion deformity of the lip, usually involving the lower lip. It may result from scarring, congenital malformation, or loss of tissue support.

Synonyms:

Cheilitis

Inflammation of one or both lips, causing dryness, scaling, fissuring, erythema, swelling, pain, or ulceration. Causes include irritant or allergic contact exposure, infection, nutritional deficiency, chronic sun exposure, and inflammatory skin disease; persistent lesions require evaluation for premalignant or malignant change.

Synonyms:

Cheiloplasty

Plastic or reconstructive surgery of the lip, performed to repair congenital clefting, trauma, tumors, scars, or other deformity.

Synonyms:

Cheiloschisis

Cleft lip, a congenital fissure of the upper lip caused by incomplete fusion of facial processes during embryonic development. It may occur alone or with cleft palate.

Synonyms:

Cheilosis

A disorder of the lips characterized by dryness, scaling, fissuring, or inflammation. Causes include irri-

tation, nutritional deficiency, infection, and systemic disease.

Synonyms:

Cheiopompholyx

A form of dyshidrotic eczema affecting the hands, with intensely itchy small vesicles on the palms or sides of the fingers.

Synonyms:

Chelation

The formation of a stable complex between a metal ion and a molecule with multiple binding sites. In medicine, chelation can be used under supervision to bind and promote elimination of selected toxic metals.

Synonyms:

Chelation Study

Nuclear medicine study using chelating agents. Evaluates renal function, obstruction.

Synonyms:

Chelation Therapy

Use of chelating agents to bind metals for excretion. Agents: EDTA (lead), deferoxamine (iron), dimercaprol (arsenic, mercury, gold), DMSA (lead, mercury), penicillamine (copper, lead). Complications: nephrotoxicity, electrolyte disturbances, redistribution of metals.

Synonyms:

Chemical Eye Injury

Ocular damage caused by exposure to an acidic or alkaline substance. Immediate copious irrigation, removal of particulate material, measurement of ocular-surface pH, and urgent ophthalmic assessment are required; alkali injuries may penetrate deeply and continue to worsen after exposure.

Synonyms:

Chemical Injury

Tissue damage from corrosive substances. Acid burns: coagulation necrosis, eschar formation. Alkali burns: liquefaction necrosis, deeper penetration.

Management: copious irrigation, remove contaminated clothing, assess for airway involvement.

Synonyms:

Chemical Peels

Chemical peels use acids to exfoliate skin layers. Superficial peels (glycolic acid 20 to 70 percent, salicylic acid 20 to 30 percent) affect the epidermis. Medium peels (trichloroacetic acid 35 to 50 percent) reach the papillary dermis. Deep peels (phenol 88 percent) reach the reticular dermis.

Synonyms:

Chemical Pneumonitis

Inflammation and lung injury caused by inhalation or aspiration of irritating chemicals, gastric contents, hydrocarbons, or other toxic substances. It may cause cough, dyspnea, hypoxemia, wheezing, and diffuse pulmonary infiltrates.

Synonyms:

Chemodectoma

A tumor arising from paraganglionic tissue, especially a carotid-body tumor. It is usually slow-growing and may compress nearby cranial nerves or vessels.

Synonyms:

Chemoembolization

A procedure that combines delivery of an antineoplastic agent with embolization of the blood supply to a tumor, most commonly for selected liver cancers.

Synonyms:

Chemokine

A family of small secreted cytokines that direct leukocyte migration (chemotaxis) to sites of infection, inflammation, and tissue repair. Classified by cysteine motif: CXC (e.g., IL-8/CXCL8, recruit neutrophils), CC (e.g., MCP-1/CCL2, attract monocytes), C, and CX3C.

Synonyms:

Chemokinesis

Nonspecific stimulation of cell movement by a chemical substance, without directional movement toward or away from a concentration gradient.

Synonyms:

Chemophobia

An excessive or irrational fear of chemicals, sometimes associated with anxiety or obsessive concerns about contamination or toxicity.

Synonyms:

Chemoprevention

The use of drugs or natural agents to prevent, delay, or reverse cancer development, e.g., tamoxifen or raloxifene in high-risk breast cancer, HPV and hepatitis B vaccination, and aspirin in colorectal cancer.

Synonyms:

Chemoradiation

The concurrent combination of chemotherapy and radiation therapy, used to treat locoregionally advanced cancers such as anal, cervical, head and neck, esophageal, and limited-stage small cell lung cancer.

Synonyms:

Chemoreceptor

A sensory receptor that responds to changes in blood or CSF chemistry, involved in respiratory and cardiovascular regulation.

Synonyms:

Chemoreceptor Trigger Zone

A region near the floor of the fourth ventricle that detects emetic stimuli in blood and cerebrospinal fluid and helps initiate vomiting.

Synonyms:

Chemoresistance

Reduced or absent responsiveness of cells, especially tumor cells, to a chemical treatment that would ordinarily inhibit or destroy them.

Synonyms:

Chemosenstivity

The degree to which cells or a tumor respond to a chemical treatment. Testing may be used experimentally or clinically to help characterize treatment response.

Synonyms:

Chemosis

Edema of the conjunctiva, producing a swollen, often translucent or blister-like appearance. It may occur with allergy, infection, inflammation, trauma, or orbital disease.

Synonyms:

Chemotaxis

Directed movement of a cell or organism toward or away from a chemical stimulus. It is important in immune-cell recruitment and inflammatory responses.

Synonyms:

Chemotherapy

Use of cytotoxic drugs to treat cancer. Mechanisms: DNA damage, microtubule inhibition, antimetabolite action. Common agents: alkylating agents, anthracyclines, taxanes, platins, antimetabolites. Side effects: myelosuppression, nausea, alopecia.

Synonyms:

Chemotherapy Extravasation

Leakage of an intravenous anticancer drug into surrounding tissue. Vesicant extravasation can cause severe local injury, so infusion must stop immediately while the catheter is managed and drug-specific antidote and surgical guidance are obtained.

Synonyms:

Cherry Angioma

A common benign proliferation of small dermal blood vessels that appears as a bright-red to purple papule, usually on the trunk or limbs. Lesions may bleed after trauma but generally require no treatment unless diagnosis is uncertain or removal is desired.

Synonyms:

Cherry Eye

Prolapse of the gland of the third eyelid, producing a rounded red mass at the inner corner of the eye. The term is used especially in veterinary ophthalmology.

Synonyms:

Cherry-Red Spot

A striking fundoscopic finding in which the macula appears bright red against a pale, ischemic, or lipid-laden surrounding retina. Mechanism: the fovea centralis lacks inner retinal layers and receives blood supply from the underlying choroid, preserving its natural red color while adjacent edematous retina turns opaque white.

Synonyms:

Cherubism

A rare inherited disorder characterized by bilateral enlargement of the jaws from expansile giant-cell lesions, usually beginning in childhood and often regressing after puberty.

Synonyms:

Chest Pain

A cardinal symptom with cardiac and non-cardiac causes requiring urgent distinction. Cardiac: acute coronary syndrome (angina, MI), pericarditis, aortic dissection, myocarditis. Pulmonary: pulmonary embolism, pneumothorax, pneumonia, pleurisy. GI: GERD, esophageal spasm, peptic ulcer. Musculoskeletal and psychogenic causes also common.

Synonyms:

Chest Physiotherapy

Techniques to mobilize and clear secretions from the lungs, including postural drainage, percussion, vibration, and huffing. It is used in bronchiectasis, CF, and post-operative patients. Positive expiratory pressure devices and oscillating PEP devices are also used.

Synonyms:

Chest Tube Insertion

Placement of a thoracostomy tube in the safe triangle (latissimus dorsi, pectoralis major, nipple level)

to drain air, fluid, or blood from the pleural space. Connected to underwater seal drainage.

Synonyms:

Chest Tube Thoracostomy

Insertion of a tube into the pleural space to drain air, fluid, or blood. Indications: pneumothorax (large, tension, or on mechanical ventilation), hemothorax, pleural effusion (empyema, malignant, transudative), and postoperative (cardiac, thoracic surgery).

Synonyms:

Chest Wall

The musculoskeletal boundary of the thoracic cavity, formed by the skin, fascia, muscles, ribs, costal cartilages, sternum, thoracic vertebrae, and associated neurovascular structures. It protects the thoracic organs and participates in breathing through coordinated movement of the ribs and respiratory muscles.

Synonyms:

Chest Wall Deformity

Abnormalities of the chest wall that can affect lung function. Pectus excavatum (sunken sternum) may compress the heart and lungs. Pectus carinatum (protruding sternum) is usually cosmetic. Scoliosis can cause restrictive lung disease. These may require surgical correction if severe.

Synonyms:

Chest X-ray

Initial imaging for respiratory symptoms. PA and lateral views. Evaluates pneumonia, pneumothorax, pleural effusion, heart size, mediastinal masses. Limited sensitivity for early disease.

Synonyms:

Chewing

Mastication of food. Teeth, muscles, joints coordinated. Difficulties: dental pain, missing teeth, TMJ disorder.

Synonyms:

Cheyne-Stokes Respiration

Crescendo-decrescendo breathing pattern with peri-

ods of apnea, seen in heart failure and stroke. It is a form of central sleep apnea.

Synonyms:

Chiari I malformation

Downward displacement of the cerebellar tonsils through the foramen magnum, which may cause headache, neck pain, balance problems, or no symptoms.

Synonyms:

Chiari Malformation

Chiari malformations are structural abnormalities of the posterior fossa and cerebellum characterized by downward displacement of the cerebellar tonsils through the foramen magnum. Type I is the most common variant, defined as cerebellar tonsillar ectopia of five millimeters or more below the foramen magnum.

Synonyms:

Chiari-Frommel Syndrome

Persistent postpartum secretion of milk with absence of menstruation, associated with hyperprolactinemia after pregnancy. It is a form of galactorrhea-amenorrhea syndrome.

Synonyms:

Chickenpox

Primary infection with Varicella-Zoster Virus, characterized by pruritic, vesicular rash in different stages (macules, papules, vesicles, crusts). Highly contagious via respiratory droplets and contact with lesions. Incubation 10-21 days. Complications include secondary bacterial infection, pneumonia, encephalitis, and Reye syndrome.

Synonyms:

Chignon

A temporary swelling (edema) on the baby's scalp caused by the vacuum cap used during ventouse (vacuum) assisted delivery. The chignon forms as the vacuum creates negative pressure pulling the scalp tissue into the cup. It settles within 24-48 hours after birth without any treatment.

Synonyms:

Chikungunya

An acute mosquito-borne viral infection characterized by fever and often severe joint pain, with rash and other systemic symptoms in some patients.

Synonyms:

Chikungunya Fever

An acute febrile illness caused by chikungunya virus and transmitted primarily by *Aedes* mosquitoes. It typically causes abrupt fever, severe symmetrical polyarthralgia, myalgia, headache, and rash; joint symptoms may persist for months or longer, especially in older adults or people with pre-existing rheumatic disease.

Synonyms:

Chikungunya virus

A positive-sense RNA virus belonging to the *Togaviridae* family that causes fever and severe joint pain. The virus is transmitted by *Aedes* mosquitoes. Symptoms include fever, rash, and polyarthralgia that can be debilitating. Most patients recover fully, but some develop chronic joint pain lasting months to years.

Synonyms:

Chilblain

An inflammatory skin lesion caused by an abnormal response to cold and damp conditions. It produces itchy, red or violaceous swollen areas, usually on fingers, toes, ears, or nose.

Synonyms:

Child Abuse

Physical, sexual, or emotional harm or neglect of a child by a caregiver. Recognized by inconsistent histories, injury patterns inconsistent with mechanism, and behavioral indicators. Types: physical abuse, sexual abuse, neglect, and emotional abuse. Mandatory reporting requirements for healthcare providers.

Synonyms:

Child Neglect

The failure of a caregiver to provide adequate food, shelter, clothing, supervision, education, or medical care. The most common form of child maltreatment. Types: physical neglect, educational neglect, emotional neglect, and medical neglect. May result in failure to thrive, developmental delay, and chronic illness.

Synonyms:

Child Poisoning

Exposure of a child to a medicine, chemical, or other substance that may cause harm. Suspected poisoning requires prompt expert assessment.

Synonyms:

Child-Pugh Classification

Clinical scoring system assessing prognosis of chronic liver disease by evaluating five parameters: total bilirubin, serum albumin, international normalized ratio, ascites, and hepatic encephalopathy. Each parameter is scored one to three points.

Synonyms:

Childbirth

The process of giving birth, encompassing three stages: (1) First stage: from the onset of regular uterine contractions (cervical effacement and dilation) to full dilation (10 cm). See Parturition (Childbirth).

Synonyms:

Childhood Absence Epilepsy

An epilepsy syndrome beginning in childhood with frequent brief absence seizures, characterized by sudden impairment of awareness and a typical generalized spike-and-wave EEG pattern.

Synonyms:

Childhood Obesity

Excess body fat in a child or adolescent, assessed using age- and sex-specific body-mass-index percentiles. It reflects interacting genetic, behavioral, environmental, and medical factors and increases later cardiometabolic risk. Evaluation should be

non-stigmatizing and include growth pattern, nutrition, activity, sleep, and comorbidities.

Synonyms:

Chills

A subjective sensation of cold, often accompanied by shivering or piloerection, caused by hypothalamic thermoregulatory responses. Chills commonly occur during fever or infection but may also accompany exposure, endocrine or metabolic disturbance, medication effects, or acute systemic illness.

Synonyms:

Chimerism

The presence in one individual of cell populations derived from genetically different zygotes or sources. It may occur naturally, after transplantation, or through exchange of cells between a pregnant person and fetus.

Synonyms:

Chionablepsia

Temporary visual impairment caused by exposure to intense reflected light from snow or ice, commonly called snow blindness. It is usually related to ultraviolet injury of the cornea.

Synonyms: snow blindness.

Chlamydia

The most common reportable bacterial STI, caused by *Chlamydia trachomatis*. Often asymptomatic in women, causing cervicitis, urethritis, and pelvic inflammatory disease. Complications include tubal factor infertility and ectopic pregnancy. Diagnosis by nucleic acid amplification test. Treatment: azithromycin or doxycycline.

Synonyms:

Chlamydia trachomatis infection

A bacterial infection transmitted mainly through sexual contact. It may cause urethritis, cervicitis, pelvic inflammatory disease, proctitis, or no symptoms.

Synonyms:

Chlamydial pneumonia

Pneumonia caused by *Chlamydia* species, usually producing a gradual cough, fever, and malaise.

Synonyms:

Chlamydiosis

Infection caused by bacteria of the genus *Chlamydia*. Depending on the species and site, it may cause sexually transmitted infection, conjunctivitis, pneumonia, or other disease.

Synonyms:

Chlamydophila Pneumonia

Atypical pneumonia with mild presentation: sore throat, hoarseness, cough. Treatment is macrolides or tetracyclines.

Synonyms:

Chloasma

Patchy brown hyperpigmentation, especially of the face, associated with pregnancy, hormones, sun exposure, or other causes. It is commonly called melasma.

Synonyms: melasma.

Chloracne

An acne-like eruption caused by exposure to certain halogenated aromatic compounds, such as dioxins and related industrial chemicals.

Synonyms:

Chloramphenicol

A broad-spectrum antibiotic with activity against gram-positive and gram-negative organisms, as well as *Rickettsia*. Chloramphenicol inhibits bacterial protein synthesis by binding to the 50S ribosomal subunit. It is indicated for serious infections when other agents are not appropriate, including bacterial meningitis and typhoid fever.

Synonyms:

Chloranemia

Anemia in which the red blood cells are abnormally pale, usually because of reduced hemoglobin content, as in iron deficiency.

Synonyms:

Chloroleukemia

A rare form of myeloid leukemia associated with greenish tumor masses composed of myeloid cells, also called granulocytic sarcoma or chloroma.

Synonyms: granulocytic sarcoma or chloroma.

Chloroma

A greenish extramedullary mass of immature myeloid cells, usually associated with acute myeloid leukemia. It is also called granulocytic sarcoma or myeloid sarcoma.

Synonyms: granulocytic sarcoma or myeloid sarcoma.

Chloropsia

A visual disturbance in which objects appear green or have a greenish tint. It can occur with retinal disease, medication or toxin exposure, or other visual-pathway disorders.

Synonyms:

Choanal Atresia

A congenital obstruction of the posterior nasal passage (choana) due to failure of the buconasal membrane to rupture during embryogenesis. Bilateral choanal atresia presents as a respiratory emergency in the newborn, who is an obligate nasal breather — cyclic cyanosis that improves with crying.

Synonyms:

Choking

Airway obstruction caused by an object lodged in the pharynx or larynx, producing impaired ventilation. Complete obstruction can cause hypoxic brain injury and death within minutes; treatment depends on the patient's age, consciousness, and effectiveness of coughing.

Synonyms:

Cholangiitis

Inflammation of the bile ducts. It may be caused by infection, obstruction, autoimmune disease, or other biliary disorders.

Synonyms:

Cholangiocarcinoma

A malignant tumor arising from the biliary epithelium, classified based on anatomical location as intrahepatic, perihilar, or distal extrahepatic.

Synonyms:

Cholangiography

Contrast imaging of bile ducts. Intraoperative, percutaneous, or ERCP approach. Evaluates biliary obstruction, stones, strictures.

Synonyms:

Cholangitis

Bacterial infection of the biliary tree, most commonly caused by choledocholithiasis (common bile duct stones) obstructing bile flow, but also from biliary strictures, stent occlusion, and malignancy. The classic clinical presentation is Charcot triad: fever, right upper quadrant pain, and jaundice (present in 50-70 percent of cases).

Synonyms:

Cholecystectomy

Surgical removal of the gallbladder, usually by a laparoscopic approach when appropriate. It may be performed for symptomatic gallstones, acute cholecystitis, selected gallstone pancreatitis, or other gallbladder disease.

Synonyms:

Cholecystitis

Inflammation of the gallbladder, most commonly caused by obstruction of the cystic duct by a gallstone, which occurs in approximately 95 percent of cases. The obstruction leads to bile stasis, increased intraluminal pressure, and ischemia of the gallbladder wall, which may progress to bacterial infection.

Synonyms:

Cholecystography

Radiographic examination of the gallbladder, usually after administration of a contrast substance, to

assess its filling, concentration, and emptying.

Synonyms:

Cholecystokinin

CCK is a peptide hormone produced by I-cells in the duodenal and jejunal mucosa in response to fatty acids (long-chain fatty acids are the most potent stimuli) and amino acids in the chyme.

Synonyms:

Choledochal Cyst

Congenital dilatation of the biliary tree classified into five types according to the Todani classification. Type I involving dilation of the common bile duct is the most common. Presents with the classic triad of abdominal pain, jaundice, and palpable mass though all three are present in less than twenty percent of cases.

Synonyms:

Choledocholithiasis

The presence of gallstones within the common bile duct, occurring in approximately 10-20 percent of patients with cholelithiasis.

Synonyms:

Cholelithiasis

The presence of stones in the gallbladder or biliary tract. Stones may contain cholesterol, pigment, or mixed material and may cause no symptoms or lead to biliary pain and complications.

Synonyms:

Cholera

An acute diarrheal illness caused by *Vibrio cholerae*, a gram-negative, comma-shaped, flagellated bacterium, serogroups O1 and O139, that produces cholera toxin, an enterotoxin that irreversibly activates adenylate cyclase in intestinal epithelial cells, causing massive secretion of isotonic fluid into the intestinal lumen.

Synonyms:

Cholestasis

Impairment of bile formation or flow leading to

retention of bile acids, bilirubin, and cholesterol in the blood and tissues.

Synonyms:

Cholesteatoma

An abnormal collection of keratinizing skin cells in the middle ear or mastoid that can erode nearby bone. It may cause hearing loss, chronic ear discharge, dizziness, or facial-nerve problems.

Synonyms:

Chronic Suppurative Otitis Media

Persistent inflammation and infection of the middle ear with recurrent or continuous ear discharge, usually through a perforated tympanic membrane. It can cause conductive hearing loss and may lead to cholesteatoma or other complications.

Synonyms: CSOM; chronic otitis media with discharge; chronic suppurative middle-ear infection.

Cholesterol and Lipids

Fatty substances in the blood, including LDL cholesterol, HDL cholesterol, and triglycerides, that play critical roles in cellular function and energy metabolism. Abnormal lipid levels, particularly high LDL and triglycerides with low HDL, promote atherosclerosis and increase the risk of heart attack and stroke.

Synonyms:

Cholesterol crystal embolization

Atheroembolic disease caused by cholesterol crystal fragments dislodging from proximal atherosclerotic plaques into distal small arteries, often after vascular procedures. Presents with livedo reticularis, blue-toe syndrome, renal failure, and eosinophilia. Diagnosis by skin, kidney, or muscle biopsy.

Synonyms:

Cholesterol crystals

Needle-shaped, cleft-like spaces seen in histological sections representing dissolved cholesterol esters, commonly found in atherosclerotic plaques, atheroembolic disease, and cholesterol-rich effusions. In atheroembolic disease, cholesterol crystals em-

bolize from ruptured plaques to distal organs causing tissue ischemia.

Synonyms:

Cholesterol emboli

Cholesterol crystals released from an atherosclerotic plaque that lodge in small arteries and cause ischemia or inflammation in downstream tissues.

Synonyms:

Cholesterol embolism

Blockage of small arteries by cholesterol crystals, often after vascular instrumentation or plaque disruption.

Synonyms:

Cholesterol embolization

Release and downstream lodging of cholesterol crystals from an atherosclerotic arterial plaque.

Synonyms:

Cholesterol Synthesis

Occurs in all nucleated cells (primarily liver and intestine, approximately 1 g/day production), using acetyl-CoA as the precursor through approximately 30 enzymatic steps.

Synonyms:

Cholesterolemia

The presence and concentration of cholesterol in the blood. Abnormal elevation is a risk factor for atherosclerotic cardiovascular disease.

Synonyms:

Cholinergic Crisis

Excess acetylcholine from organophosphate or carbamate poisoning. SLUDGE syndrome: salivation, lacrimation, urination, defecation, GI upset, emesis. Miosis, bradycardia, bronchospasm, muscle fasciculations. Treatment: atropine, pralidoxime.

Synonyms:

Cholinesterase Inhibitor

A class of medications that inhibit acetyl-

cholinesterase, the enzyme that breaks down acetylcholine in the synaptic cleft, thereby increasing cholinergic neurotransmission in the central nervous system and peripheral tissues.

Synonyms:

Chondritis

Inflammation of cartilage, such as the cartilage of the ear, nose, ribs, or larynx. It may result from infection, trauma, or immune-mediated disease.

Synonyms:

Chondroblastic osteosarcoma

A variant of osteosarcoma in which the malignant cells produce a cartilaginous matrix. It typically affects the long bones of adolescents and young adults, with a predilection for the metaphyseal regions.

Synonyms:

Chondrocalcinosis

Calcification of cartilage visible on X-ray. Associated with CPPD disease. Found in knees, wrists, pubic symphysis. May be incidental or symptomatic.

Synonyms:

Chondrodysplasia

A disorder of cartilage and bone development that causes abnormal skeletal growth and, in some forms, disproportionate short stature.

Synonyms:

Chondroma

Benign cartilage-forming tumor composed of mature hyaline cartilage, most often intramedullary (enchondroma) or subperiosteal (juxtacortical / periosteal chondroma).

Synonyms:

Chondromalacia

Softening and degeneration of cartilage, especially articular cartilage. The term is often used for changes affecting the patella and causing anterior knee pain.

Synonyms:

Chondrosarcoma

The second most common primary malignant bone tumor (after osteosarcoma) and the most common primary malignant bone tumor in adults (peak age 40-70 years).

Synonyms:

Chopart's Joint

The transverse tarsal joint, consisting of the talonavicular and calcaneocuboid joints, between the hindfoot and the midfoot.

Synonyms:

Chordae Tendineae

Thin tendinous cords connecting the papillary muscles to the free edges of the atrioventricular valve leaflets (mitral and tricuspid). They tether the leaflets and, with papillary muscle contraction during ventricular systole, prevent valve prolapse and regurgitation.

Synonyms:

Chordoma

Slow-growing, locally aggressive malignant bone tumor originating from embryonic remnants of the notochord along the axial skeleton. Three anatomic locations: (1) sacrococcygeal (50% of cases, most common), (2) sphenoccipital/clival (35%, base of skull), (3) vertebral (cervical thoracolumbar, 15%).

Synonyms:

Chorea

Involuntary, irregular, brief, non-repetitive jerky movements flowing randomly from one body part to another ('dance-like'), due to basal ganglia (striatal) dysfunction.

Synonyms:

Chorioamnionitis

Infection of the chorion and amnion, typically due to ascending bacterial infection from the genital tract. Risk factors include prolonged rupture of membranes, multiple vaginal exams, and preterm labor. Presents with maternal fever, uterine tenderness, and fetal tachycardia. Diagnosis is clinical;

amniocentesis for confirmation.

Synonyms:

Chorioamnionitis (Intraamniotic Infection)

Infection or inflammation of the amniotic fluid, membranes, placenta, or decidua, usually due to ascending polymicrobial infection. Maternal fever, uterine tenderness, fetal tachycardia, and maternal leukocytosis may occur; treatment requires broad-spectrum antibiotics and delivery planning.

Synonyms: Intraamniotic Infection

Choriocarcinoma

Malignant trophoblastic tumor from abnormal proliferation of syncytiotrophoblast and cytotrophoblast, the most aggressive form of gestational trophoblastic disease (GTD).

Synonyms:

Chorion

The outermost fetal membrane, derived from the trophoblast. The chorion frondosum (villous chorion) develops into the fetal portion of the placenta. The chorion laeve (smooth chorion) is the non-villous portion. Chorionic villi contain fetal blood vessels and are bathed in maternal blood.

Synonyms:

Chorionic Villus Sampling

Prenatal diagnostic test at 10-13 weeks gestation, earlier than amniocentesis. Transabdominal or transcervical biopsy of chorionic villi (placental tissue). Indications: advanced maternal age, abnormal first-trimester screen, carrier screening, or family history of genetic disorders. Analyzed for karyotype, FISH, and microarray.

Synonyms:

Chorioretinitis

Inflammation involving the choroid and retina, often caused by infection, autoimmune disease, or systemic inflammatory illness. It can produce floaters and impaired vision.

Synonyms:

Choroid

The vascular layer of the eye between the sclera and retina, part of the uveal tract (with ciliary body and iris). Contains dense capillary network (choriocapillaris) supplying outer retina (photoreceptors). Pigmented (melanin) to absorb stray light. Bruch's membrane separates choroid from retinal pigment epithelium.

Synonyms:

Choroid Plexus Cyst

A fluid-filled cyst within the choroid plexus of a fetal cerebral ventricle. An isolated cyst with otherwise reassuring prenatal assessment is usually benign, but its significance depends on other ultrasound findings and screening results.

Synonyms:

Choroid Plexus Tumor

A papillary neoplasm of the choroid plexus, occurring most often in children, and frequently presenting with hydrocephalus from excessive cerebrospinal fluid production.

Synonyms:

Choroidal Neovascularization

The pathological growth of new, fragile blood vessels from the choroid through Bruch's membrane into the subretinal or sub-retinal pigment epithelium space, and it is the hallmark of wet age-related macular degeneration and the primary cause of severe central vision loss in this condition.

Synonyms:

Christmas Disease

Hemophilia B, an inherited bleeding disorder caused by deficiency or dysfunction of coagulation factor IX.

Synonyms:

Chromaffinoma

A tumor of chromaffin cells, usually a pheochromocytoma of the adrenal medulla or a related extra-adrenal paraganglioma. It may secrete catecholamines and cause episodic hypertension.

Synonyms:

Chromatin

The complex of DNA, histone proteins, and associated molecules that packages the genome in the nucleus. Its organization and chemical modification regulate DNA accessibility, replication, repair, and transcription.

Synonyms:

Chromatopsia

A visual disturbance in which objects appear abnormally colored. It may result from retinal disease, toxic exposure, medication effects, or other disorders of the visual system.

Synonyms:

Chromhidrosis

A rare condition in which sweat is abnormally colored, often yellow, green, blue, or black, because of pigment in the sweat glands or on the skin surface.

Synonyms:

Chromoblastomycosis

A chronic fungal infection of skin and subcutaneous tissue that produces slowly enlarging warty or scaly lesions, usually after traumatic implantation of the fungus.

Synonyms:

Chromosomal Abnormality

Change in chromosome number or structure. Numerical: aneuploidy (abnormal number, e.g., trisomy 21), polyploidy (extra sets). Structural: deletion, duplication, inversion, translocation.

Synonyms:

Chromosome

Thread-like structure of nucleic acids and protein found in nucleus, carrying genetic information. Humans have 46 chromosomes (23 pairs): 22 pairs of autosomes, 1 pair of sex chromosomes (XX female, XY male). Chromosomes condense during cell division for visualization.

Synonyms:

Chronic

Persisting or recurring over a long period rather than occurring suddenly or briefly.

Synonyms:

Chronic Allograft Nephropathy

Progressive transplant kidney function decline over months to years. Interstitial fibrosis and tubular atrophy on histology. Can be immunologic or non-immunologic. Optimize immunosuppression and manage risk factors including hypertension and recurrent disease.

Synonyms:

Chronic autoimmune Hashimoto thyroiditis

An autoimmune inflammatory disease of the thyroid that progressively destroys thyroid tissue and commonly causes hypothyroidism.

Synonyms:

Chronic autoimmune thyroiditis

Hashimoto thyroiditis, an autoimmune destruction of the thyroid that commonly causes hypothyroidism and may be associated with anti-thyroid antibodies.

Synonyms:

Chronic Bronchitis

Defined clinically as a productive cough for at least three months in each of two consecutive years, after excluding other causes. It is characterized by hypertrophy of mucus-secreting glands in the bronchi (Reid index > 0.5), goblet cell hyperplasia, and chronic airway inflammation.

Synonyms:

Chronic Caries

Tooth decay that progresses slowly and may produce a firm, darkened lesion.

Synonyms:

Chronic Cough

Cough lasting > 8 weeks. Top 3 causes in non-smokers with normal CXR: upper airway cough

syndrome, asthma, GERD. ACE inhibitor use is another common cause.

Synonyms:

Chronic Eosinophilic Leukaemia

A clonal myeloid neoplasm characterized by persistent eosinophilia, increased or dysplastic eosinophils, and evidence of an underlying clonal process or organ injury. Symptoms may include fatigue, fever, weight loss, rash, respiratory symptoms, splenomegaly, or cardiac and neurological complications.

Synonyms:

Chronic eosinophilic pneumonia

An idiopathic inflammatory lung disease characterized by eosinophilic infiltration of the pulmonary parenchyma, presenting with fever, cough, dyspnea, and peripheral airspace opacities on imaging.

Synonyms:

Chronic Fatigue Syndrome

A complex, debilitating disorder characterized by profound fatigue lasting >6 months that is not relieved by rest and is worsened by physical or mental exertion (post-exertional malaise). Associated symptoms: unrefreshing sleep, cognitive impairment (brain fog), orthostatic intolerance, joint pain, headaches, and sore throat.

Synonyms:

Chronic Granulomatous Disease

A primary immunodeficiency caused by defects in the NADPH oxidase complex in phagocytes (neutrophils, monocytes, macrophages), impairing the respiratory burst and killing of catalase-positive organisms.

Synonyms:

Chronic Hypertension in Pregnancy

Hypertension that predates pregnancy or is diagnosed early in pregnancy. It increases the risk of preeclampsia, fetal growth problems, preterm birth, and placental complications and requires ongoing maternal and fetal monitoring.

Synonyms:

Chronic Inflammation

A prolonged inflammatory response characterized by simultaneous tissue destruction and attempts at repair, lasting weeks to years. Unlike acute inflammation, it is predominantly mononuclear, involving macrophages, lymphocytes, and plasma cells rather than neutrophils.

Synonyms:

Chronic Inflammatory Demyelinating Polyneuropathy

An acquired, immune-mediated peripheral neuropathy with a relapsing-remitting or progressive course. Presents with symmetric proximal and distal weakness, sensory loss, areflexia, and elevated CSF protein. Distinguishing from Guillain-Barre: progressive course >8 weeks (vs. rapid onset in GBS).

Synonyms:

Chronic Inflammatory Response Syndrome

A proposed multisystem illness involving persistent inflammatory symptoms after an exposure such as certain water-damaged building environments. Reported symptoms are nonspecific and may include fatigue, headache, cognitive difficulty, and respiratory complaints. Symptoms require a careful medical evaluation for established infectious, allergic, toxic, autoimmune, and other causes.

Synonyms:

Chronic Intestinal Pseudo-Obstruction

Chronic condition of recurrent episodes of intestinal obstruction without mechanical blockage due to neuromuscular dysfunction of the gastrointestinal tract. May involve the small bowel, colon, or both. Causes include systemic sclerosis, diabetes, Parkinson disease, amyloidosis, and paraneoplastic syndromes.

Synonyms:

Chronic Kidney Disease

Chronic kidney disease is the progressive loss of

kidney function over months to years, typically from diabetes, hypertension, or glomerular diseases. It is staged by estimated glomerular filtration rate and albuminuria, with end-stage renal disease requiring dialysis or transplantation.

Synonyms:

Chronic Kidney Disease Staging

Classification of kidney disease by cause, eGFR category, and albuminuria category. G1 through G5 represent eGFR from normal or high to kidney failure; staging is applied when abnormalities persist for at least 3 months and helps estimate progression and complications.

Synonyms:

Chronic lead poisoning

Prolonged low-level lead exposure causing abdominal pain, anemia with basophilic stippling, peripheral neuropathy, and nephropathy, requiring chelation therapy and removal of the exposure source.

Synonyms:

Chronic Leukemia

A leukemia characterized by an insidious onset, clonal proliferation of relatively mature blood cells, and a more indolent clinical course.

Synonyms:

Chronic Limb-Threatening Ischemia

The most severe clinical form of peripheral arterial disease, characterized by chronic ischemic rest pain, nonhealing ulceration, or gangrene attributable to arterial insufficiency. It carries high risks of limb loss and cardiovascular mortality and requires vascular evaluation for revascularization and wound management.

Synonyms:

Chronic Liver Disease

Persistent hepatic injury and structural change lasting at least 6 months, caused by viral, metabolic, alcohol-related, autoimmune, cholestatic, vascular, or drug-related disease. Progressive fibrosis can lead to cirrhosis, portal hypertension, liver failure, and

hepatocellular carcinoma.

Synonyms:

Chronic Lymphocytic Leukemia

The most common leukemia in Western countries, characterized by the clonal proliferation of mature-appearing but functionally incompetent B lymphocytes that accumulate in blood, bone marrow, and lymphoid tissues.

Synonyms:

Chronic Mesenteric Ischemia

Recurrent abdominal pain occurring after eating resulting from insufficient blood flow to meet the metabolic demands of the gastrointestinal tract. Most commonly caused by atherosclerotic stenosis of at least two of the three major mesenteric arteries.

Synonyms:

Chronic Migraine

A migraine disorder with headache on at least 15 days per month for more than three months, with migraine features on at least eight days per month. Symptoms may include throbbing pain, nausea, vomiting, and light or sound sensitivity; frequent or disabling headaches require clinical evaluation.

Synonyms:

Chronic Mucocutaneous Candidiasis

Persistent/recurrent *Candida* infections of skin, nails, mucosa (oral, esophageal, vaginal) without systemic dissemination. Autosomal dominant (STAT1 gain-of-function) or recessive (IL17F, IL17RA, ACT1, RORC). Associated with autoimmunity (hypothyroidism, AIHA, ITP, alopecia), endocrinopathies, Staph infections.

Synonyms:

Chronic myelogenous leukemia

A myeloproliferative neoplasm associated with the BCR-ABL1 fusion gene, usually producing marked leukocytosis and splenomegaly.

Synonyms:

Chronic Myeloid Leukemia

A myeloproliferative neoplasm characterized by the Philadelphia chromosome [t(9;22)(q34;q11.2)], which creates the BCR-ABL1 fusion gene encoding a constitutively active tyrosine kinase.

Synonyms:

Chronic Myelomonocytic Leukemia

A rare myelodysplastic/myeloproliferative neoplasm characterized by persistent monocytosis (absolute monocyte count greater than 1,000 per microliter and greater than 10 percent of white blood cells) in the peripheral blood and bone marrow, with dysplastic features and variable blast count.

Synonyms:

Chronic Neutrophilic Leukaemia

A rare clonal myeloproliferative neoplasm characterized by sustained mature neutrophilic leukocytosis without a primary infectious or inflammatory cause. It may cause fatigue, fever, weight loss, splenomegaly, and progressive constitutional symptoms.

Synonyms:

Chronic Obstructive Pulmonary Disease

COPD is a preventable lung disease characterized by persistent respiratory symptoms and airflow limitation due to airway and/or alveolar abnormalities, usually caused by significant exposure to noxious particles or gases (primarily tobacco smoke). Includes emphysema and chronic bronchitis.

Synonyms:

Chronic Pain

Pain persisting longer than three months or beyond normal tissue healing time, often lacking an ongoing identifiable cause. It involves complex interactions between biological, psychological, and social factors that can amplify pain signaling in the nervous system.

Synonyms:

Chronic Pain Management

Chronic pain management extends beyond the peri-

operative period. Opioid therapy for chronic pain requires careful patient selection, informed consent, and regular reassessment.

Synonyms:

Chronic Pancreatitis

Progressive irreversible inflammatory condition characterized by permanent structural damage causing exocrine and endocrine impairment. The most common cause is chronic alcohol consumption. Other causes include hereditary pancreatitis, autoimmune pancreatitis, and metabolic factors.

Synonyms:

Chronic Rhinitis

Persistent inflammation or irritation of the nasal lining causing congestion, runny nose, sneezing, itching, or postnasal drainage. Allergic, nonallergic, medication-related, and structural causes are possible. Management depends on the cause and may include trigger avoidance, saline irrigation, and clinician-directed nasal treatment.

Synonyms:

Chronic Rhinosinusitis

Persistent inflammation of the nose and paranasal sinuses lasting at least 12 weeks, usually with nasal obstruction or discharge and sometimes facial pressure or reduced smell. It may occur with or without nasal polyps.

Synonyms:

Chronic sinusitis

Persistent inflammation of the paranasal sinuses for at least 12 weeks, causing nasal obstruction, discharge, facial pressure, and reduced smell.

Synonyms:

Chronic Tension-Type Headache

A recurring headache occurring on at least 15 days per month for more than three months, usually causing bilateral pressing or tightening pain rather than throbbing. It may be associated with scalp or neck tenderness but typically lacks prominent nausea; a new or changing pattern requires clinical

assessment.

Synonyms:

Chronic Thromboembolic Pulmonary Hypertension

Pulmonary hypertension caused by organized, persistent thromboembolic obstruction and secondary pulmonary-vessel remodeling after pulmonary embolism. It is potentially curable in selected patients by pulmonary endarterectomy or balloon pulmonary angioplasty.

Synonyms:

Chronic Toxicity

Adverse effects from repeated or prolonged exposure to low doses. Cumulative damage may be irreversible. Examples: heavy metals (lead, mercury), asbestos, alcohol, solvent exposure. Monitoring: biomarkers, organ function tests.

Synonyms:

Chronic Venous Disease

A spectrum of venous outflow disorders caused by reflux, obstruction, or calf-muscle-pump dysfunction. Findings range from edema and varicose veins to skin changes, lipodermatosclerosis, and venous ulceration.

Synonyms:

Chronic Venous Insufficiency

Impaired venous return from the lower extremities due to venous valve incompetence or obstruction. Leads to venous hypertension, edema, skin changes (lipodermatosclerosis, hyperpigmentation), and venous stasis ulcers (medial malleolus). Risk factors: varicose veins, DVT, obesity, prolonged standing.

Synonyms:

Chronic venous stasis

Persistent pooling of blood in the lower limbs caused by impaired venous return. It can produce edema, skin discoloration, dermatitis, and venous ulcers.

Synonyms:

Churg-Strauss Syndrome

Eosinophilic granulomatosis with polyangiitis, a necrotizing inflammation of small and medium blood vessels associated with asthma, eosinophilia, and possible injury to the lungs, nerves, skin, heart, or kidneys.

Synonyms:

Chvostek Sign

A clinical sign of latent tetany caused by hypocalcemia (ionized $\text{Ca}^{2+} < 4.4 \text{ mg/dL}$). Elicited by tapping the facial nerve over the parotid gland just anterior to the ear canal. Positive response: involuntary twitching or contraction of ipsilateral facial muscles (lip twitching or facial spasm).

Synonyms:

Chylangioma

A benign malformation or tumor-like lesion of lymphatic vessels containing chyle or lymph. It may occur in the neck, mediastinum, or other tissues.

Synonyms:

Chylomicron

Transports dietary lipids. Largest, least dense lipoprotein.

Synonyms:

Chylothorax

Pleural effusion with chyle from thoracic duct disruption. Triglycerides $> 110 \text{ mg/dL}$. Treatment includes dietary modification, octreotide, and surgical ligation if refractory.

Synonyms:

Chyluria

Passage of lymphatic fluid into the urine, giving it a milky appearance. It usually results from an abnormal communication between lymphatic vessels and the urinary tract.

Synonyms:

Ciclopia

A rare severe congenital malformation in which the eyes are fused or a single median eye develops, usu-

ally as part of holoprosencephaly.

Synonyms:

CIDP

Chronic inflammatory demyelinating polyneuropathy (CIDP) is a chronic, immune-mediated, peripheral neuropathy characterized by progressive or relapsing symmetrical weakness and sensory loss in all four limbs, with areflexia or hyporeflexia, lasting for more than eight weeks.

Synonyms:

Ciguatera

Food poisoning caused by eating reef fish containing ciguatoxins. It may cause gastrointestinal illness followed by neurologic symptoms such as paresthesias and temperature-sensation disturbance.

Synonyms:

Ciliary Body

Circumferential structure between iris and choroid, with ciliary muscle (accommodation control via zonular fibers) and ciliary processes (aqueous humor production). Part of the uveal tract (iris, ciliary body, choroid).

Synonyms:

Ciliopathy

A disorder caused by abnormal structure or function of cellular cilia. Ciliopathies may affect development, vision, kidney function, respiration, or multiple organ systems.

Synonyms:

Cineangiocardiology

Radiographic recording of the heart and blood vessels during passage of contrast material, used to visualize cardiac chambers, valves, and coronary or great vessels.

Synonyms:

Cinefluorography

Motion-picture recording of fluoroscopic images, used to document movement of organs or contrast material during a diagnostic examination.

Synonyms:

Cineplasty

Surgical creation of a muscle-controlled stump or related reconstruction, historically used to improve control of a prosthetic limb.

Synonyms:

Cingulotomy

Surgical interruption of selected fibers of the cingulum, sometimes performed as a psychosurgical treatment for severe, treatment-resistant psychiatric illness or chronic pain.

Synonyms:

Circadian Rhythm

The approximately 24-hour endogenous biological cycle regulating sleep-wake behavior, hormone secretion, body temperature, metabolism, and other physiological processes. Generated by the suprachiasmatic nucleus of the hypothalamus, which is entrained to the environment primarily by light via the retinohypothalamic tract.

Synonyms:

Circle of Willis

A ring-like arterial anastomosis at the base of the brain that provides collateral blood flow between the anterior (internal carotid) and posterior (vertebrobasilar) circulations. It is formed by the anterior cerebral, anterior communicating, internal carotid, posterior cerebral, and posterior communicating arteries.

Synonyms:

Circulating Tumor DNA

Fragments of tumor-derived DNA detectable in blood, enabling molecular profiling, treatment monitoring, and detection of minimal residual disease without tissue biopsy (liquid biopsy).

Synonyms:

Circumcision

Surgical removal of the foreskin (prepuce) covering the glans penis. Indications: medical reasons

such as severe phimosis, recurrent balanoposthitis, paraphimosis, or lichen sclerosus (balanitis xerotica obliterans); elective infant circumcision for religious, cultural, or preventive health reasons.

Synonyms:

Circumflex Artery

A branch of the left coronary artery that travels in the left atrioventricular groove. It supplies the lateral wall of the left ventricle, the left atrium, and in left-dominant systems, the inferior wall and posteromedial papillary muscle.

Synonyms:

Cirrhosis

The end stage of chronic liver disease, characterized by diffuse fibrosis with distortion of the hepatic architecture and formation of regenerative nodules. The most common causes include chronic hepatitis C infection, alcoholic liver disease, non-alcoholic steatohepatitis, chronic hepatitis B infection, and autoimmune hepatitis.

Synonyms:

Citrate Synthase

First enzyme of TCA cycle. Condenses oxaloacetate and acetyl-CoA to citrate.

Synonyms:

Citric Acid Cycle (Krebs Cycle)

A central metabolic pathway occurring in the mitochondrial matrix that oxidizes acetyl-CoA (derived from carbohydrates, lipids, and proteins) into CO₂, generating 3 NADH, 1 FADH₂, and 1 GTP (ATP) per turn. Rate-limiting enzyme: isocitrate dehydrogenase (inhibited by ATP and NADH; activated by ADP).

Synonyms: Krebs Cycle

CKD

Abbreviation for Chronic Kidney Disease: a progressive loss of kidney function over months to years, defined by a glomerular filtration rate (GFR) less than 60 mL/min/1.73m² or markers of kidney damage (albuminuria, haematuria, structural abnormalities)

persisting for at least 3 months.

Synonyms:

CKD-Mineral Bone Disorder

Systemic disorder of mineral and bone metabolism in CKD. Includes calcium, phosphorus, PTH, and vitamin D abnormalities with vascular calcification and bone disease. Renal osteodystrophy encompasses osteitis fibrosa, osteomalacia, adynamic bone disease, and mixed uremic osteodystrophy.

Synonyms:

Class IA Antiarrhythmics

Sodium channel blockers that slow phase 0 depolarization and prolong the action potential duration and refractory period. Examples include quinidine, procainamide, and disopyramide. Used for atrial and ventricular arrhythmias. Quinidine can cause QT prolongation and torsades de pointes.

Synonyms:

Class IB Antiarrhythmics

Sodium channel blockers that shorten the action potential duration and are preferentially taken up by ischemic tissue. Examples include lidocaine and mexiletine. Lidocaine is used for ventricular tachycardia and ventricular fibrillation, particularly in the setting of acute myocardial infarction.

Synonyms:

Class IC Antiarrhythmics

Sodium channel blockers that significantly slow phase 0 depolarization without affecting action potential duration. Examples include flecainide and propafenone. Used for supraventricular arrhythmias in patients without structural heart disease.

Synonyms:

Class III Antiarrhythmics

Potassium channel blockers that prolong the action potential duration and refractory period. Examples include amiodarone, sotalol, dofetilide, and ibutilide. Amiodarone is the most commonly used but has significant toxicity. Sotalol has additional beta-blocking properties and can cause torsades de

pointes.

Synonyms:

Claudication

Muscle pain or cramping brought on by exertion and relieved by rest, usually because of reduced arterial blood flow to a limb.

Synonyms:

Claudication Distance

The distance a person can walk before exertional limb pain begins. It is used to describe symptoms and monitor change.

Synonyms:

Claustrophobia

An intense fear of enclosed or confined spaces that may cause anxiety, panic, or avoidance. Symptoms can occur in places such as elevators, tunnels, or MRI scanners.

Synonyms:

Clavicle

Only horizontally oriented long bone, serving as a shoulder-trunk strut. Medial end articulates with the manubrium (sternoclavicular joint); lateral end with the acromion (acromioclavicular joint). Most common fracture at the middle-lateral third junction from falls on an outstretched hand.

Synonyms:

Clavicle Fracture

A break in the collarbone that may occur during birth or after trauma. A newborn may show asymmetric arm movement or tenderness; older children and adults may have pain, swelling, or deformity. Diagnosis is usually made by examination and imaging.

Synonyms:

Clavicle Fracture (Intentional)

Intentional fracture of the fetal clavicle as a last resort to reduce the bisacromial diameter in shoulder dystocia. The operator applies upward pressure on the midportion of the anterior fetal clavicle with

a finger, fracturing it. The clavicle heals without long-term sequelae.

Synonyms: Intentional

Claw Foot

A deformity in which the toes are hyperextended at the metatarsophalangeal joints and flexed at the interphalangeal joints. It may result from muscle imbalance or neurologic disease.

Synonyms:

Claw Hand

A hand deformity with hyperextension at the metacarpophalangeal joints and flexion at the interphalangeal joints, classically caused by ulnar-nerve palsy or lower brachial-plexus injury.

Synonyms:

Claw Toe

A toe deformity characterized by extension at the metatarsophalangeal joint and flexion at the proximal and distal interphalangeal joints.

Synonyms:

Clear Margins

A histological finding indicating that no abnormal cells (e.g., cervical intraepithelial neoplasia or cancer cells) are present at the edge of a tissue specimen removed during a procedure such as LLETZ, cone biopsy, or surgical excision.

Synonyms:

Clearance

The volume of plasma from which a drug is completely removed per unit time, typically expressed in milliliters per minute or liters per hour. Total clearance is the sum of all clearance mechanisms, primarily hepatic and renal clearance.

Synonyms:

Cleft Lip

A congenital malformation: incomplete fusion of the lip (and often palate) during embryologic development, causing a facial cleft; cleft lip and/or cleft palate are the most common craniofacial birth

defects.

Synonyms:

Cleft Lip and Palate

A congenital anomaly caused by failure of fusion of the facial prominences during embryonic development (4-10 weeks gestation). Cleft lip: failure of maxillary and medial nasal processes to fuse. Cleft palate: failure of palatal shelves to fuse. Can occur together or separately.

Synonyms:

Cleft Palate

A congenital malformation characterized by an opening (cleft) in the palate (roof of the mouth) due to failure of fusion of the palatal shelves during embryonic development (weeks 6–9 of gestation). Incidence: 1 in 1,500–2,500 live births. Cleft palate may occur in isolation or with cleft lip (cleft lip and palate—CLP).

Synonyms:

Cleidocranial Dysplasia

An inherited skeletal disorder characterized by defective development or ossification of the clavicles and skull, delayed closure of cranial sutures, dental abnormalities, and short stature.

Synonyms:

Climacteric

The period of physiologic change around the end of reproductive capacity, including the menopausal transition. It may involve changes in menstruation, vasomotor symptoms, and other endocrine effects.

Synonyms:

Clinical Communication

Exchange of information between healthcare professionals, patients, and caregivers to support diagnosis, treatment, safety, and informed decisions.

Synonyms:

Clinical Counseling

Guidance provided in healthcare to help patients make informed decisions about health, prevention,

treatment, and self-management.

Synonyms:

Clinical Depression

A depressive disorder marked by persistent depressed mood or loss of interest with associated cognitive, emotional, or physical symptoms that cause clinically significant distress or impairment.

Synonyms:

Clinical Deterioration

Worsening of physiologic function or symptoms that increases risk of organ failure, disability, or death. Changes in mental status, respiratory effort, perfusion, urine output, and vital signs may precede overt collapse.

Synonyms:

Clinical Documentation

Recording of patient history, examination, assessment, treatment, and follow-up in the medical record.

Synonyms:

Clinical Frailty Scale

A clinician-rated scale that summarizes frailty from very fit to severely frail or terminally ill using activity, function, and disease burden. It supports communication and prognostic assessment but should be interpreted in the patient's clinical context.

Synonyms:

Clinical Guideline

Systematically developed statements to assist practice. Examples: CDC guidelines, WHO guidelines, specialty society guidelines.

Synonyms:

Clinical Handover

Transfer of responsibility and relevant patient information from one healthcare professional or team to another. Effective handover communicates diagnosis, current status, risks, pending tasks, contingency plans, and accountability.

Synonyms:

Clinical Practice Guideline

Evidence-informed recommendations intended to help healthcare professionals and patients make decisions about a specific clinical condition or situation.

Synonyms:

Clinical Presentation

Signs and symptoms of disease. Varies by disease, severity, patient factors.

Synonyms:

Clinical Reasoning

The cognitive process of collecting, weighting, and integrating clinical information to formulate diagnostic and management decisions. It includes problem representation, differential diagnosis, probability assessment, and recognition of cognitive bias.

Synonyms:

Clinical Research

Research involving people or human health data to study disease, diagnosis, prevention, treatment, or healthcare delivery.

Synonyms:

Clinical Research Bias

Systematic error in clinical study design or analysis, including selection bias, information bias, and confounding.

Synonyms:

Clinical Trial

A planned study in which people receive or are observed for an intervention to evaluate its safety, effects, or outcomes. Trials may be conducted in phases and for many types of health interventions.

Synonyms:

Clinical Trial Phases

Stages used to study a medical intervention. Phase I primarily evaluates initial safety and dosing, Phase II evaluates preliminary efficacy and safety, Phase III compares treatment with standard care in larger groups, and Phase IV monitors use after approval.

Synonyms:

Clinicopathologic Correlation

Integration of clinical history, examination, imaging, laboratory data, and pathologic findings to reach a diagnosis. It is essential when tissue findings are limited, nonspecific, or potentially affected by sampling or artifact.

Synonyms:

Clinodactyly

A congenital or developmental lateral curvature of a finger or toe, most often affecting the fifth finger and resulting from abnormal shape of a phalanx.

Synonyms:

Clinoid Process

One of several bony projections of the sphenoid bone that form part of the cranial base and support structures around the optic canal and cavernous sinus.

Synonyms:

Clip (Vascular)

A small device used to close, occlude, or secure a blood vessel during a procedure.

Synonyms: Vascular

Clitoridectomy

Surgical removal of part or all of the clitoris. In medicine it may be performed for selected tumors or severe disease; nonmedical removal is a harmful practice with no health benefit.

Synonyms:

Clitoris

A small, sensitive erectile organ located at the anterior junction of the labia minora, beneath the clitoral hood (prepuce). The clitoris is the primary source of female sexual pleasure and is homologous to the male penis.

Synonyms:

Cloacal Exstrophy

The most severe congenital anomaly of the ventral

abdominal wall, also called the OEIS complex (Omphalocele, Exstrophy of the bladder, Imperforate anus, Spinal defects). Incidence 1 in 200,000-400,000 births.

Synonyms: the OEIS.

Cloacitis

Inflammation of a cloaca or cloacal region, particularly in disorders affecting the common terminal outlet of the urinary, genital, and intestinal tracts.

Synonyms:

Clonal Evolution

The selection and expansion of tumor-cell subclones with biologic or treatment-related advantages over time. It contributes to progression, metastasis, and acquired resistance to anticancer therapy.

Synonyms:

Clonic Seizure

A seizure characterized by rhythmic, repetitive jerking caused by recurrent involuntary muscle contractions. It may be focal or generalized, with or without impaired awareness, and is classified using the clinical pattern, electroencephalography, and the underlying cause.

Synonyms:

Clonorchiasis

Infection with the Chinese liver fluke, *Clonorchis sinensis*. It affects the biliary tract and may cause inflammation, obstruction, and long-term hepatobiliary complications.

Synonyms:

Clonus

A rhythmic, involuntary oscillation of a muscle (usually ankle or patellar) produced by sustained stretch, indicating upper motor neuron (UMN) disease—hyperreflexia. Elicited by rapid dorsiflexion of the foot (sustained clonus—5 or more beats) or tapping. Associated with spasticity, hyperreflexia, and UMN signs (Babinski).

Synonyms:

Closed Comedo

A small skin lesion formed when a follicular opening is blocked by sebum and keratin but remains covered by the epidermis. It is commonly called a whitehead.

Synonyms: a whitehead.

Closed Fracture

A fracture in which the broken bone does not communicate through a wound with the external environment.

Synonyms:

Closed Reduction

Nonoperative realignment of a fractured or dislocated bone or joint by manipulation without surgically opening the site.

Synonyms:

Closed-Angle Glaucoma

Glaucoma caused by obstruction of the drainage angle of the anterior chamber, preventing aqueous humor outflow and producing potentially rapid elevation of intraocular pressure.

Synonyms:

Closed-Loop Insulin Delivery

Automated insulin delivery systems that combine continuous glucose monitoring with an insulin pump and control algorithm. The algorithm adjusts basal insulin delivery based on sensor glucose values in real time. Hybrid closed-loop systems require user-initiated meal boluses but automatically manage basal rates.

Synonyms:

Clostridioides difficile

An anaerobic, spore-forming, toxin-producing gram-positive bacillus causing antibiotic-associated diarrhea and pseudomembranous colitis. Risk factors: antibiotics (especially clindamycin, fluoroquinolones, cephalosporins), hospitalization, age >65, PPIs, and immunosuppression. Toxins A and B damage colonic epithelium.

Synonyms:

Clostridioides difficile infection

An infectious diarrhea caused by the bacterium *Clostridioides difficile*, typically occurring after disruption of normal gastrointestinal flora by antibiotics. *C. difficile* produces toxins A and B that cause colonic inflammation and diarrhea. Risk factors include antibiotic exposure, proton pump inhibitor use, and advanced age.

Synonyms:

Clostridioides difficile pathogenesis

The mechanisms by which *C. difficile* causes disease. Antibiotic disruption of the normal gut flora allows the organism to colonize; its toxins injure the colonic mucosa and cause inflammation and diarrhea. Spores persist in the environment and facilitate transmission.

Synonyms:

Clostridium

A genus of anaerobic, usually spore-forming bacteria that includes species capable of causing diseases such as tetanus, botulism, gas gangrene, and antibiotic-associated colitis.

Synonyms:

Clostridium botulinum

A gram-positive, spore-forming, anaerobic rod that produces botulinum toxin, the most potent toxin known. The toxin causes flaccid paralysis by blocking acetylcholine release at neuromuscular junctions. Infant botulism occurs from ingestion of spores in honey or soil. Wound botulism occurs from injection of contaminated heroin.

Synonyms:

Clostridium Difficile

Clostridioides difficile infection (CDI): a toxin-producing anaerobic gram-positive rod causing antibiotic-associated diarrhea and pseudomembranous colitis, most commonly after broad-spectrum antibiotics (clindamycin, cephalosporins, fluoroquinolones).

Synonyms:

Clostridium difficile Infection

An anaerobic, spore-forming, toxin-producing gram-positive bacillus causing antibiotic-associated diarrhea and pseudomembranous colitis. See *Clostridioides difficile*.

Synonyms:

Clostridium perfringens

A gram-positive, spore-forming, anaerobic rod that causes gas gangrene (clostridial myonecrosis) and food poisoning. The organism produces alpha-toxin, which causes tissue necrosis. Gas gangrene presents with crepitus, tissue necrosis, and systemic toxicity. Food poisoning presents with acute onset of diarrhea and abdominal cramps.

Synonyms:

Clostridium tetani

A gram-positive, spore-forming, anaerobic rod that causes tetanus. The organism produces tetanospasmin, a neurotoxin that causes spastic paralysis. Spores are found in soil and enter through wound contamination. The toxin blocks inhibitory neurotransmitters causing uncontrolled muscle contractions.

Synonyms:

Clotting

The cascade of enzymatic reactions converting circulating fibrinogen into an insoluble fibrin clot. See Blood Coagulation.

Synonyms:

Clubbing

Bulbous enlargement of the distal fingers or toes with increased nail curvature and loss of the normal nail-fold angle. It reflects proliferation of connective tissue in the distal digits and may be associated with chronic pulmonary disease, cyanotic heart disease, inflammatory bowel disease, or malignancy.

Synonyms:

Clubfoot

A congenital deformity in which the foot is fixed in equinus, hindfoot varus, forefoot adduction, and

cavus; the medical term is congenital talipes equinovarus. It is usually idiopathic but may be associated with neuromuscular or syndromic conditions and requires early orthopaedic assessment.

Synonyms:

Clubfoot (Talipes Equinovarus)

A congenital foot deformity with an incidence of approximately 1 in 1,000 live births, characterized by four components: equinus (ankle plantarflexion), varus (hindfoot inversion), adductus (forefoot adduction), and cavus (high arch).

Synonyms: Talipes Equinovarus

Clubhand

A congenital deformity of the hand in which the wrist and hand deviate toward the radial or ulnar side, often associated with deficiency or abnormal development of forearm bones.

Synonyms:

Cluster Headache

A primary headache disorder causing severe one-sided orbital or periorbital pain in attacks lasting about 15–180 minutes, often with tearing, conjunctival redness, nasal symptoms, eyelid swelling, or facial sweating on the same side.

Synonyms:

Clutton's Joints

Painless bilateral swelling of the knees or other large joints associated with congenital syphilis, caused by chronic synovitis.

Synonyms:

CMV

Cytomegalovirus, a common herpesvirus that may cause mild or asymptomatic infection but can cause serious disease in fetuses and people with weakened immunity.

Synonyms:

CMV Colitis

Colonic inflammation caused by cytomegalovirus reactivation in immunocompromised patients includ-

ing those with HIV and organ transplant recipients. Presents with bloody diarrhea and abdominal pain. Diagnosed by colonoscopy with biopsy showing characteristic owl-eye intranuclear inclusions in enlarged cells.

Synonyms:

CO Poisoning

Toxicity from inhalation of carbon monoxide (CO), a colorless, odorless gas binding hemoglobin 200-300 times more avidly than oxygen, forming carboxyhemoglobin (COHb) and reducing oxygen delivery. See carbon monoxide poisoning.

Synonyms:

Coagulation Cascade

The coagulation cascade is a series of enzymatic reactions leading to fibrin clot formation, involving serine protease activation cascades. The intrinsic pathway is initiated by contact activation when factor XII binds exposed collagen, sequentially activating factors XI, IX, and the cofactor VIII.

Synonyms:

Coagulation Factor Deficiencies

Inherited or acquired disorders in which one or more clotting factors are reduced or function abnormally, causing excessive bleeding. The clinical pattern and laboratory findings depend on the affected factor.

Synonyms:

Coagulation Profile

Panel of tests assessing the coagulation cascade. PT (prothrombin time, 11-14 sec): measures extrinsic and common pathways; elevated in vitamin K deficiency, warfarin, liver disease, DIC. INR standardizes PT for warfarin monitoring.

Synonyms:

Coagulative Necrosis

The most common form of necrosis, typically resulting from ischemic injury or infarction in most solid organs except the brain. The fundamental process involves denaturation of both structural proteins and enzymatic proteins, which prevents the imme-

diate liquefaction of the dead tissue.

Synonyms:

Coagulopathy

A disorder of haemostasis that impairs normal clot formation or regulation and predisposes to abnormal bleeding or thrombosis. It may result from coagulation-factor deficiency, platelet dysfunction, anticoagulant exposure, liver disease, consumptive coagulopathy, or systemic illness.

Synonyms:

Coal Worker's Pneumoconiosis

Pneumoconiosis from coal dust. Simple CWP shows upper lobe macules. Complicated CWP (progressive massive fibrosis) involves coalescent macules. May be associated with Caplan syndrome.

Synonyms:

Coarctation

A localized narrowing of a tubular anatomical structure, especially coarctation of the aorta, which obstructs blood flow and produces characteristic pressure differences.

Synonyms:

Coarctation of the Aorta

A congenital narrowing of the aorta, typically near the ductus arteriosus. Presents with upper extremity hypertension, diminished femoral pulses, and a blood pressure gradient between arms and legs. Associated with bicuspid aortic valve and other congenital heart defects.

Synonyms:

Coarse Crackles

Lower-pitched, longer-duration crackles heard throughout inspiration, caused by fluid or secretions in larger airways. They are heard in COPD, bronchiectasis, pneumonia, and pulmonary edema. They are less specific than fine crackles.

Synonyms:

Coats Disease

An uncommon retinal disorder characterized by ab-

normal retinal blood vessels, leakage, exudation, and sometimes retinal detachment, usually affecting one eye in childhood.

Synonyms:

Cobalamin Deficiency

Deficiency of vitamin B12 (cobalamin), a cofactor for methionine synthase (methylcobalamin) and methylmalonyl-CoA mutase (adenosylcobalamin).

Synonyms:

Cobalt-57

Calibration source for gamma cameras. Half-life 271 days. Used for quality control.

Synonyms:

Cobalt-Chromium

Base metal alloy for cast restorations. Strong, corrosion-resistant. Used for partial dentures, crowns.

Synonyms:

Cocaine Cardiotoxicity

Cocaine blocks norepinephrine and dopamine reuptake, causing sympathomimetic effects: tachycardia, hypertension, and coronary vasospasm. Acute myocardial infarction can occur even with normal coronary arteries due to vasospasm, accelerated atherosclerosis, and prothrombotic effects. Treatment: benzodiazepines for sympatholysis.

Synonyms:

Cocaine Toxicity

A toxic state caused by cocaine, often producing agitation, high blood pressure, rapid heart rate, hyperthermia, seizures, coronary vasospasm, myocardial infarction, or stroke. Treatment is supportive and may include sedation, temperature control, and management of cardiovascular or neurologic complications.

Synonyms:

Coccidioidomycosis

A fungal infection caused by *Coccidioides* species, usually acquired by inhaling spores. See Valley

Fever.

Synonyms:

Coccidiosis

Infection by coccidian protozoa. In humans it may cause intestinal disease or, in immunocompromised patients, infection of other organs.

Synonyms:

Coccydynia

Pain in the region of the coccyx, often worsened by sitting. Causes include trauma, childbirth, degenerative change, and less commonly infection or tumor.

Synonyms:

Coccygectomy

Surgical removal of the coccyx, reserved for selected cases of severe persistent coccygeal pain or a lesion that has not responded to conservative treatment.

Synonyms:

Coccyx

Terminal vertebral column part with 3-5 fused vertebrae. Articulates with the sacrum, allowing limited flexion important during childbirth. Provides attachment for gluteus maximus, coccygeus, and levator ani (pelvic floor). A common site of pain (coccydynia) following falls, direct trauma, and prolonged sitting.

Synonyms:

Cochlea

Snail-shaped hearing organ in the inner ear, coiled approximately 2.5 turns around the modiolus. Three fluid-filled chambers: scala vestibuli (perilymph), scala media (endolymph, organ of Corti), scala tympani (perilymph).

Synonyms:

Cochlear Implant

A cochlear implant is an electronic medical device that bypasses damaged or absent inner ear hair cells to provide direct electrical stimulation of the auditory nerve, restoring a perception of sound in

individuals with severe to profound sensorineural hearing loss who derive limited benefit from hearing aids.

Synonyms:

Cockayne Syndrome

A rare inherited disorder of DNA repair characterized by progressive neurologic dysfunction, growth failure, developmental impairment, photosensitivity, and a prematurely aged appearance.

Synonyms:

Code Blue

A hospital emergency signal indicating that a person may be in cardiopulmonary arrest and requires immediate resuscitation response.

Synonyms:

Codman Triangle

A characteristic periosteal reaction seen on plain radiographs, formed when an aggressive bone lesion elevates the periosteum away from the bone cortex, creating a triangular area of new reactive bone at the angle between the raised periosteum and underlying cortex.

Synonyms:

Codon

Sequence of three nucleotides coding for one amino acid or stop signal. 64 possible codons: 61 code for amino acids, 3 are stop codons (UAA, UAG, UGA). Degeneracy: multiple codons code for same amino acid.

Synonyms:

Coenzyme

A non-protein organic molecule that binds to an enzyme (apoenzyme) and is required for its catalytic activity. Coenzymes often act as transient carriers of specific chemical groups or electrons.

Synonyms:

Coenzyme Q

A lipid-soluble molecule in mitochondrial membranes that transfers electrons during cellular energy

production.

Synonyms:

Cofactor

A non-protein chemical compound or metallic ion required for an enzyme's catalytic activity. Cofactors include: (1) Metal ions (Mg^{2+} , Zn^{2+} , Fe^{2+}/Fe^{3+} , Cu^{2+} , Mn^{2+} , Ca^{2+} , Mo, Se) that stabilize structure, participate in redox, or act as Lewis acids; (2) Coenzymes (organic cofactors, often vitamin-derived).

Synonyms:

Cogan's syndrome

An autoimmune vasculitis characterized by interstitial keratitis and vestibular dysfunction including vertigo, hearing loss, and tinnitus. May involve large vessels including the aorta, causing aortic aneurysm or regurgitation. Treatment includes corticosteroids and immunosuppressive agents.

Synonyms:

Cognitive Behavioral Therapy

A structured, time-limited psychotherapy that identifies and modifies maladaptive thought patterns (cognitive distortions) and behaviors. It is based on the cognitive model that thoughts, feelings, and behaviors are interconnected. CBT uses techniques including cognitive restructuring, behavioral activation, exposure, and skills training.

Synonyms:

Cognitive Behavioral Therapy for Insomnia

Cognitive behavioral therapy for insomnia is a structured, evidence-based program that targets the thoughts and behaviors perpetuating poor sleep. Components include sleep restriction, stimulus control, cognitive restructuring, and sleep hygiene education.

Synonyms:

Cognitive Decline

A reduction over time in one or more cognitive abilities, such as memory, attention, language, reasoning,

or visuospatial function.

Synonyms:

Cognitive Distortions

Systematic errors in thinking that perpetuate negative emotional states and maladaptive behaviors. Common distortions include all-or-nothing thinking, catastrophizing, mind reading, overgeneralization, emotional reasoning, and should statements. CBT focuses on identifying and modifying these patterns.

Synonyms:

Cognitive Fitness

The active maintenance of mental sharpness and brain health through stimulating activities, physical exercise, social engagement, and proper nutrition. Regular challenges such as learning new skills, puzzles, reading, and social interaction support neuroplasticity and cognitive reserve.

Synonyms:

Cognitive Health and Memory

Cognitive health encompasses the ability to think clearly, learn, remember, and make decisions, with memory being a core component that involves encoding, storing, and retrieving information. Age-related changes in processing speed and recall are normal, but persistent decline may signal mild cognitive impairment or dementia.

Synonyms:

Cognitive Impairment

Decline in one or more cognitive domains: memory, attention, language, visuospatial, executive function. Types: subjective cognitive decline, mild cognitive impairment (MCI), dementia. MCI: functional independence preserved, impairment on testing. Dementia: functional impairment.

Synonyms:

Cognitive Rehabilitation

Structured therapy to improve cognitive function or help a person compensate for difficulties with memory, attention, language, or executive skills after illness or injury.

Synonyms:

Cognitive Screening

A brief assessment used to identify possible problems with memory, attention, language, or other cognitive functions. It does not by itself diagnose dementia or another disorder.

Synonyms:

Cohort Study

Follows exposed and unexposed groups over time. Prospective or retrospective. Measures incidence, relative risk.

Synonyms:

Coil (Vascular)

A catheter-delivered wire device used to block selected blood vessels, often to treat aneurysms or bleeding.

Synonyms: Vascular

Coincidence Detection

Principle of PET imaging. Two 511 keV photons detected simultaneously (within nanoseconds) by opposing detectors. Line of response defined. Time-of-flight PET improves localization.

Synonyms:

Cold Abscess

An abscess that develops slowly with little heat, redness, or acute inflammation, classically in tuberculosis or other chronic infections.

Synonyms:

Cold Agglutinin

An antibody that causes red blood cells to agglutinate at relatively low temperatures. Pathologic cold agglutinins can cause autoimmune hemolytic anemia.

Synonyms:

Cold Agglutinin Disease

Autoimmune hemolytic anemia caused by IgM autoantibodies directed against the I/i antigens on RBC membranes (maximum reactivity at $< 30^{\circ}\text{C}$,

optimal 4°C).

Synonyms:

Cold agglutinin syndrome

An immune-mediated disorder in which antibodies react with red blood cells at low temperatures, potentially causing hemolytic anemia or circulation-related symptoms.

Synonyms:

Cold agglutinins

IgM autoantibodies that bind red blood cell antigens at temperatures below 37 degrees Celsius, causing agglutination and potentially complement-mediated hemolysis in cooler peripheral circulation.

Synonyms:

Cold Injury

Tissue or systemic injury caused by exposure to low temperature, including hypothermia, frostbite, chilblains, and non-freezing cold injury. Severity depends on temperature, exposure duration, moisture, wind, and perfusion; affected patients require assessment for core-temperature disturbance and local tissue damage.

Synonyms:

Cold intolerance

Abnormal sensitivity to cold that may occur with hypothyroidism, low body weight, anemia, vascular disease, or other systemic conditions.

Synonyms:

Cold Sore

Herpes labialis: recurrent herpes simplex virus type 1 (HSV-1) infection of the lips/around mouth, presenting as prodromal tingling, then grouped vesicles that crust and heal in 7-14 days. Triggered by stress, fever, sunlight, immunosuppression, illness. Recurrence due to reactivation of latent virus in the trigeminal ganglion.

Synonyms:

Colectomy

Surgical resection of part or all of the colon. Right

hemicolectomy: for cecal/ascending colon cancer. Left hemicolectomy: for descending/sigmoid cancer. Sigmoidectomy: for diverticulitis or sigmoid cancer. Total colectomy: for FAP, UC, or Lynch syndrome.

Synonyms:

Colibacillosis

Disease caused by pathogenic strains of *Escherichia coli*, which may produce intestinal infection, urinary-tract infection, sepsis, or other illness.

Synonyms:

Colic

Sudden, severe, often cramping pain caused by contraction or obstruction of a hollow organ. The term is also used for recurrent unexplained crying in an otherwise healthy infant.

Synonyms:

Colitis

Inflammation of the colon caused by infection, inflammatory bowel disease, reduced blood flow, medication, or other conditions. Symptoms may include diarrhea, abdominal pain, blood in the stool, urgency, and tenesmus; evaluation depends on severity and suspected cause.

Synonyms:

Collagen

The major structural protein of connective tissue, composed of three polypeptide chains arranged in a triple helix. Different collagen types provide tensile strength to skin, bone, cartilage, tendons, blood vessels, and basement membranes.

Synonyms:

Collagen Disease

A systemic disorder involving connective tissue and often immune-mediated injury to collagen-rich structures. The term has historically included diseases such as systemic lupus erythematosus and systemic sclerosis.

Synonyms:

Collagen Implant

Biocompatible scaffold for tissue engineering. Types: bovine, porcine, synthetic. Used for hernia repair, soft tissue augmentation.

Synonyms:

Collagenous Colitis

Chronic inflammatory bowel disease characterized by thickening of the subepithelial collagen band in the colonic mucosa to greater than ten micrometers normally less than five micrometers with preservation of the epithelial surface. Presents with chronic watery non-bloody diarrhea primarily in middle-aged women.

Synonyms:

Collapsed Lung

A common description of pneumothorax, in which air enters the pleural space and partially or completely collapses the lung. It may cause sudden chest pain and shortness of breath and can be life-threatening when tension develops. See also Pneumothorax.

Synonyms:

Collateral Circulation

Alternative vascular pathways that develop when coronary arteries become chronically narrowed. Collaterals connect different coronary artery territories and can partially compensate for stenosis. They develop gradually in response to ischemia and are more prominent in patients with chronic coronary artery disease.

Synonyms:

Collateral Ligament Injury

MCL (medial) or LCL (lateral) knee ligament injury. MCL more common, often from valgus stress. Treatment: braces, physical therapy, surgical repair if severe.

Synonyms:

Collecting Duct

Final segment of the nephron where fine-tuning of urine concentration and composition occurs. Prin-

cipal cells respond to antidiuretic hormone by inserting aquaporin-2 water channels into the luminal membrane, enabling water reabsorption and urine concentration.

Synonyms:

Colles Fracture

A fracture of the distal radius with dorsal displacement and angulation of the distal fragment, usually caused by falling on an outstretched hand.

Synonyms:

Collimator

Lead device with holes to define gamma ray direction. Types: parallel-hole, pinhole, converging, diverging. Resolution vs. sensitivity trade-off.

Synonyms:

Colloids

Solutions containing large molecules that remain in the intravascular space, providing greater volume expansion per milliliter than crystalloids. Albumin (5 percent, 25 percent) is a natural plasma protein used for volume expansion and specific indications (cirrhosis with paracentesis, nephrotic syndrome).

Synonyms:

Coloboma

A congenital defect caused by failure of the optic fissure to close during embryonic development, resulting in a keyhole-shaped gap in any ocular structure including the iris, retina, choroid, or optic nerve. Iris colobomas are the most common and appear as a comma-shaped defect in the inferior iris.

Synonyms:

Colocolonic intussusception

telescoping of a segment of colon into an adjacent segment, less common in adults than the ileocolic type and usually associated with a pathological lead point such as a polyp, tumor, or lipoma. Adults typically present with intermittent abdominal pain, bloating, and change in bowel habits.

Synonyms:

Colon

The largest part of the large intestine, extending from the cecum to the rectum. Anatomically divided into ascending colon (right side), transverse colon (across the abdomen), descending colon (left side), and sigmoid colon (S-shaped, leading to the rectum).

Synonyms:

Colon cancer

Malignant neoplasm arising from the colonic epithelium, the third most common cancer worldwide and a leading cause of cancer-related mortality. Most arise from adenomatous polyps through the adenoma-carcinoma sequence over ten to fifteen years.

Synonyms:

Colonic Ischemia

Decreased blood flow to the colon causing mucosal or transmural injury. Most commonly affects watershed areas particularly the splenic flexure and rectosigmoid junction. Causes include non-occlusive hypoperfusion from cardiogenic shock, vasoconstrictive medications, and vasculitis.

Synonyms:

Colonization

Presence and multiplication of microorganisms on or in a body site without tissue invasion or clinical disease. Colonization may precede infection but does not by itself establish that symptoms are caused by the organism.

Synonyms:

Colonoscopy

Examination of the colon, and sometimes the terminal ileum, with a flexible endoscope. It permits direct visualization, biopsy, and removal of some lesions. It is one option for colorectal-cancer screening and is often used to evaluate suspected colonic disease; bowel preparation is usually required.

Synonyms:

Colony-Forming Unit

A unit used to estimate the number of viable mi-

croorganisms in a sample, derived from counting colonies grown on agar after plating a diluted sample. Each colony is assumed to arise from a single viable microorganism (or a cluster); results are reported as CFU/mL or CFU/g.

Synonyms:

Color Blindness

Reduced or absent ability to distinguish certain colors under normal lighting. It is often inherited, especially through X-linked variants, but may also result from eye disease, neurologic disease, aging, or medicines.

Synonyms:

Color Doppler

An ultrasound method that displays the direction and relative speed of blood flow in color over a grayscale image.

Synonyms:

Color Vision Deficiency

Color vision deficiency, commonly known as color blindness, is a condition in which the ability to perceive and discriminate certain colors is reduced or absent, most commonly affecting the perception of red and green hues, and it is caused by abnormalities in the cone photoreceptors responsible for color vision.

Synonyms:

Colorado Tick Fever

An acute viral infection transmitted by ticks and characterized by fever, headache, myalgia, and sometimes leukopenia or rash.

Synonyms:

Colorectal Adenocarcinoma

The third most common cancer worldwide and the second leading cause of cancer death, arising from the colonic epithelium through the adenoma-carcinoma sequence over 10 to 15 years. The pathogenesis involves sequential accumulation of genetic mutations beginning with APC loss, followed by KRAS activation, TP53 loss, and other alterations.

Synonyms:

Colorectal Cancer

A malignant tumor of the colon or rectum. It may cause bleeding, altered bowel habits, anemia, abdominal pain, or no early symptoms; evaluation and treatment depend on the tumor's location and stage.

Synonyms:

Colorectal Cancer Genetics

The study of inherited variants that increase the risk of colorectal cancer. Important inherited syndromes include Lynch syndrome, involving DNA mismatch-repair genes, and familial adenomatous polyposis, involving the APC gene.

Synonyms:

Colorectal Cancer Screening

Public health strategy to detect colorectal cancer and precancerous polyps in asymptomatic individuals. Current guidelines recommend screening beginning at age forty-five.

Synonyms:

Colorectal Cancer Screening Tests

Tests used to detect colorectal cancer or precancerous polyps in people without symptoms. They include stool-based tests and examinations that visualize the colon, such as colonoscopy, CT colonography, and flexible sigmoidoscopy. The appropriate test and interval depend on age, risk, and local guidance.

Synonyms:

Colorectal Surgery

Surgical treatment of diseases of the colon, rectum, and anus. Procedures may include segmental bowel resection, restorative reconstruction, stoma formation, or local procedures, depending on the disease and its extent.

Synonyms:

Colostomy

A surgically created stoma formed by bringing the

colon to the abdominal wall for fecal diversion, indicated for distal obstruction, trauma, perforation, or abdominoperineal resection. Types include end, loop, and double-barrel. Complications include parastomal hernia, prolapse, retraction, and high-output dehydration.

Synonyms:

Colostrum

The thick, yellowish fluid produced by the mammary glands in late pregnancy and the first few days postpartum. Rich in immunoglobulins (especially IgA), proteins, leukocytes, and growth factors.

Synonyms:

Colpitis

Inflammation of the vagina, often due to infection, altered vaginal flora, irritation, or hormonal change.

Synonyms:

Colposcopy

Magnified visualization of the cervix, vagina, and vulva after application of acetic acid. Indication: abnormal Pap smear (ASCUS with high-risk HPV, LSIL, HSIL, AGC). Acetic acid causes acetowhite lesions in dysplastic epithelium. Lugol iodine (Schiller test): normal glycogenated epithelium stains brown; abnormal epithelium does not.

Synonyms:

Coma

A state of profound unresponsiveness in which a person cannot be awakened and does not show purposeful responses. It is a medical emergency with many possible causes.

Synonyms:

Coma Scale

A standardized tool for describing level of consciousness using eye opening, verbal response, and motor response.

Synonyms:

Combination Inhalers

Inhalers containing both an inhaled corticosteroid and a long-acting beta₂-agonist.

teroid and a long-acting beta-2 agonist. Examples include fluticasone/salmeterol (Advair), budesonide/formoterol (Symbicort), and fluticasone furoate/vilanterol (Breo Ellipta). They simplify asthma and COPD maintenance therapy and improve adherence.

Synonyms:

Combination Therapy

Use of two or more treatments together to address a disease or mechanism. The benefits and risks depend on the condition and the specific combination.

Synonyms:

Combined Spinal-Epidural Analgesia

A neuraxial analgesia technique for labor that combines a spinal injection (short-acting opioid or opioid + low-dose local anesthetic) with an epidural catheter. Advantages: rapid onset of pain relief (3-5 minutes from the spinal component), minimal motor block, and the ability to dose through the epidural catheter for prolonged labor.

Synonyms:

Comedocarcinoma

A form of ductal carcinoma in situ of the breast characterized by central necrosis within malignant ducts, which may produce a comedo-like appearance.

Synonyms:

Comfort Measures Only

A care plan focused on relief of pain, breathlessness, distress, and other symptoms rather than treatments intended to prolong life.

Synonyms:

Comminuted

Describing a fracture in which a bone is broken into multiple fragments.

Synonyms:

Comminuted Fracture

A fracture in which the bone is broken into three or more fragments. It may result from high-energy trauma and can be associated with soft-tissue injury,

instability, and impaired healing.

Synonyms:

Commissurotomy

Surgical incision or separation of a commissure, especially a fused cardiac valve commissure, to relieve obstruction.

Synonyms:

Commode

A portable toilet or chair placed near a bed for a person who cannot easily reach a bathroom.

Synonyms:

Common Bile Duct

The duct formed by union of the common hepatic and cystic ducts. It conveys bile to the duodenum, usually joining the pancreatic duct at the hepatopancreatic ampulla.

Synonyms:

Common Cold

An acute, self-limited viral infection of the upper respiratory tract, one of the most frequent illnesses in humans, with adults experiencing 2-4 episodes annually and children 6-8 episodes.

Synonyms:

Common Iliac Arteries

Terminal abdominal aortic branches at L4, each approximately 4 cm long, dividing into internal and external iliac arteries. They supply the pelvis and lower extremities. The right common iliac artery crosses anterior to the right common iliac vein.

Synonyms:

Common Peroneal Nerve

Sciatic division (L4-S2) winding around the fibular neck, the body's most vulnerable major nerve to external compression. Divides into superficial peroneal (peroneus longus/brevis, dorsal foot sensation) and deep peroneal (tibialis anterior, extensors, first web space sensation).

Synonyms:

Common peroneal neuropathy

A peripheral nerve disorder causing weakness of ankle dorsiflexion and eversion, sensory loss over the anterolateral leg and dorsum of the foot, and possible foot drop.

Synonyms:

Common Variable Immunodeficiency

The most common symptomatic primary immunodeficiency in adults, affecting approximately 1 in 25,000 individuals. It is characterized by hypogammaglobulinemia (low IgG with low IgA and/or IgM), impaired antibody response to vaccines, and increased susceptibility to infections.

Synonyms:

Common wart

A benign epidermal proliferation caused by human papillomavirus, presenting as a rough hyperkeratotic papule, commonly on the hands or fingers.

Synonyms:

Commotio Cordis

Sudden cardiac arrest caused by a blunt, nonpenetrating impact to the chest at a vulnerable moment in the cardiac cycle, without structural heart injury.

Synonyms:

Communicable disease

Any disease caused by bacteria, viruses, or other pathogens that is spread from person to person.

Synonyms:

Communicating Hydrocephalus

A type of hydrocephalus in which there is free flow of cerebrospinal fluid (CSF) between the ventricles, but impaired absorption of CSF at the arachnoid granulations or increased CSF production. The ventricles are uniformly dilated, including the fourth ventricle.

Synonyms:

Community Acquired Infection

An infection present or incubating at hospital admission, or developing within 48 hours of admission

without recent healthcare exposure. Common examples include pneumonia, urinary tract infection, and meningitis caused by organisms such as *Streptococcus pneumoniae* and *Escherichia coli*, generally susceptible to narrow-spectrum antibiotics.

Synonyms:

Community Health Worker

A trained member of a community who helps connect people with health services, education, prevention, and social support.

Synonyms:

Community Rehabilitation

Rehabilitation delivered in community settings to improve a person's participation, independence, and daily functioning.

Synonyms:

Community Reintegration

Return to community roles: work, leisure, social. Vocational rehabilitation, accessibility modifications.

Synonyms:

Community-Acquired

Acquired outside a healthcare facility or before a person has been exposed to healthcare-associated conditions.

Synonyms:

Community-Acquired Pneumonia

CAP: acquired outside hospital. CURB-65 (confusion, uremia >7 , respiratory rate ≥ 30 , BP $<90/60$, age ≥ 65) and PSI/PORT score for severity/site of care. Outpatient: amoxicillin 1g TID, doxycycline 100 mg BID, or macrolide (if resistance <25 percent); respiratory fluoroquinolone (levofloxacin, moxifloxacin) as alternative.

Synonyms:

Comorbidity

Presence of two or more chronic conditions in same individual. Common in elderly: hypertension, diabetes, arthritis, COPD, depression. Increases com-

plexity of care, polypharmacy risk, functional decline. Comprehensive assessment needed for each condition and interactions.

Synonyms:

Comparison

A reference in an imaging report to earlier studies used to assess whether a finding has changed.

Synonyms:

Compartment Pressure

The pressure within a closed osteofascial compartment. Markedly elevated pressure can impair capillary perfusion and cause acute compartment syndrome; pressure measurements support but do not replace clinical assessment.

Synonyms:

Compartment Syndrome

A surgical emergency caused by increased pressure within a closed osteofascial compartment, leading to tissue ischemia, necrosis, and permanent functional loss. The lower leg (anterior, lateral, deep posterior, and superficial posterior compartments) and forearm (flexor and extensor compartments) are the most commonly affected sites.

Synonyms:

Competence

Autonomous voluntary authorization given by a competent patient to undergo a specific medical intervention, procedure, or clinical trial. See informed consent.

Synonyms:

Competitive Antagonist

A competitive antagonist is a drug that binds to the same receptor site as an agonist and competes for binding, reducing the effect of the agonist without producing an effect of its own.

Synonyms:

Competitive Inhibition

A type of enzyme inhibition where the inhibitor (I) competes with the substrate (S) for binding to

the enzyme's active site. The inhibitor structurally resembles the substrate and binds reversibly to the free enzyme (E), forming an EI complex that cannot proceed to product.

Synonyms:

Complement C1q Deficiency

Autosomal recessive (C1QA, C1QB, C1QC). C1q essential for classical pathway activation and immune complex clearance. 85-90% develop SLE-like disease (malar rash, photosensitivity, nephritis, anti-nuclear antibodies). Recurrent infections with encapsulated bacteria. Low CH50, low C1q, normal C3/C4.

Synonyms:

Complement C2/C4 Deficiency

C2 deficiency: most common early complement deficiency (1:20,000 Caucasians). SLE-like disease (10-30%), recurrent sinopulmonary infections. C4 deficiency: similar, strong SLE association (C4A/C4B null alleles). Low CH50, low C2 or C4, normal C3. Treatment: SLE management, prophylactic antibiotics, IVIG for recurrent infections.

Synonyms:

Complement C3

The central complement component cleaved into C3a and C3b during activation of the classical, lectin, or alternative pathway. C3b promotes opsonization and formation of downstream convertases; severe C3 deficiency causes recurrent severe infections, especially with encapsulated bacteria.

Synonyms:

Complement Cascade

The ordered activation of 30 serum and membrane proteins (complement) that opsonize pathogens, lyse microbes (membrane attack complex), and promote inflammation.

Synonyms:

Complement Deficiencies

Rare primary immunodeficiencies caused by genetic defects in complement pathway proteins, increasing susceptibility to specific infections and autoimmune

diseases.

Synonyms:

Complete Blood Count

A panel measuring red blood cells, white blood cells, platelets, hemoglobin, hematocrit, red-cell indices, and often a white-cell differential. Results are interpreted using age-, sex-, and laboratory-specific reference ranges.

Synonyms:

Complete Denture

Removable prosthesis replacing all teeth in arch. Maxillary and mandibular. Stability challenging in edentulous patients.

Synonyms:

Complete Response

Disappearance of all detectable signs of a cancer after treatment. It does not necessarily mean that every cancer cell has been eliminated.

Synonyms:

Complex Carbohydrates

Carbohydrates made up of longer chains of sugars, chiefly starches and dietary fiber, found in foods such as whole grains, legumes, vegetables, and potatoes. Fiber is not fully digested and supports bowel function, satiety, and metabolic health, while starch is digested into glucose at a rate that depends on food structure and processing.

Synonyms:

Complex Regional Pain Syndrome

A chronic pain condition characterized by regional pain and sensory changes disproportionate to the inciting event. Type I (reflex sympathetic dystrophy): no identifiable nerve injury. Type II (causalgia): follows a major nerve injury.

Synonyms:

Compliance

The extent to which a person follows a treatment recommendation; adherence is generally preferred because it emphasizes an agreed plan.

Synonyms:

Complicated Grief

Persistent, intense grief that substantially interferes with daily functioning and lasts longer than expected for the person's cultural and social context.

Synonyms:

Complicated Urinary Tract Infection

A urinary infection associated with functional or structural abnormality, obstruction, catheterization, renal impairment, male anatomy, pregnancy, or another factor increasing treatment failure or complication risk. Management requires culture-directed therapy and correction of the underlying problem when possible.

Synonyms:

Complication

Any adverse event arising during or after a surgical procedure, graded by the Clavien-Dindo classification from minor deviation (Grade I) through organ failure (Grade IV) to death (Grade V). Common types include surgical site infection, hemorrhage, wound dehiscence, anastomotic leak, ileus, and venous thromboembolism.

Synonyms:

Complications (Vascular)

Post-procedural issues: bleeding, infection, thrombosis, embolism, limb ischemia.

Synonyms: Vascular

Composite Resin

Tooth-colored restorative material. Bis-GMA or UDMA resin matrix with silica filler. Adhesive bonding. Esthetic but less durable than ceramic.

Synonyms:

Compound Presentation

A fetal presentation where an extremity (hand, arm, foot) presents alongside the vertex or breech. Most common: hand alongside the head. Incidence: 1:300-1:1000. Fetal prognosis is generally good; the prolapsed extremity often retracts as labor progresses.

Management: expectant management in most cases.

Synonyms:

Compounding

Preparation, mixing, or altering of a medicine to meet an individual patient's needs when an appropriate approved product is unavailable.

Synonyms:

Comprehensive Geriatric Assessment

A multidimensional assessment of an older person's medical conditions, medicines, function, cognition, mood, and social support, used to develop an individualized care plan.

Synonyms:

Comprehensive Metabolic Panel

Extended version of BMP including albumin, total protein, alkaline phosphatase, ALT, AST, and bilirubin (total and direct). Evaluates liver function, kidney function, electrolytes, glucose, calcium, and protein status. Uses: preoperative assessment, medication monitoring, and liver/kidney disease evaluation.

Synonyms:

Compression Therapy

Use of external pressure, usually from garments or bandages, to support venous or lymphatic flow and reduce swelling in selected conditions.

Synonyms:

Compression Ultrasound

An ultrasound technique in which gentle pressure is applied to assess whether a vein collapses. Failure of a vein to compress may suggest thrombosis.

Synonyms:

Compressive Atelectasis

Atelectasis caused by external compression of the lung by pleural fluid, air, or a mass. The lung volume is reduced by the external force. It is reversible when the compressing force is relieved (e.g., drainage of pleural effusion).

Synonyms:

Compton Scattering

An interaction in which a photon transfers part of its energy to an electron and changes direction. It contributes to scattered radiation in imaging.

Synonyms:

Compulsions

Repetitive behaviors or mental acts that the individual feels driven to perform in response to an obsession or according to rigid rules. They are aimed at preventing or reducing anxiety or preventing some dreaded event, but are not connected in a realistic way with what they are designed to neutralize.

Synonyms:

Computed Tomography

Cross-sectional imaging using rotating X-ray tube and detectors. Produces axial images, reconstructable into sagittal, coronal, 3D. CT number measured in Hounsfield units (HU): water = 0, air = -1000, bone = +1000. Contrast: iodine-based, enhances vascular structures and perfused organs. Speed: seconds.

Synonyms:

Computed Tomography Scan

Cross-sectional imaging using X-rays and computer processing. Emergency uses: head trauma (hemorrhage, fracture), chest (pulmonary embolism, aortic dissection), abdomen (appendicitis, bowel obstruction), CT pulmonary angiography (CTPA), CT angiography (CTA). Fast, widely available, high sensitivity for acute conditions.

Synonyms:

Concato's Disease

A historical term for primary polycythemia, now generally called polycythemia vera, a myeloproliferative neoplasm causing increased red-cell mass and often elevated blood viscosity.

Synonyms:

Concealed Pregnancy

Pregnancy that is hidden or not recognized until delivery, often by denial (psychogenic) or deliber-

ate concealment; a medicolegal concept relevant to infanticide.

Synonyms:

Concentration

Amount of substance per unit volume. Units: mg/dL, mmol/L, mEq/L, ppm. Conversion: molecular weight needed. Critical for toxicity assessment.

Synonyms:

Conception (Fertilization)

The fusion of a sperm and an ovum in the ampulla of the fallopian tube, forming a zygote. The sperm penetrates the corona radiata and zona pellucida (acrosome reaction). After fertilization, the zygote undergoes cleavage (mitotic division) as it travels toward the uterus. Implantation occurs approximately 6-10 days after ovulation.

Synonyms: Fertilization

Conchae

Curved bony structures covered by mucosa inside the nasal cavity that warm, humidify, and filter inhaled air.

Synonyms:

Conclusion

The part of a report that summarizes the main findings and their clinical significance or recommended next steps.

Synonyms:

Concomitant

Occurring simultaneously. Concomitant medication: additional drug taken with primary treatment.

Synonyms:

Concordance

Probability both twins have same trait. Monozygotic (identical) twins > dizygotic (fraternal) for genetic traits. High concordance suggests genetic influence.

Synonyms:

Concrescence

Union of adjacent teeth by cementum only. Usually posterior teeth.

Synonyms:

Concretio Cordis

Abnormal adhesion or fusion of structures within or around the heart, including adhesion of the pericardial surfaces or fusion of cardiac components.

Synonyms:

Concussion

A form of mild traumatic brain injury caused by a biomechanical force (direct blow to the head, face, neck, or elsewhere on the body with impulsive force transmitted to the head), resulting in a transient disturbance of brain function without structural damage visible on conventional neuroimaging.

Synonyms:

Condition

A general term for a state of bodily health or, in medical usage, a specific deviation from normal in structure or function that may or may not constitute a disease, including complaints lacking a discrete pathologic basis and overt diagnoses.

Synonyms:

Conduct Disorder

A childhood or adolescent disorder involving a persistent pattern of behavior that violates the rights of others or major age-appropriate rules. Examples include aggression, property destruction, deceitfulness, theft, and serious rule violations.

Synonyms:

Conduction Deafness

Hearing loss caused by impaired transmission of sound through the external or middle ear, with the inner ear and neural auditory pathways relatively preserved.

Synonyms:

Conductive Deafness

Hearing loss resulting from a problem in the external

auditory canal, tympanic membrane, or middle ear that reduces conduction of sound to the inner ear.

Synonyms:

Conductive Hearing Loss

Hearing loss caused by impaired transmission of sound through the outer or middle ear. Audiometry commonly shows an air-bone gap, and causes include earwax, middle-ear fluid, perforation, otosclerosis, and ossicular disease.

Synonyms:

Condylar Process

The rounded articular projection of a bone, especially the mandibular process that articulates with the temporal bone to form the temporomandibular joint.

Synonyms:

Condyloma Acuminata

Soft, wart-like genital or perianal growths caused by certain human papillomavirus types.

Synonyms:

Condyloma acuminatum

A benign, exophytic, papillomatous growth of the anogenital skin caused by human papillomavirus, most commonly types 6 and 11. They present as soft, flesh-colored, verrucous papules or plaques in the genital and perianal region. Condylomata are sexually transmitted and may be associated with cervical dysplasia.

Synonyms:

Condyloma Latum

Mucocutaneous lesion of secondary syphilis caused by *Treponema pallidum*, distinct from condyloma acuminata (genital wart).

Synonyms:

Condylomata lata

Broad, flat, moist, grayish-white papules occurring in secondary syphilis, typically found in the anogenital region and other intertriginous areas. They are highly infectious and contain abundant *Treponema*

pallidum organisms. Diagnosis is by darkfield microscopy or serological testing for syphilis.

Synonyms:

Cone-Beam Computed Tomography

Three-dimensional dental imaging using a cone-shaped X-ray beam and a rotating detector. It provides high-resolution views of teeth and maxillofacial bone with generally less radiation than conventional medical CT, but should be used only when the additional information affects care.

Synonyms:

Confabulation

Production of false or inaccurate statements or memories without conscious intent to deceive, often associated with memory impairment or frontal-lobe dysfunction.

Synonyms:

Confidentiality

The ethical and legal duty of healthcare professionals to protect patient information from unauthorized disclosure. Founded on the principle of respect for patient autonomy and trust, confidentiality is a core requirement of medical ethics (GMC guidelines) and law (GDPR, Data Protection Act, Caldicott principles).

Synonyms:

Confirmatory Test

A test used to verify a preliminary or screening result, often with a different method or greater specificity. Confirmation should be selected according to the condition, specimen, timing, and accepted clinical guidelines.

Synonyms:

Confounding

Distortion of association by third variable. Examples: age confounding relationship between exposure and disease. Controlled by matching, stratification, regression.

Synonyms:

Confusion (Delirium)

Acute onset fluctuating disturbance in attention and awareness. Usually reversible. Precipitants: infection, medications, metabolic derangement, pain, constipation, urinary retention. Differentiate from dementia (chronic, progressive). Treatment: identify and treat underlying cause, environmental modification, avoid anticholinergics.

Synonyms: Delirium

Confusion Assessment Method

A standardized bedside algorithm for detecting delirium. It identifies acute or fluctuating change, inattention, disorganized thinking, and altered level of consciousness; delirium requires the first two features plus either of the latter two.

Synonyms:

Congenital Adrenal Hyperplasia

Group of autosomal recessive disorders caused by enzyme deficiencies in the adrenal steroidogenesis pathway. Twenty-one hydroxylase deficiency is the most common accounting for approximately ninety-five percent of cases.

Synonyms:

Congenital Cataract

Opacification of the crystalline lens present at birth, a leading cause of treatable childhood blindness worldwide.

Synonyms:

Congenital CMV

Cytomegalovirus infection acquired in utero, the most common congenital viral infection. Maternal primary infection poses highest risk of fetal transmission and disease. Can cause microcephaly, sensorineural hearing loss, chorioretinitis, hepatosplenomegaly, and petechiae. Diagnosis by CMV PCR in urine or saliva.

Synonyms:

Congenital Contractural Arachnodactyly

An inherited connective-tissue disorder characterized by long slender fingers and toes, congenital

flexion contractures, muscular hypoplasia, and sometimes kyphoscoliosis.

Synonyms:

Congenital cytomegalovirus infection

Cytomegalovirus infection acquired before birth. It may cause hearing loss, developmental problems, microcephaly, or no symptoms.

Synonyms:

Congenital Diaphragmatic Hernia

A defect in the diaphragm allowing abdominal organs to herniate into the thoracic cavity, causing pulmonary hypoplasia and respiratory distress at birth. Most commonly a posterolateral (Bochdalek) defect on the left side. Presents with cyanosis, scaphoid abdomen, and bowel sounds in the chest.

Synonyms:

Congenital Disorder

A medical condition or structural abnormality present in an individual from birth, which may be caused by genetic factors or environmental influences in the womb.

Synonyms:

Congenital Glaucoma

A rare form of glaucoma (1 in 10,000-20,000 births) caused by developmental anomalies of the trabecular meshwork and anterior chamber angle, impairing aqueous humor outflow. Most cases are sporadic; familial forms are autosomal recessive (CYP1B1 gene mutations).

Synonyms:

Congenital Heart Disease

Structural or functional abnormalities of the heart or great vessels present at birth. Examples include septal defects, patent ductus arteriosus, tetralogy of Fallot, transposition of the great arteries, coarctation of the aorta, and hypoplastic left-heart syndrome.

Synonyms:

Congenital Heart Murmur

A heart murmur heard in a newborn or infant. It may be innocent or may indicate a structural heart defect; assessment considers the murmur's characteristics and associated symptoms or examination findings.

Synonyms:

Congenital Hip Dislocation

Abnormal development or displacement of the hip joint present at birth or developing in infancy, now generally called developmental dysplasia of the hip.

Synonyms:

Congenital Hyperinsulinism

Condition of inappropriate insulin secretion in neonates and infants causing severe hypoglycemia. Most commonly caused by mutations in the KATP channel genes ABCC8 and KCNJ11. Histologically classified into focal and diffuse forms. Presents with severe symptomatic hypoglycemia in the first days of life.

Synonyms:

Congenital Hyperthyroidism

Thyrotoxicosis present at birth most commonly caused by maternal Graves disease with transplacental passage of thyroid-stimulating immunoglobulins. Presents with tachycardia, irritability, poor feeding, weight loss, and goiter. Transient neonatal hyperthyroidism resolves as maternal antibodies are cleared over weeks to months.

Synonyms:

Congenital Hypothyroidism

Thyroid hormone deficiency present at birth occurring in approximately one in two thousand to four thousand live births. Most common cause is thyroid dysgenesis including aplasia, ectopia, and hypoplasia. Universal newborn screening with TSH or T4 allows early detection and treatment preventing intellectual disability.

Synonyms:

Congenital Megacolon

Hirschsprung disease, a congenital absence of enteric ganglion cells in a segment of the bowel that causes functional obstruction and enlargement of the proximal colon.

Synonyms:

Congenital melanocytic nevus

A melanocytic nevus present at birth or appearing within the first few weeks of life, ranging from small (< 1.5 cm) to giant lesions covering large body surface areas. It results from proliferation of melanocytes during embryonic development and carries a small but important risk of melanoma, which is higher in larger lesions.

Synonyms:

Congenital nevus

A melanocytic mole present at birth or developing soon afterward. It is composed of melanocytes in the epidermis and dermis. Size, location, and changes over time determine the need for clinical assessment and surveillance.

Synonyms:

Congenital Pneumonia

Lung infection acquired in utero, often from ascending chorioamnionitis. Presents with respiratory distress, fever or hypothermia, and sepsis. Common organisms include Group B Streptococcus, E. coli, and Ureaplasma. Diagnosis by chest X-ray showing infiltrates and blood culture.

Synonyms:

Congenital Rubella Syndrome

Fetal infection with rubella virus, particularly dangerous in the first trimester. Classic triad: congenital heart disease (patent ductus arteriosus, pulmonary stenosis), cataracts, and sensorineural hearing loss. Also causes hepatosplenomegaly, thrombocytopenia, and blueberry muffin rash.

Synonyms:

Congenital Scoliosis

A lateral curvature of the spine caused by congenital

vertebral anomalies that arise during embryogenesis (failure of formation or segmentation). Failure of formation: hemivertebra (wedge-shaped vertebra causing progressive curvature). Failure of segmentation: unilateral unsegmented bar (block of bone on one side).

Synonyms:

Congenital Syphilis

Treponema pallidum infection acquired transplacentally. Can cause stillbirth, prematurity, hepatosplenomegaly, rash, snuffles, osteochondritis, and Hutchinson teeth. Diagnosed by darkfield microscopy, VDRL/RPR in neonatal serum, or PCR.

Synonyms:

Congenital Zika Syndrome

Fetal brain infection with Zika virus, causing microcephaly, brain abnormalities, eye defects, hearing loss, and limb contractures. Transmission occurs via mosquito bite or sexual contact. Diagnosis by Zika virus PCR in maternal serum or amniotic fluid. No specific treatment. Prevention by avoiding endemic areas during pregnancy.

Synonyms:

Congestion

A passive vascular phenomenon of engorgement of a tissue or organ with blood from impaired venous or lymphatic drainage. Chronic venous congestion produces stasis, hypoxia, dilated vessels, edema, hemorrhage, and hemosiderin-laden macrophages, exemplified by the lungs (heart failure cells) and liver (nutmeg liver).

Synonyms:

Congestive Heart Failure

A historical term for heart failure with clinical fluid congestion. Current terminology is heart failure, which may occur with or without congestion and is classified by left-ventricular ejection fraction, symptoms, and disease stage.

Synonyms:

Conization

Surgical removal of a cone-shaped portion of the cervix for diagnosis or treatment of cervical dysplasia or selected early cervical cancers.

Synonyms:

Conjoined Twins

Monozygotic, monochorionic, monoamniotic twins who are physically connected at birth, resulting from incomplete fission of the fertilized ovum after day 13 of fertilization. Incidence: 1 in 50,000-100,000 births.

Synonyms:

Conjunctiva

The conjunctiva is a thin, transparent, mucous membrane that lines the inner surface of the eyelids (palpebral conjunctiva) and covers the anterior surface of the sclera (bulbar conjunctiva), forming a continuous sheet that protects the eye and facilitates smooth eyelid movement.

Synonyms:

Conjunctival squamous-cell carcinoma

A malignant tumor of the conjunctival epithelium, typically arising from the limbal area. It is associated with UV radiation exposure and can invade locally if not treated promptly.

Synonyms:

Conjunctivitis

Inflammation of the conjunctiva, the thin, transparent mucous membrane lining the inner surface of the eyelids and the anterior surface of the sclera. Conjunctivitis is the most common cause of red eye and is classified by etiology.

Synonyms:

Conjunctivoplasty

Plastic or reconstructive surgery of the conjunctiva, performed to repair defects, scarring, adhesions, or other abnormalities of the ocular surface.

Synonyms:

Conn's Syndrome

Primary hyperaldosteronism caused by autonomous secretion of aldosterone, leading to hypertension and often low serum potassium.

Synonyms:

Connective Tissue

A diverse type of tissue that supports, binds, protects, and insulates organs and structures throughout the body.

Synonyms:

Connective Tissue Disease

Autoimmune diseases affecting connective tissue. Examples: SLE, scleroderma, RA, Sjogren syndrome, mixed connective tissue disease. Overlap syndromes common.

Synonyms:

Conscious Sedation

A drug-induced depression of consciousness in which patients respond purposefully to verbal or tactile stimulation, maintain a patent airway, and retain protective reflexes. Typical agents include midazolam, fentanyl, or low-dose propofol. Indications include endoscopic and minor surgical procedures.

Synonyms:

Consolidation

An area of lung in which air spaces are filled with fluid, cells, or other material, increasing its density on imaging. Causes include pneumonia, edema, hemorrhage, and tumor.

Synonyms:

Consolidation Therapy

Additional treatment given after remission to eliminate residual disease and reduce the risk of relapse.

Synonyms:

Constipation

Infrequent or difficult passage of stools, often with hard stools, straining, incomplete evacuation, or a sensation of blockage. Causes include diet, medicines, functional disorders, and structural or

systemic disease.

Synonyms:

Constitutional delay in puberty

A normal variant in which pubertal development is delayed but eventually progresses normally; growth and bone age are typically delayed.

Synonyms:

Constraint-Induced Movement Therapy

Rehabilitation that limits use of a less-affected limb while providing structured practice with an affected limb to improve functional use in selected people.

Synonyms:

Constrictive Pericarditis

Thickening and fibrosis of the pericardium restricting diastolic ventricular filling. Presents with jugular venous distension, peripheral edema, hepatomegaly, and Kussmaul sign. Causes include idiopathic, post-viral, radiation, and tuberculosis. Pericardiectomy is the definitive treatment.

Synonyms:

Consultation-Liaison Psychiatry

The subspecialty of psychiatry focused on the interface between psychiatry and general medical illness. Psychiatrists provide consultation on medical-surgical wards for patients with psychiatric symptoms arising from or coexisting with medical conditions.

Synonyms:

Contact Allergen Testing

Patch testing identifies allergens causing allergic contact dermatitis. Standard panel includes 35 common allergens (nickel, fragrance mix, balsam of Peru, formaldehyde, rubber accelerators, topical antibiotics, preservatives). Patches are applied to the back for 48 hours and read at 48, 72, and 96 hours.

Synonyms:

Contact Dermatitis

An inflammatory skin reaction caused by contact with an external substance. It may be allergic,

involving delayed immune sensitization, or irritant, caused by direct chemical or physical injury.

Synonyms:

Contact precautions

Infection control measures used for patients colonised or infected with multidrug-resistant organisms. Precautions include gown and glove use, patient placement in single rooms, and dedicated equipment. Contact precautions are used for MRSA, VRE, CRE, and other resistant organisms.

Synonyms:

Contact Tracing

Identifying and monitoring persons exposed to infectious disease. Critical for outbreak control. Examples: COVID-19, Ebola, TB.

Synonyms:

Contagious Disease

An infectious disease that can be transmitted directly or indirectly from one person, animal, or source to another.

Synonyms:

Contamination

Accidental presence of microorganisms in a specimen, on a surface, or in a normally sterile material without true infection of the host. Contamination can produce misleading culture results and must be distinguished from colonization and invasive disease.

Synonyms:

Continuing Medical Education

Postgraduate education that maintains and updates a clinician's knowledge, skills, and professional competence.

Synonyms:

Continuity of Care

Consistent and coordinated care over time and across clinicians or settings, integrating the patient's history, current needs, treatment plan, and preferences. It supports safety, adherence, prevention, and chronic-disease outcomes.

Synonyms:

Continuous Electronic Fetal Monitoring

The continuous recording of fetal heart rate (FHR) and uterine contractions using external transducers (Doppler ultrasound and tocodynamometer) or internal devices (fetal scalp electrode and intrauterine pressure catheter). Used intrapartum to detect fetal hypoxia.

Synonyms:

Continuous Glucose Monitoring

Technology measuring interstitial glucose levels continuously providing real-time glucose data, trends, and alerts. Sensors are inserted subcutaneously typically in the abdomen or arm and measure glucose every five minutes. Devices include Dexcom, FreeStyle Libre, and Medtronic Guardian systems.

Synonyms:

Continuous Kidney Replacement Therapy

A prolonged extracorporeal blood-purification therapy, usually delivered continuously in an intensive-care setting. It provides gradual fluid and solute removal and is useful for hemodynamically unstable patients with severe AKI.

Synonyms:

Continuous Murmurs

Murmurs that persist throughout systole and diastole without interruption, produced by blood flowing continuously through an abnormal connection. The most common cause is patent ductus arteriosus (PDA), where blood flows from the aorta to pulmonary artery throughout the cardiac cycle.

Synonyms:

Continuous Positive Airway Pressure

Noninvasive respiratory support that delivers a constant positive pressure throughout the breathing cycle to keep the upper airway or alveoli open.

Synonyms:

Contraception

Methods to prevent pregnancy.

Synonyms:

Contraception and Birth Control

Contraception encompasses methods used to prevent pregnancy, including hormonal options like oral contraceptives, patches, rings, injections, and implants, as well as non-hormonal methods like copper IUDs, barrier methods, diaphragms, and permanent sterilization.

Synonyms:

Contraception for Adolescents

Methods to prevent unintended pregnancy. Options: combined oral contraceptives, progestin-only pills, depot medroxyprogesterone acetate, contraceptive implant (Nexplanon), intrauterine devices (IUDs), condoms, and abstinence.

Synonyms:

Contracted Pelvis

A pelvis whose size or shape is reduced or abnormal enough to interfere with passage of the fetus during labor.

Synonyms:

Contraction Stress Test

An antepartum test that evaluates the fetal heart rate response to uterine contractions. Contractions are induced with oxytocin or nipple stimulation (until 3 contractions in 10 minutes). Negative (normal): no late or significant variable decelerations. Positive (abnormal): late decelerations with $\geq 50\%$ of contractions.

Synonyms:

Contractions

Rhythmic uterine muscular contractions of labor that produce cervical dilation and effacement, driving descent of the fetus. Characterized by frequency, duration, and intensity; progress is monitored by partogram and tocography (CTG). Braxton Hicks contractions: irregular, non-progressive, painless prelabor contractions.

Synonyms:

Contracture

Permanent or semi-permanent limitation of passive joint range of motion caused by shortening or structural change in muscle, tendon, capsule, fascia, skin, or other periarticular tissue. Prevention and treatment depend on cause and stage.

Synonyms:

Contracture Prevention

Measures such as positioning, stretching, exercise, splinting, orthoses, and serial casting that help preserve joint movement in people at risk of fixed shortening.

Synonyms:

Contraindication

A condition or factor that renders a particular procedure, treatment, or medication inadvisable. Absolute contraindication: condition where intervention should never be performed. Relative contraindication: risks outweigh benefits but may be acceptable in specific circumstances.

Synonyms:

Contralateral

Located on the opposite side of the body.

Synonyms:

Contrast Agent

Substance enhancing image visibility. X-ray/CT: iodine-based (positive contrast). MRI: gadolinium-based (shortens T1, bright on T1). Ultrasound: microbubble agents. Barium sulfate for GI studies.

Synonyms:

Contrast Echocardiography

Use of microbubble contrast agents to enhance endocardial border definition and assess myocardial perfusion. Indicated for suboptimal non-contrast echo images and assessment of myocardial viability. Microbubbles remain entirely within the intravascular space, making them ideal for perfusion assessment.

Synonyms:

Contrast Reaction

Adverse reaction to contrast agent. Mild: nausea, urticaria. Severe: anaphylaxis, bronchospasm. Pre-medication for prior reactions.

Synonyms:

Contrast-Associated Acute Kidney Injury

Acute worsening of kidney function occurring after administration of contrast, whether or not contrast is causal. Risk assessment includes baseline kidney function, hemodynamic status, diabetes, nephrotoxins, urgency, and the need to avoid unnecessary contrast exposure.

Synonyms:

Contrast-Enhanced Ultrasound

Ultrasound using microbubble contrast agents. Improves lesion characterization, perfusion assessment.

Synonyms:

Contrast-Induced Nephropathy

Acute kidney injury after iodinated contrast administration. Risk factors: pre-existing renal impairment, diabetes, dehydration. Prevention: hydration, lowest contrast volume, N-acetylcysteine controversial.

Synonyms:

Contrecoup

An injury occurring on the side of an organ opposite the site of impact, especially a brain injury produced when the brain moves within the skull after trauma.

Synonyms:

Control Group

The comparison group in a study, which may receive usual care, a placebo, or no intervention according to the study design.

Synonyms:

Controlled Cord Traction

A technique for active management of third-stage labor: gentle, steady traction on the umbilical cord with one hand while the other hand applies suprapubic counter-pressure (to prevent uterine inver-

sion). Performed after signs of placental separation. The Brandt-Andrews maneuver and the Finocchietti technique are CCT methods.

Synonyms:

Controlled Substance

A drug or chemical whose manufacture, possession, and use are regulated by government authorities due to its potential for abuse, dependence, or harm.

Synonyms:

Contusion

A closed soft-tissue injury caused by blunt force, producing bleeding into tissues without an open wound. It commonly causes pain, swelling, and ecchymosis; severe contusions may involve muscle necrosis, compartment syndrome, internal bleeding, or associated bone and organ injury.

Synonyms:

Conus Medullaris Syndrome

A clinical condition resulting from damage to the conus medullaris, the tapered, terminal end of the spinal cord located at approximately the L1-L2 vertebral level.

Synonyms:

Convergence Insufficiency

Inability to maintain binocular convergence on near objects, causing eyestrain, headaches, blurred near vision, and transient diplopia during reading. Common in children and young adults; treated with convergence exercises and base-in prism, with surgery rarely needed.

Synonyms:

Coombs Test

A laboratory test that detects antibodies or complement attached to red blood cells, or antibodies in serum that can react with red cells. It is used in evaluating immune hemolysis and blood compatibility.

Synonyms:

Cooper's Ligament

Fibrous connective-tissue septa extending from the deep surface of the breast toward the skin and pectoral fascia. Tumor invasion or fibrosis may cause skin retraction.

Synonyms:

Coordination

Smooth, efficient movement. Tests: finger-to-nose, heel-to-shin, rapid alternating movements.

Synonyms:

COPD

Chronic obstructive pulmonary disease is a progressive, largely irreversible airflow limitation caused by chronic bronchitis, emphysema, or both, most commonly due to cigarette smoking. It presents with chronic cough, sputum production, and exertional dyspnea. Spirometry shows a reduced FEV1/FVC ratio.

Synonyms:

COPD Exacerbation

Acute worsening of respiratory symptoms beyond normal day-to-day variation in a patient with COPD that leads to additional therapy. Common triggers include viral or bacterial infection, air pollution, and cardiopulmonary comorbidity.

