Impaired coordination of voluntary movement, often caused by disease affecting the cerebellum or other parts of the nervous system.

Synonyms: Ataxia

Incisor

One of the front teeth, adapted mainly for cutting

or biting food.

Synonyms:

Incision

A deliberate surgical cut made into the skin or other tissue.

Synonyms:

Infant Mortality

The death of an infant before the first birthday; the infant mortality rate is usually expressed per 1,000 live births.

Synonyms:

Infestation

The presence or invasion of parasitic organisms, such as lice, mites, or worms, on or in the body.

Synonyms:

Innervation

The nerve supply to an organ, muscle, or area of the body, including the functional control provided by those nerves.

Synonyms:

Internal Capsule

A compact band of white-matter nerve fibres in the brain carrying important motor and sensory pathways between the cerebral cortex and lower centres.

Synonyms:

Intestine

The part of the digestive tract extending from the stomach to the anus, consisting of the small intestine and large intestine.

Synonyms:

Introitus

An entrance or opening, especially the entrance to the vagina.

Synonyms:

Involuntary Muscle

Muscle that contracts without conscious control, including smooth muscle in internal organs and cardiac muscle in the heart.

Synonyms:

Iron-Deficiency Anaemia

Anaemia caused by insufficient iron for haemoglobin production, commonly due to blood loss, inadequate intake, or impaired absorption.

Synonyms:

Ischaemia

Inadequate blood flow and oxygen delivery to a tissue, usually because of narrowed or blocked blood vessels, causing dysfunction or injury.

Synonyms:

Ischaemic Heart Disease (IHD)

Heart disease caused by reduced blood supply to the heart muscle, usually as a result of coronary artery disease; it may cause angina or myocardial infarction. +

iatrogenic disease

iatrogenic disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ibandronic acid

ibandronic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ibogaine

ibogaine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ibritumomab tiuxetan

ibritumomab tiuxetan is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ibuprofen

ibuprofen is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

icteric index

icteric index is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

idarubicin

idarubicin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

idoxuridine

idoxuridine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ifosfamide

ifosfamide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

igh gene

igh gene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ikappab kinase

ikappab kinase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ileal fistula

ileal fistula is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ileal hemorrhage

ileal hemorrhage is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ileal neoplasm

ileal neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ileal stenosis

ileal stenosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ileal ulcer

ileal ulcer is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iliac crest

iliac crest is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iliac vein

iliac vein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

illusion

illusion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iloprost

iloprost is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

image view

image view is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

imagination

imagination is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

imaging technique

imaging technique is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

imatinib mesylate

imatinib mesylate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

imide

imide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

imines

imines is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

ical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

imino acid

imino acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

imipenem

imipenem is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

imipramine

imipramine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

imiquimod

imiquimod is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immature

immature is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immobilization

immobilization is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immune status

immune status is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immune system

immune system is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunoblast count

immunoblast count is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunoblotting

immunoblotting is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunochemistry

immunochemistry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunocompetence

immunocompetence is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunoconjugate

immunoconjugate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunocytochemistry

immunocytochemistry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunoelectrophoresis

immunoelectrophoresis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunofluorescence technique

immunofluorescence technique is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunogenetics

immunogenetics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunoglobulin d

immunoglobulin d is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunoglobulin idotype

immunoglobulin idotype is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunoglobulin isotype

immunoglobulin isotype is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunologic adjuvant

immunologic adjuvant is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunologic factor

immunologic factor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunologic memory

immunologic memory is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunologic skin test

immunologic skin test is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunologic surveillance

immunologic surveillance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunologic technique

immunologic technique is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunologic test

immunologic test is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunological synapse

immunological synapse is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunomodulation

immunomodulation is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunoprecipitation

immunoprecipitation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunoprotein

immunoprotein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunoradiometric assay

immunoradiometric assay is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunoregulation

immunoregulation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunosuppressive

immunosuppressive is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunotoxin

immunotoxin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

immunoturbidimetry

immunoturbidimetry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

imp dehydrogenase

imp dehydrogenase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

imperforate vagina

imperforate vagina is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

implant

implant is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

implantable defibrillator

implantable defibrillator is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

implantation procedure

implantation procedure is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

importance weight

importance weight is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

impulsive behavior

impulsive behavior is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

in situ hybridization

in situ hybridization is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

in vitro

in vitro is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inalimarev

inalimarev is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inamrinone

inamrinone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inbreed

inbreed is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inclusion body

inclusion body is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inclusion conjunctivitis

inclusion conjunctivitis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

incomplete ossification

incomplete ossification is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

increased libido

increased libido is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

increased osteoid

increased osteoid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

incretins

incretins is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

incyclinide

incyclinide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

indapamide

indapamide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

indel mutation

indel mutation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

indeterminate

indeterminate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

indican

indican is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

indigo carmine

indigo carmine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

indinavir

indinavir is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

indium

indium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

indocyanine green

indocyanine green is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

indole

indole is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

indole-3-carbinol

indole-3-carbinol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

indolent

indolent is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

indoles

indoles is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

indomethacin

indomethacin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

indoximod

indoximod is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

induced abortion

induced abortion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

induced hyperthermia

induced hyperthermia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

induced labor

induced labor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

indwelling catheter

indwelling catheter is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infant

infant is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infant formula

infant formula is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infant gynecomastia

infant gynecomastia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infant incubators

infant incubators is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infant leukemia

infant leukemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

infant nutrition

infant nutrition is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infant reflex

infant reflex is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infantile fibrosarcoma

infantile fibrosarcoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infantile spasm

infantile spasm is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infectious arteritis

infectious arteritis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infectious conjunctivitis

infectious conjunctivitis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infectious encephalomyelitis

infectious encephalomyelitis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infectious enterocolitis

infectious enterocolitis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infectious mediastinitis

infectious mediastinitis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infective cervicitis

infective cervicitis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infective cystitis

infective cystitis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infective phlebitis

infective phlebitis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infective vaginitis

infective vaginitis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inferior colliculus

inferior colliculus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infiltration

infiltration is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inflammatory response

inflammatory response is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infliximab

infliximab is a medicine or pharmacologic substance;

its indication, dose, and safety depend on the specific clinical context.

Synonyms:

influenza a virus

influenza a virus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

influenzavirus A

influenzavirus A is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

influenzavirus b

influenzavirus b is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

informatics

informatics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

informative

informative is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infrared rays

infrared rays is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infrared spectrometry

infrared spectrometry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infrarenal aorta

infrarenal aorta is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

infratentorial neoplasm

infratentorial neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

infrequent

infrequent is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ingredient

ingredient is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ingrown nail

ingrown nail is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inguinal orchiectomy

inguinal orchiectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inhalation

inhalation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inhibin

inhibin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inhibitory synapse

inhibitory synapse is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iniparib

iniparib is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

initial insomnia

initial insomnia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

injury site

injury site is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

inorganic chemical

inorganic chemical is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inosine

inosine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inosine monophosphate

inosine monophosphate is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inosine pranobex

inosine pranobex is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inositol

inositol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inositol phosphates

inositol phosphates is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inpatient

inpatient is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inquilinus

inquilinus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

inquilinus limosus

inquilinus limosus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

insect virus

insect virus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

insecta

insecta is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

insemination

insemination is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inspiratory capacity

inspiratory capacity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inspiratory time

inspiratory time is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

instinct

instinct is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

insula

insula is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

insulin antagonist

insulin antagonist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

insulin coma

insulin coma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

insulin detemir

insulin detemir is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

insulin isophane

insulin isophane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

insulin lispro

insulin lispro is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

insulin receptor

insulin receptor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

insulinase

insulinase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

insurance

insurance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

integrase

integrase is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

integrin

integrin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

integrin binding

integrin binding is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intein

intein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intelligence

intelligence is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intelligence test

intelligence test is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intensive care

intensive care is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intercalated disc

intercalated disc is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intercalating agent

intercalating agent is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intercostal muscles

intercostal muscles is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interferometry

interferometry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interferon

interferon is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

interferon inducer

interferon inducer is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interferon-alpha

interferon-alpha is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interferon-beta

interferon-beta is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interim sacrifice

interim sacrifice is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interleukin 1

interleukin 1 is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interleukin 13

interleukin 13 is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interleukin 2

interleukin 2 is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interleukin 7

interleukin 7 is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interlocutory

interlocutory is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intermediate

intermediate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intermediate filament

intermediate filament is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intermittent fever

intermittent fever is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

internal

internal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

internal fixator

internal fixator is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

international cooperation

international cooperation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

international unit

international unit is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interneuron

interneuron is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

internist

internist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interphase

interphase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interphase cell

interphase cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interstitial fluid

interstitial fluid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interval

interval is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

interventional procedure

interventional procedure is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intestinal absorption

intestinal absorption is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intestinal cancer

intestinal cancer is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

intestinal duplication

intestinal duplication is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intestinal fistula

intestinal fistula is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intestinal mucosa

intestinal mucosa is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intestinal polyp

intestinal polyp is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intestinal polyposis

intestinal polyposis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intestinal villi

intestinal villi is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intestine disorder

intestine disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

intestine neoplasm

intestine neoplasm is a medical condition or clinical

entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

intestine obstruction

intestine obstruction is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intimal dissection

intimal dissection is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intoplicine

intoplicine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intraabdominal hemorrhage

intraabdominal hemorrhage is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

intraabdominal infection

intraabdominal infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

intra-arterial

intra-arterial is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intraarticular

intraarticular is a medical or biomedical term used in clinical practice, research, anatomy, or health

care; its interpretation depends on context.

Synonyms:

intrabronchial

intrabronchial is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intracartilaginous

intracartilaginous is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intracavitary

intracavitary is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intracavity radiotherapy

intracavity radiotherapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intracellular membrane

intracellular membrane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intracellular transport

intracellular transport is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intracerebral

intracerebral is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intracisternal

intracisternal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intracoronaral

intracoronaral is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intracoronary

intracoronary is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intraduodenal

intraduodenal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intraepidermal

intraepidermal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intraesophageal

intraesophageal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intralesional

intralesional is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intralymphatic

intralymphatic is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intramedullary

intramedullary is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intramural plaque

intramural plaque is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intramuscular injection

intramuscular injection is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intramuscular myxoma

intramuscular myxoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intraocular infection

intraocular infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

intraocular lymphoma

intraocular lymphoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intrapartum fever

intrapartum fever is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

intrapartum stillbirth

intrapartum stillbirth is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intrapericardial

intrapericardial is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intraperitoneal

intraperitoneal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intraperitonealroute

intraperitonealroute is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intraprostatic

intraprostatic is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intrapulmonary

intrapulmonary is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intrasynovial

intrasynovial is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intratendinous

intratendinous is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intratesticular

intratesticular is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intrathoracic

intrathoracic is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intratracheal

intratracheal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intratympanic

intratympanic is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intrauterine

intrauterine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intravascular

intravascular is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intravenous catheters

intravenous catheters is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intravital microscopy

intravital microscopy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

intrusive thought

intrusive thought is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inulin

inulin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

invasive procedure

invasive procedure is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

invertebrata

invertebrata is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

invertebrate hormones

invertebrate hormones is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

inverted papilloma

inverted papilloma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

investigational

investigational is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

involuntary movement

involuntary movement is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iodamoeba butschlii

iodamoeba butschlii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

iodide

iodide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iodipamide

iodipamide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iodoacetamide

iodoacetamide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iohexol

iohexol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ion

ion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ion transport

ion transport is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ionic strength

ionic strength is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ionization

ionization is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ionomycin

ionomycin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

ionophore

ionophore is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iopamidol

iopamidol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iothalamate clearance

iothalamate clearance is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iothalamate meglumine

iothalamate meglumine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iothalamic acid

iothalamic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ioxaglic acid

ioxaglic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ipilimumab

ipilimumab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

ipratropium

ipratropium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iratumumab

iratumumab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

irbesartan

irbesartan is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iridium

iridium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

irinotecan

irinotecan is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

irinotecan hydrochloride

irinotecan hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iris cyst

iris cyst is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iris disease

iris disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

iris melanoma

iris melanoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iris neoplasm

iris neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

irofulven

irofulven is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

iron overload

iron overload is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

irregular menstruation

irregular menstruation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

irregular respiration

irregular respiration is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

irrigation solution

irrigation solution is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

irritable mood

irritable mood is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isazophos

isazophos is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ischemic preconditioning

ischemic preconditioning is a medical condition or

clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ishak score

ishak score is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

islet cell

islet cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isoantibodies

isoantibodies is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isoantigen

isoantigen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isocarboxazid

isocarboxazid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isochromosomes

isochromosomes is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isocyanate

isocyanate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isoelectric point

isoelectric point is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isoetharine

isoetharine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isofenphos

isofenphos is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isoflavone

isoflavone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isoflurane

isoflurane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isofluorophate

isofluorophate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isogeneic graft

isogeneic graft is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isolate compound

isolate compound is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isoleucine

isoleucine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isomerase

isomerase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isoniazid

isoniazid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isoprenylation

isoprenylation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isoprocarb

isoprocarb is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isopropyl alcohol

isopropyl alcohol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isoprostane

isoprostane is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isoproterenol

isoproterenol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isoquinolines

isoquinolines is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isosorbide

isosorbide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isospora

isospora is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

isospora belli

isospora belli is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

iso-sulfan blue

iso-sulfan blue is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isothiocyanate

isothiocyanate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isothiocyanates

isothiocyanates is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isotonic exercise

isotonic exercise is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isotonic solution

isotonic solution is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isoxsuprine

isoxsuprine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isozyme

isozyme is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ispaghula husk

ispaghula husk is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ispinesib

ispinesib is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

isradipine

isradipine is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

itraconazole

itraconazole is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

ivabradine

ivabradine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ivermectin

ivermectin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ixabepilone

ixabepilone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Synonyms: IHD

J

Jaccoud's arthropathy

A non-erosive, reducible deformity of the metacarpophalangeal joints caused by chronic periarticular fibrosis and tendon laxity, most commonly associated with systemic lupus erythematosus.

Synonyms:

Julienne

To cut food into thin, matchstick-shaped strips.

Synonyms:

Jacksonian Epilepsy (Focal Seizures)

A type of focal (partial) seizure originating in the primary motor cortex, characterized by clonic (rhythmic jerking) or tonic (sustained contraction) movements that spread sequentially to adjacent body parts along the motor homunculus (Jacksonian march). Named after John Hughlings Jackson (1835-1911), who first described the phenomenon.

Synonyms: Focal Seizures

JAK-STAT Pathway

A rapid signaling pathway for cytokines and growth factors (interferons, interleukins, erythropoietin, growth hormone) that lack intrinsic enzymatic activity. Ligand binding to the cytokine receptor causes receptor dimerization and activation of associated Janus kinases (JAK1, JAK2, JAK3, TYK2) by trans-phosphorylation.

Synonyms:

JAK2

Janus kinase 2, an intracellular tyrosine kinase that transmits signals from several cytokine and growth-factor receptors. Activating JAK2 variants occur in some myeloproliferative neoplasms.

Synonyms:

Janeway Lesions

Painless, erythematous or hemorrhagic macules on the palms and soles, caused by septic microemboli in infective endocarditis. They are a minor criterion in the Duke criteria. Unlike Osler nodes, Janeway lesions are painless and represent microabscesses in the dermis. They are transient and may disappear quickly.

Synonyms:

Janus Kinase Inhibitors

JAK inhibitors (tofacitinib, baricitinib, upadacitinib, filgotinib, abrocitinib) block JAK-STAT signaling downstream of cytokine receptors (IL-6, IFN-gamma, IL-2, IL-7, IL-15, IL-21, GM-CSF, erythropoietin, thrombopoietin). Selectivity: JAK1/JAK3 (tofacitinib), JAK1/JAK2 (baricitinib), JAK1 (upadacitinib, filgotinib, abrocitinib).

Synonyms:

Japanese Encephalitis

A mosquito-borne viral infection of the central nervous system caused by Japanese encephalitis virus. Most infections are asymptomatic, but severe disease can cause fever, altered consciousness, seizures, movement disorders, and lasting neurological disability.

Synonyms:

Japanese Encephalitis Vaccine

A vaccine that protects against Japanese encephalitis, a mosquito-borne viral infection of the central nervous system. Vaccine type, schedule, and eligibility depend on age, destination or exposure risk,

and local recommendations.

Synonyms:

Jaundice

Yellowish discoloration of the skin, sclerae, and mucous membranes caused by hyperbilirubinemia (serum bilirubin greater than 2-3 mg/dL), resulting from an imbalance between bilirubin production and clearance.

Synonyms:

Jaundice (Icterus)

Yellow discoloration of the skin, sclerae, or mucous membranes caused by an increased bilirubin concentration in the blood.

Synonyms: Icterus

Jaundice in newborns

Yellow discoloration of a newborn's skin or eyes caused by elevated bilirubin.

Synonyms:

Jaw Pain

Pain in the jaw, jaw joint, or chewing muscles caused by temporomandibular disorders, dental disease, infection, injury, or less commonly heart or nerve disease. Pain with chest discomfort, sweating, breathlessness, or exertion requires urgent assessment; persistent pain or restricted jaw movement requires dental or medical review.

Synonyms:

Jejunal Atresia

Congenital complete interruption or absence of a segment of the jejunal lumen. It presents in a newborn with intestinal obstruction, commonly causing bilious vomiting, abdominal distension, and failure to pass meconium, and generally requires surgery.

Synonyms:

Jejunostomy

A surgically created opening into the jejunum, often used for placement of a feeding tube when nutrition cannot safely be given through the stomach.

Synonyms:

Jejunum

Middle segment (2.5 m) with prominent circular folds and tall villi for a velvety appearance. Richer blood supply and thicker walls than the ileum. Primary nutrient absorption site for carbohydrates, amino acids, fatty acids, vitamins, minerals. Fewer Peyer's patches. More commonly affected by Crohn's disease.

Synonyms:

Job Modification

Changes to work duties, equipment, schedule, or environment that accommodate a health-related limitation and support safe, effective work.

Synonyms:

Job Syndrome

A primary immunodeficiency, usually caused by pathogenic variants affecting STAT3, characterized by eczema, recurrent staphylococcal skin and lung infections, and markedly elevated immunoglobulin E. Skeletal, dental, and characteristic facial findings may also occur.

Synonyms:

Jock Itch

A fungal infection of the groin and inner thighs, also called tinea cruris. It causes an itchy, scaly, ring-shaped or spreading rash, often worsened by warmth and moisture. Pain, fever, extensive involvement, or failure to improve with appropriate care requires clinical evaluation.

Synonyms: tinea cruris.

Joint

Articulation between two or more bones permitting movement. Structural classification: fibrous (sutures, syndesmoses, gomphoses – immovable/slightly movable), cartilaginous (synchondroses, symphyses – slightly movable), synovial (freely movable – plane, hinge, pivot, condyloid, saddle, ball-and-socket).

Synonyms:

Joint Contracture

Persistent limitation of passive joint movement caused by shortening or fibrosis of muscle, tendon, capsule, ligament, fascia, skin, or other periarticular tissue. It may follow immobilization, neurological disease, trauma, inflammation, burns, or congenital disorders.

Synonyms:

Joint Diseases

A broad category of pathological conditions affecting the structure and function of joints. Classification by etiology: (1) Degenerative: osteoarthritis (most common, non-inflammatory, affects load-bearing joints—knee, hip, spine).

Synonyms:

Joint Effusion

Excess fluid within a joint space. Common sites: knee (most accessible), ankle, wrist, shoulder. Causes: trauma, infection, inflammatory arthritis, crystal arthropathy. Detected by ballottement or bulge sign.

Synonyms:

Joint Pain

Discomfort arising from articular structures including cartilage, synovium, ligaments, and periarticular soft tissues due to inflammation, degeneration, injury, or infection.

Synonyms:

Joint Prosthesis

An artificial joint or implant designed to replace a damaged or diseased biological joint, restoring mobility and relieving chronic pain.

Synonyms:

Joint Replacement

Surgical replacement of damaged joint surfaces with prosthetic components to reduce pain and improve function.

Synonyms:

Joint Replacement (Arthroplasty)

A surgical procedure in which a damaged or arthritic joint surface is removed and replaced with a prosthetic implant, most commonly performed for the hip (total hip arthroplasty) and knee (total knee arthroplasty).

Synonyms: Arthroplasty

Joint Replacement Rehabilitation

Exercise, education, and functional training after joint replacement to restore safe movement and independence.

Synonyms:

Joint Stiffness

Reduced ease or range of joint movement, often worse after rest. Causes include arthritis, injury, inflammation, prolonged immobility, or muscle and tendon disorders. Sudden swelling, redness, fever, severe pain, or inability to use the joint requires assessment.

Synonyms:

Joint Swelling

Enlargement of a joint caused by excess synovial fluid, blood, inflammation, infection, trauma, or structural disease. It may be accompanied by pain, warmth, stiffness, or restricted movement and can indicate inflammatory or septic arthritis.

Synonyms:

Jugular Vein

One of the major veins draining blood from the head, face, and neck. There are two pairs: internal jugular vein (IJV) and external jugular vein (EJV).

Synonyms:

Juvenile angiofibroma

A rare, benign but locally aggressive vascular tumor of the nasopharynx that occurs predominantly in adolescent boys. It may cause recurrent nosebleeds, nasal obstruction, or facial swelling.

Synonyms:

Juvenile Arthritis

A general term for inflammatory arthritis beginning in childhood. Persistent joint swelling, pain, stiffness, or limited movement may occur, and causes and subtypes vary.

Synonyms:

Juvenile Astrocytoma

An astrocytic glioma arising in a child or adolescent. Many are low-grade and may cause seizures, headache, visual symptoms, endocrine disturbance, or focal neurological deficits depending on location; diagnosis requires neuroimaging and tumour evaluation.

Synonyms:

Juvenile Dermatomyositis

An inflammatory muscle disease of childhood characterized by proximal weakness and distinctive skin findings such as heliotrope rash and Gottron papules. It may also affect blood vessels, muscles, or other organs.

Synonyms:

Juvenile Hypermobility Syndrome

Excessive joint movement in a child or adolescent associated with pain, instability, fatigue, or recurrent sprains, without another defined connective-tissue disorder. Assessment considers the pattern of hypermobility, skin and systemic features, and functional impact; management may include physiotherapy and joint protection.

Synonyms:

Juvenile Idiopathic Arthritis

A group of inflammatory arthritis disorders that begin before age 16 and persist for at least six weeks without another identified cause. Subtypes differ in the number of joints affected, systemic symptoms, associated eye disease, and laboratory findings.

Synonyms:

Juvenile Osteoporosis

Reduced bone mass or impaired bone strength occurring during childhood or adolescence, increasing

fracture risk. It may be primary or secondary to chronic disease, nutritional deficiency, endocrine disorder, immobility, or medication exposure.

Synonyms:

Juvenile Rheumatoid Arthritis

An older term for juvenile idiopathic arthritis, chronic inflammatory arthritis beginning before adulthood.

Synonyms:

Juvenile Xanthogranuloma

A benign non-Langerhans-cell histiocytic disorder that most often presents in infancy or early childhood as a yellow-red papule or nodule. Skin lesions are usually self-limited, but ocular or visceral involvement can occur and requires appropriate assessment.

Synonyms:

Juxta-articular

Located next to or close to a joint.

Synonyms:

Juxtaglomerular Apparatus

Specialized structure located at the vascular pole of the glomerulus where the distal tubule comes into contact with the afferent arteriole. Composed of macula densa cells in the tubular wall, juxtaglomerular cells in the afferent arteriolar wall that produce renin, and extraglomerular mesangial cells.

Synonyms:

Juxtavesical

Located next to or near the urinary bladder.

Synonyms:

Jet Lag

Temporary sleep and circadian disruption after rapid travel across time zones.

Synonyms:

Jaw Fracture

A break in the upper or lower jawbone.

Synonyms:

Jackknife Position

A prone position in which the operating table is flexed at the hips, raising the buttocks and lowering the head and legs.

Synonyms:

Jaw Tumors and Cysts

Abnormal growths or fluid-filled sacs that develop in the jawbone or nearby tissues.

Synonyms:

Jellyfish Stings

Skin injury caused by contact with jellyfish tentacles, which release venom and may cause pain or systemic symptoms.

Synonyms:

Jet Lag Disorder

Temporary sleep and circadian disruption after rapid travel across multiple time zones.

Synonyms:

Jaccoud Arthropathy

A deforming but usually nonerosive arthropathy, classically associated with previous rheumatic fever or systemic lupus erythematosus, causing reducible ulnar deviation and other hand deformities.

Synonyms:

Junctional Rhythm

A cardiac rhythm arising from the atrioventricular junction rather than the sinoatrial node, usually with a narrow QRS complex and a slow or absent preceding atrial impulse.

Synonyms:

Juvenile Myoclonic Epilepsy

A generalized epilepsy syndrome that typically begins in adolescence and causes myoclonic jerks, often after awakening, with possible generalized tonic-clonic or absence seizures.

Synonyms:

Juvenile Polyposis Syndrome

An inherited disorder characterized by multiple hamartomatous polyps in the gastrointestinal tract and an increased risk of colorectal and other gastrointestinal cancers.

Synonyms:

Jarisch-Herxheimer Reaction

A short-lived systemic reaction, with fever, chills, headache, muscle aches, and worsening of existing symptoms, that may occur soon after antibiotic treatment of certain bacterial infections, especially spirochaetal infections.

Synonyms:

Pre-hepatic Jaundice (Haemolytic Jaundice)

Jaundice caused by excessive breakdown of red blood cells before bilirubin reaches the liver, producing increased unconjugated bilirubin.

Synonyms: Haemolytic Jaundice

Hepatic Jaundice (Hepatocellular Jaundice)

Jaundice caused by impaired processing or excretion of bilirubin by damaged liver cells.

Synonyms: Hepatocellular Jaundice

Post-hepatic Jaundice (Obstructive Jaundice)

Jaundice caused by obstruction of bile flow after bilirubin has been processed by the liver, commonly from gallstones, strictures, or tumours.

Synonyms: Obstructive Jaundice

Kernicterus (Nuclear Jaundice)

Brain injury caused by deposition of excessive unconjugated bilirubin in the basal ganglia and other brain regions, usually in a severely jaundiced newborn.

Synonyms: Nuclear Jaundice

Mandible (Lower Jaw)

The large movable bone forming the lower jaw and carrying the lower teeth.

Synonyms: Lower Jaw

Maxilla (Upper Jaw)

The paired bones forming the upper jaw, the front part of the hard palate, and parts of the walls of the nose and eye sockets.

Synonyms: Upper Jaw

Jaw Jerk Reflex

A stretch reflex of the jaw muscles elicited by tapping the chin while the mouth is slightly open; an exaggerated response may indicate an upper motor-neuron lesion above the pons.

Synonyms:

Jugular Venous Pressure (JVP)

The height of the jugular venous column above the right atrium, used clinically as an indirect estimate of right atrial pressure and fluid status.

Synonyms: JVP

Neuromuscular Junction (Myoneural Junction)

The specialized synapse where a motor nerve ending communicates with a skeletal-muscle fibre to initiate contraction.

Synonyms: Myoneural Junction +

Janus kinase

Janus kinase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

jaw

jaw is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

jaw neoplasm

jaw neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

jeb protocol

jeb protocol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

jejunal fistula

jejunal fistula is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

jejunal hemorrhage

jejunal hemorrhage is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

jejunal neoplasm

jejunal neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

jejunal stenosis

jejunal stenosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

jejunal ulcer

jejunal ulcer is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

jeotgalibacillus

jeotgalibacillus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

job satisfaction

job satisfaction is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

johnsonella

johnsonella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

johnsonella ignava

johnsonella ignava is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

joint capsule

joint capsule is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

judgement impaired

judgement impaired is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

judgment

judgment is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

jugular foramen

jugular foramen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

jumping gene

jumping gene is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

junctional nevus

junctional nevus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

juvenile delinquency

juvenile delinquency is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

juvenile hormones

juvenile hormones is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

K

Kallmann Syndrome

Congenital form of hypogonadotropic hypogonadism caused by failure of GnRH neuron migration from the olfactory placode to the hypothalamus during embryonic development. Characterized by delayed puberty with low LH and FSH and anosmia or hyposmia from olfactory bulb hypoplasia.

Synonyms:

Keratinocytes

The predominant cells of the epidermis that produce keratin and form the skin's protective barrier.

Synonyms:

Kangaroo Care (Skin-to-Skin Contact)

Holding a newborn directly against a caregiver's bare chest while monitoring the infant's condition. It supports thermal regulation, physiologic stability, bonding, and feeding, and is particularly useful for many preterm or low-birth-weight infants.

Synonyms: Skin-to-Skin Contact

Kaposi Sarcoma

A vascular tumor caused by human herpesvirus 8 (HHV-8), presenting as violaceous plaques and nodules on skin and mucous membranes. Four types: classic (elderly Mediterranean men), endemic (African), iatrogenic (immunosuppression post-transplant), and AIDS-associated. Cutaneous lesions are the most common presentation in AIDS.

Synonyms:

Kaposi's sarcoma

A vascular tumor associated with human herpesvirus 8. It may cause purple or reddish skin lesions and can involve internal organs, especially

in people with impaired immunity.

Synonyms:

Karnofsky Performance Status

The Karnofsky Performance Status (KPS) scale is a widely used clinical tool for assessing the functional status of patients, particularly those with cancer, and quantifies the patient's ability to perform activities of daily living and tolerate treatments.

Synonyms:

Kartagener Syndrome

A subset of primary ciliary dyskinesia with situs inversus, chronic sinusitis, and bronchiectasis. Caused by dynein defects impairing both mucociliary clearance and embryonic nodal cilia rotation.

Synonyms:

Kartagener Triad

The combination of situs inversus, chronic sinusitis, and bronchiectasis caused by primary ciliary dyskinesia. The underlying ciliary defect impairs mucociliary clearance and embryonic left-right development.

Synonyms:

Karyotype

Display of chromosomes arranged in pairs, ordered by size and banding pattern. Used to detect chromosomal abnormalities. Resolution: 5-10 Mb.

Synonyms:

Karyotyping

A laboratory technique that produces an image (karyotype) of an individual's complete set of chromosomes.

mosomes, arranged in pairs by size, centromere position, and banding pattern.

Synonyms:

Katz Index

A scale that assesses independence in six basic activities of daily living: bathing, dressing, toileting, transferring, continence, and feeding.

Synonyms:

Kawasaki Disease

An acute inflammatory disease of childhood that can affect the coronary arteries. It commonly causes persistent fever, rash, conjunctival redness, mouth or extremity changes, and swollen lymph nodes; diagnosis is clinical and incomplete forms occur.

Synonyms:

Kawasaki's disease

An acute, self-limited systemic vasculitis of childhood, also known as mucocutaneous lymph node syndrome, primarily affecting medium-sized arteries with a predilection for the coronary arteries.

Synonyms: mucocutaneous.

Kayser-Fleischer Rings

Golden-brown copper deposits in Descemet membrane of the cornea. They strongly support Wilson disease in the appropriate clinical setting, but may occur in other cholestatic disorders and can be absent in isolated hepatic disease. They are identified by slit-lamp examination and present in virtually all patients with neurological manifestations of Wilson disease though they may be absent in isolated hepatic disease.

Synonyms:

Kearns-Sayre Syndrome

A mitochondrial cytopathy caused by large-scale mitochondrial DNA deletions or rearrangements. It classically begins before age 20 with progressive external ophthalmoplegia, pigmentary retinopathy, and cardiac-conduction disease, and may involve endocrine or neurological systems.

Synonyms:

Kegel

A pelvic-floor muscle contraction exercise used to improve pelvic-floor strength and control of selected types of urinary or fecal incontinence.

Synonyms:

Kegel Exercise

Repeated contraction and relaxation of the pelvic-floor muscles to improve their strength and coordination.

Synonyms:

Keloid

An overgrowth of scar tissue extending beyond the original wound margins, caused by excessive collagen deposition during wound healing. Keloids are more common in darker skin types (Fitzpatrick IV to VI) and occur at sites of trauma, surgery, piercings, and burns. They are pruritic and painful.

Synonyms:

Keratinocyte

The predominant cell of the epidermis, producing keratin and contributing to the skin's barrier and immune functions.

Synonyms:

Keratitis

Inflammation of the cornea. Infectious keratitis: bacterial (contact lens wear, trauma: *Pseudomonas*, *Staph aureus*), viral (HSV, VZV, adenovirus), fungal (*Candida*, *Fusarium*, *Aspergillus*), and *Acanthamoeba* (contact lens-related). Presents with eye pain, photophobia, tearing, conjunctival injection, and corneal opacity/ulcer.

Synonyms:

Keratoacanthoma

A low-grade or well-differentiated variant of squamous cell carcinoma (SCC) originating from hair follicles. Characterized by rapid growth over 4-6 weeks into a dome-shaped, flesh-colored or erythematous nodular lesion with a central keratin-filled crater. Often resolves spontaneously over months via involution, leaving a depressed scar.

Synonyms:

Keratoconjunctivitis Sicca

Chronic dryness and inflammation of the cornea and conjunctiva, commonly called dry-eye syndrome. Symptoms include burning, grittiness, redness, fluctuating vision, and light sensitivity; causes include reduced tear production, excessive evaporation, medicines, and autoimmune disease.

Synonyms: dry-eye.

Keratoconus

A progressive, non-inflammatory ectatic corneal disorder characterized by bilateral (90 percent of cases) thinning and cone-like protrusion of the cornea, leading to irregular astigmatism, myopia, and decreased visual acuity.

Synonyms:

Keratoderma

A group of disorders characterised by excessive thickening of the skin of the palms and soles, which may be hereditary or acquired. Acquired forms can be diffuse, focal, or punctate and may be associated with systemic diseases, malignancy, or medications.

Synonyms:

Keratoderma blennorrhagicum

A keratoderma associated with reactive arthritis (formerly Reiter syndrome), characterised by waxy, yellowish, vesiculopustular papules and plaques on the palms and soles that may coalesce and extend to the extremities. It mimics pustular psoriasis histologically and clinically.

Synonyms:

Keratoderma blenorrhagicum

Alternate spelling of keratoderma blennorrhagicum, a cutaneous manifestation of reactive arthritis with waxy, crusty, vesiculopustular lesions on the palms and soles. It is a reactive phenomenon typically occurring in the context of genitourinary or gastrointestinal infection.

Synonyms:

Keratoplasty

Surgical transplantation or reshaping of corneal tissue. Penetrating keratoplasty replaces the full corneal thickness, whereas lamellar techniques replace selected layers and may reduce rejection and recovery time.

Synonyms:

Keratoprosthesis

Artificial cornea for severe corneal blindness. Boston KPro most common. Indications: chemical burns, limbal stem cell deficiency.

Synonyms:

Keratosis Pilaris

A common, benign genetic follicular condition characterized by keratotic follicular papules. Small, rough, flesh-colored or red bumps on the extensor surfaces of proximal arms, thighs, and sometimes buttocks and face. Caused by abnormal keratinization and plugging of hair follicles with retained keratin.

Synonyms:

Kernicterus

Bilirubin encephalopathy resulting from severe unconjugated hyperbilirubinemia (typically greater than 25 mg/dL in term infants). Bilirubin deposits in the basal ganglia, hippocampus, and brainstem nuclei. Presents with lethargy, poor feeding, high-pitched cry, opisthotonus, seizures, and choreoathetosis.

Synonyms:

Kernig Sign

Sign of meningeal irritation. Patient supine, hip and knee flexed 90 degrees; inability to extend knee indicates positive sign. Seen in meningitis, subarachnoid hemorrhage.

Synonyms:

Keshan disease

Heart disease caused by a lack of selenium, an element that the body needs to function properly.

Synonyms:

Ketogenesis

The production of ketone bodies from fatty acids, mainly in the liver during fasting, prolonged exercise, or inadequate insulin activity.

Synonyms:

Ketogenic Diet

High fat, adequate protein, very low carbohydrate diet (<50g/day). Induces ketosis. Medical uses: epilepsy, obesity, metabolic syndrome. Risks: nutrient deficiency, kidney stones, dyslipidemia.

Synonyms:

Ketone Bodies

Water-soluble molecules produced mainly by the liver from fatty-acid-derived acetyl-CoA during fasting, starvation, prolonged exercise, or insulin deficiency. The principal ketone bodies are acetoacetate, beta-hydroxybutyrate, and acetone.

Synonyms:

Ketones

Acidic byproducts produced when the body breaks down fat for energy instead of glucose (ketogenesis). Ketones can be detected in blood and urine.

Synonyms:

Ketosis

Metabolic state with elevated ketone bodies. Physiological: fasting, ketogenic diet. Pathological: diabetic ketoacidosis. Distinguish from ketonemia vs ketonuria.

Synonyms:

Kidney

A paired, bean-shaped retroperitoneal organ responsible for filtering blood, excreting waste products as urine, and regulating fluid and electrolyte balance, acid-base homeostasis, and blood pressure (via the renin-angiotensin-aldosterone system). Each kidney contains approximately 1 million nephrons, the functional filtering units.

Synonyms:

Kidney and Urinary Health

Kidney and urinary health encompasses the function of the kidneys, ureters, bladder, and urethra in filtering waste, regulating fluid/electrolyte balance, and eliminating urine.

Synonyms:

Kidney Cancer

A malignant tumor arising in the kidney. Renal cell carcinoma is the most common type in adults, but other types occur, especially in children.

Synonyms:

Kidney Failure

The inability of the kidneys to maintain fluid, electrolyte, and acid-base homeostasis and to excrete metabolic wastes. Acute kidney injury (AKI): sudden decline in GFR over hours-days—prerenal (hypoperfusion), intrinsic (acute tubular necrosis, glomerulonephritis, interstitial nephritis), postrenal (obstruction).

Synonyms:

Kidney Function Tests

Blood and urine tests used to assess how well the kidneys filter waste and regulate fluid and electrolytes. Common measures include creatinine, estimated glomerular filtration rate, urine albumin, and urinalysis; results are interpreted with the clinical context.

Synonyms:

Kidney Stone

A hard deposit formed from substances in urine that can obstruct the urinary tract and cause severe flank or abdominal pain.

Synonyms:

Kidney stones

Crystalline mineral deposits that form within the renal pelvis and urinary tract, affecting approximately 10 percent of the population over a lifetime, with a male-to-female ratio of 2:1 and peak incidence in the 4th-6th decades.

Synonyms:

Kidney Stones (Nephrolithiasis / Urolithiasis)

Crystalline mineral deposits formed within the renal pelvis and calyces due to supersaturation of urine.

Synonyms: Nephrolithiasis / Urolithiasis

Kidney Transplant Rejection

Immune-mediated injury to a transplanted kidney caused by recipient antibodies, T cells, or both. Hyperacute, acute, and chronic rejection differ in timing and pathology and require correlation of graft function, imaging, serology, and often biopsy.

Synonyms:

Kidney Transplantation

Best treatment for ESRD with improved survival over dialysis. Living donor superior to deceased donor. Lifelong immunosuppression required. Rejection types include hyperacute, acute, and chronic. Complications include rejection, infection, vascular complications, and recurrent disease.

Synonyms:

Kienbock Disease

Kienbock disease (lunatomalacia): AVN of lunate. Lichtman classification: I (normal XR, MRI edema), II (lunate sclerosis), IIIA (lunate collapse, no scaphoid rotation), IIIB (lunate collapse, fixed scaphoid rotation, DISI), IV (perilunate arthritis). Etiology: negative ulnar variance, trauma, vascular variation.

Synonyms:

Kiesselbach Plexus

A network of small arteries on the front part of the nasal septum and a common source of nosebleeds.

Synonyms:

Killian's triangle

An area of potential weakness in the pharyngeal wall between the thyropharyngeus and cricopharyngeus muscles, predisposing to Zenker diverticulum formation.

Synonyms:

Killip Classification

A clinical classification system for assessing the severity of myocardial infarction based on physical examination findings. Class I: no heart failure signs. Class II: mild heart failure (crackles, S3 gallop, elevated JVD). Class III: pulmonary edema. Class IV: cardiogenic shock.

Synonyms:

Kimmelstiel-Wilson Nodules

Characteristic round eosinophilic nodular mesangial expansions in diabetic nephropathy. Represent advanced mesangial matrix accumulation. Found in peripheral mesangium associated with diffuse mesangial expansion, GBM thickening, and arteriolar hyalinosis.

Synonyms:

Kimura Disease

A chronic inflammatory disorder characterized by painless subcutaneous masses, commonly in the head and neck, regional lymphadenopathy, eosinophilia, and elevated immunoglobulin E. It is distinct from angiolymphoid hyperplasia with eosinophilia and may involve the kidneys.

Synonyms:

Kinesio Taping

Application of an elastic adhesive tape to the skin to provide support or sensory input while allowing movement. Its clinical benefit varies by condition.

Synonyms:

Kinesiology

The study of human movement and the forces that produce or affect it, with applications in health care, rehabilitation, sport, and ergonomics.

Synonyms:

Kinetic Modeling

Mathematical modeling of how a tracer or drug moves through and is exchanged among tissues or body compartments.

Synonyms:

Kinetics

The study of how a process changes over time. In pharmacology, it includes the absorption, distribution, metabolism, and elimination of a drug.

Synonyms:

Klebsiella Pneumonia

Severe, necrotizing pneumonia in alcoholic or debilitated patients. Upper lobe involvement with “bulging fissure sign” and “currant jelly” sputum.

Synonyms:

Klebsiella rhinoscleromatis

A gram-negative bacillus causing chronic granulomatous infection of the nasal passages and upper airway, leading to rhinoscleroma with progressive nasal obstruction and tissue destruction.

Synonyms:

Klinefelter Syndrome

Most common sex chromosome aneuploidy in males with a karyotype of 47,XXY occurring in approximately one in six hundred live male births. Characterized by small firm testes, gynecomastia, tall stature with long extremities, and infertility from azoospermia.

Synonyms:

Klippel-Feil Syndrome

A congenital condition characterized by fusion of two or more cervical vertebrae, resulting from failure of normal segmentation of the cervical somites during weeks 3-8 of gestation. Classic triad: short neck, low posterior hairline, and limited cervical range of motion (present in <50% of cases).

Synonyms:

Klippel-Trenaunay Syndrome

A congenital vascular disorder characterized by the triad: capillary malformations (port-wine stains), venous malformations (varicose veins, persistent embryonic veins), and soft tissue or bone hypertrophy of the affected limb (typically a lower extremity).

Synonyms:

Klippel-Trenaunay-Weber Syndrome

A rare congenital overgrowth disorder involving capillary or venous malformations and enlargement of bone or soft tissue, usually affecting one limb. It may cause limb asymmetry, pain, bleeding, thrombosis, or lymphedema. Care is multidisciplinary and may include compression, vascular treatment, and orthopedic management.

Synonyms:

Klumpke Paralysis

Lower-trunk brachial-plexus injury affecting primarily the C8 and T1 nerve roots. It causes weakness or paralysis of the intrinsic hand muscles, sensory loss along the medial forearm and hand, and occasionally Horner syndrome when sympathetic fibres are involved.

Synonyms:

Knee Disorders

The knee is a complex hinge-type synovial joint connecting the femur, tibia, and patella, stabilized by ligaments (ACL, PCL, MCL, LCL), menisci (medial and lateral), and surrounding muscles/tendons.

Synonyms:

Knee Joint

A synovial joint formed mainly by the femur, tibia, and patella. It permits flexion and extension with limited rotation and is stabilized by ligaments, menisci, muscles, and the joint capsule.

Synonyms:

Knee Pain

Pain felt in or around the knee, commonly caused by injury, osteoarthritis, bursitis, tendinitis, or inflammatory disease. Persistent swelling, instability, inability to bear weight, or fever requires medical assessment.

Synonyms:

Knee Prosthesis

An artificial joint component used to replace damaged surfaces of the knee, usually including femoral and tibial components and sometimes a patellar

component.

Synonyms:

Kneecap

The largest sesamoid bone in the human body, embedded within the quadriceps tendon anterior to the knee joint. See Patella (Kneecap).

Synonyms:

Kniest Dysplasia

A rare skeletal dysplasia caused most often by pathogenic variants in COL2A1. It produces disproportionate short stature, enlarged joints, progressive joint disease, distinctive facial features, and sometimes severe ocular, auditory, or respiratory complications.

Synonyms:

Knife-cut ulcers from Crohn's disease

Deep, linear, serpiginous ulcerations of the intestinal mucosa in Crohn disease, resembling cuts made by a knife. These longitudinal ulcers with heaped-up margins are characteristic of Crohn disease and help distinguish it from ulcerative colitis on endoscopy. They may cause strictures, fistulae, and bleeding.

Synonyms:

Knock Knees

Medial angulation of the knees causing the knees to touch while the ankles remain apart, also called genu valgum. It is common during childhood development but may be pathologic when severe, asymmetric, persistent, or associated with pain or growth disturbance.

Synonyms: genu valgum.

Knotless Anchor

Suture anchor for soft tissue repair without tying knots. Used in orthopedic surgery.

Synonyms:

KOH Preparation

Microscopic examination of skin, hair, or nail scrapings treated with potassium hydroxide to dissolve keratin and reveal fungal hyphae or yeast. A neg-

ative preparation does not exclude infection when sampling is inadequate or prior treatment has been given.

Synonyms:

Koilonychia

Spoon nails: nails with a concave (spoon-shaped) contour, most commonly associated with iron deficiency anemia; also seen in hemochromatosis, Plummer-Vinson syndrome, malnutrition, and trauma (nail dystrophy). The nail becomes thin, brittle, and turns up at the edges so a drop of water rests in the concavity.

Synonyms:

Koplik Spots

A characteristic enanthem of measles. It consists of small, bluish-white spots on an erythematous bluish-white spots on an erythematous background located on the buccal mucosa opposite the lower molars ("grains of salt on a red background"). Appear 1-2 days prior to the onset of the maculopapular rash and disappear 1-2 days after rash onset.

Synonyms:

Krabbe Disease

An autosomal-recessive lysosomal storage disorder caused by deficient galactocerebrosidase activity and accumulation of psychosine. Infantile disease causes irritability, stiffness, developmental regression, seizures, and progressive loss of neurological function; later-onset forms are variable.

Synonyms:

Kt/V

Dialysis adequacy measure representing the fractional clearance of urea. K is dialyzer clearance, t is treatment time, V is volume of distribution of urea. Target Kt/V greater than 1.4 for thrice-weekly hemodialysis. Urea reduction ratio greater than 70% is alternative adequacy measure.

Synonyms:

Kussmaul Breathing

A deep, rapid breathing pattern seen in severe

metabolic acidosis (diabetic ketoacidosis, lactic acidosis, uremia). It represents the body's attempt to compensate by blowing off CO₂. The increased respiratory rate and depth create the characteristic labored breathing.

Synonyms:

Kussmaul Sign

Paradoxical increase in jugular venous pressure with inspiration, normally the JVP decreases with inspiration. It indicates impaired right ventricular filling during inspiration. Seen in constrictive pericarditis, restrictive cardiomyopathy, severe right heart failure, cardiac tamponade, and massive pulmonary embolism.

Synonyms:

Kwashiorkor

A severe form of protein-energy malnutrition (PEM) characterized by a severe protein deficiency relative to calorie intake (often occurring in children when weaned from breast milk to a high-carbohydrate starch diet).

Synonyms:

Kyphoplasty

A procedure for selected vertebral compression fractures in which a balloon is used to create a cavity, followed by injection of bone cement.

Synonyms:

Kyphoscoliosis

An abnormal curvature of the spine in both the coronal (scoliosis) and sagittal (kyphosis) planes. Severe forms cause restrictive lung disease by reducing chest wall compliance and lung volumes. It can lead to chronic respiratory failure and pulmonary hypertension.

Synonyms:

Kyphosis

An excessive anterior-posterior curvature of the thoracic spine, measured by the Cobb angle on lateral spine x-ray (normal thoracic kyphosis is 20-40 degrees).

Synonyms:

Keratectomy

Surgical removal or reshaping of part of the cornea, often to correct vision.

Synonyms:

Keratoderma Blennorrhagica

Thickened, scaly skin lesions associated with reactive arthritis.

Synonyms:

Kaposi's Sarcoma

A cancer of blood-vessel or lymphatic-vessel lining cells, often associated with human herpesvirus 8.

Synonyms:

Kidney Calculi

Solid mineral deposits that form in the kidneys; also called kidney stones.

Synonyms: kidney stones.

Klinefelter's Syndrome

A chromosomal condition in which a male has one or more extra X chromosomes, often causing small testes and reduced fertility.

Synonyms:

Krabbe's Disease

A rare inherited disorder in which loss of myelin progressively damages the nervous system.

Synonyms:

Krukenberg Tumor

An ovarian tumor caused by metastatic cancer, commonly originating in the stomach or gastrointestinal tract.

Synonyms:

Kuru

A rare, fatal prion disease that causes progressive neurological degeneration.

Synonyms:

Kidney Position

A modified lateral position in which the operating table is flexed at the waist to elevate the flank and improve access to the kidney or retroperitoneum.

Synonyms:

Knee-Chest Position

A position in which the patient rests on the knees and chest, with the hips flexed; it may be used for spinal or anorectal procedures.

Synonyms:

Keloid Scar

A raised scar caused by excessive growth of scar tissue after skin injury.

Synonyms:

Kidney Infection

An infection of one or both kidneys, usually caused by bacteria that spread from the urinary tract.

Synonyms:

Kleptomania

A mental health disorder marked by repeated inability to resist urges to steal items that are not needed.

Synonyms:

Keratin

A tough structural protein found in skin, hair, nails, and other epithelial tissues.

Synonyms:

Keratometer

An instrument that measures the curvature of the cornea.

Synonyms:

Kinesthesia

The sense of movement and position of the body's parts.

Synonyms:

Kussmaul Respiration

Deep, rapid breathing commonly associated with severe metabolic acidosis, especially diabetic ketoacidosis.

Synonyms:

Kelly Clamp

A hinged surgical clamp used to grasp tissue or compress blood vessels and control bleeding.

Synonyms:

Kocher Clamp

A toothed surgical clamp used to hold firm tissue or clamp vessels.

Synonyms:

Kidney Transplant

Surgical placement of a healthy donor kidney into a person with kidney failure to restore renal function. Lifelong immunosuppressive treatment is generally required to reduce rejection risk.

Synonyms:

Korsakoff Syndrome

A chronic amnestic disorder caused most often by severe thiamine deficiency associated with alcohol-use disorder. It causes impaired formation of new memories, loss of past memories, and sometimes confabulation.

Synonyms:

Kala-Azar (Visceral Leishmaniasis)

A serious parasitic infection caused by Leishmania species and transmitted by sandflies. It may cause prolonged fever, weight loss, enlargement of the spleen and liver, and suppression of blood-cell production.

Synonyms: Visceral Leishmaniasis

Katayama Fever (Acute Schistosomiasis)

An acute systemic reaction to schistosome infection, usually occurring weeks after exposure and causing fever, rash, cough, abdominal symptoms, and eosinophilia.

Synonyms: Acute Schistosomiasis

Keratolysis

Breakdown or loss of keratinized tissue, especially the superficial layer of the skin; it may occur in some infections and inflammatory skin disorders.

Synonyms:

Keratomalacia

Softening and ulceration of the cornea caused most often by severe vitamin A deficiency, potentially leading to blindness.

Synonyms:

Kerion

An inflamed, boggy, pus-forming mass caused by a fungal infection of hair-bearing skin, usually a severe form of tinea capitis.

Synonyms:

Actinic Keratosis (Solar Keratosis)

A rough, scaly precancerous skin lesion caused by long-term ultraviolet exposure and capable of progressing to squamous cell carcinoma.

Synonyms: Solar Keratosis

Seborrheic Keratosis

A common benign, usually pigmented, raised skin growth with a waxy or stuck-on appearance.

Synonyms:

Ketoacidosis

A metabolic emergency in which excessive ketone production causes acidosis, most commonly in diabetic ketoacidosis.

Synonyms:

Ketonuria (Acetonuria)

The presence of ketone bodies in the urine, occurring in conditions such as diabetic ketoacidosis, prolonged fasting, or severe vomiting.

Synonyms: Acetonuria

Kinase

An enzyme that transfers a phosphate group, usually from ATP, to another molecule; kinases regulate

many cellular processes.

Synonyms:

Klebsiella

A genus of Gram-negative bacteria that can cause pneumonia, urinary-tract infection, bloodstream infection, and other healthcare-associated infections.

Synonyms:

Koch's Bacillus (Mycobacterium Tuberculosis)

The bacterium that causes tuberculosis, an infection most often affecting the lungs but capable of involving many organs.

Synonyms: Mycobacterium Tuberculosis

Korotkoff Sounds

Sounds heard through a stethoscope over an artery as a blood-pressure cuff is deflated; their appearance and disappearance are used to estimate systolic and diastolic pressure.

Synonyms:

Krebs Cycle (Citric Acid Cycle)

A series of chemical reactions in mitochondria that oxidizes acetyl-CoA and generates energy-rich molecules used for cellular energy production.

Synonyms: Citric Acid Cycle

Kulchitsky Cells (Enterochromaffin Cells)

Specialized neuroendocrine cells, especially in the gastrointestinal and respiratory tracts, that release signalling substances such as serotonin.

Synonyms: Enterochromaffin Cells +

kanamycin

kanamycin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

karyomegaly

karyomegaly is a medical condition or clinical entity; assessment and management depend on its cause,

severity, and the individual patient.

Synonyms:

karyometry

karyometry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

karyotype result

karyotype result is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kava

kava is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

keratan sulfate

keratan sulfate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

keratoconjunctivitis

keratoconjunctivitis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

keratocyte count

keratocyte count is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

keratosis

keratosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

keratosis follicularis

keratosis follicularis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

kerstersia gyiorum

kerstersia gyiorum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

ketamine

ketamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ketamine hydrochloride

ketamine hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ketanserin

ketanserin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

keto acid

keto acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ketoconazole

ketoconazole is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

ketone

ketone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

ical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ketonuria

ketonuria is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ketoprofen

ketoprofen is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

ketorolac

ketorolac is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ketorolac tromethamine

ketorolac tromethamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ketotic hypoglycemia

ketotic hypoglycemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ketotifen

ketotifen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kidney neoplasm

kidney neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

kilobecquerel

kilobecquerel is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kilocalorie

kilocalorie is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kilodalton

kilodalton is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kilogram

kilogram is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kilointernational unit

kilointernational unit is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kilojoule

kilojoule is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kilometer

kilometer is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kilovolt peak

kilovolt peak is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kinesin

kinesin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kinesis

kinesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kinesthesia

kinesthesia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kinetochore

kinetochore is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kinetosome

kinetosome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kingella

kingella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kingella denitrificans

kingella denitrificans is a microorganism or biological

taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kingella kingae

kingella kingae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kingella oralis

kingella oralis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kingella potus

kingella potus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kinin

kinin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kininogenase

kininogenase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kinocilium

kinocilium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kit device

kit device is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

klatskin tumor

klatskin tumor is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

klebsiella oxytoca

klebsiella oxytoca is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

klebsiella pneumoniae

klebsiella pneumoniae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

klebsiella singaporensis

klebsiella singaporensis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

klebsiella variicola

klebsiella variicola is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kluyvera

kluyvera is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kluyvera ascorbata

kluyvera ascorbata is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kluyvera cryocrescens

kluyvera cryocrescens is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kluyvera georgiana

kluyvera georgiana is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kluyvera intermedia

kluyvera intermedia is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kluyveromyces

kluyveromyces is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kluyveromyces lactis

kluyveromyces lactis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kluyveromyces marxianus

kluyveromyces marxianus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

knee

knee is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

knoellia

knoellia is a microorganism or biological taxon of

medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

knuckle pad

knuckle pad is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kocuria

kocuria is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kocuria rosea

kocuria rosea is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kocuria varians

kocuria varians is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kodamaea ohmeri

kodamaea ohmeri is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

KRAS gene

KRAS gene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Krebs' cycle

Krebs' cycle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kringles

kringles is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Kupffer's cell

Kupffer's cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kurthia

kurthia is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kynurenine

kynurenine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

kytococcus

kytococcus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

kytococcus sedentarius

kytococcus sedentarius is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

L

Labor

The process of uterine contractions leading to progressive cervical dilation and effacement and delivery of the fetus. Stages: first (latent—cervical dilation to 3-4 cm, then active—3-10 cm), second (full dilation to delivery of the infant), third (delivery of the placenta), fourth (first hour postpartum).

Synonyms:

Lamellar Bone

Mature, organized bone tissue arranged in layers.

Synonyms: Compact bone

Lamina

A thin plate of bone forming part of a vertebral arch.

Synonyms:

Laser Assisted Uvula Palatoplasty

A procedure that reshapes or removes selected soft-palate and uvula tissue to reduce snoring.

Synonyms: LAUP

Laser Hair Removal

Hair reduction using laser energy absorbed by pigment in the hair follicle.

Synonyms:

LED Photomodulation

Use of low-energy light-emitting diodes to influence skin cells and improve selected skin concerns.

Synonyms: LED light therapy

Left Anterior Descending Coronary

Artery

A major coronary artery supplying the front wall and septum of the left ventricle.

Synonyms: LAD artery

Left Circumflex Coronary Artery

A coronary artery that curves around the left side and back of the heart.

Synonyms: Circumflex artery

Lensometer

An instrument used to measure the prescription and optical properties of eyeglass lenses.

Synonyms: Lensmeter; focimeter

Leukotriene Blockers

Medicines that reduce leukotriene effects and help prevent asthma or allergy symptoms.

Synonyms: Leukotriene antagonists

Leukotrienes

Inflammatory signaling molecules that can narrow and swell airways during allergic reactions.

Synonyms:

Levothyroxine Sodium

The sodium salt of synthetic thyroxine used to replace deficient thyroid hormone.

Synonyms: Levothyroxine

LH

Luteinizing hormone, a pituitary hormone involved in ovulation and testosterone production.

Synonyms: Luteinizing hormone

Lignans

Plant compounds found in seeds, grains, fruits, and vegetables that have antioxidant activity.

Synonyms:

Limbus

The border where the cornea meets the white outer coat of the eye.

Synonyms: Corneoscleral limbus

Lipids

Fats, oils, and related substances used for energy, cell structure, and signaling.

Synonyms: Fats

Lipohypertrophy

Localized thickening or accumulation of fatty tissue, commonly at repeated insulin-injection sites.

Synonyms:

Lipoprotein Analysis

A blood test measuring cholesterol, triglycerides, and lipoprotein fractions such as LDL and HDL.

Synonyms: Lipid panel; lipid profile

Lipoprotein(a)

An LDL-like lipoprotein whose elevated level is an inherited cardiovascular risk factor.

Synonyms: Lp(a)

Liposuction

A cosmetic operation that removes localized fat through suction.

Synonyms: Lipoplasty

Live Attenuated Vaccines

Vaccines containing weakened organisms that stimulate immunity without usually causing disease.

Synonyms: Live vaccines

Lobar Hemorrhage

Bleeding into a lobe of the brain, beneath the cerebral cortex.

Synonyms:

Lobotomy

A historical brain operation that severed connections involving the frontal lobes.

Synonyms:

Lobules

Small subdivisions of an organ; in the breast, milk-producing glandular units.

Synonyms:

Localized

Limited to a particular area or organ, without evidence of distant spread.

Synonyms: Localized disease

Locus Ceruleus

A brainstem nucleus involved in alertness, attention, stress responses, and norepinephrine release.

Synonyms: Locus coeruleus

Long-Term Memory

Memory that can persist from minutes to many years.

Synonyms:

Low-Calorie Diet

A diet that restricts energy intake to support weight loss or another therapeutic goal.

Synonyms: Calorie-restricted diet

Low-Density Lipoprotein

A lipoprotein that transports cholesterol and can contribute to artery-wall plaque when elevated.

Synonyms: LDL; bad cholesterol

Lower Esophageal Sphincter

A ring of muscle between the esophagus and stomach that helps prevent acid reflux.

Synonyms: LES

Lumbar Spine

The five vertebrae forming the lower back.

Synonyms: Lumbar region

Lutein

A carotenoid pigment found in leafy greens and concentrated in the retina.

Synonyms:

Luteinizing Hormone-Releasing Hormone Agonist

A medicine that initially stimulates and then suppresses reproductive-hormone production with continued use.

Synonyms: GnRH agonist; LHRH agonist

LVAD

Left-ventricular assist device, an implanted pump that helps the left ventricle circulate blood.

Synonyms: Left-ventricular assist device

Lymph Nodes

Small immune organs that filter lymph and help detect infection or abnormal cells.

Synonyms: Lymph glands

Labor Dystocia

Abnormally slow or difficult labor caused by inadequate uterine forces, abnormal fetal position or size, or an inadequate maternal pelvis. Assessment considers the powers, passenger, and passage and guides appropriate augmentation or operative delivery.

Synonyms:

Laboratory Test

An examination of a body fluid, tissue, or other specimen to obtain information for diagnosis, monitoring, screening, or treatment.

Synonyms:

Labour

The process of childbirth, consisting of regular uterine contractions that cause progressive cervical effacement and dilation, leading to delivery of the baby and placenta.

Synonyms:

Labyrinth

The inner ear. It contains the cochlea, which is responsible for hearing, as well as structures that are needed for balance.

Synonyms:

Labyrinthitis

Inflammation of the labyrinth, the inner ear structure containing the cochlea and vestibular apparatus, resulting in both auditory and vestibular symptoms including sudden, severe vertigo, sensorineural hearing loss, tinnitus, nausea, and vomiting.

Synonyms:

Laceration

A wound caused by tearing of body tissue, typically caused by trauma from a sharp object (knife, glass, metal) or blunt force that splits the skin. Lacerations involve the skin and may extend into subcutaneous tissue, muscle, tendon, nerve, or blood vessels.

Synonyms:

Laceration (Forensic)

Tear or disruption of tissue produced by blunt force trauma exceeding skin elasticity, featuring irregular bruised edges, tissue bridging (intact nerves, vessels across wound floor), and hair crushing.

Synonyms: Forensic

Lachman Test

A physical examination in which the knee is slightly flexed while the tibia is moved forward to assess the integrity of the anterior cruciate ligament. Increased laxity suggests injury but is not diagnostic by itself.

Synonyms:

Lacrimal Apparatus

Produces, distributes, and drains tears for corneal moisture and protection. Components: lacrimal gland (superolateral orbit, parasympathetic CN V1, produces aqueous tear layer), superior/inferior puncta (medial eyelid openings), canaliculi, lacrimal sac (lacrimal groove), and nasolacrimal duct (drains into inferior meatus).

Synonyms:

Lacrimal Duct

A drainage channel that carries tears from the lacrimal sac into the nasal cavity. Blockage can cause watering of the eye, recurrent infection, swelling near the inner corner, or discharge.

Synonyms:

Lacrimal Gland

The paired almond-shaped exocrine glands that secrete the aqueous layer of the tear film, located in the lacrimal fossa of the superior lateral orbit (orbital part) and the upper eyelid (palpebral part).

Synonyms:

Lactate

A product of cellular metabolism measured in blood. An increased level may occur with strenuous exercise, impaired oxygen delivery, infection, medicines, liver disease, or other conditions and must be interpreted clinically.

Synonyms:

Lactate Dehydrogenase

Non-specific enzyme. Elevated in tissue damage. Isoenzymes differentiate source.

Synonyms:

Lactation

The physiological process of milk production and secretion from the mammary glands, occurring after childbirth (puerperium). See Lactation (Breastfeeding).

Synonyms:

Lactation (Breastfeeding)

The production of milk by the mammary glands stimulated by the hormone prolactin. Colostrum is produced for the first 2-5 days (rich in IgA, proteins, and growth factors). Mature milk appears at day 5-7. The milk ejection reflex (let-down) is mediated by oxytocin.

Synonyms: Breastfeeding

Lactation Nutrition

Nutrition and hydration during breastfeeding sufficient to support maternal health and milk production. Requirements vary with maternal stores, dietary pattern, and the degree of breastfeeding; selected supplements may be required according to local guidance and clinical assessment.

Synonyms:

Lactic Acid

An organic acid produced during normal metabolism, especially when pyruvate is converted to lactate. Blood lactate may rise for many reasons, including impaired oxygen delivery, strenuous exercise, or medicines.

Synonyms:

Lactic Acidosis

Metabolic acidosis associated with increased lactate production or reduced lactate clearance. Causes include impaired tissue oxygen delivery, medicines, liver disease, seizures, and other disorders.

Synonyms:

Lactose

The principal sugar in milk, composed of glucose and galactose. Lactase in the small intestine digests it.

Synonyms:

Lactose Fermentation

The ability of bacteria to ferment lactose to acid (and gas), a key differential characteristic on MacConkey agar. Lactose-fermenting enteric gram-negative bacteria produce pink/red colonies (*E. coli*, *Klebsiella*, *Enterobacter*, *Citrobacter*); non-lactose fermenters form colorless colonies (*Salmonella*, *Shigella*, *Proteus*, *Pseudomonas*).

Synonyms:

Lactose intolerance

A common digestive disorder caused by lactase deficiency leading to malabsorption of lactose, the primary disaccharide in milk and dairy products. The lactase enzyme is produced by enterocytes of

the small intestinal brush border and hydrolyzes lactose into glucose and galactose for absorption.

Synonyms:

Lactose Tolerance Test

Non-invasive test for carbohydrate malabsorption (lactose, fructose) and small intestinal bacterial overgrowth (SIBO). See Hydrogen Breath Test.

Synonyms:

Lafora Disease

A progressive autosomal-recessive myoclonic epilepsy caused by pathogenic variants affecting glycogen metabolism. It usually begins in adolescence with generalized seizures, visual symptoms, myoclonus, cognitive decline, and progressive neurological deterioration.

Synonyms:

Lambert-Eaton Myasthenic Syndrome

Autoantibodies against presynaptic calcium channels at the neuromuscular junction, associated with SCLC. Proximal weakness, reduced reflexes, facilitation with exercise.

Synonyms:

Laminectomy

Surgical removal of the lamina (posterior vertebral arch) to decompress the spinal canal. Indications: spinal stenosis (lumbar and cervical), herniated disc (with central stenosis), and spinal tumor. Decompression of the entire spinal canal. Often combined with discectomy (lumbar) or foraminotomy (nerve root decompression).

Synonyms:

Lancet

Small needle for fingerstick. Used for blood glucose testing.

Synonyms:

Langerhans-cell histiocytosis

A group of disorders characterized by clonal proliferation of Langerhans cells (antigen-presenting dendritic cells), which can infiltrate bone, skin, and

central nervous system. CNS involvement may cause diabetes insipidus, hypothalamic-pituitary dysfunction, or cerebellar degeneration.

Synonyms:

Language Barrier

Difficulty communicating because a patient and healthcare professional do not share a language or have limited proficiency in the language used for care.

Synonyms:

Language Therapy

Treatment that improves understanding, expression, reading, writing, or other language skills after developmental or acquired impairment.

Synonyms:

Lanugo

Fine, soft hair that grows all over the body of a fetus and is typically shed before birth.

Synonyms:

Laparoscopy

A minimally invasive surgical technique using a laparoscope (a thin, lighted telescope) inserted through a small incision (typically at the umbilicus) to visualize the abdominal and pelvic organs. Carbon dioxide gas is insufflated to create a working space. Additional small incisions (ports) allow insertion of instruments.

Synonyms:

Laparotomy

A surgical incision into the abdominal cavity, typically a midline vertical or transverse (Pfannenstiel) incision, providing wide access to the abdominal and pelvic organs.

Synonyms:

Large Airway Obstruction

Obstruction of airways with diameter > 2 mm (trachea and main bronchi). It causes significant symptoms including stridor, dyspnea, and impaired secretion clearance. It may be fixed (stenosis, tumor) or

variable (tracheomalacia, vocal cord dysfunction). Flow-volume loops show characteristic patterns.

Synonyms:

Large Bowel Obstruction

Mechanical blockage of the colon most commonly caused by colorectal cancer, volvulus, or diverticular stricture. Clinical presentation includes progressive abdominal distension, constipation, and obstipation. The cecum is at highest risk of perforation with distal obstruction. Diagnosis is by CT scan identifying the site and cause.

Synonyms:

Large for Gestational Age

Birth weight or fetal size above the 90th percentile for gestational age. It is associated with maternal diabetes, excessive maternal weight gain, and genetic or constitutional factors and increases the risk of shoulder dystocia, birth trauma, and neonatal hypoglycemia.

Synonyms:

Large Intestine

Final GI segment (approximately 1.5 meters) from ileocecal valve to rectum. Six segments: cecum, ascending, transverse, descending, sigmoid colon, rectum. Absorbs water, electrolytes, and vitamins (K, biotin) from colonic bacteria. Characterized by haustra, taenia coli, and epiploic appendages.

Synonyms:

Laron Syndrome

An inherited disorder of growth-hormone signaling, usually caused by growth-hormone-receptor defects. It produces severe postnatal growth failure, characteristic facial features, and very low insulin-like growth factor 1 despite elevated circulating growth hormone.

Synonyms:

Larva currens from Strongyloides

A rapidly moving, itchy skin eruption caused by larvae of *Strongyloides stercoralis*.

Synonyms:

Laryngeal Cancer

Malignant tumor arising in the larynx, most commonly squamous cell carcinoma. Risk factors include tobacco, alcohol, and selected HPV-related disease; persistent hoarseness, dysphagia, odynophagia, stridor, or neck mass requires laryngoscopic evaluation and biopsy.

Synonyms:

Laryngeal candidiasis

Fungal infection of the larynx by *Candida* species, causing hoarseness, dysphagia, and throat pain, most commonly in immunocompromised patients or those using inhaled corticosteroids.

Synonyms:

Laryngeal Nerve Damage

Injury to the recurrent or superior laryngeal nerves causing hoarseness, vocal-cord weakness, swallowing difficulty, or airway compromise. Common causes include thyroid or neck surgery, malignancy, trauma, and compression along the nerve pathway.

Synonyms:

Laryngeal Prosthesis

A device used to help restore speech after removal of the larynx, commonly through a one-way valve placed between the trachea and esophagus.

Synonyms:

Laryngectomy

Surgical removal of part or all of the larynx, most often for squamous cell carcinoma of the larynx or hypopharynx and less often for severe trauma or refractory aspiration. Total laryngectomy requires a permanent tracheostomy, so the patient breathes through a neck stoma; partial laryngectomy preserves voice and swallowing.

Synonyms:

Laryngectomy Tube

Tube maintaining airway after total laryngectomy. Types: silicone, metal. Indications: laryngeal cancer, trauma. Complications: obstruction, infection, granulation.

Synonyms:

Laryngitis

Inflammation of the larynx and vocal cords that presents with hoarseness, voice loss, sore throat, dry cough, and a sensation of a lump in the throat (globus sensation), and it may be acute or chronic.

Synonyms:

Laryngocele

Abnormal air-filled dilation of the laryngeal saccule that may be internal, external, or combined, presenting with hoarseness, neck swelling, or airway obstruction.

Synonyms:

Laryngomalacia

Dynamic collapse of supraglottic laryngeal tissue during inspiration, causing congenital stridor in infants. Most cases improve with growth, but feeding difficulty, apnea, hypoxemia, or failure to thrive requires specialist assessment and possible intervention.

Synonyms:

Laryngopharyngeal Reflux

Retrograde movement of gastric contents above the upper esophageal sphincter into the larynx and pharynx, producing chronic hoarseness, throat clearing, globus sensation, cough, excessive throat mucus, and laryngospasm, often without heartburn.

Synonyms:

Laryngoscope

Device for visualizing vocal cords during intubation. Blades: Mac (curved), Miller (straight).

Synonyms:

Laryngoscopy

A medical procedure used to visualise the larynx (voice box) and adjacent structures of the throat. Types: (1) Indirect laryngoscopy: the simplest technique, using a laryngeal mirror angled at 120 degrees to reflect the laryngeal image, with a headlight or external light source.

Synonyms:

Laryngospasm

A protective reflex causing involuntary adduction of the vocal cords, producing partial or complete airway obstruction. It is common during light anesthesia, emergence, and in pediatric patients. Triggers include secretions, blood, airway manipulation, and suctioning.

Synonyms:

Larynx

The larynx, commonly known as the voice box, is a complex organ located in the anterior neck between the pharynx and the trachea that serves three primary functions: phonation (voice production), protection of the lower airway from aspiration during swallowing, and regulation of airflow during respiration.

Synonyms:

Laser (Vascular)

A catheter-based laser system used to modify or remove selected vascular lesions or obstructive tissue.

Synonyms: Vascular

Laser Ablation

The use of focused laser energy to heat, destroy, or seal targeted tissue. The technique is used in selected vascular, ophthalmic, dermatologic, and other procedures.

Synonyms:

Laser Dentistry

Use of lasers for various procedures: caries detection, soft tissue surgery, whitening, periodontal therapy.

Synonyms:

Laser Fiber

Optical fiber for laser delivery in surgery. Used in lithotripsy, tumor ablation.

Synonyms:

Laser Trabeculoplasty

A minimally invasive laser procedure used in the

treatment of open-angle glaucoma that lowers intraocular pressure by improving the outflow of aqueous humor through the trabecular meshwork.

Synonyms:

LASIK

LASIK, or laser-assisted in situ keratomileusis, is a refractive surgical procedure that corrects myopia, hyperopia, and astigmatism by reshaping the corneal stroma using an excimer laser, after creating a thin corneal flap with either a microkeratome (a mechanical blade) or a femtosecond laser.

Synonyms:

LASIK (Laser-Assisted In Situ Keratomileusis)

A refractive surgical procedure that reshapes the cornea using an excimer laser to correct myopia, hyperopia, and astigmatism, thereby reducing dependence on glasses or contact lenses.

Synonyms: Laser-Assisted In Situ Keratomileusis

Lassa Fever

An acute viral hemorrhagic illness caused by Lassa virus, an arenavirus, endemic in West Africa (Nigeria, Sierra Leone, Guinea, Liberia). Transmission: exposure to excreta (urine, feces) of the multimammate rat (*Mastomys natalensis*), the natural reservoir. Incubation: 6-21 days.

Synonyms:

Last Menstrual Period

The first day of the last normal menstrual period, used to estimate gestational age and the due date. Requires regular menstrual cycles and reliable recall. Limitations: irregular cycles, recent oral contraceptive use, early pregnancy bleeding mistaken for menses, and poor recall.

Synonyms:

Latarjet Procedure

Surgical procedure for shoulder instability using coracoid process transfer. Provides bony block to prevent recurrent dislocation.

Synonyms:

Late Decelerations

A fetal heart rate pattern with a gradual decrease (onset to nadir >30 seconds) that starts at or after the peak of the contraction and returns to baseline after the contraction ends. Associated with uteroplacental insufficiency (reduced oxygen transfer across the placenta).

Synonyms:

Late Effects

Health problems occurring months to years after cancer treatment. Cardiac, pulmonary, endocrine, secondary cancers.

Synonyms:

Late Preterm (34-36 weeks)

Births occurring from 34 weeks 0 days through 36 weeks 6 days of gestation. These infants have greater risks than term infants of respiratory, temperature, glucose, jaundice, feeding, and readmission problems.

Synonyms: 34-36 weeks

Latent Infection

Persistent infection in which an infectious agent remains in a host in a nonreplicating or intermittently replicating state without active clinical disease. Reactivation can occur when immune control is impaired, as in latent tuberculosis.

Synonyms:

Latent Phase of Labor

The early part of the first stage of labor, beginning with regular contractions and gradual cervical change before active labor. The transition to active labor is assessed clinically, and the duration varies widely between individuals.

Synonyms:

Latent Tuberculosis Infection

An immune response to *Mycobacterium tuberculosis* without clinical or microbiologic evidence of active disease. It is usually asymptomatic and not contagious, but it can reactivate; treatment decisions depend on age, immune status, exposure risk,

test results, and drug interactions.

Synonyms:

Lateral

Positioned away from the midline of the body. Opposite of medial. Example: the thumb is lateral to the little finger in anatomical position.

Synonyms:

Lateral Collateral Ligament Injury

Tear of the LCL, less common than MCL injury but more significant. Mechanism: varus stress to the knee (direct blow to medial knee). Presents with lateral knee pain, swelling, and varus laxity. Part of the posterolateral corner (PLC) — when injured, causes significant rotational instability.

Synonyms:

Lateral Cuneiform

Located between intermediate cuneiform and cuboid, articulating with navicular, intermediate cuneiform, cuboid, and third metatarsal. Contributes to the transverse arch and lateral foot column. Injuries typically from high-energy midfoot trauma.

Synonyms:

Lateral Rotation

Rotation of a limb away from the median plane of the body.

Synonyms:

Latex Allergy

An immune-mediated hypersensitivity reaction to natural rubber latex. Contact may cause dermatitis, urticaria, rhinitis, asthma, or anaphylaxis, especially in healthcare and occupational settings.

Synonyms:

Latissimus Dorsi Muscle

Broadest back muscle forming the posterior axillary wall, from T7-L5 spinous processes, thoracolumbar fascia, iliac crest, and lower ribs to the intertubercular groove floor. Innervated by thoracodorsal nerve (C6-C8). Adducts, medially rotates, extends

the arm powerfully in swimming/rowing/climbing. Common reconstructive surgery flap.

Synonyms:

Lawton IADL Scale

Instrumental ADLs: phone use, shopping, food preparation, housekeeping, laundry, transportation, medication management, finance management.

Synonyms:

Laxative

A drug that promotes bowel evacuation, used for constipation and bowel preparation. Classes: bulk-forming (psyllium, methylcellulose), osmotic (polyethylene glycol, lactulose, magnesium salts), stimulant (senna, bisacodyl), stool softener (docusate), and lubricant (mineral oil). Choice depends on constipation type and patient factors.

Synonyms:

LD50

Lethal dose for 50% of test population. Measure of acute toxicity. Lower LD50 = more toxic. Measured in mg/kg body weight. Ethical concerns limit animal testing.

Synonyms:

LDL

Low-density lipoprotein; the 'bad' cholesterol that transports cholesterol to peripheral tissues and is the principal driver of atherosclerosis. Elevated LDL is a major modifiable cardiovascular risk factor; guidelines target LDL levels based on global risk (statin intensity).

Synonyms:

Lead Poisoning

Neurotoxic, hematological, renal effects. Sources: paint, water, gasoline, occupational. Children more vulnerable. Treatment: chelation (succimer, EDTA, dimercaprol), remove exposure. Blood lead level guides treatment.

Synonyms:

Lead-Time Bias

The appearance of improved survival after screening because diagnosis occurs earlier, even when the time of death is unchanged. It can make screening appear beneficial without reducing mortality.

Synonyms:

Leber Congenital Amaurosis

The most severe inherited retinal dystrophy, presenting at birth or within the first few months of life with profound visual impairment, nystagmus, and pupillary light-near dissociation.

Synonyms:

Left Anterior Descending Artery

A major branch of the left coronary artery that travels in the anterior interventricular groove and supplies the anterior left ventricle, much of the interventricular septum, and the apex. Its occlusion can cause extensive anterior myocardial infarction.

Synonyms:

Left Atrial Myxoma

A usually benign primary cardiac tumor, commonly arising from the interatrial septum in the left atrium. It may obstruct mitral inflow or cause embolic and constitutional symptoms such as fever, weight loss, or fatigue.

Synonyms:

Left Atrium

Receives oxygenated blood from 4 pulmonary veins. Most posterior chamber forming the cardiac base on chest radiography. Smooth walls from absorbed pulmonary veins; small auricle with pectinate muscles. Mitral valve separates it from the left ventricle.

Synonyms:

Left Bundle Branch

A continuation of the bundle of His that divides into anterior and posterior fascicles. The anterior fascicle supplies the anterior and superior left ventricular wall; the posterior fascicle supplies the inferior and posterior wall.

Synonyms:

Left hemiparesis, gaze deviated to the right

A clinical finding indicating a right hemisphere lesion, likely a right middle cerebral artery stroke. Gaze deviation toward the right suggests the lesion is in the right frontal eye field, which normally drives gaze to the contralateral (left) side; when damaged, the intact left frontal eye field drives gaze ipsilaterally (to the right).

Synonyms:

Left Hypochondriac Region

Upper left abdomen lateral to the epigastric region, containing the spleen, stomach fundus, splenic flexure, and pancreatic tail. Important for evaluating splenomegaly, gastric pathology, and splenic infarction. The spleen is normally not palpable below the costal margin; enlargement into this region is a significant finding.

Synonyms:

Left Iliac Region

Lower left abdomen containing the descending colon, sigmoid colon, and left ureter. Important for evaluating diverticulosis and diverticulitis, most commonly affecting the sigmoid colon here. Palpation may reveal masses from inflammatory bowel disease or colorectal cancer.

Synonyms:

Left Main Coronary Artery

The short vessel arising from the left aortic sinus and dividing principally into the left anterior descending and circumflex arteries. Significant left-main disease jeopardizes a large proportion of left-ventricular myocardium.

Synonyms:

Left testicular torsion

Acute rotation of the left testis on its spermatic cord, obstructing blood flow and causing ischemia. It is a urological emergency presenting with sudden severe left scrotal pain, nausea, vomiting, and a high-riding, horizontally oriented testis with absent cremasteric reflex.

Synonyms:

Left Ventricle

Thickest cardiac chamber (13-15 mm), pumping oxygenated blood into the aorta for systemic distribution. Generates approximately 120 mmHg systolic pressure. Receives blood through the mitral valve; ejects through the aortic valve.

Synonyms:

Left Ventricular Noncompaction

A rare cardiomyopathy characterized by prominent myocardial trabeculations with deep intertrabecular recesses, thought to result from arrested myocardial compaction during embryogenesis. It may present with heart failure, arrhythmias, or thromboembolism.

Synonyms:

Left-sided superior vena cava

A congenital venous anomaly where the left superior vena cava drains into the coronary sinus instead of the right atrium via the right SVC. It is the most common thoracic venous anomaly, present in 0.3–0.5% of the general population. Usually asymptomatic but relevant during central venous catheterization or cardiac surgery.

Synonyms:

Leg Ulcer

An open sore on the leg that fails to heal normally, often caused by poor venous circulation, arterial disease, diabetes, pressure, or inflammation. Pain, spreading redness, fever, or black tissue requires prompt assessment.

Synonyms:

Legg-Calve-Perthes Disease

Idiopathic avascular necrosis of the femoral head in children, typically ages 4-8 years. More common in boys (4:1) and Caucasian children. Presents with limping (antalgic gait), hip/knee pain, and limited hip range of motion (especially abduction and internal rotation). Etiology: temporary disruption of blood supply to the femoral head.

Synonyms:

Legg–Calvé–Perthes disease

Idiopathic avascular necrosis of the femoral head in children, typically between ages two and twelve, resulting from disrupted blood supply to the capital femoral epiphysis. It presents with insidious onset of hip pain, limp, and restricted range of motion.

Synonyms:

Legionella Pneumonia

From *Legionella pneumophila* in water systems. Presents with high fever, diarrhea, confusion, and hyponatremia. Diagnosis by urinary antigen test. Treatment is fluoroquinolones or macrolides.

Synonyms:

Legionella pneumophila

A gram-negative rod that causes Legionnaires' disease, a severe pneumonia, and Pontiac fever, a milder illness. The organism is found in aquatic environments and is transmitted through inhalation of contaminated water droplets. Risk factors include age, smoking, and immunosuppression.

Synonyms:

Legionnaires' Disease

A severe form of pneumonia caused by *Legionella pneumophila*, a Gram-negative aerobic bacillus that is found naturally in freshwater environments (lakes, streams) and artificially in water systems (air conditioning cooling towers, hot tubs, decorative fountains, plumbing systems, showers, humidifiers).

Synonyms:

Leiomyoma

Uterine fibroid: a benign smooth muscle tumor of the uterus (estrogen/progesterone-sensitive), the most common pelvic tumor in women. Locations: subserosal, intramural, submucosal (most symptomatic).

Synonyms:

Leiomyoma (Fibroid)

A benign tumor of uterine smooth muscle that may

cause heavy menstrual bleeding, pelvic pressure, pain, or no symptoms.

Synonyms: Fibroid

Leiomyosarcoma

A malignant tumor of smooth muscle, most often arising in the uterus, retroperitoneum, or gastrointestinal tract.

Synonyms:

Leishmania donovani

A protozoan parasite that causes visceral leishmaniasis (kala-azar), transmitted by the bite of infected female phlebotomine sandflies. The organism exists as flagellated promastigotes in the sandfly gut and as non-flagellated amastigotes within human macrophages.

Synonyms:

Leishmaniasis

A parasitic disease caused by protozoa of the genus *Leishmania*, transmitted by the bite of infected female phlebotomine sandflies. Visceral leishmaniasis (kala-azar): caused by *L. donovani*/*L. infantum* – fever, hepatosplenomegaly, pancytopenia, weight loss, hypergammaglobulinaemia; fatal if untreated.

Synonyms:

Length-Time Bias

The tendency of screening to preferentially detect slower-growing or less aggressive disease because it remains detectable for a longer preclinical period. It can exaggerate the apparent benefit of screening.

Synonyms:

Lens

Transparent biconvex avascular structure behind the iris/pupil, suspended by zonular fibers from the ciliary body. Provides approximately one-third of refractive power and allows accommodation (focusing on near objects by changing shape). Concentric lens fiber layers from surface epithelium, surrounded by a capsule.

Synonyms:

Lentigo maligna

A melanoma in situ that occurs on chronically sun-damaged skin, most commonly on the face of elderly individuals. It presents as a large, irregularly pigmented, slow-growing macule with variegated shades of brown and black. The radial growth phase may persist for years before invasion occurs.

Synonyms:

Leopold Maneuvers

A systematic abdominal palpation technique used to determine fetal position and presentation. Four maneuvers: (1) fundal grip identifies fetal lie (head vs breech), (2) umbilical grip locates the fetal back, (3) Pawlik grip identifies the presenting part and its position, (4) pelvic grip confirms presentation and attitude.

Synonyms:

Lepromatous leprosy

The disseminated, multibacillary pole of the leprosy spectrum characterised by poor cell-mediated immunity to *Mycobacterium leprae*, resulting in widespread skin nodules, plaques, and diffuse infiltration with thickening of the skin and facial features (leonine facies).

Synonyms:

Leprosy

A chronic infection caused mainly by *Mycobacterium leprae*, affecting skin, peripheral nerves, and sometimes other organs.

Synonyms:

Leprosy (Hansen's Disease)

A chronic infection caused mainly by *Mycobacterium leprae* that primarily affects the skin and peripheral nerves and can cause sensory loss and weakness.

Synonyms: Hansen's Disease

Leptin

A hormone produced mainly by adipose tissue that signals stored-energy status to the brain and influences appetite and energy balance.

Synonyms:

Leptomeningeal Metastasis

Spread of cancer to the leptomeninges and cerebrospinal fluid (carcinomatous meningitis), causing multifocal neurologic deficits; managed with intrathecal chemotherapy and involved-field radiation.

Synonyms:

Leptospirosis

A zoonotic bacterial infection caused by spirochaetes of the genus *Leptospira*, transmitted through contact with water or soil contaminated with the urine of infected animals (rodents, cattle, dogs). Incubation period 5-14 days. Mild form: fever, headache, myalgia (especially calves), conjunctival suffusion.

Synonyms:

Leriche Syndrome

Aortoiliac occlusive disease causing reduced blood flow to the pelvis and lower limbs. The classic presentation includes buttock or thigh claudication, diminished femoral pulses, and erectile dysfunction, although symptoms vary with the extent of collateral circulation.

Synonyms:

Lesion

A general term for any abnormal change in tissue structure due to disease or injury.

Synonyms:

Lesser Curvature

Concave medial stomach border from gastroesophageal junction to pylorus. Attachment site for the lesser omentum connecting to the liver, containing right/left gastric arteries. Most common gastric ulcer site. The angular incisure marks the body-antrum junction. Cancer here may cause early obstruction from the narrow lumen.

Synonyms:

Lesser Trochanter

Small conical posteromedial proximal femoral promi-

nence. Insertion for iliopsoas (primary hip flexor). Isolated fractures in adults may indicate pathologic fracture from metastatic disease; in adolescents may result from iliopsoas avulsion. Visible on lateral hip radiographs.

Synonyms:

Lethal-Means Counseling

A preventive intervention that reduces access to firearms, medications, toxic substances, or other methods of self-harm during periods of elevated risk. It is conducted collaboratively and is an important component of suicide prevention.

Synonyms:

Leucocyte (White Blood Cell)

A blood cell involved in immune defense against infection, foreign substances, and abnormal cells.

Synonyms: White Blood Cell

Leucopenia

A decreased total white blood cell count below the normal reference range ($< 4.0 \times 10^9/L$). Leucopenia is often due to a decrease in neutrophils (neutropenia) or lymphocytes (lymphopenia).

Synonyms:

Leukemia

A group of blood cancers involving abnormal proliferation of blood-forming cells in the bone marrow or blood. Leukemias are classified by the cell lineage and by clinical course, including acute and chronic forms.

Synonyms:

Leukemia cutis

Infiltration of the skin by leukemic cells, presenting as papules, nodules, or plaques. It is more common in acute myeloid leukemia and indicates a poorer prognosis.

Synonyms:

Leukemia Genetics

Acute lymphoblastic leukemia (ALL): Philadelphia chromosome (t9;22), Hyperdiploidy, ETV6-RUNX1

fusion. Acute myeloid leukemia (AML): t8;21, t15;17 (APL), FLT3 mutations. Chronic myeloid leukemia (CML): Philadelphia chromosome (BCR-ABL).

Synonyms:

Leukemic infiltration of the gingiva

Gingival enlargement caused by infiltration of leukemic cells, most commonly in acute myeloid leukemia, particularly the monocytic subtype. The gingiva becomes swollen, erythematous, friable, and may bleed spontaneously. It results from leukemic cell proliferation within the gingival connective tissue.

Synonyms:

Leukemoid Reaction

A marked reactive increase in the white-cell count, usually with prominent neutrophilia and immature granulocytes, caused by severe infection, inflammation, malignancy, or tissue injury. It resembles leukemia but is not a clonal hematologic malignancy.

Synonyms:

Leukocyte Adhesion Deficiency

LAD-I (ITGB2 mutation, CD18 deficiency): absent CD11/CD18 integrins → impaired neutrophil adhesion/transmigration → delayed umbilical cord separation (>30 days), recurrent soft tissue infections without pus formation (leukocytosis >20,000), poor wound healing, periodontitis. Severe: death by age 2 without HSCT.

Synonyms:

Leukocyte Alkaline Phosphatase

An enzyme activity measured in mature neutrophils using a cytochemical stain, historically reported as a leukocyte alkaline phosphatase (LAP) score. The score is typically low in chronic myeloid leukaemia and increased in many leukemoid reactions, infections, pregnancy, and other reactive states.

Synonyms:

Leukocytoclastic Vasculitis

A histopathologic pattern of small-vessel vasculi-

tis characterized by neutrophilic debris, fibrinoid change, and vessel-wall inflammation. Clinically it often presents with palpable purpura; causes may be cutaneous-limited or associated with systemic disease.

Synonyms:

Leukocytosis

An increased total white blood cell count above the normal reference range ($> 11 \times 10^9/L$ in adults).

Synonyms:

Leukonychia

White discoloration of the nails. True leukonychia: involves the nail matrix and moves distally with nail growth (punctate, striate/Mees lines from arsenic poisoning, or total).

Synonyms:

Leukoplakia

A clinical term for a white patch or plaque on the oral mucosa that cannot be rubbed off and cannot be characterized clinically as any other definable lesion (WHO). Leukoplakia is a potentially malignant disorder of the oral cavity, with a risk of malignant transformation to squamous cell carcinoma of approximately 1-5% per year.

Synonyms:

Leukopoiesis

The production and development of white blood cells (leukocytes) from hematopoietic stem cells in the bone marrow, regulated by colony-stimulating factors and interleukins.

Synonyms:

Leukotomy

A neurosurgical procedure involving the cutting of white matter fibers in the prefrontal cortex, also known as frontal lobotomy or prefrontal leukotomy. Developed by Egas Moniz (Nobel Prize 1949) and Walter Freeman.

Synonyms: frontal lobotomy or prefrontal leukotomy.

Levator Ani

The primary pelvic floor muscle complex supporting the pelvic organs, forming a hammock from the pubic symphysis to the coccyx. Composed of the pubococcygeus, puborectalis, and iliococcygeus muscles. Innervated by the pudendal nerve (S2-S4).

Synonyms:

Lewy Body Dementia

Dementia with visual hallucinations, parkinsonism, fluctuating cognition. Alpha-synuclein pathology. Treatment: cholinesterase inhibitors, avoid antipsychotics.

Synonyms:

Lewy Body Disease

A neurodegenerative disorder associated with abnormal neuronal alpha-synuclein aggregates. Dementia with Lewy bodies commonly features fluctuating cognition, recurrent visual hallucinations, REM sleep behavior disorder, and spontaneous parkinsonism; sensitivity to antipsychotics may occur.

Synonyms:

Leydig Cell Tumor

A testicular sex cord-stromal tumor that secretes testosterone or estrogen, causing precocious puberty or gynecomastia; most are benign and treated by orchidectomy.

Synonyms:

Lfgren Syndrome

Acute sarcoidosis with bilateral hilar lymphadenopathy, erythema nodosum, and ankle polyarthralgia. It often resolves spontaneously and generally has a favorable prognosis, although follow-up is needed. Associated with HLA-DR3.

Synonyms:

Li-Fraumeni Syndrome

An inherited cancer-predisposition syndrome most often caused by a pathogenic TP53 variant. It confers high lifetime risks of sarcomas, breast cancer, brain tumors, adrenocortical carcinoma, leukemia, and other early-onset malignancies.

Synonyms:

LI-RADS

Liver Imaging-Reporting and Data System. Standardizes reporting of liver imaging in patients with cirrhosis. Used for hepatocellular carcinoma diagnosis.

Synonyms:

Libido

Sexual desire or drive, influenced by biological, psychological, and social factors.

Synonyms:

Libido and Sexual Performance

Libido (sexual desire) is modulated by a complex interplay of hormonal (testosterone, estrogen, prolactin), neurologic, psychological, and relational factors.

Synonyms:

Lice

Pediculosis: infestation by blood-sucking lice—head lice (*Pediculus humanus capitis*, common in children, scalp), body lice (*Pediculus humanus corporis*, clothing/seams, associated with poor hygiene and epidemic typhus transmission), and pubic/crab lice (*Phthirus pubis*, sexually transmitted).

Synonyms:

Lice Infestations

Pediculosis is infestation by head, body, or pubic lice. Head lice cause scalp pruritus and nits attached to hair shafts; body lice live mainly in clothing; pubic lice affect coarse hair-bearing regions.

Synonyms:

Lichen

A descriptive dermatological term referring to a flat-topped, firm, papular skin lesion resembling the lichen plant (a symbiotic organism of algae and fungi growing on rocks and trees). Lichenoid describes lesions that resemble lichen planus or lichenoid drug eruptions.

Synonyms:

Lichen Planus

A T-cell mediated inflammatory condition affecting skin, mucous membranes, nails, and hair. Classic presentation: the 6 Ps (pruritic, purple, polygonal, planar, papules, plaques), often with Wickham striae (white lacy network on surface). Oral lichen planus affects buccal mucosa and may be erosive.

Synonyms:

Lichen Sclerosus

A chronic inflammatory skin disease most commonly affecting anogenital skin. It presents as ivory-white, atrophic plaques with wrinkled paper-like appearance. In women, it predominantly affects the vulva and perianal region (figure-eight distribution). In men, it affects the glans penis and foreskin (balanitis xerotica obliterans).

Synonyms:

Lichen Simplex Chronicus

A thickened, leathery plaque caused by chronic scratching and rubbing (itch-scratch cycle). It commonly affects the neck, ankles, lower legs, and genital area. It is a form of neurodermatitis associated with stress and anxiety.

Synonyms:

Liddle Syndrome

Autosomal dominant condition caused by gain-of-function mutations in the ENaC sodium channel subunits leading to constitutive sodium reabsorption and potassium secretion in the collecting duct. Presents with severe hypertension, hypokalemia, and metabolic alkalosis occurring in childhood or young adulthood.

Synonyms:

Liddle Syndrome Treatment

Liddle syndrome is an autosomal dominant cause of early-onset hypertension with hypokalemia and metabolic alkalosis caused by gain-of-function mutations in ENaC sodium channel subunits. Aldosterone levels are suppressed.

Synonyms:

Life Expectancy

The average number of additional years a person of a specified age is expected to live under current mortality conditions.

Synonyms:

Ligament

A dense, fibrous connective tissue band that connects bone to bone, providing passive joint stability and guiding joint motion. Ligaments are composed predominantly of type I collagen fibers (parallel orientation, crimped pattern) and elastin fibers (10-20% in some ligaments), arranged in bundles.

Synonyms:

Ligand

Any molecule that binds specifically to a biological receptor, macromolecule, or active site. In pharmacology and physiology, ligands include hormones, neurotransmitters, drugs, and toxins that bind receptors to initiate (agonist), block (antagonist), or modulate signaling.

Synonyms:

Ligation

The surgical process of tying off a blood vessel or duct using a suture or clip to prevent bleeding or block fluid flow.

Synonyms:

Ligation (Vascular)

Surgical tying, clipping, or sealing of a blood vessel to stop or redirect blood flow.

Synonyms: Vascular

Ligature

Any cord, wire, rope, fabric, or flexible object used to constrict the neck, bind limbs, suspend the body, or inflict injury. The resulting pale groove-shaped abrasion may be horizontal with petechiae in homicidal strangulation, or oblique and upward in hanging.

Synonyms:

Light Therapy

Treatment that uses selected wavelengths or inten-

sity of light for conditions such as some skin disorders, seasonal depression, or neonatal jaundice.

Synonyms:

Light's Criteria

An effusion is exudative if any one is met: pleural protein/serum protein > 0.5, pleural LDH/serum LDH > 0.6, or pleural LDH > 2/3 upper limit of normal serum LDH.

Synonyms:

Light-near dissociation

A pupillary abnormality in which the pupil does not constrict to light but does constrict during accommodation (near response). Classically seen in Argyll Robertson pupils (neurosyphilis) and also in midbrain lesions, diabetes mellitus, and optic nerve disease. Differentiates from tonic pupil (Adie pupil) by preserved near response.

Synonyms:

Likelihood Ratio

A ratio that describes how much a test result changes the odds of disease. The positive likelihood ratio is sensitivity divided by one minus specificity; the negative likelihood ratio is one minus sensitivity divided by specificity.

Synonyms:

Limbic Encephalitis

Inflammation of the limbic system, often presenting subacutely with memory impairment, seizures, psychiatric or behavioral change, and sleep disturbance. It may be autoimmune, paraneoplastic, infectious, or of unknown cause.

Synonyms:

Limbic System

A set of interconnected brain structures located in the medial temporal lobe and around the corpus callosum, involved in emotion, memory, motivation, behaviour, and autonomic regulation. The term was coined by Paul Broca (1878, *le grand lobe limbique*) and expanded by Papez (1937, Papez circuit) and MacLean (1952, 'visceral brain').

Synonyms:

Linea Aspera

Prominent longitudinal posterior femoral shaft ridge from converging muscle attachment lines. Insertion for adductor magnus, vastus medialis/lateralis, and short head of biceps femoris. Thickest femoral cortex, resisting bending forces. Diverges distally into supracondylar lines.

Synonyms:

Linea Nigra

A dark brown or black vertical line appearing on the abdomen during pregnancy, extending from the pubic symphysis to the umbilicus or beyond. Caused by hormonal stimulation of melanocytes, resulting in hyperpigmentation. More prominent in darker-skinned women.

Synonyms:

Linear Energy Transfer

Energy deposited per unit path length. High LET (alpha, neutrons) more biologically effective.

Synonyms:

Linear IgA bullous dermatosis

An autoimmune blistering disease caused by linear deposition of IgA at the basement membrane zone. It produces tense blisters, sometimes in annular or "string of pearls" patterns, and may be idiopathic or drug-induced.

Synonyms:

Lingua villosa nigra

A benign condition characterized by elongation and dark pigmentation of the filiform papillae of the tongue, often associated with tobacco use, poor oral hygiene, or antimicrobial therapy.

Synonyms:

Lingual artery

A branch of the external carotid artery supplying the tongue, floor of mouth, and sublingual structures. It arises anterior to the hypoglossal nerve and courses deep to the hyoglossus muscle. Lingual

artery aneurysm or thrombosis is rare but can cause life-threatening hemorrhage or tongue ischemia.

Synonyms:

Linitis Plastica

A diffuse infiltrative form of gastric carcinoma in which tumour cells spread through the stomach wall, producing marked thickening and rigidity with loss of normal distensibility. It may cause early satiety, weight loss, nausea, vomiting, or vague upper-abdominal symptoms.

Synonyms:

Linkage

Co-inheritance of nearby genetic markers and disease gene. Measured by recombination fraction (θ). LOD score >3 indicates linkage.

Synonyms:

Lipase

An enzyme that breaks down fats into smaller molecules. Blood lipase testing is commonly used when pancreatitis is suspected, although an abnormal result is not specific in every case.

Synonyms:

Lipedema

A chronic disorder of abnormal, usually symmetrical deposition of painful subcutaneous adipose tissue, predominantly affecting the legs and sometimes the arms. The feet and hands are typically spared, and easy bruising, tenderness, and progressive functional limitation may occur.

Synonyms:

Lipemia retinalis

A creamy, pinkish-white discolouration of the retinal vessels caused by severely elevated serum triglycerides, typically exceeding 2,000 mg/dL. It is a sign of extreme hypertriglyceridaemia and indicates a risk for acute pancreatitis, requiring urgent lipid-lowering therapy and dietary management.

Synonyms:

Lipid

Diverse group of hydrophobic molecules including triglycerides (energy storage), phospholipids (membranes), cholesterol (membranes, steroid precursor), fat-soluble vitamins (A, D, E, K). Triglycerides: glycerol + 3 fatty acids. Fatty acids: saturated (no double bonds) vs. unsaturated (one or more double bonds).

Synonyms:

Lipid Emulsion Therapy

The antidote for local anesthetic systemic toxicity. The mechanism involves the lipid sink theory (lipid phase sequesters lipophilic local anesthetics from neural and cardiac tissue) and metabolic theory (lipid provides fatty acid substrate to ischemic myocardium).

Synonyms:

Lipid Panel

Measurement of total cholesterol, LDL-C, HDL-C, and triglycerides. Fasting (9-12 hours) or non-fasting acceptable for screening. Desirable levels: total cholesterol <200 mg/dL, LDL <100 mg/dL (<70 for very high risk), HDL >40 (men) or >50 (women) mg/dL, triglycerides <150 mg/dL.

Synonyms:

Lipoatrophy

Loss of subcutaneous adipose tissue at specific sites, most commonly caused by repeated subcutaneous injections of insulin or other medications, or associated with autoimmune conditions and HIV lipodystrophy.

Synonyms:

Lipodystrophy

Abnormal distribution or loss of body fat, which may be inherited or caused by medicines, metabolic disease, or repeated injections.

Synonyms:

Lipodystrophy Syndromes

Rare conditions characterized by selective loss of adipose tissue leading to severe insulin resistance,

diabetes, and hypertriglyceridemia. Congenital generalized lipodystrophy involves loss of all body fat from birth. Familial partial lipodystrophy involves loss of limb and truncal fat with fat accumulation in face and neck.

Synonyms:

Lipofuscin

A yellow-brown granular pigment composed of oxidized lipids and cross-linked proteins that accumulates progressively within cells with age, particularly in post-mitotic cells such as neurons, cardiac myocytes, and hepatocytes.

Synonyms:

Lipogenesis

The synthesis of fatty acids and triglycerides from acetyl-CoA and other carbon sources. It occurs mainly in liver and adipose tissue when energy and carbohydrate are abundant and is stimulated by insulin.

Synonyms:

Lipoid Nephrosis

A historical term for minimal change disease, a glomerular disorder causing nephrotic syndrome through increased glomerular permeability to proteins. It is especially common in children and typically shows diffuse podocyte foot-process effacement on electron microscopy.

Synonyms:

Lipoid Pneumonia

Lung inflammation caused by accumulation of lipid-laden macrophages in the alveoli. Exogenous lipoid pneumonia results from aspiration of mineral oil, petroleum jelly, or oil-based nose drops. Endogenous lipoid pneumonia occurs distal to bronchial obstruction. HRCT shows ground-glass opacities with low-attenuation areas (fat density).

Synonyms:

Lipolysis

Hydrolysis of stored triglycerides in adipocytes to release non-esterified fatty acids and glycerol. It

is stimulated by catecholamines and fasting-related hormonal signals and inhibited by insulin.

Synonyms:

Lipoma

The most common benign soft tissue tumor, composed of mature adipocytes. It presents as a soft, mobile, painless subcutaneous nodule, commonly on the trunk, neck, and proximal extremities. Lipomas grow slowly and may be multiple (familial multiple lipomatosis). Diagnosis is clinical; ultrasound or MRI for deep or atypical lesions.

Synonyms:

Lipomatosis

A rare condition characterized by the diffuse, symmetric, non-encapsulated proliferation of mature adipose tissue, most commonly affecting the pelvis and lower extremities. Unlike simple lipomas, lipomatosis involves infiltration of fat into surrounding structures without encapsulation, making surgical excision difficult.

Synonyms:

Lipoprotein

Complex of lipids and proteins transporting hydrophobic lipids in aqueous blood. Classes: chylomicrons (dietary lipids), VLDL (endogenous triglycerides), LDL (cholesterol delivery), HDL (reverse cholesterol transport). ApoB-100 in LDL; apoA-1 in HDL. Elevated LDL cholesterol is a major risk factor for atherosclerosis.

Synonyms:

Lipoprotein Lipase

Hydrolyzes triglycerides in chylomicrons and VLDL. Activated by insulin.

Synonyms:

Lipoprotein Metabolism

The production, transport, modification, and clearance of particles that carry lipids through the blood.

Synonyms:

Liposarcoma

A malignant tumor of fat cells, usually arising in the deep soft tissues of the thigh or retroperitoneum; well-differentiated, myxoid, and pleomorphic subtypes are recognized.

Synonyms:

Liposomal amphotericin B

A liposomal formulation of amphotericin B used in the treatment of severe systemic fungal infections, with reduced nephrotoxicity compared to conventional amphotericin B. The liposomal formulation encapsulates amphotericin B within lipid vesicles, which alters the drug's biodistribution and reduces renal tubular damage.

Synonyms:

Liquefactive Necrosis

Characterized by the complete enzymatic digestion of dead cells, resulting in a liquid, viscous mass that eventually liquefies and forms a cystic cavity.

Synonyms:

Liquid Biopsy

Analysis of blood or another body fluid for cellular material, DNA, RNA, or other molecules released by a tumor or other disease process.

Synonyms:

Lisch Nodules

Benign, dome-shaped melanocytic hamartomas on the iris, commonly seen in neurofibromatosis type 1. They usually do not affect vision and support the diagnosis when interpreted with other clinical findings.

Synonyms:

Lissencephaly

A severe brain malformation characterized by a smooth cerebral surface due to absent (agyria) or decreased (pachygyria) sulcation and gyration, caused by impaired neuronal migration during 12-16 weeks of gestation.

Synonyms:

Listeria monocytogenes

A gram-positive, facultatively anaerobic rod that causes listeriosis, a foodborne infection. The organism is transmitted through contaminated food, particularly deli meats, soft cheeses, and ready-to-eat foods. It can grow at refrigeration temperatures.

Synonyms:

Listeriosis

A bacterial infection caused by *Listeria monocytogenes*, transmitted through contaminated food (deli meats, soft cheeses, unpasteurized dairy, produce). Risk groups: pregnant women (fever, flu-like illness), neonates (sepsis, meningitis), immunocompromised, and elderly.

Synonyms:

Listeriosis in Pregnancy

Infection with *Listeria monocytogenes*, a foodborne Gram-positive rod. Pregnant women are 10-20 times more susceptible than the general population. Ingestion of contaminated food (deli meats, soft cheeses, unpasteurized dairy, raw sprouts). Maternal symptoms: fever, myalgias, GI symptoms (nausea, diarrhea).

Synonyms:

Lithiasis

Stone formation. Nephrolithiasis, ureterolithiasis, cystolithiasis, urethrolithiasis.

Synonyms:

Lithium Toxicity

A potentially life-threatening condition caused by lithium levels exceeding the therapeutic range (0.6–1.2 mEq/L). Mild toxicity (1.5–2.0 mEq/L): nausea, vomiting, diarrhea, coarse tremor, muscle weakness. Moderate toxicity (2.0–2.5 mEq/L): confusion, ataxia, blurred vision, dysarthria.

Synonyms:

Lithotripsy

A medical procedure that uses shock waves to fragment kidney stones (renal calculi) into smaller pieces that can pass through the urinary tract. See Shock

Wave Lithotripsy.