Synonyms:

COPD Rehabilitation

Comprehensive intervention for COPD patients including exercise training, education, behavior change. Components: aerobic exercise, strength training, breathing techniques, nutrition, psychosocial support. Improves exercise capacity, quality of life, reduces hospitalizations.

Synonyms:

Copper

An essential trace element required for iron transport, connective-tissue cross-linking, energy metabolism, neurotransmitter synthesis, and antioxidant enzymes. Deficiency can cause anemia, neutropenia, impaired neurologic function, and bone

abnormalities; excess is toxic and accumulates in Wilson disease.

Synonyms:

copy number variation

Deletions or duplications of DNA segments >1 kb. Contribute to genetic diversity and disease. Examples: 22q11.2 deletion, Williams syndrome (7q11.23 deletion).

Synonyms:

Cor Pulmonale

Right ventricular hypertrophy and dilation from pulmonary hypertension due to lung disease. Features include peripheral edema, JVD, and hepatomegaly.

Synonyms:

Cor Triatriatum

A rare congenital heart defect where the left atrium is divided into two chambers by a fibromuscular membrane, separating the pulmonary venous chamber (posterior) from the true left atrium (anterior) containing the left atrial appendage and mitral valve. The membrane obstructs pulmonary venous return, mimicking mitral stenosis.

Synonyms:

Coracoid Process

Hook-like scapular projection extending anteriorly and laterally. Attachment for 3 muscles (pectoralis minor, coracobrachialis, short head of biceps) and 3 ligaments. Important surgical landmark. Fractures uncommon but may occur with direct trauma or shoulder dislocations.

Synonyms:

Cord Presentation

The presence of the umbilical cord between the presenting fetal part and the cervix, with intact membranes. Risk factors: malpresentation, unstable lie, low-lying placenta, and long cord. If the membranes rupture, the cord may prolapse (umbilical cord prolapse).

Synonyms:

Cordocentesis

A prenatal diagnostic procedure in which fetal blood is sampled from the umbilical cord, usually under ultrasound guidance.

Synonyms:

Cordotomy

Surgical division of selected nerve fibers, especially a spinal cord tract, to interrupt transmission of severe chronic pain.

Synonyms:

Core Biopsy

Removal of a cylindrical sample of tissue with a hollow cutting needle for microscopic examination, commonly used for breast, liver, prostate, and other lesions.

Synonyms:

Core Needle Biopsy

Biopsy using core needle. CT, ultrasound, or MRI guidance.

Synonyms:

Cori Cycle

Lactate produced by muscles transported to liver, converted to glucose via gluconeogenesis, returned to muscles.

Synonyms:

Cornea

Transparent, avascular, dome-shaped anterior eye surface providing approximately two-thirds of total refractive power. Five layers: epithelium (stratified squamous, rapidly regenerating), Bowman's membrane, stroma (thickest, regular collagen), Descemet's membrane, endothelium (single cell layer maintaining transparency).

Synonyms:

Corneal Abrasion

Loss of corneal epithelium caused by mechanical trauma — contact with fingernail, makeup brush, foreign body, contact lens overwear, dry eye, sports injury, paper edge, or surgical instrumentation.

Most common eye injury presenting to emergency departments.

Synonyms:

Corneal Cross-Linking

Corneal collagen cross-linking is a minimally invasive therapeutic procedure that strengthens the corneal stroma by creating additional chemical bonds between collagen fibrils, thereby stiffening the cornea and halting or slowing the progression of corneal ectatic disorders, particularly keratoconus and post-refractive surgery ectasia.

Synonyms:

Corneal Edema

Excess fluid within the corneal stroma or epithelium causing corneal thickening, reduced transparency, glare, and blurred vision. Causes include endothelial dysfunction, acute glaucoma, inflammation, trauma, and postoperative injury.

Synonyms:

Corneal Implant

An implanted device or tissue substitute placed in or on the cornea to restore vision, replace diseased tissue, or alter corneal shape.

Synonyms:

Corneal Ulcer

A corneal ulcer is a defect in the corneal epithelium with associated stromal inflammation and necrosis, typically caused by infectious or non-infectious mechanisms, and it is a sight-threatening condition that requires prompt diagnosis and treatment.

Synonyms:

Corneitis

Inflammation of the cornea, often producing pain, photophobia, tearing, and impaired vision. It may be infectious, immune-mediated, traumatic, or related to exposure.

Synonyms:

Cornelia de Lange Syndrome

A genetic disorder caused by mutations in genes of

the cohesin complex (NIPBL 60%, SMC1A, SMC3, RAD21, HDAC8).

Synonyms:

Corns and Calluses

Corns (heloma) are focal areas of hyperkeratosis caused by pressure and friction, typically on toes. Hard corns (heloma durum) occur on dorsal toes; soft corns (heloma molle) occur between toes. Calluses (tyloma) are diffuse hyperkeratosis on weight-bearing surfaces.

Synonyms:

Coronal Caries

Caries on clinical crown. Smooth surface or pits/fissures.

Synonyms:

Coronal Plane

A vertical plane that divides the body or an organ into front (anterior) and back (posterior) portions.

Synonyms:

Coronary Angiography

Invasive imaging of the coronary arteries using catheter-delivered contrast and X-ray fluoroscopy. It shows coronary anatomy and stenosis and can support treatment planning; noninvasive tests may be appropriate in other clinical settings.

Synonyms:

Coronary Arteries

The right and left arteries arising from the aortic sinuses that supply the myocardium. Their branches include the right coronary, anterior interventricular, and circumflex arteries.

Synonyms:

Coronary Artery

One of the blood vessels branching from the aorta that supplies oxygen-rich blood directly to the heart muscle.

Synonyms:

Coronary Artery Aneurysm

A localized dilatation of a coronary artery exceeding the normal vessel diameter by approximately 1.5 times. It may be caused by atherosclerosis, Kawasaki disease, connective-tissue disorders, infection, trauma, or an iatrogenic procedure, and can lead to thrombosis, distal embolization, myocardial ischemia, or rupture.

Synonyms:

Coronary Artery Bypass

A surgical procedure that creates a new route for blood flow around a narrowed or blocked coronary artery using a vascular graft.

Synonyms:

Coronary Artery Bypass Grafting

A surgical revascularization procedure for severe coronary artery disease (CAD). Grafts, most commonly the left internal mammary artery (LIMA) and saphenous vein grafts (SVG), are used to bypass stenotic coronary arterial segments. Indicated for multi-vessel CAD, left main coronary artery stenosis, or severe CAD in diabetic patients.

Synonyms:

Coronary Artery Disease

Narrowing or occlusion of coronary arteries, usually due to atherosclerosis, reducing blood flow to the myocardium. Risk factors include hypertension, diabetes, hyperlipidemia, smoking, family history, and obesity. CAD can present as stable angina, acute coronary syndromes (unstable angina, NSTEMI, STEMI), or sudden cardiac death.

Synonyms:

Coronary Artery Spasm

Transient intense constriction of an epicardial coronary artery that reduces myocardial blood flow. It may cause rest angina and transient ST-segment elevation and can be triggered by smoking, stimulants, or endothelial dysfunction; calcium-channel blockers and nitrates are commonly used for prevention and relief.

Synonyms:

Coronary Calcium Score

A CT-based measurement of coronary artery calcification, quantified as the Agatston score. A score of 0 indicates very low risk of cardiovascular events; >400 indicates high burden and significant atherosclerosis. It is used for cardiovascular risk stratification in asymptomatic individuals and may guide statin therapy decisions.

Synonyms:

Coronary Calcium Scoring

Non-contrast CT measuring calcified plaque in coronary arteries. Agatston score predicts cardiovascular risk.

Synonyms:

Coronary Circulation

The vascular system supplying blood to the myocardium. The left coronary artery (LCA) divides into the left anterior descending (LAD) and circumflex (LCx) arteries. The right coronary artery (RCA) supplies the right ventricle, SA node (in 60% of people), and inferior left ventricular wall.

Synonyms:

Coronary Dominance

Determined by which artery gives rise to the posterior descending artery (PDA). Right coronary dominance (85% of people): RCA gives rise to PDA. Left coronary dominance (8%): LCx gives rise to PDA. Codominance (7%): both RCA and LCx contribute.

Synonyms:

Coronary Heart Disease

Disease caused by reduced blood flow through the coronary arteries, usually due to atherosclerotic plaque. It may cause angina, myocardial infarction, heart failure, or sudden cardiac death. Also called coronary artery disease.

Synonyms: coronary artery disease.

Coronary Insufficiency

Inadequate blood flow through the coronary circulation to meet myocardial oxygen demand, usually because of coronary artery disease.

Synonyms:

Coronary Microvascular Dysfunction

Impairment of the small coronary arteries and arterioles causing impaired coronary flow reserve despite normal epicardial coronary arteries. Common in women, patients with diabetes, and hypertension. Causes chest pain (angina equivalent) and may contribute to heart failure with preserved ejection fraction.

Synonyms:

Coronary Occlusion

Obstruction of a coronary artery, commonly by atherosclerotic plaque and thrombus, that can cause myocardial ischemia or infarction.

Synonyms:

Coronary Sinus

A large vein on the back of the heart that collects de-oxygenated blood from the heart muscle and drains it into the right atrium.

Synonyms:

Coronary Stent

Mesh tube keeping coronary artery open after angioplasty. Types: bare-metal (higher restenosis), drug-eluting (releases antiproliferative drug, lower restenosis but prolonged DAPT). Complications: stent thrombosis, restenosis, bleeding (from DAPT).

Synonyms:

Coronary Thrombosis

Formation of a blood clot in a coronary artery, potentially obstructing blood flow and causing myocardial infarction.

Synonyms:

Coronavirus Disease 2019

A respiratory and systemic infectious disease caused by SARS-CoV-2. Illness ranges from asymptomatic infection to pneumonia, respiratory failure, and multisystem complications.

Synonyms:

Corpse

The dead body of a human being; the subject of medicolegal examination. Forensic assessment of a corpse includes identification, determination of death and time of death (rigor mortis, livor mortis, algor mortis, vitreous potassium, gastric emptying), external and internal examination, and collection of evidence.

Synonyms:

Corpus Callosum

Brain's largest white matter tract with approximately 200 million axons connecting left and right hemispheres. Four parts: rostrum, genu, body, splenium. Facilitates interhemispheric communication for sensory, motor, and cognitive integration.

Synonyms:

Corrected Age

The age of a preterm infant calculated by subtracting the number of weeks born before 40 weeks of gestation from chronological age. Corrected age helps interpret growth and developmental milestones during early childhood, commonly until about 2 years of age.

Synonyms:

Corrigan Pulse

A forceful, rapidly rising and collapsing arterial pulse, classically associated with aortic regurgitation.

Synonyms:

Corrosive

Substance causing tissue destruction by chemical action. Acids: coagulation necrosis, eschar. Alkalis: liquefaction necrosis, deep penetration. Ingestion: avoid emesis, endoscopy, surgical consultation.

Synonyms:

Corti's Ganglion

The spiral ganglion of the cochlea, containing the cell bodies of sensory neurons that transmit auditory information from the organ of Corti.

Synonyms:

Cortical Cataract

A type of age-related lens opacity that begins in the peripheral lens cortex as wedge-shaped or spoke-like opacities that extend centripetally toward the visual axis, caused by disruption of the normally orderly arrangement of lens fibers and the accumulation of fluid between them.

Synonyms:

Corticobasal Degeneration

A rare, progressive neurodegenerative disorder characterized by asymmetric cortical and basal ganglia dysfunction. Presents with asymmetric parkinsonism (rigidity, bradykinesia), apraxia (loss of learned motor skills), alien limb phenomenon (involuntary, purposeless movements), cortical sensory loss, myoclonus, and dystonia.

Synonyms:

Corticosteroids

Synthetic glucocorticoids with potent anti-inflammatory and immunosuppressive effects. Examples include prednisone, prednisolone, methylprednisolone, dexamethasone, and hydrocortisone. They suppress inflammatory gene expression and inhibit immune cell function.

Synonyms:

Corticosteroids Mechanism

Corticosteroids exert their anti-inflammatory and immunosuppressive effects primarily by binding to intracellular glucocorticoid receptors, which then translocate to the nucleus and modulate gene transcription.

Synonyms:

Cortisol

The primary glucocorticoid produced by the adrenal cortex (zona fasciculata) under ACTH control; essential for stress response, metabolism, and homeostasis. Functions: gluconeogenesis, glycogenolysis, protein catabolism, lipolysis, anti-inflammatory/immunosuppressive effects, and maintenance of vascular tone.

Synonyms:

Coryza

Acute inflammation of the nasal mucous membranes with nasal discharge and obstruction, commonly occurring in the common cold or other upper-respiratory infection.

Synonyms:

Cosmetic Dermatology

Cosmetic dermatology encompasses aesthetic procedures. Botulinum toxin injections (Botox, Dysport, Xeomin) relax facial muscles reducing wrinkles. Dermal fillers (hyaluronic acid, calcium hydroxylapatite, poly-L-lactic acid, polymethylmethacrylate) restore volume.

Synonyms:

Cost-Effectiveness

Comparison of costs and outcomes of interventions. Used for resource allocation.

Synonyms:

Costochondritis

Inflammation of the costochondral or costosternal junctions, the most common cause of chest wall pain. Presents with sharp, reproducible tenderness on palpation of the anterior chest, usually unilateral involving the 2nd to 5th ribs. May follow respiratory infection, trauma, or vigorous coughing, but often idiopathic.

Synonyms:

Cot Death

Sudden infant death syndrome, the sudden unexplained death of an apparently healthy infant, usually during sleep, that remains unexplained after investigation.

Synonyms:

Cough

A complex reflex arc protecting the airway by clearing secretions, irritants, and foreign material from the tracheobronchial tree.

Synonyms:

Cough Augmentation

Techniques to improve cough effectiveness in patients with neuromuscular disease or chest wall weakness. Methods include manually assisted cough (abdominal thrust timed with cough), mechanical insufflation-exsufflation (CoughAssist device), and breath stacking with a resuscitation bag.

Synonyms:

Count Rate

Number of detected events per second. Dead time losses at high count rates.

Synonyms:

Countercurrent Multiplication

The renal medullary process in which opposing tubular fluid flow and selective permeability along the loop of Henle generate a corticomedullary osmotic gradient. This gradient permits collecting-duct water reabsorption when antidiuretic hormone is present.

Synonyms:

Countertransference

The therapist's emotional reactions to the patient, which may be influenced by the therapist's own unresolved conflicts or may be a response to the patient's transference. Awareness of countertransference is essential for effective therapy and can provide valuable clinical information about the patient's interpersonal style.

Synonyms:

Coup-Contrecoup Injury

Brain injury from acceleration-deceleration trauma. Coup: injury at site of impact. Contrecoup: injury on opposite side. Common in falls, motor vehicle accidents.

Synonyms:

Courvoisier Sign

Clinical finding of a palpable non-tender gallbladder in obstructive jaundice suggesting malignant biliary obstruction. In gallstone disease, the gallbladder is typically fibrotic and not palpable, whereas in

malignant obstruction it is distended because the wall is initially normal and compliant.

Synonyms:

Covered Stent (Vascular)

A vascular stent lined with a graft material that supports the vessel and excludes a leak or aneurysm from the bloodstream.

Synonyms: Vascular

COVID Toe

A chilblain-like skin lesion reported in association with COVID-19, usually affecting the toes or fingers and appearing red, purple, or swollen.

Synonyms:

COVID-19

Coronavirus disease 2019 caused by SARS-CoV-2, first identified in December 2019. Ranges from asymptomatic to severe respiratory failure and death. Common symptoms: fever, cough, dyspnea, loss of taste/smell (anosmia), myalgia, and fatigue. Severe disease: pneumonia, ARDS, hyperinflammatory state, and thromboembolic complications.

Synonyms:

COVID-19 in Pregnancy

Pregnant women with COVID-19 are at increased risk of severe illness (ICU admission, mechanical ventilation, death) compared to non-pregnant women. Risks to the fetus: preterm birth, cesarean delivery, and possibly stillbirth. Vertical transmission is rare but possible.

Synonyms:

COVID-19 Test

A test that detects SARS-CoV-2 infection. Nucleic-acid amplification tests, including RT-PCR, detect viral genetic material, while rapid antigen tests detect viral proteins. Test performance depends on timing, specimen quality, and the amount of virus present.

Synonyms:

Cowden Syndrome

Autosomal dominant PTEN hamartoma tumor syndrome (PHTS), caused by loss-of-function mutations in PTEN (10q23) — a negative regulator of the PI3K/AKT/mTOR pathway. Multiple hamartomas and increased risk of benign and malignant tumors.

Synonyms:

Cowper's Gland

One of a pair of small male accessory sex glands below the prostate. Its secretion contributes mucus and fluid to the urethra before ejaculation.

Synonyms:

Cowpox

A zoonotic viral infection caused by cowpox virus or related orthopoxviruses, producing localized pustular or ulcerative skin lesions and sometimes systemic illness.

Synonyms:

COX Inhibitor

A class of drugs that inhibit cyclooxygenase enzymes (COX-1 and COX-2), which catalyze the conversion of arachidonic acid to prostaglandins and thromboxanes. COX-1 is constitutively expressed in most tissues, producing prostaglandins that protect the gastric mucosa, maintain renal blood flow, and support platelet aggregation.

Synonyms:

Coxa Vara

A deformity in which the angle between the femoral neck and shaft is abnormally reduced, potentially causing a limp, shortened limb, or altered hip mechanics.

Synonyms:

Coxalgia

Pain in the hip or hip joint.

Synonyms:

Coxiella burnetii

An obligate intracellular bacterium that causes Q

fever, a zoonotic infection transmitted from animals to humans. The organism is transmitted through inhalation of contaminated aerosols or ingestion of contaminated dairy products. Acute Q fever presents with fever, headache, and pneumonia. Chronic Q fever can cause endocarditis.

Synonyms:

Coxsackie virus type A16

A member of the Enterovirus genus and the most common cause of hand, foot, and mouth disease, a mild, self-limited viral illness affecting children. It presents with fever, oral vesicles and ulcers, and a maculopapular or vesicular rash on the hands and feet. Complications are rare but may include aseptic meningitis.

Synonyms:

Coxsackievirus

A group of enteroviruses that cause a range of human diseases. Group A viruses commonly cause hand-foot-and-mouth disease and herpangina, whereas group B viruses are associated with myocarditis, pericarditis, pleurodynia, and aseptic meningitis.

Synonyms:

CPAP

Continuous positive airway pressure delivered through a mask to splint open the upper airway during sleep. It is commonly used for obstructive sleep apnea and can reduce apneas and related symptoms when used consistently.

Synonyms:

CPAP Machine

Continuous positive airway pressure for sleep apnea.

Synonyms:

Cracked Tooth Syndrome

Incomplete fracture of tooth causing pain on biting. Diagnosis difficult. Treatment: crown, root canal if pulpal involvement.

Synonyms:

Crackles (Rales)

Discontinuous, non-musical adventitious lung sounds produced by the sudden explosive opening of collapsed small airways and alveoli during inspiration or the bubbling of air through fluid in the bronchioles.

Synonyms: Rales

Cradle Cap

A common form of seborrheic dermatitis in infants, causing greasy or flaky scales on the scalp with mild redness. It is usually harmless and improves with gentle scalp care; persistent inflammation or signs of infection require assessment.

Synonyms:

Cranial Arteritis

Giant-cell arteritis, an inflammatory disease of medium and large arteries, especially branches of the external carotid artery, that can cause headache, visual loss, and systemic symptoms.

Synonyms:

Cranial Cavity

The hollow space inside the skull that contains and protects the brain.

Synonyms:

Cranial Implant

An artificial device placed in or on the skull or cranial cavity for reconstruction, protection, drainage, stimulation, or treatment.

Synonyms:

Cranial Nerve

Twelve paired nerves (CN I-XII) emerging directly from the brain/brainstem, primarily serving head and neck.

Synonyms:

Cranial Nerve Palsy

Weakness or paralysis of one or more cranial nerves, causing deficits such as impaired eye movement, facial weakness, hearing loss, swallowing difficulty, or tongue weakness. The cause may be vascular,

traumatic, compressive, inflammatory, infectious, or metabolic.

Synonyms:

Craniectomy

Surgical removal of part of the skull without immediate replacement, performed to relieve intracranial pressure or provide access to the brain.

Synonyms:

Craniocerebral Injury

An injury involving the scalp, skull, brain, or more than one of these structures.

Synonyms:

Craniofacial Dysostosis

A congenital disorder involving premature fusion of cranial sutures and characteristic abnormalities of the face and skull, such as those seen in Crouzon syndrome.

Synonyms:

Craniopharyngioma

Histologically benign but locally aggressive epithelial tumor arising embryologically from Rathke pouch remnants; the most common supratentorial non-glial pediatric brain tumor (peak 5-14 years, second peak 50-74 years); bimodal age distribution.

Synonyms:

Cranioplasty

Surgical repair or reconstruction of a skull defect using bone, an implant, or another suitable material.

Synonyms:

Craniosynostosis

Premature fusion of one or more cranial sutures, restricting skull growth perpendicular to the affected suture. Presents with abnormal head shape (scaphocephaly from sagittal fusion, plagiocephaly from coronal fusion). May increase intracranial pressure. Diagnosis by physical examination and CT with 3D reconstruction.

Synonyms:

Craniotomy

Surgical opening of the skull (bone flap) for access to intracranial contents. Indications: brain tumor resection (glioblastoma, meningioma, mets), hematoma evacuation (SDH, EDH, ICH), aneurysm clipping, AVM resection, and epilepsy surgery (lobectomy).

Synonyms:

Crazy Paving Pattern

A HRCT finding characterized by ground-glass opacification with superimposed interlobular septal thickening and intralobular lines. It is seen in pulmonary alveolar proteinosis, lipoid pneumonia, ARDS, pulmonary hemorrhage, and Pneumocystis pneumonia. Despite its name, it is not specific to any single diagnosis.

Synonyms:

CRE

Carbapenem-resistant Enterobacteriaceae, resistant to carbapenem antibiotics through production of carbapenemases including KPC, NDM, and OXA-48-like enzymes. CRE are a major public health threat due to limited treatment options. Infections are associated with high mortality rates.

Synonyms:

Cream

A semisolid emulsion (oil in water or water in oil) for topical application, containing a drug in an emulsion base. Creams are lighter, less greasy, and easier to spread than ointments, and are preferred for moist or oozing skin lesions. They penetrate less deeply than ointments and are cosmetically acceptable.

Synonyms:

Creatine Kinase

An enzyme found in muscle, brain, and heart. CK-MB: cardiac isoenzyme (used historically for MI diagnosis, largely replaced by troponin). CK-MM: skeletal muscle (elevated in rhabdomyolysis, trauma, statins, myopathy). Total CK: elevated in muscle injury, myocardial infarction, seizures, hypothyroidism, and statin myopathy.

Synonyms:

Creatinine

A breakdown product of muscle creatine phosphate produced at a constant rate, filtered by the glomerulus and minimally reabsorbed; serum creatinine is the most used marker of kidney function.

Synonyms:

CREST Syndrome

A limited cutaneous form of systemic sclerosis characterized by calcinosis, Raynaud phenomenon, esophageal dysmotility, sclerodactyly, and telangiectasia. It may involve pulmonary vascular disease and other systemic complications.

Synonyms:

Cretinism

An outdated term for severe congenital or early-childhood hypothyroidism causing impaired physical and intellectual development; modern clinical language uses congenital hypothyroidism.

Synonyms:

Creutzfeldt-Jakob disease

A rapidly progressive neurodegenerative disease caused by abnormal prion proteins, leading to cognitive decline, ataxia, myoclonus, and death.

Synonyms:

Creutzfeldt Jakob Disease

Creutzfeldt-Jakob disease (CJD) is a rare, fatal, transmissible spongiform encephalopathy caused by the accumulation of misfolded prion protein (PrP^{Sc}) in the brain, leading to rapid, progressive dementia and myoclonus.

Synonyms:

Creutzfeldt-Jakob Disease

A rapidly progressive fatal neurodegenerative disease caused by abnormal prion protein, characterized by dementia, myoclonus, ataxia, and other neurologic signs.

Synonyms:

Cri du Chat Syndrome

A congenital genetic disorder caused by deletion of part of the short arm of chromosome 5, characterized in infancy by a high-pitched cry, developmental delay, and characteristic facial features.

Synonyms:

Cri-du-Chat Syndrome

A genetic disorder caused by a deletion of the short arm of chromosome 5 (5p-), with the size of the deletion correlating with severity. Incidence 1 in 15,000-50,000.

Synonyms:

Cricoid Cartilage

The cricoid cartilage is a complete, ring-shaped cartilage located at the base of the larynx, directly above the trachea and below the thyroid cartilage, and it is the only complete cartilaginous ring in the airway, providing structural support and maintaining airway patency.

Synonyms:

Cricoid Pressure

Cricoid pressure (Sellick maneuver) applies posterior displacement of the cricoid cartilage against the cervical vertebrae, occluding the esophagus and reducing aspiration risk during rapid sequence intubation.

Synonyms:

Cricothyrotomy

An emergency airway procedure that creates an opening through the cricothyroid membrane to provide oxygenation and ventilation when a patient cannot be intubated and cannot be oxygenated by less invasive methods.

Synonyms:

Criminal Abortion

Abortion performed illegally, outside permitted legal indications and procedures (e.g., unsafe methods, unqualified practitioners, or non-medical settings), carrying high maternal risk.

Synonyms:

CRISPR-Cas9

Genome editing tool derived from bacterial immune system. Cas9 enzyme guided by RNA to specific DNA sequence, creating double-strand break. Repaired by non-homologous end joining (NHEJ) or homology-directed repair (HDR). Applications: research, therapy.

Synonyms:

Critical Care

Specialized care for people with life-threatening illness or injury who need close monitoring and support for failing organs.

Synonyms:

Critical Findings

Findings requiring immediate communication. Examples: pneumothorax, brain herniation, aortic dissection.

Synonyms:

Critical Limb Ischemia

Severe chronic reduction in limb blood flow causing ischemic rest pain, nonhealing wounds, or gangrene. It requires urgent vascular assessment.

Synonyms:

Critical Results

Test results indicating a potentially life-threatening condition that require prompt communication and clinical action.

Synonyms:

Critical Value

A laboratory result indicating a potentially life-threatening condition that requires prompt communication to a responsible clinician or care team. The threshold is test- and laboratory-specific and should be defined by institutional policy.

Synonyms:

Crohn Disease

Chronic transmural inflammatory condition that can affect any segment of the gastrointestinal tract from the oral cavity to the perianal region, though

the terminal ileum and ileocolonic region are most commonly involved.

Synonyms:

Crohn Disease Cobblestoning

Endoscopic appearance of the colonic or small bowel mucosa in Crohn disease characterized by a bumpy, irregular surface resembling cobblestones. This distinctive appearance results from intersecting lines of deep linear and serpiginous ulceration that surround areas of relatively preserved or edematous but intact mucosa.

Synonyms:

Cross-Sectional Study

Measures exposure and outcome at same time. Prevalence study. Cannot establish temporality.

Synonyms:

Cross-Tolerance

Tolerance to one substance that extends to another substance with a similar mechanism of action. For example, tolerance to one benzodiazepine extends to all benzodiazepines, and tolerance to alcohol extends partially to benzodiazepines due to shared GABA-A receptor mechanisms.

Synonyms:

Croup

Acute laryngotracheobronchitis, most commonly caused by parainfluenza virus. Affects children 6 months to 3 years. Presents with barking cough, stridor, hoarseness, and inspiratory distress, worse at night. Diagnosis is clinical; X-ray shows subglottic narrowing (steeple sign).

Synonyms:

Crouzon Syndrome

An autosomal dominant craniosynostosis syndrome caused by mutations in the FGFR2 or FGFR3 genes, leading to premature fusion of multiple cranial sutures. Features: brachycephaly (short, broad head from bilateral coronal synostosis), proptosis (shallow orbits), hypertelorism, midface hypoplasia, beaked nose, and Class III malocclusion.

Synonyms:

Crown (Dental)

Cap covering damaged tooth. Materials: metal, porcelain-fused-to-metal, all-ceramic, zirconia. Indications: large caries, fractured tooth, root canal treated tooth.

Synonyms: Dental

Crown Lengthening

Surgical procedure exposing more tooth structure. Involves gingivectomy and bone removal. For restorative or aesthetic purposes.

Synonyms:

Crown-Rump Length

The measurement from the top of the fetal head (crown) to the bottom of the buttocks (rump), the most accurate method for establishing gestational age in the first trimester. Measured at 7-13 weeks. Accuracy: ± 3 -5 days. The EDD is set using CRL if the difference from LMP dating exceeds 7 days. CRL growth: approximately 1 mm per day.

Synonyms:

Crowning

The stage of the second stage of labor when the fetal head (widest diameter) distends the perineum and becomes visible at the introitus and is no longer receding between contractions.

Synonyms:

CRP

C-reactive protein. Acute phase reactant. Marker of inflammation.

Synonyms:

Crush Syndrome

Systemic manifestations of prolonged muscle crush injury (rhabdomyolysis) following trauma — typically from collapsed buildings, landslides, entrapment under debris, or excessive compression of limbs. Bywaters syndrome.

Synonyms:

Crushing Injury

Damage caused when a body part is compressed between heavy objects. It can produce fractures, nerve and blood-vessel injury, tissue death, and rhabdomyolysis. Severe limb compression or sudden release after prolonged entrapment requires emergency treatment.

Synonyms:

Crusted scabies

A severe, highly contagious form of scabies (Norwegian scabies) characterised by thick, hyperkeratotic crusts teeming with enormous numbers of *Sarcoptes scabiei* mites, typically occurring in immunocompromised, elderly, or neurologically impaired individuals.

Synonyms:

Crutches

Walking aids. Types: axillary, forearm (Loftstrand). Axillary: under arm. Forearm: through loop.

Synonyms:

Cryoablation

A procedure that freezes and destroys selected tissue, often using imaging to guide the treatment.

Synonyms:

Cryobiopsy

A bronchoscopic technique using rapid freezing to obtain larger lung tissue samples than conventional transbronchial biopsy. It provides better histopathological specimens for diagnosing interstitial lung diseases. It requires general anesthesia and bronchoscopic expertise. It is less invasive than surgical lung biopsy.

Synonyms:

Cryoglobulinemic vasculitis

Systemic vasculitis caused by cryoglobulin-containing immune complexes that deposit in small and medium vessels, classically presenting with purpura, arthralgia, and glomerulonephritis. Most cases are associated with hepatitis C virus infection.

Synonyms:

Cryoglobulins

Immunoglobulins that precipitate at cold temperatures (<37°C) and redissolve on warming. Types: Type I (monoclonal IgM, in MGUS, Waldenstrom, myeloma), Type II (mixed: monoclonal + polyclonal, in HCV infection), Type III (mixed polyclonal, in autoimmune disease).

Synonyms:

Cryopexy

A procedure that uses controlled freezing to destroy or seal abnormal tissue, especially retinal breaks or small retinal detachments.

Synonyms:

Cryoprecipitate

A plasma fraction rich in fibrinogen, factor VIII, von Willebrand factor, and factor XIII, used selectively to treat certain bleeding disorders.

Synonyms:

Cryopreservation

Preservation of cells, tissues, or embryos by cooling them to very low temperatures, usually with protective substances that limit ice-related injury.

Synonyms:

Cryopyrin-Associated Periodic Syndromes

Autosomal dominant autoinflammatory disorders (NLRP3 mutations, gain-of-function) causing constitutive inflammasome activation and IL-1 β overproduction.

Synonyms:

Cryosurgery

Surgery that destroys abnormal tissue by controlled freezing, used in selected skin lesions, tumors, and other conditions.

Synonyms:

Cryotherapy

The therapeutic application of extreme cold (typically using liquid nitrogen at -196°C) to destroy abnormal or diseased tissue.

Synonyms:

Cryptitis

Inflammation of a crypt or small anatomical recess, especially inflammation of the anal glands and crypts.

Synonyms:

Cryptococcal meningitis

Infection of the meninges by *Cryptococcus*, usually in people with impaired immunity, causing headache, fever, altered mental status, or other neurologic symptoms.

Synonyms:

Cryptococcosis

A fungal infection caused by *Cryptococcus neoformans* or *C. gattii*, primarily affecting immunocompromised patients (HIV/AIDS, organ transplant, hematologic malignancy). Pulmonary cryptococcosis: cough, dyspnea, pulmonary nodules. Meningoencephalitis: fever, headache, altered mental status, and elevated intracranial pressure.

Synonyms:

Cryptococcus neoformans

An encapsulated yeast that can cause pulmonary or central nervous system infection, especially in people with impaired immunity.

Synonyms:

Cryptogenic Organizing Pneumonia

An inflammatory lung disease with granulation tissue within alveolar ducts. May be idiopathic or secondary to infection, drugs, or connective tissue disease. Responds well to corticosteroids.

Synonyms:

Cryptorchidism

Failure of one or both testes to descend into the scrotum, the most common congenital genitourinary anomaly in boys (3% at birth, 1% at 1 year). 70% of undescended testes are palpable (inguinal), 30% non-palpable (intra-abdominal, absent, or atrophic). Spontaneous descent by 6 months occurs in about

one-third.

Synonyms:

Cryptosporidiosis

A diarrhoeal disease caused by the protozoan parasite *Cryptosporidium parvum* (zoonotic) or *C. hominis* (anthropoanotic), transmitted via contaminated water (chlorine-resistant oocysts), food, or direct contact. Presents with watery diarrhea, abdominal cramps, nausea, and low-grade fever, lasting 1-2 weeks.

Synonyms:

Crystal Arthropathy

Joint disease caused by crystal deposition. Gout (monosodium urate) and pseudogout (calcium pyrophosphate). Diagnosis by joint aspiration and polarized microscopy.

Synonyms:

Crystalloids

Aqueous solutions of mineral salts that distribute between intravascular and interstitial compartments. Normal saline (0.9 percent NaCl) has 154 mEq/L each of sodium and chloride, pH 5.4, and is associated with hyperchloremic metabolic acidosis at large volumes.

Synonyms:

Crystalluria

The presence of crystals in urine, which may reflect precipitation of salts, medication effects, metabolic disease, or a tendency to form urinary stones.

Synonyms:

CSF Analysis

Laboratory examination of cerebrospinal fluid obtained by lumbar puncture. Tests may assess cells, protein, glucose, microorganisms, and other markers of infection, inflammation, bleeding, or malignancy.

Synonyms:

CSF Rhinorrhea

Cerebrospinal fluid rhinorrhea is the leakage of cerebrospinal fluid from the subarachnoid space through

a defect in the skull base into the nasal cavity or paranasal sinuses, resulting in a clear, watery nasal discharge that may be mistaken for allergic rhinitis or sinusitis.

Synonyms:

CT Angiography

CT imaging with IV contrast timed to visualize arteries. Coronary CTA: assesses coronary artery stenosis and plaque, calcium scoring (Agatston). CTA chest: pulmonary embolism (PE protocol), aortic dissection. CTA head/neck: stroke evaluation, aneurysm, dissection, and vasculitis.

Synonyms:

CT Chest

Detailed lung and mediastinal imaging. High-resolution CT (HRCT) for interstitial lung disease. CT pulmonary angiography (CTPA) for pulmonary embolism. Lung cancer screening with low-dose CT.

Synonyms:

CT Colonography

CT imaging of the colon after bowel preparation and insufflation with air or carbon dioxide. Used for colorectal cancer screening in patients unable to undergo optical colonoscopy and for evaluating complete colonoscopy when the cecum was not reached. Detects polyps greater than six millimeters with high sensitivity.

Synonyms:

CT Colonography (Virtual Colonoscopy)

CT imaging of the colon after bowel preparation and air insufflation. Indications: colorectal cancer screening (alternative to colonoscopy), incomplete colonoscopy due to obstructing mass, and patients unable to undergo colonoscopy. Sensitivity >90% for polyps >10mm. Requires same bowel prep as colonoscopy.

Synonyms: Virtual Colonoscopy

CT Contrast

A substance administered during computed tomography to make selected tissues, vessels, or body

spaces more visible.

Synonyms:

CT Coronary Angiography

CT imaging of coronary arteries after contrast. Detects stenosis, plaque. Alternative to invasive angiography in low-intermediate risk.

Synonyms:

CT Dose-Length Product

A CT dose metric calculated from the volume CT dose index and scan length. It estimates the total scanner output for an examination and is used for protocol optimization and dose monitoring, not as a direct patient-specific risk estimate.

Synonyms:

CT Enterography

CT imaging of the small bowel after administration of large volumes of neutral oral contrast distending the small bowel with IV contrast. Excellent for evaluating Crohn disease, small bowel tumors, and obscure gastrointestinal bleeding.

Synonyms:

CT Perfusion

A CT technique that estimates blood flow and related perfusion parameters in tissue, commonly to assess selected cases of acute stroke or tumors.

Synonyms:

CT Pulmonary Angiography

CT imaging performed after intravenous contrast to show the pulmonary arteries and evaluate suspected pulmonary embolism or other vascular abnormalities.

Synonyms:

CT Scan

Computed tomography, an imaging method that uses X-rays and computer processing to produce cross-sectional images of the body.

Synonyms:

CT Scan (Computed Tomography)

Cross-sectional imaging using X-rays and computer reconstruction. Non-contrast: evaluate hemorrhage, stones, and bone. IV contrast (iodinated): evaluate inflammation, infection, tumor, and vascular structures. Oral contrast: opacify bowel.

Synonyms: Computed Tomography

Cubital Tunnel Syndrome

Cubital tunnel syndrome: ulnar nerve compression at elbow (cubital tunnel: Osborne's ligament, FCU aponeurosis, medial epicondyle, olecranon). Clinical: paresthesias ulnar 1.5 digits, nocturnal, Tinel at elbow, Froment sign (IP flexion of thumb with key pinch), Wartenberg sign (abduction of small finger), thenar/hypothenar wasting late.

Synonyms:

Cubitus Valgus

An abnormal outward angulation of the forearm relative to the upper arm when the elbow is extended.

Synonyms:

Cubitus Varus

An abnormal inward angulation of the forearm relative to the upper arm when the elbow is extended, often developing after a childhood elbow fracture.

Synonyms:

Cuboid

Cube-shaped lateral foot tarsal bone articulating with calcaneus proximally and 4th/5th metatarsals distally. Attachment for the long plantar ligament and peroneus longus tendon. Keystone of the lateral longitudinal arch. Cuboid syndrome (subluxation) is a common lateral foot pain cause in athletes from excessive pronation.

Synonyms:

Culdocentesis

Surgical puncture of the posterior vaginal fornix to sample or drain fluid from the rectouterine pouch.

Synonyms:

Cullen's Sign

Bluish or violaceous periumbilical ecchymosis caused by blood tracking through the fascial planes to the umbilicus. It is a sign of intra-abdominal or retroperitoneal haemorrhage, classically severe haemorrhagic pancreatitis, and is associated with serious underlying disease.

Synonyms:

Cultural Psychiatry

The study and clinical practice of how cultural factors influence mental health, illness expression, diagnosis, and treatment. Cultural concepts of distress, idioms of distress, and cultural syndromes must be considered. The DSM-5 includes a Cultural Formulation Interview.

Synonyms:

Culture and Sensitivity

Microbiological culture of a clinical specimen (blood, urine, sputum, wound swab, CSF) to identify pathogens and determine antimicrobial susceptibility. Culture media: blood agar (most bacteria), MacConkey (Gram-negative), chocolate agar (fastidious: *N. gonorrhoeae*, *H. influenzae*), and selective media.

Synonyms:

Culture Media

Nutrient preparations used to grow microorganisms in the laboratory, classified by composition and purpose.

Synonyms:

Culture Swab

Swab for microbial culture. Types: bacterial, viral, fungal.

Synonyms:

Cumulative Dose

Total amount of substance received over time. Important for carcinogens, teratogens, cumulative toxins.

Synonyms:

Cumulative Trauma Disorder

A disorder caused by repeated forceful or awkward movements that progressively injure muscles, tendons, nerves, or other soft tissues.

Synonyms:

Cup-to-Disc Ratio

The cup-to-disc ratio is a clinical measurement used to assess the severity of glaucomatous optic nerve damage, comparing the diameter of the optic cup (the central depression within the optic nerve head where neural tissue is absent) to the diameter of the optic disc (the entire optic nerve head).

Synonyms:

CURB-65 Score

One point each for: Confusion, Urea > 7 mmol/L, RR > 30 , BP $< 90/60$, age ≥ 65 . 0–1: outpatient. 2: consider hospitalization. 3–5: severe.

Synonyms:

Curettage

Removal of tissue from a body cavity or surface with a curette, used for diagnosis, treatment, or removal of abnormal tissue.

Synonyms:

Curettage Specimen

Tissue obtained by scraping or scooping a surface or cavity, such as the endometrium or a bone lesion, for histologic examination. The limited and fragmented nature of the specimen may restrict assessment of invasion or architecture.

Synonyms:

Curette

Spoon-shaped instrument for scraping tissue.

Synonyms:

Curling Ulcer

Stress ulceration of the stomach or duodenum associated with severe burns. Part of the Curling triad with hypovolemia and sepsis. The pathogenesis involves reduced mucosal blood flow during the systemic inflammatory response to burn injury.

Synonyms:

Curling's Ulcer

An acute peptic ulcer associated with severe burns, often occurring in the duodenum or stomach during physiologic stress.

Synonyms:

Curvularia alcornii

A dematiaceous fungal species causing phaeohyphomycosis, an opportunistic infection of the skin, sinuses, and occasionally the central nervous system in immunocompromised patients. It produces dark, septate hyphae in tissue. Diagnosis is by culture and histopathology showing pigmented fungal elements.

Synonyms:

Cushing Disease

Cushing syndrome caused by an adrenocorticotrophic hormone (ACTH)-secreting pituitary tumor. Excess cortisol can cause central weight gain, rounded facial features, skin changes, muscle weakness, high blood pressure, high blood glucose, and menstrual or mood changes.

Synonyms:

Cushing Syndrome

Clinical state resulting from chronic exposure to excess glucocorticoids regardless of cause. Most common endogenous cause is Cushing disease from pituitary ACTH-secreting adenoma accounting for approximately seventy percent.

Synonyms:

Cushing Syndrome Complications

Untreated Cushing syndrome carries significant morbidity and mortality from cardiovascular disease, infections, thromboembolic events, and metabolic derangements. Cardiovascular complications include accelerated atherosclerosis, hypertension, and dyslipidemia. Infection risk is increased from immunosuppression.

Synonyms:

Cushing Ulcer

Stress ulceration associated with central nervous system disease, trauma, or surgery. Caused by vagally mediated gastric acid hypersecretion, distinguishing it from Curling ulcer which results from mucosal ischemia. The ulcers are typically solitary, located in the stomach or duodenum, and present with gastrointestinal bleeding.

Synonyms:

Cushing's Disease

Hypercortisolism caused specifically by an adrenocorticotrophic-hormone-secreting pituitary adenoma.

Synonyms:

Cushing's Syndrome

The clinical state caused by prolonged excessive exposure to cortisol, from endogenous overproduction or exogenous corticosteroid use.

Synonyms:

Cusp Fracture

Breakage of tooth cusp. Often due to large restoration weakening tooth. Treatment: crown or onlay.

Synonyms:

Cutaneous diphtheria

A skin infection caused by toxigenic or nontoxigenic *Corynebacterium diphtheriae*, producing chronic ulcers or a gray membrane.

Synonyms:

Cutaneous Drug Eruptions

a spectrum of reactions. Exanthematous (maculopapular) is the most common, appearing 4 to 14 days after drug initiation. Urticarial appears within hours. Photoallergic occurs at sun-exposed sites. Lichenoid resembles lichen planus. Pigmented purpuric dermatosis presents as cayenne pepper spots.

Synonyms:

Cutaneous larva migrans

A creeping eruption caused by hookworm larvae (*Ancylostoma braziliense*, *A. caninum*) from

dog/cat feces penetrating the skin, typically in tropical/subtropical regions (walking barefoot on contaminated sand). Larvae migrate erratically under the skin causing intensely pruritic, serpiginous, erythematous tracks.

Synonyms:

Cutaneous leishmaniasis

A skin infection caused by *Leishmania* parasites transmitted by sandflies, usually producing one or more chronic ulcers.

Synonyms:

Cutaneous lupus

A form of lupus erythematosus limited to the skin, manifesting as discoid lesions, subacute cutaneous plaques, or acute malar erythema. It may occur in isolation or as a feature of systemic lupus erythematosus.

Synonyms:

Cutaneous Lupus Erythematosus

Autoimmune skin disease associated with lupus-spectrum illness and characterized by inflammatory lesions that may scar, alter pigmentation, or cause photosensitivity. Subacute and chronic forms have different morphologies and systemic associations; evaluation may include biopsy, direct immunofluorescence, and autoimmune testing.

Synonyms:

Cutaneous Lymphoma

Cutaneous lymphomas are heterogeneous group of T-cell and B-cell malignancies primarily involving the skin. Primary cutaneous B-cell lymphomas include marginal zone lymphoma, follicle center lymphoma, and diffuse large B-cell lymphoma leg type. Primary cutaneous T-cell lymphomas include mycosis fungoides and Sézary syndrome.

Synonyms:

Cutaneous metastases

Secondary deposits of cancer in the skin, originating from a primary tumor elsewhere in the body. They may present as nodules, plaques, or ulcers, and often

indicate advanced or recurrent disease.

Synonyms:

Cutaneous Small-Vessel Vasculitis

Inflammation and destruction of small dermal blood vessels, commonly presenting as palpable purpura on dependent areas. Causes include infections, medications, autoimmune disease, and systemic vasculitis; skin biopsy with appropriate specimen handling is central to diagnosis.

Synonyms:

Cutaneous T-Cell Lymphoma

A malignancy of skin-homing T lymphocytes. Mycosis fungoides is the most common subtype, presenting as patches, plaques, and tumors in a clothing distribution. Sézary syndrome is the leukemic variant with erythroderma, lymphadenopathy, and circulating malignant cells.

Synonyms:

Cutting Balloon (Vascular)

A balloon catheter with small blades or scoring elements that create controlled incisions in plaque during vessel dilation.

Synonyms: Vascular

CVA

An abbreviation for cerebrovascular accident, meaning a stroke caused by interruption of blood flow to the brain or bleeding within the brain. It may cause sudden neurologic deficits.

Synonyms:

Cyanide Poisoning

Toxicity from cyanide compounds (hydrogen cyanide, potassium/sodium cyanide) that inhibit cytochrome oxidase (complex IV), blocking oxidative phosphorylation and cellular respiration despite adequate oxygen—histotoxic hypoxia. Sources: smoke inhalation (fires—plastic/acrylic), ingestion (industrial, suicidal), occupational exposure.

Synonyms:

Cyanosis

A bluish discoloration of the skin and mucous membranes resulting from excessive amounts of deoxygenated hemoglobin in the capillary blood. It becomes clinically apparent when the concentration of deoxygenated hemoglobin exceeds 5 grams per deciliter, which corresponds to an oxygen saturation of approximately 85 percent.

Synonyms:

Cephalgia

Headache or pain in the head. It may result from primary headache disorders or from an underlying illness or injury.

Synonyms:

Cycle Time

Time for complete image acquisition. PET: minutes. SPECT: 20-30 minutes.

Synonyms:

Cyclothymic Disorder

A chronic mood disorder characterized by numerous periods of hypomanic symptoms and periods of depressive symptoms over at least two years (one year in children and adolescents). The hypomanic and depressive symptoms do not meet criteria for a hypomanic or major depressive episode.

Synonyms:

CYP2C19 Polymorphism

CYP2C19 is a cytochrome P450 enzyme involved in the metabolism of approximately 10 percent of drugs, including the antiplatelet agent clopidogrel, proton pump inhibitors, some antidepressants, and the antiepileptic drug phenytoin.

Synonyms:

CYP2D6 Polymorphism

CYP2D6 is a cytochrome P450 enzyme responsible for the metabolism of approximately 25 percent of commonly prescribed drugs, including codeine, tamoxifen, many antidepressants, and antipsychotics.

Synonyms:

CYP450 System

A family of enzymes, found mainly in the liver, that metabolize many medications and other foreign substances. Differences in these enzymes and their inhibition or induction can alter drug effects and toxicity.

Synonyms:

Cyst

An abnormal closed cavity or sac lined by epithelium, containing liquid, semisolid, or gaseous material, and distinguished from an abscess (which contains pus) and a pseudocyst (which lacks an epithelial lining).

Synonyms:

Cystadenoma

A usually benign glandular epithelial tumor that forms cystic spaces or cyst-like structures.

Synonyms:

Cystic echinococcosis

Hydatid disease: infection with larval cysts of *Echinococcus granulosus* (dog tapeworm), transmitted by ingestion of eggs from dog feces. Cysts grow slowly in liver (most common, 60-70 percent), lungs (20-30 percent), and other organs. Hepatic: RUQ pain, hepatomegaly, biliary obstruction. Pulmonary: cough, chest pain, hemoptysis.

Synonyms:

Cystic Fibrosis

Autosomal recessive disorder caused by CFTR gene mutations (most common: F508). Defective chloride channel causes thick mucus in lungs, pancreas, liver, reproductive tract. Symptoms: chronic sinusitis, bronchiectasis, pancreatic insufficiency, male infertility (absent vas deferens), meconium ileus.

Synonyms:

Cystic Hygroma

Congenital lymphatic malformation composed of thin-walled lymphatic cysts, manifesting as a soft, fluid-filled, painless, translucent (transilluminates brilliantly) mass, typically in the posterior triangle

of the neck (75%, left-sided), axilla (20%), mediastinum, retroperitoneum, or groin.

Synonyms:

Cysticercosis

Tissue infection caused by larval cysts (cysticerci) of the pork tapeworm *Taenia solium*, acquired by ingestion of tapeworm eggs (not by eating pork itself) from contaminated food, water, or fecal-oral autoinfection.

Synonyms:

Cystine and triple phosphate (struvite) crystals

Crystalline substances that may be found in urine sediment. Hexagonal cystine crystals support cystinuria in the appropriate setting, while struvite crystals may occur in infection-related alkaline urine; microscopy is interpreted with clinical and laboratory findings.

Synonyms: struvite

Cystine Stones

Rare stones from inherited cystinuria with defective cystine transport. Hexagonal crystals on urine microscopy. Difficult to dissolve. Treat with aggressive hydration, urine alkalization to pH greater than 7.5, and thiol agents including tiopronin and D-penicillamine that form soluble complexes with cystine.

Synonyms:

Cystinuria

An inherited disorder in which reduced renal reabsorption of cystine and certain other amino acids causes excess cystine in the urine. Cystine stones may form in the urinary tract and cause pain, obstruction, or recurrent infection.

Synonyms:

Cystitis

Inflammation of the urinary bladder, typically from bacterial infection, one of the most common bacterial infections in women.

Synonyms:

Cystocele

Anterior vaginal wall prolapse: herniation of the bladder into the anterior vaginal wall due to weakening of the pubocervical fascia, most commonly after childbirth and menopause.

Synonyms:

Cystography

Contrast imaging of bladder. Evaluates trauma, fistulas, vesicoureteral reflux.

Synonyms:

Cystometrogram

Suite of diagnostic procedures designed to evaluate the physiological function of the lower urinary tract (bladder and urethral sphincter) during filling, storage, and emptying phases. See urodynamic testing.

Synonyms:

Cystometry

A urodynamic test that measures bladder pressure and function during filling and emptying.

Synonyms:

Cystoscopy

Endoscopic examination of the urethra, bladder, and ureteral orifices. Flexible cystoscopy: office-based, local anesthesia. Rigid cystoscopy: OR, allows larger instruments for interventions.

Synonyms:

Cystostomy

Surgical creation of an opening from the urinary bladder to the skin or another structure to permit drainage of urine.

Synonyms:

Cystourethrography

Radiographic imaging of the urinary bladder and urethra, usually during filling and voiding after contrast has been introduced.

Synonyms:

Cytochrome c

Mobile electron carrier between Complex III and IV. Also involved in apoptosis.

Synonyms:

Cytochrome P450

The cytochrome P450 system is a superfamily of heme-containing monooxygenase enzymes primarily located in the endoplasmic reticulum of hepatocytes, responsible for Phase I drug metabolism through oxidation, reduction, and hydrolysis reactions.

Synonyms:

Cytogenetics

Study of chromosomes. Detects abnormalities in cancer.

Synonyms:

Cytogenetics (Karyotype)

Visualization of chromosomes under light microscopy from dividing cells (bone marrow, blood, amniotic fluid, tissue). Staining: G-banding (Giemsa, light and dark bands). Resolution: 400-550 bands per haploid genome.

Synonyms: Karyotype

Cytokine

Small signaling proteins (5-25 kDa) mediating cell-to-cell communication in immunity, inflammation, and hematopoiesis.

Synonyms:

Cytokine Release Syndrome

CRS: systemic inflammatory response from massive cytokine release (IL-6, IFN-gamma, TNF, IL-10) after T cell engaging therapies (CAR-T, bispecific antibodies, TGN1412).

Synonyms:

Cytokine Storm

A severe, dysregulated systemic inflammatory response involving excessive cytokine release that can cause tissue injury, organ dysfunction, and shock.

Synonyms:

Cytology

The microscopic study of individual cells, distinct from histology in that tissue architecture is not examined, used for screening and diagnosis of neoplastic and infectious disease. Specimens are exfoliative (cervical smears, sputum) or aspirated (fine needle aspiration, body fluids), interpreted with Papanicolaou or special stains.

Synonyms:

Cytomegalovirus

A herpesvirus that causes significant disease in immunocompromised patients including transplant recipients and HIV-infected individuals. CMV infects a wide range of cell types and establishes latent infections in myeloid progenitor cells. Primary infection is usually asymptomatic in immunocompetent individuals.

Synonyms:

Cytomegalovirus Infection

A widespread herpesvirus infection. Primary infection in immunocompetent individuals is usually asymptomatic or causes mononucleosis-like syndrome. Congenital CMV: most common congenital infection, causes sensorineural hearing loss, microcephaly, and developmental delay.

Synonyms:

Cytopathology

The branch of pathology using cytologic examination of cells to diagnose disease, particularly neoplastic and infectious processes, built on standardized reporting systems that guide management.

Synonyms:

Cytopenia

A reduction in the number of one or more circulating blood-cell lineages: red cells, white cells, or platelets.

Synonyms:

Cytoreductive Surgery

Surgical removal of as much visible tumor as possible to reduce disease burden, a cornerstone of ovarian cancer management and combined with hyper-

thermic intraperitoneal chemotherapy for peritoneal carcinomatosis.

Synonyms:

Cytoskeleton

Dynamic protein filament network providing structural support, cell shape, intracellular transport, and cell division. Three main components: (1) Microfilaments (actin, 7 nm): cell cortex, stress fibers, contractile ring (cytokinesis), lamellipodia/filopodia (motility), myosin interaction (muscle contraction).

Synonyms:

Cytotoxic T Cell

The effector cells of cell-mediated immunity that kill virus-infected cells and tumor cells. Recognize antigenic peptides presented on MHC class I molecules via the T-cell receptor; co-stimulation by CD4+ helper cells and cytokines (IL-2) is needed for activation.

Synonyms:

Cytotoxicity

The capacity of an immune effector cell or immune mediator to injure or kill a target cell. T lymphocytes and natural killer cells commonly use perforin-granzyme pathways or death-receptor signaling to induce target-cell apoptosis.

Synonyms:

CADASIL Syndrome

An inherited disorder of small brain arteries that can cause migraine with aura, strokes, mood symptoms, and cognitive decline.

Synonyms:

Capnocytophaga Infection

An infection caused by Capnocytophaga bacteria, sometimes transmitted through dog or cat bites or scratches.

Synonyms:

Carcinomatosis

Widespread dissemination of carcinoma to multiple surfaces or organs.

Synonyms:

Cardiac Ablation

A procedure that destroys a small area of heart tissue causing an abnormal rhythm.

Synonyms:

Cavernous Hemangioma

A cluster of enlarged, thin-walled blood vessels that may occur in the skin, brain, or other tissues.

Synonyms:

Cecostomy

A surgically created opening from the cecum to the abdominal wall to allow decompression or stool removal.

Synonyms:

Central Hypothyroidism

An inadequate thyroid-hormone state caused by insufficient stimulation from the pituitary gland or hypothalamus.

Synonyms:

Chemoradiotherapy

Treatment that combines chemotherapy with radiation therapy, often to improve cancer control.

Synonyms:

Chlamydial Disease

Infection caused by bacteria of the genus Chlamydia, including sexually transmitted and respiratory infections.

Synonyms:

Chronic Atrophic Gastritis

Long-term inflammation of the stomach lining that causes loss of gastric glands and may impair vitamin B12 absorption.

Synonyms:

Ciliary Dyskinesia

Abnormal movement of cilia that impairs clearance of mucus from the airways and can cause recurrent

respiratory infections.

Synonyms:

Citrullinemia

An inherited metabolic disorder in which citrulline and ammonia accumulate because of impaired urea-cycle function.

Synonyms:

Cognitive Behavior Therapy

A structured psychotherapy that identifies and changes unhelpful thoughts and behaviors.

Synonyms:

Colonic Inertia

Markedly slow movement of contents through the colon, causing severe or persistent constipation.

Synonyms:

Colonic Stenosis

Narrowing of the colon that may obstruct passage of intestinal contents.

Synonyms:

Complement Deficiency

Reduced or absent activity of one or more complement proteins, increasing susceptibility to some infections or autoimmune disease.

Synonyms:

Complete Cystectomy

Surgical removal of the entire urinary bladder.

Synonyms:

Coronary Aneurysm

Abnormal widening or ballooning of a coronary artery.

Synonyms:

Crescentic Glomerulonephritis

A rapidly progressive kidney inflammation in which crescent-shaped lesions form in the glomeruli.

Synonyms:

Cryoglobulinemia

A disorder in which abnormal proteins precipitate in the cold and can inflame or block blood vessels.

Synonyms:

Cyclic Neutropenia

Recurrent episodes of abnormally low neutrophil counts occurring at regular intervals.

Synonyms:

Cyclooxygenase Inhibitor

A medicine that reduces production of prostaglandins and may relieve pain and inflammation.

Synonyms:

Callus

A localized area of thickened, hardened skin caused by repeated pressure or friction.

Synonyms:

Cancellous Bone

Porous, trabecular bone found inside many bones, especially near joints and in the vertebrae.

Synonyms:

Capillaries

The smallest blood vessels, where oxygen, nutrients, and waste products move between blood and tissues.

Synonyms:

Capsaicin

A compound from chili peppers used in some topical medicines to reduce certain types of pain.

Synonyms:

Carbon Monoxide

A colorless, odorless gas that can prevent blood from carrying oxygen and cause life-threatening poisoning.

Synonyms:

Carcinogenesis

The process by which normal cells acquire changes

that lead to cancer.

Synonyms:

Cardiac Myocytes

Muscle cells of the heart that generate force for cardiac contraction.

Synonyms:

Cardiopulmonary Bypass

A technique that temporarily circulates and oxygenates blood during some heart operations.

Synonyms:

Cardiovascular

Relating to the heart and blood vessels.

Synonyms:

Carotid Duplex Doppler Scanning

An ultrasound examination that assesses the structure and blood flow of the carotid arteries.

Synonyms:

Cartilaginous Joint

A joint in which bones are connected by cartilage and allow limited movement.

Synonyms:

Cataplexy

Sudden temporary loss of muscle tone triggered by strong emotion, commonly associated with narcolepsy.

Synonyms:

Celiac Plexus

A network of nerves in the upper abdomen that supplies abdominal organs and may be targeted for pain treatment.

Synonyms:

Chronic Pain Syndrome

Persistent pain accompanied by significant physical, emotional, or social effects that interfere with daily life.

Synonyms:

Cilia

Small hair-like structures on cells that move fluid, particles, or mucus across a tissue surface.

Synonyms:

Classic Migraine

A migraine associated with an aura, such as temporary visual or sensory symptoms.

Synonyms:

Clot Buster

A medicine that dissolves a blood clot; the medical term is thrombolytic.

Synonyms:

Cognitive Reserve

The brain's ability to use alternative strategies or networks to maintain function despite injury or disease.

Synonyms:

Colorectal Adenoma

A gland-forming growth in the colon or rectum that may develop into colorectal cancer.

Synonyms:

Complement System

A group of blood proteins that supports immune defense by destroying microbes and promoting inflammation and phagocytosis.

Synonyms:

Compression Fracture

Collapse of a vertebra or other bone because of compression, often related to osteoporosis or trauma.

Synonyms:

Conception

The beginning of pregnancy, usually referring to fertilization and the subsequent establishment of pregnancy.

Synonyms:

Condyle

A rounded projection at the end of a bone that contributes to a joint.

Synonyms:

Crohn's Disease

A chronic inflammatory bowel disease that can affect any part of the gastrointestinal tract and often causes abdominal pain and diarrhea.

Synonyms:

Crystalline Lens

The transparent flexible structure inside the eye that focuses light onto the retina.

Synonyms:

Cystoid Macular Edema

Swelling of the macula caused by fluid collecting in small cyst-like spaces within the retina.

Synonyms:

C. Difficile Infection

Infection with *Clostridioides difficile* bacteria, often causing antibiotic-associated diarrhea and colitis.

Synonyms:

Carcinoma of Unknown Primary

Cancer that has spread but whose original site cannot be identified despite evaluation.

Synonyms:

Cavernous Malformations

Abnormally enlarged, thin-walled blood-vessel clusters that can bleed or cause neurological symptoms.

Synonyms:

Cavities and Tooth Decay

Progressive destruction of tooth enamel and deeper tooth tissues by acids produced by oral bacteria.

Synonyms:

Central Nervous System Lymphoma

A lymphoma that begins in the brain, spinal cord, eye, or cerebrospinal fluid.

Synonyms:

Central Nervous System Vascular Malformations

Abnormal blood-vessel formations in or around the brain or spinal cord.

Synonyms:

Chronic Daily Headaches

Headaches occurring on at least 15 days each month for more than three months.

Synonyms:

Chronic Hives

Recurrent itchy welts that occur on most days for more than six weeks.

Synonyms:

Chronic Pelvic Pain

Persistent or recurrent pain in the lower abdomen or pelvis lasting at least six months.

Synonyms:

Chronic Traumatic Encephalopathy

A progressive brain disorder associated with repeated head impacts and characterized by cognitive, mood, or behavioral changes.

Synonyms:

Cold Urticaria

Hives or swelling triggered by exposure of the skin to cold.

Synonyms:

Colon Polyps

Growths arising from the inner lining of the colon; some types can develop into colorectal cancer.

Synonyms:

Common Cold in Babies

A viral infection of an infant's upper respiratory tract that commonly causes a runny nose, congestion, and cough.

Synonyms:

Compulsive Sexual Behavior

Recurrent sexual thoughts or behaviors that are difficult to control and cause significant distress or impairment.

Synonyms:

Congenital Heart Defects in Children

Structural abnormalities of the heart or major blood vessels present at birth.

Synonyms:

Congenital Heart Disease in Adults

A heart defect present from birth that persists into adulthood or causes complications later in life.

Synonyms:

Congenital Mitral Valve Anomalies

Structural abnormalities of the mitral valve that are present at birth and may impair blood flow.

Synonyms:

Congenital Myasthenic Syndromes

A group of inherited disorders that impair communication between nerves and muscles, causing fatigable weakness.

Synonyms:

Constipation in Children

Infrequent, hard, or painful bowel movements in a child.

Synonyms:

Cough Headaches

Headaches triggered by coughing, sneezing, straining, or other sudden increases in pressure in the head.

Synonyms:

Cutaneous B-Cell Lymphoma

A type of non-Hodgkin lymphoma that primarily affects B lymphocytes in the skin.

Synonyms:

Cyclic Vomiting Syndrome

Recurrent episodes of severe vomiting separated by symptom-free intervals.

Synonyms:

Cyclosporiasis

An intestinal infection caused by the parasite *Cyclospora cayetanensis*, usually producing watery diarrhea.

Synonyms:

Cyclothymia

A long-term mood disorder with repeated periods of hypomanic and depressive symptoms that do not meet criteria for full episodes.

Synonyms:

Cholestasis of Pregnancy

A liver disorder of pregnancy in which impaired bile flow causes itching and elevated bile acids.

Synonyms:

Choroid Plexus Carcinoma

A malignant tumor arising from the choroid plexus, the tissue that produces cerebrospinal fluid.

Synonyms:

Chemo Brain

Subjective difficulties with memory, attention, or thinking that occur during or after cancer treatment.

Synonyms:

Chest Tube

A flexible tube inserted into the pleural space to remove air, blood, or fluid and help the lung re-expand.

Synonyms:

Culture

A laboratory test in which a clinical specimen is placed in conditions that allow microorganisms to grow and be identified; susceptibility testing may help guide treatment.

Synonyms:

Calvaria

The dome-shaped upper portion of the skull that protects the brain.

Synonyms:

Calyx

A cup-shaped structure that collects fluid or supports an organ. In the kidney, renal calyces collect urine from the renal pyramids and convey it to the renal pelvis.

Synonyms:

Cannula

A hollow tube inserted into a blood vessel, body cavity, or tissue to deliver or remove fluids or to provide access for instruments.

Synonyms:

Canthotomy

A surgical incision through the outer canthus of the eyelids, usually performed urgently to relieve pressure in the orbit.

Synonyms:

Canthus

The angle where the upper and lower eyelids meet.

Synonyms:

Carbon Dioxide

A colorless gas produced by cellular metabolism and removed mainly by the lungs during exhalation.

Synonyms:

Cardia

The part of the stomach surrounding the opening where the esophagus joins the stomach.

Synonyms:

Cast

A rigid or semi-rigid device applied around an injured limb or joint to immobilize it while bone or soft tissue heals.

Synonyms:

Cauterization

The deliberate destruction or sealing of tissue using heat, electricity, chemicals, or another energy source to control bleeding or remove abnormal tissue.

Synonyms:

Chlamydia trachomatis

A bacterium that commonly causes sexually transmitted infection of the urogenital tract and can also cause conjunctivitis or pneumonia.

Synonyms:

Clamp

A surgical instrument used to grasp, compress, occlude, or hold tissue, blood vessels, tubing, or other structures.

Synonyms:

Clean-Catch Specimen

A urine sample collected after cleansing the surrounding area and beginning urination, with the middle portion collected in a sterile container to reduce contamination.

Synonyms:

Colposcope

A lighted, magnifying instrument used to examine the cervix, vagina, or vulva in detail.

Synonyms:

Continuous Bladder Irrigation

Continuous instillation of sterile fluid through a urinary catheter to keep the bladder catheter patent and remove blood clots or debris.

Synonyms:

Continuous Subcutaneous Insulin Infusion

Delivery of rapid-acting insulin through a pump and a subcutaneous infusion set to provide basal insulin and mealtime doses.

Synonyms:

Convergence

The inward movement of both eyes so that they are directed toward the same nearby object.

Synonyms:

Creatine

A nitrogen-containing compound stored mainly in skeletal muscle that helps supply energy for short, high-intensity activity.

Synonyms:

Cross-Matching

A laboratory test that checks donor and recipient blood for compatibility before transfusion.

Synonyms:

Cystoscope

A thin, lighted instrument used to examine the urethra and bladder and, when needed, perform procedures.

Synonyms:

Cystotome

A surgical instrument used to make an incision in the capsule of the lens during selected eye procedures.

Synonyms:

Cancer Grading

Assessment of how abnormal cancer cells appear under a microscope and how aggressively the tumor is likely to behave. It differs from cancer staging, which describes the extent of spread.

Synonyms:

C1 Esterase Inhibitor

A plasma protein that regulates the complement, kallikrein-kinin, and coagulation pathways. Deficiency or dysfunction can cause hereditary angioedema.

Synonyms:

C1q Nephropathy

A glomerular disease characterized by dominant or codominant deposits of the complement component

C1q in glomeruli, with variable proteinuria and kidney dysfunction.

Synonyms:

Café Coronary

Sudden airway obstruction by food, usually occurring while eating and sometimes causing collapse or death if the airway is not rapidly cleared.

Synonyms:

Calcific Tendinitis

Deposition of calcium hydroxyapatite crystals within a tendon, most often the rotator cuff, causing acute pain and restricted movement.

Synonyms:

Callosotomy

Surgical division of the corpus callosum to reduce the spread of certain severe, treatment-resistant seizures between the cerebral hemispheres.

Synonyms:

Candidal Vaginitis

Inflammation of the vagina caused by overgrowth of Candida yeast, usually producing itching, soreness, and a thick white discharge.

Synonyms:

Caffeine Intoxication

A toxic state caused by excessive caffeine exposure, characterized by symptoms such as restlessness, nervousness, insomnia, rapid heartbeat, tremor, gastrointestinal upset, or agitation.

Synonyms:

Café-au-Lait Macules

Flat, light-brown skin patches with relatively uniform pigmentation. Multiple lesions may be associated with genetic disorders such as neurofibromatosis type 1.

Synonyms:

Cerebral Vasospasm

Abnormal narrowing of cerebral arteries that can

reduce brain perfusion and cause delayed cerebral ischemia, especially after aneurysmal subarachnoid hemorrhage.

Synonyms:

Cervical Myelopathy

Dysfunction of the spinal cord caused by compression in the cervical spine, often producing hand clumsiness, gait disturbance, weakness, sensory changes, or abnormal reflexes.

Synonyms:

Cardiac Arrhythmias

Abnormalities of the heart rate or rhythm caused by disturbances in impulse formation or conduction. They include tachycardia, bradycardia, and irregular rhythms.

Synonyms:

Cerebral Thrombosis

Formation of a blood clot within a cerebral artery, reducing blood flow and potentially causing an ischemic stroke.

Synonyms:

Cervical Intraepithelial Neoplasia (CIN)

Abnormal precancerous changes in the squamous cells of the cervix, usually associated with persistent high-risk human papillomavirus infection. CIN is graded by the severity of dysplasia.

Synonyms: CIN

Chilblains (Pernio)

Itchy, painful, red or purplish inflammatory lesions caused by an abnormal response of small blood vessels to cold and subsequent rewarming.

Synonyms: Pernio

Cognition

The mental processes involved in acquiring, storing, retrieving, and using information, including attention, memory, language, reasoning, and judgment.

Synonyms:

Compound Fracture (Open Fracture)

A fracture associated with a wound that communicates between the fracture site and the external environment. It carries increased risks of infection and tissue damage.

Synonyms: Open Fracture

Conversion Disorder (Functional Neurological Symptom Disorder)

A condition in which neurological symptoms, such as weakness, abnormal movements, sensory loss, or seizures, are not explained by a recognized structural neurological disease and cause significant impairment.

Synonyms: Functional Neurological Symptom Disorder

Corneal Graft (Corneal Transplant)

Surgical replacement of part or all of a diseased or damaged cornea with donor corneal tissue to restore vision or relieve pain.

Synonyms: Corneal Transplant

Coronary Care Unit (CCU)

A specialized hospital unit providing continuous monitoring and treatment for patients with serious acute cardiac conditions.

Synonyms: CCU

Crepitation (Crepitus)

A crackling, grating, or popping sensation or sound produced by movement of tissues, air, or bone. Causes include fractures, joint disease, subcutaneous air, and lung disease.

Synonyms: Crepitus

CABG

Coronary artery bypass grafting, a surgical procedure that creates a route around a narrowed or blocked coronary artery to improve blood flow to heart muscle.

Synonyms: Coronary artery bypass grafting; coronary bypass surgery.

Cardiac

Relating to the heart.

Synonyms: Heart-related; cardiac-related.

Cardiopulmonary

Relating to the heart and lungs or to their combined function.

Synonyms: Cardiorespiratory.

Cardiopulmonary Bypass Machine

A machine that temporarily circulates and oxygenates blood during selected heart or major-vessel operations while the heart and lungs are not performing their usual functions.

Synonyms: Heart-lung machine; cardiopulmonary bypass pump.

Cardiorespiratory Endurance

The ability of the heart, lungs, and circulation to deliver oxygen during sustained physical activity.

Synonyms: Cardiorespiratory fitness; aerobic endurance.

Carminative

A substance traditionally used to reduce intestinal gas or discomfort by promoting passage of gas through the digestive tract.

Synonyms: Antiflatulent; gas-relieving agent.

Carotenoids

Plant pigments, including beta-carotene, that contribute yellow, orange, or red color and may have antioxidant or provitamin-A activity.

Synonyms: Carotenoid pigments; provitamin-A pigments.

Catagen

The transitional phase of the hair-growth cycle between active growth and resting.

Synonyms: Catagen phase; regression phase of hair growth.

Catastrophic Reaction

A disproportionately intense emotional or behav-

ioral response to a situation that may appear minor to others, often occurring with cognitive impairment or neurologic disease.

Synonyms: Catastrophic response; catastrophic emotional reaction.

Cathartic

An agent that promotes bowel evacuation, usually by increasing stool water, intestinal motility, or both.

Synonyms: Purgative; laxative.

Cation

An ion with a positive electrical charge, such as sodium, potassium, calcium, or hydrogen.

Synonyms: Positively charged ion.

Cauda Equina

The bundle of lumbar, sacral, and coccygeal nerve roots below the end of the spinal cord.

Synonyms: Cauda equina nerve roots; horse-tail nerve bundle.

Causalgia

Severe persistent burning pain and sensory disturbance caused by injury to a peripheral nerve, now commonly classified within complex regional pain syndrome type II.

Synonyms: Complex regional pain syndrome type II; causalgic pain.

Cavity

A localized hole or structural defect in a tooth caused by dental caries.

Synonyms: Dental cavity; carious lesion.

CBC

A blood test that measures red cells, white cells, hemoglobin, hematocrit, and platelets.

Synonyms: Complete blood count; full blood count.

CCU

A hospital unit providing continuous monitoring

and specialized treatment for people with serious acute cardiac disease.

Synonyms: Coronary care unit; cardiac care unit.

Cell Senescence

A state in which a cell remains metabolically active but permanently stops dividing, often in response to aging, stress, or cellular damage.

Synonyms: Cellular senescence; replicative senescence.

Central (Brain) Fatigue

A sense of reduced mental energy, concentration, alertness, or motivation arising primarily from central nervous-system processes.

Synonyms: Central fatigue; mental fatigue.

Cerebrovascular

Relating to the blood vessels and circulation of the brain.

Synonyms: Brain-vascular; cerebral vascular.

Cervicogenic Headache

A headache caused by a disorder of the cervical spine or its soft tissues, with pain referred from the neck to the head.

Synonyms: Cervical headache; neck-related headache.

CFS

Chronic fatigue syndrome, a condition involving substantial persistent fatigue with post-exertional worsening and associated symptoms that are not explained by another disorder.

Synonyms: Chronic fatigue syndrome; myalgic encephalomyelitis/chronic fatigue syndrome.

Challenge Testing

A controlled exposure to a suspected trigger, such as a food or medication, to assess whether it produces a reproducible reaction.

Synonyms: Provocation testing; challenge test.

Chemical Peel

Application of a chemical solution to the skin to produce controlled exfoliation and regeneration of superficial or deeper skin layers.

Synonyms: Chemexfoliation; chemical resurfacing.

Chemonucleolysis

An intradiscal treatment intended to dissolve part of a herniated intervertebral disk, historically using an enzyme preparation.

Synonyms: Enzymatic disk dissolution; chemonucleolysis procedure.

Chiropractor

A healthcare practitioner who provides manual or manipulative treatment, especially for musculoskeletal conditions, according to the practitioner's training and local regulation.

Synonyms: Chiropractic practitioner; chiropractic clinician.

Chlorophyllin

A water-soluble, copper-containing derivative of chlorophyll used in some products and studied for effects such as odor control; clinical uses depend on evidence and context.

Synonyms: Chlorophyllin copper complex; sodium copper chlorophyllin.

Chlorosis

An outdated term for a greenish or pale complexion historically associated with severe iron-deficiency anemia, especially in young women.

Synonyms: Green sickness; hypochromic anemia, historical usage.

Cholagogue

A substance that promotes emptying of the gallbladder into the intestine.

Synonyms: Gallbladder stimulant; biliary evacuant.

Choleretic

A substance that promotes production or secretion of bile by the liver.

Synonyms: Bile-secretory agent; bile-flow stimulant.

Cholesterol

A lipid required for cell membranes and synthesis of steroid hormones and bile acids. Excess atherogenic cholesterol can contribute to arterial plaque.

Synonyms: Serum cholesterol; blood cholesterol.

Cholinergic Neuron

A nerve cell that releases acetylcholine as its principal neurotransmitter.

Synonyms: Acetylcholine-releasing neuron; cholinergic nerve cell.

Chondrocyte

A mature cartilage cell that produces and maintains the cartilage extracellular matrix.

Synonyms: Cartilage cell.

Chronic Paroxysmal Hemicrania

A primary headache disorder causing frequent, short-lasting, severe one-sided headaches with autonomic symptoms and a characteristic response to indomethacin.

Synonyms: CPH; chronic paroxysmal hemicrania syndrome.

Chyme

A semifluid mixture of partially digested food and gastric or intestinal secretions that passes from the stomach into the small intestine.

Synonyms: Digestive chyme; gastric chyme.

Cicatricial Alopecia

Hair loss caused by destruction and scarring of hair follicles, usually leading to permanent loss in affected areas.

Synonyms: Scarring alopecia; cicatricial hair loss.

CK

Creatine kinase, an enzyme found in skeletal muscle, heart muscle, and brain whose blood level may rise after tissue injury.

Synonyms: Creatine phosphokinase; creatine kinase enzyme.

Clonal Expansion

Rapid multiplication of genetically or immunologically related cells derived from a single precursor after activation.

Synonyms: Clonal proliferation; clone expansion.

Coagulate

To change from a liquid to a semisolid or solid state, especially the formation of a blood clot through coagulation.

Synonyms: Clot; clot formation.

Cognitive Function

The mental processes involved in attention, memory, language, reasoning, learning, judgment, and problem solving.

Synonyms: Cognition; cognitive ability.

Collagenase

An enzyme that breaks down collagen in connective tissue.

Synonyms: Collagen-digesting enzyme; collagen-degrading enzyme.

Combined Hormone Therapy

Hormone therapy containing both estrogen and a progestogen, generally used when endometrial protection is needed in a person with a uterus.

Synonyms: Estrogen-progestogen therapy; combined menopausal hormone therapy.

Combined Hyperlipidemia

A lipid disorder characterized by elevated cholesterol and triglycerides, often with increased atherogenic lipoproteins.

Synonyms: Mixed hyperlipidemia; combined hyperlipoproteinemia.

Common Migraine

A migraine without a preceding aura.

Synonyms: Migraine without aura; migraine with-

out neurologic aura.

Compact Bone

Dense outer bone tissue organized into osteons that provides strength and structural support.

Synonyms: Cortical bone; dense bone.

Complicated Migraine

An older, nonspecific term for migraine accompanied by prolonged or prominent neurologic symptoms; the specific syndrome should be identified when possible.

Synonyms: Migraine with prolonged neurologic symptoms; complex migraine, historical usage.

Compounding Pharmacy

A pharmacy that prepares customized formulations for an individual patient when a suitable commercially manufactured product is unavailable or unsuitable.

Synonyms: Compounding pharmacy practice; extemporaneous pharmacy.

Cones

Retinal photoreceptor cells responsible for color vision and detailed vision in relatively bright light.

Synonyms: Cone photoreceptors; cone cells.

Conjugate Vaccine

A vaccine in which a poorly immunogenic polysaccharide antigen is linked to a carrier protein to improve the immune response, especially in infants and young children.

Synonyms: Protein-conjugate vaccine; conjugated polysaccharide vaccine.

Conjugated Equine Estrogens

A mixture of estrogenic compounds historically derived from the urine of pregnant mares and used in some hormone-therapy formulations.

Synonyms: CEE; conjugated estrogens.

Continuous Combined Hormone Therapy

A hormone regimen in which estrogen and progesterone are taken continuously rather than sequentially.

Synonyms: Continuous combined HRT; continuous estrogen-progestogen therapy.

Contractile Proteins

Proteins, especially actin and myosin, that interact to generate force and shorten muscle cells.

Synonyms: Muscle contractile proteins; actomyosin proteins.

Contrast Medium

A substance administered or placed in the body to make tissues, organs, or body spaces more visible during imaging.

Synonyms: Contrast agent; radiographic contrast material.

Controllers

Long-term asthma medicines taken regularly to reduce airway inflammation and prevent symptoms or exacerbations.

Synonyms: Controller medicines; maintenance asthma therapy.

Convulsion

A sudden episode of involuntary, often rhythmic muscle contractions that may occur with a seizure or other disturbance of brain function.

Synonyms: Convulsive episode; seizure-related motor activity.

Corn

A localized thickening of skin caused by repeated pressure or friction, often occurring on the toes or feet.

Synonyms: Clavus; heloma.

Coronary

Relating to the arteries or circulation that supply the heart muscle.

Synonyms: Cardiac blood-vessel-related; heart-coronary.

Coronary Artery Bypass Surgery

Surgery that uses a graft to route blood around a narrowed or blocked coronary artery.

Synonyms: CABG; coronary bypass surgery.

Coronary Endarterectomy

Surgical removal of atherosclerotic plaque from the inner lining of a coronary artery.

Synonyms: Coronary plaque endarterectomy; coronary endarterectomy procedure.

Coronary Spasm

Temporary contraction of a coronary artery that reduces blood flow to the heart muscle and may cause angina or infarction.

Synonyms: Vasospastic angina mechanism; coronary artery spasm.

Coronary Care Unit

A hospital unit providing continuous monitoring and specialized care for acute cardiac illness.

Synonyms: CCU; cardiac care unit.

Corpus Cavernosum

One of two columns of erectile tissue in the penis that fill with blood during erection.

Synonyms: Cavernous body; penile corpus cavernosum.

Corpus Luteum

The temporary endocrine structure formed from an ovarian follicle after ovulation; it produces progesterone during the luteal phase and early pregnancy.

Synonyms: Yellow body; luteal body.

Corpus Spongiosum

A column of erectile tissue surrounding the penile urethra and expanding distally to form the glans.

Synonyms: Spongy body; corpus spongiosum penis.

Corrugator Muscle

A small facial muscle that draws the eyebrows downward and inward, contributing to frowning.

Synonyms: Corrugator supercilii; glabellar muscle.

Cortex

The outer layer of an organ or structure, such as the cerebral cortex, adrenal cortex, or outer layer of a hair shaft.

Synonyms: Cortical layer; outer cortex.

Cortical Bone

Dense bone forming the outer shell of most bones and providing much of the skeleton's mechanical strength.

Synonyms: Compact bone; cortical tissue.

Corticotropin-Releasing Factor

A hypothalamic hormone that stimulates the pituitary gland to release adrenocorticotrophic hormone and helps coordinate the stress response.

Synonyms: Corticotropin-releasing hormone; CRH.

COX-2 Inhibitors

Medicines that inhibit cyclooxygenase-2, an enzyme involved in prostaglandin production and inflammation.

Synonyms: Cyclooxygenase-2 inhibitors; selective COX-2 inhibitors.

CPR

Cardiopulmonary resuscitation using chest compressions, with rescue breaths when appropriate, to maintain circulation and oxygen delivery during cardiac arrest.

Synonyms: Cardiopulmonary resuscitation; basic life support measure.

Craving

A strong, often difficult-to-control desire for a substance, behavior, or experience, commonly seen in substance-use disorders.

Synonyms: Strong urge; compulsive desire.

Creatinine Test

A blood or urine test measuring creatinine to help assess kidney filtration and muscle-related creatinine production.

Synonyms: Creatinine measurement; renal func-

tion creatinine test.

Crepitus

A crackling, grating, or popping sensation or sound caused by movement of tissue, bone, joint surfaces, or air in soft tissue.

Synonyms: Crepitation; crackling sensation.

Crohn's Disease

A chronic inflammatory bowel disease that can affect any part of the gastrointestinal tract and commonly causes abdominal pain, diarrhea, weight loss, or systemic inflammation.

Synonyms: Crohn disease; regional enteritis.

Crown

The visible part of a tooth above the gum line, or a dental restoration that covers and protects a damaged tooth.

Synonyms: Dental crown; anatomic tooth crown.

CT

Computed tomography, an imaging method that uses multiple X-ray measurements and computer reconstruction to produce cross-sectional images.

Synonyms: Computed tomography; CAT scan.

Cupping

An abnormal enlargement or depression of the optic-disc cup, often assessed in evaluating glaucoma.

Synonyms: Optic-disc cupping; glaucomatous cupping.

Cushing's Syndrome

A disorder caused by prolonged exposure to excessive cortisol, producing features such as central weight gain, hypertension, skin changes, and muscle weakness.

Synonyms: Hypercortisolism; cortisol excess syndrome.

Cuticle

The thin outermost layer of a hair shaft formed by overlapping cells that protect the inner cortex.

Synonyms: Hair cuticle; cuticular layer.

Cyclic Guanosine Monophosphate

A cellular signaling molecule involved in smooth-muscle relaxation, phototransduction, and other physiologic processes.

Synonyms: cGMP; cyclic GMP.

Cyclic Hormone Therapy

Hormone therapy in which estrogen is given continuously or for part of a cycle and progestogen is added for a defined number of days.

Synonyms: Sequential hormone therapy; cyclic estrogen-progestogen therapy.

Cyclooxygenase

An enzyme family that helps convert arachidonic acid into prostaglandins and related mediators involved in pain, inflammation, and platelet function.

Synonyms: COX enzyme; prostaglandin-endoperoxide synthase.

Cytokines

Small signaling proteins released by immune and other cells that regulate inflammation, immunity, blood-cell production, and tissue responses.

Synonyms: Immune signaling proteins; cytokine mediators.

Cytotoxic Alopecia

Hair loss caused by exposure to a cytotoxic treatment or other toxic injury to actively growing hair follicles.

Synonyms: Drug-induced alopecia; chemotherapy-related hair loss.

C fiber

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cabazitaxel

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appro-

appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cabergoline

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cadherin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cadmium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cadmium chloride

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cadusafos

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Caenorhabditis elegans

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Cafe-au-lait spot

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Caffeic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Calbindin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Calcifediol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Calcineurin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Calcitriol

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Calcium carbonate

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Calcium channel

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Calcium chloride

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appro-

priate use depend on the specific agent and clinical context. **Synonyms:**

Calcium citrate

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Calcium gluconate

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Calcium signaling

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Calculation

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Calculi

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Calibration

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Caliciviridae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Calmodulin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Calnexin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Calories

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Calorimetry

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Calpain

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Calponin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Calreticulin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Calretinin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Calvarium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Campesterol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Camphor

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Campomelic dysplasia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Camptothecin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Camptothecin analogue

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Campylobacter

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Campylobacter coli

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Campylobacter concisus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Campylobacter curvus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Campylobacter fetus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Campylobacter gracilis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Campylobacter jejuni

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Campylobacter lari

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Campylobacter rectus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Campylobacter upsaliensis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Campylobacteraceae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Canagliflozin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Canarypox virus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Cancell

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Cancer cluster

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cancer immunotherapy

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cancer prevention

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cancer risk

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Candela

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Candida

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Candida albicans

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Candida boidinii

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Candida dubliniensis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Candida esophagitis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Candida famata

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Candida glabrata

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Candida inconspicua

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Candida intermedia

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Candida orthopsilosis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Candida parapsilosis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Candida sake

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Candida tropicalis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Candida zeylanoides

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Canertinib dihydrochloride

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Canfosfamide hcl

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cannabidiol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cannabinoid

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cannabinoid receptor

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Cannabinol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cannula hub

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Canola oil

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Canrenone

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Canthaxanthin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cantuzumab ravtansine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Capecitabine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Capillaria

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Capillaria philippinensis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Capillary electrophoresis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Capillary plasma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Capillary vessel

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Capnocytophaga

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Capnocytophaga gingivalis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Capnocytophaga ochracea

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Capnocytophaga sputigena

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Capreomycin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Capromab pendetide

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Capsid

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Capsid proteins

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Capsule

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or

research context. **Synonyms:**

Capsule endoscope

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Captopril

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Carbachol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carbadox

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carbamate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carbamazepine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Carbapenem

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carbaryl

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carbazilquinone

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carbenicillin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Carbofuran

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carbogen

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carbohydrate metabolism

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Carbon

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carbon tetrachloride

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appro-

appropriate use depend on the specific agent and clinical context. **Synonyms:**

Carbonate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carbophenothion

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carboplatin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carboprost

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carbosulfan

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carboxyl group

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carboxylesterase

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carboxylic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Carboxy-lyases

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carboxypeptidase h

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carbutamide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carcinoembryonal antigen

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carcinogen testing

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Cardiac care

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cardiac catheter

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cardiac fibroma

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cardiac glycoside

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cardiac hemangioma

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cardiac myocyte

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cardiac perforation

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cardiac rhabdomyoma

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cardiac sarcoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cardiac ventriculography

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cardiac volume

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cardiac wall

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cardinal body part

An anatomic, physiologic, or clinical term referring

to a body structure or function. **Synonyms:**

Cardinal cell part

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Cardiobacteriaceae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Cardiobacterium

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Cardiobacterium hominis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Cardiolipin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cardiologist

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cardiotonic agent

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cardiotoxin

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cardiovascular agents

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cardiovascular infection

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cardiovascular injury

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cardiovascular neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cardiovascular pharmacology

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cardiovascular surgery

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Cardiovirus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Carisoprodol

A biomedical dictionary term used in medical, bio-

logical, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carmine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carmustine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carney triad

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carnobacteriaceae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Carnosine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carnosinemia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carotene

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carotenoid

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carotid artery stenosis

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Carotid body

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Carpal bones

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Carpal joints

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carpometacarpal joint

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carrageenan

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carrier excipient

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carry-over effect

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carteolol

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cartilage disease

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Carubicin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Carvedilol phosphate

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Carzelesin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Casanthranol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Case study

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Case-control studies

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Casein

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Casein kinase

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Caspase

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Caspase activation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Caspase inhibitor

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Caspofungin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Caspofungin acetate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Castor oil

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Castration

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Catalase

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Catalog

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Catalog number

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cataract surgery

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Catechin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Catechol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Catecholamine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Catenin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cathepsin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cathepsin d

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cathepsin h

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cathepsin k

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cathepsin l

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cathepsin z

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cathepsins b

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Catheterization

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cathexis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Caucasian

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Caudal dysplasia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Caudal vein

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Caudate nucleus

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Caulobacter

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Caulobacteraceae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Cautery device

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Caveola

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Caveolins

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cd antigens

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

CEA assay

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Cebocephaly

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cecal hemorrhage

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cecal infection

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cecal neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cedecea

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cedecea davisae

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cedecea lapagei

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cedecea neteri

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cediranib maleate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cefaclor

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefadroxil

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefamandole

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefatrizine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefazolin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefdinir

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefepime

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefixime

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefmenoxime

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefmetazole

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefonicid

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefoperazone

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefotaxime

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefotetan

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefotiam

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefoxitin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefsulodin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Ceftazidime

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Ceftibuten

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Ceftizoxime

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Ceftriaxone

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cefuroxime

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Celecoxib

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cell adhesion

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Cell aggregation

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Cell body

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Cell count

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Cell culture

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Cell cycle

A biological molecule, chemical substance, cellular component, or physiologic concept involved in

body processes, laboratory medicine, or treatment.

Synonyms:

Cell death

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell dedifferentiation

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell density

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell differentiation

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell division

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell fusion

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell growth

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell maturation

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell migration

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell motility

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell movement

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell nucleus

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell pellet

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell physiology

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell polarity

A biological molecule, chemical substance, cellular component, or physiologic concept involved in

body processes, laboratory medicine, or treatment.

Synonyms:

Cell proliferation

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell secretion

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell sorting

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell structure

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell surface

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell survival

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell therapy

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell transplantation

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell wall

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell-cell junction

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell-cell signaling

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell-free system

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cell-matrix junction

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cellular

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Cellular immunity

A biological molecule, chemical substance, cellular component, or physiologic concept involved in

body processes, laboratory medicine, or treatment.
Synonyms:

Cellular metabolic process

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.
Synonyms:

Cellular respiration

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.
Synonyms:

Cellular vesicle

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.
Synonyms:

Cellulomonas

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.
Synonyms:

Cellulomonas hominis

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.
Synonyms:

Cellulose

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.
Synonyms:

Cellulosimicrobium

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.
Synonyms:

Cellulosome

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.
Synonyms:

Celosomy

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cementoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Centigram

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Centimeter

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Centipoise

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Central apnea

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Centrifugation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Centriole

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Centromere

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Centrosome

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cephacetrile

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cephalexin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cephaloglycin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cephalometry

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cephaloridine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cephalothin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cephapirin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cephradine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cerebellar cortex

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cerebellar disease

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cerebellar dysmetria

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cerebellar hemangioblastoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cerebellar hypoplasia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cerebellar neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cerebellar nuclei

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cerebellar vermis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cerebral aqueduct

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cerebral artery

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cerebral atrophy

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cerebral calcification

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cerebral crus

An anatomic, physiologic, or clinical term referring

to a body structure or function. **Synonyms:**

Cerebral hemisphere

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cerebral ischemia

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cerebral malaria

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cerebral ventricle

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cerebral ventriculography

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cerebral ventriculomegaly

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Cerebrosides

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cerebrovascular disorder

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cerium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Certification

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Certolizumab pegol

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Ceruminous adenocarcinoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cervical

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cervical arthritis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cervical atlas

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cervical change

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cervical dislocation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cervical endometriosis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cervical ganglion

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cervical insufficiency

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cervical lymphadenopathy

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cervix carcinoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cervix disease

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cervix neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Cesium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cestoda

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cetirizine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cetoleic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Cetrorelix

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cetuximab

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Cevimeline

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cevimeline hydrochloride

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate

use depend on the specific agent and clinical context. **Synonyms:**

Chaetomium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chagas cardiomyopathy

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Challenge agent

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chamomile extract

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chaplain

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cheek

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cheek pouch

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cheilodynia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cheilognathopalatoschisis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cheilognathoschisis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cheiromegaly

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chelating agent

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chemexfoliation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chemical

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chemical ablation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chemical burn

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chemical carcinogenesis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chemical cleavage

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chemical cofactor

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chemical fractionation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chemical impurity

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chemistry

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chemokine receptor

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Chemoreceptor cell

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Chemosensitivity assay

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Chemosensitization

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chemotactic factors

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chemotherapy regimen

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Chest tightness

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chick embryo

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Child behavior

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Child care

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Child development

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Child psychiatry

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Child psychology

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Child welfare

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Childhood angiosarcoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Childhood ependymoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Childhood fibrosarcoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Childhood ganglioglioma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Childhood leiomyosarcoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Childhood leukemia

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Childhood liposarcoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Childhood osteosarcoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Childhood rhabdomyosarcoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding;

evaluation and management depend on its cause and severity. **Synonyms:**

Children

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chilomastix mesnili

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chimera

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chironomidae

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chiropractic

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chitin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chitosan

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chlamydiaceae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Chlamydomona

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chlamydomphila

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chlamydomphila pneumoniae

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chlamydomphila psittaci

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Chloral hydrate

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorambucil

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical

context. **Synonyms:**

Chlordane

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlordecone

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlordiazepoxide

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorethoxyfos

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorfenvinphos

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorhexidine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chloride channel

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chloride ion

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlormadinone acetate

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlormerodrin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorodeoxyadenosine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chloroform

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorogenic acid

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorophyll

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorophyta

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chloropicrin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chloroplast

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chloroplast DNA

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chloroprene

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chloroquine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorothiazide

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorotoxin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorotrianisene

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorpheniramine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorphentermine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorpromazine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorpropamide

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorpyrifos

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Chlorthalidone

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate

use depend on the specific agent and clinical context. **Synonyms:**

Chlorzoxazone

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

CHO cell

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Choice behavior

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Choke

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cholate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Cholecalciferol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

D

D and C

Dilation and curettage, a procedure in which the cervix is dilated and tissue is removed from the uterine cavity for diagnosis, treatment, or management of pregnancy-related conditions.

Synonyms:

D and E

Dilation and evacuation, a surgical procedure in which the cervix is dilated and uterine contents are removed by suction and instruments.

Synonyms:

D-Dimer

A blood marker produced when cross-linked fibrin is broken down. It may be elevated in thrombosis and in many other conditions. A negative result can help exclude venous thromboembolism in appropriately selected patients with a low or intermediate pretest probability; the cutoff depends on the assay and clinical setting.

Synonyms:

D&C Instruments

Instruments used to dilate the cervix and remove tissue from the uterus during dilation and curettage.

Synonyms:

Dacrocytes (Teardrop Cells)

Teardrop-shaped red blood cells formed as erythrocytes are squeezed and deformed while exiting a fibrotic or infiltrated bone marrow space. Characteristic feature of Primary Myelofibrosis (JAK2 V617F mutation), bone marrow infiltration (myelophthitic anemia from metastatic cancer, granulomas, or leukemia), and severe thalassemia.

Synonyms: Teardrop Cells

Dacryoadenitis

Inflammation of the lacrimal gland, presenting as tender swelling in the superolateral aspect of the upper eyelid with characteristic S-shaped ptosis. It can be acute or chronic in presentation.

Synonyms:

Dacryocystitis

Inflammation of the lacrimal sac, most commonly caused by obstruction of the nasolacrimal duct leading to stagnation of tears and secondary bacterial infection (*Staphylococcus aureus*, *Streptococcus pneumoniae*, *Haemophilus influenzae*).

Synonyms:

Dacryocystography

An imaging study in which contrast material is introduced into the lacrimal drainage system to identify narrowing or obstruction.

Synonyms:

Dacryocystorhinostomy

A surgical procedure creating a passage between the lacrimal sac and the nasal cavity to bypass an obstructed nasolacrimal duct.

Synonyms:

Dacryostenosis

Narrowing or obstruction of the lacrimal drainage passages, which can cause excessive tearing and recurrent infection of the lacrimal sac.

Synonyms:

Dactylitis

Inflammation of an entire digit (finger or toe), producing a diffuse, fusiform swelling often described as sausage-shaped.

Synonyms:

Dactylosymphysis

Abnormal fusion or webbing of adjacent digits, usually present from birth.

Synonyms:

Daily Value

A reference amount of a nutrient used on food labels to help compare a serving with usual daily nutrient needs. Values are based on a 2,000-calorie diet unless otherwise stated.

Synonyms:

Daltonism

Color-vision deficiency, especially difficulty distinguishing certain colors because of abnormal or absent retinal cone function.

Synonyms:

DALY

Disability-adjusted life year, a measure combining years of healthy life lost because of premature death and disability.

Synonyms:

Damage-Control Resuscitation

A trauma strategy prioritizing rapid hemorrhage control, permissive approaches to blood pressure when appropriate, prevention of hypothermia, correction of coagulopathy, and balanced blood-product resuscitation rather than large-volume crystalloid administration.

Synonyms:

Damage-Control Surgery

A staged operative strategy for critically ill or severely injured patients in whom definitive repair is unsafe because of hypothermia, acidosis, coagulopathy, or physiologic instability. Initial surgery controls hemorrhage and contamination, followed

by resuscitation and later definitive reconstruction.

Synonyms:

Dandruff

Scaling and shedding of the scalp skin, commonly associated with seborrheic dermatitis or dry skin.

Synonyms:

Dandruff and Scalp Conditions

Dandruff is a common scalp condition presenting as flaking, itching, and mild inflammation caused by overgrowth of the yeast *Malassezia*, dry skin, or seborrheic dermatitis. Other scalp conditions include psoriasis, contact dermatitis, ringworm tinea capitis, and head lice.

Synonyms:

Dandy Fever

Dengue fever, an acute mosquito-borne viral illness causing fever, headache, severe muscle or joint pain, and sometimes hemorrhage or shock.

Synonyms:

Dandy-Walker Malformation

A congenital hindbrain malformation characterized by hypoplasia or aplasia of the cerebellar vermis, cystic dilation of the fourth ventricle, and posterior fossa enlargement with upward displacement of the tentorium, transverse sinuses, and torcular herophili.

Synonyms:

Dandy-Walker Syndrome

A congenital abnormality involving the cerebellum and the fluid spaces around it, often causing hydrocephalus or developmental problems.

Synonyms:

Dane Particle

The complete infectious particle of hepatitis B virus, consisting of the viral core and envelope.

Synonyms:

Daptomycin resistance

Resistance to daptomycin can develop through mutations in genes encoding cell membrane phospholipid synthesis. The mechanism involves changes in the bacterial cell membrane that reduce daptomycin binding. Resistance is more common in VRE than MRSA. Resistance can emerge during therapy, particularly in endocarditis and bacteremia.

Synonyms:

Darier's Disease

An inherited skin disorder characterized by abnormal keratinization, greasy crusted papules, and nail changes, often worsened by heat and sweating.

Synonyms:

Dark Adaptation

The process by which the eyes become increasingly sensitive to dim light after moving from bright illumination into darkness.

Synonyms:

Dartos

A layer of smooth muscle and connective tissue beneath the skin of the scrotum that wrinkles the scrotal skin in response to temperature and other stimuli.

Synonyms:

Darwin's Tubercle

A variable small thickening or projection on the rim of the external ear, regarded as a remnant of an ancestral mammalian ear form.

Synonyms:

DASH Diet

Dietary Approaches to Stop Hypertension. Emphasizes: fruits, vegetables, whole grains, low-fat dairy, reduced saturated fat, sodium <2300 mg/day. Lowers blood pressure effectively.

Synonyms:

Daubenton's Plane

An anatomical reference plane extending from the lower margin of the orbit to the upper margin of

the external auditory opening, used in describing skull orientation.

Synonyms:

Dawn Phenomenon

Physiological increase in blood glucose occurring in the early morning hours between approximately three and eight AM driven by counter-regulatory hormone surges including growth hormone, cortisol, and catecholamines. More pronounced in patients with diabetes who lack the compensatory insulin response.

Synonyms:

De Novo Variant

A genetic variant present in an affected individual that was not detected in either biological parent, usually arising in a parental gamete or early embryogenesis. It may cause a dominant disorder and can have implications for recurrence risk in future pregnancies.

Synonyms:

De Quervain Tendinitis

Painful stenosing inflammation of the tendons of the abductor pollicis longus and extensor pollicis brevis in the first dorsal wrist compartment. It causes radial wrist pain worsened by thumb movement or grasping and is assessed clinically.

Synonyms:

De Quervain Tenosynovitis

De Quervain tenosynovitis: first dorsal compartment (APL, EPB) stenosis. Clinical: radial wrist pain, Finkelstein test (thumb in palm, ulnar deviation), swelling over radial styloid.

Synonyms:

De-Escalation

A set of verbal and nonverbal techniques used to reduce agitation and prevent violence while preserving dignity and safety. It includes calm communication, appropriate personal space, clear limits, environmental modification, and offering choices.

Synonyms:

Dead Space

The volume of ventilated air that does not participate in gas exchange. Anatomic dead space: the conducting airways (nose, pharynx, trachea, bronchi, terminal bronchioles) that warm, humidify, and filter inspired air but contain no alveoli for gas exchange. Approximately 150 mL in a 70 kg adult.

Synonyms:

Dead Space Ventilation

Ventilation of alveoli without perfusion ($V/Q = \text{infinity}$). Anatomic dead space is the conducting airways (150 mL). Physiologic dead space includes alveoli without perfusion. Increased in PE, hypotension, and emphysema. Measured by the Bohr equation.

Synonyms:

Dead Time

The brief period after an event during which a detector or recording system cannot register another event, limiting the measured count rate.

Synonyms:

Deafferentation

Loss or interruption of sensory nerve input from a body region to the central nervous system, which may produce abnormal sensation or deafferentation pain.

Synonyms:

Deafness

Complete or severe loss of hearing. Hearing loss may be conductive, sensorineural, or mixed, depending on whether the problem affects sound transmission, the inner ear or auditory nerve, or both.

Synonyms:

Death

The permanent end of the functions that maintain a living organism.

Synonyms:

Deauville Criteria

A five-point visual scale that compares fluo-

rodeoxyglucose uptake on PET with reference tissues to assess treatment response in lymphoma.

Synonyms:

Debridement

The surgical removal of dead, damaged, or infected tissue from a wound to promote healing and prevent infection.

Synonyms:

Debulking

Surgical removal of as much tumor as possible when complete resection is not feasible, aiming to reduce tumor burden (cytoreduction) and improve response to subsequent therapy; central to ovarian cancer management.

Synonyms:

Decapitation

Separation of the head from the body, seen in severe trauma (vehicle accidents, train injuries, explosions), industrial accidents, hanging with judicial execution, or homicide. Complete decapitation is almost always rapidly fatal due to exsanguination and brain ischemia.

Synonyms:

Decay Correction

Mathematical adjustment for radioactive decay during imaging. Essential for quantitative comparison between studies.

Synonyms:

Decerebrate Posture

Abnormal extension of the arms and legs caused by severe dysfunction of the brainstem below the red nucleus. It is a sign of serious neurologic injury and may occur with traumatic brain injury, hemorrhage, or raised intracranial pressure.

Synonyms:

Decerebrate Posturing

Abnormal extension of the arms and legs, often with inward rotation of the arms, caused by severe dysfunction below the cerebral hemispheres. It in-

icates serious neurologic injury, but posture alone does not determine outcome.

Synonyms:

Decerebration

Severe loss of cerebral function, often with extension and rigid posturing of the limbs from brainstem dysfunction; it may result from major injury or increased intracranial pressure.

Synonyms:

Decibel

A logarithmic unit (dB) used to measure the intensity of sound. The decibel scale compares a given sound pressure level to a reference level (0 dB = 20 micropascals, the threshold of normal hearing at 1 kHz). The scale is logarithmic: an increase of 10 dB represents a tenfold increase in sound intensity. Normal conversation: 60 dB.

Synonyms:

Decidua

The transformed endometrium of pregnancy, shed after delivery. Three regions: decidua basalis (under the placenta, site of trophoblast invasion), decidua capsularis (over the gestational sac, covering the embryo), and decidua parietalis (the remainder of the uterine lining).

Synonyms:

Deciduitis

Inflammation of the decidua, the specialized uterine lining of pregnancy.

Synonyms:

Deciduosis

The presence of extensive or ectopic decidual tissue, usually associated with pregnancy and sometimes involving the cervix, peritoneum, or other sites.

Synonyms:

Decision-Making Capacity

The clinical ability to understand relevant information, appreciate its consequences, reason about options, and communicate a stable choice regarding

a specific decision. Capacity is decision-specific and may fluctuate; it is distinct from legal competence.

Synonyms:

Decompensated Cirrhosis

Cirrhosis complicated by clinically significant liver dysfunction or portal hypertension, commonly manifested by ascites, variceal hemorrhage, hepatic encephalopathy, or jaundice. It carries substantially higher mortality than compensated cirrhosis and warrants assessment for transplant and complication prevention.

Synonyms:

Decomposition

Postmortem breakdown of the body through autolysis and putrefaction. It begins within 24 to 72 hours at ambient temperature, producing green ce-cal discoloration, venous marbling, gas distension, skin slippage, and purge fluid.

Synonyms:

Decompression sickness

A systemic illness caused by nitrogen bubble formation in tissues during rapid decompression, presenting with joint pain, skin mottling, and neurological deficits, treated with hyperbaric oxygen therapy.

Synonyms:

Deconditioning

Physiological decline from reduced activity or immobilization. Effects: muscle atrophy, weakness, decreased cardiorespiratory fitness, balance impairment, increased fall risk. Preventable with early mobilization, exercise. Reversible with rehabilitation.

Synonyms:

Decontamination

Measures that reduce continued absorption of a toxic substance from the skin, eyes, gastrointestinal tract, or clothing. Interventions are exposure-specific and may include removal from the source, irrigation, washing, activated charcoal, or specialist procedures.

Synonyms:

Decorticate Posture

Abnormal flexion of the arms with extension of the legs, indicating severe damage affecting the cerebral hemispheres, internal capsule, or thalamus. It is a sign of major brain injury and impaired consciousness.

Synonyms:

Decorticate Posturing

Abnormal flexion of the arms with extension of the legs, caused by severe dysfunction of the brain. It indicates serious neurologic injury, but posture alone does not determine outcome.

Synonyms:

Decreased Breath Sounds

Diminished air movement heard on auscultation, indicating decreased ventilation. Causes include pneumothorax, pleural effusion, atelectasis, and mucus plugging. Unilateral decreased breath sounds may indicate tension pneumothorax or large effusion.

Synonyms:

Decubitus Ulcer

Localized damage to the skin and/or underlying soft tissue caused by prolonged pressure, shear, or friction, most commonly over bony prominences. See pressure injury.

Synonyms:

Deep

Located further inward from the surface of the body.

Synonyms:

Deep Tendon Reflex

The monosynaptic stretch reflex elicited by tapping a tendon with a reflex hammer, testing the integrity of the reflex arc (sensory afferent, spinal cord, motor efferent). Common reflexes: biceps (C5-6), triceps (C7), brachioradialis (C5-6), knee/patellar (L3-4), ankle/Achilles (S1). Graded 0 (absent) to 4+ (hyperactive, clonus).

Synonyms:

Deep Vein Thrombosis

A clot in a deep vein, usually of the lower limb, caused by a combination of reduced blood flow, increased clotting tendency, or vessel-wall injury. Anticoagulant treatment is used when indicated.

Synonyms:

Deep Vein Thrombosis Ultrasound

Venous duplex ultrasound used to evaluate suspected deep-vein thrombosis. The test assesses vein compressibility and blood flow; an abnormal result is interpreted with the clinical probability and, when needed, repeat or additional testing.

Synonyms:

Deep Venous Reflux

Retrograde flow through incompetent venous valves in the deep venous system. It contributes to chronic venous hypertension, edema, skin changes, and venous ulcer formation.

Synonyms:

Deep venous thrombosis

Formation of a blood clot in a deep vein, most often in the leg.

Synonyms:

Defecation

The process of eliminating feces from the body. Filling of the rectum triggers stretch receptors that initiate the defecation reflex via the sacral spinal cord (S2-S4), causing contraction of the rectal wall and relaxation of the internal anal sphincter.

Synonyms:

Defecography

Dynamic imaging of the rectum and pelvic floor during defecation using fluoroscopy or MRI. The rectum is filled with contrast paste and the patient performs defecation while images are captured. Evaluates rectal prolapse, intussusception, rectocele, enterocele, and pelvic floor dyssynergia.

Synonyms:

Defense Mechanisms

Psychological processes, often outside conscious awareness, that help a person manage distress or conflict. Examples include denial, projection, repression, humor, and sublimation.

Synonyms:

Defense Mechanisms (Forensic)

Physical evidence patterns on a body demonstrating active resistance against an assailant prior to incapacitation.

Synonyms: Forensic

Defense Wounds

Injuries sustained by a victim attempting to ward off an attack, typically found on the flexor surfaces of hands, palms, wrists, and forearms (incised/stab wounds from knives or contusions/abrasions from blunt force).

Synonyms:

Defense Wounds (Inscribed)

Cuts or other injuries on the hands or forearms that may occur when a person attempts to protect against an attack. The distribution and morphology of defensive injuries may help reconstruct an assault but are not independently proof of a particular event.

Synonyms: Inscribed

Defibrillation

Delivery of an unsynchronized electrical shock to terminate ventricular fibrillation or pulseless ventricular tachycardia by depolarizing a critical mass of myocardium. It is distinct from synchronized cardioversion, which times the shock to the QRS complex.

Synonyms:

Defibrillator

Device delivering electric shock to heart. Types: external (AED, manual), internal (implantable). Used for ventricular fibrillation, pulseless ventricular tachycardia. Energy: biphasic 120-200 J.

Synonyms:

Defibrillator Implant

An implanted cardioverter-defibrillator that detects and treats dangerous ventricular rhythms with electrical pacing or shock.

Synonyms:

Degenerative Spine Disease

Lumbar spinal stenosis: central (neurogenic claudication: bilateral leg pain with walking, relieved by sitting/flexion), lateral recess, foraminal. Imaging: MRI (central canal AP diameter <10mm, cross-sectional area <70mm²).

Synonyms:

Dehydration

Deficit of total body water. Hypertonic (water loss > sodium), isotonic (loss proportional), hypotonic (sodium loss > water). Causes: vomiting, diarrhea, fever, inadequate intake, diabetes insipidus. Treatment: oral rehydration or IV fluids.

Synonyms:

Dehydration in Children

A deficit of total body water, usually caused by gastrointestinal losses, inadequate intake, fever, or renal losses. Clinical assessment includes mental status, heart rate, mucous membranes, tears, capillary refill, urine output, weight change, and perfusion rather than a single sign.

Synonyms:

Delayed Cord Clamping

The practice of delaying umbilical cord clamping for ≥ 30 –60 seconds after delivery, allowing placental transfusion of blood to the newborn. Benefits: increases neonatal blood volume by 30%, improves iron stores (ferritin, hemoglobin) for the first 6 months, reduces anemia, and improves transitional circulation.

Synonyms:

Delayed Ejaculation

A sexual dysfunction characterized by a persistent or recurrent delay in, infrequency of, or absence of ejaculation during partnered sexual activity, lasting

≥ 6 months and causing marked distress. Prevalence: 1-5% of men. Lifelong vs. acquired.

Synonyms:

Delayed Emergence

Prolonged time to regain consciousness after discontinuation of anesthetic agents. Failure to regain consciousness within 30-60 minutes of completing surgery.

Synonyms:

Delayed Hypersensitivity

A delayed immune reaction, usually mediated by T cells rather than antibodies, that develops hours to days after exposure. Examples include contact dermatitis, the tuberculin reaction, and some drug eruptions.

Synonyms:

Delayed Puberty

Failure to develop secondary sexual characteristics by age thirteen in girls and age fourteen in boys. Causes include constitutional delay which is the most common, chronic illness, malnutrition, hypogonadotropic hypogonadism from Kallmann syndrome or pituitary disease, and hypergonadotropic hypogonadism from gonadal failure.

Synonyms:

Deletion

Loss of chromosomal segment. Terminal deletion: loss from end. Interstitial deletion: loss from middle. Microdeletion syndromes: 22q11.2 deletion (DiGeorge), 5p deletion (Cri-du-chat).

Synonyms:

Delirium

An acute and fluctuating disturbance of attention and awareness caused by an underlying medical, substance-related, or environmental factor. It differs from the usually more gradual course of dementia.

Synonyms:

Delirium in Anesthesia

Delirium is an acute confusional state character-

ized by fluctuating consciousness, inattention, disorganized thinking, and altered level of awareness. Postoperative delirium occurs in 15 to 50 percent of elderly surgical patients, with higher rates in hip fracture and cardiac surgery.

Synonyms:

Delirium Tremens

A severe, potentially life-threatening form of alcohol withdrawal characterized by fluctuating confusion, agitation, hallucinations, and marked autonomic overactivity. It usually occurs after cessation or major reduction of prolonged heavy alcohol use and requires urgent medical treatment.

Synonyms:

Delivery

The process of childbirth: vaginal delivery (spontaneous vertex most common; assisted—vacuum, forceps) or cesarean delivery (abdominal). Stages of labor culminate in delivery of the infant and placenta.

Synonyms:

Delivery of Posterior Arm

A shoulder dystocia maneuver: the operator's hand enters the posterior vagina along the fetal chest, finds the fetal hand, grasps the forearm, sweeps it across the chest and face, and delivers the posterior arm and hand over the perineum. This reduces the bisacromial diameter by 20% and is often highly effective.

Synonyms:

Deltoid Muscle

Large triangular muscle forming the shoulder contour, from lateral clavicle, acromion, and scapular spine to the deltoid tuberosity. Innervated by the axillary nerve (C5-C6). Anterior fibers flex/medially rotate, middle fibers abduct (primary abductor beyond 15 degrees), posterior fibers extend/laterally rotate.

Synonyms:

Delusion

A fixed belief that is not consistent with available evidence or the person's sociocultural context and is not readily changed by reasoned discussion. Delusions may be persecutory, grandiose, referential, somatic, nihilistic, or erotomanic.

Synonyms:

Delusional Disorder

A disorder characterized by the presence of one or more delusions lasting one month or more in the context of relatively preserved functioning. The delusions are non-bizarre (involving real-life situations that could conceivably occur, such as being followed, infected, loved from afar, or conspired against).

Synonyms:

Dementia

A group of symptoms involving progressive decline in memory, thinking, communication, or daily functioning. Causes include Alzheimer disease, vascular disease, Lewy body disease, frontotemporal disorders, and other conditions. Evaluation is important because some causes of cognitive decline may be treatable.

Synonyms:

Dementia (Major Neurocognitive Disorder)

Dementia is the common clinical term for an acquired syndrome of decline in one or more cognitive domains that interferes with independence in daily activities. Major neurocognitive disorder is the preferred diagnostic classification term.

Synonyms: Major Neurocognitive Disorder

Demyelinating Disease

A disease in which the myelin sheath surrounding nerve fibres is damaged, slowing or blocking neural conduction.

Synonyms:

Dendrite

The branched, tapering neuronal processes that re-

ceive synaptic input from other neurons and conduct graded potentials toward the cell body. Dendrites contain receptors, ion channels, and postsynaptic densities.

Synonyms:

Dendritic Cell

The most potent professional antigen-presenting cell, capturing antigens in tissues and migrating to lymph nodes to present peptides on MHC molecules to T cells, initiating adaptive immunity.

Synonyms:

Dendritic Ulcer

A branching epithelial ulcer of the cornea, classically caused by herpes simplex virus. It may cause a red eye, pain, light sensitivity, tearing, or reduced vision and requires ophthalmic assessment.

Synonyms:

Dengue

A mosquito-borne viral infection that commonly causes fever, headache, muscle pain, joint pain, and rash. Severe disease can cause bleeding or shock.

Synonyms:

Dengue fever

An acute mosquito-borne viral illness caused by dengue virus (DENV-1, -2, -3, -4), a flavivirus transmitted primarily by *Aedes aegypti* mosquitoes.

Synonyms:

Dengue virus

A positive-sense RNA virus belonging to the Flaviviridae family that causes dengue fever. The virus has four serotypes, and infection with one serotype provides lifelong immunity to that serotype but only temporary cross-protection against others.