Synonyms:

Lithotripsy Probe

A device that fragments a stone using mechanical, ultrasonic, laser, or shock-wave energy during a stone-removal procedure.

Synonyms:

Lithotripter Probe

A probe used to break urinary or biliary stones into smaller fragments for removal.

Synonyms:

Little Area

The highly vascular region of the anterior nasal septum where several arteries meet and where most anterior nosebleeds originate.

Synonyms:

Livedo Reticularis

A net-like, violaceous discoloration of the skin caused by altered blood flow in small cutaneous vessels. It may be temporary and cold-induced or associated with vascular, autoimmune, infectious, or clotting disorders.

Synonyms:

Liver

The largest internal organ, located in the right upper quadrant of the abdomen beneath the diaphragm.

Synonyms:

Liver Abscess

Focal collection of pus within the liver parenchyma. Pyogenic abscesses are most commonly from biliary tract infection or hematogenous spread from portal or systemic infection. Amoebic abscesses are caused by *Entamoeba histolytica* predominantly in tropical regions. Presents with fever, right upper quadrant pain, and hepatomegaly.

Synonyms:

Liver Biopsy

Percutaneous, transjugular, or laparoscopic sampling of liver tissue for histological evaluation. Indicated for staging fibrosis, diagnosing specific liver diseases, and assessing treatment response. The procedure is guided by ultrasound for accuracy. Complications include bleeding, pain, and pneumothorax.

Synonyms:

Liver Cancer

A malignant tumor arising in the liver. Hepatocellular carcinoma is the most common primary type in adults; risk factors include chronic liver disease, viral hepatitis, alcohol-related liver injury, and some toxins.

Synonyms:

Liver Cirrhosis

Advanced hepatic fibrosis with regenerative nodules surrounded by dense fibrous septa representing the end result of chronic liver injury. Common etiologies include chronic viral hepatitis, alcoholic liver disease, and nonalcoholic steatohepatitis.

Synonyms:

Liver Disease Diet

An individualized eating plan for a person with liver disease. It may address adequate energy and protein, sodium or fluid intake, alcohol avoidance, and nutrient deficiencies according to the condition.

Synonyms:

Liver Enzymes

ALT, AST, ALP, GGT. Markers of liver injury. ALT more specific for liver.

Synonyms:

Liver Failure

A life-threatening condition resulting from severe impairment of hepatic synthetic, metabolic, and detoxification functions.

Synonyms:

Liver Function Tests

Blood tests used to assess liver injury, bile-flow

abnormalities, and liver synthetic function. They commonly include aminotransferases, alkaline phosphatase, bilirubin, albumin, and clotting tests; results must be interpreted together with the clinical context.

Synonyms:

Liver Health

Essential for metabolism, detoxification, protein synthesis, bile production, and immune function.

Synonyms:

Liver Lobule

The functional unit of the liver: a hexagonal structural unit centered on a central (hepatic) venule, with portal triads (portal vein, hepatic artery, bile ductule) at the corners.

Synonyms:

Liver Mass

Abnormality in liver detected on imaging. Benign: hemangioma, focal nodular hyperplasia, adenoma. Malignant: hepatocellular carcinoma, metastasis, cholangiocarcinoma.

Synonyms:

Liver Transplant

Surgical replacement of a diseased liver with a healthy liver or part of a liver from a donor.

Synonyms:

Liver Transplantation

Surgical replacement of a diseased liver with a healthy donor organ indicated for end-stage liver disease, acute liver failure, and select hepatocellular carcinomas within Milan criteria. Requires lifelong immunosuppression with calcineurin inhibitors, antimetabolites, and corticosteroids.

Synonyms:

Living Will

A type of advance directive that records a person's preferences for future medical treatment if the person cannot communicate or decide.

Synonyms:

Living Will (Advance Statements)

A legally binding written document that specifies a person's preferences for medical treatment if they become unable to make decisions for themselves in the future (loss of capacity). Living wills are a type of advance directive (or advance decision/advance statement in the UK).

Synonyms: Advance Statements

Livor Mortis (Lividity)

Post-mortem purplish-red discoloration of dependent body parts resulting from gravitational settling of blood in uncompressed capillaries and small veins following cessation of circulation.

Synonyms: Lividity

Livor Mortis (Postmortem Lividity)

Purplish-red discoloration of dependent body parts following death, caused by gravitational pooling of blood in uncompressed capillaries and venules. Starts within 30 min–2 hours, becomes fixed after 6–12 hours.

Synonyms: Postmortem Lividity

LLETZ

Large Loop Excision of the Transformation Zone, also called LEEP (Loop Electrosurgical Excision Procedure). A common outpatient procedure used to diagnose and treat cervical intraepithelial neoplasia (CIN).

Synonyms: LEEP (Loop Electrosurgical).

Loa loa

The African eye worm, a filarial nematode transmitted by *Chrysops* deer flies, endemic to the rainforests of West and Central Africa. Adult worms migrate subcutaneously, causing Calabar swellings, and may cross the subconjunctiva of the eye, causing visible worm migration. Microfilariae are detected in daytime peripheral blood.

Synonyms:

Loading Dose

A higher initial dose of a drug administered to rapidly achieve therapeutic plasma concentrations,

followed by lower maintenance doses to sustain the steady state. The loading dose is calculated as: $\text{Loading dose} = (\text{Vd} \times \text{desired concentration}) / \text{bioavailability}$.

Synonyms:

Lobar Pneumonia

Consolidation involving an entire lobe. Most commonly caused by *S. pneumoniae*. Classic progression: congestion, red hepatization, gray hepatization, resolution.

Synonyms:

Lobectomy

Surgical removal of a lobe of an organ. Most commonly lung lobectomy (removal of one lobe of the lung, performed for lung cancer, bronchiectasis, abscess, or benign tumor) or temporal lobectomy (removal of the anterior temporal lobe for drug-resistant temporal lobe epilepsy).

Synonyms:

Local Anesthesia

The reversible abolition of sensation in a circumscribed area by infiltration or topical application of local anesthetic agents (lidocaine, bupivacaine) without loss of consciousness. Maximum safe dosing must be observed to avoid systemic toxicity. Epinephrine prolongs duration but is avoided in end-arterial territories.

Synonyms:

Local Anesthetic

A medication that causes reversible loss of sensation in a specific, localized area of the body without affecting consciousness. Local anesthetics block voltage-gated sodium channels in nerve cell membranes, preventing action potential generation and propagation.

Synonyms:

Local Anesthetic Systemic Toxicity

A life-threatening complication caused by elevated plasma concentration of local anesthetic, most commonly from inadvertent intravascular injection or

rapid absorption.

Synonyms:

Local Anesthetic Toxicity

CNS toxicity: tinnitus, perioral numbness, seizures. Cardiovascular toxicity: arrhythmias, hypotension, cardiac arrest. Treatment: lipid emulsion therapy (Intralipid), seizure control, ACLS.

Synonyms:

Local Invasion

Tumor growth into surrounding tissues. Distinguishes malignant from benign.

Synonyms:

Lochia

Vaginal discharge following delivery that undergoes characteristic changes over the puerperium. Lochia rubra (days 1-4): red, bloody discharge containing blood, decidual tissue, and fetal membranes. Lochia serosa (days 5-10): pinkish-brown discharge with serous fluid, leukocytes, and organisms.

Synonyms:

Locked-in Syndrome

A neurological condition in which the patient is fully conscious and aware but cannot move or speak due to complete paralysis of all voluntary muscles except for vertical eye movements and blinking (total locked-in syndrome: loss of all eye movements).

Synonyms:

Lockjaw (Tetanus)

A serious neurologic illness caused by tetanospasmin produced by *Clostridium tetani*. It causes painful muscle stiffness and spasms, often beginning in the jaw.

Synonyms: Tetanus

Locomotor Ataxia (Tabes Dorsalis)

A late manifestation of untreated tertiary syphilis (neurosyphilis) caused by infection with *Treponema pallidum*, involving progressive degeneration of the dorsal columns (fasciculus gracilis and cuneatus) and dorsal roots of the spinal cord.

Synonyms: Tabes Dorsalis

Locus

Specific position of gene on chromosome. Designated by chromosome number, arm (p/q), band, subband. Example: 7q31.2 (CFTR gene).

Synonyms:

Loneliness

Subjective feeling of isolation. Associated with depression, cognitive decline, mortality.

Synonyms:

Long COVID

Persistent or recurrent symptoms following acute SARS-CoV-2 infection, lasting at least several weeks and sometimes months or years. Common manifestations include fatigue, post-exertional malaise, cognitive difficulty, breathlessness, dysautonomia, and altered smell or taste.

Synonyms:

Long QT Syndrome

A disorder of cardiac repolarization that prolongs the QT interval and increases the risk of torsades de pointes and sudden cardiac death. It may be inherited or acquired from medicines, electrolyte abnormalities, or other conditions.

Synonyms:

Long-Acting Beta-2 Agonists

Bronchodilators that provide sustained relaxation of airway smooth muscle for maintenance treatment of asthma or chronic obstructive pulmonary disease. In asthma, they are used with an inhaled corticosteroid rather than alone.

Synonyms:

Long-Term Care

Assistance with ADLs/IADLs for extended period. Settings: home, assisted living, nursing home. Funding: Medicaid, long-term care insurance, out-of-pocket. Planning essential for elderly and families.

Synonyms:

Long-Term Effect

A health effect that develops or persists after prolonged exposure, treatment, or disease. It may be beneficial, harmful, or uncertain.

Synonyms:

Long-Term Rehabilitation

Chronic condition management. Focus on maintaining function, preventing complications.

Synonyms:

Loop Diuretics

A class of potent diuretics that act on the thick ascending limb of the loop of Henle by inhibiting the sodium-potassium-chloride cotransporter, blocking sodium and chloride reabsorption and producing a powerful natriuresis and diuresis. The prototypical loop diuretic is furosemide, with other agents including bumetanide and torsemide.

Synonyms:

Loop of Henle

U-shaped tubular segment consisting of a thin descending limb, thin ascending limb, and thick ascending limb. The descending limb is permeable to water but not solutes, allowing water reabsorption into the hypertonic medullary interstitium.

Synonyms:

Loratadine

A second-generation (non-sedating) H1 antihistamine used for allergic rhinitis and chronic urticaria. Peripherally selective—minimal CNS penetration, minimal anticholinergic effects. Once daily; prodrug (desloratadine is active). Adverse effects: headache, dry mouth, and rare sedation. Available OTC.

Synonyms:

Lordosis

The normal inward curvature of the cervical and lumbar spine. Excessive lumbar lordosis (hyperlordosis): increased pelvic tilt, commonly due to hip flexor tightness, weak abdominals, or pregnancy. Presents with low back pain and forward protrusion of the abdomen and buttocks.

Synonyms:

Loss of Appetite

Reduced desire to eat. It may result from illness, medicines, mood disorders, pain, or other causes.

Synonyms:

Loss-of-Function Variant

A genetic variant that reduces or abolishes the normal activity of the encoded gene product. Disease risk depends on the gene, inheritance pattern, residual function, and whether one or both copies are affected.

Synonyms:

Low Back Pain

Pain or discomfort in the lower back, commonly caused by muscle or ligament strain, disc disease, arthritis, or spinal nerve irritation. Weakness, numbness, new bladder or bowel problems, fever, major trauma, or unexplained weight loss are warning signs requiring prompt medical assessment.

Synonyms:

Low Birth Weight

Birth weight <2500 g, often due to prematurity and/or intrauterine growth restriction; further classified: very low (<1500 g), extremely low (<1000 g), and small for gestational age.

Synonyms:

Low FODMAP Diet

Dietary intervention for irritable bowel syndrome that restricts fermentable oligosaccharides, disaccharides, monosaccharides, and polyols, which are short-chain carbohydrates poorly absorbed in the small intestine and rapidly fermented by colonic bacteria producing gas and drawing water into the intestinal lumen.

Synonyms:

Low Molecular Weight Heparin

A shorter heparin preparation that predominantly inhibits factor Xa through antithrombin and is used to prevent or treat thrombosis.

Synonyms:

Low Testosterone (Hypogonadism)

Low testosterone (male hypogonadism) is a clinical syndrome of deficient testosterone production by the testes (primary) or inadequate stimulation by the pituitary/hypothalamus (secondary), defined as total testosterone <300 ng/dL on two morning measurements with consistent symptoms.

Synonyms: Hypogonadism

Low Vision

Visual impairment that cannot be fully corrected with spectacles, contact lenses, medication, or surgery, impairing daily activities. Managed with low-vision aids (magnifiers, telescopes, adaptive devices), lighting, and occupational therapy.

Synonyms:

Low-Dose CT Scan

CT protocol using reduced radiation for lung cancer screening. Detects small nodules at earlier stages. False positives require follow-up per Fleischner guidelines.

Synonyms:

Low-Phosphorus Diet

A dietary pattern limiting phosphorus intake for selected patients with chronic kidney disease or persistent hyperphosphatemia. It emphasizes avoidance of phosphate additives while maintaining adequate protein and overall nutritional status.

Synonyms:

Low-Potassium Diet

A dietary pattern limiting potassium intake when clinically indicated, usually for hyperkalemia or advanced kidney disease. It must be individualized because unnecessary restriction can reduce diet quality and cause inadequate intake of fruits and vegetables.

Synonyms:

Low-Residue Diet

A short-term diet limiting dietary fiber and foods that leave substantial undigested material in the

bowel. It may be used in selected gastrointestinal conditions or around certain procedures but is not a universal treatment for inflammatory bowel disease.

Synonyms:

Lower Airway Obstruction

Narrowing of airways below the carina, causing expiratory wheezing and airflow obstruction on spirometry. Causes include asthma, COPD, bronchiectasis, and foreign body. It is characterized by scooped-out expiratory limb on flow-volume loops and reduced FEV1/FVC ratio.

Synonyms:

Lower Extremity Venous Doppler

An ultrasound examination of the leg veins that assesses compressibility and blood flow, commonly to evaluate suspected deep venous thrombosis.

Synonyms:

Lower Motor Neuron Syndrome

A pattern caused by injury to an anterior horn cell, motor cranial-nerve nucleus, nerve root, plexus, or peripheral motor nerve. It typically causes weakness, reduced tone and reflexes, muscle atrophy, and fasciculations in affected muscles.

Synonyms:

Lower Urinary Tract Symptoms

Urinary symptoms arising from the bladder, bladder outlet, or urethra, classified as storage symptoms, voiding symptoms, and post-micturition symptoms. Causes include benign prostatic obstruction, overactive bladder, infection, neurologic disease, stricture, and malignancy.

Synonyms:

Ludwig Angina

A rapidly spreading cellulitis of the floor of the mouth and submandibular spaces, usually arising from an infected lower molar. Tongue elevation, dysphagia, drooling, and airway obstruction can develop rapidly and require emergency management.

Synonyms:

Ludwig's Angina

A rapidly progressive, life-threatening cellulitis of the submandibular, sublingual, and submental spaces, typically originating from an odontogenic infection of the lower second or third molars.

Synonyms:

Lugano Classification

Staging and response assessment for lymphoma.

Synonyms:

Lumbago

A non-specific term for low back pain, typically referring to acute or chronic pain in the lumbar region (between the lower ribs and the gluteal folds). Lumbago is a symptom, not a diagnosis.

Synonyms:

Lumbar Disc Herniation

Protrusion or extrusion of lumbar disc material through the annulus fibrosus, which may irritate or compress a nerve root and cause back or leg pain. Symptoms, examination findings, and imaging determine its significance and treatment.

Synonyms:

Lumbar puncture

Insertion of a needle into the lower spinal canal to obtain cerebrospinal fluid or administer selected medicines.

Synonyms:

Lumbar Puncture (Spinal Tap)

Insertion of a needle into the subarachnoid space at L3-L4 or L4-L5 to obtain CSF. Indications: suspected meningitis/encephalitis, subarachnoid hemorrhage, demyelinating disease, and intrathecal therapy. Contraindications: increased intracranial pressure (papilledema, mass lesion on CT), coagulopathy, and infection at the puncture site.

Synonyms: Spinal Tap

Lumbar Radiculopathy

A condition caused by compression, irritation, or inflammation of a spinal nerve root in the lumbar

spine, resulting in pain radiating into the lower extremity along the distribution of the affected nerve root (sciatica). The most commonly affected nerve roots are L4, L5, and S1.

Synonyms:

Lumbar Vertebrae

Largest and strongest mobile vertebrae for weight-bearing. Large kidney-shaped bodies, short hatchet-shaped spinous processes, sagittally-oriented facets allowing primarily flexion/extension. Lordotic curvature. Most common disc herniation site, particularly L4-L5 and L5-S1 causing sciatica.

Synonyms:

Lumpectomy

Breast-conserving surgery excising a malignant lesion with a margin of normal tissue, combined with whole-breast radiation to yield survival equivalent to mastectomy for early-stage cancer. An acceptable margin is no ink on tumor for invasive cancer and 2 mm for ductal carcinoma in situ.

Synonyms:

Lunate

Crescent-shaped proximal row carpal bone between scaphoid and triquetrum. Most commonly dislocated carpal bone from falls on extended wrists. Dislocation may compress the median nerve causing acute carpal tunnel syndrome. Vulnerable to avascular necrosis (Kienbock disease) from its precarious blood supply.

Synonyms:

Lung

The paired, cone-shaped respiratory organs located in the thoracic cavity, responsible for gas exchange (oxygen uptake, carbon dioxide elimination). Each lung is divided into lobes: the right lung has three (superior, middle, inferior), the left lung has two (superior, inferior) with a cardiac notch accommodating the heart.

Synonyms:

Lung Abscess

Localized necrosis with cavitation containing purulent material. Causes include aspiration and anaerobic bacteria. CXR shows thick-walled cavity with air-fluid level.

Synonyms:

Lung Cancer

Leading cancer death worldwide. Types: small cell, non-small cell. Risk factors: smoking, radon, asbestos.

Synonyms:

Lung Compliance

The change in lung volume produced by a given change in transpulmonary pressure. Reduced compliance increases the work of breathing, whereas excessive compliance may occur when elastic recoil is lost, as in emphysema.

Synonyms:

Lung Disease

Lung disease encompasses disorders affecting the airways, parenchyma, pleura, pulmonary vasculature, and chest wall.

Synonyms:

Lung Function Tests

Physiologic tests that measure aspects of breathing, including airflow, lung volumes, and gas transfer, to assess respiratory function.

Synonyms:

Lung herniation

Protrusion of lung tissue through a defect in the chest wall, most commonly occurring after thoracic trauma, thoracotomy, or in association with rib fractures and chronic obstructive pulmonary disease. Presents with a reducible chest wall mass that increases with coughing or straining and may cause pain and respiratory compromise.

Synonyms:

Lung Protective Ventilation

A ventilation strategy using low tidal volumes (6

mL/kg ideal body weight), plateau pressure < 30 cmH₂O, appropriate PEEP, and permissive hypercapnia to minimize ventilator-induced lung injury. It is the standard of care for ARDS and is used in all mechanically ventilated patients to reduce barotrauma, volutrauma, and biotrauma.

Synonyms:

Lung Transplant

Surgical replacement of one or both lungs from a donor for end-stage lung disease: COPD (most common), idiopathic pulmonary fibrosis, cystic fibrosis, pulmonary hypertension, and other advanced conditions. Types: single, bilateral, heart-lung.

Synonyms:

Lung Transplantation

Surgical replacement of a diseased lung with a healthy lung from a donor. Indications include IPF, COPD, CF, PAH, and bronchiectasis. Options include single lung transplant, double lung transplant, or heart-lung transplant. Post-transplant immunosuppression is required lifelong. Complications include rejection and infection.

Synonyms:

Lupus

A group of autoimmune diseases in which the immune system attacks the body's own tissues. Systemic lupus erythematosus may affect the skin, joints, kidneys, blood cells, nervous system, and other organs. Also called SLE.

Synonyms: SLE.

Lupus Erythematosus

Systemic lupus erythematosus is a chronic autoimmune disease characterized by production of autoantibodies against nuclear antigens, leading to immune complex-mediated inflammation and tissue damage in multiple organ systems. The disease predominantly affects women of childbearing age, with a striking female predominance of 9 to 1.

Synonyms:

Lupus Erythematosus (Systemic Lupus

Erythematosus - SLE)

A chronic multisystem autoimmune disease predominantly affecting women (9:1 female:male) of childbearing age, characterized by autoantibody production (ANA 98%, anti-dsDNA 70%, anti-Sm 30%) and immune complex deposition causing tissue injury.

Synonyms: Systemic Lupus Erythematosus - SLE

Lupus Nephritis

Kidney inflammation caused by systemic lupus erythematosus. It can cause blood or protein in the urine, high blood pressure, and reduced kidney function. Classification is based largely on kidney-biopsy findings, and treatment depends on the class, severity, kidney function, and individual risks.

Synonyms:

Lupus pernio

A chronic, violaceous skin lesion of the face and extremities associated with sarcoidosis, indicating a higher risk of systemic involvement and chronic disease.

Synonyms:

Lupus Vulgaris

A chronic, progressive form of cutaneous tuberculosis (TB of the skin) caused by *Mycobacterium tuberculosis*. Once common in Europe, now rare in developed countries but still seen in developing regions.

Synonyms:

Luteinizing Hormone

LH: a gonadotropin secreted by the anterior pituitary, regulating gonadal steroidogenesis. In females: stimulates theca cells to produce androgens (aromatized to estradiol); mid-cycle LH surge triggers ovulation (used in ovulation prediction and timing of intercourse/IVF). In males: stimulates Leydig cells to produce testosterone.

Synonyms:

Lutetium-177

Beta and gamma emitter, half-life 6.7 days. Used

in peptide receptor radionuclide therapy (PRRT) and PSMA therapy. Both therapeutic and imaging capabilities.

Synonyms:

Lyme Disease

A tick-borne infection caused by *Borrelia burgdorferi* (*Ixodes scapularis*, deer tick), endemic to the northeastern and upper midwestern US. Early localized: erythema migrans (bullseye rash, >5cm) at tick bite site, fatigue, fever, myalgia.

Synonyms:

Lymph

A clear, watery fluid that circulates through the lymphatic system, derived from interstitial fluid that has entered the lymphatic capillaries.

Synonyms:

Lymph Node / Gland

Small, bean-shaped organs of the lymphatic system that filter lymph and serve as sites for immune cell activation. Lymph nodes are distributed throughout the body (approximately 500-600 in total) and are concentrated in regions: cervical, axillary, inguinal, mediastinal, mesenteric, para-aortic, and iliac chains.

Synonyms:

Lymph Node Dissection

Removal of lymph nodes for staging or treatment. Sentinel node biopsy less invasive alternative.

Synonyms:

Lymph Node Structure

Small bean-shaped lymphoid organs (1-25 mm) distributed along lymphatic vessels, filtering lymph and mounting immune responses. Each has a cortex (outer, containing B-cell follicles with germinal centers), paracortex (deep cortex, containing T-cells and dendritic cells), and medulla (inner, containing medullary cords and sinuses).

Synonyms:

Lymphadenectomy

Surgical removal of lymph nodes, either sentinel or regional, for staging or therapeutic purposes; examples include axillary, inguinal, cervical, and retroperitoneal lymph node dissection.

Synonyms:

Lymphadenitis

Inflammation and enlargement of lymph nodes, usually caused by bacterial or viral infection. Affected nodes may be tender, warm, or fluctuant, and the condition may be localized or generalized.

Synonyms:

Lymphadenopathy

Enlargement of lymph nodes (greater than 1 cm in diameter, or >1.5 cm for inguinal nodes). Lymphadenopathy can be localised (single or contiguous region) or generalised (three or more non-contiguous regions).

Synonyms:

Lymphangiectasis

Abnormal dilatation of lymphatic vessels. It may be congenital or acquired and can cause lymph leakage, oedema, protein-losing enteropathy, chylous effusions, or pulmonary and pleural complications depending on the affected site.

Synonyms:

Lymphangiography

Contrast imaging of lymphatic vessels. Evaluates lymphatic obstruction, fistulas. Largely replaced by MRI/CT.

Synonyms:

Lymphangioleiomyomatosis

A rare, progressive cystic lung disease caused by proliferation of abnormal smooth muscle-like cells (LAM cells) in the lungs, lymphatics, and kidneys. It occurs almost exclusively in women of childbearing age. HRCT shows thin-walled cysts throughout both lungs. It may be associated with tuberous sclerosis complex.

Synonyms:

Lymphangioma

A benign congenital malformation of the lymphatic system, composed of dilated lymphatic channels. Lymphangiomas are typically present at birth (90% diagnosed by age 2) and result from failure of the lymphatic system to develop normal connections with the venous system.

Synonyms:

Lymphangitis

Inflammation of lymphatic channels, usually caused by bacterial infection spreading from a wound or cellulitis. It may produce tender red streaks and enlarged regional lymph nodes; systemic symptoms require prompt medical assessment and treatment.

Synonyms:

Lymphatic System

A network of lymphatic vessels, lymph nodes, and lymphoid organs (tonsils, thymus, spleen, Peyer patches) that returns interstitial fluid (lymph) to the bloodstream, transports dietary fat (chyle), and serves as the conduit for immune surveillance.

Synonyms:

Lymphedema

Persistent swelling caused by accumulation of lymphatic fluid in tissues, usually in an arm or leg.

Synonyms:

Lymphedema (Lymphoedema)

Chronic swelling of a body part due to impaired lymphatic drainage, leading to accumulation of protein-rich interstitial fluid. Primary lymphedema: caused by congenital or hereditary lymphatic maldevelopment.

Synonyms: Lymphoedema

Lymphedema Management

Measures used to reduce swelling and preserve function, including compression, exercise, skin care, and selected forms of manual lymphatic therapy.

Synonyms:

Lymphocyte

A type of white blood cell (leukocyte) that is the primary cellular component of the adaptive immune system. Lymphocytes account for 20-40% of circulating white blood cells ($1.0\text{--}4.8 \times 10^9/\text{L}$). Three main types: (1) T lymphocytes (T cells): develop in the thymus, responsible for cell-mediated immunity.

Synonyms:

Lymphocytic Colitis

Chronic inflammatory bowel disease characterized by increased intraepithelial lymphocytes exceeding twenty per one hundred surface epithelial cells in the colonic mucosa without significant subepithelial collagen band thickening.

Synonyms:

Lymphocytic Interstitial Pneumonia

A rare ILD characterized by diffuse polyclonal lymphocytic infiltration of the lung parenchyma. It is strongly associated with Sjgren syndrome and HIV. HRCT shows ground-glass opacities, thin-walled cysts, and lymphadenopathy. Treatment is corticosteroids for symptomatic disease.

Synonyms:

Lymphocytopenia

A reduced lymphocyte count ($< 1.0 \times 10^9/\text{L}$). Causes: acute (stress, steroids, sepsis, trauma, burns), infections (HIV, viral, tuberculosis, typhoid), immunosuppressive drugs, radiation, marrow failure (aplasia, leukemia, lymphoma), autoimmune (SLE), and congenital immunodeficiencies.

Synonyms:

Lymphogranuloma venereum

A sexually transmitted infection caused by invasive *Chlamydia trachomatis* serovars L1-L3, classically producing transient genital lesions and painful inguinal lymphadenopathy.

Synonyms:

Lymphokine

A cytokine produced by lymphocytes (a subset of cytokines; the term lymphokine is largely historical,

now 'cytokine'). Examples: IL-2, IL-4, IFN-gamma (from T cells), and B-cell growth factors. Mediate lymphocyte communication, activation, and regulation of immune responses.

Synonyms:

Lymphoma

A malignancy of lymphocytes, divided into Hodgkin lymphoma (HL—Reed-Sternberg cells, cervical/supraclavicular nodes, B symptoms, younger adults) and non-Hodgkin lymphoma (NHL—heterogeneous, more common, aggressive or indolent).

Synonyms:

Lymphoma (Hodgkin's and Non-Hodgkin's)

A group of cancers arising from lymphocytes, including Hodgkin lymphoma and the many types of non-Hodgkin lymphoma.

Synonyms: Hodgkin's and Non-Hodgkin's

Lymphopoiesis

The production and maturation of lymphocytes from hematopoietic stem and progenitor cells. It occurs in primary lymphoid organs such as bone marrow and thymus and continues in peripheral lymphoid tissues during immune responses.

Synonyms:

Lymphoscintigraphy

Lymphatic system imaging using Tc-99m nanocolloid injected near lesion. Used for sentinel lymph node biopsy (melanoma, breast cancer), lymphedema evaluation.

Synonyms:

Lynch Syndrome

Hereditary nonpolyposis colorectal cancer syndrome caused by mismatch repair gene mutations including MLH1, MSH2, MSH6, and PMS2 with autosomal dominant inheritance. It increases the risk of colorectal, endometrial, ovarian, gastric, and urinary tract cancers.

Synonyms:

Lysergic Acid Diethylamide

A potent hallucinogenic drug (psychedelic) classified as a Schedule 1 controlled substance (high abuse potential, no accepted medical use). LSD acts as a partial agonist at serotonin 5-HT_{2A} receptors in the prefrontal cortex, leading to altered sensory perception, mood, and cognition.

Synonyms:

Lysogenic Conversion

The acquisition of new properties (genes) by a bacterium when a temperate bacteriophage integrates its genome as a prophage and expresses phage-encoded genes.

Synonyms:

Lysosome

Membrane-bound organelles containing hydrolytic enzymes (acid hydrolases: proteases, lipases, nucleases, glycosidases) functioning at low pH (4.5–5.0) maintained by V-ATPase proton pump. Degrade macromolecules from endocytosis, phagocytosis, and autophagy.

Synonyms:

Macroscopic Hematuria

Visible blood in the urine, which may appear pink, red, or brown. Causes include urinary infection, stones, prostate disease, kidney disease, injury, and cancer; persistent or unexplained bleeding requires medical evaluation.

Synonyms:

Labile Hypertension

Blood pressure that fluctuates substantially over short periods.

Synonyms:

Lactase

An enzyme that breaks down the milk sugar lactose in the small intestine.

Synonyms:

Lacunar Stroke

An ischemic stroke caused by blockage of a small

artery deep within the brain.

Synonyms:

Langerhans Cells

Immune cells in the epidermis that capture antigens and help initiate immune responses.

Synonyms:

Laser Photocoagulation

A laser treatment that seals or destroys abnormal blood vessels, especially in the retina.

Synonyms:

Laser Prostatectomy

A procedure that uses laser energy to remove or vaporize enlarged prostate tissue.

Synonyms:

Learned Insomnia

Persistent difficulty sleeping that is maintained by anxiety and conditioned behaviors associated with sleep.

Synonyms:

Left Ventricular Hypertrophy

Thickening of the muscular wall of the heart's left ventricle.

Synonyms:

Left-Ventricular Assist Device

An implanted mechanical pump that helps the left ventricle circulate blood.

Synonyms:

Leukotriene Modifiers

Medicines that reduce asthma or allergy symptoms by blocking leukotriene production or action.

Synonyms:

Liothyronine Sodium

A synthetic form of the thyroid hormone triiodothyronine used in selected thyroid disorders.

Synonyms:

Lumbar Stenosis

Narrowing of the spinal canal or nerve openings in the lower back.

Synonyms:

Labyrinth Disorder

A disorder of the inner-ear balance structures that may cause vertigo, nausea, or imbalance.

Synonyms:

Laryngostenosis

Narrowing of the larynx that can restrict airflow.

Synonyms:

Latent Tuberculosis

Infection with *Mycobacterium tuberculosis* in which the bacteria remain inactive and cause no symptoms but may later become active.

Synonyms:

Lymphangiomatosis

An uncommon disorder involving excessive or abnormal growth of lymphatic vessels in one or more tissues.

Synonyms:

Lateral Decubitus Position

A side-lying position in which the patient rests on the nonoperative side to provide access to the chest, hip, or flank.

Synonyms:

Lloyd-Davies Position

A modified lithotomy position in which the hips and knees are flexed and the legs are supported, commonly for pelvic or colorectal surgery.

Synonyms:

Lithotomy Position

A supine position in which the hips and knees are flexed and the legs are raised and supported to provide access to the pelvis and perineum.

Synonyms:

Lazy Eye

Reduced vision in one eye caused by abnormal visual development during childhood; also called amblyopia.

Synonyms: amblyopia.

Lip Cancer

Cancer that develops in the tissues of the upper or lower lip.

Synonyms:

Listeria Infection

An infection caused by Listeria bacteria, often acquired from contaminated food.

Synonyms:

Liver Disease

Any disorder that damages or impairs the structure or function of the liver.

Synonyms:

Liver Fibrosis

Excessive formation of scar tissue in the liver after ongoing injury or inflammation.

Synonyms:

Lobular Carcinoma in Situ

Abnormal cells confined to the breast lobules that increase the risk of developing invasive breast cancer.

Synonyms:

Low Sex Drive in Women

Persistently reduced sexual desire in a woman that causes personal distress.

Synonyms:

Low Sperm Count

A semen condition in which the sperm concentration is below the expected reference range.

Synonyms:

Lacteals

Lymphatic vessels in intestinal villi that absorb

dietary fats.

Synonyms:

Laryngopharynx

The lower part of the pharynx that connects the throat with the larynx and esophagus.

Synonyms:

Laser

A device that produces a concentrated beam of light used for diagnosis, treatment, or surgery.

Synonyms:

Lavage

Washing or irrigating a body cavity, organ, or wound with fluid.

Synonyms:

Leptomeninges

The arachnoid mater and pia mater, the two delicate inner membranes covering the brain and spinal cord.

Synonyms:

Leukocytes

White blood cells that help defend the body against infection and other threats.

Synonyms:

Leukorrhea

A whitish vaginal discharge that may be normal or may indicate infection or another disorder.

Synonyms:

Lichenification

Thickening and accentuation of skin markings caused by chronic scratching or rubbing.

Synonyms:

Lingual Tonsils

Collections of lymphoid tissue at the base of the tongue.

Synonyms:

Lumen

The inner space of a hollow organ, vessel, or tube.

Synonyms:

Langer Lines

Natural lines of skin tension that reflect the predominant orientation of collagen fibers in the dermis and may influence surgical scar direction.

Synonyms:

Labiaplasty

Surgical reshaping or reduction of the labia, usually the labia minora, performed for functional symptoms, reconstruction, or selected cosmetic indications. Risks include pain, bleeding, infection, scarring, and altered sensation.

Synonyms:

Lemierre Syndrome

A potentially severe oropharyngeal infection complicated by septic thrombophlebitis of the internal jugular vein and frequently metastatic infection, classically caused by *Fusobacterium necrophorum*.

Synonyms:

Legionnaires Disease

A severe pneumonia caused by *Legionella* bacteria, usually acquired by inhaling contaminated water aerosols. It may also cause gastrointestinal symptoms, confusion, and low serum sodium.

Synonyms:

Labral Tear

A tear in the fibrocartilaginous rim of a joint socket, commonly the shoulder or hip, causing pain, clicking, instability, or reduced range of motion.

Synonyms:

Laryngeal Edema

Swelling of the tissues of the larynx that can narrow the upper airway and cause hoarseness, stridor, or respiratory distress. It may result from allergy, infection, trauma, or airway instrumentation.

Synonyms:

Leukopenia

An abnormally low white-blood-cell count, which may increase susceptibility to infection depending on the cells affected and the severity of the reduction.

Synonyms:

Lymphocytosis

An abnormally increased number or proportion of lymphocytes in the blood, often associated with viral infection, some bacterial infections, or lymphoproliferative disorders.

Synonyms:

Lung Nodule

A rounded, usually well-defined opacity in the lung measuring up to 3 cm on imaging. It may be benign, infectious, inflammatory, or an early manifestation of lung cancer and often requires follow-up assessment.

Synonyms:

Normal Labour

Spontaneous labour at term with regular uterine contractions, progressive cervical dilatation, and delivery through the birth canal without major complication.

Synonyms:

Premature Labour (Preterm Labour)

Labour that begins before 37 completed weeks of pregnancy and may result in preterm birth.

Synonyms: Preterm Labour

Obstructed Labour

Failure of the fetus to pass through the birth canal despite adequate uterine contractions, commonly because of disproportion, abnormal presentation, or an obstructing lesion.

Synonyms:

Precipitate Labour

Unusually rapid labour, often defined as delivery within three hours of the onset of regular contractions.

Synonyms:

Labia

The folds of skin surrounding the entrance to the vagina and urethra, consisting mainly of the labia majora and labia minora.

Synonyms:

Lactobacillus

A genus of bacteria that produces lactic acid and normally forms part of the healthy vaginal and intestinal microbiota; some species are used as probiotics.

Synonyms:

Larva Migrans

A condition caused by migrating larval parasites in human tissues, including cutaneous larva migrans in the skin and visceral larva migrans in internal organs.

Synonyms:

Laryngeal Stridor

A harsh, high-pitched noise caused by turbulent airflow through a narrowed upper airway, often most noticeable during inspiration.

Synonyms:

Legg-Calvé-Perthes Disease (Perthes Disease)

A childhood disorder in which the blood supply to the femoral head is temporarily impaired, causing avascular necrosis, hip pain, stiffness, and possible deformity.

Synonyms: Perthes Disease

Leptomeningitis

Inflammation or infection of the leptomeninges, the arachnoid and pia mater covering the brain and spinal cord.

Synonyms:

Leucoderma (Vitiligo)

Loss of skin pigment producing sharply defined pale or white patches, usually because melanocytes have been destroyed or have stopped functioning.

Synonyms: Vitiligo

Leucorrhoea (Leukorrhoea)

A whitish vaginal discharge that may be physiological or may result from infection, inflammation, or another genital disorder.

Synonyms: Leukorrhoea

Living Will (Advance Directive)

A document stating a person's preferences for future medical treatment if they later lose the capacity to make or communicate decisions.

Synonyms: Advance Directive

Lactational Amenorrhea

Temporary absence of menstrual periods during breastfeeding, caused by suppression of ovulation. It may provide contraceptive protection only when strict criteria for the lactational-amenorrhea method are met. +

labetalol

labetalol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

labium majus

labium majus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

labium minus

labium minus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

labor complication

labor complication is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

labor pain

labor pain is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

laboratory

laboratory is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laboratory procedure

laboratory procedure is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

labradimil

labradimil is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

labyrinthine membrane

labyrinthine membrane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lac operon

lac operon is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lacosamide

lacosamide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lacrimal disease

lacrimal disease is a medical condition or clinical

entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lactam

lactam is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lactation disorder

lactation disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lactobacillaceae

lactobacillaceae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactobacillus acidophilus

lactobacillus acidophilus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactobacillus brevis

lactobacillus brevis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactobacillus casei

lactobacillus casei is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactobacillus fermentum

lactobacillus fermentum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactobacillus gallinarum

lactobacillus gallinarum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactobacillus gasseri

lactobacillus gasseri is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactobacillus jensenii

lactobacillus jensenii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactobacillus johnsonii

lactobacillus johnsonii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactobacillus oris

lactobacillus oris is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactobacillus paracasei

lactobacillus paracasei is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactobacillus rhamnosus

lactobacillus rhamnosus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactobacillus salivarius

lactobacillus salivarius is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactobacillus vaginalis

lactobacillus vaginalis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactococcus

lactococcus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactococcus garvieae

lactococcus garvieae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactococcus lactis

lactococcus lactis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lactoferrin

lactoferrin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lactone

lactone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lactulose

lactulose is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laetrile

laetrile is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lamellar body

lamellar body is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lamellipodium

lamellipodium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lamin

lamin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lamina propria

lamina propria is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laminin

laminin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lamivudine

lamivudine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lamotrigine

lamotrigine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

landolt ring

landolt ring is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Langerhans' cell

Langerhans' cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

language development

language development is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

language disorder

language disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

laniquidar

laniquidar is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lanolin

lanolin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lanosterol

lanosterol is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

lansoprazole

lansoprazole is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

lanthanum

lanthanum is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laparoscope

laparoscope is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laparoscopic colectomy

laparoscopic colectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lapatinib

lapatinib is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

lapatinib ditosylate

lapatinib ditosylate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

large colon

large colon is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laromustine

laromustine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

larotaxel

larotaxel is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

larva

larva is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laryngeal carcinoma

laryngeal carcinoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laryngeal cartilage

laryngeal cartilage is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laryngeal cleft

laryngeal cleft is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laryngeal fistula

laryngeal fistula is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laryngeal hemorrhage

laryngeal hemorrhage is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

laryngeal masks

laryngeal masks is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laryngeal mucositis

laryngeal mucositis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laryngeal nerve

laryngeal nerve is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laryngeal obstruction

laryngeal obstruction is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

laryngeal web

laryngeal web is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

larynx disease

larynx disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

larynx muscle

larynx muscle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

larynx neoplasm

larynx neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

laser capture microdissection

laser capture microdissection is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laser surgery

laser surgery is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

laser therapy

laser therapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lassa virus

lassa virus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lassitude

lassitude is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

latanoprost

latanoprost is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

late endosome

late endosome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

latent syphilis

latent syphilis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lateral meniscus

lateral meniscus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lateral sclerosis

lateral sclerosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lateral ventricle

lateral ventricle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lathyrism

lathyrism is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lauric acid

lauric acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lauroleic acid

lauroleic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lavage fluid

lavage fluid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lead

lead is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leaf senescence

leaf senescence is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

learning

learning is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

learning disorder

learning disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lecithin

lecithin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leclercia

leclercia is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

leclercia adecarboxylata

leclercia adecarboxylata is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lectin

lectin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

LED therapy

LED therapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leech therapy

leech therapy is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

leeche

leeche is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

leflunomide

leflunomide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

left kidney

left kidney is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

left lung

left lung is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leg

leg is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

legal guardian

legal guardian is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

legionella

legionella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

legionella longbeachae

legionella longbeachae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

legionellosis

legionellosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leifsonia

leifsonia is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

leifsonia aquatica

leifsonia aquatica is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

Leigh disease

Leigh disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leiomyomatosis

leiomyomatosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leishmania

leishmania is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

leishmania chagasi

leishmania chagasi is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

leishmania major

leishmania major is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

leishmania mexicana

leishmania mexicana is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

leishmania tropica

leishmania tropica is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lelliottia amnigena

lelliottia amnigena is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leminorella grimontii

leminorella grimontii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

leminorella richardii

leminorella richardii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lenalidomide

lenalidomide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lenograstim

lenograstim is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lens coloboma

lens coloboma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lens disease

lens disease is a medical condition or clinical entity;

assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lens dislocation

lens dislocation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lens subluxation

lens subluxation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lente insulin

lente insulin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lentiform nucleus

lentiform nucleus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lentigo

lentigo is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lentinan

lentinan is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

LEOPARD syndrome

LEOPARD syndrome is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lepidoptera

lepidoptera is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lepirudin

lepirudin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leptin receptor

leptin receptor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leptomeningeal sarcoma

leptomeningeal sarcoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leptospira

leptospira is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leptospiraceae

leptospiraceae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leptotrichia

leptotrichia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leridistim

leridistim is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lerisetron

lerisetron is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

lesion identification

lesion identification is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

less than

less than is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lestaurtinib

lestaurtinib is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

lethal injection

lethal injection is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lethargy

lethargy is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

letrozole

letrozole is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leucine

leucine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leucine zipper

leucine zipper is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leuconostoc

leuconostoc is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

leuconostoc citreum

leuconostoc citreum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

leuconostoc lactis

leuconostoc lactis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

leuconostoc mesenteroides

leuconostoc mesenteroides is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

leuconostocaceae

leuconostocaceae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

leucovorin

leucovorin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leucovorin calcium

leucovorin calcium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leukapheresis

leukapheresis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leukoaraiosis

leukoaraiosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leukocyte

leukocyte is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leukocyte differentiation

leukocyte differentiation is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leukocyte disorder

leukocyte disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leukocyte elastase

leukocyte elastase is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leukocyte trafficking

leukocyte trafficking is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leukocyte transfusion

leukocyte transfusion is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leukodystrophy

leukodystrophy is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leukoencephalopathy

leukoencephalopathy is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leukostasis

leukostasis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leukotriene

leukotriene is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leukotriene degradation

leukotriene degradation is a medical condition or

clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leukotriene receptor

leukotriene receptor is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

leuprolide

leuprolide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

leuprolide acetate

leuprolide acetate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

levalbuterol

levalbuterol is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

levamisole

levamisole is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

levetiracetam

levetiracetam is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

levobunolol

levobunolol is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

levocardia

levocardia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

levocarnitine

levocarnitine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

levodopa

levodopa is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

levofloxacin

levofloxacin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

levoleucovorin

levoleucovorin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

levoleucovorin calcium

levoleucovorin calcium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

levonorgestrel

levonorgestrel is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

levorphanol

levorphanol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Lewy body

Lewy body is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lexatumumab

lexatumumab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

Leydig cell

Leydig cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

liarozole

liarozole is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lice infestation

lice infestation is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lidocaine

lidocaine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ligase

ligase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

cal practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

light coagulation

light coagulation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

light cycle

light cycle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

light microscope

light microscope is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

light microscopy

light microscopy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

light scattering

light scattering is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lignan

lignan is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lignin

lignin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lignoceric acid

lignoceric acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

limb

limb is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

limb bud

limb bud is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

limb development

limb development is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

limb fracture

limb fracture is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

limb girdle

limb girdle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

limb injury

limb injury is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

limb pain

limb pain is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

limb prosthesis

limb prosthesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

limbus corneae

limbus corneae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

linagliptin

linagliptin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

lincomycin

lincomycin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lindane

lindane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lined canister

lined canister is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

linezolid

linezolid is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lingual thyroid

lingual thyroid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lingual tonsil

lingual tonsil is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

liniment

liniment is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

linkage disequilibrium

linkage disequilibrium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

linoleic acid

linoleic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

linolenic acid

linolenic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

linseed oil

linseed oil is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

linsitinib

linsitinib is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

lintuzumab

lintuzumab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

lip

lip is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lip disease

lip disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lip infection

lip infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lip neoplasm

lip neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lipemic index

lipemic index is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lipid bilayer

lipid bilayer is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lipid binding

lipid binding is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lipid disorder

lipid disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lipid droplet

lipid droplet is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lipid metabolism

lipid metabolism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lipid peroxidation

lipid peroxidation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lipid peroxide

lipid peroxide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lipid transport

lipid transport is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lipidomics

lipidomics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lipoblastoma

lipoblastoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lipogranulomatosis

lipogranulomatosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lipoidosis

lipoidosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lipomatous neoplasm

lipomatous neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lipophagy

lipophagy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lipophilicity

lipophilicity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lipopolysaccharide

lipopolysaccharide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

liposome

liposome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

liquid

liquid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

liquid chromatography

liquid chromatography is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

liquid crystal

liquid crystal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

liraglutide

liraglutide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lisch nodule

lisch nodule is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lisinopril

lisinopril is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

listeria

listeria is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

listeria grayi

listeria grayi is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

listeria innocua

listeria innocua is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

listeria ivanovii

listeria ivanovii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

listeria seeligeri

listeria seeligeri is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

listeria welshimeri

listeria welshimeri is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

liter

liter is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

cal practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

literacy

literacy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lithium

lithium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lithium carbonate

lithium carbonate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Little's disease

Little's disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

live birth

live birth is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

livedo racemosa

livedo racemosa is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

liver circulation

liver circulation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

liver damage

liver damage is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

liver disorder

liver disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

liver dysfunction

liver dysfunction is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

liver infection

liver infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

liver neoplasm

liver neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

liver pain

liver pain is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

liver regeneration

liver regeneration is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lobaplatin

lobaplatin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lobe

lobe is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lobeline

lobeline is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lobstein disease

lobstein disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lobucavir

lobucavir is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

lobular carcinoma

lobular carcinoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lobule

lobule is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

local

local is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

cal practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

local therapy

local therapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

localized edema

localized edema is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

localized scleroderma

localized scleroderma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

location

location is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

locomotion

locomotion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

locus coeruleus

locus coeruleus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lod score

lod score is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

loiasis

loiasis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lometrexol

lometrexol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lomustine

lomustine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lonafarnib

lonafarnib is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

longevity

longevity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

longitudinal studies

longitudinal studies is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

long-term potentiation

long-term potentiation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lontucirev

lontucirev is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

loperamide

loperamide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

loperamide hydrochloride

loperamide hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lopinavir

lopinavir is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

lorazepam

lorazepam is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

Lorenzo's oil

Lorenzo's oil is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

losartan

losartan is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

losartan potassium

losartan potassium is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

losoxantrone

losoxantrone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

loss of heterozygosity

loss of heterozygosity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

loteprednol etabonate

loteprednol etabonate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lotion

lotion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

louse

louse is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lovastatin

lovastatin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

love

love is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

low grade

low grade is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lower extremity

lower extremity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lubiprostone

lubiprostone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lubricant

lubricant is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lucanthone

lucanthone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

luciferase

luciferase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Lugol's solution

Lugol's solution is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lumbar plexus

lumbar plexus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Lumbar Region

Lumbar Region is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lumbosacral region

lumbosacral region is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

luminescence

luminescence is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

luminescence type

luminescence type is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lung cyst

lung cyst is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lung development

lung development is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lung fibroma

lung fibroma is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lung injury

lung injury is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lung lavage

lung lavage is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lung neoplasm

lung neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lurtotecan

lurtotecan is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

luteal cell

luteal cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

luteinization

luteinization is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

luteolin

luteolin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

luteolysis

luteolysis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

luteoma

luteoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lux unit

lux unit is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lyase

lyase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lycopene

lycopene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymph leakage

lymph leakage is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymph node

lymph node is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphangiogenesis

lymphangiogenesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphangiomyoma

lymphangiomyoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphangiosarcoma

lymphangiosarcoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lymphatic basin

lymphatic basin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphatic disease

lymphatic disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lymphatic mapping

lymphatic mapping is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphatic tissue

lymphatic tissue is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphatic vessel

lymphatic vessel is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphoblast

lymphoblast is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphoblast count

lymphoblast count is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphocele

lymphocele is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphocyte activation

lymphocyte activation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphocyte count

lymphocyte count is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphocyte proliferation

lymphocyte proliferation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphocytic leukemia

lymphocytic leukemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lymphocytoma cutis

lymphocytoma cutis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphomatoid papulosis

lymphomatoid papulosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lymphopenia

lymphopenia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lymphoproliferative disorder

lymphoproliferative disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

lysine

lysine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lysinibacillus

lysinibacillus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lysogeny

lysogeny is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lysophagy

lysophagy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lysophosphatidylcholine

lysophosphatidylcholine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lysophospholipids

lysophospholipids is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lysozyme test

lysozyme test is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

lyssavirus

lyssavirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

lytic lesion

lytic lesion is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

Synonyms:

M

MacConkey Agar

A selective and differential culture medium used mainly for gram-negative bacteria. Bile salts and crystal violet inhibit many gram-positive organisms, while lactose fermentation produces different colony colors and helps distinguish bacterial groups.

Synonyms:

Macrophage

An immune cell that engulfs microbes, damaged cells, and debris.

Synonyms:

Magenblase Syndrome

Stomach discomfort and bloating caused by swallowing excessive air while eating.

Synonyms: Aerophagia; stomach bubble syndrome

Major Depression

A depressive disorder causing persistent low mood or loss of interest with significant functional impairment.

Synonyms: Major depressive disorder

Major Histocompatibility Complex Molecule

A cell-surface molecule that presents protein fragments to immune cells.

Synonyms: MHC molecule

Maladaptive Stress Response

A persistent or disproportionate stress reaction that harms health or functioning.

Synonyms:

Malignant

Cancerous and capable of invading nearby tissue or spreading to distant sites.

Synonyms:

Mastopexy

Surgery that lifts and reshapes sagging breasts.

Synonyms: Breast lift

Maximizer

A person who seeks the best possible option by comparing many alternatives before deciding.

Synonyms:

Meal Plan

A structured guide to the foods, portions, and timing of meals.

Synonyms:

Medicaid

A public health-insurance program serving eligible people with limited income and resources.

Synonyms:

Medicare

A United States federal health-insurance program primarily serving older adults and some people with disabilities.

Synonyms:

Medigap Insurance

Private supplemental insurance that helps pay certain costs not covered by traditional Medicare.

Synonyms: Medicare supplement insurance

Meglitinides

Short-acting medicines that stimulate pancreatic insulin release to lower blood glucose.

Synonyms:

Melanin

A pigment responsible for much of the color of skin, hair, and eyes and helping protect skin from ultraviolet light.

Synonyms:

Melatonin

A hormone produced mainly by the pineal gland that helps regulate sleep-wake timing.

Synonyms:

Membrane

A thin tissue layer that surrounds a cell, organ, or body cavity.

Synonyms:

Memory T Cells and B Cells

Long-lived immune cells that respond rapidly when they encounter a previously recognized antigen.

Synonyms: Memory lymphocytes

Ménière's Disease

An inner-ear disorder associated with episodic vertigo, fluctuating hearing loss, tinnitus, and ear pressure.

Synonyms: Meniere disease

Metabolic Equivalents

Units estimating the energy cost of physical activity relative to resting metabolism.

Synonyms: METs

Methanobrevibacter Smithii

A methane-producing microorganism commonly found in the human intestine.

Synonyms:

METs

Metabolic equivalents, units used to express the

intensity or energy cost of physical activity.

Synonyms: Metabolic equivalents

MHC Molecule

A major histocompatibility complex molecule that displays antigens to T cells.

Synonyms: Major histocompatibility complex molecule

Microbe

A microorganism, such as a bacterium, fungus, protozoan, or virus.

Synonyms: Microorganism

Microdermabrasion

A cosmetic procedure that mechanically removes a superficial layer of skin.

Synonyms:

Microgram

A unit of mass equal to one-millionth of a gram.

Synonyms: mcg; μg

Micronized

Processed into very small particles to improve dispersion or absorption.

Synonyms:

Microvasculature

The network of the body's smallest blood vessels, including arterioles, capillaries, and venules.

Synonyms:

Migraine Headache

A recurrent headache disorder often causing moderate-to-severe pain, nausea, and sensitivity to light or sound.

Synonyms: Migraine

Milligram

A unit of mass equal to one-thousandth of a gram.

Synonyms: mg

Mindfulness

Deliberate, nonjudgmental attention to present-moment experience.

Synonyms:

Mindfulness Meditation

Meditation practice involving calm, attentive awareness of thoughts, feelings, and bodily sensations.

Synonyms: Insight meditation

Mindfulness-Based Cognitive Behavioral Therapy

Therapy combining mindfulness practices with cognitive and behavioral techniques to address distress.

Synonyms: Mindfulness-based CBT

Mindlessness

Acting or thinking with limited awareness of present surroundings or internal experience.

Synonyms:

Miotic

A substance or medicine that constricts the pupil.

Synonyms: Miotic agent

Monocytes

Large circulating white blood cells that can enter tissues and become macrophages or dendritic cells.

Synonyms:

Morton's Neuroma

Thickening and irritation of a nerve, usually between the toes, causing burning forefoot pain.

Synonyms: Morton neuroma; interdigital neuroma

Motilin

A hormone that helps regulate contractions and movement in the upper gastrointestinal tract.

Synonyms:

Motility

The ability of an organ, especially the intestine, to move its contents.

Synonyms:

Motor Neuron

A nerve cell that controls skeletal or smooth muscle activity.

Synonyms: Motor nerve cell

Mucosa

A moist membrane lining body passages such as the respiratory and digestive tracts.

Synonyms: Mucous membrane

Mucous Cysts

Small fluid-filled cysts near the end joint of a finger, often associated with osteoarthritis.

Synonyms: Digital mucous cyst

Mucous Membrane

A moist tissue lining body cavities that open to the outside, including the nose, mouth, and lungs.

Synonyms: Mucosa

Multi-Infarct Dementia

Cognitive decline caused by the cumulative effects of multiple small strokes.

Synonyms: Vascular dementia

Multinodular Goiter

An enlarged thyroid containing multiple nodules.

Synonyms:

Muscle Fatigue

Reduced ability of a muscle to generate force after sustained or repeated activity.

Synonyms:

Muscle Fibers

Individual contractile cells that combine to form skeletal muscle.

Synonyms: Muscle cells

Muscle-Contraction Headache

A pressure-like headache related to sustained contraction of scalp, neck, or jaw muscles.

Synonyms: Tension-type headache

Muscular Endurance

The ability of a muscle or muscle group to sustain repeated or prolonged effort.

Synonyms:

Muscularis

A smooth-muscle layer in the wall of a hollow organ, especially the intestine.

Synonyms: Muscular layer

Musculoskeletal

Relating to muscles, bones, joints, tendons, ligaments, and related tissues.

Synonyms:

MUSE

A medicated urethral system that delivers a pellet into the urethra to treat erectile dysfunction.

Synonyms: Medicated urethral system for erection

Myalgia

Muscle pain or tenderness.

Synonyms: Myodynia

Mydriatic

A substance or medicine that dilates the pupil.

Synonyms: Mydriatic agent

Myocyte

A muscle cell.

Synonyms: Muscle cell

Myofibrils

Contractile structures inside muscle fibers made of repeating sarcomeres.

Synonyms:

Myofilaments

Actin and myosin protein filaments that slide past each other to produce muscle contraction.

Synonyms: Contractile filaments

Myosin

A motor protein that interacts with actin to generate muscle force.

Synonyms:

Macrobiotics

Diet emphasizing whole grains, vegetables, beans. May be nutritionally inadequate if restrictive. Long-term followers generally healthy but may have deficiencies.

Synonyms:

Macrodonia

Abnormally large teeth. Microdonia: abnormally small teeth.

Synonyms:

Macroglossia

Abnormal enlargement of the tongue that may cause speech or swallowing difficulty, airway obstruction, drooling, or dental malocclusion. Causes include congenital syndromes, endocrine disease, infiltrative disorders, vascular or lymphatic malformations, and tumors.

Synonyms:

Macrolides

A class of bacteriostatic antibiotics that bind to the 50S ribosomal subunit and inhibit translocation of peptidyl-tRNA during protein synthesis. The major macrolides include erythromycin, clarithromycin, and azithromycin.

Synonyms:

Macronutrients

Nutrients needed in large amounts: carbohydrates, protein, fat. Provide energy and structural components.

Synonyms:

Macrophage Activation Syndrome

A life-threatening complication of rheumatic diseases (especially systemic JIA and SLE) characterized by uncontrolled cytokine release and hemophagocytosis.

Synonyms:

Macrosomia

Birth weight exceeding 4000 grams (8 pounds 13 ounces) regardless of gestational age. Risk factors include maternal diabetes, obesity, post-term pregnancy, and prior macrosomia. Complications include shoulder dystocia, brachial plexus injury, clavicular fracture, and neonatal hypoglycemia.

Synonyms:

Macula

The macula is a specialized region of the central retina approximately five and a half millimeters in diameter that is responsible for high-acuity central vision, color perception, and fine detail discrimination, and it contains the highest density of cone photoreceptors in the eye.

Synonyms:

Macula Lutea

Small oval yellowish central retinal area approximately 5.5 mm in diameter for high-acuity vision. Yellow color from xanthophyll pigments (lutein, zeaxanthin) filtering blue light and protecting photoreceptors. The fovea centralis is the central depression (1.5 mm) with highest cone density and no rods.

Synonyms:

Macular

Relating to a macule, a flat, circumscribed change in skin color without a change in texture or elevation. Macules may be caused by pigment, inflammation, vascular change, or other processes and are distinguished from raised lesions such as papules.

Synonyms:

Macular degeneration

A progressive degenerative disease of the central retina (macula) and the leading cause of irreversible vision loss in individuals over age 50 in developed countries, affecting approximately 10 percent of those over 65 and 30 percent over 80.

Synonyms:

Macular Hole

A full-thickness defect of the fovea usually caused by vitreomacular traction, presenting with central scotoma and distorted or reduced central vision. Staged by OCT; surgical vitrectomy with internal limiting membrane peel restores closure in most cases.

Synonyms:

Macular Pucker

An epiretinal membrane of fibrocellular tissue on the inner retinal surface that contracts to distort the macula, causing metamorphopsia and reduced vision. Diagnosed by OCT; vitrectomy with membrane peeling is reserved for visually significant symptoms.

Synonyms:

Macule

A flat, circumscribed area of altered skin color without change in surface texture or thickness, conventionally less than 1 cm in diameter. Larger flat lesions are called patches.

Synonyms:

Maffucci Syndrome

A rare congenital disorder characterized by multiple enchondromas together with soft-tissue hemangiomas or lymphangiomas. Skeletal deformity, limb shortening, pathological fractures, and increased risk of cartilage or other malignancy may occur.

Synonyms:

MAG3 Renal Scan

Nuclear medicine scan evaluating renal function and obstruction. Differential function between kidneys. Non-obstructive dilation does not show delayed excretion. Useful for assessing split renal function and planning surgical interventions.

Synonyms:

Magnesium

A predominantly intracellular cation that stabilizes ATP, supports hundreds of enzymes, and contributes to neuromuscular transmission, nucleic-acid

synthesis, and bone metabolism. Deficiency may cause weakness, tremor, arrhythmias, hypokalemia, or hypocalcemia.

Synonyms:

Magnesium Deficiency

An abnormally low body magnesium level, often caused by poor intake, gastrointestinal loss, renal wasting, or medications. It may cause weakness, tremor, muscle cramps, seizures, cardiac arrhythmias, hypokalemia, and hypocalcemia.

Synonyms:

Magnesium Sulfate for Neuroprotection

Intravenous magnesium sulfate given in selected cases of imminent very preterm birth to reduce the risk of neurologic injury in the infant. The gestational-age criteria, dose, duration, and monitoring follow local obstetric and neonatal guidance.

Synonyms:

Magnetic Resonance Angiography

MRI techniques used to depict arteries or veins, with or without contrast. It may evaluate stenosis, aneurysm, dissection, thrombosis, and vascular malformation without ionizing radiation.

Synonyms:

Magnetic Resonance Cholangiopancreatography

MRI technique visualizing biliary and pancreatic ducts without contrast. Non-invasive alternative to ERCP. Used for choledocholithiasis, biliary strictures, pancreatic pathology.

Synonyms:

Magnetic Resonance Imaging

Uses strong magnetic field and radiofrequency pulses to generate images from hydrogen protons. Excellent soft tissue contrast. No ionizing radiation. Sequences: T1-weighted (fat bright, fluid dark), T2-weighted (fluid bright), FLAIR (suppresses CSF), DWI (diffusion restriction). Contrast: gadolinium-based.

Synonyms:

Magnetic Resonance Safety

The practices used to prevent injury from the static magnetic field, gradient fields, radiofrequency energy, and implanted or ferromagnetic objects in the MRI environment. Screening must address implants, foreign bodies, devices, pregnancy, burns, hearing protection, and projectile risk.

Synonyms:

Magnetic Resonance Spectroscopy

MRI technique measuring metabolic compounds. Used for tumor characterization, metabolic disorders.

Synonyms:

Magnetic Seed

Sentinel lymph node localization using magnetic seed. Alternative to radioactive tracer.

Synonyms:

Magnetic Therapy

PEMF for bone healing, pain. Evidence mixed.

Synonyms:

Mahvash Disease

A rare inherited disorder of glucagon signaling caused by inactivating variants in the glucagon receptor. It may cause pancreatic alpha-cell hyperplasia, enlarged pancreas, abnormal glucose regulation, and elevated circulating glucagon.

Synonyms:

Maintenance Dose

The dose of a drug administered at regular intervals to maintain a desired steady-state concentration, balancing the rate of drug administration with the rate of elimination. The maintenance dose is calculated as: Maintenance dose rate = (Clearance x desired concentration) / Bioavailability.

Synonyms:

Maintenance Therapy

Long-term treatment to prevent recurrence. Examples: hormonal therapy, targeted therapy.

Synonyms:

Major Depressive Disorder

A mood disorder characterized by at least one major depressive episode consisting of five or more symptoms during the same two-week period. At least one symptom must be either depressed mood or loss of interest or pleasure (anhedonia).

Synonyms:

Major Histocompatibility Complex

A locus of highly polymorphic genes encoding cell-surface glycoproteins that present antigen peptides to T cells. Human Leukocyte Antigen (HLA) in humans. MHC Class I (HLA-A, B, C): expressed on all nucleated cells, presents endogenous antigens (viral/tumor) to CD8⁺ cytotoxic T cells.

Synonyms:

Malabsorption

Defective absorption of nutrients from the small intestine. Causes: celiac disease, pancreatic insufficiency, bacterial overgrowth, Crohn disease, short bowel syndrome, and infections. Presents with diarrhea, steatorrhea, weight loss, and deficiency of specific nutrients (iron, B12, vitamin D, calcium).

Synonyms:

Malacoplakia

A chronic granulomatous inflammatory reaction characterized by macrophages containing basophilic Michaelis-Gutmann bodies. It most often affects the urinary or gastrointestinal tract and may form mass-like lesions that mimic malignancy.

Synonyms:

Malaise

A general feeling of discomfort, weakness, or being unwell. It is a nonspecific symptom that may accompany infection, inflammation, anemia, chronic disease, medication effects, or emotional stress.

Synonyms:

Malakoplakia

Rare chronic inflammatory condition characterized by accumulation of macrophages containing calcified inclusion bodies called Michaelis-Gutmann bodies,

most commonly affecting the urinary bladder but also occurring in the gastrointestinal tract.

Synonyms:

Malar Rash

A red or violaceous rash across the cheeks and bridge of the nose, often sparing the folds beside the nose. It is classically associated with systemic lupus erythematosus but can occur with other conditions; appearance alone does not establish a diagnosis.

Synonyms:

Malaria

A mosquito-borne infection caused by Plasmodium parasites. It can cause fever, chills, headache, muscle aches, and anemia; severe disease may affect the brain, lungs, kidneys, blood glucose, or other organs. Diagnosis and treatment depend on the species, illness severity, and travel or exposure history.

Synonyms:

Malate Dehydrogenase

Converts malate to oxaloacetate in TCA cycle. Produces NADH.

Synonyms:

MALDI-TOF Mass Spectrometry

Matrix-assisted laser desorption/ionization time-of-flight mass spectrometry, a method that identifies microorganisms by comparing their protein spectral fingerprints with a reference database. It provides rapid identification from an isolated colony and does not by itself establish antimicrobial susceptibility.

Synonyms:

Male Hypoactive Sexual Desire Disorder

A persistent or recurrent lack of sexual or erotic thoughts and desire in a man that causes personal distress or relationship difficulty. It is distinct from erectile dysfunction, although the conditions may coexist.

Synonyms:

Male Hypogonadism

Reduced production of testosterone, impaired sperm

production, or both due to disease of the testes or the hypothalamic-pituitary system. Possible features include low libido, erectile difficulty, infertility, reduced muscle mass, fatigue, and loss of bone density.

Synonyms:

Male Infertility

Reduced ability to achieve a pregnancy because of factors affecting sperm production, sperm transport, ejaculation, sexual function, or other reproductive processes.

Synonyms:

Male Menopause

A nontechnical term sometimes used for age-related decline in testosterone, although it is not equivalent to female menopause. Low testosterone may cause reduced libido, erectile difficulty, fatigue, depressed mood, or loss of muscle mass, but symptoms have many causes and require appropriate hormone testing before treatment.

Synonyms:

Malignancy

A cancerous growth or disease characterized by uncontrolled cell growth with potential to invade tissues or spread to distant sites.

Synonyms:

Malignant acanthosis nigricans

A paraneoplastic syndrome in which velvety, hyperpigmented, verrucous plaques develop rapidly in flexural and mucosal areas as a marker of an underlying internal malignancy, most commonly gastric adenocarcinoma. Unlike benign acanthosis nigricans, the malignant form is extensive, abrupt in onset, and may involve the oral mucosa.

Synonyms:

Malignant Ascites

Intraperitoneal fluid accumulation caused by peritoneal tumor spread, most often ovarian or gastrointestinal cancer. Management includes therapeutic paracentesis and, in selected cases, intraperitoneal

chemotherapy or shunt placement.

Synonyms:

Malignant Hypertension

Severely elevated BP greater than 180/120 with end-organ damage. Renal findings include hyperplastic arteriolosclerosis with onion-skinning and fibrinoid necrosis. Treat with IV antihypertensives. Poor prognosis if untreated. May cause AKI, encephalopathy, and retinopathy.

Synonyms:

Malignant Hyperthermia

A rare, life-threatening pharmacogenetic disorder of skeletal muscle triggered by volatile inhalation anesthetics and succinylcholine, with incidence of approximately 1 in 15,000 to 50,000 anesthetics.

Synonyms:

Malignant melanoma

A highly aggressive malignancy arising from melanocytes, characterised by uncontrolled proliferation and potential for early metastasis via lymphatic and haematogenous spread.

Synonyms:

Malignant Mesothelioma

A cancer of the mesothelial lining of the pleura (most common), peritoneum, or pericardium. Strongly associated with asbestos exposure, presenting with effusion, chest pain, and dyspnea; prognosis is generally poor.

Synonyms:

Malignant Neoplasm

Malignant neoplasms, commonly called cancers, are uncontrolled proliferations of cells that invade surrounding tissues and have the capacity to metastasize to distant sites through lymphatic, hematogenous, or transcoelomic routes.

Synonyms: cancers, are uncontrolled proliferations of cells.

Malignant Pleural Effusion

Pleural fluid accumulation from pleural or

metastatic disease, causing dyspnea. Managed with thoracentesis, pleurodesis, or an indwelling pleural catheter.

Synonyms:

Malignant syphilis

A severe, destructive form of secondary syphilis presenting with necrotic, gummatous, or ulcerative skin lesions, often in immunocompromised patients, particularly those with HIV co-infection. It represents an aberrant immune response to heavy *Treponema pallidum* infection and requires aggressive intravenous penicillin therapy.

Synonyms:

Malignant Tumor

A cancerous growth capable of invading nearby tissue or spreading to distant sites. Its behavior and treatment depend on its type, grade, stage, and molecular features.

Synonyms:

Malingering

The intentional fabrication or exaggeration of physical or psychological symptoms for external incentives (avoiding work, obtaining financial compensation, evading criminal prosecution, obtaining drugs). Not a psychiatric illness (coded as a V-code/Z-code).

Synonyms:

Mallampati Classification

A simple scoring system used to predict the ease of endotracheal intubation based on the anatomical structures visible in the oral cavity when the patient opens their mouth wide and protrudes their tongue without phonating. Class I: soft palate, fauces, uvula, and tonsillar pillars visible.

Synonyms:

Malleus

The largest of the three ossicles in the middle ear. See Hammer.

Synonyms:

Mallory-Weiss Tear

Longitudinal mucosal laceration at the gastroesophageal junction caused by forceful vomiting or retching. It typically presents with hematemesis. Most bleeds spontaneously within twenty-four to forty-eight hours. Diagnosis is made by upper endoscopy showing a linear mucosal tear.

Synonyms:

Malnutrition

Deficiency, excess, or imbalance of nutrients leading to adverse effects on tissue, body form, and function. Undernutrition: protein-energy malnutrition, micronutrient deficiencies. Overnutrition: overweight, obesity, related comorbidities. Screen with MNA (Mini Nutritional Assessment), MUST (Malnutrition Universal Screening Tool).

Synonyms:

Malocclusion

Misalignment of teeth or incorrect relation between dental arches. Types: Class I (normal molar relationship, crowding), Class II (retrognathic mandible), Class III (prognathic mandible).

Synonyms:

Malpractice

Professional negligence by healthcare provider. Requires duty, breach, causation, damages.

Synonyms:

Malpresentation

A fetal presentation other than the usual vertex presentation, including breech, face, brow, shoulder, or compound presentation. It may complicate labor and influence delivery planning.

Synonyms:

Malrotation

Abnormal rotation or fixation of an organ during development, most often referring to abnormal rotation of the intestine and its risk of volvulus.

Synonyms:

Maltol

A flavoring compound used in some foods and medicines to provide a sweet, caramel-like odor or taste.

Synonyms:

Mammary Gland

Modified sweat (apocrine) gland in the breast, overlying pectoralis major, with 15-20 lactiferous ducts converging on the nipple. Composed of glandular lobules (alveoli), fibrous stroma (Cooper's ligaments), and fat. Development regulated by estrogen, progesterone, prolactin, and oxytocin (milk let-down).

Synonyms:

Mastalgia

Breast pain or tenderness, which may be cyclical with menstruation or noncyclical. Causes include hormonal changes, cysts, infection, trauma, and musculoskeletal pain.

Synonyms:

Mammary Implant

Breast augmentation/reconstruction device. Types: saline (silicone shell, saline fill), silicone gel (cohesive gel). Incisions: inframammary, periareolar, axillary. Placement: subglandular or submuscular. Complications: capsular contracture, rupture, infection, BIA-ALCL (anaplastic large cell lymphoma).

Synonyms:

Mammogram

An X-ray image of the breast used for screening or evaluating breast symptoms.

Synonyms:

Mammography

X-ray imaging of the breast used to screen for or evaluate breast abnormalities. Screening intervals depend on age, risk, symptoms, and the guideline being followed. Standard views include the cranio-caudal and mediolateral-oblique projections.

Synonyms:

Mandible

Largest facial bone forming the lower jaw, with horseshoe-shaped body and two rami ending in condylar (TMJ) and coronoid processes. Mental foramen transmits the mental nerve. Mandibular foramen is the entry point for inferior alveolar nerve blocks. Most commonly fractured facial bone, typically at the condyle, angle, or symphysis.

Synonyms:

Mandibular fracture

A break in the lower jaw bone typically caused by trauma, presenting with pain, swelling, malocclusion, and difficulty opening the mouth; may require surgical fixation.

Synonyms:

Manganese

An essential trace element required in small amounts. Excessive exposure, especially by inhalation, can injure the nervous system and cause manganism, a movement disorder resembling parkinsonism.

Synonyms:

Mania

A distinct period of abnormally elevated, expansive, or irritable mood with increased goal-directed activity or energy, lasting ≥ 1 week (or any duration if hospitalization required).

Synonyms:

Manic Episode

A distinct period lasting at least seven days (or any duration if hospitalization is required) of abnormally elevated, expansive, or irritable mood with increased energy or activity.

Synonyms:

Manifestation

A sign, symptom, or other observable expression of a disease or condition.

Synonyms:

Manner of Death

Legal classification of the circumstances surrounding

a death, categorized into 5 official types: Natural, Accident, Suicide, Homicide, or Undetermined.

Synonyms:

Mannitol

An osmotic diuretic that is freely filtered at the glomerulus but not reabsorbed, increasing tubular osmotic pressure and water excretion. Used to reduce intracranial pressure (cerebral edema) and intraocular pressure (acute glaucoma), and to promote diuresis in rhabdomyolysis/contrast nephropathy prophylaxis.

Synonyms:

Mannose-Binding Lectin Deficiency

An inherited or acquired deficiency of mannose-binding lectin, a protein that activates the lectin pathway of complement. It may increase susceptibility to infection in selected people, especially when other immune defenses are impaired.

Synonyms:

Mantle Cell Lymphoma

An aggressive B-cell lymphoma characterized by t(11;14) translocation leading to cyclin D1 overexpression and CCND1-IGH fusion. Clinical: older males, widespread lymphadenopathy, splenomegaly, GI involvement (lymphomatous polyposis), bone marrow, peripheral blood (leukemic phase).

Synonyms:

Manual Removal of Placenta

A procedure in which a clinician removes a placenta that has not separated or cannot be delivered after birth. The timing and need depend on bleeding, maternal condition, and local clinical protocols.

Synonyms:

MAOIs

Monoamine oxidase inhibitors are a class of antidepressant drugs that inhibit the enzyme monoamine oxidase, which breaks down serotonin, norepinephrine, and dopamine in the brain. By inhibiting this enzyme, MAOIs increase the levels of these neurotransmitters in the synaptic cleft.

Synonyms:

Maple Syrup Urine Disease

An autosomal recessive inborn error of branched-chain amino acid metabolism caused by deficiency of the branched-chain alpha-ketoacid dehydrogenase complex (BCKDC) — mutations in BCKDHA, BCKDHB, DBT, or DLD.

Synonyms:

Marasmus

A severe form of protein-energy malnutrition (PEM) resulting from chronic total calorie and protein deprivation (starvation). Clinical features include severe muscle wasting, loss of subcutaneous fat ("skin and bones" appearance), stunted growth, a "monkey-like" facial appearance, and alertness.

Synonyms:

Maraviroc

A CCR5 antagonist (entry inhibitor) used in combination antiretroviral therapy for HIV-1 infection in patients with CCR5-tropic virus. Maraviroc binds to the human CCR5 coreceptor on CD4+ T cells, preventing HIV-1 gp120 binding and viral entry.

Synonyms:

Marfan Syndrome

An autosomal dominant connective tissue disorder caused by mutations in the FBN1 gene (fibrillin-1). Cardiovascular manifestations include aortic root dilation and dissection, mitral valve prolapse, and aortic regurgitation. Skeletal features include tall stature, arachnodactyly, pectus deformity, and joint hypermobility.

Synonyms:

Marfanoid Habitus

A body habitus characterized by tall stature, long limbs, long fingers (arachnodactyly), and joint laxity. Seen in Marfan syndrome, but also in other connective tissue disorders and homocystinuria. Differentiated from Marfan syndrome by absence of aortic root dilation and lens subluxation.

Synonyms:

Marfan's syndrome

An autosomal dominant connective tissue disorder caused by mutations in the FBN1 gene encoding fibrillin-1. Neurological manifestations include dural ectasia (widening of the dural sac, causing back pain and headaches), spontaneous intracranial hypotension from CSF leaks, and increased risk of stroke from arterial dissection.

Synonyms:

Marrow hyperplasia

Increased cellularity of the bone marrow due to accelerated production of blood cells, typically seen as a compensatory response to chronic hemolysis, hemorrhage, or hypoxia.

Synonyms:

Mask

Face covering for infection control. Types: surgical, N95 respirator.

Synonyms:

Mass

A discrete area of abnormal tissue that is larger or more substantial than a nodule. A mass may be benign or malignant and can occur in many organs.

Synonyms:

Mass Casualty Incident

Event overwhelming available resources, requiring triage and resource allocation. Triage systems: START (Simple Triage and Rapid Treatment), SALT. Categories: immediate (red), delayed (yellow), minor (green), expectant (black). Incident command system (ICS) coordinates response.

Synonyms:

Masseter Muscle

Thick rectangular muscle of mastication on the mandibular ramus, from the zygomatic arch to mandibular angle/ramus. Innervated by the masseteric nerve (V3). Most powerful masticatory muscle, elevating the mandible with up to 70 kg force. Involved in bruxism, TM disorders, and myofascial pain. Hypertrophy can widen facial appearance.

Synonyms:

Massive Hemoptysis

Life-threatening coughing of blood that threatens the airway, breathing, or circulation; a fixed volume threshold is not required. It requires urgent airway assessment, stabilization, and definitive treatment of the bleeding source.

Synonyms:

Massive Transfusion Protocol

A coordinated protocol for life-threatening hemorrhage that provides rapid, balanced delivery of red cells, plasma, and platelets with monitoring and correction of fibrinogen, calcium, temperature, and acid-base abnormalities.

Synonyms:

Mast Cell

A tissue-resident immune cell with large granules containing histamine, heparin, tryptase, and cytokines; bears high-affinity IgE receptors (Fc-epsilon-RI).

Synonyms:

Mast Cell Activation Syndrome

A condition involving recurrent symptoms from inappropriate release of mast-cell mediators, such as flushing, itching, hives, abdominal symptoms, wheezing, or low blood pressure. Diagnosis requires compatible episodes, objective evidence of mediator release, and response to appropriate treatment; many similar conditions must be excluded.

Synonyms:

Mastectomy

Surgical removal of the breast. Total (simple) mastectomy: removal of breast tissue, areola, and nipple. Modified radical mastectomy (MRM): total mastectomy + axillary lymph node dissection (levels I-III), for invasive breast cancer.

Synonyms:

Mastitis

Inflammation of breast tissue, often occurring dur-

ing lactation but also possible outside lactation. It may cause localized pain, warmth, swelling, and fever; infection and inflammatory causes must be distinguished clinically.

Synonyms:

Mastocytosis

A clonal disorder in which abnormal mast cells accumulate in the skin or internal organs. Cutaneous disease commonly causes urticaria pigmentosa: tan-brown macules or papules that swell and itch after rubbing (Darier sign).

Synonyms:

Mastoidectomy

A surgical procedure that involves the removal of diseased mastoid air cells and bone from the mastoid portion of the temporal bone, performed for chronic otitis media with cholesteatoma, mastoiditis, or as a component of surgery for acoustic neuroma and other skull base tumors.

Synonyms:

Mastoiditis

Bacterial infection of the mastoid air cells, typically a complication of acute otitis media. Presents with postauricular pain, swelling, erythema, and tenderness, fever, and otorrhea. Diagnosis: CT temporal bone shows mastoid air cell opacification with bony destruction.

Synonyms:

Masturbation

Self-stimulation of the genitals for sexual pleasure. It is a common human behavior; it is generally not harmful unless it causes injury, distress, or interferes with daily life.

Synonyms:

Maternal Physiologic Changes in Pregnancy

Extensive adaptive changes across all organ systems to support the growing fetus.

Synonyms:

Maternal Pushing (Second Stage)

Maternal expulsive efforts during the second stage of labor to facilitate fetal descent. Directed (closed-glottis, Valsalva) pushing: sustained breath-hold for 10 seconds with three pushes per contraction. Spontaneous (open-glottis) pushing: shorter pushes with the mother pushing when she feels an urge.

Synonyms: Second Stage

Maternal Sepsis

Organ dysfunction caused by a dysregulated maternal response to infection during pregnancy, childbirth, or the postpartum period. It may arise from uterine, urinary, respiratory, wound, or other infection and requires prompt cultures, antimicrobial therapy, source control, and hemodynamic support.

Synonyms:

Maturity Onset Diabetes of the Young

A monogenic form of diabetes with autosomal dominant inheritance, typically presenting before age 25 with non-insulin-dependent hyperglycemia. Caused by mutations in transcription factors or enzymes of beta-cell function.

Synonyms:

Maxilla

Paired bone forming the upper jaw, central face, and parts of orbit, nasal cavity, and hard palate. Body contains the maxillary sinus (largest paranasal sinus). Four processes: frontal, zygomatic, alveolar (upper teeth), and palatine (anterior hard palate). Fractures classified using the Le Fort system.

Synonyms:

Maxillofacial Prosthesis

Artificial replacement of maxillofacial structures. Obturator for cleft palate or surgical defect. Ocular, nasal, auricular prostheses.

Synonyms:

Maximum Plasma Concentration (C_{max})

The highest measured plasma concentration after a dose. C_{max} and the time to reach it are used to describe absorption rate, peak-related toxicity, and

comparative pharmacokinetics.

Synonyms: Cmax

Maximum Tolerated Dose

The highest dose of a drug that produces acceptable, manageable toxicity without causing unacceptable adverse effects, determined through dose-escalation studies, most commonly in Phase I clinical trials. The MTD identifies the dose range for subsequent efficacy studies.

Synonyms:

May-Thurner Syndrome

Compression of left common iliac vein by right common iliac artery. Causes left lower extremity DVT. Diagnosis: CT/MR venography, phlebography. Treatment: angioplasty and stenting.

Synonyms:

MCA Peak Systolic Velocity

Doppler measurement of the peak systolic velocity in the fetal middle cerebral artery. An indicator of fetal anemia: elevated MCA PSV (>1.5 MoM) correlates with moderate-to-severe anemia. The most important application is surveillance of Rh-sensitized pregnancies (detect anemia before hydrops develops).

Synonyms:

McCune-Albright Syndrome

Sporadic condition caused by activating mutations in the GNAS1 gene encoding the Gs alpha subunit leading to constitutive activation of adenylyl cyclase.

Synonyms:

McDonald Cerclage

A transvaginal cervical cerclage using a purse-string suture (Mersilene tape or Prolene) placed at the cervicovaginal junction, without bladder dissection. The most common cerclage technique. Indications: cervical insufficiency (history-indicated or ultrasound-indicated short cervix <25 mm before 24 weeks). Placed at 12-14 weeks.

Synonyms:

McMurray Test

A knee examination in which the leg is flexed, rotated, and extended to place stress on the menisci. Pain or a palpable click may suggest a meniscal lesion but is not diagnostic alone.

Synonyms:

McRoberts Maneuver

A positioning maneuver for managing shoulder dystocia where the mother's legs are hyperflexed onto her abdomen, with thighs against the abdomen. This flattens the sacrum, increases the anteroposterior diameter of the pelvis, and rotates the symphysis pubis superiorly. Often combined with suprapubic pressure.

Synonyms:

Mean Arterial Pressure

The average pressure driving systemic blood flow during one cardiac cycle. It is influenced by cardiac output and systemic vascular resistance and is approximated clinically as diastolic pressure plus one-third of pulse pressure at normal heart rates.

Synonyms:

Mean Corpuscular Hemoglobin Concentration

The mean concentration of hemoglobin within packed erythrocytes, calculated from hemoglobin and hematocrit. A reduced MCHC indicates hypochromia; an increased value may occur with spherocytosis or analytical interference.

Synonyms:

Mean Corpuscular Volume

The average volume of an erythrocyte, reported in femtoliters as part of the CBC. A low MCV indicates microcytosis, whereas a high MCV indicates macrocytosis; interpretation requires correlation with hemoglobin, reticulocytes, and other indices.

Synonyms:

Measles

A highly contagious viral illness caused by Morbil-

livirus, transmitted by respiratory droplets. Prodrome of fever, coryza, cough, and conjunctivitis, followed by Koplik spots (white buccal mucosal lesions) and maculopapular rash spreading cephalocaudally. Complications: pneumonia, encephalitis, and subacute sclerosing panencephalitis.

Synonyms:

Measles virus

A negative-sense RNA virus that causes measles, a highly contagious respiratory illness. The virus is transmitted by respiratory droplets and is one of the most infectious pathogens known. Symptoms include fever, cough, coryza, conjunctivitis, and rash.

Synonyms:

Measles-Rubella Vaccine

A combined live attenuated vaccine containing measles and rubella antigens without the mumps component, widely used in countries where mumps is not a significant public health burden, including India's Universal Immunization Schedule.

Synonyms:

Measurable Residual Disease

The burden of cancer remaining after therapy that can be quantified using a validated assay. The term is increasingly preferred to minimal residual disease because residual disease may be clinically important even when not minimal.

Synonyms:

Meatuses

The nasal meatuses are the air passages located beneath each corresponding turbinate on the lateral wall of the nasal cavity, and they serve as the drainage pathways for the paranasal sinuses and the nasolacrimal duct.

Synonyms:

Mebrofenin Scan

Hepatobiliary imaging using Tc-99m mebrofenin. Evaluates liver function, biliary obstruction.

Synonyms:

Mechanical Circulatory Support

Devices that provide temporary or permanent cardiac support. Options include intra-aortic balloon pump (IABP), Impella (percutaneous ventricular assist device), TandemHeart, extracorporeal membrane oxygenation (ECMO), and durable left ventricular assist devices (LVADs).

Synonyms:

Mechanical Insufflation-Exsufflation

A device that delivers positive pressure (insufflation) followed by rapid negative pressure (exsufflation) to simulate a cough. It is used in neuromuscular disease (Duchenne muscular dystrophy, spinal cord injury, ALS) to augment cough effectiveness and clear secretions.

Synonyms:

Mechanical Ventilation

Mechanical ventilation provides respiratory support by delivering controlled or spontaneous breaths through an endotracheal tube or tracheostomy.

Synonyms:

Mechanism of Death

The physiologic or biochemical derangement that causes death (the final failure) as opposed to the underlying disease or injury (cause of death) and the circumstances (manner). Examples: ventricular fibrillation, cerebral hemorrhage, sepsis, respiratory failure, exsanguination, cardiac tamponade.

Synonyms:

Mechanism of Toxicity

How substance causes harm. Examples: enzyme inhibition, membrane disruption, receptor binding, oxidative stress, DNA damage.

Synonyms:

Meckel Diverticulum

Congenital remnant of the omphalomesenteric duct located on the antimesenteric border of the distal ileum approximately sixty centimeters from the ileocecal valve.

Synonyms:

Meckel's diverticulum

A congenital pouch of the small intestine caused by persistence of the embryonic vitelline duct. It may bleed, inflame, or cause obstruction.

Synonyms:

Meconium Aspiration

Meconium aspiration syndrome (MAS): aspiration of meconium-stained amniotic fluid into the fetal/neonatal airway causing airway obstruction, chemical pneumonitis, and surfactant dysfunction—respiratory distress in term/post-term infants. Risk: fetal distress/hypoxia (passage of meconium in utero).

Synonyms:

Meconium Aspiration Syndrome

Respiratory distress in newborns born through meconium-stained amniotic fluid, caused by aspiration of meconium into the airways. Presents with respiratory distress, barrel-shaped chest, and coarse crackles. Meconium is thick, greenish-black fetal stool passed in utero. Risk factors include post-term pregnancy and fetal distress.

Synonyms:

Meconium Ileus

Intestinal obstruction in neonates caused by inspissated meconium most commonly associated with cystic fibrosis. Presents with abdominal distension, bilious vomiting, and failure to pass meconium within forty-eight hours.

Synonyms:

Meconium Peritonitis

Sterile chemical peritonitis resulting from in utero intestinal perforation allowing meconium to spill into the peritoneal cavity. Most commonly associated with cystic fibrosis causing inspissated meconium obstruction, intestinal atresia, and volvulus. May be detected prenatally as fetal ascites with echogenic peritoneal calcifications.

Synonyms:

Meconium-Stained Amniotic Fluid

Greenish or yellowish discoloration of amniotic fluid due to fetal meconium passage in utero. Associated with fetal distress, post-term pregnancy, and fetal growth restriction. Thick meconium increases risk of meconium aspiration syndrome. Management of non-vigorous newborns: tracheal suctioning before positive pressure ventilation.

Synonyms:

Medial

Positioned closer to the midline or middle of the body.

Synonyms:

Medial Collateral Ligament Injury

Tear of the MCL, the most common knee ligament injury. Mechanism: valgus stress to the knee (direct blow to lateral knee). Presents with medial knee pain, swelling, and valgus laxity. Grading: I (pain, no laxity), II (partial tear, some laxity), III (complete tear, significant laxity).

Synonyms:

Medial Cuneiform

Largest cuneiform, on the medial foot between navicular and first metatarsal. Insertion for tibialis anterior and posterior tendons supporting the medial longitudinal arch. The first tarsometatarsal joint (Lisfranc joint) is an important landmark; Lisfranc injuries involve fracture-dislocation at this level.

Synonyms:

Medial Rotation

Rotation of a limb toward the median plane of the body.

Synonyms:

Median Nerve

From lateral and medial cords (C5-T1), passing through the arm without branching, through the cubital fossa, into the forearm innervating most flexor muscles. In the hand innervates thenar muscles (opponens, abductor brevis, flexor brevis pollicis) and

first two lumbricals. Sensation to lateral 3.5 digits.

Synonyms:

Median Plane

A sagittal plane that passes directly through the midline of the body, dividing it into equal right and left halves.

Synonyms:

Median rhomboid glossitis

A smooth, red, diamond-shaped depapillated area on the dorsum of the tongue caused by chronic *Candida* infection, usually asymptomatic and managed with antifungal therapy.

Synonyms:

Median Survival

The time by which half of the people in a study have experienced the specified event, such as death. It is a summary measure of survival in a defined population.

Synonyms:

Mediastinitis

Inflammation or infection of the mediastinum, the central compartment of the chest. Acute cases may follow surgery, esophageal injury, or infection and can cause severe systemic illness; chronic cases may result from granulomatous or other inflammatory disease.

Synonyms:

Mediastinoscopy

A surgical procedure that accesses the mediastinum through a small incision near the sternum to inspect or biopsy mediastinal lymph nodes or masses. It is one option for staging lung cancer when less-invasive sampling is nondiagnostic or unsuitable.

Synonyms:

Mediastinum

The central compartment of the thoracic cavity between the lungs, containing the heart, major blood vessels, esophagus, and trachea.

Synonyms:

Mediators of Inflammation

Inflammatory mediators are soluble molecules that initiate, amplify, or regulate the inflammatory response.

Synonyms:

Medical Cannabis and Cannabidiol

Cannabis (marijuana) and cannabidiol (CBD) are cannabinoid compounds derived from *Cannabis sativa* that interact with the endocannabinoid system (CB1 and CB2 receptors) to modulate pain, appetite, mood, and inflammation.

Synonyms:

Medical Condition

A state affecting health or bodily function, whether acute, chronic, symptomatic, or asymptomatic.

Synonyms:

Medical Ethics

Moral principles guiding healthcare practice, including autonomy, beneficence, non-maleficence, and justice.

Synonyms:

Medical Examiner

An appointed physician, usually a board-certified forensic pathologist, charged with investigating sudden, unexpected, violent, or suspicious deaths, ordering autopsies, determining cause and manner of death, and certifying the death certificate. Unlike the elected coroner, a medical examiner must meet professional qualifications.

Synonyms:

Medical Illness

The subjective experience of being unwell, which may or may not correspond to an identifiable disease.

Synonyms:

Medical Jargon

Specialized terminology used by healthcare professionals. Unexplained medical jargon can hinder communication with patients.

Synonyms:

Medical Jurisprudence

The branch of law (and its study) that deals with the rights and duties of physicians and the legal aspects of medical practice, distinct from but overlapping with forensic medicine.

Synonyms:

Medical Negligence (Malpractice)

Legal tort occurring when a healthcare provider fails to exercise the standard of reasonable care, skill, or diligence expected of a prudent practitioner of similar standing, resulting in injury, harm, or death to a patient.

Synonyms: Malpractice

Medical Nutrition Therapy

Individualized nutrition intervention by registered dietitian. Conditions: diabetes, renal disease, GI disorders, cancer, obesity.

Synonyms:

Medical Physicist

Expert in radiation physics and safety.

Synonyms:

Medical Physics

The application of physics to medicine, including diagnostic imaging, radiation therapy, radiation safety, and physiological measurement.

Synonyms:

Medical Privacy

Protection of identifiable patient information and control of its disclosure in healthcare.

Synonyms:

Medical Records

A documented account of a patient's clinical history, examination, investigations, treatment, and outcome maintained by providers. In medicolegal practice, records are contemporaneous evidence in malpractice, injury, criminal, and death cases, so accuracy, timeliness, and unaltered amendments are

essential.

Synonyms:

Medical Tattooing

Medical tattooing (permanent makeup, micropigmentation) covers depigmented skin (vitiligo, vitiligo camouflage), restores areolas after mastectomy, and masks scars. Trichopigmentation simulates hair on bald scalp. Medical tattooing uses specialized pigments and techniques.

Synonyms:

Medical Tests

Diagnostic procedures used to screen for, confirm, or monitor disease through analysis of biologic specimens, imaging, physiologic measurements, or genetic material.

Synonyms:

Medication Adherence

The extent to which a patient's medication-taking behavior corresponds with the agreed treatment plan. Adherence is influenced by understanding, adverse effects, cost, access, regimen complexity, beliefs, and cognitive or social factors.

Synonyms:

Medication Adverse-Effect Profile

The clinically relevant pattern of predictable pharmacologic effects and harmful reactions associated with a medication. It includes common dose-related effects, serious rare events, organ-specific toxicity, interactions, and monitoring requirements.

Synonyms:

Medication Cascade

A prescribing sequence in which an adverse drug effect is misinterpreted as a new medical condition and another drug is prescribed to treat it. Recognizing cascades is an important goal of medication reconciliation and deprescribing.

Synonyms:

Medication Deprescribing

A planned, supervised process of reducing the dose

or stopping a medicine when its current or future harms outweigh its benefits or when treatment goals change. Tapering may be required to prevent withdrawal or rebound disease.

Synonyms:

Medication Error

A preventable event that may cause or lead to inappropriate medication use or patient harm while the medication is in the control of a healthcare professional, patient, or consumer. Errors can occur during prescribing, transcribing, dispensing, administration, or monitoring.

Synonyms:

Medication Management

The systematic process of optimizing pharmacotherapy to achieve therapeutic goals while minimizing adverse effects, encompassing prescribing, dispensing, administration, monitoring, and deprescribing.

Synonyms:

Medication Reconciliation

A structured process of obtaining and comparing the most accurate medication list with current prescriptions at transitions of care. It identifies omissions, duplications, incorrect doses, interactions, and unintended changes.

Synonyms:

Medication Review

Systematic examination of all medications for appropriateness. Components: indication, efficacy, safety, adherence, interactions. Tools: Beers Criteria, STOPP/START. Goals: deprescribing, optimizing therapy, reducing adverse effects.

Synonyms:

Medication Safety

Practices that reduce medication errors and prevent avoidable harm during prescribing, dispensing, administration, and use.

Synonyms:

Medication Side Effects

Unintended harmful responses to medications occurring at standard doses, ranging from mild (nausea, rash, dry mouth) to severe (anaphylaxis, Stevens-Johnson syndrome, QT prolongation, hepatotoxicity).

Synonyms:

Medications and Treatments

all pharmacologic and therapeutic interventions used to prevent, manage, or cure disease, classified by mechanism of action, therapeutic class, and route of administration.

Synonyms:

Medicolegal

Pertaining to the application of medical knowledge to legal questions and the intersection of medicine and the law. Covers forensic pathology, toxicology, psychiatry, and clinical issues: informed consent, malpractice, medical records, disability, personal injury, occupational disease, and public health law.

Synonyms:

Mediterranean Diet

Traditional eating pattern of Greece, Southern Italy. Emphasizes: fruits, vegetables, whole grains, legumes, nuts, olive oil, moderate fish/poultry, limited red meat. Associated with reduced cardiovascular disease, diabetes, cognitive decline.

Synonyms:

Medulla Oblongata

Most inferior brainstem segment, continuous with the spinal cord at the foramen magnum. Contains vital autonomic centers: cardiovascular center (heart rate, blood pressure), respiratory center (dorsal/ventral respiratory groups), and area postrema (vomiting center).

Synonyms:

Medullary Sponge Kidney

Congenital malformation characterized by cystic dilatation of the collecting ducts in the renal papillae predisposing to nephrolithiasis and nephrocalcinosis.

Presents with recurrent kidney stones, hematuria, and urinary tract infections.

Synonyms:

Medullary Thyroid Carcinoma

Neuroendocrine tumor arising from parafollicular C cells that produce calcitonin. Accounts for approximately five percent of thyroid carcinomas. May be sporadic or hereditary as part of multiple endocrine neoplasia type two A or two B. Serum calcitonin serves as a tumor marker. Diagnosis requires FNA with calcitonin immunohistochemistry.

Synonyms:

Medulloblastoma

A fast-growing embryonal tumor of the cerebellum and the most common malignant brain tumor of childhood. Treated with surgical resection, craniospinal radiation, and chemotherapy.

Synonyms:

Meige Syndrome

A segmental cranial dystonia characterized by involuntary bilateral blepharospasm with dystonic contractions of the lower face, jaw, or tongue. Symptoms fluctuate and may be worsened by stress, speech, chewing, or sensory stimuli.

Synonyms:

Meigs Syndrome

The triad of benign ovarian fibroma, ascites, and pleural effusion. The effusions typically resolve after removal of the ovarian tumour and should be distinguished from malignant ovarian disease.

Synonyms:

Meiosis

A specialized cell division that produces haploid eggs or sperm from a diploid precursor cell and creates genetic variation through recombination and chromosome assortment.

Synonyms:

Melancholic Features

A specifier for major depressive episodes character-

ized by a loss of interest or pleasure in all or almost all activities, a depressed mood that is qualitatively distinct from grief, prominent psychomotor retardation or agitation, significant anorexia or weight loss, excessive guilt, and worsening of mood in the morning.

Synonyms:

Melanocytes

Dendritic pigment-producing neural crest-derived cells in the epidermal basal layer and hair follicles, comprising approximately 5-10 percent of basal keratinocytes. Produce melanin (eumelanin, brown-black; pheomelanin, yellow-red) in melanosomes, transferred to keratinocytes via dendritic processes for UV protection.

Synonyms:

Melanoma

A malignant tumor arising from melanocytes, the cells that produce melanin. It most often begins in the skin but can also arise in the eye or mucous membranes; prognosis depends mainly on its stage and biologic features.

Synonyms:

Melanoma Surveillance

regular skin examination, patient education on self-examination, and dermoscopic monitoring of atypical nevi. High-risk patients (personal or family history, numerous atypical nevi, immunosuppression) require 6-month follow-up. Standard patients require annual examination. Total body photography establishes baseline for change detection.

Synonyms:

Melanoma Treatment

Stage-dependent. Stage 0 to IA: wide local excision. Stage IB to IIA: wide excision with sentinel lymph node biopsy. Stage IIB to IIC: wide excision, SLNB, and adjuvant therapy.

Synonyms:

Melasma

A common hyperpigmentation disorder character-

ized by brown or gray-brown patches on the face, particularly the cheeks, forehead, nose, and upper lip. Also called chloasma or the mask of pregnancy.

Synonyms: chloasma or.

Melasma (Chloasma)

An acquired, chronic pigmentary disorder characterized by symmetric, hyperpigmented, light-to-dark brown macules and patches on sun-exposed areas of the face (malar, forehead, upper lip, chin). It primarily affects women of childbearing age and individuals with darker skin types (Fitzpatrick types III-V).

Synonyms: Chloasma

Melatonin Receptor Agonists

Medications that act on MT1 and MT2 receptors in the suprachiasmatic nucleus to regulate circadian rhythms. Ramelteon is approved for insomnia with sleep onset difficulty. It has no abuse potential and does not cause dependence. It is a useful alternative to benzodiazepines for sleep initiation problems.

Synonyms:

MELD Score

Model for End-Stage Liver Disease predicting three-month mortality in advanced liver disease used for liver transplant allocation. The score is calculated using serum bilirubin, creatinine, and international normalized ratio generating a continuous score from approximately six to forty points.

Synonyms:

melena

Passage of black, tarry, foul-smelling stools due to the presence of digested blood, indicating upper gastrointestinal bleeding (usually proximal to the ligament of Treitz). The black color results from oxidation of haemoglobin to haematin by intestinal enzymes and bacteria.

Synonyms:

Melioidosis

An infectious disease caused by *Burkholderia pseudomallei*, usually acquired from contaminated soil

or water through inoculation or inhalation. It may cause pneumonia, skin infection, abscesses, sepsis, or chronic disease and is more severe in people with diabetes or other risk factors.

Synonyms:

Melorheostosis

A rare sclerosing bone dysplasia producing irregular, flowing cortical hyperostosis on imaging. It may cause pain, stiffness, limb deformity, restricted movement, contractures, or soft-tissue fibrosis and can affect one or several contiguous bones.

Synonyms:

Memantine

An NMDA receptor antagonist (uncompetitive, low-to-moderate affinity) used for moderate to severe Alzheimer disease, often added to an acetylcholinesterase inhibitor. Blocks excessive glutamate-mediated excitotoxicity while preserving normal synaptic transmission. Once or twice daily oral.

Synonyms:

Membrane Potential

The electrical potential difference across a cell membrane, approximately -70 mV in most neurons (resting membrane potential). Established by the unequal distribution of ions (primarily K⁺, Na⁺, Cl⁻) across the membrane and selective permeability.

Synonyms:

Membranoproliferative Glomerulonephritis

Pattern of glomerular injury with mesangial proliferation and capillary wall thickening creating tram-track appearance on silver stain. Hepatitis C is common cause of immune complex MPGN. C3 glomerulopathy represents complement-mediated disease. Associated with monoclonal gammopathies.

Synonyms:

Membranous Nephropathy

A glomerular disease caused by immune-complex deposition along the glomerular basement membrane. It commonly causes proteinuria and nephrotic syn-

drome and may be primary or secondary to another disease, medication, or infection.

Synonyms:

Memory

The cognitive process of encoding, storing, and retrieving information, mediated by distributed neural networks involving the hippocampus, medial temporal lobe, prefrontal cortex, and limbic system.

Synonyms:

Memory Cell

Long-lived lymphocytes (memory B cells and memory T cells) that survive after an immune response and mount rapid, enhanced responses to re-exposure to the same antigen (immunological memory).

Synonyms:

Memory Loss

Reduced ability to recall or learn information. It may result from normal aging, medical illness, medicines, brain injury, or a neurocognitive disorder.

Synonyms:

Mendelson Syndrome

A chemical pneumonitis caused by inhalation of acidic stomach contents, classically during anesthesia or childbirth. It can cause cough, breathing difficulty, and impaired oxygenation.

Synonyms:

Meniere Disease

An inner ear disorder characterized by recurrent episodes of vertigo lasting 20 minutes to 12 hours, with fluctuating sensorineural hearing loss, tinnitus, and aural fullness. Due to endolymphatic hydrops. Diagnosis: clinical criteria; audiometry shows low-frequency SNHL during attacks.

Synonyms:

Meninges

The three membranes enveloping the brain and spinal cord: dura mater (outermost, tough), arachnoid mater (middle, avascular), and pia mater (in-

nermost, adherent to the CNS surface). The subarachnoid space (between arachnoid and pia) contains cerebrospinal fluid. The epidural and subdural spaces are sites of hemorrhage.

Synonyms:

Myringitis

Inflammation of the tympanic membrane, usually caused by infection or irritation and sometimes associated with painful blisters on the eardrum.

Synonyms:

Motor Vehicle Accident

A collision or other road-traffic event causing injury or property damage. Medical evaluation may be needed for visible or delayed injuries, including head, neck, chest, abdominal, or musculoskeletal trauma.

Synonyms:

Meningioma

A usually slow-growing tumor arising from cells associated with the meninges. Most are benign, but some are atypical or malignant and can cause symptoms by compressing the brain, spinal cord, or cranial nerves.

Synonyms:

Meningitis

Inflammation of the membranes surrounding the brain and spinal cord, most often caused by a viral infection but also by bacteria, fungi, parasites, medicines, or autoimmune disease. Symptoms may include fever, headache, neck stiffness, light sensitivity, or altered mental status and require urgent assessment.

Synonyms:

Meningocele

A congenital defect in which the membranes surrounding the spinal cord or brain protrude through an opening in the skull or spine, forming a fluid-filled sac. It may occur with other neural-tube defects and can cause neurologic problems; evaluation commonly includes imaging and specialist assessment.

Synonyms:

Meningococcal Disease

A bacterial infection caused by *Neisseria meningitidis* (serogroups A, B, C, W, Y), transmitted via respiratory droplets. Meningococemia: sudden onset fever, petechial/purpuric rash, hypotension, and DIC. Meningococcal meningitis: fever, nuchal rigidity, headache, photophobia.

Synonyms:

Meningococcal infection

Infection with *Neisseria meningitidis*, which may cause meningitis, bloodstream infection, or localized respiratory disease. Severe illness can progress rapidly.

Synonyms:

Meningococcal Vaccine

Conjugate vaccine (MenACWY) and serogroup B vaccine (MenB) given at 11-12 years with booster at 16 years. Protects against *Neisseria meningitidis*, causing meningitis and septicemia. MenACWY booster at 16 years covers the high-risk period for serogroup C and Y disease.

Synonyms:

Meningoencephalitis

Inflammation of both the meninges surrounding the brain and the brain tissue itself, usually caused by infection or autoimmune disease. Fever, headache, neck stiffness, confusion, seizures, or reduced consciousness requires urgent medical assessment.

Synonyms:

Meniscal Injuries

Tears or other damage to the knee menisci, which are crescent-shaped pieces of cartilage that help distribute load and stabilize the knee. Symptoms may include joint-line pain, swelling, clicking, or restricted motion. Diagnosis is based on examination and, when needed, imaging.

Synonyms:

Meniscal Tear

Tear of the C-shaped fibrocartilage (medial or lateral meniscus) that provides shock absorption and

stability in the knee. Medial meniscus tears more common (attached to capsule). Mechanism: twisting injury with weight-bearing. Presents with joint line tenderness, pain with deep squatting, catching, locking, and giving way.

Synonyms:

Menkes Disease

An X-linked recessive disorder of copper metabolism caused by ATP7A mutations, resulting in impaired intestinal copper absorption and defective copper transport across the blood-brain barrier. Copper accumulates in intestinal and renal cells but is deficient in the liver and brain.

Synonyms:

Menkes Kinky Hair Syndrome

An X-linked disorder of copper transport caused by ATP7A dysfunction. It produces progressive neurodegeneration, seizures, developmental delay, hypopigmented or brittle kinky hair, connective-tissue abnormalities, and failure to thrive.

Synonyms:

Menopausal Hormone Therapy

Menopausal hormone therapy (MHT), formerly called hormone replacement therapy (HRT), is the use of estrogen with or without progestogen to alleviate moderate-to-severe menopausal vasomotor symptoms (hot flashes, night sweats), genitourinary syndrome of menopause (vaginal dryness, dyspareunia, urinary urgency), and prevent osteoporosis.

Synonyms:

Menopause

The point marking the end of menstruation, officially designated as one year after a woman's final period.

Synonyms:

Menarche

The first menstrual period, marking the onset of menstruation. Its timing varies with genetics, nutrition, health, and pubertal development; markedly early or delayed menarche may require assessment.

Synonyms:

Menopause and Perimenopause

Menopause is the permanent cessation of menstruation for 12 consecutive months, reflecting ovarian follicle depletion and estrogen decline, occurring at a median age of 51–52 years in North America.

Synonyms:

Menorrhagia

Heavy or prolonged menstrual bleeding that interferes with physical, social, emotional, or material quality of life. Causes include fibroids, adenomyosis, endometrial polyps, bleeding disorders, thyroid disease, and ovulatory dysfunction; it may cause iron-deficiency anemia.

Synonyms:

Menstrual Cramps

Cramping pain in the lower abdomen during or around menstruation, medically called dysmenorrhea. Pain may radiate to the back or thighs and may occur with nausea, diarrhea, headache, or fatigue. Severe, worsening, or newly developed pain requires evaluation for causes such as endometriosis or fibroids.

Synonyms:

Menstrual Cycle

The recurring hormonal and uterine changes that prepare the body for possible pregnancy. Cycle length and bleeding pattern vary among individuals and across life stages.

Synonyms:

Menstruation

The periodic shedding of the endometrial lining as part of the menstrual cycle when pregnancy does not occur. The timing, duration, and amount of bleeding vary with age, hormonal state, medicines, and health conditions.

Synonyms:

Mental Health

Mental health encompasses emotional, psychologic,

and social well-being, affecting how individuals think, feel, behave, and handle stress, relationships, and decision-making.

Synonyms:

Mental Status Examination

A structured assessment of the patient's current psychological functioning performed during the clinical interview. It evaluates appearance, behaviour, speech, mood, affect, thought process, thought content, perceptions, cognition, insight, and judgment.

Synonyms:

Mercury

Liquid metal combining with other metals to form amalgam. Concerns about toxicity, proper handling essential.

Synonyms:

Mercury Poisoning

Three forms: elemental (inhalation, neurological), inorganic (renal, GI), organic (methylmercury, neurological). Minamata disease from methylmercury. Treatment: chelation (dimercaprol, DMSA), remove exposure.

Synonyms:

Merkel Cell Carcinoma

An aggressive neuroendocrine skin cancer arising from Merkel cells. It presents as a rapidly growing, painless, red-violet nodule on sun-exposed skin of elderly patients. Approximately 80 percent are associated with Merkel cell polyomavirus. Risk factors include immunosuppression, UV exposure, and fair skin.

Synonyms:

Meropenem-vaborbactam

A combination of the carbapenem meropenem with the cyclic boronate beta-lactamase inhibitor vaborbactam. Vaborbactam inhibits class A and class C beta-lactamases, including KPC carbapenemases, but does not inhibit class D or metallo-beta-lactamases. This combination has activity against many carbapenem-resistant Enterobacteriaceae.

Synonyms:

MERRF Syndrome

Myoclonic epilepsy with ragged-red fibres, a mitochondrial disorder usually caused by a pathogenic mitochondrial DNA variant. It features myoclonus, generalized epilepsy, ataxia, and skeletal-muscle mitochondrial abnormalities, with variable multisystem involvement.

Synonyms:

Mesenteric Artery Ischemia

Inadequate blood flow through the mesenteric arteries, usually caused by embolism, thrombosis, or severe low-flow states. Acute disease presents with severe abdominal pain out of proportion to examination and can progress to bowel infarction.

Synonyms:

Mesenteric Ischemia

Reduced blood flow to intestines. Acute: embolism, thrombosis. Chronic: atherosclerosis. CT angiography diagnosis.

Synonyms:

Mesentery

The fan-shaped double layer of peritoneum attaching the small intestine (jejunum and ileum) to the posterior abdominal wall, carrying the superior mesenteric artery, vein, lymphatics, and autonomic nerves between its layers. Root extends from duodenojejunal junction to ileocecal junction.

Synonyms:

Mesh

A synthetic or biological implant used to provide structural support in pelvic organ prolapse and stress urinary incontinence surgery. Types: polypropylene (most common, mid-urethral slings for SUI, vaginal mesh for prolapse), biological (porcine, bovine, or cadaveric dermis).

Synonyms:

Mesoderm

The middle germ layer in an embryo, which develops

into muscles, bones, cartilage, blood vessels, and the kidneys.

Synonyms:

Messenger RNA

Single-stranded RNA molecule transcribed from DNA template, carrying genetic code from nucleus to ribosomes for protein synthesis. Contains 5' cap (methylguanosine), 5' UTR, coding sequence (codons), 3' UTR, and poly-A tail. Eukaryotic mRNA undergoes processing: splicing (intron removal, exon ligation), capping, polyadenylation.

Synonyms:

Meta-Analysis

A statistical method that combines quantitative results from multiple studies addressing a related question. Its validity depends on the quality and comparability of the studies.

Synonyms:

Metabolic Acidosis

A primary acid-base disorder characterized by decreased serum bicarbonate (<22 mEq/L) and pH <7.35 . Causes are classified by anion gap (AG). High AG: diabetic ketoacidosis, lactic acidosis, renal failure, starvation, toxins (methanol, ethylene glycol, salicylates).

Synonyms:

Metabolic Alkalosis

A primary increase in plasma bicarbonate or loss of hydrogen ions. Causes include vomiting, diuretic use, mineralocorticoid excess, and chloride depletion; respiratory compensation increases carbon dioxide but is limited by hypoxemia and acidosis.

Synonyms:

Metabolic Rate

The rate at which the body uses energy to maintain life and perform activity.

Synonyms:

Metabolic Syndrome

Cluster of conditions: abdominal obesity, hyperten-

sion, hyperglycemia, high triglycerides, low HDL. Increases cardiovascular disease and diabetes risk.

Synonyms:

Metabolic Tumor Volume

Total volume of metabolically active tumor on PET. Prognostic in lymphoma.

Synonyms:

Metabolism

Sum of all chemical reactions in the body: catabolism (breakdown, releases energy) and anabolism (synthesis, consumes energy). Central pathways: glycolysis, TCA cycle, oxidative phosphorylation, pentose phosphate pathway. Metabolic regulation ensures energy homeostasis.

Synonyms:

Metacarpals

Five long bones (I-V) forming the palm framework. Each has base, shaft, and head. The first is shortest and most mobile, articulating with the trapezium at a saddle joint for opposition. Second/third are firmly fixed; fourth/fifth more mobile. Bennett's fracture affects the first metacarpal base; boxer's fracture affects the fifth neck.

Synonyms:

Metacarpophalangeal Joint

A condyloid synovial joint between a metacarpal head and the base of a proximal phalanx. It permits flexion, extension, abduction, adduction, and limited circumduction.

Synonyms:

Metagenomic Sequencing

Sequencing of nucleic acid recovered directly from a clinical or environmental specimen to identify microbial genetic material without requiring growth in culture. It can detect unusual or polymicrobial infections but is vulnerable to contamination and requires clinical interpretation.

Synonyms:

Metal Artifact

Image degradation from metal implants. Reduced by metal artifact reduction sequences (MRI), iterative reconstruction (CT).

Synonyms:

Metaphyseal Corner Fractures

Bucket-handle or corner fractures at the metaphysis of long bones, characteristic of child abuse. Caused by twisting or pulling forces on extremities. Most common in the knee, ankle, and elbow. Seen on skeletal survey; may not be visible initially. Highly specific for non-accidental trauma in infants.

Synonyms:

Metaphysis

The region of a long bone between the epiphysis (end) and diaphysis (shaft), containing the epiphyseal growth plate (physis) in children—the zone of active cartilage growth (endochondral ossification).

Synonyms:

Metaplasia

A reversible adaptive change in which one differentiated adult cell type is replaced by another, representing the body's attempt to better withstand a chronic stress or irritation. The process involves reprogramming of tissue stem cells to differentiate along a different lineage that is more resilient to the new environment.

Synonyms:

Metastasectomy

Surgical removal of one or more metastases, which may be curative in selected oligometastatic disease, e.g., colorectal liver and lung metastases and sarcoma pulmonary metastases.

Synonyms:

Metastasis

Spread of cancer cells from primary site to distant locations. Routes: lymphatic, hematogenous, direct extension, transcoelomic. Common sites: lungs, liver, bone, brain. Distant metastasis indicates Stage IV disease.

Synonyms:

Metastasis of colorectal cancer

Spread of colorectal malignancy to distant organs via lymphatic, hematogenous, or peritoneal routes, most commonly involving the liver, lungs, and peritoneum. The liver is the first site of metastasis due to portal venous drainage, and hepatic metastases may be resectable with curative intent.

Synonyms:

Metastasis-Free Survival

The time from treatment until the development of distant metastasis or death; an important endpoint in adjuvant therapy trials.

Synonyms:

Metastatic adenocarcinoma

An adenocarcinoma that has spread from its primary site to distant organs, commonly the liver, lungs, bones, or brain. The prognosis and treatment depend on the primary tumor origin and the extent of metastatic disease.

Synonyms:

Metastatic Calcification

The deposition of calcium salts in otherwise normal tissues due to systemic hypercalcemia, where elevated serum calcium levels exceed the tissue ability to maintain calcium homeostasis.

Synonyms:

Metastatic Cascade

Sequence of events in metastasis: local invasion, intravasation, circulation, extravasation, colonization. Many cells die during process.

Synonyms:

Metastatic colon cancer

Advanced colonic malignancy that has spread beyond the bowel to distant sites, most commonly the liver, lungs, and peritoneum, via lymphatic and hematogenous dissemination. Staging uses CT of chest, abdomen, and pelvis, and PET-CT may identify occult metastases.

Synonyms:

Metastatic inguinal lymphadenopathy

Enlargement of inguinal lymph nodes due to metastatic cancer cells, often from primary tumors of the lower extremities, pelvis, or anorectal region. It may indicate advanced disease requiring systemic therapy.

Synonyms:

Metastatic lung cancer

Lung cancer that has spread beyond the lungs to other organs, such as the brain, bones, liver, or adrenal glands. It represents advanced stage disease with limited treatment options.

Synonyms:

Metatarsals

Five long bones (I-V) forming the forefoot. Each has base, shaft, and head. First is shortest/thickest, bearing approximately one-third of forefoot load. Stress fractures commonly affect the second and third (march fractures). Morton's neuroma typically affects the nerve between 3rd/4th metatarsal heads.

Synonyms:

Metered-Dose Inhaler

A pressurized inhaler delivering a metered dose of medication. Requires proper technique for effective delivery. Spacer devices improve drug delivery and reduce oropharyngeal deposition. Most common delivery device for asthma and COPD maintenance.

Synonyms:

Metformin in Prediabetes

Metformin may reduce progression from prediabetes to type 2 diabetes, especially in people at high risk. Its use depends on age, body size, prior gestational diabetes, kidney function, other conditions, and patient preference; lifestyle intervention remains important.

Synonyms:

Methacholine Challenge Test

A bronchoprovocation test used when asthma is

suspected but routine spirometry is nondiagnostic. Inhaled methacholine may cause bronchoconstriction, and spirometry is repeated after increasing doses. The result must be interpreted with symptoms, treatment, and other test findings because the test is not specific for asthma.

Synonyms:

Methanol Poisoning

Toxic ingestion or exposure to methanol, whose metabolites cause high-anion-gap metabolic acidosis and visual or neurologic injury. Treatment requires urgent toxicology consultation, antidotal fomepizole or selected ethanol therapy, correction of acidosis, and hemodialysis in severe cases.

Synonyms:

Methemoglobinemia

A condition in which hemoglobin iron is oxidized to the ferric state, reducing oxygen delivery and causing functional anemia. Cyanosis, chocolate-brown blood, headache, dyspnea, neurologic symptoms, and cardiovascular compromise may occur depending on level and comorbidity.

Synonyms:

Methicillin-resistant *Staphylococcus aureus*

Staphylococcus aureus resistant to beta-lactam antibiotics through acquisition of the *mecA* gene encoding penicillin-binding protein 2a (PBP2a). MRSA is a major cause of healthcare-associated and community-associated infections. Treatment options include vancomycin, daptomycin, linezolid, and trimethoprim-sulfamethoxazole.

Synonyms:

Methotrexate in Dermatology

An immunomodulatory antimetabolite used in selected inflammatory and autoimmune skin diseases, including psoriasis, eczema, and some connective-tissue disorders. Treatment requires attention to liver disease, blood counts, infection risk, drug interactions, and strict pregnancy precautions.

Synonyms:

Methylation

Addition of methyl group to DNA (cytosine) or histones. DNA methylation at CpG islands typically silences genes. Hypomethylation associated with cancer.

Synonyms:

Methylene Blue

An oxidizing-reducing agent used primarily to treat clinically significant methemoglobinemia by facilitating conversion of methemoglobin to functional hemoglobin. It may be ineffective or hazardous in glucose-6-phosphate dehydrogenase deficiency and can interact with serotonergic drugs.

Synonyms:

Methylmalonic Acid Level

A blood or urine measurement used to assess functional vitamin B12 status. Elevated methylmalonic acid supports vitamin B12 deficiency, particularly when the serum vitamin B12 concentration is borderline. Renal impairment can also increase the level and should be considered during interpretation.

Synonyms:

Metoclopramide

A dopamine (D2) receptor antagonist and 5-HT₃ antagonist used as a prokinetic antiemetic for gastroparesis, chemotherapy-induced and postoperative nausea, and GERD (facilitates gastric emptying).

Synonyms:

Metronidazole

A nitroimidazole antibiotic and antiprotozoal agent that is selectively toxic to anaerobic organisms and certain parasites. The drug is activated by reduction of its nitro group within anaerobic cells, generating toxic free radicals that damage DNA.

Synonyms:

Metronidazole-associated encephalopathy

A rare complication of prolonged or high-dose metronidazole therapy, causing cerebellar dysfunction (ataxia, dysarthria, nystagmus) and sometimes confusion or seizures. MRI may show T2-

hyperintense lesions in the cerebellar dentate nuclei, corpus callosum splenium, and brainstem. Symptoms typically resolve with drug discontinuation.

Synonyms:

Metrorrhagia

Uterine bleeding occurring at irregular times, including between expected menstrual periods. Causes include hormonal disorders, structural lesions, pregnancy-related conditions, medicines, and disease of the cervix or uterus; evaluation depends on age, pregnancy status, symptoms, and risk factors.

Synonyms:

MIBG Scan

Nuclear medicine imaging using I-123 or In-111 MIBG. Detects pheochromocytoma, neuroblastoma.

Synonyms:

Micafungin

An echinocandin antifungal agent used in the treatment and prophylaxis of invasive candidiasis and esophageal candidiasis. Micafungin inhibits beta-(1,3)-D-glucan synthase, disrupting fungal cell wall synthesis and leading to osmotic instability and cell death.

Synonyms:

Michaelis-Menten Kinetics

The mathematical model describing the rate of enzyme-catalyzed reactions as a function of substrate concentration.

Synonyms:

Microalbuminuria

Excretion of 30 to 300 mg of albumin daily undetectable by standard dipstick. Earliest marker of diabetic nephropathy and cardiovascular risk predictor. Detected by urine albumin-to-creatinine ratio on spot specimen. Normal less than 30 mg/g creatinine. Signals early glomerular damage in diabetes warranting RAAS blockade initiation.

Synonyms:

Microangiopathic hemolysis

Red-cell fragmentation and intravascular hemolysis caused by passage through abnormal small vessels, producing schistocytes, elevated LDH, and reduced haptoglobin.

Synonyms:

Microarray

Technology measuring expression of thousands of genes simultaneously or detecting copy number variations. Gene expression microarrays: compare expression patterns. SNP arrays: detect genetic variations. Comparative genomic hybridization (CGH): detect deletions/duplications.

Synonyms:

Microbiome

The collection of microorganisms (bacteria, archaea, fungi, viruses—the microbiota) and their genetic material inhabiting a host's body surfaces, particularly the gastrointestinal tract.

Synonyms:

Microcephaly

A head size substantially smaller than expected for age and sex, usually defined by an occipitofrontal circumference below the third percentile or more than two standard deviations below the mean. Causes include genetic disorders, congenital infections, brain injury, malnutrition, and impaired brain development.

Synonyms:

Micrognathia

A condition where the mandible is abnormally small, resulting in a retruded chin and decreased size of the oral cavity. May be isolated or syndromic (Pierre Robin sequence, Treacher Collins, Nager syndrome, Stickler syndrome). Presents at birth with potential airway obstruction (glossoptosis) and feeding difficulties.

Synonyms:

Micrograms

A unit of mass equal to one millionth of a gram,

written as μg .

Synonyms:

Micrometastasis

A small deposit of cancer cells that has spread from the primary tumor but is not detectable clinically or on standard imaging, e.g., isolated tumor cells in a sentinel lymph node; relevant to staging and prognosis.

Synonyms:

Micromolar

A concentration unit equal to one millionth of a mole per liter, written as $\mu\text{mol}/L$.

Synonyms:

Micronutrients

Vitamins and minerals required in small amounts for enzymatic, hormonal, structural, hematologic, neurologic, and immune functions. They include fat-soluble vitamins (A, D, E, and K), water-soluble vitamins, and essential minerals.

Synonyms:

Microphthalmia

A congenitally small eye, ranging from mild (reduced axial length) to severe with structural anomalies. Associated with coloboma, congenital cataract, and genetic syndromes; can cause vision loss and requires optical correction, amblyopia therapy, and sometimes socket rehabilitation.

Synonyms:

MicroRNA

Small non-coding RNA regulating gene expression. Post-transcriptional regulation.

Synonyms:

Microsatellite Instability

A molecular pattern caused by deficient DNA mismatch-repair function, resulting in length changes in short repetitive DNA sequences. MSI-high tumors may have increased mutation burden and can be eligible for particular immunotherapies.

Synonyms:

Microscope

Magnifies small structures. Types: light, electron, fluorescent. Essential for histology, hematology, microbiology.

Synonyms:

Microscopic Colitis

Umbrella term encompassing both collagenous colitis and lymphocytic colitis which share the clinical presentation of chronic watery non-bloody diarrhea and the pathophysiological feature of colonic mucosal inflammation. Endoscopic appearance is typically normal necessitating random biopsies for diagnosis.

Synonyms:

Microscopic Examination

The pathologic evaluation of tissue or cells under the light or electron microscope, complementing the gross examination to form the complete morphologic diagnosis. Routine light microscopy uses hematoxylin and eosin sections to assess architecture, cellular morphology, mitotic activity, and relation to margins.

Synonyms:

Microscopic Polyangiitis

A necrotizing vasculitis affecting small blood vessels (capillaries, venules, arterioles) with few or no immune deposits (pauci-immune). Part of the ANCA-associated vasculitis group. Strongly associated with MPO-ANCA (p-ANCA, 80%).

Synonyms:

Microwave Ablation

A procedure that uses microwave energy to heat and destroy selected tissue, usually under imaging guidance.

Synonyms:

Micturition

The process of urination, coordinated by the pontine micturition center, parasympathetic (pelvic nerve, S2-S4) contraction of the detrusor muscle, and relaxation of the internal (involuntary) and external

(voluntary, pudendal nerve) urethral sphincters.

Synonyms:

Mid-Systolic Click

A sharp, high-pitched sound occurring in mid-to-late systole, associated with mitral valve prolapse. The click represents sudden tensing of the elongated chordae tendineae as the prolapsing leaflet billows into the left atrium. It may be followed by a late systolic murmur of mitral regurgitation.

Synonyms:

Mid-Upper-Arm Circumference

The circumference of the upper arm measured at the midpoint between the acromion and olecranon processes. It is a practical anthropometric measure of muscle and fat stores, particularly useful when body weight or height cannot be measured reliably.

Synonyms:

Midaxillary Line

An imaginary vertical line on the side of the body passing through the apex of the axilla (armpit).

Synonyms:

Midbrain

Most superior brainstem segment connecting pons to diencephalon. Contains cerebral peduncles (corticospinal/corticobulbar tracts), substantia nigra (dopaminergic neurons degenerated in Parkinson's), red nucleus (rubrospinal tract for coordination), and periaqueductal gray (pain modulation).

Synonyms:

Midclavicular Line

An imaginary vertical line on the front of the body passing through the midpoint of the clavicle (collarbone).

Synonyms:

Middle Ear

An air-filled space between the eardrum and inner ear that contains the malleus, incus, and stapes. These ossicles transmit sound vibrations to the inner ear, and the auditory tube helps equalize middle-ear

pressure.

Synonyms:

Middle East Respiratory Syndrome

A severe respiratory infection caused by Middle East respiratory syndrome coronavirus, usually acquired through close contact with infected camels or people. It can cause pneumonia, respiratory failure, and renal or multiorgan complications.

Synonyms:

Middle Lobe Syndrome

Chronic or recurrent atelectasis and infection of the right middle lobe due to bronchial obstruction. The long, narrow right middle lobe bronchus is susceptible to compression by lymph nodes, tumors, or mucous plugging. It may be caused by bronchiectasis, malignancy, or granulomatous disease. Treatment depends on the underlying cause.

Synonyms:

Midtrimester

The middle third of pregnancy, from 14 to 28 weeks gestation. The midtrimester is when many women feel their best: nausea and fatigue of the first trimester resolve, and the physical discomforts of the third trimester have not yet developed.

Synonyms:

Migraine

A primary headache disorder characterized by recurrent episodes of moderate to severe, typically unilateral, pulsating headache lasting 4-72 hours, associated with nausea, vomiting, photophobia, and phonophobia.

Synonyms:

Migraine With Aura

A primary headache disorder characterized by recurrent attacks of fully reversible visual, sensory, or speech symptoms that develop gradually over at least five minutes and last no more than sixty minutes, followed by headache with the characteristics of migraine.

Synonyms:

Migraine Without Aura

A primary headache disorder characterized by recurrent attacks of moderate to severe, pulsating, unilateral headache lasting four to seventy-two hours, associated with nausea, vomiting, photophobia, and phonophobia.

Synonyms:

Migrating Motor Complex

Cyclical patterns of intense gastrointestinal motility occurring during fasting (interdigestive period), sweeping residual food, bacteria, and debris from the stomach through the small intestine to the colon.

Synonyms:

Mild Cognitive Impairment

A transitional cognitive state between normal aging and dementia, characterized by subjective cognitive complaints confirmed by objective cognitive impairment that is not severe enough to significantly interfere with daily activities.

Synonyms:

Milia

Small, white, keratin-filled cysts appearing on the face, particularly around the eyes. They are common in newborns (neonatal milia) and adults (primary milia). Secondary milia occur after blistering injuries, dermabrasion, or laser therapy. Milia are asymptomatic and may resolve spontaneously.

Synonyms:

Miliaria crystallina

A benign, asymptomatic eruption of small, clear, superficial vesicles caused by obstruction of eccrine sweat ducts in the stratum corneum, occurring in hot, humid environments or during high fevers. The vesicles resemble dewdrops on the skin and rupture easily, leaving fine scales.

Synonyms:

Miliary TB

Hematogenous dissemination of *M. tuberculosis* causing innumerable 1–3 mm granulomas throughout lungs and other organs. CXR shows “millet

seed” pattern. More common in immunocompromised patients.

Synonyms:

Miliary Tuberculosis

Disseminated tuberculosis caused by hematogenous spread of *Mycobacterium tuberculosis*, producing numerous tiny granulomatous lesions in the lungs and potentially multiple organs. Symptoms may include prolonged fever, weight loss, night sweats, cough, and organ-specific manifestations.

Synonyms:

Milk-Alkali Syndrome

Hypercalcemia, metabolic alkalosis, and renal dysfunction caused by excessive intake of calcium and absorbable alkali. It may occur with high-dose calcium supplements or antacid use.

Synonyms:

Milliequivalent

A chemical-equivalent unit used to express the amount of charged substances such as electrolytes.

Synonyms:

Millimolar

A concentration unit equal to one thousandth of a mole per liter, written as mmol/L.

Synonyms:

Milrinone

A phosphodiesterase-3 inhibitor with positive inotropic and vasodilatory (inodilator) actions, increasing cAMP in cardiac and vascular smooth muscle.

Synonyms:

Milroy Disease

An inherited primary lymphedema caused most often by pathogenic variants affecting VEGFR3 signaling. It typically presents with chronic swelling of the lower limbs from birth or early infancy and may be associated with papillomatosis, hydrocele, or recurrent skin infection.

Synonyms:

Mindful Eating

Paying attention to hunger cues, eating slowly, savoring food. May reduce overeating, improve digestion.

Synonyms:

Mineralocorticoid Receptor

An intracellular steroid receptor activated primarily by aldosterone in the kidney, colon, sweat glands, and other tissues. Its activation increases sodium reabsorption and potassium and hydrogen secretion and contributes to blood-pressure regulation and tissue remodeling.

Synonyms:

Mineralocorticoid Receptor Antagonist

A drug that blocks aldosterone receptors, promoting natriuresis while limiting potassium loss and adverse cardiac remodeling. Spironolactone and eplerenone improve outcomes in selected heart-failure patients; hyperkalemia and renal dysfunction require monitoring.

Synonyms:

Mini-Mental State Examination

A brief structured cognitive screening instrument assessing orientation, registration, attention, calculation, recall, language, and visuospatial ability. Scores are affected by education, language, sensory impairment, culture, and delirium and do not establish a dementia diagnosis alone.

Synonyms:

Minimal Change Disease

A cause of nephrotic syndrome, especially in children, in which the glomeruli appear nearly normal by light microscopy but podocyte foot processes are effaced on electron microscopy. It causes marked protein loss in the urine and edema.

Synonyms:

Minimal Residual Disease

The small number of malignant cells that remain after treatment and are below detection by conventional clinical examination or routine microscopy. Sensitive flow-cytometric, molecular, or imaging

methods may detect MRD and refine relapse-risk assessment.

Synonyms:

Minimum Alveolar Concentration

The alveolar concentration of an inhaled anesthetic that prevents movement in half of people exposed to a standardized painful surgical stimulus. It is used to compare the potency of volatile anesthetics.

Synonyms:

Minimum Bactericidal Concentration

The lowest concentration of an antimicrobial that kills a defined proportion of the original bacterial inoculum, commonly demonstrated by subculture without growth. MBC is distinct from MIC and is not routinely required for every infection.

Synonyms:

Minimum Effect Concentration

The lowest concentration of a drug in the blood or at its site of action that produces a defined measurable effect.

Synonyms:

Minimum inhibitory concentration

The lowest concentration of an antimicrobial that prevents visible growth of a microorganism under standardized laboratory conditions. It helps characterize susceptibility, but results must be interpreted with the organism, specimen, assay, and clinical context.

Synonyms:

Minimum Lethal Concentration

The lowest concentration of a substance associated with death in a defined test population or experimental setting.

Synonyms:

Minute Ventilation

The total volume of air breathed in one minute (tidal volume x respiratory rate). Normal is 6–8 L/min. Elevated in increased metabolic demand, pain, anxiety, and sepsis. Reduced in neuromuscular

disease and sedation.

Synonyms:

Miosis

Constriction of the pupil, produced mainly by parasympathetic activity through the oculomotor nerve and sphincter pupillae muscle. It may be physiologic or caused by medicines, toxins, neurologic disease, or ocular conditions.

Synonyms:

MIRD Schema

Medical Internal Radiation Dose. Method for calculating radiation absorbed doses.

Synonyms:

Mirizzi Syndrome

Condition where a gallstone impacted in the cystic duct or Hartmann pouch extrinsic compression of the common hepatic duct causing obstructive jaundice. Classified into four types based on the degree of erosion and fistula formation. Type one is extrinsic compression without fistula.

Synonyms:

Mirror Therapy

Mirror reflection of unaffected limb movement creates visual illusion of affected limb moving. Reduces phantom limb pain, improves stroke recovery.

Synonyms:

Miscarriage

The spontaneous loss of a pregnancy before 20 weeks of gestation, occurring in 15-20 percent of clinically recognized pregnancies. The majority (80 percent) occur in the first trimester, with risk decreasing significantly after visualization of fetal cardiac activity.

Synonyms:

Mismatch Repair Deficiency

Loss of DNA mismatch-repair function that produces microsatellite instability and a high tumor mutational burden. Seen in Lynch syndrome and some sporadic colorectal, endometrial, and other cancers, and associated with responsiveness to im-

mune checkpoint inhibitors.

Synonyms:

Misoprostol (Cytotec)

A synthetic prostaglandin analogue used for selected gynecologic and obstetric indications, including cervical ripening, labor induction, and medical management of some pregnancies. It can cause uterine contractions, bleeding, gastrointestinal effects, or uterine tachysystole; use depends on the clinical setting and gestational age.

Synonyms: Cytotec

Missense Variant

A single-nucleotide substitution that changes one amino acid in a protein. Its clinical effect ranges from benign to pathogenic and must be assessed using molecular, functional, population, and clinical evidence.

Synonyms:

Mitochondria

Double-membrane organelles known as the "powerhouse of the cell," generating ATP through oxidative phosphorylation. Outer membrane is permeable; inner membrane is highly folded (cristae) and contains the electron transport chain and ATP synthase.

Synonyms:

Mitochondrial Diabetes

Diabetes caused by mutations in mitochondrial DNA particularly the m.3243A>G mutation in the MT-TL1 gene. Maternally inherited. Often associated with sensorineural hearing loss termed maternally inherited diabetes and deafness. Patients are typically lean with impaired insulin secretion. Diagnosis requires genetic testing.

Synonyms:

Mitochondrial Disease

A group of genetic disorders caused by impaired mitochondrial energy production. Symptoms vary and may affect the brain, muscles, nerves, heart, eyes, or multiple organs; onset and severity can differ widely even within one family.

Synonyms:

Mitochondrial Inheritance

Inheritance of mitochondrial DNA, which is transmitted predominantly through the egg and therefore usually from the mother. Examples include Leber hereditary optic neuropathy and MELAS. Heteroplasmy means that mutant and normal mitochondrial DNA coexist in a cell.

Synonyms:

Mitosis

Cell division that produces two genetically similar daughter cells with the same chromosome number as the parent cell.

Synonyms:

Mitotic Figure

A cell undergoing nuclear division that can be identified microscopically. Mitotic count contributes to assessment of proliferative activity and tumor grade, although counting method and area must be standardized.

Synonyms:

MitraClip

A transcatheter device that creates a double orifice in the mitral valve by clipping the anterior and posterior leaflets together, reducing mitral regurgitation. It is indicated for patients with significant (3+ or 4+) mitral regurgitation who are at high risk for surgical mitral valve repair.

Synonyms:

Mitral Regurgitation

Incomplete closure of the mitral valve allowing blood to flow backward from the left ventricle to the left atrium during systole. Causes include mitral valve prolapse, papillary muscle dysfunction, rheumatic disease, and ischemic heart disease. Murmur: pansystolic (holosystolic) blowing murmur at the apex radiating to the axilla.

Synonyms:

Mitral Stenosis

Narrowing of the mitral valve opening, obstructing left atrial to left ventricular blood flow. Most commonly caused by rheumatic heart disease. Symptoms include dyspnea, fatigue, and atrial fibrillation. Murmur: low-pitched, rumbling mid-diastolic murmur at the apex with opening snap.

Synonyms:

Mitral Stenosis Murmur

Low-pitched, rumbling mid-diastolic murmur at the apex, best heard with the bell of the stethoscope in the left lateral decubitus position. Accompanied by an opening snap (early diastolic high-pitched click) and loud S1 in pliable valves. Severe MS may show a diastolic murmur without a preceding S2 gap.

Synonyms:

Mitral Valve

Left atrioventricular (bicuspid) valve with anterior and posterior cusps supported by chordae tendineae and papillary muscles. Anterior cusp is larger and proximate to the aortic valve. Mitral valve prolapse is the most common valvular abnormality. Mitral stenosis (most commonly rheumatic) and regurgitation are significant.

Synonyms:

Mitral Valve Prolapse

A valvular heart disease where the mitral valve leaflets prolapse into the left atrium during systole. Most patients are asymptomatic; some develop palpitations, atypical chest pain, or dyspnea. Diagnosis by echocardiography. Complications include mitral regurgitation, infective endocarditis, and arrhythmias.

Synonyms:

Mitral-valve repair

A surgical or transcatheter procedure to restore mitral valve competence without replacement, typically for regurgitation from prolapse, chordal rupture, or ischemic dysfunction. Repair preserves native valve tissue, maintains left ventricular function, and avoids lifelong anticoagulation required by mechanical prostheses.

Synonyms:

Mixed Connective Tissue Disease

An overlap syndrome with features of systemic lupus erythematosus, systemic sclerosis, and polymyositis/dermatomyositis. Highly associated with anti-U1 RNP antibodies. Presents with Raynaud phenomenon (nearly universal), puffy hands, arthritis, myositis, esophageal dysmotility, and serositis. Renal disease is less common than in SLE.

Synonyms:

Mixed Hearing Loss

A combination of both conductive and sensorineural hearing loss occurring in the same ear, resulting in a hearing deficit that involves impaired sound transmission through the outer or middle ear in addition to cochlear or neural dysfunction.

Synonyms:

Mixed Urinary Incontinence

Involuntary leakage of urine, significantly affecting psychological, social, and physical well-being. See urinary incontinence.

Synonyms:

MMR Vaccine

A live attenuated vaccine against measles, mumps, and rubella. It is given according to the immunization schedule and is generally avoided during pregnancy and in people with certain severe immune deficiencies.

Synonyms:

Mobile genetic elements

Genetic elements that can move within and between genomes. These include plasmids, transposons, and integrons. Mobile genetic elements can carry antibiotic resistance genes and virulence factors. They facilitate horizontal gene transfer and contribute to the rapid evolution of bacteria.

Synonyms:

Mobile Health (mHealth)

Use of mobile devices for health. Examples: health

apps, text message reminders, wearable devices.

Synonyms: mHealth

Modafinil

A wakefulness-promoting agent (mechanism not fully understood, likely dopaminergic) used for narcolepsy, obstructive sleep apnea residual sleepiness, and shift work sleep disorder; used off-label for fatigue and ADHD. Less abuse potential and fewer sympathomimetic effects than amphetamines.

Synonyms:

Modified Biophysical Profile (Modified BPP)

A simplified antepartum test combining the non-stress test (NST) with the amniotic fluid index (AFI). The NST assesses acute fetal status (heart rate reactivity over 20-40 minutes) and the AFI assesses chronic uteroplacental function (oligohydramnios suggests chronic hypoxia or placental insufficiency).

Synonyms: Modified BPP

Mohs Surgery

A micrographically controlled technique in which skin cancer is excised in thin layers and examined margin-by-margin, achieving high cure rates for basal cell and squamous cell carcinoma while sparing normal tissue.

Synonyms:

Molar Pregnancy

A type of gestational trophoblastic disease characterized by abnormal proliferation of trophoblastic tissue. See Hydatidiform Mole.

Synonyms:

Mole

Nevus: a benign proliferation of melanocytes, the most common skin lesion; also used for other nevi (moles are melanocytic nevi). Types: junctional (flat, brown—childhood), compound (slightly raised), intradermal (dome-shaped, flesh/pigmented).

Synonyms:

Molecular Pathology

The investigation of disease using nucleic-acid, genomic, epigenomic, or molecular protein alterations in cells and tissues. It may establish diagnosis, estimate prognosis, identify inherited risk, or select targeted therapy.

Synonyms:

Molecular Testing

Analysis of DNA, RNA, or other molecular features to identify variants, fusions, expression patterns, or infectious agents for diagnosis, prognosis, or treatment selection.

Synonyms:

Molecular Weight

Mass of molecule. Important for dosing, toxicity calculations.

Synonyms:

Molluscum Contagiosum

A viral skin infection caused by a poxvirus, presenting as firm, dome-shaped, umbilicated papules with central dimpling, 2 to 5 mm in diameter. It is transmitted by direct skin contact, autoinoculation, and sexual contact in adults. Immunocompetent hosts clear lesions spontaneously within 6 to 12 months.

Synonyms:

Molybdenum-99

Parent isotope of Tc-99m, half-life 66 hours. Produced in nuclear reactors. Generator systems provide Tc-99m for 1 week.

Synonyms:

Mondor's disease

Superficial thrombophlebitis of the anterior chest wall veins, typically the lateral thoracic, thoracoepigastric, or superior epigastric veins. Presents as a tender, cord-like subcutaneous structure with skin retraction. Usually self-limited; associated with breast surgery, trauma, or hypercoagulable states.

Synonyms:

Monitored Anesthesia Care

A distinct service where an anesthesia professional provides premedication, administration of analgesics and/or sedatives, continuous monitoring of the patient's cardiorespiratory status, and intervention for any emergent or unavoidable complications that may arise during a diagnostic or therapeutic procedure.

Synonyms:

Monitoring Test

Test to track disease progression or treatment response.

Synonyms:

Monoamine Oxidase Inhibitors

Antidepressants that inhibit monoamine oxidase, the enzyme responsible for breaking down serotonin, norepinephrine, and dopamine. MAOIs include phenelzine, tranylcypromine, isocarboxazid, and selegiline (transdermal). They are effective for atypical depression and treatment-resistant depression.

Synonyms:

Monoclonal Antibody

An antibody produced by a single cloned B-cell line, specific for one epitope, generated by hybridoma technology or recombinant methods (name suffix -mab).

Synonyms:

Monocyte

A circulating leukocyte (2-8 percent) that differentiates into macrophages and dendritic cells in tissues. Monocytes phagocytose pathogens, present antigens, and secrete cytokines (TNF, IL-1, IL-6); participate in innate immunity, inflammation, and tissue repair. Subsets differ in function (classical, nonclassical, intermediate).

Synonyms:

Mononucleosis

An acute viral syndrome caused by Epstein-Barr virus (EBV), primarily affecting adolescents and

young adults. Classic triad: fever, pharyngitis/exudative tonsillitis, and cervical lymphadenopathy. Associated with splenomegaly, fatigue, and atypical lymphocytosis. Diagnosis: positive heterophile antibody (Monospot) and EBV serology.

Synonyms:

Monosodium urate

The crystalline salt that precipitates in tissues when serum uric acid levels exceed the saturation point, forming needle-shaped, negatively birefringent crystals under polarized light microscopy. It is the pathological hallmark of gout, depositing in joints, soft tissues, and kidneys.

Synonyms:

Monosomy

Presence of one copy of a chromosome instead of the usual two. Complete autosomal monosomies are generally not compatible with life; monosomy X and some mosaic or structural forms can survive and have variable features.

Synonyms:

Monospot (EBV Heterophile Antibody)

A rapid blood test that detects heterophile antibodies associated with infectious mononucleosis. It may be negative early in illness or in young children and does not directly detect Epstein-Barr virus; specific antibody testing may be needed.

Synonyms: EBV Heterophile Antibody

Monounsaturated Fat

A fat whose fatty acids contain one carbon-carbon double bond. It occurs in foods such as olive oil, avocados, nuts, and some seeds.

Synonyms:

Montevideo Units

A quantitative measure of uterine contraction intensity, calculated by summing the peak contraction pressures (in mm Hg) minus the resting tone for each contraction in a 10-minute window. Adequate labor: ≥ 200 MVU (spontaneous) or ≥ 250 MVU (augmented). Measured with an intrauterine pres-

sure catheter (IUPC).

Synonyms:

Montgomery Tubercles

Small, raised sebaceous glands visible on the areola of the breast during pregnancy and lactation. They appear as small bumps surrounding the nipple and secrete an oily substance that lubricates the nipple and areola, protecting against infection. Their prominence increases during pregnancy under hormonal influence.

Synonyms:

Montreal Cognitive Assessment

A brief cognitive screening instrument with greater emphasis on executive function, visuospatial ability, attention, memory, language, and orientation than many shorter screens. Interpretation requires consideration of education, language, sensory deficits, and acute illness.

Synonyms:

Mood Stabilizers

Medications used to treat mood episodes in bipolar disorder and prevent recurrence. The primary mood stabilizers are lithium, valproate, carbamazepine, and lamotrigine. Each has a different mechanism and side effect profile. Lithium is the only agent with demonstrated anti-suicide properties.

Synonyms:

Morbid Obesity

Severe obesity defined clinically as BMI ≥ 40 kg/m² or BMI ≥ 35 kg/m² with obesity-related comorbidities (type 2 diabetes, hypertension, obstructive sleep apnoea, non-alcoholic fatty liver disease, osteoarthritis, cardiovascular disease).

Synonyms:

Morbidity

Illness, disease, or disability in an individual or population. Morbidity measures may describe prevalence, incidence, complications, or functional effects.

Synonyms:

Morgagni Hernia

A congenital diaphragmatic hernia occurring through the anterior retrosternal foramen of Morgagni, resulting from incomplete fusion of parts of the diaphragm. Abdominal contents may move into the chest and cause respiratory or gastrointestinal symptoms.

Synonyms:

Morning Sickness

Nausea and vomiting of pregnancy (NVP): nausea (and sometimes vomiting) commonly in the first trimester (6-12 weeks), typically resolving by 14-16 weeks; multifactorial (hCG, estrogen, progesterone, odor sensitivity).

Synonyms:

Moro Reflex

A primitive reflex present from birth to 3-6 months, elicited by suddenly startling the infant (loud noise, head drop). The infant extends both arms outward with fingers spread, then draws arms inward as if embracing. Absence at birth suggests central nervous system injury or brachial plexus palsy.

Synonyms:

Mortality

Death rate in population. Elderly mortality: higher rates, common causes: cardiovascular disease, cancer, dementia, respiratory disease, fall-related injuries. Life expectancy varies by sex, race, socioeconomic status.

Synonyms:

Mortality Rate

Deaths from disease in population. Crude: total deaths / total population. Specific: disease-specific deaths / population at risk.

Synonyms:

Morton Neuroma

A perineural fibrosis of the plantar digital nerve, most commonly between the third and fourth metatarsal heads. It presents as burning pain, numbness, and a feeling of walking on a pebble. It is not

a true neuroma but a mechanical entrapment neuropathy.

Synonyms:

Mosaicism

Presence of two or more cell lines with different genotypes in one individual. Can be somatic (affecting body cells) or germline (affecting gametes). Origin: post-zygotic mutation.

Synonyms:

Motion Analysis

Assessment of movement patterns. 3D gait analysis, video analysis. Identifies abnormalities, guides treatment.

Synonyms:

Motion Artifact

Image distortion or blurring caused by movement of the patient, organs, or equipment during image acquisition.

Synonyms:

Motion Correction

Correction for patient motion during acquisition. Respiratory gating, navigation.

Synonyms:

Motion Sickness

Nausea, dizziness, sweating, or vomiting caused by sensory mismatch during travel or other motion. It can occur in cars, boats, aircraft, amusement rides, or virtual-reality environments and usually improves when motion stops. Severe or persistent symptoms require assessment for other causes.

Synonyms:

Motivational Interviewing

A client-centered, directive counseling method for enhancing intrinsic motivation to change by exploring and resolving ambivalence. Developed by Miller and Rollnick, it uses the spirit of partnership, acceptance, compassion, and evocation. Core skills include open-ended questions, affirmations, reflections, and summaries.

Synonyms:

Motor Cortex

The frontal-lobe regions that plan and initiate voluntary movement. The primary motor cortex lies in the precentral gyrus and controls the opposite side of the body in an orderly somatotopic map.

Synonyms:

Motor Learning

A relatively lasting change in the ability to perform a motor skill resulting from practice, experience, feedback, and adaptation. Rehabilitation uses task-specific repetition and meaningful practice to promote motor learning.

Synonyms:

Motor Unit

A single alpha motor neuron and all the skeletal muscle fibers it innervates. The number of muscle fibers per motor unit determines precision of control: small motor units (few fibers, e.g., extraocular and hand muscles) provide fine movement; large motor units (hundreds to thousands of fibers, e.g., gastrocnemius) provide gross power.

Synonyms:

Mouth

The oral cavity that serves as the entry point of the digestive tract, used for eating, breathing, and speaking.

Synonyms:

Mouth Ulcers

Open sores affecting the oral mucosa, commonly caused by aphthous ulcers, trauma, infection, irritation, or systemic inflammatory disease. Most resolve within two weeks; persistent, recurrent, unusually large, or indurated ulcers require evaluation.

Synonyms:

Mouthwash

A liquid rinsed around the mouth and then expelled to freshen breath, deliver an active ingredient, or reduce selected oral microorganisms.

Synonyms:

Movement Disorder

A neurologic condition causing excessive, reduced, or otherwise abnormal movement. Hyperkinetic disorders include tremor, dystonia, chorea, myoclonus, tics, and dyskinesia; hypokinetic disorders include bradykinesia and parkinsonism.

Synonyms:

Moyamoya Disease

A progressive occlusive arteriopathy of the terminal internal carotid arteries and their proximal branches, with development of fragile collateral vessels at the brain base. It can cause transient ischemic attacks, strokes, seizures, headaches, or cognitive impairment.

Synonyms:

Mpox

A zoonotic infection caused by monkeypox virus, characterized by fever, swollen lymph nodes, and a distinctive rash that may include deep-seated vesicles or pustules.

Synonyms:

Mpox (monkeypox)

A zoonotic viral disease caused by the monkeypox virus, an orthopoxvirus in the same genus as smallpox (variola) and vaccinia. The virus has two clades: clade I (formerly Congo Basin, Central African) with higher virulence and mortality (up to 10 percent), and clade II (formerly West African) with lower mortality (less than 1 percent).

Synonyms: monkeypox

MR Angiography

Vascular imaging using MRI without ionizing radiation. Time-of-flight (TOF) or contrast-enhanced (CE-MRA). Used for cerebral aneurysms, renal artery stenosis, peripheral arterial disease.

Synonyms:

MR Enterography

MRI of the small bowel after oral contrast adminis-

tration. Superior soft tissue contrast for evaluating Crohn disease activity, fistulas, and abscesses without ionizing radiation. Demonstrates mural thickening, edema, enhancement patterns, and extraintestinal complications. Diffusion-weighted imaging helps assess disease activity.

Synonyms:

MR Neurography

Magnetic resonance imaging optimized to show peripheral nerves and abnormalities such as swelling, compression, or injury.

Synonyms:

MRCP (Magnetic Resonance Cholangiopancreatography)

Non-invasive MRI of the biliary and pancreatic ducts using heavily T2-weighted sequences that highlight static fluid. Used for: choledocholithiasis (CBD stones), biliary strictures, primary sclerosing cholangitis, pancreatic duct anatomy, and congenital biliary anomalies.

Synonyms: Magnetic Resonance Cholangiopancreatography

MRI

Magnetic resonance imaging, an imaging method that uses magnetic fields and radio waves to produce detailed images of body tissues.

Synonyms:

MRI (Magnetic Resonance Imaging)

Imaging using strong magnetic fields and radiofrequency pulses to generate detailed cross-sectional images. No ionizing radiation. Superior soft-tissue contrast compared to CT.

Synonyms: Magnetic Resonance Imaging

MRI Brain

Excellent for brain pathology: tumors, stroke, demyelination, infection, degeneration. Sequences: T1, T2, FLAIR, DWI, SWI, contrast-enhanced. DWI detects acute ischemia within minutes.

Synonyms:

MRI Contrast

A contrast agent administered during magnetic resonance imaging to improve visibility of selected tissues or abnormalities.

Synonyms:

MRI Joint

Evaluation of musculoskeletal structures: cartilage, ligaments, tendons, menisci, labrum. Knee: ACL, meniscus tears. Shoulder: rotator cuff, labrum. Hip: labral tears, FAI.

Synonyms:

MRI Sequences

T1-weighted: anatomy, fat bright. T2-weighted: pathology, fluid bright. FLAIR: suppresses CSF, lesions bright. DWI: restricted diffusion bright (acute stroke, abscess). STIR: fat suppression, fluid bright. Post-contrast T1: enhancement bright.

Synonyms:

mRNA Vaccine

A vaccine delivering messenger RNA encoding a pathogen antigen that host cells translate into protein, triggering an immune response. Approved for COVID-19 (Pfizer-BioNTech, Moderna) and RSV; under study for influenza, cancer, and other infections.

Synonyms:

MRSA

Methicillin-resistant *Staphylococcus aureus*, resistant to beta-lactam antibiotics through acquisition of the *mecA* gene encoding PBP2a. MRSA is a major cause of healthcare-associated and community-associated infections. Treatment options include vancomycin, daptomycin, and linezolid.

Synonyms:

MRSA decolonization

Measures intended to reduce MRSA carriage on the skin or in the nose. Protocols may include topical agents and antiseptic bathing, but the indication, regimen, and duration depend on the person's risk, infection history, setting, and local guidance.

Synonyms:

MRV (Magnetic Resonance Venography)

MRI technique to visualize veins, using time-of-flight (TOF) or contrast-enhanced sequences. Indications: cerebral venous sinus thrombosis, dural sinus stenosis, abdominal/pelvic venous thrombosis, portal vein thrombosis, and renal vein thrombosis. Differentiates acute vs. chronic thrombus.

Synonyms: Magnetic Resonance Venography

mTOR

Mammalian target of rapamycin. Controls cell growth, proliferation. Inhibited by rapamycin.

Synonyms:

Mucocele

Mucus extravasation cyst of minor salivary gland. Lower lip most common. Treatment: excision.

Synonyms:

Mucolytic Therapy

Medications that reduce mucus viscosity and elasticity, facilitating clearance. N-acetylcysteine (NAC) breaks disulfide bonds in mucus glycoproteins. Dornase alfa (Pulmozyme) cleaves extracellular DNA in CF sputum. Hypertonic saline aerosol draws water into the airway surface liquid.

Synonyms:

Mucormycosis

A life-threatening fungal infection caused by Mucorales order fungi including *Rhizopus*, *Mucor*, and *Rhizomucor* species. The infection primarily affects immunocompromised patients, particularly those with uncontrolled diabetes mellitus and hematologic malignancies. The fungi invade blood vessels causing thrombosis and tissue infarction.

Synonyms:

Mucosal Irritation

Chemical injury to mucous membranes. Eyes, nose, throat, GI tract. Treatment: irrigation, supportive care.

Synonyms:

Mucositis

Inflammation and ulceration of the oral or gastrointestinal mucosa caused by chemotherapy or radiation, causing pain, dysphagia, and poor intake and predisposing to local infection.

Synonyms:

Mucus Plugging

Accumulation of thick, tenacious mucus within airways causing obstruction. It is common in asthma, CF, bronchiectasis, and chronic bronchitis. It impairs gas exchange, promotes infection, and causes atelectasis. Treatment includes airway clearance techniques, mucolytics, and bronchodilators.

Synonyms:

Muenke Syndrome

A craniosynostosis syndrome caused by a pathogenic FGFR3 variant. Premature fusion of one or more skull sutures may produce an abnormal head shape and can be accompanied by developmental, hearing, limb, or neurological findings.

Synonyms:

MUGA Scan (Multigated Acquisition Scan)

ECG-gated radionuclide imaging using technetium-labeled red blood cells to measure ventricular ejection fraction and wall motion. It can be used when reproducible ejection-fraction measurement is needed, although echocardiography and cardiac MRI are also important alternatives.

Synonyms: Multigated Acquisition Scan

Multicystic Dysplastic Kidney

A congenital renal anomaly where one or both kidneys are replaced by multiple non-communicating cysts of varying sizes, with no functioning renal parenchyma. The most common cause of an abdominal mass in a newborn (unilateral). The ureter is typically atretic. The contralateral kidney may have VUR (20%) or UPJ obstruction (10%).

Synonyms:

Multidisciplinary Disaster Victim

Identification

The coordinated process of identifying victims of mass-fatality incidents (natural disasters, transport crashes, terrorist attacks) using multiple disciplines: fingerprinting, dental records, DNA profiling, forensic anthropology/radiology, and personal effects, with ante-mortem data collection and comparison.

Synonyms:

Multidisciplinary Team

Rehabilitation team includes: physiatrist, physical therapist, occupational therapist, speech-language pathologist, psychologist, social worker, case manager, nursing, recreation therapist.

Synonyms:

Multidrug-Resistant TB

TB resistant to at least isoniazid and rifampin. Requires second-line drugs for 18–24 months. Worse outcomes and higher mortality than drug-susceptible TB.

Synonyms:

Multifocal Atrial Tachycardia

An atrial tachyarrhythmia with at least three distinct P-wave morphologies, irregular rhythm, and a rate above 100 beats per minute. It is strongly associated with severe pulmonary disease, hypoxia, and metabolic stress.

Synonyms:

Multimodal Analgesia

Use of analgesic techniques with different mechanisms to improve pain control while reducing reliance on any single drug, especially opioids. Components may include acetaminophen, nonsteroidal anti-inflammatory drugs, regional anesthesia, local anesthetics, and selected adjuvants.

Synonyms:

Multimorbidity

The coexistence of two or more chronic health conditions in the same person, without requiring one to be considered the primary disease. It complicates treatment, increases polypharmacy risk, and

requires coordinated patient-centered care.

Synonyms:

Multiparametric MRI of the Prostate

MRI protocol combining T2-weighted, diffusion-weighted, and dynamic contrast-enhanced sequences to detect and characterize clinically significant prostate cancer. Findings are commonly reported using the PI-RADS system.

Synonyms:

Multiple bacterial abscesses

Numerous circumscribed collections of pus within an organ or tissue, caused by hematogenous seeding or direct extension of bacterial infection. They appear as multiple, low-attenuation lesions on imaging, often with peripheral enhancement. Common sites include the liver, brain, and kidneys.

Synonyms:

Multiple biliary hamartomas

Benign, congenital malformations of the intrahepatic bile ducts appearing as multiple, small, well-defined cystic lesions scattered throughout the liver parenchyma on imaging. They are typically asymptomatic and discovered incidentally. They must be distinguished from metastatic disease and Caroli disease.

Synonyms:

Multiple Endocrine Neoplasia Type 1

An autosomal dominant tumor syndrome caused by MEN1 gene mutation (menin).

Synonyms:

Multiple Endocrine Neoplasia Type 2

An inherited tumor syndrome caused by pathogenic variants in the RET gene. Type 2A is associated with medullary thyroid carcinoma, pheochromocytoma, and hyperparathyroidism. Type 2B is associated with medullary thyroid carcinoma, pheochromocytoma, mucosal neuromas, and a marfanoid habitus.

Synonyms:

Multiple endocrine neoplasia type 2B

An inherited RET-associated syndrome characterized by medullary thyroid carcinoma, pheochromocytoma, mucosal neuromas, and a marfanoid habitus. The thyroid-cancer risk is high and requires early specialist genetic and surgical assessment.

Synonyms:

Multiple Myeloma

A cancer of plasma cells that usually develops in the bone marrow and often produces a monoclonal immunoglobulin. It can cause bone lesions, anemia, kidney dysfunction, high calcium, infection, or other organ damage.

Synonyms:

Multiple Pregnancy

Gestation with more than one fetus: twins (most common), triplets, higher order. Types: dizygotic (two eggs, two placentas—fraternal, more common, familial and increased with IVF) vs. monozygotic (one egg split—identical, sharing determined by timing: dichorionic-diamniotic, monochorionic-diamniotic, monoamniotic, conjoined).

Synonyms:

Multiple Sclerosis

A chronic autoimmune demyelinating disease of the central nervous system, most commonly presenting in young adults. Characterized by relapsing-remitting episodes of neurological dysfunction (optic neuritis, transverse myelitis, brainstem syndromes). Diagnosis: McDonald criteria with MRI dissemination in space and time.

Synonyms:

Multiple System Atrophy

A progressive, fatal neurodegenerative disorder characterized by varying combinations of autonomic failure, cerebellar ataxia, parkinsonism, and pyramidal signs.

Synonyms:

Multiplex PCR (BioFire, FilmArray)

A molecular test that detects genetic material from

multiple organisms in one clinical sample. Different panels are designed for respiratory, gastrointestinal, bloodstream, or other specimens. Results require interpretation with the symptoms and may detect colonization or nonviable organisms as well as active infection.

Synonyms: BioFire, FilmArray

Mummification

Postmortem alteration occurring in hot, dry, arid, ventilated environments where rapid desiccation of tissues occurs before putrefaction can proceed, resulting in dry, leathery, dark brown skin clinging to underlying skeleton.

Synonyms:

Mumps

Paramyxovirus infection causing bilateral parotitis, fever, and headache. Complications include orchitis (rarely causing infertility), meningitis, pancreatitis, and sensorineural hearing loss. Prevention by MMR vaccination. Outbreaks occur in unvaccinated populations. Diagnosis by serology or RT-PCR from saliva.

Synonyms:

Mumps virus

A paramyxovirus that causes mumps, a contagious respiratory illness. The virus is transmitted by respiratory droplets. Symptoms include fever, headache, and parotitis. Complications include orchitis, oophoritis, meningitis, and deafness. Diagnosis involves serology and PCR. Treatment is supportive.

Synonyms:

Mural Thrombus

A mural thrombus is a blood clot that forms on the wall of a heart chamber or large blood vessel, typically in areas of damaged endothelium, stasis, or turbulent flow.

Synonyms:

Murmur

An extra or unusual heart sound caused by turbu-

lent blood flow. Murmurs are described by timing, location, intensity, quality, radiation, and response to position; their significance ranges from innocent flow sounds to valve or structural disease.

Synonyms:

Murmur Classification

Heart murmurs are classified by timing, grade, shape, location, radiation, and pitch. Timing: systolic (between S1 and S2), diastolic (between S2 and S1), or continuous. Grade: I (barely audible) to VI (heard without stethoscope). Shape: crescendo, decrescendo, or plateau.

Synonyms:

Muscle

A specialized contractile tissue responsible for movement, posture, and heat production.

Synonyms:

Muscle Atrophy

Loss or wasting of muscle tissue caused by disuse, nerve injury, inflammation, malnutrition, or systemic disease. It may lead to weakness and reduced function; treatment focuses on the cause, nutrition, and appropriately supervised rehabilitation.

Synonyms:

Muscle Contraction

The shortening or tension generation of muscle produced by the interaction of actin and myosin myofilaments. In skeletal and cardiac muscle, contraction follows excitation-contraction coupling: calcium binds troponin, tropomyosin moves aside, and myosin cross-bridges cycle against actin (sliding filament mechanism) using ATP.

Synonyms:

Muscle Pain (Myalgia)

Myalgia—muscle pain—is a common symptom arising from skeletal muscle injury, inflammation, overuse, infection, or systemic disease.

Synonyms: Myalgia

Muscle Tissue

A highly specialized tissue capable of contracting to produce body movement, posture, and heat.

Synonyms:

Muscle Weakness

Reduced ability to generate force with one or more muscles. Causes include nerve or muscle disease, pain, inactivity, medicines, metabolic disorders, and aging.

Synonyms:

Muscular Dystrophy

A group of inherited disorders characterized by progressive skeletal-muscle weakness and degeneration. The pattern, age of onset, and complications vary by genetic type; some forms also affect the heart, respiratory muscles, or other organs.

Synonyms:

Musculocutaneous Nerve

From lateral cord (C5-C7), piercing coracobrachialis, running between biceps and brachialis to supply these muscles and lateral forearm skin (lateral antebrachial cutaneous nerve). Sole motor supply to the anterior arm compartment. Injury causes weakness of elbow flexion/forearm supination with lateral forearm sensation loss.

Synonyms:

Musculoskeletal Pain

Pain arising from muscles, bones, joints, ligaments, tendons, or related soft tissues. Common causes include injury, overuse, arthritis, and inflammation; persistent pain, weakness, swelling, or neurologic symptoms should be assessed.

Synonyms:

Music Therapy

Use of music for therapeutic purposes. Pain reduction, emotional expression, cognitive stimulation.

Synonyms:

Mutagen

A chemical, physical agent, or biological factor ca-

pable of causing a genetic mutation. Mutagenicity does not by itself prove that an agent causes cancer.

Synonyms:

Mutation

A heritable or acquired alteration in the DNA sequence. Variants may be single-nucleotide substitutions, insertions, deletions, copy-number changes, or larger rearrangements and may be benign, pathogenic, or of uncertain significance.

Synonyms:

Mutation Rate

Frequency of new mutations per generation or per base pair per replication. Varies by gene, genomic region, organism. High mutation rate in repetitive sequences.

Synonyms:

Myalgic Encephalomyelitis

A complex illness characterized by substantial reduction in activity, post-exertional malaise, and unrefreshing sleep, often with cognitive or autonomic symptoms.

Synonyms:

Myalgic Encephalomyelitis/Chronic Fatigue Syndrome

A complex illness characterized by substantial reduction in activity, post-exertional malaise, unrefreshing sleep, and cognitive or autonomic symptoms. Management is individualized and focuses on pacing, symptom relief, and treatment of coexisting conditions.

Synonyms:

Myasthenia Gravis

An autoimmune disorder of neuromuscular transmission causing fluctuating, fatigable muscle weakness. It may affect the eyes, facial and swallowing muscles, limbs, or breathing muscles; antibodies and other tests help classify the disease.

Synonyms:

Myasthenic (Lambert-Eaton) syndrome

An autoimmune presynaptic neuromuscular-junction disorder caused by antibodies against voltage-gated calcium channels, producing proximal weakness and autonomic symptoms.

Synonyms: Lambert-Eaton

Mycobacterium abscessus

A rapidly growing nontuberculous mycobacterium that can cause pulmonary, skin, and soft-tissue infections and is often difficult to treat because of multidrug resistance.

Synonyms:

Mycobacterium avium complex

A group of nontuberculous mycobacteria that can cause chronic pulmonary disease or disseminated infection, particularly in people with impaired immunity. Treatment depends on the species, site, severity, susceptibility, and patient factors.

Synonyms:

Mycobacterium leprae

An acid-fast bacillus that causes leprosy (Hansen's disease), a chronic infection affecting the skin and peripheral nerves. The organism is transmitted through respiratory droplets, though the exact mechanism is not fully understood. The incubation period is long (2-5 years).

Synonyms:

Mycobacterium marinum

A nontuberculous mycobacterium associated with fish tanks and aquatic exposure that can cause chronic skin and soft-tissue infection.

Synonyms:

Mycobacterium tuberculosis

An acid-fast bacillus that causes tuberculosis, a chronic respiratory infection. The organism is transmitted by respiratory droplets and primarily affects the lungs but can disseminate to other organs. Latent TB infection is asymptomatic and non-transmissible. Active TB presents with cough, haemoptysis, fever, and weight loss.

Synonyms:

Mycology

The branch of microbiology that studies fungi, including yeasts, moulds, and mushrooms. Medical mycology focuses on fungal pathogens that cause disease in humans. Fungal infections (mycoses) are classified as superficial, cutaneous, subcutaneous, or systemic.

Synonyms:

Mycoplasma genitalium

A sexually transmitted bacterium that can cause urethritis, cervicitis, pelvic inflammatory disease, and, less commonly, proctitis. Many infections are asymptomatic. Diagnosis is usually by a nucleic acid amplification test, and macrolide resistance is common, so treatment should follow current susceptibility-informed guidance.

Synonyms:

Mycoplasma Pneumonia

Atypical pneumonia most common in ages 5–35. Dry cough, low-grade fever, headache. Patchy infiltrates on CXR disproportionate to symptoms (“walking pneumonia”).

Synonyms:

Mycoplasma pneumoniae-associated mucositis

Inflammatory lesions of the oral, ocular, or genital mucosa occurring as an extrapulmonary manifestation of *Mycoplasma pneumoniae* infection, often presenting with target-like skin lesions.

Synonyms:

Mycosis Fungoides

The most common cutaneous T-cell lymphoma, presenting with progressive patches, plaques, and tumors on the skin with an indolent course. Staging and therapy depend on skin involvement and extracutaneous spread.

Synonyms:

Mydriasis

Dilation of the pupil, produced mainly by sympathetic activity through the dilator pupillae muscle or by reduced parasympathetic activity. Causes include darkness, medicines, toxins, neurologic disease, and ocular injury.

Synonyms:

Myelin

A lipid-rich protective sheath that wraps around nerve fibers (axons), insulating them and speeding up electrical signal transmission.

Synonyms:

Myelin Sheath

The lipid-rich insulating layer around axons formed by Schwann cells (peripheral nervous system) and oligodendrocytes (central nervous system), which wrap the axon in concentric membrane layers.

Synonyms:

Myelodysplastic Syndrome

MDS: a group of clonal stem cell disorders characterized by ineffective hematopoiesis, cytopenias, and risk of transformation to acute myeloid leukemia (AML). Features: anemia (most common), neutropenia, thrombocytopenia; dysplasia (abnormal morphology) in marrow and blood; cytogenetic abnormalities (del5q, trisomy 8, del7q).

Synonyms:

Myelofibrosis

A myeloproliferative neoplasm characterized by bone marrow fibrosis, extramedullary hematopoiesis, and JAK2, CALR, or MPL mutations. Presents with anemia, massive splenomegaly, constitutional symptoms (fever, night sweats, weight loss), and leukoerythroblastic blood smear.

Synonyms:

Myelography

Contrast injected into subarachnoid space for spinal imaging. Used when MRI contraindicated. CT myelography more common now.

Synonyms:

Myeloma

Multiple myeloma: plasma cell malignancy. Features: bone pain, anemia, renal failure, hypercalcemia.

Synonyms:

Myeloma Cast Nephropathy

Light chain cast formation in tubules causing AKI in multiple myeloma. Friable waxy casts with giant cells. Bence Jones proteinuria. Treat myeloma and consider plasmapheresis to reduce light chain burden.

Synonyms:

Myelomeningocele

The most severe form of spina bifida, where the spinal cord and meninges herniate through a vertebral defect into a sac on the back. Presents with a visible, fluid-filled sac at birth. Associated with hydrocephalus, Arnold-Chiari malformation, and lower extremity paralysis.

Synonyms:

Myelopathy

A general term for any neurological deficit resulting from spinal cord pathology, encompassing a wide range of causes and clinical presentations.

Synonyms:

Myelosuppression

Reduced bone marrow production of red cells, white cells, and platelets, causing anemia, neutropenia, and thrombocytopenia; a common dose-limiting toxicity of chemotherapy and radiation that increases infection and bleeding risk.

Synonyms:

Myiasis

Infestation of living tissue by larvae (maggots) of various fly species, which feed on host tissue and can cause pain, secondary infection, and tissue destruction. It may be cutaneous, involving the skin and subcutaneous tissue, or affect other body sites including the nose, ears, and wounds.

Synonyms:

Myocardial Infarction

Irreversible death of heart-muscle tissue caused by prolonged inadequate blood flow. See Heart Attack.

Synonyms:

Myocardial Perfusion Imaging

Nuclear cardiology technique using radiotracers (Tc-99m sestamibi, Tl-201) to assess blood flow to the myocardium. Performed at rest and during stress (exercise or pharmacological) to detect reversible ischemia (stress defect with rest redistribution) or fixed defects (scar from prior MI).

Synonyms:

Myocardial Viability

PET assessment of hibernating myocardium. FDG uptake indicates viable myocardium.

Synonyms:

Myocarditis

Inflammation of the myocardium, most commonly caused by viral infections (coxsackievirus, adenovirus, SARS-CoV-2). Presents with chest pain, dyspnea, arrhythmias, and elevated troponin. Diagnosis: ECG, echocardiography, cardiac MRI with Lake Louise criteria, and endomyocardial biopsy.

Synonyms:

Myocarditis Diagnosis

Cardiac MRI (Lake Louise criteria) shows myocardial edema (T2-weighted imaging), late gadolinium enhancement (typically epicardial/mid-wall in non-ischemic distribution), and increased myocardial T1/T2 mapping values.

Synonyms:

Myocarditis Treatment

No specific antiviral therapy for most cases. Treatment is supportive: heart failure therapy (diuretics, ACE inhibitors, beta-blockers) for reduced EF, arrhythmia management, and avoidance of exercise during acute phase (risk of sudden death). Immunosuppression may be considered in autoimmune myocarditis or cardiac sarcoidosis.

Synonyms:

Myocardium

The thick muscular middle layer of the heart wall composed of cardiac muscle cells (cardiomyocytes). The myocardium is responsible for the contractile function of the heart. It contains intercalated discs with gap junctions that allow electrical coupling between cells.

Synonyms:

Myopia

A refractive error in which light focuses in front of the retina, causing blurred distance vision. See Nearsightedness.

Synonyms:

Myositis

Inflammation of skeletal muscle. Includes polymyositis, dermatomyositis, inclusion body myositis, immune-mediated necrotizing myopathy. Diagnosis: CK elevation, EMG, muscle MRI, muscle biopsy. Treatment: immunosuppression with corticosteroids, methotrexate, azathioprine, mycophenolate, IVIG, rituximab.

Synonyms:

Myotonia Congenita

An inherited skeletal-muscle channelopathy causing delayed relaxation after voluntary contraction. Stiffness often improves with repeated movement and may be accompanied by muscle hypertrophy; onset and severity vary between genetic forms.

Synonyms:

Myotonic Dystrophy

The most common adult-onset muscular dystrophy, an autosomal dominant multisystem disorder caused by CTG trinucleotide repeat expansions in the DMPK gene (type 1, DM1) or CCTG tetranucleotide repeat expansions in the CNBP gene (type 2, DM2) on chromosome 19q13.3. DM1 is more common and more severe than DM2.

Synonyms:

Myringotomy with Tympanostomy Tube

Incision of the tympanic membrane with placement

of a ventilation tube to equalize middle-ear pressure and permit drainage. It is used selectively for persistent middle-ear effusion, recurrent acute otitis media, or associated hearing and developmental problems.

Synonyms:

Myxedema Coma

Severe decompensated hypothyroidism characterized by altered mental status, hypothermia, bradycardia, hypoventilation, hyponatremia, and hypoglycemia. Most commonly occurs in elderly patients with long-standing untreated hypothyroidism precipitated by infection, surgery, or sedative medications. Mortality rates exceed fifty percent.

Synonyms:

Myxoma

A usually benign primary cardiac tumour composed of myxoid tissue, most often arising in the left atrium from the interatrial septum. It may cause positional obstruction of the mitral valve, constitutional symptoms, or systemic embolism; echocardiography is the usual initial diagnostic test.

Synonyms:

Ménétrier's disease

A rare acquired gastropathy characterized by massive hypertrophy of the gastric mucosal folds, particularly in the body and fundus, with foveolar hyperplasia, cystic dilation of gastric glands, and glandular atrophy. It presents with epigastric pain, nausea, vomiting, weight loss, and protein-losing enteropathy causing hypoalbuminemia.

Synonyms:

Macrocytic Anemia

Anemia in which red blood cells are larger than normal, commonly because of vitamin B12 or folate deficiency.

Synonyms:

Macular Edema

Swelling of the macula caused by fluid leaking from retinal blood vessels.

Synonyms:

Maintenance of Wakefulness Test

A sleep test that measures how long a person can remain awake in a quiet setting during the day.

Synonyms:

Mastoid Bone

The portion of the temporal bone located behind the ear.

Synonyms:

Megaloblastic Anemia

Anemia caused by impaired DNA synthesis, usually related to vitamin B12 or folate deficiency, with abnormally large red blood cells.

Synonyms:

Microaneurysm

A small bulge in the wall of a blood vessel.

Synonyms:

Microvascular Disease

Disease affecting small blood vessels, which may reduce blood flow to organs or tissues.

Synonyms:

Mitral Valve Stenosis

Narrowing of the mitral valve that restricts blood flow from the left atrium to the left ventricle.

Synonyms:

Morton's Neuroma

Thickening of tissue around a nerve in the forefoot, causing burning pain or numbness between the toes.

Synonyms:

Multiple Sleep Latency Test

A daytime sleep study that measures how quickly a person falls asleep during scheduled naps.

Synonyms:

Myasthenia

Abnormal muscle weakness that worsens with use.

Synonyms:

Myocardial Rupture

A tear in the heart wall or other heart structure, usually a severe complication of myocardial infarction.

Synonyms:

Ménière's Disease

An inner-ear disorder causing episodes of vertigo, fluctuating hearing loss, tinnitus, and ear pressure.

Synonyms:

Maxillary Sinusitis

Inflammation or infection of the air-filled sinus cavities behind the cheekbones.

Synonyms:

Meningomyelocele

A severe form of spina bifida in which the spinal cord and its membranes protrude through an opening in the spine.

Synonyms:

Mesothelioma

A cancer arising from the mesothelium, most often affecting the lining of the lungs.

Synonyms:

Microcytic Anemia

Anemia in which red blood cells are smaller than normal, commonly because of iron deficiency or a thalassemia.

Synonyms:

Mitochondrial Myopathy

Muscle weakness or dysfunction caused by abnormalities of mitochondria, the energy-producing structures of cells.

Synonyms:

Mitral Valve Insufficiency

Leakage of the mitral valve that allows blood to flow back into the left atrium.

Synonyms:

Mittelschmerz

One-sided lower-abdominal pain that occurs around ovulation.

Synonyms:

Mobius Syndrome

A rare congenital disorder causing facial weakness or paralysis and limited outward eye movement.

Synonyms:

Mucopolysaccharidosis

A group of inherited disorders in which glycosaminoglycans accumulate in tissues because of enzyme deficiency.

Synonyms:

Multiple Endocrine Neoplasia

An inherited disorder causing tumors or overactivity in two or more endocrine glands.

Synonyms:

Myoclonus

Sudden, brief, involuntary muscle jerks.

Synonyms:

Myopathy

A disease or disorder that primarily affects skeletal muscle.

Synonyms:

Myxedema

Severe hypothyroidism causing accumulation of mucin in tissues, with swelling, slowed body functions, and other symptoms.

Synonyms:

Male Breast Cancer

Cancer that develops in breast tissue in a man.

Synonyms:

Malignant Peripheral Nerve Sheath

Tumor

A cancer arising from cells associated with peripheral nerves.

Synonyms:

Mammary Duct Ectasia

Widening and inflammation of a milk duct beneath the nipple.

Synonyms:

Marginal Zone Lymphoma

A slow-growing non-Hodgkin lymphoma that begins in immune cells in the marginal zone of lymphoid tissue.

Synonyms:

MCAD Deficiency

An inherited disorder in which the body cannot properly break down certain medium-chain fats for energy.

Synonyms:

Metastatic Castration-Resistant Prostate Cancer

Prostate cancer that has spread and continues to grow despite treatments that lower testosterone.

Synonyms:

Median Arcuate Ligament Syndrome

Compression of the celiac artery by a ligament near the diaphragm, sometimes causing abdominal pain.

Synonyms:

Medication Overuse Headaches

Frequent headaches caused or worsened by regular overuse of headache medicines.

Synonyms:

Meralgia Paresthetica

Numbness, tingling, or burning on the outer thigh caused by pressure on a sensory nerve.

Synonyms:

Macrocephaly

An unusually large head size for a person's age and sex, which may be familial or associated with hydrocephalus, brain growth, or other disorders.

Synonyms:

Macroductyly

Abnormally large fingers or toes, usually caused by overgrowth of bone and soft tissue.

Synonyms:

Macropsia

A visual disturbance in which objects appear larger than they actually are.

Synonyms:

Madura Foot (Mycetoma)

A chronic localized infection of the skin and deeper tissues of the foot, caused by fungi or certain bacteria and characterized by swelling, draining sinuses, and granules.

Synonyms: Mycetoma

Metal Fume Fever

A short-lived influenza-like illness caused by inhalation of fumes from heated metals, especially zinc; symptoms include fever, chills, headache, muscle aches, and cough.

Synonyms:

Methaemoglobinaemia

A condition in which haemoglobin is oxidized to methaemoglobin and cannot release oxygen effectively, causing tissue hypoxia and sometimes cyanosis.

Synonyms:

Microbiology

The study of microorganisms, including bacteria, viruses, fungi, and parasites, and their relationships with humans and the environment.

Synonyms:

Microtia

A congenital abnormality in which the external ear is unusually small or incompletely formed; it may occur with narrowing or absence of the ear canal.

Synonyms:

Midwife

A trained healthcare professional who provides care during pregnancy, labour, birth, and the postnatal period, including care of the newborn.

Synonyms:

Milroy's Disease

An inherited form of primary lymphoedema, usually present from birth or early life and caused by abnormal development of lymphatic vessels.

Synonyms:

Molar Pregnancy (Hydatidiform Mole)

An abnormal pregnancy in which placental tissue proliferates excessively and the embryo is absent or abnormal; it is a form of gestational trophoblastic disease.

Synonyms: Hydatidiform Mole

Myometrium

The muscular middle layer of the uterine wall, which contracts during menstruation and labour.

Synonyms:

Mesenteric Lymphadenitis

Inflammation of lymph nodes in the membrane that attaches the intestines to the abdominal wall.

Synonyms:

Metachromatic Leukodystrophy

An inherited disorder in which fatty substances accumulate and damage myelin in the nervous system.

Synonyms:

Metastatic Breast Cancer

Breast cancer that has spread from the breast to distant parts of the body.

Synonyms:

Metatarsalgia

Pain and inflammation in the ball of the foot near the metatarsal bones.

Synonyms:

Manometry

Measurement of pressure within a body organ or passage, such as the esophagus or rectum.

Synonyms:

Mastication

Chewing food to prepare it for swallowing and digestion.

Synonyms:

Meatus

A natural body opening or passage, such as the external ear canal.

Synonyms:

Micropenis

An unusually small penis caused by inadequate androgen effect or other developmental conditions, defined clinically by a stretched penile length more than 2.5 standard deviations below the mean for age and population. Evaluation may identify endocrine or genetic causes.

Synonyms:

Medulla

The inner region of an organ; in the kidney it contains the renal pyramids, and in the brainstem it regulates vital functions.

Synonyms:

Microcalcification

A very small calcium deposit in tissue, sometimes an early sign of breast cancer.

Synonyms:

Myelogram

An imaging study of the spinal canal performed after contrast material is introduced around the spinal cord.

Synonyms:

Myoglobin

An oxygen-binding protein found mainly in skeletal and cardiac muscle.

Synonyms:

Myomectomy

Surgical removal of uterine fibroids while preserving the uterus.

Synonyms:

Myringotomy

A small incision in the eardrum to drain middle-ear fluid or relieve pressure.

Synonyms:

Mallet

A surgical hammer used with instruments such as osteotomes to cut or shape bone.

Synonyms:

Mayo Scissors

Heavy surgical scissors used to cut fascia, muscle, sutures, and other relatively tough material.

Synonyms:

Metzenbaum Scissors

Fine, lightweight surgical scissors used to dissect and cut delicate soft tissue.

Synonyms:

Mosquito Clamp

A small hemostatic clamp used to compress small blood vessels.

Synonyms:

Mallet Finger

An injury to the extensor tendon at the distal finger joint, causing inability to actively straighten the fingertip. It may result from a forced flexion injury and sometimes includes an avulsion fracture.

Synonyms:

Mediastinal Mass

An abnormal growth or collection of tissue in the mediastinum, the central compartment of the chest. Causes include tumors, enlarged lymph nodes, cysts, and vascular abnormalities.

Synonyms:

Morphea

A localized sclerosing skin disorder that produces areas of thickened, hardened, or discolored skin and differs from systemic sclerosis by usually lacking internal-organ involvement.

Synonyms:

Myofascial Pain Syndrome

A regional pain disorder involving sensitive trigger points in muscle and fascia, with pain that may be referred to other areas and often worsens with pressure or movement.

Synonyms:

Microangiopathic Hemolytic Anemia

An anemia caused by mechanical fragmentation of red blood cells as they pass through damaged or narrowed small blood vessels, producing schistocytes and often elevated hemolysis markers.

Synonyms:

Multisystem Inflammatory Syndrome in Children

A serious delayed inflammatory illness occurring in some children after infection with SARS-CoV-2, involving fever and two or more organ systems and potentially causing shock or cardiac dysfunction.

Synonyms:

Threatened Miscarriage

Vaginal bleeding during early pregnancy with a closed cervix and no passage of pregnancy tissue; the pregnancy may remain viable. Evaluation commonly includes clinical assessment, serial human chorionic gonadotropin testing when indicated, and ultrasound.

Synonyms: Threatened abortion.

Missed Miscarriage

A nonviable intrauterine pregnancy that has not been expelled and may produce few or no symptoms of miscarriage. Diagnosis requires appropriate ultrasound or other clinical evaluation before management is selected.

Synonyms: Missed abortion; delayed miscarriage.

Incomplete Miscarriage

Partial expulsion of products of conception, with some pregnancy tissue remaining in the uterus. +

M phase

M phase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

machine learning

machine learning is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

macroautophagy

macroautophagy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

macrococcus

macrococcus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

macrococcus caseolyticus

macrococcus caseolyticus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

macroglobulin

macroglobulin is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

macrolide

macrolide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

macrolide antibiotic

macrolide antibiotic is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

macronucleus

macronucleus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

macrophage activation

macrophage activation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

macrophage count

macrophage count is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

macroscopic hematuria

macroscopic hematuria is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

macrostomia

macrostomia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

macular drusen

macular drusen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

maculopapular lesion

maculopapular lesion is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

madurella

madurella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

madurella mycetomatis

madurella mycetomatis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

maf protein

maf protein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mafosfamide

mafosfamide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

magnesium chloride

magnesium chloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

magnesium hydroxide

magnesium hydroxide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

magnesium oxide

magnesium oxide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

magnesium sulfate

magnesium sulfate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

magnet

magnet is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

magnetic field

magnetic field is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

magnetoencephalography

magnetoencephalography is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

magnetosomes

magnetosomes is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

magnusiomyces capitatus

magnusiomyces capitatus is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

maintenance

maintenance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Majeed syndrome

Majeed syndrome is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

Majewski syndrome

Majewski syndrome is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

malabsorption syndrome

malabsorption syndrome is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

malaria vaccine

malaria vaccine is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

malassezia

malassezia is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

malassezia furfur

malassezia furfur is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

malassezia pachydermatis

malassezia pachydermatis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

malathion

malathion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

male

male is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

male condom

male condom is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

male phenotype

male phenotype is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

malignant ameloblastoma

malignant ameloblastoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

malignant bone neoplasm

malignant bone neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

malignant glioma

malignant glioma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

malignant histiocytosis

malignant histiocytosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

malignant mastocytosis

malignant mastocytosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

malignant myoepithelioma

malignant myoepithelioma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

malignant thymoma

malignant thymoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mallory body

mallory body is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

malondialdehyde

malondialdehyde is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

malposition

malposition is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

maltodextrin

maltodextrin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

maltose

maltose is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mammaglobin A

mammaglobin A is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mammals

mammals is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mammaplasty

mammaplasty is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mammary disease

mammary disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

mammary epithelium

mammary epithelium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mamillary body

mamillary body is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

managed care

managed care is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mandatory reporting

mandatory reporting is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mandibular condyle

mandibular condyle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mandibular prosthesis

mandibular prosthesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mandibulofacial dysostosis

mandibulofacial dysostosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

manic

manic is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

manic disorder

manic disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

manic mood

manic mood is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

manipulation procedure

manipulation procedure is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mannan

mannan is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mannheimia

mannheimia is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mannheimia haemolytica

mannheimia haemolytica is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mannomustine

mannomustine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mannose

mannose is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mannosidosis

mannosidosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mansonella perstans

mansonella perstans is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mansonella streptocerca

mansonella streptocerca is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mansonelliasis

mansonelliasis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mantle field

mantle field is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Mantoux test

Mantoux test is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

manufactured form

manufactured form is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

MAO inhibitor

MAO inhibitor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mapatumumab

mapatumumab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

marburgvirus

marburgvirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

Marek's disease

Marek's disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

margaric acid

margaric acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

marginal ulcer

marginal ulcer is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

maribavir

maribavir is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

marijuana

marijuana is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

marijuana abuse

marijuana abuse is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

marimastat

marimastat is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

marine biology

marine biology is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

marine toxin

marine toxin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

marital status

marital status is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

marital therapy

marital therapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

marked

marked is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

married

married is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Marshall syndrome

Marshall syndrome is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

masked data

masked data is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

masoprocol

masoprocol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mass screening

mass screening is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mass spectrometer

mass spectrometer is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mass spectrometry

mass spectrometry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

massage

massage is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

massage therapy

massage therapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mast-cell sarcoma

mast-cell sarcoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

masticate

masticate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

masticatory muscle

masticatory muscle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mastocytoma

mastocytoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

mastodynia

mastodynia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mastoid process

mastoid process is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

material

material is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

maternal

maternal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

maternal age

maternal age is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

maternal mortality

maternal mortality is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

maternal obesity

maternal obesity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mathematics

mathematics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mating

mating is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

matrix band

matrix band is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

matrix metalloproteinase

matrix metalloproteinase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mature teratoma

mature teratoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

matuzumab

matuzumab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

maxillary sinus

maxillary sinus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

maximum

maximum is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

maximum thickness

maximum thickness is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

maytansine

maytansine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mazindol

mazindol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mcc gene

mcc gene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

MCF-7 cell

MCF-7 cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mead acid

mead acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mean

mean is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mean diameter

mean diameter is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mean thickness

mean thickness is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

measles vaccine

measles vaccine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

measurement

measurement is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mebendazole

mebendazole is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

mecamylamine

mecamylamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mecarzole

mecarzole is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mechanical ventilator

mechanical ventilator is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mechanoreceptor

mechanoreceptor is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mechlorethamine

mechlorethamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

meclizine

meclizine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

medial meniscus

medial meniscus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

median

median is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mediastinal cyst

mediastinal cyst is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mediastinal disease

mediastinal disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

Mediastinal Emphysema

Mediastinal Emphysema is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mediastinal hemorrhage

mediastinal hemorrhage is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

mediastinal neoplasm

mediastinal neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

mediastinal pleura

mediastinal pleura is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mediastinal shift

mediastinal shift is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mediastinoscopes

mediastinoscopes is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

medical device

medical device is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

medical economics

medical economics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

medical history

medical history is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

medical indigency

medical indigency is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

medical pin

medical pin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

medical record

medical record is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

medicine

medicine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

meditation

meditation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

medroxyprogesterone

medroxyprogesterone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

medroxyprogesterone acetate

medroxyprogesterone acetate is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

medullary carcinoma

medullary carcinoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

medulloepithelioma

medulloepithelioma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mefenamic acid

mefenamic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mefloquine

mefloquine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

megabecquerel

megabecquerel is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

megacalycosis

megacalycosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

megacolon

megacolon is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

megakaryocyte

megakaryocyte is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

megakaryocytopoiesis

megakaryocytopoiesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

megamonas

megamonas is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

megamonas funiformis

megamonas funiformis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

megamonas hypermegale

megamonas hypermegale is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

megasphaera

megasphaera is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

megasphaera elsdenii

megasphaera elsdenii is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mega-trial

mega-trial is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

megestrol

megestrol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

megestrol acetate

megestrol acetate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

meibomian glands

meibomian glands is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

meiotic recombination

meiotic recombination is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

melancholia

melancholia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

melanocyte

melanocyte is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

melanocytic nevus

melanocytic nevus is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

melanophore

melanophore is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

melanosome

melanosome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

MELAS syndrome

MELAS syndrome is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

melatonin receptor

melatonin receptor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

melengestrol acetate

melengestrol acetate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

melitten

melitten is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

meloxicam

meloxicam is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

melphalan

melphalan is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

memantine hydrochloride

memantine hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

membrane channel

membrane channel is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

membrane fusion

membrane fusion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

membrane lipids

membrane lipids is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

membrane microdomain

membrane microdomain is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

membrane part

membrane part is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

membrane protein

membrane protein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

membrane raft

membrane raft is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

memory disorder

memory disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

memory impairment

memory impairment is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

memory training

memory training is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Meniere's disease

Meniere's disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

meningeal carcinomatosis

meningeal carcinomatosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

meningeal leukemia

meningeal leukemia is a medical condition or clinical

entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

meningeal lymphoma

meningeal lymphoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

meningeal neoplasm

meningeal neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

meningism

meningism is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

meniscus

meniscus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

menogaril

menogaril is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

menopause status

menopause status is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

menotropin

menotropin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

menses duration

menses duration is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

menstruation disturbance

menstruation disturbance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mental disorders

mental disorders is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

mental fatigue

mental fatigue is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mental process

mental process is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mental recall

mental recall is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mental retardation

mental retardation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

menthol

menthol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

meperidine

meperidine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

meperidine hydrochloride

meperidine hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mephenytoin

mephenytoin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mepivacaine

mepivacaine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

meprobamate

meprobamate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mercaptopurine

mercaptopurine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

meridian

meridian is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

merkel cells

merkel cells is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

meropenem

meropenem is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mersalyl

mersalyl is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesalamine

mesalamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesangiolytic

mesangiolytic is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesangium

mesangium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesencephalon

mesencephalon is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesenchymal cell

mesenchymal cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesenchymal chondrosarcoma

mesenchymal chondrosarcoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

mesenchyme

mesenchyme is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesenchymoma

mesenchymoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesenteric artery

mesenteric artery is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesenteric cyst

mesenteric cyst is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesenteric veins

mesenteric veins is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesial surface

mesial surface is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesna

mesna is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesonephric

mesonephric is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesonephric tumor

mesonephric tumor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesonephroma

mesonephroma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesothelial neoplasm

mesothelial neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

mesothelin

mesothelin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mesothelium

mesothelium is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mestranol

mestranol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metabolic disease

metabolic disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

metabolic response

metabolic response is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metabolite

metabolite is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metabolomics

metabolomics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metacarpal bone

metacarpal bone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metadata

metadata is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metagenome

metagenome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metagenomics

metagenomics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metagonimus yokogawai

metagonimus yokogawai is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metal

metal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metalloendopeptidase

metalloendopeptidase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metalloporphyrins

metalloporphyrins is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metalloprotease

metalloprotease is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metalloprotein

metalloprotein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metallothionein

metallothionein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metamorphosis

metamorphosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metanephrine

metanephrine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metaphase

metaphase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metaphase plate

metaphase plate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metaphyseal widening

metaphyseal widening is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metaplastic carcinoma

metaplastic carcinoma is a medical condition or

clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

metapneumovirus

metapneumovirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

metastin

metastin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metatarsal bone

metatarsal bone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metatarsal valgus

metatarsal valgus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metatarsus varus

metatarsus varus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metencephalon

metencephalon is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

meter

meter is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metestrus

metestrus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metformin

metformin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metformin hydrochloride

metformin hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methacholine chloride

methacholine chloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methadone

methadone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methadone hydrochloride

methadone hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methamidophos

methamidophos is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methamphetamine

methamphetamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methane

methane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methane sulfonate

methane sulfonate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methanobacteriaceae

methanobacteriaceae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

methanol

methanol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methaqualone

methaqualone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methazolamide

methazolamide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methemoglobin

methemoglobin is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methenamine

methenamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methicillin

methicillin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

methidathion

methidathion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methimazole

methimazole is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

methiocarb

methiocarb is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methionine

methionine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methionine enkephalin

methionine enkephalin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methisazone

methisazone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methocarbamol

methocarbamol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methodology

methodology is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methohexital

methohexital is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methomyl

methomyl is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methotrexate

methotrexate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methotrimeprazine

methotrimeprazine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methoxamine

methoxamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methoxsalen

methoxsalen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methoxyamine hydrochloride

methoxyamine hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methoxyflurane

methoxyflurane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methoxyhydroxyphenylglycol

methoxyhydroxyphenylglycol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methyclothiazide

methyclothiazide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methyl bromide

methyl bromide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methyl chloride

methyl chloride is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methyl green

methyl green is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methyl group

methyl group is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methyl isocyanate

methyl isocyanate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methyl methanesulfonate

methyl methanesulfonate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methyl parathion

methyl parathion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methylcellulose

methylcellulose is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methylcholanthrene

methylcholanthrene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methyldopa

methyldopa is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methylene chloride

methylene chloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methylguanidine

methylguanidine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methylmalonic aciduria

methylmalonic aciduria is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methylmercury compounds

methylmercury compounds is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methylmethacrylate

methylmethacrylate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methylnaltrexone

methylnaltrexone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methylnaltrexone bromide

methylnaltrexone bromide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methylnitrosourea

methylnitrosourea is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methylobacteriaceae

methylobacteriaceae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

methylobacterium

methylobacterium is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

methylphenidate

methylphenidate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methylprednisolone

methylprednisolone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methyltestosterone

methyltestosterone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methylthioinosine

methylthioinosine is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

methyltransferase

methyltransferase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metolazone

metolazone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metolcarb

metolcarb is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metoprolol

metoprolol is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

metric system

metric system is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metronomic chemotherapy

metronomic chemotherapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

metschnikowia

metschnikowia is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

metyrapone

metyrapone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mevinphos

mevinphos is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mexacarbate

mexacarbate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mexiletine

mexiletine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

meyerozyma guilliermondii

meyerozyma guilliermondii is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mezlocillin

mezlocillin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

micelle

micelle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

miconazole

miconazole is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

microabscess

microabscess is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microarray analysis

microarray analysis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microbacterium

microbacterium is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

microbial biofilms

microbial biofilms is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microbicide

microbicide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microbody

microbody is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microchip site

microchip site is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microcirculation

microcirculation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

micrococcaceae

micrococcaceae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

micrococcus

micrococcus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

micrococcus luteus

micrococcus luteus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

micrococcus lylae

micrococcus lylae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microcolon

microcolon is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microcornea

microcornea is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microcurie

microcurie is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microdialysis

microdialysis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microdissection

microdissection is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microelectrode

microelectrode is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microfibril

microfibril is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microfilament

microfilament is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microfilament proteins

microfilament proteins is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microfluidics

microfluidics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microglandular adenosis

microglandular adenosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microglia

microglia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microgliosis

microgliosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

micrognathism

micrognathism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microinjection

microinjection is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

micromole

micromole is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microneme

microneme is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

micronization

micronization is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

micronutrient

micronutrient is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microorganism

microorganism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microorganism genetics

microorganism genetics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

micropexophagy

micropexophagy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microphthalmos

microphthalmos is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

micropsia

micropsia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microradiography

microradiography is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microscopic

microscopic is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microscopy

microscopy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microsome

microsome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microspectrophotometry

microspectrophotometry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microsphere

microsphere is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microspherophakia

microspherophakia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microsporidia

microsporidia is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

microsporidiosis

microsporidiosis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

microsporium

microsporium is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

microsporium audouinii

microsporium audouinii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

microsporium distortum

microsporium distortum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

microsporium equinum

microsporium equinum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

microsporium ferrugineum

microsporium ferrugineum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

microsporium gypseum

microsporium gypseum is a microorganism or biolog-

ical taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

microstomia

microstomia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microsurgery

microsurgery is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microtechnology

microtechnology is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microtubule

microtubule is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microtubule bundle

microtubule bundle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microvillus

microvillus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microvolt

microvolt is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microwave therapy

microwave therapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

microwell plate

microwell plate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

midazolam

midazolam is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

midazolam hydrochloride

midazolam hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

middle insomnia

middle insomnia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

midodrine

midodrine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

midomafetamine

midomafetamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

midostaurin

midostaurin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mifepristone

mifepristone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Mikulicz disease

Mikulicz disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

milatuzumab

milatuzumab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

mild

mild is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mile

mile is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

miliaria

miliaria is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

milieu therapy

milieu therapy is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

military personnel

military personnel is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

milk

milk is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

millicurie

millicurie is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

milliliter

milliliter is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

millimeter

millimeter is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

millimole

millimole is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

milliosmole

milliosmole is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

millisecond

millisecond is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

milliunit

milliunit is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

millivolt

millivolt is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mineral

mineral is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mineral oil

mineral oil is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mineralocorticoid

mineralocorticoid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

minisatellite repeat

minisatellite repeat is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

minor response

minor response is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

minority health

minority health is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

minoxidil

minoxidil is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

minretumomab

minretumomab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

miosis disorder

miosis disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

mirage syndrome

mirage syndrome is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

mirex

mirex is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mirtazapine

mirtazapine is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

misalignment

misalignment is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

misdiagnosis

misdiagnosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mismatch repair

mismatch repair is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

misonidazole

misonidazole is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

misoprostol

misoprostol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

missed dose

missed dose is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

missense mutation

missense mutation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mite

mite is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mithramycin

mithramycin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitigate

mitigate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitobronitol

mitobronitol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitochondrial cristae

mitochondrial cristae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitochondrial DNA

mitochondrial DNA is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitochondrial fission

mitochondrial fission is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitochondrial fusion

mitochondrial fusion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitochondrial matrix

mitochondrial matrix is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitochondrial membrane

mitochondrial membrane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitochondrial ribosome

mitochondrial ribosome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitochondrial swelling

mitochondrial swelling is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitochondrion

mitochondrion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitogen

mitogen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitoguazone

mitoguazone is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitolactol

mitolactol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitomycin

mitomycin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitomycins

mitomycins is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitophagy

mitophagy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitosporic fungi

mitosporic fungi is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mitotane

mitotane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitotic anaphase

mitotic anaphase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitotic metaphase

mitotic metaphase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitotic prophase

mitotic prophase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitotic recombination

mitotic recombination is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitotic telophase

mitotic telophase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitoxantrone

mitoxantrone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitral atresia

mitral atresia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitral valvuloplasty

mitral valvuloplasty is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mitsuokella

mitsuokella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mitsuokella multacida

mitsuokella multacida is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mixed glioma

mixed glioma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mobile health unit

mobile health unit is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mobiluncus

mobiluncus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mobiluncus curtisii

mobiluncus curtisii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mobiluncus mulieris

mobiluncus mulieris is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mocetinostat

mocetinostat is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

modality

modality is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

moderation

moderation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

moellerella

moellerella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

moellerella wisconsensis

moellerella wisconsensis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mogibacterium

mogibacterium is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

molar

molar is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

molecular biology

molecular biology is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

molecular chaperone

molecular chaperone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

molecular diagnosis

molecular diagnosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

molecular dynamic

molecular dynamic is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

molecular imaging

molecular imaging is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

molecular medicine

molecular medicine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

molecular probe

molecular probe is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

molecular response

molecular response is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

molecule

molecule is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mollusca

mollusca is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

molluscipoxvirus

molluscipoxvirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

molt

molt is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

molybdenum

molybdenum is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mometasone

mometasone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mometasone furoate

mometasone furoate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monascus

monascus is a microorganism or biological taxon of

medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

monascus ruber

monascus ruber is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

monensin

monensin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mongolian spot

mongolian spot is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monilethrix

monilethrix is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monitoring device

monitoring device is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monkeypox

monkeypox is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monobactams

monobactams is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monoblast count

monoblast count is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monocrotophos

monocrotophos is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monocytopenia

monocytopenia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monocytosis

monocytosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monogenic obesity

monogenic obesity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monograph

monograph is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monoiodotyrosine

monoiodotyrosine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monokines

monokines is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monomer

monomer is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monomethylhydrazine

monomethylhydrazine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mononegavirales

mononegavirales is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mononeuropathy

mononeuropathy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mononuclear leukocyte

mononuclear leukocyte is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

monosaccharide

monosaccharide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monoterpenes

monoterpenes is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

monozygotic twin

monozygotic twin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

montelukast

montelukast is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

montelukast sodium

montelukast sodium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mood disorder

mood disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

mood swing

mood swing is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mopidamol

mopidamol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mopp protocol

mopp protocol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

moral

moral is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

morale

morale is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

moraxella

moraxella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

moraxella atlantae

moraxella atlantae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

moraxella bovis

moraxella bovis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

moraxella canis

moraxella canis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

moraxella lacunata

moraxella lacunata is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

moraxella lincolnii

moraxella lincolnii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

moraxella nonliquefaciens

moraxella nonliquefaciens is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

moraxella oblonga

moraxella oblonga is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

moraxella osloensis

moraxella osloensis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

moraxellaceae

moraxellaceae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

morbillivirus

morbillivirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

morcellation

morcellation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

morganella

morganella is a microorganism or biological taxon

of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

morganella morganii

morganella morganii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

morning

morning is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

morphinans

morphinans is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

morphine

morphine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

morphine sulfate

morphine sulfate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

morphogenesis

morphogenesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

morpholino

morpholino is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

morphologic response

morphologic response is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

morula

morula is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

motexafin gadolinium

motexafin gadolinium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

motexafin lutetium

motexafin lutetium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

motion perception

motion perception is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

motivation

motivation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

motor aphasia

motor aphasia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

motor delay

motor delay is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

motor stereotypy

motor stereotypy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

motor tic

motor tic is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mouth diseases

mouth diseases is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

mouth neoplasm

mouth neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

Movement

Movement is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

movement disorders

movement disorders is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

moxalactam

moxalactam is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

moxibustion

moxibustion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

moxifloxacin

moxifloxacin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mrna precursor

mrna precursor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mu-Chain disease

mu-Chain disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

mucin

mucin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mucinous

mucinous is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mucinous adenocarcinoma

mucinous adenocarcinoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mucinous cystadenoma

mucinous cystadenoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mucoepidermoid carcinoma

mucoepidermoid carcinoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mucopolidoses

mucopolidoses is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mucopolysaccharidosis vii

mucopolysaccharidosis vii is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mucor

mucor is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mucor ramosissimus

mucor ramosissimus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mucorales

mucorales is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mucosal immunity

mucosal immunity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mucosal infection

mucosal infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

mucus

mucus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mulibrey nanism

mulibrey nanism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muller cells

muller cells is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

multicenter study

multicenter study is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

multi-drug resistance

multi-drug resistance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

multienzyme complexes

multienzyme complexes is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

multimodal imaging

multimodal imaging is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

multinucleated hepatocyte

multinucleated hepatocyte is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

multiple exostoses

multiple exostoses is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

multiple fibrofolliculomas

multiple fibrofolliculomas is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

multiple organ failure

multiple organ failure is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

multiplicity

multiplicity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

multipolar neuron

multipolar neuron is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

multivesicular body

multivesicular body is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muparfostat

muparfostat is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mupirocin

mupirocin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muramidase

muramidase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muromonab-CD3

muromonab-CD3 is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscarine

muscarine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscarinic antagonist

muscarinic antagonist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscidae

muscidae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscimol

muscimol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscle cell

muscle cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscle cramp

muscle cramp is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscle development

muscle development is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscle fiber

muscle fiber is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscle hypertrophy

muscle hypertrophy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscle neoplasm

muscle neoplasm is a medical condition or clinical

entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

muscle protein

muscle protein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscle relaxant

muscle relaxant is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscle rigidity

muscle rigidity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscle spindle

muscle spindle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscle strength

muscle strength is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

muscle tonus

muscle tonus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

musculoskeletal deformity

musculoskeletal deformity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

musculoskeletal disease

musculoskeletal disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

musculoskeletal injury

musculoskeletal injury is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

musculoskeletal system

musculoskeletal system is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mustard compounds

mustard compounds is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mustard gas

mustard gas is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mutagenicity test

mutagenicity test is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mutant

mutant is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mutant proteins

mutant proteins is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mutate

mutate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mutation abnormality

mutation abnormality is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mutism

mutism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mycelium

mycelium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mycetoma

mycetoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mycobacteriaceae

mycobacteriaceae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium

mycobacterium is a microorganism or biological

taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium avium

mycobacterium avium is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium bovis

mycobacterium bovis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium chelonae

mycobacterium chelonae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium flavescens

mycobacterium flavescens is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium fortuitum

mycobacterium fortuitum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium gordonae

mycobacterium gordonae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium haemophilum

mycobacterium haemophilum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium infection

mycobacterium infection is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium kansasii

mycobacterium kansasii is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium scrofulaceum

mycobacterium scrofulaceum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium smegmatis

mycobacterium smegmatis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium szulgai

mycobacterium szulgai is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium terrae

mycobacterium terrae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobacterium ulcerans

mycobacterium ulcerans is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycobiome

mycobiome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mycophenolate mofetil

mycophenolate mofetil is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mycophenolic acid

mycophenolic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mycoplasma

mycoplasma is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycoplasma hominis

mycoplasma hominis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycoplasma orale

mycoplasma orale is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycoplasma pneumoniae

mycoplasma pneumoniae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycoplasmal pneumonia

mycoplasmal pneumonia is a microorganism or bio-

logical taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycoplasmataceae

mycoplasmataceae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

mycosis

mycosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mycosis fungoides lymphoma

mycosis fungoides lymphoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

mycotoxin

mycotoxin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

mydriatics

mydriatics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myelination

myelination is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myelitis

myelitis is a medical condition or clinical entity; assessment and management depend on its cause,

severity, and the individual patient.

Synonyms:

myeloablative agonist

myeloablative agonist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myeloablative chemotherapy

myeloablative chemotherapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myeloblast

myeloblast is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myelocyte

myelocyte is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myeloid

myeloid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myeloid cell

myeloid cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Myeloid Leukemia

Myeloid Leukemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

myeloid sarcoma

myeloid sarcoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

myelolipoma

myelolipoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myelomonocyte

myelomonocyte is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myelopoiesis

myelopoiesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myeloproliferative neoplasm

myeloproliferative neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

myelosuppressive therapy

myelosuppressive therapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myenteric plexus

myenteric plexus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Myhre syndrome

Myhre syndrome is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

myoblast

myoblast is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myoblastoma

myoblastoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myocardial bridging

myocardial bridging is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myocardial contusion

myocardial contusion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myocardial reperfusion

myocardial reperfusion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myoclonic epilepsy

myoclonic epilepsy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myoepithelial cell

myoepithelial cell is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myoepithelioma

myoepithelioma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myofibril

myofibril is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myofibrillar myopathy

myofibrillar myopathy is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

myofibroblasts

myofibroblasts is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myofibromatosis

myofibromatosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myofilament

myofilament is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myogenesis

myogenesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myogenin

myogenin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myoglobinuria

myoglobinuria is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myokymia

myokymia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myoma

myoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

myopericytoma

myopericytoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myosin atpase

myosin atpase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myositis ossifican

myositis ossifican is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

myotonic disorder

myotonic disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

myristic acid

myristic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

myroides

myroides is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

myroides odoratus

myroides odoratus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

myxococcales

myxococcales is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

myxococcus

myxococcus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

myxofibroma

myxofibroma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

myxoid cyst

myxoid cyst is a medical condition or clinical entity;

assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

myxomycete

myxomycete is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

myxopapillary ependymoma

myxopapillary ependymoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

myxosarcoma

myxosarcoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

It may cause vaginal bleeding, cramping, and an open cervix and requires clinical assessment.

Synonyms: Incomplete abortion; incomplete pregnancy loss.

N

N-Acetylcysteine

An antidote that replenishes glutathione and enhances detoxification of the toxic metabolite of acetaminophen. It is most effective when started early but may benefit patients with delayed presentation or established liver injury under specialist guidance.

Synonyms:

Nanograms Per Milliliter

A concentration unit equal to one-billionth of a gram per milliliter. **Synonyms:** ng/mL

Nasolabial Folds

Skin creases running from the sides of the nose toward the corners of the mouth. **Synonyms:** Smile lines

Natural Killer Cells

Immune cells that destroy infected or abnormal cells without prior exposure to a specific antigen. **Synonyms:** NK cells

Natural Recoverers

People who overcome an addiction without formal treatment or self-help programs. **Synonyms:**

Needle Biopsy

Removal of a small tissue sample through a hollow needle for microscopic examination. **Synonyms:**

Neonatal

Relating to a newborn, especially during the first 28 days after birth. **Synonyms:**

Nerve Sparing

Surgical preservation of nerves needed for erectile function, especially during prostate surgery. **Synonyms:**

Neuritic Plaques

Abnormal deposits of beta-amyloid surrounded by damaged nerve processes in Alzheimer disease. **Synonyms:** Amyloid plaques

Neurofibrillary Tangles

Twisted tau-protein fibers inside damaged neurons, characteristic of Alzheimer disease. **Synonyms:** Tau tangles

Neuroleptic Agents

Antipsychotic medicines used to treat disorders such as schizophrenia. **Synonyms:** Antipsychotics

Neurologist

A physician specializing in disorders of the brain, spinal cord, nerves, and muscles. **Synonyms:**

Neuropeptides

Short chains of amino acids that act as signaling molecules in the nervous system. **Synonyms:**

Neurotransmitter Receptors

Cell proteins that recognize neurotransmitters and alter cell activity when bound. **Synonyms:**

Neutral Alignment

A posture in which the body is arranged in a straight, balanced line while preserving normal spinal curves. **Synonyms:**

Nonproliferative Retinopathy

Retinal disease in which small vessels leak or become damaged without abnormal new-vessel growth.

Synonyms: Background retinopathy

Non-REM Sleep

Sleep stages that do not include rapid eye movements, including deep slow-wave sleep. **Synonyms:** NREM sleep

Noradrenaline

A hormone and neurotransmitter involved in alertness, stress responses, and blood-vessel constriction.

Synonyms: Norepinephrine

Norepinephrine

A hormone and neurotransmitter that supports alertness, heart function, and the stress response.

Synonyms: Noradrenaline

NSAID

A nonsteroidal anti-inflammatory drug used to reduce pain, fever, and inflammation.