Synonyms:

Denial

A defense mechanism in which a person refuses to accept an unpleasant reality. It is a common initial response to traumatic events and terminal illness diagnoses. While adaptive in the short term, chronic

denial can prevent appropriate medical treatment and psychological processing.

Synonyms:

Denosumab for Osteoporosis

Fully human monoclonal antibody targeting RANK ligand preventing osteoclast formation activation and survival. Reduces fracture risk at the spine hip and non-vertebral sites. Administered as subcutaneous injection every six months. Advantages include no renal dose adjustment and effectiveness even with oral bisphosphonate intolerance.

Synonyms:

Dens

The tooth-like projection of the second cervical vertebra that forms a pivot for rotation of the first vertebra.

Synonyms:

Dens Evaginatus

An extra cusp or tubercle on a tooth, most often a premolar. It may contain an extension of the dental pulp and may fracture or become affected by caries.

Synonyms:

Dens Invaginatus

An inward folding of enamel and dentin that may extend toward or into the dental pulp, allowing debris to collect and increasing the risk of caries and pulpal infection.

Synonyms:

Dental Abscess

A localized collection of pus arising from infection of a tooth or the surrounding periodontal tissues. It may cause toothache, percussion tenderness, gingival swelling, facial swelling, fever, trismus, or regional lymphadenopathy; spread into deep facial spaces can threaten the airway and requires urgent assessment.

Synonyms:

Dental Age

An estimate of developmental age based on the

formation, mineralization, and eruption of the teeth. It is useful in children but is not an exact measure of chronological age.

Synonyms:

Dental Anesthesia

The use of local anesthetic, sedation, or, when necessary, general anesthesia to control pain and anxiety during dental care.

Synonyms:

Dental Caries

A disease in which bacterial acids progressively demineralize and damage the teeth. See Dental Cavities.

Synonyms:

Dental Cavities

Permanent areas of tooth decay caused by acid-producing bacteria acting on dietary carbohydrates. Cavities progress from enamel demineralization to dentin and pulp involvement, causing sensitivity, pain, or infection.

Synonyms:

Dental Ceramic

A ceramic material used to make dental restorations such as crowns, veneers, and bridges. Examples include feldspathic ceramic, lithium disilicate, and zirconia.

Synonyms:

Dental Disease

Disorders affecting the teeth, gums, or supporting tissues, including tooth decay, gum disease, oral infections, and tooth loss. Prevention includes fluoride, regular brushing and flossing, limiting frequent sugar exposure, and routine dental examinations.

Synonyms:

Dental Extraction

Removal of a tooth from its alveolar socket. Indications include unrestorable disease, advanced periodontal destruction, impaction, orthodontic treatment, or selected prosthodontic needs; risks include bleeding, infection, nerve injury, fracture, and alve-

olar osteitis.

Synonyms:

Dental Implant

A biocompatible fixture placed in the jawbone to support a replacement tooth. The fixture may become integrated with surrounding bone and is restored with a crown, bridge, or denture.

Synonyms:

Dental Plaque

Biofilm of bacteria on tooth surfaces. Initiated by acquired pellicle. Maturation leads to disease if not removed. Disrupted by mechanical cleaning.

Synonyms:

Dental Pulp Necrosis

Death of the dental pulp, usually following untreated inflammation, trauma, or loss of blood supply. The tooth generally fails sensibility testing and may develop apical periodontitis or a periapical abscess.

Synonyms:

Dental Pulpitis

Inflammation of the dental pulp caused by caries, trauma, restorative procedures, cracks, or other irritation. Reversible pulpitis produces brief provoked pain, whereas irreversible pulpitis causes spontaneous or lingering pain and may require pulpal treatment or extraction.

Synonyms:

Dental Radiographs

Imaging for dental diagnosis. Intraoral: periapical (tooth root and surrounding bone), bitewing (interproximal caries detection, crestal bone level), and occlusal (larger area, localization).

Synonyms:

Dental Radiography

Imaging techniques for dental diagnosis: bitewing (caries, bone levels), periapical (root, periapical tissues), panoramic (full mouth overview), CBCT (3D imaging). Radiation dose: dental radiography low exposure. ALARA principle applies.

Synonyms:

Dental Restorative Materials

Materials used to restore teeth: amalgam, composite resin, glass ionomer, ceramic, gold alloy. Selection based on location, aesthetics, strength, cost, patient factors. Composite: tooth-colored, adhesive, conservative preparation. Ceramic: excellent aesthetics, brittle, expensive. Gold: durable, biocompatible, aesthetic concern.

Synonyms:

Dental Screening

Examination of the teeth, gums, and mouth to identify dental disease or risk before serious symptoms develop.

Synonyms:

Dental Sealant

Thin protective coating applied to chewing surfaces of molars. Prevents caries by sealing pits and fissures.

Synonyms:

Dental Traumatology

Management of dental injuries. Types: enamel fractures, enamel-dentin fractures, pulp exposure, root fractures, avulsion. Immediate care critical for avulsed teeth.

Synonyms:

Dentin

Calcified tissue beneath enamel forming bulk of tooth. Contains dentinal tubules with fluid and processes. Sensitive to stimuli when exposed. Reparative dentin formed in response to irritation.

Synonyms:

Dentinogenesis Imperfecta

An inherited disorder of dentin formation that can cause translucent blue-gray or amber teeth that fracture, wear, or become discolored easily. Some forms occur with osteogenesis imperfecta.

Synonyms:

Dentistry (Geriatric)

Oral health challenges in elderly: xerostomia, root caries, periodontal disease, denture problems, oral cancer, medication side effects. Assessment: complete oral exam, cancer screening, denture fit, caries risk. Prevention: fluoride, oral hygiene, regular dental visits. Adaptations: handholds, magnification, positioning.

Synonyms: Geriatric

Dentition

The teeth present in the mouth, including their number, arrangement, development, and eruption.

Synonyms:

Denture

A removable dental prosthesis that replaces some or all missing teeth and associated oral tissues. Partial dentures replace selected teeth while complete dentures replace an entire dental arch; fit, oral hygiene, tissue health, and regular review are important for function and prevention of mucosal injury.

Synonyms:

Dependence

A state in which repeated exposure to a substance produces physiologic adaptation, so that stopping or reducing it may cause withdrawal. In substance-use disorders, dependence may occur with or without addiction.

Synonyms:

Dependent Personality Disorder

A pattern of submissive and clinging behavior related to an excessive need to be taken care of.

Synonyms:

Depersonalization-Derealization Disorder

A disorder involving persistent or recurrent feelings of detachment from one's thoughts, feelings, body, or surroundings, while reality testing remains intact. Symptoms cause clinically significant distress or impairment.

Synonyms:

Depolarization

The change in membrane potential toward a less negative (more positive) value, typically caused by inward sodium or calcium current. In neurons, depolarization to threshold triggers an action potential.

Synonyms:

Depot Implant

An implant designed to release a medicine gradually over an extended period after placement in the body.

Synonyms:

Deprescribing

A planned, supervised process of reducing the dose or stopping a medication for which harms, burden, or lack of benefit outweigh expected benefit. It requires review of indication, withdrawal risk, disease recurrence, and patient goals.

Synonyms:

Depression

Major depressive disorder is a common, disabling mood disorder characterized by persistent sadness and loss of interest or pleasure in activities, affecting approximately 7 percent of adults worldwide annually.

Synonyms:

Depression (Geriatric)

Mood disorder common in elderly, often underdiagnosed. Symptoms: sad mood, anhedonia, sleep/appetite changes, fatigue, guilt, concentration difficulty, suicidal ideation. May present as cognitive impairment ("pseudodementia"). Risk factors: chronic illness, social isolation, bereavement, medications.

Synonyms: Geriatric

Depression Screening

Major depressive disorder is a common, disabling mood disorder characterized by persistent sadness and loss of interest or pleasure in activities, affecting approximately 7 percent of adults worldwide annually. See depression.

Synonyms:

Dermal Structure

The dermis has two layers: papillary dermis (superficial, thin, containing capillaries, lymphatics, and Meissner corpuscles) and reticular dermis (deep, thick, containing dense irregular connective tissue, collagen, elastin, hair follicles, sweat glands, and sebaceous glands).

Synonyms:

Dermatitis

Inflammation of the skin, often used interchangeably with eczema. Atopic dermatitis: chronic pruritic inflammation in flexural areas, associated with asthma and allergies, driven by skin barrier dysfunction and type 2 inflammation. Contact dermatitis: allergic (type IV hypersensitivity) or irritant (direct toxicity).

Synonyms:

Dermatitis Herpetiformis

A chronic, intensely pruritic, autoimmune blistering skin condition characterized by grouped, symmetric erythematous papules, urticarial plaques, and vesicles occurring primarily on extensor surfaces (elbows, knees, buttocks, scalp). It is a cutaneous manifestation of gluten-sensitive enteropathy (celiac disease).

Synonyms:

Dermatofibroma

A common benign dermal nodule, typically on the lower extremities of young adults. It presents as a firm, hyperpigmented papule that dimples when pinched (Fitzpatrick sign). It is thought to result from reactive fibrosis following minor trauma or insect bites. Dermatofibromas are asymptomatic and require no treatment.

Synonyms:

Dermatofibrosarcoma

Dermatofibrosarcoma protuberans is a locally aggressive fibrohistiocytic tumor of the skin. It typically presents as a slowly enlarging, indurated plaque on the trunk, which may develop nodules over time. It has a high local recurrence rate (up to 50 percent with simple excision) but low metastatic

potential.

Synonyms:

Dermatofibrosarcoma Protuberans

A rare locally aggressive cutaneous sarcoma arising from dermal fibroblasts. It presents as a slow-growing, firm, reddish-purple plaque or nodule, typically on the trunk. It has a high local recurrence rate but low metastatic potential. Treatment is wide local excision with Mohs micrographic surgery or imatinib for unresectable disease.

Synonyms:

Dermatographism

Urticaria factitia: the development of linear wheals (hives) within minutes of stroking or scratching the skin, the most common form of physical urticaria. Mast cell hyper-reactivity releases histamine after minor mechanical pressure. Associated with chronic spontaneous urticaria and atopy.

Synonyms:

Dermatomyositis

An inflammatory myopathy with characteristic skin manifestations: Gottron papules (over knuckles), heliotrope rash (purple periorbital), shawl/V sign erythema, and proximal muscle weakness; associated with interstitial lung disease, and in adults an increased risk of malignancy (ovary, lung, GI).

Synonyms:

Dermatopathology

The study of skin disease through examination of tissue specimens, usually with microscopy and related laboratory methods. It helps identify inflammatory, infectious, benign, and malignant skin disorders.

Synonyms:

Dermatophytosis

A superficial infection of keratinized skin, hair, or nails caused by dermatophyte fungi, producing conditions such as tinea corporis, tinea pedis, and onychomycosis.

Synonyms:

Dermis

Thick connective tissue layer beneath the epidermis providing structural support, elasticity, and nourishment. Two layers: papillary (superficial, loose connective tissue with dermal papillae interdigitating with epidermal ridges) and reticular (deep, dense irregular connective tissue).

Synonyms:

Dermoid

A benign cystic teratoma containing elements derived from ectoderm, including skin, hair follicles, sebaceous glands, and sometimes teeth. Ovarian dermoid cysts are the most common germ cell tumor of the ovary, typically occurring in young women. They are usually asymptomatic but may cause torsion, rupture, or malignant transformation.

Synonyms:

Dermoid Cyst

A usually benign cyst lined by tissue resembling skin and sometimes containing hair, glands, or other skin structures.

Synonyms:

Dermoscopy

Noninvasive examination of skin lesions with magnification and polarized or nonpolarized illumination that reveals structures not visible to the unaided eye. It improves assessment of pigmented lesions and selected inflammatory or infectious conditions but does not replace biopsy when malignancy is suspected.

Synonyms:

Descending Colon

From the splenic flexure to the left iliac fossa, approximately 25-30 cm, and mostly retroperitoneal and fixed to the posterior abdominal wall. The phrenicocolic ligament supports the splenic flexure. Anteriorly it is related to small intestine; posteriorly to the left kidney. It absorbs water and electrolytes and compacts fecal matter.

Synonyms:

Descending Thoracic Aorta

The portion of the aorta extending from the aortic arch to the diaphragm. It lies in the posterior mediastinum and gives branches to the thoracic wall and organs.

Synonyms:

Desmoid Tumor

A locally aggressive but non-metastasizing fibrous tumor (fibromatosis), associated with familial adenomatous polyposis. Treatment includes surgery, radiation, and systemic therapy; recurrence after resection is common.

Synonyms:

Desquamative Interstitial Pneumonia

A rare ILD characterized by uniform filling of alveoli with macrophages containing brown pigment (hemosiderin-laden). It is strongly associated with smoking. HRCT shows bilateral ground-glass opacities with lower lobe predominance. Smoking cessation and corticosteroids are the main treatments.

Synonyms:

Detached Retina

Separation of the neurosensory retina from the underlying retinal pigment epithelium (RPE), a medical emergency requiring prompt surgical repair to prevent permanent vision loss.

Synonyms:

Deterministic Effects

Tissue reactions caused by radiation that generally occur only above a threshold dose, with severity increasing as the dose rises. Examples include skin injury, cataracts, and tissue damage after substantial exposure.

Synonyms:

Detoxification

Removal of toxic substance from body. Methods: activated charcoal, gastric lavage (rarely used), whole bowel irrigation, hemodialysis, hemoperfusion, chelation, supportive care.

Synonyms:

Developmental Dysplasia of the Hip

A spectrum of hip abnormalities in infants and children, ranging from mild acetabular dysplasia to complete hip dislocation. The femoral head is partially or completely displaced from the acetabulum due to capsular laxity and acetabular underdevelopment.

Synonyms:

Developmental Milestones

Skills and abilities that children typically acquire at predictable ages. Examples: social smile at 2 months, rolling over at 4-6 months, sitting independently at 6-8 months, walking at 12 months, and speaking two-word phrases at 2 years. Delays in reaching milestones may indicate developmental delay, autism, or neurologic impairment.

Synonyms:

Developmental Regression

Loss of previously acquired developmental skills. Regression is a neurologic red flag requiring prompt evaluation for genetic, metabolic, neurodegenerative, epileptic, infectious, or structural causes.

Synonyms:

Developmental Surveillance

The ongoing process of eliciting caregiver concerns, observing the child, documenting developmental history, and monitoring milestones during routine care. It differs from formal developmental screening, which uses standardized instruments at specified ages.

Synonyms:

Deviated Septum

Displacement of the nasal septum from the midline, congenital or acquired from trauma, and present to some degree in most adults. Significant deviation narrows one nasal cavity, impairing airflow and sinus drainage and producing obstruction, congestion, recurrent sinusitis, epistaxis, and sleep disturbance.

Synonyms:

Devic Disease

Neuromyelitis optica spectrum disorder, an autoimmune disease that primarily affects the optic nerves and spinal cord.

Synonyms:

DEXA (Dual-Energy X-ray Absorptiometry)

Measures bone mineral density (BMD) at spine and hip. T-score compares to young adult reference. Osteoporosis: T-score ≤ -2.5 . Osteopenia: -1.0 to -2.5. Low radiation dose.

Synonyms: Dual-Energy X-ray Absorptiometry

Dexamethasone Suppression Test

A dynamic test used to assess cortisol regulation. In normal physiology, dexamethasone suppresses ACTH and cortisol; failure of suppression supports endogenous hypercortisolism but requires interpretation with medication, absorption, and comorbidity considerations.

Synonyms:

Dextrocardia

A congenital cardiac positional anomaly where the heart is located in the right hemithorax with the apex pointing to the right.

Synonyms:

Diabetes

A group of disorders characterized by persistently elevated blood glucose caused by inadequate insulin secretion, impaired insulin action, or both. Chronic hyperglycemia can damage the eyes, kidneys, nerves, heart, and blood vessels. Major forms include type 1, type 2, and gestational diabetes.

Synonyms:

Diabetes and Metabolic Health

Closely linked through insulin resistance, obesity, dyslipidemia, and hypertension, collectively known as the metabolic syndrome. Poor metabolic health increases the risk of developing type 2 diabetes and worsens glycemic control in existing diabetes.

Synonyms:

Diabetes Complications

Diabetes complications arise from chronic hyperglycemia damaging blood vessels and nerves over time. Microvascular complications include diabetic retinopathy leading to vision loss, nephropathy progressing to kidney failure, and neuropathy causing pain and loss of sensation.

Synonyms:

Diabetes insipidus

A disorder characterized by polyuria (excessive urine output exceeding 40 mL/kg/24 hours) and polydipsia due to deficient secretion of antidiuretic hormone (ADH, vasopressin) from the posterior pituitary (central diabetes insipidus) or renal resistance to ADH action (nephrogenic diabetes insipidus).

Synonyms:

Diabetes Management

The coordinated use of nutrition, physical activity, medicines when indicated, glucose monitoring, and screening for complications to maintain health and reduce diabetes-related risk.

Synonyms:

Diabetes Medications

Diabetes medications lower blood glucose through various mechanisms: metformin reduces hepatic glucose production; sulfonylureas stimulate insulin secretion; SGLT2 inhibitors increase urinary glucose excretion; GLP-1 receptor agonists enhance incretin effects; and insulin replaces deficient hormone.

Synonyms:

Diabetes Mellitus

A metabolic disorder characterized by chronic hyperglycemia resulting from insufficient insulin production, insulin resistance, or both. Type 1 diabetes results from autoimmune destruction of pancreatic beta cells, while type 2 is driven by genetic and lifestyle factors leading to insulin resistance.

Synonyms:

Diabetes Mellitus Type 1

An autoimmune disease characterized by destruction

of pancreatic beta cells leading to absolute insulin deficiency. Usually presents in childhood or young adulthood with acute onset of polyuria, polydipsia, weight loss, and diabetic ketoacidosis (DKA) at diagnosis in many.

Synonyms:

Diabetes Mellitus Type 2

A progressive metabolic disorder characterized by insulin resistance and relative insulin deficiency, strongly associated with obesity and physical inactivity. Typically presents in adults but increasingly seen in younger populations. Diagnosis: fasting glucose ≥ 126 mg/dL, HbA1c $\geq 6.5\%$, or OGTT ≥ 200 mg/dL.

Synonyms:

Diabetes Prevention

Preventing diabetes focuses on reducing the risk of developing type 2 diabetes through lifestyle interventions and risk factor management. Maintaining a healthy body weight, engaging in regular physical activity, and following a balanced diet low in refined sugars and saturated fats are cornerstone strategies.

Synonyms:

Diabetic Autonomic Neuropathy

Dysfunction of autonomic nerves caused by diabetes, affecting cardiovascular, gastrointestinal, genitourinary, sudomotor, and pupillary systems. Manifestations include orthostatic hypotension, resting tachycardia, gastroparesis, bladder dysfunction, erectile dysfunction, and impaired hypoglycemia awareness.

Synonyms:

Diabetic Cardiomyopathy

Damage to the heart muscle associated with diabetes that occurs independently of coronary artery disease or hypertension. It may cause impaired relaxation, reduced pumping function, heart failure, and rhythm problems; glucose and cardiovascular risk control can reduce risk.

Synonyms:

Diabetic Complications

The chronic and acute consequences of diabetes mellitus. Microvascular: retinopathy (leading cause of blindness), nephropathy (leading cause of ESRD—albuminuria, declining GFR), neuropathy (peripheral—stocking-glove, autonomic—gastroparesis, erectile dysfunction, postural hypotension, cardiac autonomic).

Synonyms:

Diabetic Diet

An individualized eating plan that considers carbohydrate amount and timing, overall nutrition, cultural preferences, and treatment goals to support blood-glucose control.

Synonyms:

Diabetic Foot

Foot problems associated with diabetes, including neuropathy, deformity, ulcers, infection, and impaired healing.

Synonyms:

Diabetic Foot Disease

Complex multifactorial condition resulting from the combination of peripheral neuropathy, peripheral arterial disease, and impaired immune function in diabetes. Neuropathy leads to loss of protective sensation and foot deformities. Peripheral arterial disease impairs healing. Minor trauma progresses to ulceration and infection.

Synonyms:

Diabetic Foot Ulcer

A chronic wound of the foot in a patient with diabetes, resulting from peripheral neuropathy, peripheral artery disease, and impaired wound healing. Neuropathic ulcers: painless, at pressure points (plantar metatarsal heads, heel), punched-out appearance, surrounded by callus.

Synonyms:

Diabetic Hyperosmolar Hyperglycemic State

A severe complication of diabetes marked by ex-

treme hyperglycemia, increased serum osmolality, and dehydration with little or no ketoacidosis. It can cause altered consciousness and requires urgent hospital treatment.

Synonyms:

Diabetic Ketoacidosis

An acute, life-threatening diabetes complication characterized by ketone production and metabolic acidosis, usually with elevated blood glucose. It may be triggered by infection, insufficient insulin, myocardial infarction, pancreatitis, or other physiologic stress.

Synonyms:

Diabetic Ketoacidosis Monitoring

Monitoring during DKA management includes hourly blood glucose measurement, serum electrolytes every two to four hours, venous blood gas assessment, beta-hydroxybutyrate levels, and fluid balance.

Synonyms:

Diabetic Macular Edema

The accumulation of fluid within the macula due to breakdown of the blood-retinal barrier in diabetic retinopathy, resulting in thickening of the macula and central vision loss, and it can occur at any stage of diabetic retinopathy, from mild non-proliferative to proliferative disease.

Synonyms:

Diabetic Nephropathy

Kidney disease caused by diabetes mellitus, the leading cause of ESRD worldwide. Pathophysiology: hyperglycemia-induced glomerular hyperfiltration, basement membrane thickening, mesangial expansion, and glomerulosclerosis. Presents with progressive albuminuria (microalbuminuria macroalbuminuria) and declining GFR.

Synonyms:

Diabetic Neuropathy

Nerve dysfunction caused by diabetes. It may cause distal sensory loss and pain or affect autonomic

functions such as digestion, blood pressure, sweating, bladder function, or sexual function.

Synonyms:

Diabetic Peripheral Neuropathy

The most common complication of diabetes mellitus, affecting approximately fifty percent of patients with long-standing disease. It is a length-dependent, sensorimotor polyneuropathy that affects the distal lower extremities first, in a glove-and-stocking distribution, and progresses proximally over time.

Synonyms:

Diabetic Retinopathy

A microvascular complication of diabetes mellitus and a leading cause of blindness in working-age adults. Non-proliferative DR (NPDR): microaneurysms, dot-blot hemorrhages, exudates (hard and cotton-wool spots), and venous beading. Proliferative DR (PDR): retinal neovascularization, vitreous hemorrhage, and tractional retinal detachment.

Synonyms:

Diagnosis

The identification of a disease or other health condition through clinical history, examination, and appropriate investigations. A differential diagnosis considers alternative explanations for the findings.

Synonyms:

Diagnostic microbiology

The laboratory identification of microorganisms causing disease. Methods include microscopy, culture, biochemical testing, serology, and molecular methods. Rapid diagnostic tests provide same-day results. MALDI-TOF mass spectrometry revolutionized bacterial identification.

Synonyms:

Diagnostic Radiology

The medical specialty that uses imaging methods to diagnose and characterize disease, including X-ray, ultrasound, computed tomography, magnetic resonance imaging, and nuclear medicine.

Synonyms:

Diagnostic Test

A test used to evaluate a person with symptoms, signs, or an abnormal screening result to establish, exclude, or characterize a disease. Its usefulness depends on analytic validity, clinical performance, and the consequences of the result.

Synonyms:

Diagnostic Uncertainty

The state in which available information does not establish a single diagnosis with sufficient confidence. It should be communicated transparently and managed with safety-netting, planned reassessment, and targeted additional evaluation.

Synonyms:

Dialectical Behavior Therapy

A comprehensive cognitive-behavioral treatment originally developed for borderline personality disorder. It combines cognitive-behavioral techniques with mindfulness and acceptance strategies. Core modules include mindfulness, distress tolerance, emotion regulation, and interpersonal effectiveness.

Synonyms:

Dialysis

Removal of excess fluid and waste products from the blood when kidney function is inadequate, using hemodialysis or peritoneal dialysis.

Synonyms:

Dialysis Access

A vascular route used for hemodialysis, such as an arteriovenous fistula, arteriovenous graft, or central venous catheter. Each option has different benefits and risks.

Synonyms:

Dialysis Adequacy

The degree to which a dialysis prescription removes uremic solutes and controls fluid, electrolyte, and acid-base balance while meeting patient-centered treatment goals. Measures such as Kt/V and urea reduction ratio are used for hemodialysis, but clinical status remains essential.

Synonyms:

Dialysis Disequilibrium Syndrome

Neurological complications during hemodialysis in severely uremic patients. Headache, nausea, confusion, seizures, and coma. Results from rapid solute removal causing cerebral edema. Prevent with gradual dialysis initiation and shorter initial sessions.

Synonyms:

Diaper Rash

Irritant inflammation of the skin covered by a diaper, commonly caused by prolonged contact with urine or stool, friction, moisture, or *Candida* infection. It causes redness and soreness; persistent, severe, or spreading rash requires evaluation for infection or another skin condition.

Synonyms:

Diaphragm

Dome-shaped musculotendinous partition separating thoracic/abdominal cavities, primary inspiration muscle. Central tendon with muscular periphery from xiphoid, lower six costal cartilages, and lumbar vertebrae via crura and arcuate ligaments. Innervated by phrenic nerves (C3-C5). Contraction flattens the dome increasing thoracic volume.

Synonyms:

Diaphragmatic Hernia

Protrusion of abdominal contents through a defect or opening in the diaphragm into the thoracic cavity. It may be congenital or acquired after trauma and can cause respiratory compromise, bowel obstruction, or strangulation; diagnosis is based on imaging and management depends on symptoms, contents, and the risk of organ compromise.

Synonyms:

Diaphragmatic rupture

A tear in the diaphragm most commonly caused by blunt or penetrating thoracoabdominal trauma, with the left side affected in approximately 75 percent of cases due to the protective effect of the liver on the right. Herniation of abdominal viscera into

the thorax may cause respiratory distress, bowel obstruction, or strangulation.

Synonyms:

Diaphysis

The shaft of a long bone, comprising thick cortical (compact) bone surrounding the medullary cavity, which contains bone marrow in children and is largely yellow (fatty) marrow in adults. Enclosed by periosteum; the nutrient artery enters here. Fractures of the diaphysis heal by callus formation (enchondral and intramembranous).

Synonyms:

Diarrhea

Frequent passage of loose or watery stools. It may be acute or persistent and can result from infection, medicines, dietary factors, inflammation, malabsorption, or other conditions. Associated symptoms and the need for testing or treatment depend on severity, duration, and the person's clinical features.

Synonyms:

Diarrhea, Constipation, Gas, and Bloating

These common gastrointestinal symptoms arise from disruptions in normal digestive function caused by diet, infections, medications, or underlying conditions like irritable bowel syndrome. Diarrhea involves increased stool frequency and water content, while constipation involves infrequent or difficult passage of stool.

Synonyms:

Diastasis Recti

Separation and thinning of the linea alba between the two rectus abdominis muscles, commonly occurring during or after pregnancy. It produces a midline abdominal bulge that becomes prominent with raised intra-abdominal pressure.

Synonyms:

Diastole

The phase of the cardiac cycle when the heart muscle relaxes, allowing the chambers to fill with blood.

Synonyms:

Diastolic Dysfunction

Impaired relaxation, compliance, or filling of the left or right ventricle during diastole. It can raise filling pressures and cause exertional dyspnoea, pulmonary congestion, or heart failure with preserved ejection fraction; echocardiography assesses relaxation, chamber structure, and estimated filling pressure.

Synonyms:

Diathermy

The use of high-frequency electrical current to generate heat for surgical purposes, including cutting tissue, coagulating blood vessels to stop bleeding (hemostasis), and destroying abnormal tissue (electrocautery, electrocoagulation).

Synonyms:

Diatom Test

Forensic technique used to support the diagnosis of drowning; microscopic silica-shelled diatoms present in drowning water enter lungs, penetrate alveolar capillaries, and circulate to distant closed organs (femur bone marrow, brain) only if active circulation was present at time of submersion.

Synonyms:

Dichorionic Twins

Twins that each have a separate chorion and amnion. All dizygotic twins are dichorionic, and some monozygotic twins are as well. Each fetus usually has a separate placental circulation, although the placentas may appear fused; complications include preterm birth and growth disturbance.

Synonyms:

DICOM

Digital Imaging and Communications in Medicine. Standard for medical image exchange.

Synonyms:

Dietary Assessment

The systematic evaluation of a person's food and

nutrient intake, using methods such as a food diary, 24-hour recall, or food-frequency questionnaire.

Synonyms:

Dietary Fat

A macronutrient composed mainly of triglycerides and fatty acids that provides approximately 9 kcal per gram. Fat supports cell membranes, energy storage, absorption of vitamins A, D, E, and K, and synthesis of signaling molecules; the type of fat affects cardiometabolic risk.

Synonyms:

Dietary Reference Intakes

Reference values for nutrient intake: RDA (Recommended Dietary Allowance), AI (Adequate Intake), UL (Tolerable Upper Intake Level), EAR (Estimated Average Requirement).

Synonyms:

Dieulafoy Lesion

Large caliber persistent submucosal artery in the stomach wall that can cause massive gastrointestinal bleeding. The artery is abnormally large and superficial, lacking the normal tapering into smaller arterioles. Presents with hematemesis or melena without a visible ulcer.

Synonyms:

Differential Diagnosis

The process of distinguishing a particular disease or condition from others that present with similar symptoms. Systematic approach: consider life-threatening conditions first, use pretest probability, apply diagnostic criteria, and order targeted tests.

Synonyms:

Differentiation

The process by which cells develop specialized structures and functions. In pathology, the term also describes how closely tumor cells resemble the normal tissue from which they arose.

Synonyms:

Difficult Airway

A clinical situation in which a trained clinician has difficulty with oxygenation, ventilation, supraglottic airway placement, laryngoscopy, or tracheal intubation. It may result from anatomical features, illness, trauma, or limited equipment and requires an appropriate airway plan.

Synonyms:

Difficult Intubation

Difficulty placing an endotracheal tube despite appropriate technique and equipment. Risk may be increased by limited mouth opening or neck movement, abnormal airway anatomy, facial trauma, obesity, or a previous difficult airway. Preparation includes assessment, preoxygenation, and backup airway plans.

Synonyms:

Diffuse Axonal Injury

Widespread injury to nerve fibers caused by acceleration or deceleration of the brain. It may produce prolonged impaired consciousness, and MRI can show characteristic lesions.

Synonyms:

Diffuse Esophageal Spasm

A motility disorder characterised by premature, uncoordinated esophageal contractions, causing intermittent chest pain and dysphagia for liquids and solids. Endoscopy excludes structural disease; high-resolution manometry confirms premature contractions.

Synonyms:

Diffusing Capacity

Ability of lungs to transfer gas from alveoli to blood. Reduced in emphysema, ILD, and anemia. Increased in pulmonary hemorrhage and left-to-right shunts.

Synonyms:

Diffusing Capacity of the Lung

The capacity of the respiratory membrane to transfer gas from alveolar air into pulmonary capillary blood. It depends on surface area, membrane thick-

ness, gas properties, hemoglobin, and pulmonary capillary blood volume and is commonly measured with carbon monoxide as DLCO.

Synonyms:

Diffusion

The net movement of molecules from an area of higher concentration to lower concentration due to random thermal motion (Brownian motion).

Synonyms:

Diffusion Restriction

Reduced movement of water molecules detected by diffusion-sensitive MRI sequences, usually appearing bright on DWI with corresponding low ADC. It may indicate acute ischemia but can also occur with abscess, hypercellular tumor, seizure, and other processes.

Synonyms:

Diffusion-Weighted Imaging

An MRI technique that detects differences in the movement of water molecules within tissue. Restricted diffusion may occur in acute stroke, abscess, hypercellular tumors, and other conditions.

Synonyms:

DiGeorge Syndrome

A disorder usually caused by a deletion of part of chromosome 22 that can affect development of the thymus, parathyroid glands, heart, palate, and immune system. It is also called 22q11.2 deletion syndrome.

Synonyms: 22q11.

Digestion

The process by which the body breaks down ingested food into smaller molecules that can be absorbed and utilized. Digestion begins in the mouth (mechanical–mastication; enzymatic–salivary amylase for starch, lingual lipase).

Synonyms:

Digestive Health

The efficient functioning of the gastrointestinal tract

in breaking down food, absorbing nutrients, and eliminating waste. Digestive health depends on factors such as diet, hydration, gut microbiome balance, and the integrity of the digestive mucosa.

Synonyms:

Digital Clubbing

Bulbous enlargement of distal phalanges with loss of nail-bed angle (> 180 degrees). Associated with lung cancer, ILD, bronchiectasis, and cyanotic heart disease.

Synonyms:

Digital ischemia

Reduced arterial blood flow to the fingers causing pain, pallor, coolness, and potential tissue necrosis. Causes include Raynaud phenomenon, thromboangiitis obliterans, cholesterol emboli, and arterial thrombosis. Severe cases may require amputation of affected digits.

Synonyms:

Digital Mucous Cyst

A benign ganglion cyst arising from the distal interphalangeal joint, presenting as a translucent, dome-shaped nodule on the dorsal aspect of the finger near the nail fold. It is associated with osteoarthritis of the DIP joint.

Synonyms:

Digital Subtraction Angiography

An imaging technique that subtracts precontrast images from contrast-enhanced images to show blood vessels more clearly. It can also guide selected vascular procedures.

Synonyms:

Digitalis (Digoxin) Toxicity

Nausea, vomiting, visual changes (yellow halos), arrhythmias. Risk: narrow therapeutic index, renal impairment, hypokalemia. Treatment: digoxin immune Fab, cardiac monitoring, correct electrolytes.

Synonyms: Digoxin

Digitalis toxicity

A potentially life-threatening adverse effect of cardiac glycoside therapy (digoxin, digitoxin) characterized by a narrow therapeutic index (0.5-2.0 ng/mL for digoxin).

Synonyms:

Digoxin Immune Fab

Antibody fragments that bind free digoxin and related cardiac glycosides, reducing their tissue activity. Indications include life-threatening dysrhythmia, severe hyperkalemia from acute toxicity, or a potentially massive ingestion.

Synonyms:

Dilated Cardiomyopathy

A disease of the heart muscle in which one or more chambers enlarge and contract poorly, usually causing reduced ejection fraction. Causes include inherited disease, infection, toxins, medicines, pregnancy, and ischemic or inflammatory injury.

Synonyms:

Dilated Cardiomyopathy Prognosis

Prognosis varies widely and depends on ventricular function, symptoms, cause, arrhythmias, comorbidities, and response to treatment. Guideline-directed therapy can improve cardiac function in some people, while severe disease may lead to heart failure, arrhythmia, or the need for advanced therapies.

Synonyms:

Dilation and Curettage

Surgical dilation of the cervix and curettage (scraping) of the uterine lining. Indications: incomplete or missed abortion (miscarriage management), therapeutic abortion, endometrial sampling (abnormal uterine bleeding, postmenopausal bleeding, endometrial hyperplasia/cancer), and removal of retained products of conception (RPOC).

Synonyms:

Dilator

An instrument or device used to gradually widen a body opening or passage.

Synonyms:

Dilute Russell Viper Venom Time

A phospholipid-dependent clotting assay used mainly to detect lupus anticoagulant. It is commonly performed as part of laboratory evaluation for antiphospholipid syndrome, with confirmatory testing required because anticoagulants and other factor abnormalities can affect the result.

Synonyms:

Dimercaprol

Chelating agent for arsenic, mercury, gold. Given IM. Side effects: hypertension, tachycardia, nausea, pain at injection site.

Synonyms:

Dinoprostone (Cervidil, Prepidil)

A prostaglandin E2 medicine used to soften the cervix and help initiate labor. It is available in several formulations, and administration requires obstetric monitoring because it can cause excessive uterine activity or fetal effects.

Synonyms: Cervidil, Prepidil

Dipeptidyl Peptidase-4 Inhibitors

Oral glucose-lowering medications including sitagliptin, saxagliptin, linagliptin, and alogliptin that inhibit the enzyme degrading incretin hormones GLP-1 and GIP. Resulting increase in active incretin levels enhances glucose-dependent insulin secretion and suppresses glucagon. Neutral effect on weight and low hypoglycemia risk.

Synonyms:

Diphtheria

An acute, toxin-mediated infectious disease caused by *Corynebacterium diphtheriae*, a gram-positive aerobic bacillus that produces a potent exotoxin that inhibits protein synthesis via ADP-ribosylation of elongation factor 2, causing local tissue necrosis and systemic toxicity.

Synonyms:

Diphtheria Vaccine

Toxoid vaccine containing formalin-inactivated diphtheria toxin, providing immunity against the exotoxin produced by *Corynebacterium diphtheriae* rather than the bacterium itself.

Synonyms:

Dipyllobothrium latum

The fish tapeworm, a large cestode infecting humans through consumption of raw or undercooked freshwater fish. It can grow up to 10 meters in length and absorbs vitamin B12 in the intestine, potentially causing megaloblastic anemia. Diagnosis is by identification of eggs or proglottids in stool. Treatment is with praziquantel.

Synonyms:

Diplopia

Double vision, in which one object is perceived as two. It may result from ocular misalignment, nerve disease, muscle disease, or a brain disorder.

Synonyms:

Diplopia (Double Vision)

The perception of two images of a single object, classified by onset, duration, and whether it resolves with covering one eye. Monocular diplopia (persists with one eye covered): caused by ocular surface abnormalities (dry eye, irregular astigmatism, cataract, corneal scar, lens dislocation)—usually benign.

Synonyms: Double Vision

Direct Antiglobulin Test

An immunohematologic test that detects immunoglobulin and/or complement bound to the surface of a patient's erythrocytes. A positive result supports in-vivo red-cell coating, as in autoimmune hemolytic anemia, hemolytic transfusion reactions, and hemolytic disease of the fetus and newborn.

Synonyms:

Direct Coombs Test

Direct antiglobulin test: detects antibodies or complement (C3) bound to the surface of RBCs in vivo. Positive in: autoimmune hemolytic anemia (warm:

IgG, cold: C3), drug-induced hemolytic anemia, hemolytic transfusion reaction, and hemolytic disease of the newborn (HDN). Grading: 1+ to 4+.

Synonyms:

Direct Oral Anticoagulants

DOACs directly inhibit specific coagulation factors. Direct thrombin inhibitors: dabigatran. Factor Xa inhibitors: rivaroxaban, apixaban, edoxaban, betrixaban. They have predictable pharmacokinetics, fixed dosing, and routine monitoring is not required. They have fewer drug interactions than warfarin.

Synonyms:

Direct Veneer

Composite restoration placed chairside for aesthetic improvement. Conservative alternative to laboratory veneer.

Synonyms:

Directly Observed Therapy

Supervision of medication ingestion to ensure adherence. Standard of care for TB treatment. Ensures completion of the full treatment course and reduces development of drug resistance.

Synonyms:

Dirofilaria repens

A filarial nematode transmitted by mosquitoes that causes subcutaneous or ocular dirofilariasis in humans, an accidental dead-end host. It presents as a solitary, migratory subcutaneous nodule, often on the trunk or extremities, or as a conjunctival or periorbital mass.

Synonyms:

Disability

A limitation in body function or structure, activity, or participation that results from a health condition and interaction with the person's environment.

Synonyms:

Disability Evaluation

Assessment of functional limitations for legal, insurance, or benefits purposes. Objective measures,

standardized tests.

Synonyms:

Disability-Adjusted Life Year

A population-health measure combining years of life lost because of premature mortality with years lived with disability. One DALY represents one lost year of healthy life under the chosen methods and disability weights.

Synonyms:

Disaster Preparedness

Planning and organizing resources, training, and procedures to reduce harm and support effective response and recovery during disasters.

Synonyms:

Discectomy

Surgical removal of a herniated intervertebral disc fragment compressing a nerve root. Microscopic discectomy (most common): small incision, microscope, minimal muscle dissection.

Synonyms:

Discharge Planning

A multidisciplinary process that prepares a patient for safe transition from hospital or facility care to the next setting. It includes medication review, follow-up, education, equipment, self-management support, and communication of pending results.

Synonyms:

Discitis

Inflammation or infection of an intervertebral disc, often involving adjacent vertebral endplates. It may cause severe localized back or neck pain, stiffness, fever, and reduced mobility; causes include haematogenous infection, postoperative infection, and inflammatory disease, with MRI being the preferred imaging study.

Synonyms:

Discography

An imaging procedure in which contrast material is injected into an intervertebral disc to assess disc

structure and reproduce pain. Its diagnostic value is limited and its use is selective.

Synonyms:

Disease

Abnormal condition affecting body. Can be infectious, degenerative, neoplastic, etc.

Synonyms:

Disease Reporting

Mandatory notification of specified diseases or health events to public-health authorities.

Synonyms:

Disease-Free Survival

The length of time after treatment during which a patient remains alive without detectable evidence of the disease. The precise definition depends on the cancer and the study protocol.

Synonyms:

Disease-Modifying Antirheumatic Drug

A medication that reduces inflammatory disease activity and helps prevent structural damage or disability rather than providing only symptomatic relief. Conventional synthetic, biologic, and targeted synthetic DMARDs are used according to disease and patient factors.

Synonyms:

Disinfection

The elimination of most pathogenic microorganisms on inanimate surfaces. Disinfection does not eliminate all forms of microbial life, particularly spores. High-level disinfection eliminates all microorganisms except spores. Intermediate-level disinfection eliminates mycobacteria, most viruses, and bacteria.

Synonyms:

Disk Diffusion Susceptibility Test

A standardized method in which antimicrobial-impregnated disks are placed on an inoculated agar surface and zones of growth inhibition are measured. Zone diameters are interpreted using validated organism- and drug-specific breakpoints.

Synonyms:

Diskectomy

The surgical removal of herniated intervertebral disk material that compresses nerve roots or the spinal cord, causing radiculopathy or myelopathy. Indicated in severe disk herniation causing unremitting pain, progressive motor weakness, or cauda equina syndrome.

Synonyms:

Diskitis

Infection or inflammation of an intervertebral disc and adjacent vertebral endplates, usually caused by bacterial infection. It causes localized back pain, stiffness, fever, and reluctance to move, particularly in children.

Synonyms:

Dislocation

Complete displacement of the articular surfaces of a joint, resulting in loss of normal bony alignment and often associated with ligamentous, capsular, and neurovascular injury.

Synonyms:

Dislocation of the lens

Partial or complete displacement of the crystalline lens from its normal position within the pupillary axis due to disruption or weakness of the zonular fibers. Causes include Marfan syndrome, homocystinuria, trauma, and prior intraocular surgery; it may cause acute angle-closure glaucoma or blurred vision.

Synonyms:

Disofenin Scan

Hepatobiliary imaging using Tc-99m disofenin. Similar to mebrofenin scan.

Synonyms:

Disorder

A disturbance of normal structure or function that causes symptoms, impairment, or clinically important risk. The term does not necessarily indicate a

particular level of severity.

Synonyms:

Disorientation

Difficulty knowing one's time, place, situation, or identity. It may occur with delirium, infection, metabolic disturbances, intoxication or withdrawal, brain injury, or dementia. Sudden disorientation is an urgent medical symptom.

Synonyms:

Dissection

A tear in the inner layer of a blood vessel that allows blood to track between the vessel-wall layers and create a false channel. In the aorta, this is called aortic dissection.

Synonyms:

Disseminated coccidioidomycosis

Coccidioides infection that spreads beyond the lungs to skin, bone, meninges, or other organs.

Synonyms:

Disseminated cutaneous blastomycosis

Blastomyces infection involving multiple areas of skin, usually after spread from a pulmonary infection.

Synonyms:

Disseminated Intravascular Coagulation

A pathological state of simultaneous systemic activation of coagulation and fibrinolysis, leading to widespread microvascular thrombosis that causes organ ischemia and dysfunction, paradoxically accompanied by consumptive coagulopathy and increased bleeding risk.

Synonyms:

Disseminated Mycobacterium avium–intracellulare infection

Widespread infection with Mycobacterium avium complex, usually occurring in people with severe immune suppression.

Synonyms:

Disseminated varicella infection

Varicella-zoster virus infection that spreads beyond the skin and may involve the lungs, brain, liver, or other organs.

Synonyms:

Dissociation

A disruption in the normal integration of consciousness, memory, identity, emotion, perception, behavior, and sense of self. It exists on a spectrum from normal (daydreaming) to pathological (DID, depersonalization-derealization).

Synonyms:

Dissociative Amnesia

Inability to recall important autobiographical information, usually of a traumatic or stressful nature, that is inconsistent with ordinary forgetting. The amnesia may be localized, selective, generalized, or continuous.

Synonyms:

Dissociative Disorder

DSM-5 category comprising disruption of the normally integrated functions of consciousness, memory, identity, perception, and behaviour, including dissociative amnesia, dissociative identity disorder, and depersonalization-derealization disorder. Strongly associated with severe early-life trauma.

Synonyms:

Dissociative Identity Disorder

The presence of two or more distinct personality states or an experience of possession involving marked discontinuity in sense of self, agency, affect, behavior, memory, perception, cognition, and/or sensory-motor functioning.

Synonyms:

Distal

Positioned further away from the trunk of the body or point of origin of a limb.

Synonyms:

Distal Radius Fractures

The most common upper extremity fracture. Classification: AO/OTA: A (extra-articular), B (partial articular), C (complete articular); Frykman. Colles fracture: dorsal angulation/displacement (fall on outstretched hand). Smith fracture: volar angulation (fall on flexed wrist).

Synonyms:

Distal Tubule

Segment of the nephron extending from the thick ascending limb of the loop of Henle to the collecting duct. The early distal tubule reabsorbs sodium and chloride through the NCC cotransporter, which is the target of thiazide diuretics.

Synonyms:

Distraction Osteogenesis

Surgical bone lengthening by gradual distraction. Used for jaw deformities, trauma.

Synonyms:

Distributive Shock

Shock caused by pathologic vasodilation and maldistribution of blood flow, producing inadequate effective circulating volume despite variable cardiac output. Causes include sepsis, anaphylaxis, neurogenic shock, and some toxic syndromes.

Synonyms:

Diuresis

Increased urine production. Can be physiological (fluid overload) or pharmacological (diuretics). Osmotic diuresis (hyperglycemia), water diuresis (DI), saline diuresis (hypertonic saline).

Synonyms:

Diuretic

A drug that increases urine production, used for edema (heart failure, cirrhosis, renal disease), hypertension, and electrolyte disorders.

Synonyms:

Diverticular Disease

Condition characterized by the presence of divertic-

ula, which are outpouchings of the colonic mucosa and submucosa through defects in the muscularis propria at sites where vasa recta penetrate the bowel wall.

Synonyms:

Diverticulitis

Inflammation and infection of colonic diverticula, a common complication of diverticulosis affecting 10-25 percent of individuals with diverticula. The pathophysiology involves microperforation of a diverticulum with fecal contents entering the pericolic tissues, inciting inflammation and potential abscess formation.

Synonyms:

Diverticulosis

The presence of diverticula, small mucosal outpouchings through the colonic wall at sites of vascular penetration, most commonly in the sigmoid colon (90 percent of cases). Prevalence increases with age, affecting over 50 percent of individuals older than 60 years and nearly 70 percent by age 85.

Synonyms:

Diverticulosis and Diverticulitis

Diverticulosis is a condition in which small, bulging pouches (diverticula) form in the lining of the digestive tract, most commonly in the colon. Diverticulitis occurs when these pouches become inflamed or infected, causing abdominal pain, fever, and changes in bowel habits.

Synonyms:

Dix-Hallpike Maneuver

The Dix-Hallpike maneuver is a diagnostic test used to identify benign paroxysmal positional vertigo by detecting the characteristic nystagmus and vertigo that occur when displaced otoconia within the posterior semicircular canal move in response to gravity during specific head positioning.

Synonyms:

Dizziness

A nonspecific symptom that may mean vertigo, light-

headedness, presyncope, or unsteadiness. Causes include disorders of the vestibular system, cardiovascular system, nervous system, vision, medications, or metabolism.

Synonyms:

DMFT Index

An epidemiologic index recording the number of permanent teeth that are decayed, missing because of caries, or filled. It estimates cumulative caries experience but does not measure current lesion activity or distinguish all causes of tooth loss.

Synonyms:

DMSA Scan

A nuclear-medicine study using technetium-labeled dimercaptosuccinic acid to show renal cortical function and areas of cortical injury or scarring.

Synonyms:

DNA

Deoxyribonucleic acid, the hereditary material in humans and most organisms. Double helix of two antiparallel strands (sugar-phosphate backbone, nitrogenous bases: A-T, G-C). Human genome: 3 billion base pairs, 20,000 protein-coding genes.

Synonyms:

DNA (Deoxyribonucleic Acid)

Double-stranded helical molecule carrying genetic information. Composed of nucleotides (sugar-phosphate backbone with bases adenine, thymine, guanine, cytosine). Replication is semi-conservative. Genes are specific sequences encoding proteins or functional RNAs. Chromosomes are highly condensed DNA-protein complexes.

Synonyms: Deoxyribonucleic Acid

DNA Double Helix

The molecular structure of DNA described by Watson and Crick in 1953, consisting of two antiparallel polynucleotide chains wound around each other in a right-handed helix. The sugar-phosphate backbone is on the exterior; nitrogenous bases project inward.

Synonyms:

DNA Profiling

Analysis of polymorphic DNA markers, commonly short tandem repeats, to compare biological samples for human identification or kinship assessment. Results are statistical associations and require validated laboratory procedures, appropriate controls, and documented sample integrity.

Synonyms:

DNA Repair

The cellular processes that detect and correct damage or copying errors in DNA. Major pathways include base-excision, nucleotide-excision, mismatch, and double-strand-break repair.

Synonyms:

DNA Repair Mechanisms

Cellular processes that correct DNA damage caused by replication errors, chemicals, radiation, and reactive oxygen species. Mismatch repair (MMR): corrects base-base mismatches and insertion-deletion loops that escape proofreading during replication.

Synonyms:

DNA Replication

The semi-conservative process by which DNA duplicates before cell division, producing two identical daughter molecules each containing one original and one new strand.

Synonyms:

DNA Sequencing

Determination of the nucleotide order in DNA. Sanger sequencing uses chain termination and is useful for selected small targets. Next-generation sequencing (NGS) uses massively parallel sequencing, whole genome, whole exome, targeted panels.

Synonyms:

Do Not Resuscitate

DNR: order not to perform CPR. Can be combined with DNI (do not intubate).

Synonyms:

DOACs

Direct oral anticoagulants are a class of anticoagulant drugs that directly inhibit specific coagulation factors, providing an alternative to warfarin with more predictable pharmacokinetics and no routine monitoring.

Synonyms:

Dobutamine Stress Echocardiography

Pharmacological stress test using dobutamine (beta-1 agonist) to increase heart rate, contractility, and myocardial oxygen demand. New or worsening wall motion abnormalities indicate ischemia. Preferred when patients cannot exercise. Beta-blockers should be held before testing.

Synonyms:

Docusate

A stool softener (surfactant laxative) that increases water and fat incorporation into stool by lowering surface tension, facilitating defecation in patients who should avoid straining (post-MI, post-surgery, hemorrhoids) and for opioid-related constipation. Onset 12-72 hours.

Synonyms:

Domestic Violence

A pattern of coercive control and physical, sexual, psychological, or economic abuse by one intimate partner or household member against another. Forensic evaluation documents patterned injuries, defensive wounds, strangulation signs, burns, and injuries of differing ages.

Synonyms:

Dominant

Allele whose phenotype is expressed in heterozygotes. Autosomal dominant disorders: Huntington disease, marfan syndrome, achondroplasia. Requires only one copy for expression.

Synonyms:

Donor Insemination

A fertility treatment in which sperm from a donor (anonymous or known) is placed into a woman's

vagina, cervix, or uterus to achieve pregnancy. Indications: male factor infertility (azoospermia, severe oligospermia), genetic disorders in the male partner, single women, and same-sex female couples.

Synonyms:

Donovanosis

A chronic, progressive, ulcerative genital infection caused by the intracellular gram-negative bacterium *Klebsiella granulomatis* (formerly *Calymmatobacterium granulomatis*). Also known as granuloma inguinale.

Synonyms: granuloma inguinale.

Dopamine Agonist

A class of medications that stimulate dopamine receptors (D1-D5), mimicking the effects of endogenous dopamine.

Synonyms:

Doppler Ultrasound

Ultrasound technique using the Doppler effect to evaluate blood flow. Color Doppler: direction and velocity of flow (red = toward transducer, blue = away). Spectral Doppler: waveform analysis (arterial: pulsatile; venous: continuous). Pulsed-wave: measures flow at a specific depth.

Synonyms:

Doppler Velocimetry

Ultrasound measuring blood flow velocity in umbilical and fetal vessels. Assesses fetal well-being.

Synonyms:

Doravirine

A non-nucleoside reverse transcriptase inhibitor (NNRTI) used in combination antiretroviral therapy for HIV-1 infection. Doravirine binds to the HIV reverse transcriptase enzyme and inhibits its activity through a unique mechanism that maintains activity against strains resistant to first-generation NNRTIs.

Synonyms:

Dorsal

Relating to the back side of the body; synonym for

posterior in human anatomy.

Synonyms:

Dorsal Root Ganglion

A swelling on the dorsal root of a spinal nerve containing the cell bodies of primary sensory neurons. Its pseudounipolar neurons convey peripheral sensory information to the spinal cord.

Synonyms:

Dosage

The amount and frequency of a drug administered to achieve a therapeutic effect while minimizing toxicity. Components: dose (amount, e.g., mg), dosing interval (frequency), route, and duration.

Synonyms:

Dose

Amount of substance administered. Factors: weight, age, renal/hepatic function, drug interactions. Toxic dose varies by substance and individual.

Synonyms:

Dose-Limiting Toxicity

An adverse effect of an anticancer treatment severe enough to prevent further dose escalation or require dose reduction according to a predefined protocol. DLTs are used in early-phase clinical trials to estimate a tolerable dose.

Synonyms:

Dose-Response Curve

A graphical representation of the relationship between the dose of a drug and the magnitude of its biological effect. The x-axis represents dose (typically on a logarithmic scale), and the y-axis represents the response (as percentage of maximum effect).

Synonyms:

Dose-Response Relationship

The dose-response relationship describes the quantitative relationship between the dose of a drug and the magnitude of the pharmacological response it produces. This relationship is typically represented as a sigmoidal curve when response is plotted against

the log of the dose.

Synonyms:

Dosimetry

Measurement and calculation of radiation dose. Patient dosimetry for therapy.

Synonyms:

DOTATATE

Somatostatin analog labeled with Ga-68 for PET imaging of neuroendocrine tumors.

Synonyms:

Double Outlet Right Ventricle

A congenital heart defect where more than 50% of both great arteries arise from the right ventricle, with a VSD as the only outlet from the left ventricle.

Synonyms:

Double-Balloon Enteroscopy

Advanced endoscopic technique using an enteroscope equipped with balloons at the tip of both the endoscope and an overtube allowing systematic advancement and visualization of the entire small bowel. The balloons are alternately inflated and deflated to anchor the bowel wall and advance the endoscope.

Synonyms:

Douche

A stream of water or solution directed into a body cavity, most commonly the vagina, for cleansing, therapeutic, or contraceptive purposes.

Synonyms:

Down Syndrome

Trisomy 21, most common viable trisomy. Features: intellectual disability, characteristic facies (flat face, upslanting palpebral fissures), hypotonia, heart defects, increased risk of leukemia, Alzheimer disease. Maternal age is major risk factor.

Synonyms:

DPP-4 Inhibitors

Dipeptidyl peptidase-4 inhibitors that prevent degradation of endogenous GLP-1 and GIP, enhancing incretin effects on insulin secretion. Examples include sitagliptin, saxagliptin, linagliptin, and alogliptin. They are well-tolerated with low hypoglycemia risk and weight neutrality. They have modest glucose-lowering effects.

Synonyms:

Drain (Surgical)

Tube for fluid evacuation. Types: closed suction (Jackson-Pratt, Hemovac), open (Penrose), pigtail. Indications: abscess, hematoma, seroma, biliary, urinary. Complications: infection, blockage, migration.

Synonyms: Surgical

Drainage Procedures

Image-guided drainage of fluid collections. Abscess, hematoma, biloma, urinoma. CT or ultrasound guidance.

Synonyms:

Dreams (Geriatric)

Sleep disturbances common. Nightmares, insomnia. Evaluate for delirium, depression, medications.

Synonyms: Geriatric

DRESS Syndrome

Drug Reaction with Eosinophilia and Systemic Symptoms, a severe, potentially life-threatening adverse drug reaction. Typically occurs 2-8 weeks after drug initiation (latency longer than SJS/TEN). Causative drugs: anticonvulsants (phenytoin, carbamazepine, lamotrigine), allopurinol, sulfonamides, dapson, minocycline.

Synonyms:

Dressler Syndrome

A delayed pericarditis occurring 2-10 weeks after myocardial infarction or cardiac surgery. It is an autoimmune-mediated inflammation caused by antibodies against myocardial antigens released during tissue injury. Symptoms include fever, pleuritic

chest pain, and pericardial friction rub. ECG may show diffuse ST elevation.

Synonyms:

Drift (Sit-to-Stand)

A functional assessment of lower-limb strength, balance, and mobility. Timed sit-to-stand, chair-rise, and timed-up-and-go tests may be used; results are interpreted according to the person's age, baseline function, assistive devices, and clinical purpose.

Synonyms: Sit-to-Stand

Driving Evaluation

Assess driving fitness after neurological, musculoskeletal conditions. On-road testing, vehicle modifications.

Synonyms:

Driving Rehabilitation

Training for adaptive driving: hand controls, left-foot accelerator, other modifications.

Synonyms:

Drooling

Excessive flow of saliva from the mouth, caused by increased production, impaired swallowing, or inability to keep saliva in the mouth. It may occur with neurologic disease, oral disorders, medication effects, or developmental conditions.

Synonyms:

Droplet precautions

Infection control measures used for pathogens transmitted through respiratory droplets. Precautions include surgical masks, patient placement in single rooms, and spatial separation. Droplet precautions are used for influenza, pertussis, and meningococcal infections. The distance for spatial separation is typically 3-6 feet.

Synonyms:

Drowning

Respiratory impairment from submersion/immersion in liquid. Drowning can be fatal or non-fatal. Pathophysiology: laryngospasm

followed by aspiration of fluid, surfactant washout, pulmonary edema, and hypoxemia. Fresh water: washes out surfactant, causes alveolar collapse. Salt water: draws fluid into alveoli (pulmonary edema).

Synonyms:

Drowning (Dry/Wet Signs)

Respiratory impairment caused by submersion or immersion in liquid. So-called dry and wet signs are unreliable for determining the cause of death.

Synonyms: Dry/Wet Signs

Drowsiness

An increased tendency to fall asleep or reduced alertness, ranging from mild sleepiness to difficulty staying awake. Causes include inadequate sleep, medical illness, sleep disorders, substance use, and medication effects; sudden or severe drowsiness may indicate an urgent neurologic or metabolic problem.

Synonyms:

Drug Allergy

An adverse immune-mediated reaction to a medication, representing a hypersensitivity response that is distinct from side effects, toxicities, and idiosyncratic reactions.

Synonyms:

Drug Antagonism

An interaction where one drug blocks or decreases the effectiveness of another, such as when an antidote blocks a poison.

Synonyms:

Drug Bioavailability

The fraction of an administered drug that reaches systemic circulation unchanged. Oral bioavailability is affected by first-pass metabolism, absorption, and drug formulation. IV administration has 100% bioavailability. Bioavailability influences drug dosing and route selection.

Synonyms:

Drug Classification Systems

Systems that group medicines according to proper-

ties such as their chemical structure, mechanism of action, therapeutic use, or effects on the body.

Synonyms:

Drug Clearance

The volume of plasma completely cleared of drug per unit time. Hepatic clearance depends on hepatic blood flow and enzyme activity; renal clearance depends on glomerular filtration, tubular secretion, and reabsorption. Total clearance determines maintenance dose.

Synonyms:

Drug Dependence

A state of physiological or psychological adaptation to a drug, characterized by a withdrawal syndrome upon discontinuation or dose reduction. Physical dependence: the body has adapted to the presence of the drug, and abrupt cessation produces a predictable withdrawal syndrome specific to the drug class.

Synonyms:

Drug Hypersensitivity Reactions

Immune-mediated adverse reactions to medicines. They may be immediate or delayed and can range from a mild rash to severe systemic illness.

Synonyms:

Drug Hypersensitivity Syndrome

A severe delayed drug reaction occurring 2 to 8 weeks after drug initiation. It presents with fever, rash (morbilliform, facial edema, exfoliative dermatitis), lymphadenopathy, eosinophilia, and internal organ involvement (hepatitis most common, also nephritis, pneumonitis, myocarditis).

Synonyms:

Drug Interaction

A change in the effect or concentration of one medicine caused by another medicine, food, substance, or disease.

Synonyms:

Drug Metabolism Pharmacogenomics

Pharmacogenomics of drug metabolism examines how genetic variations affect individual responses to drugs, enabling personalized medicine approaches to prescribing.

Synonyms:

Drug Overdose

Excessive ingestion of medication. Common: opioids, benzodiazepines, acetaminophen, salicylates, tricyclic antidepressants. Management: ABCs, activated charcoal, specific antidotes (naloxone, flumazenil, N-acetylcysteine), supportive care.

Synonyms:

Drug Overdose Management

Management of poisoning begins with assessment and support of airway, breathing, circulation, and neurologic status. Decontamination, enhanced elimination, and specific antidotes are considered only when appropriate for the substance, timing, and patient.

Synonyms:

Drug reaction with eosinophilia and systemic symptoms

A severe hypersensitivity syndrome characterized by fever, rash, lymphadenopathy, and multiorgan involvement triggered by medications, requiring prompt drug cessation and systemic corticosteroids.

Synonyms:

Drug Resistance

The ability of microorganisms, cancer cells, or parasites to survive and proliferate despite exposure to drugs that were previously effective.

Synonyms:

Drug Screening

Urine, blood, hair testing for substances of abuse. Panels: opiates, cocaine, amphetamines, cannabinoids, PCP, benzodiazepines, barbiturates. False positives possible. Confirmation by GC/MS or LC-MS/MS.

Synonyms:

Drug Testing

Laboratory analysis of biological specimens to detect drugs, metabolites, or poisons, used in clinical, workplace, sports, and forensic contexts. Specimens include blood, urine, oral fluid, hair, and postmortem tissues.

Synonyms:

Drug Therapeutics

The use of medicines to prevent, diagnose, or treat disease while balancing expected benefit and potential harm.

Synonyms:

Drug Tolerance

A decreased pharmacological response to a drug after repeated administration, requiring dose escalation to achieve the same effect.

Synonyms:

Drug Toxicity

Harmful effects caused by a medicine or its metabolites. Toxicity may result from excessive exposure, accumulation, interactions, or an unpredictable individual reaction.

Synonyms:

Drug Withdrawal

A clinically significant syndrome or return of symptoms caused by abrupt reduction or cessation of a drug after physiologic adaptation or dependence has developed. Tapering is required for some medications to reduce withdrawal and rebound effects.

Synonyms:

Drug-Drug Interactions

When one drug alters the pharmacokinetics or pharmacodynamics of another. Pharmacokinetic interactions affect absorption, distribution, metabolism, or excretion (e.g., CYP inhibitors increasing warfarin levels).

Synonyms:

Drug-Eluting Balloon (Vascular)

A vascular balloon catheter that delivers a medicine

to the vessel wall during dilation, without leaving a permanent implant.

Synonyms: Vascular

Drug-Eluting Stent

A vascular stent that slowly releases a medicine to reduce tissue growth and the risk of restenosis after angioplasty.

Synonyms:

Drug-Eluting Stent (Vascular)

A vascular stent coated with medicine that is released gradually to reduce tissue growth and recurrent narrowing.

Synonyms: Vascular

Drug-Facilitated Sexual Assault

Sexual contact occurring when a person's capacity to consent or resist is impaired by alcohol, medication, or another drug, whether administered covertly or knowingly consumed. Medical care includes urgent safety assessment, treatment of injuries, toxicology sampling when indicated, prophylaxis, and trauma-informed support.

Synonyms:

Drug-Induced Autoimmunity

Drug-induced lupus (DIL): procainamide, hydralazine, isoniazid, minocycline, TNF inhibitors, anti-TNF; anti-histone antibodies, positive ANA, negative anti-dsDNA/anti-Sm; symptoms resolve after drug cessation.

Synonyms:

Drug-Induced Liver Injury

Liver damage caused by a medicine, herbal product, or dietary supplement. It may produce abnormal liver tests, hepatitis, cholestasis, or liver failure; evaluation requires considering the exposure, timing, competing causes, and severity.

Synonyms:

Drusen

Yellowish-white deposits of extracellular material that accumulate beneath the retinal pigment epithelium between the retinal pigment epithelium base-

ment membrane and Bruch membrane, and they are the hallmark clinical finding in dry age-related macular degeneration.

Synonyms:

Dry Eye Disease

Dry eye disease, also known as keratoconjunctivitis sicca, is a multifactorial disorder of the ocular surface characterized by loss of homeostasis of the tear film, resulting in symptoms of ocular discomfort, visual disturbance, and tear film instability, with potential damage to the ocular surface.

Synonyms: keratoconjunctivitis sicca, is a multifactorial disorder.

Dry Eye Syndrome

A multifactorial disease of the ocular surface characterized by tear film instability, hyperosmolarity, and inflammation. Aqueous-deficient dry eye: Sjogren syndrome (autoimmune), non-Sjogren (lacrimal gland dysfunction, age). Evaporative dry eye: meibomian gland dysfunction (most common), incomplete blink, environmental factors.

Synonyms:

Dry Powder Inhaler

A breath-actuated inhaler delivering powdered medication. Does not require hand-breath coordination. Requires adequate inspiratory flow. Examples include Advair Diskus and Spiriva HandiHaler.

Synonyms:

Dry Skin

Abnormally dry, rough, or scaly skin caused by reduced moisture and disruption of the skin barrier. It is common with aging, low humidity, frequent washing, and eczema and may cause itching or fissuring.

Synonyms:

Dry Socket (Alveolar Osteitis)

A painful postoperative complication of tooth extraction, most commonly occurring after the removal of mandibular third molars (wisdom teeth).

It is caused by the premature dissolution or loss of the blood clot in the extraction socket, exposing the underlying alveolar bone and nerve endings to the oral cavity.

Synonyms: Alveolar Osteitis

DTaP Vaccine

Diphtheria, Tetanus, and acellular Pertussis vaccine given at 2, 4, 6, and 15-18 months, and 4-6 years. Protects against three serious bacterial diseases. Diphtheria causes respiratory and cardiac complications. Tetanus causes lockjaw and muscle rigidity. Pertussis causes whooping cough, most severe in young infants.

Synonyms:

Dual Antiplatelet Therapy

The combination of aspirin and a P2Y₁₂ inhibitor (clopidogrel, prasugrel, or ticagrelor) for prevention of thrombotic events after acute coronary syndrome and percutaneous coronary intervention. Duration varies: 1 month after bare-metal stent, 6-12 months after drug-eluting stent, and 12 months after ACS.

Synonyms:

Dual-Energy CT

CT using two different energy spectra. Material differentiation, virtual non-contrast images, gout detection.

Synonyms:

Dubin-Johnson syndrome

A benign, autosomal recessive disorder of conjugated hyperbilirubinemia caused by mutations in the ABCC2 gene encoding the multidrug resistance-associated protein 2 (MRP2), which transports conjugated bilirubin from hepatocytes into bile.

Synonyms:

Duchenne Muscular Dystrophy

An X-linked recessive neuromuscular disorder caused by mutations in the dystrophin gene (DMD gene) on chromosome Xp21.2, resulting in absent or severely reduced dystrophin protein, which is essential for maintaining the structural integrity of

the sarcolemma during muscle contraction.

Synonyms:

Ductal-Dependent Lesions

Congenital heart defects that require the ductus arteriosus to remain patent for adequate systemic or pulmonary blood flow. Includes pulmonary atresia, critical aortic stenosis, coarctation, hypoplastic left heart syndrome, and transposition of the great arteries.

Synonyms:

Ductus Arteriosus

A fetal blood vessel connecting the pulmonary artery to the descending aorta, allowing blood to bypass the non-functioning fetal lungs. In utero, the ductus arteriosus is kept patent by prostaglandin E₂ and low oxygen tension.

Synonyms:

Dumping Syndrome

Rapid gastric emptying of hypertonic contents into the small bowel after gastrectomy or gastric bypass surgery. Early dumping occurs within thirty minutes with vasomotor symptoms including flushing, palpitations, diarrhea, and dizziness from fluid shifts into the intestinal lumen.

Synonyms:

Duodenal Atresia

A congenital obstruction of the duodenum caused by failure of recanalization during the 8th-10th week of gestation. Associated with Down syndrome (30%), polyhydramnios (due to impaired fetal swallowing of amniotic fluid), and other anomalies (VACTERL, congenital heart disease, annular pancreas, malrotation).

Synonyms:

Duodenal perforation

Full-thickness breach of the duodenal wall, most commonly caused by penetrating peptic ulcer disease, trauma, or iatrogenic injury during endoscopy. Presents with sudden severe epigastric pain, board-like abdominal rigidity, and peritonitis. Free air

under the diaphragm on upright chest radiograph is diagnostic.

Synonyms:

Duodenal Ulcer

Peptic ulcer in the duodenal mucosa strongly associated with *H. pylori* infection. Presents with epigastric pain relieved by food typically occurring several hours after meals and at night. Complications include hemorrhage, perforation, and gastric outlet obstruction. Diagnosis is by upper endoscopy.

Synonyms:

Duodenitis

Inflammation of the duodenal mucosa, caused by *Helicobacter pylori* infection, acid-related disease, non-steroidal anti-inflammatory drugs, infection, coeliac disease, or inflammatory bowel disease. Symptoms may include epigastric pain, nausea, vomiting, and gastrointestinal bleeding.

Synonyms:

Duodenum

Shortest first small intestinal segment (25 cm), C-shaped around the pancreatic head. Four parts. Descending part has the major duodenal papilla for bile/pancreatic duct entry via the hepatopancreatic ampulla. Brunner's glands produce alkaline mucus. Most common peptic ulcer site. Primary iron and calcium absorption site.

Synonyms:

Duplex Surveillance

Scheduled clinical and ultrasound monitoring of an artery, vein, graft, stent, aneurysm, or dialysis access to detect restenosis, thrombosis, endoleak, or other failure before symptoms or limb threat develop.

Synonyms:

Duplex Ultrasound

An ultrasound examination that combines grayscale imaging of anatomy with Doppler assessment of blood flow. It can evaluate vessels, organs, and selected soft tissues.

Synonyms:

Duplication

Presence of extra copy of chromosomal segment. Can cause gene dosage effects. Examples: Charcot-Marie-Tooth disease type 1A (PMP22 duplication).

Synonyms:

Dupuyten's contracture

A fibrosing disorder of the palm that causes progressive flexion contractures of one or more fingers.

Synonyms:

Dupuytren contracture

A benign, progressive fibroproliferative disorder of the palmar fascia causing nodules, cords, and contractures of the fingers, most commonly affecting the ring and small fingers.

Synonyms:

Dura Mater

The outermost, thickest meningeal layer, a tough fibrous membrane. In the cranium it is two layers: periosteal (outer, adherent to skull) and meningeal (inner), which separate to form dural venous sinuses (e.g., superior sagittal, cavernous). Dural folds: falx cerebri, tentorium cerebelli, falx cerebelli.

Synonyms:

Durable Power of Attorney

A legal authorization allowing a designated person to act or make decisions for another person when specified conditions are met. In healthcare, it may appoint a healthcare proxy.

Synonyms:

Dural Venous Sinuses

Venous channels between dural layers, draining brain blood and CSF from the subarachnoid space into the internal jugular veins. Major sinuses: superior sagittal, transverse, sigmoid, cavernous, straight. Valveless with bidirectional flow possible.

Synonyms:

DVT

Deep venous thrombosis, the formation of a blood clot in a deep vein, most commonly in the lower extremities.

Synonyms:

DVT Prevention

Measures used to reduce the risk of deep venous thrombosis, such as early movement, mechanical compression, and anticoagulant medicine when clinically appropriate.

Synonyms:

Dwarfism

Short stature resulting from a medical condition, most commonly achondroplasia (the most common form of skeletal dysplasia, caused by gain-of-function mutation in FGFR3, presenting with rhizomelic limb shortening, macrocephaly, frontal bossing, and trident hands).

Synonyms:

DWI FLAIR Mismatch

Diffusion-weighted imaging (DWI) and fluid-attenuated inversion recovery (FLAIR) MRI sequences are used together to estimate the age of an ischemic stroke lesion and guide treatment decisions.

Synonyms:

Dx

A common abbreviation for diagnosis or diagnostic assessment.

Synonyms:

DXA Scan (Dual-Energy X-ray Absorptiometry)

An imaging test that estimates bone mineral density, commonly at the lumbar spine and hip. It is used to assess fracture risk and osteoporosis. T-scores are generally used for postmenopausal women and older men, whereas Z-scores and clinical context are important in younger people.

Synonyms: Dual-Energy X-ray Absorptiometry

Dying

The process of progressive physical decline that occurs as a person approaches death, often accompanied by psychological, social, and spiritual changes.

Synonyms:

Dysarthria

A motor speech disorder resulting from neurological impairment of the muscular components of speech production, including the lips, tongue, palate, vocal cords, and respiratory muscles.

Synonyms:

Dysautonomia

Dysfunction of the autonomic nervous system that can affect blood pressure, heart rate, sweating, temperature regulation, digestion, bladder function, or sexual function. It may be primary or secondary to another disease, medication, or injury.

Synonyms:

Dysbiosis

An alteration in microbiome composition, diversity, or function relative to a healthy state, permitting overgrowth of pathobionts or loss of beneficial microbes. Causes include antibiotics, dietary change, stress, and infection. It is associated with inflammatory bowel disease, obesity, allergy, and *Clostridioides difficile* colitis.

Synonyms:

Dyscalculia

A persistent difficulty with understanding or manipulating numerical quantities and performing arithmetic that is not explained by inadequate instruction alone. It may occur as a developmental learning disorder or result from acquired brain injury, particularly involving dominant parietal networks.

Synonyms:

Dyscrasia

An historic term broadly referring to any abnormal condition of the blood or bone marrow, now used primarily in the context of plasma cell dyscrasias (also called monoclonal gammopathies).

Synonyms: monoclonal gammopathies).

Dysentery

Severe diarrheal illness with blood and mucus in stool, typically caused by *Shigella*, *Salmonella*, *Campylobacter*, or *Entamoeba histolytica*. Presents with frequent bloody stools, abdominal cramps, tenesmus, and fever. Diagnosis: stool culture, microscopy, PCR.

Synonyms:

Dysesthesia

An unpleasant, abnormal sensation produced by a normally non-painful stimulus, or an unpleasant, exaggerated response to a normal stimulus. It is distinguished from paresthesia (which is simply an abnormal sensation that may or may not be unpleasant) by its consistently unpleasant quality.

Synonyms:

Dysgeusia

Distortion, reduction, or loss of the normal sense of taste. It may result from oral or nasal disease, viral infection, neurological injury, nutritional deficiency, systemic illness, or medication exposure and may occur with altered smell, dry mouth, or mucosal inflammation.

Synonyms:

Dysgraphia

A developmental or acquired impairment of written expression involving handwriting, spelling, written composition, or the motor and language processes required for writing. It may occur alone or with other learning, language, attention, or neurological disorders.

Synonyms:

Dyslexia

A specific learning disorder with neurobiological origin, characterized by difficulties with accurate and fluent word recognition, spelling, and decoding ability, despite adequate intelligence, motivation, and educational opportunity. Affects approximately 5–10% of the population.

Synonyms:

Dyslipidemia

An abnormal concentration or composition of circulating lipoproteins, including elevated low-density lipoprotein cholesterol, elevated triglycerides, reduced high-density lipoprotein cholesterol, or mixed abnormalities.

Synonyms:

Dysmenorrhea

Painful menstruation, often causing cramping pelvic pain. See Menstrual Cramps.

Synonyms:

Dactylomegaly

Abnormal enlargement of a finger or toe, which may occur as an isolated finding or as part of an endocrine, skeletal, vascular, or inflammatory disorder.

Synonyms:

Dracunculosis

Infection caused by the parasitic nematode *Dracunculus medinensis*, acquired by drinking water containing infected copepods. It classically produces a painful blister and emergence of a long adult worm through the skin.

Synonyms:

Diapedesis

Movement of blood cells, especially leukocytes, through intact vessel walls into surrounding tissue.

Synonyms:

Dorsal Blocking Splint

A hand splint that holds the wrist and fingers in a protective position, often used after flexor-tendon repair to limit extension and protect healing tendons.

Synonyms:

Dysmenorrhoea

Painful menstruation, classified as primary (no identifiable pelvic pathology) or secondary (underlying

structural or inflammatory condition).

Synonyms:

Dyspareunia

Painful sexual intercourse.

Synonyms:

Dyspepsia

Chronic or recurrent pain or discomfort centered in the upper abdomen. Organic causes: peptic ulcer disease, GERD, gastritis, gastric cancer. Functional dyspepsia is diagnosed after exclusion of organic pathology with normal upper endoscopy. Rome IV criteria define subtypes: epigastric pain syndrome and postprandial distress syndrome.

Synonyms:

Dysphagia

Difficulty swallowing, classified as oropharyngeal (difficulty initiating a swallow, choking, coughing, nasal regurgitation) or esophageal (sensation of food sticking retrosternally).

Synonyms:

Dysphagia (Geriatric)

Difficulty swallowing, common in elderly. Causes: neurological (stroke, Parkinson's), structural (cancer, stricture), muscular (presbyesophagus), medications. Symptoms: coughing with eating, choking, pocketing food, weight loss, aspiration. Assessment: clinical exam, videofluoroscopy, endoscopy.

Synonyms: Geriatric

Dysphagia Diet

A texture- and consistency-modified diet prescribed after assessment of swallowing safety. Liquids and foods may be thickened or altered to reduce aspiration risk while maintaining adequate energy, protein, hydration, and patient acceptability.

Synonyms:

Dysphagia Rehabilitation

Therapy to improve safe swallowing and nutrition in a person with dysphagia. It may include swallow exercises, compensatory techniques, diet modification,

and education based on the cause and swallowing assessment.

Synonyms:

Dysphasia

A language disorder caused by damage to the language-dominant hemisphere of the brain (typically left), involving difficulty with expression, comprehension, reading, or writing. Dysphasia (often used interchangeably with aphasia): partial loss of language function.

Synonyms:

Dysphonia

An abnormal voice quality encompassing hoarseness, breathiness, roughness, vocal fatigue, pitch breaks, and strained or whispered speech. It is organic when due to structural laryngeal pathology (nodules, polyps, laryngitis, laryngeal cancer) and functional when due to voice misuse, muscle tension dysphonia, or psychogenic causes.

Synonyms:

Dysplasia

Disordered cellular growth and maturation characterized by structural abnormalities within a tissue, representing a pre-neoplastic condition that may progress to invasive carcinoma.

Synonyms:

Dysplastic Nevus

Atypical nevus: a melanocytic lesion with clinical and histologic atypia, larger (>5-6 mm), with irregular borders, variable color (pink-tan-brown), and a macular/papular component; often multiple in the dysplastic nevus syndrome (familial atypical mole-melanoma, FAMMM).

Synonyms:

Dyspnea

The subjective sensation of difficult or uncomfortable breathing. See Shortness of Breath. It may result from cardiopulmonary, metabolic, neuromuscular, or psychological causes.

Synonyms:

Dyspnea on Exertion

Shortness of breath precipitated by physical activity, a cardinal symptom of cardiac and pulmonary disease. Cardiac causes: heart failure, coronary artery disease (angina equivalent), valvular disease; pulmonary: COPD, asthma, ILD, anemia, deconditioning. Quantified by NYHA functional class (heart failure) and mMRC scale (dyspnea).

Synonyms:

Dyspnoea

The subjective sensation of difficult or labored breathing. See Shortness of Breath.

Synonyms:

Dysthymia (Persistent Depressive Disorder)

A chronic form of depression with depressed mood for most of the day, more days than not, for ≥ 2 years (≥ 1 year in children/adolescents). Symptoms: poor appetite or overeating, insomnia or hypersomnia, low energy, low self-esteem, poor concentration, and hopelessness.

Synonyms: Persistent Depressive Disorder

Dystonia

A movement disorder characterized by sustained or intermittent muscle contractions causing abnormal, often repetitive, movements and postures.

Synonyms:

Dystrophic Calcification

The deposition of calcium phosphate salts in damaged, necrotic, or degenerating tissues despite normal serum calcium levels. It occurs in areas of tissue injury, inflammation, or chronic degeneration where the local tissue environment favors calcium precipitation.

Synonyms:

Dysuria

Painful, burning, or uncomfortable sensation experienced during urination. Most commonly indicates inflammation or infection of the lower urinary tract. Causes in females: acute cystitis, urethri-

tis (*Chlamydia trachomatis*, *Neisseria gonorrhoeae*), vaginitis (*Candida*, *Trichomonas*), and vulvar atrophy.

Synonyms:

Dacryocystocele

A cystic swelling caused by blockage and dilation of the tear-duct system, usually near the inner corner of the eye.

Synonyms:

Demyelination

Loss or damage of the myelin sheath that normally insulates nerve fibers and speeds nerve signaling.

Synonyms:

Dental Calculus

Hardened dental plaque formed when mineral salts accumulate on teeth.

Synonyms:

Denys-Drash Syndrome

A rare genetic disorder associated with abnormal kidney development, nephropathy, and an increased risk of Wilms tumor.

Synonyms:

Dermatographic Urticaria

A form of hives in which scratching or pressure causes raised, itchy lines on the skin.

Synonyms:

Deuteranopia

Red-green color blindness caused by absence or severe dysfunction of green-sensitive cone photopigments.

Synonyms:

Diabetic Angiopathy

Blood-vessel damage caused by diabetes, affecting small or large vessels.

Synonyms:

Diastolic Murmur

A heart murmur heard while the heart relaxes between contractions.

Synonyms:

Distal Pancreatectomy

Surgical removal of the body or tail of the pancreas, usually with preservation of the pancreatic head.

Synonyms:

DNA Damage

A chemical or structural change in DNA that can interfere with gene function or replication.

Synonyms:

Duane Retraction Syndrome

A congenital eye-movement disorder in which abnormal eye-muscle innervation limits horizontal movement and may cause the eye to retract.

Synonyms:

Duodenal Obstruction

Partial or complete blockage that prevents contents from passing through the duodenum.

Synonyms:

Dysfibrinogenemia

An inherited or acquired disorder in which fibrinogen is abnormal and blood clotting may be impaired or excessive.

Synonyms:

D2 Receptor

A dopamine receptor involved in movement, motivation, reward, and some psychiatric disorders.

Synonyms:

De Quervain's Tendonitis

Painful inflammation or narrowing of the tendons on the thumb side of the wrist.

Synonyms:

Declarative Memory

Memory for facts and events that can be consciously

recalled.

Synonyms:

Decongestant

A medicine that reduces swelling of the nasal lining and relieves nasal congestion.

Synonyms:

Deep Sleep

The deepest stage of non-rapid-eye-movement sleep, during which arousal is difficult and physical restoration occurs.

Synonyms:

Delayed Sleep Phase Syndrome

A circadian-rhythm disorder in which sleep and waking occur substantially later than desired.

Synonyms:

Dementia Pugilistica

A progressive brain disorder associated with repeated head trauma, historically described in some professional boxers.

Synonyms:

Demineralization

Loss of mineral from a tissue, such as tooth enamel or bone, which may weaken the tissue.

Synonyms:

Dermal Papilla

A structure at the base of a hair follicle that supplies signals and nutrients important for hair growth.

Synonyms:

Detrusor Instability

Involuntary bladder-muscle contractions that can cause urgency and urge incontinence.

Synonyms:

Detrusor Muscle

The smooth muscle in the bladder wall that contracts to expel urine.

Synonyms:

Detumescence

The return of an erectile tissue to its non-erect state.

Synonyms:

Diastolic Blood Pressure

The pressure in the arteries while the heart relaxes between contractions.

Synonyms:

Diastolic Heart Failure

Heart failure in which impaired ventricular relaxation or increased stiffness limits filling of the heart.

Synonyms:

Dietary Fiber

Plant material that is not fully digested and supports bowel function and other aspects of health.

Synonyms:

Digital Rectal Examination

Examination of the rectum and nearby structures using a lubricated, gloved finger.

Synonyms:

Digitalis

A group of cardiac glycosides, including digoxin, that can increase cardiac contraction and affect heart rhythm.

Synonyms:

Dihydrotestosterone

A potent androgen formed from testosterone that contributes to prostate growth and male sexual development.

Synonyms:

Direct Transmission

Spread of an infectious organism through immediate contact or short-range respiratory droplets from an infected source.

Synonyms:

Discoid Lupus Erythematosus

A chronic form of cutaneous lupus that causes per-

sistent, inflamed skin plaques that may scar.

Synonyms:

Diverticulum

A pouch-like projection from the wall of a hollow organ, especially the intestine.

Synonyms:

Dorsal Kyphosis

Excessive forward curvature of the upper spine, often associated with vertebral fractures or degenerative change.

Synonyms:

Double-Blind Study

A clinical study in which neither participants nor the investigators assessing outcomes know the assigned treatment group.

Synonyms:

Dry-Powder Inhaler

A device that delivers powdered medicine to the lungs when the user inhales through it.

Synonyms:

Dual-Energy X-Ray Absorptiometry

An imaging test that measures bone mineral density, commonly abbreviated DEXA or DXA.

Synonyms:

Dupuytren's Disease

Thickening and shortening of tissue in the palm that progressively bends one or more fingers toward the palm.

Synonyms:

Delayed Sleep Phase

A circadian-rhythm disorder in which a person falls asleep and wakes later than desired; also called delayed sleep-wake phase disorder.

Synonyms: delayed sleep-wake phase disorder.

Dermatographia

A form of physical urticaria in which scratching or

pressure causes raised, red, itchy lines on the skin.

Synonyms:

Desmoplastic Small Round Cell Tumors

Rare aggressive tumors that usually arise in the abdomen or pelvis and primarily affect children and young adults.

Synonyms:

Diabetic Coma

A state of profound unconsciousness caused by a severe diabetes-related disturbance in blood glucose or metabolism.

Synonyms:

Diabetic Hypoglycemia

An abnormally low blood glucose level in a person with diabetes, often caused by insulin or other glucose-lowering medicines.

Synonyms:

Diffuse Large B-Cell Lymphoma

A fast-growing cancer of B lymphocytes and the most common type of non-Hodgkin lymphoma.

Synonyms:

Diffuse Midline Glioma

An aggressive brain or spinal-cord tumor arising in midline structures, often in children.

Synonyms:

Dislocated Shoulder

Displacement of the upper arm bone from the shoulder joint.

Synonyms:

Double Uterus

A congenital condition in which the uterus develops as two separate cavities or two uteruses.

Synonyms:

Double-Outlet Right Ventricle

A congenital heart defect in which both major arteries arise mainly from the right ventricle.

Synonyms:

Dry Macular Degeneration

The more common form of age-related macular degeneration, involving gradual damage to the macula without abnormal blood-vessel growth.

Synonyms:

Dry Eyes

Irritation or discomfort caused by inadequate tear production or excessive tear evaporation.

Synonyms:

Dry Mouth

A condition in which the mouth does not produce enough saliva; also called xerostomia.

Synonyms: xerostomia.

Dural Arteriovenous Fistulas

Abnormal connections between arteries and veins in the dura mater surrounding the brain or spinal cord.

Synonyms:

Dyshidrosis

A skin disorder causing small, intensely itchy blisters on the palms, sides of the fingers, or soles.

Synonyms:

Dysthymia

A former term for persistent depressive disorder, a chronic condition with long-lasting depressive symptoms.

Synonyms:

Ductal Carcinoma In Situ

A noninvasive breast cancer in which abnormal cells remain within the milk ducts; commonly abbreviated DCIS.

Synonyms:

Dermabrasion

A procedure that mechanically removes the outer layers of skin to improve selected scars, wrinkles, or

surface irregularities.

Synonyms:

Dermatology

The medical specialty concerned with the diagnosis and treatment of diseases of the skin, hair, nails, and mucous membranes.

Synonyms:

Dermatome

A surgical instrument used to remove a thin layer of skin for grafting. The term also describes a band of skin supplied by one spinal nerve.

Synonyms:

Dermatoplasty

Surgical repair or reconstruction of the skin, often using tissue rearrangement or a skin graft.

Synonyms:

Desensitization

A treatment that gradually reduces an abnormal immune response by giving increasing or controlled exposure to a specific allergen.

Synonyms:

Diaphoresis

Excessive sweating, which may occur with heat, exertion, fever, pain, low blood sugar, or other medical conditions.

Synonyms:

Diarthrosis

A freely movable joint, usually a synovial joint, in which the bones are separated by a joint cavity.

Synonyms:

Diencephalon

The part of the brain between the cerebrum and brainstem that includes the thalamus and hypothalamus.

Synonyms:

Digestive System

The organs that digest food, absorb nutrients and water, and eliminate solid waste, including the gastrointestinal tract and accessory organs.

Synonyms:

Digit

A finger or toe.

Synonyms:

Dilation and Evacuation

A procedure in which the cervix is dilated and pregnancy tissue is removed from the uterus using suction and surgical instruments.

Synonyms:

Diopter

A unit of optical power equal to the reciprocal of the focal length in meters.

Synonyms:

Doppler Echocardiography

Echocardiographic imaging that uses Doppler ultrasound to assess the direction and speed of blood flow through the heart and great vessels.

Synonyms:

Duodenal Bulb

The first, expanded portion of the duodenum immediately beyond the pylorus.

Synonyms:

Duodenal Papilla

A mucosal projection in the duodenum where the bile duct and pancreatic duct, usually through the major papilla, empty into the intestine.

Synonyms:

Dukes Classification

An older staging system for colorectal cancer based mainly on how far the tumor has extended through the bowel wall and into lymph nodes or distant sites.

Synonyms:

Dynamometer

An instrument used to measure force, commonly hand-grip strength or muscle strength.

Synonyms:

Dysmetria

Inability to control the range, force, or speed of a voluntary movement, commonly caused by cerebellar dysfunction.

Synonyms:

Dacryolithiasis

Formation of a stone or concretion within the lacrimal drainage system, which may cause excessive tearing, discharge, recurrent dacryocystitis, or obstruction.

Synonyms:

Dakin Solution

A dilute sodium hypochlorite solution used as a topical antiseptic for selected contaminated or infected wounds. Concentration and exposure time must be controlled because stronger solutions can injure viable tissue.

Synonyms:

Danon Disease

A rare X-linked lysosomal storage disorder caused by LAMP2 mutations, characterized by cardiomyopathy, skeletal-muscle weakness, and variable intellectual or retinal involvement.

Synonyms:

Decannulation

Removal of a cannula or tube, especially a tracheostomy tube, after the patient can maintain a safe airway and adequate breathing, secretion clearance, and oxygenation.

Synonyms:

Deep Brain Stimulation

A treatment in which implanted electrodes deliver controlled electrical impulses to selected brain regions. It is used for conditions such as Parkinson disease, essential tremor, and some forms of dysto-

nia.

Synonyms:

Deiodinase

An enzyme that removes iodine atoms from thyroid hormones, thereby activating or inactivating thyroxine and triiodothyronine and regulating local thyroid-hormone action.

Synonyms:

Dejerine-Roussy Syndrome

Central post-stroke pain caused by a lesion of the thalamus or related sensory pathways. It may produce persistent contralateral pain, burning, abnormal sensation, or pain from normally nonpainful stimuli.

Synonyms:

De Lange Syndrome

A congenital developmental disorder, also called Cornelia de Lange syndrome, involving characteristic facial features, growth and developmental delay, limb abnormalities of variable severity, and intellectual disability.

Synonyms: Cornelia de Lange syndrome, involving characteristic facial features, growth and developmental delay, limb abnormalities of variable severity, and intellectual disability.

Dry Socket

Painful inflammation of a tooth socket caused by loss or failure of the blood clot after tooth extraction. Also called alveolar osteitis.

Synonyms: alveolar osteitis.

Death Rattle

Noisy, rattling breathing caused by secretions accumulating in the throat or upper airways, often occurring near the end of life when swallowing and coughing weaken.

Synonyms:

Decalcification

Loss of calcium salts from bone, teeth, or other mineralized tissue. In teeth it may weaken enamel;

in bone it can contribute to reduced strength.

Synonyms:

Deglutition (Swallowing)

The coordinated process of moving food, liquid, or saliva from the mouth through the pharynx and esophagus into the stomach.

Synonyms: Swallowing

Dehiscence

Separation or reopening of the edges of a wound or surgical closure. Wound dehiscence may be superficial or involve deeper tissues and requires clinical assessment.

Synonyms:

Diathesis

A predisposition or susceptibility to developing a particular disease, symptom, or physiological response, such as a bleeding diathesis.

Synonyms:

Diplegia

Paralysis or marked weakness affecting corresponding parts on both sides of the body, classically the legs more than the arms in spastic diplegia.

Synonyms:

Disarticulation

Amputation performed through a joint rather than by cutting through the shaft of a bone.

Synonyms:

Dressing

Material applied to a wound to protect it, absorb exudate, maintain a suitable healing environment, or deliver local treatment.

Synonyms:

Drip (Intravenous Infusion)

Controlled administration of fluid, blood, nutrients, or other substances directly into a vein through a cannula or catheter.

Synonyms: Intravenous Infusion

Dyskinesia

Abnormal, often involuntary movement that may be excessive, repetitive, irregular, or purposeless. Causes include neurological disease and medication effects.

Synonyms:

Dyspraxia (Developmental Coordination Disorder)

Difficulty planning and coordinating voluntary movements that interferes with daily activities, learning, or motor skills and is not explained by a primary muscle or sensory disorder.

Synonyms: Developmental Coordination Disorder

Dysreflexia (Autonomic Dysreflexia)

A potentially life-threatening episode of uncontrolled autonomic activity, usually in people with spinal-cord injury above T6, triggered by stimuli such as bladder or bowel distension.

Synonyms: Autonomic Dysreflexia

Dystocia

Difficult or abnormal labor caused by problems with uterine contractions, the fetus, or the maternal pelvis and soft tissues.

Synonyms:

Dystrophy

Abnormal development, growth, or maintenance of a tissue or organ. The term is used in conditions such as muscular dystrophy and corneal dystrophy.

Synonyms:

Dating Ultrasound

An ultrasound examination, usually performed in early pregnancy, used to estimate gestational age and calculate the expected date of delivery. First-trimester crown-rump length is generally the most accurate ultrasound measurement for dating.

Synonyms: Pregnancy dating scan; gestational-age ultrasound.

Daidzein

A naturally occurring isoflavone found in soy and

other legumes that can be converted by intestinal bacteria into related compounds.

Synonyms:

Debility

A state of weakness or loss of strength, often associated with illness, aging, or prolonged inactivity.

Synonyms: Weakness

Decoction

A preparation made by simmering plant material in water to extract soluble substances.

Synonyms:

Defenses

The body's protective mechanisms against infection, injury, and other threats, including physical barriers and immune responses.

Synonyms: Body defenses

Degenerative Disease

A disorder in which the structure or function of tissues progressively deteriorates.

Synonyms: Degenerative disorder

Degenerative Disk Disease

Age-related or injury-related deterioration of an intervertebral disk that may cause back or neck pain.

Synonyms: Degenerative disc disease

Degenerative Joint Disease

Progressive loss of cartilage and changes in a joint, commonly referring to osteoarthritis.

Synonyms: Osteoarthritis

Degenerative Spondylolisthesis

Forward displacement of one vertebra over another caused by degenerative changes in the spine.

Synonyms:

Delta Waves

Large, slow brain waves associated with deep non-REM sleep.

Synonyms: Delta rhythm

Demulcent

A substance that soothes irritated or inflamed mucous membranes by forming a protective coating.

Synonyms:

Dendrites

Branching extensions of nerve cells that receive signals from other neurons or sensory receptors.

Synonyms:

Dendritic Cells

Immune cells that capture foreign material and present antigens to T cells, helping initiate an adaptive immune response.

Synonyms:

Deoxyribonucleic Acid

The molecule that stores hereditary genetic information in cells.

Synonyms: DNA

Desiccated Thyroid

A thyroid-hormone preparation made from dried animal thyroid tissue and containing thyroid hormones.

Synonyms: Desiccated thyroid extract; natural desiccated thyroid

Dietary Supplements

Products such as vitamins, minerals, herbs, or other substances taken to supplement the diet.

Synonyms: Nutritional supplements

Digestive Tract

The continuous hollow passage from the mouth through the throat, esophagus, stomach, intestines, and anus.

Synonyms: Gastrointestinal tract; alimentary canal

Dilate

To become wider or cause a passage, vessel, or open-

ing to become wider.

Synonyms: Expand; enlarge

Disk

A flat, round structure; in the spine, an intervertebral disk separates adjacent vertebrae and cushions movement.

Synonyms: Disc

Dithiolethione

A sulfur-containing compound studied for its ability to activate cellular protective and detoxification pathways.

Synonyms:

D-Limonene

A citrus-derived compound found in the oils of orange, lemon, and other citrus fruits.

Synonyms: Limonene

DNR

An abbreviation for do-not-resuscitate, indicating that cardiopulmonary resuscitation should not be attempted if breathing or heartbeat stops.

Synonyms: Do-not-resuscitate

Do-Not-Resuscitate Order

A medical order instructing clinicians not to perform CPR if a person's breathing or heartbeat stops.

Synonyms: DNR order

Dopamine

A neurotransmitter involved in movement, motivation, reward, attention, and regulation of several hormonal functions.

Synonyms:

Double Blind

A study design in which neither participants nor the researchers assessing outcomes know who receives each intervention during the blinded phase.

Synonyms: Double-masked

Double-Contrast Barium Enema

An imaging examination of the colon using barium and air to outline the bowel wall on X-rays.

Synonyms: Air-contrast barium enema

Dowager's Hump

An exaggerated upper-back curvature, usually caused by vertebral compression fractures or osteoporosis.

Synonyms: Kyphosis

Doxazosin

An alpha-1 blocker used to relax smooth muscle and treat high blood pressure or urinary symptoms from an enlarged prostate.

Synonyms:

Dressler's Syndrome

Inflammation of the pericardium that develops weeks after heart-muscle injury, such as a heart attack or cardiac surgery.

Synonyms: Post-myocardial-infarction syndrome

DRI

A set of nutrient reference values used to plan and assess dietary intake for healthy people.

Synonyms: Dietary Reference Intakes

Dry Eye

A condition in which the eyes do not produce enough tears or tears evaporate too quickly, causing irritation and visual discomfort.

Synonyms: Dry-eye disease; keratoconjunctivitis sicca

Dual Energy X-Ray Absorptiometry

A low-dose imaging test that measures bone mineral density and can help assess fracture risk.

Synonyms: DXA; DEXA

Dual-Photon Absorptiometry

An older bone-density measurement technique that uses two photon energies to estimate bone mineral content.

Synonyms:

Duct

A tube or channel that carries a fluid, such as bile, pancreatic juice, or secretions from a gland.

Synonyms:

Duplex Doppler Ultrasound Scanning

An ultrasound test that combines structural imaging with Doppler measurement of blood flow through vessels.

Synonyms: Duplex ultrasound

Dacarbazine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dacetuzumab

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Daclizumab

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dacomitinib

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dacryocyte analysis

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Dactinomycin

A medicinal, pharmacologic, or chemical substance

studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dalotuzumab

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dalteparin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dalteparin sodium

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Danazol

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dance therapy

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Dantrolene

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Danuserib

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dapsone

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Daptomycin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Darbepoetin alfa

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Darunavir

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dasatinib

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Data collection

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Data management

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Data traceability

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention,

measurement, or patient-related concept. **Synonyms:**

Daunorubicin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Daunorubicin hydrochloride

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dav regimen

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dcc gene

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Dcmp deaminase

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

De novo

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Debrisoquin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Decanoic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Decenoic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Decerebrate state

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Deciduoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deciduous tooth

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Decision making

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Decitabine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Declopramide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Decorin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Decreased concentration

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Decreased dentin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Decreased libido

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Defective virus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Defense mechanism

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Defensin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deferasirox

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deferiprone

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deferoxamine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Defined observation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deformity

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Degarelix

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Degenerative disorder

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Deglutition

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Degranulation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Degrees fahrenheit

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dehydroascorbic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Dehydroepiandrosterone

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deinstitutionalize

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deja vu

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Delavirdine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Delayed orgasm

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deletion mutation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Delftia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Delftia acidovorans

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Delphi technique

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deltacoronavirus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Deltaretrovirus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Delta-tocopherol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deltoid

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Demeclocycline

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Demecolcine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Demethylation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Demographics domain

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Denaturant

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dendrimer

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dendritic spine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Denervation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Denileukin diftitox

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Denominator

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Denosumab

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Densitometry

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Density

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Dent disease

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Dental alloy

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental alveolus

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental amalgam

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental anxiety

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental arch

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental articulator

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental cement

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental clasp

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental deposit

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental dysplasia

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Dental fissure

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental hygiene

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental impression material

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental inlay

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental material

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental occlusion

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental overjet

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental papilla

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental pellicle

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental porcelain

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental procedure

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Dental prosthesis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental pulp

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dental sac

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dentate gyrus

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dentifrice

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dentigerous cyst

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Dentin sensitivity

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dentinogenesis

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Dentist

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dentistry

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Denture base

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Denturist

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deoxycoformycin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Deoxycytidine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deoxycytidine kinase

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deoxyglucose

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deoxyguanosine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deoxyribonuclease

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deoxyribonucleosides

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deoxyribonucleotides

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deoxyuridine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dependovirus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Depersonalization

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dephosphorylation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Depressive disorder

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Depth perception

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Depurination

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Derealization

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dermabacter

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Dermabacter hominis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Dermatan sulfate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dermatologic disorder

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Dermatologist

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dermatomycosis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desflurane

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desipramine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deslorelin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desmin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desmoid tumors

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desmoplastic

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desmoplastic fibroma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desmopressin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desmosine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desmosome

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desogestrel

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desonide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desoximetasone

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Desoxycorticosterone

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desulfovibrio

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desulfovibrio desulfuricans

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desulfovibrio piger

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desulfovibrionaceae

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Desvenlafaxine succinate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Detached

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Detergent

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deubiquitinating enzymes

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Deubiquitination

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deuterium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Deuterium oxide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Developmental disabilities

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Developmental process

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Developmental psychology

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Developmental stage

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Device embolisation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dexamethasone

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dexlansoprazole

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dexmedetomidine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dexmethylphenidate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dexrazoxane

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dexrazoxane hydrochloride

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dextroamphetamine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dextromethorphan

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dextrothyroxine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diabetic cardiomyopathies

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diacetoxyscirpenol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diacylglycerol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diagnostic procedure

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Diagnostic service

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diagnostic trial

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diakinesis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dialister micraerophilus

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dialister pneumosintes

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dialysis solutions

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dialysis therapy

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Diamine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dianhydrogalactitol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dianisidine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diapause

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diaphoretic

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diaphragmatic eventration

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diastematomyelia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diastolic murmurs

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diatomaceous earth

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diatrizoate meglumine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diazepam

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Diazinon

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diaziquone

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diazonium compounds

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Diazooxonorleucine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diazoxide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dibekacin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dibucaine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dicarboxylic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Dichlorophen

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dichlorvos

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dickeya dadantii

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diclofenac

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Diclofenac sodium

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dicloxacillin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dicrotophos

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dictyostelium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dicumarol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dicyclomine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Didanosine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dientamoeba

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Dientamoeba fragilis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Diestrus

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diet

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diet therapy

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Dietary calcium

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Dietary carbohydrate

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Dietary fats

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dietary iron

A biomedical dictionary term used in medical, bio-

logical, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dietary phospholipid

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dietary phosphorus

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dietary protein

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Dietary steroid

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dietary sterol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dietary supplement

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dietary supplementation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dietetics

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diethylhexylphthalate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diethylnitrosamine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diethylpropion

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diethylstilbestrol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dietitian

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Differentiation antigens

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Difficulty walking

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diffuse

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diffuse astrocytoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diffuse scleroderma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diffusion anisotropy

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diffunisal

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Digastric muscle

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Digestive disorder

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Digital mammography

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Digitalis preparation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Digitonin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Digitoxin

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Digoxin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dihydroxyacetone

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dilatation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dilation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diltiazem

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dimenhydrinate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dimesna

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dimethoate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dimethoxon

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dimethyl fumarate

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dimethyl sulfoxide

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dimethylbenzanthracene

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dimethylhydrazines

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dimethylnitrosamine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dimetilan

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dinaciclib

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dinitrochlorobenzene

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dinitrofluorobenzene

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dinophyceae

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dinoprost

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dinoprostone

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dinucleoside phosphates

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dinutuximab

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dioxin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dipeptide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dipetalonema

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dipetalonema infection

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Diphenoxylate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diphenylhydramine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diphosphate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diphosphonate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diphtheria toxin

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Diphyllbothriasis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diploid cell

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Diploidy

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dipstick device

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diptera

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diphtheroid bacillus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Dipylidium caninum

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dipyridamole

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dirty necrosis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Disaccharide

A biomedical dictionary term used in medical, bio-

logical, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Disclosure

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Discriminant analysis

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Discrimination learning

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Disease progression

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Disease reservoir

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Disease response

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Disease susceptibility

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Disease vector

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Disfigurement

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Disinfectant

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Disopyramide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dispensed amount

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Disruption

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Disseminate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Disseminated neuroblastoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dissociative hysteria

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Distamycins

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Distant

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Distended

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Distress

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Disulfiram

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Disulfoton

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diterpenes

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ditiocarb

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Diutina rugosa

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Divorce

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dizygotic twin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

DNA adduct

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

DNA alkylation

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

DNA binding

A biological molecule, chemical substance, cellular component, or physiologic concept involved in

body processes, laboratory medicine, or treatment. **Synonyms:**

DNA demethylation

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

DNA fingerprinting

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

DNA footprinting

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

DNA fragmentation

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

DNA gyrase

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

DNA integration

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

DNA ligases

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

DNA ligation

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

DNA methylation

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

DNA packaging

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

DNA primase

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

DNA primers

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

DNA probe

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

DNA virus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Dobutamine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or

research context. **Synonyms:**

Docetaxel

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Doconexent

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Docosadienoic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Docosahexaenoic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Docosapentaenoic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Docosatrienoic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Dodecenoic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Dolasetron

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dolasetron mesylate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dolichol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dolosigranulum pigrum

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Domperidone

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Donepezil

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Donohue syndrome

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Dopa

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dopamine antagonist

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dopamine receptor

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dopamine transporter

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dopaminergic neuron

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dorea

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Doripenem

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dorsal funiculus

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dorsolateral

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dosage forms

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dose rate

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Double-blind method

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Doxapram

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Doxazosin mesylate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Doxepin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Doxercalciferol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Doxorubicin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Doxorubicin hydrochloride

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Doxycycline

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Doxycycline hyclate

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Doxylamine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dracunculiasis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dracunculus medinensis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Drainage

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dream

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dried specimen

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Drinking water

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dronabinol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Drool

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Droperidol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dropper bottle

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Drosophila proteins

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Drosophilidae

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Drug abuse

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Drug administration route

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Drug emulsion

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Drug eruption

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Drug implant

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Drug implants

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Drug metabolism

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Drug packaging

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Drug vehicle

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dry cough

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dry ice

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dubowitz syndrome

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Dull pain

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention,

measurement, or patient-related concept. **Synonyms:**

Duloxetine hydrochloride

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dumbbell ossification

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Duocarmycins

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Duodenal adenocarcinoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Duodenal disease

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Duodenal fistula

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Duodenal hemorrhage

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Duodenal infection

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and

severity. **Synonyms:**

Duodenal neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Duodenal stenosis

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Duodenoscope

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Duodenostomy

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Durapatite

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dust

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dutasteride

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Dye

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dye lasers

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dynammin gtpase

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dynein atpase

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dynorphin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dyphylline

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dysbarism

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dysgammaglobulinemia

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Dysgerminoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dyskeratosis congenita

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dyslipidemias

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Dysostoses

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dyssomnias

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dysthymic disorder

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Dystonia disorder

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Dystonin

A biological molecule, chemical substance, cellular component, or physiologic concept involved in

body processes, laboratory medicine, or treatment.

Synonyms:

Dystrophia unguium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Dystrophin

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Dangerous Abbreviations

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

E

E Coli Enteritis

Intestinal infection caused by pathogenic strains of *Escherichia coli*. Depending on the strain, it may cause watery or bloody diarrhea, abdominal cramps, vomiting, or systemic complications such as hemolytic uremic syndrome.

Synonyms:

EBCT

Electron-beam computed tomography, a rapid imaging method used especially to assess the heart and calcium in coronary arteries.

Synonyms: Electron-beam computed tomography

Eccentric Action

Muscle action in which a muscle produces force while lengthening.

Synonyms: Eccentric contraction

ECG

A recording of the heart's electrical activity used to evaluate rhythm and other cardiac problems.

Synonyms: Electrocardiogram; EKG

ED

Erectile dysfunction: inability to obtain or maintain an erection adequate for sexual activity.

Synonyms: Erectile dysfunction

EEG

A recording of the brain's electrical activity used to evaluate seizures and other neurological conditions.

Synonyms: Electroencephalogram

Eighth Cranial Nerve

The vestibulocochlear nerve, which carries hearing and balance signals from the inner ear to the brain.

Synonyms: Vestibulocochlear nerve; auditory nerve

EKG

A recording of the heart's electrical activity.

Synonyms: Electrocardiogram; ECG

Elastin

A flexible connective-tissue protein that allows skin, blood vessels, and other tissues to stretch and recoil.

Synonyms:

Electrolysis

Permanent hair removal using electrical energy delivered through a fine probe into a hair follicle.

Synonyms:

Electrolyte

A mineral that carries an electrical charge in body fluids, such as sodium, potassium, or calcium.

Synonyms:

Electron-Beam Computed Tomography

A rapid computed-tomography technique used to image the heart and detect calcium deposits in arteries.

Synonyms: EBCT

Elimination Diets

Diets in which suspected foods are removed and later reintroduced to help identify food-related symptoms.

Synonyms: Elimination diet

Ellagic Acid

A plant-derived polyphenol found in foods such as berries and nuts.

Synonyms:

Emetic

A substance that induces vomiting.

Synonyms:

EMG

A test that evaluates muscle activity and the nerves controlling muscles.

Synonyms: Electromyography

Emmenagogue

A substance traditionally used to stimulate menstrual flow.

Synonyms:

Encoding

The process by which sensory or cognitive information is converted into a form that can be stored in memory.

Synonyms:

Endogenous Opioids

Pain-relieving opioid peptides produced naturally by the body.

Synonyms: Endogenous opioid peptides

Endorphins

Natural opioid peptides that reduce pain and can contribute to feelings of well-being.

Synonyms: Endogenous opioids

Endothelins

Peptides made by vascular endothelium that constrict blood vessels and can raise blood pressure.

Synonyms:

Endothelium-Derived Relaxing Factor

A substance released by the endothelium that re-

laxes blood vessels; it is largely identified with nitric oxide.

Synonyms: EDRF; Nitric oxide

Enkephalin

An endogenous opioid peptide involved in reducing pain.

Synonyms: Endogenous opioid

Enteropathic

Relating to disease of the intestine.

Synonyms:

Eosinophils

White blood cells involved in allergic inflammation and defense against some parasites.

Synonyms: Eosinophil granulocytes

Epicondylitis

Painful inflammation or degeneration of a tendon attachment near a joint epicondyle, commonly at the elbow.

Synonyms: Tennis elbow; golfer's elbow

Epidemiological Study

A population-based investigation of disease occurrence, causes, risks, or health outcomes.

Synonyms: Epidemiologic study

Epinephrine

A hormone and neurotransmitter that increases heart activity and narrows many blood vessels during stress.

Synonyms: Adrenaline

Epithelial Cells

Cells that cover body surfaces and line organs, cavities, and glands.

Synonyms: Epithelial tissue cells

Erector Spinae

A group of muscles running along the back that extend and stabilize the spine.

Synonyms: Erector spinae muscles

Ergots

Compounds derived from a fungus and used in some treatments, including certain headache disorders.

Synonyms:

Eructation

The release of swallowed or stomach gas through the mouth.

Synonyms: Belching; burping

Essential Fats

Fatty acids that the body cannot make in sufficient amounts and must obtain from food.

Synonyms: Essential fatty acids

Esterified Estrogens

Estrogen compounds used in some hormone treatments.

Synonyms:

Esthetician

A person trained in nonmedical skin-care and cosmetic treatments.

Synonyms: Aesthetician

Estradiol

The principal biologically active estrogen hormone during the reproductive years.

Synonyms: 17 β -estradiol

Estrogen Receptor

A cellular protein that binds estrogen and mediates its effects on target tissues.

Synonyms:

Estrogen-Replacement Therapy

Treatment using estrogen to replace hormone lost during menopause or because of ovarian failure.

Synonyms: Estrogen therapy

Etidronate

A bisphosphonate used in selected conditions involving abnormal bone remodeling.

Synonyms:

Euthyroid

Having normal thyroid function.

Synonyms:

Excitatory Neurotransmitter

A chemical messenger that increases the likelihood that a receiving neuron will generate a signal.

Synonyms:

Excitotoxin

A substance that overstimulates neurons and can injure or kill them.

Synonyms:

Executive Functions

Mental abilities used to plan, organize, make decisions, control impulses, and adapt behavior.

Synonyms: Executive control

Exercise

Planned physical activity performed to improve or maintain fitness and health.

Synonyms: Physical exercise

Exostosis

A benign bony growth; in the ear canal, repeated cold-water exposure can cause surfer's ear.

Synonyms: Surfer's ear

Experience Sampling

A research method that collects brief reports about a person's activities or feelings at randomly selected times.

Synonyms: Ecological momentary assessment

Expression Hopping

A shift from one manifestation of an addiction to another, such as from substance use to compulsive gambling.

Synonyms:

Expression of Addiction

The particular behavior or substance through which an addiction is manifested.

Synonyms:

Extend

To straighten a joint or increase the angle between bones.

Synonyms: Extension

Extracapsular Cataract Surgery

Cataract surgery that removes the cloudy lens while leaving the lens capsule largely in place.

Synonyms:

Extract

A concentrated preparation made by drawing active substances from a plant, herb, or other source.

Synonyms: Extractive

Extrinsic Factor

An outside influence that affects a person, tissue, or biological process.

Synonyms: External factor

E Coli Infection

Infections caused by *Escherichia coli*, a gram-negative enteric bacillus. Causes: UTI (most common—cystitis, pyelonephritis), diarrhea (enterotoxigenic ETEC—traveler's diarrhea; enteropathogenic; enterohemorrhagic EHEC O157:H7—bloody diarrhea, HUS; enteroinvasive), neonatal meningitis, sepsis, and intra-abdominal infections.

Synonyms:

Ear

Organ of hearing and balance, divided into external, middle, and inner ear. External: auricle (pinna), external auditory canal, tympanic membrane. Middle: air-filled cavity in temporal bone, auditory ossicles (malleus, incus, stapes), Eustachian tube (to nasopharynx).

Synonyms:

Ear Barotrauma

Injury to the ear caused by a pressure difference between the middle ear and the surrounding environment, commonly during air travel or diving. It

may cause ear pain, fullness, hearing loss, tinnitus, vertigo, or tympanic-membrane rupture.

Synonyms:

Ear canal

A tube leading from the eardrum to the outer ear.

Synonyms:

Ear Diseases

Any disorder affecting the structures of the ear—external ear (pinna, ear canal), middle ear (tympanic membrane, ossicles, Eustachian tube), or inner ear (cochlea, vestibular apparatus).

Synonyms:

Ear Infection

Infection or inflammation of the ear, commonly involving the external canal or middle ear. It may cause ear pain, fever, reduced hearing, discharge, or irritability in children. Also called otitis.

Synonyms: otitis.

Ear Wax

Cerumen, a mixture of secretions and shed skin that protects and cleans the ear canal. Impacted wax may cause hearing loss, fullness, tinnitus, itching, or discomfort. Cotton swabs and inserted objects can worsen impaction or injure the ear; removal should use safe clinician-recommended methods, particularly when an eardrum perforation is possible.

Synonyms:

Ear, Nose, and Throat

A medical specialty (otolaryngology) focused on the diagnosis and treatment of disorders affecting the ears, nose, throat, head, and neck. Conditions managed include hearing loss, sinusitis, tonsillitis, voice disorders, and head and neck cancers.

Synonyms:

Earache

Pain in or around the ear, caused by otitis, blockage, trauma, dental disease, temporomandibular-joint disorders, or referred throat pathology. Persistent, severe, or discharge-associated pain requires evalua-

tion.

Synonyms:

Earache (Otalgia)

Pain originating from the ear, a common symptom with diverse causes. Otalgia is classified as primary (originating within the ear itself) or secondary/referred (pain perceived in the ear but arising from another site).

Synonyms: Otalgia

Eardrum

A thin membrane separating the ear canal and middle ear.

Synonyms:

Ear Foreign Body

An object lodged in the external auditory canal, commonly occurring in children. It may cause pain, hearing reduction, discharge, or canal injury and should be removed with appropriate visualization and technique.

Synonyms: External auditory-canal foreign body; ear-canal foreign body.

Early Decelerations

A fetal heart rate pattern with a gradual decrease (onset to nadir >30 seconds) that mirrors the contraction and returns to baseline as the contraction ends. Caused by fetal head compression during contractions (vagal response). A benign, physiologic finding associated with normal fetal acid-base status. No intervention required.

Synonyms:

Early Detection

Identification of a disease at an early stage, when treatment may be more effective. It may result from screening or prompt evaluation of symptoms.

Synonyms:

Early Intervention

Services provided to infants and young children with developmental delays or disabilities to support development, function, and participation.

Synonyms:

Earwax

Cerumen, a waxy secretion produced by the ceruminous glands in the outer third of the external auditory canal. Earwax lubricates and protects the skin of the ear canal, trapping dust, debris, and microorganisms to prevent them from reaching the tympanic membrane.

Synonyms:

Eating Disorder

A group of conditions characterized by abnormal eating habits and distorted body image, including anorexia nervosa, bulimia nervosa, binge eating disorder, and avoidant/restrictive food intake disorder (ARFID). Anorexia: severe calorie restriction, intense fear of weight gain, and body image disturbance with dangerously low weight.

Synonyms:

Ebola

Ebola virus disease (EVD): a severe, often fatal viral hemorrhagic fever caused by Ebola virus (Filoviridae, RNA), transmitted by direct contact with blood/body fluids of infected humans/animals. Incubation 2-21 days.

Synonyms:

Ebola virus

A filovirus that causes Ebola virus disease, a severe hemorrhagic fever. The virus is transmitted through contact with infected body fluids. The incubation period is 2-21 days. Symptoms include fever, headache, myalgia, and hemorrhage. Diagnosis is made by PCR and antigen detection.

Synonyms:

Ebola Virus Disease

A severe viral infection caused by Ebola viruses, characterized by fever and systemic illness that may progress to bleeding, shock, or organ failure.

Synonyms:

Ebstein Anomaly

A rare congenital heart defect accounting for less than 1 percent of all congenital heart disease, characterized by apical displacement of the septal and posterior leaflets of the tricuspid valve into the right ventricle, resulting in atrialization of the proximal right ventricle and a small functional right ventricular chamber.

Synonyms:

Ecchymosis

An ecchymosis is a flat, purple or blue discoloration of the skin larger than 10 millimeters caused by extravasation of blood from damaged blood vessels into the subcutaneous tissue. Unlike petechiae, which result from platelet disorders, ecchymoses may result from coagulopathies, trauma, or vascular fragility.

Synonyms:

Eccrine Gland

A coiled sweat gland distributed throughout the skin that secretes a watery fluid directly onto the skin surface through a duct. Eccrine sweating supports thermoregulation and is stimulated by sympathetic cholinergic fibres; the glands are especially numerous on the palms, soles, and forehead.

Synonyms:

ECG/EKG Machine

Records electrical activity of heart. 12-lead ECG standard. Components: electrodes, leads, amplifier, recorder. Essential for cardiac diagnosis.

Synonyms:

Echinocandins

A class of antifungal agents that inhibit beta-1,3-glucan synthase, an enzyme essential for synthesis of beta-1,3-glucan, a major component of the fungal cell wall. This unique mechanism targets a structure absent in mammalian cells, resulting in favorable toxicity profiles.

Synonyms:

Echinococcal cysts

Fluid-filled parasitic cysts caused by larval *Echinococcus* tapeworms, usually occurring in the liver or lungs.

Synonyms:

Echinococcosis

Infection with *Echinococcus* tapeworms. It may produce slowly enlarging cysts in organs such as the liver or lungs.

Synonyms:

Echinococcus granulosus

A tapeworm that causes hydatid disease (cystic echinococcosis). The adult worm infects dogs, and humans are accidental intermediate hosts. Infection occurs through ingestion of eggs from dog feces. Larval cysts form in the liver and lungs, causing space-occupying lesions.

Synonyms:

Echinocytes (Burr Cells)

Red blood cells with uniform, small, evenly spaced serrated or spiky membrane projections along the entire erythrocyte circumference. Most commonly caused by End-Stage Renal Disease (Uremia), pyruvate kinase deficiency, severe hypokalemia, or in vitro artifact (crenation due to glass slides or prolonged storage).

Synonyms: Burr Cells

Echo

A common abbreviation for echocardiography, an ultrasound examination used to assess the heart's structure and function.

Synonyms:

Echocardiogram

An ultrasound examination of the heart that shows its chambers, valves, wall motion, and blood flow. It is used to evaluate heart failure, valve disease, congenital defects, and other cardiac disorders.

Synonyms:

Echocardiography

Ultrasound imaging of the heart, the primary modality for assessing cardiac structure and function. Transthoracic echocardiography (TTE) is the most common approach; transesophageal echocardiography (TEE) provides better views of posterior structures (left atrium, mitral valve, aorta).

Synonyms:

Echogenic Bowel

An ultrasound finding in which the fetal bowel appears unusually bright, sometimes as bright as nearby bone. It may be a normal variant or may be associated with infection, chromosomal conditions, cystic fibrosis, or other fetal abnormalities.

Synonyms:

Echogenic Intracardiac Focus

A small bright area, usually in a papillary muscle of the fetal heart, seen on ultrasound. It is commonly an incidental variant when isolated and the remainder of the examination is normal. Its significance depends on prior screening, other ultrasound findings, and the clinical context.

Synonyms:

Echolalia

The involuntary, automatic repetition of words or phrases spoken by another person, a speech phenomenon observed in various neurologic and psychiatric conditions. Immediate echolalia involves repeating sounds immediately after hearing them; delayed echolalia involves repeating phrases heard hours, days, or weeks earlier.

Synonyms:

Echovirus

A group of enteroviruses that commonly cause asymptomatic or mild infection but may also cause aseptic meningitis, encephalitis, rash, respiratory illness, myocarditis, or neonatal sepsis. Transmission is mainly faecal-oral or respiratory, and diagnosis is usually by nucleic-acid testing or viral culture in selected cases.

Synonyms:

Eclampsia

The occurrence of generalized tonic-clonic seizures in a patient with preeclampsia, representing a medical emergency. Complications include aspiration, placental abruption, disseminated intravascular coagulation, and maternal/fetal death.

Synonyms:

ECOG Performance Status

A five-point scale describing functional impairment, from 0 for fully active to 5 for death. It is widely used in clinical trials, prognostic assessment, and decisions about systemic anticancer treatment.

Synonyms:

Ecthyma gangrenosum

A severe cutaneous infection caused by *Pseudomonas aeruginosa*, characterized by painless, hemorrhagic vesicles that rapidly progress to necrotic ulcers with black eschars. It occurs almost exclusively in immunocompromised or neutropenic patients and results from bacterial invasion of blood vessel walls.

Synonyms:

Ectoderm

The outermost of the three primary germ layers in an embryo, which develops into the skin, nervous system, and sensory organs.

Synonyms:

Ectodermal Dysplasia

A group of inherited disorders affecting tissues derived from the embryonic ectoderm, including hair, teeth, nails, skin, and sweat glands. Findings vary but may include sparse hair, abnormal teeth, reduced sweating, heat intolerance, and recurrent infections.

Synonyms:

Ectopia lentis

Displacement or malposition of the crystalline lens from its normal position, most commonly due to trauma but also associated with systemic conditions including Marfan syndrome (superior displacement), homocystinuria (inferior displacement), and Weill-

Marchesani syndrome.

Synonyms:

Ectopic ACTH Syndrome

Adrenocorticotrophic hormone secretion by non-pituitary tumors causing Cushing syndrome. Most commonly caused by small cell lung cancer and bronchial carcinoid tumors. Other sources include thymic carcinoid, pancreatic neuroendocrine tumors, and medullary thyroid carcinoma.

Synonyms:

Ectopic Cushing Syndrome

Hypercortisolism caused by an extrapituitary tumor producing adrenocorticotrophic hormone or, rarely, corticotropin-releasing hormone. It may cause hypertension, diabetes, hypokalemia, muscle weakness, infection risk, and rapid features of cortisol excess.

Synonyms:

Ectopic Heartbeat

A heartbeat originating outside the normal sinoatrial-node rhythm. Premature atrial or ventricular beats may feel like a skipped beat, flutter, or sudden thump and can occur in healthy people or with structural heart disease.

Synonyms:

Ectopic Pregnancy

Implantation of a fertilized ovum outside the uterine cavity, most commonly in the fallopian tube (95%). Risk factors: prior ectopic, PID, tubal surgery, IUD, smoking, and assisted reproductive technology. Presents with lower abdominal pain, amenorrhea, and vaginal bleeding. Rupture causes hemodynamic instability.

Synonyms:

Ectopic thyroid

Thyroid tissue located outside its normal pretracheal position, most commonly along the path of thyroid descent from the foramen cecum to the normal cervical location. The most common site is the base of the tongue (lingual thyroid).

Synonyms:

Ectopic Thyroid Tissue

Thyroid tissue located outside the normal pretracheal position resulting from failure of normal thyroid descent during embryological development. Most commonly found at the base of the tongue termed lingual thyroid. May be the only functioning thyroid tissue. Symptoms include dysphagia, dysphonia, and upper airway obstruction.

Synonyms:

Ectrodactyly

A congenital limb malformation characterized by a deep median cleft of the hand or foot with missing central digits, resulting in a claw-like or lobster-claw appearance. Also known as split hand/foot malformation (SHFM). Most cases are autosomal dominant with incomplete penetrance, linked to mutations in TP63, DLX5, or WNT10B genes.

Synonyms:

Ectropion

Outward turning of the eyelid margin, most often the lower lid, exposing the conjunctiva and causing tearing, irritation, dryness, and incomplete eyelid closure. It may be involutional, paralytic, cicatricial, or mechanical; persistent exposure can damage the cornea.

Synonyms:

Eczema

A group of inflammatory skin conditions characterized by pruritic, erythematous, scaly patches. Atopic dermatitis is the most common form. Nummular eczema presents as coin-shaped lesions. Dyshidrotic eczema affects palms and soles with vesicles. Eczema herpeticum is a disseminated HSV infection in eczema patients, a medical emergency.

Synonyms:

Eczema (Atopic Dermatitis)

A chronic inflammatory skin condition characterized by dry, itchy, and inflamed patches of skin. It is driven by a combination of genetic predisposition, immune system dysfunction, and environmental triggers.

Synonyms: Atopic Dermatitis

Eczema herpeticum

A widespread viral skin infection caused by herpes simplex virus occurring in patients with pre-existing skin barrier defects, most commonly atopic dermatitis. It presents with monomorphic, umbilicated vesicles, pustules, and hemorrhagic crusted erosions, often with fever and lymphadenopathy.

Synonyms:

Edema

Swelling caused by excess fluid trapped in body tissues. Types: pitting (press leaves indentation), non-pitting (myxedema, lymphedema). Causes: heart failure, kidney disease, liver cirrhosis, venous insufficiency, lymphatic obstruction, medications (calcium channel blockers, NSAIDs).

Synonyms:

Edema (historically Dropsy)

An historic term for edema, referring to the abnormal accumulation of serous fluid in the tissues or body cavities.

Synonyms: historically Dropsy

Edentulism

Complete or partial absence of natural teeth. It can impair mastication, speech, nutrition, facial support, and quality of life and may be managed with removable, fixed, or implant-supported prostheses.

Synonyms:

Edward Syndrome

Trisomy 18. Features: severe intellectual disability, clenched hands, rocker-bottom feet, cardiac defects, feeding difficulties. Most die within first year.

Synonyms:

Edwards Syndrome

Trisomy 18, the second most common autosomal trisomy in live births (1 in 5,000). Caused by complete trisomy 18 (94%), mosaicism, or partial trisomy (translocation).

Synonyms:

EFAST Examination

Extended focused assessment with sonography in trauma, a bedside ultrasound examination for intraperitoneal or pericardial free fluid and pneumothorax or hemothorax. It rapidly informs trauma resuscitation but does not exclude all internal injuries when negative.

Synonyms:

Effacement

Thinning (shortening) of the cervix during labor, expressed as a percentage (0-100 percent), as the cervix is taken up into the lower uterine segment, enabling dilation. Occurs with cervical dilation in the first stage of labor, driven by contractions and the presenting part.

Synonyms:

Effective Dose

A radiation-protection quantity that estimates the population-averaged stochastic health risk from nonuniform exposure by weighting absorbed doses to different organs and tissues. It is not a patient-specific prediction of cancer risk.

Synonyms:

Effective Half-Life

The time required for the activity of a radionuclide in a tissue or body to fall by one half through both physical radioactive decay and biologic elimination. It determines the duration of radiation exposure in that compartment.

Synonyms:

Effective Reproduction Number (Rt)

The average number of secondary infections caused by an infectious person at a particular time, accounting for existing immunity, behavior, interventions, and population structure. Sustained transmission generally requires Rt above 1.

Synonyms: Rt

Efficacy

The maximum therapeutic effect a drug or intervention can produce under ideal conditions (e.g., in a

clinical trial). Efficacy is determined by the drug's mechanism of action and the receptor-effector system; it is measured by the Emax (maximal effect) on the dose-response curve.

Synonyms:

EGD

Esophagogastroduodenoscopy is an examination of the esophagus, stomach, and duodenum with a flexible endoscope. It can evaluate symptoms or bleeding, obtain biopsies, and provide selected treatments such as hemostasis or removal of a lesion.

Synonyms:

EGFR inhibition

A targeted cancer therapy using monoclonal antibodies or small-molecule tyrosine kinase inhibitors that block the epidermal growth factor receptor signaling pathway, inhibiting tumor cell proliferation, survival, and metastasis. Used in colorectal cancer, non-small cell lung cancer, and head and neck squamous cell carcinoma.

Synonyms:

Eggshell Nail

A nail that becomes unusually thin, soft, flexible, and sometimes whitish or concave. It may be associated with nutritional deficiency, chronic illness, aging, or repeated trauma; persistent nail changes should be evaluated with the skin and other symptoms in mind.

Synonyms:

Egophony

An abnormal vocal sound heard during auscultation in which spoken "E" sounds are heard as "A" (the "E-to-A" change). It is a sign of lung consolidation, as in lobar pneumonia. The consolidated lung tissue conducts high-frequency sounds better than air-filled lung.

Synonyms:

Ehlers-Danlos Syndrome

A group of hereditary connective tissue disorders caused by defects in collagen synthesis or processing.

Synonyms:

EHR

Electronic health record, a digital record of a person's health information that can include data from multiple clinicians and care settings.

Synonyms:

Ehrlichia and Anaplasma

Obligate intracellular bacteria transmitted by ticks that cause ehrlichiosis and anaplasmosis. *Ehrlichia chaffeensis* causes human monocytic ehrlichiosis. *Anaplasma phagocytophilum* causes human granulocytic anaplasmosis. The organisms infect white blood cells (*Ehrlichia*) or granulocytes (*Anaplasma*).

Synonyms:

Ehrlichiosis

A tick-borne bacterial infection caused by *Ehrlichia chaffeensis* (human monocytic ehrlichiosis) and *E. ewingii* (granulocytic). Endemic in the southeastern and south-central US. Presents with fever, headache, myalgia, malaise, and thrombocytopenia/leukopenia. Rash less common than RMSF.

Synonyms:

Eisenmenger Syndrome

Reversal of a left-to-right cardiac shunt due to irreversible pulmonary hypertension, resulting in right-to-left shunting and cyanosis. It occurs in untreated congenital heart defects with large left-to-right shunts (VSD, ASD, PDA) that cause progressive pulmonary vascular disease.

Synonyms:

Eisenmenger's syndrome

Pulmonary vascular disease caused by a long-standing congenital heart shunt, eventually reversing the shunt and causing cyanosis.

Synonyms:

Ejaculation

The expulsion of seminal fluid from the male urethra during sexual climax, a reflex coordinated by the sympathetic nervous system (T10-L2) and involving

contraction of the epididymis, vas deferens, seminal vesicles, prostate, and bulbospongiosus muscle.

Synonyms:

Ejection Click

A high-pitched sound occurring at the beginning of systole, caused by opening of a stenotic semilunar valve. Aortic ejection click is heard in bicuspid aortic valve and aortic stenosis with pliable leaflets. Pulmonary ejection click is heard in pulmonary stenosis and disappears as the valve becomes more calcified and immobile.

Synonyms:

Ejection Fraction

The percentage of blood in a ventricle that is ejected during contraction, calculated from stroke volume and end-diastolic volume. It is used to describe cardiac function, but interpretation depends on the imaging method, clinical findings, and applicable heart-failure definitions.

Synonyms:

Elastic Cartilage

Flexible cartilage containing abundant elastic fibers in its matrix. It supports structures that require shape retention with flexibility, including the external ear, epiglottis, and auditory tube.

Synonyms:

Elastography

Imaging tissue stiffness. Used for liver fibrosis assessment, breast lesion characterization, thyroid nodule evaluation.

Synonyms:

Elbow Joint

A synovial hinge complex comprising the humeroulnar and humeroradial joints. It primarily permits flexion and extension, while the proximal radioulnar component permits forearm rotation.

Synonyms:

Elder Abuse

Intentional or neglectful act causing harm to older

person. Types: physical, emotional, sexual, financial, neglect. Risk factors: social isolation, caregiver stress, cognitive impairment, dependency. Mandatory reporting required. Assessment: direct question, observation, collateral history.

Synonyms:

Elderly

Person aged 65 or older. Divisions: young-old (65-74), middle-old (75-84), old-old (85+). Heterogeneous population with varying health status, needs, preferences.

Synonyms:

Electrical Cardioversion

Delivery of a synchronized electrical shock timed to the R wave to terminate selected tachyarrhythmias, such as atrial fibrillation, atrial flutter, or certain supraventricular tachycardias. Sedation, thromboembolic risk, and the patient's hemodynamic status must be assessed.

Synonyms:

Electrical Injury

Tissue damage caused by passage of electrical current through the body. Severity depends on voltage, current (alternating vs. direct), pathway, duration, and resistance. High-voltage (>1000V): extensive internal tissue damage (muscle necrosis, compartment syndrome, rhabdomyolysis) with relatively small skin burns (entry/exit wounds).

Synonyms:

Electrical Stimulation

The therapeutic application of controlled electrical currents to nerves or muscles. Examples include transcutaneous electrical nerve stimulation for pain and neuromuscular stimulation for selected muscle or movement problems.

Synonyms:

Electrocardiogram

A recording of the heart's electrical activity through electrodes placed on the skin. A standard 12-lead study uses limb and precordial leads to help detect

arrhythmias, conduction abnormalities, myocardial ischemia or infarction, and some structural heart conditions. Also called ECG or EKG.

Synonyms: ECG or EKG.

Electrocoagulation

A surgical technique using high-frequency electrical current to destroy tissue or stop bleeding by coagulating proteins, also known as diathermy or cauterization.

Synonyms: diathermy or cauterization.

Electroconvulsive Therapy

A neuromodulation treatment involving the induction of a generalized seizure under general anesthesia using electrical current applied to the scalp. It is the most effective treatment for severe depression, especially with psychotic features, catatonia, or suicidal ideation.

Synonyms:

Electrocution

Injury from electrical current. Types: low voltage (<1000V), high voltage (>1000V). Effects: cardiac arrhythmias, muscle contractions, burns, neurological damage. Management: ABCs, cardiac monitoring, tetanus prophylaxis, wound care, check for compartment syndrome.

Synonyms:

Electroencephalogram

EEG: a recording of electrical activity of the brain via scalp electrodes, reflecting cortical neuronal activity. Uses: diagnosis and classification of seizures/epilepsy (interictal epileptiform discharges, spikes/waves), status epilepticus monitoring, assessment of encephalopathy, sleep disorders, and determination of brain death.

Synonyms:

Electroencephalography

A non-invasive neurophysiological test that records the electrical activity of the brain using electrodes placed on the scalp according to the international 10-20 system.

Synonyms:

Electrolyte Balance

Homeostasis of sodium, potassium, calcium, magnesium, chloride, phosphate. Regulated by kidneys, hormones (aldosterone, ADH, PTH). Imbalance causes neuromuscular, cardiac, metabolic dysfunction.

Synonyms:

Electrolyte Imbalance

Abnormal serum concentration of electrolytes (sodium, potassium, calcium, magnesium, phosphate, chloride). Hyponatremia (<135 mEq/L): most common electrolyte disorder; causes include SIADH, heart failure, hypovolemia, and polydipsia. Hypernatremia (>145 mEq/L): free water deficit from poor intake, diabetes insipidus, or diuretics.

Synonyms:

Electrolytes

Ions in body fluids that carry an electrical charge and are essential for normal physiologic function.

Synonyms:

Electromagnetic Navigation Bronchoscopy

A guidance system for bronchoscopy that uses electromagnetic fields to navigate to peripheral lung lesions. It allows biopsy of lesions not visible on standard bronchoscopy. It is more accurate than conventional transbronchial biopsy for peripheral lesions. It may reduce the need for CT-guided biopsy.

Synonyms:

Electromyography

Suite of diagnostic procedures designed to evaluate the physiological function of the lower urinary tract (bladder and urethral sphincter) during filling, storage, and emptying phases. See urodynamic testing.

Synonyms:

Electron Transport Chain

Series of protein complexes (I-IV) and mobile car-

riers (ubiquinone, cytochrome c) in the inner mitochondrial membrane that transfer electrons from NADH and FADH₂ to oxygen, pumping protons to create electrochemical gradient used by ATP synthase. Complex I (NADH dehydrogenase): NADH → ubiquinone.

Synonyms:

Electrophysiology Study

Invasive cardiac catheterization with multielectrode catheters placed in the heart to map the cardiac conduction system. Measures: sinus node function (SNRT, SACT), AV node function (AH interval, HV interval), and inducibility of arrhythmias (programmed electrical stimulation).

Synonyms:

Electrosurgical Unit

A generator that delivers high-frequency electrical energy through an active electrode to cut tissue or achieve hemostasis. Monopolar and bipolar configurations differ in current pathway and safety considerations; burns, unintended tissue injury, and interference with implanted devices are possible complications.

Synonyms:

Elephantiasis

Massive enlargement of a body part, typically a limb or the scrotum, caused by chronic lymphedema from obstruction of lymphatic vessels. The most common cause worldwide is lymphatic filariasis, a mosquito-borne parasitic infection by *Wuchereria bancrofti*, *Brugia malayi*, or *Brugia timori*.

Synonyms:

Elevation

Superior movement of a body part, such as raising the mandible or shoulder girdle.

Synonyms:

Elimination Half-Life

Time for plasma concentration to decrease by 50%. Determines dosing interval, accumulation, withdrawal from exposure. Affected by renal/hepatic

function, age, drug interactions.

Synonyms:

Embolectomy

Surgical removal of embolus from blood vessel. Indications: acute arterial occlusion, pulmonary embolism. Techniques: Fogarty catheter, open surgical extraction. Often combined with thrombolysis.

Synonyms:

Embolectomy (Vascular)

Removal of an embolus from a blood vessel by surgery or a catheter-based procedure.

Synonyms: Vascular

Embolism

An embolism is the occlusion of a blood vessel by a detached mass that has traveled through the bloodstream from its site of origin. The most common form is thromboembolism, where a fragment of a thrombus dislodges and travels to a distant site through the venous or arterial circulation.

Synonyms:

Embolization

Deliberate occlusion of a blood vessel or vascular malformation using materials such as coils, particles, glue, or plugs. It is used to control hemorrhage, treat aneurysms or malformations, reduce tumor vascularity, or induce organ infarction in selected therapies.

Synonyms:

Embolization (Vascular)

Intentional blockage of a blood vessel using a catheter-delivered material to control bleeding, reduce blood flow, or treat a vascular lesion.

Synonyms: Vascular

Embolization Therapy

Image-guided occlusion of vessels. Used for hemorrhage control, tumor devascularization, aneurysm treatment, varices.

Synonyms:

Embryo

The developing human organism from fertilization through the end of the eighth week after fertilization. From the ninth week after fertilization, it is termed a fetus.

Synonyms:

Emergence Agitation

A state of confusion, restlessness, and inconsolable crying during emergence from anesthesia, occurring in 10 to 80 percent of pediatric patients and 5 to 10 percent of adults. Risk factors include sevoflurane induction, short procedures, parental separation, and preexisting behavioral disorders.

Synonyms:

Emergency Contraception

Contraception used after unprotected intercourse or contraceptive failure to reduce the chance of pregnancy. Options include oral medicines and a copper intrauterine device; effectiveness depends on the method, timing, medical history, and access to care.

Synonyms:

Emergency Department

Hospital department providing immediate medical care for acute illnesses and injuries. Staffed by emergency physicians and supported by specialists. Key principles: triage (prioritize by severity), stabilization, diagnosis, treatment, disposition.

Synonyms:

Emergency Procedures

Planned actions for responding to urgent events such as spills, contamination, equipment failure, or radiation exposure while protecting patients and staff.

Synonyms:

Emerging Infectious Disease

New or reemerging infectious diseases. Examples: COVID-19, Zika, Ebola, MERS.

Synonyms:

Emesis

The forceful expulsion of gastric contents through the mouth, a complex reflex coordinated by the vomiting center in the medulla oblongata.

Synonyms:

Emetics

Substances that induce vomiting. They are generally not used to treat poisoning because vomiting may cause aspiration or additional injury.

Synonyms:

Emission

The discharge or release of a substance, usually a fluid. In male reproduction, emission refers to the movement of semen into the posterior urethra in preparation for ejaculation.

Synonyms:

Emotional Eating

Eating in response to emotions such as stress, boredom, or sadness rather than primarily in response to physical hunger. Cognitive behavioral therapy may help.

Synonyms:

Emphysema

A form of COPD characterized by permanent, abnormal enlargement of airspaces distal to the terminal bronchioles, accompanied by destruction of their walls. Centriacinar emphysema affects the respiratory bronchioles and is associated with smoking.

Synonyms:

Emphysematous aortitis due to *Clostridium septicum*

A rare, life-threatening infection of the aortic wall by *Clostridium septicum*, characterized by gas formation within the aortic wall visible on imaging. It typically occurs in immunocompromised patients and may present with sepsis, back pain, or aortoenteric fistula.

Synonyms:

Emphysematous cholecystitis

A severe, gas-forming infection of the gallbladder wall caused by anaerobic organisms, most commonly *Clostridium* species and *Escherichia coli*, occurring predominantly in diabetic men. Gas within the gallbladder wall or lumen is visible on imaging. It is a surgical emergency requiring urgent cholecystectomy and broad-spectrum antibiotics.

Synonyms:

Emphysematous hepatitis

A rare, life-threatening gas-forming infection of the liver parenchyma, most commonly caused by *Clostridium* species or mixed enteric organisms in immunocompromised or diabetic patients. Imaging reveals gas within the liver parenchyma.

Synonyms:

Emphysematous prostatitis

A rare, severe gas-forming infection of the prostate gland, most commonly caused by *Escherichia coli* in diabetic or immunocompromised patients. It presents with fever, perineal pain, urinary retention, and sepsis. Imaging shows gas within the prostatic parenchyma.

Synonyms:

Emphysematous Pyelonephritis

Severe necrotizing infection of renal parenchyma with gas formation. Almost exclusively in diabetic patients. Presents with high fever, flank pain, and sepsis. CT shows gas within renal parenchyma. A urological emergency requiring aggressive antibiotics and usually nephrectomy. Mortality is high even with treatment.

Synonyms:

Empty Calories

A nontechnical term for foods or drinks that provide substantial energy but relatively few vitamins, minerals, fiber, or other beneficial nutrients.

Synonyms:

Empty Sella Syndrome

Herniation of subarachnoid space into the sella tur-

cica, compressing the pituitary gland and flattening it against the sellar floor. Primary: due to congenital weakness of the diaphragma sella. Secondary: post-surgery, post-radiation, or pituitary apoplexy (Sheehan syndrome). Most are asymptomatic.

Synonyms:

Empyema

Pus in the pleural space. CT shows peripheral enhancement (split pleura sign). Treatment requires chest tube drainage, intrapleural fibrinolytics, or VATS decortication.

Synonyms:

Empyema Necessitans

Extension of pleural empyema through the chest wall. Presents as a painful, fluctuant mass. Requires drainage and antibiotics.

Synonyms:

EMR

Electronic medical record, a digital record of health information maintained within a particular health-care organization or practice.

Synonyms:

Enamel

Hard, highly mineralized outer layer of tooth crown. Avascular, aneural, cannot regenerate. Enamel hypoplasia causes defects. Dental caries begins in enamel. Fluoride strengthens enamel.

Synonyms:

Enamel Hypoplasia

Defective enamel quantity due to systemic disturbance during development. Pits, grooves, or thin enamel.

Synonyms:

Enamel Pearl

Small mound of enamel on root surface. Usually bifurcation area of molars. May interfere with periodontal attachment.

Synonyms:

Encapsulating peritoneal sclerosis

Rare condition characterized by a thick fibro-collagenous membrane encasing the small intestine, leading to recurrent bowel obstruction. Most commonly associated with long-term peritoneal dialysis but also seen after abdominal surgery, radiation, and beta-blocker use.

Synonyms:

Encephalitis

Inflammation of the brain tissue, often caused by infection or an autoimmune reaction. It may cause fever, headache, altered mental status, seizures, or focal neurologic deficits and requires urgent medical evaluation.

Synonyms:

Encephalocele

A neural tube defect where brain tissue and meninges herniate through a skull defect, most commonly in the occipital region. The herniated sac contains cerebrospinal fluid, meninges, and often brain tissue. Associated with other CNS anomalies including hydrocephalus and Chiari malformation. Presents as a visible, pulsatile midline mass.

Synonyms:

Encephalopathy

Any diffuse disease of the brain that alters its structure or function, presenting with a global change in mental status (confusion, lethargy, personality change, coma) rather than focal neurologic deficits.

Synonyms:

Encopresis

Recurrent passage of stool in inappropriate places by a child who is developmentally old enough for bowel control. It is commonly associated with chronic constipation and fecal retention, with overflow soiling around impacted stool.

Synonyms:

End-of-Life Care

Care focused on comfort, symptom control, communication, and support for a person with advanced

illness and for their family or caregivers.

Synonyms:

End-Stage Kidney Disease

The advanced stage of chronic kidney disease in which the kidneys can no longer adequately maintain fluid, electrolyte, and waste balance. Treatment requires dialysis or kidney transplantation, together with management of complications.

Synonyms:

End-Stage Renal Disease

The final stage of chronic kidney disease (CKD stage 5), defined by GFR <15 mL/min/1.73 m² or the need for renal replacement therapy. Uremia develops with accumulation of toxins causing nausea, anorexia, pruritus, pericarditis, encephalopathy, and bleeding diathesis.

Synonyms:

Endemic

The constant or usual presence of a disease or infectious agent within a defined population or geographic area.

Synonyms:

Endemic fungi

Fungi that occur naturally in particular geographic regions and can cause infection in people who inhale their spores.

Synonyms:

Endobronchial Foreign Body

A foreign object lodged in a bronchus, causing partial or complete airway obstruction. It may cause localized wheezing, atelectasis, and post-obstructive pneumonia. It is most common in children and may be initially misdiagnosed as asthma. Bronchoscopy is both diagnostic and therapeutic.

Synonyms:

Endobronchial Tumor

A tumor growing within the bronchial lumen, causing obstruction, atelectasis, and post-obstructive pneumonia. It may be malignant (lung cancer, car-

cinoid tumor) or benign (hamartoma, papilloma). Symptoms include cough, hemoptysis, and wheezing. Treatment is bronchoscopic removal or debulking plus definitive therapy.

Synonyms:

Endobronchial Ultrasound

Bronchoscopy with ultrasound guidance for trans-bronchial needle aspiration of mediastinal and hilar lymph nodes. Essential for lung cancer staging. Less invasive than mediastinoscopy.

Synonyms:

Endobronchial Valve

A one-way valve placed bronchoscopically in a target airway to achieve lobar atelectasis in emphysema. It allows air and secretions to exit but prevents air from entering. It is used for bronchoscopic lung volume reduction in selected patients with heterogeneous emphysema and intact fissures.

Synonyms:

Endocardial Cushion Defect

A congenital heart defect caused by abnormal development of the atrioventricular cushions, producing an atrioventricular septal defect with abnormal atrioventricular valves. It is strongly associated with Down syndrome and may cause heart failure and pulmonary hypertension.

Synonyms:

Endocarditis

Infection of the endocardial surface of the heart, most commonly involving the valves. Acute bacterial endocarditis: *Staph aureus* (most common in IV drug users and prosthetic valves), rapid destruction. Subacute: viridans group streptococci (pre-existing valve disease).

Synonyms:

Endocarditis Prophylaxis

Infective endocarditis prophylaxis with antibiotics is recommended for patients at highest risk of adverse outcomes from endocarditis who are undergoing dental procedures that involve manipulation of gingival

tissue, the periapical region of teeth, or perforation of the oral mucosa.

Synonyms:

Endocarditis Surgical Indications

Surgery indicated for: heart failure from valve dysfunction, uncontrolled infection (abscess, fistula, vegetation >10 mm with persistent emboli), fungal endocarditis, prosthetic valve dehiscence, and large vegetations (>15 mm) with embolic events.

Synonyms:

Endocardium

The innermost layer of the heart wall, a thin membrane of endothelial cells and underlying connective tissue that lines the cardiac chambers and covers the heart valves. The endocardium is continuous with the endothelium of blood vessels and provides a smooth, non-thrombogenic surface.

Synonyms:

Endocrine Disrupting Chemicals

Environmental chemicals that interfere with endocrine function including bisphenol A, phthalates, pesticides, and polychlorinated biphenyls. Potential associations with diabetes, obesity, thyroid dysfunction, reproductive disorders, and hormone-sensitive cancers. Evidence is strongest for associations with type two diabetes and obesity.

Synonyms:

Endocrine Disruptor

Chemical interfering with hormone systems. Examples: BPA, phthalates, DDT, PCBs. Effects: reproductive disorders, developmental problems, cancer.

Synonyms:

Endocrine Glands

Ductless glands that secrete hormones directly into the bloodstream to regulate distant target organs.

Synonyms:

Endocrine Therapy

Systemic treatment that manipulates hormones or their receptors in hormone-sensitive cancers, in-

cluding tamoxifen, aromatase inhibitors, luteinizing hormone-releasing hormone agonists, and antiandrogens.

Synonyms:

Endocrinology

The branch of medicine concerned with the study, diagnosis, and treatment of disorders of the endocrine system—the network of glands that secrete hormones regulating metabolism, growth and development, tissue function, sexual function, reproduction, sleep, and mood.

Synonyms:

Endocytosis

Process by which cells internalize extracellular material by engulfing it with the cell membrane, forming intracellular vesicles. Phagocytosis ("cell eating") involves engulfing large particles (>0.5 micrometers) such as bacteria or debris, forming a phagosome that fuses with lysosomes for digestion.

Synonyms:

Endoderm

The innermost germ layer in an embryo, which develops into the linings of the digestive and respiratory tracts, as well as the liver and pancreas.

Synonyms:

Endodontic Therapy (Root Canal)

Treatment of dental pulp disease or necrosis. Indications: irreversible pulpitis, pulp necrosis, periapical abscess. Procedure: access cavity, locate canals, clean and shape, obturate with gutta-percha, seal. Success rate: >90%. Alternative: extraction.

Synonyms: Root Canal

Endoleak

Persistent blood flow into an aneurysm sac after endovascular aneurysm repair. Type I and III endoleaks reflect inadequate sealing or device failure and generally require urgent correction; other types are managed according to sac expansion and risk.

Synonyms:

Endometrial Cancer

The most common gynecologic malignancy in developed countries, arising from the lining of the uterine cavity, typically in postmenopausal women.

Synonyms:

Endometrial Hyperplasia

Abnormal overgrowth of the lining of the uterus, often related to prolonged estrogen exposure without enough progesterone. It may cause heavy, irregular, or postmenopausal bleeding; atypical forms can precede endometrial cancer and require gynecologic evaluation, often including endometrial sampling.

Synonyms:

Endometrioma

A chocolate cyst of the ovary formed by ectopic endometrial tissue that hemorrhages cyclically, appearing as a homogenous low-level echo mass on ultrasound and associated with chronic pelvic pain and infertility.

Synonyms:

Endometriosis

A chronic, estrogen-dependent gynecologic disorder characterized by the presence of endometrial-like tissue (glands and stroma) outside the uterine cavity, most commonly implanted on the pelvic peritoneum, ovaries, uterosacral ligaments, and rectovaginal septum.

Synonyms:

Endometritis

Infection of the endometrium, the most common cause of puerperal fever after cesarean delivery. Risk factors include prolonged labor, multiple vaginal examinations, premature rupture of membranes, and cesarean section. Presents with fever, uterine tenderness, foul-smelling lochia, and leukocytosis.

Synonyms:

Endometrium

The lining of the uterus.

Synonyms:

Endophthalmitis

A severe, sight-threatening intraocular inflammation involving the vitreous cavity, aqueous humor, and adjacent structures, representing an ophthalmologic emergency.

Synonyms:

Endoplasmic Reticulum

Interconnected network of membranous tubules and sacs continuous with the nuclear envelope. Rough ER: studded with ribosomes, site of synthesis of secretory, membrane, and lysosomal proteins; co-translational insertion into ER lumen.

Synonyms:

Endoprosthesis

Internal prosthetic device. Vascular stent-grafts, airway stents.

Synonyms:

Endorphin

Endogenous opioid peptides (beta-endorphin, enkephalins, dynorphins) produced by the pituitary, hypothalamus, and immune cells that bind opioid receptors (mu, delta, kappa) to produce analgesia, euphoria, and modulation of pain perception and stress responses.

Synonyms:

Endoscope

Flexible or rigid tube with camera for visualizing internal structures. Types: bronchoscope, colonoscope, gastroscope, arthroscope, cystoscope. Essential for diagnosis and intervention.

Synonyms:

Endoscopic Mucosal Resection

Advanced endoscopic technique for removal of superficial gastrointestinal neoplasms by lifting the lesion through submucosal injection and resecting with an electrosurgical snare.

Synonyms:

Endoscopic Retrograde

Cholangiopancreatography

Combined endoscopic and fluoroscopic procedure used to visualize and treat disorders of the biliary and pancreatic ducts. A duodenoscope is advanced to the second portion of the duodenum and the ampulla of Vater is cannulated. Contrast dye is injected under fluoroscopic guidance creating cholangiograms and pancreatograms.

Synonyms:

Endoscopic Submucosal Dissection

Advanced endoscopic technique for en bloc resection of large gastrointestinal neoplasms using specialized electrosurgical knives to dissect through the submucosa. The technique allows complete histological assessment and is particularly valuable for early gastric and colorectal cancers.

Synonyms:

Endoscopic Ultrasound

Combined endoscopy and ultrasound for high-resolution imaging of the GI wall and adjacent structures. Linear echoendoscope: allows FNA of mediastinal, pancreatic, and peripancreatic lesions. Radial echoendoscope: 360-degree view for staging GI cancers (TNM staging).

Synonyms:

Endoscopy

Visualization of the gastrointestinal tract using flexible fiber-optic or video endoscopes. Upper endoscopy examines the esophagus, stomach, and duodenum. Colonoscopy examines the colon and terminal ileum. Both allow direct visualization, biopsy, and therapeutic interventions including polypectomy, hemostasis, and dilation.

Synonyms:

Endosteum

The thin connective tissue membrane lining the inner surface of bone, including the medullary cavity, Haversian canals, and trabeculae. Contains osteoprogenitor cells and osteoblasts, contributing to bone formation, remodeling, and repair (fracture healing).

Synonyms:

Endothelin Receptor Antagonists

Medications that block endothelin-1, a potent vasoconstrictor implicated in pulmonary arterial hypertension. Bosentan (dual ERA), ambrisentan (selective ETA), and macitentan are used for PAH. Side effects include hepatotoxicity (bosentan), anemia, and teratogenicity.

Synonyms:

Endotracheal Intubation

Placement of a cuffed tube through the mouth or nose into the trachea to maintain airway patency, deliver positive-pressure ventilation, administer inhaled anesthetics, and protect the airway in selected patients. Correct position must be confirmed clinically and with exhaled carbon dioxide when circulation is present.

Synonyms:

Endotracheal Tube

A tube placed through the mouth or nose into the trachea to maintain an airway and support ventilation. A cuff may seal the airway around the tube.

Synonyms:

Endovascular

Located within or performed through the interior of a blood vessel, usually using a catheter-based technique.

Synonyms:

Endovascular Aneurysm Repair

Minimally invasive technique for abdominal aortic aneurysm repair using stent graft. Accessed via femoral arteries. Advantages: lower perioperative mortality, faster recovery. Disadvantages: need for surveillance, endoleak risk, may require reintervention.

Synonyms:

Endovascular Graft

A fabric-covered vascular prosthesis placed through

a catheter to reinforce a diseased vessel or exclude an aneurysm. It is used in selected aortic and peripheral vascular conditions; anatomy, symptoms, operative risk, and imaging surveillance determine suitability and follow-up.

Synonyms:

Endovascular Repair

A minimally invasive procedure that uses a catheter-delivered graft or other device to repair a blood vessel from inside its lumen.

Synonyms:

Endurance

Aerobic capacity, muscular endurance. Cardiorespiratory fitness testing.

Synonyms:

Enema

The introduction of fluid into the rectum and colon through the anus for diagnostic or therapeutic purposes.

Synonyms:

Energy Conservation

Strategies that reduce unnecessary energy expenditure and fatigue during daily activities, such as pacing, prioritizing, planning, positioning, and using adaptive equipment.

Synonyms:

Energy Resolution

The ability of a radiation detector to distinguish photons with different energies, commonly expressed as the width of a photopeak relative to its energy.

Synonyms:

Energy Window

The selected range of photon energies accepted by a gamma camera or other radiation detector for image formation. Appropriate selection helps limit scattered radiation.

Synonyms:

Engagement

The descent of the fetal presenting part into the pelvis, typically occurring 2-3 weeks before labor in nulliparas or at the onset of labor in multiparas.

Synonyms:

Enhanced Recovery After Surgery

A multimodal, evidence-based perioperative pathway that reduces surgical stress and supports early recovery through preoperative counseling, appropriate fasting, opioid-sparing analgesia, early mobilization, early nutrition, and prevention of complications.

Synonyms:

Enhancement Artifact

Ultrasound artifact from fluid-filled structures. Enhanced by harmonic imaging.

Synonyms:

Enhancer

DNA sequence increasing transcription of target gene, can be distant from gene, orientation-independent. Binds activator proteins. Examples: LCR (locus control region) for beta-globin.

Synonyms:

Enrichment

Restoration of nutrients lost during processing. Examples: enriched flour, restored B vitamins.

Synonyms:

Entamoeba histolytica

A protozoan parasite that causes amoebiasis, a gastrointestinal and extra-intestinal infection transmitted via the fecal-oral route. The organism exists in two forms: the infectious cyst (transmitted in contaminated food or water) and the invasive trophozoite.

Synonyms:

Enteral Formula

A nutritionally complete or modular liquid preparation delivered into the gastrointestinal tract. Formulas may be polymeric, semi-elemental, or elemental

and are selected according to digestion, absorption, fluid, renal, hepatic, and metabolic requirements.

Synonyms:

Enteral Nutrition

Delivery of nutrients via gastrointestinal tract. Routes: nasogastric, nasoduodenal, gastrostomy (PEG), jejunostomy. Indications: dysphagia, neurological disease, head/neck cancer, prolonged inability to eat. Complications: aspiration, diarrhea, tube displacement, sinusitis.

Synonyms:

Enteric duplication cyst

A congenital, smooth-muscle-lined cyst arising from the gastrointestinal tract, most commonly in the ileum, containing ectopic gastric or intestinal mucosa. It may present in childhood with abdominal pain, obstruction, or gastrointestinal bleeding from ectopic gastric acid secretion.

Synonyms:

Enteritis

Inflammation of the small intestine, most commonly caused by infectious agents (viral, bacterial, or parasitic). Viral enteritis (norovirus, rotavirus, adenovirus, astrovirus) presents with acute onset of watery diarrhea, nausea, vomiting, and abdominal cramps, typically self-limited over 2–7 days.

Synonyms:

Enterobacteriaceae carbapenem resistance

Resistance to carbapenem antibiotics in Enterobacteriaceae, primarily through production of carbapenemases. The most important carbapenemases include KPC, NDM, and OXA-48-like enzymes. Carbapenem-resistant Enterobacteriaceae (CRE) are a major public health threat due to limited treatment options.

Synonyms:

Enterobiasis

Intestinal infection with the pinworm *Enterobius vermicularis*, commonly causing nighttime itching

around the anus.

Synonyms:

Enterobius vermicularis

A small intestinal nematode commonly called the pinworm or threadworm.

Synonyms: the pinworm or threadworm.

Enterocolitis

Inflammation of both the small intestine and colon, caused by infection, immune-mediated disease, reduced blood flow, toxins, or other injury. It may produce abdominal pain, diarrhoea, fever, vomiting, bleeding, dehydration, or systemic illness; diagnosis and management depend on the cause and severity.

Synonyms:

Enterohepatic Circulation

Recycling of toxins between liver and intestine via bile. Prolonged exposure, increased toxicity. Interrupted by activated charcoal, cholestyramine. Examples: morphine, digoxin, estrogen, thyroxine.

Synonyms:

Enteropathic Arthritis

Inflammatory arthritis associated with inflammatory bowel disease, including Crohn disease and ulcerative colitis. It may affect the spine, sacroiliac joints, or peripheral joints.

Synonyms:

Enterovirus D68

A respiratory enterovirus that usually causes a mild cold-like illness but can produce severe respiratory disease and, rarely, acute flaccid myelitis. Children with asthma or other respiratory conditions are at increased risk of severe illness.

Synonyms:

Enthesis

The site at which a tendon, ligament, or joint capsule attaches to bone.

Synonyms:

Enthesitis

Inflammation at the site where a tendon, ligament, or joint capsule inserts into bone (enthesitis), a hallmark of spondyloarthritis (ankylosing spondylitis, psoriatic arthritis, reactive arthritis, IBD-associated). Affects Achilles tendon, plantar fascia, patellar, and costochondral junctions.

Synonyms:

Entrance Wound

A skin defect created where a projectile enters the body, distinguished from an exit wound by smaller size, rounded shape, and abraded inward margin. Contact wounds show a muzzle imprint and soot; close-range wounds show soot and powder tattooing; intermediate-range wounds show stippling; distant wounds show a clean abrasion ring.

Synonyms:

Entropion

An eyelid malposition in which the eyelid margin rolls inward, causing the eyelashes and skin to rub against the ocular surface, resulting in corneal irritation, conjunctival injection, tearing, photophobia, and a foreign body sensation. The condition most commonly affects the lower eyelid and is classified into four types.

Synonyms:

Enuresis

Repeated involuntary urination, usually during sleep in a child who is developmentally expected to remain dry. It may be primary or secondary and requires assessment for constipation, urinary infection, diabetes, sleep or developmental disorders, psychosocial stressors, and lower-urinary-tract dysfunction when clinically indicated.

Synonyms:

Enuresis (Bedwetting)

Repeated involuntary urination during sleep in a child who is developmentally expected to remain dry. It may be primary or secondary; assessment considers constipation, urinary infection, diabetes, sleep disorders, and developmental or psychosocial factors.

Synonyms: Bedwetting

Environmental Health

Study of environmental factors affecting health. Examples: air pollution, water quality, occupational hazards, climate change.

Synonyms:

Enzyme

Biological catalyst (protein or RNA) that accelerates chemical reactions by lowering activation energy. Specificity: lock-and-key or induced fit models. Kinetics: Michaelis-Menten equation (V_{max} , K_m). Regulation: allosteric control, covalent modification (phosphorylation), proteolytic activation, feedback inhibition.

Synonyms:

Enzyme Induction

A process by which a drug or xenobiotic increases the synthesis or activity of drug-metabolizing enzymes, primarily cytochrome P450 enzymes in the liver, accelerating the metabolism of itself (autoinduction) or other drugs. Enzyme induction typically occurs over days to weeks as it requires new protein synthesis.

Synonyms:

Enzyme Inhibition

A process by which a drug inhibits the activity of drug-metabolizing enzymes, leading to increased plasma concentrations of co-administered drugs that are metabolized by the same enzyme. Enzyme inhibition occurs rapidly (hours to days) as it does not require new protein synthesis.

Synonyms:

Enzyme Kinetics

The study of enzyme-catalyzed reaction rates and the factors that affect them. Important concepts include substrate concentration, maximum reaction rate, binding affinity, inhibitors, and the relationship between enzyme activity and temperature or pH.

Synonyms:

Enzyme-Linked Immunosorbent Assay

An immunoassay that uses an enzyme-labeled antibody or antigen and a substrate-generated signal to detect or quantify a target analyte. It is used for measurement of antibodies, antigens, hormones, cytokines, and infectious disease markers.

Synonyms:

Eosinophil

A granulocyte (1-4 percent of leukocytes) with bilobed nucleus and eosinophilic granules containing major basic protein, eosinophil cationic protein, and peroxidase. Roles: defense against parasitic (helminth) infections and modulation of allergic inflammation; contain histaminase and aryl sulfatase.

Synonyms:

Eosinophilia

An absolute eosinophil count exceeding 500 cells per microliter in peripheral blood, most commonly caused by parasitic infections, allergic disorders, drug reactions, and autoimmune diseases. Hypereosinophilia, with counts above 1500 per microliter, may cause end-organ damage to the heart, lungs, skin, and nervous system.

Synonyms:

Eosinophilic Bronchitis

A cause of chronic cough in which eosinophilic inflammation affects the airways without the variable airflow obstruction typical of asthma. Cough-variant asthma and reflux may mimic it; diagnosis relies on clinical assessment and airway inflammation testing.

Synonyms:

Eosinophilic Esophagitis

Chronic immune-mediated condition characterized by dense eosinophilic infiltration of the esophageal mucosa defined as fifteen or more eosinophils per high-power field, in the absence of other causes of esophageal eosinophilia.

Synonyms:

Eosinophilic fasciitis

A rare connective tissue disorder characterized by symmetrical inflammation and thickening of the deep fascia and adjacent muscle, presenting with painful swelling and induration of the extremities and a peau d'orange skin appearance. Peripheral eosinophilia and elevated inflammatory markers are typical.

Synonyms:

Eosinophilic Gastroenteritis

Rare chronic inflammatory condition characterized by eosinophilic infiltration of the gastrointestinal tract beyond the esophagus involving any segment from stomach to rectum and extending beyond the mucosa to involve the muscularis propria or serosa.

Synonyms:

Eosinophilic Granulomatosis with Polyangiitis

EGPA (formerly Churg-Strauss syndrome): an ANCA-associated vasculitis characterized by asthma, peripheral and tissue eosinophilia, and necrotizing vasculitis.

Synonyms:

Ependymoma

A glioma arising from the ependymal cells lining the ventricles and spinal canal; more common in children and frequently associated with hydrocephalus.

Synonyms:

Epicardium

The outermost layer of the heart wall, which is the visceral layer of the serous pericardium. It consists of a single layer of mesothelial cells and underlying connective tissue containing blood vessels, nerves, and adipose tissue. The epicardium produces pericardial fluid that lubricates the heart surface.

Synonyms:

Epidemic

Sudden increase in disease cases above expected level. Examples: cholera outbreak, measles outbreak.

Synonyms:

Epidemiology

Study of distribution and determinants of health-related states in populations. Branches: descriptive (who, when, where), analytic (why, how), experimental (intervention trials). Measures: incidence, prevalence, mortality rates, case-fatality rate.

Synonyms:

Epidermal Inclusion Cyst

A common benign cyst lined by stratified squamous epithelium with keratin debris. It presents as a firm, mobile, subcutaneous nodule, typically on the face, neck, and back. A central punctum is characteristic. It may become inflamed or infected. Treatment includes complete excision (including the cyst wall) to prevent recurrence.

Synonyms:

Epidermal Layers

From deep to superficial, the epidermis consists of the basal, spinous, granular, lucid, and cornified layers. The lucid layer is present mainly in thick skin such as the palms and soles.

Synonyms:

Epidermis

Outermost skin layer, stratified squamous keratinized epithelium approximately 0.1 mm thick, with five layers (superficial to deep): stratum corneum (dead keratinized cells), lucidum (clear layer, thick skin only), granulosum (keratinization begins), spinosum (spiny layer, Langerhans cells), basale (stem cells, melanocytes, Merkel cells).

Synonyms:

Epidermoid Cyst

A benign, slow-growing cyst lined by squamous epithelium and filled with keratin, usually presenting as a firm subcutaneous nodule. Rupture can cause inflammation, tenderness, and a foul-smelling discharge.

Synonyms:

Epidermolysis Bullosa

A group of genetic disorders causing skin fragility and blistering with minimal trauma. Simplex (intraepidermal blistering), junctional (blistering at lamina lucida), dystrophic (sublamina densa blistering), and Kindler syndrome (mixed). Dystrophic EB can cause scarring, contractures, and squamous cell carcinoma.

Synonyms:

Epididymal Cyst

A usually benign, fluid-filled cyst arising in the epididymis. It may be painless and may require treatment only if it causes significant symptoms or complications.

Synonyms:

Epididymis

Coiled duct approximately 6 meters long on the posterolateral aspect of each testis, divided into head (caput, receiving efferent tubules from the testis), body (corpus), and tail (cauda, continuing as the vas deferens). Functions include sperm maturation (gaining motility over approximately 12 days), storage (in the tail), and transport.

Synonyms:

Epididymitis

Inflammation of the epididymis, a common cause of acute scrotal pain in adults, typically resulting from infection. In sexually active men under 35 years, the most common pathogens are sexually transmitted: *Chlamydia trachomatis* (most common) and *Neisseria gonorrhoeae*, with epididymitis often accompanied by urethritis.

Synonyms:

Epidural

Regional analgesia (or anesthesia) delivering local anesthetic/opioid via a catheter in the epidural space (lumbar), used for pain relief during labor and for cesarean (higher dose) anesthesia. Provides excellent analgesia while allowing maternal mobility and pushing; reduces catecholamine stress.

Synonyms:

Epidural Abscess

A collection of infected material between the dura mater and the skull or vertebral canal, capable of compressing the brain, spinal cord, or nerve roots. Spinal epidural abscess may cause severe focal back pain, fever, neurological deficit, or sphincter dysfunction and requires urgent imaging and specialist assessment.

Synonyms:

Epidural Analgesia

Segmental pain relief produced by delivering a local anesthetic, sometimes with an opioid, through a catheter into the epidural space. It may be used during labor or selected operations; the medicines and concentrations depend on the patient and clinical setting.

Synonyms:

Epidural Analgesia for Labor

A neuraxial technique for labor analgesia: a catheter is placed in the epidural space (L3-L4 or L2-L3 interspace) and local anesthetic (bupivacaine 0.0625-0.125%) with opioid (fentanyl 2 µg/mL) is infused continuously or in patient-controlled epidural analgesia (PCEA) boluses.

Synonyms:

Epidural Anesthesia

A regional anesthetic technique involving injection of local anesthetic and/or opioid into the epidural space (the potential space between the dura mater and the ligamentum flavum within the spinal canal), producing segmental analgesia and sympathetic blockade.

Synonyms:

Epidural Blood Patch

A minimally invasive procedure used to treat postdural puncture headache (PDPH) resulting from accidental dural puncture during epidural placement or spinal anesthesia. It involves injecting a small volume of the patient's autologous blood (typically 15-20 mL) into the epidural space at or near the site of the previous puncture.

Synonyms:

Epidural Hematoma

Accumulation of blood between the skull and the dura mater, typically from arterial bleeding (middle meningeal artery) following temporal bone fracture. Presents with loss of consciousness, then a lucid interval (hours), followed by rapid neurological deterioration due to mass effect.

Synonyms:

Epigastric Region

Central superior region between the hypochondriac regions and above the umbilical region. Overlies the stomach, duodenum, pancreas, and portions of the liver. The aorta and inferior vena cava pass through it. Epigastric pain associates with gastric ulcers, pancreatitis, GERD, and aortic aneurysms.

Synonyms:

Epigenetics

Heritable changes in gene expression without DNA sequence alteration. Mechanisms: DNA methylation, histone modification, non-coding RNA. Influenced by environment, diet, stress. Reversible.

Synonyms:

Epiglottis

A leaf-shaped elastic cartilage at the base of the tongue that covers the laryngeal inlet during swallowing, directing food and liquid into the esophagus and preventing aspiration into the airway. Elevates during swallowing (with the larynx) under glossopharyngeal/vagal innervation.

Synonyms:

Epiglottitis

Inflammation of the epiglottis, a life-threatening emergency. Most commonly caused by *Haemophilus influenzae* type b (now rare due to vaccination). Presents with high fever, drooling, dysphagia, tripod position, and rapid progression to airway obstruction. Do not examine the throat.

Synonyms:

Epilepsy

A neurological disorder characterized by recurrent, unprovoked seizures due to abnormal electrical activity in the brain. Classification includes focal, generalized, and unknown onset seizures. Etiology: genetic, structural, metabolic, infectious, immune. Diagnosis: clinical history, EEG, neuroimaging.

Synonyms:

Epilepsy Surgery

Indicated for patients with drug-resistant epilepsy who have a concordant, resectable seizure focus identified on comprehensive presurgical evaluation. Failure of two or more appropriately chosen and adequately dosed antiepileptic drugs to achieve sustained seizure freedom.

Synonyms:

Epinephrin (Adrenaline)

An alternate spelling of epinephrine, a catecholamine hormone and medicine that increases heart rate and airway diameter and constricts blood vessels.

Synonyms: Adrenaline

Epinephrine (Adrenaline)

A catecholamine hormone and neurotransmitter produced by the adrenal medulla and sympathetic nerve terminals, acting on alpha-1, alpha-2, beta-1, beta-2, and beta-3 adrenergic receptors.

Synonyms: Adrenaline

Epiphora

Excessive tearing caused by impaired tear drainage or reflex hypersecretion. Causes: nasolacrimal duct obstruction (most common in infants and elderly), punctal stenosis, eyelid malposition (ectropion, entropion), and reflex tearing from dry eye or ocular surface irritation.

Synonyms:

Epiphyseal Plate

A layer of hyaline cartilage, also called the growth plate or physis, located between the epiphysis and metaphysis of a growing long bone. It permits lon-

gitudinal bone growth through endochondral ossification, progressing from resting cartilage through proliferation and hypertrophy to calcification and replacement by bone.

Synonyms: the growth plate or physis, located between.

Epiphysis

The expanded end of a long bone, usually covered by articular cartilage where it forms a synovial joint. It contains spongy (trabecular) bone with a thin outer shell of compact bone and contributes to the shape and function of the joint.

Synonyms:

Episcleritis

A benign, self-limited inflammatory condition of the episclera, the thin layer of connective tissue between the sclera and conjunctiva.

Synonyms:

Episiotomy

A surgical incision of the perineum to enlarge the vaginal outlet during delivery. Two types: mediolateral (most common worldwide) and median/midline. Previously performed routinely; current evidence supports selective use. Indications include operative vaginal delivery, fetal distress requiring expedited delivery, and shoulder dystocia.

Synonyms:

Episiotomy Repair

Surgical repair of an episiotomy incision after delivery. Technique: continuous suturing of the vaginal mucosa (2-0 chromic), interrupted sutures for the perineal muscles, and subcuticular closure of the perineal skin. The rectum should be examined after repair (suture inadvertently through the rectal mucosa).

Synonyms:

Epispadias

A congenital anomaly where the urethral meatus opens on the dorsal (top) surface of the penis in boys or in a split, open position on the clitoral hood

in girls. Caused by abnormal development of the genital tubercle and cloacal membrane.

Synonyms:

Epistasis

Interaction between genes where one gene masks or modifies expression of another. Examples: coat color in mice, ABO blood group modifications.

Synonyms:

Epistaxis

Bleeding from the nasal mucosa that may range from minor bleeding to a medical emergency. See Nosebleed.

Synonyms:

Epithelial Tissue

The tissue that covers external body surfaces, lines internal cavities and pathways, and forms glands.

Synonyms:

Epithelium

One of the four primary tissue types, composed of cells that line the surfaces of the body (skin, mucous membranes, serous membranes) and form glands.

Synonyms:

Epley Maneuver

A sequence of head and body movements used to move displaced otoconia from the posterior semicircular canal into the utricle. It is commonly used to treat posterior-canal benign paroxysmal positional vertigo.

Synonyms:

Epstein Pearls

Small, white keratin-filled cysts on the palate of a newborn that usually disappear without treatment.

Synonyms:

Epstein-Barr Virus

EBV (human herpesvirus 4): ubiquitous virus causing infectious mononucleosis, transmitted via saliva ('kissing disease').

Synonyms:

Erb's Palsy

Upper brachial plexus injury (C5-C6) causing weakness or paralysis of the shoulder and arm muscles. Presents with the characteristic waiter's tip position: arm adducted, elbow extended, forearm pronated, wrist flexed. Most commonly caused by shoulder dystocia during delivery. See also Brachial Plexus Injury.

Synonyms:

Erdheim–Chester disease

A rare, non-Langerhans cell histiocytosis characterized by xanthogranulomatous infiltration of multiple organ systems, most commonly the long bones, retroperitoneum, and cardiovascular system. It causes symmetric osteosclerosis of the diaphyses and metaphyses of long bones, exophthalmos, and xanthelasma.

Synonyms:

Erectile Disorder

A sexual dysfunction characterized by persistent or recurrent difficulty achieving or maintaining an erection sufficient for sexual activity, or a marked decrease in erectile rigidity, lasting ≥ 6 months and causing marked distress. Prevalence: 10-20% of men under 60, rising to 40-70% over age 70.

Synonyms:

Erectile Dysfunction

The persistent inability to achieve or maintain an erection sufficient for satisfactory sexual performance. Affects up to 50% of men aged 40-70. Etiology: organic (vascular disease, diabetes, hypogonadism, neurological disorders, medications, Peyronie disease) and psychogenic (anxiety, depression, relationship issues).

Synonyms:

Ergonomics

The design of tasks, tools, and environments to fit human capabilities and reduce discomfort, error, and injury.

Synonyms:

Ergotism

A toxidrome caused by prolonged exposure to ergot alkaloids from the fungus *Claviceps purpurea* contaminating rye and other grains, or from ergot-derived medications.

Synonyms:

Erosion

Partial-thickness loss of epidermis that does not extend through the entire epidermis and therefore usually heals without scarring. It may result from trauma, blister rupture, maceration, or inflammatory disease.

Synonyms:

Erosion (Tooth)

Chemical wear without bacterial involvement. Causes: acidic foods/drinks, gastric acid (GERD, bulimia), environmental acids. Management: dietary modification, fluoride, restoration.

Synonyms: Tooth

Erosive Gastritis

Inflammation of the stomach lining with superficial erosions but no full-thickness ulceration. Commonly caused by NSAIDs, alcohol, or critical illness. May present with epigastric pain or gastrointestinal bleeding. Diagnosis is by upper endoscopy showing erosions and erythema.

Synonyms:

Eruption Cyst

A fluid-filled swelling over a tooth that is about to erupt, often appearing blue or purple and usually resolving when the tooth emerges.

Synonyms:

Eruptive xanthomas

Sudden eruption of numerous small, yellow-orange papules with an erythematous halo, typically on the buttocks, elbows, knees, and trunk, caused by severe hypertriglyceridemia. They represent lipid-laden macrophages in the dermis and are a marker

of significantly elevated serum triglycerides, often exceeding 1000 mg/dL.

Synonyms:

Erysipelas

A superficial form of cellulitis involving the upper dermis and superficial lymphatics, most commonly caused by *Streptococcus pyogenes*. It presents as a bright red, well-demarcated, raised plaque with sharp borders, typically on the face or lower extremities. Fever and chills precede the rash.

Synonyms:

Erythema

Redness of the skin or mucous membranes caused by increased blood flow to dilated superficial capillaries, often associated with inflammation, infection, or another underlying condition. It commonly blanches with pressure, unlike purpura.

Synonyms:

Erythema ab igne

A reticulated, hyperpigmented erythematous patch caused by chronic, repeated exposure to moderate heat or infrared radiation, such as from heating pads, laptops, or fireplaces. Histologically it shows increased melanin and dermal amyloid deposition.

Synonyms:

Erythema gyratum repens

A distinctive, rapidly moving, concentric erythematous eruption with a wood-grain or serpiginous pattern. It is often associated with an underlying malignancy, especially lung cancer, and should prompt an appropriate evaluation while other causes are considered.

Synonyms:

Erythema Infectiosum

A common childhood exanthem caused by parvovirus B19, also called fifth disease. A mild prodrome is followed by a slapped-cheek facial eruption and a lacy rash on the trunk and limbs.

Synonyms: fifth disease.

Erythema marginatum

A migratory, non-pruritic, erythematous rash with a serpiginous or annular pattern that blanches centrally, occurring as a major Jones criterion in acute rheumatic fever. It typically appears on the trunk and proximal extremities and may come and go over days or weeks.

Synonyms:

Erythema Migrans

The expanding annular skin lesion of early Lyme disease, appearing days to weeks after infection with *Borrelia* transmitted by Ixodes ticks. It may be uniformly erythematous rather than a classic bull's-eye lesion and is usually diagnosed clinically.

Synonyms:

Erythema Multiforme

An acute, self-limited immune-mediated reaction, most commonly triggered by herpes simplex virus (90 percent of cases) and *Mycoplasma pneumoniae*. It presents as target lesions (iris lesions with three zones: central duskeness, middle pale edematous ring, outer erythematous halo) on extremities.

Synonyms:

Erythema Nodosum

The most common form of panniculitis, characterized by painful, erythematous, tender nodules and plaques on the bilateral shins, representing an inflammatory reaction of the subcutaneous fat.

Synonyms:

Erythrasma

A superficial infection caused by *Corynebacterium minutissimum* in moist intertriginous areas, producing well-demarcated reddish-brown patches with fine scale and sometimes mild pruritus. Wood-lamp examination may show coral-red fluorescence.

Synonyms:

Erythrocyte

A mature red blood cell specialized to transport oxygen and carbon dioxide through the circulation. Its biconcave, anucleate form maximizes surface area

and flexibility; haemoglobin provides the principal oxygen-binding capacity.

Synonyms:

Erythrocyte Sedimentation Rate

A non-specific inflammatory marker measuring the rate at which erythrocytes settle in 1 hour. Normals: males age/2, females (age+10)/2. Markedly elevated >100 mm/hr: suggests infection (endocarditis), autoimmune (giant cell arteritis, polymyalgia rheumatica, SLE, RA), malignancy (multiple myeloma), and chronic kidney disease.

Synonyms:

Erythrocytosis

An increased red-cell mass, usually reflected by elevated haemoglobin and haematocrit. It may be relative because of reduced plasma volume or absolute because of increased erythropoiesis, which can be primary from a marrow disorder or secondary to hypoxia, erythropoietin production, or other causes.

Synonyms:

Erythrodermic psoriasis

A severe, life-threatening variant of psoriasis characterised by widespread erythema and scaling involving more than 90% of the body surface area, often with systemic symptoms including fever, chills, and hemodynamic instability.

Synonyms:

Erythromelalgia

Episodic burning pain, redness, and warmth of the extremities triggered by warmth or exercise and relieved by cooling, caused by arteriolar inflammation and platelet-mediated microvascular occlusion.

Synonyms:

Erythromycin Ophthalmic Prophylaxis

Application of ophthalmic erythromycin to a newborn soon after birth to reduce the risk of gonococcal ophthalmia neonatorum. Use, timing, and alternatives depend on local policy, availability, and the mother's infection-risk assessment.

Synonyms:

Erythroplakia

A persistent red patch of mucosa, especially in the mouth, that may represent a premalignant or malignant lesion and requires clinical evaluation, often including biopsy.

Synonyms:

Erythropoiesis

The process by which haematopoietic stem and progenitor cells develop into mature red blood cells. It occurs primarily in adult bone marrow and is regulated chiefly by erythropoietin in response to tissue oxygenation; maturation requires iron, vitamin B12, folate, and appropriate marrow function.

Synonyms:

Erythropoiesis-Stimulating Agents

Medicines such as epoetin alfa and darbepoetin alfa that stimulate red-cell production, often used for selected forms of anemia in chronic kidney disease or cancer treatment. Use requires appropriate assessment of iron status, risks, and treatment targets.

Synonyms:

Erythropoietin

A glycoprotein hormone (EPO) that regulates erythropoiesis—the production of red blood cells in the bone marrow. Produced primarily by interstitial peritubular cells in the kidney (90%) and hepatocytes (10%) in response to tissue hypoxia.

Synonyms:

ESBL

Extended-spectrum beta-lactamase, enzymes that hydrolyse penicillins, cephalosporins, and monobactams. ESBLs are common in Enterobacteriaceae, particularly *Klebsiella pneumoniae* and *E. coli*. ESBL production confers resistance to most beta-lactam antibiotics except carbapenems.

Synonyms:

ESBL-producing organisms

Bacteria that produce extended-spectrum beta-lactamases (ESBLs), enzymes that hydrolyze penicillins, cephalosporins, and monobactams. ESBLs

are common in Enterobacteriaceae, particularly *Klebsiella pneumoniae* and *E. coli*. ESBL production confers resistance to most beta-lactam antibiotics except carbapenems.

Synonyms:

Escherichia coli

A gram-negative bacterium that normally lives in the intestine but can cause urinary, intestinal, bloodstream, and other infections. Different strains produce different clinical syndromes, including traveler's diarrhea, bloody diarrhea, and hemolytic uremic syndrome.

Synonyms:

Escherichia coli O157:H7 Infection

Infection with a Shiga-toxin-producing strain of *E. coli*, usually acquired from contaminated food, water, or contact with infected animals or people. It commonly causes severe abdominal cramps and bloody diarrhea and can lead to hemolytic uremic syndrome, especially in children. Medical advice is important; antibiotics and antidiarrheal medicines may be inappropriate in suspected cases.

Synonyms:

ESKD

End-stage kidney disease defined as GFR less than 15 or need for dialysis. Medicare eligibility at GFR less than 15 or on dialysis. Palliative care option for those not wanting renal replacement therapy. Comprehensive advance care planning essential.

Synonyms:

Esophageal Achalasia

Primary esophageal motility disorder characterized by failure of the lower esophageal sphincter to relax during swallowing and absent peristalsis in the distal esophagus, resulting from selective loss of inhibitory neurons in the myenteric plexus.

Synonyms:

Esophageal Atresia

A congenital anomaly where the esophagus ends in a blind pouch, often with a tracheoesophageal

fistula connecting the distal esophagus to the trachea. Presents with drooling, inability to pass a nasogastric tube, and choking with feedings. The 3 Es association: Esophageal atresia, Esophageal anomalies, and Extremity anomalies.

Synonyms:

Esophageal Cancer

Malignant tumor of the esophagus. Squamous cell carcinoma predominates in the upper and middle third (smoking, alcohol); adenocarcinoma of the lower third arises from Barrett esophagus. Presents with progressive dysphagia and weight loss; treatment depends on stage and includes surgery, chemoradiation, and systemic therapy.

Synonyms:

Esophageal Candidiasis

Fungal infection of the esophagus caused by *Candida* species common in immunocompromised patients including those with HIV, organ transplant recipients, and patients on inhaled corticosteroids. Presents with odynophagia and dysphagia. Diagnosed by endoscopy showing white adherent plaques and biopsy confirming fungal hyphae.

Synonyms:

Esophageal Dilation

Endoscopic passage of bougies or balloons to widen esophageal strictures. Used for symptomatic strictures from peptic disease, radiation, caustic injury, or eosinophilic esophagitis. Savary bougies are passed over a guidewire with progressive dilation. Through-the-scope balloons allow controlled radial dilation under direct visualization.

Synonyms:

Esophageal Diverticulum

Outpouching of the esophageal wall classified by location. Zenker diverticulum occurs in the hypopharynx and is the most common esophageal diverticulum. Mid-esophageal diverticula are traction diverticula caused by extrinsic inflammatory disease including tuberculosis and histoplasmosis.

Synonyms:

Esophageal Foreign Body

An object or food bolus lodged in the esophagus, causing difficulty swallowing, pain, drooling, or breathing symptoms. Batteries, sharp objects, complete obstruction, and perforation require urgent assessment and removal.

Synonyms:

Esophageal Intramural Pseudodiverticulosis

Condition characterized by multiple small outpouchings of the esophageal submucosal glands seen on barium swallow as flask-shaped contrast collections oriented longitudinally along the esophagus. The pseudodiverticula are not true diverticula but rather dilated excretory ducts of submucosal glands.

Synonyms:

Esophageal Leukoplakia

White plaques on the esophageal mucosa representing squamous cell hyperplasia with hyperkeratosis. Similar to oral leukoplakia it is considered a potentially premalignant condition. Associated with chronic irritation from smoking, alcohol, and gastroesophageal reflux.

Synonyms:

Esophageal Manometry

Diagnostic test measuring esophageal motor function by recording intraluminal pressures during swallowing. A catheter with pressure sensors is passed through the nose into the stomach and withdrawn to record pressures at multiple levels. High-resolution manometry using closely spaced sensors provides a spatiotemporal color plot.

Synonyms:

Esophageal Perforation

Full-thickness rupture of the esophageal wall, most commonly Boerhaave syndrome from forceful vomiting occurring on the left posterolateral distal esophagus. Iatrogenic perforation during endoscopy is another common cause. Presents with chest pain, subcutaneous emphysema, and mediastinitis.

Synonyms:

Esophageal pH Monitoring

24-hour ambulatory monitoring of esophageal acid exposure. Catheter-based (transnasal pH probe placed 5 cm above LES) or wireless (Bravo capsule endoscopically attached to esophageal mucosa). Measures: % time pH <4 (total, upright, supine), DeMeester score (>14.7 abnormal), and symptom-reflux correlation.

Synonyms:

Esophageal Spasm

Esophageal motility disorder characterized by uncoordinated or excessive contractions impairing bolus transport. Diffuse esophageal spasm shows simultaneous contractions on manometry. Jackhammer esophagus features extremely high-amplitude peristaltic contractions.

Synonyms:

Esophageal Stent

Self-expanding metal stent for esophageal obstruction. Palliative for malignancy. Migration, tumor ingrowth common complications.

Synonyms:

Esophageal Stricture

Narrowing of the esophageal lumen from chronic gastroesophageal reflux disease, caustic ingestion, or eosinophilic esophagitis. Presents with progressive dysphagia initially to solids then liquids. Diagnosed by upper endoscopy and barium swallow.

Synonyms:

Esophageal Surgery

Operations on the esophagus or its junction with the stomach, including procedures for reflux, stricture, cancer, perforation, or motility disorders. The operation is selected according to the disease, anatomy, symptoms, and surgical risk.

Synonyms:

Esophageal Varices

Dilated, tortuous submucosal veins in the lower esophagus, most commonly caused by portal hypertension (cirrhosis—hepatic fibrosis with increased

portal venous pressure >10 mmHg). They develop as portosystemic collaterals connecting the portal venous system (left gastric vein) to the systemic venous system (azygos vein).

Synonyms:

Esophageal Web

Thin mucosal fold protruding into the esophageal lumen most commonly in the postcricoid region or upper esophagus. Webs may be asymptomatic or cause dysphagia particularly to solids. Multiple webs can occur in association with iron deficiency anemia as part of Plummer-Vinson syndrome or Paterson-Kelly syndrome.

Synonyms:

Esophagitis

Inflammation of the esophageal mucosa.

Synonyms:

Esophagogastric bypass

Surgical creation of a conduit between the esophagus and stomach to restore gastrointestinal continuity, most commonly performed as part of esophagectomy or to palliate unresectable esophageal malignancy. Techniques include gastric pull-up with esophagogastrostomy and jejunal interposition.

Synonyms:

Esophagogastroduodenoscopy

Upper endoscopy: flexible endoscopic examination of the esophagus, stomach, and duodenum.

Synonyms:

Esophagus

A muscular tube that transports food and liquids from the pharynx (throat) to the stomach.

Synonyms:

Esophagus (esophagus)

A muscular tube approximately 25 cm long connecting the pharynx to the stomach, extending from the cricopharyngeus muscle (at the level of C6) to the gastroesophageal junction (T11).

Synonyms: esophagus

Esotropia

A type of strabismus in which one eye deviates inward (toward the nose). Congenital/infantile esotropia: large-angle, constant, onset before 6 months; requires early surgical correction. Accommodative esotropia: associated with hyperopia, onset age 2-3 years; treatment with corrective glasses improves alignment.

Synonyms:

ESR

Erythrocyte sedimentation rate, a blood test that measures how quickly red blood cells settle in a tube. An elevated result may occur with inflammation but is not specific for a particular disease.

Synonyms:

Essential Hypertension

Persistent elevation of systemic arterial blood pressure without an identifiable single secondary cause. It results from interacting genetic, vascular, renal, metabolic, and environmental factors and increases the risk of stroke, coronary disease, heart failure, kidney disease, and retinopathy.

Synonyms:

Essential Medicines

Drugs that satisfy the priority healthcare needs of a population, as defined by the WHO Model List of Essential Medicines. Selection criteria include efficacy, safety, comparative cost-effectiveness, and suitability for use in resource-limited settings.

Synonyms:

Essential Mixed Cryoglobulinemia

A disorder in which circulating immunoglobulins precipitate in cooler temperatures and deposit in small blood vessels, causing vasculitis. Symptoms may include purpura, joint pain, weakness, nerve problems, kidney disease, and cold sensitivity. Evaluation includes cryoglobulin testing and assessment for infections, autoimmune disease, and lymphoproliferative disorders.

Synonyms:

Essential Nutrient

Nutrient that cannot be synthesized by body, must be obtained from diet. Essential amino acids, fatty acids, vitamins, minerals.

Synonyms:

Essential Thrombocythemia

A chronic myeloproliferative neoplasm characterized by sustained platelet count elevation (greater than 450,000 per microliter) due to clonal megakaryocytic proliferation, with a risk of both thrombotic and hemorrhagic complications.

Synonyms:

Essential Tremor

The most common movement disorder, characterized by a bilateral, symmetrical, postural and kinetic tremor predominantly affecting the upper extremities, with a frequency of four to twelve hertz. It typically begins insidiously in the second or third decade of life and slowly progresses over years.

Synonyms:

Estimated Due Date

The expected date of delivery, calculated as 40 weeks (280 days) from the first day of the last menstrual period. Confirmed or adjusted by first-trimester ultrasound crown-rump length measurement (most accurate ± 5 -7 days). Second-trimester ultrasound is less accurate (± 10 -14 days). Third-trimester is least accurate (± 21 -30 days).

Synonyms:

Estimated Fetal Weight

An ultrasound-derived estimate of fetal weight, calculated using formulas that combine BPD, HC, AC, and FL. The Hadlock formula (using HC, AC, FL) is the most commonly used. Accuracy: ± 10 -15%. Indications: assess fetal growth, determine size for gestational age, and plan delivery. EFW <10th percentile: SGA/IUGR.

Synonyms:

Estimated Glomerular Filtration Rate

An estimate of glomerular filtration derived from

serum creatinine and, depending on the validated equation, age and sex. It is used to stage chronic kidney disease and guide medication dosing, but is less reliable when creatinine is changing rapidly or in unusual body composition.

Synonyms:

Estrogen

A group of steroid hormones involved in reproductive development, menstrual regulation, bone health, and other physiologic functions.

Synonyms:

Ethmoid Bone

Delicate bone between the orbits forming parts of the nasal septum and orbital/nasal roofs. Has the cribriform plate (olfactory nerve filaments), perpendicular plate (superior nasal septum), and labyrinths (nasal conchae, ethmoid air cells). The crista galli provides falx cerebri attachment.

Synonyms:

Ethmoidal Air Cells

Air-filled spaces in the ethmoid bone that form part of the paranasal sinus system.

Synonyms:

Ethmoidal Sinus

The ethmoidal sinuses, also known as ethmoidal air cells, are a collection of multiple small, thin-walled, air-containing cavities within the ethmoid bone between the orbits and above the nasal cavity, and they are divided into anterior and posterior groups based on their drainage sites.

Synonyms: ethmoidal air cells, are a collection of multiple.

Ethylene Glycol

A toxic alcohol found in some antifreeze and industrial products. Ingestion can cause severe metabolic acidosis, neurologic impairment, kidney injury, and death.

Synonyms:

Ethylene Glycol Poisoning

Toxicity from ingestion of ethylene glycol, often found in antifreeze. Its metabolites can cause severe metabolic acidosis, neurologic impairment, kidney injury, and calcium-oxalate deposition. It requires urgent toxicology assessment and antidotal or extracorporeal treatment when indicated.

Synonyms:

Etiology

Cause or origin of disease. Examples: genetic, infectious, environmental, idiopathic.

Synonyms:

Euphoria

An intense feeling of well-being, elation, or happiness, which can be a normal emotional response or a pathologic symptom.

Synonyms:

Eustachian Tube

Auditory/pharyngotympanic tube connecting the middle ear to the nasopharynx, approximately 36 mm long in adults. Cartilaginous medial two-thirds and bony lateral third. Functions: equalizing middle ear/atmospheric pressure, draining middle ear secretions, and protecting from nasopharyngeal pathogens.

Synonyms:

Eustachian-Tube Dysfunction

Failure of the auditory tube to equalize middle-ear pressure or clear secretions. It can cause aural fullness, popping, conductive hearing loss, and retracted tympanic membrane and is common with upper-respiratory infection, allergic rhinitis, or craniofacial disorders.

Synonyms:

Euthanasia

The deliberate act of ending a person's life to relieve suffering, typically performed by a physician. Active euthanasia involves directly administering a lethal substance (e.g., barbiturate overdose followed by neuromuscular blockade) at the patient's explicit

request.

Synonyms:

Euthanasia and Assisted Dying

Ethical and legal concepts regarding intentional termination of life to relieve intractable pain and suffering. Active Euthanasia: deliberate administration of a lethal agent (e.g., lethal dose of barbiturates) by a physician to terminate a patient's life upon their explicit request.

Synonyms:

Euthyroid Sick Syndrome

Abnormal thyroid function tests in patients with non-thyroidal illness (critical illness, starvation, major surgery) without intrinsic thyroid disease. Pattern: low T3 (most common), low T4, reverse T3 elevated, normal or low TSH. The severity correlates with illness severity.

Synonyms:

Event Monitor

A portable device that records heart rhythm intermittently or when activated during symptoms over an extended period.

Synonyms:

Event-Free Survival

The time from randomization or treatment start to a specified event such as disease progression, relapse, or death from any cause.

Synonyms:

Eversion

Turning the sole of the foot laterally, so that it faces away from the median plane.

Synonyms:

Evidence-Based Medicine

Integration of best research evidence with clinical expertise and patient values. Foundation for clinical guidelines.

Synonyms:

Evidence-Based Practice

Integration of best research evidence, clinical expertise, patient values. Rehabilitation guidelines based on systematic reviews.

Synonyms:

Evisceration

Protrusion of viscera through a dehiscence abdominal wound, typically occurring 5-8 days postoperatively and constituting a surgical emergency. Risk factors include obesity, wound infection, and inadequate fascial closure. Management requires sterile coverage, broad-spectrum antibiotics, and emergent operative reclosure.

Synonyms:

Evoked Potentials (VEP, BAER, SSEP)

Electrophysiologic tests measuring the CNS electrical response to specific sensory stimuli. Visual evoked potentials (VEP): checkboard pattern reversal, measures P100 latency; delayed in optic neuritis/MS. Brainstem auditory evoked responses (BAER): click stimuli, waves I-V; delayed in acoustic neuroma, MS, brainstem stroke.

Synonyms: VEP, BAER, SSEP

Ewart Sign

Dullness to percussion, decreased breath sounds, and bronchial breathing at the left infrascapular region caused by compressive atelectasis from a large pericardial effusion. It is a physical examination finding of pericardial effusion. The effusion compresses the adjacent left lower lobe, creating a zone of consolidation.

Synonyms:

Ewing Sarcoma

A highly malignant small round blue cell tumor of bone and soft tissue, representing the second most common primary bone malignancy in children and adolescents (peak age 10-20 years), with a strong predilection for males and Caucasian populations.

Synonyms:

Exacerbation of COPD

An acute worsening of respiratory symptoms beyond normal day-to-day variations, requiring change in medication. It is commonly triggered by respiratory infections (viral, bacterial), air pollution, or non-compliance. Treatment includes increased bronchodilators, systemic corticosteroids, antibiotics if indicated, and oxygen therapy.

Synonyms:

Examination

Systematic assessment of a patient's health status. Components: inspection, palpation, percussion, auscultation (IPPA). General survey: appearance, posture, gait, vital signs. Focused examination based on chief complaint.

Synonyms:

Exanthema

A widespread skin eruption, usually macular or papular, associated with an acute systemic illness. Viral infections are common causes, but drug reactions, bacterial disease, immune disorders, and other systemic conditions may also produce exanthema; fever, mucosal involvement, blistering, or skin pain may indicate a severe process.

Synonyms:

Exanthematous pustulosis

An acute drug-related skin eruption with numerous small, sterile, non-follicular pustules on reddened skin. Fever and neutrophilia may occur. It often improves after the causative medicine is withdrawn, but severe cases require medical assessment.

Synonyms:

Exchange Transfusion

Emergent procedure to rapidly lower severe hyperbilirubinemia by removing small volumes of the infant's blood and replacing with compatible donor blood. Used when phototherapy fails or bilirubin approaches toxic levels (greater than 25 mg/dL in term infants or above exchange threshold on Bhutani curve).

Synonyms:

Excision

The surgical removal of a piece of tissue, an organ, or a lesion. Excisional biopsy removes the entire lesion with a margin of normal tissue, used for definitive diagnosis and treatment of small tumors (suspected melanoma, breast lump, lymph node).

Synonyms:

Excisional Biopsy

Surgical removal of entire lesion. Diagnosis and treatment.

Synonyms:

Excitation-Contraction Coupling

The sequence of events linking an action potential to muscle contraction. In skeletal muscle: the action potential travels down the T-tubule, triggering calcium release from the sarcoplasmic reticulum via ryanodine receptors (calcium-induced calcium release mediated by voltage-gated dihydropyridine receptors).

Synonyms:

Excoriation Disorder

Recurrent skin picking resulting in skin lesions. The individual has made repeated attempts to decrease or stop the skin picking. The skin picking causes clinically significant distress or impairment. It is not attributable to a medical condition or substance. Common sites include face, arms, and hands.

Synonyms:

Excretion

Removal of substance from body. Routes: renal (urine), hepatic (bile), pulmonary (gas), sweat, breast milk. Important for toxicity and drug clearance.

Synonyms:

Exercise Intolerance

Reduced ability to perform physical activity at the expected level because of exertional fatigue, breathlessness, chest discomfort, leg pain, or other symptoms. Causes include cardiac, pulmonary, vascular, metabolic, neuromuscular, haematological, and de-

conditioning states.

Synonyms:

Exercise Stress Test

A noninvasive cardiac diagnostic test that evaluates the cardiovascular response to graded physical exertion, primarily used to diagnose coronary artery disease, assess functional capacity, and guide prognosis.

Synonyms:

Exercise-Induced Arrhythmias

Catecholamine-sensitive ventricular tachycardia and right ventricular outflow tract VT can be triggered by exercise. HCM-related sudden death risk increases during vigorous exercise. Exercise-induced myocardial ischemia may trigger ventricular arrhythmias in CAD.

Synonyms:

Exercise-Induced Asthma

Bronchoconstriction occurring during or shortly after physical exertion, causing cough, wheezing, chest tightness, or shortness of breath. It is associated with airway hyperresponsiveness and may occur in people with or without persistent asthma.

Synonyms:

Exercise-Induced Bronchoconstriction

Airway narrowing during or after exercise, presenting with cough, wheeze, and dyspnea. It occurs in up to 90% of asthmatics and is triggered by heat and water loss from the airways. Prevention includes pre-exercise SABA.

Synonyms:

Exhaled Nitric Oxide

A non-invasive measure of airway eosinophilic inflammation. FeNO > 25 ppb in adults suggests eosinophilic airway inflammation and predicts response to inhaled corticosteroids. It is useful for diagnosing eosinophilic asthma, monitoring treatment response, and differentiating asthma from other causes of cough.

Synonyms:

Exhibitionistic Disorder

A paraphilic disorder involving recurrent, intense sexual arousal from exposing one's genitals to an unsuspecting person. The individual has acted on these urges or they cause marked distress or interpersonal difficulty. Duration $\geq$ 6 months. Onset typically before age 18. Treatment: CBT and SSRIs.

Synonyms:

Exhumation

The lawful disinterment and removal of a buried body or remains for re-examination, re-testing, or identification. Indications: new evidence, suspicion of poisoning or foul play, DNA testing, paternity/maternity testing, exhumation of a wrongly buried body, or repatriation.

Synonyms:

Existential Distress

Emotional suffering related to questions of meaning, identity, freedom, mortality, or purpose, often occurring during serious illness.

Synonyms:

Exit Wound

A skin defect produced where a projectile leaves the body, typically larger, irregular, and stellate, with everted edges, no abrasion ring or soot. Size depends on deformation, yaw, and fragmentation; small non-deformed bullets may produce shored exits, and an exit may be absent if the projectile is retained.

Synonyms:

Exocytosis

Process by which intracellular vesicles fuse with the plasma membrane, releasing their contents into the extracellular space and incorporating membrane proteins/lipids into the cell membrane. The SNARE complex (v-SNARE on vesicles and t-SNARE on target membrane) mediates vesicle docking and fusion.

Synonyms:

Exon

A segment of a DNA or RNA molecule containing information coding for a protein or peptide sequence.

Synonyms:

Exophthalmos

Abnormal protrusion of the eyeball (globe) from the orbit, most commonly caused by thyroid eye disease (Graves ophthalmopathy—an autoimmune condition associated with hyperthyroidism). The proptosis results from inflammation, edema, and fibrosis of the extraocular muscles and proliferation of orbital fat within the fixed bony orbit.

Synonyms:

Exotropia

A type of strabismus in which one eye deviates outward (toward the temple). Intermittent exotropia: most common type, often noticed when tired or daydreaming, can be controlled with fusion. Constant exotropia: requires treatment to prevent amblyopia. Congenital exotropia: rare, requires early evaluation.

Synonyms:

Expectorants

Medications that promote the clearance of mucus from the respiratory tract by increasing sputum volume and reducing its viscosity, facilitating productive cough. The most common expectorant is guaifenesin (glyceryl guaiacolate), which increases respiratory tract fluid secretion and reduces sputum adhesiveness.

Synonyms:

Expectoration

The act of coughing up and spitting out mucus, sputum, or phlegm from the respiratory tract; sputum production.

Synonyms:

Expiratory Grunting

A forced exhalation against a partially closed glottis, creating an audible sound. It is an end-expiratory maneuver that generates intrinsic PEEP, helping

to maintain alveolar recruitment and improve oxygenation. It is commonly seen in children with respiratory distress.

Synonyms:

Explantation

Surgical removal of an implanted device or prosthesis. It may be required for infection, malfunction, intolerance, migration, fracture, tissue injury, or completion of a temporary therapy.

Synonyms:

Exploratory Laparotomy

Open surgical entry into the abdominal cavity to diagnose or treat suspected intra-abdominal pathology, such as hemorrhage, perforation, ischemia, or obstruction, when less invasive evaluation is inadequate or inappropriate.

Synonyms:

Exposure Route

Path by which substance enters body. Routes: inhalation, ingestion, dermal, injection, ocular. Determines absorption rate and toxicity.

Synonyms:

Expressivity

Degree to which a genotype is expressed in phenotype. Variable expressivity: same genotype produces different phenotypic severity in different individuals. Examples: neurofibromatosis type 1, Marfan syndrome.

Synonyms:

Extension

Movement that increases the angle between two bones or straightens a joint.

Synonyms:

Extensively Drug-Resistant TB

TB resistant to isoniazid, rifampin, fluoroquinolones, and at least one injectable agent. Very limited treatment options and poor outcomes.

Synonyms:

Extensor Digitorum

Posterior forearm muscle from lateral epicondyle via the common extensor tendon, dividing into 4 tendons inserting on extensor expansions of digits 2-5. Innervated by posterior interosseous nerve (C7-C8). Extends MCP joints, assists PIP/DIP extension. Lateral epicondylitis (tennis elbow) is an overuse injury of its common origin.

Synonyms:

External Auditory Canal

Tube from the concha to the tympanic membrane, approximately 2.5 cm long in adults. Lateral third is cartilaginous; medial two-thirds are bony (temporal bone). Skin-lined with ceruminous glands (producing cerumen/earwax) and hair follicles. Cerumen has antimicrobial and insect-repellent properties.

Synonyms:

External Beam Radiation Therapy

Radiation delivered from a machine outside the body to a planned treatment area. Techniques include three-dimensional conformal therapy, intensity-modulated therapy, and stereotactic therapy.

Synonyms:

External Cephalic Version

A procedure that uses external pressure to turn a breech or transverse fetus into a head-down position. Timing, eligibility, monitoring, and contraindications depend on gestational age, placental and fetal factors, and the clinical setting.

Synonyms:

External Fixation

Stabilization of a fracture or limb using pins or wires attached to an external frame. It may provide temporary damage-control stabilization or definitive treatment, particularly when soft-tissue injury or contamination limits internal fixation.

Synonyms:

External Iliac Artery

Larger common iliac terminal branch, continuing as the femoral artery below the inguinal ligament.

Gives off inferior epigastric and deep circumflex iliac arteries. Related to external iliac vein medially and ureter anteriorly. Commonly used for cardiac catheterization and endovascular access.

Synonyms:

External Jugular Vein

Formed by posterior auricular and retromandibular vein divisions, crossing the sternocleidomastoid superficially to drain into the subclavian vein. Visible through the skin; used for peripheral IV access when other sites are unavailable. Distended in right heart failure and SVC obstruction. A useful physical examination landmark.

Synonyms:

External Oblique Muscle

Most superficial flat abdominal muscle from outer lower eight ribs to linea alba, pubic tubercle, and iliac crest. Innervated by T7-T12. Contralateral trunk rotation and flexion; compresses abdomen. Forms the inguinal ligament from its free inferior border. Superficial inguinal ring is an opening in its aponeurosis.

Synonyms:

External Resorption

Loss of tooth structure from outside. Inflammatory, replacement, surface, cervical resorption. Treatment depends on type and extent.

Synonyms:

Extracellular Fluid

The fluid outside cells, including plasma and interstitial fluid. Sodium, chloride, and bicarbonate are its principal effective solutes; ECF volume and composition are regulated by the kidneys, cardiovascular system, and endocrine mechanisms.

Synonyms:

Extracellular Matrix

A complex network of proteins and carbohydrates secreted by cells that provides structural and chemical support to surrounding cells.

Synonyms:

Extracellular pathogens

Microorganisms that survive and replicate outside host cells. Extracellular bacteria include Streptococcus, Staphylococcus, and Escherichia coli. These pathogens are typically killed by antibodies and complement. They produce toxins and enzymes to damage host tissues.

Synonyms:

Extracorporeal Membrane Oxygenation

A temporary mechanical circulatory support system that provides cardiac and/or respiratory support. VA-ECMO (veno-arterial) provides both cardiac and respiratory support; VV-ECMO (veno-venous) provides respiratory support only.

Synonyms:

Extracorporeal Shock Wave Lithotripsy

Non-invasive treatment method for urinary calculi that uses focused acoustic shock waves generated outside the body to fragment kidney or ureteral stones into smaller gravel-like pieces (dust/sand) that pass spontaneously in urine.

Synonyms:

Extranodal natural killer T-cell lymphoma

An aggressive lymphoma arising from natural killer cells, most commonly involving the nasal cavity and upper aerodigestive tract. It is strongly associated with Epstein-Barr virus infection.

Synonyms:

Extraocular Muscle Function Testing

Assessment of the six extraocular muscles innervated by CN III (medial rectus: adduction; superior rectus: elevation; inferior rectus: depression; inferior oblique: extorsion), CN IV (superior oblique: intorsion and depression), and CN VI (lateral rectus: abduction).

Synonyms:

Extraocular Muscles

Six muscles controlling eye movement: four rectus (superior, inferior, medial, lateral) and two oblique

(superior, inferior).

Synonyms:

Extrapulmonary manifestation of tuberculosis

Tuberculosis occurring outside the lungs, such as in lymph nodes, bone, kidneys, meninges, or the abdomen.

Synonyms:

Extrapyramidal Symptoms

Drug-induced movement disorders caused by D2 receptor blockade in the nigrostriatal pathway.

Synonyms:

Extrauterine Pregnancy

A pregnancy in which the fertilized ovum implants outside the uterine cavity, an alternative term for ectopic pregnancy. By far the most common site is the fallopian tube (ampulla 70%, isthmus 12%, fimbria 11%, cornual/interstitial 2–4%).

Synonyms:

Extravasation

Leakage of urine outside urinary tract. Causes: trauma, surgery, obstruction. Pseudovesical extravasation (rectus sheath), extraperitoneal, intraperitoneal. Treatment: catheter drainage, surgical repair.

Synonyms:

Extubation Criteria

Clinical findings used to determine whether a patient can safely have an endotracheal tube removed. They include adequate spontaneous breathing, oxygenation, airway protection, cough, neuromuscular recovery, and hemodynamic stability.

Synonyms:

Exudate

An exudate is an inflammatory fluid with high protein content and abundant cells, resulting from increased vascular permeability during inflammation. Exudates are typically caused by bacterial infections, autoimmune diseases, viral infections, or ma-

lignancy.

Synonyms:

Exudative Pleural Effusion

From local pleural disease. Causes include pneumonia, malignancy, TB, and PE. Elevated protein, LDH, and cell count.

Synonyms:

Eye

The organ of vision, a spherical structure (approximately 24 mm diameter) in the bony orbit. Three layers: fibrous (sclera, cornea), vascular/uveal (choroid, ciliary body, iris), neural (retina). Anterior segment: cornea, anterior chamber (aqueous humor), iris/pupil, lens.

Synonyms:

Eye Disorders

The sensory ability to perceive light and interpret visual information processed by the eyes and brain, enabling recognition of shapes, colors, depth, and motion. See Vision.

Synonyms:

Eye Floaters

Spots, threads, or cobweb-like shapes that move across the visual field, usually caused by opacities in the vitreous. Sudden new floaters, flashes, or a curtain-like shadow require urgent evaluation for retinal tear or detachment. See also Floaters.

Synonyms:

Eye Health

The maintenance of optimal vision and prevention of ocular disease through regular eye examinations, protective measures, and timely treatment. Common conditions affecting eye health include refractive errors, cataracts, glaucoma, diabetic retinopathy, and age-related macular degeneration.

Synonyms:

Eye Irritation

Chemical injury to eye. Immediate irrigation with water or saline for 15–20 minutes. Alkali burns more

dangerous than acid. Ophthalmology consultation.

Synonyms:

Eye Pain

Pain in or around the eye caused by surface irritation, infection, trauma, inflammation, glaucoma, or orbital disease. Severe pain with vision loss, photophobia, trauma, or nausea requires urgent assessment.

Synonyms:

Eye Redness

Red discoloration of the eye caused by dilation or inflammation of conjunctival or deeper ocular blood vessels. Causes range from irritation and conjunctivitis to keratitis, uveitis, and acute glaucoma.

Synonyms:

Eye Trauma

Ocular injuries ranging from corneal abrasions to globe rupture. Chemical burns: irrigate immediately with saline or water for 30 minutes. Penetrating injuries: shield eye, no pressure, emergent ophthalmology consultation. Foreign bodies: remove superficial items; embedded objects require surgical removal.

Synonyms:

Ectopia Cordis

A rare congenital defect in which the heart is located partly or completely outside the chest.

Synonyms:

Eisenmenger Complex

Severe pulmonary hypertension caused by a long-standing congenital heart defect with abnormal blood flow between the heart chambers or vessels.

Synonyms:

Electroretinography

A test that records the electrical responses of the retina to light.

Synonyms:

Elliptocytosis

A condition in which many red blood cells have an oval or elliptical shape.

Synonyms:

Encephalomalacia

Softening or loss of brain tissue, usually after an injury, stroke, or infection.

Synonyms:

Encephalomyelitis

Inflammation of the brain and spinal cord.

Synonyms:

Endocardial Fibroelastosis

Abnormal thickening of the inner lining of the heart caused by excess fibrous and elastic tissue, usually in infants or children.

Synonyms:

Endometrial Biopsy

Removal of a small sample of uterine lining for microscopic examination.

Synonyms:

Endomyocardial Fibrosis

Scarring and thickening of the inner heart lining and underlying heart muscle that can impair filling.

Synonyms:

Enophthalmos

Abnormal backward displacement of an eyeball within the eye socket.

Synonyms:

Enterovesical Fistula

An abnormal connection between the intestine and urinary bladder.

Synonyms:

Eosinophilic Granuloma

A localized form of Langerhans cell histiocytosis that commonly affects bone or skin.

Synonyms:

Epiretinal Membrane

A thin layer of scar-like tissue that forms on the surface of the retina and may distort vision.

Synonyms:

Episodic Ataxia

An inherited disorder causing recurrent brief attacks of impaired coordination and balance.

Synonyms:

Erythroblastosis Fetalis

Fetal or newborn red-cell destruction caused by maternal antibodies against fetal blood-cell antigens.

Synonyms:

Esophagectomy

Surgical removal of part or all of the esophagus.

Synonyms:

Esophagram

An imaging study of the esophagus performed after the patient swallows a contrast material.

Synonyms:

Euthyroid Goiter

An enlarged thyroid gland with thyroid-hormone levels that remain within the normal range.

Synonyms:

Evans Syndrome

An autoimmune disorder in which antibodies destroy red blood cells and platelets, separately or together.

Synonyms:

Evoked Potential

An electrical response recorded from the nervous system after a specific sensory stimulus.

Synonyms:

Excessive Tearing

Abnormally increased production or inadequate drainage of tears, causing watery eyes.

Synonyms:

Exfoliative Dermatitis

Widespread redness, scaling, and shedding of the skin.

Synonyms:

Exsanguination

Life-threatening loss of blood from severe bleeding.

Synonyms:

Extrahepatic Cholestasis

Impaired bile flow caused by blockage or disease outside the liver.

Synonyms:

Extrapyramidal Disorder

A movement disorder caused by dysfunction of brain circuits that regulate posture and involuntary movement.

Synonyms:

Effusion

Abnormal accumulation of fluid in a body space, such as a joint, pleural cavity, or pericardial sac.

Synonyms:

Electrophysiologic Testing

A procedure that records or provokes electrical activity in the heart to investigate suspected arrhythmias.

Synonyms:

Embolic Stroke

An ischemic stroke caused by a clot or other material that travels from elsewhere and blocks a brain artery.

Synonyms:

Enteric Nervous System

The network of nerve cells in the gastrointestinal tract that regulates movement, secretion, and local blood flow.

Synonyms:

Epidural Space

The space outside the dura mater around the spinal cord, where local anesthetic may be injected.

Synonyms:

External Otitis

Inflammation or infection of the outer ear canal, commonly called swimmer's ear.

Synonyms: swimmer's ear.

E. Coli Infection

An infection caused by *Escherichia coli* bacteria, which may cause diarrhea, urinary infection, or more serious illness.

Synonyms:

Earwax Blockage

A buildup of earwax that blocks the ear canal and may cause hearing loss, pain, or ringing.

Synonyms:

Egg Allergy

An immune reaction to proteins in eggs that may cause skin, digestive, or breathing symptoms.

Synonyms:

Exercise Headaches

Headaches triggered by strenuous physical activity.

Synonyms:

Eye Melanoma

A cancer that develops in the pigment-producing cells of the eye.

Synonyms:

Eyestrain

Eye discomfort, fatigue, or blurred vision caused by prolonged visual effort.

Synonyms:

Electrocautery

Use of heat produced by an electrical current to cut tissue or control bleeding.

Synonyms:

Ejaculatory Duct

A duct formed by the union of the vas deferens and the duct of a seminal vesicle. It passes through the prostate and opens into the urethra.

Synonyms:

Electronystagmography

A test that records eye movements to evaluate nystagmus and vestibular function.

Synonyms:

Electrophoresis

A laboratory method that separates charged molecules according to their movement through a medium in an electric field.

Synonyms:

Elevator

A surgical instrument used to lift, separate, or strip tissue, bone, or a tooth from surrounding structures.

Synonyms:

Emmetropia

The normal refractive state of the eye, in which parallel light focuses on the retina without accommodation.

Synonyms:

Endocrine System

The network of glands and hormone-producing tissues that regulate body functions by releasing hormones into the blood.

Synonyms:

Endocrine Tissues

Cells or groups of cells that produce and release hormones into the blood or nearby tissues.

Synonyms:

Endometrial Ablation

A procedure that destroys the uterine lining to reduce heavy menstrual bleeding. It is not a method of contraception and is not intended for people planning pregnancy.

Synonyms:

Enucleation

Surgical removal of the eyeball while leaving the eyelid, eye muscles, and most orbital tissues in place.

Synonyms:

Epicondyle

A bony projection near a condyle that provides attachment for muscles and ligaments.

Synonyms:

Epigastrium

The upper middle region of the abdomen, located between the right and left hypochondriac regions.

Synonyms:

Equilibrium Receptors

Sensory receptors in the vestibular system that detect head position and movement and help maintain balance.

Synonyms:

Erosive Esophagitis

Inflammation of the esophagus with visible breaks or erosions in its lining, most commonly caused by gastroesophageal reflux.

Synonyms:

Escharotomy

An incision through rigid eschar from a deep circumferential burn to relieve constriction and restore chest expansion or blood flow.

Synonyms:

Expiration

The movement of air out of the lungs, usually caused by relaxation of the diaphragm and elastic recoil of the lungs.

Synonyms:

Excoriation

A superficial loss of skin caused by scratching, rubbing, or another form of mechanical trauma.

Synonyms:

Extubation

Removal of an endotracheal tube after the patient can maintain an open airway and adequate spontaneous breathing.

Synonyms:

Ependyma

A specialized epithelial lining of the brain ventricles and spinal-cord central canal that is involved in cerebrospinal-fluid circulation and, in some regions, production.

Synonyms:

Erythroderma

Generalized redness and scaling of most or all of the skin, which can result from inflammatory skin disease, drug reactions, or malignancy and may cause serious fluid and temperature disturbances.

Synonyms:

Eschar

Dry, dark, devitalized tissue that forms over a wound, burn, pressure injury, or area of necrosis.

Synonyms:

Eales Disease

An uncommon retinal vasculopathy characterized by inflammation and obliteration of peripheral retinal veins, often followed by retinal ischemia, neovascularization, and recurrent vitreous hemorrhage.

Synonyms:

Ecthyma

A deeper form of impetigo in which infection extends through the epidermis into the dermis, producing punched-out ulcers covered by thick crusts, usually on the legs.

Synonyms:

Efferent Neuron

A nerve cell that carries motor or autonomic signals away from the central nervous system to muscles, glands, or other target tissues.

Synonyms:

Erdheim-Chester Disease

A rare non-Langerhans-cell histiocytosis caused by clonal histiocyte proliferation, commonly producing symmetrical long-bone pain or sclerosis and possible cardiovascular, renal, neurologic, or retroperitoneal involvement.

Synonyms:

Edentulousness

Complete or partial absence of natural teeth. It may result from dental disease, trauma, developmental abnormalities, or tooth extraction and can impair chewing, speech, and oral function.

Synonyms:

Eustachian Tube Dysfunction

Failure of the eustachian tube to open or close normally, causing ear pressure, muffled hearing, pain, or recurrent middle-ear fluid. It may follow an upper-respiratory infection, allergy, or rapid pressure changes.

Synonyms:

Exocrine Pancreatic Insufficiency

Inadequate secretion of pancreatic digestive enzymes, causing maldigestion and malabsorption, often with weight loss, bloating, and greasy or difficult-to-flush stools. Common causes include chronic pancreatitis, cystic fibrosis, and pancreatic surgery.

Synonyms:

Ectasia

Abnormal widening or dilation of a tubular structure, vessel, duct, or organ. The term is used in conditions such as vascular ectasia and duct ectasia.

Synonyms:

Emaciation

Extreme wasting and loss of body mass, especially muscle and fat, caused by severe illness, malnutrition, or other chronic conditions.

Synonyms:

Embolus

A detached intravascular mass, such as a blood clot, fat droplet, air bubble, or other material, that travels through the circulation and may obstruct a vessel.

Synonyms:

Embryology

The study of development from fertilization through the embryonic and fetal stages, including the formation of organs and body structures.

Synonyms:

Emollient

A substance applied to the skin to soften and moisturize it by reducing water loss and improving the skin barrier. Emollients are commonly used in eczema and dry skin.

Synonyms:

Endarterectomy

Surgical removal of atherosclerotic plaque and diseased inner lining from an artery to improve blood flow, commonly performed in the carotid arteries.

Synonyms:

Enteropathy

A disease or disorder affecting the intestine. Causes include infection, inflammation, gluten sensitivity, impaired blood flow, toxins, and inherited conditions.

Synonyms:

Exhalation

The process of breathing air out of the lungs. It is normally passive at rest but becomes active during exercise or respiratory distress.

Synonyms:

Extrapyramidal System

Neural pathways and brain structures, including the basal ganglia, that help regulate movement, muscle tone, posture, and automatic motor activity.

Synonyms:

Extremity

A limb of the body, including the upper extremity (shoulder, arm, forearm, wrist, and hand) or lower extremity (hip, thigh, leg, ankle, and foot).

Synonyms:

Extrinsic Allergic Alveolitis (Hypersensitivity Pneumonitis)

An immune-mediated inflammation of the lung caused by repeated inhalation of sensitizing organic particles, such as moulds, animal proteins, or contaminated agricultural dust.

Synonyms: Hypersensitivity Pneumonitis

Eyeball (Globe)

The roughly spherical organ of vision, consisting of the cornea, sclera, uveal tract, lens, retina, and internal chambers and fluids.

Synonyms: Globe

Eyebrow

A strip of hair above the orbit that helps protect the eye from sweat, moisture, and particles.

Synonyms:

Eye Drops

Liquid preparations instilled into the conjunctival sac for diagnosis, lubrication, or treatment of eye conditions. They should be used according to clinical or product instructions.

Synonyms:

Eyelashes

Short, curved hairs arising from the eyelid margins that help protect the ocular surface from foreign particles and excessive light.

Synonyms:

Eyelids

Mobile folds of skin and muscle that protect the eyes, spread the tear film, and help regulate the amount of light entering the eye.

Synonyms:

Eyesight (Vision)

The ability to perceive and interpret light, form, color, movement, and detail through the eyes and visual pathways of the nervous system.

Synonyms: Vision

Ear cartilage

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Ear disease

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Ear neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Early diagnosis

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Early endosome

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Eat

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ebolavirus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Eccentrocyte count

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or

research context. **Synonyms:**

Eccrine porocarcinoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Eccrine poroma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ecdysone

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Echinacea

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Echinococcus multilocularis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Echinococcus vogeli

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Echinodermata

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Echinomycin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate

use depend on the specific agent and clinical context. **Synonyms:**

Echolocation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Echothiophate iodide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ecology

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Econazole

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Ecotoxicology

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ectomesenchymoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ectopic tissue

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Ectoplasm

A biomedical dictionary term used in medical, bio-

logical, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ectromelia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eculizumab

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Edatrexate

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Edema trunk

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Edetic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Edodekin alfa

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Edotecarin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Edrecolomab

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Educational psychology

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Edwardsiella

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Edwardsiella hoshinae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Edwardsiella ictaluri

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Edwardsiella tarda

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Efalizumab

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Efaproxiral

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Efavirenz

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Effectiveness

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Efferent nerve

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Efferent pathway

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eflornithine

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Egg shell

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eggerthella

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Eggerthella lenta

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Ehrlichia

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Eicosadienoic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Eicosanoid

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eicosanoid degradation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eicosanoid metabolism

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eicosanoid receptor

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Eicosapentaenoic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Eicosatetraenoic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Eicosatrienoic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Eicosenoic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment.

Synonyms:

Eikenella

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Eikenella corrodens

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Elastic fiber

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Elastic tissue

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Elasticity

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Elastics

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Elastofibroma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Elastomer

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Elastosis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Elbow

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Elbow extensor

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Elbow flexors

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Elective abortion

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Electric impedance

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Electric organ

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Electrical alternans

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Electrical conductance

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Electrical synapse

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Electroacupuncture

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Electrocardiogram lead

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Electrocardiography

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Electrochemistry

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Electrochemotherapy

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Electrocorticography

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Electrode

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Electrodesiccation

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Electrofocusing

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Electron

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Electron microscopy

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Electron transport

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Electrooculography

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention,

measurement, or patient-related concept. **Synonyms:**

Electro-osmosis

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Electrophysiology

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Electroporation

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Element

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Elesclomol sodium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eligibility determination

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Eligible

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Elinafide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Elixir

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Elizabethkingia

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Elliptocyte count

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Elongin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Elotuzumab

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Eltrombopag

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eltrombopag olamine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or

research context. **Synonyms:**

Embryo neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Embryogenesis

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Embryonal carcinoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Embryonal rhabdomyosarcoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Embryonic

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Embryonic cell

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Embryonic induction

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Embryonic mosaic

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Embryonic stage

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Emergency care

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Emergency treatment

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Emitefur

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Emodin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Emotion

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Emotional adjustment

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Emotional dependency

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Empathy

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Empedobacter

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Empedobacter brevis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Empedobacter falsenii

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Employee

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Employment status

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Emtricitabine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Emulsion

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Enalapril

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Enalaprilat

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Enamel organ

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Enanthema

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Encephalitis virus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Encephalitozoon

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enchondroma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Enchondromatosis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Enclomiphene

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

End point

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endarteritis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endemic diseases

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Endemic goiter

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endocannabinoid

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endocervical

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endocrine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endocrine disease

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Endocrine finding

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endocrine function

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endocrine gland

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Endocrine neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Endocrinologists

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endodontics

A biomedical dictionary term used in medical, bio-

logical, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endodontist

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endogenous opiates

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endogenous retrovirus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Endolimax

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endolimax nana

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endolymph

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endometrial

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endometrial adenocarcinoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Endometrial carcinoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Endometrial disorder

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Endometrial neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Endometrial polyp

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endopeptidase

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endoribonuclease

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endosome

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endothelial cell

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Endothelin

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Endothelium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Endotoxin

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Energy increased

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Energy intake

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Energy metabolism

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Enflurane

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Enfuvirtide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Enhanced pause

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eniluracil

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Enoxaparin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Enrollment

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Entamoeba

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Entamoeba coli

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Entamoeba hartmanni

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Entamoeba polecki

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enteric bacteria

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterobacter

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterobacter aerogenes

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterobacter asburiae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterobacter cancerogenus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterobacter cloacae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterobacter hormaechei

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterobacteriaceae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterobius

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Enterococcaceae

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Enterococcus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterococcus avium

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterococcus dispar

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterococcus durans

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterococcus faecalis

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterococcus faecium

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion.

fication and clinical discussion. **Synonyms:**

Enterococcus gallinarum

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterococcus hirae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterococcus malodoratus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterococcus mundtii

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterococcus pseudoavium

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterococcus raffinosus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterococcus thailandicus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Enterocyte

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Enterocytozoon

A biomedical dictionary term used in medical, bio-

logical, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Enteroendocrine cell

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Enteromonas hominis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Enterostomy procedure

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Enterotoxin

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Enterovirus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Entinostat

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Entorhinal cortex

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Enucleation procedure

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Environment

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Environmental exposure

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Environmental illness

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Enzyme activity

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Enzyme deficiency

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Enzyme inhibitor

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Enzyme precursors

A biological molecule, chemical substance, cellular component, or physiologic concept involved in

body processes, laboratory medicine, or treatment. **Synonyms:**

Enzyme therapy

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Eosine yellowish

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ependymal cell

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Ependymal tumor

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ependymblastoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ephedrine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ephrins

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epiblast

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epichlorohydrin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epidemiologic method

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epidemiologic studies

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epidemiologist

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epidermal acanthosis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epidermal cells

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Epidermal growth factor

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epidermophyton

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Epidermophyton floccosum

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Epididymal neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Epidural neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Epigallocatechin gallate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epigastric

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epigastric artery

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Epigenome

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or

research context. **Synonyms:**

Epigenomics

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epipodophyllotoxin

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Epirubicin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Epirubicin hydrochloride

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Epithalamic

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epithelial

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epithelial cyst

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Epithelioid cell

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Epithelioma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epitope

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Epitope mapping

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Eplerenone

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Epoetin alfa

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Epoetin beta

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Epoprostenol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epothilon

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epothilone B

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epothilone D

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epoxide hydrolase

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Epoxy compounds

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Eptifibatide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Equilin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Equine morbillivirus

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Equinovarus deformity

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Equipment safety

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Equivalence trial

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

ErbB receptors

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Erbium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ergocalciferol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ergolines

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or

research context. **Synonyms:**

Ergosterol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ergotamine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eribulin mesylate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Erlotinib hydrochloride

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Erosion lesion

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Erratic results

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ertapenem

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Erucic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Erucic acids

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Eryptosis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Erysipelothrix

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Erythroblast

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Erythrocyte membrane

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Erythrodysplasia

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Erythroid hyperplasia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Erythroleukoplakia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Erythromycin

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Erythromycin estolate

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Erythroplasia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Erythropoietin receptor

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Erythrosine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Escape reaction

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Escherichia

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Escherichia albertii

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Escherichia blattae

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Escherichia coli infection

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Escherichia fergusonii

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Escherichia hermannii

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Escherichia vulneris

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Escitalopram

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Esomeprazole

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Esomeprazole magnesium

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Esophageal

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Esophageal bleeding

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Esophageal carcinoma

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Esophageal duplication

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Esophageal fistula

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Esophageal infection

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Esophageal necrosis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Esophageal stenosis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Esophageal ulceration

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Esophagogastric junction

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Esophagoscope

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Esophagoscopy

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Esophagus disease

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Esophagus neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Essiac

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Estazolam

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ester

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Esterase

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Esterification

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Esthesia

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Esthesiometer

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Estivation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Estramustine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Estriol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Estrogen inhibitor

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Estrone

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Estrous cycle

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Estrus

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eszopiclone

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Etanercept

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Etanidazole

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Etaracizumab

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

Ethacrynic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Ethambutol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethane

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethanol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethanol metabolism

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethanolamine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethchlorvynol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethers

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethics

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethidium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethinyl estradiol

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethiodized oil

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethion

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethionamide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethmocephaly

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethmoid sinus

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethmoid sinusitis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethnicity

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethoglucid

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethosuximide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethoxzolamide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethyl ether

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethyl methanesulfonate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethylene

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethylene chlorohydrin

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethylene dibromide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethylene oxide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethylenethiourea

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethylnitrosourea

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ethynodiol diacetate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Etidronic acid

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Etilefrine

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Etiocholanolone

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Etioplast

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Etodolac

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Etomidate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Etoposide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Etoposide phosphate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Etoricoxib

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Etretinate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eubacterium

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Eubacterium limosum

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Eubacterium rectale

A named microorganism, microbial group, or

infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Eubacterium ventriosum

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Eucalyptus oil

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Euchromatin

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Euglena

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eukaryote

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eukaryotic cell

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Europium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eurotium

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Everolimus

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Evolution

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ewingella

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ewingella americana

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Ewings sarcoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exacerbation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Examination table

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its pre-

cise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exatecan mesylate

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Excessive bruising

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Excision biopsy

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Excitatory synapse

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Executive function

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exemestane

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exenatide

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exencephaly

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exenteration

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exercise tolerance

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exfoliation syndrome

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Exhibitionism

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exiguobacterium

A named microorganism, microbial group, or infectious-disease term used in biomedical classification and clinical discussion. **Synonyms:**

Exocervix

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Exocrine gland

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Exocrine pancreas

A biomedical dictionary term used in medical, bio-

logical, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exodeoxyribonuclease

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exonuclease

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exopeptidase

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exophiala

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exophiala dermatitidis

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Expectorant

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Experience

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Expiratory time

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Exploratory behavior

A clinical, diagnostic, therapeutic, or health-care term used to describe an assessment, intervention, measurement, or patient-related concept. **Synonyms:**

Exposure

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Exserohilum

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Extent

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

External capsule

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

External ear

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

External nose

A biological molecule, chemical substance, cellular component, or physiologic concept involved in

body processes, laboratory medicine, or treatment. **Synonyms:**

Extraamniotic

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Extracellular exosome

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Extracellular region

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Extracellular space

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Extracellular vesicle

A biological molecule, chemical substance, cellular component, or physiologic concept involved in body processes, laboratory medicine, or treatment. **Synonyms:**

Extracorporeal circulation

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Extraction

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Extranodal

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Extraocular

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Extraocular muscle

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Extrapleural pneumonectomy

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Extraskkeletal osteosarcoma

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Extrinsic

A biomedical dictionary term used in medical, biological, laboratory, or health-care contexts; its precise meaning depends on the surrounding clinical or research context. **Synonyms:**

Eye development

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Eye disorder

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Eye hemorrhage

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Eye infection

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Eye injury

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Eye movement

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Eye neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Eye prosthesis

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Eyeglass

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Eyelash

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Eyelid

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Eyelid coloboma

An anatomic, physiologic, or clinical term referring to a body structure or function. **Synonyms:**

Eyelid disorder

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Eyelid neoplasm

A medical condition or disease-related term describing a disorder, symptom complex, or clinical finding; evaluation and management depend on its cause and severity. **Synonyms:**

Ezetimibe

A medicinal, pharmacologic, or chemical substance studied or used in health care; its effects and appropriate use depend on the specific agent and clinical context. **Synonyms:**

F

Ciguatera Poisoning

Food poisoning caused by ciguatoxins accumulated in reef fish, especially large tropical predatory fish. It may cause nausea, vomiting, diarrhea, numbness, tingling, temperature-reversal sensations, itching, and weakness. Treatment is supportive; severe neurologic or cardiovascular symptoms require urgent medical care.