Synonyms: Nonsteroidal anti-inflammatory drug

Nuclear Tests

Diagnostic tests using small amounts of radioactive material to assess organs or identify disease.

Synonyms: Nuclear medicine tests

Nutraceutical

A concentrated food-derived product marketed for health benefits beyond basic nutrition.

Synonyms:

Nutrients

Substances obtained from food that the body needs for energy, growth, repair, and regulation.

Synonyms:

Na⁺/K⁺ ATPase

The sodium-potassium pump is a P-type ATPase found in the plasma membrane of all animal cells, directly consuming approximately 20-30 percent of cellular ATP. It pumps 3 Na⁺ ions out of the cell and 2 K⁺ ions in per ATP hydrolyzed, establishing

steep electrochemical gradients: high Na⁺ outside, high K⁺ inside.

Synonyms:

Nabothian Cyst

A benign mucus-retention cyst of the uterine cervix caused by obstruction of an endocervical gland. It is common, usually asymptomatic, and generally requires no treatment.

Synonyms:

NAD⁺

Nicotinamide adenine dinucleotide in its oxidized form, a coenzyme that carries electrons in cellular energy metabolism.

Synonyms:

NAD⁺ (Nicotinamide Adenine Dinucleotide)

Coenzyme involved in redox reactions, existing in oxidized (NAD⁺) and reduced (NADH) forms. Accepts electrons and hydrogen (NAD⁺ + 2e⁻ + H⁺ → NADH). Key roles: glycolysis (glyceraldehyde-3-phosphate dehydrogenase), TCA cycle (isocitrate, alpha-ketoglutarate, malate dehydrogenases), beta-oxidation.

Synonyms: Nicotinamide Adenine Dinucleotide

Nadir

The lowest point, particularly referring to the lowest white blood cell count after chemotherapy. Bone marrow suppression typically reaches nadir 7-14 days post-treatment. Important for infection risk assessment.

Synonyms:

Naegle Rule

A formula for estimating the due date (estimated date of delivery, EDD): add 7 days to the first day of the last menstrual period (LMP), then add 9 months (or subtract 3 months). Example: LMP January 1 yields EDD October 8. Assumes a 28-day cycle with ovulation on day 14. The rule is most accurate with regular cycles and confirmed LMP.

Synonyms:

Naegleria Fowleri

A free-living amoeba that can cause primary amoebic meningoencephalitis after contaminated water enters the nose. The infection is rare but rapidly progressive, with fever, severe headache, meningism, altered consciousness, seizures, and high mortality.

Synonyms:

Naegleria Infection

A rare infection caused by the free-living amoeba *Naegleria fowleri*, usually acquired when contaminated warm fresh water enters the nose. It can cause rapidly progressive primary amoebic meningoencephalitis with severe headache, fever, vomiting, confusion, seizures, and coma. It is a medical emergency.

Synonyms:

Nail

A protective plate of hardened keratin covering the dorsal surface of the distal phalanges of the fingers and toes.

Synonyms:

Nail Changes

Alterations in nail color, shape, texture, or attachment that may result from local injury, skin disease, infection, medicines, nutritional deficiency, or systemic illness. Their significance depends on the pattern and other clinical findings.

Synonyms:

Nail Clubbing

Abnormal enlargement of the distal digit with increased nail curvature and loss of the normal nail-fold angle. It may be familial or associated with pulmonary, cardiovascular, gastrointestinal, or malignant disease and should be interpreted with the clinical context.

Synonyms:

Nail Infection

Infection of the nail or surrounding tissue, commonly caused by fungi or bacteria. It may cause thickening, discoloration, separation of the nail, pain, swelling,

or drainage; diabetes and poor circulation increase the risk of complications.

Synonyms:

Nail Pits

Small, sharply circumscribed depressions in the nail plate caused by abnormal focal keratinization of the proximal nail matrix. They are classically associated with psoriasis but may also occur in alopecia areata, eczema, lichen planus, or other nail disorders.

Synonyms:

Nail Psoriasis

Nail psoriasis affects 50 percent of patients with psoriasis and 80 percent with nail involvement having joint disease. Features include pitting (most common), onycholysis (nail separation), oil drop sign (salmon patch), subungual hyperkeratosis, and nail plate crumbling. Nail psoriasis is associated with psoriatic arthritis.

Synonyms:

Nanocolloid

Tc-99m labeled colloidal particles for lymphatic imaging. Particle size 10-100 nm. Used for sentinel node detection.

Synonyms:

Narcissistic Personality Disorder

A pattern of grandiosity, need for admiration, and lack of empathy.

Synonyms:

Narcolepsy

A chronic sleep disorder characterized by excessive daytime sleepiness and irresistible sleep attacks, with or without cataplexy (sudden bilateral loss of muscle tone triggered by strong emotions). Narcolepsy type 1: with cataplexy, caused by loss of hypocretin/orexin neurons in the hypothalamus.

Synonyms:

Narrow angle glaucoma

Anatomical narrowing of the anterior chamber angle due to relative pupillary block or a shallow ante-

rior chamber, creating risk for angle closure and acute intraocular pressure elevation. Identified on gonioscopy, it may be managed with laser peripheral iridotomy to equalise pressure between the posterior and anterior chambers.

Synonyms:

Narrow Therapeutic Index

A drug characteristic where there is a small difference between the therapeutic dose and the toxic dose, requiring careful dosing and therapeutic drug monitoring to ensure efficacy while avoiding toxicity. Narrow therapeutic index drugs have a therapeutic index <2-3 (the ratio of toxic dose to effective dose).

Synonyms:

Narrow-Complex Tachycardia

A rapid cardiac rhythm with QRS complexes of normal or near-normal width, usually arising above the ventricles.

Synonyms:

Narrowband UVB Phototherapy

Controlled exposure to ultraviolet B light centered near 311–313 nm for inflammatory or pigmentary skin disease. It is used for psoriasis, vitiligo, eczema, and other selected conditions with eye protection, cumulative-dose monitoring, and skin-cancer risk assessment.

Synonyms:

Nasal Cannula

A device with two small prongs placed in the nostrils to deliver supplemental oxygen. The flow rate is adjusted to the patient's needs and the device used.

Synonyms:

Nasal Cavity

The paired space inside the nose, extending from the nostrils to the nasopharynx. It warms, humidifies, and filters inspired air and contains the receptors responsible for smell.

Synonyms:

Nasal Congestion

A sensation of nasal stuffiness or obstruction from engorgement of the venous sinusoids within the nasal mucosa, especially the inferior turbinates; a symptom shared by many conditions.

Synonyms:

Nasal Endoscopy

Direct endoscopic inspection of the nasal passages, turbinates, septum, sinus drainage pathways, and nasopharynx. It is useful for chronic rhinosinusitis, unilateral obstruction, epistaxis, polyps, foreign bodies, and suspected neoplasia.

Synonyms:

Nasal Flaring

Widening and outward movement of the nostrils during breathing. It is a visible sign of increased work of breathing, particularly in infants and children, and may accompany airway obstruction, bronchiolitis, pneumonia, asthma, or severe systemic illness.

Synonyms:

Nasal Implant

A device placed in or near the nose to support nasal structures or improve airflow. Its purpose depends on the device and condition.

Synonyms:

Nasal Obstruction

Blocked airflow through one or both nasal passages. Causes include congestion, allergy, infection, a deviated septum, polyps, trauma, or a mass. Persistent one-sided obstruction or bleeding requires medical evaluation.

Synonyms:

Nasal Polyps

Benign, pedunculated, edematous outgrowths of the sinus and nasal mucosa that arise most commonly from the ethmoidal sinuses and protrude into the nasal cavity through the middle meatus, causing nasal obstruction, anosmia (loss of smell), and rhinorrhea.

Synonyms:

Nasal Septal Hematoma

A collection of blood between the nasal septal cartilage and its perichondrium, usually after nasal trauma. It causes nasal obstruction and a soft fluctuant septal swelling and requires urgent drainage to prevent cartilage necrosis and saddle-nose deformity.

Synonyms:

Nasal Septum

The wall that divides the nasal cavity into right and left sides. It consists mainly of cartilage in front and bone behind and helps support the nose and direct airflow.

Synonyms:

Nasal Stent

Support for nasal septum/airway. Materials: silicone, metal. Indications: septal hematoma, post-septoplasty support, nasal valve collapse. Complications: crusting, infection, pressure necrosis.

Synonyms:

Nasogastric Tube

A tube passed through the nose into the stomach to remove contents or deliver nutrition, fluids, or medicines when clinically indicated.

Synonyms:

Nasopharyngeal Airway

A soft tube inserted through the nose to maintain a passage between the nares and pharynx. It may be useful in a spontaneously breathing patient with partial upper-airway obstruction but is relatively contraindicated in suspected basal skull fracture or significant nasal trauma.

Synonyms:

Nasopharyngeal Carcinoma

A malignancy arising from the epithelial lining of the nasopharynx, and it has a unique geographical and ethnic distribution, with highest incidence in southern China, Southeast Asia, and North Africa.

Synonyms:

Natal Teeth

Teeth present at birth, most often involving the lower central incisors. They may be loose, interfere with feeding, or injure the infant's tongue and require dental assessment.

Synonyms:

Natural Killer Cell

A type of innate lymphoid cell (lymphocyte) that provides early defense against virus-infected cells and tumor cells without prior sensitization. NK cells recognize stressed or missing-self cells (absent or altered MHC class I) and kill them by releasing perforin and granzymes, or through antibody-dependent cellular cytotoxicity.

Synonyms:

Nausea

An unpleasant sensation of an impending need to vomit, often accompanied by autonomic symptoms such as salivation, sweating, pallor, or dizziness. Common causes include gastrointestinal illness, pregnancy, medication effects, migraine, vestibular disorders, metabolic disease, and serious abdominal or neurologic conditions.

Synonyms:

Navicular

Boat-shaped tarsal bone between talus and three cuneiforms. Navicular tuberosity is a palpable medial prominence serving as posterior tibial tendon insertion, key medial longitudinal arch stabilizer. Central third has a precarious blood supply, susceptible to stress fractures and avascular necrosis (Kohler disease in children).

Synonyms:

NDM-1

New Delhi metallo-beta-lactamase-1, an enzyme that allows certain bacteria to resist many beta-lactam antibiotics, including carbapenems. NDM-1-producing organisms can cause difficult-to-treat urinary, wound, bloodstream, or lung infections. Laboratory susceptibility testing and strict infection-control measures are essential.

Synonyms:

Near Miss

A patient-safety event that could have caused harm but did not, either by chance or because it was intercepted. Reporting and analyzing near misses can identify system vulnerabilities before harm occurs.

Synonyms:

Nearsightedness

A refractive error, also called myopia, in which distant objects appear blurred because light focuses in front of the retina. It is corrected with diverging lenses, contact lenses, or refractive surgery.

Synonyms: myopia, in which distant objects appear blurred because.

Nebulizer

A device that converts liquid medications into a mist for inhalation. Used for bronchodilators (albuterol, ipratropium) and corticosteroids in acute exacerbations. More effective than MDI in patients with severe obstruction.

Synonyms:

Neck Cancer

Human papillomavirus, particularly HPV-16, is an increasingly important etiological factor in head and neck squamous cell carcinoma, particularly oropharyngeal cancer, and it is responsible for the rising incidence of oropharyngeal cancer in younger patients without traditional risk factors of tobacco and alcohol use.

Synonyms:

Neck Pain

Pain or stiffness in the cervical region, commonly caused by muscle strain, degenerative disease, poor posture, or injury. Severe pain after trauma or pain with weakness, numbness, fever, or neurologic deficits requires prompt assessment.

Synonyms:

Necrobiosis Lipoidica

A chronic inflammatory skin disorder characterized

by yellow-brown, atrophic plaques, usually on the shins. It is associated with diabetes but can occur without diabetes.

Synonyms:

Necrobiosis lipoidica diabetorum

A chronic granulomatous skin disorder most commonly associated with diabetes mellitus, presenting as well-demarcated, atrophic, yellow-brown plaques with telangiectasia, typically on the pretibial area. The plaques have a waxy, glazed appearance with a violaceous border. Ulceration occurs in approximately 35 percent of cases.

Synonyms:

Necrolytic migratory erythema

A recurrent, erosive, erythematous eruption that often affects periorificial and intertriginous skin. It is classically associated with glucagonoma but may have other causes, so evaluation should consider nutritional, hepatic, pancreatic, and metabolic disease.

Synonyms:

Necropsy

A post-mortem examination of an animal or human body to determine disease or cause of death.

Synonyms:

Necroptosis

A regulated, programmed form of necrosis that shares features of both classical necrosis and apoptosis, serving as a backup cell death mechanism when apoptosis is inhibited. It is particularly important during viral infections, as many viruses encode proteins that block caspase-mediated apoptosis to ensure their own replication.

Synonyms:

Necrosis

Cell death caused by severe injury or disease, often with loss of membrane integrity and release of cellular contents. It commonly provokes inflammation, although the appearance and inflammatory response vary with the cause and tissue.

Synonyms:

Necrotizing anterior scleritis

A severe, sight-threatening form of scleral inflammation characterised by ischaemic necrosis of the sclera with visible underlying uvea through thinned, grey-white scleral patches.

Synonyms:

Necrotizing Enterocolitis

An acquired inflammatory disease that can cause intestinal necrosis, primarily affecting premature infants. Risk factors include prematurity, enteral feeding, and bacterial colonization. It may cause abdominal distension, bloody stools, bilious vomiting, and feeding intolerance. Pneumatosis intestinalis on imaging strongly supports the diagnosis but must be interpreted with the clinical findings.

Synonyms:

Necrotizing Fasciitis

A life-threatening soft tissue infection characterized by rapid necrosis of the subcutaneous fascia and subcutaneous tissue, with relative sparing of the overlying skin in early stages. It is a surgical emergency requiring immediate wide surgical debridement and broad-spectrum antibiotics.

Synonyms:

Necrotizing Soft Tissue Infection

A rapidly progressive infection of fascia, subcutaneous tissue, or muscle causing severe pain, swelling, systemic toxicity, and tissue necrosis. It is a surgical emergency requiring immediate assessment, broad antimicrobial therapy, and aggressive debridement.

Synonyms:

Needle

Hollow metal tube for fluid withdrawal or injection. Gauge: larger number = smaller diameter. Common gauges: 18G (blood draw), 22G (IV), 25-27G (injection).

Synonyms:

Needle Driver

Instrument for passing suture needle through tissue.

Synonyms:

Needle Driver (Perineal)

A hand instrument used to hold and guide a suture needle during a perineal repair.

Synonyms: Perineal

Needle Driver (Vascular)

A hand instrument used to hold and guide a suture needle during vascular repair.

Synonyms: Vascular

Needle Holder

A surgical instrument with jaws used to grasp and guide a suture needle during tissue repair.

Synonyms:

Negative Feedback

A regulatory mechanism in which the output of a system feeds back to decrease or reverse the initiating stimulus, maintaining homeostasis around a set point.

Synonyms:

Negative Predictive Value

The probability that a person with a negative test result truly does not have the target condition. NPV varies with disease prevalence or pretest probability and is not an intrinsic fixed property of a test.

Synonyms:

Negative Pressure Ventilation

Ventilation using negative pressure applied around the chest wall to expand the lungs, as opposed to positive pressure applied to the airway. The “iron lung” is a historical example. Modern negative pressure ventilators include the cuirass and wrap. They are rarely used today but may be useful in neuromuscular disease.

Synonyms:

Negative Symptoms

Reduced or absent normal emotional, motivational, cognitive, or social functions, including affective flattening, alogia, avolition, anhedonia, and asociality. Persistent negative symptoms can substantially impair functional recovery.

Synonyms:

Neglect

A form of child maltreatment: the failure to provide for a child's basic needs—physical (food, clothing, shelter, medical care), educational, or emotional—causing harm or risk of harm. Features: failure to thrive, poor hygiene, untreated illness/injury, missed healthcare appointments, inadequate supervision, and developmental delay.

Synonyms:

Neglect Syndrome

Hemispatial neglect (unilateral neglect, hemineglect) is a neurological condition characterized by failure to attend to, respond to, or orient toward stimuli on the side of space contralateral to the brain lesion, in the absence of primary sensory or motor deficits sufficient to explain the neglect.

Synonyms:

Neisseria gonorrhoeae

A gram-negative diplococcus that causes gonorrhea, a sexually transmitted infection. The organism has developed resistance to many antibiotics including fluoroquinolones and macrolides.

Synonyms:

Neisseria meningitidis

A gram-negative diplococcus that causes meningitis and meningococcemia. The organism has a polysaccharide capsule that is the target of conjugate vaccines. Serogroups A, B, C, W, X, and Y cause most disease. Meningitis presents with fever, headache, neck stiffness, and altered mental status.

Synonyms:

Nelson Syndrome

Enlargement and hypersecretion of an

adrenocorticotrophic-hormone-producing pituitary tumour after bilateral adrenalectomy, usually for Cushing disease. It may cause rapid skin hyperpigmentation, headache, visual-field loss, and other effects of an expanding sellar mass.

Synonyms:

Neoadjuvant Therapy

Treatment before primary treatment to shrink tumor. Examples: chemotherapy before surgery.

Synonyms:

Neonatal Abstinence Syndrome

A withdrawal syndrome in neonates following in utero exposure to opioids (most common) or other substances (benzodiazepines, SSRIs, alcohol). Onset within 24-72 hours of birth (varies by half-life of substance).

Synonyms:

Neonatal Cephalohematoma

A collection of blood beneath the periosteum of a newborn's skull, usually caused by birth trauma. It is limited by skull sutures and generally resolves over time, although it requires assessment for associated injury or jaundice.

Synonyms:

Neonatal Conjunctivitis

Inflammation of the conjunctiva during the first month of life, caused by chemical irritation, bacteria, or viruses acquired during delivery. Purulent discharge, eyelid swelling, and corneal involvement require urgent evaluation.

Synonyms:

Neonatal Diabetes Mellitus

Diabetes diagnosed within the first six months of life. Can be transient or permanent. Transient neonatal diabetes mellitus is caused by abnormalities at chromosome 6q24 and usually resolves but may relapse in adolescence.

Synonyms:

Neonatal Herpes Simplex

Herpes simplex virus infection in the first 28 days of life, usually HSV-2 from maternal genital infection. Three forms: skin, eye, and mouth disease; CNS disease; and disseminated disease. Disseminated form mimics sepsis with high mortality. Diagnosis by viral PCR, culture, or Tzanck smear. Treatment: IV acyclovir for 14-21 days.

Synonyms:

Neonatal herpes simplex virus

A severe neonatal infection caused by herpes simplex virus, typically acquired during passage through the birth canal, presenting within the first month of life as skin, eye, and mouth disease, central nervous system disease, or disseminated disease with multiorgan involvement.

Synonyms:

Neonatal hyperbilirubinemia

Elevated unconjugated bilirubin levels in newborns exceeding 5 mg per deciliter, potentially causing jaundice and, if severe, kernicterus with neurological damage. Phototherapy is the standard treatment.

Synonyms:

Neonatal Hypoglycemia

Blood glucose less than 40-45 mg/dL in term infants or less than 25 mg/dL in preterm infants. Risk factors include prematurity, small for gestational age, large for gestational age, and maternal diabetes. Presents with jitteriness, lethargy, poor feeding, and seizures. Treatment: early feeding, IV dextrose infusion, and monitoring.

Synonyms:

Neonatal Hypocalcemia

Low serum calcium in a newborn, which may cause jitteriness, poor feeding, hypotonia, apnea, or seizures. Causes include prematurity, maternal diabetes, birth asphyxia, and disorders of parathyroid function.

Synonyms:

Neonatal Hypothermia

Core body temperature below 36.5 degrees Celsius in a newborn. Classified as mild (36-36.4), moderate (32-35.9), or severe (below 32). Occurs due to rapid heat loss through evaporation, convection, conduction, and radiation. Prevention: skin-to-skin contact, drying, warm environment, and delayed bathing.

Synonyms:

Neonatal Polycythemia

An abnormally high red-cell concentration in a newborn, often defined by a venous hematocrit of at least 65 percent. It may increase blood viscosity and cause respiratory, neurologic, or metabolic symptoms.

Synonyms:

Neonatal Hypoxic-Ischemic Encephalopathy

Brain dysfunction in a newborn caused by inadequate oxygenation and/or cerebral blood flow around the time of birth. Moderate or severe HIE may produce altered consciousness, abnormal tone, seizures, and multiorgan injury; selected term or near-term infants may benefit from early therapeutic hypothermia.

Synonyms:

Neonatal Infections

Early-onset sepsis (EOS, <72h): GBS, E. coli, Listeria. Risk factors: maternal GBS+, chorioamnionitis, PROM >18h. Kaiser sepsis calculator for management. Late-onset sepsis (LOS, >72h): CoNS, S. aureus, gram-negatives, Candida. NEC: prematurity, formula feeding, ischemic gut. Pneumatosis intestinalis, portal venous gas.

Synonyms:

Neonatal Jaundice

Yellow discoloration of a newborn's skin or eyes caused by elevated bilirubin. It is common but may require treatment or investigation when severe, early, or prolonged.

Synonyms:

Neonatal Jaundice (Jaundice of the Newborn)

Yellow discoloration of a newborn's skin or eyes caused by elevated bilirubin. It is often physiologic but requires assessment when severe, early, rapidly increasing, or prolonged.

Synonyms: Jaundice of the Newborn

Neonatal Resuscitation

The systematic approach to stabilizing a newborn after delivery, guided by the Neonatal Resuscitation Program (NRP).

Synonyms:

Neonatal Sepsis

Systemic bacterial infection in the first 28 days of life, classified as early-onset (within 72 hours, usually from vertical transmission) or late-onset (after 72 hours, often nosocomial). Common organisms: Group B Streptococcus, E. coli, Listeria.

Synonyms:

Neonatal Skin Conditions

Common and usually benign. Erythema toxicum neonatorum (red papules and pustules on erythematous base, appears day 2 to 3, resolves by 2 weeks). Milia (tiny white cysts on nose and cheeks). Miliaria crystallina (clear vesicles from sweat duct obstruction). Sebaceous hyperplasia (yellow papules on nose and cheeks).

Synonyms:

Neonatal thyrotoxicosis

Transient hyperthyroidism in newborns caused by transplacental transfer of maternal thyroid-stimulating immunoglobulins, presenting with tachycardia, irritability, and poor weight gain in the first weeks of life.

Synonyms:

Neonatal Transition

The physiologic adaptation from placental gas exchange to pulmonary respiration after birth. It includes lung aeration, falling pulmonary vascular resistance, closure of fetal circulatory shunts, and

changes in cardiac output and thermoregulation.

Synonyms:

Neonatologist

A pediatrician who specializes in the medical care of newborn infants, particularly premature and critically ill neonates.

Synonyms:

Neoplasm

Abnormal growth of tissue, may be benign or malignant. Benign neoplasms: localized, slow-growing, do not metastasize. Malignant neoplasms (cancer): invasive, metastasize, can be fatal. Classification: carcinoma (epithelial origin), sarcoma (mesenchymal origin), leukemia (hematopoietic), lymphoma (lymphoid).

Synonyms:

Nephrectomy

Surgical removal of a kidney. Radical nephrectomy: kidney + Gerota fascia + adrenal gland (for renal cell carcinoma). Partial nephrectomy (nephron-sparing): for small renal tumors (<7 cm, renal function preservation). Simple nephrectomy: for benign disease (non-functioning kidney, chronic infection, massive hydronephrosis).

Synonyms:

Nephritic Syndrome

Characterized by hematuria with dysmorphic RBCs and RBC casts, oliguria, hypertension, and mild proteinuria less than 3.5 g/day. Results from glomerular inflammation increasing permeability to cells and reducing GFR. Hypertension from sodium and water retention.

Synonyms:

Nephroblastoma

Wilms tumor, a malignant embryonal renal tumor of childhood that commonly presents as an asymptomatic abdominal mass.

Synonyms:

Nephrocalcinosis

Deposition of calcium salts within the renal parenchyma, often caused by hypercalcemia, hypercalciuria, distal renal tubular acidosis, prematurity, or inherited disorders. It may impair renal concentrating ability and progress to chronic kidney disease.

Synonyms:

Nephrogenic Diabetes Insipidus

Inability of the renal collecting ducts to respond adequately to antidiuretic hormone, causing excessive dilute urine production and intense thirst. Causes include inherited defects, chronic kidney disease, electrolyte disorders, and medication exposure.

Synonyms:

Nephrogenic fibrosing dermopathy

A rare fibrosing disorder of the skin causing thickening and hardening, primarily of the extremities and trunk, associated with kidney failure and gadolinium-based contrast exposure.

Synonyms:

Nephrogenic Systemic Fibrosis

A rare fibrosing disorder associated mainly with exposure to certain gadolinium contrast agents in people with severe kidney impairment.

Synonyms:

Nephrolithiasis

Formation of stones in the urinary tract. Calcium-containing stones are common, but stone composition varies and may include uric acid, struvite, or cystine. Risk factors include dehydration, hypercalciuria, hyperoxaluria, hypocitraturia, and low urine volume. Evaluation includes 24-hour urine analysis.

Synonyms:

Nephron

Functional unit of the kidney comprising the glomerulus, proximal tubule, loop of Henle, distal tubule, and collecting duct. Each kidney contains approximately one million nephrons responsible for filtering blood, reabsorbing solutes and water, and

excreting waste to form urine.

Synonyms:

Nephron Function

The nephron is the functional unit of the kidney, with approximately 1 million per kidney. Each nephron consists of a renal corpuscle (glomerulus and Bowman's capsule) and a renal tubule (proximal convoluted tubule, loop of Henle, distal convoluted tubule, and collecting duct).

Synonyms:

Nephronophthisis

An autosomal-recessive tubulointerstitial kidney disease causing progressive loss of concentrating ability, polyuria, polydipsia, anemia, and chronic kidney failure. It may be isolated or part of a ciliopathy with retinal, skeletal, hepatic, or neurological manifestations.

Synonyms:

Nephropathy

Disease or damage of the kidneys, which may impair filtration, fluid balance, or other kidney functions.

Synonyms:

Nephrostomy

An artificial opening created between the kidney and the skin to drain urine directly when the normal pathway is blocked. See urology.

Synonyms:

Nephrostomy Tube

A percutaneously placed catheter in the renal pelvis to drain urine, bypassing a ureteral obstruction. Indications: ureteral obstruction (calculus, tumor, stricture) causing hydronephrosis, pyonephrosis (infected, obstructed kidney — emergency drainage), and as a temporary measure before definitive surgery.

Synonyms:

Nephrotic Range Proteinuria

Protein excretion greater than 3.5 g/day or urine protein-to-creatinine ratio greater than 3.5 g/g. Re-

flects severe glomerular damage with significant protein loss. Degree correlates with severity of injury and risk of complications including thromboembolism, infection, and progression to ESRD.

Synonyms:

Nephrotic Syndrome

Clinical constellation of heavy proteinuria greater than 3.5 g/day, hypoalbuminemia less than 3.0 g/dL, generalized edema, hyperlipidemia, and lipiduria. Results from increased glomerular permeability to albumin. Reduced oncotic pressure causes fluid extravasation. Hepatic lipoprotein synthesis increases causing hyperlipidemia.

Synonyms:

Nephrotoxicity

Kidney damage from toxins, drugs, contrast. Amino-glycosides, cisplatin, contrast media, ethylene glycol. Monitoring: creatinine, urine output. Prevention: hydration, dose adjustment.

Synonyms:

Nerve

A bundle of axons (nerve fibers) surrounded by connective tissue sheaths that transmits electrical impulses between the central nervous system and the periphery. Structure: epineurium (outer layer), perineurium (surrounds fascicles), endoneurium (surrounds individual axons).

Synonyms:

Nerve Conduction Studies

Measurement of the speed and amplitude of electrical impulses along peripheral nerves. Sensory NCS: stimulate at one point, record distally. Motor NCS: stimulate at two or more points along the nerve, record from muscle. Parameters: conduction velocity (m/s), amplitude (microvolts/millivolts), and distal latency.

Synonyms:

Nerve Conduction Study

A diagnostic test that measures the speed and strength of electrical signals traveling through a

nerve to detect nerve damage or dysfunction.

Synonyms:

Nervous Tissue

The tissue of the nervous system, composed of neurons and supporting cells, that detects stimuli and transmits electrical signals.

Synonyms:

Nettle Rash

Urticaria, an itchy eruption of transient raised wheals caused by release of inflammatory mediators in the skin.

Synonyms:

Neural Tube Defects

Congenital malformations resulting from failure of the neural tube to close during the third to fourth week of gestation. Include anencephaly (incomplete cranial closure), encephalocele (herniation through skull defect), and spina bifida (incomplete spinal closure).

Synonyms:

Neuralgia

Pain caused by irritation or damage to a peripheral or cranial nerve, typically described as sharp, burning, stabbing, or electric-shock-like and occurring along the nerve's distribution. It may be triggered by light touch or movement and can result from compression, trauma, infection, metabolic disease, or demyelination.

Synonyms:

Neuraminidase Inhibitors

A class of antiviral drugs that inhibit the neuraminidase enzyme on the surface of influenza viruses, preventing the release of newly formed viral particles from infected cells and thereby limiting viral spread. The two available agents are oseltamivir, administered orally, and zanamivir, administered by inhalation.

Synonyms:

Neuroblastoma

Childhood sympathetic nervous system tumor. MYCN amplification poor prognosis. Presents as abdominal mass, opsoclonus-myoclonus syndrome. Spontaneous regression possible in infants.

Synonyms:

Neurocognitive Disorder

A condition involving acquired decline in one or more cognitive abilities that affects daily function. Causes include neurodegenerative disease, vascular disease, injury, infection, and medicines.

Synonyms:

Neurocysticercosis

The most common parasitic infection of the central nervous system worldwide and is caused by the larval stage (cysticercus) of the pork tapeworm *Taenia solium*. It is endemic in Latin America, Asia, and Africa, and is an important cause of epilepsy in endemic regions.

Synonyms:

Neurodegeneration

The progressive loss of structure and function of neurons, culminating in their death, and represents the underlying mechanism of many devastating neurological disorders.

Synonyms:

Neuroendocrine Tumor

A tumor arising from cells with both neural and hormone-producing features. These tumors can occur throughout the body and may produce hormones or be nonfunctioning.

Synonyms:

Neuroendocrine Tumors Grading

Classification of neuroendocrine tumors by proliferative rate using Ki-67 index and mitotic count. Well-differentiated low-grade tumors have Ki-67 less than three percent and fewer than two mitoses per ten high-power fields. Intermediate-grade tumors have Ki-67 of three to twenty percent.

Synonyms:

Neurofibroma

A benign peripheral nerve sheath tumor. Solitary neurofibromas are common and present as soft, flesh-colored papules or nodules. Multiple neurofibromas are characteristic of neurofibromatosis type 1 (NF1).

Synonyms:

Neurofibromatosis

A group of autosomal dominant genetic disorders causing tumor growth along nerves. Type 1 (NF1, chromosome 17) causes café-au-lait spots, neurofibromas, optic gliomas, and learning disabilities. Type 2 (NF2, chromosome 22) causes bilateral vestibular schwannomas, meningiomas, and ependymomas.

Synonyms:

Neurofibromatosis Type 1

Autosomal dominant disorder caused by mutations in the NF1 gene encoding neurofibromin on chromosome seventeen.

Synonyms:

Neurofibromatosis Type 2

An autosomal dominant disorder caused by NF2 gene mutation on chromosome 22. Characterized by bilateral vestibular schwannomas (acoustic neuromas), meningiomas, and ependymomas. Features: hearing loss, tinnitus, and balance problems. Diagnosis: MRI showing bilateral vestibular schwannomas.

Synonyms:

Neurogenic Bladder

Lower urinary-tract dysfunction caused by a neurologic lesion affecting central or peripheral control of storage and voiding. It may produce urgency, retention, incontinence, high bladder pressures, recurrent infection, and upper-tract damage.

Synonyms:

Neurogenic megacolon

Massive dilation of the colon due to loss of autonomic innervation, most commonly from Chagas disease, Hirschsprung disease, or diabetic autonomic

neuropathy. It presents with chronic constipation, abdominal distension, fecal impaction, and risk of toxic megacolon.

Synonyms:

Neurogenic Shock

Distributive shock caused by loss of sympathetic vascular tone, usually after acute spinal-cord injury above T6. It is characterized by hypotension with relative bradycardia and warm skin, distinguishing it from hemorrhagic shock when the clinical findings are complete.

Synonyms:

Neurography

MRI technique visualizing peripheral nerves. Used for nerve tumors, entrapment, trauma.

Synonyms:

Neuroleptic

An older term for antipsychotic medications, derived from their ability to produce a state of mental indifference and motor slowing. The term is now largely replaced by “antipsychotic,” though it is still used in specific contexts such as neuroleptic malignant syndrome. Typical neuroleptics are first-generation antipsychotics.

Synonyms:

Neuroleptic Malignant Syndrome

A rare but life-threatening idiosyncratic reaction to dopamine receptor-blocking agents, typically antipsychotics, characterized by hyperthermia, severe muscle rigidity, altered mental status, and autonomic dysfunction.

Synonyms:

Neurologic Localization

The process of using the pattern of deficits in strength, sensation, reflexes, coordination, cranial-nerve function, and cognition to identify the anatomic site of nervous-system dysfunction. Localization guides differential diagnosis and selection of investigations.

Synonyms:

Neurological Examination

A clinical assessment of mental status, cranial nerves, motor function, reflexes, coordination, sensation, and gait. It helps localize nervous-system dysfunction and determine the need for further testing.

Synonyms:

Neurological Rehabilitation

Rehabilitation for stroke, spinal cord injury, traumatic brain injury, Parkinson disease, multiple sclerosis. Goals: maximize function, independence, quality of life. Multidisciplinary team: physiatrist, PT, OT, speech therapy, psychology.

Synonyms:

Neurology PET

PET imaging used in selected neurologic disorders to assess brain metabolism or receptor activity, such as in some dementias, epilepsy evaluations, and movement disorders.

Synonyms:

Neuromuscular Blocking Agents

Medications administered intraoperatively to induce skeletal muscle relaxation and facilitate endotracheal intubation and surgical exposure.

Synonyms:

Neuromuscular Junction

The neuromuscular junction is the synapse between motor neuron and skeletal muscle fiber, where acetylcholine released from presynaptic terminals binds to nicotinic acetylcholine receptors on the postsynaptic motor end plate, causing depolarization and muscle contraction.

Synonyms:

Neuromyelitis Optica

Neuromyelitis optica spectrum disorder (NMOSD), formerly known as Devic disease, is an autoimmune, inflammatory demyelinating disorder of the central nervous system that preferentially targets the optic nerves and spinal cord.

Synonyms:

Neuron

The fundamental excitable cell of the nervous system specialized for receiving, integrating, and transmitting electrical and chemical signals. Structural components: cell body (soma), dendrites (receptive), axon (conducting), and synaptic terminals (releasing neurotransmitters).

Synonyms:

Neuropathic Pain

Chronic pain caused by damage or disease affecting the somatosensory nervous system, including the peripheral nerves, dorsal root ganglia, spinal cord, or brain.

Synonyms:

Neuropathic Ulcer

A chronic wound of the foot in a patient with diabetes, resulting from peripheral neuropathy, peripheral artery disease, and impaired wound healing. See diabetic foot ulcer.

Synonyms:

Neuropathy

Disease or dysfunction of peripheral nerves causing pain, numbness, tingling, weakness, or altered reflexes. Common causes include diabetes, alcohol, nutritional deficiency, toxins, compression, autoimmune disease, and inherited disorders.

Synonyms:

Neuropathy (Peripheral Neuropathy)

Damage to peripheral nerves causing sensory, motor, or autonomic dysfunction. Common causes: diabetes mellitus, alcohol use disorder, vitamin B12 deficiency, chemotherapy, autoimmune diseases, and hereditary conditions (Charcot-Marie-Tooth disease). Presents with numbness, tingling, burning pain, weakness, and gait instability.

Synonyms: Peripheral Neuropathy

Neuroplasticity

The brain's ability to reorganize its structure, function, and connections in response to experience, learning, and injury. It is relevant to psychiatric

treatment because antidepressants, psychotherapy, and ECT are thought to promote neuroplastic changes including neurogenesis in the hippocampus and synaptic remodeling.

Synonyms:

Neurosarcoidosis

Neurological involvement by sarcoidosis, caused by non-caseating granulomatous inflammation of the brain, meninges, cranial nerves, spinal cord, peripheral nerves, or muscles. Presentations include cranial neuropathies, aseptic meningitis, seizures, hypothalamic or pituitary dysfunction, myelopathy, and peripheral neuropathy.

Synonyms:

Neurosyphilis

Infection of the central or peripheral nervous system by *Treponema pallidum*. It may occur at any stage of syphilis and cause meningitis, stroke, cranial-nerve dysfunction, sensory ataxia, cognitive decline, or tabes dorsalis.

Synonyms:

Neurotransmitter

Neurotransmitters are endogenous chemical messengers that transmit signals across synapses from one neuron to another or to target cells such as muscle or gland cells.

Synonyms:

Neurovascular Examination

Assessment of distal motor function, sensation, pulses, capillary refill, skin temperature, and color in an injured limb. Serial examination is essential for detecting nerve injury, vascular compromise, compartment syndrome, and evolving ischemia.

Synonyms:

Neutropenia

A reduced neutrophil count ($< 1.5 \times 10^9/L$; severe < 0.5), increasing risk of bacterial and fungal infection, especially febrile neutropenia.

Synonyms:

Neutrophil Extracellular Traps

NETs: web-like structures of chromatin + granular proteins (MPO, NE, histone) released by neutrophils (NETosis: suicidal vs vital).

Synonyms:

Neutrophil Recruitment

A multistep process essential for acute inflammation and host defense, involving sequential adhesive interactions between neutrophils and endothelial cells. The process begins with the rolling phase, where neutrophils loosely attach to endothelial cells through selectin-mediated interactions.

Synonyms:

Neutrophilic dermatosis

A group of inflammatory skin conditions characterised by dense neutrophilic infiltrate in the dermis without evidence of infection, which includes Sweet syndrome (acute febrile neutrophilic dermatosis), pyoderma gangrenosum, and Behçet disease.

Synonyms:

Neutrophilic eccrine hidradenitis

A neutrophilic dermatosis characterized by neutrophilic infiltration of the eccrine glands and surrounding dermis, typically occurring in patients receiving chemotherapy, particularly cytarabine. It presents with painful, erythematous plaques or nodules, most commonly on the trunk and extremities.

Synonyms:

Nevus

A benign hamartoma of the skin; most commonly melanocytic nevus (mole). Other nevi: congenital, dysplastic/atypical, Spitz, blue nevus, halo nevus; non-melanocytic: epidermal, sebaceous, vascular (strawberry hemangioma, port-wine stain).

Synonyms:

Nevus comedonicus

A congenital hamartoma of the pilosebaceous unit presenting as a localised cluster of dilated follicular ostia filled with keratinous plugs, resembling closely grouped open comedones. It typically ap-

pears at birth or in early childhood on the face, neck, or trunk, and may be associated with other developmental anomalies.

Synonyms:

New Daily Persistent Headache

A headache that begins on a clearly remembered day and becomes continuous within 24 hours, persisting for at least three months. It may resemble migraine or tension-type headache; a new persistent headache requires medical evaluation to exclude secondary causes such as infection, pressure disorders, or vascular disease.

Synonyms:

Newborn Circumcision

Surgical removal of the foreskin from the penis, typically performed within the first few days of life. Medical benefits include reduced risk of urinary tract infections, sexually transmitted infections, and penile cancer. Complications include bleeding, infection, and meatal stenosis.

Synonyms:

Newborn Hearing Screen

Universal screening for congenital hearing loss, performed before hospital discharge. Two-step protocol: otoacoustic emissions (OAE: measures cochlear outer hair cell response to click stimulus) and automated auditory brainstem response (AABR: measures neural response from the cochlea to the brainstem). Pass/refer.

Synonyms:

Newborn Metabolic Screen

A dried blood spot test (heel stick) collected 24-48 hours after birth to screen for congenital disorders before symptoms develop.

Synonyms:

Newborn Screening

A public health program testing newborns for treatable genetic, metabolic, and endocrine disorders 24-48 hours after birth. Blood spot (heel stick) on filter paper (Guthrie card). Conditions vary by

state (Recommended Uniform Screening Panel: 35 core conditions).

Synonyms:

Next-Generation Sequencing

Massively parallel sequencing technology that analyzes many DNA molecules simultaneously. It supports gene panels, whole-exome sequencing, whole-genome sequencing, and tumor sequencing, with limitations involving coverage, structural variants, mosaicism, and interpretation.

Synonyms:

Niacin (Vitamin B3)

A water-soluble vitamin that forms NAD⁺ and NADP⁺, essential electron carriers in oxidation-reduction reactions and biosynthetic pathways. Severe deficiency causes pellagra, characterized by dermatitis, diarrhea, and dementia.

Synonyms: Vitamin B3

Nickel-Chromium

Base metal alloy for crowns. Less expensive than noble metals. Nickel allergy concern.

Synonyms:

Nicotine

An addictive stimulant found in tobacco and some vaping products that acts on neuronal nicotinic receptors.

Synonyms:

Niemann-Pick Disease

A group of autosomal recessive lysosomal storage disorders caused by sphingomyelinase deficiency (ASM, types A and B, SMPD1 mutations) or NPC1/NPC2 cholesterol transport defects (type C).

Synonyms:

Night Blindness

Impaired vision in dim light (nyctalopia). Causes: vitamin A deficiency (most common cause worldwide, leading to retinol deficiency and rod dysfunction), retinitis pigmentosa (progressive rod-cone degeneration, genetic), congenital stationary night

blindness, advanced glaucoma, and cataract.

Synonyms:

Night Eating Syndrome

Delayed circadian pattern of eating. Evening hyperphagia, morning anorexia, insomnia. Associated with obesity, depression.

Synonyms:

Night Sweats

Episodes of excessive sweating during sleep that soak clothing or bedding. They may occur with infection, hormonal changes, cancer, medication effects, or other systemic illness; persistent unexplained night sweats warrant assessment.

Synonyms:

NIH Stroke Scale

The National Institutes of Health Stroke Scale (NIHSS) is a standardized, validated clinical assessment tool used to quantify the severity of acute ischemic stroke.

Synonyms:

Nikolsky Sign

A clinical dermatological sign in which light lateral pressure applied to normal-appearing skin causes epidermal detachment or sloughing. Positive sign indicates intraepidermal loss of cell-cell cohesion (acantholysis).

Synonyms:

Nipah Virus Infection

A zoonotic viral infection that may cause fever, respiratory illness, encephalitis, seizures, and coma. It can spread from infected animals or people through close contact. There is no widely available licensed vaccine or specific antiviral treatment; suspected infection requires urgent isolation and specialist care.

Synonyms:

Nitrates

Vasodilator drugs that release nitric oxide, causing relaxation of vascular smooth muscle through activation of guanylyl cyclase and increased cyclic GMP.

They primarily cause venodilation at low doses, reducing preload and myocardial oxygen demand, and arterial dilation at higher doses, reducing afterload.

Synonyms:

Nitrogen Balance

The difference between dietary nitrogen intake, estimated mainly from protein intake, and nitrogen loss, primarily in urine. Positive balance supports growth or tissue repair; negative balance occurs with inadequate intake, inflammation, trauma, or catabolic disease.

Synonyms:

Nitrous Oxide

An inhaled anesthetic gas with analgesic and anesthetic-sparing properties. It has rapid onset and offset but relatively low potency, expands closed gas spaces, and may contribute to diffusion hypoxia or postoperative nausea.

Synonyms:

Nitrous Oxide for Labor

A 50:50 mixture of nitrous oxide and oxygen (Entonox) inhaled by the mother during labor for analgesia. Self-administered via a mask or mouthpiece; the woman controls her own dosing, taking a breath 30 seconds before a contraction.

Synonyms:

Nocardia asteroides infection

Infection by *Nocardia asteroides*, an environmental bacterium that can cause lung, skin, or brain infection, especially in immunocompromised people.

Synonyms:

Nocardiosis

A bacterial infection caused by *Nocardia* species (*N. asteroides*, *N. brasiliensis*), found in soil. Most common in immunocompromised patients (transplant, HIV, chronic steroid use). Pulmonary nocardiosis (most common): cough, fever, necrotizing pneumonia, cavitary lesions.

Synonyms:

Nocebo

A harmful or unpleasant symptom or treatment effect caused or amplified by negative expectations rather than by the treatment's specific pharmacologic action.

Synonyms:

Nociception

Neural processing of noxious thermal, mechanical, or chemical stimuli that may result in the perception of pain. It includes transduction, transmission, modulation, and projection; nociception and pain are related but not identical concepts.

Synonyms:

Nocturia

Complaint of waking one or more times during the night to void, with each void preceded and followed by sleep. Highly prevalent in older adults and significantly impairs sleep quality and quality of life.

Synonyms:

Nodular lymphoid hyperplasia

Benign aggregates of lymphoid tissue occurring in the gastrointestinal tract, most commonly in the small intestine, presenting as multiple small nodules on endoscopy or imaging. It may be associated with immunodeficiency states, particularly common variable immunodeficiency, and *Giardia lamblia* infection.

Synonyms:

Nodule

Small, palpable mass <2 cm. Can be solid or cystic. Examples: thyroid nodule, rheumatoid nodule, pulmonary nodule. Evaluation depends on location.

Synonyms:

Nomogram

A graphical tool that estimates a quantity or risk from related measurements. The Rumack–Matthew nomogram is used in selected cases of acute acetaminophen ingestion.

Synonyms:

Non communicating Hydrocephalus

Non-communicating (obstructive) hydrocephalus is a type of hydrocephalus in which there is obstruction to the flow of cerebrospinal fluid (CSF) within the ventricular system, preventing CSF from reaching the arachnoid granulations for absorption.

Synonyms:

Non-Accidental Trauma

Injuries inflicted on a child, suspected when history and examination findings are inconsistent with the reported mechanism. Red flags: multiple fractures at different stages of healing, posterior rib fractures, metaphyseal corner fractures, and retinal hemorrhages.

Synonyms:

Non-Adherence

Failure to follow an agreed treatment plan, which may result from access barriers, side effects, beliefs, misunderstanding, or other circumstances.

Synonyms:

Non-Alcoholic Fatty Liver Disease

Hepatic steatosis in the absence of significant alcohol consumption, strongly associated with metabolic syndrome, obesity, and type 2 diabetes. NAFLD includes simple steatosis and non-alcoholic steatohepatitis (NASH) with inflammation and fibrosis. NASH can progress to cirrhosis and hepatocellular carcinoma.

Synonyms:

Non-Allergic Rhinitis

Nasal congestion, discharge, or sneezing not caused by an allergic immune response. Triggers may include changes in temperature or humidity, smoke, odors, medicines, or hormonal changes.

Synonyms:

Non-Asthmatic Eosinophilic Bronchitis

A cause of chronic cough characterized by airway eosinophilia without the variable airflow obstruction or bronchial hyperresponsiveness typical of asthma. Symptoms often improve with inhaled

corticosteroids, whereas bronchodilators alone may provide little benefit.

Synonyms:

Non-Celiac Gluten Sensitivity

Symptom improvement with gluten-free diet without celiac disease or wheat allergy. Diagnosis of exclusion.

Synonyms:

Non-Communicable Disease

Disease not transmitted between persons. Examples: cancer, heart disease, diabetes.

Synonyms:

Non-Contact Tonometry

A method of estimating intraocular pressure with a brief puff of air directed at the cornea. It does not touch the eye and is useful for screening, although abnormal or uncertain results may require confirmation with another method.

Synonyms:

Non-Distensible Balloon (Vascular)

A catheter balloon designed to maintain its shape during high-pressure dilation of a narrowed vessel.

Synonyms: Vascular

Non-Functioning Pituitary Adenoma

Pituitary adenomas that do not secrete clinically significant hormones. The most common pituitary adenomas to present with mass effects.

Synonyms:

Non-Hodgkin Lymphoma

A group of malignant lymphoid tumors arising from B cells, T cells, or natural-killer cells. Subtypes differ in biology, clinical behavior, affected organs, and treatment.

Synonyms:

Non-Invasive Prenatal Testing

Screening of cell-free placental DNA in maternal blood for selected fetal chromosomal abnormalities,

especially trisomies 21, 18, and 13. It is highly sensitive screening, not a definitive diagnosis; positive results require confirmatory invasive testing.

Synonyms:

Non-Invasive Ventilation

Positive pressure ventilation delivered via a face mask or nasal mask without endotracheal intubation. BiPAP (bilevel positive airway pressure) is most commonly used for acute hypercapnic respiratory failure (COPD exacerbation) and cardiogenic pulmonary edema. It reduces the need for intubation and improves outcomes in selected patients.

Synonyms:

Non-Proliferative Diabetic Retinopathy

The early stage of diabetic retinopathy, characterized by structural abnormalities of the retinal vasculature resulting from chronic hyperglycemia-induced damage to the endothelial cells and pericytes of retinal capillaries, without neovascularization.

Synonyms:

Non-Radiographic Axial Spondyloarthritis

Inflammatory arthritis affecting the spine and sacroiliac region without definite structural changes on plain X-ray. It may cause chronic inflammatory back pain, morning stiffness, enthesitis, uveitis, psoriasis, or inflammatory bowel disease. MRI, laboratory findings, and clinical assessment help establish the diagnosis.

Synonyms:

Non-Rebreather Mask

A face mask with a reservoir bag and one-way valves that can deliver a high concentration of supplemental oxygen when fitted and used correctly.

Synonyms:

Non-Small Cell Lung Cancer

Most common lung cancer type. Includes adenocarcinoma, squamous cell, large cell.

Synonyms:

Non-Stress Test

Antepartum fetal monitoring assessing fetal heart rate reactivity. Reactive NST: ≥ 2 accelerations of 15 bpm for 15 seconds (≥ 32 weeks) or 10 bpm for 10 seconds (<32 weeks) within 20 minutes. Non-reactive: insufficient accelerations after 40 minutes (may indicate fetal sleep, acidosis, or CNS depression). False positive rate high.

Synonyms:

Non-Tuberculous Mycobacteria

NTM: environmental mycobacteria (*M. avium* complex - MAC, *M. kansasii*, *M. abscessus*). Pulmonary NTM: ATS/IDSA criteria (clinical + radiographic + microbiologic: 2+ sputum or 1 BAL + nodules/cavities/bronchiectasis on CT). MAC: nodular bronchiectatic (middle-aged women, "Lady Windermere syndrome") or fibrocavitary (older men, COPD).

Synonyms:

Nonalcoholic Fatty Liver Disease

NAFLD: hepatic steatosis (>5 percent of hepatocytes) in the absence of significant alcohol use, associated with the metabolic syndrome (obesity, type 2 diabetes, dyslipidemia, hypertension).

Synonyms:

Nonalcoholic Steatohepatitis

Progressive form of NAFLD characterized by hepatic steatosis with lobular inflammation and hepatocyte ballooning with significant risk of progression to fibrosis, cirrhosis, and hepatocellular carcinoma. NASH affects approximately three to five percent of the general population.

Synonyms:

Noncompetitive Antagonist

A noncompetitive antagonist is a drug that reduces the effect of an agonist by a mechanism that cannot be overcome by increasing the agonist concentration.

Synonyms:

Noncompetitive Inhibition

A type of enzyme inhibition where the inhibitor

binds at a site distinct from the active site (allosteric site), and can bind to both the free enzyme (E) and the enzyme-substrate complex (ES) with equal affinity. The inhibitor does not compete with the substrate and cannot be overcome by increasing substrate concentration.

Synonyms:

Noninvasive Prenatal Testing

A maternal blood test that analyzes cell-free DNA to estimate the chance of selected fetal chromosomal conditions. It is a screening test, not a definitive diagnosis.

Synonyms:

Noninvasive Ventilation

Positive-pressure ventilatory support delivered without an endotracheal tube, commonly by a mask or helmet. CPAP provides continuous positive pressure; bilevel support provides separate inspiratory and expiratory pressures. It is used selectively when the patient can protect the airway and cooperate.

Synonyms:

Nonmelanoma Skin Cancer

A group of skin cancers that arise from the cells of the epidermis, excluding melanoma. The two most common types are basal cell carcinoma (BCC) and squamous cell carcinoma (SCC), which together account for the vast majority of all skin cancers diagnosed globally.

Synonyms:

Nonselective Beta-Blockers

Nonselective beta-adrenergic blocking agents block both beta-1 and beta-2 adrenergic receptors, reducing heart rate, myocardial contractility, and cardiac output through beta-1 blockade, while also blocking beta-2 receptors in the bronchial smooth muscle and peripheral vasculature.

Synonyms:

Nonsense Variant

A sequence variant that creates a premature stop codon, potentially producing a truncated protein

or triggering nonsense-mediated mRNA decay. The effect depends on the gene, location, transcript, and residual protein production.

Synonyms:

Nonspecific Interstitial Pneumonia

A pattern with uniform, temporally homogeneous inflammation and/or fibrosis. Most common ILD associated with connective tissue disease. HRCT shows bilateral ground-glass opacities with subpleural sparing.

Synonyms:

Nonsteroidal Anti-Inflammatory Drug

A medicine that inhibits cyclooxygenase enzymes and reduces prostaglandin production, producing analgesic, anti-inflammatory, and fever-reducing effects. NSAIDs can cause gastrointestinal, kidney, cardiovascular, or other adverse effects.

Synonyms:

Nonsteroidal Anti-inflammatory Drugs

Analgesic and anti-inflammatory drugs that inhibit cyclooxygenase enzymes and prostaglandin synthesis. Perioperative use requires assessment of renal function, gastrointestinal bleeding risk, platelet effects, cardiovascular risk, and surgical bleeding considerations.

Synonyms:

Nontuberculous Mycobacterial Lung Disease

Chronic lung infection caused by environmental Mycobacterium species other than *M. tuberculosis*. It may produce cough, fatigue, weight loss, breathlessness, or coughing blood, especially in people with structural lung disease. Diagnosis requires compatible imaging and repeated microbiologic testing; treatment is prolonged and individualized.

Synonyms:

Nonunion and Malunion

Nonunion is failure of a fractured bone to heal after an adequate period (generally 6-9 months for long bones) without clinical or radiographic evidence

of progression toward union for 3 months. Classification: hypertrophic (viable ends, inadequate stability), atrophic (devitalized ends, poor biology), oligotrophic (intermediate).

Synonyms:

Noonan Syndrome

An inherited disorder of the RAS–MAPK signaling pathway, characterized by distinctive facial features, short stature, congenital heart disease, and variable developmental or bleeding problems.

Synonyms:

Normal Flora

The resident microorganisms (commensals) colonizing body surfaces—skin, oropharynx, gastrointestinal tract, genitourinary tract—without causing disease under normal conditions. They provide protection (colonization resistance, immune priming), synthesis of vitamins, and nutrient metabolism.

Synonyms:

Normal Pressure Hydrocephalus

A disorder of cerebrospinal-fluid circulation causing enlarged ventricles and a clinical pattern that may include gait impairment, cognitive decline, and urinary urgency or incontinence.

Synonyms:

Normalization

Correction for detector efficiency variations. Performed daily with uniform source.

Synonyms:

Normocalcemic Hyperparathyroidism

Condition of elevated parathyroid hormone with persistently normal serum calcium and normal vitamin D levels. Exclusion of secondary causes of elevated PTH including vitamin D deficiency, renal insufficiency, and medications is required. Represents an early or mild form of primary hyperparathyroidism. May progress to overt hypercalcemia.

Synonyms:

Norovirus

A single-stranded RNA virus that is the leading cause of gastroenteritis outbreaks worldwide. The virus is highly contagious and can cause large outbreaks in closed settings including hospitals, cruise ships, and nursing homes. Norovirus causes acute onset of vomiting and diarrhea. Diagnosis is made by PCR or antigen detection in stool.

Synonyms:

Norovirus Infection

A highly contagious viral gastroenteritis causing sudden nausea, vomiting, watery diarrhea, abdominal cramps, and sometimes fever. Illness is usually short but can cause dangerous dehydration, especially in infants, older adults, or medically vulnerable people. Oral rehydration and careful hand hygiene are central to management and prevention.

Synonyms:

Norrie Disease

An X-linked retinal disorder, usually caused by pathogenic variants in NDP, characterized by congenital or early-onset blindness from abnormal retinal development. Hearing loss, developmental differences, and peripheral vascular or vitreoretinal complications may occur.

Synonyms:

Nose

The external nasal structure and nasal cavities, the primary organ of olfaction and the entry to the respiratory tract. External nose: bone (nasal bones, frontal process of maxilla) and cartilage (septal, upper/lower lateral cartilages).

Synonyms:

Nosebleed

Bleeding from the nasal mucosa, also called epistaxis. Most cases arise from the anterior nasal septum and result from local trauma, dryness, inflammation, or vascular disease; persistent or severe bleeding may require medical intervention.

Synonyms: epistaxis.

Nosocomial

Hospital-acquired. Nosocomial infection: infection acquired in hospital.

Synonyms:

Nosocomial Infection

A hospital-acquired infection developing during or after hospitalization that was not present or incubating at admission, classically defined by onset beyond 48 hours. Common sites are bloodstream, urinary tract, lungs, and surgical wounds; causative organisms are frequently multidrug-resistant, prevented by hand hygiene and stewardship.

Synonyms:

Notifiable Disease

Disease required by law to be reported to health authorities. Examples: tuberculosis, measles, HIV, COVID-19.

Synonyms:

NSAIDs

Nonsteroidal anti-inflammatory drugs are a class of drugs that inhibit cyclooxygenase enzymes, COX-1 and COX-2, reducing the synthesis of prostaglandins and thromboxanes from arachidonic acid. They produce analgesic, anti-inflammatory, antipyretic, and antiplatelet effects.

Synonyms:

NSAIDs (Nonsteroidal Anti-Inflammatory Drugs)

A class of analgesic, antipyretic, and anti-inflammatory drugs that inhibit cyclooxygenase (COX-1 and/or COX-2), reducing prostaglandin and thromboxane synthesis.

Synonyms: Nonsteroidal Anti-Inflammatory Drugs

NSTEMI

Non-ST-elevation myocardial infarction: acute myocardial necrosis (elevated cardiac troponin) without persistent ST-segment elevation on ECG, caused by subtotal occlusion or distal embolization of a coronary artery. Features: chest pain, ECG changes (ST

depression, T-wave inversion), elevated troponin.

Synonyms:

Nuchal Translucency Screening

An ultrasound measurement of the fluid-filled space at the posterior fetal nuchal region, performed at 11-14 weeks (crown-rump length 45-84 mm). Increased NT (>95th percentile or >3.0-3.5 mm) is associated with trisomies 21, 18, 13, Turner syndrome, and cardiac defects.

Synonyms:

Nuclear Medicine

A medical specialty that uses small amounts of radioactive substances (radiotracers) to diagnose, stage, and treat various diseases, including cancer and heart disease.

Synonyms:

Nuclear Medicine Documentation

Record keeping for radioactive materials, including inventory, disposal, administered activity, and patient release.

Synonyms:

Nuclear Medicine Reporting

Structured interpretation of nuclear medicine studies using standardized terminology and clinically relevant findings.

Synonyms:

Nuclear Medicine Resolution

Ability of a PET or SPECT system to distinguish small details, limited by factors such as positron range, non-collinearity, and detector geometry.

Synonyms:

Nuclear Sclerosis

A common age-related cataract in which the central lens becomes increasingly yellow and hard. It can gradually reduce vision, alter color perception, and sometimes temporarily improve near vision.

Synonyms:

Nuclear Stress Test

Myocardial perfusion imaging during stress. Detects coronary artery disease.

Synonyms:

Nucleoside Analogs

A class of antiviral drugs that structurally resemble natural nucleosides and inhibit viral replication by interfering with DNA or RNA synthesis.

Synonyms:

Nucleus

The membrane-bound organelle containing the genetic material (DNA) in eukaryotic cells. Surrounded by the nuclear envelope (double membrane with nuclear pores for transport). Contains chromatin (DNA + histone proteins), nucleolus (ribosome biogenesis), and nuclear matrix.

Synonyms:

Number Needed to Harm

The number of people exposed to an intervention for one additional person to experience a specified adverse outcome compared with the control over a defined time. It is the reciprocal of absolute risk increase.

Synonyms:

Number Needed to Treat

The number of people who must receive an intervention for one additional person to experience the specified beneficial outcome compared with the control over a defined time. It is the reciprocal of absolute risk reduction.

Synonyms:

Numbness and Tingling

Abnormal sensations, also called paresthesias, that may result from nerve compression, peripheral neuropathy, spinal disease, vitamin deficiency, vascular problems, or neurologic disorders. Sudden one-sided symptoms require urgent evaluation for stroke.

Synonyms: paresthesias, that may result from nerve compression,.

Nummular eczema

A chronic inflammatory dermatosis presenting as coin-shaped, well-demarcated, erythematous, vesicular, or crusted plaques, typically on the extremities. The lesions are intensely pruritic and may be triggered by dry skin, skin trauma, or allergic contact dermatitis. It is more common in adults with atopic predisposition.

Synonyms:

Nursing

A health profession focused on assessing patients, providing care, supporting recovery, preventing illness, and educating patients and families.

Synonyms:

Nursing Home

A residential facility that provides ongoing nursing care, assistance with daily activities, and medical or rehabilitation services for people who cannot live independently.

Synonyms:

Nutcracker esophagus

Esophageal motility disorder characterized by high-amplitude peristaltic contractions exceeding 180 mmHg in the distal esophagus on manometry, with preserved peristaltic coordination. Presents with intermittent chest pain and dysphagia to solids and liquids.

Synonyms:

Nutcracker Syndrome

Compression of left renal vein between aorta and SMA causing hematuria and flank pain. Managed conservatively. Stenting or surgery for severe cases.

Synonyms:

Nutrient Density

Amount of nutrients per calorie. Whole foods more nutrient-dense than processed foods. Importance for weight management, health.

Synonyms:

Nutrition

The intake and use of food and nutrients needed for energy, growth, tissue maintenance, and health.

Synonyms:

Nutrition (Geriatric)

Nutritional assessment and intervention in elderly. Risks: malnutrition (undernutrition, obesity), micronutrient deficiencies (vitamin D, B12, calcium), dehydration. Assessment: weight, BMI, dietary intake, lab values. Interventions: supplementation, meal delivery, appetite stimulants, feeding assistance.

Synonyms: Geriatric

Nutrition (Oncology)

Nutritional care for people with cancer, addressing intake, symptoms, treatment effects, weight, muscle mass, and personal goals.

Synonyms: Oncology

Nutrition Education

Teaching patients about healthy eating. Cultural sensitivity, health literacy appropriate. Motivational interviewing effective.

Synonyms:

Nutrition in Pregnancy

A balanced diet providing adequate calories, protein, vitamins, and minerals to support maternal and fetal health. Additional caloric needs: 300 kcal/day in the second and third trimesters. Key nutrients: folic acid (400 mcg/day), iron (27 mg/day), calcium (1000 mg/day), vitamin D (600 IU/day), iodine (220 mcg/day), DHA (200-300 mg/day).

Synonyms:

Nutrition Risk Screening 2002

A validated screening tool for hospitalized adults that considers nutritional status and disease severity to identify patients likely to benefit from nutrition support. Screening is not itself a complete malnutrition diagnosis.

Synonyms:

Nutrition-Focused Physical Examination

A structured examination for physical findings associated with malnutrition, including loss of subcutaneous fat, muscle wasting, edema, ascites, reduced functional status, and micronutrient-related signs. It complements dietary history, anthropometry, laboratory data, and disease assessment.

Synonyms:

Nutritional Assessment

Comprehensive evaluation: dietary intake, anthropometrics, biochemical tests, clinical examination. Dietitian involvement essential.

Synonyms:

Nutritional Dermatoses

Nutritional deficiencies cause distinctive skin findings. Vitamin C deficiency (scurvy): perifollicular hemorrhage, corkscrew hairs, gingival bleeding. Niacin deficiency (pellagra): photosensitive dermatitis in sun-exposed areas, diarrhea, dementia.

Synonyms:

Nutritional Screening

Rapid assessment for malnutrition risk. Tools: MST, MNA, MUST. Screening all elderly patients recommended. Identifies need for comprehensive assessment.

Synonyms:

Nyctalopia

Difficulty seeing in dim light or darkness. See Night Blindness.

Synonyms:

NYHA Functional Classification

A four-class system grading heart failure severity based on symptoms and exercise tolerance. Class I: no limitation of physical activity. Class II: slight limitation; comfortable at rest but ordinary activity causes symptoms. Class III: marked limitation; comfortable at rest but less than ordinary activity causes symptoms.

Synonyms:

Nystagmus

A rhythmic, involuntary oscillation of the eyes that can be horizontal, vertical, rotational, or mixed in pattern, and it is classified based on the underlying cause as infantile (developing in the first six months of life), acquired (developing later in life), or periodic alternating.

Synonyms:

Nephritis

Inflammation of kidney tissue.

Synonyms:

Nerve Block

Injection of medicine near a nerve or nerve group to reduce pain or interrupt nerve signals.

Synonyms:

Nitric Oxide

A signaling molecule that relaxes blood-vessel muscle and promotes vasodilation.

Synonyms:

Nociceptors

Sensory nerve endings that detect potentially tissue-damaging stimuli and transmit pain signals.

Synonyms:

Nonketotic Hyperglycemic Hyperosmolar Syndrome

A severe complication of diabetes marked by very high blood glucose, dehydration, and increased blood osmolality, usually without substantial ketoacidosis.

Synonyms:

Normal-Pressure Hydrocephalus

A disorder in which cerebrospinal fluid accumulates and causes gait difficulty, cognitive decline, and urinary problems despite near-normal measured pressure.

Synonyms:

Nucleus Accumbens

A brain region involved in reward, motivation, and reinforcement.

Synonyms:

Nephrosclerosis

Hardening and scarring of the kidneys caused by chronic vascular injury, often related to hypertension.

Synonyms:

Nocardia Infection

An infection caused by Nocardia bacteria, often affecting the lungs, skin, or brain.

Synonyms:

Noma

A rapidly progressive destructive infection of the mouth and face, usually associated with severe malnutrition and poor health conditions.

Synonyms:

Non-Hodgkin's Lymphoma

A group of cancers arising from lymphocytes outside the Hodgkin lymphoma category.

Synonyms:

Non-Infectious Cystitis

Inflammation of the bladder that is not caused by an infectious organism.

Synonyms:

Nickel Allergy

An allergic skin reaction caused by contact with nickel-containing materials.

Synonyms:

Nightmare Disorder

Repeated disturbing dreams that cause significant distress or interfere with sleep and daytime function.

Synonyms:

Nonallergic Rhinitis

Nasal congestion, sneezing, or runny nose caused by

irritants or other triggers rather than an allergy.

Synonyms:

Neuroglia

Supporting cells of the nervous system that nourish, protect, and maintain neurons.

Synonyms:

Neutrophils

The most abundant type of white blood cell. Neutrophils rapidly migrate to sites of infection or injury and ingest microorganisms and cellular debris.

Synonyms:

Non-Rapid Eye Movement Sleep

Sleep consisting of stages N1, N2, and N3, with progressively deeper sleep and reduced responsiveness to the environment.

Synonyms:

Normal Saline

A sterile 0.9% sodium-chloride solution used as an intravenous fluid, for irrigation, and to dilute or deliver medications.

Synonyms:

Nucleus Pulposus

The soft, gel-like central portion of an intervertebral disk, surrounded by the annulus fibrosus.

Synonyms:

Nutritional Anemia

Anemia caused by inadequate intake, absorption, or use of nutrients needed for red-cell production, especially iron, vitamin B12, or folate.

Synonyms:

Nondisjunction

Failure of homologous chromosomes or sister chromatids to separate properly during cell division, producing cells with abnormal chromosome numbers.

Synonyms:

Nontuberculous Mycobacterial Infection

Infection caused by Mycobacterium species other than *M. tuberculosis*, often affecting the lungs but sometimes the lymph nodes, skin, or other organs. Disease is more likely in people with structural lung disease or impaired immunity.

Synonyms:

Nuchal Rigidity

Abnormal stiffness and resistance to passive flexion of the neck, classically associated with irritation or inflammation of the meninges, including meningitis or subarachnoid hemorrhage.

Synonyms:

Nasal Septum Perforation

A hole through the cartilage or bone separating the nasal passages, which may cause crusting, nosebleeds, whistling, or obstruction and can result from trauma, surgery, intranasal drugs, or inflammatory disease.

Synonyms:

Neurogenic Orthostatic Hypotension

A fall in blood pressure on standing caused by failure of the autonomic nervous system to produce an adequate vasoconstrictor response. It may cause dizziness, fainting, or falls.

Synonyms:

Nephroptosis (Floating Kidney)

Abnormal downward movement of a kidney when a person stands, sometimes causing flank discomfort, urinary symptoms, or intermittent obstruction.

Synonyms: Floating Kidney

Nephrosis

A non-inflammatory disorder of the kidney, classically associated with heavy protein loss in the urine and the changes of nephrotic syndrome.

Synonyms:

Nephrotoxic

Describing a substance or condition capable of damaging the kidneys or impairing their function.

Synonyms:

Nerve Deafness (Sensorineural Deafness)

Hearing loss caused by damage to the cochlea, auditory nerve, or central auditory pathways rather than blockage of sound transmission through the outer or middle ear.

Synonyms: Sensorineural Deafness

Nerve Growth Factor

A protein that supports the development, survival, and maintenance of certain sensory and sympathetic nerve cells.

Synonyms:

Nerve Injury

Damage to a peripheral or central nerve that may cause pain, numbness, altered sensation, weakness, or loss of autonomic function.

Synonyms:

Nervous System

The body-wide system consisting of the brain, spinal cord, and peripheral nerves that receives information, processes it, and coordinates movement, sensation, and internal functions.

Synonyms:

Neuritis

Inflammation or irritation of a nerve, often causing pain, altered sensation, or weakness.

Synonyms:

Neuroanatomy

The study of the structure and organization of the nervous system.

Synonyms:

Neuroendocrinology

The study of interactions between the nervous system and the endocrine system, including how the brain regulates hormone release.

Synonyms:

Niacin (Nicotinic Acid, Vitamin B3)

A water-soluble vitamin required for cellular energy metabolism; severe deficiency causes pellagra, with dermatitis, diarrhoea, and cognitive changes.

Synonyms: Nicotinic Acid, Vitamin B3

Nipple

The projection at the centre of the breast through which milk is released from the mammary ducts; it contains smooth muscle and sensory nerve endings.

Synonyms:

Nipple Discharge

Fluid released from a nipple outside normal breast-feeding; it may be physiological or associated with infection, duct disease, hormonal disturbance, or breast cancer.

Synonyms:

Nipple Inversion or Retraction

Inward turning or pulling-in of the nipple. It may be longstanding and benign, but new unilateral inversion or retraction requires assessment for duct disease or breast cancer.

Synonyms:

Nocturnal Enuresis (Bed-Wetting)

Repeated involuntary urination during sleep in a child old enough to have achieved bladder control.

Synonyms: Bed-Wetting

Nocturnal Emission

Involuntary ejaculation during sleep, sometimes called a wet dream. It is a common and normal event during male puberty and adolescence.

Synonyms:

Nocturnal Lagophthalmos

Incomplete closure of the eyelids during sleep, which may cause dryness, irritation, and exposure injury to the cornea.

Synonyms:

Normocytic Anaemia

Anaemia in which the red blood cells are of approximately normal size, occurring in conditions such as chronic disease, acute blood loss, or haemolysis.

Synonyms:

Nummular Eczema

An inflammatory skin disorder producing itchy, coin-shaped patches, commonly on the limbs or trunk.

Synonyms:

Night Terrors

Episodes of abrupt partial awakening from deep non-REM sleep with intense fear, screaming, autonomic arousal, and limited recall afterward, occurring most often in children.

Synonyms:

Nonconvulsive Status Epilepticus

Ongoing seizure activity without prominent rhythmic limb jerking, often presenting as prolonged confusion, impaired awareness, or subtle twitching and requiring electroencephalographic confirmation and urgent treatment.

Synonyms:

Nonunion Fracture

Failure of a broken bone to heal within the expected time and without progressive healing, often causing persistent pain, instability, or deformity.

Synonyms:

Nasal Vestibulitis

Inflammation or infection of the nasal vestibule, commonly caused by *Staphylococcus* bacteria and producing tenderness, crusting, redness, or small pustules near the nostrils.

Synonyms:

Necrotizing Pneumonia

Severe pneumonia in which infection causes necrosis and cavitation of lung tissue, often accompanied by sepsis, respiratory failure, or abscess formation.

Synonyms:

Nonspecific Interstitial Pneumonitis

An interstitial lung disease characterized by relatively uniform inflammation and fibrosis of the lung interstitium, often associated with connective-tissue disease, medications, or an unknown cause.

Synonyms:

Nuchal Cord

Wrapping of the umbilical cord around the fetal neck, occurring once or more times. It is common and often harmless, but monitoring during labor is needed if fetal heart-rate abnormalities occur.

Synonyms:

O

Obesity

Abnormal or excessive fat accumulation that presents a health risk. Defined by BMI: $\geq 30 \text{ kg/m}^2$ (class I: 30-34.9, class II: 35-39.9, class III: ≥ 40). Major risk factor for type 2 diabetes, hypertension, cardiovascular disease, sleep apnea, osteoarthritis, certain cancers, and reduced life expectancy.

Synonyms:

Object of Addiction

A substance or rewarding behavior to which a person develops a harmful compulsive relationship. **Synonyms:**

Occult

Hidden or not visible without microscopy or laboratory testing. **Synonyms:**

Omega-3 Fatty Acids

Polyunsaturated fats found especially in fatty fish and some plant foods. **Synonyms:** n-3 fatty acids

Omega-6 Fatty Acids

Essential polyunsaturated fats found in many plant oils and foods. **Synonyms:** n-6 fatty acids

Ondine's Curse

A rare disorder of automatic breathing in which ventilation may fail during sleep. **Synonyms:** Congenital central hypoventilation syndrome

Ophthalmologist

A medical doctor specializing in diseases and surgery of the eyes. **Synonyms:**

Opioid

A natural or synthetic substance that acts on opioid receptors to relieve pain and may cause sedation or dependence. **Synonyms:**

Optician

A technician who fits and dispenses eyeglasses or contact lenses. **Synonyms:**

Optimism

A tendency to expect favorable outcomes or interpret events positively. **Synonyms:**

Orthopedist

A physician specializing in disorders and injuries of bones, joints, muscles, and related tissues. **Synonyms:** Orthopedic surgeon

Osteoblasts

Cells that form new bone. **Synonyms:**

Osteoclasts

Cells that break down and resorb bone tissue. **Synonyms:**

Osteocytes

Mature bone cells embedded within bone tissue that help maintain it. **Synonyms:**

Osteons

Cylindrical structural units of compact bone arranged around central canals. **Synonyms:** Haversian systems

Osteopath

A physician trained in medicine and surgery who earns a Doctor of Osteopathic Medicine degree. **Synonyms:** DO

Outpatient

A person receiving medical care without being admitted overnight. **Synonyms:**

Output

The maximum sound level a hearing aid can produce. **Synonyms:**

Overweight

Body weight above the healthy range, commonly defined in adults as a BMI of 25 to 29.9. **Synonyms:**

Oxidant

A reactive molecule that can damage cells and tissues by promoting oxidation. **Synonyms:** Oxidizing agent

Oxidation

A chemical process that changes a substance through loss of electrons or reaction with oxygen. **Synonyms:**

Oxygenated Blood

Blood that has acquired oxygen in the lungs and carries it to body tissues. **Synonyms:**

Adolescent Obesity

Obesity during adolescence, assessed using age- and sex-specific growth charts rather than adult BMI thresholds alone. It may affect metabolic, cardiovascular, orthopedic, and psychological health.

Synonyms:

Obesity Hypoventilation Syndrome

Chronic daytime hypercapnia in obese individuals without other causes. Reduced chest wall compliance and blunted respiratory drive. Often coexists with OSA. Treatment: weight loss and BiPAP.

Synonyms:

Obex Region

The caudal tip of the fourth ventricle where it narrows into the central canal of the spinal cord. It lies near the dorsal medulla and is an important anatomical landmark in the floor of the ventricular system.

Synonyms:

Objective Response Rate

The proportion of patients whose tumor shrinks by a predefined amount (complete or partial response) during treatment; a common efficacy endpoint in oncology trials.

Synonyms:

Oblique Plane

A plane that passes through the body or an organ at an angle other than a right angle (diagonal plane).

Synonyms:

Obsessions

Recurrent, persistent, intrusive, and unwanted thoughts, urges, or images that are experienced as intrusive and cause marked anxiety or distress. Common obsessions include contamination fears, fears of harming oneself or others, need for symmetry, taboo thoughts (sexual, religious, or aggressive), and doubt.

Synonyms:

Obsessive-Compulsive Disorder

Characterized by the presence of obsessions, compulsions, or both. Obsessions are recurrent, persistent, intrusive, and unwanted thoughts, urges, or images that cause marked anxiety or distress. The individual attempts to ignore or suppress them or neutralize them with some other thought or action.

Synonyms:

Obsessive-Compulsive Personality Disorder

A pattern of preoccupation with orderliness, perfectionism, and mental and interpersonal control, at the expense of flexibility and efficiency.

Synonyms:

Obstetric Anal Sphincter Injury

A third- or fourth-degree perineal tear involving the anal sphincter complex during childbirth. It requires accurate examination, repair, follow-up, and assessment for bowel or continence problems.

Synonyms:

Obstetric Ultrasound

Ultrasound imaging during pregnancy. First trimester: dating, viability. Second trimester: anatomy survey. Third trimester: growth, position.

Synonyms:

Obstetrician

A medical doctor who specializes in the care of women during pregnancy, labor, and the postpartum period (obstetrics). Obstetricians manage normal and high-risk pregnancies, perform cesarean deliveries and assisted vaginal deliveries, and treat pregnancy complications (pre-eclampsia, gestational diabetes, hemorrhage, preterm labor).

Synonyms:

Obstetrics

The branch of medicine and surgery concerned with the care of women during pregnancy, childbirth, and the postpartum period.

Synonyms:

Obstructed Infected Urinary System

Urinary tract obstruction accompanied by infection, pyonephrosis, or sepsis. It is a urologic emergency requiring immediate resuscitation, antimicrobial therapy, and urgent decompression by nephrostomy or ureteral stent.

Synonyms:

Obstruction

Blockage of urinary flow. Ureteral, urethral, bladder outlet. Causes: stones, stricture, tumor, BPH. Complications: hydronephrosis, infection, renal failure.

Synonyms:

Obstructive Jaundice

Jaundice caused by obstruction of bile flow from the liver to the duodenum, resulting in accumulation of conjugated bilirubin in the blood. See Jaundice for complete overview.

Synonyms:

Obstructive Nephropathy

Kidney damage caused by blockage of urine flow anywhere from the kidney to the urethra. Causes include stones, tumors, strictures, enlarged prostate, and congenital abnormalities; untreated obstruction can lead to hydronephrosis, infection, and kidney failure.

Synonyms:

Obstructive parotitis

Inflammation of the parotid gland resulting from obstruction of the parotid duct, most commonly by sialolithiasis, presenting with painful glandular swelling that worsens with meals. The obstruction leads to stasis, secondary bacterial infection, and recurrent episodes of swelling and tenderness.

Synonyms:

Obstructive Shock

A form of shock caused by physical obstruction of blood flow outside the heart, reducing cardiac output despite normal cardiac function.

Synonyms:

Obstructive Sleep Apnea

Recurrent partial or complete upper-airway collapse during sleep, causing disrupted breathing and often daytime symptoms. Evaluation may include sleep testing; treatment is individualized and can include positive-airway-pressure therapy, weight management, oral appliances, positional therapy, or surgery.

Synonyms:

Obstructive Uropathy

Urinary tract obstruction at any level from the renal pelvis to the urethra, leading to impaired urine flow and potential renal damage. Causes include nephrolithiasis, benign prostatic hyperplasia,

ureteral strictures, tumors of the bladder, prostate, or cervix, and external compression from lymphadenopathy or retroperitoneal fibrosis.

Synonyms:

Obturator

A structure that occludes an opening. In anatomy, the obturator foramen is a large opening in the pelvic bone, closed by the obturator membrane. The obturator nerve (L2–L4) innervates the adductor muscles of the thigh and provides sensory innervation to the medial thigh. The obturator artery supplies the adductor compartment.

Synonyms:

Obturator hernia

Herniation of abdominal contents through the obturator canal, most commonly occurring in thin elderly women with a history of multiple pregnancies. It is a rare cause of small bowel obstruction and may present with the Howship-Romberg sign of medial thigh pain from obturator nerve compression.

Synonyms:

Obtuse Marginal Artery

A branch of the circumflex coronary artery that runs along the obtuse margin of the heart and supplies the lateral wall of the left ventricle. Its size and number vary with coronary anatomy.

Synonyms:

Occipital Bone

Forms the posterior-inferior cranium surrounding the foramen magnum (spinal cord passage). Has basilar, lateral, and squamous parts. Occipital condyles articulate with C1 for nodding movement. The external occipital protuberance provides muscle attachment.

Synonyms:

Occipital Lobe

The most posterior of the four cerebral lobes, located behind the parieto-occipital sulcus and above the tentorium cerebelli. The occipital lobe is the primary visual processing center of the brain.

Synonyms:

Occipital Neuralgia

A paroxysmal, severe, stabbing or electric shock-like pain in the distribution of the greater, lesser, or third occipital nerves (posterior scalp, from the nuchal line to the vertex).

Synonyms:

Occiput Posterior Position

A fetal head position in which the occiput faces the maternal sacrum. It may cause back pain or slow labor, although the fetus may rotate during labor.

Synonyms:

Occiput Transverse Position

The fetal head presenting with the sagittal suture oriented transversely. Usually the normal descent position; most rotate to OA with contractions. When persistent, it can cause protracted descent and prolonged second stage.

Synonyms:

Occlusal Guard

Appliance protecting teeth from attrition. Night guard for bruxism. Sports mouthguard.

Synonyms:

Occlusion

Complete blockage of vessel. May be natural (thrombosis) or iatrogenic (embolization).

Synonyms:

Occult Blood

Blood that is not visible to the naked eye and is detected by chemical or immunochemical testing. Fecal occult-blood tests may be used in colorectal-cancer screening; the test type and collection instructions determine whether dietary or medicine restrictions apply.

Synonyms:

Occult Gastrointestinal Bleeding

Chronic or intermittent gastrointestinal blood loss that is not visible to the patient and may not

produce melaena or haematochezia. It commonly presents with iron-deficiency anaemia or a positive faecal blood test.

Synonyms:

Occupational Asthma

Asthma from workplace exposures to sensitizers (isocyanates, flour, latex) or irritants. Improves away from work and worsens at work. Serial peak flow monitoring supports diagnosis.

Synonyms:

Occupational COPD

Chronic obstructive pulmonary disease associated with workplace exposure to dust, chemicals, fumes, or other inhaled hazards. Symptoms and risk depend on the exposure and other factors, including smoking.

Synonyms:

Occupational Dermatoses

Work-related skin diseases. Occupational contact dermatitis accounts for 90 percent of occupational skin diseases. Irritant contact dermatitis is more common (hands, wet work) than allergic contact dermatitis. Occupations at risk include healthcare workers, hairdressers, construction workers, food handlers, and metalworkers.

Synonyms:

Occupational Exposure

Radiation exposure to nuclear medicine staff. Monitored with dosimeters. Limits: 50 mSv/year whole body, 150 mSv/year lens, 500 mSv/year extremities.

Synonyms:

Occupational Exposure Limit

A regulatory or advisory concentration or dose limit intended to reduce worker exposure to a hazardous substance over a defined averaging period. Limits vary by substance, jurisdiction, route, and whether the value is a ceiling, short-term limit, or time-weighted average.

Synonyms:

Occupational Health

Health of workers. Examples: workplace safety, occupational diseases, ergonomics.

Synonyms:

Occupational Hearing Loss

Permanent sensorineural hearing impairment caused by repeated or prolonged exposure to workplace noise or ototoxic hazards. Prevention depends on reducing exposure and using effective hearing protection.

Synonyms:

Occupational Medicine

The medical specialty concerned with the effects of work on health, prevention of work-related illness and injury, and safe return to work.

Synonyms:

Occupational Rehabilitation

Services that help a person regain or adapt the skills needed for work after illness, injury, or disability.

Synonyms:

Occupational Therapy

OT helps patients perform daily activities (ADLs, IADLs) through therapeutic activities, adaptive equipment, environmental modification. Focus on upper extremity function, cognition, sensory integration.

Synonyms:

Occupational Therapy Assessment

Evaluation of a person's ability to perform daily activities, work, and other meaningful occupations, including factors affecting performance and the need for adaptive strategies or equipment.

Synonyms:

OCD

Obsessive-compulsive disorder, a condition involving recurrent unwanted thoughts or urges and/or repetitive behaviors or mental acts that cause distress or interfere with daily life.

Synonyms:

Ochronosis

A blue-black or brownish pigmentation of connective tissues (cartilage, skin, sclerae, tendons) caused by accumulation of homogentisic acid and its oxidation products.

Synonyms:

Octreoscan

Nuclear medicine imaging using In-111 octreotide. Detects neuroendocrine tumors.

Synonyms:

Ocular Histoplasmosis Syndrome

Ocular disease following prior subclinical Histoplasma capsulatum infection, characterized by punched-out peripheral chorioretinal scars, peripapillary atrophy, and choroidal neovascularization that causes central vision loss. Active choroidal neovascularization is treated with anti-VEGF therapy.

Synonyms:

Ocular Hypertension

Persistently elevated intraocular pressure without demonstrable glaucomatous optic-nerve damage or corresponding visual-field loss. It increases future glaucoma risk and requires individualized assessment of corneal thickness, optic-nerve appearance, pressure, and other risk factors.

Synonyms:

Ocular myiasis

Infestation of the eye or ocular adnexa by fly larvae, which may involve the conjunctiva, cornea, or intraocular structures, presenting with pain, irritation, tearing, and visual disturbance. In severe cases, larvae can penetrate the globe causing endophthalmitis and blindness.

Synonyms:

Ocular Pain

Pain in or around the eye caused by surface irritation, infection, inflammation, trauma, glaucoma, or orbital disease. Severe pain with vision loss, light sensitivity, nausea, or injury requires urgent ophthalmic assessment.

Synonyms:

Ocular Surface Disease

A group of disorders affecting the cornea, conjunctiva, eyelids, and tear film, including dry eye, blepharitis, meibomian-gland dysfunction, and exposure-related disease. Symptoms and signs reflect tear-film instability, inflammation, epithelial injury, or abnormal lid function.

Synonyms:

Oculocerebrorenal Syndrome

An inherited peroxisomal disorder, also called Zellweger spectrum disorder, affecting the brain, eyes, kidneys, liver, and other organs. Severe forms present neonatally with hypotonia, seizures, feeding difficulty, distinctive facial features, and profound developmental impairment.

Synonyms: Zellweger spectrum disorder, affecting.

Odds Ratio

Ratio of odds of exposure in cases vs. controls. Used in case-control studies. OR approximates RR for rare diseases.

Synonyms:

Odontogenic cutaneous fistula

An abnormal tract connecting the skin surface to a periapical dental infection, typically presenting as a draining sinus tract on the chin, cheek, or submandibular region. It results from chronic dental infection eroding through the bone and soft tissue to the skin surface.

Synonyms:

Odontogenic Keratocyst

Aggressive cyst with high recurrence. Associated with nevoid basal cell carcinoma syndrome (Gorlin syndrome). Treatment: enucleation, resection, or decompression.

Synonyms:

Odontoid Process

A tooth-like projection superiorly from the body of the axis (C2 vertebra). The odontoid process

projects into the atlas (C1) and is held in place by the transverse ligament of the atlas, allowing rotation of the head (the atlantoaxial joint accounts for 50% of cervical rotation).

Synonyms:

Odontoma

Hamartomatous dental tissue mass. Compound (multiple tooth-like structures) or complex (amorphous calcified mass). Treatment: surgical removal.

Synonyms:

Odor Threshold

Lowest concentration detectable by smell. Important for warning properties of toxins.

Synonyms:

Odynophagia

Painful swallowing, characterized by a burning, squeezing, or sticking sensation behind the sternum during deglutition. Strongly suggests mucosal inflammation or ulceration of the esophagus.

Synonyms:

Oesophageal Ulcer

A mucosal ulceration of the oesophagus caused by gastro-oesophageal reflux, infection, medication or corrosive injury, inflammatory disease, or malignancy. It may cause odynophagia, dysphagia, chest pain, haematemesis, or melaena.

Synonyms:

Oesophageal Varices

Enlarged veins in the esophagus, usually caused by portal hypertension. They can rupture and cause life-threatening bleeding.

Synonyms:

Oesophagitis

Inflammation of the oesophageal mucosa. Common causes include gastro-oesophageal reflux, infection in immunocompromised patients, medication-related injury, eosinophilic inflammation, radiation, and caustic ingestion. Symptoms include heartburn, odynophagia, dysphagia, and chest pain.

Synonyms:

Oestrogen

The primary female sex hormone, produced mainly by the ovaries (granulosa cells of developing follicles) and in smaller amounts by adipose tissue, the adrenal glands, and the placenta during pregnancy.

Synonyms:

Oestrogen Replacement Therapy

The administration of exogenous estrogen (with or without progestogen) to relieve symptoms of estrogen deficiency and prevent long-term health consequences in postmenopausal women. See Hormone Replacement Therapy (HRT).

Synonyms:

Off-Label Use

The use of a licensed medication for an indication, dose, route, or patient population not included in its marketing authorisation (product licence).

Synonyms:

Ogilvie Syndrome

Acute colonic pseudo-obstruction characterized by massive colonic dilation in the absence of mechanical obstruction typically occurring in hospitalized patients with serious comorbidities including post-surgical states, severe infections, and medication effects.

Synonyms:

Ogilvie's syndrome

Acute colonic pseudo-obstruction characterized by massive dilation of the colon, particularly the cecum and right colon, without mechanical obstruction. It occurs in hospitalized patients with serious medical or surgical conditions, often postoperatively, and results from autonomic nervous system imbalance.

Synonyms:

Ointment

A semi-solid, greasy topical preparation for application to the skin, mucous membranes, or eyes. Ointments are typically composed of a hydrophobic

base (petrolatum, lanolin, paraffin, beeswax, vegetable oils) and may contain dissolved or suspended active pharmaceutical ingredients.

Synonyms:

Okihiro Syndrome

A congenital disorder, usually caused by pathogenic variants in *SALL4*, combining radial-ray limb abnormalities with Duane retraction anomaly or other eye-movement defects. Hearing, cardiac, renal, and vertebral anomalies may also occur.

Synonyms:

Oleothorax

Historical surgical obliteration of the pleural space using infused oil to collapse the lung, once used for tuberculosis treatment before effective chemotherapy, now largely obsolete.

Synonyms:

Olfactory Nerve

Cranial nerve I (CN I), responsible for the sense of smell. Olfactory receptor neurons in the olfactory epithelium of the nasal roof project axons through the cribriform plate of the ethmoid bone to the olfactory bulb, then via the olfactory tract to the primary olfactory cortex (piriform cortex, amygdala, entorhinal cortex).

Synonyms:

Oligoclonal Bands

Immunoglobulin G (IgG) proteins produced by a limited number of B-cell clones in the cerebrospinal fluid (CSF), detected by isoelectric focusing of CSF and serum samples.

Synonyms:

Oligodendroglioma

A slow-growing glioma arising from oligodendrocytes, most often in the cerebral hemispheres. Associated with IDH mutation and 1p/19q codeletion, which confer a better prognosis and chemosensitivity.

Synonyms:

Oligohydramnios

Insufficient amniotic fluid volume, defined as amniotic fluid index less than 5 cm or single deepest pocket less than 2 cm. Causes include fetal renal anomalies, post-term pregnancy, premature rupture of membranes, maternal dehydration, and placental insufficiency.

Synonyms:

Oligometastasis

A limited number of metastatic deposits, often defined as up to five, amenable to aggressive local treatment (surgery, stereotactic radiation, or ablation) with the potential for prolonged control.

Synonyms:

Oliguria

Reduced urine output, defined as <400 mL/day or <0.5 mL/kg/hour in adults. Oliguria is an important sign of acute kidney injury (AKI) and prerenal azotaemia.

Synonyms:

Olive Pontocerebellar Atrophy

A group of neurodegenerative disorders characterized by progressive loss of neurons in the inferior olives, pons, and cerebellum. They cause worsening ataxia, dysarthria, incoordination, and sometimes pyramidal, autonomic, or cognitive features.

Synonyms:

Omega-3

Polyunsaturated fatty acids (EPA, DHA, ALA). Anti-inflammatory, cardiovascular benefits. Sources: fatty fish, flaxseed, walnuts. Supplementation common.

Synonyms:

Omega-6

Polyunsaturated fatty acids (linoleic acid). Pro-inflammatory in excess. Balance with omega-3 important. Sources: vegetable oils, nuts, seeds.

Synonyms:

Omenn Syndrome

A severe combined immunodeficiency caused by hypomorphic defects affecting lymphocyte-receptor gene rearrangement or related pathways. It presents in infancy with erythroderma, lymphadenopathy, hepatosplenomegaly, diarrhea, failure to thrive, and recurrent or opportunistic infections.

Synonyms:

Omentectomy

Removal of part or all of the greater omentum, commonly performed during staging and cytoreduction for ovarian and other intra-abdominal cancers.

Synonyms:

Omentum

A double layer of peritoneum connecting the stomach to other abdominal organs. The greater omentum (gastrocolic omentum) hangs from the greater curvature of the stomach, covers the transverse colon and small intestine, and is rich in fat and immune cells (milky spots—aggregates of macrophages and lymphocytes).

Synonyms:

Omphalitis

Infection of the umbilical stump in neonates, typically occurring within the first 1–2 weeks of life. Omphalitis is a potentially serious condition requiring prompt treatment due to the risk of spread to the liver (portal vein thrombosis, portal hypertension) and peritoneum via the umbilical vessels.

Synonyms:

Omphalocele

A congenital abdominal wall defect where abdominal organs herniate into the base of the umbilical cord, covered by a peritoneal-amniotic membrane. Associated with chromosomal abnormalities (trisomies 13, 18) and other anomalies. Differentiated from gastroschisis by membrane coverage and midline location.

Synonyms:

Onchocerca volvulus

A filarial nematode that causes onchocerciasis (river blindness), transmitted by repeated bites of infected blackflies (*Simulium* species) breeding near fast-flowing rivers. Adult worms reside in subcutaneous nodules (onchocercomata), where they can survive for years, producing microfilariae that migrate through the skin and eyes.

Synonyms:

Onchocerciasis

A parasitic disease caused by the filarial nematode *Onchocerca volvulus*, transmitted by repeated bites of infected blackflies (*Simulium* species) breeding near fast-flowing rivers. Adult worms form subcutaneous nodules (onchocercomata).

Synonyms:

Oncocytoma

A usually benign epithelial tumor, commonly arising in the kidney and composed of cells with abundant eosinophilic mitochondria-rich cytoplasm.

Synonyms:

Oncogene

A gene that, when activated, overexpressed, or altered, can promote uncontrolled cell proliferation or survival. Oncogenes commonly arise from normal proto-oncogenes through mutation, amplification, translocation, or abnormal regulation.

Synonyms:

Oncogenic

Capable of promoting the development of cancer.

Synonyms:

Oncologic Emergency

A cancer-related condition that threatens life, organ function, or neurologic integrity and requires urgent treatment. Examples include malignant spinal-cord compression, superior vena cava syndrome, tumor lysis syndrome, hypercalcemia, airway obstruction, and febrile neutropenia.

Synonyms:

Oncologist

A physician who specializes in the diagnosis and treatment of cancer. Includes medical oncologists (systemic therapy), radiation oncologists (radiotherapy), and surgical oncologists (operative management).

Synonyms:

Oncology PET

PET, often combined with CT, used in selected cancers to assess disease distribution, treatment response, or recurrence.

Synonyms:

Oncology Rehabilitation

Cancer rehabilitation: fatigue, pain, neuropathy, lymphedema, functional impairment. Pre- and post-treatment support.

Synonyms:

Oncolytic Virus

A genetically modified virus that selectively replicates in and destroys cancer cells while sparing normal tissue, e.g., talimogene laherparepvec (T-VEC) for melanoma.

Synonyms:

Oncosis

A form of cell death characterized by cellular swelling, derived from the Greek word *onkos* meaning swelling, representing a pre-lethal state that precedes necrosis. It is typically caused by ischemic injury leading to ATP depletion, which impairs the sodium-potassium pump and causes osmotic water influx.

Synonyms:

Oncotic Pressure

The osmotic pressure exerted by plasma proteins (predominantly albumin) that do not freely cross the capillary wall. Normal plasma oncotic pressure is approximately 25-28 mmHg. It opposes the hydrostatic pressure that drives fluid out of capillaries, favoring fluid reabsorption at the venular end.

Synonyms:

One Health

Approach recognizing health connections between humans, animals, environment. Examples: zoonotic diseases, antibiotic resistance, food safety.

Synonyms:

One-Hour Glucose Challenge Test

A screening test for gestational diabetes mellitus (GDM) performed at 24-28 weeks. The patient drinks 50 g of glucose (regardless of fasting state), and plasma glucose is measured at 1 hour. Thresholds vary by protocol; a result in the range of 130–140 mg/dL positive, warranting diagnostic 3-hour oral glucose tolerance test (OGTT).

Synonyms:

Onycholysis

Separation of the nail plate from the underlying nail bed, beginning distally or laterally. Causes include trauma, psoriasis, fungal infection, thyroid disease, medications, and chemical exposure; the underlying cause should be identified.

Synonyms:

Onychomycosis

Fungal nail infection, most commonly caused by dermatophytes (*Trichophyton rubrum*), affecting toenails more than fingernails. It presents as nail thickening, discoloration (yellow-brown), subungual debris, and nail separation. Diagnosis is confirmed by KOH preparation or fungal culture.

Synonyms:

Oocyte

The female gamete (egg cell) produced in the ovary through oogenesis. Oocytes develop from primordial germ cells, which undergo mitosis to form oogonia, then enter meiosis I before birth and arrest in prophase I until puberty.

Synonyms:

Oophorectomy

Surgical removal of one (unilateral) or both (bilateral) ovaries.

Synonyms:

Oophoritis

Inflammation of an ovary, usually associated with pelvic infection or, less commonly, autoimmune disease. It may cause lower abdominal or pelvic pain, fever, abnormal discharge, or menstrual changes; severe pain requires assessment to exclude ovarian torsion or abscess.

Synonyms:

Opacity

Lack of transparency of a normally transparent ocular structure (cornea, lens, vitreous, or aqueous humour). Corneal opacity results from scarring (trauma, infection—herpes simplex keratitis, trachoma), dystrophies (Fuchs endothelial dystrophy, granular/lattice/macular dystrophies), or edema.

Synonyms:

Open Fractures

Fractures in which the broken bone or fracture hematoma communicates with an external wound. They have increased risks of infection and soft-tissue injury and require urgent assessment and specialized treatment.

Synonyms:

Open Reduction and Internal Fixation

Operative exposure and realignment of a fracture followed by fixation with implants such as plates, screws, wires, or nails. It is used when closed treatment cannot provide acceptable alignment, stability, or joint restoration.

Synonyms:

Open Surgery

Traditional surgical approach with incision. Used for bypass, aneurysm repair, thrombectomy.

Synonyms:

Open-book fracture

A pelvic ring disruption with diastasis of the pubic symphysis or sacroiliac joints, often from high-energy trauma, carrying risk of massive hemorrhage and organ injury.

Synonyms:

Open-Heart Surgery

Any surgical procedure involving opening the chest wall (sternotomy or thoracotomy) and operating on the heart, usually with cardiopulmonary bypass (the heart–lung machine).

Synonyms:

Operative Vaginal Delivery

Vaginal delivery assisted by vacuum or forceps. Indications: prolonged second stage, suspected fetal compromise, need to shorten the second stage for maternal benefit (exhaustion, cardiac disease, hypertensive crisis).

Synonyms:

Ophthalmic Emergency

An eye or visual condition requiring urgent evaluation to prevent irreversible vision loss or severe ocular injury. Examples include acute angle closure, retinal detachment, central retinal artery occlusion, endophthalmitis, chemical injury, orbital cellulitis, and open-globe trauma.

Synonyms:

Ophthalmomyiasis

Infestation of the eye by fly larvae (most commonly Oestridae), which may be superficial (conjunctival) or deep (intraocular), with the latter carrying a risk of retinal detachment, endophthalmitis, and permanent vision loss.

Synonyms:

Ophthalmoplegia

Weakness or paralysis of one or more eye muscles, causing limited eye movement, double vision, or abnormal eye position. Causes include nerve disorders, stroke, diabetes, thyroid disease, trauma, and neuromuscular conditions.

Synonyms:

Ophthalmoscope

Instrument for examining retina and optic nerve. Direct: larger, brighter image. Indirect: wider field. Essential for fundoscopic examination.

Synonyms:

Ophthalmoscopy

Examination of the interior of the eye, especially the retina, optic disc, and retinal blood vessels, using an ophthalmoscope. It helps detect retinal disease, optic-nerve abnormalities, glaucoma, and systemic vascular disease.

Synonyms:

Opiate

A natural alkaloid derived from the opium poppy (*Papaver somniferum*) or a semi-synthetic derivative that binds to opioid receptors.

Synonyms:

Opioid Agonist Treatment

Treatment of opioid use disorder with a prescribed opioid agonist or partial agonist, most commonly methadone or buprenorphine, together with psychosocial and medical support. It reduces withdrawal, craving, illicit opioid use, overdose, and mortality.

Synonyms:

Opioid Analgesics

A class of drugs that bind to opioid receptors in the central and peripheral nervous systems, producing analgesia and other effects.

Synonyms:

Opioid Antagonist

A medicine that blocks opioid receptors and can reverse opioid effects such as respiratory depression. Naloxone is a commonly used example.

Synonyms:

Opioid Overdose

A medical emergency characterized by the classic triad of respiratory depression, miosis (pinpoint pupils), and decreased level of consciousness. It can progress to respiratory arrest, cardiovascular collapse, and death.

Synonyms:

Opioid Reversal

Emergency treatment of opioid toxicity with nalox-

one, a competitive opioid-receptor antagonist. It is titrated to restore adequate breathing, with repeated doses or monitoring sometimes needed because its effect may wear off before the opioid.

Synonyms:

Opioid Toxicity

Toxic effects of opioid agonists, classically respiratory depression, central nervous system depression, and miosis. Management prioritizes ventilation and airway support; naloxone is titrated to restore adequate breathing while recognizing the risk of recurrent toxicity and withdrawal.

Synonyms:

Opioid Use Disorder

A problematic pattern of opioid use leading to significant impairment or distress. Opioids include heroin, fentanyl, morphine, oxycodone, and hydrocodone. Criteria are the same eleven as for substance use disorders generally. Overdose presents with respiratory depression, miosis, and decreased level of consciousness.

Synonyms:

Opioids

A class of drugs that bind to opioid receptors in the central and peripheral nervous systems, producing analgesia and other effects. See Opioid Analgesics.

Synonyms:

Opisthotonos

Severe backward arching of the head, neck, and spine caused by sustained extensor muscle spasm. It is classically associated with tetanus but may also occur in meningitis, seizures, or severe brain injury.

Synonyms:

Opportunistic Infection

An infection caused by organisms that ordinarily do not cause disease in immunocompetent hosts but cause significant illness when host defences are impaired.

Synonyms:

Opposition

Movement of the thumb across the palm to contact the fingertips. It combines abduction, flexion, and medial rotation at the first carpometacarpal joint.

Synonyms:

Oppositional Defiant Disorder

A childhood/adolescent disorder characterized by a persistent pattern (≥ 6 months) of angry/irritable mood, argumentative/defiant behavior, and vindictiveness.

Synonyms:

Opsoclonus

Rapid, involuntary, multidirectional, conjugate eye movements without an intersaccadic interval. It may occur with myoclonus and ataxia as part of an autoimmune or paraneoplastic syndrome, particularly in children with neuroblastoma.

Synonyms:

Opsonization

The process by which pathogens or particles are coated with opsonins (antibodies—IgG, complement—C3b, or acute-phase proteins) that enhance recognition and phagocytosis by phagocytes bearing corresponding receptors (Fc receptors, complement receptors).

Synonyms:

Optic Atrophy

End-stage degeneration of the optic nerve fibers resulting from any optic neuropathy. Causes: glaucoma, ischemic optic neuropathy, multiple sclerosis, compressive lesions (pituitary tumor, aneurysm), toxins (methanol, ethambutol), and hereditary (Leber hereditary optic neuropathy).

Synonyms:

Optic Disc

The point on the retina where the optic nerve exits the eye, lacking photoreceptors and creating the natural blind spot.

Synonyms:

Optic Disc Edema

Swelling of the optic-nerve head caused by axoplasmic-flow disruption. Bilateral optic-disc edema from raised intracranial pressure is papilledema; unilateral or non-pressure causes require separate evaluation for optic-nerve, retinal, inflammatory, ischemic, or infiltrative disease.

Synonyms:

Optic Glioma

A usually slow-growing glioma of the optic nerve or optic pathway, occurring most often in children. It may cause progressive visual loss, optic atrophy, proptosis, or visual-field defects and is associated with neurofibromatosis type 1.

Synonyms:

Optic Nerve

CN II exiting through the optic disc (blind spot), passing through the optic canal, and partially decussating at the optic chiasm. Technically a CNS tract with oligodendrocyte myelination and meningeal coverings, making it susceptible to demyelinating disease (optic neuritis in MS).

Synonyms:

Optic Nerve Atrophy

Pallor and degeneration of the optic nerve caused by loss of retinal ganglion-cell axons. It produces permanent visual impairment and may result from ischemia, inflammation, compression, glaucoma, trauma, or raised intracranial pressure.

Synonyms:

Optic Neuritis

Inflammation or demyelination of the optic nerve, often causing subacute vision loss, impaired color vision, and pain with eye movement. It may be associated with multiple sclerosis or other inflammatory, infectious, or immune-mediated disorders.

Synonyms:

Optical Coherence Tomography

A non-invasive imaging technique that uses low-coherence interferometry to produce high-resolution,

cross-sectional images of the retina and other ocular structures, providing quantitative measurements of retinal layer thickness and detecting structural abnormalities with micrometer-level resolution.

Synonyms:

Optometry

A healthcare profession concerned with examining the eyes and visual system for defects and abnormalities, prescribing corrective lenses (spectacles, contact lenses), diagnosing eye disease, and providing pre- and post-operative care for surgical eye treatments.

Synonyms:

Oral Cancer

Malignancy of oral cavity, including lips, tongue, floor of mouth, buccal mucosa, palate, tonsils, oropharynx. Major risk factors: tobacco use, alcohol consumption, human papillomavirus (HPV, especially p16-positive oropharyngeal cancer). Presentation: persistent ulcer, leukoplakia, erythroplakia, mass, pain, difficulty swallowing.

Synonyms:

Oral Candidiasis

Infection or overgrowth of *Candida* species on the oral mucosa, often presenting as removable white plaques, erythematous patches, or angular cheilitis. Risk factors include antibiotics, inhaled corticosteroids, immunosuppression, diabetes, xerostomia, and dentures.

Synonyms:

Oral Cavity

The space extending from the lips to the oropharynx, bounded by the cheeks, palate, and tongue. It receives food, begins mechanical and chemical digestion, and contributes to speech.

Synonyms:

Oral Cavity Cancer

Squamous cell carcinoma of the lip, tongue, buccal mucosa, floor of mouth, or palate, associated with tobacco, alcohol, and betel quid use. Treatment is

primarily surgical resection, with adjuvant radiation or chemoradiation for adverse features.

Synonyms:

Oral Contraceptive

Birth control pill: combined oral contraceptive (COC—ethinylestradiol + progestin) or progestin-only pill (POP/minipill). Mechanisms: ovulation inhibition, cervical mucus thickening, endometrial change.

Synonyms:

Oral Glucose Tolerance Test

A diagnostic test measuring plasma glucose response after a standardized oral glucose load. It is used in selected evaluations of diabetes, impaired glucose tolerance, and gestational diabetes when fasting glucose or HbA1c is insufficient.

Synonyms:

Oral Hygiene

Practices maintaining oral health: brushing twice daily with fluoride toothpaste, flossing daily, mouthwash (optional), regular dental visits. Proper brushing technique: soft brush, 45-degree angle to gumline, gentle circular motions. Interdental cleaning essential for plaque removal.

Synonyms:

Oral Hypoglycemic

A class of drugs used to treat type 2 diabetes (with lifestyle).

Synonyms:

Oral Leukoplakia

A white patch or plaque on the oral mucosa that cannot be scraped off and cannot be characterized as any other diagnosable disease, considered a potentially malignant disorder. Risk factors: tobacco use (most common), alcohol, and betel nut chewing. Most common sites: buccal mucosa, alveolar ridge, and tongue.

Synonyms:

Oral Lichen Planus

Chronic inflammatory condition. Reticular (lace-like white lines), erosive (painful ulcers). Associated with hepatitis C. Malignant transformation rare but possible.

Synonyms:

Oral Medicine

Specialty diagnosing oral mucosal diseases, dental causes of facial pain, oral manifestations of systemic disease.

Synonyms:

Oral Mucosa

The moist stratified squamous epithelial lining of the oral cavity. It includes masticatory, lining, and specialized mucosa and provides barrier protection, sensation, lubrication, and sites for minor salivary glands.

Synonyms:

Oral Nutritional Supplement

A calorie-, protein-, or micronutrient-containing product consumed by mouth to supplement, not automatically replace, usual food intake. The product and dose should match the patient's needs, swallowing ability, disease restrictions, and tolerance.

Synonyms:

Oral Pathology

Study of diseases affecting oral tissues. Includes neoplasms, cysts, inflammatory conditions, developmental anomalies.

Synonyms:

Oral Polio Vaccine

A live attenuated poliovirus vaccine administered by mouth. Its formulation and use depend on the public-health program and circulating poliovirus strains; it has played an important role in polio control.

Synonyms:

Oral Radiology

Specialty of producing and interpreting images of

oral and maxillofacial region.

Synonyms:

Oral Sex (Fellatio, Cunnilingus)

Oral stimulation of the genitals for sexual pleasure. Fellatio: oral stimulation of the penis. Cunnilingus: oral stimulation of the vulva and clitoris. Analingus (rimming): oral stimulation of the anus.

Synonyms: Fellatio, Cunnilingus

Oral Squamous Cell Carcinoma

A malignant neoplasm arising from oral stratified squamous epithelium. Persistent induration, ulceration, red or white patches, unexplained bleeding, pain, or neck mass requires evaluation and biopsy; staging incorporates tumor, nodal, and metastatic findings.

Synonyms:

Oral Surgery

Surgical procedures in oral and maxillofacial region. Extractions, implant placement, biopsies, cyst removal, corrective jaw surgery.

Synonyms:

Oral Toxicity

Harm caused by swallowing a toxic substance, medicine, or excessive dose.

Synonyms:

Oral Ulcer

Ulceration of oral mucosa. Aphthous ulcer (canker sore) most common. Traumatic, viral, autoimmune causes.

Synonyms:

Orbital Cellulitis

A serious infection of the orbital tissues posterior to the orbital septum, potentially sight-threatening and life-threatening due to the risk of optic nerve compression, cavernous sinus thrombosis, and intracranial extension.

Synonyms:

Orbital metastasis

Secondary cancer deposits in the orbit, most commonly from breast, lung, or prostate primaries. Symptoms include proptosis, diplopia, pain, and visual impairment.

Synonyms:

Orbital Pseudotumor

Noninfectious, idiopathic inflammation of orbital tissues, also called idiopathic orbital inflammation. It can cause painful eye movement, proptosis, eyelid swelling, diplopia, and restricted ocular motility.

Synonyms: idiopathic.

Orchiectomy

Surgical removal of one or both testicles. Radical inguinal orchiectomy is diagnostic and therapeutic for testicular cancer; bilateral orchiectomy is a hormonal therapy for prostate cancer.

Synonyms:

Orchitis

Inflammation of the testis, often associated with epididymitis (epididymo-orchitis).

Synonyms:

Orexin Receptor Antagonists

Medications that block orexin (hypocretin) receptors to promote sleep. Suvorexant and lemborexant are approved for insomnia. They reduce wakefulness by blocking the arousal system. They have lower abuse potential than benzodiazepines and do not cause respiratory depression.

Synonyms:

Orf

A zoonotic viral skin infection caused by the parapoxvirus, transmitted to humans from infected sheep and goats (direct contact with lesions, fomites—virus survives in scabs for months). Orf is an occupational disease of farmers, butchers, and veterinarians. Incubation: 3–7 days.

Synonyms:

Organ

A structure composed of two or more different types of tissues that has a recognizable shape and performs specific functions.

Synonyms:

Organ System

A group of related organs that work together to perform major body functions.

Synonyms:

Organ Transplants

The surgical transfer of an organ from a donor to a recipient whose organ function is severely impaired. Solid-organ transplantation may involve the kidney, liver, heart, lung, pancreas, or intestine and requires donor assessment, recipient selection, and ongoing follow-up.

Synonyms:

Organophosphate

A class of chemicals that can inhibit acetylcholinesterase. Some are pesticides or nerve agents and can cause cholinergic poisoning.

Synonyms:

Organophosphate Poisoning

Acetylcholinesterase inhibitors. SLUDGE syndrome: salivation, lacrimation, urination, defecation, GI upset, emesis. Miosis, bradycardia, bronchospasm, muscle fasciculations. Treatment: atropine, pralidoxime, supportive care.

Synonyms:

Orogastric Tube

Tube through mouth to stomach. For infants, unconscious patients.

Synonyms:

Oropharyngeal Airway

A rigid airway adjunct inserted through the mouth to displace the tongue and help maintain upper-airway patency in an unconscious patient without an intact gag reflex. It does not protect against aspiration.

Synonyms:

Oropharyngeal Carcinoma

Malignancy arising in the oropharynx, including the tonsil, base of tongue, soft palate, and posterior pharyngeal wall. HPV-associated tumors form an important subgroup; evaluation includes endoscopy, biopsy, imaging, and cervical-node assessment.

Synonyms:

Oropharynx

The posterior portion of the mouth leading to the esophagus, containing the tonsils and base of tongue. Area for swallowing and speech. Examination with tongue depressor and light source. Pathology: pharyngitis, tonsillitis, malignancy.

Synonyms:

Orphan Drug

A pharmaceutical agent developed specifically to treat a rare medical condition (affecting fewer than 200,000 people in the United States, as defined by the Orphan Drug Act of 1983).

Synonyms:

Orthodontic Bracket

A bonded or banded attachment that transmits forces from an orthodontic archwire to a tooth. Bracket position and wire sequence guide controlled tooth movement.

Synonyms:

Orthodontic Retainer

A removable or fixed appliance used after active orthodontic treatment to maintain tooth position while periodontal and alveolar tissues remodel. Retention is often needed long term because relapse can occur.

Synonyms:

Orthodontics

Specialty of dental management of malocclusion and dental-facial discrepancies. Appliances: fixed braces, removable appliances, clear aligners. Treatment indications: crowding, spacing, overbite, underbite,

crossbite, open bite, midline discrepancy. Treatment duration: 12-24 months typically. Retention phase essential for stability.

Synonyms:

Orthognathic Surgery

Corrective jaw surgery for skeletal malocclusion. Le Fort I, Bilateral Sagittal Split Osteotomy. Combined with orthodontics.

Synonyms:

Orthopedic Biologics

Biological or biomaterial products used to support bone or soft-tissue healing. Examples include autograft, allograft, demineralized bone matrix, bone-marrow products, and synthetic graft substitutes; their uses and evidence vary by procedure and condition.

Synonyms:

Orthopedic Implant

Devices for bone/joint reconstruction. Types: plates, screws, rods, hinges, prostheses. Materials: titanium, cobalt-chrome, stainless steel, polyethylene, ceramic. Used for fractures, arthritis, tumors, deformities. Complications: infection, loosening, fracture, wear.

Synonyms:

Orthopedic Infections

Infections involving bones, joints, muscles, or orthopedic implants. Examples include osteomyelitis, septic arthritis, prosthetic-joint infection, and some diabetic foot infections.

Synonyms:

Orthopedic Rehabilitation

Therapy that restores movement, strength, function, and independence after musculoskeletal injury or surgery.

Synonyms:

Orthopedic Screws

Fixation devices for fractures. Materials: titanium, stainless steel. Types: cortical, cancellous, inter-

fragmentary. Used with plates, rods, nails. Complications: loosening, breakage, infection.

Synonyms:

orthopedics

The branch of surgery concerned with the musculoskeletal system, including bones, joints, ligaments, tendons, muscles, and nerves.

Synonyms:

Orthopnea

Dyspnea that occurs when lying flat and is relieved by sitting upright. It is measured by the number of pillows the patient needs to sleep (two-pillow orthopnea). It is a hallmark of left heart failure and is caused by redistribution of fluid from the lower extremities to the lungs in the supine position.

Synonyms:

Orthopnoea

Shortness of breath that occurs when lying flat and is relieved by sitting or standing upright. Orthopnoea is a classic symptom of left-sided heart failure (elevated pulmonary venous pressure worsens pulmonary congestion in the supine position). Other causes: severe COPD, asthma exacerbation, diaphragmatic paralysis, ascites, and obesity.

Synonyms:

Orthorexia

A term used for an excessive or rigid preoccupation with eating foods considered healthy. It is not a universally recognized formal psychiatric diagnosis but may cause nutritional or social impairment.

Synonyms:

Orthosis

An externally applied device that supports, aligns, prevents deformity, protects, or assists movement of a body segment. It differs from a prosthesis, which replaces a missing body part.

Synonyms:

Orthostatic Hypotension

Decrease in SBP ≥ 20 mmHg or DBP ≥ 10 mmHg

within 3 minutes of standing. Causes: dehydration, medications (antihypertensives, diuretics, alpha-blockers, antidepressants), autonomic dysfunction (diabetes, Parkinson disease), and prolonged bed rest. Symptoms: dizziness, lightheadedness, syncope, falls.

Synonyms:

Orthostatic Intolerance

Symptoms or signs that develop when standing because the cardiovascular and autonomic systems do not maintain adequate cerebral perfusion. Manifestations include light-headedness, palpitations, fatigue, visual dimming, presyncope, or syncope and may occur with or without orthostatic tachycardia or hypotension.

Synonyms:

Orthotic Training

Training for brace users: donning/doffing, skin care, gait training with brace.

Synonyms:

Osborn wave

A positive deflection at the junction of the QRS complex and ST segment on electrocardiography, also known as a J wave. It is classically associated with hypothermia, where its amplitude correlates with the degree of cooling.

Synonyms: a J wave.

OSFED

Other Specified Feeding or Eating Disorder, used when the clinical presentation causes significant distress or impairment but does not meet full criteria for any of the specific eating disorders.

Synonyms:

Osgood-Schlatter Disease

A traction apophysitis of the tibial tuberosity at the insertion of the patellar tendon, caused by repetitive microtrauma during periods of rapid growth.

Synonyms:

Osler Nodes

Painful, erythematous nodules on the pads of fingers and toes, caused by immune complex deposition in infective endocarditis. They are a minor criterion in the Duke criteria. Osler nodes are tender and may last hours to days.

Synonyms:

Osmolality

The concentration of osmotically active particles per kilogram of solvent. Plasma osmolality is determined mainly by sodium and its accompanying anions, glucose, and urea and governs water movement across cell membranes.

Synonyms:

Osmosis

The net movement of water molecules across a semipermeable membrane from a region of lower solute concentration (higher water concentration) to a region of higher solute concentration (lower water concentration). Driven by the osmotic pressure difference, which is proportional to the number of solute particles.

Synonyms:

Osmotic Demyelination Syndrome

Demyelinating process affecting the pons and extrapontine regions caused by overly rapid correction of chronic hyponatremia. The brain adapts to chronic hyponatremia by extruding osmoles and when sodium is corrected too quickly water shifts out of brain cells causing osmotic injury to oligodendrocytes.

Synonyms:

Osmotic Diarrhea

Diarrhea caused by poorly absorbed solutes retaining water in the intestinal lumen. It typically improves with fasting and may result from carbohydrate malabsorption, laxatives, or other osmotically active substances.

Synonyms:

Osmotic Fragility Test

A test that measures the susceptibility of red blood cells to haemolysis when placed in progressively more dilute saline solutions. Increased fragility supports hereditary spherocytosis, although the result may also be affected by other haemolytic disorders and recent transfusion.

Synonyms:

Osmotic Pressure

The pressure required to prevent the movement of water across a semipermeable membrane when a solute concentration gradient exists, proportional to the number of dissolved particles (van't Hoff law: $\pi = iCRT$). It is a colligative property depending on particle number, not particle identity.

Synonyms:

Osseointegration

Direct structural and functional connection between living bone and the surface of a load-bearing implant under appropriate conditions. It depends on implant stability, surface characteristics, bone quality, healing, and control of infection and occlusal forces.

Synonyms:

Ossicles

Three smallest body bones forming the ossicular chain in the middle ear: malleus (hammer, attached to tympanic membrane), incus (anvil), stapes (stirrup, footplate in oval window).

Synonyms:

Ossicular Discontinuity

Partial or complete separation of the middle-ear ossicles, usually caused by trauma, chronic ear disease, or surgery. It produces conductive hearing loss and may be evaluated with otoscopy, audiometry, and imaging.

Synonyms: Ossicular-chain discontinuity; ossicular disruption.

Osteoarthritis

The most common joint disease, characterized by

progressive cartilage loss, subchondral bone sclerosis, osteophyte formation, and synovial inflammation, affecting knees, hips, hands (DIP/PIP Heberden/Bouchard nodes), spine. Risk factors: age, obesity, joint injury, malalignment, genetics, female sex.

Synonyms:

Osteoarthritis (Geriatric)

Osteoarthritis occurring in later life, commonly affecting the knees, hips, hands, or spine and causing joint pain, stiffness, and reduced movement. Management may include exercise, weight management, medicines, assistive measures, or joint replacement when appropriate.

Synonyms: Geriatric

Osteoblast

A bone-forming cell derived from mesenchymal stem cells in the bone marrow. Osteoblasts synthesise and deposit the bone matrix (osteoid), composed primarily of type I collagen and non-collagenous proteins (osteocalcin, osteonectin, alkaline phosphatase).

Synonyms:

Osteochondritis Dissecans

A condition characterized by separation of a fragment of articular cartilage and subchondral bone from the joint surface, most commonly in the knee (lateral aspect of the medial femoral condyle). Most common in adolescents and young adults. Etiology: repetitive microtrauma, ischemia, or genetic predisposition.

Synonyms:

Osteochondroma

A usually benign cartilage-capped bony projection arising from the surface of a bone and continuous with its cortex and medullary cavity. It may be solitary or occur in hereditary multiple exostoses.

Synonyms:

Osteoclast

A large, multinucleated bone-resorbing cell derived from the monocyte-macrophage lineage (hematopoi-

etic stem cells).

Synonyms:

Osteocyte

The mature, terminally differentiated bone cell embedded within the bone matrix in lacunae, derived from osteoblasts. Osteocytes are connected to each other and to bone surface cells via canaliculi, forming a mechanosensory network that senses mechanical loading and fluid flow.

Synonyms:

Osteogenesis Imperfecta

A connective tissue disorder caused by collagen type I mutations, ranging from mild to lethal. Features: fractures with minimal trauma, blue sclerae, dental abnormalities, and hearing loss. Severe forms (type II) cause multiple fractures in utero and perinatal death. Diagnosis: clinical features, genetic testing, and bone biopsy.

Synonyms:

Osteoid Osteoma

A benign bone-forming tumor, usually in an adolescent or young adult, characterized by a small vascular nidus surrounded by reactive sclerosis. It commonly causes localized pain that is worse at night and may improve with nonsteroidal anti-inflammatory drugs.

Synonyms:

Osteomalacia

Impaired mineralization of newly formed osteoid in adults resulting from vitamin D deficiency, phosphate depletion, or defective mineralization.

Synonyms:

Osteomyelitis

An infection of bone and bone marrow, most commonly caused by bacterial pathogens, with *Staphylococcus aureus* responsible for the majority of cases.

Synonyms:

Osteonecrosis (Avascular Necrosis)

Osteonecrosis (AVN) is bone death from vascular

compromise, affecting femoral head (most common), humeral head, femoral condyles, talus. Risk factors: glucocorticoids (high dose, cumulative), alcohol, trauma, sickle cell disease, SLE, antiphospholipid syndrome, pancreatitis, decompression sickness, radiation, organ transplantation.

Synonyms: Avascular Necrosis

Osteopathy

A system of manual medicine and healthcare founded by Andrew Taylor Still (1828–1917) based on the principle that the body's structure (musculoskeletal system) and function are interrelated, and that the body has inherent self-regulatory and healing mechanisms.

Synonyms:

Osteopenia

Bone mineral density (BMD) that is lower than normal but not low enough to be classified as osteoporosis. T-score between -1.0 and -2.5 on DXA scan. A risk factor for osteoporosis and fractures.

Synonyms:

Osteopetrosis

A rare inherited bone disease characterized by defective osteoclast function, leading to impaired bone resorption and abnormally dense, sclerotic bones. The bone is structurally abnormal—brittle despite increased density—and prone to fracture.

Synonyms:

Osteoporosis

A skeletal disorder in which reduced bone strength increases the risk of fractures. Risk is influenced by age, hormones, medicines, genetics, nutrition, smoking, alcohol, and other conditions; diagnosis and management use clinical assessment and bone-density testing when appropriate.

Synonyms:

Osteoporosis Fracture Risk Assessment

Evaluation combining clinical risk factors, prior fragility fracture history, bone mineral density, and tools such as FRAX to estimate future fracture

probability and guide treatment.

Synonyms:

Osteosarcoma

The most common primary malignant bone tumor in children and adolescents (excluding leukemia), with a peak incidence during the adolescent growth spurt (ages 10-20 years), and a second smaller peak in older adults (usually secondary to Paget disease or prior radiation).

Synonyms:

Osteotomy

A surgical procedure involving cutting and repositioning of bone to correct deformity, realign joint surfaces, alter weight-bearing forces, or change limb length.

Synonyms:

Ostomy

Surgical opening into bowel or urinary tract. Colostomy, ileostomy, urostomy. Appliances for collection.

Synonyms:

Ostomy Appliance

Collection device for feces/urine after ostomy surgery. Types: urostomy (urine), colostomy (feces), ileostomy (ileum). One-piece or two-piece systems. Open or closed end. Skin care essential. Complications: skin irritation, hernia, obstruction, prolapse.

Synonyms:

Ostraceous psoriasis

A severe, chronic variant of plaque psoriasis in which the lesions become thick, hard, and shell-like (ostraceous), with laminated, greyish-brown crusts resembling oyster shells. It is often refractory to standard therapies and may require systemic agents, biologics, or combination treatment.

Synonyms:

Other Pain Conditions

Pain conditions that do not fit neatly into a single category, including nociplastic pain, fibromyalgia,

chronic tension-type headache, temporomandibular pain, chronic pelvic pain, and complex regional pain syndrome. Diagnosis and treatment depend on the specific condition.

Synonyms:

Other Specified Sexual Dysfunction

A category for sexual dysfunction symptoms that cause distress but do not meet full criteria for any specific sexual dysfunction.

Synonyms:

Otic capsule

The otic capsule is the dense bony shell (otic capsule bone) that surrounds and protects the inner ear structures, including the cochlea, vestibule, and semicircular canals, forming the hardest bone in the human body.

Synonyms:

Otitis Externa

Inflammation or infection of the external ear canal, commonly causing ear pain, itching, tenderness, or discharge.

Synonyms:

Otitis media

A group of inflammatory conditions of the middle ear, most commonly caused by viral or bacterial infection, with *Streptococcus pneumoniae*, *Haemophilus influenzae*, and *Moraxella catarrhalis* being the most frequent bacterial pathogens.

Synonyms:

Otitis Media with Effusion

Nonpurulent fluid in the middle ear without acute signs of infection. It may cause conductive hearing loss, aural fullness, or speech and learning effects in children; many cases resolve spontaneously, but persistent or consequential effusion requires hearing assessment and ENT review.

Synonyms:

Otocephaly

A severe congenital craniofacial malformation char-

acterized by absent or markedly underdeveloped mandible, ventral displacement or fusion of the ears, and associated facial and airway abnormalities. It is usually lethal because of profound impairment of breathing and feeding.

Synonyms:

Otolaryngology

The surgical specialty concerned with the diagnosis and treatment of disorders of the ear, nose, throat, head, and neck. Otolaryngologists (ENT surgeons) manage conditions ranging from otitis media and sinusitis to head and neck cancer, thyroid disease, and voice disorders.

Synonyms:

Otology

The medical specialty concerned with disorders of the ear, including hearing loss, tinnitus, balance disorders, ear infections, otosclerosis, cholesteatoma, and related conditions.

Synonyms:

Otorrhea

Discharge from the ear. Classification: acute otorrhea (<6 weeks) and chronic otorrhea (>6 weeks).

Synonyms:

Otosclerosis

An abnormal bony growth in the middle ear that causes hearing loss.

Synonyms:

Otoscope

Instrument for examining ear canal and tympanic membrane. Light source, magnifying lens, speculum. Essential for otologic evaluation.

Synonyms:

Otoscopy

A clinical examination technique used to visualize the external auditory canal and tympanic membrane, and it is an essential component of the evaluation of ear complaints including hearing loss, ear pain, otorrhea, and tinnitus.

Synonyms:

Otoacoustic Emissions

Low-level sounds generated by the cochlea, usually by outer hair cells, that can be recorded with a sensitive probe in the ear canal. Testing is used for newborn hearing screening and for assessing cochlear function.

Synonyms: OAE; otoacoustic-emission testing; cochlear emissions.

Ototoxicity

Functional damage to the cochlea or vestibular system caused by exposure to a toxic substance, including some medicines or industrial chemicals. It may present with hearing loss, tinnitus, or imbalance and can be temporary or permanent.

Synonyms: Auditory toxicity; vestibular toxicity; ototoxic effect.

Outbreak

Synonymous with epidemic. Sometimes used to refer to a local epidemic as compared to a larger, general epidemic.

Synonyms:

Outcome Measurement

The use of defined measures to assess a patient's symptoms, function, quality of life, or other results before and after care.

Synonyms:

Outcome Research

Study of rehabilitation outcomes. Effectiveness, cost-effectiveness, patient-reported outcomes.

Synonyms:

Outer Ear

The visible auricle and the external auditory canal, which collect and conduct sound toward the eardrum.

Synonyms:

Outpatient Rehabilitation

Rehabilitation provided without hospital admission

to improve function after illness, injury, surgery, or disability. The setting, frequency, and duration are individualized.

Synonyms:

Ovarian Cancer

A malignant tumor arising in the ovary or related tissues. It may cause abdominal or pelvic symptoms, but early disease can be asymptomatic.

Synonyms:

Ovarian Cyst

A fluid-filled sac within or on the ovary, most commonly functional (follicular or corpus luteum cysts) related to the menstrual cycle. Usually asymptomatic; can present with pelvic pain, pressure, and bloating. Complications: rupture, hemorrhage, torsion (sudden severe pain with nausea/vomiting).

Synonyms:

Ovarian Hyperstimulation Syndrome

A potentially serious complication of ovarian stimulation in assisted reproduction caused by increased vascular permeability and fluid shift. It produces enlarged ovaries, abdominal distension, ascites, hemoconcentration, electrolyte abnormalities, thrombosis risk, and, in severe cases, organ dysfunction.

Synonyms:

Ovarian Pregnancy

A rare ectopic pregnancy implanted in ovarian tissue rather than in the uterine cavity or fallopian tube. Diagnosis uses clinical findings, serial human chorionic gonadotropin measurements, ultrasound, and sometimes surgical or pathologic confirmation; treatment is individualized.

Synonyms:

Ovarian Torsion

Twisting of the ovary (and often the fallopian tube) on its vascular pedicle, causing obstruction of blood flow—a gynecologic emergency. Risk: ovarian cysts/tumors (especially >5 cm), longer utero-ovarian ligament, younger women, pregnancy.

Synonyms:

Ovariectomy

Surgical removal of one or both ovaries.

Synonyms:

Ovary

The female gonad, a paired almond-shaped organ located in the pelvic cavity on each side of the uterus. Functions: production of oocytes (ova) and secretion of female sex hormones (oestrogen, progesterone, and small amounts of androgens). Each ovary contains follicles at various stages of development.

Synonyms:

Over-the-Counter

Medications available without a prescription, considered safe and effective for self-care with appropriate labeling and low abuse potential. Examples: acetaminophen, ibuprofen, antacids, antihistamines, decongestants, laxatives. Regulated in the US by the FDA (OTC monograph system) and Rx-to-OTC switches (e.g., omeprazole, loratadine).

Synonyms:

Over-the-Counter Medications

Nonprescription drugs approved as safe and effective for self-management of common symptoms, available at pharmacies and retail stores without a prescription.

Synonyms:

Over-the-Counter Drug

A medication that can be purchased without a prescription, deemed safe and effective for self-medication when used according to label instructions. OTC drugs have established safety profiles, low toxicity, and clear dosing guidelines suitable for consumer use.

Synonyms:

Overactive Bladder

A clinical syndrome of urinary urgency, usually with frequency and nocturia, with or without urge incontinence, due to detrusor overactivity during filling. Causes: idiopathic (most), neurogenic (stroke,

spinal injury, MS, Parkinson), bladder outlet obstruction, and aging; worsened by caffeine and diuretics.

Synonyms:

Overall Survival

Time from treatment to death from any cause.

Synonyms:

Overdenture

Removable denture supported by implants or natural teeth. Preservation of alveolar bone, improved stability.

Synonyms:

Overdose

Exposure to a dose of a medicine or substance that is greater than intended or safe and may cause toxicity.

Synonyms:

Overflow Urinary Incontinence

Leakage of urine caused by incomplete bladder emptying and excessive bladder filling. It may occur with weak urinary flow, dribbling, urgency, or urinary retention.

Synonyms:

Overgrowth Syndrome

A group of congenital disorders characterized by excessive growth of the body, a region, or specific tissues, often with developmental or tumor-predisposition features. Causes include genomic imprinting abnormalities, mosaic variants, and alterations in growth-signaling pathways.

Synonyms:

Overlap Myositis

Patients with features of inflammatory myopathy (DM/PM/IMNM) plus another systemic autoimmune disease (SLE, SSc, MCTD, Sjogren). Anti-PM-Scl (Scl/PM overlap, limited SSc + myositis, good prognosis); anti-Ku (SLE/PM overlap); anti-U1-RNP (MCTD with myositis).

Synonyms:

Ovulation

The release of a mature egg from the ovary, at which time it is available to be fertilized by sperm.

Synonyms:

Ovum

The female reproductive cell (egg) after ovulation and before fertilization. The ovum is a large, non-motile cell (100 μ m diameter) surrounded by the zona pellucida (glycoprotein layer that mediates sperm binding and prevents polyspermy after fertilization) and the corona radiata (follicular cells).

Synonyms:

Oxalate

A metabolic end product that can form calcium oxalate crystals in the kidneys, contributing to nephrolithiasis and oxalate nephropathy, particularly in hyperoxaluric states.

Synonyms:

Oxaloacetate

A four-carbon citric-acid-cycle intermediate that condenses with acetyl-CoA to form citrate. It is also a precursor for gluconeogenesis and participates in amino-acid transamination to aspartate.

Synonyms:

Oxidative Phosphorylation

Process generating ATP using energy released by electron transfer through the electron transport chain. Protons pumped across inner mitochondrial membrane create electrochemical gradient (proton motive force). ATP synthase (Complex V) uses proton flow to phosphorylate ADP to ATP. P/O ratio: 2.5 ATP per NADH, 1.5 ATP per FADH₂.

Synonyms:

Oxidative Stress

Imbalance between reactive oxygen species and antioxidants. DNA damage, protein oxidation, lipid peroxidation.

Synonyms:

Oxygen Consumption

The volume of oxygen consumed by the body per unit time, reflecting overall metabolic rate. Resting oxygen consumption (VO₂) in a normal adult is approximately 250 mL/min (about 3.5 mL/kg/min, 1 MET). It is calculated as cardiac output x (arterial O₂ content - venous O₂ content) by the Fick principle.

Synonyms:

Oxygen Delivery

The rate at which oxygen is transported from the lungs to the tissues, equal to cardiac output multiplied by arterial oxygen content: $DO_2 = CO \times CaO_2$. Arterial oxygen content = $(1.34 \times \text{hemoglobin} \times SaO_2) + (0.003 \times PaO_2)$. Normal oxygen delivery is approximately 1000 mL/min.

Synonyms:

Oxygen Enhancement Ratio

Ratio of dose under hypoxic vs. aerobic conditions. Higher for low LET radiation.

Synonyms:

Oxygen Mask

Delivers supplemental oxygen. Types: simple, nasal cannula, non-rebreather, Venturi.

Synonyms:

Oxygen Saturation

The percentage of hemoglobin carrying oxygen in blood. It may be estimated by pulse oximetry (SpO₂) or measured in an arterial blood sample by co-oximetry (SaO₂). The appropriate range depends on the person's condition, baseline oxygenation, and treatment goals.

Synonyms:

Oxygen-Hemoglobin Dissociation Curve

The sigmoidal relationship between partial pressure of oxygen (PO₂) and hemoglobin oxygen saturation (SO₂). The curve reflects hemoglobin's cooperative binding: oxygen binding to one subunit increases affinity for subsequent oxygen molecules. At PO₂ of 100 mmHg (alveolar), hemoglobin is approximately

98 percent saturated.

Synonyms:

Oxytocics

A class of medications that stimulate uterine contractions, used for induction and augmentation of labor and prevention/treatment of postpartum hemorrhage. Oxytocin (Syntocinon) — synthetic analog of endogenous oxytocin, administered IV infusion for labor induction or IM/IV for PPH prevention.

Synonyms:

Oxytocin Infusion

Intravenous synthetic oxytocin used to induce or augment labor or, in selected settings, to manage postpartum bleeding. The dose is started and adjusted according to uterine activity, fetal status, maternal condition, and local protocol; excessive uterine stimulation can be harmful.

Synonyms:

Ozaena

A chronic condition characterized by atrophic rhinitis with crusting, foul-smelling nasal discharge (fetor), and a sensation of nasal obstruction despite a patent airway. Ozaena is caused by progressive atrophy of the nasal mucosa and underlying bone, often associated with *Klebsiella ozaenae* infection.

Synonyms:

Ondine's Curse

A rare disorder in which automatic breathing is impaired, especially during sleep; also called congenital central hypoventilation syndrome.

Synonyms: congenital central hypoventilation syndrome.

Open Prostatectomy

Surgical removal of enlarged prostate tissue through an abdominal incision.

Synonyms:

Orbital Irradiation

Radiation treatment directed at tissues within the eye socket, sometimes used for severe thyroid eye

disease.

Synonyms:

Overt Proteinuria

Abnormally high protein loss in the urine that is detectable by routine testing and may indicate kidney disease.

Synonyms:

Obstructive Hydrocephalus

A buildup of cerebrospinal fluid caused by a blockage in its normal flow through the brain's ventricles.

Synonyms:

Ocular Melanoma

A cancer that begins in pigment-producing cells of the eye.

Synonyms:

Oculomotor Nerve

The third cranial nerve, which controls most eye movements, raises the upper eyelid, and constricts the pupil.

Synonyms:

Odontogenic Cyst

A fluid-filled sac that develops from tissues involved in tooth formation, usually in the jaw.

Synonyms:

Oblique Fracture

A fracture in which the break crosses the bone at an angle rather than perpendicular or parallel to its long axis.

Synonyms:

Obstipation

Severe constipation with inability to pass stool or gas, often suggesting intestinal obstruction.

Synonyms:

Occlusive Vascular Disease

Disease in which narrowing or blockage of a blood vessel reduces or stops blood flow to tissues.

Synonyms:

Olecranon

The bony projection of the proximal ulna that forms the point of the elbow.

Synonyms:

Olfaction

The sense of smell, mediated by receptors in the olfactory epithelium and pathways to the brain.

Synonyms:

Orbit

The bony cavity of the skull that contains the eye, extraocular muscles, nerves, vessels, and associated tissues.

Synonyms:

Organelle

A specialized structure within a cell that performs a particular function, such as energy production, protein synthesis, or waste processing.

Synonyms:

Orifice

An opening into or out of a body structure, organ, or anatomical passage.

Synonyms:

Ossification

The process of forming bone tissue.

Synonyms:

Osteochondrosis

A disorder of bone and cartilage development, often affecting a growth center or joint surface.

Synonyms:

Osteodystrophy

Abnormal bone growth or remodeling caused by a systemic or metabolic disorder.

Synonyms:

Osteogenic Sarcoma

Osteosarcoma, a malignant bone tumor whose cells produce osteoid or immature bone.

Synonyms:

Osteoma

A usually benign, slow-growing tumor composed of mature bone tissue.

Synonyms:

Osteoplasty

Surgical repair, reshaping, or reconstruction of bone.

Synonyms:

Otorhinolaryngology

The medical specialty concerned with diseases of the ear, nose, throat, head, and neck; also called otolaryngology.

Synonyms: otolaryngology.

Oxygen

A gas required for aerobic cellular metabolism. It is transported in blood mainly bound to hemoglobin and in a small amount dissolved in plasma.

Synonyms:

Ocular Rosacea

Inflammation affecting the eyes and eyelids in people with rosacea, causing irritation, redness, or dryness.

Synonyms:

Ophthalmia Neonatorum

Eye inflammation or infection in a newborn, often acquired during delivery.

Synonyms:

Optic Disk

The point where the optic nerve leaves the retina; it has no photoreceptors and forms the blind spot.

Synonyms:

Orthopneic Position

An upright sitting position that helps a person breathe more easily, often with the arms supported.

Synonyms:

Osteotome

A sharp surgical instrument used to cut or shape bone.

Synonyms:

Oculomotor Nerve Palsy

Weakness or paralysis of muscles supplied by the third cranial nerve, causing eyelid drooping, double vision, abnormal eye position, and sometimes a dilated pupil.

Synonyms:

Oedema

Abnormal accumulation of fluid in the tissues, causing swelling; it may be localized or generalized and can result from venous disease, inflammation, heart failure, kidney disease, or low blood protein.

Synonyms:

Oesophagus

The muscular tube that carries swallowed food and liquid from the throat to the stomach by coordinated waves of contraction.

Synonyms:

Oligomenorrhoea

Infrequent menstrual periods, usually with cycles longer than 35 days or fewer than about eight periods per year.

Synonyms:

Oligospermia

A lower-than-expected concentration of sperm in semen, which may reduce fertility.

Synonyms:

Open-Angle Glaucoma

A chronic optic-nerve disease in which the drainage angle of the eye remains anatomically open but aqueous humour outflow is impaired, often causing progressive, initially symptomless visual-field loss.

Synonyms:

Onychocryptosis (Ingrowing Toenail)

A condition in which the edge of a nail grows into the surrounding skin, causing pain, inflammation, and sometimes infection.

Synonyms: Ingrowing Toenail

Oral Rehydration Therapy (ORT)

Replacement of water and electrolytes by mouth using a balanced glucose-and-salt solution, especially to prevent or treat dehydration from diarrhoea or vomiting.

Synonyms: ORT

Ortolani's Sign

A palpable or audible clunk produced when a dislocated but reducible infant hip is gently abducted and reduced; it is a screening sign of developmental dysplasia of the hip.

Synonyms:

Osteitis

Inflammation of bone, usually caused by infection, trauma, or another inflammatory process.

Synonyms:

Otalgia (Earache)

Pain in or around the ear, arising from the ear itself or referred from structures such as the teeth, jaw, throat, or cervical spine.

Synonyms: Earache

Otorrhoea

Discharge from the ear, which may be watery, bloody, or purulent and may result from infection, trauma, or a perforated eardrum.

Synonyms:

Otolith

A small calcium-carbonate crystal in the vestibular organs of the inner ear that contributes to sensing gravity and linear acceleration; displaced otoliths can cause benign positional vertigo.

Synonyms:

Ocular Migraine

A migraine-related visual disturbance, often involving flashing lights, zigzag lines, or a temporary blind spot. It may occur with or without headache.

Synonyms:

Orbital Fracture

A break in one or more bones forming the eye socket, usually caused by facial trauma and potentially associated with double vision, eye-movement restriction, or injury to the eye.

Synonyms:

Osteophyte

A bony outgrowth, commonly called a bone spur, that develops near a joint or along the spine and may cause pain, stiffness, or nerve compression.

Synonyms: a bone spur, that develops near a joint or along the spine and may cause pain, stiffness, or nerve compression.

Osteonecrosis of the Jaw

Death of jawbone tissue, often associated with antiresorptive or antiangiogenic medications, radiation, infection, or trauma, and characterized by exposed bone or a nonhealing oral wound.

Synonyms:

Opioid Withdrawal

A characteristic group of symptoms occurring after abrupt reduction or cessation of prolonged opioid use, including anxiety, muscle aches, sweating, abdominal cramps, diarrhea, nausea, and insomnia.

Synonyms:

Oropharyngeal Dysphagia

Difficulty transferring food or liquid from the mouth through the throat, often causing coughing, choking, nasal regurgitation, or aspiration.

Synonyms:

Oxygen Toxicity

Tissue injury caused by exposure to oxygen at excessively high partial pressures or concentrations, potentially affecting the lungs, eyes, or central ner-

vous system.

Synonyms:

Obstetric Fistula

An abnormal connection between the birth canal and the bladder or rectum, usually caused by prolonged obstructed labor, resulting in continuous leakage of urine or stool. It requires specialist evaluation and repair. +

obatoclox

obatoclox is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

obatoclox mesylate

obatoclox mesylate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oblimersen sodium

oblimersen sodium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

observational study

observational study is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

obstetric nursing

obstetric nursing is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

obstetrical forceps

obstetrical forceps is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

occipital diastasis

occipital diastasis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

occlusal adjustment

occlusal adjustment is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

occlusal splint

occlusal splint is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

occupation

occupation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

occupational disease

occupational disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ochrobactrum

ochrobactrum is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

ochrobactrum anthropi

ochrobactrum anthropi is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

ochrobactrum intermedium

ochrobactrum intermedium is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

octadecadienoic acid

octadecadienoic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

octanoic acid

octanoic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

octopamine

octopamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

octreotide

octreotide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ocular albinism

ocular albinism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ocular fixation

ocular fixation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ocular orbit

ocular orbit is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ocular toxoplasmosis

ocular toxoplasmosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

oculocardiac reflex

oculocardiac reflex is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oculomotor nucleus

oculomotor nucleus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

odontoblast

odontoblast is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

odontodysplasia

odontodysplasia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

odontogenesis

odontogenesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

odontogenic fibroma

odontogenic fibroma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

odontogenic neoplasm

odontogenic neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

odorant

odorant is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

odoribacter splanchnicus

odoribacter splanchnicus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

oerskovia

oerskovia is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

oerskovia turbata

oerskovia turbata is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

ofatumumab

ofatumumab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

offspring

offspring is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ofloxacin

ofloxacin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oidiodendron

oidiodendron is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

oil

oil is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ointment bases

ointment bases is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

okadaic acid

okadaic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olanzapine

olanzapine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olaparib

olaparib is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olaratumab

olaratumab is a medicine or pharmacologic sub-

stance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

oleandomycin

oleandomycin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

oleic acid

oleic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olfactory bulb

olfactory bulb is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olfactory cortex

olfactory cortex is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olfactory gyrus

olfactory gyrus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olfactory learning

olfactory learning is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olfactory mucosa

olfactory mucosa is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olfactory neuroblastoma

olfactory neuroblastoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olfactory tract

olfactory tract is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olfactory tubercle

olfactory tubercle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oligella

oligella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

oligella ureolytica

oligella ureolytica is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

oligella urethralis

oligella urethralis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

oligodendroglia

oligodendroglia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oligodendroglial neoplasm

oligodendroglial neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

oligogenic inheritance

oligogenic inheritance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oligomenorrhea

oligomenorrhea is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

oligomycin

oligomycin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

oligonucleotide

oligonucleotide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oligopeptide

oligopeptide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oligosaccharide

oligosaccharide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olivary nucleus

olivary nucleus is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olivomycin

olivomycin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

olivopontocerebellar atrophy

olivopontocerebellar atrophy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olmesartan medoxomil

olmesartan medoxomil is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olopatadine hydrochloride

olopatadine hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

olsenella

olsenella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

olsenella uli

olsenella uli is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

oltipraz

oltipraz is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

omacetaxine mepesuccinate

omacetaxine mepesuccinate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

omalizumab

omalizumab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

omasum

omasum is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

omega-n-methylarginine

omega-n-methylarginine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

omeprazole

omeprazole is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

ommaya reservoir

ommaya reservoir is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oncocytic neoplasm

oncocytic neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

oncogenic virus

oncogenic virus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

oncogenicity

oncogenicity is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

oncology

oncology is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oncology nursing

oncology nursing is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oncolytic virotherapy

oncolytic virotherapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oncolytic viruses

oncolytic viruses is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

oncoprotein

oncoprotein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oncostatin m

oncostatin m is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ondansetron

ondansetron is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

ondansetron hydrochloride

ondansetron hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

onychomadesis

onychomadesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oogenesis

oogenesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oogonium

oogonium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ooplasm

ooplasm is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

open bite

open bite is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

operant conditioning

operant conditioning is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

operating room

operating room is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

operating tables

operating tables is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

operon

operon is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ophthalmic solution

ophthalmic solution is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

opiate alkaloid

opiate alkaloid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

opiate assay

opiate assay is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

opiate overdose

opiate overdose is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

opioid receptor

opioid receptor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

opisthorchis felineus

opisthorchis felineus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

oprelvekin

oprelvekin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

opsonin

opsonin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

optic chiasma

optic chiasma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

optic nerve disorder

optic nerve disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

optic tract

optic tract is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

optical illusion

optical illusion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

optical rotation

optical rotation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

optical trap

optical trap is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

optics

optics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

optometrist

optometrist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oral

oral is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oral administration

oral administration is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oral health

oral health is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oral hemorrhage

oral hemorrhage is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

oral spray

oral spray is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

orantinib

orantinib is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

orbital contusion

orbital contusion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

orbital fractures

orbital fractures is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

orbital myositis

orbital myositis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

orbital neoplasm

orbital neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

orbivirus

orbivirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

order coleoptera

order coleoptera is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

order spirochaetales

order spirochaetales is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oregovomab

oregovomab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

orexin

orexin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

organ culture

organ culture is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

organ transplantation

organ transplantation is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

organic chemical

organic chemical is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

organic impurity

organic impurity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

organic oxide

organic oxide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

organism

organism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

organization name

organization name is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

organogenesis

organogenesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

organoid

organoid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

organometallic compound

organometallic compound is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

organosilicon compounds

organosilicon compounds is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

orgasm

orgasm is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

orientation

orientation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

orlistat

orlistat is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ornithine

ornithine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ornithine decarboxylase

ornithine decarboxylase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oropharyngeal

oropharyngeal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oropharyngeal neoplasm

oropharyngeal neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

orotic aciduria

orotic aciduria is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

orphenadrine

orphenadrine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ortataxel

ortataxel is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

orthobunyavirus

orthobunyavirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

orthodontic appliance

orthodontic appliance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

orthodontic wires

orthodontic wires is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

orthodontist

orthodontist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

orthohepadnavirus

orthohepadnavirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

orthokeratosis

orthokeratosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

orthomyxoviridae

orthomyxoviridae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

orthopoxvirus

orthopoxvirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

orthoptera

orthoptera is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

orthoreovirus

orthoreovirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

orthotic devices

orthotic devices is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

os odontoideum

os odontoideum is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oscillometry

oscillometry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oseltamivir

oseltamivir is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

oseltamivir phosphate

oseltamivir phosphate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

osmium

osmium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

osmium tetroxide

osmium tetroxide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

osmoregulation

osmoregulation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

osseous metaplasia

osseous metaplasia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ossifying fibroma

ossifying fibroma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteitis deformans

osteitis deformans is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteoblastoma

osteoblastoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteocalcin

osteocalcin is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteocalcin assay

osteocalcin assay is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteochondritis

osteochondritis is a medical condition or clinical

entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteochondromatosis

osteochondromatosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteogenesis

osteogenesis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteolysis

osteolysis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteoma cutis

osteoma cutis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteon

osteon is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteonectin

osteonectin is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteopoikilosis

osteopoikilosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteopontin

osteopontin is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteoporotic fracture

osteoporotic fracture is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteoprotegerin test

osteoprotegerin test is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteoradionecrosis

osteoradionecrosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

osteosclerosis

osteosclerosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

other

other is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

other race

other race is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

otic ointment

otic ointment is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

otolaryngologist

otolaryngologist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ouabain

ouabain is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ounce

ounce is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

outcomes research

outcomes research is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

outlier

outlier is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ovalbumin

ovalbumin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ovalocyte count

ovalocyte count is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ovarian failure

ovarian failure is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ovarian fibromata

ovarian fibromata is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ovarian follicle

ovarian follicle is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ovarian gonadoblastoma

ovarian gonadoblastoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ovarian hemorrhage

ovarian hemorrhage is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ovarian infection

ovarian infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ovarian rupture

ovarian rupture is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ovarian teratoma

ovarian teratoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ovarian thecoma

ovarian thecoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ovary disease

ovary disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

ovary neoplasm

ovary neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

overbite

overbite is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

overlay denture

overlay denture is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

overriding aorta

overriding aorta is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oversedate

oversedate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oviposition

oviposition is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ovomucin

ovomucin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ovotestis

ovotestis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ownership

ownership is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxacillin

oxacillin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

oxalates

oxalates is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxaliplatin

oxaliplatin is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxandrolone

oxandrolone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxaprozin

oxaprozin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxazepam

oxazepam is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

oxazole

oxazole is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

oxcarbazepine

oxcarbazepine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxidants

oxidants is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxidation-reduction

oxidation-reduction is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxide

oxide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxidopamine

oxidopamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxidoreductase

oxidoreductase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxime

oxime is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oximetry

oximetry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxonic acid

oxonic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxprenolol

oxprenolol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxycodone

oxycodone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxycodone hydrochloride

oxycodone hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxygen pulse

oxygen pulse is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxygen therapy

oxygen therapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxygen transport

oxygen transport is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxygenases

oxygenases is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxygenator

oxygenator is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxyhemoglobin

oxyhemoglobin is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxylipins

oxylipins is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxymetazoline

oxymetazoline is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxymetholone

oxymetholone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxymorphone

oxymorphone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxyphil cell

oxyphil cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxyphilic adenoma

oxyphilic adenoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxytocic

oxytocic is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

oxytocin

oxytocin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ozone

ozone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Synonyms:

P

P Wave

The first deflection on the ECG, representing atrial depolarization. Normal P waves are upright in leads I and II, inverted in aVR, and less than 0.12 seconds (3 small boxes) in duration and 2.5 mm in amplitude.

Synonyms:

Pacemaker, Artificial

An implanted device that sends electrical impulses to maintain an appropriate heart rhythm. **Synonyms:** Artificial pacemaker

Pacemaker, Natural

The sinoatrial node, whose cells normally initiate the heartbeat. **Synonyms:** Sinoatrial node

PAD

Peripheral artery disease caused by narrowed arteries, usually affecting the legs. **Synonyms:** Peripheral artery disease

Painkillers

Medicines or other treatments that relieve pain. **Synonyms:** Analgesics

Palpate

To examine body tissues by carefully feeling them with the hands. **Synonyms:** Palpation

Pelvic Floor

A group of muscles and connective tissues supporting the pelvic organs and controlling urinary and fecal continence. **Synonyms:**

Pepsin

A stomach enzyme that begins digestion of proteins.

Synonyms:

Percutaneous Electrical Nerve Stimulation

Electrical stimulation delivered through the skin to reduce pain signals. **Synonyms:** PENS

Percutaneous Transluminal Coronary Angioplasty

Balloon-based treatment that widens a narrowed coronary artery, often followed by stent placement. **Synonyms:** PTCA; balloon angioplasty

Performance Anxiety

Anxiety about sexual performance that can interfere with sexual function. **Synonyms:**

Periodic Limb Movement Disorder

Repeated involuntary limb movements during sleep that may disrupt rest. **Synonyms:** PLMD

Periodization

Planned variation of exercise volume and intensity over time. **Synonyms:**

Peripheral Vascular Disease

Disease involving narrowed or blocked blood vessels outside the heart and brain. **Synonyms:** Peripheral arterial disease

Peripheral Vision

The portion of the visual field outside the direct line of sight. **Synonyms:** Side vision

Personal Emergency Response System

A wearable or nearby device that lets a person summon help during an emergency. **Synonyms:** Medical alert system

Pessimism

A tendency to expect negative outcomes or interpret situations unfavorably. **Synonyms:**

Peyronie's Disease

Scar tissue within the penis that can cause curvature and pain during erection. **Synonyms:** Peyronie disease

Phantom Limb

The sensation that an amputated limb is still present, sometimes with pain. **Synonyms:** Phantom-limb sensation

Phlebotomy

The collection of blood from a vein, usually with a needle. **Synonyms:** Venipuncture

Photoreceptors

Specialized retinal cells that detect light; rods and cones are the two main types. **Synonyms:**

Physician Assistant

A licensed clinician who evaluates patients and provides medical care under a physician's practice framework. **Synonyms:** PA

Pigment

A substance that gives tissue, hair, skin, or other material its color. **Synonyms:**

Piles

Enlarged or swollen veins in the anus or lower rectum. **Synonyms:** Hemorrhoids

Pill

A solid oral dosage form containing medicine or another active ingredient. **Synonyms:** Tablet

Plasma

The liquid portion of blood in which blood cells and dissolved substances circulate. **Synonyms:**

Plasma Cells

Mature B lymphocytes that produce antibodies. **Synonyms:**

Platelets

Small blood components that gather at damaged vessels and help form clots. **Synonyms:** Thrombocytes

Polymenorrhea

Menstrual bleeding occurring at unusually short intervals. **Synonyms:**

Polyp

A growth projecting from a mucous membrane; it may be benign, precancerous, or rarely cancerous. **Synonyms:**

Positive Psychology

The study of well-being, strengths, resilience, and factors that help people thrive. **Synonyms:**

Posterior Chamber

The part of the eye between the iris and lens, containing aqueous humor. **Synonyms:**

Posterior Heel Bursitis

Inflammation of a bursa near the back of the heel, causing pain and swelling. **Synonyms:** Retrocalcaneal bursitis

Posterior Keyhole Foraminotomy

A minimally invasive operation that enlarges a spinal nerve opening to relieve compression. **Synonyms:**

Postpartum

Relating to the period after childbirth. **Synonyms:** Postnatal

Post-Traumatic Headache

A headache that begins or persists after a head or neck injury. **Synonyms:**

Power

The rate at which work is performed; in exercise, it combines force and movement speed. **Synonyms:**

Power Training

Exercise designed to improve the ability to produce force rapidly. **Synonyms:** Explosive training

Prazosin

An alpha-1 blocker that relaxes blood vessels and smooth muscle. **Synonyms:**

Precursor

A substance that can be converted into another biologically active substance. **Synonyms:**

Prehypertension

Blood pressure above normal but below the former threshold for hypertension. **Synonyms:** Elevated blood pressure

Preload Reduction

Lowering the amount of blood returning to the heart to reduce cardiac workload. **Synonyms:**

Premature Ventricular Contraction

An early heartbeat arising from the ventricles. **Synonyms:** PVC

Prick Test

A skin test in which small amounts of suspected allergens are introduced into the skin. **Synonyms:** Skin-prick test

Primary Angioplasty

Angioplasty used as the initial treatment to reopen an artery during an acute heart attack. **Synonyms:**

Primary Osteoporosis

Bone loss due to aging, menopause, or other normal

physiological processes rather than another disease.

Synonyms:

Protocol

A predefined plan specifying procedures for a clinical study, examination, or treatment. **Synonyms:**

PSA

Prostate-specific antigen, a protein measured in blood to help evaluate prostate conditions. **Synonyms:** Prostate-specific antigen

PSA Velocity

The rate at which PSA concentration changes over time. **Synonyms:**

Psychogenic

Caused or substantially influenced by psychological factors. **Synonyms:**

Psychogenic Erectile Dysfunction

Erectile difficulty primarily related to psychological factors rather than a structural disease. **Synonyms:**

Psychosomatic

Relating to physical symptoms influenced by psychological processes or stress. **Synonyms:**

PTCA

Percutaneous transluminal coronary angioplasty, a procedure that opens a narrowed coronary artery. **Synonyms:** Percutaneous coronary intervention

Puborectalis Muscle

A pelvic-floor muscle sling around the rectum that helps maintain continence. **Synonyms:**

Pudendal Arteries

Arteries supplying blood to the external genital and perineal region. **Synonyms:**

Pudendal Nerve

The nerve carrying sensation and motor signals to much of the perineum and pelvic floor. **Synonyms:**

Pulmonary

Relating to the lungs. **Synonyms:**

Pulmonary Veins

Veins carrying oxygen-rich blood from the lungs to the left atrium. **Synonyms:**

Pulse Pressure

The difference between systolic and diastolic blood pressure. **Synonyms:**

Pump Failure

Severe weakening of the heart's pumping ability, causing inadequate blood flow to organs. **Synonyms:** Cardiogenic pump failure

Purulent

Containing or producing pus. **Synonyms:**

Pyloric Sphincter

A muscular valve regulating passage of stomach contents into the duodenum. **Synonyms:** Pylorus

Pyridoxine

A form of vitamin B6 involved in metabolism and nervous-system function. **Synonyms:** Vitamin B6

P2Y12 Inhibitor

An antiplatelet drug that blocks the platelet P2Y12 ADP receptor, reducing activation and aggregation. Clopidogrel, prasugrel, and ticagrelor are used in selected acute coronary syndrome and percutaneous coronary intervention settings, with bleeding and drug-specific contraindications considered.

Synonyms:

p53 Tumor Suppressor

The p53 protein, encoded by the TP53 gene on chromosome 17p, is a transcription factor and the most commonly mutated gene in human cancer, with mutations found in over 50 percent of all malignancies.

Synonyms:

Pacemaker

An implanted electronic device that delivers electrical impulses to the heart to regulate heart rate and rhythm. Indications include symptomatic bradycardia, high-degree AV block, and sick sinus syndrome. Single-chamber pacemakers pace the atrium or ventricle; dual-chamber pacemakers pace both.

Synonyms:

Pacemaker Complications

Early: pneumothorax, hematoma, cardiac perforation/tamponade, lead dislodgement. Late: lead fracture, battery depletion, infection, tricuspid regurgitation from lead interference, venous thrombosis, and pacemaker syndrome (AV dyssynchrony in VVI pacing).

Synonyms:

Pachygyria

A cortical malformation in which the cerebral gyri are abnormally broad and reduced in number because of impaired neuronal migration. It may cause developmental delay, intellectual disability, seizures, and motor or neurological impairment of variable severity.

Synonyms:

Pachymeningitis

Inflammation of the dura mater (pachymeninx), the outermost layer of the meninges. Pachymeningitis is less common than leptomeningitis (inflammation of pia and arachnoid mater).

Synonyms:

Pacing

Planned regulation of activity, rest, and intensity to avoid symptom exacerbation while gradually increasing tolerance. It is used in fatigue, chronic pain, cardiopulmonary disease, and post-viral conditions.

Synonyms:

PACS

Picture Archiving and Communication System. Digital image storage and retrieval.

Synonyms:

PAD Management

Atherosclerotic occlusive disease of arteries supplying the lower limbs, causing reduced blood flow. See peripheral arterial disease.

Synonyms:

Page kidney

Renal compression from a perinephric hematoma or mass causing hypertension through activation of the renin-angiotensin system, typically following trauma or occurring in patients on anticoagulation.

Synonyms:

Paget Disease of Bone

A chronic bone disorder characterized by excessive, disorganized bone remodeling with increased osteoclastic bone resorption followed by compensatory osteoblastic bone formation, producing structurally abnormal bone that is enlarged, weak, and prone to fracture.

Synonyms:

Paget's Disease

A chronic bone disorder characterized by excessive, disorganized bone remodeling with increased osteoclastic bone resorption followed by compensatory osteoblastic bone formation, producing structurally abnormal bone that is enlarged, weak, and prone to fracture. See Paget Disease of Bone.

Synonyms:

Paget Disease of the Nipple

A rare breast cancer involving the nipple and areola, often causing persistent eczema-like scaling, redness, itching, burning, or discharge. It may be associated with underlying ductal carcinoma in situ or invasive breast cancer.

Synonyms:

Pain

An unpleasant sensory and emotional experience associated with actual or potential tissue damage, serving as a protective alerting system but becoming maladaptive when chronic (lasting >3 months).

Synonyms:

Pain (Geriatric)

Pain in an older adult. Assessment considers communication, cognition, function, medicines, and possible causes; treatment is individualized to the person and condition.

Synonyms: Geriatric

Pain (Vascular)

Pain caused by impaired blood flow, often appearing in a limb with exertion as claudication or, in more severe disease, at rest.

Synonyms: Vascular

Pain Assessment Scales

Pain assessment uses standardized scales to quantify pain intensity. Numeric rating scale (NRS) asks patients to rate pain from 0 (no pain) to 10 (worst pain imaginable). Visual analog scale (VAS) is a 10 cm line with anchors. Faces pain scale (Wong-Baker FACES) uses facial expressions for children and cognitively impaired patients.

Synonyms:

Pain Management

Assessment and treatment of pain using appropriate pharmacologic, physical, psychological, and interventional approaches. Treatment is individualized according to the cause, severity, duration, functional effect, and risks of each option.

Synonyms:

Pain Relief (Analgesia)

Achieved through pharmacologic, interventional, physical, and psychologic modalities targeting nociceptive transmission and pain perception.

Synonyms: Analgesia

Pair Production

Photon interaction producing electron-positron pair. Requires energy >1.022 MeV.

Synonyms:

Paleness

Unusual lightening of the skin or mucous membranes caused by reduced blood flow, vasoconstriction, ane-

mia, shock, hypothermia, or other systemic illness. Sudden paleness with weakness, bleeding, chest pain, or fainting requires urgent assessment.

Synonyms:

Palindromic Rheumatism

Characterized by recurrent, self-limited attacks of mono- or oligoarthritis (hours to days), periarticular soft tissue swelling, no radiographic erosions between attacks. 30-50% evolve to RA (anti-CCP positive predicts progression).

Synonyms:

Palliative Care

Specialized medical care for serious illness focusing on symptom relief and quality of life. Not limited to end-of-life. Can be provided alongside curative treatment. Components: pain management, symptom control, psychosocial support, spiritual care, advance care planning. Referral early in disease course.

Synonyms:

Palliative Rehabilitation

Rehabilitation for people with serious or life-limiting illness, focused on comfort, function, participation, symptom management, and quality of life.

Synonyms:

Pallister-Hall Syndrome

A congenital disorder usually caused by pathogenic variants in *GLI3*. It is characterized by hypothalamic hamartoma and mesoaxial polydactyly and may include imperforate anus, renal or airway anomalies, and pituitary hormone abnormalities.

Synonyms:

Pallor

Paleness of the skin and mucous membranes, caused by reduced cutaneous blood flow (vasoconstriction—cold, shock, anemia, fear) or reduced hemoglobin/pigmentation.

Synonyms:

Palmar erythema of pregnancy

Symmetrical redness of the palms occurring during pregnancy, thought to be related to elevated circulating oestrogen levels causing vasodilatation. It is a benign, physiological finding that typically resolves after delivery and requires no specific treatment.

Synonyms:

Palmar Grasp Reflex

A primitive reflex in which an infant flexes the fingers around an object placed in the palm. It is normally present at birth and gradually diminishes as voluntary grasp develops; asymmetry or persistence may warrant neurologic assessment.

Synonyms:

Palpation

The second step of the physical examination, utilizing the sense of touch to evaluate body structures for size, shape, consistency, mobility, tenderness, temperature, and vibration.

Synonyms:

Palpebral Conjunctiva

The part of the conjunctiva that lines the inner surfaces of the eyelids. It joins the bulbar conjunctiva at the fornices and helps protect and lubricate the eye.

Synonyms:

Palpitation

The subjective sensation of a rapid, forceful, or irregular heartbeat. Palpitations are a common symptom with a broad differential.

Synonyms:

Palsy of the long thoracic nerve

Weakness or paralysis of the long thoracic nerve (C5-C7), which innervates the serratus anterior muscle. Causes include trauma, compression, viral infection, or idiopathic. Results in winging of the scapula, particularly when pushing against a wall, and impaired overhead arm elevation. Most cases resolve spontaneously.

Synonyms:

Pancoast Syndrome

A clinical syndrome caused by an apical lung tumour invading the lower brachial plexus, sympathetic chain, or adjacent structures. It may produce severe shoulder and arm pain, hand weakness, sensory loss, and Horner syndrome.

Synonyms:

Pancoast Tumor

Superior sulcus tumor invading brachial plexus, subclavian vessels, and sympathetic chain. Causes Horner syndrome, shoulder/arm pain, and hand muscle atrophy. Treated with chemoradiation followed by surgery.

Synonyms:

Pancreas

Retroperitoneal gland (15-20 cm) behind the stomach, spanning from duodenum to spleen. Exocrine function: acinar cells secrete digestive enzymes (amylase, lipase, proteases) and bicarbonate into pancreatic duct to duodenum.

Synonyms:

Pancreas Divisum

A congenital anomaly in which the dorsal and ventral pancreatic ducts fail to fuse. Most people are asymptomatic, but impaired drainage through the minor papilla can predispose to recurrent pancreatitis.

Synonyms:

Pancreatectomy

Removal of all (total) or part of the pancreas. Pancreaticoduodenectomy (Whipple) is used for pancreatic head and periampullary tumors; distal pancreatectomy for body and tail lesions.

Synonyms:

Pancreatic Abscess

A localized collection of pus within or adjacent to the pancreas, usually developing as a complication of infected pancreatic necrosis or severe pancreatitis. It may cause persistent fever, abdominal pain, sepsis, and organ failure.

Synonyms:

Pancreatic Adenocarcinoma

A malignant tumor arising from the exocrine ductal cells of the pancreas. It may cause jaundice, abdominal or back pain, weight loss, or no early symptoms; risk factors include smoking, chronic pancreatitis, diabetes, obesity, and inherited cancer syndromes.

Synonyms:

Pancreatic Cancer

Malignancy arising in the pancreas, most often pancreatic ductal adenocarcinoma. Symptoms may include jaundice, abdominal or back pain, weight loss, or digestive problems, although early disease may be asymptomatic. Treatment depends on tumor type, extent, and patient factors.

Synonyms:

Pancreatic Duct

The main duct of the pancreas, conveying exocrine pancreatic secretions to the duodenum. It commonly joins the common bile duct before opening at the major duodenal papilla.

Synonyms:

Pancreatic Elastase

A stool test that measures elastase-1 as an indirect estimate of pancreatic exocrine function. Low results support pancreatic exocrine insufficiency, but interpretation depends on stool consistency, the assay, and the clinical setting. Replacement pancreatic enzymes do not usually interfere with the test.

Synonyms:

Pancreatic Enzyme

Digestive enzymes secreted by pancreatic acinar cells into the duodenum, including proteases (trypsinogen, chymotrypsinogen, proelastase, procarboxypeptidases), amylase (starch digestion), and lipase (triglyceride digestion), along with bicarbonate from ductal cells to neutralize gastric acid.

Synonyms:

Pancreatic Exocrine Insufficiency

Inadequate secretion or delivery of pancreatic digestive enzymes and bicarbonate, causing maldigestion and malabsorption. Chronic pancreatitis, cystic fibrosis, pancreatic resection, and advanced pancreatic disease are important causes; steatorrhea and weight loss may respond to pancreatic enzyme replacement.

Synonyms:

Pancreatic Insufficiency

Inadequate production or delivery of pancreatic digestive enzymes, causing impaired digestion and absorption, weight loss, diarrhea, or fatty stools. Treatment may include pancreatic enzyme replacement and nutritional support.

Synonyms:

Pancreatic Mass

Abnormality in pancreas detected on imaging. Pancreatic adenocarcinoma most common malignancy. Neuroendocrine tumors also important.

Synonyms:

Pancreatic Neuroendocrine Tumors

Tumors arising from neuroendocrine cells of the pancreas. They may produce hormones, such as insulin or gastrin, or be nonfunctioning. Classification and prognosis use differentiation, grade, proliferation measures, stage, and clinical behavior.

Synonyms:

Pancreatic Pseudocyst

A pancreatic pseudocyst is a localized collection of pancreatic fluid surrounded by a wall of granulation tissue without an epithelial lining, typically occurring as a complication of acute or chronic pancreatitis. Unlike true cysts, pseudocysts lack an epithelial lining, which is why they are called pseudocysts.

Synonyms:

Pancreatic Surgery

Pancreaticoduodenectomy (Whipple): pancreatic head, duodenum, gallbladder, distal stomach (pylorus-preserving standard), common bile duct;

reconstruction: pancreaticojejunostomy (duct-to-mucosa or invagination), hepaticojejunostomy, gastrojejunostomy/duodenojejunostomy.

Synonyms:

Pancreatic Trauma

Injury to the pancreas caused by blunt or penetrating trauma. Assessment may require CT, laboratory testing, and observation or intervention according to the injury.

Synonyms:

Pancreatitis

Inflammation of the pancreas that may be acute or chronic. Causes include gallstones, alcohol, medicines, metabolic disorders, and other conditions; severity ranges from mild to necrotizing disease.

Synonyms:

Pancreatoblastoma

A rare malignant pancreatic epithelial tumour occurring mainly in children. It may present with an abdominal mass, pain, vomiting, weight loss, or hormonal symptoms and requires imaging, tissue diagnosis, staging, and multidisciplinary treatment.

Synonyms:

Pancreatography

Contrast imaging of pancreatic duct. ERCP approach. Evaluates pancreatic duct abnormalities.

Synonyms:

Pancytopenia

Simultaneous reduction of red cells, white cells, and platelets, indicating bone marrow failure or infiltration.

Synonyms:

PANDAS

Pediatric autoimmune neuropsychiatric disorder associated with streptococcal infection, a proposed syndrome involving abrupt onset or worsening of obsessive-compulsive symptoms or tics in a child after infection. Diagnosis is clinical and remains con-

troversial; evaluation should also consider common neurologic, psychiatric, and infectious causes.

Synonyms:

Pandemic

Epidemic spread across multiple countries/continents. Examples: COVID-19, Spanish flu, HIV/AIDS.

Synonyms:

Paneth Cell

Specialized secretory epithelial cell at the base of a small-intestinal crypt that produces antimicrobial substances.

Synonyms:

Panic Attack

An abrupt surge of intense fear or discomfort reaching a peak within minutes.

Synonyms:

Panic Disorder

Recurrent unexpected panic attacks, which are abrupt surges of intense fear or discomfort peaking within minutes.

Synonyms:

Panlobular Emphysema

A subtype involving diffuse destruction of the entire acinus. It predominantly affects the lower lobes and is classically associated with alpha-1 antitrypsin deficiency. The destruction is more uniform compared to centriacinar emphysema.

Synonyms:

Panniculitis

Inflammation of the subcutaneous fat, presenting as tender, erythematous or violaceous nodules and plaques, most commonly on the lower extremities. The classification is based on whether the septa or lobules of the fat are primarily affected, and the aetiology includes infections, autoimmune diseases, medications, and pancreatic disease.

Synonyms:

Panoramic Radiograph

An extraoral radiograph displaying both jaws, teeth, temporomandibular regions, and surrounding structures in one image. It is useful for surveying dentition, development, impaction, and gross osseous pathology but has less fine detail than intraoral radiographs.

Synonyms:

Panretinal Photocoagulation

A laser treatment that applies scattered burns to the peripheral retina to reduce abnormal blood-vessel growth. It is used for selected proliferative retinal diseases, including proliferative diabetic retinopathy, and can affect peripheral or night vision.

Synonyms:

Panuveitis

Inflammation involving the anterior uvea, vitreous, and posterior uveal tissues. It can threaten vision and may be caused by infection, autoimmune disease, trauma, or other disorders; treatment depends on the cause and severity.

Synonyms:

Pap Smear

Papanicolaou test (cervical cytology): a screening test collecting cervical cells (conventional or liquid-based) to detect precancerous cervical changes (CIN) and cancer, usually combined with HPV DNA testing (co-testing).

Synonyms:

Papillary Muscle

Muscular projections of the ventricular myocardium attached by chordae tendineae to the atrioventricular valve leaflets (anterolateral and posteromedial in the left ventricle; anterior, septal, and posterior in the right ventricle).

Synonyms:

Papillary Thyroid Carcinoma

Most common histological subtype of thyroid carcinoma accounting for approximately eighty percent of cases. Characterized by nuclear features including

nuclear grooves, intranuclear cytoplasmic inclusions, and Orphan Annie eye nuclei. Often multifocal and bilateral with lymph node metastases.

Synonyms:

Papilledema

Swelling of the optic disc caused by elevated intracranial pressure, and it is a critical clinical sign that requires urgent investigation to identify the underlying cause, which may be life-threatening.

Synonyms:

Papilloma

A benign epithelial neoplasm characterised by finger-like projections of fibrovascular tissue covered by hyperplastic epithelium, most commonly caused by human papillomavirus infection in cutaneous warts or mucosal sites. Cutaneous papillomas present as flesh-coloured, rough, or pedunculated growths.

Synonyms:

Papillomatosis cutis lymphostatica

Diffuse, warty, papillomatous thickening of the skin resulting from chronic lymphoedema, most commonly affecting the lower extremities in the setting of long-standing venous or lymphatic insufficiency. The skin develops cobblestone-like hyperkeratotic papules and plaques due to lymph stasis and chronic inflammation.

Synonyms:

Papular

A papule: a small, solid, elevated skin lesion <1 cm in diameter (palpable), of various colors and etiologies.

Synonyms:

Papular Urticaria

A hypersensitivity reaction to insect bites, especially from fleas, bedbugs, or mosquitoes, causing recurrent intensely itchy papules or small vesicles, often clustered on exposed areas in children. Diagnosis is clinical.

Synonyms:

Papule

A solid, raised skin lesion, conventionally less than 1 cm in diameter. Papules may arise from epidermal, dermal, inflammatory, infectious, or neoplastic processes.

Synonyms:

Paracentesis

Percutaneous needle aspiration of ascitic fluid from the peritoneal cavity. Used for diagnostic analysis to determine the cause of ascites and for therapeutic removal of large volumes for symptom relief. The serum-ascites albumin gradient is calculated to differentiate portal hypertensive from non-portal hypertensive causes.

Synonyms:

Paracetamol overdose

Toxic ingestion of paracetamol that can cause dose-dependent hepatic necrosis; risk assessment uses the timing and serum concentration of the ingestion.

Synonyms:

Paracetamol Toxicity

Liver injury caused by excessive acetaminophen (paracetamol) exposure. Severe poisoning may cause nausea, abdominal pain, liver failure, or death and requires urgent assessment.

Synonyms:

Paraesophageal hernia

A hiatal hernia in which part of the stomach moves through the diaphragm beside the esophagus. It may cause obstruction or strangulation even when reflux is absent.

Synonyms:

Paraganglioma

A neuroendocrine tumor arising from extra-adrenal paraganglia, related to pheochromocytoma; may secrete catecholamines. Associations with hereditary syndromes (SDH mutations, VHL, NF1) warrant genetic counseling.

Synonyms:

Paragonimiasis

A parasitic infection caused by *Paragonimus* lung flukes, usually acquired by eating undercooked crustaceans. It commonly affects the lungs.

Synonyms:

Parainfluenza

Infection caused by human parainfluenza viruses, commonly producing croup, laryngitis, bronchiolitis, or pneumonia in children. Adults often have a mild upper-respiratory illness.

Synonyms:

Paranasal Sinuses

Air-filled cavities in the bones around the nose that connect with the nasal cavity through small openings. They are lined with mucosa and contribute to mucus production and resonance of the voice.

Synonyms:

Paraneoplastic disorder

A systemic syndrome caused by a malignancy through mechanisms other than direct invasion, metastasis, or metabolic effects of the tumor. Paraneoplastic syndromes result from hormone production, immune-mediated mechanisms, or cytokine release by the tumor, affecting distant organs.

Synonyms:

Paraneoplastic Neurologic Syndrome

Neurologic symptoms from immune response to cancer. Examples: Lambert-Eaton, cerebellar degeneration.

Synonyms:

Paraneoplastic Syndrome

Symptoms caused by cancer but not by tumor mass or metastasis. Mechanisms: hormone production, immune cross-reaction. Examples: SIADH, Cushing syndrome, Lambert-Eaton myasthenia, hypercalcemia.

Synonyms:

Paranoia

A thought process characterized by excessive or

irrational suspiciousness and distrust of others, often manifesting as delusions of persecution, reference, or grandeur.

Synonyms:

Paraphilia

A condition characterized by intense and persistent sexual interest in atypical objects, situations, or individuals. Examples: exhibitionism, fetishism, frotteurism, pedophilic disorder, sexual masochism, sexual sadism, transvestic disorder, voyeurism, and paraphilia not otherwise specified.

Synonyms:

Paraphimosis

Urological emergency in uncircumcised males occurring when a retracted, tight foreskin becomes trapped behind the coronal sulcus of the glans penis, forming a constricting ring.

Synonyms:

Parapneumonic Effusion

Pleural effusion complicating pneumonia. Simple effusions resolve with antibiotics. Complicated effusions (pH < 7.2, glucose < 60 mg/dL) require chest tube drainage.

Synonyms:

Parapneumonic Pleural Effusion

Pleural fluid accumulation associated with bacterial pneumonia. It may be uncomplicated or progress to a complicated effusion or empyema, requiring imaging, pleural-fluid analysis, antibiotics, and sometimes drainage.

Synonyms:

Paraquat

A highly toxic herbicide. Ingestion can cause injury to the mouth and gastrointestinal tract, kidney failure, and delayed lung injury; severe poisoning has a high risk of death.

Synonyms:

Paraseptal Emphysema

A form of emphysema characterized by destruction

of alveoli adjacent to the pleura. It typically affects young adults and predisposes to spontaneous pneumothorax due to rupture of subpleural blebs. It may be associated with Marfan syndrome.

Synonyms:

Parasite

An organism that lives on or within a host organism, deriving nutrients at the host's expense.

Synonyms:

Parasitemia

The presence and measurable burden of parasites in the blood. It is used particularly for malaria and some blood-borne protozoal infections and may correlate with disease severity.

Synonyms:

Parasitic Infections

Malaria: *Plasmodium* (*falciparum*, *vivax*, *ovale*, *malariae*, *knowlesi*). *Falciparum*: cerebral malaria, severe anemia, ARDS, AKI, hypoglycemia. Diagnosis: thick/thin smear, RDT (HRP2 for *P. falciparum*, pLDH for all species, aldolase). Amoebiasis: *E. histolytica*, stool antigen, PCR. Giardiasis: stool antigen, duodenal aspirate.

Synonyms:

Parasitology

The branch of microbiology that studies parasites, including protozoa, helminths, and ectoparasites. Parasitic infections are a major global health problem, particularly in tropical and subtropical regions. Protozoan parasites include *Plasmodium* (malaria), *Trypanosoma* (sleeping sickness, Chagas disease), and *Leishmania* (leishmaniasis).

Synonyms:

Parasympathetic Nervous System

The craniosacral division of the autonomic nervous system mediating 'rest-and-digest' functions. Preganglionic fibers from cranial nerves III, VII, IX, X, and sacral nerves S2-S4 synapse on ganglia near or within target organs (short postganglionic fibers).

Synonyms:

Parasympatholytic

A drug that blocks muscarinic (cholinergic) receptors, inhibiting parasympathetic nervous system activity. Agents: atropine (bradycardia, organophosphate poisoning), ipratropium/tiotropium (COPD/asthma—bronchodilation), scopolamine (motion sickness), oxybutynin/tolterodine (overactive bladder), and glycopyrrolate.

Synonyms:

Parasympathomimetic

A drug that mimics or enhances parasympathetic (cholinergic) activity. Direct agonists: muscarinic (pilocarpine—glaucoma, dry mouth) and nicotinic agonists.

Synonyms:

Parathyroid

One of the small endocrine glands behind the thyroid that secretes parathyroid hormone and regulates calcium and phosphate balance.

Synonyms:

Parathyroid Crisis

Severe hypercalcemia with calcium greater than fourteen milligrams per deciliter causing altered mental status, cardiac arrhythmias, and acute kidney injury. Most commonly occurs in patients with primary hyperparathyroidism precipitated by dehydration, immobility, or thiazide diuretics.

Synonyms:

Parathyroid Hormone Physiology

Parathyroid hormone is the primary regulator of calcium homeostasis secreted by the four parathyroid glands in response to low ionized calcium levels detected by the calcium-sensing receptor.

Synonyms:

Parathyroid Hyperplasia

Enlargement and increased cellularity of one or more parathyroid glands causing excessive parathyroid hormone secretion and primary hyperparathyroidism. It may occur sporadically or as part of multiple endocrine neoplasia.

Synonyms:

Parathyroid Surgery

Operations on the parathyroid glands, usually performed for selected cases of primary or secondary hyperparathyroidism. The decision depends on symptoms, calcium levels, kidney involvement, bone disease, overall health, and current clinical guidance.

Synonyms:

Parathyroidectomy

Surgical removal of parathyroid glands for refractory secondary hyperparathyroidism unresponsive to medical therapy. Indicated when calcium-phosphorus product persistently elevated despite maximal medical management, symptomatic bone disease, or calciphylaxis. Subtotal or total parathyroidectomy with autotransplantation.

Synonyms:

Parenteral Nutrition

Intravenous nutrition bypassing GI tract. Total parenteral nutrition (TPN) provides complete nutrition. Indications: bowel failure, short bowel syndrome, prolonged NPO, malabsorption. Risks: infection, liver dysfunction, metabolic complications, line complications.

Synonyms:

Paresthesia

An abnormal sensation such as tingling, prickling, numbness, burning, or pins and needles. See Numbness and Tingling.

Synonyms:

Parietal Lobe

The cerebral lobe posterior to the central sulcus and above the lateral sulcus, containing the primary somatosensory cortex (postcentral gyrus, Brodmann 3,1,2) processing touch, pain, temperature, and proprioception, plus the somatosensory association cortex.

Synonyms:

Parinaud Syndrome

A disorder caused by dysfunction of the dorsal midbrain, characterized by impaired upward gaze, abnormal pupil responses, and convergence-retraction eye movements. Causes include tumors, stroke, multiple sclerosis, and hydrocephalus.

Synonyms:

Parkinson Disease

A progressive neurodegenerative disorder characterized by the loss of dopaminergic neurons in the substantia nigra pars compacta of the midbrain, leading to reduced dopamine levels in the striatum and the cardinal motor features of bradykinesia, resting tremor, rigidity, and postural instability.

Synonyms:

Parkinson's Disease

A progressive neurodegenerative disorder caused by selective loss of dopaminergic neurons in the substantia nigra pars compacta, leading to dopamine depletion in the striatum. The pathological hallmark is the presence of Lewy bodies, intracellular inclusions composed of aggregated alpha-synuclein protein, within surviving neurons.

Synonyms:

Parkinsonism

A clinical syndrome characterized by bradykinesia, rigidity, tremor (resting, pill-rolling), and postural instability. Idiopathic Parkinson disease: most common cause, responds well to levodopa.

Synonyms:

Paronychia

Inflammation of the nail fold. Acute paronychia is bacterial (*Staphylococcus aureus*, *Streptococcus*), presenting as painful, erythematous, swollen nail fold with possible abscess. Treatment includes warm compresses, antibiotics, and incision and drainage if abscessed.

Synonyms:

Parotid Gland

The largest of the three major salivary glands, lo-

cated in the preauricular region, extending from the zygomatic arch superiorly to the angle of the mandible inferiorly. The parotid gland is encased in the parotid fascia (investing layer of deep cervical fascia).

Synonyms:

Parotitis

Inflammation of the parotid gland caused by infection, duct obstruction, dehydration, medicines, or autoimmune disease. It may produce painful swelling near the ear, fever, dry mouth, or purulent drainage; treatment depends on the cause.

Synonyms:

Paroxysmal Nocturnal Dyspnea

Episodes of breathlessness that awaken a person from sleep after a period of lying down. It can occur with heart failure or other cardiopulmonary conditions and differs from orthopnea, which begins soon after lying down.

Synonyms:

Paroxysmal Nocturnal Hemoglobinuria

A rare, acquired clonal disorder of hematopoietic stem cells characterized by complement-mediated intravascular hemolysis, thrombosis (particularly in unusual sites such as hepatic, portal, and cerebral veins), and bone marrow failure.

Synonyms:

Paroxysmal Supraventricular Tachycardia

Sudden-onset and sudden-termination episodes of rapid regular tachycardia arising above the ventricles, usually involving an atrioventricular re-entry or nodal re-entry circuit. Palpitations, dizziness, chest discomfort, or syncope may occur.

Synonyms:

Partial Agonist

A partial agonist is a drug that binds to a receptor and produces a biological response that is less than the maximum possible response, even when all receptors are occupied. Partial agonists have affinity for the receptor but lower intrinsic activity

compared to full agonists, producing a submaximal response regardless of dose.

Synonyms:

Partial Denture

Removable prosthesis replacing some teeth. Metal framework or acrylic. Requires remaining teeth for support.

Synonyms:

Partial Response

Significant tumor reduction but not complete.

Synonyms:

Partial Thromboplastin Time

A coagulation test measuring the intrinsic and common pathways (factors XII, XI, IX, VIII, X, V, II, fibrinogen), used to monitor unfractionated heparin and detect factor deficiencies.

Synonyms:

Partial Volume Artifact

CT artifact from voxel containing multiple tissues. Reduced by thinner slices.

Synonyms:

Partial-Volume Effect

Underestimation or distortion of measured activity in small or low-contrast structures because the object size approaches the scanner's spatial resolution. It affects quantitative PET and SPECT and may require recovery or correction methods.

Synonyms:

Particle (Vascular)

An embolic particle used to occlude selected vessels under image guidance.

Synonyms: Vascular

Particulate Matter

Small solid or liquid particles suspended in air. Fine particles can penetrate the lungs and increase cardiovascular and respiratory risk.

Synonyms:

Partograph (Partogram)

A graphic record of cervical change, fetal descent, contractions, and maternal or fetal observations during labor. It can support communication and recognition of abnormal progress, but findings must be interpreted with current labor guidance and the overall clinical situation.

Synonyms: Partogram

Parturition (Childbirth)

The process of giving birth, encompassing three stages: (1) First stage: from the onset of regular uterine contractions (cervical effacement and dilation) to full dilation (10 cm). Latent phase—slow dilation (0–4 cm) over hours, variable duration. Active phase—more rapid dilation (4–10 cm), typically 1–1.5 cm/hour in nulliparous women.

Synonyms: Childbirth

Parvovirus B19

Human parvovirus B19: a small DNA virus causing erythema infectiosum ('fifth disease') in children, transmitted by respiratory droplets.

Synonyms:

Parvovirus B19 infection

A viral infection that may cause slapped-cheek rash, joint symptoms, or temporary suppression of red-cell production.

Synonyms:

Pasteurella multocida

A bacterium commonly carried by animals that can cause wound infections after bites or scratches and, less often, respiratory or bloodstream infection.

Synonyms:

Pasteurization

A heat treatment reducing microbial load in liquids by heating below boiling point to inactivate vegetative pathogens and spoilage organisms while preserving quality.

Synonyms:

Patau Syndrome

Trisomy 13, affecting 1 in 10,000-20,000 live births. Features: holoprosencephaly (most characteristic, incomplete forebrain division), microcephaly, microphthalmia or anophthalmia, cleft lip and palate, polydactyly (postaxial), clenched fists with overlapping fingers, and congenital heart defects (VSD, PDA, dextrocardia, 80%).

Synonyms:

Patch

A flat, circumscribed area of altered skin color larger than approximately 1 cm. It is the larger counterpart of a macule and may be caused by pigmentary, vascular, inflammatory, or neoplastic disease.

Synonyms:

Patch (Vascular)

A piece of biological or synthetic material sewn onto a blood vessel to widen or repair it.

Synonyms: Vascular

Patch Graft

Vascular graft for patch angioplasty. Bovine pericardium, PTFE.

Synonyms:

Patch Testing

Patch testing identifies allergens causing allergic contact dermatitis. The standard series includes 35 allergens. Additional custom trays include occupational and personal allergens. Patches are applied to the upper back for 48 hours and removed. Reading at 48 hours (initial) and 72 to 96 hours (delayed) identifies positive reactions.

Synonyms:

Patella

The largest sesamoid bone, embedded in the quadriceps tendon. It articulates with the femoral trochlea to form the patellofemoral joint and improves the mechanical efficiency of knee extension. It is triangular and covered by thick articular cartilage.

Synonyms:

Patella (Kneecap)

The largest sesamoid bone in the human body, embedded within the quadriceps tendon at the front of the knee. It improves the mechanical efficiency of knee extension, protects the front of the joint, and distributes forces across the femoral trochlea.

Synonyms: Kneecap

Patellofemoral Instability

A tendency of the patella to move abnormally or dislocate from the femoral trochlea. Risk factors include abnormal trochlear shape, a high-riding patella, ligament insufficiency, altered limb alignment, and previous dislocation.

Synonyms:

Patellofemoral Pain Syndrome

Anterior knee pain related to the patellofemoral joint, common in adolescents and young adults (especially runners). Etiology: multifactorial (malalignment, quadriceps imbalance, overuse, tight lateral structures, weak VMO, and patellar instability).

Synonyms:

Patent Ductus Arteriosus

A congenital heart defect characterized by persistent patency of the ductus arteriosus, a vessel connecting the pulmonary artery to the proximal descending aorta, which normally closes within the first few days of life. The resulting left-to-right shunt leads to pulmonary overcirculation and left heart volume overload.

Synonyms:

Patent Foramen Ovale

A persistent flap-like opening between the atria that normally permits fetal blood flow and usually closes after birth. It is often an incidental finding but may allow a clot to pass from the venous to the arterial circulation in selected circumstances.

Synonyms:

Paternal uniparental disomy 14 (UDP 14

pat) thoracic dysplasia

A rare genetic condition resulting from inheritance of both copies of chromosome 14 from the father, leading to dysregulated expression of imprinted genes on chromosome 14. It presents with severe thoracic hypoplasia, pulmonary hypoplasia, and characteristic facial features. It is a lethal condition in most cases.

Synonyms: UDP 14 pat

Paternity Testing

The use of genetic markers to establish or exclude a biological parent-child relationship, the reference method being short tandem repeat DNA profiling of the child, alleged father, and mother. Modern STR analysis commonly yields paternity probability exceeding 99.99 percent for true fathers.

Synonyms:

Pathogen

A tiny organism such as a virus, bacterium, or parasite that can invade the body and produce disease.

Synonyms:

Pathogenesis

Mechanism of disease development. Steps: initiation, promotion, progression.

Synonyms:

Pathogenic Variant

A genetic variant with sufficient validated evidence to be interpreted as causing or contributing to disease. Classification uses standardized evidence from population data, segregation, functional studies, computational analysis, and phenotype correlation.

Synonyms:

Pathogenicity

The capacity of a microorganism to cause disease in a susceptible host. Pathogenicity is a qualitative property, whereas virulence describes the relative degree of disease-causing capacity among strains or organisms.

Synonyms:

Pathologic Fracture

A fracture occurring through bone weakened by an underlying disease such as metastasis, myeloma, infection, benign tumor, or metabolic bone disorder. Evaluation includes characterization of the lesion and treatment of both the fracture and its cause.

Synonyms:

Pathologic Hypertrophy

The enlargement of an organ resulting from an increase in the size of its constituent cells without an increase in cell number, typically occurring as a response to chronically increased workload or hormonal stimulation.

Synonyms:

Pathology

Study of disease. Includes general pathology (cell injury, inflammation, neoplasia) and systemic pathology (organ-specific diseases).

Synonyms:

Pathology Artifact

A distortion, alteration, or contaminant introduced during specimen collection, fixation, processing, sectioning, staining, or imaging rather than representing true disease. Artifacts must be recognized to avoid diagnostic error.

Synonyms:

Patient

Person receiving medical care. Also: patient zero (initial case), patient safety.

Synonyms:

Patient Advocacy

Acting on behalf of a patient to ensure that the patient's needs, rights, and preferences are addressed in healthcare.

Synonyms:

Patient Communication

The exchange of information and understanding between a patient, caregivers, and healthcare professionals during care.

Synonyms:

Patient Education

The process of explaining a health condition, treatment, medicines, exercises, equipment, warning signs, and prevention strategies in a way the patient can understand and use.

Synonyms:

Patient Positioning

Placing and supporting a patient in a position that permits safe care, accurate examination or imaging, and adequate comfort.

Synonyms:

Patient Preparation

The instructions and assessments completed before a test or procedure, such as fasting, medicine review, hydration, consent, or skin preparation when required.

Synonyms:

Patient Safety

Prevention of harm from healthcare. Examples: medication errors, healthcare-associated infections, surgical errors. Strategies: checklists, hand hygiene, barcoding.

Synonyms:

Patient-Centered Care

Care respecting patient preferences, needs, values. Examples: shared decision-making, communication, coordination.

Synonyms:

Patient-Centered Outcome

An outcome that reflects what matters to the patient, including symptoms, function, quality of life, treatment burden, and ability to achieve personal goals, rather than relying only on laboratory or imaging measures.

Synonyms:

Patient-Controlled Analgesia

A method in which a patient self-administers pre-

scribed doses of analgesic medication using a programmable pump with preset safety limits. The medication, dose, and lockout interval are individualized according to the patient's condition and monitoring needs.

Synonyms:

Patient-Reported Outcome Measure

A validated questionnaire completed directly by a patient to assess symptoms, function, health status, or quality of life without clinician interpretation of the response.

Synonyms:

Patlak Plot

Linear graphical method for quantitative PET.

Synonyms:

Pattern Recognition Receptors

PRRs recognize PAMPs (pathogen) and DAMPs (damage). TLRs: TLR1/2 (lipoproteins), TLR2/6 (lipoteichoic acid), TLR3 (dsRNA), TLR4 (LPS, MD-2, CD14), TLR5 (flagellin), TLR7/8 (ssRNA), TLR9 (CpG DNA). Cytosolic: RIG-I/MDA5 (RNA), cGAS (DNA → cGAMP → STING → IFN), NOD1/2 (peptidoglycan).

Synonyms:

PCL Injuries

Posterior cruciate ligament (PCL) tears: dashboard injury (posterior tibial force), hyperflexion. Clinical: posterior drawer (most sensitive), quadriceps active test, posterior sag sign. Grade I (1-5mm), II (6-10mm), III (>10mm). Isolated PCL: nonoperative (brace, rehab) for Grade I/II; surgical for Grade III or combined.

Synonyms:

PCOS

Common endocrine disorder affecting six to twelve percent of reproductive-aged women characterized by hyperandrogenism, ovulatory dysfunction, and polycystic ovarian morphology on ultrasound. See Polycystic Ovary Syndrome.

Synonyms:

PCR (Polymerase Chain Reaction)

Technique amplifying specific DNA sequences exponentially. Components: template DNA, primers, DNA polymerase (Taq), nucleotides, buffer. Cycles: denaturation, annealing, extension. Applications: diagnostics, forensics, research.

Synonyms: Polymerase Chain Reaction

PE Anticoagulation

Anticoagulant treatment for pulmonary embolism to prevent clot extension and recurrence. Options include direct oral anticoagulants, heparins, and vitamin K antagonists; the choice and duration depend on bleeding risk, pregnancy, kidney function, cancer, provoking factors, and other clinical features.

Synonyms:

Peak Expiratory Flow Rate

The maximum flow rate achieved during a forced expiratory manoeuvre after maximal inspiration, measured in litres per minute (L/min) using a peak flow meter. PEFR reflects the degree of airflow obstruction and is effort-dependent.

Synonyms:

Peak Flow Meter

A handheld device that measures the maximum speed of forced expiration, often used to monitor asthma.

Synonyms:

Pearly penile papules

Small, benign, dome-shaped papules arranged circumferentially around the glans penis, representing normal anatomical variants requiring no treatment.

Synonyms:

Pectoralis Major Muscle

Thick fan-shaped chest muscle with clavicular and sternocostal heads, inserting on the lateral intertubercular groove lip. Innervated by medial/lateral pectoral nerves (C5-T1). Clavicular head flexes; sternocostal head extends from flexion. Adducts and medially rotates powerfully.

Synonyms:

Pectoralis Minor Muscle

Thin triangular muscle deep to pectoralis major, from ribs 3-5 to the coracoid process. Innervated by medial pectoral nerve (C8-T1). Draws scapula anteriorly/inferiorly, stabilizing it against the thorax. Assists forced inspiration. Tightness contributes to rounded shoulder posture and thoracic outlet syndrome.

Synonyms:

Pectus Carinatum

A congenital chest wall deformity characterized by anterior protrusion of the sternum (pigeon chest), caused by excessive growth of the costal cartilages pushing the sternum forward. Less common than pectus excavatum. Associated with congenital heart disease, Marfan syndrome, Noonan syndrome, and homocystinuria.

Synonyms:

Pectus Excavatum

The most common congenital chest wall deformity, characterized by depression of the sternum (funnel chest), caused by excessive growth of the costal cartilages that push the sternum inward. Typically sporadic, but associated with Marfan syndrome, Ehlers-Danlos syndrome, Noonan syndrome, and Poland syndrome.

Synonyms:

Pediatric Anesthesia

Pediatric anesthesia requires age-appropriate dosing, equipment, and techniques. Children have higher metabolic rates, increased oxygen consumption, smaller functional residual capacity, and higher risk of desaturation. Airway anatomy differs (larger tongue, more anterior larynx, narrower subglottic area).

Synonyms:

Pediatric Appendicitis

Acute inflammation of the vermiform appendix, usually caused by luminal obstruction. Children may

have evolving periumbilical-to-right-lower-quadrant pain, anorexia, vomiting, fever, and guarding, but presentation can be atypical in young children; timely surgical and antimicrobial assessment reduces perforation risk.

Synonyms:

Pediatric Cancer

Cancer occurring in infants, children, or adolescents. Common types include leukemia, brain tumors, lymphoma, neuroblastoma, and Wilms tumor; prognosis varies by type and stage.

Synonyms:

Pediatric Dentistry

Specialty of dental care for children. Manages primary dentition, growth, behavior. Preventive focus. Special needs adaptation.

Synonyms:

Pediatric Dermatology

The medical specialty concerned with skin, hair, and nail disorders in infants, children, and adolescents. It includes congenital lesions, inflammatory diseases, infections, vascular lesions, and tumors.

Synonyms:

Pediatric Dermatology Conditions

Distinct from adult dermatology. Birthmarks include vascular (hemangiomas, port-wine stains) and pigmented (café-au-lait, congenital nevi, Mongolian spots). Infantile hemangiomas proliferate in first months then involute. Congenital melanocytic nevi carry melanoma risk proportional to size.

Synonyms:

Pediatric Diabetic Ketoacidosis

A life-threatening complication of type 1 diabetes characterized by hyperglycemia, metabolic acidosis, and ketosis. Presents with polyuria, polydipsia, vomiting, abdominal pain, Kussmaul respirations, and fruity breath odor.

Synonyms:

Pediatric Eczema

Atopic dermatitis in children commonly begins in infancy with facial and extensor involvement; flexural disease predominates in older children. Pruritus, xerosis, sleep disturbance, and scratching are characteristic.

Synonyms:

Pediatric Fever

An elevated body temperature in a child, usually caused by infection but sometimes by inflammation, medicines, or environmental heat. Evaluation depends on age, appearance, duration, and associated findings.

Synonyms:

Pediatric Health

Pediatric health encompasses the physical, cognitive, emotional, and social development of children from infancy through adolescence, with emphasis on preventive care, developmental surveillance, and age-appropriate management of acute and chronic conditions.

Synonyms:

Pediatric Meningitis

Inflammation of the meninges in children, bacterial forms being the most dangerous. Presents with fever, headache, neck stiffness, photophobia, altered mental status, and petechial rash (meningococcal). Infants may present with irritability, poor feeding, bulging fontanelle, and high-pitched cry.

Synonyms:

Pediatric Nuclear Medicine

Special considerations for children: lower doses, sedation often needed, distraction techniques. Dose reduction: weight-based activity, optimized protocols.

Synonyms:

Pediatric Rehabilitation

Rehabilitation for children with congenital or acquired disabilities. Developmental considerations, family-centered care, school collaboration.

Synonyms:

Pediatric Shock

Inadequate tissue oxygen delivery or utilization in a child, most often caused by hypovolemia, distributive disease, cardiogenic dysfunction, or obstruction. Children may maintain blood pressure until late; tachycardia, abnormal perfusion, altered mental status, and oliguria are important early warning signs.

Synonyms:

Pediatric Skin Tumors

Pediatric skin tumors differ from adult tumors. Infantile hemangioma is the most common benign tumor of infancy. Congenital melanocytic nevus carries risk of melanoma (larger nevi have higher risk). Juvenile xanthogranuloma is a benign histiocytic lesion. Pyogenic granuloma is a common vascular lesion. Dermoid cysts are congenital.

Synonyms:

Pediatric Toxicology

Poisoning in children. Common: iron, medications, household cleaners, plants. Prevention: child-proof containers, education.

Synonyms:

Pediatrician

A medical doctor who specializes in the health and medical care of children from birth through adolescence (typically up to age 16-18).

Synonyms:

Pediatrics

The branch of medicine concerned with the health and medical care of infants, children, and adolescents from birth to age 18 (or up to age 16 in the UK).

Synonyms:

Pediculosis

Infestation with lice. Head lice spread mainly through close head-to-head contact and cause scalp pruritus with nits attached to hair shafts. Body lice live in clothing and can transmit certain infec-

tions; pubic lice infest coarse hair-bearing regions. Treatment and contact management depend on the species and local resistance patterns.

Synonyms:

Pediculosis Capitis

Infestation of the scalp by head lice, causing itching and attached eggs or lice in the hair.

Synonyms:

Pediculus humanus capitis

A blood-sucking parasite commonly known as the louse (plural, lice) that can cause an itchy scalp; infestations are highly contagious and especially common in school-age children.

Synonyms:

Pedigree

Diagram showing inheritance of traits through generations. Symbols: squares (males), circles (females), shaded (affected), half-shaded (carriers). Used to determine inheritance pattern and recurrence risk.

Synonyms:

Pedophilic Disorder

A paraphilic disorder involving recurrent, intense sexual fantasies, urges, or behaviors toward pre-pubescent children, generally beginning in adolescence or adulthood. Clinical diagnosis requires the criteria to cause significant distress or impairment, or to be acted upon, and requires the person to meet established age-difference criteria.

Synonyms:

PEG Tube

A feeding tube placed through the abdominal wall into the stomach using endoscopic guidance.

Synonyms:

Percutaneous Endoscopic Gastrostomy

Endoscopic placement of a feeding tube through the abdominal wall directly into the stomach. Indications: long-term enteral feeding (>4 weeks) for dysphagia (stroke, ALS, dementia, head/neck cancer) and malnutrition.

Synonyms:

Pellagra

A nutritional deficiency disease caused by a severe lack of niacin (Vitamin B3) or its precursor amino acid tryptophan.

Synonyms:

Pelvic Binder

A circumferential device applied around the pelvis to reduce motion and hemorrhage from suspected unstable pelvic-ring injury. It should be centered over the greater trochanters and used with definitive imaging and hemorrhage-control management.

Synonyms:

Pelvic Cavity

The lower abdominal cavity enclosed by the pelvis, containing the urinary bladder, internal reproductive organs, and rectum.

Synonyms:

Pelvic Congestion Syndrome

Chronic pelvic pain associated with enlarged or inefficient pelvic veins, often worsening with prolonged standing, before menstruation, or after intercourse. Diagnosis requires evaluation for other causes of pelvic pain and may involve pelvic imaging; treatment is individualized by gynecology or vascular specialists.

Synonyms:

Pelvic Floor Dysfunction

Weakness, overactivity, poor coordination, or injury of the muscles and connective tissues supporting the bladder, bowel, and reproductive organs. Symptoms may include urinary or fecal problems, pelvic pain, constipation, pain with sex, or pelvic organ prolapse; assessment may involve pelvic-health clinicians.

Synonyms:

Pelvic Floor Health and Disorders

The pelvic floor is a musculofascial sling (levator ani, coccygeus, and surrounding fascia) spanning the pelvic outlet, supporting the pelvic organs (blad-

der, uterus, rectum), maintaining continence, and facilitating urination, defecation, and sexual function.

Synonyms:

Pelvic Inflammatory Disease

Infection and inflammation of the upper female genital tract (uterus, fallopian tubes, ovaries, and peritoneum), most commonly caused by sexually transmitted infections (*Chlamydia trachomatis*, *Neisseria gonorrhoeae*). Presents with lower abdominal pain, cervical motion tenderness, adnexal tenderness, and fever.

Synonyms:

Pelvic Inlet

The superior opening of the true pelvis, bounded by the sacral promontory posteriorly, the arcuate lines of the ilia laterally, and the symphysis pubis anteriorly. Its anteroposterior diameter (true conjugate) normally measures at least 11 cm. The transverse diameter is typically 13 cm.

Synonyms:

Pelvic Organ Prolapse

POP: descent of the pelvic organs through the vagina due to pelvic floor weakness. Types: cystocele (anterior—bladder), rectocele (posterior—rectum), uterine prolapse (apical), enterocele, and vault prolapse (post-hysterectomy).

Synonyms:

Pelvic Outlet

The inferior opening of the true pelvis, bounded by the pubic symphysis, ischial tuberosities, sacrotuberous ligaments, and coccyx. Normal anteroposterior diameter is 11-13 cm (from the lower border of the pubic symphysis to the tip of the coccyx), and the transverse diameter (between the ischial tuberosities) is approximately 10-11 cm.

Synonyms:

Pelvic Pain

Pain localized to the lower abdomen, pelvis, or perineum, lasting <3 months (acute) or >3–6 months

(chronic), and can arise from gynecologic, urologic, gastrointestinal, musculoskeletal, or psychologic causes.

Synonyms:

Pelvic spleen

An ectopic or wandering spleen that has descended into the pelvic cavity, resulting from laxity or absence of the normal ligamentous attachments that fix the spleen in the left upper quadrant. It may present as a palpable pelvic mass, with risk of torsion, infarction, or rupture. Diagnosis is by CT or ultrasound.

Synonyms:

Pelvis

Bony ring from 2 hip bones, sacrum, and coccyx. Each hip bone fuses from ilium, ischium, and pubis meeting at the acetabulum. Divided into false (greater, above brim) and true (lesser, below brim) pelvis. Males: narrower, deeper, heart-shaped inlet. Females: wider, shallower, oval inlet for childbirth.

Synonyms:

Pemberton Sign

Facial flushing, cyanosis, or breathing difficulty induced by raising both arms, suggesting obstruction at the thoracic inlet, often from a large retrosternal goiter.

Synonyms:

Pemberton's sign

A clinical sign elicited by asking the patient to raise both arms above the head for one minute, causing facial plethora, cyanosis, and distended neck veins in patients with a substernal goiter or mediastinal mass compressing the thoracic inlet.

Synonyms:

Pemphigoid

Bullous pemphigoid is an autoimmune subepidermal blistering disease caused by antibodies against hemidesmosomal proteins, especially BP180 and BP230. It usually causes intensely pruritic tense blisters on urticarial or erythematous skin, with less

mucosal involvement than pemphigus.

Synonyms:

Pemphigoid gestationis

An autoimmune blistering disease of pregnancy characterised by intensely pruritic urticarial plaques and tense vesicles or bullae, typically arising in the second or third trimester around the umbilicus and spreading to the trunk and extremities.

Synonyms:

Pemphigus

A group of autoimmune blistering diseases with intraepidermal blisters due to antibodies against desmogleins (cell adhesion molecules): pemphigus vulgaris (PV—flaccid blisters, mucosal involvement, positive Nikolsky sign), pemphigus foliaceus (superficial, no mucosal), paraneoplastic pemphigus.

Synonyms:

Pemphigus Vulgaris

An autoimmune intraepidermal blistering disease caused by IgG antibodies against desmoglein 1 and 3. It presents with flaccid blisters that rupture easily, leaving painful erosions of skin and mucous membranes. Nikolsky sign is positive (lateral pressure causes epidermal sloughing).

Synonyms:

Penetrance

Proportion of individuals with a particular genotype who express the expected phenotype. Complete penetrance: all with genotype show phenotype. Incomplete penetrance: some with genotype do not show phenotype.

Synonyms:

Penetrating Abdominal Trauma

Injury to the abdomen caused by a projectile, sharp object, or other penetrating force. It may damage abdominal organs or blood vessels and requires urgent assessment for internal bleeding or organ injury; management depends on the mechanism, examination, stability, and imaging findings.

Synonyms:

Congenital Penile Curvature

Curvature of the penis present from birth, usually caused by unequal development of the erectile tissues. Mild curvature may need no treatment; significant curvature causing functional difficulty may require specialist assessment.

Synonyms:

Penile Adhesions

Abnormal attachment of penile skin to the glans, often after circumcision or during childhood. They may cause irritation or conceal part of the glans and are assessed and treated according to severity.

Synonyms:

Penile Discharge

Fluid leaving the urethral opening that is not normal urine or semen. It may result from urethritis, including sexually transmitted infection, and requires clinical assessment and appropriate testing.

Synonyms:

Penile Edema

Swelling of the penis caused by inflammation, infection, trauma, allergic reaction, impaired lymphatic drainage, or a constricting ring or retracted foreskin. Sudden painful swelling with an irreducible foreskin is an emergency.

Synonyms:

Penile Cancer

Rare malignancy, mostly squamous cell carcinoma. Risk factors: HPV, phimosis, poor hygiene, smoking. Presentation: penile lesion, ulcer, mass. Treatment: surgery (partial/total penectomy), radiation, chemotherapy.

Synonyms:

Penile Fracture

Rupture of tunica albuginea during erection. "Pop" sound, immediate detumescence, swelling, ecchymosis. Surgical emergency.

Synonyms:

Penile Implant

A surgically implanted device used to produce penile rigidity in selected people with erectile dysfunction that has not responded to other treatments.

Synonyms:

Penile Prosthesis

Inflatable or malleative device for erectile dysfunction. Types: two-piece, three-piece (reservoir, pump, cylinders). Surgical implantation. Complications: infection, erosion, mechanical failure, dissatisfaction.

Synonyms:

Penile Torsion

Rotation of the penis around its longitudinal axis, usually a congenital condition in which the glans or urethral opening is rotated. Symptomatic or marked torsion may require urologic evaluation and surgical correction.

Synonyms:

Penile Hygiene

Routine cleaning and drying of the penis and foreskin, with gentle retraction only when it moves freely and replacement afterward. Good hygiene helps reduce irritation and infection without harsh soaps or forceful retraction.

Synonyms:

Penis

The male external genital organ, composed of three erectile columns: two dorsal corpora cavernosa and one ventral corpus spongiosum (containing the urethra, expanding into the glans). Root is attached to the pubic arch (crura and bulb).

Synonyms:

Pentad of TTP

Classic clinical pentad of Thrombotic Thrombocytopenic Purpura: (1) Thrombocytopenia, (2) Microangiopathic Hemolytic Anemia (schistocytes), (3) Neurological symptoms, (4) Renal insufficiency, and (5) Fever. See Thrombotic Thrombocytopenic Purpura (TTP).

Synonyms:

Pentavalent Vaccine

A WHO-prequalified five-in-one combination vaccine containing Diphtheria toxoid, Tetanus toxoid, whole-cell Pertussis antigen, Hepatitis B (HBsAg), and Haemophilus influenzae type b (Hib) conjugate, administered as a single intramuscular injection.

Synonyms:

Pentose Phosphate Pathway

A cytoplasmic glucose oxidation pathway running parallel to glycolysis, primarily in the liver, adipose tissue, adrenal cortex, and red blood cells. It has two phases: the oxidative phase (producing NADPH and ribose-5-phosphate) and the non-oxidative phase (interconverting sugar phosphates).

Synonyms:

Peptic Ulcer

An open sore in the stomach or duodenal lining caused most often by Helicobacter pylori infection or nonsteroidal anti-inflammatory drug use. It may cause burning upper-abdominal pain, bleeding, perforation, or obstruction. Also called peptic ulcer disease.

Synonyms: peptic ulcer.

Peptic Ulcer Bleeding

Haemorrhage caused by erosion of an artery or other blood vessel beneath a gastric or duodenal peptic ulcer. It is a common cause of upper gastrointestinal bleeding and may present with haematemesis, coffee-ground vomiting, melaena, or haemodynamic instability.

Synonyms:

Peptic Ulcer Disease

Condition characterized by ulceration of the gastrointestinal mucosa extending through the muscularis mucosae into the submucosa or deeper layers, occurring most commonly in the duodenal bulb and gastric antrum.