Synonyms:

False Negative

A test result that indicates a condition is absent when it is actually present.

Synonyms:

Familial Combined Hyperlipidemia

An inherited disorder causing elevated cholesterol, triglycerides, or both.

Synonyms:

Fasting Lipid Profile

A blood test measuring cholesterol and triglyceride levels, usually after fasting.

Synonyms: Lipid panel

Fast-Twitch Fiber

A skeletal-muscle fiber specialized for rapid, powerful contractions.

Synonyms: Type II muscle fiber

Fat

A nutrient and energy source composed mainly of lipids.

Synonyms: Lipid

Fatty Acids

Organic components of fats used for energy and for building cell membranes and signaling molecules.

Synonyms:

Fatty Streak

An early atherosclerotic lesion formed by lipid accumulation in an artery wall.

Synonyms:

Fibrin

A threadlike protein that forms the structural mesh of a blood clot.

Synonyms:

Fibroblast

A connective-tissue cell that produces collagen and other extracellular-matrix components.

Synonyms:

Fibroid

A benign smooth-muscle tumor, most often arising in the uterus.

Synonyms: Uterine leiomyoma

Fibrous Plaque

A raised arterial lesion containing fibrous tissue and lipid that can narrow the vessel.

Synonyms: Atherosclerotic plaque

Finasteride

A 5-alpha-reductase inhibitor used for benign prostatic enlargement and some types of hair loss.

Synonyms:

Fixed Joint

A joint with little or no movement, often because bones are joined by dense tissue.

Synonyms: Synarthrosis

Flaccid

Relaxed, soft, or lacking normal muscle tone or erection.

Synonyms:

Flare

A temporary worsening or recurrence of symptoms.

Synonyms: Exacerbation

Flatus

Gas passed through the anus.

Synonyms: Intestinal gas

Flavonoids

Plant polyphenols found in many fruits, vegetables, teas, and other foods.

Synonyms:

Flex

To bend a joint and decrease the angle between its bones.

Synonyms: Flexion

Flight-or-Fight Response

The coordinated stress response that prepares the body to confront or escape a perceived threat.

Synonyms: Fight-or-flight response; stress response

Flow

A state of highly focused, effortless involvement in an activity, often with reduced awareness of time.

Synonyms:

Foam Cells

Lipid-filled cells, usually macrophages, that contribute to atherosclerotic plaque.

Synonyms:

Focal Neuropathy

Damage to a single peripheral nerve or a small group of nerves.

Synonyms: Mononeuropathy

Focus Words

Calming words or phrases used to anchor attention during relaxation or stress-management exercises.

Synonyms:

Follicle

A small sac or tissue structure, such as a hair follicle or ovarian follicle.

Synonyms:

Follicle-Stimulating Hormone

A pituitary hormone that supports ovarian follicle development and sperm production.

Synonyms: FSH

Follicular Unit

A natural hair-growth unit containing one or more follicles and associated structures.

Synonyms:

Follicular Unit Transplantation

Hair-restoration surgery that transplants individual follicular units to thinning areas.

Synonyms: FUT

Food Allergies

Immune reactions to particular food proteins that can cause symptoms ranging from hives to anaphylaxis.

Synonyms: Food allergy

Forehead Lift

Cosmetic surgery that reduces forehead lines and raises drooping eyebrows.

Synonyms: Brow lift

FRAX Tool

A calculator that estimates a person's ten-year probability of major osteoporotic or hip fracture.

Synonyms: FRAX fracture-risk calculator

Free Fragment

A piece of an intervertebral disk that has separated from the main disk.

Synonyms: Sequestered disk fragment

Frequency Range

The span from the lowest to highest sound frequencies amplified by a hearing aid.

Synonyms:

Frequency Response

The amount of amplification a hearing aid provides across different sound frequencies.

Synonyms:

Fructose

A simple sugar found naturally in fruit, honey, and some syrups.

Synonyms: Fruit sugar

FSH

Follicle-stimulating hormone, a pituitary hormone involved in ovarian follicle development and sperm production.

Synonyms: Follicle-stimulating hormone

Functional Gastrointestinal Disorders

Digestive symptoms caused by altered gut function without an evident structural disease or infection.

Synonyms: Disorders of gut-brain interaction

Functional Incontinence

Involuntary urine leakage because a person cannot reach or use the toilet in time despite recognizing the need to void.

Synonyms:

Fabry Disease

An X-linked lysosomal storage disorder caused by deficient alpha-galactosidase A activity and accumulation of globotriaosylceramide in multiple organs.

Synonyms:

Face Presentation

A fetal presentation in which the neck is hyperextended and the face is the presenting part. The position of the fetal chin influences whether vaginal birth is possible and how labor is managed.

Synonyms:

Facet Joints

Zygapophysial joints connecting adjacent vertebral articular processes. Orientation varies: cervical (45 degrees, allowing rotation), thoracic (coronal, allowing rotation but limiting flexion/extension), lumbar (sagittal, allowing flexion/extension but limiting rotation). Innervated by medial branches of dorsal rami.

Synonyms:

Facial Edema

Swelling caused by excess fluid in the tissues of the face. Causes include allergy, infection, trauma, kidney or heart disease, and venous obstruction. Sudden swelling of the lips, tongue, or throat with breathing difficulty is an emergency.

Synonyms:

Facial Nerve Problems

Disorders affecting cranial nerve VII, which controls facial expression, taste from part of the tongue, and some tear and salivary function. Weakness may result from Bell palsy, stroke, infection, trauma, or a tumor. Sudden facial weakness, especially with arm weakness or speech difficulty, requires emergency assessment.

Synonyms:

Facial Pain

Pain felt in the face that may arise from dental disease, sinus disease, temporomandibular disorders, nerve disorders, infection, or other causes.

Synonyms:

Facial paralysis

Weakness or loss of movement of the facial muscles, usually caused by dysfunction of the facial nerve or its central pathways. Causes include Bell palsy,

stroke, infection, trauma, and tumors.

Synonyms:

Facilitated Diffusion

Passive transport of molecules across cell membranes via specific transmembrane protein carriers or channels, moving substances down their concentration gradient without energy expenditure. Channel-mediated facilitated diffusion uses ion channels (voltage-gated, ligand-gated, or mechanically-gated) for rapid ion movement.

Synonyms:

Factitious Disorder

Presentation of physical or psychological symptoms or imposing injury or disease on another, with the deceptive intention of assuming the sick role. In factitious disorder imposed on self, the individual falsifies signs or symptoms, induces injury or disease, and presents to medical providers.

Synonyms:

Factor H Deficiency

Autosomal recessive (CFH mutation). Factor H regulates alternative pathway (cofactor for factor I, accelerates decay). Uncontrolled alternative pathway activation → C3 consumption → low C3, normal C4. Atypical HUS (aHUS): microangiopathic hemolytic anemia, thrombocytopenia, acute kidney injury.

Synonyms:

Factor I Deficiency

Autosomal recessive (CFI mutation). Factor I cleaves C3b/C4b (cofactor: factor H, MCP, C4BP). Uncontrolled complement → low C3, low C4, low factor H. Recurrent pyogenic infections, aHUS, C3 glomerulopathy, SLE-like disease. Treatment: eculizumab for aHUS/C3G; plasma infusion (contains factor I); IVIG.

Synonyms:

Factor V Deficiency

An inherited or acquired bleeding disorder caused by reduced factor V activity, impairing thrombin gener-

ation and fibrin formation. It may cause easy bruising, nosebleeds, heavy menstrual bleeding, postoperative bleeding, or severe bleeding in rare cases.

Synonyms:

Factor V Leiden

An inherited factor V variant that reduces sensitivity to activated protein C and increases the risk of venous thromboembolism. The risk varies with zygosity, family history, and other factors.

Synonyms:

Factor V Leiden mutation

A factor V variant resistant to activated protein C, causing inherited thrombophilia and increased venous thrombosis risk.

Synonyms:

Factor VII

A blood-clotting protein made mainly in the liver that begins the tissue-factor pathway of coagulation. Inherited deficiency can cause abnormal bleeding, ranging from easy bruising to serious bleeding after injury or procedures.

Synonyms:

Factor VIII

A clotting protein that works with factor IX to help form a stable blood clot. Inherited deficiency causes hemophilia A, characterized by prolonged or spontaneous bleeding into joints, muscles, or other tissues.

Synonyms:

Facultative Anaerobe

A microorganism capable of growth under both aerobic and anaerobic conditions, using respiration when a suitable terminal electron acceptor is present and fermentation or anaerobic respiration when it is not.

Synonyms:

FAD (Flavin Adenine Dinucleotide)

A flavin-derived redox coenzyme, usually bound tightly to enzymes as a prosthetic group. FAD

accepts two hydrogen atoms to form FADH₂, which donates electrons to the respiratory chain through selected dehydrogenases.

Synonyms: Flavin Adenine Dinucleotide

Failed Induction of Labor

The inability to achieve active labor and progressive cervical change after an adequate trial of induction. Definition: no active labor (cervical change) after at least 12–18 hours of oxytocin with ruptured membranes and adequate contractions. Management: the latent phase may be prolonged (up to 24 hours or more).

Synonyms:

Failed Intubation

Inability to successfully place an endotracheal tube after multiple attempts. In the operating room, a failed intubation algorithm is followed: call for help, maintain oxygenation (face mask, supraglottic airway), and decide to wake the patient (if non-emergent) or proceed with a supraglottic airway (if surgery is urgent).

Synonyms:

Failure to Thrive

Inadequate growth in children, defined as weight below the 5th percentile or crossing two major percentile lines on growth charts. Causes include caloric insufficiency (neglect, poor feeding), organic disease (congenital heart disease, renal disease), and psychosocial factors.

Synonyms:

Fainting

A brief loss of consciousness caused by temporary reduction of blood flow to the brain, followed by spontaneous recovery. It is also called syncope.

Synonyms: syncope.

Falciform ligament

A sickle-shaped peritoneal fold that attaches the liver to the anterior abdominal wall and diaphragm, separating the left and right lobes of the liver. It contains the ligamentum teres, the obliterated rem-

nant of the umbilical vein. It may be implicated in rare complications such as internal herniation or necrosis following trauma.

Synonyms:

Fall

Unintended change in position to ground. Major cause of morbidity/mortality in elderly. Risk factors: gait/balance impairment, muscle weakness, visual impairment, polypharmacy, environmental hazards, orthostatic hypotension. Prevention: exercise, medication review, vision correction, home modification, hip protectors.

Synonyms:

Fall Prevention

Measures that reduce the risk of falling, including strength and balance training, medication review, vision assessment, safer footwear, and environmental modification.

Synonyms:

Fall Risk

The likelihood that a person will fall, based on factors such as gait, balance, strength, vision, medicines, orthostatic blood-pressure changes, and the environment.

Synonyms:

Fall Screening

Assessment of a person's history and risk factors for falling to guide prevention and further evaluation.

Synonyms:

Fallopian Tube

The paired muscular tubes (10–12 cm) connecting the ovaries to the uterus, conducting oocytes and sperm and the site of fertilization (usually ampulla). Segments: infundibulum (fimbriae—sweep the oocyte), ampulla, isthmus, intramural.

Synonyms:

Fallopian Tube Cancer

A rare tumor histologically similar to high-grade serous ovarian carcinoma. Presents with a pelvic

mass, pain, or watery discharge; staging and treatment follow the principles of ovarian cancer.

Synonyms:

Fallopian tube torsion

Twisting of the fallopian tube around its pedicle, usually around an underlying mass such as a hydrosalpinx or paraovarian cyst, causing acute pelvic pain and requiring urgent surgical intervention.

Synonyms:

False Ribs

Ribs 8-10 not articulating directly with the sternum; their cartilages join rib 7's cartilage forming the costal margin. Greater mobility and flexibility of the lower thoracic wall. More susceptible to fractures at their angles due to greater length and less rigid attachment.

Synonyms:

False-Negative Result

A negative test result in a person who does have the target condition. Causes include inadequate specimen, early or late testing, low organism or biomarker concentration, prior treatment, technical error, and limited test sensitivity.

Synonyms:

False-Positive Result

A positive test result in a person who does not have the target condition. Causes include limited specificity, cross-reactivity, technical error, contamination, and testing in a low-prevalence population.

Synonyms:

Familial Adenomatous Polyposis

Hereditary condition with hundreds to thousands of adenomas throughout the colon caused by germline APC gene mutations with autosomal dominant inheritance. Polyps develop during the second decade and colorectal cancer occurs by age forty if untreated. Diagnosis is by colonoscopy showing numerous polyps and genetic testing.

Synonyms:

Familial Hypercholesterolemia

An inherited disorder causing persistently high low-density lipoprotein cholesterol, usually because of impaired LDL-receptor pathway function. It increases the risk of premature atherosclerotic disease; diagnosis uses lipid levels, family history, physical findings, and genetic testing when available.

Synonyms:

Familial Hypocalciuric Hypercalcemia

Autosomal dominant condition caused by inactivating mutations in the calcium-sensing receptor gene leading to a higher set point for calcium-mediated PTH suppression. Presents with mild hypercalcemia, inappropriately normal or mildly elevated PTH, and low urinary calcium excretion with calcium-to-creatinine clearance ratio less than 0.01.

Synonyms:

Familial Mediterranean Fever

An autosomal recessive autoinflammatory disorder (MEFV gene mutations, pyrin/inflammasome dysregulation) causing recurrent self-limited febrile attacks with serositis (peritonitis, pleuritis, synovitis), erysipelas-like erythema, lasting 12-72 hours.

Synonyms:

Familial multiple lipomatosis

An autosomal dominant condition characterized by the development of numerous, symmetrically distributed subcutaneous lipomas, typically appearing in early adulthood. The lipomas are encapsulated, painless, and slow-growing, affecting the trunk and extremities. Unlike Dercum disease, they are not painful.

Synonyms:

Family Involvement

The participation of family members or other support persons in care planning, treatment, rehabilitation, and support, with attention to the patient's preferences and caregiver burden.

Synonyms:

Fanconi Anemia

An autosomal recessive (or X-linked) bone marrow failure syndrome caused by mutations in at least 22 FANC genes involved in DNA repair (the FA/BRCA pathway).

Synonyms:

Fanconi Syndrome

Generalized proximal tubular dysfunction with impaired reabsorption of glucose, amino acids, phosphate, uric acid, and bicarbonate. Causes glycosuria, aminoaciduria, phosphaturia, and metabolic acidosis. Associated with proximal RTA. Causes include myeloma, heavy metal toxicity, Wilson disease, and genetic disorders.

Synonyms:

Farmer's Lung

The most common HP, caused by thermophilic actinomycetes in moldy hay. Presents acutely 4–8 hours after exposure with fever, cough, and dyspnea.

Synonyms:

Farsightedness

A refractive error, also called hyperopia, in which light focuses behind the retina when the eye is relaxed. It can cause blurred near vision, eyestrain, and headaches and is corrected with converging lenses or refractive procedures.

Synonyms: hyperopia, in which light focuses behind the retina when.

Fascial Loop

A loop or sling made from a person's tissue or synthetic material and used to support or reinforce a body structure, such as the urethra.

Synonyms:

Fasciitis

Inflammation of fascia, the connective tissue surrounding muscles and other structures. Causes and severity vary widely, from localized plantar fasciitis to serious infectious fasciitis.

Synonyms:

Fascioliasis

A parasitic infection caused by liver flukes of the genus *Fasciola*, acquired by ingesting metacercariae on contaminated aquatic plants or in water. Acute hepatic migration may cause fever, right-upper-quadrant pain, hepatomegaly, and eosinophilia; chronic biliary infection may cause colic, cholangitis, or biliary obstruction.

Synonyms:

Fasciotomy

Surgical incision through the fascia to relieve compartment syndrome. Indications: acute compartment syndrome (trauma, reperfusion, burns, crush injury). Classic signs: pain out of proportion, pain with passive stretch, paresthesias, pallor, pulselessness (late).

Synonyms:

Fast Heart Rate

A heart rate faster than expected for age or activity, usually called tachycardia. It may be a normal response to exercise, fever, pain, or stress, or a sign of arrhythmia or another medical disorder.

Synonyms:

Fasting Guidelines

Preoperative fasting guidelines minimize aspiration risk while reducing patient discomfort and catabolism. Clear liquids (water, clear juice without pulp, black coffee, sports drinks) are allowed up to 2 hours before surgery. Breast milk up to 4 hours. Infant formula up to 6 hours. Light meal (toast and clear liquid) up to 6 hours.

Synonyms:

Fat Embolism

Fat embolism occurs when fat globules enter the bloodstream, typically following long bone fractures, orthopedic surgery, or severe trauma involving adipose tissue.

Synonyms:

Fat Necrosis

A specialized form of necrosis that occurs in adipose

tissue, most commonly following acute pancreatitis when activated pancreatic lipases escape into the surrounding tissues and digest triglycerides in mesenteric or subcutaneous fat cells. In the breast, it may follow trauma or surgery and can produce a firm lump that mimics malignancy on examination or imaging.

Synonyms:

Fat-Soluble Toxins

Lipophilic toxins stored in fat, prolonged elimination. Examples: organochlorine pesticides, PCBs, dioxins, tetrachlorodiphenylmethane.

Synonyms:

Fatigue

A persistent feeling of tiredness, exhaustion, or lack of energy that is not fully relieved by rest. It may result from sleep disturbance, anemia, infection, endocrine disease, chronic organ disease, medication exposure, or psychological and neurological conditions.

Synonyms:

Fatigue (Cancer)

Persistent tiredness or reduced energy associated with cancer or its treatment. It may result from the disease, anemia, sleep problems, medicines, mood, or other factors.

Synonyms: Cancer

Fatty Acid

A carboxylic acid with a hydrocarbon chain that may be saturated or contain one or more double bonds. Fatty acids provide energy, form membrane lipids, and serve as precursors for signaling molecules.

Synonyms:

Fatty Acid Synthase

Multi-enzyme complex for fatty acid synthesis. Produces palmitate.

Synonyms:

Fatty Liver Disease

A condition characterized by the accumulation of excess fat in liver cells, most commonly associated with obesity, insulin resistance, and metabolic syndrome.

Synonyms:

Febrile

Feverish; having a high body temperature.

Synonyms:

Febrile Neutropenia

Fever in a patient with a sufficiently low absolute neutrophil count to create a high risk of serious infection, generally defined as a single temperature of at least 38.3°C or sustained temperature of at least 38.0°C with ANC below 500/ μ L or expected to fall below that level.

Synonyms:

Febrile Seizure

A seizure occurring in a child usually between 6 months and 5 years of age with fever but without evidence of central nervous system infection or a previous afebrile seizure. Simple febrile seizures are generalized, brief, and nonrecurrent within the same illness; prolonged or focal events require further evaluation.

Synonyms:

Fecal Calprotectin

Neutrophil-derived protein measured in stool as a marker of intestinal inflammation. It is stable in stool at room temperature for up to seven days. Useful for differentiating inflammatory from functional bowel disease and monitoring inflammatory bowel disease activity.

Synonyms:

Fecal Elastase

Pancreatic enzyme measured in stool as a marker of exocrine pancreatic function. Low levels below two hundred micrograms per gram indicate pancreatic insufficiency, and levels below one hundred are consistent with severe exocrine insufficiency.

Synonyms:

Fecal Immunochemical Test

A stool-based screening test that uses antibodies to detect human hemoglobin. A positive result generally requires evaluation of the colon, commonly with colonoscopy. Test intervals and follow-up depend on screening guidance and clinical risk.

Synonyms:

Fecal Impaction

A large, firm mass of stool retained in the rectum or colon that cannot be evacuated normally. It may cause abdominal or rectal pain, distention, overflow diarrhoea, urinary symptoms, nausea, or bowel obstruction and is associated with constipation, immobility, dehydration, neurological disease, and medications.

Synonyms:

Fecal Incontinence

Inability to control bowel movements ranging from minor soiling to complete loss of continence. Causes include sphincter injury from obstetric trauma or surgery, neuropathy from diabetes or spinal cord injury, diarrhea, rectal prolapse, and cognitive impairment.

Synonyms:

Fecal microbiota transplantation

Transfer of processed stool from a screened donor into a patient's gastrointestinal tract to restore microbial diversity. It may be used for selected recurrent *Clostridioides difficile* infection when standard treatment has failed; careful donor screening and clinical supervision are required.

Synonyms:

Fecundity

The biological ability to conceive and produce a live birth. Fecundity is influenced by age (declines significantly after 35), ovarian reserve, tubal patency, uterine factors, and male fertility (sperm count, motility, morphology). Fecundability: the probability of achieving pregnancy in a single menstrual

cycle.

Synonyms:

Federal Register

The official United States publication for rules, proposed rules, notices, and other government actions.

Synonyms:

Feedback Inhibition

Regulatory mechanism where the end product of a metabolic pathway inhibits an earlier enzyme (usually the first committed step). Examples: isoleucine inhibiting threonine deaminase, CTP inhibiting aspartate transcarbamoylase, ATP inhibiting phosphofructokinase. Allows efficient resource utilization and prevents overproduction.

Synonyms:

Feeding Jejunostomy

Surgical or endoscopic placement of a feeding tube into the jejunum for enteral nutrition when upper gastrointestinal access is not feasible. Used in patients with head and neck cancers, esophageal obstruction, or severe dysphagia. Provides long-term nutritional support and avoids the complications of parenteral nutrition.

Synonyms:

Feeding Tube

A flexible tube used to deliver nutrition, fluids, or medicines to the stomach or intestine when oral intake is inadequate or unsafe.

Synonyms:

Felty Syndrome

Triad of rheumatoid arthritis, splenomegaly, and neutropenia (ANC <2000). Complication of long-standing, severe, seropositive RA. Increased infection risk. Treatment: DMARDs (methotrexate, TNF inhibitors), G-CSF for neutropenia, splenectomy in refractory cases.

Synonyms:

Female Genital Mutilation

FGM: the partial or total removal of female external

genitalia for non-medical reasons, a human rights violation practiced in parts of Africa, the Middle East, and Asia (types I-IV). Immediate complications: severe pain, hemorrhage, infection, urinary retention.

Synonyms:

Female Infertility

Failure to achieve pregnancy after a defined period of regular unprotected intercourse, due to factors involving ovulation, the reproductive tract, ovarian reserve, or other causes.

Synonyms:

Female Orgasmic Disorder (Anorgasmia)

Persistent or recurrent delay in, infrequency of, or absence of orgasm that causes personal distress. It may be lifelong or acquired and can have medical, psychological, relationship, medication-related, or other causes.

Synonyms: Anorgasmia

Female Sexual Interest/Arousal Disorder

Persistent or recurrent reduction in sexual interest, thoughts, responsiveness, or arousal that causes personal distress. Causes may include medical conditions, medicines, mood, relationship factors, pain, or other psychological and social factors.

Synonyms:

Femoral Artery

Continues from external iliac through the femoral triangle and adductor canal to become the popliteal artery. Branches: superficial/deep circumflex femoral, deep femoral (profunda femoris), muscular. Palpable in the femoral triangle; most common site for arterial catheterization. Related to femoral vein medially and nerve laterally.

Synonyms:

Femoral Hernia

A hernia in which abdominal contents pass through the femoral ring into the femoral canal, below the inguinal ligament and medial to the femoral vessels. It may become incarcerated or strangulated and

often requires surgical assessment.

Synonyms:

Femoral Nerve

Largest lumbar plexus nerve (L2-L4), passing through psoas major and entering the thigh under the inguinal ligament lateral to the femoral artery. Innervates quadriceps, sartorius, pectineus; sensation to anterior thigh and medial leg (saphenous nerve). Used for knee surgery nerve block anesthesia.

Synonyms:

Femoral Shaft Fractures

Femoral shaft fractures: high energy (MVC, fall from height) or low energy (elderly, pathologic). Winquist-Hansen classification of comminution: I (none), II (butterfly <50% width), III (butterfly >50%), IV (segmental).

Synonyms:

Femoral Triangle

Upper anterior thigh space bounded superiorly by the inguinal ligament, laterally by sartorius, and medially by adductor longus. Contents from lateral to medial: femoral nerve, artery, vein, and deep inguinal lymph nodes. The femoral artery is used for arterial catheterization. The femoral vein is accessed for central venous lines.

Synonyms:

Femoral Vein

The major deep vein of the thigh, continuation of the popliteal vein (through the adductor hiatus), running with the femoral artery in the femoral sheath (medial to artery) through the femoral triangle, becoming the external iliac vein at the inguinal ligament. Receives the great saphenous vein.

Synonyms:

Femur

Longest, heaviest, strongest body bone. Proximal: head, neck, trochanters. Shaft: linea aspera. Distal: condyles, epicondyles. The neck connects head to shaft at approximately 125 degrees. Neck fractures

are common in elderly osteoporotic patients with avascular necrosis risk. Bears entire upper body weight during standing.

Synonyms:

Femur Length

The length of the fetal femur (diaphysis), measured from the greater trochanter to the distal femoral metaphysis. Used for dating (14-26 weeks) and growth assessment. Normal growth: 2 mm per week. Short femur: can be constitutional (especially with short parents), associated with aneuploidy (trisomy 21, skeletal dysplasias), or IUGR.

Synonyms:

Fencer's Pose

The posture produced by the asymmetric tonic neck reflex, with extension of the arm and leg on the side toward which the head is turned and flexion on the opposite side.

Synonyms:

FeNO (Fractional Exhaled Nitric Oxide)

A breath test that estimates type 2, often eosinophilic, airway inflammation. The result is interpreted with symptoms, age, treatment, and other clinical findings.

Synonyms: Fractional Exhaled Nitric Oxide

Fenofibrate

A fibric acid derivative (fibrate) activating PPAR-alpha, increasing HDL and reducing triglycerides, with modest LDL effects. Used for severe hypertriglyceridemia (pancreatitis risk), mixed dyslipidemia, and as an adjunct in residual hypertriglyceridemia.

Synonyms:

Fentanyl Derivatives

Potent synthetic opioids related to fentanyl that may be used for analgesia or anesthesia. Examples include sufentanil, remifentanil, and alfentanil; their potency, duration, dosing, and risks differ, and they require careful monitoring because they can depress breathing.

Synonyms:

Ferritin

Intracellular iron storage protein reflecting total body iron stores. Low ferritin: iron deficiency anemia (<30 ng/mL, absolute; <100 can be consistent with iron deficiency in inflammation).

Synonyms:

Fertilisation

The union of a sperm and an egg (oocyte) to form a zygote, the first cell of a new individual.

Synonyms:

Fertility

The biological capacity to conceive and produce offspring. Fertility depends on the proper functioning of the reproductive system in both males and females, including ovulation, sperm production, and hormonal regulation.

Synonyms:

Fertility Preservation

Measures taken before gonadotoxic cancer therapy to preserve reproductive potential, including embryo or oocyte cryopreservation, sperm banking, and ovarian or testicular tissue cryopreservation.

Synonyms:

FESS

Functional endoscopic sinus surgery is a minimally invasive surgical technique that uses nasal endoscopes and specialized instruments to restore normal sinus drainage and ventilation by removing obstructive tissue and opening blocked sinus ostia, while preserving as much normal sinus mucosa and anatomy as possible.

Synonyms:

Fetal Acid-Base Status

Assessment of fetal oxygenation and acid-base balance, usually using umbilical cord blood gases at birth or other intrapartum information. Interpretation depends on the complete gas panel, sampling site, timing, clinical condition, and laboratory refer-

ence ranges; marked acidemia may indicate impaired oxygenation.

Synonyms:

Fetal Alcohol Spectrum Disorder

A broad spectrum of physical, behavioral, and cognitive impairments caused by prenatal alcohol exposure.

Synonyms:

Fetal Alcohol Syndrome

A collection of birth defects resulting from exposure of the fetus to alcohol during pregnancy, representing the most severe form of fetal alcohol spectrum disorder (FASD).

Synonyms:

Fetal Attitude

The relationship of the fetal body parts to one another, especially the degree of flexion or extension of the head and limbs. The usual attitude is flexion, but deflexed, neutral, or extended attitudes can affect the presenting part and labor.

Synonyms:

Fetal Bradycardia

A fetal heart-rate baseline below 110 beats per minute for at least 10 minutes. Causes include medicines, maternal conditions, fetal conduction disease, hypoxia, cord problems, or placental abruption; persistent or severe bradycardia requires urgent obstetric assessment.

Synonyms:

Fetal Distress

Abnormal fetal status during labor, indicated by abnormal fetal heart rate patterns (late or prolonged decelerations, minimal variability, absent accelerations). May indicate fetal hypoxia, cord compression, or placental insufficiency.

Synonyms:

Fetal Echocardiography

A specialized ultrasound examination of the fetal heart used to assess cardiac structure, rhythm, and

function, including possible congenital heart disease.

Synonyms:

Fetal Growth Restriction

Failure of a fetus to reach its biologic growth potential, often associated with placental insufficiency. It is assessed using serial growth measurements, amniotic fluid, Doppler studies, and fetal surveillance rather than a single estimated-weight threshold alone.

Synonyms:

Fetal Heart Rate

Normal fetal heart rate ranges from 110-160 beats per minute. Monitored via auscultation with a fetoscope, Doppler ultrasound, or continuous electronic fetal monitoring. Baseline FHR is determined over a 10-minute window and is modulated by the autonomic nervous system.

Synonyms:

Fetal Hydrops

Abnormal accumulation of fluid in at least two fetal compartments, such as the skin, chest, abdomen, or around the heart. Causes include fetal anemia, heart disease, infection, chromosome conditions, and immune incompatibility; it requires specialist obstetric evaluation.

Synonyms:

Fetal Hypoxia

Inadequate oxygen available to the fetus before or during birth. It may result from placental problems, reduced maternal oxygenation, cord compression, or prolonged labor. Abnormal fetal heart-rate patterns can indicate risk and require prompt obstetric assessment.

Synonyms:

Fetal Kick Counts (Fetal Movement Counting)

Observation and recording of fetal movements by a pregnant person. A noticeable reduction from the usual pattern should prompt timely obstetric advice.

Synonyms: Fetal Movement Counting

Fetal Lie

The relationship between the long axis of the fetus and that of the pregnant person. It may be longitudinal, transverse, or oblique. A persistent abnormal lie near delivery can affect the mode of birth.

Synonyms:

Fetal Macrosomia

Excessive fetal size, often defined as estimated or birth weight of at least 4,000 or 4,500 g depending on the clinical context. Diabetes, excessive maternal weight gain, and prior macrosomia are risk factors; complications include shoulder dystocia, birth trauma, and cesarean delivery.

Synonyms:

Fetal Presentation

The fetal part that enters the maternal pelvis first. Presentations include cephalic, breech, shoulder, face, brow, and compound forms; the presentation influences labor and delivery planning.

Synonyms:

Fetal Scalp Electrode

A spiral wire electrode placed on the fetal scalp through the cervix to directly record the fetal heart rate. Provides a more accurate FHR signal than external Doppler, particularly in obese patients or when external monitoring is inadequate. Indications: poor-quality external tracing, need for internal monitoring.

Synonyms:

Fetal Scalp Stimulation

A bedside test during labor in which the fetal scalp is gently stimulated during a vaginal examination. A resulting fetal heart-rate acceleration may be reassuring, but the result must be interpreted with the complete fetal monitoring pattern and clinical context.

Synonyms:

Fetal Tachycardia

A sustained fetal heart-rate baseline above 160 beats per minute for at least 10 minutes. Causes may include maternal fever, infection, medicines, fetal hypoxia, or fetal arrhythmia.

Synonyms:

Fetal Ultrasound

Ultrasound imaging during pregnancy. First trimester (6-12 weeks): confirm pregnancy, gestational age (crown-rump length), number of fetuses, viability (heart activity), nuchal translucency (screening for aneuploidy at 11-13 weeks).

Synonyms:

Fetal Viability

The potential for a fetus to survive outside the uterus with medical support. It depends on gestational age, fetal condition, available neonatal care, and other clinical factors; it is not a single fixed point.

Synonyms:

Fetishistic Disorder

A paraphilic disorder characterized by recurrent, intense sexual arousal from either the use of nonliving objects (fetish) or a highly specific focus on nongenital body parts (partialism), lasting ≥ 6 months and causing distress or impairment or involving acting on these urges.

Synonyms:

Fetomaternal Hemorrhage

Transplacental passage of fetal red blood cells into the maternal circulation. Occurs in small amounts during normal pregnancy but can be massive during trauma, placental abruption, or cesarean delivery.

Synonyms:

Fetus

An unborn offspring from the 9th week of gestation (after the embryonic period) until birth. The fetal period is characterized by rapid growth, maturation of organ systems, and increasing complexity of function.

Synonyms:

FEV1/FVC Ratio

Fraction of air exhaled in first second relative to total. < 0.70 post-bronchodilator indicates obstruction. Normal or elevated in restrictive disease.

Synonyms:

Fever

Elevated body temperature (>38 degrees C or 100.4 degrees F). Workup depends on duration, height, and patient factors. Common causes: infections (bacterial, viral), autoimmune disorders, malignancies, drug reactions. Management: antipyretics (acetaminophen, ibuprofen), treat underlying cause.

Synonyms:

Fever of Unknown Origin

Persistent or recurrent fever for which an appropriate initial evaluation has not established a diagnosis.

Synonyms:

Fexofenadine

A second-generation (non-sedating) H1 antihistamine used for allergic rhinitis and chronic urticaria. Peripherally selective with minimal sedation and anticholinergic effects; no significant CNS penetration. Adverse effects: headache, dizziness, and dry mouth.

Synonyms:

Fiber

Indigestible carbohydrate from plant cell walls. Soluble (oats, beans, apples) lowers cholesterol, blood glucose. Insoluble (whole grains, vegetables) adds bulk, prevents constipation. Recommended: 25-30 g/day.

Synonyms:

Fiber Optic

A technology that transmits light through flexible glass or plastic fibers. It is used in medical endoscopes and other imaging or examination devices.

Synonyms:

Fibrin Sealant

A biological adhesive containing fibrinogen and thrombin that forms a fibrin clot when applied to tissue. It may help control bleeding or seal selected surgical surfaces.

Synonyms:

Fibrinogen

A soluble plasma protein, also called coagulation factor I, that is converted to fibrin during blood clot formation. Its concentration may increase with inflammation and decrease with severe liver disease or consumption coagulopathy.

Synonyms: coagulation factor I, that is converted to fibrin during blood clot formation.

Fibrinoid Necrosis

A specialized pattern of vascular necrosis characterized by the deposition of immune complexes, fibrin, and plasma proteins within the walls of blood vessels, creating an amorphous, bright pink, smudgy eosinophilic appearance on hematoxylin and eosin staining.

Synonyms:

Fibrinolysis

The enzymatic breakdown of fibrin within a blood clot, principally mediated by plasmin generated from plasminogen. It limits clot extension and supports restoration of vascular patency; excessive fibrinolysis can cause bleeding, whereas impaired fibrinolysis can promote thrombosis.

Synonyms:

Fibrinous Pericarditis

Inflammation of the pericardium characterized by deposition of fibrin on the pericardial surfaces, giving them a rough, shaggy appearance described as bread-and-butter pericarditis.

Synonyms:

Fibroadenoma

The most common benign tumor of the female breast, a proliferation of stromal and epithelial elements presenting as a firm, rubbery, smooth, mobile,

painless mass, most often in women aged fifteen to thirty. The mass slips easily under the fingers (breast mouse), and ultrasonography shows a well-defined oval hypoechoic lesion.

Synonyms:

Fibrocartilage

Strong cartilage containing dense bundles of type I collagen, adapted to resist compression and tension. It forms intervertebral discs, the pubic symphysis, and menisci.

Synonyms:

Fibrocystic Breast Changes

A benign condition characterized by lumpy, painful breast tissue, most common in women aged 20-50, driven by hormonal fluctuations during the menstrual cycle (estrogen and progesterone). Microscopic features include stromal fibrosis, cyst formation (macrocyts and microcyts), and adenosis (increased glandular tissue).

Synonyms:

Fibrocystic Breasts

Benign breast changes involving fibrosis and cyst formation, often producing lumpy or tender breasts that fluctuate with the menstrual cycle. They are common and are not themselves a premalignant condition.

Synonyms:

Fibroids, Cysts, and Polyps

Benign growths that can develop in the reproductive organs. Fibroids are smooth muscle tumors of the uterus; cysts are fluid-filled sacs that commonly form on the ovaries; and polyps are tissue overgrowths in the endometrium or cervix.

Synonyms:

Fibroma

A benign cardiac tumour composed of fibroblasts and collagen, usually arising within the ventricular myocardium or interventricular septum in children. It may cause ventricular obstruction or clinically important arrhythmias; echocardiography and cardiac

MRI help define its location and extent.

Synonyms:

Fibromuscular Dysplasia

A non-atherosclerotic, non-inflammatory disease of medium-sized arteries, often involving the renal or carotid arteries. Imaging may show alternating narrowing and dilation. Symptoms, vascular complications, and treatment depend on the arteries involved and the individual clinical situation.

Synonyms:

Fibromyalgia

A chronic centralized pain syndrome characterized by widespread musculoskeletal pain (>3 months), fatigue, sleep disturbance, cognitive dysfunction (fibro fog), and somatic symptoms, affecting 2-4% of population (female:male 9:1).

Synonyms:

Fibrosarcoma

A malignant tumor of fibroblasts, a soft tissue sarcoma of adulthood or infancy, arising in deep soft tissues, bones, or paranasal sinuses.

Synonyms:

FibroScan

Non-invasive transient elastography technique measuring liver stiffness to assess hepatic fibrosis. Values correlate with fibrosis stage with higher values indicating more advanced fibrosis. The technique avoids the need for liver biopsy in many patients. Results may be unreliable in obesity, ascites, and narrow intercostal spaces.

Synonyms:

Fibrosing alopecia

A group of primary cicatricial (scarring) alopecias in which chronic inflammation leads to permanent destruction of hair follicles and replacement by fibrous tract remnants. It includes conditions such as lichen planopilaris, frontal fibrosing alopecia, and central centrifugal cicatricial alopecia.

Synonyms:

Fibrosis

The excessive deposition of extracellular matrix components, primarily collagen types I and III, in response to chronic tissue injury. It represents a pathological wound healing response that leads to organ scarring and dysfunction.

Synonyms:

Fibrous Dysplasia

A benign skeletal disorder in which normal bone is replaced by fibro-osseous tissue, producing weakened or misshapen bone. It may affect one bone or multiple bones and can cause pain, deformity, pathological fracture, or nerve compression; imaging often shows a characteristic ground-glass appearance.

Synonyms:

Fibula

Slender lateral leg bone, not weight-bearing, serving for muscle attachment and forming the lateral malleolus. Head provides biceps femoris and lateral collateral ligament attachment; the common peroneal nerve wraps around its neck, vulnerable to injury. Lateral malleolus extends more distally and posteriorly than the medial malleolus.

Synonyms:

Field of View

The extent of anatomy or space captured in one image or measurement.

Synonyms:

Fifth Disease

Erythema infectiosum caused by Parvovirus B19. Characterized by bright red cheeks (slapped cheek appearance) followed by a lacy, reticulated rash on the trunk and extremities. Mild febrile illness in children. Concern in pregnancy (hydrops fetalis risk) and immunocompromised patients (pure red cell aplasia). Diagnosis by serology.

Synonyms:

Filariasis

A group of nematode infections transmitted by mosquitoes and other vectors. The major species

causing lymphatic filariasis are *Wuchereria bancrofti*, *Brugia malayi*, and *Brugia timori*. Adult worms reside in lymphatic vessels causing lymphoedema and elephantiasis.

Synonyms:

Filoviruses

A family of negative-sense RNA viruses that includes Ebola and Marburg viruses. These viruses cause severe hemorrhagic fever with high mortality rates. The virus is transmitted through contact with infected body fluids. The incubation period is 2-21 days. Symptoms include fever, headache, myalgia, and hemorrhage.

Synonyms:

Filter (Vascular)

A device placed in a large vein, usually the inferior vena cava, to trap clots and reduce the risk of pulmonary embolism in selected patients.

Synonyms: Vascular

Filtered Back Projection

An image-reconstruction method that mathematically back-projects measured data after applying a filter. It is fast but can be more sensitive to noise and artifacts than iterative methods.

Synonyms:

Filtration Fraction

The fraction of renal plasma flow that is filtered at the glomerulus, calculated as GFR divided by renal plasma flow (RPF). Normal GFR is approximately 125 mL/min and RPF is approximately 625 mL/min, yielding a filtration fraction of approximately 0.20 (20 percent).

Synonyms:

Fimbriae

The finger-like projections at the distal end of each fallopian tube that sweep over the ovary during ovulation to capture the released egg and guide it into the fallopian tube. The fimbriae are lined with ciliated epithelium that creates a current to draw the egg into the tube.

Synonyms:

Financial Abuse

The improper or unauthorized use of another person's money, property, or financial resources for personal gain.

Synonyms:

Findings

The observations documented during an examination or study, including relevant normal and abnormal features.

Synonyms:

Fine Crackles

High-pitched, brief, discontinuous sounds heard at the end of inspiration, caused by opening of small airways. They are characteristic of ILD, pulmonary fibrosis, and heart failure. They are also called Velcro crackles due to their resemblance to the sound of Velcro being pulled apart.

Synonyms: Velcro crackles due to their resemblance to the sound of.

Fine Motor Skills

The ability to use small muscles (hands/fingers) for precise movements, developing with age: reaching (3-4 months), grasping (5-6 months), pincer grasp (9-12 months), self-feeding (12-18 months), building towers/scribbling (18-24 months), drawing shapes and using utensils (3-5 years), and handwriting.

Synonyms:

Fine Needle Aspiration

A percutaneous sampling technique in which a 22 to 25-gauge needle, often ultrasound- or palpation-guided, aspirates cellular material from a palpable or imaging-detected lesion for cytologic examination, with minimal trauma and lower morbidity than core or open biopsy.

Synonyms:

Finger Dislocation

Displacement of the bones forming a finger joint, usually caused by a direct blow, fall, or forced bend-

ing. Pain, swelling, deformity, and loss of movement are typical. The joint should be assessed for fracture, tendon injury, and neurovascular compromise before reduction and splinting.

Synonyms:

Finkelstein Test

A wrist examination that stresses the tendons on the thumb side of the wrist. Pain near the radial styloid may support a diagnosis of de Quervain tenosynovitis but is not specific by itself.

Synonyms:

First Stage of Labor

The period from the onset of regular labor to complete cervical dilation. It includes a latent phase and an active phase, with progress varying widely among individuals. Assessment considers cervical change, contraction pattern, maternal and fetal condition, and the overall clinical course.

Synonyms:

First Trimester

The period from conception to 12 weeks gestational age. Characterized by rapid embryonic organogenesis, rising hCG levels, and establishment of the placenta. Common symptoms include nausea, vomiting, fatigue, and breast tenderness. Dating ultrasound performed to confirm gestational age. Risk of miscarriage highest during this trimester.

Synonyms:

First-Degree AV Block

A conduction delay in which every atrial impulse reaches the ventricles but with a prolonged PR interval (>0.20 seconds). It is caused by delayed conduction through the AV node or His-Purkinje system. First-degree block is usually benign and asymptomatic.

Synonyms:

First-Degree Burn

A superficial burn affecting only the epidermis: erythema, pain, and dryness without blistering (e.g., mild sunburn); heals in 3-7 days without scarring.

Assessment: size (percent BSA—rule of nines), depth, and cause (thermal, chemical, electrical).

Synonyms:

First-Episode Psychosis

The first clinically recognized episode of psychosis, regardless of eventual diagnosis. It requires urgent assessment for substance exposure, medication effects, mood symptoms, neurologic disease, systemic illness, safety risk, and functional decline.

Synonyms:

First-Pass Effect

The metabolism of a drug by the liver and intestinal wall before it reaches the systemic circulation after oral administration.

Synonyms:

First-Pass Metabolism

The metabolism of a drug by the liver before it reaches systemic circulation after oral administration. Drugs with high first-pass metabolism (e.g., morphine, nitroglycerin, lidocaine) have low oral bioavailability and may require alternative routes (sublingual, transdermal, IV).

Synonyms:

FISH (Fluorescence In Situ Hybridization)

A molecular cytogenetic technique using fluorescent DNA probes that hybridize to specific chromosomal regions. Faster than karyotype (24-48 hours, vs. 7-14 days).

Synonyms: Fluorescence In Situ Hybridization

Fissured Tongue

A usually harmless condition in which grooves or cracks develop on the surface of the tongue. Food and debris may collect in the fissures, causing irritation or odor. Gentle brushing of the tongue and routine oral care help prevent symptoms.

Synonyms:

Fistula

An abnormal passage connecting two organs, ves-

sels, or body surfaces. It may result from infection, inflammation, injury, surgery, or congenital development.

Synonyms:

Fistula (Pathology)

An abnormal epithelial-lined connection between two body surfaces or organs that normally do not communicate. Fistulas may be congenital, such as tracheoesophageal fistula, or acquired, resulting from inflammation, infection, surgery, trauma, or malignancy.

Synonyms: Pathology

Fistula-in-Ano

Abnormal epithelialized tract connecting the anal canal to the perianal skin, representing a common and distressing complication of Crohn disease and also occurring following perianal abscess drainage or from cryptoglandular infection.

Synonyms:

Fitz-Hugh-Curtis Syndrome

Perihepatitis associated with pelvic inflammatory disease caused by ascension of *Neisseria gonorrhoeae* or *Chlamydia trachomatis* from the pelvis to the liver capsule along the right paracolic gutter. Presents with right upper quadrant pain, fever, and tender hepatomegaly often in young sexually active women.

Synonyms:

Five-Year Survival Rate

The proportion of patients alive five years after diagnosis or treatment; a standard benchmark for comparing cancer outcomes.

Synonyms:

Fixed Drug Eruption

A recurrent drug reaction appearing at the same site with each exposure to the offending drug. It presents as well-demarcated, round to oval, erythematous to violaceous plaques that may blister. Common culprits include sulfonamides, tetracyclines, NSAIDs, and barbiturates.

Synonyms:

Flail Chest

A clinical condition caused by three or more consecutive ribs fractured in two or more places, creating a free-floating segment of chest wall. The segment moves paradoxically inward during inspiration and outward during expiration. It causes severe pain, impaired ventilation, and may require mechanical ventilation.

Synonyms:

Flakka

A street name for synthetic cathinone stimulants, particularly alpha-PVP. Intoxication may cause extreme agitation, paranoia, hallucinations, seizures, dangerous hyperthermia, muscle breakdown, and cardiovascular instability. Severe agitation, altered consciousness, high temperature, or chest pain is a medical emergency.

Synonyms:

Flank Pain

Pain arising from the lateral back between the ribs and iliac crest, often reflecting disease of the kidney, ureter, musculoskeletal structures, or adjacent abdominal organs. Associated fever, haematuria, vomiting, urinary symptoms, trauma, or hypotension helps distinguish infection, obstruction, stones, injury, and other causes.

Synonyms:

Flashes

Perception of flickering light or lightning-like streaks from mechanoelectrical stimulation of the retina rather than an external source. The leading cause is posterior vitreous detachment, often with floaters; retinal tears and detachment, migraine aura, and optic neuritis also produce flashes.

Synonyms:

Flat Feet

Reduction or absence of the medial longitudinal arch, causing the sole to approach or contact the ground during standing. Flexible flat feet are com-

mon and often asymptomatic; rigid or painful flat feet may result from structural deformity, tendon dysfunction, or arthritis.

Synonyms:

Flatfoot

A reduction or collapse of the medial longitudinal arch of the foot, with increased contact of the sole with the ground. It may be flexible and asymptomatic or rigid and painful; causes include normal development, ligamentous laxity, tendon dysfunction, trauma, inflammatory disease, and structural deformity.

Synonyms:

Flatulence

Passage of intestinal gas through the anus. It reflects swallowed air and bacterial fermentation of undigested carbohydrates and may be increased by dietary factors, constipation, malabsorption, altered gut motility, or functional gastrointestinal disorders; persistent symptoms require assessment for associated disease.

Synonyms:

Flecainide

A class IC sodium channel blocker that slows conduction velocity with little effect on refractoriness. Used for suppression of supraventricular arrhythmias (atrial fibrillation in patients without structural heart disease—'pill-in-the-pocket', paroxysmal SVT) and ventricular arrhythmias.

Synonyms:

Flexibility

The range through which a joint or group of joints can move, influenced by muscles, tendons, ligaments, joint structure, and pain.

Synonyms:

Flexible Nasolaryngoscopy

Office examination of the nasal cavity, nasopharynx, pharynx, and larynx using a flexible fiberoptic or digital endoscope passed through the nose. It evaluates voice change, swallowing symptoms, nasal

obstruction, lesions, vocal-fold movement, and airway anatomy.

Synonyms:

Flexible Sigmoidoscopy

Endoscopic examination of the rectum and sigmoid colon (up to 60 cm). Indications: colorectal cancer screening (q5-10 years, combined with FIT), evaluation of rectal bleeding, chronic diarrhea, and surveillance of known distal colonic disease (ulcerative colitis).

Synonyms:

Flexion

Movement that decreases the angle between two bones or bends a joint, generally in the sagittal plane.

Synonyms:

Flexor Digitorum Profundus

Deep anterior forearm muscle with ulnar and humeroulnar heads, inserting on distal phalanges bases of digits 2-5. Medial half (digits 4-5) innervated by ulnar nerve; lateral half (digits 2-3) by anterior interosseous nerve (C8-T1). Flexes DIP, PIP, MCP joints, and wrist.

Synonyms:

Flexor Digitorum Superficialis

Large anterior forearm muscle with humeroulnar, radial, and ulnar heads, inserting on middle phalanges of digits 2-5. Innervated by median nerve (C8-T1). Flexes PIP joints, MCP joints, and wrist. Important for median nerve function assessment. Tendons pass through carpal tunnel, susceptible to stenosing tenosynovitis (trigger finger).

Synonyms:

Floater

Mobile spots, threads, cobwebs, or rings in the visual field caused by vitreous opacities casting shadows on the retina. Most arise from posterior vitreous detachment, an age-related separation of the vitreous gel from the retina; hemorrhage, vitritis, and asteroid hyalosis are other causes.

Synonyms:

Floating Ribs

Ribs 11-12 with short costal cartilages terminating in abdominal wall musculature, not articulating with the sternum or other ribs. Most mobile and least protected, susceptible to fracture from direct trauma. Fractures may injure underlying kidneys, requiring hematuria and flank tenderness assessment in trauma.

Synonyms:

Flossing

Cleaning between teeth with dental floss or another interdental device to remove plaque and food debris from areas a toothbrush may not reach.

Synonyms:

Flow Cytometry

A laboratory technique that measures physical and molecular characteristics of cells or particles as they pass through a laser beam. It is used for cell counting, immunophenotyping, diagnosis of some leukemias and lymphomas, and assessment of selected immune disorders.

Synonyms:

Flow-Volume Loop

Graphical representation of airflow during forced breathing. Obstructive: scooped expiratory limb. Restrictive: narrowed loop with preserved shape. Variable extrathoracic obstruction: flattening of inspiratory limb.

Synonyms:

Flu

Influenza is a contagious respiratory infection caused mainly by influenza A or B viruses. It commonly causes fever, cough, sore throat, headache, muscle aches, and fatigue. Complications may include pneumonia and worsening of underlying medical conditions.

Synonyms:

Fludeoxyglucose F-18

Radiotracer used in PET imaging, analog of glucose labeled with fluorine-18. Taken up by cells via glucose transporters and phosphorylated by hexokinase, trapped intracellularly. Uptake reflects metabolic activity. Used for oncology (tumor detection, staging, response assessment), neurology (epilepsy, dementia), cardiology (viability).

Synonyms:

Fluid Imbalance

An abnormal excess or deficiency of body water or electrolytes such as sodium, potassium, calcium, or bicarbonate. It may result from dehydration, kidney or heart disease, endocrine disorders, gastrointestinal losses, or inappropriate fluid administration.

Synonyms:

Fluid Overload

Excess total body fluid due to impaired renal sodium/water excretion or excessive intake, leading to edema, weight gain, hypertension, and pulmonary congestion. Causes: heart failure, renal failure (acute/chronic), nephrotic syndrome, cirrhosis, iatrogenic (IV fluids), and hypoalbuminemia.

Synonyms:

Fluorescein Angiography

An eye test in which fluorescein dye is injected into a vein and sequential photographs are taken of the retinal circulation. It helps identify leakage, blocked vessels, abnormal new vessels, and other retinal or choroidal abnormalities.

Synonyms:

Fluorescence In-Situ Hybridization

A targeted cytogenetic technique using fluorescent DNA probes to detect or localize specific chromosome sequences. It can identify selected aneuploidies, microdeletions, gene rearrangements, or amplifications but does not survey the entire genome.

Synonyms:

Fluoride

Mineral that strengthens tooth enamel and inhibits

bacterial acid production. Sources: water fluoridation (0.7 ppm optimal), toothpaste, professional applications. Mechanism: incorporates into hydroxyapatite forming fluorapatite (more acid-resistant), promotes remineralization, inhibits bacterial enzymes.

Synonyms:

Fluoride Varnish

A concentrated fluoride preparation applied to teeth by a healthcare professional to help prevent or arrest dental caries. The frequency of application depends on age and caries risk.

Synonyms:

Fluorine-18

PET radionuclide, half-life 110 minutes. Produced in cyclotron via O-18(p,n)F-18 reaction. Used in FDG and other tracers. Requires on-site or nearby cyclotron due to short half-life.

Synonyms:

Fluoroquinolones

Broad-spectrum bactericidal antibiotics that inhibit bacterial DNA gyrase and topoisomerase IV, enzymes essential for DNA replication, transcription, and repair. They are synthetic derivatives of nalidixic acid and include ciprofloxacin, levofloxacin, moxifloxacin, and others.

Synonyms:

Fluoroscopy

Real-time X-ray imaging used to visualize dynamic processes.

Synonyms:

Fluorosis

Enamel hypomineralization from excess fluoride during development. Mild: white spots. Severe: brown stains, pitting. Prevention: monitor fluoride intake in children.

Synonyms:

Fluorouracil side effect

Toxicity from the antimetabolite 5-fluorouracil caus-

ing mucositis, diarrhea, hand-foot syndrome, myelosuppression, and potential cardiotoxicity, requiring dose adjustment or discontinuation.

Synonyms:

Flushing

Transient reddening and warmth of the skin caused by increased cutaneous blood flow. It may result from heat, emotion, exertion, fever, alcohol, endocrine or neuroendocrine disease, mast-cell activation, medication exposure, or autonomic dysfunction; associated diarrhoea, wheeze, hypotension, or palpitations may indicate systemic disease.

Synonyms:

Flutter Valve

A handheld device combining PEP therapy with oscillations during exhalation. The oscillations create shear forces that loosen mucus from airway walls, while the PEP keeps airways open. It is used for airway clearance in bronchiectasis, CF, and COPD.

Synonyms:

FNA

A percutaneous sampling technique in which a 22 to 25-gauge needle, often ultrasound- or palpation-guided, aspirates cellular material from a palpable or imaging-detected lesion for cytologic examination, with minimal trauma and lower morbidity than core or open biopsy. See Fine Needle Aspiration (FNA).

Synonyms:

Focal Nodular Hyperplasia

Benign liver lesion with a characteristic central stellate scar visible on imaging. The lesion represents a hyperplastic response to a pre-existing vascular malformation rather than a true neoplasm. Associated with oral contraceptive use though it also occurs in men and children. No risk of hemorrhage or malignant transformation.

Synonyms:

Focal Segmental Glomerulosclerosis

The most common cause of nephrotic syndrome in African American adults and Hispanic pop-

ulations. Associated with HIV infection (HIV-associated nephropathy), heroin use, sickle cell disease, massive obesity, interferon therapy, and renal hyperfiltration (solitary kidney).

Synonyms:

Focal Seizure

A seizure arising from networks limited to one cerebral hemisphere at onset. Awareness may be preserved or impaired, and motor, sensory, autonomic, cognitive, or emotional features depend on the involved region; a focal seizure may spread to become bilateral tonic-clonic.

Synonyms:

Focal-Onset Seizure

A seizure that begins within networks limited to one cerebral hemisphere. Awareness may be preserved or impaired, and motor, sensory, autonomic, cognitive, or emotional features reflect the involved cortical region; it may evolve to bilateral tonic-clonic activity.

Synonyms:

FODMAP Diet

Restriction of Fermentable Oligo-, Di-, Monosaccharides And Polyols. Used for IBS management. Low FODMAP diet followed by gradual reintroduction.

Synonyms:

Folate Deficiency

Folate (vitamin B9) deficiency causes megaloblastic anemia identical to B12 deficiency but without neurologic manifestations (except possible cognitive changes). Dietary sources: leafy greens, legumes, liver; daily requirement 400 mcg. Absorption in jejunum.

Synonyms:

Folate-deficiency anemia

A type of megaloblastic anemia caused by insufficient folic acid, a B vitamin essential for DNA synthesis, cell division, and red blood cell production.

Synonyms:

Foley Catheter

An indwelling urinary catheter held in the bladder by an inflatable balloon and connected to a drainage system.

Synonyms:

Folic Acid Supplementation

Use of folic acid before conception and during early pregnancy to reduce the risk of fetal neural-tube defects. The dose depends on individual risk and local clinical guidance; folate is also needed for DNA synthesis and red-cell production.

Synonyms:

Follicle Stimulating Hormone

FSH: a gonadotropin secreted by the anterior pituitary, regulating gonadal function. In females: stimulates ovarian follicle growth and estradiol production; LH surge triggers ovulation. In males: stimulates Sertoli cells and spermatogenesis. Controlled by GnRH and feedback (estrogen, inhibin).

Synonyms:

Follicular Lymphoma

An indolent B-cell non-Hodgkin lymphoma with a follicular growth pattern. Many cases have changes involving BCL2, but classification depends on tissue and molecular findings. It commonly causes painless lymph-node enlargement and may involve bone marrow or other sites.

Synonyms:

Follicular Thyroid Carcinoma

Second most common thyroid carcinoma accounting for approximately ten percent of cases. Distinguished from follicular adenoma by capsular or vascular invasion on histological examination which cannot be determined by fine-needle aspiration. Metastasizes hematogenously to bone, lung, and liver.

Synonyms:

Folliculitis

Inflammation of hair follicles, presenting as pustules

centered on follicles. Bacterial folliculitis (*Staphylococcus aureus*) is most common. Hot tub folliculitis (*Pseudomonas*) occurs after hot tub exposure. Gram-negative folliculitis complicates long-term antibiotic use. Pseudofolliculitis barbae (razor bumps) results from ingrown hairs.

Synonyms:

Follow-Up

A planned assessment after an illness, procedure, or treatment to evaluate progress, identify complications, and adjust care when needed.

Synonyms:

Follow-Up Recommendations

Recommendations for further imaging or evaluation. Based on guidelines (Fleischner Society for lung nodules).

Synonyms:

Fomepizole

An alcohol dehydrogenase inhibitor used as an antidote for toxic alcohol exposure, particularly methanol and ethylene glycol. It prevents formation of toxic metabolites and is used with supportive care and hemodialysis when indicated.

Synonyms:

Fomite

An inanimate object or surface capable of transmitting infectious agents (viruses, bacteria, fungi) between people (e.g., doorknobs, towels, medical equipment, toys, needles). Transmission occurs when contaminated fomites contact mucous membranes or skin, or are involved in procedures.

Synonyms:

Fontanelle

Soft membranous spaces between skull bones that allow brain growth and skull molding during delivery. Anterior fontanelle diamond-shaped, closes by 12-18 months. Posterior fontanelle triangular, closes by 2-3 months. Bulging fontanelle suggests increased intracranial pressure; sunken fontanelle indicates dehydration.

Synonyms:

Food Allergy

Immune-mediated reaction to food protein. IgE-mediated: anaphylaxis. Non-IgE: EoE, food protein-induced enterocolitis. Common allergens: milk, egg, peanut, tree nut, fish, shellfish, soy, wheat.

Synonyms:

Food Intolerance

Adverse reaction not immune-mediated. Lactose intolerance, gluten sensitivity (non-celiac), histamine intolerance, FODMAP sensitivity. Diagnosis: elimination diet, challenge.

Synonyms:

Food Poisoning

Illness caused by consuming food contaminated with bacteria, viruses, parasites, or their toxins. Common pathogens include Salmonella, Escherichia coli, Listeria, and norovirus, with symptoms such as nausea, vomiting, diarrhea, abdominal cramps, and fever.

Synonyms:

Food-Borne Disease

Illness caused by eating food or drinking water contaminated with infectious organisms, toxins, or harmful chemicals.

Synonyms:

Food-Drug Interaction

An alteration in drug absorption, metabolism, distribution, or effect caused by a food, beverage, nutrient, or supplement. Examples include vitamin K affecting warfarin response, grapefruit affecting selected CYP3A4 substrates, and calcium impairing absorption of some medicines.

Synonyms:

Foodborne Illness

Any illness resulting from the ingestion of contaminated food, encompassing infections and intoxications caused by pathogens, toxins, or chemical contaminants. It affects millions annually and poses

particular risks to pregnant women, young children, older adults, and immunocompromised individuals.

Synonyms:

Foot Drop

Weakness or paralysis of ankle dorsiflexion causing the forefoot to drag or the patient to lift the knee abnormally while walking. Common causes include common peroneal nerve injury, L5 radiculopathy, motor-neuron disease, and peripheral neuropathy.

Synonyms:

Foot Pain

Pain in the foot caused by injury, overuse, arthritis, nerve disease, infection, or circulation problems. Persistent pain, inability to bear weight, numbness, discoloration, fever, or an open wound requires medical assessment.

Synonyms:

Force Plates

Instruments that measure forces exerted by the feet on the ground during standing or movement, helping assess gait, balance, symmetry, and loading.

Synonyms:

Forced Expiratory Volume

The volume of air forcibly exhaled in a specified time during a maximal expiratory effort. FEV1 is the volume exhaled in the first second; normally at least 70-80 percent of the forced vital capacity (FEV1/FVC ratio).

Synonyms:

Forced Oscillation Technique

Similar to impulse oscillometry, applying small pressure oscillations at various frequencies during tidal breathing to measure respiratory resistance and reactance. It provides information about airway mechanics without requiring forced expiratory maneuvers.

Synonyms:

Forced Vital Capacity

Total air exhaled after maximal inspiration. Re-

duced in both obstructive and restrictive disease. In restrictive disease, FVC reduced with preserved ratio.

Synonyms:

Forceps

Grasping instrument. Tissue forceps: with teeth. Dressing forceps: without teeth.

Synonyms:

Forceps (Obstetric)

A paired instrument used in selected operative vaginal deliveries to assist delivery of the fetal head.

Synonyms: Obstetric

Forceps (Surgical)

Handheld instruments used to grasp, hold, move, or manipulate tissue or medical materials during a procedure.

Synonyms: Surgical

Forceps (Vascular)

A surgical instrument used to grasp, hold, or manipulate tissue, vessels, or medical materials.

Synonyms: Vascular

Forceps Delivery

Assisted vaginal delivery using forceps (curved blades applied to the fetal head) to expedite delivery for maternal or fetal indications (prolonged second stage, fetal distress, maternal exhaustion, medical conditions limiting pushing).

Synonyms:

Forceps-Assisted Delivery

Operative vaginal delivery using forceps (two curved blades applied to the fetal head). Types: outlet (forceps applied at the introitus, fetal scalp visible), low (station $\geq +2$, not at outlet), midpelvic (station $\geq +2$ but head above ischial spines), and rotational (forceps used to rotate from OP to OA).

Synonyms:

Fordyce's angiokeratomas

Benign vascular ectasias of the superficial dermal capillaries covered by an epidermal reaction, appearing as small, dark red to purple, asymptomatic papules on the scrotum, vulva, or oral mucosa. They are common, increase with age, and are clinically insignificant. They may bleed if traumatized.

Synonyms:

Foreign Body

Any object lodged in body. Types: organic (wood, thorn), inorganic (metal, glass, plastic). Radiopaque vs. radiolucent. Removal: surgical, endoscopic, spontaneous passage. Complications: infection, granuloma, migration.

Synonyms:

Foreign Body Aspiration

Inhalation of object into airway. Common in children (peanuts, coins, small toys). Signs: choking, coughing, stridor, wheezing, decreased breath sounds. Diagnosis: chest X-ray (may be negative), bronchoscopy.

Synonyms:

Foreign Body Reaction

Inflammation and immune response to material that remains in tissue, such as a splinter, suture, implant, or other medical device. It may cause a lump, redness, drainage, pain, or scarring; treatment depends on the material and whether infection is present.

Synonyms:

Foreign-Body Aspiration

Entry of an object into the larynx, trachea, or bronchi, most often in toddlers. Sudden cough, choking, unilateral wheeze, or focal air trapping may occur; complete airway obstruction is an immediate emergency and requires age-appropriate resuscitation.

Synonyms:

Forensic Anthropology

The application of physical-anthropology methods to legal investigations involving human remains,

especially skeletal material. It can help establish whether remains are human, estimate biological characteristics, assess trauma, and support identification.

Synonyms:

Forensic Entomology

The study of insects and other arthropods in legal investigations, principally to estimate the postmortem interval (PMI) and to link suspects to scenes.

Synonyms:

Forensic Evidence

Physical, biological, documentary, or testimonial material gathered, preserved, and analyzed to establish facts in a legal investigation. Categories include biological evidence (blood, semen, hair), trace evidence (fibers, glass, gunshot residue), pattern evidence (fingerprints, toolmarks, bloodstain patterns), and digital evidence.

Synonyms:

Forensic Examination

Structured medicolegal evaluation of a living or deceased person, scene, or evidence to document findings relevant to a legal matter. Components include sexual assault examination with evidence collection, child abuse assessment, injury documentation, driving-impairment evaluation, and autopsy.

Synonyms:

Forensic Medicine (Legal Medicine)

Branch of medicine that applies medical, biological, and scientific knowledge to legal questions and the administration of justice.

Synonyms: Legal Medicine

Forensic Odontology

The application of dental science to legal investigations. It may support human identification by comparing dental records, radiographs, and distinctive dental anatomy and may assist in the assessment of dental injuries.

Synonyms:

Forensic Pathology

A branch of pathology that applies medical knowledge to legal questions, especially the cause and manner of death and the documentation of injuries. Forensic pathologists examine deaths that are sudden, unexpected, violent, or otherwise subject to legal investigation.

Synonyms:

Forensic Psychiatry

The medical specialty at the interface of psychiatry and the law. Core activities: competency to stand trial, criminal responsibility/insanity defense (mental state at time of offense), dangerousness/risk assessment, civil commitment, testamentary capacity, and personal injury claims.

Synonyms:

Forensic Radiography

The use of imaging (X-ray, CT, MRI, ultrasound) in forensic and medico-legal investigation.

Synonyms:

Forensic Toxicology

The analysis of drugs, poisons, and their metabolites in biological specimens (blood, urine, vitreous humor, hair, tissues) to determine their role in intoxication, poisoning, or death.

Synonyms:

Forensic Toxicology Screen

Laboratory analysis of biological specimens for drugs, alcohols, poisons, and their metabolites. A screening result is presumptive until confirmed and quantified by a validated method such as mass spectrometry, with interpretation based on specimen type, timing, therapeutic use, and postmortem changes.

Synonyms:

Formaldehyde

Preservative, industrial chemical. Irritant, carcinogen (nasopharyngeal cancer). Sensitizer. Use in fume hood, PPE required.

Synonyms:

Formalin-Fixed Paraffin-Embedded Tissue

Tissue preserved in formalin, processed, and embedded in paraffin wax for sectioning and microscopic examination. FFPE blocks support histology, immunohistochemistry, and many molecular tests but may contain fixation-related nucleic-acid or antigen alterations.

Synonyms:

Formication

A sensation that insects are crawling on or under the skin when none are present. It may occur with nerve disorders, menopause, substance withdrawal, medication effects, or psychiatric illness. Persistent or new symptoms should be medically evaluated.

Synonyms:

Formula Feeding

Alternative to breastfeeding using commercially prepared infant formula. Types include cow's milk-based, soy-based, hydrolyzed protein, and amino acid-based formulas. Iron-fortified formulas standard to prevent iron deficiency anemia. Preparation requires clean water and proper sterilization of bottles.

Synonyms:

Fornix

The conjunctival fornix is the redundant, dome-shaped fold of conjunctiva where the palpebral conjunctiva transitions to the bulbar conjunctiva, forming a deep recess superiorly (superior fornix), inferiorly (inferior fornix), and medially and laterally (medial and lateral fornices).

Synonyms:

Fortification

Addition of nutrients to food. Examples: iodized salt, vitamin D milk, folic acid grains. Public health strategy for deficiency prevention.

Synonyms:

Four-Dimensional Ultrasound

Real-time 3D ultrasound. Used in obstetrics for

fetal imaging.

Synonyms:

Fournier Gangrene

A rapidly progressive necrotizing infection of the perineum, external genitalia, or perianal region. It causes severe pain, swelling, fever, systemic toxicity, and tissue necrosis and requires immediate surgical debridement and broad-spectrum antimicrobial treatment.

Synonyms:

Fourth-Degree Tear

A severe perineal tear during childbirth that extends through the anal sphincter and into the rectal mucosa. It requires careful examination, repair, follow-up, and assessment for complications.

Synonyms:

Fovea

A tiny depression in the center of the retina that provides the sharpest and most detailed visual acuity.

Synonyms:

Fovea Centralis

Central macular pit (approximately 1.5 mm) with the highest cone density (approximately 200,000 per square millimeter) and no rods, providing the sharpest visual acuity and color vision. Avascular with overlying retinal layers displaced laterally for direct light access to cones.

Synonyms:

Fractional Excretion of Sodium

The percentage of filtered sodium excreted in urine, calculated from serum and urine sodium and creatinine. It may help distinguish prerenal physiology from tubular injury, although diuretics, CKD, sepsis, and other conditions limit interpretation.

Synonyms:

Fractional Excretion of Urea (FEUrea)

The percentage of filtered urea excreted in urine. It may be used as an adjunct when diuretics make

FENa less interpretable, but it is also affected by catabolism, sepsis, gastrointestinal bleeding, and chronic kidney disease.

Synonyms: FEUrea

Fractional Flow Reserve

An invasive physiological measurement during coronary catheterization using a pressure wire to assess the hemodynamic significance of a coronary stenosis. $FFR = Pa/Pd$ (aortic pressure / distal coronary pressure) during maximal hyperemia (adenosine).

Synonyms:

Fractional IPV

A reduced-dose schedule of inactivated polio vaccine used in the WHO and India Universal Immunization Schedule, where one-fifth of the standard intramuscular IPV dose (0.1 mL instead of 0.5 mL) is given by intradermal injection at each of two deltoid sites (total 0.2 mL per fractional dose), rather than the full 0.5 mL intramuscular dose.

Synonyms:

Fracture

A break in the continuity of bone, classified by location, pattern (transverse, oblique, spiral, comminuted), displacement, and whether the fracture communicates with the external environment (open vs. closed). Fracture healing occurs through inflammatory, reparative, and remodeling phases.

Synonyms:

Fracture Displacement

Loss of normal anatomic alignment between fracture fragments, described by translation, angulation, shortening, or rotation. The acceptable degree depends on the bone, joint involvement, patient age, and functional demands.

Synonyms:

Fracture Liaison Service

A coordinated program that identifies patients with fragility fractures, evaluates bone health and secondary causes, initiates fracture prevention, and ensures follow-up to reduce recurrent fractures.

Synonyms:

Fracture of the temporal bone

A break in the thin bones forming the skull base and ear structures, potentially injuring the facial nerve, carotid artery, or middle ear and presenting with hearing loss, vertigo, or cerebrospinal fluid leak.

Synonyms:

Fracture Prevention

Measures that reduce the risk of bone fracture, including assessment and treatment of osteoporosis, strength and balance exercise, fall prevention, and correction of relevant nutritional or medication-related risks.

Synonyms:

Fracture-Fixation Device

An implant such as a plate, screw, intramedullary nail, or external-fixation component used to stabilize a broken bone and maintain alignment during healing. Selection depends on fracture pattern, bone quality, and soft-tissue condition.

Synonyms:

Fragile X Syndrome

An inherited neurodevelopmental disorder caused by expansion of a CGG repeat in the FMR1 gene, leading to reduced gene expression. It may cause intellectual disability, characteristic physical features, and behavioral or autism-spectrum features.

Synonyms:

FRAIL Scale

A brief frailty screen assessing Fatigue, Resistance, Ambulation, Illnesses, and Loss of weight. It identifies risk of frailty but is not a substitute for a comprehensive geriatric assessment.

Synonyms:

Frailty

Clinical syndrome of decreased reserve and resilience to stressors. Components: unintentional weight loss, exhaustion, low physical activity, slow gait speed, weak grip strength. Identification: Fried pheno-

type, frailty index. Consequences: adverse outcomes (falls, hospitalization, mortality), polypharmacy, functional decline.

Synonyms:

Frameshift Mutation

Insertion or deletion of nucleotides not in multiples of three, shifting reading frame. Usually produces nonfunctional protein. Examples: some cystic fibrosis mutations, Tay-Sachs disease.

Synonyms:

Francisella tularensis

A gram-negative coccobacillus that causes tularemia, a zoonotic infection transmitted by ticks, deer flies, or direct contact with infected animals. The organism can be acquired through the skin, respiratory tract, or gastrointestinal tract. Ulceroglandular tularemia presents with skin ulcer and regional lymphadenopathy.

Synonyms:

Frank-Starling Mechanism

The physiological principle stating that stroke volume increases as end-diastolic volume (preload) increases, up to an optimal point. Within physiological limits, greater ventricular stretch leads to stronger contraction due to increased calcium sensitivity of myofilaments and optimal overlap of actin and myosin.

Synonyms:

Free Radical

A molecule or atom containing an unpaired electron, making it chemically reactive. Excessive free-radical activity can contribute to oxidative injury.

Synonyms:

Free Radical Injury

Free radicals are highly reactive molecules with unpaired electrons that can damage cellular components through oxidative stress. Reactive oxygen species include the superoxide anion, hydrogen peroxide, and the hydroxyl radical generated through the Fenton reaction.

Synonyms:

Free Water Clearance

The rate at which the kidneys excrete water in excess of or less than the amount needed to produce urine isotonic to plasma. Positive clearance indicates excretion of dilute urine; negative clearance indicates retention of water through concentration of urine.

Synonyms:

Frenectomy

Surgical removal or repositioning of frenulum. Indications: diastema, gingival recession, tongue-tie, interference with denture.

Synonyms:

Frenulum Breve

An abnormally short penile frenulum that may cause pain, tearing, or bleeding during erection or sexual activity. Treatment depends on symptoms and may include observation or a minor surgical procedure.

Synonyms:

Frequency

Increased daytime micturition, typically more than seven episodes per day, distinguished from polyuria (high urine volume) and nocturia (nighttime voiding). Common causes include urinary tract infection, benign prostatic hyperplasia, overactive bladder, and diabetes mellitus.

Synonyms:

Frey's syndrome

Aberrant regeneration of parasympathetic nerve fibers to sweat glands after injury to the auriculotemporal nerve, most commonly following parotid surgery or trauma. It results in gustatory sweating and facial flushing while eating. Diagnosis is confirmed by the starch-iodine test.

Synonyms:

Friedman Curve

The classic labor curve described by Emanuel Friedman in the 1950s, plotting cervical dilatation against

time. Defined the latent and active phases, with active phase beginning at 4 cm. The Friedman curve was the standard for labor management for decades.

Synonyms:

Friedreich Ataxia

An inherited neurodegenerative disorder causing progressive gait and limb ataxia, sensory loss, weakness, and sometimes cardiomyopathy or diabetes.

Synonyms:

Frontal Bone

Forms the forehead and superior orbits, with the squama frontalis, orbital plates, and nasal part. Contains frontal sinuses draining into the nasal cavity via the frontonasal duct. Articulates with parietal bones at the coronal suture. The metopic suture fuses by age six.

Synonyms:

Frontal Lobe

The largest lobe of the cerebral cortex, lying anterior to the central sulcus, comprising the primary motor cortex (precentral gyrus, Brodmann 4), premotor and supplementary motor areas, prefrontal cortex, and Broca's area (dominant hemisphere, expressive language).

Synonyms:

Frontal Sinus

The frontal sinuses are paired, air-filled cavities located within the frontal bone above the orbits and the root of the nose, separated by a bony septum that may be deviated to one side, and they are the last of the paranasal sinuses to develop, typically appearing around age seven and reaching full size by late adolescence.

Synonyms:

Frontal Sinusitis

Inflammation or infection of the frontal sinuses, causing forehead pain or pressure, nasal congestion, and drainage. Severe headache, swelling around the eye, high fever, confusion, or neurologic symptoms may indicate a complication requiring urgent care.

Synonyms:

Frontotemporal Dementia

Dementia affecting frontal and temporal lobes. Behavioral variant (personality changes) or language variant (aphasia). Younger onset (50-60).

Synonyms:

Frostbite

Tissue injury caused by freezing of skin and underlying tissues. Severity grading: first degree (superficial, numbness, erythema), second degree (blisters, clear fluid, pain), third degree (hemorrhagic blisters, necrosis, full-thickness skin loss), fourth degree (deep tissue necrosis, mummification, autoamputation).

Synonyms:

Frotteuristic Disorder

A paraphilic disorder involving recurrent, intense sexual arousal from touching or rubbing against a nonconsenting person, lasting ≥ 6 months and causing distress or impairment or involving acting on these urges. Typically occurs in crowded public places (subways, buses, concerts).

Synonyms:

Frozen Section

An intraoperative pathology consultation in which a fresh tissue specimen is rapidly frozen, sectioned on a cryostat, and stained with hematoxylin and eosin within 10 to 20 minutes to guide immediate surgical decision-making. It is used to establish benign versus malignant, assess margins, and identify lymph node metastases.

Synonyms:

Frozen Shoulder

Adhesive capsulitis: progressive shoulder pain and stiffness. Stages: freezing (pain), frozen (stiffness), thawing (recovery). Associated with diabetes, thyroid disease, immobilization. Treatment: physical therapy, corticosteroid injection, manipulation under anesthesia, arthroscopic capsular release.

Synonyms:

Fructosamine

A measurement of glycated serum proteins, primarily albumin, that reflects average glycemia over approximately two to three weeks. It is useful when HbA1c is unreliable because of altered red-cell survival, but it is affected by changes in protein concentration and turnover.

Synonyms:

Fructose Malabsorption

Poor absorption of fructose leading to GI symptoms. Fermentation by bacteria produces gas, osmotic diarrhea. Low-fructose diet beneficial.

Synonyms:

Fructose Metabolism

The enzymatic conversion of fructose primarily in the liver through fructokinase, aldolase B, and downstream glycolytic intermediates. Essential fructosuria is usually benign, whereas aldolase B deficiency causes hereditary fructose intolerance and hypoglycemia after fructose ingestion.

Synonyms:

Fuchs Dystrophy

A progressive corneal endothelial disorder in which endothelial cell loss impairs fluid regulation and causes corneal oedema. Early disease may cause morning blur and glare; advanced disease produces persistent oedema, bullae, pain, and reduced vision. Diagnosis is clinical and supported by slit-lamp examination and corneal imaging.

Synonyms:

Full Agonist

A full agonist is a drug that binds to a receptor and produces the maximum possible biological response that the receptor can generate, achieving 100 percent of the maximal effect. Full agonists have both high affinity for the receptor and high intrinsic activity, meaning they are very effective at activating the receptor once bound.

Synonyms:

Functional Asplenia

Loss of splenic function due to sickling and infarction in sickle cell disease, typically by age 5 years. Increases risk of overwhelming bacterial infection, particularly from encapsulated organisms (*Streptococcus pneumoniae*, *Haemophilus influenzae*).

Synonyms:

Functional Assessment

Evaluation of ability to perform daily activities. Tools: Barthel Index, Lawton IADL Scale, Katz Index. Identifies needs for assistance, predicts outcomes, guides care planning.

Synonyms:

Functional Capacity

The maximum level of physical, cognitive, communication, or self-care performance a person can safely achieve under specified conditions. It is assessed in relation to activities, participation, environment, and personal goals.

Synonyms:

Functional Dyspepsia

Chronic epigastric pain or discomfort without identifiable structural cause. The Rome IV criteria include postprandial distress syndrome with early satiety and postprandial fullness, and epigastric pain syndrome with epigastric pain or burning unrelated to meals.

Synonyms:

Functional Electrical Stimulation

Application of electrical impulses to peripheral nerves or muscles to produce purposeful contraction during a functional task, such as foot clearance during gait or cycling after neurologic injury.

Synonyms:

Functional Independence Measure

FIM: standardized assessment of disability. Scores 18 (total assistance) to 7 (independent). 18 items: self-care, sphincter control, transfers, locomotion, communication, social cognition.

Synonyms:

Functional MRI

An MRI method that estimates brain activity by detecting task-related changes in blood oxygenation and blood flow. It is used in research and in selected preoperative assessments.

Synonyms:

Functional Neurological Disorder

Neurologic symptoms such as weakness, abnormal movements, sensory loss, or seizures that are incompatible with recognized patterns of structural neurologic disease and arise from altered nervous-system function. Diagnosis is based on positive clinical signs, not merely on normal investigations.

Synonyms:

Functional Neurological Symptom Disorder

A condition in which neurological symptoms such as weakness, abnormal movement, sensory loss, or episodes resembling seizures are incompatible with recognized neurological disease patterns and cause significant distress or impairment.

Synonyms:

Functional Neurological Symptom Disorder (Conversion Disorder)

A condition in which patients present with neurological symptoms (weakness, paralysis, non-epileptic seizures, sensory loss, gait abnormalities, dystonia, speech difficulties) that cannot be explained by structural neurological disease. The symptoms are not intentionally produced (unlike malingering or factitious disorder).

Synonyms: Conversion Disorder

Functional Residual Capacity

The volume of air remaining in the lungs at the end of a normal expiration, equal to the sum of expiratory reserve volume plus residual volume (approximately 2.2-3 L in adults). FRC represents the lung volume at which the outward recoil of the chest wall balances the inward recoil of the lungs, the resting equilibrium position.

Synonyms:

Functional Screening

A brief assessment of a person's ability to perform daily activities, move safely, communicate, and manage basic self-care.

Synonyms:

Functional Status

Ability to perform activities of daily living (ADLs) and instrumental ADLs (IADLs). ADLs: bathing, dressing, toileting, transferring, continence, feeding. IADLs: shopping, cooking, managing medications, finances, transportation, housekeeping. Decline indicates need for assistance.

Synonyms:

Functional Urinary Incontinence

Urinary incontinence due to physical or cognitive impairment preventing toilet access.

Synonyms:

Fundal Height

The distance from the symphysis pubis to the top of the uterus measured in centimeters. Used to estimate gestational age and fetal growth. Generally correlates with weeks of gestation between 20-36 weeks (e.g., 24 cm at 24 weeks). Discrepancies may suggest fetal growth restriction, macrosomia, polyhydramnios, or multiple gestation.

Synonyms:

Fundus Photography

The documentation of the appearance of the retina, optic nerve, and retinal vasculature using a specialized camera that illuminates and photographs the posterior segment of the eye, providing a permanent, objective record of retinal findings that can be used for comparison over time, patient education, and telemedicine consultations.

Synonyms:

Fungal Arthritis

Infection and inflammation of a joint caused by a fungus, usually after surgery, trauma, injection, bloodstream spread, or in a person with impaired immunity. It often develops gradually with persistent

pain, swelling, and reduced movement. Joint-fluid culture and tissue testing guide prolonged antifungal and sometimes surgical treatment.

Synonyms:

Fungal endophthalmitis

Fungal infection of the interior of the eye, often associated with bloodstream infection, surgery, trauma, or immunosuppression and capable of causing severe visual loss.

Synonyms:

Fungal Infection

An infection caused by a fungus. It may be superficial, affecting the skin, nails, or mucous membranes, or invasive, affecting the lungs, bloodstream, or other organs. The presentation and risk depend on the organism and the person's immune status.

Synonyms:

Fungal Infection (Tinea/Dermatophytosis)

Superficial fungal infections of skin, hair, or nails caused by dermatophytes (Trichophyton, Microsporum, Epidermophyton). Tinea corporis (ringworm): annular scaling plaque with central clearing. Tinea pedis (athlete's foot): interdigital scaling, maceration. Tinea cruris (jock itch): groin rash sparing scrotum.

Synonyms: Tinea/Dermatophytosis

Fungal Nail Infection

Infection of a fingernail or toenail by dermatophytes or other fungi, causing thickening, discoloration, brittleness, separation from the nail bed, or subungual debris.

Synonyms:

Fungal Nails

A fungal infection of the nail, usually caused by dermatophytes, producing thickened, discolored, brittle, or crumbly nails. The infection may spread to surrounding skin and recur. Diagnosis may require microscopy or culture, and treatment depends on the organism, number of nails, severity, and the

person's medical history.

Synonyms:

Fungal pathogenesis

The mechanisms by which fungi cause disease. Fungal pathogenesis involves adhesion, invasion, and evasion of host defences. Adhesins mediate attachment to host cells. Invasive hyphae penetrate tissues. Capsules and melanin protect against immune responses. Biofilm formation provides protection against antifungal agents.

Synonyms:

Fungal resistance mechanisms

Mechanisms by which fungi develop resistance to antifungal agents. Azole resistance occurs through up-regulation of efflux pumps (CDR1, CDR2, MDR1), mutations in the target enzyme ERG11, and over-expression of ERG11. Echinocandin resistance is primarily due to mutations in the FKS1 and FKS2 genes encoding beta-(1,3)-D-glucan synthase.

Synonyms:

Fungal Skin Infections

Skin infections caused by dermatophytes or yeasts, including ringworm (tinea), athlete's foot, and candidiasis. These infections thrive in warm, moist environments and present with red, itchy, scaly, or ring-shaped lesions. Treatment typically involves topical or oral antifungal medications and measures to keep the skin clean and dry.

Synonyms:

Fungemia

The presence of viable fungi in the bloodstream. Candida species are the most common cause in hospitalized patients; fungemia requires prompt evaluation for a source, metastatic infection, and appropriate antifungal treatment.

Synonyms:

Fungus

A eukaryotic microorganism with a chitin cell wall and ergosterol-containing membrane, classified as yeasts, moulds, or dimorphic fungi. Reproducing

by spores, fungi cause superficial, mucosal, subcutaneous, and systemic infections, especially in immunocompromised hosts.

Synonyms:

Furuncle

A painful, pus-filled infection of a hair follicle, usually caused by *Staphylococcus aureus*. It may form an erythematous nodule with a central necrotic core or progress to a skin abscess. Treatment depends on size, location, recurrence, and systemic illness and may include drainage or antimicrobial therapy.

Synonyms:

Furuncle and Carbuncle

Furuncle (boil) is a deep infection of the hair follicle caused by *Staphylococcus aureus*, presenting as a painful, erythematous nodule that may drain pus. Carbuncle is a cluster of interconnected furuncles causing a larger, more deeply invasive infection.

Synonyms:

Furuncular myiasis

A cutaneous infestation caused by larvae of certain fly species (such as *Dermatobia hominis* or *Cuterebra*) that develop within boil-like furuncular lesions in the skin, presenting with a painful, erythematous nodule with a central punctum through which the larva breathes.

Synonyms:

Furunculosis

Recurrent or multiple furuncles, which are deep infections of hair follicles and surrounding tissue, usually caused by *Staphylococcus aureus*. Lesions are painful, erythematous, and purulent and may occur with colonization, close-contact transmission, skin disease, diabetes, immune dysfunction, or other risk factors.

Synonyms:

Fusariosis

An opportunistic invasive fungal infection caused by *Fusarium* species, affecting predominantly immunocompromised patients, particularly those with

prolonged neutropenia or hematological malignancies. It causes disseminated infection with skin lesions, bloodstream infection, and involvement of multiple organs.

Synonyms:

Fusion

Union of two tooth buds. Results in large tooth with reduced tooth count.

Synonyms:

Fabry's Disease

An inherited disorder in which a lipid accumulates in cells, causing pain, skin findings, kidney disease, and heart or nervous-system complications.

Synonyms:

Facial Nerve

The seventh cranial nerve, which controls facial expression and carries taste sensation from part of the tongue.

Synonyms:

Factor V

A blood-clotting protein required for formation of thrombin and fibrin.

Synonyms:

False Positive

A test result that indicates a disease or condition is present when it is not.

Synonyms:

Familial Dysautonomia

An inherited disorder that impairs development and function of sensory and autonomic nerves.

Synonyms:

Fatty Liver

Excess accumulation of fat in liver cells.

Synonyms:

Femoral Neuropathy

Damage to the femoral nerve, causing weakness or

sensory loss in the thigh and leg.

Synonyms:

Filarial Elephantiasis

Severe swelling and thickening of tissues caused by lymphatic obstruction from filarial infection.

Synonyms:

Flat Affect

Markedly reduced outward expression of emotion.

Synonyms:

Focal Glomerulosclerosis

Scarring affecting some glomeruli or only parts of affected glomeruli, which can impair kidney filtration.

Synonyms:

Foodborne Disease

Illness caused by eating food or drinking water contaminated with infectious organisms, toxins, or harmful chemicals.

Synonyms:

Frasier Syndrome

A rare genetic disorder associated with abnormal sexual development, kidney disease, and increased risk of gonadal tumors.

Synonyms:

Friedreich's Ataxia

An inherited degenerative disorder causing progressive problems with coordination, sensation, and heart function.

Synonyms:

Fuchs' Dystrophy

A progressive disorder in which corneal endothelial cells deteriorate, causing corneal swelling and impaired vision.

Synonyms:

Fucosidosis

A rare inherited metabolic disorder caused by defi-

ciency of the enzyme alpha-L-fucosidase.

Synonyms:

Funisitis

Inflammation of the umbilical cord, usually associated with infection or an inflammatory response.

Synonyms:

Fowler Position

A semiupright position in which the head and upper body are elevated, usually about 45 to 60 degrees.

Synonyms:

Facet Rhizotomy

A procedure that interrupts selected sensory nerves supplying spinal facet joints to reduce chronic pain.

Synonyms:

Fasting Plasma Glucose Test

A blood test that measures glucose after fasting and helps diagnose diabetes or impaired glucose regulation.

Synonyms:

Fecal Occult Blood Test

A test that detects small amounts of blood in stool, often for colorectal cancer screening.

Synonyms:

Filtering Procedure

An operation that creates an alternate drainage pathway to lower pressure inside the eye, usually in glaucoma.

Synonyms:

Frontotemporal Lobar Degeneration

A group of progressive disorders affecting the frontal and temporal brain lobes, causing changes in behavior, language, or executive function.

Synonyms:

Fundoplication

Surgery that wraps the upper stomach around the lower esophagus to reduce gastroesophageal reflux.

Synonyms:

Female Sexual Dysfunction

Persistent sexual problems in a woman that cause distress, such as low desire, arousal difficulty, or pain.

Synonyms:

Floor of the Mouth Cancer

Cancer that develops in the tissues beneath the tongue.

Synonyms:

Functional Neurologic Disorder

A condition in which changes in nervous-system function cause symptoms that are not explained by structural damage.

Synonyms:

Fontanel

A soft membranous gap between the bones of an infant's skull.

Synonyms:

Foramen

An opening or passage through a bone or other anatomical structure, usually for nerves or blood vessels.

Synonyms:

Fossa

A shallow depression or hollow in a bone or other body structure.

Synonyms:

Fremitus

A vibration felt or heard through body tissues, often used to assess transmitted voice sounds in the chest.

Synonyms:

Fulguration

Destruction of tissue by applying electrical energy, commonly during a surgical procedure.

Synonyms:

Facies

A characteristic facial appearance that may provide clues to an underlying disease or physiologic condition.

Synonyms:

Fascia

A layer or band of connective tissue that surrounds, separates, and supports muscles, organs, nerves, and blood vessels.

Synonyms:

Fasciculation

An involuntary, brief twitch of a small group of muscle fibers, often caused by irritation or disease of a motor nerve.

Synonyms:

Fetal Circulation

The circulation before birth in which the placenta supplies oxygen and nutrients and fetal shunts direct much of the blood away from the lungs.

Synonyms:

Fixation

Stabilization of tissue or bone in a desired position, using methods such as sutures, wires, screws, plates, or external devices.

Synonyms:

Free Thyroxine Index

A calculated estimate of circulating free thyroxine based on the total thyroxine concentration and a measure of thyroid-hormone binding.

Synonyms:

Full-Thickness Skin Graft

A skin graft containing the entire epidermis and dermis, transferred to cover a wound or reconstruct a defect.

Synonyms:

Functional Murmur

A heart murmur caused by increased blood flow

without a structural abnormality of the heart or valves.

Synonyms:

Fundus

The rounded or farthest part of a hollow organ; examples include the upper stomach and the posterior interior surface of the eye.

Synonyms:

Genitourinary Tract

The combined urinary and reproductive organs and their associated ducts.

Synonyms:

Gigli Saw

A flexible wire saw used to cut bone, especially during selected orthopedic or amputation procedures.

Synonyms:

Gleason Tumor Grade

A histopathologic grade of prostate adenocarcinoma based on the architectural pattern of the tumor glands; it contributes to the Gleason score and Grade Group.

Synonyms:

Greenstick Fracture

An incomplete fracture in which a young, flexible bone bends and cracks on one side without breaking completely.

Synonyms:

Fahr Disease

A rare neurologic disorder characterized by abnormal, often bilateral, calcification of the basal ganglia and other brain regions, with movement, cognitive, psychiatric, or seizure manifestations. Primary familial brain calcification is the preferred modern term for many inherited cases.

Synonyms:

Factor XI Deficiency

An inherited or acquired bleeding disorder caused

by inadequate factor XI activity, producing variable bleeding that is often most apparent after surgery, dental procedures, or trauma.

Synonyms:

Fecalith

A hard mass of inspissated fecal material, commonly found in the appendix or colon, that can contribute to appendicitis or intestinal obstruction.

Synonyms:

Fecaluria

Passage of fecal material or fecal odor in the urine, usually indicating an abnormal connection such as an enterovesical fistula.

Synonyms:

Falciparum Malaria

Severe malaria caused by the parasite *Plasmodium falciparum* and transmitted by infected *Anopheles* mosquitoes. It can rapidly cause cerebral malaria, severe anemia, kidney injury, respiratory distress, or death and requires urgent treatment.

Synonyms:

Female Athlete Triad

A syndrome involving low energy availability, menstrual dysfunction, and decreased bone mineral density in physically active females. It is related to inadequate nutrition, excessive exercise, or both, and increases the risk of stress fractures and other health problems.

Synonyms:

Fulminant Hepatitis

Rapid, severe loss of liver function caused by extensive hepatic injury, often accompanied by coagulopathy and hepatic encephalopathy. It is a medical emergency that may require intensive care and liver transplantation.

Synonyms:

Factor IX

A vitamin K-dependent blood-clotting protein in the intrinsic coagulation pathway. Inherited deficiency

causes hemophilia B.

Synonyms:

Fibrillation

Rapid, irregular, and uncoordinated contraction of muscle fibers. Atrial fibrillation causes an irregular atrial rhythm; ventricular fibrillation is a cardiac arrest rhythm requiring immediate resuscitation.

Synonyms:

First Aid

Immediate basic care given to a person who is injured or suddenly ill before definitive medical treatment is available. Priorities include scene safety, emergency activation, airway, breathing, circulation, and control of serious bleeding.

Synonyms:

Fits (Seizures)

A common term for episodes caused by abnormal electrical activity in the brain, which may produce altered awareness, abnormal movements, sensory symptoms, or loss of consciousness.

Synonyms: Seizures

Fluid Balance

The relationship between fluid intake and output, regulated by the kidneys, hormones, thirst, and other mechanisms. Imbalance may cause dehydration, fluid overload, or electrolyte disturbances.

Synonyms:

Foramen Ovale

An opening between the right and left atria of the fetal heart that allows blood to bypass the lungs. It normally closes functionally after birth; persistence is called a patent foramen ovale.

Synonyms:

Foreskin (Prepuce)

A fold of skin covering and protecting the glans penis. It is normally retractable after separation from the glans, although the timing varies.

Synonyms: Prepuce

Freckles (Ephelides)

Small, flat, light-brown macules caused by increased melanin production, usually becoming more noticeable with ultraviolet exposure.

Synonyms: Ephelides

Frenum (Frenulum)

A fold of mucous membrane or skin that anchors or limits movement of a body part, such as the lingual frenulum beneath the tongue or the labial frenula.

Synonyms: Frenulum

Full Blood Count (FBC)

A laboratory test measuring red blood cells, hemoglobin, hematocrit, white blood cells, and platelets, often including red-cell indices and a white-cell differential.

Synonyms: FBC

Functional Disorder

A condition in which symptoms or impaired function occur without a sufficient structural abnormality to explain them. Functional disorders are real and may involve altered nervous-system or physiological processing.

Synonyms:

Fourth Stage of Labor

The first one to two hours after delivery of the placenta, when the mother is observed for uterine contraction, bleeding, vital-sign changes, and early postpartum complications.

Synonyms:

Synonyms:

Group B Streptococcal Infection in Pregnancy

Maternal colonization or infection with *Streptococcus agalactiae*, which can be transmitted to the newborn during labor and cause serious early-onset infection. Screening and intrapartum management reduce neonatal risk.

Synonyms: +

fab immunoglobulins

fab immunoglobulins is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

face

face is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

facelift

facelift is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

facet joint

facet joint is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

facial asymmetry

facial asymmetry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

facial cleft

facial cleft is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

facial expression

facial expression is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

facial muscle

facial muscle is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

facial neoplasm

facial neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

facial nucleus

facial nucleus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

facial paresis

facial paresis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

facial vein

facial vein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

facklamia

facklamia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

facklamia hominis

facklamia hominis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

factor xii

factor xii is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

factor xiii

factor xiii is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

factorial study

factorial study is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

faculty

faculty is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

faecalibacterium

faecalibacterium is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

faecalibacterium prausnitzii

faecalibacterium prausnitzii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fair hair

fair hair is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

falimarev

falimarev is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

famciclovir

famciclovir is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

familial testotoxicosis

familial testotoxicosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

family

family is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

family medicine

family medicine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

family planning

family planning is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

family study

family study is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

family therapy

family therapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

famophos

famophos is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

famotidine

famotidine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

farad

farad is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

farber lipogranulomatosis

farber lipogranulomatosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fascia adherens

fascia adherens is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fasciola

fasciola is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fasciola hepatica

fasciola hepatica is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fasciolopsis buski

fasciolopsis buski is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fasting

fasting is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fat body

fat body is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fat measurement

fat measurement is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fat pad

fat pad is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fat-soluble vitamin

fat-soluble vitamin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fatty degeneration

fatty degeneration is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

favism

favism is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

fazarabine

fazarabine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Fc Receptor

Fc Receptor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fear

fear is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

febrile convulsion

febrile convulsion is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

febuxostat

febuxostat is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fec protocol

fec protocol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

feces

feces is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

feeding methods

feeding methods is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

feeding poor

feeding poor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

felbamate

felbamate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

felodipine

felodipine is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

female

female is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

female breast

female breast is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

female condom

female condom is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

female genitalia

female genitalia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

female phenotype

female phenotype is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

feminization

feminization is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

femtogram

femtogram is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

femtoliter

femtoliter is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

femur fracture

femur fracture is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

fenamiphos

fenamiphos is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fenclonine

fenclonine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fenfluramine

fenfluramine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fenitrothion

fenitrothion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fenobucarb

fenobucarb is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fenoldopam

fenoldopam is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fenoprofen

fenoprofen is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

fenoterol

fenoterol is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

fenoxycarb

fenoxycarb is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fenretinide

fenretinide is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fentanyl

fentanyl is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fentanyl citrate

fentanyl citrate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fenthion

fenthion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fermentation

fermentation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ferredoxin

ferredoxin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ferroptosis

ferroptosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ferrous sulfate

ferrous sulfate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fertility agent

fertility agent is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fertility domain

fertility domain is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fertilization

fertilization is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ferumoxytol

ferumoxytol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fetal bradyarrhythmia

fetal bradyarrhythmia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fetal death

fetal death is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fetal disease

fetal disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

fetal heart

fetal heart is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fetal hemoglobin

fetal hemoglobin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fetal malpresentation

fetal malpresentation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fetal pyelectasis

fetal pyelectasis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fetal stage

fetal stage is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fetal tissue

fetal tissue is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fetal weight

fetal weight is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fetomaternal transfusion

fetomaternal transfusion is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fibrinogen assay

fibrinogen assay is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fibrinogen decreased

fibrinogen decreased is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fibrinolytic agent

fibrinolytic agent is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fibrinolytic therapy

fibrinolytic therapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fibrofolliculoma

fibrofolliculoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fibroid tumor

fibroid tumor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fibrolipoma

fibrolipoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fibromatosis

fibromatosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fibromyxosarcoma

fibromyxosarcoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fibronectin

fibronectin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Ficusin

Ficusin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fidaxomicin

fidaxomicin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fiducial markers

fiducial markers is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

filamentous fungus

filamentous fungus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

Filaria bancrofti

Filaria bancrofti is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

filaria demarquayi

filaria demarquayi is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

filarial elephantiasis

filarial elephantiasis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

filgrastim

filgrastim is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

filler excipient

filler excipient is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

filopodium

filopodium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

filoviridae

filoviridae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fimbriae proteins

fimbriae proteins is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

finegoldia

finegoldia is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

finegoldia magna

finegoldia magna is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

finger

finger is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

finger flexors

finger flexors is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

finger injury

finger injury is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

finger joint

finger joint is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

firefly family

firefly family is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

firesetting behavior

firesetting behavior is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

firmicutes

firmicutes is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fish oil

fish oil is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fish venom

fish venom is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fixative

fixative is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fixed macrophage

fixed macrophage is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flagellin

flagellin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flagellum

flagellum is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flare-up

flare-up is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flavin

flavin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flaviviridae

flaviviridae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

flavivirus

flavivirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

flavobacteriaceae

flavobacteriaceae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

flavobacterium

flavobacterium is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

flavodoxin

flavodoxin is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flavonifractor

flavonifractor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flavonoid

flavonoid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flavonol

flavonol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flavopiridol

flavopiridol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flavor enhancer

flavor enhancer is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flavoxate

flavoxate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flaxseed extract

flaxseed extract is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flea

flea is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fleshy tab

fleshy tab is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flocculation

flocculation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flowmeter

flowmeter is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

floxacillin

floxacillin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

floxuridine

floxuridine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluconazole

fluconazole is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

flucytosine

flucytosine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fludarabine

fludarabine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fludarabine phosphate

fludarabine phosphate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fludrocortisone

fludrocortisone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluid management

fluid management is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluid therapy

fluid therapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flumazenil

flumazenil is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluocinolone acetonide

fluocinolone acetonide is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluocinonide

fluocinonide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluorescein

fluorescein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluorescence

fluorescence is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluorescence microscopy

fluorescence microscopy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluorescence polarization

fluorescence polarization is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluorescent dye

fluorescent dye is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluoride poisoning

fluoride poisoning is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

fluorimetry

fluorimetry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluorine

fluorine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluorometholone

fluorometholone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluorophotometry

fluorophotometry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluoropyrimidine

fluoropyrimidine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluoroquinolone

fluoroquinolone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluorouracil

fluorouracil is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

fluoxetine

fluoxetine is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

fluoxymesterone

fluoxymesterone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluphenazine

fluphenazine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluphenazine hydrochloride

fluphenazine hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flurandrenolide

flurandrenolide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

flurazepam

flurazepam is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

flurbiprofen

flurbiprofen is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

flutamide

flutamide is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluticasone

fluticasone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fluvastatin

fluvastatin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

fluvoxamine

fluvoxamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fMRI

fMRI is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

foam cell

foam cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

focal

focal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

focal adhesion

focal adhesion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

foetal acidosis

foetal acidosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

folate

folate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

folate antagonist

folate antagonist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

folic acid

folic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

follicular fluid

follicular fluid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

follicular hyperkeratosis

follicular hyperkeratosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

follistatin

follistatin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

fomites

fomites is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fondaparinux

fondaparinux is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fondaparinux sodium

fondaparinux sodium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fonofos

fonofos is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fonsecaea

fonsecaea is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

food

food is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

food consumption

food consumption is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

food safety

food safety is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

foot

foot is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

forcible intercourse

forcible intercourse is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

forearm

forearm is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

forearm circumference

forearm circumference is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

forehead

forehead is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

forelimb

forelimb is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

forensic medicine

forensic medicine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

foreskin

foreskin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

foretinib

foretinib is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

formate

formate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

formetanate

formetanate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

formoterol fumarate

formoterol fumarate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

formothion

formothion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

formparanate

formparanate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fosaprepitant dimeglumine

fosaprepitant dimeglumine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fosbretabulin

fosbretabulin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

foscarnet

foscarnet is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

foscarnet sodium

foscarnet sodium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fosfomycin

fosfomycin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

fosinopril

fosinopril is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

fotemustine

fotemustine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

found dead

found dead is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fourier analysis

fourier analysis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fourth finger

fourth finger is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fracture fixation

fracture fixation is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

fractured elbow

fractured elbow is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

fractured ilium

fractured ilium is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

framycetin

framycetin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

francisella

francisella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

francisellaceae

francisellaceae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

freeze drying

freeze drying is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

freeze etching

freeze etching is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

freeze substitution

freeze substitution is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

freezing

freezing is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fresh specimen

fresh specimen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fresolimumab

fresolimumab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

Freund's adjuvant

Freund's adjuvant is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Friend virus

Friend virus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

frontal bossing

frontal bossing is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

frustration

frustration is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Fryns syndrome

Fryns syndrome is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

fucose

fucose is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fucosyltransferase

fucosyltransferase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

full sibling

full sibling is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fullerene

fullerene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fulvestrant

fulvestrant is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

funding

funding is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fundus oculi

fundus oculi is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fundus uteri

fundus uteri is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fungal vaccines

fungal vaccines is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fungi

fungi is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

furan

furan is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

furazolidone

furazolidone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

furocoumarin

furocoumarin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

furosemide

furosemide is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

fursultiamin

fursultiamin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fusarium

fusarium is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fusarium chlamydosporum

fusarium chlamydosporum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fusarium incarnatum

fusarium incarnatum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fusarium solani

fusarium solani is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fused placenta

fused placenta is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fused teeth

fused teeth is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fusidic acid

fusidic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fusion gene

fusion gene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fusion protein

fusion protein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

fusobacterium

fusobacterium is a microorganism or biological

taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fusobacterium infection

fusobacterium infection is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fusobacterium mortiferum

fusobacterium mortiferum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fusobacterium naviforme

fusobacterium naviforme is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fusobacterium necrogenes

fusobacterium necrogenes is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fusobacterium necrophorum

fusobacterium necrophorum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fusobacterium nucleatum

fusobacterium nucleatum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fusobacterium russii

fusobacterium russii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

fusobacterium varium

fusobacterium varium is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

G

G-Protein Coupled Receptors

The largest family of cell surface receptors with seven transmembrane alpha-helical domains. Upon ligand binding, the receptor undergoes a conformational change that activates an associated heterotrimeric G-protein (G α , G β , G γ). The G α subunit exchanges GDP for GTP and dissociates from the G β -gamma complex.

Synonyms:

Gain

The amount by which a hearing aid increases sound intensity, measured in decibels.

Synonyms:

Gait Cycle

The sequence of leg and foot movements from one heel strike to the next heel strike of the same foot.

Synonyms:

Gamma-Aminobutyric Acid

The principal inhibitory neurotransmitter in the brain.

Synonyms: GABA

Gastric

Relating to the stomach.

Synonyms:

Gastrointestinal

Relating to the digestive system.

Synonyms: GI

Generic Drug

A medicine equivalent to a brand-name medicine

in active ingredient, strength, dosage form, and intended use, usually sold under a nonproprietary name.

Synonyms: Generic medicine

Genetic

Relating to genes, heredity, or inherited characteristics.

Synonyms:

Genistein

A soy-derived isoflavone with estrogen-like and antioxidant activity.

Synonyms:

GERD

Gastroesophageal reflux disease, in which stomach contents repeatedly flow back into the esophagus.

Synonyms: Gastroesophageal reflux disease

Geriatric Care Manager

A professional who helps coordinate health and support services for an older adult.

Synonyms: Aging-life care manager

GFR

Glomerular filtration rate, an estimate of how efficiently the kidneys filter blood.

Synonyms: Glomerular filtration rate

Gingiva

The oral tissue surrounding and protecting the roots of the teeth.

Synonyms: Gums; gum tissue

Gleason Score

A grading system that estimates the aggressiveness of prostate cancer from its microscopic appearance.

Synonyms: Gleason grade group

Glenoid

The shallow socket of the scapula that forms the shoulder joint with the humeral head.

Synonyms: Glenoid cavity

Glomeruli

Microscopic capillary networks in the kidneys where blood filtration begins.

Synonyms: Renal glomeruli

Glutamic Acid Decarboxylase

An enzyme that converts glutamate to GABA; antibodies to it can occur in type 1 diabetes.

Synonyms: GAD

Glycosylated Hemoglobin

Hemoglobin with glucose attached, reflecting average blood glucose over roughly two to three months.

Synonyms: Hemoglobin A1c; HbA1c

GnRH

Gonadotropin-releasing hormone, which stimulates pituitary release of LH and FSH.

Synonyms: Gonadotropin-releasing hormone

GnRH Antagonists

Medicines that block GnRH signaling and reduce pituitary release of reproductive hormones.

Synonyms:

Goblet Cells

Specialized epithelial cells that secrete mucus, especially in the intestine and airways.

Synonyms:

Gonadotropin-Releasing Hormone

A hypothalamic hormone that controls pituitary secretion of FSH and LH.

Synonyms: GnRH

Gram

A metric unit of mass equal to one-thousandth of a kilogram.

Synonyms: g

Greenstick Fracture

An incomplete fracture in which a young bone bends and cracks rather than breaking all the way through.

Synonyms:

G Spot

A proposed area of sexually sensitive tissue on the front wall of the vagina.

Synonyms: Grafenberg spot

Guardianship

A legal arrangement in which an appointed person makes decisions for someone unable to make them independently.

Synonyms: Legal guardianship

Gullet

The esophagus, the tube carrying food from the throat to the stomach.

Synonyms: Esophagus

Gum Disease

Inflammation or infection affecting the gums and supporting tissues of the teeth.

Synonyms: Periodontal disease

Gums

The soft oral tissue surrounding and supporting the teeth.

Synonyms: Gingiva

G6PD Deficiency

Glucose-6-phosphate dehydrogenase (G6PD) deficiency is an X-linked enzymopathy affecting the pentose phosphate pathway, leading to impaired NADPH production and reduced glutathione regeneration, rendering erythrocytes susceptible to oxidative hemolysis. Common variants: African A- (mild), Mediterranean (severe), Mahidol (SE Asia).

Synonyms:

GABA (Gamma-Aminobutyric Acid)

The primary inhibitory neurotransmitter in the mammalian central nervous system, synthesised from glutamate via glutamic acid decarboxylase (GAD) with pyridoxal phosphate (vitamin B6) as cofactor.

Synonyms: Gamma-Aminobutyric Acid

Gadolinium-Based Contrast Agent

A paramagnetic contrast agent used in MRI to alter tissue signal and improve lesion conspicuity or vascular assessment. Agent selection and dosing consider kidney function, pregnancy, prior reactions, and the rare risk of nephrogenic systemic fibrosis.

Synonyms:

Gadolinium-Induced Nephrogenic Systemic Fibrosis

Rare but serious condition in patients with severe renal impairment receiving gadolinium-based MRI contrast. Causes skin thickening, organ fibrosis. Risk reduced with macrocyclic agents.

Synonyms:

Gagging

A protective retching response triggered by stimulation of the pharynx, posterior tongue, or nearby structures. It may occur during swallowing, examination, aspiration, reflux, infection, or emotional distress; persistent gagging with dysphagia, vomiting, respiratory symptoms, or weight loss requires assessment.

Synonyms:

Gait

The pattern or style of walking. Gait is a complex motor function involving coordination of the central and peripheral nervous systems, muscles, and joints. Gait assessment evaluates stance, stride length, cadence, arm swing, truncal stability, and turning.

Synonyms:

Gait Abnormality

A deviation from normal walking caused by musculoskeletal, neurological, vestibular, visual, cardiovascular, or systemic disease. Assessment considers speed, base, symmetry, balance, stride, turning, assistive-device use, and associated weakness, sensory loss, pain, or cognitive impairment.

Synonyms:

Gait Assessment

A crucial component of the neurological examination that provides significant diagnostic information about the underlying neurological condition. Normal gait requires intact motor, sensory, cerebellar, and vestibular systems, as well as intact cognition.

Synonyms:

Gait Disturbance

An abnormality of walking that may involve speed, balance, coordination, strength, or the pattern of movement. Causes include neurologic, musculoskeletal, vestibular, and systemic disorders.

Synonyms:

Gait Speed

Walking velocity measured over a standardized distance. It is a simple marker of mobility, frailty, disability, and mortality risk and can track functional change over time.

Synonyms:

Gait Training

Teaching or retraining walking pattern. Techniques: parallel bars, walker, cane, stair training. Addresses abnormalities: limping, antalgic gait, hemiplegic gait, parkinsonian gait. Goals: safety, efficiency, independence.

Synonyms:

Galactoceles

A milk-filled retention cyst of the breast, occurring during lactation or after weaning. Results from obstruction of a milk duct. Presents as a painless, fluctuant breast mass. Diagnosis by ultrasound showing a well-defined, hypoechoic or anechoic mass. Treat-

ment includes aspiration. May become infected, requiring antibiotics.

Synonyms:

Galactagogue

A substance that promotes breast milk production.

Synonyms:

Galactorrhea

Milk-like nipple discharge unrelated to breastfeeding or the period after childbirth. It may result from increased prolactin, medicines, pregnancy, endocrine disease, breast stimulation, or other conditions and requires assessment when persistent or unexplained.

Synonyms:

Galactorrhoea

The spontaneous flow of milk from the breast not associated with childbirth or breastfeeding. Galactorrhoea can be unilateral or bilateral and is caused by hyperprolactinaemia (elevated prolactin).

Synonyms:

Galactosaemia

A rare autosomal recessive disorder of galactose metabolism caused by deficiency of one of three enzymes: galactose-1-phosphate uridylyltransferase (GALT, classic galactosaemia, type I), galactokinase (GALK, type II), or UDP-galactose epimerase (GALE, type III).

Synonyms:

Galactose Metabolism

Conversion of galactose to glucose-1-phosphate through the Leloir pathway involving galactokinase, galactose-1-phosphate uridylyltransferase, and UDP-galactose 4-epimerase. Defects cause galactosemia, which can produce liver disease, cataracts, and developmental toxicity.

Synonyms:

Galactosemia

An inherited disorder of galactose metabolism, most often caused by galactose-1-phosphate uridylyltransferase deficiency. Untreated classic disease can cause

jaundice, liver dysfunction, vomiting, cataracts, sepsis, and neurodevelopmental impairment after milk feeding.

Synonyms:

Galant Reflex

A primitive reflex present from birth to 4 months, elicited by stroking the skin along the side of the infant's back. The infant curves toward the stimulated side. Assessed by running a finger from the lateral back toward the hip while the infant is in ventral suspension. Absence may indicate neurologic abnormality.

Synonyms:

Gall-Bladder

A pear-shaped sac located beneath the liver on the visceral surface, in the gallbladder fossa between the right and quadrate lobes of the liver. Capacity: approximately 30-50 mL.

Synonyms:

Gall-Bladder, Diseases of

Conditions affecting the gallbladder, including gallstones, inflammation, infection, polyps, and cancer. Symptoms and treatment depend on the specific disorder.

Synonyms:

Gallavardin Phenomenon

The dissociation of the murmur of aortic stenosis into two components: a musical quality heard at the apex and a harsh, rough quality heard at the right upper sternal border. This occurs because high-frequency components are transmitted to the apex while low-frequency components are heard at the base.

Synonyms:

Gallbladder

A small, pear-shaped sac under the liver that stores and concentrates bile before releasing it into the small intestine to aid fat digestion.

Synonyms:

Gallbladder Cancer

A malignant tumor arising in the gallbladder, often associated with chronic inflammation or gallstones. It may be discovered incidentally or present with abdominal pain, jaundice, or other biliary symptoms.

Synonyms:

Gallbladder volvulus

Axial torsion of the gallbladder around its mesentery and cystic duct, most commonly affecting elderly women, leading to acute gallbladder ischemia. Presents with sudden onset severe right upper quadrant pain, nausea, vomiting, and signs of peritoneal irritation.

Synonyms:

Gallium Scan

Nuclear medicine imaging using Ga-67. Detects inflammation, infection, tumors. Largely replaced by FDG-PET.

Synonyms:

Gallium-68

PET radionuclide, half-life 68 minutes. Produced from Ge-68/Ga-68 generator. Used in DOTATATE, PSMA, and other theranostic applications.

Synonyms:

Gallstone Ileus

Large gallstone eroding through the gallbladder wall into the duodenum causing mechanical small bowel obstruction. Diagnosed by CT showing Rigler triad of small bowel obstruction, pneumobilia, and ectopic gallstone. The most common site of obstruction is the ileum where the bowel caliber narrows.

Synonyms:

Gallstones

Solid deposits that form in the gallbladder, usually from cholesterol or bile pigments. They may cause no symptoms or obstruct the biliary tract, producing biliary pain, inflammation, jaundice, or pancreatitis.

Synonyms:

Gallstones (Cholelithiasis)

Solid deposits that form in the gallbladder, usually from cholesterol or bile pigments. They may cause no symptoms or obstruct the biliary tract, producing biliary pain, inflammation, jaundice, or pancreatitis.

Synonyms: Cholelithiasis

Galvanism

The application of a direct electric current for therapeutic or diagnostic purposes. Named after Luigi Galvani (1737-1798). Historical uses: galvanic stimulation of muscles, iontophoresis (introduction of ionised drugs through skin), electroconvulsive therapy (modified).

Synonyms:

Gambling Addiction

A behavioral addiction characterized by persistent, difficult-to-control gambling despite harmful financial, social, occupational, or health consequences. It may involve preoccupation, increasing bets, unsuccessful attempts to stop, and gambling to escape distress. Assessment and structured behavioral and addiction treatment can help.

Synonyms:

Gamma Camera

Imaging device using NaI(Tl) scintillation crystal, photomultiplier tubes, collimator. Detects gamma rays from radiopharmaceuticals. Anger camera principle.

Synonyms:

Gamma-Globulin

A fraction of plasma proteins containing antibodies (immunoglobulins). Historically the term referred to a group of serum proteins with the slowest electrophoretic mobility (gamma region on serum protein electrophoresis). Currently synonymous with immunoglobulin preparations used for passive immunisation and immunotherapy.

Synonyms:

Ganglion

A collection of neuronal cell bodies located outside

the central nervous system (CNS).

Synonyms:

Ganglioneuroblastoma

A pediatric tumor of the sympathetic nervous system containing both neuroblastic and ganglion-cell elements. It most often arises in the adrenal or paraspinal region and may present with an abdominal mass, pain, hypertension, or systemic symptoms.

Synonyms:

Ganglionic Blocker

A class of drugs that block nicotinic acetylcholine receptors at autonomic ganglia (both sympathetic and parasympathetic), inhibiting neurotransmission in both divisions of the autonomic nervous system.

Synonyms:

Gangrene

Death of tissue due to loss of blood supply, typically affecting the extremities and bowel, and represents a form of coagulative necrosis. Dry gangrene occurs in tissues with gradual arterial occlusion, where the dead tissue becomes dry, shrunken, and dark brown or black.

Synonyms:

Gargalesthesia

The sensation of tickling. A complex sensory experience mediated by light tactile stimulation of sensitive skin areas (axillae, soles, flanks, ribcage). Involves both spinal reflexes (goosebumps, withdrawal) and emotional processing in the anterior cingulate cortex and somatosensory cortex.

Synonyms:

Gargle

The act of rinsing the mouth and throat with a liquid, holding it at the back of the throat while exhaling to create a bubbling action. Used for relief of sore throat or as a delivery method for antiseptics, anaesthetics, and anti-inflammatory agents.

Synonyms:

Gartner duct cyst

A benign cyst arising from remnants of the mesonephric (Wolffian) duct along the lateral wall of the vagina or uterus. They are typically asymptomatic and discovered incidentally on pelvic examination or imaging. Most require no treatment unless symptomatic, in which case surgical excision is performed.

Synonyms:

Gas Gangrene

A life-threatening infection in which bacteria produce toxins and gas within damaged tissue, causing rapid muscle destruction. It is commonly associated with *Clostridium* species and requires urgent surgical assessment, source control, and antimicrobial treatment.

Synonyms:

Gaskin Maneuver (All-Fours Position)

A maneuver for shoulder dystocia resolution: the mother is rolled onto her hands and knees (all-fours position). Gravity and the change in pelvic dimensions (increased anteroposterior diameter of the pelvic outlet) may dislodge the impacted shoulder. The posterior arm may also be delivered more easily.

Synonyms: All-Fours Position

Gastralgia

Pain in the stomach or epigastric region.

Synonyms:

Gastrectomy

Surgical removal of all (total gastrectomy) or part (partial/subtotal gastrectomy) of the stomach. Indications: gastric cancer (most common), severe peptic ulcer disease (rarely needed now due to PPIs and *H. pylori* treatment), gastric lymphoma, gastrointestinal stromal tumor (GIST), perforation, bleeding.

Synonyms:

Gastric Acid

Hydrochloric acid secreted by gastric parietal cells, producing an intragastric pH of 1-3. Secretion is

stimulated by histamine (H₂ receptors), gastrin (CCK-B/gastrin receptors), and acetylcholine (M₃ muscarinic receptors), and inhibited by somatostatin, prostaglandins, and luminal acid (negative feedback).

Synonyms:

Gastric Bezoar

Accumulation of indigestible material in the stomach. Phytobezoars consist of vegetable fiber, trichobezoars of hair, and pharmacobezoars of medications. Associated with gastroparesis, prior surgery, and impaired gastric motility. Diagnosed by endoscopy.

Synonyms:

Gastric Bypass

Roux-en-Y gastric bypass creating a small proximal pouch drained by a Roux limb, combining restrictive and mildly malabsorptive mechanisms. Indicated for BMI over 40, or over 35 with obesity-related comorbidity. Mean excess weight loss approaches 60-70 percent.

Synonyms:

Gastric cancer

A malignant tumor arising from the stomach lining or other stomach tissue.

Synonyms:

Gastric Carcinoid Tumor

Neuroendocrine tumor arising from enterochromaffin-like cells in the gastric fundus. Type I gastric carcinoids are associated with autoimmune atrophic gastritis and hypergastrinemia, are typically small and multifocal, and carry a good prognosis.

Synonyms:

Gastric Emptying

The movement of stomach contents into the duodenum through coordinated muscular contractions and pyloric regulation. Delayed emptying is called gastroparesis.

Synonyms:

Gastric Emptying Study

Nuclear medicine diagnostic test measuring the rate of gastric emptying. The protocol involves ingestion of a radiolabeled meal followed by serial gamma camera images obtained at one, two, and four hours. Gastric emptying is considered delayed if more than ten percent of the meal remains at four hours.

Synonyms:

Gastric Lymphoma

Malignant proliferation of lymphoid tissue in the stomach most commonly mucosa-associated lymphoid tissue lymphoma. Strongly associated with *H. pylori* infection. Early disease may regress completely with *H. pylori* eradication therapy alone.

Synonyms:

Gastric Malignancy

A cancerous tumor arising in the stomach.

Synonyms:

Gastric Outlet Obstruction

Blockage of gastric outflow at the pylorus or duodenum. Causes include peptic ulcer scarring, gastric cancer, and pyloric stenosis in infants. Presents with projectile vomiting, dehydration, and metabolic alkalosis. Diagnosis is by upper endoscopy and CT scan.

Synonyms:

Gastric pneumatosis

Presence of gas within the gastric wall, also called gastric emphysema, which may be benign (gastric emphysema) or life-threatening (emphysematous gastritis). Benign forms result from barotrauma, chronic obstructive pulmonary disease, or mechanical causes.

Synonyms: gastric emphysema, which may be.

Gastric Polyps

Protruding lesions of the gastric mucosa classified by histological type. Fundic gland polyps are the most common type associated with long-term proton pump inhibitor use and familial adenomatous polyposis. Hyperplastic polyps are associated with

chronic gastritis and *H. pylori* infection and carry a small risk of dysplasia.

Synonyms:

Gastric Surgery

Gastric cancer: D2 lymphadenectomy standard (stations 1-12a, 12b). Gastrectomy types: total, distal subtotal (Billroth I gastroduodenostomy, Billroth II gastroduodenostomy, Roux-en-Y), proximal, pylorus-preserving. Reconstruction: Roux-en-Y preferred (prevents bile reflux).

Synonyms:

Gastric Ulcer

Peptic ulcer in the gastric mucosa associated with *H. pylori*, NSAIDs, and smoking. Pain is typically worsened by food. There is a higher risk of malignancy than duodenal ulcers. Diagnosis is by upper endoscopy with biopsy to exclude malignancy. Treatment involves proton pump inhibitors and *H. pylori* eradication.

Synonyms:

Gastric Volvulus

Rotation of the stomach along its axis causing obstruction. It may present with Borchardt triad of epigastric pain, retching, and inability to pass a nasogastric tube. It is a surgical emergency requiring decompression and gastropexy. Organoaxial volvulus is the most common type where the stomach rotates along its longitudinal axis.

Synonyms:

Gastrin

A peptide hormone produced by G cells in the gastric antrum and duodenum. Secreted in response to: (1) gastric distension, (2) amino acids and peptides (especially from protein-rich meals), (3) vagal stimulation (via gastrin-releasing peptide, GRP), (4) hypercalcaemia.

Synonyms:

Gastrin Secretion

Gastrin is a peptide hormone produced by G-cells in the gastric antrum and duodenum, stimulating

hydrochloric acid secretion by parietal cells, pepsinogen secretion by chief cells, and growth of the gastric mucosa.

Synonyms:

Gastrinoma

Gastrin-secreting neuroendocrine tumor causing Zollinger-Ellison syndrome characterized by gastric acid hypersecretion leading to severe peptic ulcer disease, diarrhea, and esophagitis. Approximately sixty percent are malignant with liver metastases. Multiple endocrine neoplasia type 1 association in approximately twenty percent.

Synonyms:

Gastritis

Inflammation of the stomach lining. Causes include infection, medicines such as nonsteroidal anti-inflammatory drugs, alcohol, bile reflux, autoimmune disease, and severe physiologic stress.

Synonyms:

Gastrocnemius

The large superficial muscle of the posterior calf, forming the bulk of the calf contour. Origin: medial and lateral femoral condyles. Insertion: calcaneus via the Achilles tendon. Nerve: tibial nerve (S1-S2). Action: plantar flexion of the ankle (standing, walking, running, jumping); also flexes the knee.

Synonyms:

Gastrocnemius Muscle

Most superficial posterior leg muscle forming the calf prominence, with medial/lateral femoral condyle heads merging with soleus to form the Achilles tendon on the calcaneus. Innervated by tibial nerve (S1-S2). Plantarflexes ankle and flexes knee (two-joint muscle). Active in walking/running/jumping.

Synonyms:

Gastroduodenal Crohn Disease

Involvement of the stomach and duodenum by Crohn disease occurring in approximately five percent of patients with Crohn. Gastric Crohn typically involves the antrum and pylorus and can cause

gastric outlet obstruction from edema, fibrosis, or stricture. Duodenal Crohn presents with epigastric pain, nausea, vomiting, and weight loss.

Synonyms:

Gastroenteritis

Inflammation of the stomach and intestinal mucosa, most commonly caused by viral infections (norovirus, rotavirus, adenovirus), bacterial pathogens (*E. coli*, *Salmonella*, *Campylobacter*), or parasites. Presents with diarrhea, vomiting, abdominal cramps, and dehydration. Self-limited in most cases.

Synonyms:

Gastroenterology

The medical specialty focused on the diagnosis and management of diseases of the gastrointestinal tract (esophagus, stomach, small intestine, colon, rectum, pancreas, gallbladder, bile ducts, liver). Subspecialties: hepatology (liver), pancreatology, inflammatory bowel disease, gastrointestinal oncology, neurogastroenterology.

Synonyms:

Gastroesophageal Junction Adenocarcinoma

A gland-forming cancer arising where the esophagus meets the stomach. Symptoms may include difficulty swallowing, reflux, weight loss, anemia, or bleeding. Diagnosis requires endoscopy and biopsy; treatment depends on stage and may include surgery, chemotherapy, radiation, immunotherapy, or targeted therapy.

Synonyms:

Gastroesophageal Reflux

Backward flow of gastric contents into the esophagus, caused by transient or persistent relaxation of the lower esophageal sphincter or other mechanical factors.

Synonyms:

Gastroesophageal Reflux Disease

A condition in which repeated reflux of stomach

contents causes troublesome symptoms or complications. See Acid Reflux.

Synonyms:

Gastrogastric intussusception

Rare form of intussusception where one segment of the stomach telescopes into an adjacent gastric segment, typically associated with a lead point such as a gastric polyp, leiomyoma, or carcinoma. Presents with abdominal pain, nausea, vomiting, and occasionally upper gastrointestinal bleeding.

Synonyms:

Gastrograffin Study

X-ray imaging using water-soluble contrast. Used when barium contraindicated (perforation risk). Less detailed than barium.

Synonyms:

Gastrointestinal amyloidosis

Deposition of misfolded amyloid fibrils in the gastrointestinal tract, either as part of systemic amyloidosis (AL, AA, or ATTR types) or rarely as primary localized disease.

Synonyms:

Gastrointestinal Bleeding

Hemorrhage from any part of the gastrointestinal tract classified as upper or lower based on location relative to the ligament of Treitz. Upper gastrointestinal bleeding originating proximal to this landmark typically presents with hematemesis or melena.

Synonyms:

Gastrointestinal Bleeding Scan

Detection of GI bleeding using Tc-99m labeled RBCs. Sensitive for active bleeding (>0.1 mL/min). Localizes bleeding site. Alternative: tagged RBC scan, CT angiography.

Synonyms:

Gastrointestinal Decontamination

Methods: activated charcoal, gastric lavage (rare), whole bowel irrigation (sorbitol, PEG). Timing crit-

ical for charcoal (1-2 hours post-ingestion).

Synonyms:

Gastrointestinal Obstruction

Partial or complete blockage of the passage of intestinal contents through the gastrointestinal tract. It may be mechanical or functional and can cause colicky pain, vomiting, distention, constipation, obstruction, dehydration, bowel ischaemia, perforation, or sepsis.

Synonyms:

Gastrointestinal Pain

Pain arising from the digestive tract or related organs. Causes include indigestion, infection, ulcer disease, inflammation, obstruction, gallstones, and disorders of the liver or pancreas. Severe, persistent, or worsening pain requires medical assessment.

Synonyms:

Gastrointestinal Perforation

A full-thickness defect in the gastrointestinal wall allowing luminal contents to enter the peritoneal or adjacent space. It can cause peritonitis, sepsis, and shock and usually requires urgent imaging, antimicrobial therapy, resuscitation, and source control.

Synonyms:

Gastrointestinal Stromal Tumor

A mesenchymal tumor arising from specialized cells in the gastrointestinal wall, most often in the stomach or small intestine. Many tumors contain activating changes in KIT or PDGFRA; their malignant potential varies.

Synonyms:

Gastrointestinal Villi

Finger-like projections of the small-intestinal mucosa that greatly increase absorptive surface area. Each villus contains blood capillaries and a central lacteal for transport of absorbed nutrients and lipids.

Synonyms:

Gastroparesis

Delayed gastric emptying without mechanical obstruction most commonly caused by diabetes mellitus, post-surgical changes, or idiopathic causes. Presents with nausea, vomiting of undigested food, early satiety, bloating, and abdominal pain. Diagnosed by gastric emptying scintigraphy showing more than ten percent retention at four hours.

Synonyms:

Gastroschisis

A full-thickness abdominal wall defect, usually to the right of the umbilicus, through which bowel herniates without a covering membrane. Not associated with chromosomal abnormalities. Presents at birth with exposed bowel loops that may be edematous, thickened, and discolored from amniotic fluid exposure.

Synonyms:

Gastrospenic fistulization

Abnormal communication between the stomach and spleen, most commonly arising from gastric ulcer erosion into the splenic hilum or as a complication of splenic abscess. Presents with abdominal pain, gastrointestinal hemorrhage, and sepsis.

Synonyms:

Gastrostomy

Surgical creation of an opening (stoma) through the abdominal wall into the stomach for enteral feeding or decompression.

Synonyms:

Gastrostomy Tube

Tube through abdominal wall into stomach for feeding. Percutaneous endoscopic gastrostomy. Indications: prolonged enteral feeding, dysphagia, neurological disorders. Complications: infection, leakage, granulation tissue, burial bumper.

Synonyms:

Gastrulation

A crucial early phase in embryonic development where the single-layered blastula reorganizes into a

multi-layered structure with three germ layers.

Synonyms:

Gaucher Disease

An inherited lysosomal storage disorder caused by deficient glucocerebrosidase, leading to lipid accumulation in cells and possible enlargement of the spleen and liver, anemia, bone disease, or neurologic disease.

Synonyms:

Gaucher's disease

Another name for Gaucher disease, an inherited lysosomal storage disorder caused by deficient glucocerebrosidase.

Synonyms:

Gauze

A woven or nonwoven material used to clean, dress, pack, or absorb fluid from a wound. It may be sterile or nonsterile and comes in several forms.

Synonyms:

Gavage

Feeding through a tube passed into the stomach (nasogastric, orogastric, or gastrostomy tube). Used when oral feeding is impossible or inadequate. In neonates: gavage feeding is used for premature infants unable to coordinate suck-swallow-breathe.

Synonyms:

Gel

A semisolid pharmaceutical formulation in which a liquid (usually water) is immobilized within a three-dimensional network of a gelling agent (e.g., carbomer, cellulose, alginate).

Synonyms:

Gelfoam

An absorbable hemostatic agent made from purified porcine gelatin. Used in surgical settings to control bleeding where conventional hemostasis is difficult (liver, bone, neurosurgery). Mechanism: provides a physical matrix that promotes platelet aggregation and clot formation. Absorbed within 4-6 weeks.

Synonyms:

Gemfibrozil

A fibrate (PPAR-alpha agonist) used primarily for severe hypertriglyceridemia (reducing pancreatitis risk) and mixed hyperlipidemia. Raises HDL and lowers triglycerides markedly; modest LDL lowering.

Synonyms:

Gemination

Attempted division of single tooth bud. Results in large tooth with bifid crown, normal tooth count.

Synonyms:

Gender Dysphoria

Psychological distress resulting from incongruence between one's experienced gender and assigned gender at birth. Persists for ≥ 6 months and causes significant impairment. Onset in childhood (may resolve) or adolescence/adulthood (persistent).

Synonyms:

Gene

Basic unit of heredity, segment of DNA encoding a functional product (protein or RNA). Structure: promoter, coding sequence (exons), introns, terminator. Genes are located at specific positions (loci) on chromosomes.

Synonyms:

Gene Expression

Process by which information from a gene is used to synthesize functional product (protein or RNA). Steps: transcription, RNA processing, translation, post-translational modification. Regulated at multiple levels.

Synonyms:

Gene Panel

A laboratory test that sequences a selected group of genes associated with a clinical phenotype. Panels can provide efficient, focused analysis but may miss variants outside the selected genes or changes poorly detected by the platform.

Synonyms:

Gene Therapy

Treatment by introducing, removing, or changing genetic material. Approaches: gene addition (functional copy), gene silencing (siRNA, antisense), gene editing (CRISPR-Cas9). Examples: Luxturna (RPE65 mutation), Zolgensma (SMN1 in spinal muscular atrophy).

Synonyms:

General Anesthesia

A controlled, reversible state of unconsciousness, analgesia, amnesia, and muscle relaxation induced by pharmacologic agents, enabling surgical procedures without patient awareness or pain.

Synonyms:

General Anesthetic

An agent producing reversible loss of consciousness, amnesia, analgesia, and muscle relaxation sufficient for surgery.

Synonyms:

Generalized Anxiety Disorder

Characterized by excessive, difficult-to-control anxiety and worry about multiple events or activities occurring more days than not for at least six months. Associated symptoms include restlessness, being easily fatigued, difficulty concentrating, irritability, muscle tension, and sleep disturbance.

Synonyms:

Generalized granuloma annulare

A widespread variant of granuloma annulare presenting with numerous small, flesh-coloured to erythematous papules distributed over the trunk and extremities, lacking the classic annular arrangement of localized disease. It is often associated with diabetes mellitus and may be more persistent than localized forms.

Synonyms:

Generalized Tonic-Clonic Seizure

A generalized tonic-clonic seizure (formerly grand mal seizure) is a seizure involving bilateral tonic stiffening followed by rhythmic clonic jerking of the

extremities, with loss of consciousness.

Synonyms:

Generalized-Onset Seizure

A seizure that begins in bilaterally distributed networks and rapidly engages both cerebral hemispheres. Generalized absence, myoclonic, tonic, clonic, atonic, and tonic-clonic seizures are recognized clinical types.

Synonyms:

Generator

System for producing short-lived radionuclide from longer-lived parent. Tc-99m from Mo-99. Elution with saline. Quality control: Mo-99 breakthrough, Al-3+ breakthrough, sterility.

Synonyms:

Generic Medicine

A medicine containing the same active ingredient, strength, dosage form, route, and intended clinical effect as an approved reference product. Regulatory requirements generally include demonstration of pharmaceutical equivalence and bioequivalence.

Synonyms:

Genetic Counseling

Process of helping individuals understand and adapt to genetic aspects of disease. Includes risk assessment, education, psychosocial support, informed decision-making.

Synonyms:

Genetic Counselor

A health professional who evaluates inherited cancer risk, arranges and interprets genetic testing, and provides counseling to patients and families, including cascade testing of relatives.

Synonyms:

Genetic Heterogeneity

The occurrence of similar or related phenotypes caused by different genetic mechanisms. Locus heterogeneity refers to variants in different genes causing the same phenotype; allelic heterogeneity refers

to different variants in the same gene.

Synonyms:

Genetic Screening

Testing of asymptomatic individuals for genetic disorders. Newborn screening: metabolic disorders, hemoglobinopathies. Carrier screening: before pregnancy or during pregnancy. Prenatal screening: non-invasive prenatal testing (NIPT), maternal serum screening.

Synonyms:

Genetic Sonogram

A targeted ultrasound performed at 18-22 weeks that combines standard anatomic survey with specific soft markers for aneuploidy.

Synonyms:

Genetic Testing

Analysis of DNA for disease risk or diagnosis. Examples: BRCA testing, carrier screening.

Synonyms:

Genetic Testing (Sequencing)

Analysis of the order of DNA bases to identify variants associated with genetic disorders. The method is selected according to the gene, variant, and clinical question.

Synonyms: Sequencing

Genetic Variant of Uncertain Significance

A DNA variant for which available evidence is insufficient to classify it as benign or pathogenic. It should not generally be used alone to make predictive or treatment decisions and may be reclassified as evidence evolves.

Synonyms:

Genital Herpes

Herpes simplex virus infection of the genital region (HSV-2 most commonly; HSV-1 increasingly), transmitted sexually, causing painful grouped vesicles/ulcers, urethritis, dysuria, and lymphadenopathy; primary infection may cause fever and systemic symptoms. Recurrent episodes are shorter

and milder.

Synonyms:

Genital Injury

Trauma to the genital or anogenital tissues caused by sexual contact, assault, childbirth, accident, or disease. Examination should document location, morphology, healing stage, pain, bleeding, and associated injuries without assuming mechanism from appearance alone.

Synonyms:

Genital Warts

Soft or rough growths on genital or perianal skin caused by infection with certain types of human papillomavirus.

Synonyms:

Genital Warts (Condylomata Acuminata)

Warts of the genital or anal region caused most often by low-risk types of human papillomavirus. They spread through direct skin-to-skin sexual contact and may be visible or asymptomatic.

Synonyms: Condylomata Acuminata

Genitalia

The external and internal reproductive organs. The term includes the vulva and vagina, or the penis, scrotum, and associated structures, together with the gonads and reproductive ducts when used broadly; anatomy varies with sex, age, and developmental stage.

Synonyms:

Genitals

The external and internal reproductive organs. Female genitals: external (vulva — mons pubis, labia majora, labia minora, clitoris, vaginal opening, Bartholin glands) and internal (vagina, cervix, uterus, fallopian tubes, ovaries).

Synonyms:

Genito-Pelvic Pain/Penetration Disorder

A sexual dysfunction characterized by persistent or recurrent difficulties with vaginal penetration,

marked vulvovaginal or pelvic pain during intercourse, fear or anxiety about penetration, and/or tensing of the pelvic floor muscles, lasting ≥ 6 months and causing marked distress.

Synonyms:

Genodermatoses

Genetic skin disorders. Inherited ichthyoses (lamellar, X-linked, congenital ichthyosiform erythroderma). Epidermolysis bullosa (simplex, junctional, dystrophic). Neurocutaneous syndromes (neurofibromatosis, tuberous sclerosis, Sturge-Weber). Ectodermal dysplasias (hypohidrotic, hypotrichosis, nail dystrophy).

Synonyms:

Genomic Imprinting

Parent-of-origin-specific gene expression. Only one allele (maternal or paternal) is expressed. Examples: Prader-Willi (paternal deletion 15q11-q13), Angelman (maternal deletion 15q11-q13).

Synonyms:

Genotoxicity

The ability of a substance or physical agent to damage genetic material. Genotoxicity may cause mutations or chromosome damage, but a positive test does not by itself establish that an agent causes cancer in humans.

Synonyms:

Genotype

Genetic makeup of an individual, the specific alleles present at one or more loci. Determines phenotype along with environmental factors.

Synonyms:

Geographic Atrophy

The advanced form of dry age-related macular degeneration, characterized by well-demarcated, progressively enlarging areas of complete loss of the retinal pigment epithelium, choriocapillaris, and overlying photoreceptors in the macula, resulting in irreversible central vision loss.

Synonyms:

Geographic tongue

A benign inflammatory condition of the tongue featuring migratory red patches with white or yellow borders, alternating with areas of depapillation, often asymptomatic and of unknown cause.

Synonyms:

Geriatric Assessment

Comprehensive multidimensional evaluation of elderly person. Domains: medical, functional, cognitive, psychological, social, environmental, pharmacological. Performed by interdisciplinary team. Guides care planning, identifies problems, predicts outcomes.

Synonyms:

Geriatric Dentistry

Dental care for elderly. Management of age-related changes, polypharmacy effects, xerostomia, root caries, periodontal disease, oral cancer screening.

Synonyms:

Geriatric Depression Scale

A screening questionnaire designed to detect depressive symptoms in older adults while minimizing emphasis on somatic symptoms that may overlap with medical illness. A positive screen requires clinical diagnostic assessment.

Synonyms:

Geriatric Medical Ethics

Ethical principles applied to care of older adults, including autonomy, capacity, beneficence, non-maleficence, and justice.

Synonyms:

Geriatric Nutrition

Nutrition care addressing the effects of aging, chronic disease, medications, frailty, oral and swallowing problems, sensory changes, and social factors on intake and nutritional status. Goals include preserving function, muscle mass, hydration, and quality of life.

Synonyms:

Geriatric Rehabilitation

Rehabilitation designed to improve function, mobility, independence, and safety in older adults after illness, injury, or functional decline.

Synonyms:

Geriatric Syndrome

Multifactorial condition common in elderly, not attributable to single disease. Examples: falls, incontinence, frailty, delirium, immobility, pressure ulcers. Require comprehensive assessment and multidisciplinary management.

Synonyms:

Geriatrician

A physician specializing in the health care of older adults, including complex illness, multiple conditions, medications, function, and goals of care.

Synonyms:

Geriatrics

The medical specialty concerned with the health, function, and care of older adults.

Synonyms:

Geriatric

An obsolete term formerly used for an older woman; use person-first, age-neutral language instead.

Synonyms:

Germ

A colloquial term for a microorganism that causes disease.

Synonyms:

Germ Cell Tumor

A tumor arising from germ cells (precursors of sperm and eggs), including seminoma, dysgerminoma, teratoma, yolk sac tumor, embryonal carcinoma, and choriocarcinoma. Occurs in the testis, ovary, and extragonadal sites (mediastinum, retroperitoneum, pineal); many are highly curable with platinum-based chemotherapy.

Synonyms:

Germ Theory of Disease

The scientific principle that specific microorganisms cause specific infectious diseases; established in the late 19th century by Koch (postulates—organism present in all cases, isolated in pure culture, reproduces disease when inoculated, re-isolated) and promoted by Pasteur and Lister.

Synonyms:

German Measles (Rubella)

A contagious viral infection caused by rubella virus, characterized by fever, lymph-node enlargement, and a fine rash. Infection during pregnancy can harm the fetus.

Synonyms: Rubella

Germinoma

A germ-cell tumor most commonly arising in the pineal or suprasellar region, highly sensitive to radiation and chemotherapy. Ovarian (dysgerminoma) and testicular (seminoma) counterparts exist.

Synonyms:

Germline Mutation

A genetic variant present in the egg or sperm and therefore present in essentially every cell of the individual. Pathogenic germline variants may confer inherited cancer susceptibility and can have implications for relatives and treatment.

Synonyms:

Germline Testing

Genetic testing performed to identify inherited or potentially heritable variants, usually from blood or saliva. Results may affect the patient, biological relatives, cancer surveillance, reproductive planning, and genetic counseling.

Synonyms:

Germline Variant

A DNA variant present in the cells that give rise to eggs or sperm and therefore potentially transmissible to offspring. It may also be present in most cells of the individual, unlike a variant restricted to a somatic tissue.

Synonyms:

Gerontologist

A specialist who studies aging and its biological, psychological, social, or economic effects.

Synonyms:

Gerontology

The multidisciplinary study of aging and the biological, psychological, social, and environmental factors that influence it.

Synonyms:

Gestation

The period of development of a fetus from fertilization to birth. Human gestation averages 280 days (40 weeks) from the first day of the last menstrual period (LMP) or 266 days (38 weeks) from conception.

Synonyms:

Gestational Age

The age of pregnancy measured in weeks from the first day of the last menstrual period (LMP). Also called menstrual age. Typically 2 weeks longer than fertilization age. Calculated using LMP or first-trimester ultrasound. Used to estimate due date (40 weeks from LMP). Preterm is less than 37 weeks; post-term is beyond 42 weeks.

Synonyms: menstrual age.

Gestational Diabetes

Glucose intolerance first diagnosed during pregnancy. It may increase the risk of excessive fetal growth, birth complications, neonatal hypoglycemia, and hypertensive pregnancy disorders.

Synonyms:

Gestational Diabetes Mellitus

Glucose intolerance first recognized during pregnancy affecting approximately six to nine percent of pregnancies. Results from insulin resistance induced by placental hormones including human placental lactogen, cortisol, and progesterone combined with insufficient beta cell compensation.

Synonyms:

Gestational Hypertension

New-onset hypertension after 20 weeks of pregnancy without proteinuria or other features of preeclampsia. It requires monitoring for progression and assessment of maternal and fetal well-being.

Synonyms:

Gestational Sac

The first sonographic sign of an intrauterine pregnancy, visible on transvaginal ultrasound at approximately 4.5-5 weeks gestational age. A fluid-filled structure within the decidua, surrounded by the chorionic ring. Mean sac diameter (MSD) correlates with gestational age.

Synonyms:

Gestational Trophoblastic Disease

A spectrum of conditions arising from abnormal trophoblast proliferation, including complete and partial hydatidiform moles and gestational choriocarcinoma. Complete mole has 46,XX karyotype (all paternal origin); partial mole is triploid (69 chromosomes). Presents with elevated hCG, uterus large for dates, and vaginal bleeding.

Synonyms:

Gestational Trophoblastic Neoplasia

Persistent or malignant trophoblastic disease after a pregnancy event, identified by abnormal or rising beta-hCG, metastases, or histologic criteria. It includes invasive mole and choriocarcinoma and is highly responsive to risk-adapted chemotherapy.

Synonyms:

Gettler Test

Historical quantitative chemical test for drowning, comparing chloride concentration in blood harvested from the left and right heart ventricles.

Synonyms:

Ghrelin

A hormone produced mainly in the stomach that influences appetite, energy balance, and growth-

hormone release.

Synonyms:

Giant Cell Arteritis

A large-vessel vasculitis of adults >50 (peak 70-80) affecting cranial branches of carotid arteries, with risk of permanent vision loss from anterior ischemic optic neuropathy. Clinical: new-onset headache (temporal), scalp tenderness, jaw claudication, visual disturbances (amaurosis fugax, diplopia), polymyalgia rheumatica symptoms.

Synonyms:

Giant Cell Arteritis Emergency

Suspected giant cell arteritis with visual symptoms, jaw or tongue claudication, or neurologic ischemia requires immediate glucocorticoid treatment to reduce risk of irreversible visual loss while diagnostic evaluation proceeds.

Synonyms:

Giant Coronary Aneurysm

An unusually large dilation of a coronary artery, with risk of thrombosis, rupture, or impaired coronary blood flow.

Synonyms:

Giant right atrium

Marked dilatation of the right atrium, most commonly caused by chronic severe tricuspid regurgitation, Ebstein anomaly, or long-standing atrial fibrillation with right heart failure. The enlarged atrium may cause compression of adjacent structures, arrhythmias, and thrombus formation. Diagnosis is by echocardiography or cardiac imaging.

Synonyms:

Giardia Infection

Intestinal infection caused by the protozoan *Giardia duodenalis*, usually acquired from contaminated water, food, or person-to-person spread. It commonly causes foul-smelling diarrhea, bloating, abdominal cramps, and malabsorption.

Synonyms:

Giardia lamblia

A protozoan parasite that causes giardiasis, a diarrhoeal illness transmitted through the fecal-oral route. The organism has a trophozoite and cyst stage. Infection occurs through ingestion of cysts in contaminated water. Symptoms include foul-smelling diarrhea, abdominal cramps, and bloating.

Synonyms:

Giardiasis

Infection with *Giardia lamblia* (*G. intestinalis*), a protozoan parasite causing diarrheal illness. Transmission via contaminated water (fecal-oral). Presents with foul-smelling, greasy diarrhea, bloating, abdominal cramps, weight loss, and steatorrhea. Diagnosis: stool antigen testing or microscopy. Treatment: metronidazole or tinidazole.

Synonyms:

Giemsa Stain

A Romanowsky-type stain of methylene blue and eosin dyes used to visualise blood cells and microorganisms in smears and tissue sections. In microbiology it stains *Plasmodium*, *Babesia*, *Trypanosoma*, *Leishmania*, *Borrelia*, and intracellular cytomegalovirus inclusions, supporting rapid diagnosis of blood-borne parasitic and other infections.

Synonyms:

Gigantism

A rare condition of excessive growth and tall stature caused by growth hormone (GH) hypersecretion that begins before epiphyseal plate closure in childhood, before the onset of puberty.

Synonyms:

Gilbert Syndrome

A common, benign autosomal recessive hereditary hyperbilirubinemia caused by a promoter mutation in the *UGT1A1* gene leading to reduced activity (30% of normal) of UDP-glucuronosyltransferase.

Synonyms:

Gingival Hyperplasia

An abnormal overgrowth of gingival tissue around

the teeth, which can impair plaque control, increase the risk of periodontal disease, and affect aesthetics. It can be caused by chronic inflammatory conditions (associated with poor oral hygiene) or systemic factors.

Synonyms:

Gingival melanoma

A rare and aggressive mucosal melanoma arising from melanocytes in the gingival mucosa, presenting as a pigmented or amelanotic nodule or ulcer on the gums. Mucosal melanomas of the head and neck carry a poor prognosis compared to cutaneous melanoma, often presenting at an advanced stage.

Synonyms:

Gingival Recession

Apical displacement of the gingival margin from the cemento-enamel junction, exposing the root surface. Causes include periodontal inflammation, traumatic toothbrushing, thin periodontal tissue, tooth position, and iatrogenic factors; it may produce sensitivity and root-carries risk.

Synonyms:

Gingivectomy

Surgical removal of gingival tissue. Indications: gingival hyperplasia, cosmetic recontouring, access to caries.

Synonyms:

Gingivitis

Inflammation of gums without bone loss. Caused by dental plaque accumulation. Signs: redness, swelling, bleeding on probing. Reversible with improved oral hygiene and professional cleaning. If untreated, progresses to periodontitis.

Synonyms:

Gingivoplasty

Surgical reshaping of gingiva. Often combined with gingivectomy.

Synonyms:

Gingivostomatitis

Inflammation of the gums and oral mucosa, commonly caused by primary herpes simplex infection but also associated with other infections, trauma, or systemic disease. It may cause painful ulcers, swollen bleeding gums, fever, and difficulty eating or drinking.

Synonyms:

Gitelman Syndrome

Inherited autosomal recessive disorder of the distal convoluted tubule caused by mutations in the NCC sodium-chloride cotransporter gene. Milder than Bartter syndrome typically presenting in adolescence or adulthood.

Synonyms:

Gland

An organized group of epithelial cells specialized for secretion.

Synonyms:

Glandular Fever (Infectious Mononucleosis)

An acute illness usually caused by Epstein-Barr virus, characterized by fever, sore throat, swollen lymph nodes, and fatigue.

Synonyms: Infectious Mononucleosis

Glanzmann thrombasthenia

An inherited platelet aggregation disorder caused by deficient or dysfunctional glycoprotein IIb/IIIa, producing mucocutaneous bleeding despite a normal platelet count.

Synonyms:

Glasgow Coma Scale

A standardized assessment of consciousness based on eye opening, verbal response, and motor response, with a total score from 3 to 15. It supports serial neurologic assessment but should be recorded with the individual component scores and confounders.

Synonyms:

Glass Ionomer

Restorative material releasing fluoride. Bonds to tooth structure. Used for pediatric dentistry, cervical lesions, bases.

Synonyms:

Glaucoma

A group of progressive optic neuropathies characterized by the degeneration of retinal ganglion cells and their axons, resulting in characteristic optic nerve head changes and visual field loss, with elevated intraocular pressure being the most important modifiable risk factor.

Synonyms:

Glaucoma Drainage Implant

A surgically implanted tube-and-plate device that diverts aqueous humor from the anterior chamber to a subconjunctival reservoir, lowering intraocular pressure in selected glaucomas.

Synonyms:

Glenohumeral Joint

Ball-and-socket synovial joint between humeral head and glenoid cavity. Most mobile body joint allowing flexion, extension, abduction, adduction, medial/lateral rotation, circumduction. Mobility trades for stability, making it the most commonly dislocated joint. Stabilized by glenoid labrum, glenohemoral ligaments, and rotator cuff.

Synonyms:

Glenoid Cavity

Shallow pear-shaped depression on the lateral scapular angle articulating with the humeral head. The glenoid labrum deepens the socket by approximately 50 percent. Due to its shallowness, the glenohumeral joint is the most commonly dislocated joint.

Synonyms:

GLIM Criteria

A consensus framework for diagnosing malnutrition using at least one phenotypic criterion, such as weight loss, low body-mass index, or reduced muscle mass, and at least one etiologic criterion, such as

reduced intake or assimilation or disease-related inflammation. Severity is graded using phenotypic thresholds.

Synonyms:

Glioblastoma

Grade IV astrocytoma (WHO), the most common and aggressive primary malignant brain tumor in adults. Arises de novo (primary GBM, IDH-wildtype) or from low-grade astrocytoma (secondary, IDH-mutant—better prognosis).

Synonyms:

Glioma

A tumor arising from glial cells (astrocytes, oligodendrocytes, ependymal cells) in the brain or spinal cord. Includes astrocytomas, oligodendrogliomas, and ependymomas; behavior ranges from low-grade to highly aggressive (glioblastoma).

Synonyms:

Glisson's Capsule

Thin fibrous connective tissue envelope surrounding the liver, sending septa inward dividing it into lobules. Richly innervated by phrenic and intercostal nerve pain fibers, sensitive to distension and inflammation. Covered by visceral peritoneum except at the bare area.

Synonyms:

Global Health

Health issues transcending national boundaries. Examples: pandemics, health disparities, climate change.

Synonyms:

Globin

A family of heme-binding proteins involved in oxygen transport and storage. Structure: globin fold (8 alpha-helices arranged in a globular structure), binds one heme molecule (iron-protoporphyrin IX) per subunit.

Synonyms:

Globulin

A group of serum proteins (globular proteins) that are less soluble in water but soluble in dilute salt solutions. On serum protein electrophoresis, globulins migrate in the alpha-1, alpha-2, beta, and gamma regions. Alpha-1 globulins: alpha-1-antitrypsin, alpha-fetoprotein.

Synonyms:

Globus Sensation

The persistent or intermittent sensation of a lump or foreign body in the throat without an anatomic lesion or dysphagia, also termed globus pharyngeus, typically noticed between meals. There is no impediment to swallowing and no weight loss; the feeling worsens with stress, anxiety, or laryngopharyngeal reflux.

Synonyms:

Glomerular Filtration Rate

Volume of plasma filtered by the glomeruli per unit time normally ninety to one hundred twenty milliliters per minute per one point seven three square meters body surface area. Estimated by the CKD-EPI equation using serum creatinine, age, sex, and race.

Synonyms:

Glomerulonephritis

Inflammation of the glomeruli, classified by clinical presentation (nephritic vs. nephrotic syndrome) and histopathology (e.g., IgA nephropathy, post-streptococcal, membranoproliferative, crescentic). Presents with hematuria, proteinuria, hypertension, and reduced GFR.

Synonyms:

Glomerulopathy

Any disease affecting the renal glomeruli, the capillary structures responsible for blood filtration. It may produce albuminuria or proteinuria, haematuria, reduced filtration, oedema, hypertension, or kidney failure and may be primary or secondary to systemic, metabolic, infectious, or immune disease.

Synonyms:

Glomerulus

The tuft of capillaries in the renal corpuscle (Bowman's capsule) where blood is filtered to form urine.

Synonyms:

Glomus Tumor

A rare benign neoplasm arising from glomus bodies (thermoregulatory shunts), presenting as a small, blue-red, exquisitely tender subungual or digital nodule. The classic triad is severe pain, point tenderness, and cold sensitivity. Diagnosis is clinical with positive Love pin test and Hildreth sign (tumor disappears with ischemia).

Synonyms:

Glomus tympanicum

A benign vascular tumor arising from the glomus bodies on the promontory of the middle ear, presenting with pulsatile tinnitus, hearing loss, and a reddish mass behind the tympanic membrane.

Synonyms:

Glossitis

Inflammation of the tongue. Causes: (1) Infection: bacterial (*Streptococcus*, *Actinomyces*), viral (HSV, Coxsackie-herpangina, HIV), fungal (*Candida*-oral thrush).

Synonyms:

Glossopharyngeal Neuralgia

Recurrent, brief attacks of severe stabbing or electric-shock-like pain in the throat, tonsillar region, base of the tongue, or ear, caused by irritation of the glossopharyngeal nerve. Swallowing, coughing, or talking may trigger attacks.

Synonyms:

Glottis

The opening between the vocal folds (true vocal cords) in the larynx, through which air passes during respiration and phonation. Boundaries: anterior (anterior commissure, attachment of vocal folds to thyroid cartilage), posterior (arytenoid cartilages and posterior commissure).

Synonyms:

Gloves

Hand coverings used to protect the wearer, the patient, or both from contamination, chemicals, or injury. Medical gloves may be examination or surgical gloves and may be sterile or nonsterile.

Synonyms:

GLP-1 Receptor Agonist

A glucose-lowering drug that activates the glucagon-like peptide-1 receptor, enhancing glucose-dependent insulin secretion, suppressing inappropriate glucagon secretion, slowing gastric emptying, and increasing satiety.

Synonyms:

Glucagon

A peptide hormone produced by the alpha cells of the pancreatic islets (Langerhans).

Synonyms:

Glucagon Signaling

Glucagon binds GPCR, activates adenylate cyclase, increases cAMP, activates PKA. Promotes glycogenolysis, gluconeogenesis.

Synonyms:

Glucagonoma

A rare pancreatic neuroendocrine tumor secreting glucagon. Classic presentation: 4 Ds — diabetes mellitus (mild, new onset), dermatitis (necrolytic migratory erythema, characteristic painful, erythematous, blistering rash on groin, perineum, extremities), diarrhea, and deep vein thrombosis.

Synonyms:

Glucocorticoid Replacement Therapy

Replacement of cortisol deficiency in adrenal insufficiency using hydrocortisone in divided doses. Typical regimen is ten to fifteen milligrams in the morning and five to ten milligrams in the early afternoon mimicking the physiological cortisol diurnal rhythm.

Synonyms:

Glucocorticoid-Sparing Therapy

Use of a non-glucocorticoid treatment strategy to control inflammation while reducing cumulative corticosteroid exposure. It aims to limit osteoporosis, infection, diabetes, hypertension, adrenal suppression, and other glucocorticoid complications.

Synonyms:

Glucocorticoids

A class of steroid hormones produced by the zona fasciculata of the adrenal cortex, regulated by the hypothalamic-pituitary-adrenal (HPA) axis.

Synonyms:

Glucometer

A handheld device that measures blood glucose, usually from a small capillary-blood sample obtained by finger prick.

Synonyms:

Gluconeogenesis

Metabolic pathway generating glucose from non-carbohydrate precursors (lactate, glycerol, glucogenic amino acids). Occurs primarily in liver (90%) and kidney (10%).

Synonyms:

Glucose

A monosaccharide (C₆H₁₂O₆) that is the primary energy source for cells. Types: D-glucose (dextrose, naturally occurring enantiomer) and L-glucose (synthetic). Routes of entry: dietary carbohydrates (digested to glucose), gluconeogenesis (synthesis from non-carbohydrate precursors), glycogenolysis (breakdown of stored glycogen).

Synonyms:

Glucose Intolerance

Impaired handling of glucose resulting in blood-glucose concentrations above normal but below the diagnostic threshold for diabetes in a defined testing context. It often reflects insulin resistance or inadequate insulin secretion and is associated with increased risk of type 2 diabetes and cardiovascular disease.

Synonyms:

Glucose Management Indicator

Derived metric from continuous glucose monitoring that estimates the hemoglobin A1c equivalent based on mean sensor glucose values. Formula converts mean glucose to an A1c-equivalent value allowing comparison between CGM data and traditional A1c.

Synonyms:

Glucose Sensor

Continuous glucose monitor (CGM) for diabetes. Subcutaneous sensor measures interstitial glucose. Transmitter sends data to receiver/phone. Examples: Dexcom, Freestyle Libre, Medtronic. Reduces hypoglycemia, improves A1c.

Synonyms:

Glucose Tolerance Test

Testing for diabetes mellitus and gestational diabetes. 75g OGTT (oral glucose tolerance test): measure plasma glucose at 0, 60, and 120 minutes. Diagnostic: fasting ≥ 126 mg/dL, 2-hour ≥ 200 mg/dL. Gestational diabetes screening: 50g glucose challenge test (GCT) at 24-28 weeks; if >140 mg/dL at 1 hour, proceed to 100g 3-hour OGTT.

Synonyms: Oral glucose tolerance test (OGTT); gestational diabetes glucose tolerance test.

Glucose Challenge Test

A screening test for gestational diabetes mellitus, commonly using a nonfasting 50-g glucose drink followed by a one-hour plasma-glucose measurement. An abnormal screening result is followed by a diagnostic oral glucose tolerance test; the threshold depends on the protocol used.

Synonyms: GCT; one-hour glucose challenge test; 50-g glucose screening test.

Glucose-6-Phosphatase

Enzyme converting glucose-6-phosphate to glucose. Located in liver and kidney. Deficiency causes Von Gierke disease.

Synonyms:

Glucose-6-phosphate dehydrogenase deficiency

An X-linked enzymopathy affecting approximately 400 million people worldwide, causing episodes of hemolytic anemia triggered by oxidative stress from infections, certain drugs including primaquine and sulfonamides, and fava beans. G6PD is essential for generating NADPH to protect red blood cells from oxidative damage.

Synonyms:

Glue (Vascular)

A vascular embolization material used to occlude selected vessels under image guidance.

Synonyms: Vascular

Glutamate

The principal excitatory neurotransmitter in the central nervous system. Synthesized from glutamine or alpha-ketoglutarate and acting on ionotropic receptors (AMPA, kainate, NMDA) for fast synaptic transmission and metabotropic receptors (mGluR1-8) for modulation.

Synonyms:

Glutathione

Antioxidant tripeptide (Glu-Cys-Gly). Detoxifies reactive metabolites (e.g., NAPQI from acetaminophen). Depletion causes toxicity. N-acetylcysteine replenishes glutathione.

Synonyms:

Gluteal Injury

Damage to the muscles, tendons, nerves, or soft tissues of the buttock caused by trauma, overuse, injection, or falls. Pain, bruising, weakness, or difficulty walking may occur. Severe swelling, numbness, inability to bear weight, or bowel or bladder changes requires urgent evaluation.

Synonyms:

Gluten

A complex of storage proteins (prolamins and glutelins) found in wheat (gliadin), barley (hordein), and rye (secalin). Gluten provides elasticity to

dough. In susceptible individuals, gluten triggers an autoimmune response (celiac disease) or non-autoimmune sensitivity (non-celiac gluten sensitivity, NCGS).

Synonyms:

Gluten-Free Diet

Eliminates gluten (wheat, barley, rye). Essential for celiac disease, non-celiac gluten sensitivity. Risk of nutrient deficiency if not supplemented. May be unnecessarily restrictive for others.

Synonyms:

Gluten-Sensitive Enteropathy (Celiac Disease)

An immune-mediated disorder in which ingestion of gluten damages the lining of the small intestine in genetically susceptible people. It may cause diarrhea, malabsorption, anemia, or other systemic effects.

Synonyms: Celiac Disease

Gluteus Maximus Muscle

Largest, most superficial gluteal muscle forming the buttock bulk, from posterior iliac gluteal line, sacrum, coccyx, and sacrotuberous ligament to the iliotibial tract and gluteal tuberosity. Innervated by inferior gluteal nerve (L5-S2). Primary hip extensor and lateral rotator.

Synonyms:

Gluteus Medius Muscle

Thick fan-shaped muscle between maximus and minimus, from external ilium to the greater trochanter. Innervated by superior gluteal nerve (L4-S1). Primary hip abductor essential for pelvic stability during single-leg stance. Superior gluteal nerve injury causes Trendelenburg sign with contralateral pelvic drop.

Synonyms:

Gluteus Minimus Muscle

The smallest and deepest gluteal muscle, extending from the outer ilium to the greater trochanter. It abducts and medially rotates the hip and helps

stabilize the pelvis during walking.

Synonyms:

Glycaemia

The concentration of glucose in the blood, normally maintained within a narrow range (fasting: 3.9-5.5 mmol/L or 70-100 mg/dL) through the coordinated action of insulin (lowers glucose) and counter-regulatory hormones (glucagon, cortisol, catecholamines, growth hormone).

Synonyms:

Glycemic Control

Management of blood glucose to individualized targets that reduce symptoms and long-term complications while avoiding hypoglycemia. Goals and monitoring methods depend on age, health, treatment, pregnancy, and patient circumstances.

Synonyms:

Glycemic Index

Ranking of carbohydrates by effect on blood glucose. High GI foods spike glucose. Low GI foods provide sustained energy. Useful for diabetes management.

Synonyms:

Glycemic Load

A measure that combines a food's glycemic index with the amount of available carbohydrate in a serving to estimate its effect on blood glucose.

Synonyms:

Glycerin

A colorless, odorless, sweet-tasting trihydroxy alcohol (glycerol) with humectant, osmotic, and solvent properties.

Synonyms:

Glycerol (Glycerine)

A triol compound (CH₂OH-CHOH-CH₂OH), a colourless, odourless, viscous liquid with a sweet taste.

Synonyms: Glycerine

Glycogen

A branched polysaccharide composed of glucose units linked by alpha-1,4 glycosidic bonds (linear) and alpha-1,6 bonds (branching points, every 8-10 residues). Glycogen serves as the main storage form of glucose in animals.

Synonyms:

Glycogen Storage Disease

A group of inherited metabolic disorders caused by defects in glycogen synthesis, breakdown, or regulation, resulting in abnormal glycogen accumulation in tissues. Major types: Type I (von Gierke, G6PC deficiency) — fasting hypoglycemia, lactic acidosis, hepatomegaly, hyperuricemia, and hypertriglyceridemia.

Synonyms:

Glycogenesis

The synthesis of glycogen from glucose, primarily in liver and skeletal muscle. Glucose-1-phosphate is converted to UDP-glucose, and glycogen synthase and the branching enzyme extend and branch the polymer; insulin promotes the pathway.

Synonyms:

Glycogenolysis

Breakdown of glycogen to glucose-1-phosphate (converted to glucose-6-phosphate). Liver glycogenolysis maintains blood glucose during fasting; muscle glycogenolysis provides energy for contraction. Regulated by hormonal signals (glucagon, epinephrine) and allosteric effectors (AMP activates phosphorylase).

Synonyms:

Glycolysis

Metabolic pathway breaking down glucose (6C) to pyruvate (3C), generating 2 ATP (net) and 2 NADH. Occurs in cytoplasm. Ten enzymatic steps: investment phase (uses 2 ATP) and payoff phase (produces 4 ATP, 2 NADH). Key regulatory enzymes: hexokinase, phosphofructokinase-1 (PFK-1, rate-limiting), pyruvate kinase.

Synonyms:

Glycosuria

The presence of glucose in the urine. Normally, the renal tubules reabsorb filtered glucose via sodium-glucose co-transporters (SGLT2 in proximal tubule). Glycosuria occurs when blood glucose exceeds the renal threshold (approximately 10 mmol/L or 180 mg/dL), overwhelming reabsorptive capacity.

Synonyms:

GnRH Agonist

Gonadotropin-releasing hormone agonists are a class of medications that initially stimulate (flare effect, 1-3 weeks) and then suppress pituitary gonadotropin (LH and FSH) secretion through receptor down-regulation, leading to profound suppression of sex steroid production (testosterone in men, estradiol in women).

Synonyms:

GnRH Antagonist

A class of medications that competitively block GnRH receptors on pituitary gonadotrophs, producing immediate, reversible suppression of LH and FSH secretion without the initial flare effect seen with GnRH agonists.

Synonyms:

Goal Attainment Scaling

An individualized outcome method in which patient-specific goals are defined with graded levels of expected attainment and scored after intervention. It captures meaningful changes that standardized measures may miss.

Synonyms:

Goal Setting

SMART goals: Specific, Measurable, Achievable, Relevant, Time-bound. Patient-centered goals improve adherence.

Synonyms:

Goals-of-Care Discussion

A clinical conversation that aligns treatment recommendations with a patient's values, priorities, prognosis, acceptable burdens, and preferred outcomes.

It may include decisions about hospitalization, resuscitation, artificial nutrition, and comfort-focused care.

Synonyms:

Goiter

Enlargement of the thyroid gland, which can be diffuse or nodular. Causes: iodine deficiency (most common worldwide), Hashimoto thyroiditis, Graves disease, multinodular goiter, and thyroid cancer. May be associated with normal, hyperthyroid, or hypothyroid function.

Synonyms:

Gold Alloy

Noble metal alloy for dental restorations. Excellent biocompatibility, durability, marginal adaptation. Expensive.

Synonyms:

Goldenhar Syndrome

A variant of hemifacial microsomia characterized by the triad: epibulbar dermoids (benign conjunctival tumors), preauricular skin tags or sinuses, and vertebral anomalies (hemivertebrae, fused vertebrae, scoliosis). Also involves facial asymmetry, microtia, conductive hearing loss, and macrostomia.

Synonyms:

Goldmann Tonometry

A slit-lamp examination that estimates intraocular pressure by measuring the force needed to flatten a defined area of the cornea.

Synonyms:

Golfer Elbow

Medial epicondylitis, a tendinopathy of the common flexor/pronator tendon at the medial epicondyle. Less common than tennis elbow. Caused by repetitive wrist flexion and forearm pronation. Presents with medial elbow pain worsened by wrist flexion and gripping. Tenderness over the medial epicondyle. Positive Golfer elbow test.

Synonyms:

Golgi Apparatus

Membrane-bound organelle (Golgi complex) consisting of flattened cisternae (cis, medial, trans) that modifies, sorts, and packages proteins and lipids from the ER for secretion or delivery to other organelles.

Synonyms:

Golgi Tendon Organ

A mechanoreceptor located at the junction between a skeletal muscle and its tendon, innervated by Ib afferent fibers. The Golgi tendon organ detects tension generated by muscle contraction or passive stretch.

Synonyms:

Gonadal Dysgenesis

Incomplete or abnormal development of the ovaries or testes, often resulting from chromosomal abnormalities, gene variants, or disordered sex development. It may cause atypical genital development, delayed or absent puberty, infertility, and abnormal gonadal hormone production.

Synonyms:

Gonadotrophins

Hormones that stimulate the gonads. The anterior pituitary secretes follicle-stimulating hormone (FSH) and luteinising hormone (LH), both glycoprotein hormones sharing a common alpha subunit (identical to TSH and hCG alpha) with a unique beta subunit.

Synonyms:

Gonads

The primary reproductive organs: testes in males and ovaries in females. Functions: (1) gamete production (spermatogenesis in testes, oogenesis in ovaries); (2) sex steroid hormone secretion (testosterone from testicular Leydig cells; estrogen and progesterone from ovarian follicular cells and corpus luteum).

Synonyms:

Gonioscopy

An ophthalmological examination technique that allows direct visualization of the anterior chamber angle, the anatomical region where the cornea and iris meet and where the trabecular meshwork is located, and it is essential for distinguishing between open-angle and angle-closure forms of glaucoma.

Synonyms:

Gonococcal Arthritis

A disseminated infection of joints caused by *Neisseria gonorrhoeae*, often with fever, migratory joint or tendon pain, skin pustules, and tenosynovitis. It requires prompt antimicrobial treatment and evaluation for concomitant sexually transmitted infection.

Synonyms:

Gonococcal pharyngitis

Infection of the throat by *Neisseria gonorrhoeae*, usually acquired through sexual contact. It may cause sore throat or no symptoms.

Synonyms:

Gonorrhea

A sexually transmitted infection caused by the Gram-negative diplococcus *Neisseria gonorrhoeae*. Epidemiology: second most common bacterial STI (after Chlamydia), highest incidence in 15-24 year olds.

Synonyms:

Goodpasture Syndrome

Anti-GBM disease affecting both kidneys and lungs. Pulmonary hemorrhage with hemoptysis and crescentic GN. Linear IgG deposits on renal biopsy. Emergent plasmapheresis, cyclophosphamide, and steroids. Early treatment essential to prevent irreversible renal and pulmonary damage.

Synonyms:

Gotttron Papules

A characteristic skin finding of dermatomyositis, consisting of erythematous to violaceous lichenoid papules located over the dorsal aspects of the interphalangeal (PIP/DIP) and metacarpophalangeal

(MCP) joints. May undergo necrosis or ulceration.

Synonyms:

Gout

A crystal-deposition disease caused by monosodium urate crystals in joints or tissues. It produces episodes of acute inflammatory arthritis and may cause chronic tophi or kidney stones.

Synonyms:

Gout Flare

An acute inflammatory response to monosodium urate crystal deposition in or around a joint. It commonly causes abrupt severe pain, swelling, warmth, and erythema, often involving the first metatarsophalangeal joint; aspiration can confirm crystals and exclude infection.

Synonyms:

Gout nodulosis

The formation of tophi—large, firm, subcutaneous nodules composed of monosodium urate crystals—resulting from chronic, poorly controlled hyperuricemia. Tophi most commonly occur at the ears, fingers, toes, olecranon bursae, and Achilles tendon, and may ulcerate and discharge chalky white material.

Synonyms:

Gown

Protective clothing. Types: examination, surgical, isolation.

Synonyms:

Grade

Degree of cellular differentiation. Grade 1: well-differentiated. Grade 2: moderately differentiated. Grade 3: poorly differentiated. Grade 4: undifferentiated. Higher grade = more aggressive.

Synonyms:

Graded Potentials

Local changes in membrane potential that vary in magnitude proportional to stimulus strength, unlike all-or-none action potentials. They include recep-

tor potentials (in sensory receptors), postsynaptic potentials (EPSPs and IPSPs at synapses), and pacemaker potentials (in cardiac/specialized cells).

Synonyms:

Graft

Tissue or a synthetic material transferred to another site to replace, repair, reinforce, or bypass a damaged body structure.

Synonyms:

Graft (Periodontal)

Tissue used to cover exposed root or augment gingiva. Connective tissue graft (gold standard), free gingival graft, allograft, xenograft.

Synonyms: Periodontal

Graft-Versus-Host Disease

An immune-mediated complication of allogeneic hematopoietic transplantation in which donor-derived immunocompetent T cells attack recipient tissues. Acute or chronic GVHD commonly affects skin, liver, and gastrointestinal tract and requires prevention and immunosuppressive treatment.

Synonyms:

Grafting

The surgical transfer of tissue or a synthetic substitute to repair, replace, or support a body structure. An autograft comes from the same person, whereas an allograft comes from another person of the same species.

Synonyms:

Gram Negative Bacilli

Rod-shaped gram-negative bacteria appearing pink on Gram stain owing to a thin peptidoglycan layer and lipopolysaccharide outer membrane.

Synonyms:

Gram Positive Cocci

Spherical gram-positive bacteria staining purple owing to a thick peptidoglycan layer and absent outer membrane. Clinically important genera include *Staphylococcus*, *Streptococcus*, and *Enterococcus*,

identifiable by arrangement (clusters, chains, pairs) and hemolysis, and causing skin, pharyngeal, respiratory, and bloodstream infections.

Synonyms:

Gram stain

A differential staining technique that classifies bacteria into two major groups based on cell wall structure. The procedure involves crystal violet staining, iodine mordant, alcohol decolorisation, and safranin counterstain.

Synonyms:

Gram-Negative Bacteria

Bacteria that do not retain crystal violet during Gram staining and therefore appear pink or red. They have a thin peptidoglycan layer and an outer membrane that may contain lipopolysaccharide. Examples include *Escherichia coli*, *Klebsiella*, *Pseudomonas*, and *Neisseria*.

Synonyms:

Gram-Negative Meningitis

Meningitis caused by gram-negative bacteria, including *Escherichia coli*, *Klebsiella*, and *Neisseria* species. It can progress rapidly to sepsis, neurologic injury, and death and requires urgent cerebrospinal-fluid evaluation and antimicrobial treatment.

Synonyms:

Gram-Positive Bacteria

Bacteria that retain crystal violet in the Gram stain (appear purple/blue), characterized by a thick peptidoglycan cell wall and no outer membrane.

Synonyms:

Grand Mal

A type of generalised seizure characterized by bilateral synchronous epileptic activity involving the entire brain. Formerly called grand mal, now classified as bilateral tonic-clonic seizure according to the ILAE 2017 classification.

Synonyms:

Granular Casts

Degenerated cellular debris within tubular lumen appearing as coarse or fine-grained structures. Coarse casts represent more acute process, fine casts indicate chronic degenerative process. Common in acute tubular necrosis reflecting tubular epithelial cell damage. Also seen in chronic kidney disease, nephrotic syndrome, and hypertension.

Synonyms:

Granulocyte

A type of white blood cell (leukocyte) containing cytoplasmic granules that are visible on light microscopy. Granulocytes are produced in the bone marrow (myelopoiesis, 3-4 days maturation) and are part of the innate immune system.

Synonyms:

Granuloma

A distinctive pattern of chronic inflammation characterized by the aggregation of modified macrophages (epithelioid histiocytes), often with multinucleated giant cells (Langhans or foreign-body type), surrounded by lymphocytes. Granulomas form when macrophages cannot eliminate a persistent antigen or pathogen.

Synonyms:

Granuloma Annulare

A benign inflammatory condition characterized by annular, erythematous to skin-colored plaques with raised borders and central clearing. It most commonly affects the hands, feet, and elbows. Localized form is most common; generalized form is associated with diabetes mellitus.

Synonyms:

Granulomatosis with Polyangiitis

GPA (formerly Wegener granulomatosis): an ANCA-associated small-vessel necrotizing vasculitis affecting the upper and lower respiratory tract and kidneys.

Synonyms:

Granulomatous amebic encephalitis

A rare, usually fatal central nervous system infection caused by free-living amoebae such as *Acanthamoeba* species, typically affecting immunocompromised individuals. It presents with a subacute to chronic meningoencephalitis and forms granulomatous lesions in the brain.

Synonyms:

Granulomatous Inflammation

A distinctive pattern of chronic inflammation characterized by organized collections of activated macrophages that have undergone morphological transformation into epithelioid cells, often surrounded by a rim of lymphocytes and occasionally fibroblasts.

Synonyms:

Granulosa Cell Tumor

An estrogen-secreting ovarian sex cord-stromal tumor that can cause precocious puberty, endometrial hyperplasia, or carcinoma. Generally low-grade with a tendency to late recurrence.

Synonyms:

Graves Disease

Autoimmune disorder and most common cause of hyperthyroidism characterized by thyroid-stimulating immunoglobulins that bind and activate the thyroid-stimulating hormone receptor causing unregulated thyroid hormone synthesis and secretion. The diffuse goiter reflects TSH receptor stimulation.

Synonyms:

Gray (Gy)

The SI unit of absorbed radiation dose, equal to one joule of ionizing radiation energy deposited per kilogram of matter. It describes physical energy absorption and differs from the sievert, which incorporates biologic weighting.

Synonyms: Gy

Gray Matter

Regions of the brain and spinal cord composed primarily of nerve cell bodies, dendrites, and synapses,

responsible for processing information.

Synonyms:

Greater Curvature

Convex lateral stomach border from gastroesophageal junction to pylorus, approximately four times longer than the lesser curvature. Attachment site for the greater omentum. Blood supply from short gastric and left gastroepiploic vessels. Common site for gastric ulcers and cancer.

Synonyms:

Greater Trochanter

Large quadrilateral lateral proximal femoral prominence. Insertion for gluteus medius/minimus and piriformis. Palpable landmark and site of trochanteric bursa. Intertrochanteric fractures between trochanters are extracapsular with lower avascular necrosis risk because periosteal blood supply is preserved.

Synonyms:

Grey Turner's Sign

Bluish or violaceous ecchymosis of the flanks caused by retroperitoneal bleeding tracking through the abdominal wall. It is classically associated with severe haemorrhagic pancreatitis but may occur with other retroperitoneal haemorrhage.

Synonyms:

Grid Implant

A flexible electrode array placed on or near the brain or another tissue surface to record electrical activity or deliver stimulation.

Synonyms:

Grief

A natural emotional response to loss, particularly the death of a loved one, but also following other significant losses such as divorce, job loss, or declining health. It encompasses a range of feelings including sadness, anger, guilt, and numbness, often occurring in waves rather than linear stages.

Synonyms:

Gripping

Cramping or spasmodic abdominal pain, often caused by contractions or obstruction of a hollow organ.

Synonyms:

Grippe

An older name for influenza, a viral respiratory illness that commonly causes fever, cough, body aches, and fatigue.

Synonyms:

Griscelli Syndrome

Three types: Type 1 (MYO5A mutation): primary neurologic impairment, no immunodeficiency; Type 2 (RAB27A mutation): immunodeficiency + partial albinism, HLH risk; Type 3 (MLPH mutation): only partial albinism. Type 2: silvery hair, large melanosomes in melanocytes, defective cytotoxic granule release -> HLH.

Synonyms:

Gross Examination

The macroscopic, naked-eye inspection of a specimen in the pathology laboratory, performed before microscopic sectioning and the essential first step in pathologic diagnosis of resected tissues and organs.

Synonyms:

Gross Motor Skills

The ability to use large muscle groups for movement and posture, developing in a predictable sequence in infancy/childhood: head control (3 months), sitting (6 months), crawling (9 months), standing (10-12 months), walking (12-18 months), running/jumping (2-3 years), hopping and balance (3-5 years).

Synonyms:

Ground-Glass Opacity

Hazy lung opacity on CT without obscuring vessels. Non-specific, may represent inflammation, edema, fibrosis, malignancy.

Synonyms:

Group A Strep

Group A Streptococcus (*Streptococcus pyogenes*), a gram-positive coccus in chains, beta-hemolytic. Infections: pharyngitis/tonsillitis, impetigo, erysipelas, cellulitis, scarlet fever, necrotizing fasciitis, streptococcal toxic shock syndrome, pneumonia, and puerperal sepsis.

Synonyms:

Group A streptococcus

Streptococcus pyogenes, a bacterium that can cause pharyngitis, skin infections, invasive disease, and immune-mediated complications.

Synonyms:

Group B Strep

Group B Streptococcus (GBS, *Streptococcus agalactiae*): a gram-positive coccus colonizing the GI and genitourinary tract in 10-30 percent of women; major cause of neonatal sepsis and meningitis.

Synonyms:

Group B Streptococcus

A gram-positive bacterium (*Streptococcus agalactiae*) colonizing the genitourinary and gastrointestinal tracts. Asymptomatic vaginal colonization occurs in 20-30% of pregnant women. Screening is performed at 36-37 weeks gestation via rectovaginal swab culture.

Synonyms:

Growing Pains

Recurrent, bilateral leg pain in children ages 3-12, typically occurring in the late afternoon or evening and resolving by morning. Pain is deep, aching in the calves, shins, and thighs (not joints). No limping, fever, swelling, or functional impairment.

Synonyms:

Growth Chart

A graphical representation of growth (weight, height/length, head circumference, BMI) plotted against age, standardized by population (WHO growth standards 0-5 years; CDC growth charts 2-20 years; percentiles/z-scores).

Synonyms:

Growth Factor

Proteins that stimulate cell growth, proliferation, differentiation, and survival. Major families: EGF (epidermal growth factor), FGF (fibroblast growth factor), PDGF (platelet-derived), VEGF (vascular endothelial), TGF-beta (transforming), NGF (nerve), IGF (insulin-like), HGF (hepatocyte).

Synonyms:

Growth Hormone

A hormone released by the anterior pituitary that promotes growth partly through insulin-like growth factor 1 and also affects protein, fat, and carbohydrate metabolism.

Synonyms:

Growth Hormone Deficiency

Insufficient secretion of growth hormone from the anterior pituitary, causing short stature in children and metabolic effects in adults. In children: delayed growth, short stature, delayed bone age, and increased fat mass. In adults: decreased muscle mass, increased fat mass, reduced bone density, fatigue, and dyslipidemia.

Synonyms:

Growth Hormone Physiology

Growth hormone is secreted in a pulsatile pattern by pituitary somatotroph cells regulated by hypothalamic GHRH which stimulates release and somatostatin which inhibits release. GH acts directly on tissues and indirectly through IGF-1 produced primarily by the liver.

Synonyms:

Growth Medium

A nutrient preparation supporting microbial multiplication in vitro, supplying carbon, nitrogen, minerals, and growth factors in liquid or solid form.

Synonyms:

Growth Retardation

Abnormally slow physical growth or failure to reach

expected height or weight for age and developmental stage. Causes include inadequate nutrition, chronic systemic disease, endocrine or genetic disorders, malabsorption, psychosocial deprivation, and constitutional variation; assessment uses growth charts and clinical context.

Synonyms:

Growth Scan

An ultrasound examination used to assess fetal size, growth pattern, amniotic fluid, and sometimes blood flow. Measurements are compared with gestational-age standards to identify possible growth restriction or excessive growth.

Synonyms:

Guaifenesin

An expectorant used to loosen respiratory mucus and make coughing more productive. It provides symptomatic relief in some respiratory illnesses; dosing depends on the formulation and patient.

Synonyms:

Guided Tissue Regeneration

Periodontal procedure using barrier membrane to promote regeneration of bone, cementum, periodontal ligament.

Synonyms:

Guillain-Barre Syndrome

An acute, immune-mediated polyneuropathy typically presenting with ascending paralysis following an antecedent infection (*Campylobacter jejuni*, CMV, EBV, Zika). Variants: acute inflammatory demyelinating polyneuropathy (AIDP, most common in North America), acute motor axonal neuropathy (AMAN, more common in Asia).

Synonyms:

Gummy Smile

Excessive gingival display when smiling. Caused by hypermobile lip, vertical maxillary excess, altered passive eruption. Treatment: surgery, Botox, orthodontics.

Synonyms:

Gunshot Wound

An injury produced by a projectile discharged from a firearm; forensic classification by range and direction. Entrance wound: rounded/ovoid defect with an abraded ring and often a zone of soot (close range) or stippling/tattooing (intermediate range); contact wounds show muzzle imprint.

Synonyms:

Gut Microbiome

The complex community of trillions of microorganisms, including bacteria, viruses, and fungi, residing in the gastrointestinal tract. The gut microbiome plays a crucial role in digestion, immune function, vitamin synthesis, and protection against pathogens.

Synonyms:

Guttate Psoriasis

An acute eruption of numerous small, scaly, drop-like psoriatic papules and plaques, often following streptococcal pharyngitis in children or young adults. Diagnosis is clinical; the eruption may resolve spontaneously or evolve into chronic plaque psoriasis.

Synonyms:

Gynaecologist

A medical doctor who specializes in the health of the female reproductive system (vagina, cervix, uterus, fallopian tubes, ovaries) and breasts.

Synonyms:

Gynaecomastia

The benign enlargement of breast tissue in males. Pathophysiology: an imbalance between estrogen (stimulates breast tissue growth) and androgen (suppresses) activity, resulting in increased estrogen-to-testosterone ratio.

Synonyms:

gynecology

The medical specialty concerned with the health of the female reproductive system (uterus, ovaries, fallopian tubes, cervix, vagina, and vulva).

Synonyms:

Gynecomastia

Enlargement of breast tissue in males, often bilateral, occurring physiologically in neonates, during puberty (40-60% of boys), and in aging men. Pathologic causes include Klinefelter syndrome, testicular tumors, medications (spironolactone, cannabis), and liver disease. Persistent or asymmetric gynecomastia warrants evaluation.

Synonyms:

Gyrus

A ridge or convolution on the surface of the cerebral cortex, separated by sulci (grooves). The folded structure triples the surface area of the brain (approximately 2500 cm²) while fitting within the cranial vault.

Synonyms:

Gallbladder Carcinoma

Cancer arising from the gallbladder.

Synonyms:

Gallbladder Infection

Inflammation or infection of the gallbladder, often associated with blockage of bile flow.

Synonyms:

Giant Cell Tumor

A usually benign but locally aggressive bone tumor containing numerous giant cells.

Synonyms:

Glomerulosclerosis

Scarring of the glomeruli, the kidney structures that filter blood.

Synonyms:

Gonadoblastoma

A rare tumor of an abnormal or developmentally disordered gonad that may contain germ cells and sex-cord cells.

Synonyms:

Gonococcal Urethritis

Inflammation of the urethra caused by infection with *Neisseria gonorrhoeae*.

Synonyms:

Granuloma Inguinale

A chronic sexually transmitted infection that causes ulcerative lesions of the genital region.

Synonyms:

Granulomatosis

A disorder characterized by formation of granulomas, which are organized collections of immune cells caused by chronic inflammation.

Synonyms:

Growth Failure

Abnormally slow physical growth or inadequate weight gain compared with expected development.

Synonyms:

Gyrate Atrophy

An inherited retinal disorder causing progressive loss of peripheral vision and night vision.

Synonyms:

Gastrointestinal Tract

The continuous digestive passage from the mouth through the esophagus, stomach, intestines, rectum, and anus.

Synonyms:

Ganglioglioma

A usually slow-growing brain or spinal-cord tumor made of nerve cells and supporting glial cells.

Synonyms:

Gas and Gas Pains

Gas-related fullness, bloating, or abdominal discomfort caused by swallowed or intestinal gas.

Synonyms:

Golfer's Elbow

Painful inflammation or degeneration of tendons on

the inner side of the elbow.

Synonyms:

Group B Streptococcal Disease

Infection caused by group B Streptococcus bacteria, which can be serious in newborns and vulnerable adults.

Synonyms:

Gamma Globulin

The fraction of blood plasma containing most immunoglobulins, or antibodies.

Synonyms:

Gas Transport

Movement of oxygen from the lungs to tissues and carbon dioxide from tissues to the lungs through the blood.

Synonyms:

Gastroduodenostomy

Surgical creation of an opening between the stomach and duodenum.

Synonyms:

Gastrojejunostomy

Surgical creation of an opening between the stomach and jejunum.

Synonyms:

Genu Varum

Outward bowing of the legs, commonly called bowlegs.

Synonyms: bowlegs.

Glomerular Capsule

The cup-shaped structure surrounding a kidney glomerulus that receives filtered fluid.

Synonyms:

Glomerular Filtrate

Fluid filtered from blood into the kidney tubules at the glomerulus.

Synonyms:

Glucosamine

A naturally occurring compound used in cartilage formation and sometimes taken as a supplement for joint symptoms.

Synonyms:

Goniometer

An instrument used to measure the angle or range of motion of a joint.

Synonyms:

Graafian Follicle

A mature ovarian follicle that contains an egg ready for ovulation.

Synonyms:

Graft-versus-Host Reaction

An immune reaction in which transplanted donor immune cells attack the recipient's tissues.

Synonyms:

Greater Omentum

A fold of fatty peritoneal tissue that hangs from the stomach and partly covers the abdominal organs.

Synonyms:

Gustation

The sense of taste.

Synonyms:

Gowers Sign

A maneuver in which a person uses the hands to push up from the floor or thighs because of proximal muscle weakness, classically seen in muscular dystrophy.

Synonyms:

Ganglion Cyst

A benign, fluid-filled cyst arising near a joint or tendon sheath, most often at the wrist or hand. It may be painless or cause pressure, discomfort, or limitation of movement.

Synonyms:

Gastric Varices

Enlarged veins in the stomach wall caused by portal hypertension, usually related to liver disease or obstruction of the splenic or portal venous circulation. Rupture can cause life-threatening gastrointestinal bleeding.

Synonyms:

Gag Reflex (Pharyngeal Reflex)

A protective reflex in which stimulation of the back of the throat produces contraction of the pharyngeal muscles and may trigger retching. It helps protect the airway from foreign material.

Synonyms: Pharyngeal Reflex

Dry Gangrene

Tissue death caused mainly by loss of arterial blood supply, producing dry, shrunken, dark tissue with a relatively clear boundary from viable tissue.

Synonyms:

Wet Gangrene

Tissue death complicated by bacterial infection and tissue swelling, producing moist, discolored, rapidly spreading necrosis. It requires urgent medical assessment.

Synonyms:

GAG (Glycosaminoglycan)

A long, unbranched carbohydrate chain found in the extracellular matrix and connective tissues. Abnormal breakdown or accumulation of GAGs occurs in mucopolysaccharidoses.

Synonyms: Glycosaminoglycan

Gamete

A mature reproductive cell, such as a sperm or ovum, containing one set of chromosomes and combining with another gamete at fertilization.

Synonyms:

Gastroenterostomy

Surgical creation of an opening between the stomach and a segment of the small intestine, usually the jejunum, to bypass or replace a blocked or diseased

gastric outlet.

Synonyms:

Genetics

The study of genes, heredity, genetic variation, and how genetic information influences traits, disease risk, and response to treatment.

Synonyms:

Genome

The complete genetic material of an organism, including its genes and noncoding DNA.

Synonyms:

Genu Valgum (Knock-Knee)

An alignment abnormality in which the knees angle inward and may touch while the ankles remain apart. It may be developmental or caused by bone, joint, or metabolic disease.

Synonyms: Knock-Knee

Glans Penis

The expanded, sensitive distal end of the penis containing the external urethral opening and covered by the foreskin when present.

Synonyms:

Global Aphasia

A severe language disorder caused by extensive damage to the dominant cerebral hemisphere, impairing speech production, comprehension, reading, and writing.

Synonyms:

Glue Ear (Secretory Otitis Media)

Persistent fluid in the middle ear without acute infection, often causing conductive hearing loss and a feeling of blockage. It is common in children.

Synonyms: Secretory Otitis Media

Groin

The region where the lower abdomen meets the upper thigh, containing the inguinal canal and related muscles, vessels, nerves, and lymph nodes.

Synonyms:

Gestational Pyelonephritis

A kidney infection occurring during pregnancy, usually causing fever, flank pain, nausea, or urinary symptoms. It can lead to sepsis, preterm labor, or respiratory complications and requires prompt clinical assessment.

Synonyms: Pyelonephritis in pregnancy; pregnancy-associated kidney infection. +

gaba receptor

gaba receptor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gabapentin

gabapentin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gadoleic acid

gadoleic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gadolinium

gadolinium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gadopentetate dimeglumine

gadopentetate dimeglumine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gaffkya homari

gaffkya homari is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gag gene

gag gene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gag protein

gag protein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gait apraxia

gait apraxia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gait ataxia

gait ataxia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

galactans

galactans is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

galactolipids

galactolipids is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

galactose

galactose is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

galactosialidosis

galactosialidosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

galactoside

galactoside is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

galactosyltransferase

galactosyltransferase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

galanin

galanin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

galiximab

galiximab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

gall bladder disease

gall bladder disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

gallamine triethiodide

gallamine triethiodide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gallbladder necrosis

gallbladder necrosis is a medical condition or clinical

entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

gallbladder perforation

gallbladder perforation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gallic acid

gallic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gallium

gallium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gallium nitrate

gallium nitrate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gametogenesis

gametogenesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gamma rays

gamma rays is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gamma synuclein

gamma synuclein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gamma-chemokines

gamma-chemokines is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gammacoronavirus

gammacoronavirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gammaherpesvirina

gammaherpesvirina is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gammaretrovirus

gammaretrovirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

ganciclovir

ganciclovir is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

ganglia

ganglia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ganglion cell

ganglion cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ganglioneuroma

ganglioneuroma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ganglioneuromatosis

ganglioneuromatosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ganglioside

ganglioside is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gangliosidosis

gangliosidosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

gap junction

gap junction is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Gardner syndrome

Gardner syndrome is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

gardnerella

gardnerella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gardnerella vaginalis

gardnerella vaginalis is a microorganism or biological

taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

garlic

garlic is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gartner duct

gartner duct is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gas

gas is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gas chromatography

gas chromatography is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gas poisoning

gas poisoning is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

gas scavenger

gas scavenger is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastric balloon

gastric balloon is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastric dysplasia

gastric dysplasia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastric fistula

gastric fistula is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastric fundus

gastric fundus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastric hemorrhage

gastric hemorrhage is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastric juice

gastric juice is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastric leiomyosarcoma

gastric leiomyosarcoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastric mucosa

gastric mucosa is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastric necrosis

gastric necrosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

gastric obstruction

gastric obstruction is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastric stenosis

gastric stenosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastroenteritis bacterial

gastroenteritis bacterial is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gastroenterologist

gastroenterologist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastroepiploic artery

gastroepiploic artery is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastrointestinal agents

gastrointestinal agents is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastrointestinal disorder

gastrointestinal disorder is a medical condition or

clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

gastrointestinal gas

gastrointestinal gas is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastrointestinal hemorrhage

gastrointestinal hemorrhage is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastrointestinal hormone

gastrointestinal hormone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastrointestinal neoplasm

gastrointestinal neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

gastrointestinal system

gastrointestinal system is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastroscope

gastroscope is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastroscopy

gastroscopy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gastrula

gastrula is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gatifloxacin

gatifloxacin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gauss

gauss is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gefitinib

gefitinib is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

gel electrophoresis

gel electrophoresis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gelatin

gelatin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

geldanamycin analogue

geldanamycin analogue is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gelsolin

gelsolin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gemcitabine

gemcitabine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gemcitabine hydrochloride

gemcitabine hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gemella

gemella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gemella bergeri

gemella bergeri is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gemella haemolysans

gemella haemolysans is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gemella morbillorum

gemella morbillorum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gemella sanguinis

gemella sanguinis is a microorganism or biological

taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gemifloxacin

gemifloxacin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gemtuzumab ozogamicin

gemtuzumab ozogamicin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gender

gender is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gender identity

gender identity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene amplification

gene amplification is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene conversion

gene conversion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene deletion

gene deletion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene dosage

gene dosage is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene duplication

gene duplication is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene frequency

gene frequency is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene fusion

gene fusion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene library

gene library is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene modification

gene modification is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene mutation

gene mutation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene rearrangement

gene rearrangement is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene silencing

gene silencing is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene targeting

gene targeting is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene transfer

gene transfer is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene-environment interaction

gene-environment interaction is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gene-modified

gene-modified is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

generalized

generalized is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

generalized lipodystrophy

generalized lipodystrophy is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

generalized seizure

generalized seizure is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

genetic anticipation

genetic anticipation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genetic carrier

genetic carrier is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genetic disorder

genetic disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

genetic drift

genetic drift is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genetic engineering

genetic engineering is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genetic linkage

genetic linkage is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genetic marker

genetic marker is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genetic polymorphism

genetic polymorphism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genetic profile

genetic profile is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genetic recombination

genetic recombination is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genetic susceptibility

genetic susceptibility is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genetic technique

genetic technique is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genetic transcription

genetic transcription is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

geniculate body

geniculate body is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genital edema

genital edema is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genital system

genital system is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genitourinary neoplasm

genitourinary neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

genomic instability

genomic instability is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genomic library

genomic library is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genomic medicine

genomic medicine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genomics

genomics is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genotype determination

genotype determination is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gentamicin

gentamicin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gentamicin sulfate

gentamicin sulfate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gentian violet

gentian violet is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genu recurvatum

genu recurvatum is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genus dermatophilus

genus dermatophilus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genus dickeya

genus dickeya is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genus leminorella

genus leminorella is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

genus saimiri

genus saimiri is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

geophagia

geophagia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

geotrichum

geotrichum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

geotrichum klebahnii

geotrichum klebahnii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

geriatric nursing

geriatric nursing is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

germ cell

germ cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

germ layer

germ layer is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

germanium

germanium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

giant cells

giant cells is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

giardia

giardia is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gigabecquerel

gigabecquerel is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gill

gill is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gimatecan

gimatecan is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gingiva disease

gingiva disease is a medical condition or clinical

entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

gingival hemorrhage

gingival hemorrhage is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gingival infections

gingival infections is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

gingival margin

gingival margin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gingival neoplasm

gingival neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

gingival overgrowth

gingival overgrowth is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gingival pocket

gingival pocket is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ginkgo biloba

ginkgo biloba is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ginseng preparation

ginseng preparation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gizzard

gizzard is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glanders

glanders is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

glandular stomach

glandular stomach is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gliclazide

gliclazide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glioblastoma multiforme

glioblastoma multiforme is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

gliocladium

gliocladium is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gliosarcoma

gliosarcoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gliosis

gliosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glipizide

glipizide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

globicatella

globicatella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

globicatella sanguinis

globicatella sanguinis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

globozoospermia

globozoospermia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

globule unit

globule unit is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

globus pallidus

globus pallidus is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glomerular filtration

glomerular filtration is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glomerulomegaly

glomerulomegaly is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glomerulonephritis acute

glomerulonephritis acute is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glossalgia

glossalgia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glossectomy

glossectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glossinidae

glossinidae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glossopharyngeal nerve

glossopharyngeal nerve is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glossoptosis

glossoptosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glucan

glucan is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glucarpidase

glucarpidase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glucocorticoid

glucocorticoid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gluconates

gluconates is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glucose transport

glucose transport is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glucose transporter

glucose transporter is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glucosinolate

glucosinolate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glucosylceramidase

glucosylceramidase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glucuronate

glucuronate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glucuronic acid

glucuronic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glucuronide

glucuronide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glutamate decarboxylase

glutamate decarboxylase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glutamate receptor

glutamate receptor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glutamic acid

glutamic acid is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glutamine

glutamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glutaral

glutaral is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glutathione disulfide

glutathione disulfide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glutathione transferase

glutathione transferase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gluteal muscle

gluteal muscle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glyburide

glyburide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glyceraldehyde

glyceraldehyde is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glyceride

glyceride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycerol

glycerol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycerol kinase

glycerol kinase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycerophosphates

glycerophosphates is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycerophospholipids

glycerophospholipids is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycerylphosphorylcholine

glycerylphosphorylcholine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycine

glycine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycine receptor

glycine receptor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycocalyx

glycocalyx is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycolates

glycolates is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycolipid

glycolipid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycomics

glycomics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycopeptide

glycopeptide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycophorin

glycophorin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycoprotein

glycoprotein is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycopyrrolate

glycopyrrolate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycosaminoglycans

glycosaminoglycans is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycoside

glycoside is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycosphingolipid

glycosphingolipid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycosylation

glycosylation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycosylphosphatidylinositol

glycosylphosphatidylinositol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycosyltransferase

glycosyltransferase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycyrrhetic acid

glycyrrhetic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glycyrrhizic acid

glycyrrhizic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glyoxal

glyoxal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glyoxysome

glyoxysome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glyphosate

glyphosate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

glyphosine

glyphosine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gnathostoma

gnathostoma is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gnathostoma spinigerum

gnathostoma spinigerum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gnathostomiasis

gnathostomiasis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

goblet cell

goblet cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gold

gold is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gold alloys

gold alloys is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

golgi cisternae

golgi cisternae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gonad

gonad is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gonad disorder

gonad disorder is a medical condition or clinical

entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

gonadal agenesis

gonadal agenesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gonadorelin

gonadorelin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gonadotrophs

gonadotrophs is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gonadotropin

gonadotropin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gondoic acid

gondoic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gordonia aichiensis

gordonia aichiensis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gordonia bacterium

gordonia bacterium is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gordonia bronchialis

gordonia bronchialis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gordonia rubripertincta

gordonia rubripertincta is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gordonia sputi

gordonia sputi is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

gordonia terrae

gordonia terrae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

goserelin

goserelin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gossypol

gossypol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gout suppressants

gout suppressants is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

government

government is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

government funding

government funding is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

g-quadruplexes

g-quadruplexes is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gracilibacillus

gracilibacillus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

graft versus host

graft versus host is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gramicidin

gramicidin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gram-positive rods

gram-positive rods is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

grandchild

grandchild is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

grandparent

grandparent is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

granisetron

granisetron is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

granisetron hydrochloride

granisetron hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

granulation tissue

granulation tissue is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

granules

granules is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

granulicatella

granulicatella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

granulicatella adiacens

granulicatella adiacens is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

granulicatella elegans

granulicatella elegans is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

granulocyte count

granulocyte count is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

granulocytic sarcoma

granulocytic sarcoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

granulosa cell

granulosa cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

granzyme

granzyme is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gravidity

gravidity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gravitropism

gravitropism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

greater than

greater than is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

grimontia hollisae

grimontia hollisae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

grip strength

grip strength is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

griseofulvin

griseofulvin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gross virus

gross virus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

ground substance

ground substance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

groundwater

groundwater is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

group therapy

group therapy is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

growth

growth is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

growth cone

growth cone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

growth disorder

growth disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

growth inhibitor

growth inhibitor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gtp binding

gtp binding is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

guanazole

guanazole is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

guanfacine

guanfacine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

guanine

guanine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

guanosine

guanosine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

guanosine diphosphate

guanosine diphosphate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

guanosine monophosphate

guanosine monophosphate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

guanosine triphosphate

guanosine triphosphate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

guanosinetriphosphatase

guanosinetriphosphatase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

guanylate cyclase

guanylate cyclase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

guide device

guide device is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

guided imagery

guided imagery is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

guilt

guilt is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gut epithelium

gut epithelium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gynatresia

gynatresia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

gynecological examination

gynecological examination is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

gynecologist

gynecologist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

H

21-Hydroxylase deficiency

An inherited defect in CYP21A2 that reduces cortisol and aldosterone synthesis, increases 17-hydroxyprogesterone, and causes congenital adrenal hyperplasia with androgen excess.

Synonyms:

Hair Bulb

The enlarged base of a hair follicle where the hair shaft is produced.

Synonyms:

Hair Shaft

The portion of a hair that projects above the skin surface.

Synonyms:

Hammertoe

A deformity in which a toe bends downward at a middle joint.

Synonyms: Hammer toe

Happiness

A subjective sense of well-being, contentment, or pleasure.

Synonyms:

Happiness Set-Point

An individual's usual baseline level of happiness around which mood tends to fluctuate.

Synonyms:

Harm Reduction Therapy

Treatment that aims to reduce health and social harms from addictive behavior, even when absti-

nence is not immediate.

Synonyms: Harm reduction

Hay Fever

Seasonal or persistent allergic rhinitis caused by inhaled allergens.

Synonyms: Allergic rhinitis

HbA1c

Hemoglobin with glucose attached; its measurement estimates average blood glucose over the previous two to three months.

Synonyms: Glycosylated hemoglobin; hemoglobin A1c

Heberden Nodes

Bony enlargements at the end joints of fingers, commonly associated with osteoarthritis.

Synonyms: Heberden's nodes

Hedonic

Relating to pleasure or the pursuit of pleasure.

Synonyms:

Hedonic Treadmill

The tendency to adapt to life changes so that their emotional effects diminish over time.

Synonyms: Hedonic adaptation

Helper T Cells

CD4-positive immune cells that coordinate responses by activating other immune cells.

Synonyms: CD4 T cells

HEPA Filter

A high-efficiency particulate air filter that removes a large proportion of airborne particles.

Synonyms: High-efficiency particulate air filter

Heparin

An anticoagulant that reduces formation and extension of blood clots.

Synonyms:

High Blood Pressure

Persistently elevated pressure of blood against artery walls.

Synonyms: Hypertension

HLA

Human leukocyte antigen, a cell-surface protein system involved in immune recognition and tissue compatibility.

Synonyms: Human leukocyte antigen

Hormones

Chemical messengers released by glands or tissues that regulate processes throughout the body.

Synonyms:

Hot Flash

A sudden episode of heat, flushing, sweating, and sometimes palpitations, commonly occurring during menopause.

Synonyms: Hot flush

HPA

The hypothalamic-pituitary-adrenal axis, a hormone system central to the stress response.

Synonyms: Hypothalamic-pituitary-adrenal axis

Human Leukocyte Antigen

A protein on cell surfaces that helps the immune system distinguish self from foreign material.

Synonyms: HLA

Humectant

A substance that attracts and retains water, com-

monly used to hydrate skin.

Synonyms:

Hyaluronic Acid

A naturally occurring carbohydrate polymer that binds water in connective tissue, skin, joints, and the eye.

Synonyms: Hyaluronan

Hydrogenation

A chemical process that adds hydrogen to a compound; in foods it can convert liquid oils into more solid fats.

Synonyms:

Hydroxyapatite

A calcium-phosphate mineral forming much of the hardness of bones and teeth.

Synonyms:

Hygiene Hypothesis

The theory that limited early-life microbial exposure may increase susceptibility to allergies and immune disorders.

Synonyms:

Hyperalgesia

An abnormally increased response to a painful stimulus.

Synonyms:

Hyperinsulinemia

An abnormally high concentration of insulin in the blood.

Synonyms:

Hyperplastic Polyp

A usually benign overgrowth of mucosal cells, often found in the colon or rectum.

Synonyms:

Hypertensive Cerebellar Hemorrhage

Bleeding into the cerebellum caused by rupture of a vessel damaged by high blood pressure.

Synonyms:

Hypertensive Intracerebral Hemorrhage

Bleeding into brain tissue caused by rupture of a blood vessel associated with hypertension.

Synonyms:

Hypnagogic Hallucinations

Vivid sensory experiences occurring while a person is falling asleep.

Synonyms:

Hypnogram

A chart showing the timing and stages of sleep during a recording.

Synonyms: Sleep-stage diagram

Hypothalamic-Pituitary-Adrenal Axis

A network linking the hypothalamus, pituitary gland, and adrenal glands to regulate stress hormones and other functions.

Synonyms: HPA axis

H Influenzae Meningitis

Bacterial meningitis caused by *Haemophilus influenzae*, especially type b in unvaccinated children. It may cause fever, headache, neck stiffness, altered consciousness, seizures, and serious neurologic complications.

Synonyms:

H1N1 Influenza

Influenza A infection caused by an H1N1 virus strain. It usually produces fever, cough, sore throat, myalgia, and fatigue but can cause viral pneumonia and severe respiratory failure in high-risk patients.

Synonyms:

Histamine-2 Receptor Antagonist

A drug that blocks histamine H2 receptors on gastric parietal cells, reducing gastric acid secretion. Agents: cimetidine, ranitidine, famotidine, nizatidine. Used for GERD, peptic ulcer disease, and dyspepsia—less potent than PPIs. Adverse effects: headache, diarrhea, confusion (elderly, cimetidine),

and rare thrombocytopenia.

Synonyms:

Habenula

A paired epithalamic structure forming part of the dorsal diencephalon. It integrates limbic and basal-forebrain signals with midbrain monoaminergic systems and contributes to reward, aversion, stress, and motivational behavior.

Synonyms:

Haem- / Haema- / Haemato- / Haemo- (Prefixes relating to blood)

Prefixes derived from the Greek word *haima* (blood), used in medical terminology to denote blood-related conditions and procedures.

Synonyms: Prefixes relating to blood

Haemangioma

A benign vascular tumor composed of proliferating endothelial cells, the most common soft tissue tumor of infancy.

Synonyms:

Haemarthrosis

Bleeding into a joint cavity. Causes: trauma (most common), hemophilia (spontaneous haemarthrosis is characteristic, especially in severe deficiency of factor VIII or IX, common in knees, elbows, ankles), anticoagulant therapy, pigmented villonodular synovitis (PVNS, recurrent haemarthrosis), joint surgery, and vascular malformations.

Synonyms:

Haematocrit

The proportion of blood volume occupied by red blood cells, expressed as a percentage or decimal fraction. The reference range varies with age, sex, altitude, pregnancy, and laboratory method.

Synonyms:

Haematologist

A medical doctor who specializes in the diagnosis, treatment, and prevention of diseases of the blood and blood-forming organs.

Synonyms:

Haematoma

A localised collection of blood outside blood vessels, usually clotted, within an organ or tissue. Haematomas form when trauma or disease causes a blood vessel to rupture.

Synonyms:

Haematuria

The presence of blood in the urine. Classification: gross (visible to the naked eye, indicates bleeding beyond the nephron) vs microscopic (detected only on urinalysis or microscopy, >3 RBCs per high-power field).

Synonyms:

Haemodialysis

A medical procedure that filters waste products, toxins, and excess fluid from the blood when the kidneys are unable to do so (end-stage renal disease, ESRD). Mechanism: blood is pumped through an extracorporeal circuit and passes through a dialyser (artificial kidney) containing thousands of hollow fibers with a semipermeable membrane.

Synonyms:

Haemolytic Disease of the Newborn

Destruction of a newborn's red blood cells by maternal antibodies that crossed the placenta, causing anemia and jaundice.

Synonyms:

Haemophilia

An X-linked recessive bleeding disorder caused by deficiency of coagulation factor VIII (hemophilia A, 80-85%) or factor IX (hemophilia B, Christmas disease, 15-20%). Incidence: 1 in 5,000 male births (hemophilia A), 1 in 30,000 (hemophilia B).

Synonyms:

Haemophilus influenzae

A gram-negative coccobacillus that causes meningitis, epiglottitis, pneumonia, and other infections. The encapsulated type b (Hib) strain was the most

virulent, causing invasive disease in children. The Hib conjugate vaccine has dramatically reduced the incidence of invasive Hib disease.

Synonyms:

Haemoptysis

Coughing up blood or blood-stained sputum from the lower respiratory tract.

Synonyms:

Haemorrhoids

Enlarged symptomatic vascular cushions of the anal canal that may cause painless bright-red rectal bleeding, prolapse, itching, or discomfort.

Synonyms:

Hair Cells

The sensory receptor cells of the inner ear that convert mechanical sound vibrations into electrical neural signals, and they are named for the bundle of stereocilia projecting from their apical surface.

Synonyms:

Hair Follicle

Complex dermal/hypodermal mini-organ producing hair. Has infundibulum (surface opening), isthmus (from sebaceous duct to arrector pili insertion), and lower segment (bulb with matrix and dermal papilla). Hair cycle: anagen (active growth, 2-7 years), catagen (regression, 2-3 weeks), telogen (resting, 2-3 months).

Synonyms:

Hair Loss

Alopecia: reduction of scalp or body hair. Types: nonscarring (androgenetic—pattern hair loss, telogen effluvium—stress/illness/drugs, anagen effluvium—chemotherapy, alopecia areata—autoimmune patches, tinea capitis, trichotillomania) and scarring (lupus, lichen planopilaris, folliculitis decalvans). Female pattern hair loss is common.

Synonyms:

Hair Loss (Alopecia)

The partial or complete loss of hair from areas where it normally grows, most commonly the scalp. Causes include genetic predisposition (androgenetic alopecia), autoimmune conditions (alopecia areata), hormonal changes, medications, stress, and nutritional deficiencies.

Synonyms: Alopecia

Hair Loss Classification

Hair loss (alopecia) is classified as scarring (cicatricial) or non-scarring. Non-scarring alopecias are potentially reversible: androgenetic alopecia (male and female pattern), alopecia areata, telogen effluvium, anagen effluvium, and tinea capitis.

Synonyms:

Hairy Cell Leukemia

A rare, indolent B-cell chronic lymphoproliferative disorder characterized by the accumulation of mature B lymphocytes with characteristic cytoplasmic projections ("hairy cells") in the bone marrow, peripheral blood, and spleen.

Synonyms:

Hairy Tongue

A usually harmless overgrowth and discoloration of the tongue's papillae, often appearing black, brown, or white. It may be associated with smoking, poor oral hygiene, dry mouth, or antibiotics; gentle tongue cleaning and removal of contributing factors usually help.

Synonyms:

Haldane Effect

The decrease in hemoglobin's CO₂ carrying capacity when oxygen binds to it, facilitating CO₂ release at the lungs. Deoxygenated hemoglobin (deoxyhemoglobin) is a better buffer for H⁺ ions and forms more carbaminohemoglobin than oxyhemoglobin.

Synonyms:

Half-Life

Elimination half-life is the time required for the plasma concentration of a drug to decrease by 50

percent after reaching equilibrium. It is calculated from the elimination rate constant using the equation $t_{1/2}$ equals 0.693 divided by the elimination rate constant.

Synonyms:

Half-life (Physical)

Time for radioactive isotope to decay to half its original activity. F-18: 110 min; Tc-99m: 6 hours; I-131: 8 days; Ga-68: 68 min. Affects imaging timing, radiation dose.

Synonyms: Physical

Half-Life ($t_{1/2}$)

The time required for plasma drug concentration to decrease by 50%. It determines dosing frequency and time to steady state (4-5 half-lives). Drugs with long half-lives (e.g., amiodarone: 40-55 days, warfarin: 40 hours) can be given once daily but take longer to reach steady state and to be eliminated.

Synonyms: $t_{1/2}$

Halitosis

An unpleasant odour of the breath that may be socially distressing. The most common cause (85-90%) is poor oral hygiene—accumulation of bacteria on the tongue, dental plaque, periodontitis, and gingivitis.

Synonyms:

Hallucination

A perception in the absence of an external stimulus, experienced as real and occurring in objective space.

Synonyms:

Hallux Valgus

Lateral deviation of the great toe (hallux) with medial prominence of the first metatarsal head (bunion). More common in women, associated with narrow-toed shoes, high heels, and genetic predisposition. Presents with pain over the medial eminence, difficulty with shoe wear, and progressive deformity.

Synonyms:

Hallux Valgus (Bunion)

A progressive deformity of the first metatarsophalangeal (MTP) joint, characterized by lateral deviation of the great toe (hallux valgus) and medial deviation of the first metatarsal head (metatarsus primus varus), resulting in a bony prominence on the medial side of the forefoot (the bunion).

Synonyms: Bunion

Halo nevus

A benign melanocytic nevus surrounded by a rim of depigmentation (Sutton nevus), caused by an immune-mediated T-cell response directed against melanocytes in the nevus. It is most common on the trunk of children and young adults and typically resolves by central depigmentation, leaving a white macule.

Synonyms:

Hamartoma

A benign growth composed of a disorganized mixture of tissue elements normally present at that site, e.g., pulmonary hamartoma, Peutz-Jeghers polyps, and PTEN-related (Cowden) lesions.

Synonyms:

Hamate

Wedge-shaped distal row carpal bone on the ulnar side with the hook of the hamate. The hook forms Guyon's canal medial border and serves as flexor retinaculum attachment. Articulates with 4th/5th metacarpals. Hook fractures associated with racquet sports and ulnar nerve compression.

Synonyms:

Hamman's Sign

A crunching or crackling sound heard on auscultation synchronized with the heartbeat, caused by air in the mediastinum (pneumomediastinum). It is a rare but specific finding. It is also described as a mediastinal crunch heard in spontaneous pneumomediastinum.

Synonyms:

Hammer

The common name for the malleus, one of the three small bones of the middle ear.

Synonyms:

Hammer Toe

A deformity of the second, third, or fourth toe characterized by flexion at the PIP joint and extension at the MTP and DIP joints. Caused by muscle imbalance (intrinsic foot muscle weakness) and narrow-toed shoes. Presents with pain over the dorsal PIP joint (corn/callus) and the tip of the toe. Flexible hammer toe: correctable passively.

Synonyms:

Hampton Hump

Wedge-shaped opacification with its base abutting the pleura on chest radiography, representing pulmonary infarction secondary to Pulmonary Embolism. See Pulmonary Embolism (PE).

Synonyms:

Hampton's Hump

Wedge-shaped, pleural-based opacity on CXR representing pulmonary infarction distal to PE.

Synonyms:

Hamstring

One of three muscles forming the posterior compartment of the thigh: semitendinosus, semimembranosus, and biceps femoris (long and short heads). Common origin: ischial tuberosity (except short head of biceps femoris which originates from the linea aspera of the femur).

Synonyms:

Hamstring Muscles

Three posterior thigh muscles: biceps femoris (long/short heads), semitendinosus, semimembranosus, mostly from the ischial tuberosity (short head of biceps from linea aspera). Long head/semimembranosus/semitendinosus innervated by tibial sciatic nerve; short head by common peroneal division. Flex knee, extend hip.

Synonyms:

Hand Foot and Mouth Disease

A common viral illness (mostly children <10 years) caused by coxsackievirus A16 (and enterovirus 71), transmitted by fecal-oral/respiratory.

Synonyms:

Hand hygiene

The most effective measure for preventing healthcare-associated infections. Hand hygiene includes handwashing with soap and water and hand rubbing with alcohol-based rubs. Alcohol-based rubs are preferred for routine hand hygiene as they are faster and more effective than soap and water.

Synonyms:

Hand Prolapse

Prolapse of a fetal hand or arm alongside or below the presenting part. May occur spontaneously or after manual rotation. The prolapsed arm may be mistaken for a cord or foot. Management: if the hand is above the presenting part (compound presentation), it may be gently pushed back during contractions.

Synonyms:

Hand, Foot, and Mouth Disease

A contagious viral illness, usually in children, causing fever and vesicles or ulcers on the hands, feet, and mouth. Enteroviruses are common causes.

Synonyms:

Hand-Foot-and-Mouth Syndrome

A usually mild, contagious viral illness, commonly caused by enteroviruses, producing fever, mouth sores, and small spots or blisters on the hands and feet. It mainly affects young children but can occur in adults. Hydration, pain relief, and hygiene are important; severe dehydration, neurologic symptoms, or persistent fever requires care.

Synonyms:

Hand-Foot-Mouth Disease

A common enteroviral infection, usually in young children, causing fever, painful oral ulcers, and a vesicular rash on the hands, feet, and sometimes

buttocks. It is highly contagious and usually self-limited.

Synonyms:

Hanging (Complete vs Incomplete)

Form of violent asphyxial death produced by suspension of the body by a ligature around the neck. Complete Hanging: feet off ground, total body weight exerts pressure. Incomplete Hanging: part of body touches ground. Asphyxia results from occlusion of jugular veins (2 kg force) or carotid arteries (5 kg force).

Synonyms: Complete vs Incomplete

Hanging and Strangulation Signs

Medico-legal findings resulting from mechanical constriction of the neck structures. Hanging: neck constriction by a ligature tightened by the weight of the victim's body. Ligature mark: pale, hard, parchment-like groove running obliquely upward toward the knot, usually situated above the thyroid cartilage.

Synonyms:

Hansen's Disease (Leprosy)

A chronic infection caused mainly by *Mycobacterium leprae* that primarily affects the skin and peripheral nerves. It can cause numb skin patches, nerve thickening, weakness, and eye problems. Transmission usually requires prolonged close contact, and multidrug therapy can cure the infection.

Synonyms: Leprosy

Hantavirus

A genus of enveloped negative-sense RNA viruses of the Bunyaviridae family, transmitted to humans primarily through inhalation of aerosolized rodent excreta (urine, feces, saliva).

Synonyms:

Hantavirus Pulmonary Syndrome

A severe respiratory illness caused by hantaviruses, usually acquired by inhaling aerosolized particles from infected rodent urine, droppings, or nesting material. Fever, muscle aches, headache, and gastroin-

testinal symptoms may rapidly progress to cough, pulmonary edema, and respiratory failure. Immediate hospital care is essential.

Synonyms:

Haplotype

Set of alleles inherited together on same chromosome. Used in linkage analysis, population genetics, disease association studies.

Synonyms:

Haptoglobin

An alpha-2 globulin that binds free hemoglobin, preventing oxidative damage and renal excretion. Low/undetectable: acute hemolysis (intravascular and extravascular), liver disease (decreased production), and hereditary deficiency. Elevated: acute phase reaction (inflammation, infection, malignancy).

Synonyms:

Harlequin color change

A transient, benign skin color change in newborns where one half of the body becomes flushed while the other half remains pale, due to asymmetric vasomotor tone. It occurs in up to 10 percent of healthy neonates, typically when the infant is placed on their side.

Synonyms:

Harm Reduction

Evidence-based strategies that decrease health, social, and legal harms associated with substance use without requiring immediate abstinence. Examples include naloxone access, sterile injecting equipment, drug-checking where available, safer-use education, and linkage to treatment.

Synonyms:

Hartmann Procedure

Surgical resection of the rectosigmoid colon with creation of an end colostomy and rectal stump. Used for emergency resection of complicated diverticulitis with peritonitis and colorectal cancer with obstruction or perforation. The procedure avoids primary

anastomosis in a contaminated field.

Synonyms:

Hartnup Disease

An autosomal-recessive disorder of neutral-amino-acid transport, especially in the intestine and renal tubules. Defective tryptophan handling can cause pellagra-like photosensitive dermatitis, cerebellar ataxia, and neuropsychiatric symptoms, often intermittently.

Synonyms:

Hashimoto Thyroiditis

An autoimmune disorder in which immune-mediated inflammation gradually damages the thyroid gland and may cause hypothyroidism. The gland may be enlarged or atrophic, and thyroid autoantibodies are often present.

Synonyms:

Hay Fever (Allergic Rhinitis)

Inflammation of the nasal lining caused by an allergic response to airborne substances, including pollens, dust mites, animal dander, or mold. It causes sneezing, congestion, nasal itching, and watery discharge.

Synonyms: Allergic Rhinitis

HbA1c (Glycated Hemoglobin)

Hemoglobin containing glucose-derived adducts formed by nonenzymatic glycation. It reflects average glycemic exposure over approximately two to three months, with interpretation affected by altered red-cell survival and some hemoglobin variants.

Synonyms: Glycated Hemoglobin

hCG (Human Chorionic Gonadotropin)

A hormone produced mainly by placental tissue and measured in urine or blood to help detect and monitor pregnancy. Concentrations normally rise early in pregnancy, but the rate and interpretation vary; results must be considered with timing and clinical findings.

Synonyms: Human Chorionic Gonadotropin

HDL

High-density lipoprotein, a class of particles that transports cholesterol and other lipids in the blood. HDL concentration is one component of cardiovascular risk assessment; it should not be interpreted as a protective or harmful measure by itself.

Synonyms:

Head and Neck Cancer

Cancers arising in the oral cavity, pharynx, larynx, sinonasal tract, and salivary glands, most commonly squamous cell carcinoma. Risk factors include tobacco, alcohol, and HPV (oropharyngeal). Treatment involves surgery, radiation, and chemotherapy, often combined to preserve function.

Synonyms:

Head Circumference

Measured at the largest circumference above the ears and eyebrows, reflecting brain growth. Plotted on growth charts to detect microcephaly (below 3rd percentile) or macrocephaly (above 98th percentile). Rapid increase may indicate hydrocephalus or intracranial hemorrhage; failure to grow may indicate microcephaly or brain atrophy.

Synonyms:

Head Injury

Trauma to scalp, skull, or brain. Scalp lacerations: bleed profusely, require suturing. Skull fracture: basilar (Battle sign, raccoon eyes) or depressed (surgical emergency). Concussion: transient neurological dysfunction, manage with rest, gradual return to activity.

Synonyms:

Head lice

An infestation of the scalp by the obligate human ectoparasite *Pediculus humanus capitis*, a wingless, blood-sucking insect that feeds on human blood, most common in children aged 3-12. It is extremely common, especially in school-aged children aged 3-11 years, with an estimated 6-12 million infestations annually in the United States.

Synonyms:

Headache

One of the most common neurologic symptoms, classified as primary (migraine, tension-type, cluster, and trigeminal autonomic cephalalgias) or secondary (attributed to an underlying structural, infectious, vascular, or metabolic cause).

Synonyms:

Headache and Migraine

Headaches are pain in the head or upper neck region, classified as primary (tension-type, migraine, cluster) or secondary to underlying conditions. Migraines are a neurological disorder characterized by recurrent episodes of moderate to severe throbbing pain, often accompanied by nausea, photophobia, and aura.

Synonyms:

Health Behavior

An action or pattern of action that affects health, such as eating, physical activity, tobacco use, alcohol use, sexual practices, or taking medicines.

Synonyms:

Health Behavior Change

Modification of behaviors that affect health, such as tobacco use, diet, physical activity, and adherence to treatment.

Synonyms:

Health Behavior Motivation

Factors that influence initiation and maintenance of health-related behaviors, including adherence, physical activity, and smoking cessation.

Synonyms:

Health Disparities

Differences in health outcomes or access to care among groups, often associated with social, economic, environmental, geographic, or structural factors.

Synonyms:

Health Disparity

Difference in health outcomes between populations.

Examples: racial disparities, socioeconomic disparities, geographic disparities.

Synonyms:

Health Equity

The fair opportunity for all people to attain their highest possible level of health, without avoidable differences caused by social or economic disadvantage.

Synonyms:

Health Inequity

A systematic, avoidable, and unjust difference in health or access to health resources between social groups. It differs from health variation that is not preventable or not linked to unfair social conditions.

Synonyms:

Health Information Technology

Use of technology for health information. Examples: electronic health records, telemedicine, mobile health, decision support.

Synonyms:

Health Literacy

Ability to obtain, process, understand health information. Examples: reading labels, following instructions, communicating with providers.

Synonyms:

Health Promotion

Activities maintaining/improving health in elderly. Components: vaccination, screening, exercise, nutrition, cognitive stimulation, social engagement, fall prevention. Tailored to individual capacity and preferences.

Synonyms:

Health Surveillance

The ongoing collection and analysis of health data to identify patterns, monitor disease, and guide public-health action.

Synonyms:

Health-Related QoL

A person's perceived physical, psychological, and social well-being as affected by health and illness.

Synonyms:

Healthcare Associated Infection

An infection developing as a consequence of health-care delivery, typically beyond 48 hours after admission or within 30 days of a procedure.

Synonyms:

Healthcare Provider

A healthcare professional or organization that provides medical care, such as a physician, nurse, therapist, or clinic.

Synonyms:

Healthcare Proxy

A person designated to make healthcare decisions for someone who cannot make or communicate those decisions. The appointment may be recorded in an advance directive or other legal document.

Synonyms:

Healthcare-Associated Pneumonia

HCAP concept retired (2016 IDSA/ATS); risk factors for MDR now assessed individually. Risk factors for MDR pathogens (prior antibiotics, structural lung disease, frequent hospitalization) should be assessed individually rather than using the HCAP category.

Synonyms:

Healthy Aging

The process of developing and maintaining the functional ability that supports well-being in older age.