Synonyms:

Peptide Bond

A covalent amide bond formed between the carboxyl group of one amino acid and the amino group of another, releasing water. Peptide bonds link amino acids into polypeptide chains and have partial double-bond character that restricts rotation.

Synonyms:

Percussion

Tapping body surface to assess underlying structures. Sounds: dull (solid organ, fluid), resonant (lung), tympanic (gas-filled). Used to assess organ size, presence of fluid, air.

Synonyms:

Percussion Note

The sound produced by percussing the chest wall. Normal lung produces a resonant note. Dullness suggests consolidation or fluid. Hyperresonance suggests pneumothorax or emphysema. Stony dullness suggests pleural effusion. Tympany suggests large pneumothorax.

Synonyms:

Percutaneous Biopsy

Removal of tissue through the skin using a needle or other instrument, often guided by ultrasound, CT, or another imaging method.

Synonyms:

Percutaneous Coronary Intervention

A catheter-based procedure to open blocked coronary arteries, typically involving balloon angioplasty and stent placement. Indications include acute STEMI (primary PCI), NSTEMI (early invasive strategy), and stable CAD with significant stenosis. Drug-eluting stents have reduced restenosis rates compared to bare-metal stents.

Synonyms:

Percutaneous Drainage

Placement of a needle or catheter through the skin to drain a fluid collection or obstructed body space, often with imaging guidance.

Synonyms:

Percutaneous Nephrolithotomy

Minimally invasive surgical procedure for removing large, complex, or staghorn renal calculi. Access: a needle track is established under fluoroscopic or ultrasound guidance from the flank through the renal parenchyma into the target renal calyx, dilated to allow passage of a nephroscope and working sheath.

Synonyms:

Percutaneous Transluminal Angioplasty

Balloon dilation of arterial stenosis. Often combined with stenting.

Synonyms:

Percutaneous Umbilical Blood Sampling

An invasive procedure for fetal blood sampling from the umbilical vein under ultrasound guidance, typically performed after 18-20 weeks.

Synonyms:

Perforation of a viscus

Full-thickness breach of the wall of a hollow abdominal organ, most commonly the stomach, duodenum, or colon, resulting in leakage of luminal contents into the peritoneal cavity. Causes include peptic ulcer disease, diverticulitis, appendicitis, inflammatory bowel disease, ischemia, and trauma.

Synonyms:

Performance Status

A standardized measure of a patient's functional ability and activity level, commonly recorded with ECOG or Karnofsky scales. It helps estimate prognosis, determine treatment eligibility, and quantify change during cancer care.

Synonyms:

Perfusion

Blood flow through tissue. Adequate perfusion essential for organ function.

Synonyms:

Perfusion Imaging

Imaging tissue blood flow. CT perfusion, MR perfusion, PET perfusion. Used for stroke, tumor char-

acterization.

Synonyms:

Perfusion PET

Tracers: Rb-82, N-13 ammonia, O-15 water. Measure blood flow.

Synonyms:

Periapical Abscess

An acute or chronic localized collection of pus at the apex of a tooth's root, arising from pulpal infection and necrosis (usually due to untreated dental caries or trauma).

Synonyms:

Periapical Granuloma

A chronic inflammatory lesion at the apex of a tooth, usually resulting from pulpal necrosis and persistent apical infection. It may be asymptomatic and is diagnosed through clinical, radiographic, and sometimes histopathologic assessment.

Synonyms:

Pericardial Cavity

The narrow, fluid-filled space between the layers of the pericardium surrounding the heart.

Synonyms:

Pericardial Effusion

The accumulation of excess fluid within the pericardial space. The clinical significance is determined by both the volume of fluid and the rate of accumulation; rapid accumulation of even small volumes can restrict cardiac filling, leading to cardiac tamponade. Symptoms include chest pressure, dyspnea, and orthopnea.

Synonyms:

Pericardial Effusion Etiology

Causes include infection, malignancy, kidney failure, hypothyroidism, autoimmune disease, inflammation after myocardial injury or cardiac surgery, radiation, trauma, and some medications. The likely cause varies with geography, age, medical history, and immune status.

Synonyms:

Pericardial Knock

A high-pitched, early diastolic sound caused by sudden cessation of ventricular filling in constrictive pericarditis. It is heard at the left sternal border and may be confused with an S3 or opening snap. The knock is typically louder with inspiration and is a characteristic finding in constrictive pericarditis.

Synonyms:

Pericardial metastases

Cancer deposits in the pericardium, which may cause inflammation or accumulation of fluid around the heart.

Synonyms:

Pericardial Tamponade

Fluid accumulation in pericardial space compromising cardiac filling. Beck triad: hypotension, jugular venous distension, muffled heart sounds. Electrical alternans on ECG. Diagnosis: echocardiography. Treatment: emergent pericardiocentesis, pericardial window.

Synonyms:

Pericardiocentesis

A procedure to aspirate fluid from the pericardial space, performed emergently for cardiac tamponade or diagnostically for pericardial effusion. The subxiphoid approach is most commonly used, with the needle directed toward the left shoulder under echocardiographic guidance.

Synonyms:

Pericarditis

Inflammation of the pericardium, the fibrous sac surrounding the heart. Acute pericarditis presents with sharp, pleuritic chest pain that improves with leaning forward, pericardial friction rub, and diffuse ST elevation on ECG.

Synonyms:

Pericardium

The fibroserous sac surrounding the heart and prox-

imal great vessels. Outer fibrous pericardium (anchors to diaphragm, sternum) and inner serous pericardium (parietal layer lining the sac; visceral layer/epicardium on the heart) with the pericardial cavity (15-50 mL serous fluid) between them.

Synonyms:

Perichondritis of the Ear

Infection or inflammation of the auricular perichondrium, often after trauma, piercing, or surgery. *Pseudomonas aeruginosa* is an important cause; delayed treatment can produce cartilage necrosis and permanent deformity.

Synonyms:

Pericoronitis

Inflammation of the soft tissue around the crown of a partially erupted tooth, most often a mandibular third molar. Food retention and bacterial accumulation may cause pain, swelling, trismus, fever, or spread into deeper spaces.

Synonyms:

Periductal mastitis

Inflammation around the major subareolar ducts, often associated with smoking, causing a painful periareolar mass, discharge, or recurrent breast abscess.

Synonyms:

Perilymphatic Fistula

Abnormal communication between the inner ear fluid spaces and the middle ear or mastoid, often after trauma, barotrauma, or surgery. It may cause episodic vertigo, hearing loss, tinnitus, or pressure-induced symptoms and requires specialist evaluation.

Synonyms:

Perimenopause

The transition time in a woman's life that begins when ovaries produce less estrogen and menstruation becomes less frequent, and ends when the ovaries no longer produce eggs and menstruation stops.

Synonyms:

Perinatal Psychiatry

The subspecialty focused on psychiatric disorders during pregnancy and the postpartum period. Common conditions include perinatal depression, perinatal anxiety, perinatal OCD, and postpartum psychosis. Medication selection must balance maternal mental health with fetal or neonatal exposure risks.

Synonyms:

Perineal Laceration

Tearing of the perineal tissues during vaginal delivery. The injury is graded by depth: it may involve skin, perineal muscle, the anal sphincter, or the rectal mucosa.

Synonyms:

Perineal Laceration Classification

Obstetric perineal tears are graded by depth: first degree involves skin, second degree involves perineal muscle, third degree involves the anal sphincter complex, and fourth degree extends through the rectal mucosa. Accurate examination and repair reduce long-term pelvic-floor and continence complications.

Synonyms:

Perineal Protection

Techniques used during the second stage to minimize perineal trauma (lacerations, episiotomy). Manual protection: the attendant's hand applies gentle pressure to the fetal head to control the speed of delivery (not too fast), supporting the perineum and flexing the fetal head.

Synonyms:

Perineal Tear

Laceration of the perineum during vaginal delivery, classified by degree: first degree (skin only), second degree (perineal muscles), third degree (sphincter complex involvement), and fourth degree (rectal mucosa). Most deliveries involve first or second degree tears. Third and fourth degree tears risk fecal incontinence.

Synonyms:

Perineum

The region between the external genitalia and anus, bounded by the pubic symphysis, coccyx, and ischial tuberosities. It contains structures of the urogenital and anal regions and stretches during childbirth.

Synonyms:

Periodontal Abscess

A localized accumulation of pus within periodontal tissues, commonly associated with a periodontal pocket, foreign material, or impaired drainage. It may cause pain, swelling, suppuration, tooth mobility, and systemic symptoms and requires urgent dental assessment.

Synonyms:

Periodontal Disease

Inflammation and destruction of the tissues supporting the teeth, usually caused by dental plaque. It can lead to gum bleeding, bone loss, loose teeth, and tooth loss.

Synonyms:

Periodontal Flap Surgery

Surgical access for deep debridement. Flap reflected, calculus removed, bone contoured, flap repositioned.

Synonyms:

Periodontal Ligament

Connective tissue attaching tooth to bone. Contains collagen fibers, cells, blood vessels, nerves. Provides proprioception, shock absorption. Expanded in bruxism.

Synonyms:

Periodontal Pocket

A pathologically deepened gingival sulcus caused by apical migration of the junctional epithelium and loss of periodontal attachment. Pocket depth and clinical attachment level are measured with a periodontal probe and interpreted with bleeding, inflammation, and radiographic bone loss.

Synonyms:

Periodontal Probing

Measurement of the depth of the gingival sulcus/pocket using a periodontal probe with millimeter markings. Normal: 1–3 mm. Periodontal pockets: ≥ 4 mm (indicates attachment loss and periodontitis). Full-mouth probing at 6 sites per tooth: mesio-buccal, mid-buccal, disto-buccal, mesio-lingual, mid-lingual, disto-lingual.

Synonyms:

Periodontitis

Inflammatory disease destroying supporting structures of teeth (periodontal ligament, alveolar bone). Caused by dysbiotic plaque biofilm with host immune response. Clinical signs: pocket formation, attachment loss, bone loss, tooth mobility, recession. Staging and grading guide treatment.

Synonyms:

Perioperative Antibiotic Prophylaxis

Administration of an appropriate antimicrobial within a defined interval before incision to reduce infection risk for selected procedures. Choice, timing, redosing, and discontinuation depend on procedure, organisms, patient factors, and local guidance.

Synonyms:

Perioral Dermatitis

A papulopustular eruption around the mouth, sparing the vermilion border. It is more common in young women and associated with topical corticosteroid use. Other triggers include fluoridated toothpaste, cosmetics, and inhaler steroids.

Synonyms:

Periosteum

The dense connective tissue membrane covering the outer surface of bones (except at articular surfaces, which are covered by cartilage). Two layers: outer fibrous (collagen, vessels, nerves) and inner cambium (osteoprogenitor cells, osteoblasts).

Synonyms:

Peripancreatic malignancy

Neoplastic process involving tissues surrounding the

pancreas, including primary pancreatic adenocarcinoma with peripancreatic extension and metastatic disease from adjacent or distant organs. Often presents at an advanced stage with abdominal pain, weight loss, obstructive jaundice, and new-onset diabetes.

Synonyms:

Peripartum Cardiomyopathy

A form of dilated cardiomyopathy occurring in the last month of pregnancy or within 5 months postpartum, with no other identifiable cause. Risk factors include advanced maternal age, multiple gestations, preeclampsia, and African American race. Presents with heart failure symptoms.

Synonyms:

Peripartum Cardiomyopathy Prognosis

Recovery of ventricular function varies widely. Prognosis is influenced by the initial ejection fraction, ventricular size, symptoms, treatment, complications, and follow-up; persistent dysfunction requires ongoing cardiac care.

Synonyms:

Peripheral

Located away from the center or toward the outer edges of the body or an organ.

Synonyms:

Peripheral Arterial Disease

Atherosclerotic narrowing of arteries supplying limbs. Symptoms: intermittent claudication (pain with walking, relieved by rest), critical limb ischemia (rest pain, ulcers, gangrene). Diagnosis: ABI <0.9, Doppler, angiography. Treatment: risk factor modification, exercise, cilostazol, revascularization for severe disease.

Synonyms:

Peripheral Artery Disease

Narrowing of arteries supplying the limbs, usually caused by atherosclerosis. It may cause exertional leg pain relieved by rest, reduced pulses, nonhealing wounds, or critical limb ischemia. Also called

peripheral arterial disease.

Synonyms: peripheral arterial disease.

Peripheral Blood Smear

Microscopic examination of a stained blood smear (Wright-Giemsa stain).

Synonyms:

Peripheral Edema

Swelling due to accumulation of fluid in the interstitial space of the limbs, most commonly the lower extremities.

Synonyms:

Peripheral Nerve Blocks

Peripheral nerve blocks provide targeted anesthesia and analgesia for specific surgical sites. Ultrasound-guided blocks improve success rates and reduce complications.

Synonyms:

Peripheral Nerve Injuries

Damage to nerves outside the brain and spinal cord caused by trauma, compression, stretching, disease, or toxins. It may cause pain, numbness, weakness, or loss of function; recovery depends on the severity and location of the injury.

Synonyms:

Peripheral Nervous System

The portion of the nervous system consisting of nerves and ganglia outside the brain and spinal cord. The PNS connects the central nervous system (CNS) to peripheral tissues and organs. Components: (1) Cranial nerves (12 pairs)—emerging from the brain/brainstem, innervating head, neck, and viscera.

Synonyms:

Peripheral Neuropathy

A disorder of peripheral nerves causing sensory, motor, and/or autonomic symptoms in a distal, symmetric 'stocking-glove' pattern.

Synonyms:

Periprosthetic Joint Infection

Infection involving a joint prosthesis and adjacent tissues. Diagnosis integrates clinical findings, inflammatory markers, joint-fluid analysis and culture, and imaging; treatment may require debridement, implant retention, staged exchange, or resection arthroplasty.

Synonyms:

Perirenal extramedullary hematopoiesis

Formation of blood cells in the tissue surrounding the kidney, occurring as a compensatory response to chronic severe anemia such as myelofibrosis or thalassemia major.

Synonyms:

Peristalsis

Rhythmic sequential contractions of longitudinal and circular smooth muscle that propel gastrointestinal contents in an aboral (oral to anal) direction.

Synonyms:

Peritoneal Carcinomatosis

Diffuse metastatic seeding of the peritoneal cavity from gastrointestinal or ovarian malignancies. Presents with ascites, bowel obstruction, and cachexia. Diagnosed by CT and paracentesis showing malignant cells. Prognosis is generally poor.

Synonyms:

Peritoneal Dialysis

Dialysis using peritoneum as semipermeable membrane. CAPD with four manual exchanges daily or APD using cyclor overnight. Advantages include home-based therapy and hemodynamic stability. Complications include peritonitis and catheter infection. Tenckhoff catheter is standard access.

Synonyms:

Peritoneal Dialysis Catheter

Flexible tube surgically placed into the peritoneal cavity for peritoneal dialysis. The Tenckhoff catheter is the most commonly used type with one or two cuffs that promote tissue ingrowth and anchor

the catheter. Placement can be done surgically, laparoscopically, or percutaneously under radiological guidance.

Synonyms:

Peritoneal Infection

Infection of the lining of the abdominal cavity, often called peritonitis. Causes include a ruptured appendix or bowel, abdominal surgery, pelvic infection, or contamination during dialysis. Severe abdominal pain, fever, vomiting, or a rigid abdomen requires urgent assessment.

Synonyms:

Peritoneum

The serous membrane lining the abdominal cavity and covering the abdominal organs. Parietal peritoneum lines the abdominal wall (innervated by somatic nerves—pain is well-localized); visceral peritoneum covers organs (innervated by visceral afferents—pain is dull, poorly localized).

Synonyms:

Peritonitis

Inflammation or infection of the peritoneum, commonly caused by a perforated abdominal organ, appendicitis, abdominal trauma, or infection of ascitic fluid. Severe abdominal pain, guarding, fever, vomiting, or shock requires urgent medical evaluation.

Synonyms:

Peritonitis in PD

Infection or inflammation of the peritoneum in a person receiving peritoneal dialysis. Cloudy effluent, abdominal pain, or fever requires prompt evaluation of the effluent and other causes. Treatment usually includes antibiotics selected for the suspected organisms; recurrent or refractory infection may require catheter removal.

Synonyms:

Peritonsillar Abscess

A collection of pus beside the tonsil, usually developing as a complication of tonsillar infection. See

Quinsy.

Synonyms:

Periungual fibroma

Benign, flesh-colored or pink fibrous tumors arising from the nail fold or nail bed, presenting as firm, exophytic nodules that may distort the nail plate. They occur sporadically or in association with tuberous sclerosis complex. When multiple periungual fibromas are present, they raise suspicion for tuberous sclerosis.

Synonyms:

Periventricular Leukomalacia

Ischemic white matter injury in the premature infant brain, a major cause of cerebral palsy. Risk factors include prematurity, hypotension, and inflammation. Diagnosis by cranial ultrasound showing periventricular echodensities or cystic changes. Prevention: avoiding hypotension, maintaining normothermia, and managing infection.

Synonyms:

Permissive Hypercapnia

A ventilator strategy that allows PaCO₂ to rise above normal (and pH to fall) in exchange for lung-protective ventilation with lower tidal volumes and airway pressures. It is used in severe ARDS when achieving normal PaCO₂ would require harmful ventilation parameters.

Synonyms:

Pernicious Anemia

A type of vitamin B12 deficiency anemia caused by autoimmune destruction of gastric parietal cells, leading to lack of intrinsic factor and impaired B12 absorption in the terminal ileum.

Synonyms:

Peroxisome

Single-membrane organelles containing oxidative enzymes (catalase, urate oxidase, D-amino acid oxidase) that produce and degrade hydrogen peroxide (H₂O₂).

Synonyms:

Persistent Asthma

Asthma requiring daily controller therapy. Mild persistent: symptoms > 2 days/week but not daily. Moderate persistent: daily symptoms, nighttime awakenings > 1/week. Severe persistent: symptoms throughout the day, frequent nighttime awakenings, SABA use several times/day, extremely limited activity.

Synonyms:

Persistent Depressive Disorder

formerly called dysthymia, a chronic depressive mood lasting at least two years in adults (one year in children and adolescents).

Synonyms:

Persistent Organic Pollutant

POCPs: organochlorines, PCBs, dioxins. Bioaccumulate, long-range transport, persistent. Stockholm Convention bans/restricts.

Synonyms:

Persistent Pulmonary Hypertension of the Newborn

Failure of the normal fall in pulmonary vascular resistance after birth, causing right-to-left shunting and hypoxaemia. Management requires urgent neonatal respiratory and circulatory support.

Synonyms:

Persistent pupillary membranes

Remnants of the fetal tunica vasculosa lentis that fail to regress after birth, appearing as fine pigmented strands bridging across the pupil or attaching from the iris collarette to the lens capsule. They are usually benign and asymptomatic but may rarely obstruct the visual axis requiring surgical or laser treatment.

Synonyms:

Personal Protective Equipment

PPE: gloves, gowns, masks, eye protection. Used based on transmission-based precautions.

Synonyms:

Personality Disorder

A group of mental disorders characterized by enduring maladaptive patterns of thinking, feeling, and behaving that deviate from cultural expectations and cause functional impairment. Cluster A (odd/eccentric): paranoid, schizoid, schizotypal. Cluster B (dramatic/erratic): antisocial, borderline, histrionic, narcissistic.

Synonyms:

Personalized Medicine

An approach that uses a person's biological, clinical, and sometimes genetic information to guide prevention, diagnosis, or treatment.

Synonyms:

Pertussis

A contagious respiratory infection caused by *Bordetella pertussis* and characterized by severe coughing spells. See Whooping Cough.

Synonyms:

Pessaries

Devices inserted into the vagina to support pelvic organs in cases of pelvic organ prolapse (cystocele, rectocele, uterine prolapse). Types: ring pessary (most common, with or without supportive membrane), shelf pessary (for severe prolapse), cube pessary (suction-based), and Gellhorn pessary (for advanced prolapse).

Synonyms:

Pessary

A removable device placed in the vagina to provide structural support for pelvic organ prolapse (uterine prolapse, cystocele, rectocele) or stress urinary incontinence.

Synonyms:

PET Scan

An imaging study that detects the distribution of a radioactive tracer to assess tissue metabolism or function.

Synonyms:

PET Scan (Positron Emission Tomography)

Nuclear medicine imaging using radioactive tracers (most commonly FDG, a glucose analog) to detect metabolically active tissues.

Synonyms: Positron Emission Tomography

PET Scanner

Ring of detectors capturing coincidence events. BGO, LSO, or LYSO crystals. Time-of-flight PET improves signal-to-noise.

Synonyms:

PET Tracers

18F-FDG: glucose metabolism (cancer, infection, inflammation). 18F-fluoride: bone turnover. 11C-metionine: protein synthesis. 68Ga-DOTATATE: somatostatin receptors. 68Ga-PSMA: prostate cancer.

Synonyms:

PET/CT

Combined PET and CT imaging. CT provides anatomical localization and attenuation correction. Essential for accurate interpretation. Low-dose CT for attenuation correction; diagnostic CT for detailed anatomy.

Synonyms:

PET/MRI

Combined PET and MRI. Superior soft tissue contrast, no ionizing radiation from CT. Useful for neurology, oncology, cardiology. Longer scan time, higher cost.

Synonyms:

Petechiae

Small, pinpoint, non-blanching red or purple spots on the skin or mucous membranes caused by extravasation of red blood cells from capillaries into the surrounding tissue. They are typically less than 2 millimeters in diameter and result from decreased platelet count, platelet dysfunction, or increased vascular fragility.

Synonyms:

Petit Mal

An older term for an absence seizure, a brief episode of impaired awareness with little or no movement.

Synonyms:

Peutz-Jeghers Syndrome

An autosomal dominant neurocutaneous disorder caused by germline loss-of-function mutations in the STK11 (LKB1) tumor suppressor gene on chromosome 19p13.

Synonyms:

Peutz-Jeghers's syndrome

An autosomal dominant condition caused by STK11 gene mutations, characterized by hamartomatous polyps throughout the gastrointestinal tract and mucocutaneous hyperpigmented macules on the lips, buccal mucosa, and digits. The polyps may cause gastrointestinal bleeding, intussusception, and obstruction.

Synonyms:

Peyronie Disease

Fibrous plaque in penis causing curvature, pain, erectile dysfunction. Treatment: observation, medications, injection therapy, surgery.

Synonyms:

Pfeiffer Syndrome

An autosomal dominant craniosynostosis syndrome caused by FGFR1 or FGFR2 mutations. Features: craniosynostosis (bilateral coronal), midface hypoplasia, proptosis, hypertelorism, broad thumbs and great toes (medial deviation), and variable syndactyly.

Synonyms:

pH

Measure of hydrogen ion concentration: $\text{pH} = -\log[\text{H}^+]$. Normal blood pH: 7.35-7.45. Acidemia: $\text{pH} < 7.35$. Alkalemia: $\text{pH} > 7.45$. Buffers minimize pH changes.

Synonyms:

pH Monitoring

Measurement of esophageal pH. Evaluates gastroesophageal reflux disease.

Synonyms:

Phacoemulsification

A cataract-surgery technique that uses ultrasound to break up and remove the cloudy lens through a small incision. An intraocular lens is usually implanted to restore focusing ability.

Synonyms:

Phagocytosis

The process by which specialized cells (phagocytes) engulf and destroy foreign particles, microorganisms, and cellular debris.

Synonyms:

Phalanges

14 finger bones. Thumb: 2 (proximal, distal). Each other finger: 3 (proximal, middle, distal). MCP joints are condyloid allowing flexion, extension, abduction, adduction, circumduction. IP joints are hinge joints allowing only flexion/extension. Mallet finger and jersey finger are common tendon avulsion injuries.

Synonyms:

Phalen Test

Wrist flexion test for carpal tunnel syndrome. Symptoms reproduced within 60 seconds.

Synonyms:

Phantom

Device simulating human anatomy for quality control and calibration. Types: line source, uniform, Jaszczak, NEMA IU body phantom.

Synonyms:

Phantom Limb Pain

Painful sensations perceived in a limb that has been amputated, caused by persistent or reorganized activity in peripheral nerves and central sensory pathways. It may feel burning, shooting, cramping, or electric.

Synonyms:

Phantosmia

Perception of a smell when no corresponding odor is present. It may occur with sinonasal disease, migraine, seizures involving olfactory networks, head injury, neurodegenerative disease, infection, or other neurological conditions.

Synonyms:

Pharmaceutical

A medicine or medicinal preparation produced for prevention, diagnosis, or treatment of disease.

Synonyms:

Pharmacodynamic Interaction

A drug interaction in which one drug changes the effect of another at its site of action without necessarily changing its concentration. Effects may be additive, synergistic, or antagonistic, such as combined respiratory depression or bleeding risk.

Synonyms:

Pharmacodynamics

The study of the biochemical and physiological effects of drugs on the body and their mechanisms of action, describing what the drug does to the body.

Synonyms:

Pharmacogenetics

Study of genetic variation affecting drug response. Examples: TPMT (mercaptopurine toxicity), CYP2C9/VKORC1 (warfarin dosing), HLA-B*1502 (carbamazepine SJS in Asians), HLA-B*5701 (abacavir hypersensitivity), UGT1A1 (irinotecan toxicity).

Synonyms:

Pharmacogenomics

The study of how genetic variations influence individual responses to drugs, including drug efficacy, toxicity, and metabolism. Genetic polymorphisms in drug-metabolizing enzymes, transporters, and receptors can lead to significant inter-individual variability in drug response.

Synonyms:

Pharmacokinetic Interaction

A drug interaction that changes absorption, distribution, metabolism, or excretion of another drug, thereby altering its concentration over time. Enzyme inhibition, enzyme induction, transporter effects, and altered gastric pH are common mechanisms.

Synonyms:

Pharmacokinetics

The study of what the body does to a medicine, including its absorption, distribution, metabolism, and elimination. It helps explain drug concentrations over time and supports dose selection.

Synonyms:

Pharmacological Stress Test

Stress testing using medications (dobutamine, adenosine, regadenoson). For patients unable to exercise.

Synonyms:

Pharmacology

The scientific study of drugs and their actions, properties, sources, and effects on living systems.

Synonyms:

Pharmacovigilance

The science and activities relating to the detection, assessment, understanding, and prevention of adverse drug reactions and other drug-related problems.

Synonyms:

Pharyngeal Tonsil

The adenoid tissue located in the roof of the nasopharynx, behind the nose.

Synonyms:

Pharyngitis

Inflammation of the throat that commonly causes soreness or pain with swallowing. It is usually viral but may be caused by bacteria or other conditions;

fever, cough, rash, and examination findings help guide evaluation.

Synonyms:

Pharynx

A muscular tube extending from the base of the skull (clivus) to the level of the cricoid cartilage (C6), where it continues as the esophagus.

Synonyms:

Phase I Metabolism

Phase I metabolism involves chemical modification of drug molecules through oxidation, reduction, and hydrolysis reactions, primarily catalyzed by the cytochrome P450 enzyme system in the liver.

Synonyms:

Phase II Metabolism

Phase II metabolism, also known as conjugation reactions, involves the attachment of endogenous hydrophilic molecules to drugs or their Phase I metabolites, dramatically increasing water solubility and facilitating renal excretion.

Synonyms: conjugation reactions, involves the attachment of.

Phencyclidine

A dissociative drug that can cause altered perception, agitation, hallucinations, impaired coordination, or dangerous behavior.

Synonyms:

Phenotype

Observable characteristics of an individual, resulting from genotype and environmental interactions. Includes morphology, development, biochemical properties, behavior.

Synonyms:

Phenylketonuria

An inherited disorder, usually due to phenylalanine hydroxylase deficiency, causing accumulation of phenylalanine and reduced tyrosine availability. Untreated disease can cause intellectual disability, seizures, eczema, and a musty odor; newborn screen-

ing and dietary treatment are effective.

Synonyms:

Pheochromocytoma

Catecholamine-secreting tumor arising from chromaffin cells of the adrenal medulla or extra-adrenal paraganglia. Approximately ten percent are bilateral, ten percent are extra-adrenal, and ten percent are malignant. Classic presentation includes episodic headache, sweating, and palpitations with sustained or paroxysmal hypertension.

Synonyms:

Phimosis

Inability to retract the foreskin (prepuce) proximally over the glans penis. Physiologic phimosis is normal in infants and uncircumcised young boys due to natural adhesions between glans and prepuce, resolving spontaneously in over 90% by age 3-5 years.

Synonyms:

Phlebitis

Inflammation of a vein, often affecting the lower extremities. Superficial thrombophlebitis: inflammation and thrombosis of a superficial vein (great saphenous vein most common), presenting with erythema, tenderness, warmth, and a palpable cord along the vein.

Synonyms:

Phlebography

Venography using contrast dye. Used for diagnosing venous thrombosis, malformations. Largely replaced by duplex ultrasound.

Synonyms:

Phlegmasia cerulea dolens

Massive deep vein thrombosis causing severe venous outflow obstruction, cyanosis, marked edema, and compromised arterial perfusion. A limb-threatening emergency with risk of venous gangrene and pulmonary embolism. Requires urgent anticoagulation and consideration of thrombolysis or surgical thrombectomy.

Synonyms:

Phobias

Persistent, excessive fear of a specific object or situation that leads to avoidance or significant distress.

Synonyms:

Phocomelia

A severe congenital limb deficiency where the proximal portion of a limb (humerus/femur, radius/tibia) is absent or severely hypoplastic, and the hand or foot attaches directly to the trunk. Most famously associated with thalidomide exposure during the first trimester of pregnancy (days 20-36 after conception).

Synonyms:

Phosphate

An inorganic ion and component of nucleotides, phospholipids, proteins, and bone mineral. It participates in ATP energy transfer, phosphorylation-dependent signaling, intracellular buffering, and acid excretion by the kidney.

Synonyms:

Phosphate Binders

Calcium acetate, sevelamer, lanthanum. Bind dietary phosphate in GI tract. Target normal serum phosphorus in CKD-MBD. Avoid calcium-based binders in patients with vascular calcification.

Synonyms:

Phosphate Homeostasis

Serum phosphate is regulated by the interplay of PTH vitamin D and fibroblast growth factor 23. PTH promotes renal phosphate excretion. Active vitamin D stimulates intestinal phosphate absorption. FGF23 produced by osteocytes inhibits renal phosphate reabsorption and suppresses 1-alpha-hydroxylase reducing active vitamin D production.

Synonyms:

Phosphodiesterase Inhibitor

A class of drugs that inhibit phosphodiesterase enzymes, which break down cyclic nucleotides (cAMP and cGMP), thereby increasing intracellular levels of these second messengers and potentiating their

downstream effects.

Synonyms:

Phosphodiesterase-5 Inhibitors

Medications that inhibit PDE-5, increasing cGMP and causing smooth muscle relaxation and vasodilation. Sildenafil and tadalafil are used for PAH and erectile dysfunction. In PAH, they reduce pulmonary vascular resistance and improve exercise capacity.

Synonyms:

Phosphofructokinase-1

Rate-limiting enzyme of glycolysis. Activated by AMP, fructose-2,6-bisphosphate. Inhibited by ATP, citrate.

Synonyms:

Phospholipase C Pathway

A GPCR signaling pathway activated primarily by Gq-protein coupled receptors (e.g., alpha-1 adrenergic, muscarinic M1/M3, vasopressin V1, angiotensin II AT1 receptors).

Synonyms:

Phospholipid

Lipid containing phosphate group, major component of cell membranes. Structure: glycerol backbone, two fatty acid tails (hydrophobic), phosphate group with polar head group (hydrophilic). Forms bilayers spontaneously in aqueous environment.

Synonyms:

Phosphorus

An essential mineral present in ATP, nucleic acids, phospholipids, and bone. Its concentration is regulated chiefly by the kidneys, parathyroid hormone, fibroblast growth factor 23, and vitamin D; kidney failure may cause hyperphosphatemia.

Synonyms:

Photoallergy

An immune-mediated skin reaction that occurs when ultraviolet light activates a sensitizing substance on or in the skin, causing an eczematous

rash.

Synonyms:

Photocoagulation

Coagulation of tissue by intense light, often laser light, to treat lesions such as abnormal retinal vessels.

Synonyms:

Photodynamic Therapy

A treatment that combines a photosensitizing agent with light to generate reactive oxygen species and destroy cancer cells, used for actinic keratosis, superficial skin cancers, and selected visceral tumors.

Synonyms:

Photoelectric Effect

Photon absorption by inner shell electron. Major interaction at low energies, high Z materials.

Synonyms:

Photomultiplier Tube

Converts light photons to electrical signals. Array of PMTs positioned behind crystal. Positioning circuit determines interaction location.

Synonyms:

Photopeak

Full-energy peak in gamma spectrum. Used for energy window setting.

Synonyms:

Photopheresis

Extracorporeal treatment in which white blood cells are exposed to a photosensitizer and ultraviolet A light before being returned to the patient.

Synonyms:

Photophobia

Abnormal sensitivity or intolerance to light, causing discomfort or the need to avoid bright environments. It may occur with migraine, corneal disease, uveitis, meningitis, retinal disease, medication effects, or neurologic disorders.

Synonyms:

Photosensitivity

An abnormal skin reaction to sunlight (UVA/UVB), manifesting as rash, erythema, or burning on sun-exposed areas.

Synonyms:

Phototherapy

Therapeutic exposure to a controlled wavelength and dose of ultraviolet or visible light. Common modalities include narrowband UVB, broadband UVB, and PUVA; treatment requires assessment of photosensitizing drugs, cumulative exposure, eye protection, and long-term skin risk.

Synonyms:

Phototoxic dermatitis

An acute, dose-dependent inflammatory skin reaction occurring when certain ingested or topically applied chemicals (such as psoralens, tetracyclines, NSAIDs, or thiazides) absorb ultraviolet radiation, leading to direct cellular damage and a sunburn-like eruption in exposed areas.

Synonyms:

Phototoxicity

Skin reaction from UV light + chemical. Sunburn-like. Examples: tetracyclines, thiazides, NSAIDs, psoralens.

Synonyms:

Phrenic Nerve

Primarily from C4 (with C3 and C5: "C3, 4, 5 keeps the diaphragm alive"), traveling between anterior and middle scalene muscles, descending anterior to the anterior scalene across the first rib. Right phrenic passes anterior to the lung root; left passes anterior and lateral.

Synonyms:

Phyllodes Tumor

A breast tumor composed of both stromal and epithelial elements, ranging from benign through borderline to malignant. Typically a large, rapidly

growing mass; treatment is surgical excision with clear margins.

Synonyms:

Physiatrist

Physician specialty focusing on function, quality of life for patients with impairment, disability. See rehabilitation medicine.

Synonyms:

Physical Half-Life

The time required for half of the radioactive nuclei in a sample to undergo nuclear decay. It is distinct from biologic half-life, which describes biological elimination, and effective half-life, which combines both processes.

Synonyms:

Physical Therapy Assessment

Comprehensive evaluation: history, observation, ROM, strength, sensation, coordination, balance, gait, functional tasks.

Synonyms:

Physiologic Jaundice of Newborn

A common, benign condition characterized by unconjugated hyperbilirubinemia appearing after 24 hours of age (peak at 3-5 days) in healthy term newborns. Caused by increased bilirubin production (high RBC turnover, short RBC lifespan) and immature hepatic conjugation (low UDP-glucuronyl transferase activity).

Synonyms:

Physiological Dead Space

Volume of ventilated respiratory tract that does not participate in gas exchange, including anatomic and alveolar dead space.

Synonyms:

Physiology

Study of body function. Systems physiology: cardiovascular, respiratory, renal, gastrointestinal, endocrine, nervous, muscular, reproductive.

Synonyms:

Phytomenadione

Vitamin K is a fat-soluble vitamin essential for the post-translational gamma-carboxylation of glutamate residues to gamma-carboxyglutamate (Gla) in specific clotting factors (II, VII, IX, X, protein C, protein S) and anticoagulant proteins (protein C, protein S, protein Z). See Vitamin K: Phylloquinone.

Synonyms:

PI-RADS

Prostate Imaging-Reporting and Data System. Standardizes multiparametric MRI reporting for prostate cancer detection and staging.

Synonyms:

Pia Mater

The innermost meningeal layer, a delicate vascularized membrane firmly adherent to the surface of the brain and spinal cord, following all gyri and sulci. It carries blood vessels that penetrate the CNS and forms the tela choroidea, contributing to the choroid plexus (CSF production).

Synonyms:

Pica

Compulsive eating of non-nutritive substances (ice, dirt, clay). Associated with iron deficiency, pregnancy, developmental disorders.

Synonyms:

Peripherally Inserted Central Catheter

A long, flexible catheter inserted into the basilic or cephalic vein and advanced so the tip sits in the superior vena cava. Inserted at the bedside, often by a specialized PICC nurse, with ultrasound and ECG or X-ray confirmation. Indications: long-term IV antibiotics (>2 weeks), TPN, chemotherapy, and frequent blood draws.

Synonyms:

Pierre Robin Sequence

A congenital anomaly triad: micrognathia (small mandible), glossoptosis (posteriorly displaced tongue causing airway obstruction), and U-shaped

cleft palate. The sequence arises from early mandibular hypoplasia, which prevents the tongue from descending, thereby impairing palatal shelf fusion.

Synonyms:

Pierson Syndrome

A rare autosomal-recessive disorder caused by LAMB2 variants, classically combining congenital nephrotic syndrome with microcoria and structural abnormalities of the eyes. Kidney failure, developmental impairment, and severe visual disability may occur.

Synonyms:

Pigment Cirrhosis

Liver cirrhosis associated with abnormal pigment or iron deposition, as may occur in hereditary hemochromatosis.

Synonyms:

Pigmentary mosaicism

A pattern of alternating hyperpigmented and hypopigmented skin patches arranged in a linear, segmental, or blaschkoid distribution, caused by genetic mosaicism from post-zygotic mutations affecting melanocyte development. It is a cosmetic condition without systemic involvement.

Synonyms:

Pilar Cyst

A benign cyst arising from the outer root sheath of hair follicles, most commonly on the scalp. It presents as a firm, mobile, subcutaneous nodule without a central punctum. Unlike epidermoid cysts, pilar cysts have smooth walls and contain dense keratin. They may be multiple in familial cases. Treatment is simple excision.

Synonyms:

Piles (Hemorrhoids)

Swollen, inflamed vascular cushions in the anal canal that normally aid continence. Internal hemorrhoids (above the dentate line, painless) present with painless bright red rectal bleeding and prolapse; graded

I-IV by degree of prolapse.

Synonyms: Hemorrhoids

Pilonidal Disease

A chronic inflammatory condition of the sacrococcygeal region involving hair follicles. Pilonidal sinus: epithelialized tract containing hair and debris. Pilonidal abscess: acute infection of the sinus. Most common in young, hirsute males, exacerbated by prolonged sitting, obesity, and local trauma.

Synonyms:

Pilonidal Sinus Disease

A chronic sinus or cyst in the natal cleft, usually containing hair and debris. It may cause recurrent pain, swelling, drainage, or abscess formation.

Synonyms:

Pineal Gland Tumor

A tumor of the pineal region, including germinoma, pineocytoma, and pineoblastoma. Presents with Parinaud syndrome, hydrocephalus, and raised intracranial pressure; germinomas are highly radiosensitive.

Synonyms:

Pinguecula

A yellowish-white, slightly elevated benign degenerative lesion of the bulbar conjunctiva near the limbus, from elastotic degeneration of the substantia propria. Chronic ultraviolet exposure, dust, wind, and dryness are the principal risk factors.

Synonyms:

Pink Eye

Inflammation of the conjunctiva producing a pink or red appearance of the eye, most often indicating conjunctivitis. Causes are infectious (viral, bacterial, chlamydial) or noninfectious (allergic, irritant), with viral the most common overall.

Synonyms:

Pink Puffer

A clinical phenotype of emphysema in COPD. Patients present with severe dyspnea, minimal cough,

thin habitus, pursed-lip breathing, accessory muscle use, and relatively normal PaO₂ with late hypercapnia. They tend to be older and have more extensive emphysema.

Synonyms:

Pinna

Visible external ear portion, elastic cartilage covered by skin, shaped to funnel sound into the external auditory canal. Key features: helix (outer rim), antihelix (inner ridge), tragus (canal prominence), antitragus, concha (canal-leading depression), lobule (earlobe, only non-cartilaginous part).

Synonyms:

Pure-Tone Audiometry

A hearing test that measures the softest tones a person can hear at selected frequencies through air and bone conduction. The results are plotted on an audiogram and help distinguish conductive from sensorineural hearing loss.

Synonyms: Pure-tone threshold audiometry; pure-tone hearing test.

Pinworm

Infection with *Enterobius vermicularis*, the most common helminth infection in developed countries, primarily in school-age children. Lifecycle: ingestion of eggs larvae hatch in small intestine adults colonize the cecum/appendix; female migrates to perianal area at night to deposit eggs.

Synonyms:

Piriformis Syndrome

Sciatic nerve compression by piriformis muscle. Buttock pain, radiating down leg. Diagnosis: clinical, exclude disc herniation. Treatment: stretching, injection, surgical release.

Synonyms:

Pisiform

Small pea-shaped sesamoid bone in the flexor carpi ulnaris tendon, in the proximal row. Articulates only with the triquetrum. Forms the medial border of Guyon's canal (ulnar nerve/artery passage).

Only sesamoid carpal bone, subcutaneous and easily palpable on the ulnar palm.

Synonyms:

Pituitary Adenoma

Pituitary adenomas are benign neoplasms arising from the adenohypophysis (anterior pituitary gland), accounting for approximately ten to fifteen percent of all intracranial neoplasms.

Synonyms:

Pituitary Apoplexy

Acute hemorrhage or infarction within a pituitary adenoma causing sudden headache, visual field defects, ophthalmoplegia, and altered consciousness. Medical emergency requiring urgent glucocorticoid administration to prevent adrenal crisis from acute ACTH deficiency.

Synonyms:

Pituitary Gland

Pea-sized "master gland" in the sella turcica, connected to hypothalamus by infundibulum. Anterior pituitary (adenohypophysis): GH, TSH, ACTH, FSH, LH, prolactin. Posterior pituitary (neurohypophysis): ADH (vasopressin), oxytocin (from hypothalamus). Regulates other endocrine glands and bodily functions.

Synonyms:

Pituitary tumor

A neoplasm arising from the pituitary gland, either functioning (hormone-secreting) or non-functioning. It can cause visual field defects, headaches, and hormonal imbalances depending on size and secretory status.

Synonyms:

Pityriasis Rosea

An acute, self-limited eruption often beginning with a herald patch followed by oval scaly lesions distributed along skin-cleavage lines. It usually resolves within several weeks; treatment is symptomatic, and atypical, severe, recurrent, or persistent disease should be reassessed.

Synonyms:

Placebo

Inactive substance used as control in trials. Placebo effect: improvement from expectation.

Synonyms:

Placebo Effect

A psychological and physiological phenomenon where a patient experiences a real improvement in health or symptoms after receiving an inactive treatment (like a sugar pill) due to their expectations of healing.

Synonyms:

Placenta

A temporary organ that develops in the uterus during pregnancy, providing oxygen and nutrients to the growing fetus while removing waste products.

Synonyms:

Placenta increta

Abnormal placental invasion into the myometrium without reaching the serosa, increasing the risk of massive hemorrhage at delivery and often requiring cesarean hysterectomy.

Synonyms:

Placenta Praevia

Placental implantation over or near the internal cervical opening. It may cause painless vaginal bleeding later in pregnancy and can affect the safety and mode of delivery.

Synonyms:

Placental Abruption

Premature separation of the placenta from the uterine wall before delivery. It may cause vaginal bleeding, abdominal pain, uterine tenderness, fetal distress, and maternal or fetal compromise.

Synonyms:

Placental Accreta Spectrum

Abnormal placental attachment to the myometrium, ranging from accreta (adherent to decidua basalis)

to increta (invading myometrium) to percreta (invading through serosa). Major risk factor is prior caesarean section with anterior placenta previa.

Synonyms:

Placental Separation Signs

Clinical signs indicating the placenta has separated from the uterine wall and is ready for delivery. Classic signs: lengthening of the umbilical cord (cord lengthens as the placenta descends), a sudden gush of blood, and uterine elevation and firming (the uterus rises and becomes globular as the placenta moves into the lower segment).

Synonyms:

Plague

A bacterial infection caused by *Yersinia pestis*, transmitted by fleas from rodents. Three forms: bubonic (most common, 80-90%): painful, swollen lymph nodes (buboes) after flea bite, fever, chills. Septicemic: bacteremia without bubo, endotoxic shock, DIC, purpura.

Synonyms:

Plant Thorn Synovitis

Inflammation of a joint after penetration by a plant thorn or splinter, sometimes involving an infection introduced by the injury. Symptoms may develop gradually as persistent joint pain, swelling, and limited movement; evaluation may require removal of retained material and targeted treatment.

Synonyms:

Plantar Fasciitis

The most common cause of heel pain, caused by degeneration and microtears of the plantar fascia at its calcaneal origin. Presents with sharp, stabbing heel pain with the first steps in the morning (post-static dyskinesia), improving after a few minutes but worsening with prolonged standing or activity.

Synonyms:

Plantar Wart (Verruca Plantaris)

A wart (verruca) located on the sole of the foot, caused by human papillomavirus (HPV, typically

types 1, 2, 4, 63). Plantar warts are endophytic (grow inward due to pressure) rather than exophytic like common warts, and are often painful with direct pressure (walking, standing).

Synonyms: Verruca Plantaris

Plantar warts

Common warts (verrucae) occurring on the plantar surface of the foot, caused by human papillomavirus infection of the keratinocytes. They present as hard, thickened papules with a rough surface and disrupted dermatoglyphics (skin lines), often with pinpoint black dots representing thrombosed capillaries.

Synonyms:

Plaque

A raised, palpable lesion greater than approximately 1 cm, often formed by the coalescence of papules. Plaques are characteristic of several inflammatory, infectious, and neoplastic skin disorders.

Synonyms:

Plaque Assay

A method for quantifying viruses: serial dilutions of a viral suspension are added to a monolayer of host cells, forming zones of cell destruction (plaques), each plaque representing one infectious unit; results expressed as plaque-forming units per mL (PFU/mL).

Synonyms:

Plasma Cell

The terminally differentiated antibody-secreting cell derived from activated B lymphocytes (after antigen stimulation, class switching, and affinity maturation in germinal centers).

Synonyms:

Plasma Cell Myeloma

A malignant neoplasm of clonal plasma cells, usually producing a monoclonal immunoglobulin or light chain. It may cause hypercalcemia, renal impairment, anemia, and destructive bone lesions, collectively known as CRAB features, together with

recurrent infection and hyperviscosity in some patients.

Synonyms:

Plasma Concentration

The amount of a substance present in a defined volume of plasma at a given time. It is used to interpret exposure, toxicity, therapeutic drug monitoring, and pharmacokinetic relationships.

Synonyms:

Plasmacytoma

A solitary mass of neoplastic plasma cells, which may occur in bone (solitary plasmacytoma of bone) or soft tissue (extramedullary plasmacytoma). It can progress to multiple myeloma.

Synonyms:

Plasmids

Small, circular, extrachromosomal DNA elements that replicate independently of the bacterial chromosome. Plasmids carry non-essential genes that provide selective advantages including antibiotic resistance, virulence factors, and metabolic capabilities.

Synonyms:

Plasmodium vivax

A malaria parasite transmitted by Anopheles mosquitoes. It infects red blood cells and can persist in the liver as dormant hypnozoites that cause relapses.

Synonyms:

Plastic bronchitis

A rare condition producing large, branching mucous casts that form in the airways, causing life-threatening airway obstruction, often associated with congenital heart disease or post-fontan circulation.

Synonyms:

Plate Method

Simple portion control: half plate vegetables, quarter plate protein, quarter plate grains. Promotes

balanced eating.

Synonyms:

Platelet Aggregation

The adhesion and clumping of platelets to form a hemostatic plug at sites of vascular injury.

Synonyms:

Platelet Count

The number of platelets per unit volume of blood (normal 150,000-400,000/ μ L), part of the CBC. Reduced (thrombocytopenia): bleeding risk (severe <20,000, spontaneous <10,000)—ITP, TTP, HIT, DIC, marrow failure, drugs, sepsis. Elevated (thrombocytosis): reactive or myeloproliferative.

Synonyms:

Platelet Function Disorders

Conditions in which platelets do not adhere, activate, or aggregate normally, causing impaired primary hemostasis. They may be inherited or acquired and can cause easy bruising, nosebleeds, heavy menstrual bleeding, or bleeding after procedures.

Synonyms:

Platelet Plug Formation

The initial hemostatic response to vascular injury, involving platelet adhesion, activation, and aggregation. When the endothelium is disrupted, subendothelial von Willebrand factor and collagen are exposed to flowing blood.

Synonyms:

Platelets (Thrombocytes)

Small, anucleate, disc-shaped cell fragments (2–4 μ m diameter) derived from megakaryocytes in the bone marrow, circulating at $150\text{--}400 \times 10^9/\text{L}$.

Synonyms: Thrombocytes

Platypnea

Dyspnea that occurs in the upright position and is relieved by lying down. It is the opposite of orthopnea. It is rare and may be associated with hepatopulmonary syndrome, intracardiac shunting,

or pulmonary arteriovenous malformations.

Synonyms:

Pleiotropy

Single gene influencing multiple phenotypic traits. Examples: phenylketonuria (PKU) affects multiple systems; sickle cell anemia causes anemia, pain crises, organ damage.

Synonyms:

Pleomorphic Adenoma

A usually benign salivary-gland tumor composed of epithelial and connective-tissue elements. It most often occurs in the parotid gland and may slowly enlarge; long-standing lesions can rarely undergo malignant transformation.

Synonyms:

Pleomorphism

Variation in the size and shape of cells or their nuclei within a tissue. Marked pleomorphism is a feature of many high-grade malignancies but can also occur in some reactive or degenerative conditions.

Synonyms:

Pleura

The serous membrane covering the lungs (visceral pleura) and lining the thoracic cavity (parietal pleura: costal, mediastinal, diaphragmatic, cervical/cupola). The pleural cavity is a potential space containing a thin film of serous fluid that couples the lung to the chest wall during ventilation.

Synonyms:

Pleural Cavity

The narrow, fluid-filled space between the two layers of the pleura surrounding each lung.

Synonyms:

Pleural Effusion

Abnormal fluid in the pleural space. Transudates result from altered pressures; exudates from inflammation, infection, or malignancy. Light's criteria differentiate the two.

Synonyms:

Pleural Fluid Glucose

Pleural-fluid glucose may be reduced in empyema, complicated parapneumonic effusion, rheumatoid pleuritis, tuberculosis, and malignancy. It is interpreted with pH, cell count, protein, LDH, microbiology, imaging, and the clinical setting.

Synonyms:

Pleural Fluid pH

Pleural-fluid pH helps assess infection and other causes of effusion. A markedly low pH supports a complicated parapneumonic effusion in the appropriate clinical setting, but drainage decisions also depend on imaging, fluid appearance, microbiology, glucose, and the patient's condition.

Synonyms:

Pleural Friction Rub

A grating, leathery sound heard on auscultation caused by inflamed pleural surfaces rubbing against each other during breathing. It is a sign of pleurisy and may be heard in pneumonia, PE, and pleural effusion. It disappears when fluid accumulates and separates the pleural surfaces.

Synonyms:

Pleural perforation

A breach in the pleural lining allowing air or fluid to enter the pleural space, potentially causing pneumothorax or hydropneumothorax, often from trauma, procedures, or underlying lung disease.

Synonyms:

Pleural Plaque

Circumscribed fibrous tissue on parietal pleura, hallmark of asbestos exposure. Bilateral, often calcified. Does not indicate asbestosis.

Synonyms:

Pleurectomy

Surgical removal of part or all of the pleura, used in the treatment of malignant pleural mesothelioma and recurrent malignant pleural effusion.

Synonyms:

Pleurisy

Pleural inflammation causing sharp, breathing-related chest pain. Causes: pneumonia, PE, autoimmune disease, malignancy. Treatment addresses the underlying cause.

Synonyms:

Pleuritis

Inflammation of the pleural membranes (visceral and parietal pleura). Presents with pleuritic chest pain: sharp, stabbing pain exacerbated by deep breathing, coughing, or sneezing.

Synonyms:

Pleurodesis

Fusion of visceral and parietal pleura to prevent recurrence of effusions or pneumothorax. Chemical pleurodesis uses talc, doxycycline, or bleomycin.

Synonyms:

Pleurodynia

Acute, severe chest pain caused by inflammation or spasm of the intercostal muscles, often associated with viral infection.

Synonyms:

Plexus

A complex network of intersecting nerves or blood vessels in the body.

Synonyms:

Plombage

An obsolete surgical technique for treating pulmonary tuberculosis in which material was placed in the extraparietal pleural space to compress the diseased lung and promote collapse therapy. Various materials including paraffin wax, lucite balls, and oil were used.

Synonyms:

Plug (Vascular)

A vascular occlusion device used to block a selected vessel under image guidance.

Synonyms: Vascular

Plummer-Vinson Syndrome

Triad of iron deficiency anemia, esophageal web, and dysphagia occurring predominantly in middle-aged women. The esophageal webs are thin mucosal folds typically located in the postcricoid region of the hypopharynx and proximal esophagus.

Synonyms:

Pneumatic Otoscopy

A diagnostic technique that combines visualization of the tympanic membrane with assessment of its mobility in response to positive and negative air pressure changes, providing information about the presence of middle ear fluid and the condition of the Eustachian tube.

Synonyms:

Pneumatic Retinopexy

A procedure for selected retinal detachments in which an intravitreal gas bubble is injected and laser or cryotherapy seals the retinal break while positioning helps the bubble support the repair.

Synonyms:

Pneumatocele

Thin-walled, air-filled cystic spaces in the lung, often in staphylococcal pneumonia. Typically self-resolving.

Synonyms:

Pneumatosis cystoides coli

Condition characterized by multiple gas-filled cysts within the wall of the colon, which may be primary (idiopathic) or secondary to intestinal mucosal disruption from conditions such as chronic obstructive pulmonary disease, ischemic bowel disease, or intestinal obstruction. Often discovered incidentally on imaging or colonoscopy.

Synonyms:

Pneumatosis Cystoides Intestinalis

Gas-filled cysts within the bowel wall that may be primary or secondary to bowel ischemia, infection, chronic lung disease, or medications. Often an incidental finding on imaging. Primary pneumatosis is

benign and asymptomatic. Secondary pneumatosis may indicate serious underlying disease. Managed by treating the underlying condition.

Synonyms:

Pneumatosis Intestinalis

Presence of gas within the bowel wall appearing as linear or cystic radiolucencies on imaging. Primary pneumatosis is benign and idiopathic accounting for approximately fifteen percent of cases.

Synonyms:

Pneumocephalus

The presence of air or gas within the cranial cavity, most commonly following trauma, surgery, or sinus disease, and potentially causing increased intracranial pressure if tension develops.

Synonyms:

Pneumococcal Conjugate Vaccine

A vaccine that links pneumococcal polysaccharides to a carrier protein to produce protective immunity against selected *Streptococcus pneumoniae* serotypes. Product choice and schedule depend on age, vaccination history, medical risk, and local recommendations.

Synonyms:

Pneumococcal sepsis

Sepsis caused by *Streptococcus pneumoniae*, often arising from pneumonia, meningitis, or another invasive pneumococcal infection.

Synonyms:

Pneumoconiosis

ILDs from mineral dust inhalation (silicosis, asbestosis, coal worker's, berylliosis). They share interstitial fibrosis and risk of infection and malignancy.

Synonyms:

Pneumocystis Jirovecii Pneumonia

Opportunistic pneumonia caused by *Pneumocystis jirovecii*, especially in people with advanced HIV infection or other cellular immunodeficiency. It causes progressive exertional dyspnea, dry cough,

fever, and hypoxemia.

Synonyms:

Pneumocystis Pneumonia

Opportunistic pneumonia caused by *Pneumocystis jirovecii*, usually in people with impaired cell-mediated immunity. It may cause progressive exertional dyspnea, dry cough, fever, and hypoxemia with diffuse ground-glass changes. Diagnosis and treatment require clinical, microbiologic, and radiologic assessment; trimethoprim-sulfamethoxazole is commonly used.

Synonyms:

Pneumography

Contrast imaging of body cavities. Pneumoencephalography obsolete. Pneumoperitoneum for laparoscopy.

Synonyms:

Pneumomediastinum

Air in the mediastinum, often from alveolar rupture with air tracking along bronchovascular sheaths. Causes include asthma exacerbation, trauma, Valsalva maneuver, and esophageal rupture (Boerhaave syndrome). It presents with chest pain, subcutaneous emphysema, and Hamman's crunch (mediastinal crunch synchronous with heartbeat).

Synonyms:

Pneumonectomy

Removal of an entire lung, most often for centrally located lung cancer; carries higher operative morbidity and mortality than lobectomy and requires preserved contralateral lung function.

Synonyms:

Pneumonia

Infection of the lung parenchyma, classified as community-acquired (CAP), hospital-acquired (HAP), or ventilator-associated (VAP). Common pathogens: *Streptococcus pneumoniae*, *Haemophilus influenzae*, *Mycoplasma pneumoniae*, viruses. Presents with cough, fever, dyspnea, and consolidation on imaging. Severity assessment:

CURB-65 or PSI.

Synonyms:

Pneumopericardium

Air in the pericardial space, usually from trauma (penetrating chest injury), esophageal perforation, or iatrogenic causes (central line placement, cardiac surgery). Can cause cardiac tamponade if under tension. Diagnosis by chest X-ray showing air surrounding the heart (air-fluid level if combined with effusion).

Synonyms:

Pneumoperitoneum

Free air within the peritoneal cavity, most commonly caused by perforation of a hollow viscus such as the stomach, duodenum, or colon. Iatrogenic causes include recent laparoscopy, endoscopy with perforation, and peritoneal dialysis. Presents with acute abdominal pain, rigidity, and signs of peritonitis.

Synonyms:

Pneumothorax

Air in the pleural space causing lung collapse. Primary spontaneous occurs in tall, thin young men. Secondary occurs with underlying lung disease. Tension is a medical emergency.

Synonyms:

POEMS Syndrome

A rare plasma-cell disorder named for polyneuropathy, organomegaly, endocrinopathy, monoclonal plasma-cell disorder, and skin changes. Other manifestations include sclerotic bone lesions, papilledema, fluid overload, thrombocytosis, and elevated vascular endothelial growth factor.

Synonyms:

Point Mutation

Change in single nucleotide base pair. Substitutions: transition (purine to purine, pyrimidine to pyrimidine) or transversion (purine to pyrimidine). Effects: silent (same amino acid), missense (different amino acid), nonsense (stop codon).

Synonyms:

Point-of-Care Testing

Diagnostic testing performed near the patient rather than in a central laboratory. POCT can shorten turnaround time but requires validated devices, quality control, operator training, and appropriate interpretation.

Synonyms:

Point-of-Care Ultrasound

Bedside ultrasonography performed and interpreted by the treating clinician to answer focused diagnostic or procedural questions. Emergency applications include cardiac activity, volume status, pulmonary pathology, abdominal free fluid, vascular thrombosis, and procedural guidance.

Synonyms:

Poison Control

A specialized service that provides immediate advice about exposure to medicines, chemicals, or other potential poisons.

Synonyms:

Poison-Center Consultation

Specialist toxicology advice used to identify hazards, interpret exposure and laboratory data, select antidotes, guide observation or disposition, and coordinate public-health response. Consultation is appropriate for significant, uncertain, mixed, pediatric, or unusual exposures.

Synonyms:

Poisoning

Harmful effect from exposure to toxic substance. Routes: ingestion, inhalation, dermal, injection. Management: ABCs, decontamination, antidote if available, supportive care.

Synonyms:

Poland Syndrome

A congenital condition characterized by absence or underdevelopment of part of the pectoral muscles on one side, sometimes accompanied by abnormalities of the hand on the same side.

Synonyms:

Polio

Abbreviation for poliomyelitis, an acute viral infection caused by poliovirus, an enterovirus of the Picornaviridae family transmitted via the fecal-oral route, primarily affecting children under 5 years of age.

Synonyms:

Poliomyelitis

An infection caused by poliovirus that may be asymptomatic or may damage motor neurons and cause acute flaccid paralysis.

Synonyms:

Poliovirus

An enterovirus that causes poliomyelitis, a paralytic illness. The virus is transmitted by the fecal-oral route. Most infections are asymptomatic, but a small percentage cause acute flaccid paralysis. The virus attacks motor neurons in the spinal cord. Diagnosis involves stool culture and PCR. There is no specific treatment.

Synonyms:

Polish (Dental)

Smoothing restorative surfaces to reduce plaque accumulation. Essential for longevity.

Synonyms: Dental

Polyarteritis Nodosa

Necrotizing inflammation of medium-sized muscular arteries, spares lungs. Associated with hepatitis B (10-30%). Clinical: systemic symptoms, mononeuritis multiplex, livedo reticularis, renal involvement (hypertension, renal insufficiency—no glomerulonephritis), GI ischemia.

Synonyms:

Polychondritis

Relapsing inflammatory disorder targeting cartilage throughout the body, causing pain, swelling, and destruction of the ears, nose, larynx, trachea, and joints. May lead to airway collapse and hearing loss.

Synonyms:

Polycystic Kidney Disease

Inherited disorder with progressive renal cyst formation. ADPKD most common from PKD1 or PKD2 mutations. Bilateral enlarged kidneys with countless cysts. PKD1 more severe with earlier ESRD. Extrarenal manifestations include hepatic cysts and berry aneurysms. Screen family members.

Synonyms:

Polycystic Liver Disease

Dominant polycystic liver disease is an autosomal dominant condition characterized by multiple hepatic cysts that may cause massive hepatomegaly, abdominal pain, and compressive symptoms. Usually associated with autosomal dominant polycystic kidney disease. Liver function is preserved even with extensive cyst involvement.

Synonyms:

Polycystic Ovary Syndrome

Common endocrine disorder affecting six to twelve percent of reproductive-aged women characterized by hyperandrogenism, ovulatory dysfunction, and polycystic ovarian morphology on ultrasound.

Synonyms:

Polycythemia

Elevated red blood cell mass/hematocrit. Primary: polycythemia vera (JAK2 V617F mutation, tri-lineage proliferation, low EPO, risk of thrombosis and myelofibrosis/leukemia). Secondary: hypoxia (COPD, high altitude, congenital heart disease, sleep apnea) with high EPO, or EPO-secreting tumors (renal cell, hepatoma).

Synonyms:

Polycythemia Vera

A chronic myeloproliferative neoplasm characterized by increased red blood cell mass, often with increased white blood cell and platelet counts, driven by constitutive activation of the JAK-STAT signaling pathway.

Synonyms:

Polydactylysm

Congenital presence of extra fingers or toes.

Synonyms:

Polydactyly

A congenital anomaly characterized by supernumerary digits on the hands or feet. Postaxial polydactyly (ulnar/fibular side, most common): more frequent in African American and Native American populations, often isolated and autosomal dominant.

Synonyms:

Polydipsia

Excessive, unquenchable thirst. A classic symptom of hyperosmolar states and endocrine disorders.

Synonyms:

Polyethylene Glycol

An osmotic laxative used for constipation and bowel preparation for colonoscopy. PEG (e.g., Miralax, GoLYTELY) is a non-absorbable polymer that draws water into the colonic lumen, softening stool and stimulating defecation without significant electrolyte shifts. For chronic constipation: 17 g daily in water.

Synonyms:

Polygenic Inheritance

Trait influenced by multiple genes, each with small effect. Examples: height, skin color, common diseases (diabetes, heart disease). Produces continuous variation.

Synonyms:

Polygenic Risk Score

A statistical estimate of disease susceptibility calculated from the combined effects of many genetic variants, each usually contributing a small amount of risk. It modifies but does not replace clinical risk assessment or environmental factors.

Synonyms:

Polyhydramnios

Excessive amniotic fluid during pregnancy. Causes include diabetes, fetal swallowing or gastrointesti-

nal disorders, chromosomal abnormalities, and unknown factors; severity and treatment depend on the cause.

Synonyms:

Polymastia

The presence of more than two breasts, resulting from development of accessory breast tissue along the mammary ridge, most commonly in the axillary region and present at birth or appearing at puberty.

Synonyms:

Polymerase Chain Reaction

An in-vitro method that exponentially amplifies a defined DNA segment through repeated cycles of denaturation, primer annealing, and DNA synthesis by a thermostable polymerase. It is used in diagnosis, research, forensics, and pathogen detection.

Synonyms:

Polymicrobial infections

Infections caused by multiple microbial species. Polymicrobial infections are common in wound infections, intra-abdominal infections, and respiratory infections. The interactions between organisms can be synergistic or antagonistic. Understanding polymicrobial infections is essential for selecting appropriate antimicrobial therapy.

Synonyms:

Polymicrogyria

A brain malformation characterized by an excessive number of abnormally small, fused gyri, resulting in an irregular, bumpy cortical surface with shallow sulci. Caused by abnormal late neuronal migration or post-migrational cortical organization. May be focal or diffuse, unilateral or bilateral, and symmetric or asymmetric.

Synonyms:

Polymyalgia Rheumatica

An inflammatory syndrome, usually affecting older adults, that causes bilateral shoulder and hip-girdle pain and morning stiffness. It is associated with giant-cell arteritis and requires assessment for symp-

toms such as new headache or visual disturbance.

Synonyms:

Polymyositis

An idiopathic inflammatory myopathy characterized by symmetric, proximal muscle weakness (shoulders, hips) with elevated muscle enzymes (CK, aldolase, LDH). More common in women, peaks at 30-50 years.

Synonyms:

Polyp Surveillance Colonoscopy

Interval-based endoscopic follow-up of patients with previously identified colorectal polyps. Intervals are determined by polyp number, size, and histological features. One to two small adenomas require surveillance at seven to ten years. Three to four adenomas at three to five years.

Synonyms:

Polyphagia

Excessive, uncontrollable hunger or increased appetite. Classic cardinal symptom of uncontrolled Diabetes Mellitus (cellular starvation due to lack of insulin or insulin resistance), Hyperthyroidism (elevated basal metabolic rate), Prader-Willi Syndrome, and atypical depression.

Synonyms:

Polypharmacy

Use of multiple medications by one patient, often defined numerically as five or more concurrent medicines. It increases the risk of interactions, adverse effects, prescribing cascades, nonadherence, and medication errors, although some multidrug regimens are clinically appropriate.

Synonyms:

Polysomnography

Sleep study measuring brain activity, breathing, oxygen saturation, muscle activity. Diagnoses sleep apnea, parasomnias.

Synonyms:

Polysomnography (Sleep Study)

Overnight monitoring for sleep-disordered breathing. Parameters: EEG (sleep staging: N1, N2, N3, REM), EOG (eye movements), EMG (chin and leg movements), airflow (nasal pressure, thermistor), respiratory effort (chest/abdomen belts), snore microphone, body position, oximetry (SpO2), and ECG.

Synonyms: Sleep Study

Polyunsaturated Fat

Liquid at room temperature. Sources: fish, vegetable oils, nuts. Essential fatty acids.

Synonyms:

Polyuria

Excessive urine output, defined as >3 L/day in adults. Causes are divided into water diuresis and solute diuresis. Water diuresis: central diabetes insipidus (ADH deficiency), nephrogenic diabetes insipidus (ADH resistance from lithium, hypercalcemia, hypokalemia, genetic causes), and primary polydipsia (psychogenic or dipsogenic).

Synonyms:

Pons

Middle brainstem segment with prominent anterior bulge containing pontine nuclei (relaying cortical input to cerebellum), corticospinal fibers, and cranial nerve V, VI, VII, and VIII nuclei. Fourth ventricle floor is partly formed by the pons. Pneumotaxic center (parabrachial nucleus) regulates breathing pattern.

Synonyms:

Popliteal Aneurysm

Aneurysm of popliteal artery behind knee. Associated with AAA. Risk: thrombosis, embolism, compression. Treatment: surgical repair or endovascular stenting.

Synonyms:

Popliteal Artery

Continues from femoral artery at the adductor hiatus, dividing into anterior/posterior tibial arteries

at the lower popliteus border. Deepest popliteal fossa structure, related anteriorly to vein and tibial nerve. Palpable at the fossa's inferior margin.

Synonyms:

Popliteal Fossa

Diamond-shaped space on the posterior knee, bounded by hamstrings superiorly and gastrocnemius heads inferiorly. Contains popliteal artery/vein, tibial nerve, and common peroneal nerve. The popliteal pulse is palpated at the inferior margin.

Synonyms:

Population Attributable Fraction

The proportion of cases or disease burden in the total population that would theoretically be prevented if the exposure were eliminated, assuming the exposure is causal and other conditions remain unchanged.

Synonyms:

Population Attributable Risk

Proportion of disease in population attributable to exposure. $PAR = (\text{incidence total} - \text{incidence unexposed}) / \text{incidence total}$.

Synonyms:

Porcelain Gallbladder

Calcification of the gallbladder wall visible on imaging representing chronic inflammatory condition associated with cholelithiasis and chronic cholecystitis. Historically considered a strong risk factor for gallbladder carcinoma, recent studies suggest the cancer risk may be lower than previously estimated.

Synonyms:

Porencephaly

A cavity or cyst within the cerebral hemisphere caused by developmental malformation or destruction of previously formed brain tissue. Clinical effects depend on location and size and may include seizures, hemiparesis, developmental impairment, hydrocephalus, or cerebral palsy.

Synonyms:

Porphyria Cutanea Tarda

The most common porphyria, caused by a deficiency of hepatic uroporphyrinogen decarboxylase (UROD), leading to accumulation of uroporphyrinogens. Triggered by hepatitis C virus (HCV), alcohol abuse, iron overload (hemochromatosis), and estrogen therapy.

Synonyms:

Porphyrias

Metabolic disorders of heme synthesis causing cutaneous and neurological symptoms. Cutaneous porphyrias include porphyria cutanea tarda (blisters on sun-exposed skin, hypertrichosis, sclerodermoid changes), erythropoietic protoporphyria (immediate pain and burning on sun exposure without visible changes), and variegate porphyria.

Synonyms:

Portal Hypertension

Elevated pressure in the portal venous system defined as hepatic venous pressure gradient exceeding five millimeters of mercury with clinically significant portal hypertension occurring when the gradient exceeds ten.

Synonyms:

Portal Hypertensive Gastropathy

Diffuse mucosal changes in the stomach due to portal hypertension causing chronic blood loss. Characterized by mosaic pattern and cherry red spots on endoscopy representing dilated mucosal vessels. Most common in patients with advanced cirrhosis and portal hypertension.

Synonyms:

Portal System

Venous network draining the GI tract, spleen, and pancreas to the liver via the portal vein (formed by superior mesenteric and splenic vein union behind the pancreatic neck). Carries nutrient-rich deoxygenated blood for hepatic processing before systemic entry. Receives left gastric, right gastric, cystic, and paraumbilical veins.

Synonyms:

Portal Vein

The vein carrying nutrient-rich blood from the gastrointestinal tract, spleen, pancreas, and gallbladder to the liver, formed behind the pancreatic neck by the union of the superior mesenteric and splenic veins. It enters the porta hepatis with the hepatic artery and bile duct.

Synonyms:

Portal Vein Thrombosis

Partial or complete thrombosis of the portal vein or its branches. It may result from cirrhosis, malignancy, inflammation, thrombophilia, or abdominal surgery and can cause portal hypertension, intestinal ischemia, or variceal formation.

Synonyms:

Portion Control

Managing serving sizes. Larger portions available today contribute to obesity. Using smaller plates, reading labels helpful.

Synonyms:

Portopulmonary Syndrome

Development of pulmonary arterial hypertension in the setting of portal hypertension or liver disease. Results from increased cardiac output and splanchnic vasodilation leading to pulmonary vascular remodeling.

Synonyms:

Positional Asphyxia

Fatal or potentially fatal impairment of breathing caused by body position that restricts chest movement, airway patency, or venous return. Risk is increased by restraint, intoxication, obesity, and inability to reposition; findings are nonspecific and require scene and medical correlation.

Synonyms:

Positive End-Expiratory Pressure

Pressure maintained at end-expiration to prevent alveolar collapse. Improves oxygenation by recruiting alveoli and increasing FRC. Balances oxygenation with hemodynamic effects.

Synonyms:

Positive Feedback

A regulatory mechanism in which an output amplifies the initiating stimulus, producing an accelerating or self-reinforcing response that drives the system away from equilibrium and toward completion of an event.

Synonyms:

Positive Predictive Value

The probability that a person with a positive test result truly has the target condition. PPV depends on test specificity and sensitivity and on disease prevalence or pretest probability in the tested population.

Synonyms:

Positive Predictive Value in Surveillance

The proportion of reported signals or alerts that represent true events meeting the surveillance case definition. It is influenced by the specificity of the signal and the underlying prevalence of the condition.

Synonyms:

Positive Pressure Ventilation

Mechanical ventilation that delivers air/oxygen under positive pressure to support or replace spontaneous breathing. Noninvasive (NIV): CPAP (continuous) and BiPAP (two levels) via mask for obstructive sleep apnea, cardiogenic pulmonary edema, and hypercapnic COPD.

Synonyms:

Positive Symptoms

Symptoms reflecting an excess or distortion of normal mental functions, such as hallucinations, delusions, disorganized speech, or grossly disorganized behavior. They are contrasted with negative symptoms, which reflect loss or reduction of function.

Synonyms:

Positron

Anti-particle of electron. Emitted by PET radionu-

clides. Annihilation with electron produces two 511 keV photons.

Synonyms:

Positron Emission Mammography

PET imaging of breast. Higher sensitivity than mammography for dense breasts. Limited availability.

Synonyms:

Positron Emission Tomography

Functional imaging modality using positron-emitting radionuclides. Common isotope: fluorine-18 (110 min half-life). Detection: annihilation photons (511 keV) detected in coincidence. Tracers: FDG (metabolism), florbetapir (amyloid), flortaucipir (tau), PSMA (prostate cancer).

Synonyms:

Post-Acute Rehabilitation

Time-limited interdisciplinary care after an acute illness, injury, or hospitalization to restore mobility, self-care, cognition, communication, and safe community function. Intensity and setting depend on medical stability and rehabilitation potential.

Synonyms:

Post-Cardiac Arrest Management

Care after return of spontaneous circulation that supports breathing and circulation, identifies and treats the cause of the arrest, manages temperature and seizures when indicated, and assesses neurologic recovery over time.

Synonyms:

Post-Concussion Syndrome

Persistent symptoms after concussion: headache, dizziness, cognitive difficulties, sleep disturbance, mood changes. Management: symptom-directed, gradual return to activity.

Synonyms:

Post-Dural Puncture Headache

A positional headache occurring after accidental dural puncture during epidural placement or lum-

bar puncture, caused by cerebrospinal fluid leakage and intracranial hypotension. Symptoms include frontal or occipital headache worse when upright and relieved when supine, neck stiffness, tinnitus, photophobia, and nausea.

Synonyms:

Post-exposure prophylaxis

The administration of antimicrobial agents after exposure to a pathogen to prevent infection. PEP is used for HIV, hepatitis B, hepatitis C, rabies, and other infections. The timing of PEP is critical, with early administration being most effective. Understanding PEP is essential for managing occupational exposures and outbreaks.

Synonyms:

Post-Infectious Cough

A chronic cough persisting 3–8 weeks after a URI, caused by transient bronchial hyperresponsiveness and airway inflammation. It is self-limited and usually resolves without treatment. Inhaled corticosteroids, antitussives, and time are the mainstays of management.

Synonyms:

Post-Mortem

An examination of a body after death to determine the cause of death, identify disease processes, and evaluate the effects of medical or surgical treatment. Also called autopsy, necropsy.

Synonyms: autopsy, necropsy.

Post-Obstructive Pneumonia

Pneumonia occurring distal to a bronchial obstruction caused by tumor, foreign body, mucus plug, or stenosis. The obstruction prevents clearance of secretions, creating a favorable environment for infection. It does not resolve with antibiotics alone until the obstruction is relieved.

Synonyms:

Post-Operative Atelectasis

Collapse of some alveoli after surgery, promoted by anesthesia, shallow breathing, pain, immobil-

ity, mucus retention, or underlying lung disease. Management addresses the cause and may include mobilization, effective analgesia, deep breathing, and treatment of complications.

Synonyms:

Post-Pneumonectomy Syndrome

A rare complication following pneumonectomy where the remaining lung herniates across the mediastinum, causing compression of airways and vessels. It presents with dyspnea, stridor, and recurrent infections. Treatment is surgical correction with mediastinal repositioning and prosthetic implant placement.

Synonyms:

Post-Streptococcal Glomerulonephritis

Immune-mediated glomerulonephritis following infection with nephritogenic strains of group A streptococcus typically 1 to 3 weeks after pharyngitis or 3 to 6 weeks after skin infection. Subepithelial humps on electron microscopy representing immune complex deposits.

Synonyms:

Post-Surgical Pain

Acute pain following operative procedures, caused by tissue incision, retraction, dissection, and inflammation, mediated by nociceptors sensitized by prostaglandins, bradykinin, and cytokines. Intensity varies by procedure (thoracotomy, joint replacement, and laparotomy produce more severe pain).

Synonyms:

Post-Surgical Rehabilitation

Recovery program after surgery. Phases: acute (pain control, wound care), subacute (range of motion, strengthening), functional (return to activities). Protocols vary by procedure.

Synonyms:

Post-Term Pregnancy

Pregnancy continuing beyond 42 weeks gestation (294 days from LMP). Risk factors include prior post-term pregnancy, nulliparity, and genetic factors.

Complications include macrosomia, oligohydramnios, meconium aspiration, placental insufficiency, and stillbirth.

Synonyms:

Post-Test Probability

The probability of disease after incorporating a test result with the pretest probability. It can be estimated using Bayes' theorem or by converting pretest odds to post-test odds with the appropriate likelihood ratio.

Synonyms:

Post-Thrombotic Syndrome

Chronic pain, heaviness, edema, skin change, and sometimes ulceration developing after deep-vein thrombosis because of persistent venous obstruction and valvular damage. Compression, exercise, skin care, and selected interventions may reduce disability.

Synonyms:

Post-Transfusion Purpura

A rare immune-mediated thrombocytopenic disorder occurring several days after transfusion of blood products, usually in previously sensitized individuals. It causes abrupt, severe thrombocytopenia with petechiae, mucosal bleeding, or more serious haemorrhage.

Synonyms:

Post-Traumatic Stress Disorder

A disorder that may develop after exposure to actual or threatened death, serious injury, or sexual violence, causing persistent re-experiencing, avoidance, negative mood or cognition, and heightened arousal.

Synonyms:

Post-Void Residual

The amount of urine remaining in the bladder after urination, measured by ultrasound or catheterization. A persistently high residual may indicate incomplete emptying, but its significance depends on the volume, timing, symptoms, and clinical context.

Synonyms:

Post-Void Residual Volume

The amount of urine remaining in the bladder immediately after urination, measured by ultrasound or catheterization. An elevated residual suggests incomplete emptying but must be interpreted with timing, bladder volume, symptoms, and repeated measurements.

Synonyms:

Postanesthesia Care Unit

The postanesthesia care unit (PACU) is a monitored recovery area where patients are observed during the immediate postoperative period. Admission assessment includes vital signs, level of consciousness, pain assessment, and surgical site evaluation.

Synonyms:

Postcholecystectomy Syndrome

Persistence or recurrence of symptoms after cholecystectomy. Causes include retained common bile duct stones, sphincter of Oddi dysfunction, bile salt malabsorption, irritable bowel syndrome, and other gastrointestinal conditions. Evaluation includes liver function tests, MRCP, and endoscopic ultrasound.

Synonyms:

Posterior

Relating to the back of the body or positioned closer to the back.

Synonyms:

Posterior Cruciate Ligament Injury

Tear of the PCL, less common than ACL injury. Mechanism: dashboard injury (tibia striking dashboard), hyperflexion, or fall on a flexed knee with foot plantarflexed. Presents with posterior knee pain, mild swelling, and posterior sag of the tibia. Positive posterior drawer test (most sensitive), posterior sag sign (Godfrey test).

Synonyms:

Posterior Cruciate Ligament Tear

PCL tear: less common, usually from direct blow to tibia (dashboard injury). Symptoms: knee pain, swelling, instability. Diagnosis: posterior drawer test, MRI. Treatment: usually conservative, surgical if combined injuries.

Synonyms:

Posterior Descending Artery

An artery running in the posterior interventricular groove and supplying the inferior ventricular walls and posterior interventricular septum. It usually arises from the right coronary artery in right-dominant circulation but may arise from the circumflex artery.

Synonyms:

Posterior Drawer Test

PCL integrity test. Knee flexed 90 degrees, posterior tibial translation.

Synonyms:

Posterior Pituitary

The neural lobe of the pituitary that stores and releases vasopressin and oxytocin synthesized in the hypothalamus. Vasopressin regulates renal water retention and vascular tone; oxytocin contributes to uterine contraction and milk ejection.

Synonyms:

Posterior reversible encephalopathy syndrome

A neurotoxic state caused by failed cerebrovascular autoregulation, typically from acute hypertension, eclampsia, immunosuppressive drugs (tacrolimus, cyclosporine), or sepsis. Presents with headache, seizures, altered consciousness, and visual disturbances.

Synonyms:

Posterior Subcapsular Cataract

A type of lens opacity located at the posterior aspect of the lens, just anterior to the posterior lens capsule, in the visual axis, and it is particularly visually disabling because of its central location.

Synonyms:

Posterior Tibial Artery

Arises from the popliteal artery, courses deep in the posterior leg, palpable behind the medial malleolus. Divides into medial/lateral plantar arteries for the sole. Supplies posterior leg muscles. Important for peripheral vascular disease assessment. The pedal pulse behind the medial malleolus is a key clinical examination component.

Synonyms:

Posterior Urethral Valves

The most common cause of lower urinary tract obstruction in male infants, caused by congenital mucosal folds (valves) in the posterior urethra (prostatic urethra) that obstruct urine outflow.

Synonyms:

Posterior Uveitis

Inflammation affecting the retina, choroid, or both. It may cause floaters, blurred vision, visual-field defects, or eye pain and can result from infection, autoimmune disease, or other inflammatory conditions.

Synonyms:

Posterior Vitreous Detachment

Separation of the posterior vitreous cortex from the retinal surface, commonly related to age-related vitreous liquefaction. New flashes or floaters require dilated retinal examination because an associated retinal tear or detachment may be present.

Synonyms:

Postmenopausal osteoporosis

Bone loss caused by lower estrogen levels associated with menopause. Sometimes called type I osteoporosis.

Synonyms:

Postmenopause

The period in a woman's life lasting from the end of perimenopause until the end of life.

Synonyms:

Postmortem Artifact

Any structural, chemical, or physical change introduced into a body after death (e.g., embalming artifacts, insect activity, postmortem animal scavenging, resuscitation trauma) that mimics antemortem disease or trauma.

Synonyms:

Postmortem Interval

Estimated elapsed time between actual death and the time of autopsy or body discovery, calculated utilizing algor mortis, livor mortis, rigor mortis, vitreous potassium levels, and insect succession patterns.

Synonyms:

Postmortem Toxicology

Toxicologic analysis of specimens collected after death to identify drugs, alcohols, poisons, and metabolites. Results must account for therapeutic administration, redistribution, decomposition, specimen site, contamination, and tolerance before conclusions about causation are made.

Synonyms:

Postnatal depression

A depressive episode occurring after childbirth, with persistent low mood, anhedonia, sleep or appetite disturbance, guilt, impaired bonding, or suicidal thoughts.

Synonyms:

Postoperative Care

Structured post-surgical management encompassing pain control, fluid balance, wound care, early mobilization, and venous thromboembolism prophylaxis.

Synonyms:

Postoperative Cognitive Dysfunction

A decline in cognitive abilities such as memory, attention, or executive function after surgery. It may be temporary or persistent and is more frequent in older adults and after major or complicated procedures. Assessment requires comparison with the person's baseline and consideration of delirium, med-

ication effects, and other medical causes.

Synonyms:

Postoperative Complications

Clavien-Dindo classification: Grade I (any deviation, no treatment), Grade II (pharmacologic), Grade III (surgical/endoscopic/radiologic intervention: IIIa no GA, IIIb GA), Grade IV (ICU: IVa single organ, IVb multi-organ), Grade V (death).

Synonyms:

Postoperative Delirium

A common complication after major surgery, particularly in elderly patients. It is categorized as hyperactive (agitation, restlessness, hallucinations), hypoactive (lethargy, withdrawal, decreased responsiveness), or mixed. Hypoactive delirium is the most common and most missed form.

Synonyms:

Postoperative Ileus

Temporary impairment of gastrointestinal motility after surgery, most common after abdominal surgery. Pathophysiology: autonomic dysfunction (sympathetic overactivity), inflammatory mediators, opioids, and electrolyte abnormalities.

Synonyms:

Postoperative Nausea and Vomiting

Nausea, retching, or vomiting occurring after surgery. Risk is influenced by factors such as previous motion sickness or postoperative nausea, anesthetic technique, opioid use, and patient characteristics. Prevention and treatment are tailored to the individual risk and procedure.

Synonyms:

Postoperative Pain Management

Management of pain after surgery using a combination of medicines, regional techniques, physical measures, and rehabilitation. The plan is tailored to the procedure, pain severity, medical conditions, and risks of adverse effects.

Synonyms:

Postoperative Pulmonary Complication

Respiratory deterioration after surgery, including atelectasis, pneumonia, aspiration, respiratory failure, bronchospasm, and exacerbation of chronic lung disease. Risk reduction includes smoking cessation, lung-protective ventilation, analgesia, mobilization, and appropriate respiratory exercises.

Synonyms:

Postpartum Anxiety

Excessive, persistent, or distressing anxiety during pregnancy or after childbirth that interferes with sleep, daily function, bonding, or self-care. It may occur with panic, intrusive worries, or depression and deserves clinical assessment; thoughts of self-harm or harm to the baby require emergency help.

Synonyms:

Postpartum Blues

A common, short-lived period of tearfulness, mood changes, irritability, or anxiety beginning soon after childbirth and usually improving within two weeks. Support, rest, and practical help are important; persistent, severe, psychotic, or suicidal symptoms require prompt assessment for a postpartum mental-health disorder.

Synonyms:

Postpartum Cardiomyopathy (Peripartum Cardiomyopathy)

A dilated cardiomyopathy causing heart failure toward the end of pregnancy or during the months after delivery. Symptoms may include breathlessness, difficulty lying flat, swelling, fatigue, or chest discomfort and require prompt assessment.

Synonyms: Peripartum Cardiomyopathy

Postpartum Depression

Major depressive or manic episodes occurring during pregnancy or within four weeks of delivery (DSM-5). The term is often used more broadly to cover depressive episodes up to one year postpartum. Risk factors include prior depression, lack of social support, stressful life events, and hormonal fluctuations.

Synonyms:

Postpartum Endometritis

Infection of the decidua and endometrial cavity after delivery, occurring more often after cesarean birth. Fever, uterine tenderness, pelvic pain, and foul-smelling lochia are typical; treatment generally requires intravenous broad-spectrum antibiotics.

Synonyms:

Postpartum Hemorrhage

Excessive bleeding after childbirth, usually caused by poor uterine contraction, retained placental tissue, genital-tract trauma, or a clotting disorder. It can cause shock and requires urgent obstetric assessment and treatment.

Synonyms:

Postpartum Hemorrhage (Secondary)

Excessive bleeding occurring between 24 hours and 12 weeks postpartum. Causes: retained products of conception (most common), endometritis, subinvolution of the placental site, and coagulopathy. Presents with heavy or prolonged bleeding, cramping, and passing clots. Diagnosis: ultrasound (retained tissue, thickened endometrium).

Synonyms: Secondary

Postpartum Infection

Infections occurring after delivery, a leading cause of maternal morbidity. Types: endometritis (most common, especially after cesarean), wound infection (cesarean incision, episiotomy, perineal laceration), urinary tract infection, mastitis, septic pelvic thrombophlebitis, and pneumonia.

Synonyms:

Postpartum Psychosis

A rare but severe psychiatric emergency (1-2 per 1000 deliveries) characterized by the acute onset of delusions, hallucinations, disorganized behavior, confusion, and mood swings (mania or depression) within 1-4 weeks postpartum.

Synonyms:

Postpartum Thyroiditis

Autoimmune inflammation of the thyroid occurring

during the first year after delivery. It may cause a temporary hyperthyroid phase followed by hypothyroidism, and symptoms and recovery vary; thyroid-function testing guides follow-up and treatment.

Synonyms:

Postrenal AKI

Acute kidney injury caused by obstruction of urine flow from the kidneys to the urethra. Causes include prostate enlargement, stones, tumors, fibrosis, and neurogenic bladder. The effect depends on the location, duration, completeness, and whether one or both kidneys are affected.

Synonyms:

Poststreptococcal pustulosis

A sterile, non-follicular pustular eruption occurring as a rare sequela of streptococcal pharyngitis, presenting with scattered pustules on an erythematous base, typically on the trunk and extremities. It is thought to be an immune-mediated hypersensitivity reaction to streptococcal antigens.

Synonyms:

Postterm Pregnancy

Pregnancy that continues beyond 42 completed weeks of gestation. Risks and management depend on gestational dating, fetal condition, and maternal health.

Synonyms:

Posttraumatic Stress Disorder

A psychiatric disorder that develops after exposure to a traumatic event (death, serious injury, sexual violence).

Synonyms:

Postural Orthostatic Tachycardia Syndrome

An autonomic disorder causing an excessive increase in heart rate after standing, with symptoms such as light-headedness, palpitations, fatigue, weakness, brain fog, nausea, or fainting. Diagnosis requires clinical assessment and exclusion of other causes of

orthostatic symptoms.

Synonyms:

Potassium

Major intracellular cation. Essential for cardiac function, muscle contraction, blood pressure regulation. Deficiency: hypokalemia (weakness, arrhythmias). Sources: fruits, vegetables, potatoes, beans.

Synonyms:

Potassium Binders

Sodium zirconium cyclosilicate and patiromer. Exchange potassium in GI tract for sodium or calcium. Treat chronic hyperkalemia allowing continued RAAS inhibitor use in CKD.

Synonyms:

Potassium-Sparing Diuretics

Potassium-sparing diuretics act on the distal nephron to promote sodium excretion while minimizing potassium loss. They include epithelial sodium channel blockers such as amiloride and triamterene, and mineralocorticoid receptor antagonists such as spironolactone and eplerenone.

Synonyms:

Potency

The amount of a drug required to produce a specified effect. A more potent drug produces that effect at a lower dose, but potency does not indicate the maximum effect.

Synonyms:

Potency vs Efficacy

Potency is the amount of drug required to produce a given effect, measured by the EC₅₀ (the concentration producing 50% of maximal effect). Drugs with higher potency achieve effects at lower doses (e.g., fentanyl is more potent than morphine).

Synonyms:

Pott Disease

TB of the spine involving thoracic or lumbar vertebrae. Causes vertebral destruction, kyphosis (gibbus

deformity), and paravertebral abscess. May cause spinal cord compression.

Synonyms:

Potter Syndrome

A sequence of anomalies resulting from severe oligohydramnios (low amniotic fluid volume), most commonly caused by bilateral renal agenesis, but also from autosomal recessive polycystic kidney disease, posterior urethral valves, or chronic amniotic fluid leak.

Synonyms:

Powassan Encephalitis

Encephalitis caused by Powassan virus, a tick-borne flavivirus.

Synonyms:

PR Interval

The time from the onset of the P wave to the onset of the QRS complex, representing the time for electrical conduction through the atria, AV node, and His-Purkinje system. Normal duration is 0.12-0.20 seconds (3-5 small boxes). Prolonged PR interval (>0.20 s) indicates first-degree AV block.

Synonyms:

Prader-Willi Syndrome

A genetic disorder caused by loss of function of genes on chromosome 15 (paternal deletion or maternal uniparental disomy). Features: neonatal hypotonia and failure to thrive, followed by hyperphagia and obesity in childhood. Intellectual disability, short stature, hypogonadism, and behavioral problems.

Synonyms:

Pralidoxime

An oxime that can reactivate inhibited acetylcholinesterase when administered early after organophosphate poisoning, particularly for nicotinic weakness and respiratory-muscle dysfunction. It is used with atropine and supportive care according to exposure and local guidance.

Synonyms:

Pramipexole

A non-ergot dopamine agonist (D2/D3) used for Parkinson disease (as monotherapy in early disease or adjunct to levodopa) and restless legs syndrome. Activates striatal dopamine receptors.

Synonyms:

Prebiotics

Non-digestible fibers feeding beneficial gut bacteria. Sources: garlic, onions, leeks, asparagus, bananas, whole grains.

Synonyms:

Prebiotics and Probiotics

Prebiotics are nondigestible food ingredients (fiber and oligosaccharides—inulin, fructooligosaccharides, galactooligosaccharides) that selectively stimulate the growth and activity of beneficial gut bacteria (*Bifidobacterium*, *Lactobacillus*), promoting host health.

Synonyms:

Precision Medicine

Treatment tailored to individual tumor characteristics. Requires molecular profiling.

Synonyms:

Precocious Puberty

Onset of secondary sexual characteristics before age eight in girls and age nine in boys. Central precocious puberty results from early activation of the hypothalamic-pituitary-gonadal axis. Causes include CNS tumors, hydrocephalus, and idiopathic.

Synonyms:

Preconception Counseling

Counseling provided to women of reproductive age before pregnancy to optimize outcomes.

Synonyms:

Prediabetes

Intermediate state of hyperglycemia between normal glucose homeostasis and diabetes defined by fasting glucose 100 to 125 milligrams per deciliter, two-hour glucose during oral glucose tolerance test 140 to 199

milligrams per deciliter, or A1c 5.7 to 6.4 percent.

Synonyms:

Predictive Test

A test that estimates whether a person or disease is likely to respond to a particular treatment.

Synonyms:

Preeclampsia

A pregnancy-specific hypertensive disorder defined as new-onset hypertension (blood pressure 140/90 mmHg or higher) after 20 weeks gestation with proteinuria or other end-organ damage.

Synonyms:

Preeclampsia with Severe Features

Preeclampsia accompanied by severe hypertension or signs of significant organ involvement, such as low platelets, liver or kidney dysfunction, pulmonary edema, severe headache, or visual symptoms. It requires urgent obstetric evaluation and management.

Synonyms:

Pregnancy

The physiological state in which a developing embryo or fetus grows within the female uterus, typically lasting approximately 40 weeks from the last menstrual period to childbirth.

Synonyms:

Pregnancy Nutrition

Nutrition care during pregnancy that supports maternal health, placental and fetal growth, and appropriate gestational weight gain. Energy, protein, folate, iron, iodine, choline, vitamin D, and other requirements vary by stage and individual clinical factors.

Synonyms:

Pregnancy Test

A glycoprotein hormone produced by the placenta, detected in urine and serum for pregnancy diagnosis. See hCG (Human Chorionic Gonadotropin).

Synonyms:

Pregnancy-Induced Hypertension

New-onset hypertension during pregnancy without the proteinuria or organ dysfunction that defines preeclampsia. Diagnosis and treatment depend on repeated blood-pressure measurements, gestational age, symptoms, and evidence of maternal or fetal complications.

Synonyms:

Preload

The end-diastolic volume or pressure in the ventricles, representing the degree of ventricular stretch before contraction. Preload is determined by venous return and is estimated by the pulmonary capillary wedge pressure (PCWP) or left ventricular end-diastolic pressure (LVEDP).

Synonyms:

Premature (Early) Ejaculation

A persistent or recurrent pattern of ejaculation that occurs sooner than desired, with limited control and associated personal distress. Assessment considers the person's typical experience and sexual context.

Synonyms: Early

Premature Atrial Contraction

A premature beat arising from an ectopic focus in the atria, producing an early P wave (often abnormal morphology) followed by a normal QRS; common and usually benign, increasing with age and caffeine/stress. ECG: early abnormal P wave, normal PR and QRS, followed by a compensatory pause.

Synonyms:

Premature Ejaculation

Ejaculation occurring sooner than desired. Most common sexual dysfunction in men. Treatment: behavioral techniques, topical anesthetics, SSRIs, counseling.

Synonyms:

Premature Ovarian Insufficiency

Loss of ovarian function before age forty characterized by amenorrhea, hypergonadotropic hypog-

onadism, and estrogen deficiency. Causes include genetic disorders particularly Turner syndrome and fragile X premutations, autoimmune oophoritis, iatrogenic from chemotherapy or radiation, and idiopathic.

Synonyms:

Premature Rupture of Membranes

PROM: spontaneous rupture of the amniotic membranes before the onset of labor; preterm PROM (PPROM) occurs before 37 weeks. Features: gush or leakage of fluid per vaginam; confirmed by sterile speculum (pooling, ferning, nitrazine pH test) or amniotic fluid biomarkers (IGFBP-1, PAMG-1).

Synonyms:

Premature Ventricular Contractions

Ectopic beats originating from the ventricles, appearing as wide, bizarre QRS complexes that occur earlier than expected. PVCs are common in the general population and are usually benign. Frequent PVCs (>10% of total beats) may cause left ventricular dysfunction.

Synonyms:

Premenstrual Dysphoric Disorder

A severe, debilitating form of premenstrual syndrome characterized by marked mood symptoms (depression, anxiety, irritability, mood swings), physical symptoms (breast tenderness, bloating, fatigue), and functional impairment that occur during the luteal phase and remit within days of menses onset.

Synonyms:

Premenstrual Syndrome

A recurrent pattern of physical, emotional, and behavioral symptoms during the luteal phase of the menstrual cycle that resolve with menses. Affects up to 50% of reproductive-age women. Symptoms: irritability, mood swings, depression, anxiety, bloating, breast tenderness, fatigue, and appetite changes.

Synonyms:

Prenatal Care

Regular medical care during pregnancy to mon-

itor maternal and fetal health. Includes history and physical exam, weight and blood pressure monitoring, urine testing, blood work, fundal height measurements, fetal heart rate auscultation, and ultrasound.

Synonyms:

Prenatal Diagnosis

Detection of genetic or structural disorders in fetus before birth. Methods: chorionic villus sampling (CVS, 10-13 weeks), amniocentesis (15-20 weeks), percutaneous umbilical blood sampling (PUBS, after 18 weeks). Non-invasive: NIPT (cell-free fetal DNA).

Synonyms:

Prenatal Exposure

Contact of a fetus with a medicine, substance, infection, or environmental factor during pregnancy. Effects depend on the agent, dose, timing, and fetal susceptibility.

Synonyms:

Prenatal Vitamins

Multivitamin supplements formulated for pregnancy, containing folic acid (400-800 mcg), iron (27-60 mg), calcium (200-300 mg), vitamin D (400-600 IU), DHA (200 mg), and iodine (150-220 mcg). Started preconceptually or at the first prenatal visit. Evidence supports NTD reduction from folic acid. Iron prevents maternal anemia.

Synonyms:

Preoperative Assessment

Preoperative assessment evaluates surgical risk and optimizes medical conditions before anesthesia. It includes medical history, physical examination, airway assessment, cardiovascular risk stratification (Revised Cardiac Risk Index), pulmonary function assessment, and laboratory testing based on clinical indication.

Synonyms:

Preoperative Evaluation

Medical assessment before elective surgery to opti-

mize outcomes and minimize perioperative risk.

Synonyms:

Prerenal Azotemia

A rise in nitrogen-containing waste products caused by reduced effective blood flow to the kidneys without primary renal-tissue injury. Causes include dehydration, hemorrhage, heart failure, sepsis, and hepatorenal syndrome; urine indices may support but do not by themselves establish the diagnosis.

Synonyms:

Presbycusis

Bilateral, usually symmetric age-related sensorineural hearing loss, initially affecting high frequencies and speech discrimination in noise. Management includes hearing rehabilitation, hearing aids, communication strategies, and cochlear implantation in selected severe cases.

Synonyms:

Presbyopia

Age-related loss of accommodation caused by lens hardening and loss of elasticity, beginning around age 40 and causing progressive difficulty with near vision. Corrected with reading glasses, bifocals, or progressive lenses; the most common refractive change of aging.

Synonyms:

Prescription

A written or electronic order by a licensed prescriber (physician, NP, PA, dentist) authorizing a pharmacy to dispense a specific drug to a specific patient. Components: patient identifiers, drug name, dose, route, frequency, quantity, refills, and prescriber signature.

Synonyms:

Prescription Drug

A medication whose dispensing or use is subject to prescription requirements under the applicable law. It requires professional oversight because of its risks, complexity, or need for monitoring; regulatory approval and prescribing rules vary by country and

product.

Synonyms:

Prescription Medications

Pharmaceutical drugs that require authorization from a licensed healthcare provider before they can be dispensed to a patient. These medications are regulated because they carry risks that necessitate professional oversight, including potential side effects, drug interactions, and the need for precise dosing.

Synonyms:

Preseptal Cellulitis

Preseptal cellulitis, also known as periorbital cellulitis, is an infection of the eyelid and periorbital tissues anterior to the orbital septum, without involvement of the orbital contents, and it is the most common orbital infection, particularly in children.

Synonyms: periorbital cellulitis, is an infection of the.

Pressure Atrophy

The gradual wasting of tissue resulting from sustained external compression that impairs blood supply and causes cellular shrinkage and eventual death. The mechanism involves compression of blood vessels, which reduces perfusion and causes ischemia of the dependent tissue.

Synonyms:

Pressure Injury

Localized damage to the skin and/or underlying soft tissue caused by prolonged pressure, shear, or friction, most commonly over bony prominences.

Synonyms:

Pressure Support Ventilation

Spontaneous breathing mode with ventilator-provided pressure support above PEEP for each breath. Reduces work of breathing. Used for weaning from mechanical ventilation.

Synonyms:

Pressure Ulcer

Localized damage to skin and underlying tissue caused by sustained pressure or pressure with shear, typically over a bony prominence. Staging includes non-blanchable erythema, partial-thickness loss, full-thickness loss, and full-thickness tissue loss with exposed or palpable deep structures; obscured wounds are unstageable.

Synonyms:

Pressure Ulcer Prevention

Measures that reduce prolonged pressure and tissue injury, including repositioning, support surfaces, skin inspection, moisture control, nutrition, and mobility.

Synonyms:

Pressure Urticaria

A form of chronic inducible urticaria in which sustained pressure causes localized swelling, erythema, and pain, usually after a delay of several hours. Lesions may last 8 to 72 hours and commonly affect the hands, feet, buttocks, or areas compressed by clothing or sitting.

Synonyms:

Pressure-Flow Study

Suite of diagnostic procedures designed to evaluate the physiological function of the lower urinary tract (bladder and urethral sphincter) during filling, storage, and emptying phases. See urodynamic testing.

Synonyms:

Presyncope

The sensation of imminent fainting (lightheadedness, weakness, visual blurring) without actual loss of consciousness, due to transient global cerebral hypoperfusion that resolves before LOC. Causes: orthostatic hypotension (volume depletion, autonomic failure, medications), vasovagal, cardiac (arrhythmias, aortic stenosis), and metabolic.

Synonyms:

Preterm Birth

Birth before 37 completed weeks of gestation. It may follow spontaneous labor or rupture of the membranes, or may be medically indicated because of maternal or fetal complications.

Synonyms:

Preterm Infant

An infant born before 37 completed weeks of gestation; classified by gestational age (late preterm 34-36, moderate 32-33, very preterm <32, extremely <28 weeks) and by birth weight. Causes: preterm labor, PPROM, preeclampsia, multiple pregnancy, infection, and iatrogenic.

Synonyms:

Preterm Labor

Regular uterine contractions causing cervical change before 37 weeks gestation. Risk factors include prior preterm delivery, multiple gestation, infection, and cervical insufficiency. Diagnosis requires regular contractions with documented cervical change.

Synonyms:

Preterm Premature Rupture of Membranes

Rupture of the amniotic membranes before the onset of labor at <37 weeks gestation. Causes: infection (subclinical chorioamnionitis), cervical insufficiency, and prior PPROM. Presents with sudden gush or leakage of fluid per vagina.

Synonyms:

Pretest Probability

The estimated probability that a patient has a disease before the result of a diagnostic test is known. It is based on prevalence, symptoms, examination findings, risk factors, and prior test results and should guide test selection and interpretation.

Synonyms:

Pretibial Myxedema

Localized dermopathy occurring in approximately five percent of patients with Graves disease caused by glycosaminoglycan deposition in the dermis par-

ticularly over the pretibial area. Presents as non-pitting indurated plaques with a peau d'orange appearance.

Synonyms:

Prevalence

Total number of cases (new and existing) in population at given time. Formula: all cases / total population. Prevalence = incidence $\times$ duration.

Synonyms:

Prevention

Measures to prevent disease. Primary (before disease), secondary (early detection), tertiary (complication prevention).

Synonyms:

Preventive Dentistry

Practice of preventing dental disease. Methods: oral hygiene instruction, fluoride, sealants, diet counseling, regular check-ups.

Synonyms:

Prevertebral air

Gas in the prevertebral soft tissues on lateral cervical spine radiograph, indicating a breach in the aerodigestive tract. It may result from esophageal perforation, tracheal injury, retropharyngeal abscess with gas-forming organisms, or trauma.

Synonyms:

Priapism

Prolonged, painful erection lasting longer than 4 hours, occurring independently of sexual desire or stimulation. Medical emergency categorized into two types: ischemic (low-flow, veno-occlusive) and non-ischemic (high-flow, arterial).

Synonyms:

Primary adrenal insufficiency (Addison's disease)

Destruction or dysfunction of the adrenal cortex causing deficiency of cortisol and aldosterone, presenting with fatigue, hyperpigmentation, weight loss, and salt craving. Lifelong hormone replacement is

required.

Synonyms: Addison's disease

Primary adrenal lymphoma

A rare lymphoma arising primarily in the adrenal gland, most commonly diffuse large B-cell lymphoma. It often presents bilaterally and may cause adrenal insufficiency.

Synonyms:

Primary Aldosteronism

Excess production of aldosterone by the adrenal glands, usually from an adrenal nodule or enlargement of both glands. It increases sodium retention and may cause hypertension, low potassium, or suppressed renin.

Synonyms:

Primary Biliary Cholangitis

A chronic autoimmune liver disease in which small intrahepatic bile ducts are progressively damaged. It can cause cholestasis, itching, fatigue, and eventually cirrhosis; antimitochondrial antibodies often support the diagnosis.

Synonyms:

Primary Ciliary Dyskinesia

An inherited disorder of ciliary structure or function that impairs mucociliary clearance. It can cause chronic sinus and lung infections, bronchiectasis, infertility, and abnormal organ laterality.

Synonyms:

Primary Hyperaldosteronism

Excess autonomous production of aldosterone by the adrenal glands. It can cause hypertension, low potassium, metabolic alkalosis, and suppressed renin. Causes include an adrenal adenoma or bilateral adrenal hyperplasia.

Synonyms:

Primary hyperoxaluria

A group of autosomal recessive metabolic disorders characterized by overproduction of oxalate by the liver, leading to calcium oxalate deposition in the

kidneys and other organs. Type 1 is caused by alanine-glyoxylate aminotransferase deficiency. It presents with recurrent nephrolithiasis, nephrocalcinosis, and progressive renal failure.

Synonyms:

Primary Hyperparathyroidism

Autonomous overproduction of parathyroid hormone from one or more abnormal parathyroid glands causing hypercalcemia. Most commonly caused by a single parathyroid adenoma accounting for approximately eighty-five percent. Multigland hyperplasia accounts for approximately ten to fifteen percent and parathyroid carcinoma is rare.

Synonyms:

Primary hypertrophic osteoarthropathy

A rare inherited syndrome characterized by digital clubbing, periostosis of long bones, and pachydermia, presenting with joint pain, skin thickening, and visible nail-bed enlargement.

Synonyms:

Primary Immune Response

The adaptive immune response to first exposure to an antigen, characterized by a slow onset (lag phase: days, during which antigen processing, clonal expansion, and differentiation occur), followed by rising antibody titers (predominantly IgM, then IgG), and generation of memory cells.

Synonyms:

Primary Immunodeficiency

A group of genetically determined disorders of the immune system causing increased susceptibility to infection, autoimmunity, and malignancy.

Synonyms:

Primary Lateral Sclerosis

A rare neurodegenerative disorder confined to the upper motor neurons (corticospinal tract) of the motor cortex and brainstem. Presents with slowly progressive spasticity, hyperreflexia, Babinski sign, and pseudobulbar affect (emotional lability).

Synonyms:

Primary Metabolism

The essential biochemical processes by which cells produce energy, synthesize molecules, and maintain their functions.

Synonyms:

Primary Myelofibrosis

A chronic myeloproliferative neoplasm characterized by bone marrow fibrosis (reticulin and/or collagen fibrosis), extramedullary hematopoiesis (primarily splenic and hepatic), and a leukoerythroblastic peripheral blood picture.

Synonyms:

Primary Open-Angle Glaucoma

A chronic optic neuropathy with characteristic retinal ganglion-cell and optic-nerve loss, usually accompanied by progressive visual-field defects, despite an anatomically open anterior-chamber angle. Intraocular pressure is an important modifiable risk factor, and treatment lowers pressure to slow progression.

Synonyms:

Primary Ovarian Insufficiency

Loss of normal ovarian activity before age 40, characterized by irregular or absent menses, reduced estrogen, and intermittently or persistently elevated gonadotropins. Causes include genetic, autoimmune, iatrogenic, toxic, infectious, and unknown factors.

Synonyms:

Primary Prevention

Preventing cancer development. Strategies: smoking cessation, vaccination (HPV, hepatitis B), sun protection, healthy diet, exercise.

Synonyms:

Primary Sclerosing Cholangitis

Chronic cholestatic liver disease characterized by progressive fibrosis and strictures of intrahepatic and extrahepatic bile ducts. The disease has a strong association with ulcerative colitis occurring in seventy to eighty percent of patients.

Synonyms:

Primary Tuberculosis

The first infection with *Mycobacterium tuberculosis*. It may produce a small pulmonary focus and regional lymph-node involvement; the infection may be contained as latent tuberculosis or progress to active disease.

Synonyms:

Primary Tumor

Original cancer site. Secondary: metastatic sites.

Synonyms:

Primordial Prevention

Preventing the emergence of disease risk factors by addressing social, economic, behavioural, and environmental conditions early. Examples: promoting healthy diets and physical activity in children, reducing tobacco exposure, and creating safe environments for exercise.

Synonyms:

Prion

An infectious agent composed solely of misfolded protein (PrP^{Sc}) that propagates by converting normal cellular prion protein (PrP^C) into the abnormal conformation; contains no nucleic acid, resistant to standard sterilization (heat, radiation, formaldehyde).

Synonyms:

Prion Disease

A neurodegenerative disease caused by abnormal folding and propagation of prion protein. These disorders are rare and usually progressive and fatal, although their course varies by the specific disease.

Synonyms:

PRK

Photorefractive keratectomy, commonly known as PRK, is a refractive surgical procedure that corrects myopia, hyperopia, and astigmatism by reshaping the corneal stroma using an excimer laser after mechanical removal of the corneal epithelium, without creating a corneal flap.

Synonyms:

Probable Cause

A legally recognized reasonable basis for believing that a person committed an offense or that evidence of an offense will be found.

Synonyms:

Probe

Instrument for exploring wound or cavity.

Synonyms:

Probiotic

Live microorganisms administered in adequate amounts to confer a health benefit by modulating the microbiome and immune responses.

Synonyms:

Procalcitonin

A biomarker that may rise during some bacterial infections and systemic inflammation. It can support assessment of infection and antibiotic decisions, but it cannot by itself diagnose or exclude bacterial infection or determine sepsis severity.

Synonyms:

Procalcitonin-guided antibiotic therapy

The use of procalcitonin levels to guide initiation and discontinuation of antibiotics. Procalcitonin is a biomarker that rises in bacterial infections and falls with effective treatment. Elevated levels support the need for antibiotic therapy, while declining levels support discontinuation.

Synonyms:

Procedural Sedation

Administration of sedative and analgesic medicines to facilitate a painful or anxiety-provoking procedure while preserving spontaneous ventilation and protective reflexes to the intended depth. Continuous monitoring and immediate rescue capability are required.

Synonyms:

Procedure

A planned medical or surgical action performed for diagnosis, treatment, prevention, or palliation.

Synonyms:

Proctitis

Inflammation of the rectal mucosa causing tenesmus, rectal pain, and bloody discharge. Causes include inflammatory bowel disease, sexually transmitted infections including gonorrhea, chlamydia, and herpes, radiation therapy, and ischemia. Diagnosed by proctoscopy with biopsy. Treatment is directed at the underlying etiology.

Synonyms:

Prodrug

A prodrug is a pharmacologically inactive compound that is converted to an active drug through metabolic processes within the body. Prodrugs are designed to overcome limitations of the parent drug including poor bioavailability, rapid metabolism, lack of tissue selectivity, or unacceptable side effects.

Synonyms:

Product Liability

Legal responsibility for injury or damage caused by a defective or unsafe product.

Synonyms:

Progeria

A rare genetic premature-aging syndrome, most commonly caused by a pathogenic LMNA variant. Children develop severe growth failure, characteristic skin and facial changes, loss of subcutaneous fat, joint stiffness, and early atherosclerotic cardiovascular disease.

Synonyms:

Progesterone

A natural steroid hormone produced mainly by the corpus luteum after ovulation and by the placenta during pregnancy. It transforms and maintains the endometrium for implantation, reduces uterine contractility during pregnancy, supports breast glandular development, and contributes to regulation of the menstrual cycle.

Synonyms:

Progesterone Supplementation

Administration of progesterone to prevent preterm birth in high-risk women. Natural progesterone (17-alpha hydroxyprogesterone caproate) shown to reduce preterm birth rate in women with prior spontaneous preterm delivery. Also beneficial for short cervix detected on screening. Typically started in the second trimester.

Synonyms:

Progestogen

A synthetic form of progesterone, the hormone that maintains the uterine lining in the secretory phase of the menstrual cycle and supports early pregnancy.

Synonyms:

Prognosis

Predicted outcome of cancer. Factors: stage, grade, molecular features, patient status. Survivability statistics.

Synonyms:

Prognostic Test

A test that provides information about the likely course or outcome of a disease.

Synonyms:

Progression

Worsening or advancement of a disease, such as increasing tumor size, new lesions, or spread to another site.

Synonyms:

Progression-Free Survival

The length of time from a defined starting point, such as diagnosis or treatment, until cancer progression or death from any cause, whichever occurs first.

Synonyms:

Progressive Disease

Worsening of cancer during or after treatment, defined per RECIST as growth of target lesions, appearance of new lesions, or unequivocal progression of non-target lesions.

Synonyms:

Progressive Supranuclear Palsy

A neurodegenerative tauopathy characterized by the accumulation of tau protein in the basal ganglia, brainstem, and cerebral cortex, belonging to the family of Parkinson plus syndromes.

Synonyms:

Projection

A defense mechanism in which unacceptable thoughts, feelings, or impulses are attributed to others. For example, a patient who is angry at the therapist may accuse the therapist of being angry at them. It is common in paranoid thinking, delusional disorders, and personality disorders.

Synonyms:

Prolactin Physiology

Prolactin is the only pituitary hormone primarily under tonic inhibitory control by the hypothalamus through dopamine acting on D2 receptors. Prolactin stimulates lactation suppresses GnRH and is important for reproductive function. Physiological elevations occur during pregnancy lactation breast stimulation sleep and stress.

Synonyms:

Prolactinoma

A benign prolactin-secreting pituitary adenoma, the most common functional pituitary tumor, presenting with galactorrhea, amenorrhea, infertility, and hypogonadism in women, and decreased libido, erectile dysfunction, and visual field defects in men. Prolactin levels are markedly elevated, often above 200 ng per mL.

Synonyms:

Prolactinoma Treatment

Treatment may include a dopamine agonist, surgery, radiation, or observation, depending on tumor size, symptoms, hormone levels, treatment response, and patient preferences. Dopamine agonists often lower prolactin levels and reduce tumor size.

Synonyms:

Prolapse of orbital fat

Herniation of intraorbital fat through a dehiscence in the orbital septum, most commonly presenting as a painless, soft, reducible mass in the upper eyelid or lower eyelid. It is often age-related and may be confused with a lipoma or dermoid cyst.

Synonyms:

Prolapse of the Uterus (Uterine Prolapse)

Descent of the uterus into the vaginal canal due to weakening of pelvic floor supports, most commonly the uterosacral and cardinal ligaments.

Synonyms: Uterine Prolapse

Proliferative Diabetic Retinopathy

The advanced stage of diabetic retinopathy, characterized by the growth of new, fragile blood vessels (neovascularization) on the retinal surface, optic disc, or iris in response to severe retinal ischemia and the release of vascular endothelial growth factor.

Synonyms:

Prolonged Deceleration

A fetal heart rate deceleration lasting ≥ 2 minutes but <10 minutes. If the deceleration persists ≥ 10 minutes, it is a baseline change. Causes: maternal hypotension (epidural-induced aortocaval compression), uterine hyperstimulation, umbilical cord prolapse, placental abruption, and maternal seizure.

Synonyms:

Prolonged Second Stage

Second stage of labor exceeding the time limits: nulliparas — 3 hours with regional anesthesia (2 hours without); multiparas — 2 hours with regional (1 hour without). Management: reassess position, contractions, and fetal status. For inadequate contractions: oxytocin augmentation. For malposition (OP, OT): manual rotation.

Synonyms:

Prominent iris collarette

A visible thickening or ridge of the iris at the junction of the pupillary and ciliary zones, representing the site where the embryonic pupillary membrane

was attached. It is typically a normal anatomical variant but can be a clinical sign in conditions such as Axenfeld-Rieger syndrome or iridocorneal endothelial syndrome.

Synonyms:

Promoter

DNA sequence upstream of gene where RNA polymerase and transcription factors bind to initiate transcription. Core promoter: TATA box, transcription start site. Regulatory elements: enhancers, silencers.

Synonyms:

Pronation

Rotation of the forearm so that the palm faces posteriorly in anatomical position, or downward when the elbow is flexed. The radius crosses over the ulna.

Synonyms:

Prone Positioning

Turning supine patients to prone for > 12 hours daily in severe ARDS. Improves oxygenation by recruiting dorsal lung segments. Reduces mortality when PaO₂/FiO₂ < 150.

Synonyms:

Propafenone

A class IC antiarrhythmic with sodium channel blockade and weak beta-blocking activity. Used for paroxysmal atrial fibrillation (in patients without structural heart disease, including 'pill-in-the-pocket'), supraventricular tachycardias, and ventricular arrhythmias.

Synonyms:

Properdin Deficiency

X-linked recessive (CFP gene). Properdin stabilizes alternative pathway C3 convertase. Recurrent Neisseria infections (meningococcemia, gonococcemia). Low AH50, normal CH50, low properdin. Treatment: meningococcal vaccination (ACWY + B), prophylactic penicillin, IVIG for severe infections.

Synonyms:

Prophylaxis

Preventive administration of a vaccine, antimicrobial, or immune globulin to prevent infection in exposed or at-risk individuals. Examples: post-exposure prophylaxis for rabies, HIV, and hepatitis B; perioperative antibiotic prophylaxis; and chemoprophylaxis for malaria. See also Endocarditis Prophylaxis.

Synonyms:

Propofol Infusion Syndrome

Rare but fatal complication of prolonged high-dose propofol infusion. Features: metabolic acidosis, rhabdomyolysis, cardiac failure, hyperlipidemia. Risk: critical illness, children, high doses (>4-5 mg/kg/hr), prolonged infusion (>48 hours). Prevention: limit dose and duration.

Synonyms:

Proprioception

The sense of body position, movement, and joint position arising from mechanoreceptors in muscles (muscle spindles), tendons (Golgi tendon organs), and joints, as well as skin receptors. Signals ascend via the dorsal column-medial lemniscal pathway (conscious proprioception) and the spinocerebellar tract (unconscious).

Synonyms:

Propylthiouracil

A thioamide antithyroid drug that inhibits thyroid peroxidase (hormone synthesis) and blocks peripheral T₄-to-T₃ conversion. Used for hyperthyroidism/Graves disease—preferred in the first trimester of pregnancy (lower teratogenicity than methimazole) and in thyroid storm.

Synonyms:

Prostacyclin Analogs

Medications that mimic prostacyclin (PGI₂), causing vasodilation and inhibiting platelet aggregation in the pulmonary vasculature. They include epoprostenol (continuous IV), treprostinil (subcutaneous, IV, inhaled, oral), and iloprost (inhaled). They are used for severe PAH.

Synonyms:

Prostaglandin Analogs

A class of topical medications used in the treatment of open-angle glaucoma and ocular hypertension that lower intraocular pressure by increasing the uveoscleral outflow of aqueous humor, reducing intraocular pressure by approximately twenty-five to thirty-five percent.

Synonyms:

Prostaglandins

Lipid compounds involved in labor initiation and cervical ripening. Endogenous prostaglandins (PGE₂, PGF₂α) stimulate uterine contractions and promote cervical softening. Synthetic analogs used clinically: misoprostol (PGE₁) and dinoprostone (PGE₂ gel or insert) for cervical ripening and labor induction.

Synonyms:

Prostate

Walnut-sized gland (approximately 20 g) surrounding the urethra just below the bladder, producing approximately 30 percent of seminal fluid. It has peripheral, central, and transition zones.

Synonyms:

Prostate Adenocarcinoma

The most common non-cutaneous malignancy in men and the second leading cause of cancer death in men after lung cancer. The disease typically arises in the peripheral zone of the prostate and is hormone-dependent, requiring androgens for growth.

Synonyms:

Prostate Biopsy

Sampling of prostate tissue, commonly by transperineal or transrectal needle technique, for histologic diagnosis of prostate cancer. Targeted and systematic cores may be combined, with attention to infection prevention, bleeding, urinary retention, and sepsis risk.

Synonyms:

Prostate Cancer

Most common non-cutaneous cancer in men. Risk factors: age, family history, African American race, high red meat intake. Screening: PSA testing, DRE. Diagnosis: transrectal ultrasound-guided biopsy. Staging: TNM system, Gleason score.

Synonyms:

Prostate-Specific Antigen

A serine protease produced mainly by prostate epithelial cells and secreted into seminal fluid. PSA can be measured in blood, where levels may rise with benign enlargement, inflammation, infection, or prostate cancer. Interpretation depends on age, prostate size, medicines, symptoms, and changes over time.

Synonyms:

Prostatectomy

Surgical procedure involving the partial or total removal of the prostate gland. Simple prostatectomy: removal of the inner adenoma while leaving the peripheral capsule intact, performed open, laparoscopically, or robotically for very large BPH (>80-100 grams).

Synonyms:

Prostatitis

Inflammation or infection of the prostate that may cause pelvic or urinary pain, difficulty urinating, fever, or recurrent urinary infections. It can be acute, chronic bacterial, or chronic pelvic pain syndrome.

Synonyms:

Prosthesis

Artificial replacement for missing body part. Types: upper extremity, lower extremity. Components: socket, suspension, joint, pylon, terminal device. Fitting: certified prosthetist. Training: physical therapy.

Synonyms:

Prosthetic Limb

Artificial replacement for missing limb. Types:

above/below knee, above/below elbow. Components: socket, suspension, joint, pylon, terminal device. Materials: carbon fiber, silicone, metal. Rehabilitation: gait training, strength, ADL.

Synonyms:

Prosthetic Training

Training for amputees: stump care, donning/doffing, gait training, balance, stair negotiation, community ambulation.

Synonyms:

Prosthetics

Artificial replacement of missing body part. Elderly use: lower limb (transtibial, transfemoral), upper limb. Considerations: mobility level, cognition, vision, comorbidities, support system. Rehabilitation: physical therapy, strength training, balance.

Synonyms:

Prosthodontics

Dental specialty concerned with replacement of missing teeth and restoration of oral function. Types: fixed (crowns, bridges, implants), removable (partial dentures, complete dentures), maxillofacial prosthetics (ocular, nasal, auricular). Goals: aesthetics, function, phonetics, preservation of remaining structures.

Synonyms:

Protease inhibitor

A class of antiretroviral drugs that block the viral protease enzyme responsible for cleaving polyprotein precursors into functional proteins during HIV replication, preventing the formation of mature, infectious virions. Used in combination antiretroviral therapy for HIV infection.

Synonyms:

Protease Inhibitors

A class of antiviral drugs that block viral proteases, enzymes essential for processing viral polyproteins into functional components needed for viral assembly and maturation.

Synonyms:

Protective Factor

Attribute decreasing probability of disease. Examples: exercise (cardiovascular disease), vaccination (infectious disease).

Synonyms:

Protein

Polymer of amino acids linked by peptide bonds. Structure: primary (sequence), secondary (alpha helix, beta sheet), tertiary (3D folding), quaternary (multiple subunits). Functions: enzymes, structural, transport, signaling, immune defense, movement. Folding determined by amino acid sequence (Anfinsen's dogma). Chaperones assist folding.

Synonyms:

Protein Binding

The reversible association of drug molecules with plasma proteins, primarily albumin for acidic drugs and alpha-1 acid glycoprotein for basic drugs. Only unbound or free drug is pharmacologically active and available for distribution to tissues, metabolism by the liver, and excretion by the kidneys.

Synonyms:

Protein C

Natural anticoagulant. Inactivates factors Va and VIIIa. Warfarin can cause skin necrosis in deficiency.

Synonyms:

Protein C Deficiency

An inherited (autosomal dominant) thrombophilia causing increased VTE risk. Protein C is a vitamin K-dependent natural anticoagulant that inactivates factors Va and VIIIa and stimulates fibrinolysis. Heterozygous: 6-10 fold increased VTE risk.

Synonyms:

Protein Folding

The process by which newly synthesized polypeptide chains acquire their functional three-dimensional structures. The amino acid sequence (primary structure) determines the folding pathway.

Synonyms:

Protein S

Vitamin K-dependent plasma glycoprotein that acts as a cofactor for activated protein C in the inactivation of factors Va and VIIIa. Deficiency or dysfunction increases the risk of venous thromboembolism.

Synonyms:

Protein S Deficiency

An inherited (autosomal dominant) thrombophilia. Protein S is a vitamin K-dependent natural anticoagulant that acts as a cofactor for activated protein C in inactivating factors Va and VIIIa. Heterozygous: 2-10 fold increased VTE risk. Homozygous: rare, purpura fulminans.

Synonyms:

Protein Synthesis

Translation of mRNA code into polypeptide chain. Initiation: ribosome assembly at start codon (AUG). Elongation: aminoacyl-tRNAs bring amino acids; peptide bonds form in peptidyl transferase center; ribosome translocates. Termination: stop codon (UAA, UAG, UGA) recognized by release factors.

Synonyms:

Protein-Energy Malnutrition

Severe deficiency of protein and calories. Types: marasmus (chronic, wasting), kwashiorkor (acute, edema, fatty liver), marasmic-kwashiorkor. Risk: famine, poverty, alcoholism, malignancy, malabsorption. Treatment: gradual refeeding, monitor refeeding syndrome.

Synonyms:

Proteinuria

Excretion of more than 150 mg of protein in urine daily. Causes include glomerular disease, tubulointerstitial disease, overflow proteinuria from multiple myeloma, and functional proteinuria from fever or exercise. Quantification by 24-hour urine or spot protein-to-creatinine ratio.

Synonyms:

Prothrombin Time

PT: a coagulation test measuring the extrinsic and

common pathways (factors VII, X, V, II, fibrinogen), used to monitor warfarin therapy (reported as INR) and assess bleeding risk. Prolonged PT: warfarin/Vitamin K deficiency, liver disease, DIC, factor deficiencies (VII), and anticoagulant use.

Synonyms:

Proto-Oncogene

A normal gene that regulates cell growth, division, differentiation, or survival and can become an oncogene after activating mutation, amplification, translocation, or overexpression.

Synonyms:

Proton Pump Inhibitor

A class of medications that irreversibly inhibit the gastric H⁺/K⁺ ATPase (proton pump) in parietal cells, the final common pathway of gastric acid secretion, producing profound and sustained suppression of both basal and stimulated acid production.

Synonyms:

Proton Therapy

Radiation using protons instead of photons. Bragg peak allows precise dose delivery. Used for pediatric tumors, skull base tumors.

Synonyms:

Protozoa

Single-celled eukaryotes lacking a cell wall, classified by locomotion into amoebae, flagellates, ciliates, and sporozoa.

Synonyms:

Proximal

Positioned closer to the trunk of the body or point of origin of a limb.

Synonyms:

Proximal Humerus Fractures

Proximal humerus fractures: Neer classification (4 parts: articular surface, greater tuberosity, lesser tuberosity, shaft; displaced >1 cm or angulated >45 degrees = part). 1-part (nondisplaced): sling, early motion. 2-part: surgical neck (ORIF plate, IM nail)

or greater tuberosity (if displaced >5mm or rotator cuff involvement).

Synonyms:

Proximal Radioulnar Joint

Pivot synovial joint between radial head circumference and ulnar radial notch, held by the annular ligament. Allows pronation/supination with approximately 150 degrees range. Parallel bones in supination; radius crosses ulna in pronation. Significant in radial head fractures, Monteggia fracture-dislocations, and nursemaid's elbow.

Synonyms:

Proximal Tubule

Segment of the nephron extending from Bowman capsule to the loop of Henle with a convoluted proximal straight tubule and convoluted proximal tubule. Responsible for reabsorbing approximately sixty-five percent of filtered sodium, water, bicarbonate, glucose, amino acids, and phosphate through an extensive brush border.

Synonyms:

Proximal Tubule Reabsorption

The proximal convoluted tubule (PCT) reabsorbs approximately 65 percent of filtered sodium, water, glucose, amino acids, bicarbonate, and phosphate.

Synonyms:

Proximate Cause

The legally sufficient cause that directly contributes to an injury or outcome.

Synonyms:

Prune Belly Syndrome

A congenital syndrome comprising the triad: deficient abdominal wall musculature (wrinkled, prune-like appearance), bilateral cryptorchidism (undescended testes), and urinary tract anomalies (dilated ureters, dilated and trabeculated bladder, and posterior urethral valves or urethral atresia). Almost exclusively affects boys.

Synonyms:

Pruritus

Itching; an unpleasant sensation provoking scratching, a common symptom of skin and systemic disease.

Synonyms:

Pruritus Ani

Persistent itching around the anus with multiple potential causes including hemorrhoids, fissures, infections such as pinworms and candidiasis, dermatologic conditions including psoriasis and lichen sclerosus, and idiopathic causes.

Synonyms:

Pruritus in CKD

Severe itching in dialysis patients from uremic toxin accumulation, elevated calcium-phosphorus product, and secondary hyperparathyroidism. Difficult to treat. Include phosphate binders, dialysis optimization, gabapentin, and UV phototherapy.

Synonyms:

PSA (Prostate-Specific Antigen)

A serine protease produced by prostate tissue and measured in blood. It may be used with shared decision-making to assess prostate-cancer risk and to monitor known disease. PSA can also rise with benign enlargement, inflammation, infection, or recent procedures, so no single value establishes or excludes cancer.

Synonyms: Prostate-Specific Antigen

Pseudoaneurysm

A contained arterial wall disruption in which blood communicates with the arterial lumen but is held by surrounding tissue rather than all layers of the arterial wall. It may follow catheterization, trauma, surgery, infection, or grafting and can rupture or embolize.

Synonyms:

Pseudobulbar Affect

Involuntary episodes of laughing or crying disproportionate to mood, usually due to neurologic disease.

Synonyms:

Pseudoclubbing

Broadening and flattening of the nail tips without the complete loss of the angle between the nail and nail fold that characterizes true clubbing. It is seen in conditions such as hyperparathyroidism, rheumatoid arthritis, and psoriasis.

Synonyms:

Pseudoephedrine

A sympathomimetic (alpha-1 agonist, some beta effects) oral decongestant used for nasal congestion in colds and sinusitis. Increases nasal mucosal vasoconstriction.

Synonyms:

Pseudogout

Calcium pyrophosphate deposition disease (CPPD): deposition of calcium pyrophosphate dihydrate crystals in joints, causing acute arthritis resembling gout (pseudogout) or chronic osteoarthritis-like disease.

Synonyms:

Pseudogout Flare

Acute crystal-induced arthritis caused by calcium pyrophosphate dihydrate deposition, often affecting the knee or wrist. Identification of positively birefringent rhomboid crystals in synovial fluid supports the diagnosis.

Synonyms:

Pseudohypoparathyroidism

A group of inherited disorders in which target organs are resistant to parathyroid hormone, causing hypocalcaemia and hyperphosphataemia despite elevated PTH. Some forms cause Albright hereditary osteodystrophy, with short stature, round facies, brachydactyly, or subcutaneous ossifications.

Synonyms:

Pseudomelanosis duodeni

Benign condition characterized by dark pigment deposits in the duodenal mucosa, visible as slate-gray or black patches on endoscopy, caused by accumulation of iron-containing pigment in macrophages within the lamina propria.

Synonyms:

Pseudomembranous Colitis

Colonic inflammation caused by *C. difficile* infection showing yellow-white plaques on colonoscopy. The plaques consist of fibrin, inflammatory cells, and necrotic epithelial debris overlying mucosal ulceration. Presents with profuse watery diarrhea and abdominal pain.

Synonyms:

Pseudomonas aeruginosa infection

Infection caused by *Pseudomonas aeruginosa*, an opportunistic gram-negative bacterium that can affect the lungs, wounds, urinary tract, blood, or other sites.

Synonyms:

Pseudomonas aeruginosa resistance

Pseudomonas aeruginosa has intrinsic and acquired resistance mechanisms making it inherently resistant to many antibiotics. Intrinsic resistance includes low outer membrane permeability, efflux pumps, and chromosomal beta-lactamase.

Synonyms:

Pseudomyxoma Peritonei

Accumulation of mucinous ascites and mucin-producing tumor nodules in the peritoneal cavity, usually from a ruptured low-grade appendiceal or ovarian mucinous neoplasm; treated with cytoreductive surgery and hyperthermic intraperitoneal chemotherapy.

Synonyms:

Pseudothrombocytosis due to red cell fragments

Falsely elevated platelet count on automated hematology analyzers caused by fragmentation of red blood cells (schistocytes) being counted as platelets. Seen in microangiopathic hemolytic anemias such as TTP, HUS, DIC, and mechanical heart valves. Manual peripheral blood smear review confirms true platelet count.

Synonyms:

Pseudoxanthoma elasticum

An inherited connective tissue disorder caused by mutations in the ABCC6 gene, leading to progressive calcification and fragmentation of elastic fibres in the skin, eyes, and cardiovascular system. Cutaneous findings include yellowish, peau d'orange papules in flexural areas (neck, axillae, groin) resembling plucked chicken skin.

Synonyms:

Psittacosis

A zoonotic infection caused by *Chlamydia psittaci*, transmitted from infected birds (parrots, pigeons, poultry) via inhalation of dried bird droppings/secretions. Features: abrupt fever, headache, myalgia, dry cough, atypical pneumonia; complications: hepatitis, myocarditis, meningitis.

Synonyms:

PSMA

Prostate-specific membrane antigen. Target for PET imaging and therapy in prostate cancer.

Synonyms:

Psoas Abscess

A collection of pus in or around the psoas muscle, caused by infection spreading through the blood or from nearby tissues. It may cause back or hip pain, fever, difficulty walking, or few symptoms and usually requires imaging and targeted treatment.

Synonyms:

Psoriasis

A chronic immune-mediated skin disorder that causes well-defined plaques with overlying scale. It may also affect the nails and joints, and its severity and distribution vary among individuals.

Synonyms:

Psoriatic Arthritis

An inflammatory arthritis associated with psoriasis of the skin or nails. It may affect the spine, peripheral joints, digits, or tendon insertions, and diagnosis uses the clinical pattern together with appropriate laboratory and imaging findings.

Synonyms:

Psychoactive Substance

A substance that alters mood, perception, cognition, behavior, or consciousness.

Synonyms:

Psychodermatology

Psychodermatology addresses the mind-skin connection. Stress exacerbates psoriasis, eczema, acne, and urticaria. Psychiatric disorders (depression, anxiety, body dysmorphic disorder) are associated with skin conditions.

Synonyms:

Psychodynamic Therapy

A form of depth psychology that explores how unconscious processes, early life experiences, and internal conflicts influence current thoughts, feelings, and behaviors. It involves exploration of transference and countertransference, defense mechanisms, and the therapeutic relationship as a vehicle for change.

Synonyms:

Psychogenic Non-Epileptic Seizures

Seizure-like episodes that are not caused by abnormal electrical activity in the brain. They are a form of conversion disorder with attacks or seizures. Events may include shaking, stiffening, unresponsiveness, and other movements.

Synonyms:

Psychological Support

Counseling, therapy for patients with chronic illness, disability, pain. Address depression, anxiety, adjustment difficulties, coping strategies.

Synonyms:

Psychopharmacology

The study and clinical application of medications used to treat psychiatric disorders. It involves understanding drug mechanisms, pharmacokinetics, drug interactions, and side effect profiles.

Synonyms:

Psychosis

A syndrome characterized by loss of contact with shared reality, commonly involving delusions, hallucinations, disorganized thought or behavior, and negative symptoms. Causes include primary psychotic disorders, mood disorders, substances, medications, neurologic disease, and systemic illness.

Synonyms:

Psychosocial Rehabilitation

Support for mental illness recovery: skills training, supported employment, peer support.

Synonyms:

Psychosocial Support

Cancer affects mental health. Depression, anxiety common. Support groups, counseling beneficial.

Synonyms:

Psychotherapy

A structured treatment in which a trained therapist helps a person understand and change distressing thoughts, emotions, behaviors, or relationship patterns. Major approaches include cognitive behavioral therapy, psychodynamic therapy, interpersonal therapy, supportive therapy, exposure-based therapy, and family or group therapy.

Synonyms:

Pterygium

A triangular, fibrovascular proliferation of bulbar conjunctiva extending onto the cornea, usually nasal, associated with chronic ultraviolet exposure, dust, and dry climates. Most are asymptomatic or cause mild irritation, but growth toward the visual axis can induce astigmatism and obstruct vision.

Synonyms:

PTH-Related Peptide

A peptide that activates the parathyroid-hormone receptor and can cause humoral hypercalcemia of malignancy. It increases bone resorption and renal calcium retention while reducing phosphate reabsorption.

Synonyms:

Pthirus pubis

The pubic louse, a parasitic insect that infests the pubic hair and occasionally other coarse body hair, causing pediculosis pubis. Transmission is primarily through sexual contact. It causes intense pruritus and may transmit *Borrelia recurrentis* causing relapsing fever. Diagnosis is by visual identification of the louse or nits.

Synonyms:

Ptosis

The drooping of the upper eyelid, which can be congenital or acquired, and can range from mild drooping that is primarily a cosmetic concern to severe drooping that obstructs the visual axis and causes amblyopia in children or visual impairment in adults.

Synonyms:

PTSD

Post-traumatic stress disorder, a condition involving persistent trauma-related memories, avoidance, negative mood or cognition, and heightened arousal after a severe traumatic event.

Synonyms:

Puberty

Developmental period during which sexual maturation and reproductive capability are attained.

Synonyms:

Pubis

Anterior-inferior hip bone with body, superior ramus, and inferior ramus. Two pubic bones meet at the pubic symphysis (cartilaginous joint widening in childbirth). Pubic tubercle is the lateral inguinal ligament attachment. Direct hernias emerge medial to inferior epigastric vessels near it.

Synonyms:

Public Exposure

Radiation exposure to public from nuclear medicine patients. Guidelines for discharge after therapy. I-131 therapy: radiation safety instructions for 3-7 days.

Synonyms:

Public Health

The science and practice of protecting and improving the health of communities through education, policy-making, and research for disease and injury prevention.

Synonyms:

Public Health Emergency

Event threatening public health. Examples: pandemic, bioterrorism, natural disaster. Declaration enables special powers.

Synonyms:

Public Health Research Bias

Systematic error in a population-health study, including selection bias, information bias, and confounding.

Synonyms:

Pudendal Block

A local anesthetic block of the pudendal nerve (S2-S4) used for perineal anesthesia during the second stage of labor, outlet forceps delivery, or perineal repair. Technique: transvaginal approach — a needle guide is placed on the ischial spine, and the needle is advanced through the sacrospinous ligament.

Synonyms:

Puerperal Fever

Fever higher than 38 degrees Celsius occurring during the first 10 days postpartum, not including the first 24 hours. Most common cause is endometritis, particularly after cesarean delivery. Other causes include urinary tract infection, wound infection, mastitis, and thrombophlebitis.

Synonyms:

Puerperal psychosis

A rare psychiatric emergency beginning soon after childbirth, characterized by rapidly changing mood, confusion, delusions, hallucinations, or disorganized behavior.

Synonyms:

Puerperium

The period following delivery during which the reproductive organs return to their prepregnancy state, approximately 6 weeks in duration. Characterized by uterine involution, cervical closure, lochial discharge changes, and hormonal shifts. Physical recovery includes perineal healing, breast engorgement, and metabolic readjustment.

Synonyms:

Pugilistic Stance

The characteristic body position adopted by fire victims—flexed arms, elbows bent, fists clenched, knees flexed—resulting from heat-induced contraction (denaturation) of muscles (mainly flexors) and tendons, not from conscious movement. It occurs with thermal injury and can be present regardless of cause (even if death preceded fire).

Synonyms:

Pulmonary Alveolar Hemorrhage

Bleeding into the alveolar spaces from disruption of the alveolar-capillary membrane. Causes include vasculitis (GPA, MPA, Goodpasture), connective tissue disease, medications, and coagulopathy. It presents with hemoptysis, falling hemoglobin, diffuse bilateral infiltrates, and serially bloody returns on BAL.

Synonyms:

Pulmonary Alveolar Microlithiasis

A rare genetic disease caused by SLC34A2 mutations, leading to accumulation of calcium phosphate microliths within the alveoli. HRCT shows diffuse bilateral calcified nodules with a “sandstorm” appearance. It is usually diagnosed in the third to fourth decade.

Synonyms:

Pulmonary Alveolar Proteinosis

A rare disease characterized by accumulation of surfactant-like material within the alveoli due to impaired clearance by alveolar macrophages. Most cases are autoimmune (anti-GM-CSF antibodies). Presents with progressive dyspnea and cough. HRCT shows bilateral ground-glass opacities with

“crazy paving” pattern.

Synonyms:

Pulmonary Angiography

Contrast imaging of the pulmonary arteries, usually by catheter. It can diagnose pulmonary vascular abnormalities but is now used less often for pulmonary embolism because CT pulmonary angiography is less invasive.

Synonyms:

Pulmonary Arterial Hypertension

A precapillary pulmonary hypertension syndrome caused by increased pulmonary vascular resistance from pulmonary arteriolar disease. It may be idiopathic, heritable, drug-associated, or associated with conditions such as connective-tissue disease, congenital heart disease, portal hypertension, or HIV.

Synonyms:

Pulmonary Arteriovenous Fistula

An abnormal direct connection between a pulmonary artery and vein that bypasses the capillary bed. It can cause hypoxemia, cyanosis, dyspnea, paradoxical emboli, or brain abscess.

Synonyms:

Pulmonary Arteriovenous Malformation

An abnormal direct communication between a pulmonary artery and vein, causing a right-to-left shunt. It may be idiopathic or associated with hereditary hemorrhagic telangiectasia (Osler-Weber-Rendu syndrome). It can cause hypoxemia, paradoxical emboli (stroke, brain abscess), and hemoptysis.

Synonyms:

Pulmonary Artery

The blood vessel that carries deoxygenated blood from the right ventricle of the heart to the lungs.

Synonyms:

Pulmonary Artery Catheter

A catheter inserted through the right heart into the pulmonary artery to measure hemodynamic

parameters (PA pressure, PAWP, cardiac output). Used for diagnosis and management of pulmonary hypertension, heart failure, and critical illness.

Synonyms:

Pulmonary Atresia

A congenital heart defect where the pulmonary valve is completely absent (atretic), obstructing right ventricular outflow. Two main types: pulmonary atresia with intact ventricular septum (PA-IVS) and pulmonary atresia with ventricular septal defect (PA-VSD, also called tetralogy of Fallot with pulmonary atresia).

Synonyms: tetralogy of Fallot with pulmonary atresia).

Pulmonary Capillary Wedge Pressure

An indirect estimate of left-atrial pressure obtained by briefly occluding a small pulmonary-artery branch with a balloon-tipped catheter. It reflects left-sided filling pressure when measured correctly and interpreted in the appropriate clinical and ventilatory context.

Synonyms:

Pulmonary Contusion

Bruising of the lung parenchyma from blunt chest trauma, causing hemorrhage and edema without lung laceration. It impairs gas exchange and can progress to ARDS. It is often associated with rib fractures and flail chest. Treatment is supportive with lung-protective ventilation.

Synonyms:

Pulmonary Edema

Accumulation of fluid in the pulmonary interstitium and alveoli, most commonly due to left-sided heart failure (cardiogenic). Causes increased hydrostatic pressure leads to transudation. Presents with acute dyspnea, orthopnea, crackles, and S3 gallop. Non-cardiogenic causes include ARDS, renal failure, and high altitude.

Synonyms:

Pulmonary Embolism

Occlusion of the pulmonary arterial bed by a thrombus, tumor, air, or fat, most commonly originating as a deep vein thrombosis (DVT) from the lower extremities. Presents with acute onset of dyspnea, pleuritic chest pain, cough, hemoptysis, tachycardia, and hypoxemia.

Synonyms:

Pulmonary Embolism Treatment

Anticoagulation: DOACs preferred (rivaroxaban, apixaban) or LMWH bridging to warfarin. Duration: 3 months for provoked (reversible risk factor), indefinite for unprovoked or recurrent. Massive PE: systemic thrombolysis (alteplase 100 mg IV over 2 hours) or surgical catheter-directed embolectomy.

Synonyms:

Pulmonary Fibrosis

Scarring replacing normal alveolar architecture. Causes: IPF, connective tissue disease, asbestos, radiation, drugs (bleomycin, methotrexate). Features: progressive dyspnea, dry cough, digital clubbing.

Synonyms:

Pulmonary Function Tests

Spirometry: FVC (forced vital capacity), FEV1 (forced expiratory volume in 1 second), FEV1/FVC ratio. Obstructive pattern: FEV1/FVC <0.7 (asthma, COPD). Restrictive pattern: FVC <80% with normal or increased FEV1/FVC (pulmonary fibrosis, chest wall disorders). Lung volumes: TLC (total lung capacity), RV (residual volume).

Synonyms:

Pulmonary Hemosiderosis

Accumulation of iron-containing pigment in the lungs, usually after repeated bleeding into the air spaces. It may cause cough, coughing blood, anemia, shortness of breath, or diffuse lung changes and can result from immune-mediated or other disorders.

Synonyms:

Pulmonary Hypertension

Elevated mean pulmonary artery pressure (>20

mmHg at rest) due to various etiologies. WHO Group 1: pulmonary arterial hypertension (idiopathic, heritable, drug-induced). Group 2: left heart disease. Group 3: lung disease. Group 4: chronic thromboembolic. Group 5: multifactorial. Diagnosis requires right heart catheterization.

Synonyms:

Pulmonary Hypertension Classification

WHO Classification: Group 1 (PAH: idiopathic, heritable, drug-induced, connective tissue disease-associated). Group 2 (left heart disease: systolic/diastolic dysfunction, valvular). Group 3 (lung disease/hypoxia: COPD, ILD, sleep apnea). Group 4 (chronic thromboembolic). Group 5 (multifactorial: sarcoidosis, hematologic disorders).

Synonyms:

Pulmonary Infarction

Lung necrosis from PE when bronchial supply is compromised. Causes pleuritic pain, hemoptysis, and wedge-shaped opacity. Most PE do not cause infarction due to dual blood supply.

Synonyms:

Pulmonary Lobes

The anatomical divisions of the lungs separated by interlobar fissures. The right lung has superior, middle, and inferior lobes; the left lung has superior and inferior lobes and a lingula.

Synonyms:

Pulmonary Rehabilitation

A supervised, multidisciplinary program combining exercise training, education, behavioral support, and self-management for chronic respiratory disease. It improves exercise capacity, dyspnea, functional status, and quality of life.

Synonyms:

Pulmonary Sequestration

A congenital malformation of non-functioning lung tissue that lacks normal communication with the tracheobronchial tree and receives its blood supply from a systemic artery (usually the descending

aorta). Intralobar sequestration is within the normal pleural investment; extralobar is outside.

Synonyms:

Pulmonary Stenosis

A right ventricular outflow tract obstruction at the valvular, subvalvular, or supra-valvular level. Valvular pulmonary stenosis (most common) is often congenital, frequently associated with Noonan syndrome.

Synonyms:

Pulmonary Surfactant

A phospholipid-protein mixture produced by type II alveolar pneumocytes that reduces surface tension at the air-liquid interface within alveoli. The primary component is dipalmitoylphosphatidylcholine (DPPC, lecithin), which forms a monolayer that reduces surface tension to near zero during expiration.

Synonyms:

Pulmonary tuberculosis

Tuberculosis infection involving the lungs, usually caused by *Mycobacterium tuberculosis* and spread through airborne particles.

Synonyms:

Pulmonary Valve

Semilunar valve between right ventricle and pulmonary trunk with three cusps. Most superiorly located cardiac valve with thinner cusps than the aortic valve. Pulmonic stenosis is a congenital defect causing right ventricular hypertrophy. Less commonly affected by endocarditis than mitral/aortic valves.

Synonyms:

Pulmonary Vascular Resistance

The resistance to blood flow through the pulmonary circulation, calculated approximately as the transpulmonary pressure gradient divided by cardiac output. Elevated resistance contributes to pulmonary hypertension and right-ventricular afterload.

Synonyms:

Pulmonary Vasodilator Therapy

Medications that reduce pulmonary vascular resistance and pulmonary artery pressure. Used for WHO Group 1 PAH. Includes endothelin receptor antagonists (bosentan), PDE-5 inhibitors (sildenafil), prostacyclin analogs (epoprostenol), and soluble guanylate cyclase stimulators (riociguat).

Synonyms:

Pulmonary Vein

The four veins (two from each lung) returning oxygenated blood from the lungs to the left atrium, a unique exception in the venous system (carrying oxygenated blood). Superior and inferior pulmonary veins enter the left atrium posteriorly.

Synonyms:

Pulmonary Wedge Pressure

The pressure measured by a balloon-tipped pulmonary artery catheter when the balloon is inflated, occluding a branch of the pulmonary artery. It approximates left atrial pressure. Normal is 6–12 mmHg. Elevated in left heart failure (PCWP > 18 mmHg). Low in hypovolemia.

Synonyms:

Pulmonary-artery dissection

Rare but life-threatening tear in the pulmonary artery wall, most commonly associated with pulmonary hypertension, Marfan syndrome, or prior pulmonary artery catheterization. Presents with acute chest pain, dyspnea, and hemodynamic collapse. Diagnosis by CT angiography or echocardiography; management requires emergent surgical repair.

Synonyms:

Pulp

Soft connective tissue central to tooth containing blood vessels, nerves, connective tissue. Responds to injury with inflammation, necrosis, calcification. Root canal therapy removes infected pulp.

Synonyms:

Pulp Stone

Calcified mass in pulp chamber or root canal. May be free, attached, or embedded. Incidental finding.

Synonyms:

Pulpectomy

Complete removal of pulp from primary tooth. Followed by resorbable filling material.

Synonyms:

Pulposus

Relating to the nucleus pulposus, the gelatinous central portion of an intervertebral disk.

Synonyms:

Pulpotomy

Removal of coronal pulp in primary tooth with reversible inflammation. Maintains radicular pulp vitality.

Synonyms:

Pulse

The rhythmic expansion of an artery produced by each heartbeat. Clinicians assess its rate, rhythm, strength, and symmetry.

Synonyms:

Pulse Examination

Assessment of arterial pulses for rate, rhythm, strength, and symmetry to help evaluate circulation.

Synonyms:

Pulse Oximeter

A noninvasive device that estimates peripheral oxygen saturation using light absorption. Readings can be affected by poor perfusion, motion, skin or nail characteristics, device limitations, and the clinical setting.

Synonyms:

Pulse Oximetry

A noninvasive method for estimating peripheral oxygen saturation by measuring red and infrared light absorption through a pulsatile vascular bed. It is

widely used for monitoring, but values must be interpreted with symptoms, perfusion, device limitations, and the individual's clinical targets.

Synonyms:

Pulseless Electrical Activity

A cardiac arrest rhythm organized electrical activity without a detectable pulse. PEA has many reversible causes (5 H's and 5 T's): hypovolemia, hypoxia, hydrogen ion (acidosis), hypo/hyperkalemia, hypothermia; tension pneumothorax, tamponade (cardiac), toxins, thrombosis (pulmonary), thrombosis (coronary).

Synonyms:

Pulsus Paradoxus

A decrease in systolic blood pressure greater than 10 mmHg during inspiration, normally less than 10 mmHg. Exaggerated in cardiac tamponade (due to ventricular interdependence in the confined pericardial space), severe asthma, COPD exacerbation, and constrictive pericarditis.

Synonyms:

Punch Biopsy

A small, full-thickness circular biopsy obtained with a rotating trephine, used to diagnose skin and soft-tissue lesions. Suture closure may be needed.

Synonyms:

Punctate Hemorrhages (Tardieu Spots)

Small, pinpoint sub-ecchymotic hemorrhages (petechiae) resulting from the rupture of small capillaries under conditions of intense mechanical venous engorgement and asphyxia.

Synonyms: Tardieu Spots

Punctate palmoplantar keratoderma

A hereditary keratoderma characterised by multiple, small, firm, circumscribed keratotic papules and plaques scattered across the palms and soles, often with an autosomal dominant inheritance pattern. It may present in adolescence or adulthood and can be associated with malignant transformation in rare cases.

Synonyms:

Pupil

Central round iris aperture for light entry, size controlled by sphincter pupillae (CN III parasympathetic, constricts to 2-3 mm) and dilator pupillae (sympathetic, dilates to 8 mm). The pupillary light reflex tests CN II (afferent) and CN III (efferent): light in one eye causes bilateral constriction (direct and consensual).

Synonyms:

Pure Tone Audiometry

The standard behavioral test used to measure hearing sensitivity across the frequency range important for speech perception, typically from 250 to 8000 Hertz, by determining the lowest intensity level at which a pure tone can be detected approximately fifty percent of the time (the hearing threshold).

Synonyms:

Purging

Deliberate behaviors intended to compensate for eating, such as self-induced vomiting or misuse of laxatives, diuretics, or excessive exercise.

Synonyms:

Purging Disorder

Recurrent purging behavior to influence weight or shape in the absence of binge eating. Self-induced vomiting, misuse of laxatives, diuretics, or other medications. It is classified under Other Specified Feeding or Eating Disorder (OSFED). It can lead to electrolyte imbalances, dental erosion, Russell's sign, and esophageal tears.

Synonyms:

Purines

Nitrogenous bases containing a double-ring structure (a six-membered ring fused to a five-membered imidazole ring), which serve as essential components of nucleotides in DNA and RNA. The primary purines are adenine (A) and guanine (G).

Synonyms:

Purkinje Fibers

The terminal branches of the cardiac conduction system, distributed throughout the ventricular myocardium. They conduct impulses rapidly (up to 4 m/s) to ensure coordinated ventricular contraction from apex to base. Purkinje fibers have an intrinsic firing rate of 20-40 beats per minute.

Synonyms:

Purpura

Purple discoloration of the skin or mucous membranes caused by extravasation of red blood cells from blood vessels into the surrounding tissue. Purpura can be classified by size: petechiae are less than 2 millimeters, purpura are 2 to 10 millimeters, and ecchymoses are greater than 10 millimeters.

Synonyms:

Purpura fulminans

A rapidly progressive, life-threatening condition characterised by extensive, confluent, non-blanching purpuric skin necrosis with haemorrhagic bullae, resulting from acute intravascular thrombosis and disseminated intravascular coagulation.

Synonyms:

Purulent Pericarditis

Bacterial infection of the pericardial space, most commonly caused by *S. aureus*, *S. pneumoniae*, or gram-negative organisms. Often occurs as a complication of pneumonia, endocarditis, chest surgery, or immunosuppression. Presents with fever, pleuritic chest pain, and rapidly accumulating effusion with tamponade physiology.

Synonyms:

Pus

A thick, yellow or green liquid that is composed of dead cells and bacteria, most often found at the site of a bacterial infection.

Synonyms:

Push Enteroscopy

Endoscopic technique using a longer endoscope to visualize and intervene in the proximal small bowel

beyond the reach of standard upper endoscopy. Unlike capsule endoscopy, push enteroscopy allows direct visualization with the ability to obtain biopsies and perform hemostasis.

Synonyms:

Pustule

A small, circumscribed elevation of skin containing pus (neutrophils) within the epidermis. Causes: bacterial (folliculitis, impetigo, furuncle), acne vulgaris (inflammatory comedones), pustular psoriasis (generalized pustular psoriasis—systemic symptoms), hidradenitis suppurativa, and drug reactions.

Synonyms:

Putrefaction

Postmortem decomposition of body tissues brought about by bacterial and enzymatic action, characterized by green discoloration of lower abdomen (cecum), marbling of cutaneous veins, gas distension, foul odor, and liquefaction.

Synonyms:

Pyelonephritis

An infection of the renal parenchyma and pelvicalyceal system, typically resulting from ascending urinary tract infection. Acute pyelonephritis most commonly affects women and is caused by gram-negative enteric organisms, particularly *Escherichia coli*, which account for approximately 80 percent of cases.

Synonyms:

Pyelotomy

An incision into the renal pelvis, usually made to remove an obstruction or kidney stone.

Synonyms:

Pylephlebitis

Septic thrombophlebitis of the portal vein or its tributaries, most commonly arising from intra-abdominal infections such as appendicitis, diverticulitis, cholangitis, or hepatic abscess. Presents with high fever, rigors, right upper quadrant pain, jaundice, and sepsis.

Synonyms:

Pyloric Stenosis

Hypertrophy of the pyloric sphincter muscle causing gastric outlet obstruction most common in young infants. Presents with non-bilious projectile vomiting typically beginning at two to eight weeks of age. Dehydration and metabolic alkalosis with hypochloremia and hypokalemia develop as the condition progresses.

Synonyms:

Pylorus

The muscular outlet of the stomach that connects to the duodenum. Its sphincter regulates the passage of partially digested food into the small intestine; narrowing or blockage can cause vomiting, abdominal distension, and dehydration, especially in infants with pyloric stenosis.

Synonyms:

Pyoderma Gangrenosum

A neutrophilic inflammatory skin disorder that causes painful ulcers with undermined, violaceous borders. It may be associated with inflammatory bowel disease, arthritis, blood disorders, or other systemic conditions, and trauma can worsen the lesions.

Synonyms:

Pyogenic Granuloma

A benign vascular proliferation presenting as a rapidly growing, friable, red papule or nodule that bleeds easily. It commonly occurs on fingers, face, and lips, and may be triggered by trauma or pregnancy (epulis gravidarum). Diagnosis is clinical.

Synonyms:

Pyonephrosis

Pus in renal collecting system. Urological emergency. Requires drainage (stent or nephrostomy) and antibiotics.

Synonyms:

Pyostomatitis vegetans

A rare, chronic, inflammatory oral mucosal condition characterized by multiple, soft, yellowish, vegetative pustules on an erythematous base, predominantly affecting the buccal mucosa and gingiva. It is strongly associated with inflammatory bowel disease, particularly ulcerative colitis, and may precede gastrointestinal symptoms.

Synonyms:

Pyrexia

A regulated rise in body temperature caused by changes in the hypothalamic temperature set point. See Fever.

Synonyms:

Pyridoxine (Vitamin B6)

A vitamin converted to pyridoxal phosphate, a coenzyme for transamination, decarboxylation, and other amino-acid reactions. Deficiency can cause neuropathy, dermatitis, seizures, and sideroblastic anemia; excessive supplementation can also cause neuropathy.

Synonyms: Vitamin B6

Pyrimidines

Nitrogenous bases containing a single six-membered heterocyclic ring, serving as structural building blocks for nucleic acids. The primary pyrimidines are cytosine (C), thymine (T, present in DNA), and uracil (U, present in RNA).

Synonyms:

Pyruvate

The three-carbon alpha-keto acid produced at the end of glycolysis from phosphoenolpyruvate by pyruvate kinase.

Synonyms:

Pyruvate Dehydrogenase

Converts pyruvate to acetyl-CoA. Regulated by phosphorylation (inactivated by PDH kinase). Requires thiamine, lipoate, CoA, FAD, NAD+.

Synonyms:

Pyruvate Kinase Deficiency

An inherited red-cell glycolytic defect causing chronic hemolytic anemia of variable severity. Manifestations include jaundice, splenomegaly, gallstones, fatigue, and complications of iron overload.

Synonyms:

Pannus

An abnormal layer of vascularized tissue that grows over a joint or the cornea.

Synonyms:

Paraplegia

Paralysis of both legs and usually part of the lower trunk.

Synonyms:

Parasomnias

Unwanted movements, behaviors, emotions, or experiences that occur during sleep or at the transition between sleep and wakefulness.

Synonyms:

Parathyroid Hormone

A hormone that regulates calcium and phosphate levels in the blood and supports bone remodeling.

Synonyms:

Paroxysmal Hemicrania

A rare headache disorder causing brief, repeated attacks of severe one-sided head or facial pain.

Synonyms:

Passive Immunity

Protection against infection provided by antibodies received from another source rather than produced by the person's own immune system.

Synonyms:

Patch Test

A skin test used to identify delayed allergic contact reactions to substances applied under adhesive patches.

Synonyms:

Pattern-Recognition Receptors

Immune receptors that detect common molecular features of pathogens or damaged cells.

Synonyms:

PDE5 Inhibitors

Medicines that increase penile blood flow by inhibiting phosphodiesterase type 5; they are used mainly to treat erectile dysfunction.

Synonyms:

Percutaneous Discectomy

Removal of part of a herniated spinal disk through a small skin incision.

Synonyms:

Perforation

An abnormal hole through the wall of an organ or tissue.

Synonyms:

Perfusion Defect

An area receiving abnormally low blood flow, identified by an imaging or functional test.

Synonyms:

Peyronie's Disease

A condition in which scar tissue in the penis causes curvature or pain during erection.

Synonyms:

Phagocytes

Immune cells that engulf and digest microorganisms, dead cells, and other particles.

Synonyms:

Phonophobia

Abnormal sensitivity to or fear of sound, often associated with migraine.

Synonyms:

Photorefractive Keratectomy

Laser eye surgery that reshapes the cornea to correct refractive errors.

Synonyms:

Physical Dependence

A state in which the body adapts to a substance or medication and develops withdrawal symptoms when it is reduced or stopped.

Synonyms:

Pick's Disease

A form of frontotemporal dementia characterized by progressive changes in behavior, language, and personality.

Synonyms:

Platelet

A small blood component that helps form clots and stop bleeding.

Synonyms:

Posterior Myocardial Infarction

A heart attack involving the back wall of the heart.

Synonyms:

Postherpetic Neuralgia

Persistent nerve pain in an area affected by shingles after the rash has healed.

Synonyms:

Primary Hypertension

High blood pressure without an identifiable single underlying cause.

Synonyms:

Procedural Memory

Long-term memory for learned skills and procedures.

Synonyms:

Prodrome

An early symptom or group of symptoms that precedes a disease episode.

Synonyms:

Prolapsed Disk

A spinal disk that bulges or ruptures and may compress a nearby nerve; also called a herniated disk.

Synonyms: a herniated disk.

Proliferative Retinopathy

Advanced retinal disease in which abnormal new blood vessels grow and may bleed or impair vision.

Synonyms:

Proptosis

Forward displacement or bulging of an eye.

Synonyms:

Prostatic Urethral Stent

A small device placed in the prostatic urethra to help maintain urine flow when the prostate obstructs it.

Synonyms:

Proctocolitis

Inflammation of the rectum and the adjacent portion of the colon.

Synonyms:

Pulmonary Emphysema

A chronic lung disease in which damage to the air sacs reduces the lungs' ability to exchange gases.

Synonyms:

Park-Bench Position

A modified lateral position in which the upper body is partly rotated toward prone; it is used for selected posterior brain and neck procedures.

Synonyms:

Prone Position

A position in which the patient lies face down, commonly providing access to the back, spine, buttocks, or posterior legs.

Synonyms:

Pancolitis

Inflammation affecting the entire colon, often as an

extensive form of ulcerative colitis.

Synonyms:

Pancreatic Cysts

Fluid-filled sacs in or around the pancreas, which may be benign or precancerous.

Synonyms:

Panic Attacks and Panic Disorder

Panic attacks are sudden episodes of intense fear; panic disorder involves recurrent attacks and persistent concern about having more.

Synonyms:

Parotid Tumors

Abnormal growths arising in the parotid salivary glands, located in front of and below the ears.

Synonyms:

Parvovirus Infection

An infection caused by parvovirus B19 that commonly causes mild fever and rash but may be serious in some people.

Synonyms:

Peanut Allergy

An immune reaction to peanut proteins that can cause symptoms ranging from hives to life-threatening anaphylaxis.

Synonyms:

Pediatric Brain Tumors

Tumors that develop in the brain or nearby tissues of children.

Synonyms:

Pediatric Obstructive Sleep Apnea

Repeated blockage of a child's upper airway during sleep, causing pauses in breathing.

Synonyms:

Penicillin Allergy

An immune reaction to penicillin antibiotics that may cause rash, swelling, breathing difficulty, or

anaphylaxis.

Synonyms:

Peripheral Nerve Tumors

Tumors that arise from or around nerves outside the brain and spinal cord.

Synonyms:

Postconcussion Syndrome

Persistent physical, cognitive, or emotional symptoms after a concussion.

Synonyms:

Precordium

The region of the chest overlying the heart.

Synonyms:

Pyuria

An abnormal number of white blood cells or pus in the urine, often associated with urinary infection.

Synonyms:

Philadelphia Chromosome

A chromosome rearrangement, usually t(9;22), that creates the BCR::ABL1 fusion gene and is characteristic of most cases of chronic myeloid leukemia.

Synonyms:

Phonocardiography

Graphic recording of heart sounds and murmurs using a microphone and recording system.

Synonyms:

Phorometer

An instrument used to measure ocular alignment and the amount of prism correction needed for binocular vision disorders.

Synonyms:

Photosensitization

Increased sensitivity to ultraviolet or visible light caused by a medication, chemical, or disease, producing an exaggerated skin reaction.

Synonyms:

Physical Examination

A systematic assessment of the body using inspection, palpation, percussion, auscultation, and other examination methods.

Synonyms:

Physical Therapy

Rehabilitation using exercise, movement training, manual techniques, and physical modalities to improve function, mobility, and reduce disability.

Synonyms:

Phytomedicine

The evidence-based use of medicinal products derived from plants to prevent or treat disease.

Synonyms:

Pineal Gland

A small endocrine gland in the brain that secretes melatonin and helps regulate circadian rhythms.

Synonyms:

Pitting Edema

Swelling in which pressure applied to the skin leaves a temporary indentation, usually because of excess interstitial fluid.

Synonyms:

Placental Abnormalities

Disorders of placental location, attachment, structure, or separation that may affect pregnancy or cause bleeding.

Synonyms:

Placenta Previa

Implantation of the placenta over or near the internal cervical opening, which can cause painless bleeding during the second half of pregnancy.

Synonyms:

Plasmin

A proteolytic enzyme that breaks down fibrin and helps dissolve blood clots.

Synonyms:

Plethysmography

Measurement of changes in the volume of a body part or organ, used to assess blood flow, lung volumes, or other physiologic functions.

Synonyms:

Pleural Disorders

Conditions affecting the pleura, including pleural effusion, pneumothorax, pleurisy, infection, and tumors.

Synonyms:

Pleural Space

The potential space between the visceral and parietal pleura surrounding each lung.

Synonyms:

Pneumonitis

Inflammation of lung tissue, often caused by infection, inhaled substances, radiation, medications, or immune reactions.

Synonyms:

Pneumoplasty

Surgical repair or reconstruction of lung tissue or an airway.

Synonyms:

Pneumotachometer

An instrument that measures the rate of airflow during breathing.

Synonyms:

Postural Drainage

Positioning the body so gravity helps move respiratory secretions toward the larger airways for clearance.

Synonyms:

Prepuce

The fold of skin covering the glans penis; it is also called the foreskin.

Synonyms: the foreskin.

Protein Electrophoresis

A laboratory test that separates proteins in serum or urine according to their electrical properties, helping detect abnormal protein patterns.

Synonyms:

Pseudophakia

The presence of an artificial intraocular lens after removal of the natural lens, usually during cataract surgery.

Synonyms:

Pulmonary Circuit

The circulation in which blood travels from the right ventricle to the lungs for gas exchange and returns to the left atrium.

Synonyms:

Pulmonary Ventilation

The movement of air into and out of the lungs.

Synonyms:

Pyramidal Tracts

Descending motor pathways from the cerebral cortex that control voluntary movement, especially precise movement of the limbs.

Synonyms:

Palate

The roof of the mouth, consisting of a bony hard palate in front and a muscular soft palate behind.

Synonyms:

Palatine Tonsils

Paired masses of lymphoid tissue on the sides of the oropharynx that contribute to immune defense.

Synonyms:

Pancreatic Islets

Clusters of endocrine cells in the pancreas that release hormones such as insulin, glucagon, somatostatin, and pancreatic polypeptide.

Synonyms:

Panhypopituitarism

Deficiency of most or all anterior pituitary hormones due to disease of the pituitary gland or hypothalamus.

Synonyms:

Paralysis

Loss of voluntary muscle movement in part or all of the body, caused by disruption of motor pathways or muscles.

Synonyms:

Parenchyma

The functional tissue of an organ, distinguished from its supporting connective tissue, or stroma.

Synonyms:

Pelvimetry

Measurement of the dimensions of the maternal pelvis, usually to assess selected obstetric concerns.

Synonyms:

Peripartum

The period immediately before, during, and shortly after childbirth.

Synonyms:

Peyer Patches

Aggregated lymphoid follicles in the mucosa and submucosa of the ileum that monitor intestinal contents and support immune defense.

Synonyms:

Nullipara

A person who has never given birth at or beyond the gestational age considered viable, regardless of the outcome of any pregnancies.

Synonyms:

Primipara

A person who has given birth once at or beyond the gestational age considered viable, regardless of whether the infant was born alive.

Synonyms:

Primigravida

A person who is pregnant for the first time.

Synonyms:

Nulligravida

A person who has never been pregnant.

Synonyms:

Pes Anserinus

The combined tendon insertion of the sartorius, gracilis, and semitendinosus muscles on the antero-medial proximal tibia; inflammation there is pes-anserine bursitis.

Synonyms:

Pilonidal Cyst

A cyst or sinus in the cleft between the buttocks, usually containing hair and skin debris. It may become infected, painful, swollen, and drain pus.

Synonyms:

Polyneuropathy

A generalized disorder affecting multiple peripheral nerves, often causing symmetric numbness, tingling, burning pain, weakness, or impaired reflexes in the limbs.

Synonyms:

Puncture Wound

A wound produced when a pointed object penetrates the skin and underlying tissue, creating a small surface opening with potentially deep tissue damage and infection risk.

Synonyms:

Parathyroid Carcinoma

A rare malignant tumor of the parathyroid gland that commonly causes excessive parathyroid-hormone secretion, hypercalcemia, kidney stones, bone disease, or related symptoms.

Synonyms:

Paraparesis

Weakness affecting both legs, usually caused by

disease or injury of the spinal cord, nerve roots, or peripheral nerves.

Synonyms:

Paratyphoid Fever

An enteric fever caused by *Salmonella Paratyphi*, producing prolonged fever and gastrointestinal or systemic illness similar to typhoid fever.

Synonyms:

Pasteurellosis

Infection caused by *Pasteurella* bacteria, commonly introduced through animal bites or scratches and causing cellulitis, abscesses, or occasionally invasive disease.

Synonyms:

Parietal Bone

One of two skull bones forming much of the roof and sides of the cranium.

Synonyms:

Pathophysiology

The study of the functional changes produced by disease or injury and the mechanisms through which they cause signs and symptoms.

Synonyms:

Pavor Nocturnus (Night Terrors)

Episodes of sudden intense fear, screaming, and autonomic arousal during sleep, usually arising from deep non-REM sleep and often followed by little or no memory.

Synonyms: Night Terrors

Pectoriloquy

Abnormally clear transmission of spoken sounds through the chest wall, often suggesting lung consolidation or another change in lung tissue.

Synonyms:

Penumbra

Brain tissue surrounding an area of infarction that is functionally impaired but potentially salvageable

if blood flow is restored promptly.

Synonyms:

Post-Natal Depression

Depression beginning during pregnancy or after childbirth, with persistent low mood or loss of interest and possible effects on sleep, bonding, and daily functioning.

Synonyms:

Post-Partum Haemorrhage

Excessive bleeding after childbirth, most commonly caused by failure of the uterus to contract, retained placental tissue, genital-tract trauma, or clotting problems.

Synonyms:

Pre-Eclampsia

A pregnancy-related disorder involving new hypertension after 20 weeks of gestation with proteinuria or other evidence of maternal organ or placental dysfunction.

Synonyms:

Premature Birth

Birth before 37 completed weeks of pregnancy; the earlier the birth, the greater the risks of respiratory, neurological, and developmental complications.

Synonyms:

Presbycusis (Presbycusis)

Age-related, usually gradual sensorineural hearing loss, particularly affecting the ability to hear high-frequency sounds and understand speech in noise.

Synonyms: Presbycusis

Pseudocyesis

A false belief or bodily state resembling pregnancy, with symptoms such as abdominal enlargement, breast changes, or even perceived fetal movement despite no fetus being present.

Synonyms:

Prothrombin Time (PT)

A blood test measuring the time required for clot formation through the extrinsic and common coagulation pathways; it is commonly reported as the INR.

Synonyms: PT

Pregnancy of Unknown Location

A positive pregnancy test without a confirmed intrauterine or ectopic pregnancy on ultrasound. Serial human chorionic gonadotropin measurements and repeat imaging help determine whether the pregnancy is early, failing, or ectopic.

Synonyms:

Subchorionic Hemorrhage

Bleeding between the chorion and the uterine wall caused by partial separation of the gestational sac membranes. It may produce vaginal bleeding in early or mid-pregnancy and is assessed according to bleeding, gestational age, and ultrasound findings.

Synonyms:

Postpartum Preeclampsia

New-onset hypertension with pre-eclampsia features after childbirth, sometimes occurring several days or weeks postpartum. Severe headache, visual symptoms, chest pain, shortness of breath, or seizures require urgent assessment.

Synonyms:

Pelvic Girdle Pain in Pregnancy

Pain arising from the pelvic joints and surrounding tissues during pregnancy, often affecting the pubic symphysis, sacroiliac joints, hips, or lower back. It may impair walking, turning in bed, or climbing stairs.

Synonyms:

Round Ligament Pain

Sharp or aching pain in the lower abdomen or groin caused by stretching of the round ligaments as the uterus enlarges during pregnancy. Persistent, severe, or bleeding-associated pain requires medical evaluation.

Synonyms:

Postpartum Care

Clinical care during the weeks after childbirth that assesses bleeding, uterine involution, blood pressure, infection, wound healing, breastfeeding, mental health, contraception, and recovery.

Synonyms:

Postpartum Urinary Retention

Inability to empty the bladder adequately after childbirth, sometimes associated with epidural anesthesia, perineal trauma, swelling, or prolonged labor. Prompt assessment prevents bladder overdistension and injury.

Synonyms:

Postpartum Contraception

Contraceptive counseling and care after childbirth, taking account of breastfeeding, venous-thromboembolism risk, medical conditions, fertility intentions, and the timing of method initiation.

Synonyms:

Perinatal Asphyxia

Impaired oxygenation or ventilation before, during, or shortly after birth that may cause neonatal encephalopathy, organ injury, or death. Immediate newborn assessment and resuscitation are essential.

Synonyms:

Prenatal Genetic Counseling

A consultation that reviews the risk of inherited or chromosomal conditions, available screening and diagnostic tests, possible results, and reproductive options before or during pregnancy. +

pachyonychia congenita

pachyonychia congenita is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pacifier

pacifier is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pacinian corpuscle

pacinian corpuscle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

packaging tube

packaging tube is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

paclitaxel

paclitaxel is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

paclitaxel liposome

paclitaxel liposome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

paclitaxel poliglumex

paclitaxel poliglumex is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

paecilomyces

paecilomyces is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

paenibacillus

paenibacillus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

paenibacillus alvei

paenibacillus alvei is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

paenibacillus phoenicis

paenibacillus phoenicis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

paenibacillus polymyxa

paenibacillus polymyxa is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

pagetoid reticulosis

pagetoid reticulosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pain perception

pain perception is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pain threshold

pain threshold is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

palatal muscle

palatal muscle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

palate neoplasm

palate neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

palatine tonsil

palatine tonsil is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

palatorrhaphy

palatorrhaphy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

palifermin

palifermin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

palivizumab

palivizumab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

palladium

palladium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

palm oil

palm oil is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

palmar reflex

palmar reflex is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

palmitic acid

palmitic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

palmoplantar hyperkeratosis

palmoplantar hyperkeratosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

palonosetron

palonosetron is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

palonosetron hydrochloride

palonosetron hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

palpable

palpable is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

palsy

palsy is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pamidronic acid

pamidronic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pan troglodyte

pan troglodyte is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

panax

panax is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pancreas enzyme

pancreas enzyme is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pancreas infection

pancreas infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pancreas neoplasm

pancreas neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pancreas transplantation

pancreas transplantation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pancreatic carcinoma

pancreatic carcinoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pancreatic diseases

pancreatic diseases is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pancreatic fistula

pancreatic fistula is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pancreatic hormones

pancreatic hormones is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pancreatic islet

pancreatic islet is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pancreatic juice

pancreatic juice is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pancreaticoduodenectomy

pancreaticoduodenectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pancrelipase

pancrelipase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pancuronium

pancuronium is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pandoraea

pandoraea is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

pargyline

pargyline is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

paricalcitol

paricalcitol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

parietal pleura

parietal pleura is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

parinaric acid

parinaric acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

parity

parity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

paromomycin

paromomycin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

parosteal osteosarcoma

parosteal osteosarcoma is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

parotid neoplasm

parotid neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

parotidectomy

parotidectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

paroxetine

paroxetine is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

paroxetine hydrochloride

paroxetine hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pars compacta

pars compacta is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pars planitis

pars planitis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

parthenogenesis

parthenogenesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

partial

partial is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

partial cystectomy

partial cystectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

partial hysterectomy

partial hysterectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

partial nephrectomy

partial nephrectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

partial remission

partial remission is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

participation

participation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

particle size

particle size is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

parvimonas micra

parvimonas micra is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

parvoviridae

parvoviridae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

parvovirus

parvovirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

passive immunization

passive immunization is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

paste

paste is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pasteurella

pasteurella is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

pasteurella aerogenes

pasteurella aerogenes is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

pasteurella bettyae

pasteurella bettyae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

pasteurella canis

pasteurella canis is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

pasteurella pneumotropica

pasteurella pneumotropica is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

pasteurellaceae

pasteurellaceae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

patellar dislocation

patellar dislocation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

patent urachus

patent urachus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

paternal behavior

paternal behavior is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pathologic dilatation

pathologic dilatation is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pathologic ossification

pathologic ossification is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pathologic process

pathologic process is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pathologic response

pathologic response is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pathological fracture

pathological fracture is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pathologist

pathologist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

patient care

patient care is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

patient discharge

patient discharge is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

patient observation

patient observation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

patient rights

patient rights is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

paxillin

paxillin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pazopanib

pazopanib is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

peanut oil

peanut oil is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peau d'orange

peau d'orange is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pectin

pectin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pectinate line

pectinate line is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pectoral girdle

pectoral girdle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pectoralis muscles

pectoralis muscles is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pediatric AIDS

pediatric AIDS is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pediatric nursing

pediatric nursing is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pediatric obesity

pediatric obesity is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pediococcus

pediococcus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

pediococcus pentosaceus

pediococcus pentosaceus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

pedophilia

pedophilia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pedunculate

pedunculate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peer review

peer review is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pefloxacin

pefloxacin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pegargiminase

pegargiminase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pegaspargase

pegaspargase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pegdinetanib

pegdinetanib is a medicine or pharmacologic sub-

stance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

pegfilgrastim

pegfilgrastim is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peldesine

peldesine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pelitrexol

pelitrexol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pellet

pellet is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pelvic bone

pelvic bone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pelvic diaphragm

pelvic diaphragm is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pelvic examination

pelvic examination is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pelvic exenteration

pelvic exenteration is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pelvic girdle

pelvic girdle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pelvic infection

pelvic infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pelvic kidney

pelvic kidney is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pelvic lymphadenectomy

pelvic lymphadenectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pelvic mass

pelvic mass is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pelvic neoplasm

pelvic neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pelvic viscus

pelvic viscus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pemetrexed

pemetrexed is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pemetrexed disodium

pemetrexed disodium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pemoline

pemoline is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

penbutolol

penbutolol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

penclomedine

penclomedine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pendulous

pendulous is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

penicillamine

penicillamine is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

penicillin

penicillin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

penicillin G

penicillin G is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

penicillin V

penicillin V is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

penicillium

penicillium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

penile disease

penile disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

penile erection

penile erection is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

penile infection

penile infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

penile leukoplakia

penile leukoplakia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

penis carcinoma

penis carcinoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

penoscrotal transposition

penoscrotal transposition is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pentadecanoic acid

pentadecanoic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pentamidine

pentamidine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pentamidine isethionate

pentamidine isethionate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pentatrichomonas hominis

pentatrichomonas hominis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pentetic acid

pentetic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pentobarbital

pentobarbital is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pentosan polysulfate

pentosan polysulfate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pentose

pentose is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pentoxifylline

pentoxifylline is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pentylentetrazole

pentylentetrazole is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

peplomycin

peplomycin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

pepsin A

pepsin A is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pepsinogen

pepsinogen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptic esophagitis

peptic esophagitis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptichemio

peptichemio is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptide

peptide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptide biosynthesis

peptide biosynthesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptide hormone

peptide hormone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptide library

peptide library is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptide metabolism

peptide metabolism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptide transport

peptide transport is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptide yy

peptide yy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptidoglycan

peptidoglycan is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptococcaceae

peptococcaceae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptococcus

peptococcus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptococcus niger

peptococcus niger is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptoniphilus

peptoniphilus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptoniphilus harei

peptoniphilus harei is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptoniphilus indolicus

peptoniphilus indolicus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peptostreptococcus

peptostreptococcus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peracetic acid

peracetic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peracute

peracute is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perception

perception is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perceptual disorder

perceptual disorder is a medical condition or clinical

entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

perceptual distortion

perceptual distortion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perceptual masking

perceptual masking is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

percutaneous discectomy

percutaneous discectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perforant pathway

perforant pathway is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

performance

performance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

performed diagnosis

performed diagnosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

performed histopathology

performed histopathology is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

performed procedure

performed procedure is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perfusion culture

perfusion culture is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pergolide

pergolide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perianal

perianal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perianal abscess

perianal abscess is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perianal glands

perianal glands is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

periarteritis nodosa

periarteritis nodosa is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

periarticular

periarticular is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pericardial mesothelioma

pericardial mesothelioma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pericardial stripping

pericardial stripping is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pericardial wall

pericardial wall is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pericardiectomy

pericardiectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pericardiostomy

pericardiostomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pericytes

pericytes is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perifosine

perifosine is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perillyl alcohol

perillyl alcohol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perilymph

perilymph is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perimenopausal

perimenopausal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perinatal death

perinatal death is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perindopril

perindopril is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

perineural

perineural is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perineuronal satellitosis

perineuronal satellitosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perinuclear space

perinuclear space is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

periodic acid

periodic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

periodontal cyst

periodontal cyst is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

periodontal dressing

periodontal dressing is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

periodontist

periodontist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

periodontium

periodontium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

periodontium disease

periodontium disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

periorbital edema

periorbital edema is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

periorbital infection

periorbital infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

periostitis

periostitis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peripheral blood

peripheral blood is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peripheral ischemia

peripheral ischemia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peripheral nerve

peripheral nerve is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

periplasm

periplasm is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perirenal hematoma

perirenal hematoma is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peritoneal

peritoneal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peritoneal cavity

peritoneal cavity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peritoneal diseases

peritoneal diseases is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

peritoneal fluid

peritoneal fluid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peritoneal lavage

peritoneal lavage is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peritoneal necrosis

peritoneal necrosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

peritoneal sac

peritoneal sac is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peritoneum neoplasm

peritoneum neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

perivitelline space

perivitelline space is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

permease

permease is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

permethrin

permethrin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

permissiveness

permissiveness is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peroneal nerve

peroneal nerve is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peroxidase

peroxidase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

peroxisomal disorder

peroxisomal disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

peroxisome proliferation

peroxisome proliferation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perphenazine

perphenazine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

perseveration

perseveration is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

persistent cloaca

persistent cloaca is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

person

person is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

person name

person name is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

person with disability

person with disability is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

personality

personality is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

personality change

personality change is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

personality test

personality test is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

persuasive communication

persuasive communication is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pertussis toxin

pertussis toxin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pertussis vaccine

pertussis vaccine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pertuzumab

pertuzumab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

pestalotiopsis

pestalotiopsis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pesticide

pesticide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

petechia

petechia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

petri dish

petri dish is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

petrolatum

petrolatum is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pexophagy

pexophagy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

P-glycoprotein

P-glycoprotein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pH meter

pH meter is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phagocyte

phagocyte is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phagocytic vesicle

phagocytic vesicle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phagolysosome

phagolysosome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phagophores

phagophores is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phalanx unspecified

phalanx unspecified is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phantom pain

phantom pain is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pharmaceutical adjuvant

pharmaceutical adjuvant is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pharmaceutical excipient

pharmaceutical excipient is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pharmaceutical solutions

pharmaceutical solutions is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pharmacist

pharmacist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pharmacogenomic testing

pharmacogenomic testing is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pharmacologic substance

pharmacologic substance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pharmacotherapy

pharmacotherapy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pharmacy facility

pharmacy facility is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pharyngeal carcinoma

pharyngeal carcinoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pharyngeal disease

pharyngeal disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pharyngeal hemorrhage

pharyngeal hemorrhage is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pharyngeal mucositis

pharyngeal mucositis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pharyngeal stenosis

pharyngeal stenosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pharyngectomy

pharyngectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pharyngolaryngeal pain

pharyngolaryngeal pain is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pharynx necrosis

pharynx necrosis is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pharynx neoplasm

pharynx neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

phase-contrast microscopy

phase-contrast microscopy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenacetin

phenacetin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenazopyridine

phenazopyridine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenelzine

phenelzine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenethyl isothiocyanate

phenethyl isothiocyanate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenethylamines

phenethylamines is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenformin

phenformin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenobarbital

phenobarbital is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenocopy

phenocopy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenol

phenol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenolphthalein

phenolphthalein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenols

phenols is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenothiazine

phenothiazine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenothiazines

phenothiazines is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenoxodiol

phenoxodiol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenoxybenzamine

phenoxybenzamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenprocoumon

phenprocoumon is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phentermine

phentermine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenthoate

phenthoate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phentolamine

phentolamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenylacetate

phenylacetate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenylalanine

phenylalanine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenylbutyrate

phenylbutyrate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenylephrine

phenylephrine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenylpropanolamine

phenylpropanolamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenytoin

phenytoin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phenytoin sodium

phenytoin sodium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pheromone

pheromone is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phialemonium atrogriseum

phialemonium atrogriseum is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phialophora

phialophora is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phialophora verrucosa

phialophora verrucosa is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phlebovirus

phlebovirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

phlegm

phlegm is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phobia

phobia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phonation

phonation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phorate

phorate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phorbol ester

phorbol ester is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phorbols

phorbols is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phosgene

phosgene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phosgene oxime

phosgene oxime is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phosmet

phosmet is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phosphamidon

phosphamidon is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phosphatidic acid

phosphatidic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phosphatidylcholine

phosphatidylcholine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phosphatidylethanolamines

phosphatidylethanolamines is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phosphatidylinositol

phosphatidylinositol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phosphatidylserine

phosphatidylserine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phosphatidylserines

phosphatidylserines is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

phosphine

phosphine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pigmentation disorder

pigmentation disorder is a medical condition or clin-

ical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pilocarpine

pilocarpine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pilocytic astrocytoma

pilocytic astrocytoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

piloerection

piloerection is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pilomatrixoma

pilomatrixoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pilonidal fistula

pilonidal fistula is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pilot project

pilot project is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pilus

pilus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pimozide

pimozide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pinch strength

pinch strength is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pindolol

pindolol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pineal cyst

pineal cyst is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pineal germinoma

pineal germinoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pineoblastoma

pineoblastoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pineocytoma

pineocytoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pinhole meatus

pinhole meatus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pinocytosis

pinocytosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pint

pint is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pinta

pinta is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pioglitazone

pioglitazone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pipemidic acid

pipemidic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pipendoxifene

pipendoxifene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

piperacillin

piperacillin is a medicine or pharmacologic sub-

stance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

piperazine

piperazine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

piperonyl butoxide

piperonyl butoxide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pipette

pipette is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pipobroman

pipobroman is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pirfenidone

pirfenidone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pirimicarb

pirimicarb is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pirinitramide

pirinitramide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

piritrexim

piritrexim is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

piromidic acid

piromidic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

piroxicam

piroxicam is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pisiform bone

pisiform bone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pithomyces

pithomyces is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pituicytoma

pituicytoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pituitary

pituitary is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pituitary carcinoma

pituitary carcinoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pituitary disease

pituitary disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pituitary dwarfism

pituitary dwarfism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pituitary hormone

pituitary hormone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pituitary neoplasm

pituitary neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pityriasis lichenoides

pityriasis lichenoides is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pivampicillin

pivampicillin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

pixantrone

pixantrone is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

place

place is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

placebo control

placebo control is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

placenta accreta

placenta accreta is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

placenta disorder

placenta disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

placenta percreta

placenta percreta is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

placental hormone

placental hormone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

placental infarction

placental infarction is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

placental lactogen

placental lactogen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

placentation

placentation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plagiocephaly

plagiocephaly is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

planococcaceae

planococcaceae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

planococcus bacteria

planococcus bacteria is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

plant development

plant development is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plant extract

plant extract is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plant oils

plant oils is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plant part

plant part is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plant poisoning

plant poisoning is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plant proteins

plant proteins is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plant tumor

plant tumor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plant virus

plant virus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

plantar nerve

plantar nerve is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plantar wart

plantar wart is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plantaris muscle

plantaris muscle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plasma cell neoplasm

plasma cell neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

plasma kallikrein

plasma kallikrein is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plasma membrane

plasma membrane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plasma substitutes

plasma substitutes is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plasmablastic lymphoma

plasmablastic lymphoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plasmalogen

plasmalogen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plasmapheresis

plasmapheresis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plasmid

plasmid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plasminogen

plasminogen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plasminogen activator

plasminogen activator is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plasminogen inactivators

plasminogen inactivators is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plasmodesma

plasmodesma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plasmodium

plasmodium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pleural neoplasm

pleural neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pleural sac

pleural sac is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pleural tuberculosis

pleural tuberculosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pleuritic pain

pleuritic pain is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pleuropulmonary blastoma

pleuropulmonary blastoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plexiform neurofibroma

plexiform neurofibroma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pliability

pliability is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plitidepsin

plitidepsin is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Ploidies

Ploidies is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plozalizumab

plozalizumab is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

pluralibacter gergoviae

pluralibacter gergoviae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pluripotent stem cell

pluripotent stem cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

plutonium

plutonium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pneumococcal infection

pneumococcal infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pneumococcal vaccine

pneumococcal vaccine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pneumocystis

pneumocystis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pneumocystis carinii

pneumocystis carinii is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pneumocystis infection

pneumocystis infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pneumocystis jiroveci

pneumocystis jiroveci is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pneumovirinae

pneumovirinae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pneumovirus

pneumovirus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

pocket erosion

pocket erosion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

podiatrist

podiatrist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

podocyte

podocyte is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

podofilox

podofilox is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

podophyllin

podophyllin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

podosome

podosome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

poikilocytosis

poikilocytosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

poikiloderma

poikiloderma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pokeweed mitogen

pokeweed mitogen is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pol gene

pol gene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polarity

polarity is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polarography

polarography is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

policy

policy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polidocanol

polidocanol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

poliosis

poliosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

poliovirus vaccine

poliovirus vaccine is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

pollakisuria

pollakisuria is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pollen

pollen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pollen tube

pollen tube is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pollination

pollination is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

poly A

poly A is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

poly I-C

poly I-C is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

poly ICLC

poly ICLC is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polyadenylation

polyadenylation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polyamine

polyamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polyamine catabolism

polyamine catabolism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polyarthritis

polyarthritis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polybrominated biphenyl

polybrominated biphenyl is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polychlorinated biphenyl

polychlorinated biphenyl is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polychromasia

polychromasia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polyene

polyene is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polyethylene

polyethylene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polygenic obesity

polygenic obesity is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

polyglutamate camptothecin

polyglutamate camptothecin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polygraphy

polygraphy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polyketide synthase

polyketide synthase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polylysine

polylysine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polymer

polymer is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polymerization

polymerization is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polymyxin b

polymyxin b is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polyneuritis

polyneuritis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polynucleotide

polynucleotide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polyoma virus

polyoma virus is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

polyomavirus hominis 2

polyomavirus hominis 2 is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

polyphenol

polyphenol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polyploid

polyploid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polyposis

polyposis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polypropylene

polypropylene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polyradiculopathy

polyradiculopathy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polysaccharide

polysaccharide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polysome

polysome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polysplenia

polysplenia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polystyrene

polystyrene is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polytene chromosome

polytene chromosome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polythiazide

polythiazide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polyurethane

polyurethane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

polyvinyl

polyvinyl is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pomalidomide

pomalidomide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Pontiac fever

Pontiac fever is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

popliteal cyst

popliteal cyst is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

population density

population density is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

population genetics

population genetics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

population group

population group is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

population health

population health is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pore

pore is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

porfimer sodium

porfimer sodium is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

porfiromycin

porfiromycin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

porifera

porifera is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

porin

porin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

porokeratosis

porokeratosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

poroma

poroma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

porphyria

porphyria is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

porphyrin

porphyrin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

porphyromonas

porphyromonas is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

porphyromonas bennonis

porphyromonas bennonis is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

porphyromonas catoniae

porphyromonas catoniae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

porphyromonas endodontalis

porphyromonas endodontalis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

porphyromonas levii

porphyromonas levii is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

porphyromonas somerae

porphyromonas somerae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

portion of cytosol

portion of cytosol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

port-wine stain

port-wine stain is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

positive

positive is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

positive finding

positive finding is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

positron camera

positron camera is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

postal service

postal service is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

posterior rhinorrhea

posterior rhinorrhea is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

postganglionic fiber

postganglionic fiber is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

postnatal care

postnatal care is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

postoperative hemorrhage

postoperative hemorrhage is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

postoperative infection

postoperative infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

postoperative period

postoperative period is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

postprandial period

postprandial period is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

postsynaptic membrane

postsynaptic membrane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

potassium acetate

potassium acetate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

potassium channel

potassium channel is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

potassium chloride

potassium chloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

potassium citrate

potassium citrate is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

potassium cyanide

potassium cyanide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

potassium deficiency

potassium deficiency is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

potassium dichromate

potassium dichromate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

potassium iodide

potassium iodide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

potassium ion

potassium ion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

potential

potential is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

potentiometry

potentiometry is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

poultice

poultice is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pound

pound is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

povidone

povidone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

povidone-iodine

povidone-iodine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

powder diffraction

powder diffraction is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

poxviridae

poxviridae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

poxviridae infection

poxviridae infection is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

ppar alpha

ppar alpha is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

ppar delta

ppar delta is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pracinostat

pracinostat is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

practitioner

practitioner is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pragmatic trial

pragmatic trial is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pralatrexate

pralatrexate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pravastatin

pravastatin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

pravastatin sodium

pravastatin sodium is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

praziquantel

praziquantel is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prealbumin

prealbumin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

precancerous condition

precancerous condition is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

precancerous polyp

precancerous polyp is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

precipitating factor

precipitating factor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

preclinical study

preclinical study is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

preconception care

preconception care is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prediabetes syndrome

prediabetes syndrome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prednimustine

prednimustine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prednisolone

prednisolone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prednisone

prednisone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

preexcitation syndrome

preexcitation syndrome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prefix

prefix is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prefrontal cortex

prefrontal cortex is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pregabalin

pregabalin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

preganglionic fiber

preganglionic fiber is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pregnancy complication

pregnancy complication is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pregnancy outcome

pregnancy outcome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pregnancy status

pregnancy status is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pregnancy trimester

pregnancy trimester is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pregnane

pregnane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pregnanolone

pregnanolone is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pregnenolone

pregnenolone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

premalignant

premalignant is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

premature adrenarche

premature adrenarche is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

premature closure

premature closure is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

premature labor

premature labor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

premature thelarche

premature thelarche is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pre-medication

pre-medication is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pre-miRNA

pre-miRNA is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prenylation

prenylation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

preoperative care

preoperative care is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

preoptic area

preoptic area is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

presenile dementia

presenile dementia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

presenilin

presenilin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

preservation

preservation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

preservative

preservative is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pressoreceptor

pressoreceptor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

presynaptic terminals

presynaptic terminals is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

primary endpoint

primary endpoint is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

primary hypersomnia

primary hypersomnia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

primary hypoparathyroidism

primary hypoparathyroidism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

primary hypothyroidism

primary hypothyroidism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

primary microRNA

primary microRNA is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

primidone

primidone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

primitive node

primitive node is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

primitive streak

primitive streak is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prinomastat

prinomastat is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

privacy

privacy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

privacy breach

privacy breach is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

probability

probability is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

probenecid

probenecid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proboscis

proboscis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

probucol

probucol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

procainamide

procainamide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

procaine

procaine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

procarbazine

procarbazine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

procarbazine hydrochloride

procarbazine hydrochloride is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

procentriole

procentriole is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

procerus muscle

procerus muscle is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

processing bodies

processing bodies is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

processor

processor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prochlorperazine

prochlorperazine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

procollagen

procollagen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proctoscope

proctoscope is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proctoscopy

proctoscopy is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

product recall

product recall is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

productive cough

productive cough is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proestrus

proestrus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

progesterone antagonist

progesterone antagonist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

progestin

progestin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prognostic factor

prognostic factor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

program development

program development is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

programmed instruction

programmed instruction is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proinsulin

proinsulin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

projectile vomiting

projectile vomiting is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prokaryote

prokaryote is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prolactin

prolactin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prolactin receptor

prolactin receptor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prolapsed cord

prolapsed cord is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proliferation

proliferation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prolindac

prolindac is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proline

proline is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prolymphocyte count

prolymphocyte count is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prolymphocytic leukemia

prolymphocytic leukemia is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

promazine

promazine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

promecarb

promecarb is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

promegapoietin

promegapoietin is a medical or biomedical term used

in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prometaphase

prometaphase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

promethazine

promethazine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

promonocyte count

promonocyte count is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

promyelocytes

promyelocytes is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prone

prone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pronephric

pronephric is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

propane

propane is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

propanol

propanol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

propellant

propellant is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

properdin

properdin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

propetamphos

propetamphos is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prophage

prophage is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prophase

prophase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prophenofos

prophenofos is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prophylactic mastectomy

prophylactic mastectomy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

propiolactone

propiolactone is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

propionates

propionates is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

propionibacteriaceae

propionibacteriaceae is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

propionibacterium

propionibacterium is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

propionibacterium acnes

propionibacterium acnes is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

propofol

propofol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

propoxur

propoxur is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

propoxycaïne

propoxycaïne is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

propoxyphene

propoxyphene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

propranolol

propranolol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

propylene glycol

propylene glycol is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prosencephalon

prosencephalon is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prosopagnosia

prosopagnosia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prosoposchisis

prosoposchisis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prostaglandin

prostaglandin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prostaglandin antagonist

prostaglandin antagonist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prostaglandin degradation

prostaglandin degradation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prostaglandin receptor

prostaglandin receptor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prostaglandins e

prostaglandins e is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prostaglandins f

prostaglandins f is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prostate carcinoma

prostate carcinoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prostate disease

prostate disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

prostate infection

prostate infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

prostate neoplasm

prostate neoplasm is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

prostatic fluid

prostatic fluid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prostatic obstruction

prostatic obstruction is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

prostatism

prostatism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prosthetic heart valve

prosthetic heart valve is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protamine

protamine is a medical or biomedical term used in

clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protanopia

protanopia is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteaphagy

proteaphagy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteasome

proteasome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteasome binding

proteasome binding is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteasome inhibitor

proteasome inhibitor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protective agent

protective agent is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protegrin

protegrin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein acetylation

protein acetylation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein biosynthesis

protein biosynthesis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein deficiency

protein deficiency is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

protein denaturation

protein denaturation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein dephosphorylation

protein dephosphorylation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein engineering

protein engineering is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein expression

protein expression is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein glycosylation

protein glycosylation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein import

protein import is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein isoform

protein isoform is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein kinase

protein kinase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein metabolism

protein metabolism is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein methylation

protein methylation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein overexpression

protein overexpression is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein phosphorylation

protein phosphorylation is a medical or biomedical

term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein prenylation

protein prenylation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein purification

protein purification is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein refolding

protein refolding is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein secretion

protein secretion is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein sequence

protein sequence is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein splicing

protein splicing is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein subunit

protein subunit is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein translocation

protein translocation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein transport

protein transport is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protein unfolding

protein unfolding is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteinaceous plug

proteinaceous plug is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteobacteria

proteobacteria is a microorganism or biological taxon of medical interest; its clinical significance depends on the species, site, and host.

Synonyms:

proteogenomics

proteogenomics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteoglycan

proteoglycan is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteolipids

proteolipids is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteolysis

proteolysis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteome

proteome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteomic profile

proteomic profile is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteomics

proteomics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteus

proteus is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteus hauseri

proteus hauseri is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteus mirabilis

proteus mirabilis is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteus penneri

proteus penneri is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteus syndrome

proteus syndrome is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

proteus vulgaris

proteus vulgaris is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prothionamide

prothionamide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

prothrombin

prothrombin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protista

protista is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

protocol agent

protocol agent is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychoacoustics

psychoacoustics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychobiology

psychobiology is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychodidae

psychodidae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychodrama

psychodrama is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psycholinguistics

psycholinguistics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychological adjustment

psychological adjustment is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychological dependence

psychological dependence is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychological transfer

psychological transfer is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychology

psychology is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychometrics

psychometrics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychomotor agitation

psychomotor agitation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychomotor disorder

psychomotor disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

psychomotor performance

psychomotor performance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychoneuroimmunology

psychoneuroimmunology is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychopathology

psychopathology is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychophysics

psychophysics is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychophysiology

psychophysiology is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychosexual development

psychosexual development is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychosurgery

psychosurgery is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

Psychotic Disorder

Psychotic Disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

psychotropic drug

psychotropic drug is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychrobacter

psychrobacter is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

psychrobacter immobilis

psychrobacter immobilis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pteridine

pteridine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pubertal failure

pubertal failure is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

public assistance

public assistance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

public policy

public policy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

publication

publication is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

puerperal disorder

puerperal disorder is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

puerperal infection

puerperal infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pulmonary blastoma

pulmonary blastoma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulmonary circulation

pulmonary circulation is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulmonary compliance

pulmonary compliance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulmonary fistula

pulmonary fistula is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulmonary hemorrhage

pulmonary hemorrhage is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pulmonary infection

pulmonary infection is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pulmonary mass

pulmonary mass is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulmonary nodule

pulmonary nodule is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulmonary reactance

pulmonary reactance is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulmonary trunk

pulmonary trunk is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulmonary valve insufficiency

pulmonary valve insufficiency is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulmonologist

pulmonologist is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulp canal

pulp canal is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulp disease

pulp disease is a medical condition or clinical entity; assessment and management depend on its cause, severity, and the individual patient.

Synonyms:

pulpitis

pulpitis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulse irregular

pulse irregular is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulse radiolysis

pulse radiolysis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulse rate

pulse rate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pulvinar

pulvinar is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

puncture biopsy

puncture biopsy is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

punicic acid

punicic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

punishment

punishment is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

purine

purine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

purine nucleosides

purine nucleosides is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

purine nucleotides

purine nucleotides is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

purinoceptor

purinoceptor is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

purkinje cell

purkinje cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

puromycin

puromycin is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

purulent discharge

purulent discharge is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

putamen

putamen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

putrescine

putrescine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

p-value

p-value is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pynodysostosis

pynodysostosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyelitis

pyelitis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyloric antrum

pyloric antrum is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyoderma

pyoderma is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyometra

pyometra is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyramidal cell

pyramidal cell is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyramidal tract

pyramidal tract is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrazinamide

pyrazinamide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrazines

pyrazines is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrazole

pyrazole is a medicine or pharmacologic substance; its indication, dose, and safety depend on the specific clinical context.

Synonyms:

pyrazoles

pyrazoles is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrene

pyrene is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrenochaeta

pyrenochaeta is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyridine

pyridine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyridostigmine bromide

pyridostigmine bromide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyridoxal phosphate

pyridoxal phosphate is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrimethamine

pyrimethamine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrimidine analog

pyrimidine analog is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrimidine dimer

pyrimidine dimer is a medical or biomedical term

used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrimidine nucleosides

pyrimidine nucleosides is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrimidine nucleotides

pyrimidine nucleotides is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrogen

pyrogen is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyroglyphidae

pyroglyphidae is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyronine

pyronine is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrophosphatase

pyrophosphatase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyroplakilocytosis

pyroplakilocytosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyroptosis

pyroptosis is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrosequencing

pyrosequencing is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyroxamide

pyroxamide is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrroles

pyrroles is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrrolidonecarboxylic acid

pyrrolidonecarboxylic acid is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyrrolnitrin

pyrrolnitrin is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyruvate decarboxylase

pyruvate decarboxylase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

pyruvate kinase

pyruvate kinase is a medical or biomedical term used in clinical practice, research, anatomy, or health care; its interpretation depends on context.

Synonyms:

It is guided by personal and family history, previous pregnancy outcomes, ancestry, and test findings.

Synonyms: Pregnancy genetic counseling; antenatal genetic counseling.

Q

Q Fever

A zoonotic disease caused by *Coxiella burnetii*, an obligate intracellular Gram-negative bacterium. Q fever is transmitted to humans primarily by inhalation of contaminated aerosols from infected livestock (cattle, sheep, goats) and their products (placenta, birth fluids, urine, feces, milk). Incubation: 2–3 weeks.

Synonyms:

Quantitative Computed Tomography

CT-based imaging that measures bone mineral density as well as showing bone structure. **Synonyms:** QCT

Quick Relievers

Fast-acting medicines that relax airway muscle and rapidly ease bronchoconstriction. **Synonyms:** Rescue medicines

Quiet Sleep

Non-REM sleep, during which brain and body activity generally slow. **Synonyms:** Non-REM sleep

Q Wave

The negative deflection that follows the P wave in some electrocardiographic leads, representing initial ventricular depolarization.

Synonyms:

QALY

Quality-adjusted life year, a measure combining the length of life with a value assigned to health-related quality of life during that time.

Synonyms:

QRS Complex

The deflection representing ventricular depolarization, consisting of a Q wave (initial downward deflection), R wave (upward deflection), and S wave (downward deflection after R). Normal duration is 0.06-0.10 seconds (1.5-2.5 small boxes). Widened QRS (>0.12 s) indicates bundle branch block, ventricular rhythm, or hyperkalemia.

Synonyms:

QT Interval

The time from the onset of the QRS complex to the end of the T wave, representing total ventricular depolarization and repolarization. Normal QT is 0.35-0.44 seconds. The corrected QT (QTc) adjusts for heart rate using Bazett's formula: $QTc = QT / \text{square root of RR interval}$.

Synonyms:

QT Prolongation

An electrocardiographic finding characterized by prolongation of the QT interval, representing the time from ventricular depolarization to repolarization, which predisposes to the potentially fatal arrhythmia torsades de pointes. The corrected QT interval should be less than 440 milliseconds in men and 460 milliseconds in women.

Synonyms:

Quad Screen (Maternal Serum Screening)

Second-trimester prenatal screening (15-22 weeks) for fetal aneuploidy and neural tube defects. Measures 4 markers: AFP (alpha-fetoprotein: elevated in NTD, low in Down syndrome), hCG (elevated in Down syndrome), uE3 (unconjugated estriol: low in Down syndrome), and inhibin A (elevated in Down

syndrome).

Synonyms: Maternal Serum Screening

Quadrant

One of four sections of the abdomen (RUQ, LUQ, RLQ, LLQ) used for clinical description. RUQ: liver, gallbladder, duodenum, right kidney. LUQ: stomach, spleen, left kidney, pancreas tail. RLQ: appendix, cecum, right ovary. LLQ: sigmoid colon, left ovary.

Synonyms:

Quadrantectomy

Surgical removal of one quadrant of an organ, most commonly a breast-conserving operation removing a breast tumour with a surrounding margin of tissue. The exact procedure and need for additional treatment depend on pathology and clinical staging.

Synonyms:

Quadriceps Femoris

The four-headed muscle group on the anterior thigh consisting of rectus femoris and the three vasti. It extends the knee; rectus femoris also flexes the hip, and the group contributes to standing, walking, and shock absorption.

Synonyms:

Quadriceps Femoris Muscle

Four-muscle anterior thigh group: rectus femoris, vastus lateralis, vastus medialis, vastus intermedius, all inserting on the tibial tuberosity via the patellar ligament. Innervated by femoral nerve (L2-L4). Primary knee extensor for walking, running, rising from seated. VMO is important for patellar tracking.

Synonyms:

Quadriceps Injury

Damage to the quadriceps muscle or tendon caused by sudden force, overuse, or direct trauma. It may cause front-of-thigh pain, bruising, weakness, or difficulty extending the knee. Severe pain, a palpable defect, or inability to bear weight requires assessment for a significant tear or tendon rupture.

Synonyms:

Quadriceps tendon ruptures

A tear of the tendon connecting the quadriceps muscle to the patella, causing weakness or inability to extend the knee. Complete tears often require surgical repair; treatment depends on the extent of injury and the person's functional needs.

Synonyms:

Quadriplegia

Paralysis of all four limbs and trunk, resulting from a spinal cord lesion at the cervical level or a bilateral brainstem lesion. Common causes include traumatic spinal cord injury, stroke, multiple sclerosis, spinal cord tumors, and demyelinating disease.

Synonyms:

Quadruplet Pregnancy

A pregnancy involving four fetuses. It carries increased risks of preterm birth, fetal growth restriction, hypertensive and metabolic complications, and maternal morbidity and therefore requires specialized multidisciplinary antenatal care.

Synonyms:

Quality Assurance

Planned activities used to verify that healthcare services meet defined standards of safety, quality, and performance.

Synonyms:

Quality Control

Daily, weekly, monthly tests ensure system performance. Uniformity, energy, sensitivity, spatial resolution, count rate performance.

Synonyms:

Quality Control (Laboratory)

Procedures using control materials, calibration, equipment checks, and documented review to ensure that a laboratory method remains accurate and precise during routine testing.

Synonyms: Laboratory

Quality Improvement

Systematic efforts to improve healthcare. Methods:

PDSA cycles, Lean, Six Sigma. Outcomes: safety, effectiveness, patient-centeredness.

Synonyms:

Quality of Life

A person's perceived physical, psychological, social, and functional well-being.

Synonyms:

Quality-Adjusted Life Year

A health-economic measure combining length of life with health-related quality of life on a scale where 1 represents full health and 0 represents death. It is used to compare cost-effectiveness across interventions.

Synonyms:

Quantification

Measurement of radiotracer uptake or clearance. SUV (PET), clearance rates (renal), ejection fraction (cardiac). Essential for treatment monitoring.

Synonyms:

Quantitative PET

The measurement or estimation of radiotracer concentration and tissue kinetics from PET data, using measures such as standardized uptake value or compartmental modeling.

Synonyms:

Quarantine

Separation or restriction of movement of people who have been exposed to an infectious disease while monitoring whether they become ill. It differs from isolation of people who are already infected.

Synonyms:

Quickening

The first perception of fetal movement by the mother, typically felt between 16-20 weeks in multiparous women and 18-22 weeks in nulliparous women. Described initially as a subtle fluttering sensation that becomes stronger and more regular as pregnancy progresses.

Synonyms:

Quiescent

Inactive or dormant state of disease. Example: quiescent ulcerative colitis (no symptoms but histologic inflammation may persist).

Synonyms:

Quinine

An alkaloid derived from cinchona bark, with anti-malarial, antipyretic, and skeletal muscle relaxant properties. Quinine is a blood schizonticide with activity against all Plasmodium species, but resistance has emerged in *P. falciparum*.

Synonyms:

Quinsy

A peritonsillar abscess: a collection of pus between the tonsillar capsule and the superior pharyngeal constrictor muscle, usually developing as a complication of tonsillar infection.

Synonyms:

Quinupristin-dalfopristin

A streptogramin antibiotic combination that inhibits bacterial protein synthesis. It is used intravenously for selected serious gram-positive infections, including some resistant *Enterococcus faecium* infections, when appropriate alternatives are unavailable.

Synonyms:

Quorum Sensing

Cell-density-dependent bacterial communication system in which bacteria produce and detect small signaling molecules (autoinducers—acyl-homoserine lactones in gram-negative, autoinducing peptides in gram-positive, AI-2 inter-species) to coordinate population-wide behaviors.

Synonyms:

Quadripareisis

Weakness affecting all four limbs, usually resulting from cervical spinal-cord disease, brain injury, neuromuscular disease, or another disorder of the central or peripheral nervous system.

Synonyms:

Quinolone

A class of synthetic antibacterial drugs that inhibit bacterial DNA gyrase or topoisomerase IV. Examples include ciprofloxacin and levofloxacin.

Synonyms:

Quadrantanopia

Loss of vision in one quarter of the visual field, usually caused by a lesion affecting specific portions of the optic pathways.

Synonyms:

Quadriceps Tendon Rupture

A tear of the tendon connecting the quadriceps muscle to the patella, causing pain, swelling, and inability to actively extend the knee.

Synonyms:

Quadriceps Tendinitis

Overuse-related inflammation or degeneration of the quadriceps tendon, causing pain above the kneecap that worsens with jumping, running, or resisted knee extension.

Synonyms:

Quartan Fever

A fever pattern in which fever attacks recur approximately every 72 hours, classically associated with infection by *Plasmodium malariae*.

Synonyms:

Quincke's Disease (Angioneurotic Oedema)

Sudden swelling of deeper layers of the skin or mucosa, commonly affecting the lips, face, tongue, throat, or bowel; airway involvement is an emergency.

Synonyms: Angioneurotic Oedema

Quincke's Pulse

Visible capillary pulsation in the nail bed or skin, often associated with a wide pulse pressure and severe aortic regurgitation.

Synonyms:

Quincke's Sign

A sign of severe aortic regurgitation in which alternating flushing and blanching of the nail bed or skin can be seen with each heartbeat.

Synonyms:

Quotidian Fever

A fever pattern in which fever attacks occur approximately every 24 hours; it may occur in malaria and several other infections.

Synonyms:

R

Rabies

A fatal viral encephalitis caused by rabies virus, transmitted through the bite of infected animals. After inoculation, the virus travels to the CNS via peripheral nerves. Symptoms include hydrophobia, aerophobia, and progressive neurological deterioration. Diagnosis is made by direct fluorescent antibody testing of brain tissue.