Synonyms:

Healthy Eating for Diabetes

A dietary approach designed to maintain stable blood glucose levels in individuals with diabetes mellitus. It emphasizes carbohydrate consistency, high fiber intake, lean proteins, and healthy fats while minimizing refined sugars and simple carbohydrates.

Synonyms:

Healthy Years

Years of life lived in good health, without substantial disease, disability, or loss of function.

Synonyms:

Healthy Years Lost

Years of life lost due to premature death or disability. DALYs combine YLL and YLD.

Synonyms:

Hearing Aid

Amplification device for hearing loss. Types: behind-the-ear (BTE), in-the-ear (ITE), receiver-in-canal (RIC). Components: microphone, amplifier, speaker, battery. Fitting: audiogram-based. Adjustments: volume, programs.

Synonyms:

Hearing Aids and Devices

Electronic devices worn in or behind the ear that amplify sound for individuals with hearing loss. Modern hearing aids include digital signal processing, directional microphones, and connectivity to smartphones and other audio sources.

Synonyms:

Hearing Impairment

Partial or complete reduction in the ability to detect or understand sound. It may be conductive, sensorineural, or mixed and can result from congenital disorders, infection, noise, ototoxic injury, trauma, ageing, or disease of the ear or auditory pathways.

Synonyms:

Hearing Loss

Reduced ability to hear, classified as conductive (outer/middle ear pathology: cerumen impaction, otitis media, otosclerosis, tympanic membrane perforation), sensorineural (inner ear or auditory nerve: presbycusis, noise exposure, ototoxic drugs, Meniere disease, acoustic neuroma), or mixed.

Synonyms:

Hearing Screening

Newborn hearing screening (universal): otoacoustic emissions (OAE) and/or automated auditory brainstem response (AABR) before discharge; referral for comprehensive audiology if failed.

Synonyms:

Heart

A four-chambered muscular pump (two atria, two ventricles) located in the mediastinum, responsible for circulating blood throughout the body.

Synonyms:

Heart Attack

Acute myocardial injury caused most often by blockage of a coronary artery, usually from rupture of an atherosclerotic plaque and thrombosis. It may cause chest pressure, shortness of breath, sweating, nausea, or atypical symptoms and requires emergency treatment.

Synonyms:

Heart Attack (Myocardial Infarction)

The death of heart muscle tissue due to sudden blockage of a coronary artery, typically by a blood clot. It presents with chest pain or pressure, shortness of breath, nausea, and diaphoresis, though symptoms may be atypical in women and diabetics.

Synonyms: Myocardial Infarction

Heart Block

A delay or interruption in the conduction of cardiac impulses from the atria to the ventricles through the atrioventricular (AV) node and His-Purkinje system. Classification: first-degree AV block: PR interval >200 ms, each atrial impulse conducts to the ventricles, typically asymptomatic.

Synonyms:

Heart Disease

A broad term encompassing various conditions affecting the heart and blood vessels, most commonly coronary artery disease, heart failure, arrhythmias, and valvular heart disease. Atherosclerosis, the buildup of plaque in the arteries, is the underlying

cause of most cardiovascular events.

Synonyms:

Heart Failure

A clinical syndrome in which symptoms or signs result from impaired cardiac structure or function. It may be classified by ejection fraction, including reduced, mildly reduced, or preserved function, and by symptom severity such as NYHA class I-IV.

Synonyms:

Heart Failure Stages

ACC/AHA staging: Stage A (at risk for HF but no structural disease or symptoms); Stage B (structural heart disease but no symptoms); Stage C (structural disease with prior or current symptoms); Stage D (advanced HF requiring specialized interventions). This staging system emphasizes prevention and progression.

Synonyms:

Heart Failure with Preserved Ejection Fraction

A clinical syndrome of heart failure with a relatively preserved left-ventricular ejection fraction, often associated with impaired relaxation or increased stiffness. Diagnosis requires compatible symptoms or signs and objective evidence of cardiac dysfunction or elevated filling pressures.

Synonyms:

Heart Failure with Reduced Ejection Fraction

A clinical syndrome of heart failure with reduced left-ventricular systolic function, commonly associated with ischemic heart disease, cardiomyopathy, hypertension, or valvular disease. The ejection-fraction threshold is defined by the applicable guideline and should be interpreted with the clinical findings.

Synonyms:

Heart Health

The state of cardiovascular well-being, characterized by efficient pumping function, clear arteries, normal blood pressure, and regular heart rhythm.

Maintaining heart health involves a heart-healthy diet, regular aerobic and resistance exercise, weight management, stress reduction, and avoidance of tobacco.

Synonyms:

Heart Murmur

An audible extra sound produced by turbulent blood flow within the heart or great vessels, heard on auscultation.

Synonyms:

Heart Palpitations

An awareness of the heartbeat as pounding, racing, fluttering, or irregular. Palpitations may occur with normal rhythm or arrhythmia and can be triggered by stress, exertion, fever, stimulants, endocrine disease, or structural heart disease.

Synonyms:

Heart Rate

The number of cardiac contractions (heartbeats) per minute. Normal resting heart rate (sinus rhythm): 60-100 bpm in adults; higher in children (70-120 at age 1-2 years, 80-130 in neonates).

Synonyms:

Heart Sounds

Audible sounds produced by the heart during the cardiac cycle, normally heard as two sounds (lub-dub). S1 (lub) is caused by closure of the mitral and tricuspid valves at the beginning of systole. S2 (dub) is caused by closure of the aortic and pulmonary valves at the end of systole. Additional sounds (S3, S4) may indicate pathology.

Synonyms:

Heart Surgery

Surgical procedures performed on the heart or great vessels to treat structural or functional cardiac conditions. Common operations include coronary artery bypass grafting (CABG), valve repair or replacement, and repair of congenital heart defects.

Synonyms:

Heart Valve

A flap-like structure that directs one-way blood flow through the heart. The four valves are the tricuspid, pulmonary, mitral, and aortic valves.

Synonyms:

Heart Valve Disorders

Disorders affecting any of the four heart valves, including stenosis (narrowing) and regurgitation (leaking), which impair blood flow through the heart. Causes include congenital malformations, age-related degeneration, rheumatic fever, and endocarditis.

Synonyms:

Heart Valve Prosthesis

Replacement heart valve. Types: mechanical (titanium, carbon, durable, requires lifelong anticoagulation), bioprosthetic (cow/pig tissue, no anticoagulation, degenerates). Mechanical: more durable, higher thrombotic risk. Bioprosthetic: better quality of life, reoperation risk.

Synonyms:

Heart Ventricles

The two lower chambers of the heart. The right ventricle pumps blood to the lungs, and the left ventricle pumps blood to the body.

Synonyms:

Heart-Healthy Eating

A dietary approach emphasizing foods that support cardiovascular function and reduce the risk of heart disease. Key principles include limiting saturated fats, trans fats, sodium, and added sugars while prioritizing fruits, vegetables, whole grains, lean proteins, and healthy fats like those from olive oil and fatty fish.

Synonyms:

Heartburn

A burning sensation, typically retrosternal (behind the sternum), that may radiate to the throat and is often associated with regurgitation of sour or bitter-tasting fluid into the mouth. Despite its name,

heartburn is a symptom of gastro-oesophageal reflux disease (GORD), not a cardiac symptom.

Synonyms:

Heat Cramps

Painful, involuntary muscle spasms occurring during or after strenuous activity in heat, often related to fluid and electrolyte loss. Resting in a cool place and replacing fluids and electrolytes may help. Confusion, fainting, or ongoing symptoms may signal heat illness requiring urgent medical attention.

Synonyms:

Heat Exhaustion

A heat-related illness caused by excessive loss of water and salt, producing weakness, dizziness, nausea, headache, sweating, and sometimes fainting without severe central nervous system dysfunction.

Synonyms:

Heat Intolerance

An abnormal inability to tolerate warm environments or increased body heat, often causing excessive sweating, flushing, fatigue, or dizziness. Common causes include hyperthyroidism, menopause, fever, medications, autonomic disorders, and dehydration.

Synonyms:

Heat Pack

A device that applies warmth to the body surface to relieve some muscle pain or stiffness. Excessive heat or prolonged contact can cause burns.

Synonyms:

Heat Rash

An itchy or prickly rash caused by blocked sweat ducts during hot, humid conditions. Small red bumps or clear vesicles often appear in skin folds or areas covered by clothing. Cooling, keeping the skin dry, and avoiding occlusive products usually help; infection or persistent symptoms warrants assessment.

Synonyms:

Heat Stroke

A life-threatening heat-related illness with markedly elevated body temperature and altered mental status. It requires immediate cooling and emergency medical treatment.

Synonyms:

Heavy Metal Poisoning

Lead, mercury, arsenic, cadmium, thallium. Chelation therapy, supportive care, prevention. Sources: paint, water pipes, fish, occupational exposure.

Synonyms:

Heberden Node

A firm bony enlargement of the distal interphalangeal joint, usually caused by hand osteoarthritis. It may be tender during progression and can produce deformity, reduced fine-motor function, or restricted finger movement.

Synonyms:

Heel Pain

Pain beneath or around the heel, commonly caused by plantar fasciitis, Achilles tendinopathy, bursitis, stress fracture, nerve compression, or inflammatory arthritis. Persistent pain, swelling, inability to bear weight, or trauma requires assessment.

Synonyms:

Heel Spur

A bony growth arising from the heel bone, often associated with plantar-fascia strain. The spur itself may cause no symptoms; heel pain is more often related to surrounding soft-tissue inflammation.

Synonyms:

Heimlich Manoeuvre

An emergency procedure for relieving upper airway obstruction caused by a foreign body (choking). The maneuver is performed on a conscious, choking adult who cannot speak, cough effectively, or breathe.

Synonyms:

Heinz Bodies

Clumps of denatured hemoglobin inside red blood

cells caused by oxidative injury. They may occur in glucose-6-phosphate dehydrogenase deficiency after exposure to oxidizing substances and are identified with special stains.

Synonyms:

Helicobacter pylori

A gram-negative, spiral-shaped bacterium adapted to colonize the stomach. It can cause chronic gastritis, peptic ulcer disease, and increase the risk of gastric cancer and gastric MALT lymphoma.

Synonyms:

Helicobacter Pylori Infection

Infection of the stomach by *H. pylori*, a spiral-shaped bacterium associated with chronic gastritis, peptic ulcer disease, gastric adenocarcinoma, and gastric MALT lymphoma. It is diagnosed with noninvasive or endoscopic testing and treated with combination eradication therapy.

Synonyms:

HELLP Syndrome

A serious pregnancy-associated disorder characterized by hemolysis, elevated liver enzymes, and low platelet count. It may occur with or without classic hypertension or proteinuria and requires urgent assessment.

Synonyms:

Helminths

Parasitic worms that cause disease in humans. The major groups are nematodes (roundworms), cestodes (tapeworms), and trematodes (flukes). Helminths have complex life cycles often involving intermediate hosts. Infection occurs through ingestion of eggs or larvae, penetration of skin, or insect vectors.

Synonyms:

Helper T Cell

A type of CD4-positive T lymphocyte that coordinates immune responses by releasing cytokines and activating other immune cells.

Synonyms:

HELPERR Mnemonic

A mnemonic for the sequential management of shoulder dystocia: H — Help (call for additional personnel, anesthesia, and pediatrics). E — Evaluate for episiotomy (generous episiotomy to provide more room). L — Legs (McRoberts maneuver: hyperflex maternal legs onto the abdomen).

Synonyms:

Hemangioblastoma

A benign, well-circumscribed vascular tumor of the central nervous system, most commonly the cerebellum, often cystic with a mural nodule. Associated with von Hippel-Lindau disease; treated by surgical resection.

Synonyms:

Hemangioma

Benign vascular tumor. Port-wine stain (capillary malformation), strawberry hemangioma. Treatment: observation, laser, surgery.

Synonyms:

Hemangiosarcoma

A malignant tumor of vascular endothelial cells, an aggressive sarcoma that may arise in the skin, liver, or bone.

Synonyms:

Hematemesis

Vomiting of blood, indicating upper gastrointestinal bleeding proximal to the ligament of Treitz. Blood may be bright red (acute, brisk bleeding) or resemble coffee grounds (altered blood that has been in contact with gastric acid).

Synonyms:

Hematochezia

The passage of bright red or maroon blood per rectum, usually indicating active lower gastrointestinal (LGI) bleeding distal to the ligament of Treitz (e.g., diverticulosis, arteriovenous malformations/angiodysplasia, colorectal polyps/cancer, inflammatory bowel disease, hemorrhoids).

Synonyms:

Hematocrit

The percentage of total blood volume composed of packed red blood cells, one of the most commonly ordered laboratory tests in clinical medicine.

Synonyms:

Hematologic Changes in Pregnancy

Plasma volume increases 40-50% while red cell mass increases 20-30%, resulting in physiologic anemia (Hb 10-11 g/dL). Leukocytosis (WBC up to 15,000-16,000/ μ L, predominantly neutrophils) is normal.

Synonyms:

hematology

The branch of medicine concerned with the study, diagnosis, treatment, and prevention of disorders of the blood and blood-forming organs (bone marrow, lymph nodes, spleen).

Synonyms:

Hematometocolpos

Accumulation of blood in the uterine cavity and vagina due to outflow obstruction such as an imperforate hymen or transverse vaginal septum, presenting with cyclic pelvic pain and primary amenorrhea in adolescents.

Synonyms:

Hematopoiesis

The production and maturation of blood cells from multipotent hematopoietic stem cells, principally in the bone marrow after birth. It generates erythrocytes, leukocytes, and platelets through regulated progenitor-cell differentiation.

Synonyms:

Hematopoietic Stem Cell Transplantation

Infusion of hematopoietic stem cells after a conditioning regimen to restore marrow function or replace diseased hematopoiesis. Autologous HSCT uses the patient's own cells; allogeneic HSCT uses cells from a donor and carries risks including graft-versus-host disease and graft failure.

Synonyms:

Hematuria

Presence of red blood cells in the urine, categorized as microscopic (>3 RBCs per high-power field on urine microscopy) or gross (macroscopic, visible color change from pink to dark red). Microscopic hematuria is often asymptomatic and detected on routine urinalysis.

Synonyms:

Hemianopia

Loss of vision in half the visual field of one or both eyes. Homonymous hemianopia affects the same side in both eyes and localizes to a contralateral lesion posterior to the optic chiasm, most often stroke or tumor.

Synonyms:

Hemicolectomy

Surgical removal of the right or left portion of the colon, sometimes with nearby lymph nodes and reconnection of the bowel.

Synonyms:

Hemifacial Microsomia

A congenital craniofacial disorder involving asymmetric hypoplasia of the structures derived from the first and second branchial arches, most commonly affecting the mandible, ear, and soft tissues on one side. Also known as craniofacial microsomia or Goldenhar syndrome when epibulbar dermoids and vertebral anomalies are present.

Synonyms: craniofacial microsomia or.

Hemifacial Spasm

Involuntary, unilateral, intermittent twitching of the facial muscles innervated by the facial nerve (CN VII). Typically begins around the eye (orbicularis oculi) and spreads to the lower face.

Synonyms:

Hemiparesis

Weakness affecting one side of the body, less severe than hemiplegia (paralysis). It results from a lesion of the corticospinal tract anywhere from the motor cortex to the spinal cord, most commonly from

stroke, but also from tumors, trauma, or demyelination. The pattern of weakness helps localize the lesion.

Synonyms:

Hemiplegia

Paralysis of one side of the body (the face, arm, and leg on the same side), caused by damage to the corticospinal tract (pyramidal tract) at any level from the cerebral cortex to the spinal cord.

Synonyms:

Hemochromatosis

Iron overload disorder characterized by excessive intestinal iron absorption leading to progressive iron deposition in parenchymal organs. Hereditary hemochromatosis is most commonly caused by homozygous C282Y mutations in the HFE gene affecting approximately one in two hundred individuals of Northern European descent.

Synonyms:

Hemochromatosis Cardiomyopathy

Iron overload cardiomyopathy from hereditary (HFE gene mutations, most common) or secondary causes. Iron deposition in the myocardium causes restrictive then dilated cardiomyopathy. Diagnosis: elevated transferrin saturation ($>45\%$), ferritin, and genetic testing. Cardiac MRI T2* <20 ms indicates myocardial iron overload.

Synonyms:

Hemodialysis

Extracorporeal blood purification using semipermeable membrane. Three sessions per week for 3 to 4 hours. Requires vascular access with AV fistula preferred. Adequacy assessed by Kt/V greater than 1.4. Complications include hypotension, access infection, and dialyzer reactions.

Synonyms:

Hemofiltration

An extracorporeal process that removes plasma water and dissolved solutes by convection across a semipermeable membrane, with replacement fluid

used to maintain volume. It is used in continuous and intermittent kidney-replacement modalities.

Synonyms:

Hemoglobin

Tetrameric protein in red blood cells (4 subunits: 2 alpha, 2 beta in adults) containing heme groups that bind oxygen. Each heme contains iron (Fe²⁺) that reversibly binds O₂. Cooperative binding produces sigmoidal oxygen dissociation curve. P₅₀ (pO₂ at 50% saturation) 27 mmHg.

Synonyms:

Hemoglobin A1c

Glycated hemoglobin reflecting average blood glucose concentration over the preceding two to three months corresponding to the red blood cell lifespan. Formed by non-enzymatic glycation of hemoglobin at the N-terminal valine of the beta chain. The percent of glycated hemoglobin is directly proportional to mean glucose levels.

Synonyms:

Hemoglobin A1c Variability

Factors that can make hemoglobin A1c less reliable include altered red-cell survival, hemoglobin variants, anemia, pregnancy, kidney disease, transfusion, and some treatments. An alternative measure of glucose may be needed when A1c does not reflect recent glycemia.

Synonyms:

Hemoglobin C Disease

An inherited hemoglobinopathy caused by a beta-globin variant that produces hemoglobin C. It may cause mild hemolytic anemia, jaundice, splenomegaly, or, when combined with hemoglobin S, clinically significant sickling disease.

Synonyms:

Hemoglobin Electrophoresis

Separation of hemoglobin variants by electrophoresis or HPLC. Normal adult: HbA (95-98%), HbA₂ (2-3%), HbF (<1%). Sick cell disease (HbSS): HbS only, no HbA. Sick cell trait (HbAS): HbA

> HbS. Thalassemia: elevated HbA₂ or HbF. Beta thalassemia trait: HbA₂ 3.5-7%.

Synonyms:

Hemoglobinopathies: Thalassemias

Thalassemias are inherited disorders of globin chain synthesis imbalance: alpha-thalassemia (HBA1/HBA2 deletions) and beta-thalassemia (HBB mutations).

Synonyms:

Hemoglobinopathy

An inherited disorder affecting the structure or production of haemoglobin. Examples include sickle-cell disease and thalassemia; manifestations range from asymptomatic microcytosis to haemolytic anaemia, vaso-occlusion, and organ injury.

Synonyms:

hemolysis

The premature destruction of red blood cells, releasing hemoglobin into the plasma. Extravascular hemolysis (most common): RBCs are destroyed by macrophages in the spleen and liver — causes unconjugated hyperbilirubinemia, increased LDH, and decreased haptoglobin.

Synonyms:

Hemolytic Anemia

Anemia due to accelerated destruction of red blood cells (RBCs), classified as intrinsic (RBC defect) or extrinsic (external factors). Intrinsic: hereditary spherocytosis, G6PD deficiency, sickle cell disease, thalassemia.

Synonyms:

Hemolytic Anemias: Autoimmune

Autoimmune hemolytic anemia occurs when antibodies or complement cause premature destruction of red blood cells. Warm-antibody and cold-antibody forms differ in their triggers, laboratory findings, and sites of red-cell destruction.

Synonyms:

Hemolytic Anemias: Hereditary

Hereditary spherocytosis (HS): cytoskeletal protein defects (ankyrin, band 3, protein 4.2, alpha/beta spectrin) -> spherical RBCs, splenic trapping, hemolysis. AD (75%) or AR. Clinical: anemia, jaundice, splenomegaly, gallstones.

Synonyms:

hemolytic Disease of the Newborn

A condition in which maternal antibodies destroy fetal/neonatal red blood cells (RBCs), causing hemolytic anemia, hyperbilirubinaemia, and in severe cases hydrops fetalis.

Synonyms:

Hemolytic Jaundice

Jaundice resulting from excessive hemolysis (breakdown of red blood cells) causing overproduction of unconjugated bilirubin that exceeds the liver's capacity for conjugation and excretion. See Jaundice for complete overview.

Synonyms:

Hemolytic Uremic Syndrome

A thrombotic microangiopathy characterized by red-cell destruction, low platelets, and acute kidney injury. It may follow Shiga-toxin-producing gastrointestinal infection or result from complement dysregulation and other causes.

Synonyms:

Hemolytic-Uremic Syndrome

A potentially life-threatening disorder characterized by microangiopathic hemolytic anemia, thrombocytopenia, and acute kidney injury. It often follows Shiga-toxin-producing bacterial gastroenteritis but may also result from complement dysregulation or other triggers.

Synonyms:

Hemoperfusion

Blood passed through adsorbent column (charcoal, resin) to remove toxins. Used for drug overdoses with high protein binding, large volume of distribution.

Synonyms:

Hemophagocytic Lymphohistiocytosis

HLH: uncontrolled immune activation with cytokine storm (IFN-gamma, IL-6, IL-10, TNF). Familial HLH (FHL): PRF1 (FHL2), UNC13D (FHL3), STX11 (FHL4), STXBP2 (FHL5), RAB27A (FHL6/GrisCELLI type 2). Secondary HLH: infections (EBV, CMV), malignancy (lymphoma), autoimmune (SJIA/MAS, SLE), immunodeficiency.

Synonyms:

Hemophagocytosis of sickle cells

Activation of macrophages that engulf erythrocytes, leukocytes, and platelets within the bone marrow, occurring as a complication of sickle cell disease during severe hemolytic crises or infection.

Synonyms:

Hemophilia

An inherited bleeding disorder caused by deficiency or dysfunction of clotting factor VIII, IX, or another coagulation component. It causes prolonged bleeding, particularly into joints and muscles, after injury or procedures.

Synonyms:

Hemophilia A

An inherited bleeding disorder caused by deficiency or dysfunction of clotting factor VIII, usually resulting in prolonged bleeding into joints, muscles, or other tissues.

Synonyms:

Hemophilia B

An inherited bleeding disorder caused by deficiency or dysfunction of clotting factor IX, producing a bleeding pattern similar to hemophilia A.

Synonyms:

Hemoptysis

Expectoration of blood from the lower respiratory tract. Must be differentiated from hematemesis and epistaxis. Causes: bronchitis, pneumonia, TB, bronchiectasis, lung cancer, PE.

Synonyms:

Hemorrhage

Extravasation of blood from the cardiovascular system (heart, arteries, veins, capillaries).

Synonyms:

Hemorrhagic

Relating to bleeding or the escape of blood from blood vessels.

Synonyms:

Hemorrhagic Shock

Circulatory failure caused by severe blood loss. It may produce rapid pulse, low blood pressure, cool skin, reduced urine output, confusion, or collapse. Treatment requires urgent control of bleeding, restoration of circulating volume, blood products when indicated, and correction of associated injuries or clotting abnormalities.

Synonyms:

Hemorrhagic Stroke

A neurological deficit caused by rupture of a cerebral blood vessel, accounting for 13% of all strokes but 40% of stroke mortality. Intracerebral hemorrhage: hypertensive (basal ganglia, thalamus, pons, cerebellum), amyloid angiopathy (lobar, elderly), vascular malformations, anticoagulation. Subarachnoid hemorrhage: aneurysm rupture.

Synonyms:

Hemorrhoidectomy

Surgical excision of symptomatic hemorrhoids. Indications: Grade III-IV internal hemorrhoids (prolapsed, irreducible), external hemorrhoids with uncontrolled bleeding or recurrent thrombosis, mixed hemorrhoids.

Synonyms:

hemorrhoids (Piles)

Vascular cushions in the anal canal composed of arteriovenous anastomoses (normal structures present from birth), which become symptomatic when they bleed, prolapse, or thrombose.

Synonyms: Piles

Hemosiderin

A golden-brown, granular, iron-containing pigment derived from the degradation of hemoglobin and stored within macrophages as an insoluble complex. It forms when red blood cells are phagocytosed and degraded, typically in conditions of hemorrhage, hemolysis, or excessive red blood cell destruction.

Synonyms:

hemostasis

The physiological process that stops bleeding at the site of vascular injury.

Synonyms:

Hemostat

A clamp used to compress a blood vessel or tissue and control bleeding.

Synonyms:

Hemostat (Perineal)

A clamp used during procedures to compress a blood vessel or hold tissue and control bleeding.

Synonyms: Perineal

Hemostat (Surgical)

A clamping surgical instrument used to control bleeding by compressing a blood vessel or tissue.

Synonyms: Surgical

Hemostat (Vascular)

A surgical clamp used to temporarily occlude a blood vessel and control bleeding.

Synonyms: Vascular

Hemothorax

Blood in pleural space. Traumatic or spontaneous. Symptoms: chest pain, dyspnea, decreased breath sounds, dullness to percussion. Diagnosis: chest X-ray, ultrasound, CT. Treatment: tube thoracostomy, blood transfusion, surgery if ongoing bleeding.

Synonyms:

Henoch-Schonlein Purpura

IgA vasculitis: palpable purpura on buttocks/legs, abdominal pain, arthralgia, renal involvement (IgA nephropathy), most common in children. Self-limited in most cases; corticosteroids for severe GI/renal involvement.

Synonyms:

Henoch-Schönlein purpura

An older name for IgA vasculitis, an inflammation of small blood vessels that can cause palpable purpura, usually on the lower limbs and buttocks, with joint pain, abdominal symptoms, and kidney involvement.

Synonyms:

Heparin-Induced Thrombocytopenia

An immune-mediated adverse drug reaction caused by IgG antibodies against platelet factor 4 (PF4)-heparin complexes, leading to platelet activation, thrombocytopenia, and a prothrombotic state. HIT typically occurs 5-14 days after heparin exposure (unfractionated heparin > low molecular weight heparin).

Synonyms:

Hepatectomy

Surgical removal of part or all of the liver for primary or metastatic tumors, requiring an adequate future liver remnant; portal vein embolization can hypertrophy the remnant before resection.

Synonyms:

Hepatic Cyst

Fluid-filled cavity in the liver most commonly congenital and asymptomatic. Simple hepatic cysts are lined by biliary epithelium and contain clear fluid. May cause pain or compressive symptoms if large or complicated by hemorrhage, infection, or rupture. Simple cysts require no treatment.

Synonyms:

Hepatic Dose Adjustment

Modification of medication selection or dosing because impaired liver function may reduce

metabolism, transport, protein synthesis, or biliary excretion. Standardized liver tests do not always predict drug clearance, so drug-specific guidance is required.

Synonyms:

Hepatic Drug Metabolism

The liver chemically modifies medicines through reactions such as oxidation, reduction, hydrolysis, and conjugation. These reactions can inactivate a drug, activate a prodrug, or produce an active or toxic metabolite, and are influenced by genetics, disease, age, and other medicines.

Synonyms:

Hepatic Encephalopathy

Neuropsychiatric syndrome occurring in advanced liver disease resulting from accumulation of neurotoxic substances, particularly ammonia. Ammonia crosses the blood-brain barrier and is metabolized by astrocytes into glutamine causing osmotic swelling and impaired neurotransmission.

Synonyms:

Hepatic Hemangioma

Most common benign liver tumor composed of dilated blood-filled vascular spaces lined by endothelial cells. Usually asymptomatic and found incidentally on imaging. Most are small and require no treatment.

Synonyms:

Hepatic Hydrothorax

Large pleural effusion occurring in patients with cirrhosis and portal hypertension in the absence of primary cardiac or pulmonary disease. Most commonly right-sided resulting from transit of ascitic fluid through small defects in the diaphragm into the pleural space driven by the pressure gradient between the abdomen and thorax.

Synonyms:

Hepatic Ischemia

Liver injury caused by inadequate hepatic blood flow or oxygen delivery, often during shock, severe

hypoxemia, cardiac failure, or hepatic vascular occlusion. It can produce a rapid, marked rise in aminotransferases and may progress to acute liver failure.

Synonyms:

Hepatic Portal System

The venous network draining blood from the gastrointestinal tract, spleen, and pancreas to the liver before it reaches the systemic circulation. Formed by the union of the superior mesenteric and splenic veins behind the pancreatic neck; receives inferior mesenteric, left gastric, and other tributaries.

Synonyms:

Hepatic Surgery

Surgical treatment of liver disease, including partial liver resection, transplantation, and procedures for tumors or biliary disorders. The operation depends on the diagnosis, tumor extent, liver function, and overall health.

Synonyms:

Hepatic Synthetic Dysfunction

Impaired hepatic production of proteins and other molecules, including albumin and coagulation factors. It may cause hypoalbuminemia, edema, prolonged prothrombin time, and increased INR, although INR can also be altered by vitamin K deficiency, anticoagulants, and other conditions.

Synonyms:

Hepatic Trauma

Liver injury from trauma. CT staging guides management. Grades I-V based on injury severity.

Synonyms:

Hepatic Vein

Veins draining the liver into the inferior vena cava. The right, middle, and left hepatic veins emerge from the posterior surface of the liver at the bare area and drain into the IVC just below the diaphragm. They carry deoxygenated blood leaving the liver (after the hepatic portal system delivers blood for processing).

Synonyms:

Hepatitis

Inflammation or injury of the liver caused by infection, alcohol, medicines, autoimmune disease, or other conditions.

Synonyms:

Hepatitis (Viral Hepatitis)

Inflammation of the liver caused by hepatotropic viruses. Hepatitis A (HAV): fecal-oral, acute self-limited, no chronic carrier state; vaccine-preventable. Hepatitis B (HBV): blood/sexual/perinatal transmission; acute and chronic infection; leading cause of cirrhosis and HCC.

Synonyms: Viral Hepatitis

Hepatitis A

An acute viral infection of the liver caused by hepatitis A virus (HAV), transmitted via fecal-oral route (contaminated food or water). Incubation 15-50 days. Presents with fever, malaise, nausea, jaundice, and elevated transaminases. Self-limited; does not cause chronic infection. Fulminant hepatitis is rare. Diagnosis: IgM anti-HAV.

Synonyms:

Hepatitis A Virus

Picornavirus transmitted through the fecal-oral route most commonly via contaminated food or water. The incubation period is fifteen to fifty days. Clinical presentation ranges from asymptomatic infection in young children to symptomatic acute hepatitis with jaundice, fatigue, nausea, elevated transaminases, dark urine, and pale stools.

Synonyms:

Hepatitis A, B, C, D, E

Five viruses that can cause viral hepatitis. They differ in transmission, risk of chronic infection, prevention, and treatment.

Synonyms:

Hepatitis B

A viral infection caused by hepatitis B virus (HBV),

transmitted via blood, sexual contact, and perinatally. Can cause acute (self-limited or fulminant) and chronic infection (defined by HBsAg positivity >6 months). Chronic HBV leads to cirrhosis and hepatocellular carcinoma.

Synonyms:

Hepatitis B Vaccine

Recombinant vaccine given at birth, 1-2 months, and 6-18 months. Protects against hepatitis B virus, which can cause chronic liver disease, cirrhosis, and hepatocellular carcinoma. Also prevents perinatal transmission when given to infants of HBsAg-positive mothers within 12 hours of birth, plus hepatitis B immune globulin.

Synonyms:

Hepatitis B Vaccine (Birth Dose)

The first dose of the hepatitis B vaccine is recommended within 24 hours of birth for all medically stable infants. Administered IM in the vastus lateralis. Prevents perinatal transmission of HBV. For infants born to HBsAg-positive mothers: HBIG (0.5 mL IM) is given within 12 hours of birth along with the vaccine.

Synonyms: Birth Dose

Hepatitis B Virus

Hepadnavirus transmitted through percutaneous exposure, sexual contact, and perinatally causing acute and potentially chronic hepatitis. The virus has a partially double-stranded circular DNA genome.

Synonyms:

Hepatitis C

A viral infection caused by hepatitis C virus (HCV), primarily transmitted through blood exposure (IV drug use, blood transfusion before 1992). Acute infection is often asymptomatic; 50-80% progress to chronic hepatitis. Chronic HCV can lead to cirrhosis and hepatocellular carcinoma over decades. Diagnosis: anti-HCV antibody, HCV RNA.

Synonyms:

Hepatitis C Virus

Flavivirus transmitted primarily through percutaneous exposure with injection drug use being the most common route. Approximately seventy to eighty percent of acute infections progress to chronic hepatitis C, the leading cause of cirrhosis, hepatocellular carcinoma, and liver transplantation in many Western countries.

Synonyms:

Hepatitis D Virus

Defective RNA virus requiring co-infection with hepatitis B to replicate, using hepatitis B surface antigen for its envelope. Hepatitis D causes more severe liver disease than hepatitis B alone with accelerated progression to cirrhosis and higher risk of hepatocellular carcinoma.

Synonyms:

Hepatitis E Virus

A non-enveloped RNA virus transmitted mainly by the fecal-oral route, often through contaminated water or food. It causes acute hepatitis and, in some people, chronic infection or severe disease. Clinical presentation may resemble hepatitis A, with jaundice and elevated transaminases.

Synonyms:

Hepatitis Serology

Panel of serologic markers for hepatitis A, B, C, and E. HAV: anti-HAV IgM (acute), anti-HAV IgG (past infection/vaccination). HBV: HBsAg (active infection), anti-HBs (immunity/vaccination), anti-HBc IgM (acute), anti-HBc IgG (past), HBeAg (high replication), anti-HBe (low replication). HBV DNA: quantifies viral load.

Synonyms:

Hepatitis Viruses

Hepatitis A: fecal-oral, acute self-limited, vaccine (inactivated). Hepatitis B: blood/sexual/perinatal. Acute: HBsAg, IgM anti-HBc. Chronic: HBsAg >6 months, HBV DNA, HBeAg. Treatment: entecavir, tenofovir (TAF/TDF) - suppress DNA, prevent cirrhosis/HCC. HDV: requires HBV, pegylated interferon. Hepatitis C: blood-borne. Acute: HCV

RNA.

Synonyms:

Hepatobiliary Scintigraphy

Liver/gallbladder imaging using Tc-99m mebrofenin or disofenin. Assess biliary patency, gallbladder function, bile leak, acute cholecystitis (non-visualization of gallbladder).

Synonyms:

Hepatoblastoma

A malignant embryonal liver tumor occurring almost exclusively in infants and young children, associated with elevated AFP and prematurity.

Synonyms:

Hepatocellular Carcinoma

Primary liver cancer arising from hepatocytes. Risk factors: cirrhosis, chronic hepatitis B/C, alcohol, and metabolic dysfunction-associated steatotic liver disease. Surveillance with ultrasound and AFP; treatment includes resection, transplantation, ablation, TACE, and systemic therapy.

Synonyms:

Hepatocellular Jaundice

Jaundice caused by dysfunction of hepatocytes, impairing the liver's ability to take up, conjugate, or excrete bilirubin. See Jaundice for complete overview. Causes: viral hepatitis (A, B, C, D, E), alcoholic hepatitis, drug-induced liver injury (paracetamol, isoniazid), cirrhosis, autoimmune hepatitis, Wilson disease, haemochromatosis.

Synonyms:

Hepatojugular Reflux

Sustained pressure applied over the liver for 15-30 seconds causes a sustained rise in JVP of more than 3 cm above baseline. It indicates right heart failure or fluid overload, reflecting the inability of the right ventricle to accommodate increased venous return.

Synonyms:

Hepatoma

A tumor arising from liver cells, usually referring

to hepatocellular carcinoma, the most common primary malignant liver tumor.

Synonyms:

Hepatomegaly

Enlarged liver detected on imaging. Causes: fatty liver, hepatitis, congestion, infiltration, malignancy.

Synonyms:

Hepatopulmonary Syndrome

Triad of liver disease, intrapulmonary vascular dilatation, and impaired oxygenation causing hypoxemia. Presents with platypnea which is dyspnea worsening in the upright position and orthodeoxia which is oxygen desaturation in the upright position.

Synonyms:

Hepatorenal Syndrome

A form of acute or chronic kidney dysfunction associated with advanced liver disease and portal hypertension, without another sufficient cause of renal failure. It reflects altered circulation and renal blood flow and requires prompt assessment and treatment of both the liver disease and kidney dysfunction.

Synonyms:

Hepatosplenomegaly

Enlargement of both the liver and spleen. It may result from infection, portal hypertension, storage disease, malignancy, haemolysis, or systemic inflammatory and infiltrative disorders; evaluation depends on associated symptoms and laboratory and imaging findings.

Synonyms:

Hepatotoxicity

Liver injury caused by a drug, toxin, chemical, or other exposure. Acetaminophen is an important cause of acute liver failure in some regions. Evaluation may include liver tests, clotting studies, medication review, and clinical assessment.

Synonyms:

HER2-Positive

A cancer whose cells have increased expression or

amplification of human epidermal growth factor receptor 2 (HER2). Some HER2-targeted medicines may be used according to the cancer type and clinical context.

Synonyms:

Herd Immunity

Resistance of population to invasion by infectious agent when sufficient proportion immune. Threshold varies by disease (measles 95%, polio 80%).

Synonyms:

Hereditary Angioedema

Recurrent episodes of nonpitting swelling of the skin, gastrointestinal tract, or upper airway caused most often by deficiency or dysfunction of C1 inhibitor. Attacks can cause abdominal pain, vomiting, airway obstruction, or life-threatening laryngeal edema without typical urticaria.

Synonyms:

Hereditary Cancer

Cancer caused by inherited genetic mutations. Genetic counseling recommended.

Synonyms:

Hereditary Hemorrhagic Telangiectasia

An autosomal dominant vascular disorder (also called Osler-Weber-Rendu syndrome) characterized by telangiectasias on skin and mucous membranes, pulmonary AVMs, hepatic AVMs, and cerebral AVMs. Pulmonary AVMs can cause hypoxemia and paradoxical emboli. Treatment is embolization of pulmonary AVMs.

Synonyms: Osler-Weber-Rendu syndrome).

Hereditary Hemorrhagic Telangiectasia (Osler-Weber-Rendu Disease)

An autosomal dominant vascular dysplasia characterized by malformed blood vessels lacking smooth muscle layers. Mutations in ENG (endoglin) or ACVRL1 (ALK1) genes.

Synonyms: Osler-Weber-Rendu Disease

Hereditary Spherocytosis

The most common inherited hemolytic anemia in Northern Europeans (autosomal dominant 75%, recessive 25%). Caused by defects in RBC membrane proteins (spectrin, ankyrin, band 3, protein 4.2), leading to loss of membrane surface area, reduced deformability, and premature destruction in the spleen.

Synonyms:

Hermansky-Pudlak Syndrome

Autosomal recessive (10+ genes: HPS1-10, BLOC/AP-3 complexes). Oculocutaneous albinism, bleeding disorder (absent dense bodies in platelets -> prolonged bleeding time), pulmonary fibrosis (HPS-1, HPS-4), granulomatous colitis, neutropenia. Diagnosis: electron microscopy of platelets (absent dense bodies), genetic testing.

Synonyms:

Hernia

The protrusion of an organ or tissue through an abnormal opening in the wall of the cavity that normally contains it. Most hernias occur in the abdominal wall.

Synonyms:

Hernia Mesh

Synthetic or biologic material for hernia repair. Polypropylene most common. Complications: infection, recurrence, chronic pain, mesh migration.

Synonyms:

Hernia Repair (Herniorrhaphy)

Surgical repair of a hernia (inguinal, femoral, umbilical, incisional, hiatal). Inguinal hernia repair: open (Lichtenstein tension-free mesh, Shouldice, Bassini) or laparoscopic (TEP: totally extraperitoneal, TAPP: transabdominal preperitoneal). Mesh reinforcement reduces recurrence (1-3% for mesh vs. 5-15% for primary tissue repair).

Synonyms: Herniorrhaphy

Herniated Disc

Protrusion of the nucleus pulposus through a tear

in the annulus fibrosus of the intervertebral disc, causing compression or inflammation of adjacent nerve roots. Most common at L4-L5 and L5-S1 (lumbar) and C5-C6, C6-C7 (cervical). Lumbar: sciatica (radiating leg pain), paresthesias, sensory loss, and motor weakness (foot drop).

Synonyms:

Herniated disk

Displacement of nucleus pulposus material through a tear in the annulus fibrosus of an intervertebral disc, most commonly occurring in the lumbar spine (L4-L5 and L5-S1 account for 95 percent of lumbar herniations) and cervical spine (C5-C6 and C6-C7), potentially compressing spinal nerves.

Synonyms:

Herpangina

An acute viral infection, usually caused by enteroviruses, that produces fever, sore throat, and small vesicles or ulcers on the soft palate and posterior pharynx. It is most common in children and spreads through respiratory and fecal-oral secretions.

Synonyms:

Herpes

Infection caused by a herpesvirus. The term commonly refers to herpes simplex infection, which causes oral or genital lesions, but other herpesviruses cause distinct diseases.

Synonyms:

Herpes gestationis

An autoimmune blistering skin disease of pregnancy mediated by anti-basement membrane zone antibodies, presenting with pruritic urticarial plaques and vesicles, typically in the second or third trimester.

Synonyms:

Herpes Simplex

Infection with herpes simplex virus type 1 or type 2, commonly causing recurrent oral or genital vesicles and ulcers.

Synonyms:

Herpes Simplex (Cold Sores / Genital Herpes)

A viral infection caused by herpes simplex virus type 1 (HSV-1, typically orofacial, though increasingly anogenital) and type 2 (HSV-2, predominantly anogenital). HSV is a double-stranded DNA virus of the Herpesviridae family with latency in sensory ganglia and periodic reactivation.

Synonyms: Cold Sores / Genital Herpes

Herpes Simplex Encephalitis

The most common cause of sporadic fatal encephalitis, caused by herpes simplex virus type 1 (HSV-1) in over ninety percent of cases. The virus typically infects the temporal lobes, orbitofrontal cortex, and insular cortex, causing hemorrhagic necrosis.

Synonyms:

Herpes Simplex Skin Infection

Infection of skin or mucosa by herpes simplex virus, producing grouped vesicles or erosions on an erythematous base. Recurrent disease commonly affects the oral or genital region; widespread infection in patients with eczema is eczema herpeticum and requires urgent medical assessment.

Synonyms:

Herpes simplex virus

A double-stranded DNA virus belonging to the Herpesviridae family that causes oral and genital herpes. HSV has two serotypes: HSV-1, which typically causes oral herpes, and HSV-2, which typically causes genital herpes. The virus establishes latent infections in sensory ganglia and can reactivate periodically.

Synonyms:

Herpes simplex virus infection

Infection with herpes simplex virus type 1 or type 2, commonly causing recurrent oral, genital, skin, eye, or central nervous system disease.

Synonyms:

Herpes vegetans

A rare, chronic, verrucous or vegetative form of

herpes simplex virus infection occurring in immunocompromised patients, particularly those with HIV/AIDS. It presents as exophytic, proliferative, ulcerative plaques on the genital or perianal skin, often refractory to standard antiviral therapy.

Synonyms:

Herpes Zoster

A painful, usually one-sided blistering rash caused by reactivation of latent varicella-zoster virus in a sensory nerve ganglion. It typically follows a band-like distribution and may cause persistent nerve pain after the rash resolves.

Synonyms:

Herpes Zoster (Shingles)

A painful, vesicular rash caused by reactivation of latent varicella-zoster virus (VZV, human herpesvirus 3) in the dorsal root ganglia.

Synonyms: Shingles

Herpes zoster ophthalmicus

Reactivation of varicella-zoster virus latency in the trigeminal ganglion, with viral spread along the ophthalmic division (V1) causing painful vesicular skin eruption on the forehead, eyelid, and nose, with potential ocular involvement including keratitis, uveitis, and secondary glaucoma.

Synonyms:

Herpetic glossitis

Inflammation of the tongue caused by herpes simplex virus infection, presenting with painful vesicles and ulceration on the tongue surface, often recurring in immunocompromised patients.

Synonyms:

Herpetic Whitlow

A painful viral infection of the finger caused by the herpes simplex virus (typically HSV-1), characterized by swelling, redness, and painful vesicular lesions on the finger.

Synonyms:

Hesitation Wounds

Multiple superficial, tentative parallel incised cuts surrounding a deeper primary fatal cut wound, classically observed in suicides involving sharp instruments (wrists, neck).

Synonyms:

Heteroplasmy

The presence of more than one mitochondrial DNA sequence in a cell or person, usually because mutant and normal mitochondrial genomes coexist.

Synonyms:

Heterotopic Pregnancy

Simultaneous intrauterine and ectopic pregnancy. Rare in spontaneous conception (1:30,000) but more common with ART (1:100-1:500). Risk factors: ovulation induction, IVF with multiple embryo transfer. The presence of an intrauterine pregnancy does not exclude an ectopic pregnancy.

Synonyms:

Heterozygous

Having two different alleles of a particular gene at a genetic locus. The observable effect depends on the gene and the relationship between the alleles.

Synonyms:

Hexokinase

Phosphorylates glucose to glucose-6-phosphate. Low K_m , inhibited by product. Glucokinase (liver) has high K_m , not inhibited.

Synonyms:

Hiatal Hernia

Protrusion of part of the stomach through the esophageal opening in the diaphragm into the chest. It may be sliding or paraesophageal and can be associated with reflux or other symptoms.

Synonyms:

Hiatus Hernia

Another term for hiatal hernia: protrusion of part of the stomach through the esophageal hiatus of the diaphragm into the chest. It may be sliding or

paraesophageal.

Synonyms:

Hib

Haemophilus influenzae type b, an encapsulated bacterium that can cause meningitis, epiglottitis, pneumonia, septic arthritis, cellulitis, or sepsis. Routine conjugate vaccination substantially reduces invasive Hib disease.

Synonyms:

Hiccough (Hiccup)

An involuntary, repetitive, spasmodic contraction of the diaphragm followed by sudden closure of the glottis, producing the characteristic 'hic' sound. Hiccups are caused by irritation or stimulation of the phrenic nerve (C3-C5, innervates the diaphragm) or the vagus nerve (CN X).

Synonyms: Hiccup

Hiccups

Recurrent involuntary spasms of the diaphragm followed by sudden closure of the glottis, producing a characteristic sound. Persistent or intractable hiccups may reflect irritation of the diaphragm or phrenic and vagal pathways, metabolic disease, medication exposure, or central nervous system disease.

Synonyms:

Hiccups (Singultus)

Involuntary, spasmodic contractions of the diaphragm and intercostal muscles followed by sudden glottic closure, producing the characteristic "hic" sound. The reflex arc involves the phrenic nerve (C3-C5), vagus nerve, and brainstem centers.

Synonyms: Singultus

Hidradenitis

Hidradenitis suppurativa is a chronic inflammatory follicular occlusion disease affecting apocrine gland-bearing areas (axillae, groin, inframammary). It presents with recurrent painful nodules, abscesses, sinus tracts, and scarring.

Synonyms:

Hidradenitis Suppurativa

A chronic inflammatory skin disorder involving recurrent painful nodules, abscesses, draining tunnels, and scars, usually in skin folds such as the axillae, groin, buttocks, or breasts. Severity varies and is influenced by genetic, hormonal, and environmental factors.

Synonyms:

High Arch

An abnormally elevated medial longitudinal arch of the foot, also called pes cavus. It may be idiopathic or associated with neuromuscular disease and can cause overload of the heel and forefoot, calluses, pain, instability, or difficulty fitting footwear.

Synonyms: pes cavus.

High-Dependency Unit

A ward or area within a hospital that provides a level of care between a general ward and an intensive care unit, for patients who require intensive observation or treatment but not mechanical ventilation.

Synonyms:

High-Flow Nasal Cannula

A device delivering heated and humidified oxygen at flow rates up to 60 L/min through a nasal cannula. It provides a modest amount of PEEP, reduces dead space ventilation, and improves patient comfort compared to non-invasive ventilation. It is used for acute hypoxemic respiratory failure and post-extubation support.

Synonyms:

High-Intensity Focused Ultrasound

A treatment that concentrates ultrasound energy to heat and destroy a targeted area of tissue. Its uses depend on the device, disease, and clinical setting.

Synonyms:

High-Level Disinfection

Disinfection that inactivates all microorganisms except high numbers of bacterial spores. It is commonly used for heat-sensitive semicritical equipment such as some flexible endoscopes after meticulous

cleaning.

Synonyms:

Hill-Sachs Lesion

Impaction fracture of posterolateral humeral head from anterior shoulder dislocation. Associated with Bankart lesion.

Synonyms:

Hip Dislocation

Loss of normal congruence between the femoral head and acetabulum. It is usually traumatic in adults and may damage the sciatic nerve or femoral-head blood supply; congenital or developmental dislocation occurs in developmental dysplasia of the hip.

Synonyms:

Hip Disorders

The hip joints are ball-and-socket joints connecting the femur to the pelvis, providing stability and a wide range of motion for walking, running, and weight-bearing activities. Common hip conditions include osteoarthritis, fractures, bursitis, and labral tears.

Synonyms:

Hip Dysplasia

Developmental dysplasia of the hip (DDH): abnormal development of the acetabulum/femoral head causing instability, subluxation, or dislocation. Risk factors: female, breech presentation, family history, firstborn, and tight swaddling.

Synonyms:

Hip Fracture

Fracture of proximal femur, usually femoral neck or intertrochanteric region. Mechanism: low-energy fall in osteoporotic bone. Symptoms: pain, inability to bear weight, shortened/externally rotated leg. Diagnosis: X-ray, MRI if X-ray negative. Treatment: surgical fixation (internal fixation, arthroplasty).

Synonyms:

Hip Joint

Multiaxial ball-and-socket synovial joint between femoral head and acetabulum. Designed for stability and mobility, bearing entire upper body weight. Acetabular labrum deepens the socket; strong ligaments (iliofemoral, pubofemoral, ischiofemoral) reinforce it. Ligamentum teres contains the femoral head artery.

Synonyms:

Hip Prosthesis

Total hip replacement components: femoral stem (metal), head (metal/ceramic), acetabular cup (polyethylene/metal/ceramic). Fixation: cemented (older patients), cementless (younger, porous coating for bone ingrowth). Materials: cobalt-chrome, titanium, ceramics.

Synonyms:

Hip Replacement

A surgical procedure in which the diseased hip joint is replaced with a prosthetic implant (arthroplasty). Total hip replacement (THR) replaces both the femoral head and the acetabulum.

Synonyms:

Hip-Fracture Rehabilitation

Multidisciplinary postoperative management aimed at restoring mobility, preventing complications, and returning the older person to the highest feasible level of independence. It includes early mobilization, pain control, osteoporosis treatment, delirium prevention, nutrition, and discharge planning.

Synonyms:

Hippocampus

Curved medial temporal lobe structure, part of the limbic system, critical for new declarative memory formation (episodic and spatial) and short-to-long-term memory conversion. Has dentate gyrus, hippocampus proper (CA1-CA4), subiculum, and entorhinal cortex. One of few adult neurogenesis sites (dentate gyrus).

Synonyms:

Hippotherapy

Therapeutic horseback riding for neurological, musculoskeletal conditions. Improves balance, posture, coordination.

Synonyms:

Hirschsprung Disease

Congenital condition characterized by the absence of enteric ganglion cells in a segment of the distal colon, resulting from failure of neural crest cell migration during embryonic development.

Synonyms:

Hirschsprung's Disease

A congenital disorder characterized by the absence of parasympathetic ganglion cells (aganglionosis) in the distal colon, resulting in failure of relaxation and functional obstruction. Incidence: 1 in 5,000 live births, male predominance (4:1).

Synonyms:

Hirsutism

Excess terminal hair growth in women in a male-pattern distribution (face—upper lip, chin, sideburns; chest, back, lower abdomen, inner thighs). Hirsutism affects 5-10% of women of reproductive age. Pathophysiology: increased androgen production or increased end-organ sensitivity.

Synonyms:

Histamine

A biogenic amine (imidazolyethylamine) synthesised from L-histidine by histidine decarboxylase, stored in basophils, mast cells, and platelets, and released during allergic and inflammatory responses.

Synonyms:

Histiocytosis

A group of rare disorders of abnormal histiocyte (macrophage/dendritic cell) proliferation, including Langerhans cell histiocytosis, Erdheim-Chester disease, and hemophagocytic lymphohistiocytosis.

Synonyms:

Histology

The microscopic study of the structure of tissues and cells. Histology involves preparing thin tissue sections (3-10 micrometres) by fixation (formalin, paraffin embedding), sectioning (microtome), staining (haematoxylin and eosin, H&E), and examination under a light or electron microscope.

Synonyms:

Histopathology

The laboratory-based diagnosis of disease through microscopic examination of tissue sections from biopsy, excision, or autopsy, built on fixation, paraffin embedding, sectioning, and hematoxylin and eosin staining.

Synonyms:

Histoplasma capsulatum

A fungus found in soil contaminated with bird or bat droppings that can cause histoplasmosis when its spores are inhaled.

Synonyms:

Histoplasmosis

A systemic fungal infection caused by *Histoplasma capsulatum*, a dimorphic fungus found in nitrogen-rich soil enriched with bat or bird guano, most commonly in the Ohio and Mississippi River valleys of the United States, Central and South America, and parts of Africa and Asia.

Synonyms:

Histrionic Personality Disorder

A pattern of excessive emotionality and attention-seeking.

Synonyms:

HIV

Human immunodeficiency virus: a retrovirus (HIV-1, HIV-2) causing progressive CD4+ T-cell depletion and AIDS if untreated. Transmitted via sexual contact, blood/blood products, mother-to-child.

Synonyms:

HIV (Human Immunodeficiency Virus)

A retrovirus (family Retroviridae, genus Lentivirus) that causes acquired immunodeficiency syndrome (AIDS) by infecting and destroying CD4+ T lymphocytes (helper T cells). Two types: HIV-1 (pandemic, most common worldwide) and HIV-2 (less virulent, West Africa).

Synonyms: Human Immunodeficiency Virus

HIV infection

Infection with human immunodeficiency virus, which progressively damages immune function if untreated. Antiretroviral therapy suppresses viral replication and reduces transmission and complications.

Synonyms:

HIV Test

Screening and confirmatory testing for HIV. Fourth-generation HIV antigen/antibody combo test (p24 antigen + HIV-1/2 antibodies): window period 2-4 weeks. Positive screening requires confirmatory HIV-1/2 antibody differentiation assay. Rapid point-of-care tests (fingerstick, oral swab): results in 20 minutes.

Synonyms:

HIV/AIDS

HIV-1/2: retrovirus, CD4+ T cell depletion. Transmission: sexual, blood, perinatal, breast milk. Acute retroviral syndrome: fever, lymphadenopathy, pharyngitis, rash, high viral load. Clinical latency: CD4 decline over years. AIDS: CD4 <200 or AIDS-defining illness (PJP, toxo, CMV, MAC, crypto, KS, lymphoma, TB).

Synonyms:

HIV/AIDS Immunopathogenesis

HIV-1 infects CD4+ T cells, macrophages, dendritic cells via gp120 binding to CD4 + CCR5 (R5-tropic, early) or CXCR4 (X4-tropic, late). Reverse transcription -> integration -> transcription/translation -> budding. Acute retroviral syndrome (2-4 weeks): fever, lymphadenopathy, pharyngitis, rash, high viral load.

Synonyms:

HIV/AIDS Nutrition

Malnutrition due to increased need/requirement, malabsorption, side effects. Supplementation, opportunistic infection management.

Synonyms:

Hives

Transient, itchy, raised wheals caused by localized dermal edema. Urticaria may be acute or chronic and can result from infection, foods, medications, physical triggers, or autoimmune mechanisms; swelling of the airway is an emergency.

Synonyms:

Hives (Urticaria)

A common skin condition characterized by transient, well-circumscribed, intensely pruritic wheals that blanch with pressure and resolve within 24 hours without scarring, caused by mast-cell mediator release in the dermis. Acute urticaria lasts less than 6 weeks; chronic urticaria recurs for 6 weeks or longer and is often spontaneous.

Synonyms: Urticaria

HLA-B27

A class I human-leukocyte-antigen molecule associated with several spondyloarthropathies, including ankylosing spondylitis and reactive arthritis. A positive result supports but does not establish a diagnosis.

Synonyms:

HMG-CoA Reductase

Rate-limiting enzyme of cholesterol synthesis. Target of statin drugs.

Synonyms:

Hoarding Disorder

Persistent difficulty discarding or parting with possessions, regardless of their actual value. The individual perceives a need to save items and experiences distress at the thought of discarding them. This results in accumulation of possessions that congest

and clutter active living areas.

Synonyms:

Hoarseness

A subjective change in voice quality characterized by roughness, breathiness, strain, or altered pitch; a subset of dysphonia rather than a diagnosis. Common causes include acute viral laryngitis, voice overuse, smoking, reflux, and vocal cord lesions (nodules, polyps, papillomas, laryngeal carcinoma).

Synonyms:

Hodgkin Lymphoma

A B-cell lymphoma characterized by the presence of Reed-Sternberg cells (large, binucleate or multinucleate cells with owl-eye nucleoli) in a background of reactive inflammatory cells.

Synonyms:

Hodgkin's Lymphoma

A B-cell lymphoma characterized by the presence of Reed-Sternberg cells (large, binucleate or multinucleate cells with owl-eye nucleoli) in a background of reactive inflammatory cells. See Hodgkin Lymphoma.

Synonyms:

Holoprosencephaly

A structural brain malformation resulting from incomplete or failed division of the forebrain (prosencephalon) into the cerebral hemispheres during the fifth week of gestation.

Synonyms:

Holosystolic Murmur Differential

Pansystolic (holosystolic) murmurs are plateau-shaped and extend from S1 to S2.

Synonyms:

Holt-Oram Syndrome

An autosomal dominant disorder caused by TBX5 gene mutations, characterized by congenital heart disease and upper limb malformations. Cardiac anomalies: atrial septal defect (most common), VSD, and conduction abnormalities (heart block,

atrial fibrillation).

Synonyms:

Holter Monitor

Continuous ECG recording for 24-48 hours to detect arrhythmias, quantify burden (atrial fibrillation, PVCs, PACs), and correlate symptoms with rhythm. Patient diary logs symptoms. Indications: palpitations, syncope, presyncope, and assessment of arrhythmia control. Reveals paroxysmal arrhythmias not captured on standard 12-lead ECG.

Synonyms:

Holter Monitoring

Portable, continuous electrocardiographic recording over an extended period, commonly 24 hours or longer, to detect intermittent rhythm abnormalities and correlate them with symptoms.

Synonyms:

Home Care

Medical care provided at home. Includes nursing, therapy, personal care.

Synonyms:

Home Health

Healthcare services delivered in a person's home, such as nursing, therapy, monitoring, or assistance with a medical treatment plan.

Synonyms:

Home Health Rehabilitation

Physical, occupational, or speech therapy delivered at home when a person cannot safely travel to an outpatient facility.

Synonyms:

Home Rehabilitation

Rehabilitation provided in a person's home to improve movement, self-care, communication, or daily functioning.

Synonyms:

Homeostasis

The maintenance of stable internal conditions despite external changes. Key regulated variables: temperature, pH, glucose, electrolytes, blood pressure, fluid balance. Mechanisms: negative feedback loops (most common), positive feedback (rare, e.g., labor, blood clotting).

Synonyms:

Homocystinuria

An autosomal recessive inborn error of methionine metabolism caused most commonly by deficiency of cystathionine beta-synthase (CBS), leading to accumulation of homocysteine and methionine.

Synonyms:

Homozygous

Having two identical alleles of a particular gene (AA or aa). Can be homozygous dominant or homozygous recessive.

Synonyms:

Hookworm

Intestinal nematode infection by *Ancylostoma duodenale* or *Necator americanus*, acquired by skin penetration of filariform larvae (walking barefoot on contaminated soil).

Synonyms:

Hookworm Infection

Intestinal infection caused by hookworms acquired when larvae in contaminated soil penetrate the skin or are ingested. Chronic infection can cause abdominal symptoms, iron-deficiency anemia, protein loss, and impaired growth in children.

Synonyms:

Hookworm infestation

Intestinal infection by hookworm nematodes, which attach to the intestinal wall and may cause iron-deficiency anemia, abdominal symptoms, or poor growth.

Synonyms:

Hordeolum (Stye)

A tender, localized infection or inflammation of an eyelid gland that produces a small red lump near the eyelid margin.

Synonyms: Stye

Horizontal gene transfer

The transfer of genetic material between bacteria through mechanisms other than parent-to-offspring transmission. The three mechanisms are transformation (uptake of free DNA), transduction (transfer via bacteriophages), and conjugation (direct cell-to-cell transfer).

Synonyms:

Hormone

Chemical messenger secreted by endocrine glands into blood, acting on distant target organs with specific receptors. Classes: peptides/proteins (insulin, GH), steroids (cortisol, estrogen), amines (thyroid hormone, catecholamines). Mechanisms: cell surface receptors (GPCRs, RTKs) or intracellular receptors (nuclear receptors).

Synonyms:

Hormone Replacement Therapy

HRT (menopause hormone therapy): estrogen $\pm$ progestin to relieve menopausal symptoms (vasomotor, vaginal atrophy, sleep, mood) and prevent osteoporosis. Regimens: estrogen-only (post-hysterectomy) or combined (with progestin for endometrial protection in uterus-intact women); routes: oral, transdermal, vaginal.

Synonyms:

Hormone Therapy

Treatment blocking hormone effects in hormone-sensitive cancers. Examples: tamoxifen (breast cancer), leuprolide (prostate cancer), aromatase inhibitors.

Synonyms:

Hormone-Receptor Positive

A cancer whose cells express receptors for hormones such as estrogen or progesterone. Hormone-blocking

treatment may be useful for selected cancers with these receptors.

Synonyms:

Hormone-Sensitive Lipase

Breaks down triglycerides in adipose tissue. Activated by glucagon, epinephrine via cAMP.

Synonyms:

Horner Syndrome

A clinical triad caused by disruption of the sympathetic pathway to the eye and face, resulting in ipsilateral miosis (constricted pupil), ptosis (drooping of the upper eyelid due to paralysis of the superior tarsal muscle), and anhidrosis (loss of sweating on the affected side of the face).

Synonyms:

Horseshoe Kidney

The most common renal fusion anomaly (1 in 400-500), where the lower poles of both kidneys are fused across the midline by an isthmus of renal parenchyma or fibrous tissue.

Synonyms:

Hospice

Palliative care for terminal illness with prognosis <6 months. Focus on comfort, quality of life, support for patient and family. Provided at home, hospice facility, or hospital. Interdisciplinary team: physician, nurse, social worker, chaplain, volunteer.

Synonyms:

Hospice Rehabilitation

Rehabilitation in hospice setting. Symptom management, positioning, caregiver education.

Synonyms:

Hospital-Acquired Infection

Infection acquired during hospitalization. Also: healthcare-associated infection (HAI). Examples: CLABSI, CAUTI, surgical site infection.

Synonyms:

Hospital-acquired infections

Infections that develop during or after hospitalisation. Major types include central line-associated bloodstream infections, catheter-associated urinary tract infections, ventilator-associated pneumonia, and surgical site infections. Risk factors include invasive devices, prolonged hospitalisation, and antimicrobial use.

Synonyms:

Hospital-Acquired Pneumonia

Pneumonia developing > 48 hours after hospital admission. Common pathogens include *Pseudomonas* and MRSA. Empiric treatment covers resistant organisms.

Synonyms:

Hospitalization (Geriatric)

Inpatient stay for elderly patients. High risk for adverse outcomes: delirium, functional decline, institutionalization. Precautions: fall prevention, early mobilization, medication reconciliation, delirium prevention, nutrition support. Geriatrician consultation beneficial.

Synonyms: Geriatric

Host

A person or other living organism that can be infected by a virus or other pathogen under natural conditions. The host may be a human, animal, or plant. In medical contexts, the host is the patient in whom an infection or disease develops.

Synonyms:

Host Response

Immunological reaction to implant. Foreign body response, encapsulation, rejection.

Synonyms:

Hot Flashes

Vasomotor symptoms: sudden sensations of intense heat, sweating, flushing, and palpitations, most commonly from estrogen withdrawal around menopause; also in hypogonadism, chemotherapy-induced ovarian failure, and some medications (SERMs, GnRH

agonists). Mechanism: hypothalamic thermoregulatory dysfunction.

Synonyms:

Hounsfield Units

CT number scale referencing water (0 HU) and air (-1000 HU). Fat: -50 to -100 HU. Water: 0 HU. Soft tissue: +20 to +50 HU. Bone: +400 to +3000 HU. Blood: +40 to +60 HU (acute), +20 to +40 HU (chronic).

Synonyms:

Howell-Jolly Bodies

Basophilic nuclear remnants (clusters of DNA) normally removed from circulating red blood cells by splenic macrophages (pitting). Presence on peripheral blood smear indicates functional asplenia or anatomical splenectomy (e.g., trauma, sickle cell auto-splenectomy). Also seen in severe megaloblastic anemia.

Synonyms:

HPLC

High-performance liquid chromatography for radiochemical purity analysis.

Synonyms:

HPV

Human papillomavirus is a group of DNA viruses that infect skin and mucous membranes. Some types cause warts, whereas persistent infection with high-risk types can cause precancerous lesions and cancers of the cervix, anus, penis, vulva, vagina, or oropharynx.

Synonyms:

HPV Vaccine

Human Papillomavirus vaccine given at 11-12 years (can start at 9), with series completion by 15 years. Two-dose series if started before 15; three-dose series if started at 15 or older. Protects against HPV types causing cervical cancer, oropharyngeal cancer, and genital warts. Gardasil 9 covers nine HPV types.

Synonyms:

HRT

Hormone replacement therapy uses estrogen, with a progestogen when needed, to treat selected menopausal symptoms caused by declining ovarian hormone production. It can relieve vasomotor and genitourinary symptoms and help prevent bone loss, but benefits and risks depend on the person's age, medical history, regimen, and duration of use.

Synonyms:

Human Chorionic Gonadotropin

A glycoprotein hormone produced by trophoblast cells after implantation. Detectable in serum 8-11 days post-conception and in urine 12-14 days. Levels double approximately every 48-72 hours in early pregnancy, peaking at 8-11 weeks then plateauing.

Synonyms:

Human immunodeficiency virus

A retrovirus belonging to the Lentivirus genus that causes acquired immunodeficiency syndrome (AIDS). HIV has two species: HIV-1 and HIV-2. The virus targets CD4+ T cells, macrophages, and dendritic cells. HIV has a complex genome encoding structural proteins, enzymes (reverse transcriptase, integrase, protease), and regulatory proteins.

Synonyms:

Human microbiome

The collection of microorganisms that live on and in the human body. The microbiome includes bacteria, viruses, fungi, and archaea. The gut microbiome is the most studied and plays a role in digestion, immune function, and disease.

Synonyms:

Human Papillomavirus

The most common STI, with over 100 types. High-risk types (16, 18) cause cervical, oropharyngeal, anal, and genital cancers. Low-risk types (6, 11) cause genital warts. Prevention: HPV vaccine (Gardasil 9) protects against 9 HPV types. Screening: Pap smear and HPV testing for cervical cancer prevention.

Synonyms:

Human Placental Lactogen

A peptide hormone produced by the placenta that contributes to mammary-gland development and shifts maternal metabolism toward increased lipolysis and reduced insulin sensitivity during pregnancy. It supports nutrient availability for the fetus and contributes to physiologic gestational insulin resistance.

Synonyms:

Humeroradial Joint

Between capitulum and radial head, allowing flexion-extension and contributing to pronation-supination via radial head rotation. Radial collateral ligament provides lateral stability. Capitulum has articular cartilage only anteriorly.

Synonyms:

Humeroulnar Joint

Uniaxial hinge between trochlea and trochlear notch of the ulna, allowing only flexion/extension (0 to approximately 145 degrees). Ulnar collateral ligament is the primary valgus restraint. Trochlear notch provides inherent bony stability, making it the most congruent elbow joint.

Synonyms:

Humerus

Single upper arm bone, the longest of the upper limb. Proximal end: head, anatomical/surgical necks, tubercles. Shaft: deltoid tuberosity, radial groove, epicondyles. Distal end: trochlea, capitulum, olecranon fossa. The surgical neck is the common fracture site potentially injuring the axillary nerve.

Synonyms:

Humoral Immunity

The component of adaptive immunity mediated by antibodies produced by B lymphocytes (plasma cells) that neutralize extracellular pathogens and toxins. Humoral responses defend against bacteria, viruses outside cells, and parasites.

Synonyms:

Hunger

Physiological drive to eat. Regulated by ghrelin, blood glucose, stomach distension. Psychological factors also influence.

Synonyms:

Hungry Bone Syndrome

Severe hypocalcemia occurring after parathyroidectomy particularly in patients with severe preoperative hyperparathyroidism and high bone turnover. Rapid bone remineralization after removal of excess PTH sequesters calcium and phosphorus from the serum causing symptomatic hypocalcemia.

Synonyms:

Hunter Syndrome

Mucopolysaccharidosis type II (MPS II), an X-linked recessive lysosomal storage disorder caused by iduronate-2-sulfatase deficiency (IDS gene mutations). Accumulation of dermatan sulfate and heparan sulfate (same as Hurler).

Synonyms:

Huntington Disease

Autosomal dominant neurodegenerative disorder caused by CAG trinucleotide repeat expansion in HTT gene. Onset: 30-50 years. Symptoms: chorea, dementia, psychiatric disease. Anticipation: earlier onset in successive generations (paternal transmission). No cure; symptomatic treatment.

Synonyms:

Huntington's Disease

An autosomal dominant neurodegenerative disorder caused by a CAG trinucleotide repeat expansion in the huntingtin gene on chromosome 4p16.3. The disease is characterized by the triad of progressive chorea, cognitive decline, and psychiatric manifestations.

Synonyms:

Huntington's Disease (Chorea)

An autosomal dominant neurodegenerative disorder caused by a CAG trinucleotide repeat expansion (>36 repeats, normally <26) in the HTT gene on

chromosome 4 (4p16.3), which encodes the huntingtin protein.

Synonyms: Chorea

Hurler Syndrome

Mucopolysaccharidosis type I (MPS I), the severe form, an autosomal recessive lysosomal storage disorder caused by alpha-L-iduronidase deficiency (IDUA gene mutations). Accumulation of dermatan sulfate and heparan sulfate leads to progressive multisystem involvement.

Synonyms:

Hyaline Cartilage

The most common type of cartilage, containing fine type II collagen fibers in a firm, glassy matrix. It supports airways, covers articular surfaces, and forms much of the fetal skeleton and growth plates.

Synonyms:

Hyaline Casts

Transparent colorless cylindrical structures composed primarily of Tamm-Horsfall protein secreted by the thick ascending limb. Most common type of urine cast. Normal in concentrated urine and after exercise. Increased in dehydration, prerenal states, and volume depletion.

Synonyms:

Hyaline Membrane

A layer of protein-rich material lining damaged alveoli, classically seen in respiratory distress syndrome. It impairs gas exchange.

Synonyms:

Hyaline Membrane Disease

An older name for neonatal respiratory distress syndrome, caused mainly by surfactant deficiency in premature infants. See Respiratory Distress Syndrome.

Synonyms:

Hydatid cyst

A cyst caused by the larval stage of *Echinococcus granulosus*, a tapeworm transmitted from dogs to

humans through ingestion of contaminated food. The liver is the most commonly affected organ, followed by the lungs. Cysts grow slowly and may become symptomatic from mass effect or rupture, causing anaphylaxis.

Synonyms:

Hydatidiform Mole

A form of gestational trophoblastic disease in which abnormal trophoblastic tissue grows in the uterus. A complete mole has no viable fetus; a partial mole may contain abnormal fetal tissue. Both require follow-up because persistent disease can occur.

Synonyms:

Hydranencephaly

A rare congenital condition where the cerebral hemispheres are nearly completely absent, replaced by thin-walled, fluid-filled sacs, while the brainstem, basal ganglia, and cerebellum are relatively preserved. Caused by bilateral internal carotid artery occlusion in utero (vascular insult, infection, or twin-twin transfusion).

Synonyms:

Hydrocele

Accumulation of serous fluid within the tunica vaginalis surrounding the testis. Congenital hydrocele results from patent processus vaginalis; acquired hydrocele may follow infection, trauma, or tumor. Transilluminates on examination. Ultrasound confirms fluid collection.

Synonyms:

Hydrocephalus

Abnormal accumulation of cerebrospinal fluid (CSF) within the ventricles of the brain, leading to increased intracranial pressure. Communicating hydrocephalus: impaired CSF absorption (subarachnoid hemorrhage, meningitis, leptomeningeal carcinomatosis).

Synonyms:

Hydrocolpos

Distension of the vagina with fluid due to obstruc-

tion of the vaginal outlet, often from an imperforate hymen or transverse septum, presenting as a pelvic mass in neonates or adolescents.

Synonyms:

Hydrofluoric Acid Exposure

Contact with hydrofluoric acid, which can cause deep tissue injury and systemic fluoride toxicity, including dangerous low calcium and cardiac arrhythmias.

Synonyms:

Hydrogen Bond

Weak electrostatic interaction between a hydrogen atom covalently bonded to an electronegative atom (N, O, F) and another electronegative atom. Critical for protein structure (alpha helix, beta sheet), DNA double helix (base pairing), enzyme-substrate binding, and water properties (high boiling point, solvent properties).

Synonyms:

Hydrogen Breath Test

Non-invasive test for carbohydrate malabsorption (lactose, fructose) and small intestinal bacterial overgrowth (SIBO). Patient ingests a substrate (lactose, glucose, or lactulose). Breath hydrogen is measured at baseline and 15-30 minutes for 2-3 hours. Rise in H₂ >20 ppm from baseline: positive (bacterial fermentation).

Synonyms:

Hydronephrosis

Dilation of renal collecting system proximal to obstruction. Causes include stones, strictures, malignancy, and BPH. Graded on ultrasound from mild to severe. Prolonged obstruction leads to cortical thinning and renal failure. Bilateral more clinically significant. Urgent decompression required for obstructive uropathy with infection.

Synonyms:

Hydrophobia

Painful spasms or fear triggered by attempts to drink, classically occurring in advanced rabies be-

cause of inflammation of the brain and nerves involved in swallowing.

Synonyms:

Hydropneumothorax

The simultaneous presence of both fluid and air in the pleural space, causing respiratory distress and dullness to percussion with absent breath sounds, typically requiring chest tube drainage.

Synonyms:

Hydrops Fetalis

Abnormal accumulation of fluid in two or more fetal compartments, including pleural effusion, pericardial effusion, ascites, and subcutaneous edema. Causes include Rh isoimmunization, chromosomal abnormalities, cardiac defects, infections (parvovirus B19), and twin-to-twin transfusion syndrome.

Synonyms:

Hydrotherapy

Exercise in water using buoyancy, resistance, warmth. Benefits: reduced weight-bearing, improved circulation, pain relief, increased range of motion. Used for arthritis, spinal cord injury, amputation, neurological conditions.

Synonyms:

Hydroxocobalamin

A cobalt-containing form of vitamin B12 used as an antidote for cyanide poisoning. It binds cyanide to form cyanocobalamin, which is excreted in urine; it can cause red discoloration of skin and body fluids and interfere with some laboratory tests.

Synonyms:

Hymen

A thin fold of mucous membrane that partially covers the external opening of the vagina. The hymen is a remnant of fetal development, with no known physiological function in postnatal life.

Synonyms:

Hyoid Bone

U-shaped bone in the anterior neck at C3, unique for not directly articulating with any other bone. Suspended by muscles and the stylohyoid ligament. Provides attachment for suprahyoid (digastric, stylohyoid, mylohyoid, geniohyoid) and infrahyoid (sternohyoid, sternothyroid, thyrohyoid, omohyoid) muscles.

Synonyms:

Hyper-IgM Syndromes

A group of disorders characterized by normal or elevated IgM with low IgG, IgA, and IgE, due to defective class switch recombination (CSR) and somatic hypermutation (SHM).

Synonyms:

Hyperaldosteronism

Hyperaldosteronism, also known as Conn syndrome when caused by an adrenal adenoma, is characterized by excessive aldosterone production causing hypertension, hypokalemia, and metabolic alkalosis.

Synonyms: Conn syndrome when caused by an adrenal adenoma, is.

Hyperaldosteronism Complications

Beyond hypertension and hypokalemia, primary hyperaldosteronism causes target organ damage including left ventricular hypertrophy, fibrosis, stroke, coronary artery disease, atrial fibrillation, and chronic kidney disease. These complications occur at higher rates than in essential hypertension of similar severity.

Synonyms:

Hyperammonemia

An abnormally elevated concentration of ammonia in the blood. It may result from an inherited urea-cycle or organic-acid disorder, severe liver dysfunction, or other acquired causes and can produce encephalopathy, cerebral oedema, seizures, and coma.

Synonyms:

Hyperbaric Oxygen Therapy

Administration of 100% oxygen at increased atmospheric pressure. Indications: carbon monoxide poisoning, decompression sickness, gas gangrene, necrotizing soft tissue infections, delayed radiation injury, crush injury, compromised grafts. Mechanism: increases dissolved oxygen, vasoconstriction, antimicrobial effect.

Synonyms:

Hypercalcemia

Serum calcium greater than 10.5 milligrams per deciliter. Causes summarized by mnemonic MALIGNANT: Myeloma, Metastases, Metabolic bone disease, Hyperparathyroidism, Adrenal insufficiency, Paget disease, Immobilization, Thiazide diuretics, Addison disease, Neonatal, Tumor-derived PTHrP.

Synonyms:

Hypercalcemia of Malignancy

Elevated serum calcium caused by cancer, a common paraneoplastic and oncologic emergency. Mechanisms: PTHrP secretion (most common—squamous cell lung, breast, renal, ovarian), osteolytic metastases (breast, myeloma), 1,25-dihydroxyvitamin D (lymphoma), and ectopic PTH (rare).

Synonyms:

Hypercapnia

An abnormally elevated arterial partial pressure of carbon dioxide, usually caused by alveolar hypoventilation. It may produce headache, somnolence, confusion, asterixis, respiratory acidosis, and, when severe or rapidly developing, coma.

Synonyms:

Hypercholesterolemia

Elevated serum total cholesterol and LDL cholesterol levels, a major modifiable risk factor for atherosclerotic cardiovascular disease. It may be primary, due to familial hypercholesterolemia from LDL receptor mutations, or secondary to diet, obesity, hypothyroidism, or nephrotic syndrome.

Synonyms:

Hypercoagulable State

Condition increasing thrombosis risk. Inherited: Factor V Leiden, prothrombin mutation, protein C/S deficiency, antithrombin deficiency. Acquired: cancer, pregnancy, oral contraceptives, antiphospholipid syndrome, myeloproliferative disorders.

Synonyms:

Hypercyanotic Tetralogy

A complex congenital heart defect with four features: ventricular septal defect, overriding aorta, right ventricular outflow tract obstruction (pulmonary stenosis), and right ventricular hypertrophy. It causes right-to-left shunting and cyanosis. Treatment is surgical repair, typically in infancy.

Synonyms:

Hyperemesis

Excessive or persistent vomiting that may cause dehydration, electrolyte abnormalities, and nutritional deficiency.

Synonyms:

Hyperemesis Gravidarum

Severe, persistent nausea and vomiting during pregnancy resulting in weight loss greater than 5%, dehydration, electrolyte imbalances, and ketosis. Occurs in 0.3-2% of pregnancies, typically presenting in the first trimester. Differentiated from normal morning sickness by severity and metabolic derangement.

Synonyms:

Hyperesthesia

Increased sensitivity to sensory stimulation—touch (tactile), pain (hyperalgesia), or other stimuli—so that normally non-painful or mildly painful stimuli produce exaggerated discomfort.

Synonyms:

Hyperglycemia

Blood glucose above the expected range for the testing conditions. Acute hyperglycemia can cause osmotic diuresis, dehydration, and electrolyte disturbances. Chronic hyperglycemia leads to microvascular (retinopathy, nephropathy, neuropathy) and

macrovascular complications.

Synonyms:

Hypergonadotropic Hypogonadism

Primary testicular failure with elevated LH/FSH. Causes: Klinefelter syndrome, cryptorchidism, orchitis, chemotherapy, radiation.

Synonyms:

Hyperhidrosis

Excessive sweating beyond thermoregulatory needs. Primary focal hyperhidrosis affects palms, soles, axillae, and face without underlying cause. Secondary generalized hyperhidrosis is caused by medications, endocrine disorders, infections, or malignancies.

Synonyms:

Hyperkalemia

Serum potassium >5.0 mEq/L. ECG changes: peaked T waves, widened QRS, sine wave. Causes: renal failure, medications (ACE inhibitors, potassium-sparing diuretics), tissue breakdown, acidosis.

Synonyms:

Hyperlipidemia

Elevated levels of lipids in the blood—total cholesterol, LDL, triglycerides, and/or reduced HDL—a major modifiable risk factor for atherosclerosis and cardiovascular disease. Primary (genetic: familial hypercholesterolemia) or secondary (hypothyroidism, diabetes, nephrotic syndrome, obesity, alcohol).

Synonyms:

Hypermobile Ehlers-Danlos Syndrome

A heritable connective-tissue disorder characterized mainly by generalized joint hypermobility, instability, chronic musculoskeletal pain, and other variable features involving skin, autonomic function, or digestion. Diagnosis is clinical and requires assessment for other connective-tissue disorders and related conditions.

Synonyms:

Hypernatremia

A serum sodium concentration above the reference range, usually reflecting too little free water relative to body sodium or, less often, excess sodium. Causes include impaired water intake, diabetes insipidus, osmotic diuresis, gastrointestinal losses, and sodium administration.

Synonyms:

Hyperopia

A refractive error in which light focuses behind the retina when the eye is relaxed. See Farsightedness.

Synonyms:

Hyperosmolar Hyperglycemic State

Hyperglycemic emergency characterized by severe hyperglycemia greater than 600 milligrams per deciliter, hyperosmolality greater than 320 milliosmoles per kilogram, and profound dehydration without significant ketosis.

Synonyms:

Hyperparathyroidism

A disorder of excessive parathyroid hormone (PTH) secretion from one or more of the four parathyroid glands, classified as primary, secondary, or tertiary.

Synonyms:

Hyperphosphatemia

A phosphate concentration above the laboratory reference range, often caused by impaired renal excretion, hypoparathyroidism, tumor lysis, rhabdomyolysis, or excess intake. Consequences may include secondary hyperparathyroidism, vascular/metastatic calcification, and when combined with hypocalcemia, tetany.

Synonyms:

Hyperpigmentation

Darkening of the skin caused by increased melanin production, deposition of pigment in the dermis, or accumulation of other pigments.

Synonyms:

Hyperplasia

Increased cell number. Can be physiological or pathological.

Synonyms:

Hyperpolarization

A change in membrane potential to a more negative value, moving it further from threshold and making the cell less excitable. Occurs when potassium leaves the cell (opening of voltage-gated potassium channels, as in the afterhyperpolarization after an action potential) or when chloride enters (GABA-A receptor activation).

Synonyms:

Hyperprolactinaemia

An abnormally elevated concentration of prolactin in the blood. Causes include medicines, pregnancy, hypothyroidism, pituitary tumors, and other disorders.

Synonyms:

Hyperprolactinemia

Elevated serum prolactin levels most commonly caused by prolactin-secreting pituitary adenomas termed prolactinomas. Other causes include medications particularly antipsychotics and metoclopramide, hypothyroidism, stalk effect from non-functioning pituitary adenomas, renal failure, and chest wall lesions.

Synonyms:

Hypersensitivity

An exaggerated or inappropriate immune response to an antigen, ranging from a mild reaction to anaphylaxis.

Synonyms:

Hypersensitivity Pneumonitis

An immune-mediated lung disease from environmental antigen inhalation (molds, bird proteins). Acute, subacute, and chronic forms exist. HRCT shows ground-glass opacities, air trapping, and centrilobular nodules. Chronic HP progresses to fibrosis.

Synonyms:

Hypersensitivity Reactions

Inappropriate or excessive immune responses causing tissue damage or disease.

Synonyms:

Hypersensitivity Type I

Type I hypersensitivity, also known as immediate hypersensitivity or allergic reactions, is mediated by IgE antibodies and mast cells, producing symptoms within minutes of allergen re-exposure.

Synonyms: immediate hypersensitivity or allergic reactions,.

Hypersensitivity Type II

Type II hypersensitivity, also known as cytotoxic hypersensitivity, is mediated by IgG or IgM antibodies directed against antigens on cell surfaces or the extracellular matrix, causing tissue damage through complement activation, antibody-dependent cellular cytotoxicity, and phagocytosis.

Synonyms: cytotoxic hypersensitivity, is mediated by IgG.

Hypersensitivity Type III

Type III hypersensitivity is caused by deposition of antigen-antibody immune complexes in tissues and blood vessel walls, activating complement and recruiting neutrophils that release destructive enzymes and reactive oxygen species.

Synonyms:

Hypersensitivity Type IV

Type IV hypersensitivity, also known as delayed-type hypersensitivity, is mediated by T lymphocytes rather than antibodies and takes 48 to 72 hours to develop after antigen exposure.

Synonyms: delayed-type hypersensitivity, is mediated by T.

Hypertelorism

Increased distance between the orbits (the bony eye sockets), measured as an increased interorbital distance on imaging.

Synonyms:

Hypertension

Persistently elevated arterial blood pressure. The diagnostic threshold depends on the guideline and the measurement method; diagnosis generally requires properly obtained readings on more than one occasion or other appropriate confirmation. It increases the risk of cardiovascular, cerebrovascular, and kidney disease.

Synonyms:

Hypertension (High Blood Pressure)

Persistently elevated blood pressure, defined as systolic BP >130 mmHg or diastolic BP >80 mmHg (ACC/AHA guidelines). See Hypertension.

Synonyms: High Blood Pressure

Hypertension in Anesthesia

Hypertension during anesthesia causes increased bleeding, myocardial ischemia, and stroke risk. Common causes include light anesthesia, pain, hypercarbia, hypoxia, bladder distension, shivering, and drug withdrawal (beta-blockers, clonidine).

Synonyms:

Hypertensive

Having blood pressure that is persistently above the accepted range for the clinical context.

Synonyms:

Hypertensive Crisis

Severe elevation in blood pressure (SBP >180 or DBP >120) requiring urgent medical attention. Two types: hypertensive emergency (with end-organ damage) and hypertensive urgency (no acute end-organ damage). Hypertensive urgency: can be managed with oral antihypertensives (captopril, clonidine, labetalol) and careful outpatient follow-up.

Synonyms:

Hypertensive Emergency

Severe hypertension (SBP >180 or DBP >120) with acute target organ damage. Organs involved: brain (hypertensive encephalopathy, stroke), heart (acute coronary syndrome, acute pulmonary edema, aortic dissection), kidneys (acute kidney injury), and eyes

(papilledema).

Synonyms:

Hypertensive Heart Disease

Left ventricular hypertrophy and diastolic/systolic dysfunction resulting from chronic hypertension. LVH is an independent cardiovascular risk factor and precursor to heart failure. Diagnosis by ECG (voltage criteria) or echocardiography (wall thickness >1.1 cm). Treatment of hypertension can regress LVH.

Synonyms:

Hypertensive Nephropathy

Kidney damage caused by chronic hypertension, leading to nephrosclerosis (arteriolar hyalinosis and glomerulosclerosis). Presents with slowly progressive proteinuria (usually subnephrotic), hypertension, and gradual decline in kidney function. More common in African American patients. Diagnosis of exclusion.

Synonyms:

Hypertensive Nephrosclerosis

Kidney damage from chronic hypertension. Benign form with hyaline arteriolosclerosis. Malignant form with hyperplastic arteriolosclerosis and onion-skinning. Second leading cause of ESRD after diabetes. Tight BP control with ACE inhibitors or ARBs essential to slow progression.

Synonyms:

Hypertensive Retinopathy

Retinal changes caused by chronic or acute hypertension. Grading (Keith-Wagener-Barker): Grade I: generalized arteriolar narrowing; Grade II: arteriovenous nicking; Grade III: cotton-wool spots, flame hemorrhages, hard exudates; Grade IV: papilledema (malignant hypertension).

Synonyms:

Hyperthermia in Anesthesia

Perioperative hyperthermia (temperature greater than 38 degrees Celsius) has multiple causes. Malignant hyperthermia (discussed separately) is the

most urgent. Sepsis, thyroid storm, serotonin syndrome, neuroleptic malignant syndrome, and central fever are other causes.

Synonyms:

Hyperthermic Intraperitoneal Chemotherapy

Heated chemotherapy circulated through the peritoneal cavity during surgery, following cytoreductive surgery, for peritoneal carcinomatosis from appendiceal, colorectal, and ovarian cancers and peritoneal mesothelioma.

Synonyms:

Hyperthyroidism

A condition of excess thyroid hormone production and secretion from the thyroid gland, resulting in thyrotoxicosis (elevated serum T4 and T3 concentrations).

Synonyms:

Hyperthyroidism (Thyrotoxicosis)

A state in which excess thyroid hormone effect causes symptoms such as heat intolerance, sweating, tremor, weight loss, or rapid heartbeat. It may result from increased thyroid production or other causes of thyrotoxicosis.

Synonyms: Thyrotoxicosis

Hypertonic Saline

Intravenous saline with a sodium concentration greater than plasma, commonly 3% sodium chloride. It is used selectively for severe symptomatic hyponatremia or other urgent indications, with careful monitoring to avoid overly rapid correction and osmotic demyelination.

Synonyms:

Hypertonic Saline Inhalation

Nebulized 3–7% sodium chloride solution that draws water into the airway surface liquid by osmosis, improving mucociliary clearance. It is used in CF and bronchiectasis. It may cause bronchospasm and should be preceded by a bronchodilator. It reduces exacerbations in CF.

Synonyms:

Hypertrichosis

Excessive hair growth in androgen-independent areas, affecting both sexes, either congenital or acquired. Generalized: genetic syndromes, medications (minoxidil, cyclosporine, phenytoin, glucocorticoids), malnutrition, porphyria, hypothyroidism, and malignancy (paraneoplastic).

Synonyms:

Hypertriglyceridemia

Elevated serum triglyceride levels, classified as mild at 150 to 499 mg per dL, moderate at 500 to 999, and severe above 1000. Severe hypertriglyceridemia increases the risk of acute pancreatitis. Causes include obesity, diabetes, alcohol use, and genetic disorders of lipoprotein metabolism.

Synonyms:

Hypertrophic Cardiomyopathy

A disease in which the heart muscle, especially the left ventricle, becomes abnormally thick and stiff. It may obstruct blood flow, impair filling, cause chest pain or breathlessness, and increase the risk of arrhythmia and sudden death.

Synonyms:

Hypertrophic Cardiomyopathy Genetics

HCM is caused by mutations in genes encoding sarcomeric proteins, most commonly beta-myosin heavy chain (MYH7) and myosin-binding protein C (MYBPC3). Inheritance is autosomal dominant with variable penetrance. Genetic testing identifies causative mutations in 40-60% of cases.

Synonyms:

Hypertrophic Cardiomyopathy Treatment

Management may include medicines to relieve symptoms, treatment of arrhythmias or obstruction, an implantable defibrillator for selected patients, and surgery or ablation when indicated. Treatment is guided by symptoms, anatomy, risk, and specialist assessment.

Synonyms:

Hypertrophic Pyloric Stenosis

Hypertrophy and hyperplasia of the pyloric muscle causing gastric outlet obstruction, typically in young infants. Progressive nonbilious projectile vomiting, hunger after vomiting, dehydration, and hypochloremic hypokalemic metabolic alkalosis may occur.

Synonyms:

Hypertrophic Scar

Raised scar tissue confined to the original wound margins, caused by excessive collagen production during healing. Unlike keloids, hypertrophic scars regress over time and do not extend beyond wound boundaries. They are common after burns, surgery, and trauma.

Synonyms:

Hypertrophy

Increased cell size. Physiological (muscle) or pathological.

Synonyms:

Hyperventilation

Breathing in excess of metabolic requirements, resulting in decreased partial pressure of arterial carbon dioxide (PaCO₂) and respiratory alkalosis.

Synonyms:

Hyperventilation Syndrome

Recurrent or persistent overbreathing that exceeds metabolic requirements, usually producing reduced arterial carbon dioxide and respiratory alkalosis in the absence of primary pulmonary disease. Symptoms may include breathlessness, chest tightness, dizziness, palpitations, paraesthesia, and carpopedal spasm.

Synonyms:

Hyphema

Bleeding into the anterior chamber of the eye, between the cornea and iris, typically resulting from blunt ocular trauma that tears the blood vessels of the iris or ciliary body.

Synonyms:

Hypnosis

A state of focused attention, reduced peripheral awareness, and heightened suggestibility, resembling a trance-like state but distinct from sleep. Hypnosis is induced by a procedure (hypnotic induction) involving focused concentration, relaxation, and guided imagery.

Synonyms:

Hypnotic

A medication that induces, maintains, or improves sleep, used for insomnia.

Synonyms:

Hypoactive Sexual Desire Disorder

A sexual dysfunction characterized by persistently or recurrently deficient or absent sexual thoughts, fantasies, and desire for sexual activity, causing marked distress or interpersonal difficulty. In DSM-5, HSDD in women is merged with female sexual arousal disorder into female sexual interest/arousal disorder.

Synonyms:

Hypocalcemia

Serum calcium less than 8.5 milligrams per deciliter or ionized calcium less than 4.5 milligrams per deciliter. Causes include hypoparathyroidism, vitamin D deficiency, hypomagnesemia, hyperphosphatemia, and critical illness.

Synonyms:

Hypocalcemia, hypophosphatemia, and hyperkalemia

The classic electrolyte triad of acute hypoparathyroidism, most commonly occurring after thyroid or parathyroid surgery from inadvertent removal or devascularization of the parathyroid glands. Hypocalcemia causes tetany, paresthesias, and Chvostek and Trousseau signs.

Synonyms:

Hypodermis

Subcutaneous tissue/superficial fascia, the deepest skin layer with loose connective tissue and adipose

tissue. Attaches skin to underlying muscles/bones via fibrous septa. Provides thermal insulation, energy storage (fat), mechanical cushioning, and contains blood vessels, lymphatics, and nerves.

Synonyms:

Hypodontia

Congenital absence of one or more teeth. Common: third molars, maxillary lateral incisors, second premolars.

Synonyms:

Hypoesthesia

Reduced sensitivity to touch, temperature, pain, or other sensations. It may result from nerve compression, neuropathy, spinal disease, stroke, injury, or other neurologic conditions; sudden or spreading numbness requires prompt assessment.

Synonyms:

Hypogammaglobulinemia

A reduction in circulating immunoglobulins that predisposes to recurrent infections, especially with encapsulated bacteria; it may be inherited or acquired.

Synonyms:

Hypogastric Region

Central inferior region below the umbilical region, containing the urinary bladder, sigmoid colon, rectum, and in females the uterus and ovaries. Assessed for bladder distension, uterine enlargement, and pelvic masses. Suprapubic pain may indicate cystitis, calculi, or pelvic pathology.

Synonyms:

Hypoglossal nerve injury

Damage to the twelfth cranial nerve (CN XII), which innervates the ipsilateral intrinsic and extrinsic tongue muscles. Causes include skull base fractures, surgical trauma, tumors, or infection.

Synonyms:

Hypoglossal nerve palsy

Weakness or paralysis of the hypoglossal nerve (CN

XII), leading to ipsilateral tongue weakness, atrophy, and fasciculations. Causes include tumors at the skull base or in the hypoglossal canal, surgical injury, or central lesions. Unilateral palsy causes the tongue to deviate toward the affected side on protrusion.

Synonyms:

Hypoglycemia

An abnormally low blood-glucose concentration that may cause sweating, tremor, palpitations, hunger, confusion, seizures, or loss of consciousness. Causes include glucose-lowering medicines, missed meals, alcohol, and critical illness. Treatment depends on the person's ability to swallow and the cause; severe or recurrent episodes require urgent assessment.

Synonyms:

Hypoglycemia in Diabetes

Blood glucose less than 70 milligrams per deciliter in patients with diabetes. Classification by level: level one less than 70, level two less than 54 which is clinically significant hypoglycemia, and level three severe hypoglycemia requiring assistance.

Synonyms:

Hypoglycemia Unawareness

Loss of the warning symptoms of hypoglycemia including tremor, sweating, and palpitations occurring in patients with recurrent hypoglycemia particularly type one diabetes. Results from attenuated counter-regulatory hormone responses particularly impaired glucagon and epinephrine responses.

Synonyms:

Hypogonadism

Decreased functional activity of the gonads (testes or ovaries) with reduced sex hormone production. Male hypogonadism: low testosterone causing decreased libido, erectile dysfunction, infertility, reduced muscle mass, and osteoporosis. Female: estrogen deficiency causing amenorrhea, hot flashes, and osteoporosis.

Synonyms:

Hypogonadism in Men

Testosterone deficiency resulting from inadequate testicular function classified as primary testicular failure or secondary hypothalamic-pituitary dysfunction. Primary causes include Klinefelter syndrome, cryptorchidism, orchitis, trauma, and chemotherapy.

Synonyms:

Hypogonadism in Women

Testosterone deficiency in women causing decreased libido, fatigue, depressed mood, and reduced sense of well-being. Causes include oophorectomy, premature ovarian insufficiency, adrenal insufficiency, hypopituitarism, and medications.

Synonyms:

Hypogonadotropic Hypogonadism

Secondary testicular failure with low/normal LH/FSH. Causes: Kallmann syndrome, pituitary tumors, obesity, medications, systemic illness.

Synonyms:

Hypohidrosis

Reduced or absent sweating, leading to heat intolerance and risk of hyperthermia. Causes include autonomic neuropathy (diabetes, Parkinson disease), skin diseases (scleroderma, burns), medications (anticholinergics), and genetic disorders (hypohidrotic ectodermal dysplasia).

Synonyms:

Hypokalemia

Serum potassium less than 3.5 mEq/L. Causes include gastrointestinal losses from vomiting and diarrhea, renal losses from diuretics, RTA, and hyperaldosteronism, intracellular shift from alkalosis and insulin, and inadequate intake.

Synonyms:

Hypomagnesemia

Serum magnesium less than 1.7 milligrams per deciliter. Causes include gastrointestinal losses from diarrhea, renal losses from diuretics and alcohol, malnutrition, and medications including proton

pump inhibitors.

Synonyms:

Hypomania

Distinct period of abnormally elevated, expansive, or irritable mood with increased energy lasting at least four consecutive days, observable by others but without marked functional impairment, hospitalisation, or psychotic features.

Synonyms:

Hypomanic Episode

A distinct period of abnormally elevated, expansive, or irritable mood with increased energy lasting at least four consecutive days. The episode is not severe enough to cause marked impairment in functioning or necessitate hospitalization, and there are no psychotic features. The change in functioning is observable by others.

Synonyms:

Hyponatremia

Serum sodium less than 135 mEq/L. Most common electrolyte disorder in hospitalized patients. Causes are classified by volume status: hypovolemic from GI losses and diuretics, euvolemic from SIADH and hypothyroidism, and hypervolemic from heart failure, cirrhosis, and nephrotic syndrome.

Synonyms:

Hypoparathyroidism

Deficiency or absence of parathyroid hormone causing hypocalcemia and hyperphosphatemia. Most commonly occurs after thyroid or parathyroid surgery from inadvertent removal of parathyroid glands. Autoimmune hypoparathyroidism may occur alone or as part of autoimmune polyendocrine syndrome type one.

Synonyms:

Hypoparathyroidism Management

Management aims to correct low calcium and inadequate parathyroid-hormone activity while avoiding complications. It may include calcium and active vitamin D, monitoring of calcium and kidney function,

and treatment of the underlying cause; specialist guidance is often required.

Synonyms:

Hypophosphatemia

An abnormally low serum phosphate concentration caused by reduced intake or absorption, intracellular shifting, or renal phosphate wasting. Severe deficiency can cause muscle weakness, respiratory failure, hemolysis, impaired myocardial function, and neurologic dysfunction.

Synonyms:

Hypopituitarism

Deficiency of one or more pituitary hormones most commonly from pituitary adenomas, craniopharyngiomas, pituitary surgery or radiation, traumatic brain injury, or infiltrative diseases. Growth hormone deficiency is typically the first hormone lost followed by gonadotropins then TSH and ACTH.

Synonyms:

Hypoplasia

Incomplete or underdevelopment of a tissue, organ, or body structure, resulting in reduced size or functional capacity. It may be congenital, developmental, genetic, or acquired and ranges from a mild anatomical variant to severe organ dysfunction.

Synonyms:

Hypoplastic Left Heart Syndrome

A severe congenital heart defect where the left heart structures (mitral valve, left ventricle, aortic valve, ascending aorta) are underdeveloped and unable to support systemic circulation. The right ventricle pumps blood to both the pulmonary and systemic circulations via a patent ductus arteriosus.

Synonyms:

Hypopyon

A layering of inflammatory cells (purulent exudate/leukocytes) in the anterior chamber of the eye, forming a visible white-to-yellow fluid level in the lower portion of the cornea. Caused by severe anterior uveitis (HLA-B27 spondyloarthropathies, Be-

hget disease), infectious keratitis (bacterial/fungal corneal ulcers), or endophthalmitis.

Synonyms:

Hyposmia

Decreased sensitivity to odors in which olfaction is reduced but not absent, distinct from anosmia and parosmia, and the most common olfactory complaint.

Synonyms:

Hypospadias

A congenital condition in which the urethral opening is on the underside of the penis rather than at the tip. It may be associated with a curved penis or an incomplete foreskin, and severity depends on the location of the opening and associated abnormalities.

Synonyms:

Hypotension

Abnormally low blood pressure, generally systolic <90 mmHg or mean arterial pressure <65 mmHg. Causes include hypovolemia, cardiac failure, sepsis, anaphylaxis, and medications. Orthostatic hypotension is a drop upon standing. Severe hypotension (shock) requires urgent fluid resuscitation and vasopressors.

Synonyms:

Hypotension in Anesthesia

Abnormally low blood pressure occurring during anesthesia. The clinically important threshold depends on the patient, baseline pressure, duration, and surgical context.

Synonyms:

Hypothalamic-Pituitary-Adrenal Axis (HPA Axis)

An endocrine regulatory pathway in which hypothalamic corticotropin-releasing hormone stimulates pituitary ACTH secretion, which stimulates adrenal cortisol production. Cortisol exerts negative feedback and coordinates metabolic, immune, and stress responses.

Synonyms: HPA Axis

Hypothalamic-Pituitary-Adrenal Axis Physiology

The hypothalamus releases CRH in a diurnal rhythm peaking in the early morning stimulating pituitary corticotrophs to secrete ACTH which stimulates the adrenal cortex to produce cortisol. Cortisol exerts negative feedback on both the hypothalamus and pituitary suppressing CRH and ACTH release.

Synonyms:

Hypothalamic-Pituitary-Gonadal Axis Physiology

The hypothalamus releases GnRH in a pulsatile fashion stimulating pituitary gonadotrophs to secrete LH and FSH. In males LH stimulates Leydig cells to produce testosterone while FSH stimulates Sertoli cells to support spermatogenesis.

Synonyms:

Hypothalamic-Pituitary-Thyroid Axis Physiology

The hypothalamus secretes TRH stimulating pituitary thyrotrophs to release TSH which stimulates the thyroid gland to produce T4 and T3. T3 the more biologically active form is produced by peripheral conversion of T4 by deiodinase enzymes.

Synonyms:

Hypothalamus

Small region below the thalamus forming the third ventricle's floor and lower lateral walls, weighing approximately 4 grams, the master homeostasis regulator. Controls autonomic and endocrine systems (via the pituitary through the hypophyseal portal system), temperature, hunger, thirst, sleep-wake cycles, and emotion.

Synonyms:

Hypothermia

Core temperature <35 degrees C (95 degrees F). Stages: mild (32-35), moderate (28-32), severe (<28). J-wave (Osborn wave) on ECG. Management: passive rewarming (mild), active external

rewarming (moderate), active internal rewarming (severe). Avoid rough handling (risk of VF).

Synonyms:

Hypothermia in Anesthesia

Hypothermia (core temperature less than 36 degrees Celsius) occurs in 50 to 80 percent of surgical patients due to anesthetic-induced thermoregulatory dysfunction and heat redistribution. Initial phase (first 30 to 60 minutes) involves core-to-peripheral heat redistribution causing 0.5 to 1.5 degree Celsius drop.

Synonyms:

Hypothyroidism

A common condition of inadequate thyroid hormone production, with a prevalence of 4-10 percent in the general population and up to 20 percent in women over 60 years.

Synonyms:

Hypotonia

Abnormally reduced muscle tone, causing decreased resistance to passive movement and a floppy or poorly supported posture. It may result from muscle, peripheral nerve, neuromuscular-junction, spinal-cord, brain, genetic, or metabolic disorders and requires evaluation when persistent or associated with weakness or developmental delay.

Synonyms:

Hypovolemic Shock

Circulatory failure caused by insufficient circulating blood or fluid volume, leading to reduced tissue perfusion. Causes include hemorrhage, severe dehydration, and fluid loss.

Synonyms:

Hypoxemia

Abnormally low oxygen concentration in arterial blood. Causes include hypoventilation, ventilation-perfusion mismatch, shunting, impaired diffusion, and low inspired oxygen.

Synonyms:

Hypoxia

Inadequate oxygen availability at the tissue level. It may result from low arterial oxygen, anemia, reduced blood flow, or impaired cellular oxygen use.

Synonyms:

Hypoxic Cell Injury

Cellular injury caused by inadequate oxygen availability, reducing oxidative phosphorylation and ATP production. Causes include ischemia, hypoxemia, anemia, and impaired oxygen utilization; severity and duration determine reversibility.

Synonyms:

Hypoxic Pulmonary Vasoconstriction

The unique response of pulmonary arterioles to low alveolar oxygen tension (PO₂ less than approximately 60 mmHg), causing vasoconstriction.

Synonyms:

Hypoxic-Ischemic Brain Injury

Brain injury caused by inadequate oxygen delivery or cerebral blood flow. It may follow cardiac arrest, asphyxia, shock, respiratory failure, or severe hypoglycemia and can produce coma, seizures, cognitive impairment, or death.

Synonyms:

Hysterectomy

The surgical removal of the uterus, the second most common major surgical procedure in women after cesarean section in the United States.

Synonyms:

Hysterectomy and Surgical Menopause

Hysterectomy is the surgical removal of the uterus, and when the ovaries are also removed (oophorectomy), it induces surgical menopause regardless of age.

Synonyms:

Hysterosalpingo-Contrast-Sonography

An ultrasound-based technique for evaluating the uterine cavity and fallopian tube patency. Sterile saline or contrast medium is injected through the

cervix while transvaginal ultrasound is performed.

Synonyms:

Hysterosalpingo-Contrast-Sonography (HyCoSy)

Ultrasound evaluation of tubal patency using contrast. Alternative to hysterosalpingography.

Synonyms: HyCoSy

Hysterosalpingogram

An X-ray procedure used to evaluate the uterine cavity and fallopian tube patency. A radiopaque contrast medium is injected through the cervix, and serial X-ray images are taken as the contrast fills the uterine cavity and spills from the fallopian tubes.

Synonyms:

Hysterosalpingography

Fluoroscopic imaging after injection of iodinated contrast into the uterine cavity through a cervical cannula. Used for infertility evaluation: assesses tubal patency (normal: contrast spills freely into peritoneal cavity), uterine cavity shape (fibroids, polyps, synechiae, Mullerian anomalies), and proximal/distal tubal occlusion.

Synonyms:

Hallux Rigidus

Stiffness and painful loss of motion at the joint where the big toe meets the foot.

Synonyms:

Hemarthrosis

Bleeding into a joint space.

Synonyms:

Hemopericardium

Accumulation of blood in the sac surrounding the heart.

Synonyms:

Hemoperitoneum

Accumulation of blood in the abdominal cavity.

Synonyms:

Hemorrhoid

A swollen vein in the lower rectum or anus.

Synonyms:

Herpes Encephalitis

Inflammation of the brain caused by herpes simplex virus infection.

Synonyms:

Heterotaxy Syndrome

A congenital disorder in which internal organs are arranged abnormally and may have associated heart defects.

Synonyms:

Hodgkin's Disease

A cancer of the lymphatic system characterized by abnormal lymphocytes, including Reed-Sternberg cells.

Synonyms:

Horner's Syndrome

A group of findings caused by disruption of sympathetic nerves, including a drooping eyelid, a small pupil, and reduced sweating on one side of the face.

Synonyms:

Hydrothorax

An abnormal collection of clear fluid in the pleural space around a lung.

Synonyms:

Hydroureter

Abnormal enlargement of a ureter caused by impaired urine drainage.

Synonyms:

Hyperacusis

Abnormally increased sensitivity to ordinary sounds.

Synonyms:

Hyperphagia

Excessive hunger or food intake.

Synonyms:

Hyperreflexia

Exaggerated or overactive deep-tendon reflexes.

Synonyms:

Hypersomnia

Excessive daytime sleepiness or abnormally prolonged sleep.

Synonyms:

Hyperthermia

An abnormally high body temperature caused by excess heat production or impaired heat loss.

Synonyms:

Hypophosphatasia

A rare inherited disorder of bone and tooth mineralization caused by deficient tissue-nonspecific alkaline phosphatase.

Synonyms:

Health Care Proxy

A legal appointment authorizing another person to make healthcare decisions when a patient cannot make them.

Synonyms:

High-Density Lipoprotein

A lipoprotein that transports cholesterol in the blood and is commonly called HDL.

Synonyms: HDL.

Hamstring Injury

A strain or tear of one or more muscles or tendons at the back of the thigh.

Synonyms:

Hand-Foot-and-Mouth Disease

A contagious viral illness causing sores in the mouth and a rash on the hands and feet, usually in children.

Synonyms:

Heatstroke

A life-threatening rise in body temperature caused by failure of the body's heat regulation.

Synonyms:

Heavy Menstrual Bleeding

Menstrual bleeding that is unusually heavy or prolonged and interferes with daily activities.

Synonyms:

Hilar Cholangiocarcinoma

A cancer of the bile ducts where the ducts leave the liver.

Synonyms:

Hip Labral Tear

A tear in the ring of cartilage that surrounds the hip socket.

Synonyms:

Hemopoietic Stem Cell

A stem cell that can develop into red blood cells, white blood cells, or platelets.

Synonyms:

Hemorrhagic Anemia

Anemia caused by loss of blood.

Synonyms:

Hemosiderosis

Excessive deposition of the iron-storage pigment hemosiderin in tissues.

Synonyms:

Hepatic Flexure

The bend where the ascending colon becomes the transverse colon near the liver.

Synonyms:

Hepatitis D

Liver inflammation caused by hepatitis D virus, which occurs only with hepatitis B infection.

Synonyms:

Hepatitis E

Liver inflammation caused by hepatitis E virus, usually transmitted through contaminated food or wa-

ter.

Synonyms:

Herniorrhaphy

Surgical repair of a hernia.

Synonyms:

Hilum

A depression or opening where blood vessels, nerves, ducts, or other structures enter or leave an organ.

Synonyms:

Hydrochloric Acid

The acid in gastric juice that helps digest food and kill microorganisms.

Synonyms:

Formed Elements of Blood

The cellular components of blood: red blood cells, white blood cells, and platelets.

Synonyms:

Hallux

The great toe.

Synonyms:

Hematoma

A localized collection of blood outside blood vessels, usually caused by injury or a bleeding disorder.

Synonyms:

Hematomyelia

Bleeding into the spinal cord.

Synonyms:

Hemiballism

A movement disorder causing sudden, large-amplitude, flinging movements on one side of the body, usually from a lesion involving the subthalamic region.

Synonyms:

Hertz

The SI unit of frequency, equal to one cycle per

second.

Synonyms:

HER2 Inhibitor

A targeted cancer treatment that blocks signaling through human epidermal growth factor receptor 2 in cancers with HER2 overexpression or amplification.

Synonyms:

Hypovolemia

A reduced volume of blood or other circulating fluid.

Synonyms:

Homocysteine

An amino acid formed during methionine metabolism. Persistently elevated blood levels may occur with genetic, nutritional, renal, or other disorders.

Synonyms:

Hyperpnea

Breathing that is deeper than normal and may also be faster, increasing overall ventilation.

Synonyms:

Hypolipidemic Agent

A medication that lowers blood lipids such as cholesterol or triglycerides.

Synonyms:

Hypopnea

Abnormally shallow or reduced breathing, especially when it occurs repeatedly during sleep.

Synonyms:

Hypoproteinemia

An abnormally low concentration of proteins in the blood, often involving low albumin levels.

Synonyms:

Hypoventilation

Inadequate ventilation that results in insufficient carbon-dioxide removal and may cause elevated

blood carbon dioxide.

Synonyms:

Hematosi

The exchange of oxygen and carbon dioxide between alveolar air and pulmonary capillary blood, resulting in oxygenation of the blood.

Synonyms:

Hesselbach Triangle

A weak area of the anterior abdominal wall bounded by the lateral border of the rectus abdominis, the inferior epigastric vessels, and the inguinal ligament; direct inguinal hernias pass through it.

Synonyms:

Homans Sign

Calf pain elicited by forced ankle dorsiflexion, historically associated with deep-vein thrombosis but insufficiently accurate for diagnosis and not recommended as a standalone test.

Synonyms:

Hyperlordotic Posture

An exaggerated inward curvature of the lumbar spine, often producing increased anterior pelvic tilt and a prominent lower-back arch.

Synonyms:

Hantavirus Infection

A zoonotic viral infection acquired mainly through inhalation of contaminated rodent excreta. It may cause hemorrhagic fever with renal syndrome or hantavirus pulmonary syndrome, which can progress rapidly to respiratory failure.

Synonyms:

High-Altitude Pulmonary Edema

A potentially fatal accumulation of fluid in the lungs after rapid ascent to high altitude, characterized by breathlessness, cough, reduced exercise tolerance, and sometimes frothy sputum. Immediate descent and oxygen are essential.

Synonyms:

Hysteroscopy

Direct examination of the inside of the uterus with a thin camera-equipped instrument passed through the cervix. It can be used to diagnose or treat causes of abnormal uterine bleeding, infertility, or recurrent pregnancy loss.

Synonyms:

Hyperuricemia

An abnormally high concentration of uric acid in the blood, which may be asymptomatic or contribute to gout and uric-acid kidney stones.

Synonyms:

Haemoglobinuria (Hemoglobinuria)

The presence of free hemoglobin in the urine, often causing red or dark-brown discoloration. It may result from intravascular hemolysis or other blood disorders.

Synonyms: Hemoglobinuria

Haemorrhagic Disease of the Newborn (Vitamin K Deficiency Bleeding)

Bleeding in a newborn or young infant caused by inadequate vitamin K-dependent clotting activity. It may occur early, classically, or late and can involve the brain or gastrointestinal tract.

Synonyms: Vitamin K Deficiency Bleeding

Heart-Lung Machine (Cardiopulmonary Bypass Machine)

A device that temporarily takes over the pumping and gas-exchange functions of the heart and lungs during selected cardiac operations.

Synonyms: Cardiopulmonary Bypass Machine

Heart Transplantation

Surgical replacement of a failing heart with a donor heart, usually for selected patients with advanced heart failure who meet specialist criteria.

Synonyms:

Heredity

The transmission of genetic characteristics from parents to offspring through genes and chromosomes.

Synonyms:

Human Leukocyte Antigen (HLA)

A group of cell-surface proteins encoded by genes in the major histocompatibility complex. HLA molecules present antigens to T cells and are important in immune responses and tissue matching for transplantation.

Synonyms: HLA

Hydrosalpinx

Dilatation of a fallopian tube caused by accumulation of clear fluid, usually after inflammation, infection, endometriosis, or previous pelvic surgery. It may affect fertility.

Synonyms:

Hypopharynx

The lower part of the pharynx behind and beside the larynx, extending from the oropharynx to the esophagus. It directs food toward the esophagus during swallowing.

Synonyms:

Hypophysis (Pituitary Gland)

An endocrine gland at the base of the brain that regulates growth, thyroid and adrenal function, reproduction, lactation, and water balance through its hormones.

Synonyms: Pituitary Gland

Hysterotomy

A surgical incision into the uterus, performed in selected obstetric or gynecologic procedures. +

habit

habit is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

haemophilus aegyptius

haemophilus aegyptius is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

haemophilus haemolyticus

haemophilus haemolyticus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

haemophilus infections

haemophilus infections is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

haemophilus paragallinarum

haemophilus paragallinarum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

haemophilus parainfluenzae

haemophilus parainfluenzae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

haemophilus somnus

haemophilus somnus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

haemophilus vaccine

haemophilus vaccine is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hafnia

hafnia is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hafnia alvei

hafnia alvei is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hair

hair is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hair disease

hair disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

halcinonide

halcinonide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

half-brother

half-brother is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

half-sibling

half-sibling is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

half-sister

half-sister is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Hallermann's syndrome

Hallermann's syndrome is a medical condition or

clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hallucinogen

hallucinogen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hallux varus

hallux varus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

halobacillus

halobacillus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

halobacteriaceae

halobacteriaceae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

halofenate

halofenate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

halofuginone hydrobromide

halofuginone hydrobromide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

halogen

halogen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

halogenation

halogenation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

haloperidol

haloperidol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

halothane

halothane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hamartomatous polyposis

hamartomatous polyposis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hand

hand is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hand deformity

hand deformity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hannaella luteola

hannaella luteola is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hanseniaspora

hanseniaspora is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hanseniaspora uvarum

hanseniaspora uvarum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hanseniaspora valbyensis

hanseniaspora valbyensis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

haploidentical donor

haploidentical donor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

haploidy

haploidy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hapten

hapten is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

haptoglobin analyses

haptoglobin analyses is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

haptoglobin decreased

haptoglobin decreased is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hard palate

hard palate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

harderian gland

harderian gland is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hardness

hardness is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

harringtonines

harringtonines is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Hashimoto disease

Hashimoto disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hashitoxicosis

hashitoxicosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

head

head is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

head movement

head movement is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

health

health is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

health care

health care is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

health care facility

health care facility is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

health care personnel

health care personnel is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

health education

health education is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

health insurance

health insurance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

health service

health service is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

health services research

health services research is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

health status

health status is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

health survey

health survey is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

health workforce

health workforce is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

healthy

healthy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hearing

hearing is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hearing disorder

hearing disorder is a medical condition or clinical

entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hearing test

hearing test is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heart aneurysm

heart aneurysm is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heart catheterization

heart catheterization is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heart contraction

heart contraction is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heart injury

heart injury is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

heart neoplasm

heart neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

heart rhythm

heart rhythm is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heart septum

heart septum is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heart tamponade

heart tamponade is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heart valve disorder

heart valve disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

heart ventricle

heart ventricle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heat shock protein

heat shock protein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Heberden's node

Heberden's node is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hedgehog proteins

hedgehog proteins is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

height

height is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hela cell

hela cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

helcococcus

helcococcus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

helcococcus kunzii

helcococcus kunzii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

helcococcus pyogenes

helcococcus pyogenes is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

helcococcus sueciensis

helcococcus sueciensis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

helicase

helicase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

helicobacter

helicobacter is a microorganism or biological taxon

of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

helicobacter cinaedi

helicobacter cinaedi is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

helicobacter felis

helicobacter felis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

helicobacter fennelliae

helicobacter fennelliae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

helicobacter mustelae

helicobacter mustelae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

helicobacter rappini

helicobacter rappini is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

helicobacteraceae

helicobacteraceae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

helium

helium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heller myotomy

heller myotomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

helminth

helminth is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

helminthiasis

helminthiasis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

helper virus

helper virus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hemagglutination test

hemagglutination test is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemagglutinin

hemagglutinin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemangioendothelioma

hemangioendothelioma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemangiopericytoma

hemangiopericytoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hematocolpos

hematocolpos is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hematogenous

hematogenous is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hematologic agents

hematologic agents is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hematologic response

hematologic response is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Hematological Disease

Hematological Disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hematologist

hematologist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hematopoietic growth factor

hematopoietic growth factor is a medical or biomedical

cal term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hematopoietic neoplasm

hematopoietic neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hematopoietic system

hematopoietic system is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hematoporphyrin derivative

hematoporphyrin derivative is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hematosalpinx

hematosalpinx is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hematoxylin

hematoxylin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heme

heme is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemerythrin

hemerythrin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemianopsia

hemianopsia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemidesmosome

hemidesmosome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemifacial atrophy

hemifacial atrophy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemihypertrophy

hemihypertrophy is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hemilaryngectomy

hemilaryngectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemimandibulectomy

hemimandibulectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemimegalencephaly

hemimegalencephaly is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemimelia

hemimelia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemipelvectomy

hemipelvectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemispherectomy

hemispherectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemisternebra

hemisternebra is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemivertebrae

hemivertebrae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemocyanin

hemocyanin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemocytometer

hemocytometer is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemodialysis clearance

hemodialysis clearance is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemodialysis solution

hemodialysis solution is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemodynamics

hemodynamics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemoglobin A

hemoglobin A is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemoglobin C

hemoglobin C is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemoglobin H

hemoglobin H is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemoglobin increased

hemoglobin increased is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemoglobin M

hemoglobin M is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemoglobin S

hemoglobin S is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemoglobin trait

hemoglobin trait is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemoglobinuria

hemoglobinuria is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemolymph

hemolymph is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemolysin

hemolysin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemolytic index

hemolytic index is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemopexin

hemopexin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemophilus

hemophilus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemophilus ducreyi

hemophilus ducreyi is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemopoietic tissue

hemopoietic tissue is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemoprotein

hemoprotein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemorrhagic disorder

hemorrhagic disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hemorrhoidal hemorrhage

hemorrhoidal hemorrhage is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hemospermia

hemospermia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemostasis valve

hemostasis valve is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hemostatic agent

hemostatic agent is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hempa

hempa is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

henipavirus

henipavirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hepadnaviridae

hepadnaviridae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

heparan sulfate

heparan sulfate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heparin binding

heparin binding is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heparin lyase

heparin lyase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hepatic

hepatic is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hepatic artery

hepatic artery is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hepatic fissure

hepatic fissure is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hepatic lamina

hepatic lamina is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hepatic necrosis

hepatic necrosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hepatitis G virus

hepatitis G virus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hepatitis virus

hepatitis virus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hepatobiliary system

hepatobiliary system is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hepatocellular adenoma

hepatocellular adenoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hepatocyte

hepatocyte is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hepatodiaphragmatic nodule

hepatodiaphragmatic nodule is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hepatolenticular degeneration

hepatolenticular degeneration is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hepatovirus

hepatovirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hepcidin

hepcidin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

herbal supplement

herbal supplement is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

herbaspirillum

herbaspirillum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

herbaspirillum huttiense

herbaspirillum huttiense is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

herbicide

herbicide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hereditary

hereditary is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hereditary coproporphyria

hereditary coproporphyria is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hereditary elliptocytosis

hereditary elliptocytosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hereditary hyperbilirubinemia

hereditary hyperbilirubinemia is a medical condi-

tion or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

Hermanski-Pudlak syndrome

Hermanski-Pudlak syndrome is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hermaphroditism

hermaphroditism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heroin

heroin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heroin dependence

heroin dependence is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

herpes labialis

herpes labialis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

herpesviridae

herpesviridae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

herpesviridae infection

herpesviridae infection is a microorganism or biolog-

ical taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

herpesvirus saimiri

herpesvirus saimiri is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hesperidin

hesperidin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heterochromatin

heterochromatin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heterocyclic amine

heterocyclic amine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heterocyclic compound

heterocyclic compound is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heteroduplex analysis

heteroduplex analysis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heterogeneity

heterogeneity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heterogeneous echotexture

heterogeneous echotexture is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heterophile antibody

heterophile antibody is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heterophyes heterophyes

heterophyes heterophyes is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heterosexuality

heterosexuality is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

heterozygote

heterozygote is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hexachlorobenzene

hexachlorobenzene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hexachlorophene

hexachlorophene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hexadecadienoic acid

hexadecadienoic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hexadecatetraenoic acid

hexadecatetraenoic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hexadecatrienoic acid

hexadecatrienoic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hexamethonium compounds

hexamethonium compounds is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hexanoic acid

hexanoic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hexestrol

hexestrol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hexose

hexose is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hexylresorcinol

hexylresorcinol is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hibernation

hibernation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hibernoma

hibernoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hiccup

hiccup is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hidrocystoma

hidrocystoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

high-pitched cry

high-pitched cry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hilar

hilar is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hind

hind is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hip

hip is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hip circumference

hip circumference is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hip injury

hip injury is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hirudin

hirudin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hirudins

hirudins is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hirudo medicinalis

hirudo medicinalis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histamine degradation

histamine degradation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histamine receptor

histamine receptor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histamine release

histamine release is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histidine

histidine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histidine decarboxylase

histidine decarboxylase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histidinemia

histidinemia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histiocytic sarcoma

histiocytic sarcoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histiocytoma

histiocytoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histocompatibility

histocompatibility is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histocompatibility testing

histocompatibility testing is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histogenesis

histogenesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histological techniques

histological techniques is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histology cassette

histology cassette is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histone

histone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histone acetylation

histone acetylation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histone acetyltransferase

histone acetyltransferase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histone deacetylases

histone deacetylases is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histone deacetylation

histone deacetylation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histone modification

histone modification is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histopathologic grade

histopathologic grade is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

histophilus

histophilus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

histoplasma

histoplasma is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hiv antibodies

hiv antibodies is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hiv seropositivity

hiv seropositivity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hla antigen

hla antigen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hmgb proteins

hmgb proteins is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hmgn proteins

hmgn proteins is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

holdemia

holdemia is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

holdemia filiformis

holdemia filiformis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

holography

holography is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

holorachischisis

holorachischisis is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

holter electrocardiography

holter electrocardiography is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

home environment

home environment is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

home health care

home health care is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

home hospice

home hospice is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

homelessness

homelessness is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

homeobox gene

homeobox gene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

homeodomain proteins

homeodomain proteins is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

homeopathy

homeopathy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

homicide

homicide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Homo sapiens

Homo sapiens is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

homologous recombination

homologous recombination is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

homologous transplantation

homologous transplantation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

homosexuality

homosexuality is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

homovanillic acid

homovanillic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

homozygote

homozygote is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hoof wall

hoof wall is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hope

hope is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hordeolum

hordeolum is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hormone inhibitor

hormone inhibitor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hormone receptor

hormone receptor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

horseradish peroxidase

horseradish peroxidase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hospice care

hospice care is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hospital

hospital is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hospital administration

hospital administration is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hospitalization

hospitalization is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

host cell

host cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hostility

hostility is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hounsfield unit

hounsfield unit is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hour

hour is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

household

household is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

housing humidity

housing humidity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

housing type

housing type is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

human calcitonin

human calcitonin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

human embryo

human embryo is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

human gastrin

human gastrin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

human genome

human genome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

human herpesvirus 6

human herpesvirus 6 is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

human herpesvirus 8

human herpesvirus 8 is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

human metapneumovirus

human metapneumovirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

human nociceptin

human nociceptin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

humeral epicondyle

humeral epicondyle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

humeral fracture

humeral fracture is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

humidity

humidity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hurthle cell

hurthle cell is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

husband

husband is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hyaline

hyaline is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hyaloid canal

hyaloid canal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hyaluronoglucosaminidase

hyaluronoglucosaminidase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hybridoma

hybridoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hycanthone

hycanthone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydralazine

hydralazine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrarthrosis

hydrarthrosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydration

hydration is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrazine

hydrazine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrazine sulfate

hydrazine sulfate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrazines

hydrazines is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrazones

hydrazones is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroa vacciniforme

hydroa vacciniforme is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrobiology

hydrobiology is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrocarbon

hydrocarbon is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrocephalus acquired

hydrocephalus acquired is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hydrochlorothiazide

hydrochlorothiazide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrocodone

hydrocodone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrocodone bitartrate

hydrocodone bitartrate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroflumethiazide

hydroflumethiazide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrogen

hydrogen is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrogen cyanide

hydrogen cyanide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrogen peroxide

hydrogen peroxide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrogen sulfide

hydrogen sulfide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrogenase

hydrogenase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrogen-ion concentration

hydrogen-ion concentration is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrolase

hydrolase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrolysis

hydrolysis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydrolyzable tannin

hydrolyzable tannin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydromorphone

hydromorphone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydromyelia

hydromyelia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroxamic acid

hydroxamic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroxybenzoate

hydroxybenzoate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroxychloroquine

hydroxychloroquine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroxycholesterols

hydroxycholesterols is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroxyl group

hydroxyl group is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroxyl radical

hydroxyl radical is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroxylamines

hydroxylamines is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroxylation

hydroxylation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroxyproline

hydroxyproline is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroxyprolinemia

hydroxyprolinemia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroxysteroid

hydroxysteroid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroxyurea

hydroxyurea is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hydroxyzine

hydroxyzine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Hydrozoa

Hydrozoa is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hygiene

hygiene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hymenolepiasis

hymenolepiasis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hymenolepis diminuta

hymenolepis diminuta is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hymenolepis nana

hymenolepis nana is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hymenoptera

hymenoptera is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

hyoscyamine

hyoscyamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hyperactivity

hyperactivity is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperamylasemia

hyperamylasemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperargininemia

hyperargininemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperbaric chamber

hyperbaric chamber is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperbilirubinemia

hyperbilirubinemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypercalciuria

hypercalciuria is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypercementosis

hypercementosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperemia

hyperemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperemia grade

hyperemia grade is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperextension

hyperextension is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperfibrinogenemia

hyperfibrinogenemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperflexion

hyperflexion is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypergammaglobulinemia

hypergammaglobulinemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperglycinemia

hyperglycinemia is a medical condition or clinical

entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperhomocysteinemia

hyperhomocysteinemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypericum perforatum

hypericum perforatum is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperinsulinism

hyperinsulinism is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperkeratosis

hyperkeratosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperkinesia

hyperkinesia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperlipasaemia

hyperlipasaemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperlipoproteinemia

hyperlipoproteinemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperlordosis

hyperlordosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperlysinemia

hyperlysinemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypernatremia result

hypernatremia result is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperornithinemia

hyperornithinemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperostosis

hyperostosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperoxaluria

hyperoxaluria is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperoxia

hyperoxia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperparakeratosis

hyperparakeratosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperpituitarism

hyperpituitarism is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperproteinemia

hyperproteinemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperpyrexia

hyperpyrexia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypersplenism

hypersplenism is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hyperthyroxinemia

hyperthyroxinemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypertonia

hypertonia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypertrophic gastritis

hypertrophic gastritis is a medical condition or clinical

entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypertrophic cardiopathy

hypertrophic cardiopathy is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypertropia

hypertropia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypervigilance

hypervigilance is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypervolemia

hypervolemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypha

hypha is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hypnic headache

hypnic headache is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hypnotherapy

hypnotherapy is a medical or biomedical term used in clinical practice, research, anatomy, or health

care; its interpretation depends on context.

Synonyms:

hypoadrenalism

hypoadrenalism is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypoalbuminemia

hypoalbuminemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypoalphalipoproteinemias

hypoalphalipoproteinemias is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypoblast

hypoblast is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypocapnia

hypocapnia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypcholesterolemia

hypcholesterolemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypochondriasis

hypochondriasis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypochromia

hypochromia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypochromic anemia

hypochromic anemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypocitraturia

hypocitraturia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypocupremia

hypocupremia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypodermic needle

hypodermic needle is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypogalactia

hypogalactia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypoglossal nerve

hypoglossal nerve is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypoglycemic agent

hypoglycemic agent is a medical condition or clinical

entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypokinesia

hypokinesia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypolipidemic agents

hypolipidemic agents is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypolipoproteinemia

hypolipoproteinemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypomethylation

hypomethylation is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypopharyngeal neoplasm

hypopharyngeal neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypophosphatemic ricket

hypophosphatemic ricket is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypophysectomy

hypophysectomy is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypophysitis

hypophysitis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypoploidy

hypoploidy is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypothalamic hamartoma

hypothalamic hamartoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypothalamic hormone

hypothalamic hormone is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypothalamic neoplasm

hypothalamic neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypotrichosis

hypotrichosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypotropia

hypotropia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hypoxanthine

hypoxanthine is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hysteria

hysteria is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

hysteroscope

hysteroscope is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

hysterotomy abortion

hysterotomy abortion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Synonyms:

I

Cyclospora Infection

An intestinal infection caused by the parasite *Cyclospora cayetanensis*, usually acquired from contaminated food or water. It commonly causes prolonged watery diarrhea, abdominal cramps, nausea, fatigue, and weight loss. Diagnosis requires specialized stool testing, and antimicrobial treatment is often effective.

Synonyms:

IBD

Inflammatory bowel disease, including Crohn's disease and ulcerative colitis, causing chronic intestinal inflammation.

Synonyms: Inflammatory bowel disease

ICD

Implantable cardioverter-defibrillator, a device that detects dangerous heart rhythms and delivers a corrective shock.

Synonyms: Implantable cardioverter defibrillator

Ice Pick Headache

A sudden, severe, stabbing headache that usually lasts only seconds.

Synonyms: Primary stabbing headache

Iliopsoas Muscles

The psoas major and iliacus muscles, which work together to flex the hip.

Synonyms: Iliopsoas

Immobilize

To restrict movement of a body part, often with a splint or cast, to support healing.

Synonyms: Immobilization

Immunoglobulin E

An antibody class that plays a central role in many immediate allergic reactions.

Synonyms: IgE

Immunologically Privileged Site

A body site where immune responses are limited to reduce risk of tissue damage.

Synonyms:

Impacted

Firmly wedged or unable to move from its normal position, as with an impacted tooth.

Synonyms:

Impaction

Obstruction caused by material that is firmly lodged, such as hardened stool in the bowel.

Synonyms:

Impotence

An older term for erectile dysfunction.

Synonyms: Erectile dysfunction

In Situ

In its original place or position.

Synonyms: In place

Inactivated Vaccines

Vaccines made from microorganisms that have been killed and cannot reproduce.

Synonyms: Inactivated vaccines

Inferior Myocardial Infarction

A heart attack affecting the lower or inferior portion of the heart muscle.

Synonyms:

Infiltrating Cancer

Cancer that has grown beyond its site of origin into surrounding tissue.

Synonyms: Invasive cancer

Infusion

Slow administration of a fluid or medicine into a vein or tissue.

Synonyms: Intravenous infusion

Inhibitory Neurochemical

A chemical messenger that reduces signaling between nerve cells.

Synonyms: Inhibitory neurotransmitter

Injectable Fillers

Materials injected beneath or into skin to restore volume or soften wrinkles.

Synonyms: Dermal fillers

Inoperable

Not suitable for surgical treatment, often because surgery cannot safely remove or correct the condition.

Synonyms:

Insulin

A pancreatic hormone that helps cells take up glucose and lowers blood glucose.

Synonyms:

Insulin-Dependent Diabetes

Type 1 diabetes, in which the pancreas produces little or no insulin and replacement insulin is required.

Synonyms: Type 1 diabetes

Intense Pulsed Light

Broadband light treatment used for selected cosmetic skin conditions and hair reduction.

Synonyms: IPL

Intensity

The degree of effort or physiological demand during physical activity.

Synonyms:

Interferons

Signaling proteins that help coordinate immune responses, especially against viral infections.

Synonyms:

Interleukins

Cytokines that carry signals between immune cells and regulate inflammation.

Synonyms: ILs

Intermediate-Density Lipoprotein

A lipoprotein remnant formed as very-low-density lipoprotein is metabolized toward LDL.

Synonyms: IDL

Intervention Study

A study in which researchers assign or provide an intervention and compare its outcomes with a control.

Synonyms: Clinical trial

Intervertebral Disk

A fibrocartilaginous cushion between spinal vertebrae that absorbs shock and permits movement.

Synonyms: Intervertebral disc

Intervertebral Foramen

An opening between adjacent vertebrae through which a spinal nerve exits.

Synonyms: Neural foramen

Intolerance

An adverse response to a substance that does not involve the immune mechanism of an allergy.

Synonyms: Nonallergic sensitivity

Intrinsic Sphincter Deficiency

Weakness of the urinary sphincter that causes stress urinary incontinence.

Synonyms: ISD

Iodides

Salts containing iodine, sometimes used in carefully selected thyroid disorders.

Synonyms:

Irritants

Substances that provoke inflammation or allergy-like symptoms without necessarily causing an immune allergy.

Synonyms:

Ischemic Heart Disease

Heart disease caused by inadequate blood flow through narrowed or blocked coronary arteries.

Synonyms: Coronary artery disease; coronary heart disease

IADL Training

Training to improve skills needed for independent living, such as preparing food, shopping, managing medicines, handling finances, and using transportation.

Synonyms:

Iatrogenic

An illness or condition caused by medical examination or treatment. Examples: hospital-acquired infections, drug side effects, surgical complications, radiation-induced damage. Prevention: proper technique, informed consent, monitoring, reporting systems.

Synonyms:

Iatrogenic Injury

An injury caused unintentionally by a medical examination, treatment, procedure, or medicine.

Synonyms:

ICD Shock Therapy

Anti-tachycardia pacing (ATP) for slow VT delivers rapid pacing pulses to terminate the arrhythmia painlessly. Cardioversion shock synchronously terminates VT. Defibrillation shock treats VFib asynchronously. The MADIT-RIT trial showed that higher-rate programming (detection >180-200 bpm) reduced inappropriate shocks and mortality.

Synonyms:

Ice Pack

A device that applies cold to a body area to help relieve pain or swelling. It should be wrapped to protect the skin and used for limited periods.

Synonyms:

ICF Framework

International Classification of Functioning, Disability and Health. Biopsychosocial model: body functions/structures, activities, participation, environmental factors, personal factors.

Synonyms:

Ichthyosis

A group of disorders characterized by dry, scaly skin resembling fish scales. Ichthyosis vulgaris is the most common, autosomal dominant, associated with filaggrin mutation and atopy. X-linked ichthyosis is caused by steroid sulfatase deficiency. Lamellar ichthyosis is a severe congenital form.

Synonyms:

Ichthyosis Vulgaris

A common inherited disorder of skin keratinization characterized by dry, scaling skin, especially on the extensor limbs. Symptoms often improve with age and with regular emollient and keratolytic skin care.

Synonyms:

ICU Psychosis

A colloquial term for delirium occurring in an intensive-care setting, with acute changes in attention, awareness, and cognition. Causes include severe illness, infection, medicines, sleep disruption, pain, and metabolic abnormalities. It re-

quires prompt evaluation and treatment of reversible causes, with supportive measures to orient and calm the patient.

Synonyms:

Ideas of Reference

The false belief that unrelated events, objects, or people have a particular and unusual significance specifically for the patient. For example, believing that TV newscasters are sending personal messages or that strangers are conspiring against them.

Synonyms:

Idiopathic

Of unknown cause. Examples: idiopathic pulmonary fibrosis, idiopathic thrombocytopenia.

Synonyms:

Idiopathic Hypersomnia

A sleep disorder characterized by excessive daytime sleepiness, prolonged or unrefreshing sleep, difficulty awakening, and impaired alertness despite adequate opportunity for sleep. It is diagnosed after excluding other medical, psychiatric, circadian, and substance-related causes.

Synonyms:

Idiopathic Intracranial Hypertension

Elevated intracranial pressure without mass lesion. Symptoms: headache, pulsatile tinnitus, visual changes, papilledema. Treatment: acetazolamide, weight loss, surgical options.

Synonyms:

Idiopathic Pulmonary Fibrosis

A chronic, progressive fibrosing interstitial pneumonia of unknown cause. Histopathology shows usual interstitial pneumonia (UIP). Features include exertional dyspnea, dry cough, bibasilar crackles, and digital clubbing. Median survival is 3–5 years.

Synonyms:

Idiosyncratic Reaction

An uncommon, unexpected, and often genetically determined adverse drug reaction that is unrelated

to the drug's known pharmacology and usually dose-independent (a Type B reaction).

Synonyms:

Idioventricular Rhythm

A ventricular rhythm arising from an ectopic focus in the His-Purkinje system or ventricular myocardium, typically at a slow rate with wide QRS complexes. It may occur during escape from higher pacemakers, reperfusion, conduction block, or severe cardiac disease.

Synonyms:

IgA

Immunoglobulin A, the predominant antibody in mucosal secretions (saliva, tears, breast milk, gastrointestinal and respiratory tract). Exists mainly as a dimer linked by a J chain and secretory component, which protects it from proteolysis.

Synonyms:

IgA Nephropathy

The most common primary glomerulonephritis worldwide, characterized by mesangial IgA deposition. Presents with hematuria (macroscopic with mucosal infections, especially upper respiratory), proteinuria, and hypertension. Most common in young adults, with male predominance.

Synonyms:

IgA Vasculitis

An immune-complex small-vessel vasculitis characterized by palpable purpura, joint pain, abdominal symptoms, and kidney involvement. It is common in children and may follow an infection; renal disease determines long-term risk.

Synonyms:

IgA Vasculitis (Henoch-Schonlein Purpura)

The most common systemic vasculitis in children (peak age 2–8 years), characterized by IgA1-containing immune complex deposition in small vessels. Often preceded by an upper respiratory tract infection (e.g., group A *Streptococcus*).

Synonyms: Henoch-Schonlein Purpura

IgD

Immunoglobulin D, a membrane-bound antibody expressed on the surface of mature naive B cells (with IgM) serving as a B-cell receptor. Serum IgD is present in trace amounts and its secreted function is unclear. Its role in B-cell activation and signaling is an area of research.

Synonyms:

IgE

Immunoglobulin E, the antibody class mediating immediate (type I) hypersensitivity and defense against parasites. Binds high-affinity Fc-epsilon-RI receptors on mast cells and basophils; allergen cross-linking triggers degranulation and release of histamine and leukotrienes, causing allergic rhinitis, asthma, urticaria, and anaphylaxis.

Synonyms:

IgG

Immunoglobulin G, the most abundant antibody class in serum (75-80 percent), produced during secondary immune responses. Functions: neutralization, opsonization, complement activation (classical pathway), and antibody-dependent cellular cytotoxicity.

Synonyms:

IgG and complement deposition at the dermis-epidermis junction

An immunofluorescence finding that may occur in the lupus band test, in which immune complexes containing immunoglobulin and complement deposit along the dermoepidermal junction. The pattern and clinical context are needed for interpretation.

Synonyms:

IgG4-Related Disease

A fibro-inflammatory disorder that can produce tumefactive lesions and organ enlargement in multiple sites. Histology may show IgG4-positive plasma cells, storiform fibrosis, and obliterative phlebitis; diagnosis requires clinicopathologic correlation be-

cause no single test is sufficient.

Synonyms:

IgG4-related disease arteritis

A form of IgG4-related disease affecting large and medium-sized arteries, characterized by transmural inflammation with abundant IgG4-positive plasma cells, storiform fibrosis, and obliterative phlebitis. It may involve the aorta and its branches, causing stenosis or aneurysm formation.

Synonyms:

IgG4-related ophthalmic disease

An immune-mediated fibroinflammatory disorder that can affect the lacrimal glands, orbit, eyelids, or extraocular muscles. It may cause swelling, mass lesions, double vision, or visual symptoms and can occur with IgG4-related disease in other organs.

Synonyms:

IgM

Immunoglobulin M, the largest antibody (pentamer), produced during the primary immune response (first antibody to appear). Functions: potent complement activation (classical pathway) and agglutination; expressed as a membrane-bound B-cell receptor on naive B cells.

Synonyms:

IGRA (Interferon-Gamma Release Assay)

Blood test for *Mycobacterium tuberculosis* infection (latent or active). T-SPOT.TB (ELISPOT) or QuantiFERON-TB Gold Plus (ELISA). Measures IFN-gamma released by T cells after exposure to MTB-specific antigens (ESAT-6, CFP-10, TB7.7).

Synonyms: Interferon-Gamma Release Assay

Ileal Atresia

Congenital complete interruption or absence of a segment of the ileal lumen. It causes neonatal intestinal obstruction with abdominal distension, bilious vomiting, and failure to pass meconium and generally requires surgical management.

Synonyms:

Ileal Obstruction

Partial or complete blockage of the ileum, the final portion of the small intestine. Causes include adhesions, hernia, inflammatory bowel disease, tumors, and twisting of the bowel. Symptoms may include cramping pain, vomiting, abdominal distension, and inability to pass stool or gas.

Synonyms:

Ileal Pouch-Anal Anastomosis

Surgical creation of a J-pouch from the terminal ileum after proctocolectomy to preserve intestinal continuity for ulcerative colitis. Avoids permanent ileostomy by allowing defecation through the anal route. The procedure involves removal of the entire colon and rectum with construction of a reservoir from distal ileum.

Synonyms:

Ileitis

Inflammation of the ileum, the distal segment of the small intestine. Causes include Crohn disease, infection, ischemia, medication-related injury, and other inflammatory disorders; symptoms may include right-lower-quadrant pain, diarrhea, fever, or bleeding.

Synonyms:

Ileocecal Valve

A sphincter-like fold at the junction of the terminal ileum and caecum. It regulates passage of intestinal contents into the colon and helps limit reflux of colonic contents into the small intestine.

Synonyms:

Ileostomy

A surgically created stoma from the terminal ileum to the abdominal wall, performed after proctocolectomy for ulcerative colitis or familial adenomatous polyposis, or to protect a distal anastomosis. Output is liquid and enzyme-rich, requiring careful fluid and skin management.

Synonyms:

Ileum

Longest distal segment (3.5 m) with thinner walls, shorter villi, and Peyer's patches on the antimesenteric border. Absorbs vitamin B12, bile salts, remaining nutrients. Ileocecal valve prevents colonic backflow. Crohn's disease most commonly affects the terminal ileum; resection may cause B12 deficiency and bile salt malabsorption.

Synonyms:

Ileus

Failure of coordinated intestinal propulsion without a mechanical blockage, usually from postoperative bowel inhibition, inflammation, metabolic disturbance, or medication effect. It causes distension, nausea, vomiting, and reduced passage of flatus or stool.

Synonyms:

Iliotibial Band Syndrome

Lateral knee pain from IT band friction over lateral femoral epicondyle. Common in runners. Treatment: rest, stretching, strengthening, biomechanical correction.

Synonyms:

Ilium

Largest hip bone forming the superior portion. Body contributes to acetabulum; wing has a concave iliac fossa. Iliac crest runs ASIS to PSIS, a palpable landmark for lumbar puncture level. Sacroiliac joint articulates with sacrum. Gluteal muscles originate from its external surface; iliacus fills its fossa.

Synonyms:

Illness Anxiety Disorder

Preoccupation with having or acquiring a serious illness, with minimal or no somatic symptoms present. The individual has a high level of anxiety about health, performs excessive health-related behaviors, and experiences maladaptive avoidance. Symptoms persist for at least six months. The individual is not delusional and insight may vary.

Synonyms:

Image Display

The presentation of medical images in views and contrast settings that allow anatomy and abnormalities to be assessed.

Synonyms:

Image Processing

The mathematical or computer-based manipulation of acquired medical-image data to reconstruct, enhance, correct, or display an image.

Synonyms:

Image Quality

The degree to which an image accurately and clearly shows the structures relevant to diagnosis. It is affected by resolution, contrast, noise, and artifacts.

Synonyms:

Image Reconstruction

Mathematical process converting projection data to cross-sectional images. Iterative methods (OSEM) superior to filtered back projection. Corrects for attenuation, scatter, resolution.

Synonyms:

Image-Guided Ablation

Destruction of abnormal tissue using an energy source such as heat, cold, or chemicals while imaging guides placement and monitors the procedure.

Synonyms:

Image-Guided Biopsy

Removal of a tissue sample with the position of the needle or instrument guided by ultrasound, CT, MRI, or fluoroscopy.

Synonyms:

Image-Guided Drainage

Placement of a catheter or needle under imaging guidance to evacuate fluid, pus, blood, or bile from a pathologic collection. Indications include abscess, biloma, urinoma, pleural collection, and symptomatic cysts.

Synonyms:

Image-Guided Therapy

A minimally invasive procedure performed with imaging to guide instruments or treatment to a target tissue.

Synonyms:

Imaging

The production of pictures of internal body structures using methods such as radiography, ultrasound, computed tomography, magnetic resonance imaging, or nuclear medicine.

Synonyms:

Imaging-Guided Biopsy

Tissue acquisition directed by ultrasound, CT, MRI, or fluoroscopy to target a lesion while avoiding critical structures. The procedure requires appropriate specimen handling, informed consent, bleeding-risk assessment, and post-procedure monitoring.

Synonyms:

Iminoacetic Acid Scan

A nuclear-medicine examination using a technetium-labeled iminodiacetic acid compound to evaluate hepatobiliary function and bile flow. It is not primarily a renal scan.

Synonyms:

Immediate Hypersensitivity

A rapid, typically immunoglobulin-E-mediated hypersensitivity reaction in which allergen cross-linking of mast-cell or basophil receptors releases inflammatory mediators. It can cause urticaria, bronchospasm, gastrointestinal symptoms, or anaphylaxis.

Synonyms:

Immune and Infectious Diseases

A medical field encompassing disorders of the immune system and illnesses caused by pathogenic microorganisms. Immune system disorders include autoimmune diseases (e.g., lupus, rheumatoid arthritis), immunodeficiencies, and hypersensitivity reactions.

Synonyms:

Immune Checkpoint

An inhibitory or stimulatory receptor-ligand pathway that regulates lymphocyte activation and limits tissue injury. Therapeutic blockade of inhibitory checkpoints such as CTLA-4 or PD-1 can enhance antitumor immunity but may cause immune-related adverse effects.

Synonyms:

Immune Complex

A soluble or tissue-associated aggregate formed by antigen bound to antibody. Persistent or inadequately cleared immune complexes may activate complement and deposit in tissues, producing type III hypersensitivity and vasculitic or renal injury.

Synonyms:

Immune Evasion

The ability of a pathogen, tumor, or other abnormal cell to avoid recognition or destruction by the immune system.

Synonyms:

Immune Hemolytic Anemia

Anemia caused by immune-mediated destruction of red blood cells, either by autoantibodies or antibodies directed against foreign red-cell antigens. It may cause fatigue, jaundice, dark urine, splenomegaly, and laboratory evidence of hemolysis.

Synonyms:

Immune Response

The coordinated reaction of the immune system to foreign substances (antigens), pathogens, or abnormal cells. The innate immune response acts rapidly and non-specifically (physical barriers, phagocytes, complement, NK cells, inflammation).

Synonyms:

Immune Thrombocytopenia

An autoimmune disorder characterized by isolated thrombocytopenia (platelet count $<100 \times 10^9/L$) due to autoantibody-mediated platelet destruction and impaired platelet production. Primary ITP (no identifiable cause) vs secondary (SLE, CLL, HIV,

HCV, drugs).

Synonyms:

Immune Thrombocytopenic Purpura

An autoimmune bleeding disorder characterized by isolated thrombocytopenia (platelet count $<100,000/L$) with normal white blood cell count and hemoglobin. Caused by autoantibodies (primarily IgG) directed against platelet surface glycoproteins (IIb/IIIa or Ib/IX), leading to splenic macrophage phagocytosis of platelets.

Synonyms:

Immune Tolerance

The state of unresponsiveness of the immune system to self-antigens and to specific foreign antigens, preventing autoimmunity while preserving responses to pathogens. Central tolerance: deletion of self-reactive lymphocytes in the thymus (T cells) and bone marrow (B cells).

Synonyms:

Immune-Mediated Necrotizing Myopathy

A subacute severe proximal myopathy with very high CK (often $>10,000$), minimal inflammation on biopsy, necrotic fibers. Two major autoantibodies: anti-HMGCR (3-hydroxy-3-methylglutaryl-CoA reductase, statin-associated or spontaneous) and anti-SRP (signal recognition particle).

Synonyms:

Immune-Related Adverse Event

An inflammatory or autoimmune toxicity caused by immune checkpoint blockade or another immune-activating cancer treatment. It may affect skin, bowel, liver, endocrine organs, lungs, heart, kidneys, or nervous system and often requires treatment-specific immunosuppression.

Synonyms:

Immunization

The process of inducing protection against an infection, usually through vaccination. Recommended vaccines and schedules depend on age, previous doses, pregnancy, immune status, medical condi-

tions, travel, exposure risk, and current public-health guidance.

Synonyms:

Immunocompromised Host

A person whose immune defenses are impaired by congenital disease, infection, malignancy, immunosuppressive treatment, organ failure, or another condition. Such patients have increased susceptibility to opportunistic infection, severe disease, and atypical presentations.

Synonyms:

Immunodeficiency

Impaired development or function of one or more components of the immune system, resulting in increased susceptibility to infection, malignancy, or autoimmunity. It may be primary and genetic or secondary to disease, medication, malnutrition, or another acquired cause.

Synonyms:

Immunodeficiency and infections

Immunocompromised individuals are at increased risk for opportunistic infections. Primary immunodeficiencies are genetic disorders affecting immune function. Secondary immunodeficiencies include HIV/AIDS, organ transplantation, chemotherapy, and corticosteroid use.

Synonyms:

Immunodeficiency Diseases

Disorders in which one or more components of the immune system are absent, deficient, or dysfunctional. They may be inherited or acquired and can cause recurrent, severe, unusual, or persistent infections, autoimmune disease, and increased malignancy risk.

Synonyms:

Immunofluorescence

A technique using fluorescently labeled antibodies to detect specific antigens in tissues, cells, or microorganisms; visualized by fluorescence microscopy.

Synonyms:

Immunoglobulin (Antibody)

Y-shaped glycoprotein produced by plasma cells that specifically binds antigens. Composed of two identical heavy chains and two identical light chains linked by disulfide bonds. Variable regions (Fab) bind antigen; constant region (Fc) mediates effector functions (complement activation, Fc receptor binding).

Synonyms: Antibody

Immunoglobulin Replacement Therapy

Indications: primary antibody deficiencies (XLA, CVID, hyper-IgM, specific antibody deficiency), secondary hypogammaglobulinemia (CLL, myeloma, post-rituximab, post-transplant) with recurrent infections.

Synonyms:

Immunohistochemistry

A technique that uses labeled antibodies to detect specific antigens in tissue sections. It supports tumor classification, identification of lineage, assessment of predictive biomarkers, and detection of infectious or immune-mediated processes.

Synonyms:

Immunological Memory

The ability of the adaptive immune system to mount a faster, larger, and more effective response upon re-exposure to an antigen, conferred by long-lived memory B cells and memory T cells generated during the primary response.

Synonyms:

Immunomodulators in Dermatology

Topical immunomodulators treat inflammatory skin diseases without corticosteroid side effects. Pimecrolimus 1 percent cream and tacrolimus 0.03 and 0.1 percent ointments are calcineurin inhibitors used for atopic dermatitis, facial eczema, and intertriginous areas. They are steroid-sparing agents.

Synonyms:

Immunophenotyping

Identification and characterization of cells according

to their surface, cytoplasmic, or nuclear antigens, usually by flow cytometry or immunohistochemistry. It is used to classify leukemias, lymphomas, immune-cell subsets, and some immunodeficiency disorders.

Synonyms:

Immunosenescence

Age-related changes in innate and adaptive immunity that alter infection susceptibility, vaccine responses, inflammation, and cancer surveillance. It is influenced by chronic disease, nutrition, medications, and functional status.

Synonyms:

Immunosuppressant

A drug that reduces immune system activity, used to prevent organ transplant rejection and to treat autoimmune and inflammatory diseases.

Synonyms:

Immunosuppression in Transplant

Medications to prevent rejection. Induction with thymoglobulin or basiliximab. Maintenance with tacrolimus, mycophenolate, and prednisone. Monitor drug levels and renal function. Calcineurin inhibitor nephrotoxicity is major concern requiring dose optimization.

Synonyms:

Immunosuppression Screening

Pre-treatment evaluation for latent or active infection, vaccination status, malignancy risk, and organ dysfunction before immunosuppressive therapy. Testing commonly includes tuberculosis, hepatitis B and C, HIV, blood counts, liver and kidney function, and pregnancy when relevant.

Synonyms:

Immunosuppressive Drug

A drug that suppresses immune responses, used for organ transplantation, graft-versus-host disease, and autoimmune/inflammatory diseases.

Synonyms:

Immunotherapy

Treatment using immune system to fight cancer. Types: checkpoint inhibitors (PD-1, PD-L1, CTLA-4), CAR T-cell therapy, cytokines, cancer vaccines. Examples: pembrolizumab, nivolumab, ipilimumab, axicabtagene ciloleucel.

Synonyms:

Immunotherapy and Biologic Treatments

Advanced therapies that harness or modify the immune system to treat diseases, particularly cancer, autoimmune disorders, and inflammatory conditions. Biologics are large-molecule drugs derived from living organisms that target specific immune pathways, such as TNF inhibitors, monoclonal antibodies, and checkpoint inhibitors.

Synonyms:

Immunotherapy in Dermatology

Cancer immunotherapy uses medicines that alter immune activity against skin cancers. Checkpoint inhibitors target pathways such as PD-1, PD-L1, or CTLA-4. Their use depends on the tumor type, stage, prior treatment, and the patient's health.

Synonyms:

Immunotoxicity

Immune system damage from chemicals. Effects: immunosuppression, hypersensitivity, autoimmunity. Examples: benzene, chemotherapy, biologics.

Synonyms:

Impacted Tooth

Tooth unable to erupt into functional position. Most common: mandibular third molars, maxillary canines. May cause pathology: cyst, root resorption, caries. Treatment: monitoring or extraction.

Synonyms:

Impedance Hearing Testing

A group of tests, including tympanometry, that measure the movement of the eardrum and middle-ear function.

Synonyms:

Impella Device

Percutaneous microaxial left ventricular assist device that actively pumps blood from the LV into the aorta, reducing LV workload and increasing cardiac output. Types: Impella 2.5 (up to 2.5 L/min), Impella CP (up to 3.7 L/min), Impella 5.0 (up to 5 L/min, surgically placed).

Synonyms:

Imperforate Anus

A congenital anomaly where the anus is completely absent or fails to open at the perineum. Classified as low (distal to the levator ani complex) or high (proximal to the levator ani). Often associated with other anomalies including vertebral, anal, cardiac, tracheoesophageal, renal, and limb defects.

Synonyms:

Imperforate Hymen

A congenital obstruction of the vaginal opening by an intact hymen without a normal central opening. After puberty it may cause absent menstruation, cyclic pelvic pain, urinary retention, or a pelvic mass from retained menstrual blood.

Synonyms:

Impetigo

A highly contagious, superficial bacterial infection of the epidermis, primarily affecting children.

Synonyms:

Implant (Dental)

A biocompatible fixture placed in the jawbone to support a dental prosthesis. It may be used for one missing tooth or to support a partial or complete denture; complications include infection, bone loss, and mechanical failure.

Synonyms: Dental

Implant Failure

Loss of an implant's intended structural, biologic, or functional performance. Causes include infection, fracture, loosening, wear, malposition, thrombosis, material degradation, and patient or tissue factors.

Synonyms:

Implant Sterilization

Validated processing that removes or inactivates all viable microorganisms, including bacterial spores, from an implant. Methods include moist heat, ethylene oxide, radiation, and low-temperature plasma according to material and device requirements.

Synonyms:

Implant-Associated Infection

Infection involving an implanted medical device or the tissue surrounding it. Microbial adherence and biofilm formation can impair antimicrobial penetration and often require device-directed therapy, source control, or removal.

Synonyms:

Implant-Supported Prosthesis

A fixed or removable dental prosthesis that is supported or retained by one or more dental implants.

Synonyms:

Implantable Cardioverter Defibrillator

An implanted device that detects dangerous ventricular rhythms and treats them with antitachycardia pacing or an electrical shock.

Synonyms:

Implantable Cardioverter-Defibrillator

An implanted device that monitors heart rhythm and delivers electrical therapy (antitachycardia pacing or defibrillation) for life-threatening ventricular arrhythmias.

Synonyms:

Implantable Loop Recorder

Subcutaneous device providing continuous ECG monitoring for up to 3 years. Used for evaluation of unexplained syncope, recurrent palpitations, cryptogenic stroke, and occult atrial fibrillation detection. Small size (coin-sized), inserted under local anesthesia in the chest.

Synonyms:

Implantable Port

A subcutaneously placed vascular-access device con-

sisting of a reservoir connected to a catheter, used for repeated administration of medication, fluids, blood products, or parenteral nutrition. It requires sterile access and may be complicated by infection, thrombosis, occlusion, or mechanical failure.

Synonyms:

Implantation

The embedding of the blastocyst into the endometrium, occurring approximately 6-10 days after ovulation. The blastocyst hatches from the zona pellucida, and the trophoblast invades the decidua. Implantation triggers hCG production, which maintains the corpus luteum. Failure of implantation is a common cause of early pregnancy loss.

Synonyms:

Impression

Summary of key findings and recommendations in radiology report.

Synonyms:

Imprinting

A pattern of gene expression determined by whether a gene copy was inherited from the mother or father.

Synonyms:

Impulse Oscillometry

A pulmonary function testing technique that measures respiratory impedance by applying small pressure oscillations during tidal breathing. It assesses large airway resistance (R5), small airway resistance (R5-R20), and reactance.

Synonyms:

In Situ Carcinoma

Abnormal malignant cells confined to the tissue layer in which they arose and not yet invading through the basement membrane.

Synonyms:

In Vitro Fertilisation

An assisted reproductive technology in which eggs are retrieved from the ovaries, fertilized with sperm in a laboratory, and resulting embryos are trans-

ferred to the uterus.

Synonyms:

Inactivated Polio Vaccine

Salk vaccine, a formalin-inactivated preparation containing all three poliovirus serotypes (1, 2, and 3), administered by intramuscular injection. The only polio vaccine used in the United States since 2000, and the recommended vaccine for immunocompromised individuals and pregnant women worldwide.

Synonyms:

Inborn Error of Metabolism

An inherited disorder caused by a defect in a metabolic pathway, often resulting in accumulation of harmful substances or deficiency of essential products.

Synonyms:

Incentive Spirometry

A device that provides visual feedback while a person inhales slowly and deeply. It may be used with coughing, mobilization, and other measures to support lung expansion after illness or surgery.

Synonyms:

Incidence

Number of new cases of a disease in a population during a specified time period. Measures risk of developing disease. Incidence rate = new cases / population at risk x time unit.

Synonyms:

Incidental Finding

An unexpected observation discovered during an examination performed for another reason. Its importance depends on the finding and the clinical context.

Synonyms:

Incidentaloma

Incidental imaging finding of uncertain significance. May require further evaluation.

Synonyms:

Incised Wound

Clean-cut wound produced by a sharp-edged instrument (scalpel, knife, glass) that is longer on the skin surface than it is deep, featuring clean edges without tissue bridging or marginal abrasion.

Synonyms:

Incisional Biopsy

Surgical removal of part of lesion. Diagnosis before definitive treatment.

Synonyms:

Incisional Hernia

A hernia through a weakness in a previous surgical incision. It may appear as a bulge that becomes more prominent with standing or straining. Risk factors include wound infection, obesity, smoking, poor nutrition, chronic cough, and repeated surgery.

Synonyms:

Inclusion Body Myositis

A slowly progressive inflammatory and degenerative muscle disease, usually causing asymmetric weakness of the finger flexors and quadriceps. Muscle biopsy may show endomysial inflammation and rimmed vacuoles. Response to immunotherapy is often limited.

Synonyms:

Inclusion-Cell (I-Cell) Disease

A rare inherited lysosomal-storage disorder caused by impaired tagging and trafficking of lysosomal enzymes, leading to their secretion outside cells. It causes severe developmental delay, skeletal abnormalities, coarse facial features, and progressive multisystem disease. Management is supportive and coordinated by specialists.

Synonyms: I-Cell

Incontinence

The involuntary loss of control over urination (urinary incontinence) or defecation (fecal incontinence).

Synonyms:

Incontinence (Fecal)

Involuntary fecal leakage. Causes: diarrhea, constipation with overflow, sphincter damage, neurological disease, medications. Assessment: history, examination, anorectal manometry. Treatment: bowel regimen, sphincter exercises, biofeedback, surgery if indicated.

Synonyms: Fecal

Incontinence (Urinary)

Involuntary urine leakage. Types: stress (cough/sneeze), urge (overactive bladder), overflow (retention), functional (immobility/cognition), mixed. Assessment: history, bladder diary, urinalysis, post-void residual.

Synonyms: Urinary

Incontinentia Pigmenti

An X-linked dominant disorder affecting skin, teeth, eyes, and the nervous system, caused by pathogenic variants in IKBKG. Skin lesions evolve through vesicular, verrucous, hyperpigmented, and atrophic stages and may be associated with retinal disease or seizures.

Synonyms:

Increased Intracranial Pressure

Abnormally elevated pressure within the skull caused by brain swelling, hemorrhage, mass lesion, impaired cerebrospinal-fluid circulation, or venous obstruction. It can cause headache, vomiting, visual disturbance, reduced consciousness, and brain herniation.

Synonyms:

Increased Vascular Permeability

A fundamental feature of acute inflammation that allows plasma proteins, fluid, and leukocytes to exit the vascular space and enter the extravascular tissue.

Synonyms:

Incubation period

The time between when a person is exposed to an infection and when symptoms appear.

Synonyms:

Incubator

A controlled-environment chamber culturing microorganisms, cells, or tissues at defined temperature, humidity, and atmospheric composition.

Synonyms:

Incus

The incus, commonly known as the anvil, is the middle ossicle of the three bones in the middle ear, articulating with the malleus at the incudomalleolar joint and with the stapes at the incudostapedial joint.

Synonyms:

Independence

The ability to perform activities and make decisions without assistance, although a person may still use devices, adaptations, or occasional support.

Synonyms:

India Immunization Schedule

The Universal Immunization Schedule (UIP) of the Government of India, providing free vaccines to all children, adolescents, and pregnant women through the public health system.

Synonyms:

Indication

A clinical condition, symptom, or question that provides the reason for performing a test, procedure, or treatment.

Synonyms:

Indigestion

Dyspepsia characterized by recurrent upper-abdominal discomfort, early satiety, postprandial fullness, bloating, or nausea. It may result from functional dyspepsia, gastroesophageal reflux, peptic ulcer disease, medications, or other gastrointestinal disorders.

Synonyms:

Indirect Antiglobulin Test

A test that detects free, clinically significant antibodies in a patient's serum or plasma by incubating it with reagent erythrocytes. It is used for antibody screening, compatibility testing, and prenatal red-cell antibody evaluation.

Synonyms:

Indirect Calorimetry

Measurement of oxygen consumption and carbon-dioxide production to estimate resting energy expenditure. It is the preferred method for determining energy needs when prediction equations are unreliable, particularly in critically ill or metabolically complex patients.

Synonyms:

Indirect Veneer

Ceramic restoration fabricated in lab. Porcelain or composite. Aesthetic enhancement.

Synonyms:

Indium-111

SPECT radionuclide, half-life 2.8 days. Used in WBC labeling, octreotide scanning. Emits gamma rays at 171 and 245 keV.

Synonyms:

Indium-111 Scan

Nuclear medicine imaging using In-111. Used for WBC labeling, octreotide scanning.

Synonyms:

Indoor Allergens

Substances inside buildings that can trigger allergic or asthma symptoms, including dust mites, mold, cockroach particles, and animal dander. Exposure may cause rhinitis, conjunctivitis, wheezing, or eczema. Reduction of exposure and appropriate allergy or asthma treatment depend on the identified trigger.

Synonyms:

Induced Sputum Analysis

A method of assessing airway inflammation by ex-

aming sputum produced after inhaled saline stimulation. The types and proportions of inflammatory cells may support assessment of asthma, infection, COPD, or bronchiectasis.

Synonyms:

Induction of Labor

The artificial initiation of uterine contractions before the onset of spontaneous labor.

Synonyms:

Induction Therapy

Intensive initial treatment aimed at achieving remission, especially in acute leukemias.

Synonyms:

Infant Botulism

A neuromuscular illness caused by intestinal colonization with *Clostridium botulinum* and production of botulinum neurotoxin in infants. It causes constipation, poor feeding, weak cry, hypotonia, facial weakness, and descending paralysis.

Synonyms:

Infant Feeding

Provision of breast milk, appropriately prepared formula, or both to meet an infant's energy, protein, fluid, and micronutrient requirements. Feeding recommendations depend on age, growth, medical conditions, developmental readiness, and safe preparation practices.

Synonyms:

Infant harlequin syndrome

A transient, benign cutaneous vascular phenomenon in neonates characterized by asymmetric flushing of one half of the body with sharp midline demarcation, caused by transient asymmetric sympathetic tone. The affected side is red and warm while the contralateral side is pale.

Synonyms:

Infant Sleep Position

Placing an infant on the back for every sleep is recommended to reduce the risk of sleep-related

death. Infants should sleep on a firm, separate surface without pillows, loose bedding, bumpers, or stuffed toys.

Synonyms:

Infanticide

The killing of a child, in law typically defined as the killing of a newborn or infant (usually within the first year, or specifically within 24 hours of birth in some jurisdictions) by its mother while mentally disturbed by the effects of childbirth or lactation.

Synonyms:

Infantile Colic

A behavioral syndrome in healthy infants characterized by episodes of excessive, inconsolable crying for >3 hours per day, >3 days per week, for >3 weeks (Wessel criteria). Onset typically at 2-3 weeks, peaks at 6-8 weeks, and resolves by 3-4 months of age.

Synonyms:

Infantile hepatic hemangiomas

Benign vascular tumors of the liver occurring in infants, typically presenting within the first six months of life with hepatomegaly, high-output cardiac failure, consumptive hypothyroidism, or cutaneous hemangiomas. Large tumors may cause abdominal compartment syndrome and thrombocytopenia from Kasabach-Merritt phenomenon.

Synonyms:

Infarction

Tissue death from prolonged ischemia. Examples: myocardial infarction, cerebral infarction.

Synonyms:

Infection

Measures to prevent healthcare-associated infections: hand hygiene, personal protective equipment (PPE), isolation precautions (contact, droplet, airborne), sterilization, disinfection. See infection control.

Synonyms:

Infection (Geriatric)

Infectious diseases in elderly often present atypically: fever may be absent, confusion may be sole symptom. Common infections: UTI, pneumonia, skin/soft tissue, bloodstream. Prevention: vaccination, hand hygiene, aspiration precautions. Treatment: earlier presentation, broader differential, drug interactions, renal dosing.

Synonyms: Geriatric

Infection Control

Measures to prevent healthcare-associated infections: hand hygiene, personal protective equipment (PPE), isolation precautions (contact, droplet, airborne), sterilization, disinfection. Multidrug-resistant organisms: MRSA, VRE, *C. difficile*, carbapenem-resistant Enterobacteriaceae.

Synonyms:

Infection Imaging

WBC scanning, gallium scanning, FDG PET. Detection of occult infection.

Synonyms:

Infection Prevention

Measures that reduce the risk of infection, including hand hygiene, personal protective equipment, environmental cleaning, sterilization, disinfection, vaccination, and appropriate isolation precautions.

Synonyms:

Infections in Pregnancy

Listeriosis: *Listeria monocytogenes* (deli meats, soft cheese), meningoenitis, fetal loss, neonatal sepsis. Ampicillin + gentamicin. GBS: vaginal colonization 20-30 percent of pregnant women; universal screening at 35-37 weeks; intrapartum prophylaxis (penicillin G) for GBS-positive women to prevent early-onset neonatal disease.

Synonyms:

Infectious Arthritis

Inflammation of a joint caused by infection, usually bacterial and sometimes viral or fungal. Acute pain, swelling, warmth, fever, and restricted movement

require urgent evaluation because joint damage can develop quickly.

Synonyms:

Infectious Disease

Disease caused by pathogen. Examples: bacterial, viral, fungal, parasitic.

Synonyms:

Infectious Dose

The number of viable organisms required to establish infection in a host under specified conditions. The dose depends on the pathogen, route of exposure, host defenses, and organism viability.

Synonyms:

Infectious Esophagitis

Inflammation of the esophagus caused by an infectious organism, most often *Candida*, herpes simplex virus, or cytomegalovirus in immunocompromised patients. It commonly causes painful swallowing, difficulty swallowing, and retrosternal pain.

Synonyms:

Infectious Meningitis

Infection and inflammation of the membranes surrounding the brain and spinal cord. Bacterial meningitis is a medical emergency; headache, fever, neck stiffness, vomiting, confusion, or a new rash requires immediate medical attention.

Synonyms:

Infectious Myringitis

Inflammation and infection of the tympanic membrane, often associated with viral or bacterial respiratory infection. It can cause severe ear pain, fever, hearing reduction, and small fluid-filled blisters on the eardrum.

Synonyms:

Infective Endocarditis

Infection of the endocardial surface of the heart, most commonly affecting the heart valves. It is diagnosed using the Duke criteria, which include major criteria (positive blood cultures, echocardi-

graphic evidence of vegetations) and minor criteria (predisposing heart condition, fever, vascular phenomena, immunologic phenomena).

Synonyms:

Inferior

Positioned lower or closer to the feet.

Synonyms:

Inferior Alveolar Nerve Block

A regional anesthetic injection near the mandibular foramen to anesthetize the inferior alveolar nerve before it enters the mandibular canal. It usually anesthetizes mandibular teeth on that side; the lingual nerve is often anesthetized incidentally.

Synonyms:

Inferior hemifield loss

Loss of vision in the lower half of the visual field in one or both eyes, which localises to lesions of the superior retina or superior optic radiations passing through the parietal lobe. Causes include superior retinal detachment, branch retinal artery occlusion, and parietal lobe stroke.

Synonyms:

Inferior Mesenteric Artery

Third major abdominal aortic branch at L3, the hindgut artery. Supplies distal transverse colon through rectum. Branches: left colic, sigmoid, superior rectal. The marginal artery of Drummond provides SMA-IMA collateral circulation. Occlusion may cause ischemic colitis at the splenic flexure watershed (Griffiths' point).

Synonyms:

Inferior Vena Cava

Body's largest vein, formed by common iliac vein union at L5, returning lower body deoxygenated blood to the right atrium. Ascends right of the aorta, pierces the diaphragm at T8, enters the pericardium. Receives hepatic, renal, gonadal, and lumbar veins. IVC thrombosis/compression causes bilateral lower extremity edema and DVT.

Synonyms:

Infertility

Failure to achieve pregnancy after a period of regular unprotected intercourse, or reduced ability to conceive or carry a pregnancy. Causes may involve ovulation, reproductive anatomy, sperm, age-related fertility, medical conditions, or unexplained factors.

Synonyms:

Infiltrate

Patchy lung opacity detected on imaging. Non-specific, may represent infection, edema, hemorrhage, inflammation.

Synonyms:

Inflammaging

Persistent, low-grade, age-associated inflammatory activity linked to cellular senescence, immune dysregulation, chronic infection, tissue injury, and comorbidity. It contributes to frailty, atherosclerosis, sarcopenia, and neurodegenerative disease.

Synonyms:

Inflammasomes

Multiprotein complexes activating caspase-1 -> cleavage of pro-IL-1beta/pro-IL-18 -> mature IL-1beta/IL-18 + pyroptosis (gasdermin D pores). Canonical: NLRP3 (crystals, ATP, K⁺ efflux, ROS, lysosomal rupture), NLRC4 (flagellin, T3SS), AIM2 (cytosolic DNA), Pyrin (RhoA inactivation).

Synonyms:

Inflammation

The body's protective response to injury or infection. Cardinal signs: redness (rubor), heat (calor), swelling (tumor), pain (dolor), loss of function (functio laesa). Mediators: histamine, prostaglandins, cytokines, complement. Acute: neutrophil-predominant. Chronic: lymphocyte/macrophage-predominant.

Synonyms:

Inflammation (Dietary)

Chronic low-grade inflammation linked to diet. Western diet pro-inflammatory (saturated fat, sugar, refined grains). Mediterranean diet anti-

inflammatory.

Synonyms: Dietary

Inflammation Imaging

FDG PET sensitive for inflammatory processes. Differentiate infection from malignancy challenging.

Synonyms:

Inflammatory Back Pain

A pattern of chronic back pain characterized by insidious onset, improvement with exercise, lack of improvement with rest, nocturnal pain, and prolonged morning stiffness. It suggests axial spondyloarthritis but is not diagnostic without supportive clinical, laboratory, and imaging findings.

Synonyms:

Inflammatory Bowel Disease

Chronic relapsing inflammatory conditions of the gastrointestinal tract encompassing Crohn disease and ulcerative colitis, resulting from a dysregulated immune response in genetically susceptible individuals triggered by environmental factors and alterations in the gut microbiome.

Synonyms:

Inflammatory Bowel Disease Diet

Crohn disease, ulcerative colitis. Nutritional support during flares. Exclusive enteral nutrition for Crohn induction. Individual triggers vary.

Synonyms:

Inflammatory Myopathies

A group of autoimmune disorders characterized by chronic muscle inflammation and progressive proximal muscle weakness. The three main types are dermatomyositis, polymyositis, and inclusion body myositis.

Synonyms:

Influenza

A contagious respiratory illness caused by influenza A or B viruses, characterized by sudden onset of fever, myalgia, headache, malaise, nonproductive cough, sore throat, and nasal congestion. Seasonal

epidemics occur annually. Complications: pneumonia (primary viral or secondary bacterial), exacerbation of underlying conditions.

Synonyms:

Influenza Test

A test for influenza A or B using a respiratory specimen. Rapid antigen tests provide quick results but may miss infection. Molecular tests are generally more sensitive and may identify or subtype influenza viruses; results must be interpreted with symptoms, timing, and local laboratory methods.

Synonyms:

Influenza Vaccination in Pregnancy

Annual inactivated influenza vaccine recommended for all pregnant women. Pregnancy increases the risk of severe influenza (pneumonia, ICU admission, death) due to changes in immune function and cardiopulmonary physiology.

Synonyms:

Influenza Vaccine

Inactivated influenza vaccine given annually starting at 6 months of age. Two doses needed in the first season for children under 9. Live attenuated nasal spray vaccine (FluMist) available for children over 2. Updated annually to match circulating strains. Reduces influenza complications, hospitalizations, and deaths.

Synonyms:

Influenza virus

A segmented, negative-sense RNA virus belonging to the Orthomyxoviridae family. Influenza causes seasonal epidemics and occasional pandemics of respiratory illness. The virus has two surface glycoproteins: hemagglutinin (HA), which mediates attachment, and neuraminidase (NA), which facilitates release.

Synonyms:

Informed Consent

Autonomous voluntary authorization given by a competent patient to undergo a specific medical

intervention, procedure, or clinical trial.

Synonyms:

Informed Consent (Geriatric)

Process of obtaining voluntary authorization from elderly patient with decision-making capacity. Capacity assessment: understanding, appreciation, reasoning, communication of choice. Impaired capacity may require surrogate decision-maker.

Synonyms: Geriatric

Infusion Pump

Device controlling IV fluid delivery rate. Types: syringe pump, volumetric pump, elastomer. Precision: mL/hour. Alarms: occlusion, air embolism, completion.

Synonyms:

Ingestion

The act of taking a substance into the digestive tract by swallowing. Ingestion of a toxic substance can cause poisoning.

Synonyms:

Ingrown Toenail

Ingrown toenail (onychocryptosis) occurs when the nail edge grows into the surrounding skin, causing pain, redness, and swelling. It is common in adolescents and adults, exacerbated by improper nail trimming, tight shoes, and trauma. Treatment includes partial nail avulsion with matrixectomy (phenol application) for recurrent cases.

Synonyms:

Inguinal Canal

An oblique passage (4 cm) through the anterior abdominal wall, from the deep (internal) inguinal ring to the superficial (external) inguinal ring, transmitting the spermatic cord in males and round ligament in females, plus ilioinguinal and genital branch of genitofemoral nerves.

Synonyms:

Inguinal Hernia

Protrusion of abdominal contents through the in-

guinal canal. Indirect (lateral to inferior epigastric vessels, through deep inguinal ring): congenital, patent processus vaginalis; most common overall (60-70%), male predominance.

Synonyms:

Inguinal Region

Area at the thigh-trunk junction traversed by the inguinal ligament (ASIS to pubic tubercle). Clinically significant for inguinal hernias: indirect (through deep inguinal ring, most common) and direct (through Hesselbach's triangle).

Synonyms:

Inhalation Injury

Thermal or chemical injury to the airway or lungs caused by smoke, heated gases, or toxic combustion products. It can produce upper-airway edema, bronchospasm, impaired mucociliary clearance, and carbon-monoxide or cyanide toxicity and may worsen after the initial burn.

Synonyms:

Inhalational Anesthesia

Anesthetic maintenance or induction using volatile liquids or gases delivered through the respiratory tract. Depth is influenced by inspired concentration, alveolar ventilation, uptake, distribution, and the agent's blood-gas solubility.

Synonyms:

Inhaled Corticosteroids

Anti-inflammatory medications delivered directly to the airways, reducing airway inflammation, mucus production, and bronchial hyperresponsiveness. Examples include fluticasone, budesonide, beclomethasone, and mometasone. They are the cornerstone of asthma maintenance therapy. Side effects include oral candidiasis and dysphonia.

Synonyms:

Inhaled Nitric Oxide

A selective pulmonary vasodilator used in acute settings (acute respiratory failure, right heart failure, post-cardiac surgery). It reduces pulmonary

vascular resistance and improves oxygenation by dilating well-ventilated pulmonary vessels (improving V/Q matching). It has a short half-life and requires continuous delivery.

Synonyms:

Inhaler

Device for administering aerosolized medication. Types: MDI (metered-dose), DPI (dry powder).

Synonyms:

Iniiencephaly

A rare, usually lethal neural-tube defect characterized by occipital bone defect, severe retroflexion of the head, and marked shortening or distortion of the cervical and thoracic spine. It is often identified prenatally and may occur with other congenital anomalies.

Synonyms:

Injury Classification (Abrasion, Laceration, Contusion, Incised Wounds)

Forensic categorization of mechanical wounds. Abrasion: superficial friction injury affecting only the epidermis (e.g., scrape, graze, pattern abrasion).

Synonyms: Abrasion, Laceration, Contusion, Incised Wounds

Injury Dating

Estimation of the age of an injury using clinical appearance, histopathology, imaging, and the history of symptoms. Exact dating is often uncertain, particularly for bruises and soft-tissue injuries, and findings should be reported with appropriate limitations.

Synonyms:

Innate immune evasion

Mechanisms by which pathogens evade the innate immune system. Strategies include capsules that prevent phagocytosis, biofilms that protect against immune cells, and intracellular survival within macrophages. Some bacteria produce enzymes that degrade complement components. Others modify their surface molecules to avoid recognition.

Synonyms:

Innate Immunity

First line of defense against pathogens, present from birth. Rapid (minutes to hours), germline-encoded, lacks immunological memory.

Synonyms:

Innate Lymphoid Cells

ILCs: lymphoid lineage, no rearranged antigen receptors, mirror Th subsets. ILC1 (T-bet, IFN-gamma): intracellular pathogens, IBD. ILC2 (GATA3, IL-5/13): helminths, allergy, asthma, tissue repair. ILC3 (ROR-gammat, IL-17/22): extracellular bacteria/fungi, lymphoid organogenesis.

Synonyms:

Inner ear

The deepest part of the ear, consisting of the cochlea and the labyrinth.

Synonyms:

Inoculation

The introduction of microorganisms or clinical material into a culture medium, host, or sterile site to initiate growth, infection, or immune response.

Synonyms:

Inotrope

A drug that increases myocardial contractility (positive inotropy), used for cardiogenic shock, decompensated heart failure, and perioperative low-output states. Agents: dobutamine (beta-1 agonist), milrinone (PDE3 inhibitor), dopamine, epinephrine, norepinephrine (also vasopressors), and digoxin (chronic).

Synonyms:

Inotropes in Anesthesia

Inotropes increase myocardial contractility. Dobutamine is a beta-1 and beta-2 agonist increasing cardiac output with minimal effect on heart rate. Dose: 2 to 20 mcg/kg/min infusion. Milrinone is a phosphodiesterase-3 inhibitor increasing contractility and causing vasodilation.

Synonyms:

Inpatient Rehabilitation

Intensive inpatient rehabilitation (3+ hours therapy/day) for acute conditions: stroke, spinal cord injury, traumatic brain injury, major trauma. See acute rehabilitation.

Synonyms:

INR

International normalized ratio: a standardized measure of the prothrombin time (PT), calculated as $(\text{patient PT}/\text{mean normal PT})^{\text{ISI}}$, to ensure consistent monitoring of vitamin K antagonist (warfarin) therapy across laboratories. Target INR: 2-3 for most indications (AF, VTE); 2.5-3.5 for mechanical heart valves.

Synonyms:

Insect bite

A cutaneous reaction resulting from the injection of salivary contents from an insect during feeding, causing a localized or systemic hypersensitivity response. Common presentations include a pruritic papule or wheal with surrounding erythema. Severe reactions may include anaphylaxis, particularly with Hymenoptera stings.

Synonyms:

Insect Sting Allergies

Immune reactions to venom from insects such as bees, wasps, hornets, and fire ants. Reactions may be local or systemic; generalized hives, breathing difficulty, dizziness, vomiting, or throat swelling may indicate anaphylaxis and require emergency treatment.

Synonyms:

Insomnia

A sleep disorder characterized by difficulty falling asleep, staying asleep, or waking too early despite adequate opportunity for sleep, with resulting daytime impairment. It may be acute or chronic and is often triggered by stress, anxiety, depression, or poor sleep habits.

Synonyms:

Insomnia Disorder

Difficulty initiating or maintaining sleep, or early-morning awakening with inability to return to sleep, at least three nights per week for at least three months. The individual experiences clinically significant distress or impairment in functioning.

Synonyms:

Inspection

The first step of the physical examination, involving systematic visual observation of the patient's overall appearance, posture, body habitus, gait, skin color, nutritional status, respiratory effort, and specific anatomical regions. Requires adequate lighting and proper patient exposure.

Synonyms:

Inspiratory Crackles

Fine, discontinuous sounds heard during inspiration, caused by the sudden opening of collapsed airways. They are a hallmark of interstitial lung disease (bibasilar, Velcro-like crackles) and pulmonary fibrosis. They are also heard in pneumonia, atelectasis, and heart failure.

Synonyms:

Instrument Sterilization

A validated process that destroys all forms of microbial life, including bacterial spores, on or within a medical instrument. Common methods include steam under pressure, ethylene oxide, hydrogen-peroxide plasma, and dry heat, selected according to device material and design.

Synonyms:

Instrumental Activities of Daily Living

More complex activities required for independent community living, including medication management, shopping, cooking, finances, communication, transportation, and household tasks.

Synonyms:

Instrumental ADL

A complex activity needed for independent community living, such as shopping, cooking, managing medicines or finances, and using transportation.

Synonyms:

Insufficient Cervix

Painless cervical shortening and dilation during the second trimester, also called cervical insufficiency. It can cause recurrent mid-trimester pregnancy loss or spontaneous preterm birth without regular uterine contractions.

Synonyms: cervical insufficiency.

Insulin Aspart

A rapid-acting insulin analog (modified amino acid sequence) with onset 10-20 minutes, peak 1-3 hours, duration 3-5 hours. Used to cover prandial glucose (injected at or just after meals) in type 1 and type 2 diabetes; also used in continuous subcutaneous insulin infusion (pump) and IV in acute settings.

Synonyms:

Insulin Autoantibodies

Autoantibodies directed against insulin or other pancreatic beta-cell antigens, including GAD, IA-2, and ZnT8 antibodies. Their presence supports autoimmune type 1 diabetes but a negative panel does not exclude it.

Synonyms:

Insulin Glargine

A long-acting basal insulin analog with a flat, peakless profile providing near-24-hour coverage, administered once daily (or twice in some patients). Formed by modification of human insulin producing slow, steady absorption from the injection depot. Used for type 1 and type 2 diabetes (basal component).

Synonyms:

Insulin Injection Technique

Insulin is injected into subcutaneous tissue using the prescribed device, dose, and site. Common sites include the abdomen, thighs, buttocks, and upper

arms; rotating sites helps reduce lipohypertrophy and variable absorption. Technique should be individualized to the person and device.

Synonyms:

Insulin lipohypertrophy

Thickened fatty tissue at repeated insulin-injection sites. Injecting into these areas can make insulin absorption unpredictable.

Synonyms:

Insulin Pen Devices

Pre-filled or reusable insulin pen devices providing convenient and accurate insulin delivery. Benefits include portability precision dosing discrete injection and reduced needle phobia.

Synonyms:

Insulin Preparations

Hormone synthesized by pancreatic beta cells that regulates glucose homeostasis by promoting glucose uptake in skeletal muscle and adipose tissue, suppressing hepatic glucose production, and inhibiting lipolysis.

Synonyms:

Insulin Pump Therapy

Continuous subcutaneous insulin infusion delivering rapid-acting insulin analog through a catheter placed subcutaneously typically in the abdomen. Provides basal insulin at programmed rates and bolus doses at mealtimes.

Synonyms:

Insulin Resistance

Diminished biological response to physiological insulin concentrations resulting in impaired glucose disposal in peripheral tissues and failure to suppress hepatic glucose production. Pathophysiological hallmark of type two diabetes and metabolic syndrome.

Synonyms:

Insulin Resistance Syndromes

Rare inherited severe insulin resistance syndromes include Donohue syndrome also known as leprechaun-

nism, Rabson-Mendenhall syndrome, and type A insulin resistance syndrome caused by mutations in the insulin receptor gene. Donohue syndrome is the most severe with death in infancy.

Synonyms:

Insulin Secretion

Release of insulin from pancreatic beta cells in response primarily to increased plasma glucose, with amplification by incretin hormones and nutrients. Insulin promotes glucose uptake, glycogen synthesis, lipogenesis, and protein synthesis while suppressing hepatic glucose production.

Synonyms:

Insulin Signaling

The cellular process initiated when insulin binds its receptor and activates pathways that regulate glucose uptake, glycogen formation, protein synthesis, and fat metabolism.

Synonyms:

Insulin-induced lipohypertrophy

A common complication of subcutaneous insulin therapy characterized by localized accumulation of adipose tissue at injection sites, caused by the lipogenic effect of insulin on subcutaneous fat. It presents as firm, rubbery, non-tender subcutaneous nodules that can cause unpredictable insulin absorption and glycemic variability.

Synonyms:

Insulin-like Growth Factor

IGF-1 promotes growth. Produced in liver in response to GH.

Synonyms:

Insulinoma

A usually small pancreatic neuroendocrine tumour that secretes insulin inappropriately. It causes episodes of fasting or exertional hypoglycaemia with autonomic and neuroglycopenic symptoms that improve when blood glucose is raised.

Synonyms:

Integrative Rehabilitation

Combination of conventional and complementary therapies: acupuncture, massage, yoga, meditation.

Synonyms:

Integrans

Genetic elements that capture and express gene cassettes through site-specific recombination. Integrans contain an integrase gene and a recombination site for gene cassette insertion. They are important vehicles for the spread of antibiotic resistance genes, particularly in gram-negative bacteria.

Synonyms:

Integumentary System

The body system comprising the skin and its appendages: hair, nails, sweat glands, and sebaceous glands. It forms a protective barrier, limits fluid loss, contributes to thermoregulation and sensation, supports immune defence, and participates in vitamin D synthesis.

Synonyms:

Intellectual Disability

Neurodevelopmental disorder with onset in the developmental period, characterised by deficits in intellectual and adaptive functioning across conceptual, social, and practical domains. DSM-5 grades severity by adaptive functioning: mild, moderate, severe, profound.

Synonyms:

Intensity-Modulated Radiation Therapy

A computer-optimized form of three-dimensional radiation therapy that shapes and modulates the radiation dose to conform tightly to the target while sparing adjacent normal tissue.

Synonyms:

Intensive Care Medicine

Specialty managing critically ill patients. Components: monitoring, ventilatory support, hemodynamic support, infection control, nutrition, sedation, pain management. Common conditions: sepsis, ARDS, traumatic brain injury, post-cardiac arrest,

multiorgan failure.

Synonyms:

Intensive Care Rehabilitation

Early rehabilitation in ICU setting. Early mobilization, positioning, passive range of motion. Improves outcomes, reduces complications.

Synonyms:

Intensive Care Unit

A specialist hospital unit providing continuous monitoring and life support for critically ill patients. In obstetrics, women may require ICU admission for: severe pre-eclampsia or eclampsia, massive postpartum hemorrhage, amniotic fluid embolism, sepsis, cardiac disease in pregnancy, or complications of anesthesia.

Synonyms:

Interatrial Septum

The wall separating the right and left atria. It contains the fossa ovalis, a remnant of the foramen ovale from fetal circulation. The interatrial septum has a thinner area where transseptal puncture can be performed during cardiac catheterization.

Synonyms:

Intercostal Retraction

Inward movement of the skin and soft tissues between the ribs during inspiration, indicating increased work of breathing. It is common in infants and children with respiratory distress and may accompany airway obstruction, bronchiolitis, pneumonia, asthma, or other pulmonary disease.

Synonyms:

Interdental Brush

Small brush for cleaning between teeth. Used where spaces exist.

Synonyms:

Interference

A factor that alters the accuracy or interpretation of a laboratory test, measurement, or drug effect.

Synonyms:

Interferon Signaling

Type I IFN (IFN-alpha/beta): all nucleated cells produce; receptor IFNAR (ubiquitous); JAK1/TYK2 -> STAT1/2/IRF9 (ISGF3) -> ISGs (hundreds: antiviral, antiproliferative, immunomodulatory). Type II IFN (IFN-gamma): T/NK cells; receptor IFNGR; JAK1/JAK2 -> STAT1 -> GAS elements. Type III IFN (IFN-lambda): mucosal epithelium; receptor IFNLR.

Synonyms:

Interferon-Gamma Release Assay

Blood tests measuring IFN-gamma release in response to M. tuberculosis antigens (ESAT-6, CFP-10). More specific than PPD and unaffected by BCG. Cannot distinguish latent from active TB.

Synonyms:

Interferonopathies

A group of rare disorders caused by abnormal activation of type I interferon pathways. They can produce inflammation, neurologic disease, skin lesions, blood-vessel injury, or lung disease, often beginning in childhood.

Synonyms:

Interleukin

A family of cytokines (interleukins) produced mainly by leukocytes that regulate immune cell growth, differentiation, activation, and communication. Examples: IL-1 and IL-6 (inflammation, fever), IL-2 (T-cell growth), IL-4/IL-13 (Th2, IgE), IL-5 (eosinophils), IL-10 (anti-inflammatory), IL-12 (Th1), IL-17 (Th17, autoimmunity), IL-23.

Synonyms:

Interleukin-6

A cytokine involved in immune regulation and inflammation that stimulates production of acute-phase proteins by the liver.

Synonyms:

Intermediate Cuneiform

Smallest cuneiform, centrally located between medial and lateral cuneiforms. Articulates with

navicular, medial/lateral cuneiforms, and second metatarsal. Forms the transverse arch apex. Relatively fixed, contributing to midfoot stability. Injuries are typically associated with high-energy midfoot trauma.

Synonyms:

Intermediate Uveitis

Inflammation primarily affecting the vitreous body, peripheral retina, and ciliary body, with the classic presentation being pars planitis, which is characterized by the presence of snowbanking (a white, inflammatory exudate on the inferior pars plana) and snowballs (vitreous inflammatory aggregates).

Synonyms:

Intermittent Auscultation

Periodic assessment of the fetal heart rate with a fetoscope or Doppler device during labor rather than continuous electronic monitoring. The frequency of assessment depends on the stage of labor, risk factors, and local clinical protocol.

Synonyms:

Intermittent Claudication

Reproducible muscle discomfort, usually in the calf, thigh, or buttock, induced by walking and relieved by rest, caused by exertional arterial insufficiency. It is distinguished from rest pain and nonvascular musculoskeletal pain by history and vascular testing.

Synonyms:

Intermittent Explosive Disorder

A disorder characterized by recurrent, impulsive, problematic outbursts of verbal or physical aggression that are grossly disproportionate to the provocation. The outbursts are not premeditated and cause marked distress or functional impairment. Age >6 years.

Synonyms:

Intermittent Fasting

Cycling between fasting and eating periods. Methods: alternate-day fasting, 5:2 diet, time-restricted eating. Potential benefits: weight loss, metabolic

health. Evidence emerging.

Synonyms:

Internal Hernia

Herniation of bowel through a mesenteric defect common after Roux-en-Y gastric bypass creating a defect at the jejunojejunostomy. May cause intermittent or acute small bowel obstruction. Presents with episodic abdominal pain, nausea, and vomiting.

Synonyms:

Internal Iliac Artery

Smaller common iliac terminal branch (hypogastric), supplying the pelvis, perineum, gluteal region, and medial thigh. Posterior division: iliolumbar, lateral sacral, superior gluteal. Anterior division: inferior gluteal, internal pudendal, obturator, vesical, uterine, vaginal, middle rectal arteries.

Synonyms:

Internal Jugular Vein

Descends in the carotid sheath with the internal carotid artery and vagus nerve, draining brain, face, and neck. Begins at the jugular foramen as a sigmoid sinus continuation, joining the subclavian vein to form the brachiocephalic vein. Contains backflow-preventing valves. Used for central venous catheterization.

Synonyms:

Internal Oblique Muscle

Middle flat abdominal layer deep to external oblique, from thoracolumbar fascia, iliac crest, and lateral inguinal ligament to lower ribs, linea alba, and pubic crest. Innervated by T7-T12 and L1. Ipsilateral rotation (opposite of external oblique). Contributes to inguinal canal and abdominal wall integrity.

Synonyms:

Internal Podalic Version

A maneuver where the operator inserts a hand into the uterus, grasps one or both fetal feet, and converts a transverse lie or cephalic presentation to a breech, then delivers by total breech extraction. Indication: delivery of the second twin (transverse

lie) or severe fetal distress in the second stage. Rare in modern obstetrics.

Synonyms:

Internal Resorption

Loss of dentin from pulp cavity inward. Pink spot may be visible. Treatment: root canal therapy.

Synonyms:

Internuclear Ophthalmoplegia

A conjugate horizontal gaze disorder caused by a lesion of the medial longitudinal fasciculus (MLF), a heavily myelinated fiber tract that connects the abducens nucleus (CN VI) on one side to the oculomotor nucleus (CN III) on the contralateral side, coordinating horizontal gaze.

Synonyms:

Interpersonal Psychotherapy

A time-limited, evidence-based psychotherapy for depression that focuses on the interpersonal context of mood symptoms. It identifies four problem areas: grief, role disputes, role transitions, and interpersonal deficits. IPT helps patients improve interpersonal functioning and social support.

Synonyms:

Interpreter

A trained person who translates spoken or signed communication between a patient and healthcare professional.

Synonyms:

Interproximal Caries

Dental caries occurring on the contact surfaces between adjacent teeth. It may be difficult to detect clinically and is commonly assessed with bitewing radiographs when imaging is indicated.

Synonyms:

Interstitial (Cornual) Pregnancy

An ectopic pregnancy implanted in the part of the fallopian tube that passes through the muscular wall of the uterus. It can enlarge before rupture and cause severe internal bleeding.

Synonyms: Cornual

Interstitial Cystitis

Chronic bladder pain syndrome. Symptoms: suprapubic pain, frequency, urgency. Diagnosis: exclusion, cystoscopy with hydrodistension. Treatment: lifestyle modification, medications, bladder instillations, surgery.

Synonyms:

Interstitial Keratitis

Inflammation of the corneal stroma without primary involvement of the corneal surface. It may follow infection, autoimmune disease, or trauma and can cause pain, photophobia, redness, and reduced vision.

Synonyms:

Interstitial Lung Disease

A heterogeneous group of disorders with inflammation and fibrosis of lung parenchyma, causing restrictive physiology (reduced FVC and TLC with normal or elevated FEV1/FVC ratio).

Synonyms:

Interstitial Nephritis

Inflammation of the renal interstitium and tubules, which can be acute or chronic. Acute interstitial nephritis is most commonly caused by medications, particularly NSAIDs, antibiotics including penicillins and cephalosporins, and proton pump inhibitors.

Synonyms:

Interstitial Pneumonia

Inflammation centered on the interstitium. Caused by Mycoplasma, Chlamydia, Legionella, and viruses. Presents with dry cough and diffuse crackles.

Synonyms:

Intertrigo

An inflammatory rash of opposing skin surfaces (skin folds) caused by friction, moisture, heat, and lack of air circulation. Affects intertriginous areas:

axillae, inframammary, inguinal, abdominal folds, and intergluteal cleft. Presents with erythema, maceration, fissuring, and erosions.

Synonyms:

Interventional Procedures

Image-guided treatments: angioplasty, stenting, embolization, ablation, biopsy, drain placement. Advantages: minimally invasive, faster recovery, lower complication rates.

Synonyms:

Interventional Radiologist

A physician trained to perform minimally invasive diagnostic and therapeutic procedures using medical imaging for guidance.

Synonyms:

Interventional Radiology

Image-guided minimally invasive procedures. Examples: angioplasty, stenting, embolization, biopsy, ablation, drain placement. Reduces need for open surgery.

Synonyms:

Interventricular Septum

The thick muscular wall separating the left and right ventricles. It has two portions: the muscular (inferior, thicker) and membranous (superior, thinner) portions. The septum contains parts of the cardiac conduction system, including the bundle of His.

Synonyms:

Intervertebral Disc

A fibrocartilaginous cushion between adjacent vertebral bodies, composed of a gelatinous nucleus pulposus surrounded by a tough annulus fibrosus. It absorbs shock and permits limited movement of the vertebral column.

Synonyms:

Intestinal Atresia

A congenital obstruction of the small intestine (jejunum or ileum) caused by an intrauterine vascular accident (mesenteric ischemia) leading to aseptic

necrosis and resorption of a segment of bowel. In contrast to duodenal atresia, it is not associated with Down syndrome.

Synonyms:

Intestinal Ganglioneuromatosis

Benign proliferation of ganglion cells and nerve fibers in the gastrointestinal tract wall. May be diffuse involving the entire gastrointestinal tract or localized as ganglioneuromas. Associated with multiple endocrine neoplasia type 2B where intestinal ganglioneuromatosis may precede the development of medullary thyroid carcinoma.

Synonyms:

Intestinal lipomatosis

Benign overgrowth of adipose tissue within the intestinal wall, most commonly affecting the ileum and colon. Often asymptomatic and discovered incidentally, but large lipomas can cause intussusception, gastrointestinal bleeding, or bowel obstruction.

Synonyms:

Intestinal Lymphoma

Malignant proliferation of lymphoid cells arising in the small or large intestine. Important types include enteropathy-associated T-cell lymphoma, monomorphic epitheliotropic intestinal T-cell lymphoma, and diffuse large B-cell lymphoma.

Synonyms:

Intestinal Malrotation

Congenital failure of normal midgut rotation and fixation, predisposing to a narrow mesenteric base, volvulus, and duodenal obstruction. Infants may present with bilious vomiting, abdominal distension, or bowel ischemia; sudden symptoms require emergency assessment.

Synonyms:

Intestinal Obstruction

A mechanical or functional blockage that prevents normal passage of intestinal contents. Causes include adhesions, hernias, tumors, inflammation, volvulus, and disorders of intestinal motility.

Synonyms:

Intestinal Perforation

Full-thickness breach in the bowel wall allowing luminal contents to enter the peritoneal cavity. Causes include diverticulitis, appendicitis, peptic ulcer disease, and trauma. Presents with acute abdomen, peritonitis, and free air on imaging.

Synonyms:

Intestinal Pseudo-Obstruction

Acute or chronic dilation of the bowel without mechanical obstruction due to neuromuscular dysfunction. Acute colonic pseudo-obstruction also called Ogilvie syndrome occurs in hospitalized or post-surgical patients.

Synonyms: Ogilvie syndrome.

Intimal Hyperplasia

Proliferation and migration of vascular smooth-muscle cells with extracellular-matrix deposition within the intima after vascular injury or graft placement. It can produce restenosis at anastomoses, stents, dialysis access, or bypass grafts.

Synonyms:

Intimate Partner Violence in Pregnancy

Physical, sexual, or psychological abuse by a current or former partner during pregnancy. It can harm the pregnant person and fetus and is associated with complications such as injury, preterm birth, and placental abruption.

Synonyms:

Intoxication

A state of physical or mental impairment caused by recent exposure to a substance, such as alcohol, a medicine, or another drug.

Synonyms:

Intra-Abdominal Abscess

Localized collection of pus within the abdomen commonly in the pelvis, between bowel loops, or beneath the diaphragm. Results from intra-abdominal infection or surgery. Presents with fever, abdominal pain,

and leukocytosis. Diagnosed by CT with contrast showing rim-enhancing fluid collection.

Synonyms:

Intra-Abdominal Hypertension

Sustained elevation of intra-abdominal pressure above twelve millimeters of mercury measured through the urinary bladder. Graded as grade one twelve to fifteen, grade two sixteen to twenty, grade three twenty-one to twenty-five, and grade four greater than twenty-five millimeters of mercury.

Synonyms:

Intra-aortic Balloon Pump

Mechanical circulatory support. Inflatable catheter in descending aorta. Inflates during diastole (increases coronary perfusion), deflates during systole (reduces afterload). Indications: cardiogenic shock, unstable angina, high-risk PCI. Complications: limb ischemia, bleeding, infection.

Synonyms:

Intraabdominal cancer

A broad term for malignancies arising within the abdominal cavity, including cancers of the colon, stomach, pancreas, liver, ovaries, and peritoneum. Presentation varies widely depending on the specific organ involved.

Synonyms:

Intraabdominal hernia

Herniation of abdominal viscera through a congenital or acquired defect or abnormal mesenteric aperture within the peritoneal cavity, distinct from ventral or inguinal hernias. Types include paraduodenal, foramen of Winslow, transmesocolic, and transomental hernias.

Synonyms:

Intracellular Fluid

The fluid contained within cells, comprising approximately two thirds of total body water in a typical adult. Its major solutes include potassium, magnesium, phosphate, and intracellular proteins, and its composition is maintained by selective membrane

transport.

Synonyms:

Intracellular pathogens

Microorganisms that survive and replicate within host cells. Intracellular bacteria include *Mycobacterium*, *Listeria*, and *Chlamydia*. Viruses are obligate intracellular pathogens. Intracellular survival protects pathogens from antibiotics and immune responses.

Synonyms:

Intracerebral Hemorrhage

Bleeding directly into the brain parenchyma, accounting for approximately ten to fifteen percent of all strokes and carrying a high mortality rate of approximately forty percent at thirty days.

Synonyms:

Intracranial Hemorrhage

Bleeding within the cranial cavity. Epidural hematoma: arterial bleeding (middle meningeal artery), typically from temporal bone fracture; lucid interval then rapid deterioration. Subdural hematoma: venous bleeding from bridging veins; acute (<72h), subacute, or chronic (elderly, alcoholics).

Synonyms:

Intracranial Pressure

The pressure within the cranial vault generated by brain tissue, cerebrospinal fluid, and intracranial blood. Sustained elevation can reduce cerebral perfusion and cause headache, vomiting, altered consciousness, pupillary abnormalities, and brain herniation.

Synonyms:

Intraductal Papilloma

A benign papillary tumor arising within a breast duct, often presenting with spontaneous unilateral bloody or clear nipple discharge. It may be solitary near the nipple or multiple in the peripheral breast.

Synonyms:

Intrahepatic Cholestasis of Pregnancy

A pregnancy-associated liver disorder characterized mainly by itching without a primary rash and increased bile acids in the blood. It may increase fetal risk and requires clinical evaluation and monitoring.

Synonyms:

Intramedullary Nail

A metal implant inserted into the medullary canal of a long bone to align and stabilize a fracture. It shares load along the bone axis and is commonly used for femoral and tibial shaft fractures.

Synonyms:

Intramural Hematoma

Collection of blood within the wall of the gastrointestinal tract most commonly the duodenum. Caused by trauma, anticoagulation, or coagulopathy. Presents with abdominal pain, vomiting, and sometimes obstructive symptoms. Diagnosis is by CT showing circumferential wall thickening with high-attenuation hematoma.

Synonyms:

Intramuscular

A route of drug administration in which the drug is injected into skeletal muscle (deltoid, vastus lateralis, gluteus maximus).

Synonyms:

Intraocular Lens

Artificial lens replacing natural lens after cataract extraction. Types: monofocal (distance vision), multifocal/bifocal (near and distance), toric (astigmatism), extended depth of focus. Implantation via small incision, folds for insertion. Complications: posterior capsule opacification, dysphotopsia, infection, retinal detachment.

Synonyms:

Intraocular lens dislocation

Postoperative displacement of an implanted artificial intraocular lens from its intended position within the capsular bag or ciliary sulcus into the vitreous cavity or anterior chamber. It is most com-

monly caused by progressive zonular dehiscence and may require surgical repositioning or exchange.

Synonyms:

Intraocular Pressure

The pressure generated by aqueous humor within the eye, normally maintained by a balance between aqueous production and outflow. Abnormal IOP is an important risk factor for glaucomatous optic neuropathy, but glaucoma can occur at statistically normal pressures.

Synonyms:

Intraocular tumor

Any neoplasm arising within the eye, with uveal melanoma being the most common primary malignancy in adults and retinoblastoma the most common in children. Diagnosis requires dilated fundus examination, ultrasound, and MRI; treatment depends on tumour type, size, and location.

Synonyms:

Intraoperative Blood Transfusion

Intraoperative blood transfusion replaces lost blood volume and maintains oxygen-carrying capacity during major surgery. Indications include hemoglobin less than 7 g/dL in stable patients, less than 8 g/dL in cardiac disease, or active hemorrhage with hemodynamic instability.

Synonyms:

Intraoperative Neuromonitoring

Intraoperative neuromonitoring (IONM) uses electrophysiological techniques to monitor neural pathway integrity during surgery. Somatosensory evoked potentials (SSEP) monitor sensory pathways. Motor evoked potentials (MEP) monitor motor pathways. Electromyography (EMG) monitors cranial nerves and spinal roots.

Synonyms:

Intraoperative Temperature Monitoring

Monitoring body temperature during surgery to detect and manage hypothermia or hyperthermia. Possible sites include the esophagus, nasopharynx, blad-

der, rectum, skin, or a pulmonary artery catheter; accuracy depends on the site, device, perfusion, and clinical setting.

Synonyms:

Intraosseous Access

Placement of a vascular-access needle into the medullary cavity of a suitable bone to permit rapid infusion of fluids, blood products, and medications when intravenous access is delayed or impossible. It is a temporary emergency route and can cause extravasation, infection, or compartment injury.

Synonyms:

Intraosseous Infusion

Administration of fluids, blood products, or medications through an intraosseous access device. Infusion should be monitored for resistance, swelling, pain, and extravasation and replaced with definitive vascular access as soon as practical.

Synonyms:

Intrapartum

The period during labor and childbirth, from the onset of regular uterine contractions leading to cervical dilation until delivery of the baby and placenta.

Synonyms:

Intrapulmonary Shunt

Perfusion of alveoli without ventilation ($V/Q = 0$). Blood passes through the pulmonary circulation without gas exchange, mixing with oxygenated blood and causing hypoxemia. It is seen in ARDS, pneumonia, and atelectasis. It is refractory to supplemental oxygen.

Synonyms:

Intrathecal Chemotherapy

Administration of chemotherapy directly into the cerebrospinal fluid via lumbar puncture or an Ommaya reservoir, used for leptomeningeal metastasis and central nervous system prophylaxis in leukemias and lymphomas.

Synonyms:

Intrathoracic localized obstruction

A focal blockage within the thoracic cavity affecting the airways, esophagus, or great vessels, leading to localized symptoms depending on the structure involved. Causes include endobronchial tumors, foreign bodies, esophageal strictures, or vascular anomalies. Diagnosis is by imaging and endoscopy.

Synonyms:

Intrauterine Device

IUD: a long-acting reversible contraceptive (LARC) device placed in the uterus. Types: copper IUD (ParaGard—hormone-free, up to 10-12 years, also emergency contraception) and levonorgestrel-releasing IUS (Mirena/Skyla—progestin, up to 3-8 years, reduces bleeding).

Synonyms:

Intrauterine Fetal Demise / Stillbirth

Death of a fetus before complete delivery. The gestational-age definition varies by jurisdiction. Causes may include placental disease, umbilical-cord complications, infection, genetic abnormalities, maternal disease, or unexplained factors.

Synonyms:

Intrauterine Growth Restriction

IUGR: a fetus with estimated weight below the 10th percentile (or growth velocity decline), usually with placental insufficiency or maternal/fetal factors.

Synonyms:

Intrauterine Pressure Catheter

A fluid-filled catheter inserted into the uterine cavity alongside the fetus to measure the intensity and frequency of contractions in mm Hg (Montevideo units, MVU).

Synonyms:

Intrauterine Transfusion

Ultrasonically guided intravascular or intraperitoneal transfusion of fetal red blood cells to treat severe fetal anemia, most commonly from Rh isoimmunization. Performed through the umbilical vein using a 22-25 gauge needle. Packed red blood cells,

CMV-negative and crossmatched, are transfused slowly.

Synonyms:

Intravascular Catheter Infections

CLABSI: central line-associated bloodstream infection. Diagnosis: quantitative blood cultures (catheter vs peripheral >5:1), differential time to positivity (>2h), catheter tip culture (>15 CFU). Catheter-related BSIs: coagulase-negative staphylococci (most common), *S. aureus*, enterococci, gram-negatives, *Candida*.

Synonyms:

Intravascular Filter

A device placed in a large vein to trap venous clots and reduce pulmonary embolism risk in selected patients who cannot receive or have not responded adequately to anticoagulation.

Synonyms:

Intravascular lymphoma

A rare aggressive B-cell non-Hodgkin lymphoma characterized by proliferation of neoplastic lymphocytes within the lumina of small blood vessels, predominantly affecting the skin and central nervous system. Presents with livedo reticularis, skin nodules, neurological deficits, and fever of unknown origin.

Synonyms:

Intravascular Ultrasound

Catheter-based imaging using a miniature ultrasound probe inside coronary arteries to visualize vessel wall layers, plaque composition, and stent deployment. Provides more detailed information than angiography alone, including vessel remodeling, plaque burden, and true vessel diameter.

Synonyms:

Intravenous Anesthesia

Anesthetic induction or maintenance using drugs delivered into a vein. It permits rapid titration but requires attention to dose, context-sensitive recovery, cardiovascular and respiratory effects, and

the availability of a secure airway.

Synonyms:

Intravenous Lipid Emulsion Therapy

Administration of a lipid emulsion as a rescue treatment for selected severe lipophilic drug toxicities, especially local-anesthetic systemic toxicity. It may act as a lipid sink and through metabolic and cardiovascular effects and requires critical-care monitoring.

Synonyms:

Intravenous pyelogram

A radiographic imaging study of the urinary tract following intravenous administration of iodinated contrast material. The contrast is filtered by the glomeruli and excreted through the collecting system, allowing sequential imaging of the renal parenchyma, calyces, renal pelvis, ureters, and bladder.

Synonyms:

Intraventricular Hemorrhage

Bleeding into the germinal matrix and ventricular system, primarily in premature infants less than 32 weeks gestation. Graded I-IV by severity on cranial ultrasound. Grade I (germinal matrix only) and Grade II (intraventricular without dilation) have good prognosis.

Synonyms:

Intravitreal Injection

An ophthalmological procedure in which medication is injected directly into the vitreous cavity of the eye through the pars plana, a safe entry zone located approximately 3.5 to 4 millimeters posterior to the limbus, to deliver therapeutic agents directly to the retina and vitreous for the treatment of various retinal diseases.

Synonyms:

Intrinsic Renal AKI

Acute kidney injury caused by damage to renal tissue. Causes include acute tubular injury, acute interstitial nephritis, glomerulonephritis, and vas-

cular disorders. Laboratory findings vary with the cause and should not be interpreted in isolation.

Synonyms:

Intron

A non-coding segment of a gene that is transcribed into RNA but spliced out before the messenger RNA is translated into a protein.

Synonyms:

Intussusception

Condition in which a segment of intestine telescopes into the adjacent distal segment causing bowel obstruction and compromise of the mesenteric blood supply. It is the most common cause of intestinal obstruction in infants and children between six months and three years of age.

Synonyms:

Invasive Candidiasis

A serious *Candida* infection that enters the bloodstream or deep organs, most often in people who are critically ill or immunocompromised. It may cause persistent fever or organ dysfunction and requires prompt medical diagnosis and treatment.

Synonyms:

Invasive ductal carcinoma

The most common type of breast cancer, characterized by malignant cells that have broken through the duct wall and invaded surrounding breast tissue. It can metastasize via lymphatic or hematogenous spread.

Synonyms:

Invasive Lobular Carcinoma

A breast cancer characterized by discohesive cells infiltrating in single-file lines. More frequently bilateral and multifocal than ductal carcinoma and harder to detect on imaging; usually hormone receptor positive.

Synonyms:

Inverse Agonist

A type of drug that binds to a cell receptor and

actively produces the opposite biological effect of an agonist, effectively turning down the receptor's baseline activity.

Synonyms:

Inversion

Chromosomal segment reversed end-to-end. Paracentric: does not include centromere. Pericentric: includes centromere. Usually benign unless breakpoint disrupts gene.

Synonyms:

Involuntary Psychiatric Treatment

Assessment, hospitalization, or treatment without the patient's consent under applicable law when serious mental disorder creates a substantial risk of harm or severe inability to meet basic needs. The least restrictive alternative, due process, and ongoing reassessment are required.

Synonyms:

Involution

The process by which the uterus returns to its prepregnancy size after delivery. The uterus weighs approximately 1000 grams immediately postpartum and returns to approximately 60 grams by 6 weeks. Fundal height decreases approximately 1 cm per day.

Synonyms:

Iodide-associated sialadenitis

Inflammation and swelling of the salivary glands caused by excessive iodide intake, typically from medications such as amiodarone or iodine-containing contrast, resolving with dose reduction.

Synonyms:

Iodinated Contrast Media

Contrast agents containing iodine used primarily for radiography, CT, angiography, and some fluoroscopic procedures. Important risks include immediate hypersensitivity-like reactions, extravasation, thyroid effects, and kidney injury in susceptible patients.

Synonyms:

Iodine

Required for thyroid hormones. Deficiency: goiter, hypothyroidism, cretinism. Prevention: iodized salt, seafood. Excess can cause thyroid dysfunction.

Synonyms:

Iodine Swab

Antiseptic for skin preparation. Povidone-iodine.

Synonyms:

Iodine-123

Pure gamma emitter, half-life 13 hours. Used for thyroid imaging. No beta emission, lower radiation dose than I-131.

Synonyms:

Iodine-131

A radioactive iodine isotope used in selected diagnostic and therapeutic procedures, especially for thyroid disease.

Synonyms:

Iododerma

A papulopustular or acneiform skin eruption caused by iodine excess, presenting on the face and extensor surfaces, resolving with iodine restriction and symptomatic treatment.

Synonyms:

Ionizing Radiation

Radiation with enough energy to remove electrons from atoms and create ions, including X-rays, gamma rays, and certain particulate emissions. It can cause deterministic tissue effects at sufficient doses and stochastic cancer risk at lower doses.

Synonyms:

Ipecac

Emetic no longer recommended for routine poisoning management. Risk of aspiration, delays charcoal administration.

Synonyms:

Ipratropium Bromide

An inhaled anticholinergic (antimuscarinic) bronchodilator that blocks acetylcholine at airway smooth muscle muscarinic receptors. It reduces bronchospasm and mucus secretion. It is used in COPD and acute asthma exacerbations. It is less effective than beta-2 agonists in asthma but more effective in COPD.

Synonyms:

Ipsilateral

Located on the same side of the body.

Synonyms:

Iridocyclitis

Inflammation involving the iris and ciliary body, a form of anterior uveitis. It may cause eye pain, photophobia, redness, blurred vision, and cells or flare in the anterior chamber and may be associated with autoimmune disease, infection, trauma, or other causes.

Synonyms:

Iridotomy

A procedure that creates a small opening in the iris to allow aqueous humor to pass between the posterior and anterior chambers. Laser peripheral iridotomy is used to treat or prevent selected forms of angle-closure glaucoma.

Synonyms:

Iris

Colored circular muscular diaphragm between cornea and lens, controlling pupil size and light entry. Two muscles: sphincter pupillae (parasympathetic CN III, constricts in bright light) and dilator pupillae (sympathetic, dilates in darkness). Iris root attaches to the ciliary body.

Synonyms:

Iris atrophy

Thinning or loss of iris tissue resulting from trauma, chronic inflammation, ischaemia, or neurodegenerative disease, leading to a translucent or patched iris appearance. It may be sectoral or diffuse and

can be associated with decreased pupillary response, photophobia, or secondary glaucoma.

Synonyms:

Iritis

Inflammation of the iris, the most common form of anterior uveitis. Presents with acute onset eye pain, photophobia, blurred vision, and redness (ciliary flush). Signs: cells and flare in the anterior chamber, keratic precipitates (KP), synechiae (adhesions between iris and lens).

Synonyms:

Iron

Essential for hemoglobin, myoglobin, and electron transport. Heme iron from animal foods is generally more bioavailable than non-heme iron from plant foods. Deficiency is the most common nutritional deficiency worldwide and may result from blood loss, increased requirements, poor intake, or malabsorption.

Synonyms:

Iron deficiency

The most common nutritional deficiency worldwide, resulting from inadequate iron intake, impaired absorption, or chronic blood loss, leading to reduced hemoglobin synthesis and microcytic hypochromic anemia. Clinical features include fatigue, pallor, koilonychia, pica, and angular cheilitis.

Synonyms:

Iron Deficiency Anemia

Anemia caused by insufficient iron for hemoglobin production. It is often microcytic and hypochromic; treatment requires identifying the cause and replacing iron when appropriate.

Synonyms:

Iron-Deficiency Anemia

Anemia caused by insufficient iron for normal hemoglobin production. It may cause fatigue, weakness, shortness of breath, paleness, headache, or unusual cravings such as ice; the cause of iron loss or inadequate intake should be identified.

Synonyms:

Iron-Deficiency Anaemia in Adolescents

Iron-deficiency anaemia during adolescence, commonly related to rapid growth, inadequate dietary iron, or menstrual blood loss. Assessment should identify the cause and guide dietary advice and clinical treatment.

Synonyms:

Irregular Sleep-Wake Syndrome

A circadian rhythm sleep-wake disorder with multiple irregular periods of sleep and wakefulness across the 24-hour day rather than one consolidated nighttime sleep period. It is associated with neurological disease, dementia, aging, and reduced exposure to environmental time cues.

Synonyms:

Irreversible Cell Injury

Cell damage beyond the point of recovery, resulting in death by necrosis, apoptosis, or another regulated cell-death pathway. Key features include inability to reverse mitochondrial dysfunction and severe membrane or nuclear damage.

Synonyms:

Irritable Bowel Syndrome

A chronic functional gastrointestinal disorder characterized by recurrent abdominal pain and altered bowel habits (diarrhea, constipation, or mixed) without identifiable structural pathology. Pathophysiology involves dysregulation of the gut–brain axis, visceral hypersensitivity, altered motility, and imbalances in the gut microbiome.

Synonyms:

Irritable Bowel Syndrome Diet

An individualized eating plan used to reduce irritable bowel syndrome symptoms. A limited trial of a low-FODMAP diet may help some people and should be followed by structured food reintroduction.

Synonyms:

Isaacs Syndrome

A rare peripheral nerve hyperexcitability disorder causing continuous muscle-fibre activity, stiffness, cramps, fasciculations, myokymia, and delayed muscle relaxation. It may be autoimmune, paraneoplastic, or associated with inherited or acquired peripheral-nerve disorders.

Synonyms:

Isavuconazole

A triazole antifungal agent used in the treatment of invasive aspergillosis and mucormycosis. Isavuconazole inhibits fungal lanosterol 14- α demethylase, disrupting ergosterol synthesis and fungal cell membrane integrity.

Synonyms:

Ischemia

Reduced blood flow causing oxygen deprivation. Can lead to tissue damage or death.

Synonyms:

Ischemia-Reperfusion Injury

The paradoxical tissue damage that occurs when blood flow is restored to previously ischemic tissue, a phenomenon with major clinical significance in myocardial infarction treatment, stroke management, organ transplantation, and shock resuscitation.

Synonyms:

Ischemic Cardiomyopathy

Weakening of the heart muscle caused by coronary artery disease and previous or ongoing myocardial ischemia. Scarred or poorly perfused myocardium can reduce contractile function and increase the risk of heart failure and ventricular arrhythmias.

Synonyms:

Ischemic Colitis

Colonic mucosal ischemia resulting from reduced blood flow through the marginal artery and end-arteries, most commonly occurring at watershed areas between vascular territories, particularly the splenic flexure.

Synonyms:

Ischemic gangrene

Death of tissue due to prolonged severe arterial insufficiency, most commonly in the extremities. Presents as dry, black, mummified tissue with a clear line of demarcation from viable tissue. Requires revascularization when possible and surgical debridement or amputation of necrotic tissue.

Synonyms:

Ischemic Stroke

A neurologic deficit caused by inadequate blood flow to part of the brain, usually from thrombotic or embolic arterial occlusion. Causes include atherosclerotic disease, cardiac embolism, and small-vessel disease.

Synonyms:

Ischium

Inferior-posterior hip bone. Ischial tuberosity bears seated weight and serves as hamstring attachment. Ischial spine is a pudendal nerve block landmark and determines pelvic outlet level. Lesser sciatic notch lies between spine and tuberosity.

Synonyms:

Isocitrate Dehydrogenase

A regulated enzyme of the citric acid cycle that converts isocitrate to alpha-ketoglutarate while producing NADH and releasing carbon dioxide. Mitochondrial isoforms are stimulated by ADP and calcium and inhibited by ATP and NADH. Mutations in IDH1 or IDH2 can produce the oncometabolite 2-hydroxyglutarate.

Synonyms:

Isokinetic Exercise

Muscle contraction at constant speed throughout range of motion. Uses specialized equipment. Assesses and improves strength.

Synonyms:

Isolation

Separation of sick persons with contagious disease. Examples: tuberculosis isolation, airborne infection isolation rooms.

Synonyms:

Isolation (Social)

Lack of social contacts and interactions. Common in elderly: bereavement, mobility limitation, sensory impairment, retirement. Consequences: depression, cognitive decline, functional impairment, mortality. Interventions: social programs, transportation, technology, volunteer visits.

Synonyms: Social

Isolation Precautions

Measures used with standard precautions to reduce transmission of infection. Additional precautions may be contact, droplet, or airborne, depending on the mode of spread.

Synonyms:

Isoniazid Toxicity

Hepatotoxicity, peripheral neuropathy, seizures. Treatment: pyridoxine (vitamin B6) supplementation, activated charcoal, seizure control.

Synonyms:

Isosorbide Dinitrate

An organic nitrate (and prodrug) that releases nitric oxide, relaxing vascular smooth muscle—predominantly venous (preload reduction) with coronary dilation.

Synonyms:

Isosporiasis

Intestinal infection caused by the protozoan *Cystoisospora belli*. It typically causes watery diarrhea, abdominal cramps, nausea, fever, and weight loss and may be prolonged or severe in people with impaired cellular immunity.

Synonyms:

Isotope

One of two or more atoms of the same element with the same number of protons but different numbers of neutrons.

Synonyms:

Isotretinoin

A systemic retinoid used for severe, recalcitrant nodular acne. It reduces sebum production, normalizes follicular keratinization, decreases *Propionibacterium acnes*, and has anti-inflammatory effects. Dose is 0.5 to 1 mg/kg/day for 15 to 20 weeks, targeting cumulative dose of 120 to 150 mg/kg.

Synonyms:

Itching

Pruritus, the unpleasant cutaneous sensation that provokes the desire to scratch. It may be acute or chronic and may arise from skin disease, systemic illness, medication, or neuropathic mechanisms.

Synonyms:

Iterative Reconstruction

Modern reconstruction method. OSEM (Ordered Subsets Expectation Maximization). Better quality, longer computation.

Synonyms:

IV Fluids

Intravenous fluid therapy for volume resuscitation and maintenance. Crystalloids: normal saline (0.9% NaCl, increases chloride, risk of hyperchloremic metabolic acidosis), lactated Ringer (balanced, contains K⁺, Ca²⁺, lactate buffer, safer in large volumes), Plasma-Lyte (balanced, closest to plasma).

Synonyms:

IVC Filter

Device placed in inferior vena cava to prevent pulmonary embolism. Indications: DVT/PE with contraindication to anticoagulation, recurrent PE despite anticoagulation. Complications: filter thrombosis, migration, perforation, IVC occlusion.

Synonyms:

IVF

In vitro fertilization: the assisted reproductive technology in which oocytes are retrieved, fertilized by sperm outside the body (in vitro), and the resulting embryos transferred to the uterus. Indications: tubal factor, male factor (with ICSI), endometriosis,

unexplained, ovulation disorders, genetic testing, and same-sex couples or individuals using donor sperm or eggs.

Synonyms:

Immunoglobulin

An antibody protein produced by immune cells to recognize and help neutralize foreign substances.

Synonyms:

Immunosuppressant Drug

A medicine that reduces immune-system activity, often to prevent transplant rejection or treat autoimmune disease.

Synonyms:

Impaired Fasting Glucose

Blood glucose above the normal range after fasting but below the diagnostic threshold for diabetes.

Synonyms:

Impaired Glucose Tolerance

Blood glucose above the normal range after a glucose challenge but below the diagnostic threshold for diabetes.

Synonyms:

Infarct

An area of dead tissue caused by inadequate blood supply.

Synonyms:

Islets of Langerhans

Clusters of endocrine cells in the pancreas that produce hormones including insulin and glucagon.

Synonyms:

Iliac Artery

An artery that supplies blood to the pelvis and lower limb.

Synonyms:

Immunoglobulin A

An antibody found mainly in mucosal secretions,

including saliva, tears, and intestinal fluid.

Synonyms:

Immunoglobulin G

The most abundant antibody in blood, providing long-lasting protection against many infections.

Synonyms:

Immunoglobulin M

The first major antibody produced during an initial immune response.

Synonyms:

Infectious Encephalitis

Inflammation of the brain caused by an infectious organism, most often a virus.

Synonyms:

Intracranial Aneurysm

A weakened, bulging area in a blood vessel within the skull.

Synonyms:

Intrahepatic Cholestasis

Impaired bile flow within the liver, causing bile acids to accumulate in the blood.

Synonyms:

Impacted Wisdom Teeth

Wisdom teeth that cannot emerge normally because they are blocked by bone, gum, or another tooth.

Synonyms:

Incompetent Cervix

Early painless opening of the cervix during pregnancy, which may lead to pregnancy loss or premature birth.

Synonyms:

Infant Jaundice

Yellowing of a newborn's skin or eyes caused by excess bilirubin in the blood.

Synonyms:

Infant Reflux

Backflow of stomach contents into an infant's esophagus, often causing spitting up.

Synonyms:

Inflammatory Breast Cancer

A rare, rapidly progressing breast cancer that causes redness, swelling, and skin thickening.

Synonyms:

Ingrown Hair

A hair that curls back into the skin or grows sideways, causing an inflamed bump.

Synonyms:

Intestinal Ischemia

Inadequate blood flow to the intestines, which can damage intestinal tissue.

Synonyms:

Intracranial Venous Malformations

Abnormal collections or connections of veins within the skull that may bleed or affect nearby brain tissue.

Synonyms:

Icterus

Yellow discoloration of the skin or eyes caused by excess bilirubin; also called jaundice.

Synonyms: jaundice.

Ictus

A sudden neurological event, such as a stroke or seizure.

Synonyms:

Ileal Conduit

A surgically created passage that diverts urine through a segment of ileum to an opening in the abdominal wall.

Synonyms:

Infectious Mononucleosis

A viral illness, usually caused by Epstein-Barr virus,

characterized by fatigue, sore throat, and swollen lymph nodes.

Synonyms:

Insertion

Movement of a muscle attachment toward its fixed attachment, or placement of one structure into another.

Synonyms:

Inspiration

The act of breathing air into the lungs.

Synonyms:

Intubation

Placement of a tube into the airway or another body passage to maintain it or deliver treatment.

Synonyms:

Iontophoresis

Delivery of an ionized medication through the skin using a mild electrical current.

Synonyms:

Immunity

The ability of the body to recognize and resist infectious agents or other foreign substances through innate or adaptive defenses.

Synonyms:

Immunology

The medical and biological study of the immune system, immune responses, and immune disorders.

Synonyms:

Immunosuppression

Reduction of immune-system activity, caused by disease or intentionally induced with medications or other treatment.

Synonyms:

Injection

Introduction of a medication, fluid, or other substance into the body with a needle or other injection

device.

Synonyms:

Insulin Shock

Severe hypoglycemia, historically associated with excessive insulin and characterized by confusion, seizures, loss of consciousness, or other neurologic dysfunction.

Synonyms:

Interneurons

Neurons within the central nervous system that connect other neurons and help process or coordinate neural signals.

Synonyms:

Intraaortic Balloon Pump

A temporary circulatory-support device with a balloon in the descending aorta that inflates and deflates in coordination with the cardiac cycle.

Synonyms:

Intravenous Pyelography

An X-ray examination of the urinary tract after intravenous contrast administration; it is now often replaced by CT urography or ultrasound.

Synonyms:

Intrinsic Factor

A protein secreted by stomach parietal cells that is required for vitamin B12 absorption in the terminal ileum.

Synonyms:

In Vitro Fertilization

A fertility treatment in which an egg and sperm are combined in a laboratory and a resulting embryo is transferred to the uterus.

Synonyms:

Irrigation

Flushing a wound, body cavity, or organ with fluid to remove blood, debris, microorganisms, or unwanted material.

Synonyms:

Isometric

Describing muscle contraction that produces force without a meaningful change in muscle length or joint movement.

Synonyms:

Isotonic

Describing muscle contraction in which muscle length changes to move a joint under a relatively constant external load.

Synonyms:

Impingement Syndrome

Pain and restricted movement caused when a tendon or other soft tissue is compressed between bones, commonly in the shoulder during elevation of the arm.

Synonyms:

Incarcerated Hernia

A hernia whose protruded tissue cannot be returned to the abdominal cavity. It may progress to strangulation and requires urgent clinical assessment.

Synonyms:

Impacted Fracture

A fracture in which one broken bone fragment is driven firmly into another, often producing relative stability but sometimes causing shortening or deformity.

Synonyms:

Infantile Spasms

A severe seizure disorder of infancy characterized by brief, sudden flexion or extension spasms, often occurring in clusters and associated with developmental impairment.

Synonyms:

Iodine Deficiency

Inadequate iodine intake or availability, which can impair thyroid-hormone production and cause goiter, hypothyroidism, or developmental problems in

a fetus or child.

Synonyms:

Intestinal Metaplasia

Replacement of the normal lining of an intestinal or gastric region by intestinal-type epithelium, usually in response to chronic injury or inflammation and sometimes associated with increased cancer risk.

Synonyms:

Irritant Contact Dermatitis

Inflammation of the skin caused by direct chemical or physical injury rather than an immune-mediated allergy. It commonly produces redness, burning, scaling, fissures, or pain at the area of exposure.

Synonyms:

Isolated Systolic Hypertension

Elevated systolic blood pressure with normal diastolic pressure, commonly related to arterial stiffness in older adults and associated with increased cardiovascular risk.

Synonyms:

Immersion Foot (Trench Foot)

A painful cold injury caused by prolonged exposure of the feet to cold, wet conditions without freezing, leading to numbness, swelling, and skin changes.

Synonyms: Trench Foot

Incompetence

Failure of a structure to close or function adequately; examples include valvular incompetence of the heart and cervical incompetence during pregnancy.

Synonyms:

Incoordination (Ataxia)