Synonyms:

Radial Tunnel Syndrome

Compression of the radial nerve near the elbow, causing arm pain, tingling, or weakness. **Synonyms:**

Radiation

Energy transmitted as particles or electromagnetic waves, including X-rays and gamma rays. **Synonyms:**

Radical Prostatectomy

Surgery that removes the entire prostate, usually with nearby seminal vesicles. **Synonyms:**

Radioallergosorbent Test

A blood test used to detect allergen-specific IgE antibodies. **Synonyms:** RAST

Radiofrequency

Electromagnetic energy used in some diagnostic and therapeutic medical procedures. **Synonyms:** RF energy

Radiograph

An image produced using X-rays. **Synonyms:** X-ray

Radionuclide Imaging or Scan

Imaging that detects radiation from a tracer administered to the patient. **Synonyms:** Nuclear scan; scintigraphy

Radionuclides

Radioactive atoms used as tracers in nuclear medicine imaging or treatment. **Synonyms:**

Randomized

Assigned by chance rather than choice or preference, as in a clinical trial. **Synonyms:**

Rapid Eye Movement Sleep

A sleep stage marked by rapid eye movements, vivid dreaming, and high brain activity. **Synonyms:** REM sleep

RAST

A blood test for allergen-specific IgE antibodies. **Synonyms:** Radioallergosorbent test

Raynaud's Syndrome

Episodic narrowing of small blood vessels in fingers or toes triggered by cold or stress. **Synonyms:** Raynaud phenomenon

RCT

Randomized controlled trial, a study comparing randomly assigned intervention and control groups. **Synonyms:** Randomized controlled trial

RDA

Recommended dietary allowance, the daily nutrient intake sufficient for nearly all healthy people in a

defined group. **Synonyms:** Recommended dietary allowance

Rebound Insomnia

Return or worsening of insomnia after stopping a sleep medicine. **Synonyms:**

Receptors

Cell proteins or structures that bind specific signaling molecules and trigger a response. **Synonyms:**

Recombinant Tissue Plasminogen Activator

A laboratory-produced clot-dissolving medicine used in selected emergencies. **Synonyms:** Recombinant tPA

Recommended Dietary Allowance

The average daily intake expected to meet the nutrient needs of nearly all healthy people in a defined group. **Synonyms:** RDA

Recovery

The process of regaining health or overcoming an addiction or harmful behavior. **Synonyms:**

Rehabilitative Driving Specialist

A professional who evaluates driving ability and recommends adaptive equipment or training. **Synonyms:**

Rejection

An immune response in which the body attacks transplanted tissue or an organ. **Synonyms:** Transplant rejection

Relaxation Response

Physiological changes produced by relaxation practices that counter the stress response. **Synonyms:**

REM

Rapid eye movement, a sleep stage associated with vivid dreams and intense brain activity. **Synonyms:** Rapid eye movement sleep

REM Behavior Disorder

A sleep disorder in which a person acts out dreams during REM sleep. **Synonyms:** REM sleep behavior disorder

REM Rebound

Increased REM sleep after REM deprivation or withdrawal of a REM-suppressing medicine. **Synonyms:**

Renal

Relating to the kidneys. **Synonyms:**

Reperfusion

Restoration of blood flow to tissue after an interruption. **Synonyms:**

Reperfusion Therapy

Treatment that restores circulation to tissue deprived of blood, such as clot-dissolving treatment or angioplasty. **Synonyms:**

Repetitions

The number of times an exercise movement is performed. **Synonyms:** Reps

Resistance

The ability of a microorganism to withstand a medicine that previously inhibited or killed it. **Synonyms:** Drug resistance

Resistant Hypertension

High blood pressure that remains above goal despite appropriate treatment with multiple medicines. **Synonyms:** Treatment-resistant hypertension

Restenosis

Re-narrowing of a blood vessel after it has been opened by angioplasty or another procedure. **Synonyms:**

Resting Energy Expenditure

The calories the body uses at rest to maintain essential functions. **Synonyms:** Resting metabolic rate

Resuscitation

Emergency measures used to restore breathing and circulation. **Synonyms:** CPR; revival

Retinoid

A vitamin-A-related compound used in some skin treatments and other medical applications. **Synonyms:**

Retrieval

The process of recalling information stored in memory. **Synonyms:** Memory retrieval

Retrospective Study

A study that examines past records or exposures to investigate disease causes or outcomes. **Synonyms:**

Revascularization

Restoration of blood flow to an area through bypass surgery, angioplasty, or another procedure. **Synonyms:**

Reward Insufficiency Theory

The theory that inadequate pleasure responses may contribute to addictive behavior. **Synonyms:**

Reward Pathway

Interconnected brain regions involved in motivation, pleasure, reinforcement, and reward learning. **Synonyms:** Mesolimbic pathway

Rheumatic Disease

A disorder affecting joints, muscles, connective tissue, or related structures, often through inflammation. **Synonyms:**

Rheumatism

Pain, stiffness, or discomfort in joints and surrounding soft tissues. **Synonyms:**

Rheumatologist

A physician specializing in inflammatory and autoimmune diseases of joints and connective tissue. **Synonyms:**

Rhytidectomy

Cosmetic surgery that removes excess facial skin and tightens supporting tissues. **Synonyms:** Facelift

Risky Drinking

Alcohol use that increases the likelihood of health, safety, or social consequences. **Synonyms:** Hazardous drinking

RLS

Restless legs syndrome, an urge to move the legs with uncomfortable sensations, especially at night. **Synonyms:** Restless legs syndrome

Root

The part of a tooth below the gum line. **Synonyms:**

Root Canal

The channel inside a tooth root containing the pulp and its nerves and blood vessels. **Synonyms:**

Roughage

The indigestible portion of plant foods that adds bulk to stool. **Synonyms:** Dietary fiber

Rupture

A tear or complete break in an organ, vessel, muscle, or other tissue. **Synonyms:**

Ruptured Disk

A spinal disk whose outer layer has torn, allowing inner material to bulge outward. **Synonyms:** Herniated disk; slipped disk

Rabies vaccination

Immunization used before or after exposure to reduce the risk of rabies. Post-exposure management also includes wound care and, when indicated, rabies immunoglobulin.

Synonyms:

Radial Artery

The smaller terminal branch of the brachial artery, arising at the cubital fossa, running laterally along the radius to the wrist (palpable at the anatomical

snuffbox) and hand. Supplies the lateral forearm and the thumb side of the hand; forms the deep palmar arch.

Synonyms:

Radial artery thrombosis

Formation of a thrombus in the radial artery, often at the site of arterial catheterization or in the setting of a hypercoagulable state or vasculitis. May cause hand ischemia with pain, pallor, and decreased pulse. Treatment includes anticoagulation and surgical intervention for limb-threatening ischemia.

Synonyms:

Radial Club Hand

A congenital longitudinal deficiency of the radial ray, ranging from thumb hypoplasia to complete absence of the radius. The hand is radially deviated due to the absent radial support, with the carpus displaced proximally and radially.

Synonyms:

Radial keratotomy

A refractive surgical procedure, now largely obsolete, in which radial incisions are made in the peripheral corneal stroma to flatten the central cornea and reduce myopia. It was superseded by laser refractive surgery (LASIK, PRK) due to complications including diurnal visual fluctuation, glare, and hyperopic shift.

Synonyms:

Radial Nerve

From posterior cord (C5-T1), the plexus's largest branch. In the arm runs in the radial groove with the profunda brachii artery, innervating triceps and anconeus. At the elbow divides into superficial (sensory to dorsal hand) and deep (posterior interosseous) branches. Deep branch innervates forearm/hand extensors.

Synonyms:

Radiation Biology

The study of how ionizing or nonionizing radiation affects cells, tissues, organisms, and populations.

Synonyms:

Radiation Contamination

Unwanted radioactive material on a person, surface, object, or body site. Contamination may be removable or fixed and requires containment, monitoring, decontamination, and documentation according to radiation-safety procedures.

Synonyms:

Radiation Dose

The amount of ionizing radiation absorbed or received by a person or tissue. Dose varies with the examination, equipment, protocol, and patient size; imaging should be justified and optimized to obtain the needed information with the lowest reasonable exposure.

Synonyms:

Radiation Emergency

An event involving actual or suspected harmful radiation exposure or contamination that requires urgent protective and medical measures.

Synonyms:

Radiation Enteritis

Inflammation and injury of the small or large intestine caused by therapeutic ionizing radiation. It may be acute with diarrhea, cramping, and nausea or delayed with strictures, malabsorption, bleeding, fistula, or obstruction.

Synonyms:

Radiation Fibrosis

Permanent scarring and stiffening of tissue caused by radiation injury, which may develop months or years after treatment. It can affect the skin, lungs, bowel, or other organs and may cause pain, reduced function, or shortness of breath.

Synonyms:

Radiation Monitoring

Measurement of radiation levels or individual exposure using devices such as personal dosimeters and area monitors.

Synonyms:

Radiation Necrosis

Irreversible tissue injury caused by ionizing radiation, often developing months or years after treatment. In the brain it may produce edema, seizures, headache, or focal deficits and can resemble recurrent tumour on imaging.

Synonyms:

Radiation Oncologist

A physician who uses ionizing radiation and related treatments to manage cancer and selected other diseases.

Synonyms:

Radiation Oncology

A medical specialty that uses high-energy radiation (such as X-rays or gamma rays) to shrink tumors and destroy cancer cells.

Synonyms:

Radiation Physics

The study and application of physical principles governing radiation production, detection, imaging, therapy, and protection.

Synonyms:

Radiation Pneumonitis

An inflammatory lung injury occurring weeks to months after thoracic radiation. It may cause dry cough, fever, dyspnea, and hypoxemia within the irradiated field and can progress to radiation fibrosis.

Synonyms:

Radiation Poisoning

Illness caused by substantial exposure to ionizing radiation, potentially producing skin injury, bone-marrow suppression, gastrointestinal symptoms, or organ failure.

Synonyms:

Radiation Pregnancy Screening

Assessment of pregnancy status before procedures involving ionizing radiation or radioactive materials

when pregnancy is possible. The decision to proceed requires clinical justification, risk optimization, and consideration of gestational age and fetal dose.

Synonyms:

Radiation Protection

The practice of keeping radiation exposure as low as reasonably achievable while obtaining the required diagnostic or therapeutic result. It relies on justification, optimization, time reduction, distance, shielding, and appropriate contamination control.

Synonyms:

Radiation recall

An inflammatory reaction that occurs in previously irradiated skin or mucosa after administration of certain chemotherapeutic agents, particularly antimetabolites and anthracyclines. It manifests as erythema, desquamation, or mucositis in the previously irradiated field, mimicking acute radiation dermatitis.

Synonyms:

Radiation Safety

Principles: time, distance, shielding. ALARA (As Low As Reasonably Achievable). Radioactive materials handled in designated areas. Waste disposal per regulations. Pregnancy screening for women of childbearing age.

Synonyms:

Radiation Sickness

Acute radiation syndrome caused by high-dose whole-body or substantial partial-body exposure to ionizing radiation. It may produce nausea, vomiting, marrow failure, infection, bleeding, gastrointestinal injury, neurovascular collapse, and death depending on dose.

Synonyms:

Radiation Therapy

Use of ionizing radiation to kill cancer cells. Types: external beam, brachytherapy, stereotactic. Mechanisms: DNA damage, cell death. Side effects: fatigue, skin reactions, site-specific effects.

Synonyms:

Radiation-induced angiosarcoma

A rare, aggressive soft tissue sarcoma arising in previously irradiated tissue, typically with a long latency period. It carries a poor prognosis due to local recurrence and metastatic potential.

Synonyms:

Radiation-Recall Dermatitis

An inflammatory skin reaction that occurs in a previously irradiated area after exposure to a triggering substance, often months or years later. The area may become red, swollen, painful, or blistered and requires clinical evaluation.

Synonyms:

Radiculitis

Inflammation or irritation of a spinal nerve root, causing radiating pain, paresthesia, sensory loss, weakness, or reflex change in a dermatomal or myotomal distribution. Causes include infection, inflammatory disease, disc pathology, and compression.

Synonyms:

Radiculopathy

Dysfunction of a spinal nerve root, usually from disc herniation, narrowing, or inflammation. It may cause shooting pain, tingling, numbness, weakness, or altered reflexes along the affected nerve pathway.

Synonyms:

Radioactive Iodine

Used for thyroid imaging and treatment. I-131 emits beta particles (therapy) and gamma rays (imaging). Half-life: 8 days. Used for hyperthyroidism (Graves, toxic nodules) and thyroid cancer ablation. I-123 for diagnostics (shorter half-life, pure gamma).

Synonyms:

Radioactive Iodine Ablation

Treatment of differentiated thyroid carcinoma using iodine-131 to destroy residual thyroid tissue after total thyroidectomy. Indications include intermedi-

ate and high-risk disease for remnant ablation and treatment of residual or recurrent disease. Patients must be hypothyroid or receive recombinant TSH to maximize iodine uptake.

Synonyms:

Radioactivity

The spontaneous transformation of unstable atomic nuclei with emission of particles or electromagnetic radiation. Activity is the rate of nuclear transformations and is measured in becquerels.

Synonyms:

Radiobiology

Study of radiation effects on biological systems. DNA damage, cell death, repair mechanisms.

Synonyms:

Radiocarpal Joint

The wrist joint between the distal radius and articular disc proximally and the scaphoid, lunate, and triquetrum distally. It permits flexion, extension, radial deviation, ulnar deviation, and circumduction.

Synonyms:

Radiochemical Purity

The fraction of total radioactivity present in the intended chemical form of a radiopharmaceutical. Impurities may alter biodistribution, reduce target uptake, and increase radiation dose to nontarget tissues.

Synonyms:

Radiochemistry

Chemistry of radiopharmaceuticals. Labeling, purification, quality control.

Synonyms:

Radiocontrast

A substance administered during imaging to make selected tissues, vessels, or body spaces more visible.

Synonyms:

Radioembolization

Intra-arterial delivery of radioactive microspheres (yttrium-90) to liver tumors through the hepatic artery, used for hepatocellular carcinoma and liver metastases.

Synonyms:

Radiofrequency Ablation

A procedure that uses high-frequency electrical energy to heat and destroy selected tissue, often under imaging guidance.

Synonyms:

Radioimmunoassay

Sensitive immunoassay using radiolabeled antigens or antibodies. Competitive binding principle. Used for hormone measurement (thyroid, reproductive), tumor markers, drug levels. Largely replaced by non-radioactive methods (ELISA) but still used for some assays.

Synonyms:

Radiologic Technologist

A trained health professional who performs selected medical-imaging examinations and helps protect patients from unnecessary radiation exposure.

Synonyms:

Radiologic-Pathologic Correlation

Integration of imaging findings with gross and microscopic pathology to explain lesion location, extent, tissue composition, and sampling adequacy. It is important for discordant biopsy and imaging results.

Synonyms:

Radiologist

A physician trained to interpret medical images and, in some specialties, perform image-guided procedures.

Synonyms:

Radiology Report

Document describing imaging findings and interpretation. Structure: indication, technique, findings, impression. Clear, concise language essential. Criti-

cal findings require immediate communication.

Synonyms:

Radiology-Patient Identification

Verification of the correct patient, examination, body site, indication, pregnancy status when relevant, allergies, renal function, and prior imaging before image acquisition or intervention. It is a core diagnostic and procedural safety step.

Synonyms:

Radiolucent

Describing a material that allows relatively greater passage of X-rays and therefore appears darker on a radiograph or CT image. Air is highly radiolucent; some stones, foreign bodies, and lesions may also be radiolucent.

Synonyms:

Radionuclide Therapy

Internal radiation therapy using radiopharmaceuticals. Examples: I-131 (thyroid), Lu-177 DOTATATE (neuroendocrine tumors), Lu-177 PSMA (prostate cancer), Ra-223 (bone metastases), Y-90 microspheres (liver cancer).

Synonyms:

Radionuclidic Purity

The fraction of radioactivity arising from the intended radionuclide rather than contaminating radionuclides. It is important because contaminants may change radiation type, energy, half-life, dosimetry, and patient risk.

Synonyms:

Radiopaque

Describing a material that attenuates X-rays strongly and therefore appears relatively white on a radiograph or CT image. Bone, metal, and some contrast agents are radiopaque.

Synonyms:

Radiopharmaceutical

Radioactive compound used for diagnostic or therapeutic purposes. Components: radionuclide + tar-

getting molecule. Selectivity determines biodistribution and image quality.

Synonyms:

Radiopharmaceutical Extravasation

Inadvertent leakage of a radiopharmaceutical from the injection vessel into surrounding tissue. It can reduce diagnostic accuracy and, with therapeutic agents, cause local radiation injury; the event requires documentation and dose assessment.

Synonyms:

Radiopharmaceutical Labeling Kit

A prepared set of reagents used to attach a radionuclide, commonly technetium-99m, to a compound for diagnostic imaging.

Synonyms:

Radiopharmaceutical Quality Control

Testing performed to verify identity, radionuclidic purity, radiochemical purity, pH, sterility, endotoxin limits, and other release specifications before clinical administration. Requirements depend on the preparation and jurisdiction.

Synonyms:

Radiopharmacy

Preparation and dispensing of radiopharmaceuticals. Good manufacturing practice (GMP) required. Sterility, pyrogen testing, quality control.

Synonyms:

Radiosensitization

Increased susceptibility of cells or tissues to injury from ionizing radiation.

Synonyms:

Radiotracer

A compound containing a radioactive nuclide that follows a biologic pathway and permits in-vivo imaging or measurement. Its distribution reflects the target physiology, receptor, enzyme, transporter, or tissue process.

Synonyms:

Radium-223

Alpha emitter, half-life 11.4 days. Used for bone metastases from prostate cancer. Mimics calcium, targets bone turnover sites.

Synonyms:

Radius

Lateral forearm bone in the anatomical position. Proximal end: head, neck, radial tuberosity. Shaft. Distal end: styloid process, articular surfaces. The radial head articulates with the capitulum and ulnar notch, allowing pronation/supination. Bears approximately 80 percent of wrist axial load.

Synonyms:

Rampant Caries

Widespread severe caries affecting multiple surfaces. Associated with sugary drinks, xerostomia, bulimia.

Synonyms:

Ramsay Hunt Syndrome

Reactivation of varicella-zoster virus in the geniculate ganglion causing ipsilateral facial paralysis, severe ear pain, and vesicular eruption in or around the ear or oral cavity. Hearing loss and vertigo may occur; prompt treatment is important.

Synonyms:

Random Events

Coincidence events from unrelated photons. Reduced by timing window and energy discrimination.

Synonyms:

Randomization

Assignment of study participants to intervention groups by chance, helping reduce systematic differences between groups.

Synonyms:

Randomized Controlled Trial

An experimental study in which participants are assigned by chance to different interventions or a control condition and followed for specified outcomes.

Synonyms:

Range of Motion

ROM: joint movement capacity. Goniometer measurement. Restrictions from contracture, pain, swelling.

Synonyms:

Ranson Criteria

Clinical scoring system for acute pancreatitis severity incorporating eleven parameters at two time points. Admission parameters include age, white blood cell count, glucose, LDH, and AST. Forty-eight hour parameters include hematocrit drop, BUN increase, calcium, oxygen tension, base deficit, and fluid sequestration.

Synonyms:

Ranula

A mucocele (mucus extravasation cyst) of the sublingual salivary gland, presenting as a blue-translucent, fluctuant swelling in the floor of the mouth, typically lateral to the lingual frenulum. A ranula results from trauma or obstruction of a sublingual gland duct, causing mucus accumulation in the sublingual space.

Synonyms:

Rape

Sexual penetration of the mouth, vagina, or anus accomplished without consent or with a person unable to consent, often through force, threat, fraud, or impairment; many statutes subsume it under sexual assault.

Synonyms:

Rapid Sequence Induction

An intubation technique designed to minimize aspiration risk in patients with full stomach.

Synonyms:

Rapid Strep Test

A test performed on a throat swab to detect Group A Streptococcus. It provides a rapid result, but a negative result may require confirmatory testing depending on the patient's age, symptoms, and local guidance.

Synonyms:

Rapid-Sequence Intubation

A planned emergency airway technique using a sedative-hypnotic and a neuromuscular blocker in rapid succession to facilitate tracheal intubation while minimizing aspiration risk. Preparation includes preoxygenation, backup airway plans, hemodynamic assessment, and confirmation of tube position.

Synonyms:

Rapidly Progressive Glomerulonephritis

A syndrome of rapidly worsening kidney function accompanied by glomerular inflammation, often with crescent formation on biopsy. Causes include anti-glomerular-basement-membrane disease, immune-complex disease, and pauci-immune vasculitis. It requires urgent evaluation and treatment.

Synonyms:

Rasburicase

A recombinant urate-oxidase enzyme that converts uric acid to the more soluble allantoin. It is used in selected patients at risk of or experiencing tumor-lysis-related hyperuricemia. It can cause serious hypersensitivity or hemolysis in people with glucose-6-phosphate dehydrogenase deficiency and requires appropriate screening and monitoring.

Synonyms:

Rash

A general term for any visible skin eruption, change in skin color, texture, or appearance.

Synonyms:

Rashes

Visible eruptions or changes in skin color, texture, or appearance that may result from infection, inflammation, allergy, medicines, or other causes.

Synonyms:

Rat bite fever

A systemic bacterial infection caused by *Streptobacillus moniliformis* or *Spirillum minus*, trans-

mitted through rat bites or contact with rat-contaminated food or water. It presents with relapsing fever, rash, polyarthritis, and lymphadenopathy. The characteristic rash is petechial or maculopapular on the extremities.

Synonyms:

Rat-Bite Fever

Systemic infection caused by *Streptobacillus moniliformis* or *Spirillum minus* after exposure to infected rodents. Fever, migratory arthralgia, vomiting, and a maculopapular or petechial rash may occur.

Synonyms:

Raynaud Phenomenon

Exaggerated vasospastic response of digital arteries to cold or stress, causing well-demarcated color changes (white-blue-red) in fingers or toes. Primary Raynaud: idiopathic, symmetric, no tissue damage, normal capillaries.

Synonyms:

Raynaud Syndrome

A vasospastic disorder causing episodic digital color changes (white → blue → red) triggered by cold or stress, due to exaggerated vasoconstriction of digital arteries. Primary Raynaud: benign, symmetric, in young women, no underlying disease.

Synonyms:

Raynaud's phenomenon

Episodic constriction of small arteries in the fingers or toes, causing color changes, numbness, or pain after cold exposure or emotional stress.

Synonyms:

Reaction Time

Time from stimulus to response. Declines with age, neurological disease.

Synonyms:

Reactivation Tuberculosis

Reactivation of latent infection, typically years later. Characteristically affects apical and posterior upper lobe segments. Features include chronic cough,

hemoptysis, night sweats, weight loss, and cavitation.

Synonyms:

Reactive Arthritis

An inflammatory arthritis that develops after certain genitourinary or gastrointestinal infections. It may involve the joints, eyes, skin, or urinary tract; not every person has all of these features.

Synonyms:

Reactive Attachment Disorder

A pattern of inhibited, emotionally withdrawn behavior toward adult caregivers. The child rarely or minimally seeks comfort when distressed and rarely or minimally responds to comfort when distressed. The child shows a pattern of persistently irritable and sad mood that is not limited to interactions with caregivers.

Synonyms:

Reactive Oxygen Species

Superoxide, hydrogen peroxide, hydroxyl radical. Normal metabolism byproducts.

Synonyms:

Reactive perforating collagenosis

A perforating dermatosis in which dermal collagen is extruded through the epidermis, presenting as discrete, dome-shaped papules with a central keratotic plug, most commonly on the extensor extremities.

Synonyms:

Receiver Operating Characteristic

ROC curve: plot of sensitivity vs. 1-specificity. Area under curve measures test accuracy.

Synonyms:

Receptor

A protein that binds a specific signaling molecule (ligand) and initiates a cellular response. Types: (1) Cell surface: ion channel (nicotinic AChR), G-protein coupled (GPCR: adrenergic, muscarinic, opioid), enzyme-linked (RTK: insulin receptor, cytokine receptors).

Synonyms:

Receptor Desensitization

A rapid decrease in the response of a receptor to continuous or repeated agonist stimulation, occurring within minutes to hours.

Synonyms:

Receptor Downregulation

A decrease in the number or sensitivity of receptors in response to chronic receptor stimulation by agonists. When receptors are chronically activated, the cells compensate by internalizing and degrading receptors, reducing receptor density on the cell surface, and decreasing receptor responsiveness.

Synonyms:

Receptor Tyrosine Kinases

Single-pass transmembrane receptors with intrinsic tyrosine kinase activity in their intracellular domain. Ligand binding (e.g., insulin, EGF, PDGF, FGF) induces receptor dimerization and autophosphorylation of tyrosine residues.

Synonyms:

Receptor Upregulation

An increase in the number or sensitivity of receptors in response to chronic receptor blockade or decreased neurotransmitter activity. When receptors are chronically blocked by antagonists, the cells compensate by synthesizing more receptors to maintain homeostatic signaling, leading to increased sensitivity to agonists.

Synonyms:

Recessive

Allele whose phenotype is masked in heterozygotes. Autosomal recessive disorders: cystic fibrosis, sickle cell anemia, Tay-Sachs disease. Requires two copies for expression.

Synonyms:

RECIST

Response Evaluation Criteria in Solid Tumors, standardized imaging-based criteria that categorize re-

sponse to anticancer therapy as complete response, partial response, stable disease, or progressive disease.

Synonyms:

Recombinant DNA

DNA molecule formed by combining genetic material from different sources. Basis of biotechnology. Used to produce insulin, growth hormone, vaccines, gene therapy vectors.

Synonyms:

Recreational Therapy

Use of recreation for therapeutic purposes. Improves quality of life, socialization, coping.

Synonyms:

Rectal Bleeding

Passage of bright-red or dark blood from the rectum, caused by hemorrhoids, fissures, polyps, inflammatory bowel disease, diverticular disease, or cancer. Persistent, heavy, or unexplained bleeding requires evaluation.

Synonyms:

Rectal Prolapse

Protrusion of rectal tissue through the anal opening. Complete prolapse involves all layers of the rectal wall and presents as a concentric cylindrical mass with visible mucosal folds. Partial prolapse involves only the mucosa. Associated with chronic straining, pelvic floor dysfunction, and neurological conditions.

Synonyms:

Rectocele

A weakening of the vaginal wall that allows the rectum to bulge into the vagina.

Synonyms:

Rectovaginal Fistula

Abnormal connection between the rectum and vagina causing passage of stool or gas through the vagina. Causes include obstetric injury particularly third and fourth degree perineal tears, Crohn dis-

ease, radiation therapy, and surgical complications. Presents with vaginal discharge of stool, flatus, or recurrent vaginal infections.

Synonyms:

Rectum

The final straight section of the large intestine, approximately 12-15 cm long, extending from the sigmoid colon to the anal canal. The rectum stores feces before defecation.

Synonyms:

Rectus Abdominis Muscle

Long flat vertical anterior abdominal wall muscle from pubic symphysis to xiphoid process/costal cartilages 5-7, divided by tendinous intersections ("six-pack"). Innervated by T7-T12. Flexes trunk, compresses abdomen, increases intra-abdominal pressure. Diastasis recti common in pregnancy/obesity.

Synonyms:

Rectus Abdominis Sheath

A fibrous aponeurotic envelope formed by the abdominal wall muscles and surrounding the rectus abdominis muscle. It contains the superior and inferior epigastric vessels and related nerves.

Synonyms:

Recurrence

Return of cancer after treatment. Can be local, regional, or distant.

Synonyms:

Recurrence Risk

The probability that a genetic condition will occur again in a future pregnancy or relative, estimated from the inheritance pattern, parental testing, penetrance, and observed or presumed pathogenic variant.

Synonyms:

Recurrence-Free Survival

Time without cancer return after treatment.

Synonyms:

Recurrent

Disease returning after remission. Examples: recurrent UTI, herpes.

Synonyms:

Recurrent Caries

Caries under or around restoration. Due to microleakage, marginal breakdown.

Synonyms:

Red Blood Cell Labeling

Nuclear medicine technique labeling RBCs with Tc-99m. Used for GI bleeding detection, cardiac blood pool imaging.

Synonyms:

Red Flag

A symptom, sign, or test result suggesting a potentially serious condition that requires urgent assessment or escalation of care. Red flags are context-specific and should not be used as a substitute for clinical judgment.

Synonyms:

Red Infarction

Red infarction, also known as hemorrhagic infarction, occurs in tissues with dual blood supply, loose tissue architecture, or venous obstruction, allowing blood to accumulate in the necrotic area and produce a dark red appearance.

Synonyms: hemorrhagic infarction, occurs in tissues with dual blood.

Redundant mitral valve

Excess leaflet tissue of the mitral valve, most commonly the posterior leaflet, which may prolapse into the left atrium during systole. Often associated with myxomatous degeneration and mitral valve prolapse. May be asymptomatic or cause mild mitral regurgitation detected incidentally on echocardiography.

Synonyms:

Reemerging Disease

Previously controlled disease increasing. Examples: tuberculosis, measles, drug-resistant infections.

Synonyms:

Reexpansion pulmonary edema

Noncardiogenic pulmonary edema developing rapidly after rapid reexpansion of a collapsed lung, typically following chest tube drainage of a large or long-standing pneumothorax.

Synonyms:

Refeeding Syndrome

Life-threatening fluid and electrolyte shifts when nutrition restarted in malnourished patient. Hypophosphatemia, hypokalemia, hypomagnesemia, fluid overload, cardiac failure. Prevention: start low (25-30 kcal/kg), advance slowly, supplement electrolytes, monitor closely.

Synonyms:

Reference Interval

The range of laboratory results expected in a defined reference population, usually encompassing the central 95 percent of values. A result outside the interval is not by itself diagnostic and must be interpreted with clinical context, biologic variation, and the laboratory's method-specific range.

Synonyms:

Referred Pain

An unpleasant sensory and emotional experience associated with actual or potential tissue damage, serving as a protective alerting system but becoming maladaptive when chronic (lasting >3 months). See pain.

Synonyms:

Reflex anoxic seizure

A brief seizure-like episode caused by transient cerebral hypoperfusion after a sudden painful or emotional stimulus, usually with pallor, bradycardia, and rapid recovery.

Synonyms:

Reflex Arc

The neural pathway that mediates a reflex action, bypassing conscious brain processing for rapid, au-

tomatic responses. A reflex arc consists of five components: (1) Receptor—sensory nerve ending detecting a stimulus (e.g., pain, stretch).

Synonyms:

Reflux

Gastroesophageal reflux in infants: effortless regurgitation of gastric contents, very common (physiologic 'spitting up') and usually benign, resolving by 12 months with maturation of the lower esophageal sphincter.

Synonyms:

Reflux Nephropathy

Renal scarring and chronic kidney damage caused by vesicoureteral reflux, recurrent urinary infection, or both. It may lead to hypertension, proteinuria, impaired growth, and chronic kidney disease.

Synonyms:

Refraction

The bending of light rays as they pass through the eye's optical system (cornea, aqueous humour, crystalline lens, vitreous humour) to focus a sharp image on the retina. The refractive power of the eye is measured in dioptres (D). Emmetropia: normal refractive state—parallel light rays focus exactly on the retina without accommodation.

Synonyms:

Refractive Errors and Astigmatism

Refractive errors are vision disorders caused by the eye's inability to properly focus light onto the retina, resulting in blurred vision.

Synonyms:

Refractive Surgery

Surgical procedures that reshape the cornea or alter the eye to correct refractive errors and reduce dependence on eyeglasses or contact lenses. Laser techniques include LASIK (corneal flap with excimer ablation), photorefractive keratectomy (surface ablation), and small-incision lenticule extraction (SMILE).

Synonyms:

Refractory

Resistant to a treatment or not responding adequately to it. The term may refer to cancer or other diseases.

Synonyms:

Refractory Period

The period after an action potential during which a cell cannot (absolute refractory period) or can only partially (relative refractory period) generate a new action potential.

Synonyms:

Refsum Disease

An autosomal-recessive peroxisomal disorder of phytanic-acid metabolism. It causes retinitis pigmentosa, anosmia, peripheral neuropathy, ataxia, hearing loss, ichthyosis, and shortened metacarpals or metatarsals with variable onset.

Synonyms:

Regadenoson Pharmacological Stress

Selective A2A adenosine receptor agonist used as a pharmacological vasodilator for nuclear myocardial perfusion imaging. Single IV bolus injection produces coronary vasodilation with fewer side effects than adenosine (less bronchospasm, AV block). Contraindicated in severe asthma or COPD requiring oxygen.

Synonyms:

Regional Anesthesia

Regional anesthesia involves the administration of local anesthetic agents to specific nerves or nerve plexuses to provide surgical anesthesia and postoperative analgesia for a defined body region.

Synonyms:

Regulatory Approval

Authorization by a competent regulatory authority for a medicine, device, or procedure to be marketed or used for specified purposes after review of evidence.

Synonyms:

Regulatory T Cells

Tregs (CD4+ CD25+ FOXP3+): essential for peripheral tolerance. Thymic (tTreg) vs peripheral (pTreg) origin. FOXP3: master transcription factor; mutations cause IPEX.

Synonyms:

Regurgitation

The backward flow of blood through a heart valve that fails to close properly (valvular incompetence or insufficiency).

Synonyms:

Rehabilitation

A coordinated process that helps a person restore or adapt physical, cognitive, psychological, and social function after illness, injury, surgery, or disability.

Synonyms:

Rehabilitation Clinic

Outpatient rehabilitation facility.

Synonyms:

Rehabilitation Engineering

Technology development for disability: prosthetics, orthotics, assistive devices, environmental control.

Synonyms:

Rehabilitation Hospital

Inpatient facility specializing in rehabilitation.

Synonyms:

Rehabilitation Medicine

Physician specialty focusing on function, quality of life for patients with impairment, disability. Also called physiatry.

Synonyms: physiatry.

Rehabilitation Motivation

Patient factors that influence participation in rehabilitation, including intrinsic and extrinsic motivation and engagement with therapeutic goals.

Synonyms:

Rehabilitation Potential

The expected capacity to improve function, independence, participation, or quality of life through rehabilitation. It depends on diagnosis, prognosis, cognition, motivation, comorbidity, social support, and environmental resources.

Synonyms:

Rehabilitation Unit

Hospital ward dedicated to rehabilitation.

Synonyms:

Reinfection

A new episode of infection by the same or a related pathogen after the original infection has resolved. Reinfection is distinct from relapse, in which the original infection persists or returns from an incompletely eradicated focus.

Synonyms:

Relapse

Return or worsening of a disease after a period of improvement or remission. The term is used for cancer and many noncancerous disorders.

Synonyms:

Relapse-Free Survival

The time from completion of treatment to recurrence of the cancer or death from any cause.

Synonyms:

Relapsing Fever

An acute febrile illness caused by *Borrelia* species, characterized by recurrent episodes of fever separated by afebrile intervals.

Synonyms:

Relapsing Polychondritis

A systemic autoimmune disorder causing inflammation and destruction of cartilage throughout the body. Airway involvement can cause tracheal and bronchial stenosis. Other features include auricular chondritis, nasal chondritis, ocular inflammation, and arthritis. Treatment is corticosteroids and immunosuppressants.

Synonyms:

Relative Afferent Pupillary Defect

An asymmetric reduction in the direct pupillary light response caused by unequal afferent input from the retina or optic nerve. It is detected with the swinging-flashlight test and is also called a Marcus Gunn pupil.

Synonyms: a Marcus Gunn pupil.

Relative Biological Effectiveness

Ratio of dose of reference radiation to dose of test radiation for same effect. Alpha particles: RBE 10-20.

Synonyms:

Relative Risk

Ratio of disease risk in exposed vs. unexposed. $RR = (a/(a+b)) / (c/(c+d))$. $RR > 1$: increased risk. $RR < 1$: protective.

Synonyms:

Reliability

Consistency of measurement. Test-retest, inter-rater reliability.

Synonyms:

REM Sleep Behavior Disorder

A sleep disorder in which the normal muscle paralysis of REM sleep is reduced or absent, allowing a person to move or vocalize while dreaming.

Synonyms:

Remifentanyl

An ultra-short-acting synthetic opioid analgesic metabolized by non-specific plasma and tissue esterases, producing context-sensitive half-time of approximately 3 to 10 minutes regardless of infusion duration. This makes it ideal for total intravenous anesthesia (TIVA) combined with propofol, and for procedures requiring rapid emergence.

Synonyms:

Remission

Decrease or disappearance of cancer signs. Com-

plete remission: no detectable disease. Partial remission: significant reduction but not complete.

Synonyms:

Remitting Seronegative Symmetrical Synovitis with Pitting Edema

RS3PE: an acute-onset, symmetric polyarthritis (usually in elderly) with pitting edema of the hands/feet, negative rheumatoid factor and anti-CCP, and marked response to low-dose corticosteroids.

Synonyms:

Remodeling

Bone adaptation to implant stress. Wolff's law: bone remodels along lines of stress.

Synonyms:

Renal Abscess

A localized collection of pus within or around the kidney, usually caused by infection. Diagnosis and treatment may require imaging, antibiotics, and drainage.

Synonyms:

Renal Agenesis

Congenital absence of one (unilateral, 1 in 1,000) or both (bilateral, 1 in 4,000) kidneys. Unilateral renal agenesis: usually asymptomatic, discovered incidentally — the solitary kidney undergoes compensatory hypertrophy. The contralateral kidney may have VUR, UPJ obstruction, or ectopia.

Synonyms:

Renal Anemia

Anemia associated with chronic kidney disease, caused by reduced erythropoietin production and other factors such as iron deficiency, inflammation, and shortened red-cell survival. Evaluation and treatment are individualized; iron replacement and erythropoiesis-stimulating therapy may be considered when appropriate.

Synonyms:

Renal Artery

A paired branch of the abdominal aorta supplying a kidney. It divides into segmental, interlobar, arcuate, and interlobular arteries within the renal parenchyma.

Synonyms:

Renal Artery Aneurysm

A focal enlargement of a renal artery, often asymptomatic but capable of causing hypertension, thromboembolism, or rupture. Management depends on size, symptoms, anatomy, pregnancy, and growth, and may involve surveillance, endovascular treatment, or surgery.

Synonyms:

Renal Artery Doppler

Ultrasound assessing renal artery stenosis. Screening for renovascular hypertension.

Synonyms:

Renal Artery Embolism

Acute occlusion of renal artery from cardiac emboli typically from atrial fibrillation or mural thrombus. Presents with acute flank pain and hematuria. CT angiography shows filling defect. Treat with anticoagulation and possibly thrombolysis or embolectomy if caught early.

Synonyms:

Renal Artery Stenosis

Narrowing of renal artery causing renovascular hypertension. Atherosclerotic most common in elderly at ostium. Fibromuscular dysplasia in young women causing mid-distal stenosis with string-of-beads appearance. Flash pulmonary edema and declining function on ACE inhibitors indicate intervention.

Synonyms:

Renal Biopsy

Percutaneous needle biopsy for histological diagnosis. Indicated for unexplained AKI, nephrotic syndrome, hematuria with renal involvement, and transplant dysfunction. Ultrasound-guided for accuracy. Complications include bleeding, arteriovenous

fistula, and rarely loss of kidney.

Synonyms:

Renal Calculi (Kidney Stones)

Crystalline mineral deposits that form in the kidneys or urinary tract. They may cause severe colicky pain, blood in the urine, urinary obstruction, or infection.

Synonyms: Kidney Stones

Renal Cell Carcinoma

A malignant tumor arising from the kidney's renal tubular epithelium. Major subtypes include clear-cell, papillary, and chromophobe carcinoma; symptoms and treatment depend on the tumor's extent.

Synonyms:

Renal Changes in Pregnancy

Pregnancy increases renal blood flow and glomerular filtration. These changes lower usual serum creatinine values and may increase urinary loss of glucose and amino acids.

Synonyms:

Renal Clearance

The volume of plasma completely cleared of a substance by the kidneys per unit time, measured in mL/min. Clearance of any substance X is calculated as: $CX = (Ux \times V)/Px$, where Ux is urine concentration, V is urine flow rate, and Px is plasma concentration.

Synonyms:

Renal Colic

Severe, paroxysmal flank pain caused by ureteral obstruction, typically by a kidney stone, with radiation to the groin; often the worst pain experienced.

Synonyms:

Renal Cortex

Outer kidney portion between capsule and medulla. Granular tissue with glomeruli, convoluted tubules, and cortical collecting ducts. Extends between pyramids as renal columns. Receives approximately 90 percent of renal blood flow; primary filtration site.

Synonyms:

Renal cryptococcosis

Infection of the kidney by *Cryptococcus* species, usually as part of disseminated cryptococcosis in an immunocompromised person.

Synonyms:

Renal Diet

Restricted protein, sodium, potassium, phosphorus for kidney disease. Individualized based on stage. Dialysis increases protein need requirement.

Synonyms:

Renal Dose Adjustment

Modification of a medication dose, dosing interval, or both to account for reduced kidney clearance. The adjustment should use an appropriate estimate of renal function, drug-specific pharmacokinetics, treatment indication, and therapeutic monitoring when available.

Synonyms:

Renal Drug Excretion

The elimination of drugs by the kidney through glomerular filtration, active tubular secretion, and passive tubular reabsorption. Drugs eliminated renally (e.g., aminoglycosides, vancomycin, lithium, metformin) require dose adjustment in renal impairment.

Synonyms:

Renal Failure

Decline in kidney function leading to accumulation of waste products (azotemia) and electrolyte abnormalities. Acute kidney injury (AKI): rapid decline over hours to days, potentially reversible. Chronic kidney disease (CKD): progressive decline over months to years.

Synonyms:

Renal Infarction

Renal infarction results from occlusion of the renal artery or its branches, causing coagulative necrosis of the renal parenchyma. The kidney has end-

arterial supply with limited collateral circulation, making it susceptible to ischemic injury even from small vessel occlusion.

Synonyms:

Renal Leukemia Infiltration

Kidney involvement by chronic lymphocytic leukemia or other hematological malignancies causing bilateral renomegaly and renal dysfunction. Leukemic cells infiltrate the interstitium and peritubular capillaries. May cause AKI from compression of tubules and vessels or chronic kidney disease.

Synonyms:

Renal Mass

Abnormality in kidney detected on imaging. Solid masses may be renal cell carcinoma. Cystic masses classified by Bosniak system.

Synonyms:

Renal Medulla

The inner part of the kidney containing the renal pyramids, loops of Henle, vasa recta, and collecting ducts. Its structure and blood supply help establish the concentration gradient used to concentrate urine.

Synonyms:

Renal Osteodystrophy

Bone disease in CKD including osteitis fibrosa, osteomalacia, adynamic bone disease, and osteoporosis. Results from calcium-phosphate imbalance, secondary hyperparathyroidism, and vitamin D deficiency. Manage with phosphate binders, vitamin D analogues, and parathyroidectomy for refractory hyperparathyroidism.

Synonyms:

Renal Pelvis

The funnel-shaped expansion of the ureter within the kidney, formed by the union of major calyces. It collects urine from the renal papillae and directs it into the ureter.

Synonyms:

Renal Replacement Therapy

Treatment that substitutes for inadequate kidney excretory and regulatory function. Modalities include intermittent hemodialysis, continuous kidney replacement therapy, peritoneal dialysis, and kidney transplantation.

Synonyms:

Renal Replacement Therapy Indications

Urgent indications for dialysis include refractory hyperkalemia, severe metabolic acidosis, toxin exposure by a dialyzable agent, refractory fluid overload or pulmonary edema, and symptomatic uremia. The decision incorporates the patient's trajectory and overall goals of care.

Synonyms:

Renal Scan

Nuclear medicine imaging using Tc-99m compounds. Evaluates renal function, obstruction, blood flow. MAG3 for function, DTPA for GFR.

Synonyms:

Renal Scintigraphy

Renal imaging using Tc-99m compounds. MAG3 (tubular secretion) for functional assessment, DTPA (glomerular filtration) for GFR measurement. Used for obstruction, function, transplant monitoring, renin-mediated hypertension.

Synonyms:

Renal Transplant (Renal Transplantation)

Surgical placement of a functioning donor kidney into a person with advanced kidney failure. It can restore kidney function but requires suitability assessment and long-term immunosuppression.

Synonyms: Renal Transplantation

Renal Trauma

Kidney injury from trauma. CT staging guides management. Grades I-V based on injury severity.

Synonyms:

Renal Tubular Acidosis

Group of disorders with normal anion gap metabolic acidosis from impaired renal acid excretion or bicarbonate reabsorption. Type 1 distal with impaired H⁺ secretion and urine pH greater than 5.5. Type 2 proximal with impaired bicarbonate reabsorption. Type 4 hyperkalemic from aldosterone deficiency or resistance.

Synonyms:

Renal Ultrasound

Noninvasive imaging used to assess kidney size, structure, blood flow, and urinary obstruction. It is particularly useful when obstruction, cystic disease, or structural abnormality is suspected and is often used in the evaluation of acute or chronic kidney disease.

Synonyms:

Renal Vein

A paired vein draining each kidney into the inferior vena cava. The left renal vein is longer and crosses anterior to the aorta, receiving the left gonadal and suprarenal veins.

Synonyms:

Renin Inhibitor

A class of antihypertensive drugs that directly inhibit renin, the first and rate-limiting enzyme in the renin-angiotensin-aldosterone system. Renin catalyzes the conversion of angiotensinogen to angiotensin I, which is then converted to angiotensin II by ACE. Aliskiren is the only direct renin inhibitor available.

Synonyms:

Renin-Angiotensin-Aldosterone System

A hormonal system in which renin initiates formation of angiotensin II, promoting vasoconstriction and aldosterone secretion. Aldosterone increases distal sodium reabsorption and potassium and hydrogen-ion secretion; RAAS dysregulation contributes to hypertension, heart failure, and CKD progression.

Synonyms:

Renin-Angiotensin-Aldosterone System Physiology

The RAAS regulates blood pressure and fluid electrolyte balance. Renin released from juxtaglomerular cells cleaves angiotensinogen to angiotensin I. Angiotensin converting enzyme converts angiotensin I to angiotensin II which causes vasoconstriction and stimulates aldosterone secretion from the adrenal cortex.

Synonyms:

Renography

Nuclear medicine imaging of kidneys. Evaluates function, obstruction, blood flow.

Synonyms:

Renovascular Hypertension

Hypertension due to renal artery stenosis. Diagnosis: Doppler ultrasound, CTA, MRA, renography. Treatment: angioplasty, stenting, surgery.

Synonyms:

Reperfusion Injury

Tissue damage following restoration of blood flow after ischemia. Mechanisms: oxidative stress, calcium overload, inflammation. Examples: myocardial reperfusion injury, stroke reperfusion injury. Mitigation: antioxidants, reperfusion protocols.

Synonyms:

Replantation of an Avulsed Tooth

Replacement of an avulsed permanent tooth into its socket after trauma, followed by flexible stabilization and endodontic and periodontal follow-up when indicated. Prognosis depends strongly on extraoral dry time, storage conditions, root maturity, and contamination.

Synonyms:

Repolarization

The return of the membrane potential toward the resting value after depolarization. In neurons and skeletal/cardiac muscle, repolarization is primarily caused by the efflux of potassium through voltage-gated potassium channels and inactivation

of sodium channels.

Synonyms:

Reporting Standards

Standards for structured reporting. ACR guidelines, BI-RADS, LI-RADS, PI-RADS.

Synonyms:

Reproductive Organs

The organs involved in reproduction. Female: ovaries (produce eggs and hormones), fallopian tubes (transport eggs, site of fertilization), uterus (nurtures the developing fetus), cervix (lower part of uterus, dilates during labor), vagina (passage for sperm and baby), and vulva (external genitalia).

Synonyms:

Reproductive Toxicity

Effects on reproduction: infertility, teratogenesis, fetal toxicity, developmental toxicity. Testing required for pharmaceuticals.

Synonyms:

Reproductive Years

The period of a woman's life during which she is capable of conceiving, typically from menarche (first menstrual period, average age 12-13) to menopause (final menstrual period, average age 51).

Synonyms:

Research

The systematic investigation and scientific study of new materials, methods, or clinical trials to advance medical knowledge and patient care.

Synonyms:

Research Ethics

Principles that protect the rights, safety, welfare, privacy, and informed participation of people or animals involved in research.

Synonyms:

Reservoir

A human, animal, or environmental habitat in which

an infectious agent normally lives, multiplies, and persists. A reservoir may serve as the source from which the agent is transmitted to a susceptible host.

Synonyms:

Residual Limb

The portion of a limb remaining after amputation. Care includes edema control, skin inspection, shaping, strengthening, desensitization, contracture prevention, and prosthetic preparation.

Synonyms:

Residual Volume

The volume of air remaining in the lungs after a maximal forced expiration, approximately 1.2 L in adults. Residual volume cannot be measured by simple spirometry because it cannot be exhaled; it is measured by body plethysmography, helium dilution, or nitrogen washout.

Synonyms:

Resilience

Ability to recover from stressors. Important for healthy aging.

Synonyms:

Resolution

Ability to distinguish small structures. Spatial, temporal, contrast resolution.

Synonyms:

Resolution Recovery

Correction for detector resolution degradation with distance.

Synonyms:

Resorption Atelectasis

Atelectasis caused by complete obstruction of an airway, leading to absorption of trapped air by the pulmonary capillaries. Common causes include mucus plugging, foreign body, tumor, and post-surgical shallow breathing. The affected area appears as increased density on CXR with volume loss.

Synonyms:

Respiratory Acidosis

Acid-base disturbance due to accumulation of CO₂ from hypoventilation, lowering pH (acidemia). Causes: respiratory depression (opioids, sedatives, CNS disease), airway obstruction, neuromuscular weakness (GBS, myasthenia), chest wall restriction, severe COPD/asthma, and ventilation-perfusion mismatch.

Synonyms:

Respiratory Alkalosis

Acid-base disturbance from excessive elimination of CO₂ by hyperventilation, raising pH (alkalemia). Causes: anxiety/hyperventilation, hypoxia, pulmonary embolism, sepsis, fever, pain, salicylate toxicity, liver failure, pregnancy, high altitude. Compensation: renal bicarbonate excretion (days).

Synonyms:

Respiratory Changes in Pregnancy

The growing uterus elevates the diaphragm, while hormonal changes increase ventilatory drive. Tidal volume and minute ventilation generally increase, while functional residual capacity decreases.

Synonyms:

Respiratory Depression

Breathing that is abnormally slow or shallow, causing inadequate ventilation and possible carbon-dioxide retention or low oxygen. Medicines, brain disorders, and metabolic illness can cause it.

Synonyms:

Respiratory Distress

Difficulty breathing due to various causes. Assessment: work of breathing (retractions, nasal flaring, tripod position), oxygen saturation, breath sounds. Causes: asthma, COPD, pneumonia, pulmonary embolism, pneumothorax, anaphylaxis, heart failure.

Synonyms:

Respiratory Distress Syndrome

A condition primarily affecting premature infants caused by pulmonary surfactant deficiency, leading

to alveolar collapse and respiratory failure. Presents with tachypnea, grunting, nasal flaring, retractions, and cyanosis. Chest X-ray shows diffuse ground-glass opacity.

Synonyms:

Respiratory Drive

The neural output that stimulates respiratory muscles and determines ventilation. It is generated by brainstem networks and modified by chemoreceptor input, mechanoreceptors, wakefulness, metabolic state, medications, and behavioral control.

Synonyms:

Respiratory Failure

Inadequate gas exchange resulting in hypoxemia (PaO₂ <60 mmHg), hypercapnia (PaCO₂ >50 mmHg), or both. Type 1 (hypoxemic): V/Q mismatch, shunt, diffusion impairment. Type 2 (hypercapnic): hypoventilation from neuromuscular disease, COPD exacerbation, or opioid overdose.

Synonyms:

Respiratory Health

The proper functioning of the lungs and airways, enabling efficient gas exchange and oxygen delivery to the body. Maintaining respiratory health involves avoiding tobacco smoke, minimizing exposure to air pollutants and occupational hazards, and receiving vaccinations against respiratory infections like influenza and pneumococcal disease.

Synonyms:

Respiratory Infections

Illnesses caused by pathogens including viruses, bacteria, and fungi that affect the airways and lungs.

Synonyms:

Respiratory Physiology

The study of pulmonary function encompassing ventilation (movement of air), gas exchange (diffusion of O₂ and CO₂ across the alveolar-capillary membrane), transport of gases in blood, and regulation of breathing.

Synonyms:

Respiratory Protection

Measures and equipment used to reduce inhalation of harmful dusts, fumes, gases, aerosols, or infectious particles.

Synonyms:

Respiratory Quotient

The ratio of carbon dioxide production to oxygen consumption for a particular substrate or metabolic state. It differs from the respiratory exchange ratio measured at the mouth and is used in metabolic and ventilatory physiology.

Synonyms:

Respiratory Rate

The number of breaths taken per minute. The expected rate varies with age, activity, temperature, illness, and other factors.

Synonyms:

Respiratory Rehabilitation

A program of exercise, education, breathing techniques, and self-management that improves function and quality of life in people with chronic respiratory disease.

Synonyms:

Respiratory Syncytial Virus

A respiratory virus that commonly causes bronchiolitis and pneumonia in infants and young children. Infection is usually mild in adults but may be severe in infants, older adults, and people with chronic heart or lung disease.

Synonyms:

Respiratory System

The anatomical and physiological system responsible for gas exchange—delivering oxygen to the blood and removing carbon dioxide. Components: (1) Upper respiratory tract—nose, nasal cavity, paranasal sinuses, pharynx (nasopharynx, oropharynx, laryngopharynx).

Synonyms:

Respiratory Tract Infections

Infections affecting any part of the respiratory tract, classified by anatomical location into upper respiratory tract infections (URTIs) and lower respiratory tract infections (LRTIs).

Synonyms:

Respiratory viruses

Viruses that cause respiratory tract infections. Major respiratory viruses include influenza, respiratory syncytial virus (RSV), parainfluenza virus, adenovirus, and human metapneumovirus. SARS-CoV-2 causes COVID-19. Symptoms range from mild upper respiratory illness to severe pneumonia.

Synonyms:

Response Assessment

Evaluation of treatment response. RECIST criteria for solid tumors. PET response criteria for lymphoma.

Synonyms:

Response Evaluation Criteria

RECIST criteria for tumor response. PERCIST for PET.

Synonyms:

Resting Membrane Potential

The steady electrical potential difference across the cell membrane of an unstimulated cell, typically -70 mV in neurons, -80 to -90 mV in skeletal and cardiac muscle, and -50 to -60 mV in smooth muscle.

Synonyms:

Restless Legs Syndrome

An urge to move the legs, usually accompanied by uncomfortable sensations, that begins or worsens during rest, is relieved by movement, and occurs predominantly in the evening or night. The condition causes significant distress or impairment. It is associated with iron deficiency, renal failure, pregnancy, and peripheral neuropathy.

Synonyms:

Restorative Dentistry

Specialty of restoring damaged teeth. Procedures: fillings, inlays, onlays, crowns, bridges, implants. Goals: function, aesthetics, durability.

Synonyms:

Restraint

Device or medication limiting movement. Physical restraints: vests, wrist restraints, lap traps. Chemical restraints: antipsychotics, benzodiazepines for behavior control. Should be last resort, time-limited, with monitoring. Alternatives: addressing underlying causes, environmental modification.

Synonyms:

Restraint-Related Harm

Physical or psychological injury associated with using a device, medication, or environmental restriction to limit a person's movement. Older adults are at risk of falls, pressure injury, delirium, aspiration, and functional decline; the least restrictive alternatives should be prioritized.

Synonyms:

Restriction Enzyme

Bacterial enzyme cutting DNA at specific recognition sequences. Used in molecular cloning, DNA fingerprinting, restriction fragment length polymorphism (RFLP) analysis.

Synonyms:

Restrictive Cardiomyopathy

A cardiomyopathy characterized by impaired ventricular relaxation and filling due to stiff, noncompliant myocardium, with preserved systolic function and normal or reduced ventricular volumes. Causes include amyloidosis, sarcoidosis, hemochromatosis, endomyocardial fibrosis, and radiation.

Synonyms:

Retained Placenta

Failure of the placenta to deliver after birth within the interval expected for safe management. It may result from failure of separation, abnormal placental attachment, or trapping behind a closed cervix and

can cause severe bleeding.

Synonyms:

Retained Products of Conception

Fragments of placental or fetal tissue retained in the uterus after delivery, miscarriage, or abortion. Causes: incomplete placental separation, succenturiate lobe, and placenta accreta. Presents: persistent or heavy bleeding, pain, and fever in the postpartum period.

Synonyms:

Retention Time

The time required for a compound to pass through a chromatographic system from injection to detection. In analytical toxicology, comparison with validated standards helps identify compounds, but retention time alone is not definitive identification.

Synonyms:

Reticular Formation

A network of interconnected nuclei in the brainstem (midbrain, pons, medulla) that regulates arousal, consciousness, sleep-wake transitions, and alertness (ascending reticular activating system), as well as muscle tone, posture, cardiovascular and respiratory control (vasomotor and respiratory centers), pain modulation, and attention.

Synonyms:

Reticulocyte Count

The number or percentage of immature red blood cells in blood. It reflects recent bone-marrow red-cell production and helps assess anemia, especially when interpreted with the hemoglobin and clinical context.

Synonyms:

Retina

Innermost eye layer, a thin neural tissue layer lining the posterior two-thirds of the globe for phototransduction (light to neural signals). Ten layers, with photoreceptors (rods for low-light vision, cones for color vision) in the outer nuclear layer.

Synonyms:

Retinal Detachment

A separation of the neurosensory retina from the underlying retinal pigment epithelium, creating a potential space that fills with fluid and resulting in progressive vision loss in the affected area, and it is classified into three main types based on the underlying mechanism.

Synonyms:

Retinal Artery Occlusion

Blockage of a retinal artery causing sudden, usually painless loss of vision. It requires urgent ophthalmic and vascular evaluation because it may indicate a systemic embolic or vascular disorder.

Synonyms:

Retinal Detachment Repair

Surgical or pneumatic treatment to close retinal breaks and reattach the retina. Techniques include vitrectomy, scleral buckling, and pneumatic retinopexy, selected according to the type and location of detachment.

Synonyms:

Retinal Hemorrhages

Bleeding within the retina, a hallmark finding in abusive head trauma (shaken baby syndrome). Found on dilated fundoscopic examination, often bilateral and multi-layered. Also seen in severe accidental trauma, bleeding disorders, and increased intracranial pressure.

Synonyms:

Retinal ischemia

Inadequate blood flow to the retina, often caused by a retinal artery occlusion or severe vascular disease. It may cause sudden, painless visual loss and requires emergency ophthalmic and vascular assessment; treatment depends on the cause and time of presentation.

Synonyms:

Retinal Layers

The retina consists of ten distinct layers that process visual information through a complex neural circuit.

Synonyms:

Retinal Prosthesis

Experimental device for blindness. Argus II system: camera to processor to electrode array stimulates retina. Indications: retinitis pigmentosa. Provides light perception, pattern recognition.

Synonyms:

Retinal Tear

A full-thickness break in the neurosensory retina, often caused by vitreoretinal traction. It can permit fluid to enter the subretinal space and progress to rhegmatogenous retinal detachment; symptomatic tears are generally treated urgently with laser photocoagulation or cryotherapy.

Synonyms:

Retinal Vein Occlusion

Obstruction of a retinal vein producing retinal hemorrhages, edema, and variable visual loss. Branch and central forms may cause macular edema, retinal ischemia, and neovascular complications.

Synonyms:

Retinitis Pigmentosa

A group of inherited retinal disorders in which rod and cone photoreceptors gradually degenerate. Symptoms may include night blindness, narrowing of the visual field, and progressive loss of vision.

Synonyms:

Retinoblastoma

Childhood eye cancer. RB1 gene mutation (autosomal dominant inheritance, but sporadic cases common). Hereditary form: bilateral, multifocal, earlier onset. Sporadic: unilateral, single focus. Treatment: chemotherapy, radiation, surgery, enucleation.

Synonyms:

Retinol

Vitamin A (retinol) is a fat-soluble vitamin essential for vision, immune function, cell differentiation, and reproduction. See Vitamin A: Retinal.

Synonyms:

Retinopathy

Disease or damage of the retina, often related to diabetes, hypertension, vascular disease, inflammation, or inherited disorders.

Synonyms:

Retinopathy of Prematurity

Abnormal vascularization of the retina in premature infants, a leading cause of childhood blindness. Affects infants less than 32 weeks gestation and less than 1500 grams. Stages range from mild (avascular retina) to severe (retinal detachment). Screening began at 31-33 weeks corrected gestational age or 4 weeks chronological age.

Synonyms:

Retinoschisis

Splitting of the retinal layers, producing a separation between inner and outer retinal tissue. It may be degenerative and peripheral or inherited and juvenile, and can cause visual-field loss, reduced acuity, or complications resembling retinal detachment.

Synonyms:

Retract (Vascular)

To pull a vessel or tissue away from an operative field using a surgical retractor.

Synonyms: Vascular

Retraction (Self-Retaining)

Holding tissue away from an operative field with a retractor that remains in position without continuous manual support.

Synonyms: Self-Retaining

Retractor

Holds tissue aside for exposure. Types: handheld, self-retaining (Weitlaner, Gelpi).

Synonyms:

Retractor (Abdominal)

A surgical instrument used to hold back the abdominal wall or organs to improve access and visibility during an operation.

Synonyms: Abdominal

Retractor (Hand)

A handheld surgical instrument used to hold tissue or an organ away from the operative field.

Synonyms: Hand

Retractor (Surgical)

An instrument used to separate or hold tissues aside during a surgical procedure.

Synonyms: Surgical

Retrograde Ejaculation

Semen enters bladder instead of exiting urethra. Causes: diabetes, surgery, medications. Dry orgasm. Treatment: medications, sperm retrieval for fertility.

Synonyms:

Retroperitoneal Fibrosis

Chronic fibroinflammatory tissue formation in the retroperitoneum, often encasing the ureters and great vessels. It can cause hydronephrosis, flank pain, reduced kidney function, hypertension, or lower-limb edema and may be idiopathic, immune-mediated, drug-related, or secondary to malignancy.

Synonyms:

Retroperitoneal hemorrhage

Bleeding into the retroperitoneal space, which may result from aortic rupture, anticoagulation therapy, retroperitoneal hematoma following femoral catheterization, trauma, or retroperitoneal neoplasms. Presents with flank pain, abdominal distension, hypotension, and anemia.

Synonyms:

Retroperitoneum

The anatomical space posterior to the peritoneum. It contains the kidneys, adrenal glands, ureters, aorta, and inferior vena cava, as well as portions of the duodenum, pancreas, and colon. Some organs are secondarily retroperitoneal after development. It is divided into anterior pararenal, perirenal, and posterior pararenal spaces.

Synonyms:

Retropharyngeal Abscess

A collection of pus in the retropharyngeal space, located between the posterior pharyngeal wall and the prevertebral fascia. Most common in children aged 2-4 years, arising from suppurative lymphadenitis of the retropharyngeal lymph nodes that drain the nasopharynx, adenoids, and sinuses.

Synonyms:

Retrovirus

An RNA virus that replicates by reverse transcribing its RNA genome into DNA, which is then integrated into the host cell genome. Family Retroviridae. Key enzyme: reverse transcriptase (RNA-dependent DNA polymerase) converts viral RNA into double-stranded DNA; integrase inserts the viral DNA (provirus) into the host chromosome.

Synonyms:

Rett Syndrome

An X-linked dominant neurodevelopmental disorder affecting almost exclusively females, caused by mutations in the MECP2 gene.

Synonyms:

Return of Spontaneous Circulation

Restoration of sustained cardiac mechanical activity after cardiac arrest, evidenced by a palpable pulse or measurable blood pressure and signs of circulation. Post-arrest care addresses oxygenation, ventilation, blood pressure, temperature, neurologic injury, and the cause of arrest.

Synonyms:

Reverberation Artifact

Ultrasound artifact from multiple reflections. Reduced by changing angle, using tissue harmonic imaging.

Synonyms:

Reverse Transcription

Synthesis of DNA from an RNA template by the enzyme reverse transcriptase.

Synonyms:

Reversible Cell Injury

Cellular dysfunction caused by a harmful stimulus that can resolve when the stimulus is removed. Common changes include cellular swelling, fatty change, membrane blebbing, and reduced oxidative phosphorylation without irreversible membrane or nuclear destruction.

Synonyms:

Revision Arthroplasty

Surgical replacement, exchange, or repair of a failed or painful joint prosthesis. Indications include infection, aseptic loosening, instability, periprosthetic fracture, wear, and recurrent dislocation.

Synonyms:

Reye Syndrome

A rare acute encephalopathy with hepatic dysfunction, classically occurring in children recovering from a viral illness. It causes persistent vomiting, altered mental status, cerebral edema, and elevated liver enzymes without primary inflammatory liver failure.

Synonyms:

Reynolds Pentad

Extension of the Charcot triad to include hypotension and altered mental status representing suppurative cholangitis, a severe life-threatening form of ascending cholangitis. Patients present with high fever, rigors, right upper quadrant pain, jaundice, hypotension, and confusion.

Synonyms:

Rezafungin

A long-acting echinocandin antifungal medicine that inhibits fungal cell-wall synthesis. It is used for selected invasive candidiasis infections; its long duration permits an intermittent dosing schedule under specialist supervision.

Synonyms:

Rh Factor

A system of blood group antigens (the Rh system) on the surface of red blood cells, the most important of which is the D antigen (RhD). See Rhesus (Rh)

Factor.

Synonyms:

Rh Isoimmunization

Maternal alloantibody production against fetal Rh D-positive red blood cells in an Rh D-negative mother, occurring when fetal RBCs enter the maternal circulation (fetomaternal hemorrhage).

Synonyms:

Rhabdoid Tumor

A highly aggressive malignant tumor of infancy, occurring in the kidney (malignant rhabdoid tumor) or brain (atypical teratoid/rhabdoid tumor), characterized by loss of the SMARCB1 (INI1) gene.

Synonyms:

Rhabdomyolysis

Rapid breakdown of skeletal muscle that releases muscle proteins into the bloodstream. Causes include crush injury, extreme exertion, seizures, heat illness, and some diseases; it can lead to acute kidney injury and requires prompt medical assessment.

Synonyms:

Rhabdomyolysis and AKI

Severe muscle breakdown releases myoglobin and other intracellular contents, potentially causing acute kidney injury, electrolyte abnormalities, and cardiac arrhythmias. Findings may include muscle pain, weakness, dark urine, and elevated creatine kinase; treatment requires urgent assessment and cause-directed fluid and supportive therapy.

Synonyms:

Rhabdomyoma

A benign cardiac tumour composed of striated muscle cells, occurring predominantly in infants and children and strongly associated with tuberous sclerosis. It commonly involves the ventricular myocardium and may regress spontaneously, although large or multiple tumours can cause obstruction or arrhythmias.

Synonyms:

Rhabdomyosarcoma

A malignant tumor showing skeletal-muscle differentiation, occurring primarily in children and commonly involving the head and neck, genitourinary tract, or extremities.

Synonyms:

Rhegmatogenous Retinal Detachment

The most common type of retinal detachment, caused by a full-thickness break or tear in the retina that allows liquefied vitreous humor to enter the subretinal space, separating the neurosensory retina from the underlying retinal pigment epithelium.

Synonyms:

Rhesus (Rh) Factor

A system of antigens on the surface of red blood cells, especially the D antigen. A person is Rh-positive when the D antigen is present and Rh-negative when it is absent. Rh incompatibility can affect pregnancy and transfusion safety.

Synonyms: Rh

Rheumatic Fever

A nonsuppurative inflammatory complication of Group A Streptococcal pharyngitis, occurring 2-4 weeks after infection. Diagnosed by Jones criteria: major manifestations (carditis, polyarthritides, chorea, erythema marginatum, subcutaneous nodules) plus evidence of prior streptococcal infection. Major criterion plus two minor criteria.

Synonyms:

Rheumatic Heart Disease

Valvular damage resulting from acute rheumatic fever, an autoimmune response to Group A streptococcal pharyngitis. Most commonly affects the mitral valve (stenosis/regurgitation), followed by aortic. Prevention through prompt treatment of streptococcal pharyngitis.

Synonyms:

Rheumatoid Arthritis

A chronic autoimmune inflammatory disease that commonly causes symmetric pain, swelling, and

progressive damage in the small joints of the hands and feet. It may also affect other organs.

Synonyms:

Rheumatoid Factor

An autoantibody, usually of the IgM class, directed against part of IgG. It may support a diagnosis of rheumatoid arthritis but can also occur in other autoimmune diseases, infections, and healthy people.

Synonyms:

Rhinencephalon

The part of the brain concerned chiefly with the sense of smell and related limbic functions.

Synonyms:

Rhinitis

Inflammation or dysfunction of the nasal mucosa causing congestion, rhinorrhea, sneezing, or itching.

Synonyms:

Rhinophyma

A severe, end-stage subtype of phymatous rosacea occurring predominantly in elderly men. Characterized by progressive nodular thickening, hypertrophy, and lobular enlargement of the nasal skin with prominent, dilated pilosebaceous pores. Pathophysiology: sebaceous gland hyperplasia, fibrosis, and chronic inflammation.

Synonyms:

Rhinoplasty

A surgical procedure to alter the shape, size, or function of the nose, performed for cosmetic reasons (aesthetic rhinoplasty—improving nasal appearance) or functional reasons (functional rhinoplasty—improving nasal airflow by correcting internal/external nasal valve collapse, deviated septum, or turbinate hypertrophy).

Synonyms:

Rhinovirus

A genus of non-enveloped, positive-sense RNA viruses in the Picornaviridae family. Rhinoviruses are a common cause of the common cold and spread

mainly through respiratory secretions and contaminated hands or surfaces.

Synonyms:

RhoGAM

Rh immune globulin containing anti-D antibodies, used to prevent Rh isoimmunization in Rh-negative mothers. Administered intramuscularly at 28 weeks gestation and within 72 hours after delivery of an Rh-positive infant. Also given after amniocentesis, chorionic villus sampling, miscarriage, ectopic pregnancy, or abdominal trauma.

Synonyms:

Rhonchi

Low-pitched, continuous adventitious sounds heard primarily during expiration, caused by secretions in the large airways. They may clear with coughing. They are heard in COPD, bronchitis, and bronchiectasis. They are different from wheezes in their lower pitch and coarser quality.

Synonyms:

Rib

One of 12 paired, curved bones forming the thoracic cage, protecting the heart, lungs, and great vessels. True ribs (1–7) attach directly to the sternum via costal cartilage. False ribs (8–10) attach indirectly to the sternum via the costal cartilage of rib 7. Floating ribs (11–12) have no anterior attachment.

Synonyms:

Riboflavin (Vitamin B2)

A water-soluble vitamin that forms the coenzymes FAD and FMN. These cofactors participate in oxidation-reduction reactions, including electron transfer, fatty-acid oxidation, and energy metabolism.

Synonyms: Vitamin B2

Ribosomal RNA

RNA component of ribosomes, catalyzing peptide bond formation (peptidyl transferase activity). Eukaryotic ribosome: 60S (28S, 5.8S, 5S rRNAs + proteins) + 40S (18S rRNA + proteins) = 80S.

Prokaryotic: 50S (23S, 5S rRNAs) + 30S (16S rRNA) = 70S. rRNA genes are highly conserved, used in phylogenetics.

Synonyms:

Ribosome

Ribonucleoprotein complexes (rRNA + proteins) that synthesize proteins by translating mRNA. Two subunits: 60S (large, 28S/5.8S/5S rRNA) and 40S (small, 18S rRNA) in eukaryotes (80S complete). Prokaryotes have 50S/30S (70S complete).

Synonyms:

Ribozyme

RNA molecule with catalytic activity. Peptidyl transferase is a ribozyme.

Synonyms:

Rickets

A disorder of growing bones caused by inadequate mineralization, often from vitamin D deficiency or phosphate disorders. It may cause bone pain, poor growth, deformity, fractures, or widening at the growth plates.

Synonyms:

Rickettsia

A genus of obligate intracellular Gram-negative coccobacillary bacteria transmitted by arthropod vectors (ticks, fleas, lice, mites). Rickettsia are the causative agents of the spotted fever group (SFG) and typhus group (TG) rickettsioses.

Synonyms:

Rickettsialpox

A mite-borne infection caused by Rickettsia akari, producing a vesicular rash, fever, headache, and an inoculation eschar. It is usually self-limited but may resemble other febrile exanthems.

Synonyms:

Ridge Preservation

Socket grafting after extraction to maintain bone volume. Reduces ridge resorption.

Synonyms:

Right Atrium

Receives deoxygenated blood from superior vena cava, inferior vena cava, and coronary sinus. Smooth posterior part (sinus venosus) and rough anterior auricle with pectinate muscles. The fossa ovalis is the fetal foramen ovale remnant. The SA node pacemaker is near the superior vena cava opening.

Synonyms:

Right Bundle Branch

A continuation of the bundle of His that travels along the right side of the interventricular septum to the right ventricle. It supplies the right ventricular myocardium and Purkinje fibers. Right bundle branch block (RBBB) occurs when this branch is damaged, causing delayed right ventricular activation.

Synonyms:

Right Coronary Artery

Arises from the right aortic sinus and travels in the right atrioventricular groove. It supplies the right atrium, right ventricle, SA node (60% of individuals), AV node (85% of individuals), and the inferior wall of the left ventricle.

Synonyms:

Right coronary artery occlusion

Blockage of the right coronary artery, reducing blood flow to areas of the heart it supplies and potentially causing myocardial infarction or rhythm disturbances.

Synonyms:

Right Heart Failure

Failure of the right ventricle to adequately pump blood to the lungs, causing systemic venous congestion. Causes include left heart failure (most common), pulmonary hypertension, right ventricular infarction, pulmonary embolism, and constrictive pericarditis. Signs include elevated JVD, peripheral edema, hepatomegaly, and ascites.

Synonyms:

Right Hypochondriac Region

One of nine abdominal regions in the upper right abdomen, bounded medially by the right midclavicular line and superiorly by the right costal margin. Contains the cecum, appendix, ascending colon, and inferior right liver lobe. Pain here may indicate appendicitis (McBurney's point), cecal pathology, or hepatic disease.

Synonyms:

Right Iliac Region

Lower right abdomen containing the cecum, appendix, and terminal ileum. McBurney's point (junction of lateral and middle thirds from umbilicus to ASIS) is critical for appendicitis diagnosis. Also significant for evaluating inguinal and femoral hernias, and the right ureter's course.

Synonyms:

Right Lymphatic Duct

Short lymphatic vessel (approximately 1.5 cm) draining lymph from the right upper quadrant: right arm, right side of the head and neck, and right thorax. Formed by the junction of right jugular, subclavian, and bronchomediastinal trunks, emptying into the right venous angle (junction of right internal jugular and subclavian veins).

Synonyms:

Right sixth cranial nerve palsy

Weakness or paralysis of the right abducens nerve (CN VI), causing inability to abduct the right eye and resulting in horizontal diplopia worse at distance and on right gaze.

Synonyms:

Right ureterovesical calculus

A stone lodged at the junction of the right ureter and bladder, causing flank pain, hematuria, and urinary urgency or frequency. May require endoscopic or lithotripsy intervention.

Synonyms:

Right Ventricle

Receives deoxygenated blood from the right atrium

through the tricuspid valve, pumping into the pulmonary trunk via the pulmonary valve. Thinner walls (3-5 mm) than the left ventricle due to low pulmonary resistance.

Synonyms:

Rigor Mortis

Post-mortem stiffening of body muscles resulting from loss of ATP synthesis following death. Without ATP, actin and myosin filaments remain permanently cross-linked in a rigid state.

Synonyms:

Ring in the Ears

Perception of ringing, buzzing, hissing, or other sound without an external source, medically called tinnitus. It may be associated with hearing loss, loud-noise exposure, earwax, ear infection, medicines, or jaw disorders. Sudden hearing loss, one-sided symptoms, or pulsatile ringing requires medical evaluation.

Synonyms:

Ringworm

Dermatophytosis: superficial fungal infection of keratinized tissue (skin, hair, nails) by dermatophytes (*Trichophyton*, *Microsporum*, *Epidermophyton*). See Tinea.

Synonyms:

Rinne Test

The Rinne test is a screening test that compares air conduction and bone conduction hearing using a vibrating tuning fork (typically 512 Hz) to help differentiate between conductive and sensorineural hearing loss.

Synonyms:

RIPE Therapy

Standard 4-drug regimen for active TB: Rifampin, Isoniazid, Pyrazinamide, Ethambutol. Intensive phase 2 months, continuation phase 4 months (total 6 months). Pyridoxine prevents isoniazid-induced neuropathy.

Synonyms:

Rippling Muscle Disease

A rare, benign myopathy characterized by mechanically-induced muscle contractions that spread across the muscle as a visible wave (rippling), typically triggered by stretch, percussion, or movement.

Synonyms:

RIS

Radiology Information System. Workflow management for radiology department.

Synonyms:

Risk Assessment

Process: hazard identification, dose-response, exposure assessment, risk characterization. Used for regulatory decisions.

Synonyms:

Risk Factor

Attribute increasing probability of disease. Examples: smoking (lung cancer), hypertension (stroke), obesity (diabetes).

Synonyms:

Risk Factor Modification

Smoking cessation, blood pressure control, lipid management, diabetes control, exercise.

Synonyms:

Risk-Benefit Analysis

Weighing therapeutic benefit against potential harm.

Synonyms:

Ristocetin-Induced Platelet Aggregation

A platelet-function assay that evaluates platelet agglutination in the presence of ristocetin, which depends on von Willebrand factor and platelet glycoprotein Ib.

Synonyms:

Ritalin

A central nervous system stimulant, a piperidine

derivative that blocks the reuptake of dopamine and noradrenaline (norepinephrine) by inhibiting the dopamine transporter (DAT) and noradrenaline transporter (NAT) in the prefrontal cortex, increasing their synaptic concentrations. See Methylphenidate.

Synonyms:

River Blindness

Onchocerciasis, a parasitic infection caused by *Onchocerca volvulus* and transmitted by blackflies. It can cause severe itching, skin disease, and visual impairment.

Synonyms:

RNA

Ribonucleic acid, single-stranded nucleic acid (ribose sugar, uracil instead of thymine).

Synonyms:

Robot-Assisted Rehabilitation

Robotic devices for repetitive task training. Upper extremity, lower extremity, gait training. Objective measurement, high repetition.

Synonyms:

Romberg Test

The Romberg test is a clinical neurological test used to assess the integrity of the dorsal column-medial lemniscus pathway (proprioception) and the cerebellum in maintaining balance. The test is performed by asking the patient to stand with feet together and eyes open, and then to close the eyes.

Synonyms:

Romberg's sign

Increased unsteadiness when a person stands with the feet together and closes the eyes, suggesting impaired proprioception or vestibular function.

Synonyms:

Root Caries

Caries on exposed root surfaces. Common in elderly with recession. Fluoride effective.

Synonyms:

Root Fracture

Vertical or horizontal fracture of root. Prognosis depends on location and direction. Vertical root fractures typically require extraction.

Synonyms:

Rooting Reflex

A primitive reflex present from birth to 3-4 months, triggered by stroking the infant's cheek or corner of the mouth. The infant turns toward the stimulus and opens the mouth, searching for the nipple. Facilitates breastfeeding. Absence may indicate neurologic impairment. Disappears as voluntary feeding develops.

Synonyms:

Ropinirole

A non-ergot dopamine agonist (D2/D3) used for Parkinson disease and restless legs syndrome. Adverse effects: nausea, dizziness, somnolence (sudden sleep attacks), orthostatic hypotension, impulse control disorders (gambling, hypersexuality), hallucinations, and leg edema. Extended-release for once-daily Parkinson dosing.

Synonyms:

Rosacea

A chronic inflammatory disorder characterized by persistent or recurrent centrofacial erythema, flushing, telangiectasia, inflammatory papules or pustules, phymatous change, or ocular involvement. It is classified by phenotype rather than by obligatory subtypes.

Synonyms:

Roseola

A common childhood viral illness, usually caused by human herpesvirus 6, with several days of fever followed by a rash as the fever resolves.

Synonyms:

Roseola Infantum

A viral illness caused by Human Herpesvirus 6 (HHV-6), affecting children 6 months to 2 years. Characterized by high fever (39-40.5 degrees Cel-

sus) for 3-5 days followed by defervescence and appearance of a maculopapular rash starting on the trunk and spreading outward. Rash appears as fever resolves. Diagnosis is clinical.

Synonyms:

Rostral

Positioned toward the snout or front of the head; in the brain, it means toward the forehead.

Synonyms:

Rotator Cuff

A group of four muscles and their tendons that stabilize the glenohumeral (shoulder) joint and allow a wide range of motion. The muscles are the supraspinatus (abduction), infraspinatus (external rotation), teres minor (external rotation), and subscapularis (internal rotation)—collectively remembered by the acronym SITS.

Synonyms:

Rotator Cuff Arthropathy

Glenohumeral joint degeneration associated with chronic, irreparable rotator-cuff deficiency. Superior migration of the humeral head, altered joint mechanics, pain, and loss of elevation may lead to consideration of reverse shoulder arthroplasty.

Synonyms:

Rotavirus

A double-stranded RNA virus that is the leading cause of severe gastroenteritis in children worldwide. The virus has a segmented genome and infects enterocytes of the small intestine. Rotavirus causes profuse watery diarrhea, vomiting, and dehydration. Diagnosis is made by antigen detection in stool.

Synonyms:

Rotavirus Vaccine

An oral live attenuated vaccine that protects infants and young children against severe rotavirus gastroenteritis. The product, schedule, and age limits depend on the immunization program; mild fever or diarrhea may occur.

Synonyms:

Roth Spots

Retinal hemorrhages with pale centers, seen on fundoscopic examination in infective endocarditis. They are a minor criterion in the Duke criteria. Roth spots are caused by immune complex-mediated vasculitis of retinal vessels.

Synonyms:

Rothmund-Thomson Syndrome

A genetically heterogeneous disorder characterized by poikiloderma beginning in infancy, short stature, sparse hair, skeletal abnormalities, juvenile cataracts in some forms, and increased risk of osteosarcoma or other cancers.

Synonyms:

Rouleau

A stack or column of red blood cells, commonly seen in blood with increased plasma proteins.

Synonyms:

Round Pneumonia

Pneumonia appearing as a round opacity on CXR rather than typical consolidation. More common in children and elderly. May mimic lung mass.

Synonyms:

Roundworm

Ascariasis: infection by *Ascaris lumbricoides*, the most common human soil-transmitted helminth, acquired by ingesting eggs from contaminated food/soil.

Synonyms:

Route of Administration

The path by which a drug enters the body, influencing absorption, onset, bioavailability, and first-pass metabolism. Enteral routes: oral, sublingual, buccal, rectal. Parenteral: intravenous (100 percent bioavailability, immediate onset), intramuscular, subcutaneous, intradermal.

Synonyms:

Rovsing Sign

Physical exam sign of acute appendicitis: palpation

of the left lower quadrant elicits pain in the right lower quadrant due to displacement of gas stretching the inflamed appendix. See Appendicitis.

Synonyms:

RPR/VDRL (Syphilis Serology)

Nontreponemal blood tests used to screen for and monitor syphilis. Reactive results require interpretation with clinical findings and, usually, a treponemal confirmatory test.

Synonyms: Syphilis Serology

RSV

Respiratory syncytial virus, a contagious respiratory virus that can cause bronchiolitis and pneumonia, especially in infants and young children.

Synonyms:

Rubella

German measles caused by Rubivirus. Mild illness with fever, rash, and lymphadenopathy in children. Dangerous in pregnancy due to congenital rubella syndrome (cataracts, heart defects, deafness). Rash similar to measles but milder, with postauricular and suboccipital lymphadenopathy. Prevention by MMR vaccination.

Synonyms:

Rubella virus

A togavirus that causes rubella (German measles), a mild febrile illness with rash. The virus is transmitted by respiratory droplets. Rubella is most dangerous during pregnancy, causing congenital rubella syndrome (CRS) with deafness, cataracts, and cardiac defects. Diagnosis involves serology. Treatment is supportive.

Synonyms:

Rubin Maneuver

An internal rotational maneuver for shoulder dystocia: the operator inserts a hand and applies pressure to the posterior aspect of the anterior fetal shoulder, rotating it toward the fetal chest (adducting the shoulders). This reduces the bisacromial diameter and disimpacts the anterior shoulder from the pubic

symphysis.

Synonyms:

Rubinstein-Taybi Syndrome

A genetic developmental disorder associated with characteristic facial features, short stature, broad thumbs and toes, and intellectual disability. It is commonly caused by pathogenic variants in CREBBP or EP300.

Synonyms:

Rumination Disorder

Recurrent effortless regurgitation of recently ingested food, followed by rechewing, reswallowing, or spitting, without the retching typical of vomiting. It can cause weight loss, malnutrition, and dental complications.

Synonyms:

Running Total

The cumulative amount of a measured exposure, dose, or other quantity up to a specified time.

Synonyms:

Runny Nose

Excess nasal drainage, medically called rhinorrhea, caused by infection, allergy, irritation, or structural nasal disease. It may occur with congestion, sneezing, cough, or sore throat. Persistent one-sided, bloody, or clear drainage after head injury requires medical assessment.

Synonyms:

Ruptured Abdominal Aortic Aneurysm

A tear through an abdominal aortic aneurysm causing internal bleeding, shock, and usually sudden abdominal or back pain. It requires emergency repair.

Synonyms:

Russell-Silver Syndrome

A congenital growth disorder involving prenatal and postnatal growth restriction, relative macrocephaly, triangular face, body asymmetry, and feeding difficulty. It is often associated with abnormalities of

genomic imprinting on chromosomes 7 or 11.

Synonyms:

Rx

Prescription or treatment. Symbol derives from Latin "requirere" (to take). Also used as abbreviation for remedy. Rx symbol: Rx or %x;.

Synonyms:

Reverse Trendelenburg Position

A supine position in which the head and upper body are elevated above the feet.

Synonyms:

Rapid Gastric Emptying

Abnormally rapid movement of food from the stomach into the small intestine, sometimes called dumping syndrome.

Synonyms:

Rectal Cancer

Cancer that develops in the tissues of the rectum.

Synonyms:

Recurrent Breast Cancer

Breast cancer that returns after a period in which it was undetectable.

Synonyms:

Residual Limb Pain

Pain in the remaining portion of a limb after amputation.

Synonyms:

Retinal Diseases

Disorders that damage the retina, the light-sensitive tissue at the back of the eye.

Synonyms:

Reye's Syndrome

A rare condition causing sudden brain and liver dysfunction, most often in children recovering from a viral infection.

Synonyms:

Ringworm of the Body

A contagious fungal infection causing an itchy, ring-shaped rash on the skin.

Synonyms:

Ringworm of the Scalp

A fungal infection of the scalp and hair that can cause scaling, broken hairs, and hair loss.

Synonyms:

Rotator Cuff Injury

Damage to one or more tendons or muscles that stabilize and move the shoulder.

Synonyms:

Rales

Crackling or bubbling sounds heard in the lungs, often caused by fluid or narrowed airways.

Synonyms:

Retinitis

Inflammation of the retina that may impair vision.

Synonyms:

Romberg Sign

Loss of balance when standing with the feet together and the eyes closed, suggesting impaired proprioception or vestibular function.

Synonyms:

Rule of Nines

A method for estimating the percentage of body-surface area affected by burns.

Synonyms:

Rongeur

A strong, jawed surgical instrument used to bite and remove small pieces of bone or other hard tissue.

Synonyms:

Rabies Virus

The virus that causes rabies, a usually fatal viral infection of the central nervous system transmitted most often through the saliva of an infected animal.

Synonyms:

Radioactive Iodine Uptake Test

A nuclear medicine test that measures how much radioactive iodine the thyroid gland absorbs. It helps evaluate hyperthyroidism and some thyroid disorders.

Synonyms:

Radiography

Medical imaging that uses X-rays to create two-dimensional images of internal structures, especially bones and the chest.

Synonyms:

Radiology

The medical specialty that uses imaging to diagnose and sometimes treat disease.

Synonyms:

Radioisotope (Radionuclide)

An unstable isotope that emits radiation as it decays; radioisotopes are used in medical imaging, diagnosis, and selected treatments.

Synonyms: Radionuclide

Rale (Rhonchus)

An abnormal sound heard through a stethoscope during breathing, caused by air moving through fluid, mucus, narrowed airways, or abnormal lung tissue.

Synonyms: Rhonchus

Respiratory Arrest

Complete cessation of breathing, resulting in rapid loss of oxygen and requiring immediate resuscitation.

Synonyms:

Renal Dialysis

A treatment that removes waste products and excess fluid from the blood when the kidneys cannot do so adequately, using haemodialysis or peritoneal dialysis.

Synonyms:

Retinol (Vitamin A)

A fat-soluble vitamin required for vision, epithelial health, immune function, and normal growth; deficiency may cause night blindness and xerophthalmia.

Synonyms: Vitamin A

Revascularisation

Restoration of blood flow to an organ or limb by a procedure such as angioplasty, stenting, or surgical bypass.

Synonyms:

Root Canal Therapy

Dental treatment in which infected or inflamed pulp is removed from a tooth, the canal is cleaned and sealed, and the tooth is restored.

Synonyms:

Roth's Spots

Small retinal haemorrhages with pale centres, associated with conditions such as infective endocarditis, severe anaemia, leukaemia, and diabetes.

Synonyms:

Radionuclide

An unstable atom that emits radiation as it decays. Radionuclides are used in diagnostic imaging and some treatments.

Synonyms:

Radionuclide Heart Scan

A nuclear medicine study that uses a radioactive tracer to evaluate myocardial blood flow, heart muscle viability, or ventricular function.

Synonyms:

Rasp

A roughened surgical instrument used to file, shape, or smooth bone or other hard tissue.

Synonyms:

Red Blood Cells

Blood cells that contain hemoglobin and transport oxygen from the lungs to tissues while carrying some carbon dioxide back to the lungs.

Synonyms:

Reed-Sternberg Cells

Large abnormal cells derived from B lymphocytes and characteristic of classic Hodgkin lymphoma.

Synonyms:

Reflexes

Automatic, rapid responses to stimuli mediated through neural pathways called reflex arcs.

Synonyms:

Renal Corpuscle

The filtration unit at the beginning of a nephron, consisting of the glomerulus enclosed by Bowman capsule.

Synonyms:

Renal Pyramids

Cone-shaped structures in the renal medulla that contain tubules and collecting ducts and drain urine toward the renal papillae.

Synonyms:

Renin

An enzyme released mainly by juxtaglomerular cells of the kidney. It initiates the renin-angiotensin-aldosterone system and helps regulate blood pressure and fluid balance.

Synonyms:

Repetitive Strain Injury

Pain or dysfunction caused by repeated forceful movements, sustained positions, or overuse of muscles, tendons, nerves, or other tissues.

Synonyms:

Resection

Surgical removal of part or all of an organ, tissue, or lesion.

Synonyms:

Resectoscope

An endoscopic surgical instrument with a viewing system and working loop used to remove or cauterize tissue, especially during prostate or bladder procedures.

Synonyms:

Resorption

The removal and absorption of tissue, especially the breakdown of bone by osteoclasts.

Synonyms:

Respiration

The process of exchanging oxygen and carbon dioxide between an organism and its environment, including ventilation and gas exchange in the lungs.

Synonyms:

Reticular Activating System

A network involving the brainstem reticular formation and related structures that helps regulate wakefulness, alertness, attention, and sleep-wake transitions.

Synonyms:

Retinoscope

An instrument that shines light into the eye to help determine refractive error.

Synonyms:

Rheumatology

The medical specialty concerned with musculoskeletal disorders and systemic autoimmune and inflammatory diseases.

Synonyms:

Rh Incompatibility

An immune reaction that can occur when an Rh-negative pregnant person carries an Rh-positive fetus and forms antibodies against fetal red blood cells. Anti-D immune globulin can prevent sensitization.

Synonyms:

Ribonucleic Acid

A nucleic acid involved in carrying, translating, and regulating genetic information, especially during protein synthesis.

Synonyms:

Rift Valley Fever

A mosquito-borne viral disease that usually causes fever and muscle pain but can occasionally cause hepatitis, eye disease, encephalitis, or hemorrhage.

Synonyms:

Rods

Retinal photoreceptor cells that provide vision in dim light and contribute to peripheral vision but do not detect color.

Synonyms:

Rubeola

Measles, a highly contagious viral illness caused by measles virus and characterized by fever, cough, conjunctivitis, and a widespread maculopapular rash.

Synonyms:

Radius Fracture

A break in the radius, one of the two bones of the forearm, often occurring near the wrist after a fall onto an outstretched hand.

Synonyms:

Rotator Cuff Tear

A partial or complete tear of one or more tendons stabilizing the shoulder, causing pain, weakness, and difficulty raising or rotating the arm.

Synonyms:

Radial Nerve Palsy

Dysfunction of the radial nerve causing weakness of wrist and finger extension, often producing wrist drop, with sensory loss over part of the back of the hand in some cases.

Synonyms:

Radiation Proctitis

Inflammation and injury of the rectum after pelvic radiation therapy, causing rectal pain, urgency, diarrhea, mucus, or bleeding.

Synonyms:

Rhinorrhea

Excessive watery or mucoid discharge from the nose, commonly caused by infection, allergy, irritants, or changes in temperature.

Synonyms:

Rib Fracture

A break in one or more ribs, usually causing localized chest pain worsened by breathing, coughing, or movement and sometimes associated with injury to underlying organs.

Synonyms:

Rocky Mountain Spotted Fever

A potentially severe tick-borne infection caused by *Rickettsia rickettsii*, often producing fever, headache, and a rash that may involve the palms and soles.

Synonyms:

Retrograde Amnesia

Loss of memory for events that occurred before an injury, illness, or other triggering event, with variable preservation of more remote memories.

Synonyms:

S

16S Ribosomal RNA Sequencing

Molecular identification of bacteria and archaea using conserved and variable regions of the 16S ribosomal RNA gene. It is useful for difficult-to-culture organisms but may not distinguish closely related species or provide susceptibility data.

Synonyms:

SAD

Seasonal affective disorder, a recurring mood disorder linked to seasonal changes and reduced daylight.

Synonyms: Seasonal affective disorder

Saline

A sterile water solution containing sodium chloride, commonly used for fluids, irrigation, or drug delivery.

Synonyms: Normal saline

Sarcolemma

The specialized cell membrane surrounding a muscle fiber. **Synonyms:**

Satisficer

A person who chooses an option that meets acceptable criteria without seeking the absolute best option. **Synonyms:**

Sausage Digit

Diffuse swelling of an entire finger or toe, often seen with inflammatory arthritis. **Synonyms:** Dactylitis

Scapulothoracic Joint

The functional gliding connection between the scapula and the back of the chest wall. **Synonyms:**

Schlemm's Canal

A circular channel that drains aqueous humor from the eye. **Synonyms:** Canal of Schlemm

Scintillations

Perceived flashes or zigzag lines, often occurring during a migraine aura. **Synonyms:**

Secondary Osteoporosis

Bone loss caused by another illness, medication, or prolonged immobility. **Synonyms:**

Sed Rate

A blood test measuring how quickly red blood cells settle, used as a nonspecific marker of inflammation.

Synonyms: Erythrocyte sedimentation rate; ESR

Selective Estrogen Receptor Modulators

Medicines that activate estrogen receptors in some tissues and block them in others. **Synonyms:** SERMs

Selective Serotonin Reuptake Inhibitors

Antidepressants that increase serotonin signaling by reducing its reuptake into nerve cells. **Synonyms:** SSRIs

Self-Help Group

A peer group in which members support one another while changing a harmful behavior or coping with a problem. **Synonyms:** Support group

Seminal Vesicles

Glands behind the bladder that produce much of the fluid in semen. **Synonyms:**

Senescence

Gradual biological decline associated with aging. **Synonyms:** Biological aging

Senile Dementia

An outdated term formerly used for dementia in older adults. **Synonyms:** Dementia

Sensate Focus Techniques

Structured touch exercises used in sex therapy to reduce performance pressure and improve intimacy. **Synonyms:** Sensate focus

SERMs

Selective estrogen receptor modulators that have estrogen-like effects in some tissues and blocking effects in others. **Synonyms:** Selective estrogen receptor modulators

Seroma

A pocket of clear fluid that develops near a surgical incision or injured tissue. **Synonyms:**

Serotonin

A neurotransmitter involved in mood, sleep, appetite, and pain regulation. **Synonyms:** 5-hydroxytryptamine; 5-HT

Sesamoiditis

Inflammation and pain around a small sesamoid bone, often beneath the big toe. **Synonyms:**

Set

A group of consecutive repetitions of an exercise. **Synonyms:**

Short-Term Memory

The temporary storage and use of information over seconds to minutes. **Synonyms:** Working memory

Sigmoidoscopy

Examination of the rectum and sigmoid colon with a flexible viewing instrument. **Synonyms:**

Signature Strengths

Personal character strengths that a person values and naturally uses. **Synonyms:**

Silent Heart Attack

A myocardial infarction without recognized pain or typical warning symptoms. **Synonyms:** Unrecognized myocardial infarction

Silent Ischemia

Inadequate blood flow to heart muscle without noticeable symptoms. **Synonyms:** Asymptomatic ischemia

Single-Photon Absorptiometry

An older technique using gamma rays to measure bone density, usually in an arm or peripheral bone. **Synonyms:** SPA

Sinus Node

The heart's natural pacemaker, located in the right atrium. **Synonyms:** Sinoatrial node

Skeletal Muscles

Muscles attached to bones that produce voluntary movement. **Synonyms:** Voluntary muscles

Skin Resurfacing

Procedures that improve skin texture or pigmentation by removing or remodeling superficial skin layers. **Synonyms:**

Sleep Architecture

The pattern and organization of sleep stages across a sleep period. **Synonyms:**

Sleep Spindles

Brief bursts of rhythmic brain activity during stage 2 non-REM sleep. **Synonyms:**

Sling

A supportive device or surgically placed strip used to support an injured limb or urinary structures. **Synonyms:**

Slipped Disk

A spinal disk that bulges or herniates through a tear in its outer layer. **Synonyms:** Herniated disk

Slipped Vertebra

Forward displacement of one vertebra relative to the one below it. **Synonyms:** Spondylolisthesis

Slit Lamp

An instrument using magnification and a narrow beam of light to examine the eye. **Synonyms:** Biomicroscope

Slow-Twitch Fiber

A muscle fiber adapted for sustained, aerobic activity and fatigue resistance. **Synonyms:** Type I muscle fiber

Slow-Wave Sleep

Deep non-REM sleep characterized by slow brain waves and reduced responsiveness. **Synonyms:** Deep sleep

SMART

A goal-setting framework emphasizing specific, measurable, achievable, realistic, and time-bound goals. **Synonyms:** SMART goals

Somatization

Expression of psychological distress through physical symptoms. **Synonyms:**

Somniloquy

Talking during sleep. **Synonyms:** Sleep talking

Sorbitol

A sugar alcohol used as a sweetener and, in larger amounts, as an osmotic laxative. **Synonyms:**

Spacer

A chamber used with a metered-dose inhaler to improve delivery of medicine to the lungs. **Synonyms:** Valved holding chamber

Sphincter

A ring-shaped muscle that regulates an opening by contracting and relaxing. **Synonyms:**

Spinal Tap

A procedure that withdraws cerebrospinal fluid from the lower spinal canal for testing. **Synonyms:** Lumbar puncture

Spinous Process

The posterior bony projection of a vertebra to which muscles and ligaments attach. **Synonyms:**

Splenic Flexure Syndrome

Left-upper-abdominal pain caused by gas trapped at the bend between the transverse and descending colon. **Synonyms:**

Spongy Bone

Porous trabecular bone found inside many bones, especially near joints. **Synonyms:** Cancellous bone; trabecular bone

Squamous Cell

A thin, flat epithelial cell. **Synonyms:**

Stable Angina

Predictable exertional chest pain caused by temporary inadequate coronary blood flow. **Synonyms:** Chronic stable angina

Stable Coronary Artery Disease

Coronary artery narrowing causing a consistent, predictable pattern of angina. **Synonyms:** Stable ischemic heart disease

Stages of Change

A model describing gradual phases people pass through while changing behavior. **Synonyms:** Transtheoretical model

Standardized Extract

An herbal extract adjusted to contain a specified amount of a selected constituent. **Synonyms:**

Statins

Cholesterol-lowering medicines that inhibit HMG-CoA reductase. **Synonyms:** HMG-CoA reductase inhibitors

Steroids

Hormone-like medicines or compounds with a four-ring chemical structure; corticosteroids are used to reduce inflammation. **Synonyms:** Corticosteroids

Stimulant

A substance that increases activity of the central nervous system or other body systems. **Synonyms:**

Stratum Corneum

The outermost layer of the epidermis, composed mainly of dead keratinized cells. **Synonyms:**

Strength

The ability of a muscle or muscle group to exert force. **Synonyms:**

Strength Training

Exercise using resistance to increase muscle strength and capacity. **Synonyms:** Resistance training; weight training

Stress Response

Physiological changes that prepare the body to respond to a perceived threat. **Synonyms:** Fight-or-flight response

Stressors

Events, conditions, or circumstances that trigger a stress response. **Synonyms:**

Stria

A line, streak, or band in tissue, such as a stretch mark. **Synonyms:** Striae

Stricture

Abnormal narrowing of a hollow body passage. **Synonyms:**

Subarachnoid Space

The space between the arachnoid and pia mater containing cerebrospinal fluid. **Synonyms:**

Subcutaneous

Located or administered beneath the skin. **Synonyms:** Subcuticular

Subendocardial Myocytes

Heart-muscle cells in the inner layer of the myocardium, which are especially vulnerable to reduced blood flow. **Synonyms:**

S3 Gallop Pathology

A third heart sound produced during rapid ventricular filling. In some adults it may indicate volume overload or ventricular dysfunction, although it can be physiologic in children, young adults, and pregnancy. Its significance depends on the complete clinical assessment.

Synonyms:

S4 Gallop Pathology

A fourth heart sound indicates atrial contraction against a stiff ventricle (decreased compliance). Associated with left ventricular hypertrophy from hypertension, aortic stenosis, and hypertrophic cardiomyopathy. S4 is best heard at the apex with the bell, and is accentuated by exertion, expiration, and isorhythmic AV dissociation.

Synonyms:

Sacral Nerve Stimulation

Neuromodulation for urinary/fecal incontinence, constipation. Sacral nerve root (S3) stimulation. Implantable pulse generator + electrode. Indications: refractory urge incontinence, fecal incontinence, non-obstructive urinary retention.

Synonyms:

Sacral Nerve Stimulator

An implanted device that delivers electrical stimulation to sacral nerves to alter bladder, bowel, or pelvic-floor function in selected patients.

Synonyms:

Sacral Vertebrae

Five vertebrae fused to form the sacrum. They transmit body weight from the vertebral column to the pelvic girdle and contain anterior and posterior sacral foramina for spinal nerves.

Synonyms:

Sacroiliac Joint

The synovial joint between the sacrum and the ilium (auricular surfaces), forming the connection between the axial skeleton and the pelvis. The sacroiliac joint is reinforced by strong ligaments (anterior, interosseous, and posterior sacroiliac ligaments, sacrotuberous and sacrospinous ligaments).

Synonyms:

Sacroiliitis

Inflammation of one or both sacroiliac joints, causing pain in the lower back, buttock, or posterior thigh that may worsen with prolonged rest. Causes include axial spondyloarthritis, psoriatic or enteropathic arthritis, infection, trauma, and degenerative disease.

Synonyms:

Sacrum

Large triangular bone from 5 fused sacral vertebrae between the hip bones. Articulates with L5 superiorly and coccyx inferiorly. The sacral promontory is an obstetric landmark. Contains 4 pairs of sacral foramina. Forms the posterior pelvic wall. Sacroiliac joints are important for force transmission between spine and lower limbs.

Synonyms:

Safety Plan

A collaboratively written, practical plan for responding to escalating suicidal thoughts or emotional crisis. It identifies warning signs, internal coping strategies, supportive contacts, professional resources, and methods to restrict access to lethal means.

Synonyms:

Sagittal Plane

A vertical plane that divides the body or an organ

into right and left sides.

Synonyms:

Salbutamol (Albuterol)

A selective beta-2 adrenergic agonist bronchodilator used for acute relief and prevention of bronchospasm in asthma and COPD. Relaxes airway smooth muscle; short-acting (SABA), onset 5-15 minutes, duration 4-6 hours via inhaler or nebulizer. Adverse effects: tremor, tachycardia, palpitations, hypokalemia, and headache.

Synonyms: Albuterol

Salicylate

A group of compounds that includes aspirin and has analgesic, antipyretic, and anti-inflammatory effects.

Synonyms:

Salicylate Toxicity

Poisoning caused by excessive aspirin or another salicylate, potentially producing vomiting, ringing in the ears, fever, abnormal breathing, confusion, and acid-base disturbances.

Synonyms:

Saline Infusion Sonohysterography

Ultrasound evaluation of uterus using saline contrast. Evaluates intrauterine pathology.

Synonyms:

Saliva

Secretion of salivary glands (1-1.5 L/day). Functions: lubrication, digestion (amylase), buffering, antimicrobial, remineralization. Xerostomia (dry mouth) increases caries risk. Causes: medications, Sjogren syndrome, radiation, dehydration.

Synonyms:

Salivary Gland

Any exocrine gland that secretes saliva into the oral cavity. The major paired glands are the parotid, submandibular, and sublingual glands; numerous minor glands occur throughout the oral mucosa.

Synonyms:

Salivary Gland Cancer

A rare malignancy most often arising in the parotid gland. Histologic types include mucoepidermoid carcinoma, adenoid cystic carcinoma, and acinic cell carcinoma; facial nerve preservation is a key surgical consideration.

Synonyms:

Salivary Gland Infection

Infection of a salivary gland, usually bacterial and often involving the parotid or submandibular gland. Painful swelling, fever, dry mouth, and purulent drainage from the duct may occur.

Synonyms:

Salivary Gland Scintigraphy

Salivary gland function assessment using Tc-99m pertechnetate. Used for Sjogren syndrome, obstruction, radiation sialadenitis.

Synonyms:

Salivary Gland Tumors

Tumors arising in the salivary glands. Many are benign, especially in the parotid gland; pleomorphic adenoma is a common benign type. Malignant types include mucoepidermoid, adenoid cystic, and acinic cell carcinoma.

Synonyms:

Salivation

The secretion of saliva by the salivary glands.

Synonyms:

Salmonella

A genus of Gram-negative, facultatively anaerobic, rod-shaped bacteria in the Enterobacteriaceae family. It includes non-typhoidal strains that cause gastroenteritis and typhoidal strains that can cause enteric fever.

Synonyms:

Salmonellosis

Infection with Salmonella bacteria (non-typhoidal), typically acquired from contaminated food (eggs, poultry, meat). Presents with acute gastroenteritis:

diarrhea, fever, and abdominal cramps within 6-72 hours of ingestion. Self-limited in immunocompetent patients. Bacteremia can occur, especially in immunocompromised.

Synonyms:

Salpingectomy

Surgical removal of a fallopian tube. It may be used to treat a tubal ectopic pregnancy, hydrosalpinx, or other tubal disease. The approach and whether the tube is removed depend on the clinical condition, fertility plans, and the state of the opposite tube.

Synonyms:

Salpingitis

Inflammation of the fallopian tubes, most commonly caused by ascending infection from the lower genital tract. Salpingitis is a component of pelvic inflammatory disease and is often bilateral.

Synonyms:

Salpingo-oophorectomy

Surgical removal of one or both fallopian tubes and ovaries. Bilateral salpingo-oophorectomy treats and stages ovarian cancer and is used as risk-reducing surgery in BRCA mutation carriers.

Synonyms:

Salpingography

Contrast imaging of fallopian tubes. Part of hysterosalpingography.

Synonyms:

Salpingostomy (Salpingotomy)

A fertility-preserving surgical procedure for tubal ectopic pregnancy: a linear incision on the antimesenteric border of the fallopian tube to remove the ectopic gestation, leaving the tube in situ. Indications: unruptured ectopic, desire for future fertility, contralateral tubal damage or absence.

Synonyms: Salpingotomy

Saltatory Conduction

The rapid propagation of action potentials along myelinated nerve fibers, where the action potential

appears to "jump" from one Node of Ranvier to the next. Myelin (produced by Schwann cells in the PNS and oligodendrocytes in the CNS) insulates the axon, preventing ion flow across the internodal membrane.

Synonyms:

Salvage Therapy

Treatment given for cancer that has not responded to, or has returned after, an earlier course of treatment.

Synonyms:

Sandhoff Disease

An autosomal-recessive lysosomal storage disorder caused by deficiency of beta-hexosaminidase A and B, leading to accumulation of GM2 ganglioside. It causes progressive neurodegeneration, developmental regression, seizures, hypotonia, and sometimes organ enlargement.

Synonyms:

Sandpaper Tooth

Rough enamel surface retains plaque. May indicate early demineralization or fluorosis.

Synonyms:

Saphenous Vein

A superficial vein of the lower limb that drains the foot and leg. The great and small saphenous veins are clinically important in venous disease and may be used as graft material in selected vascular or cardiac bypass procedures.

Synonyms:

SAPHO Syndrome

A rare inflammatory disorder involving synovitis, acne, pustulosis, hyperostosis, and osteitis. It commonly affects the anterior chest wall, spine, or jaw and may resemble infection or malignancy. Diagnosis is clinical and treatment may include anti-inflammatory or specialist immunomodulatory therapy.

Synonyms:

Sarcoidosis

A multisystem inflammatory disorder of uncertain cause characterized by noncaseating granulomas. It commonly affects the lungs and lymph nodes but may involve the skin, eyes, heart, nervous system, or other organs.

Synonyms:

Sarcoidosis Skin Manifestations

Cutaneous sarcoidosis affects 25 percent of patients with systemic sarcoidosis.

Synonyms:

Sarcoma

A malignant tumor arising from connective or supporting tissues, including bone, cartilage, fat, muscle, and blood vessels. Examples include osteosarcoma, liposarcoma, and rhabdomyosarcoma.

Synonyms:

Sarcopenia

Age-related loss of muscle mass and function. Prevalence increases with age. Risk factors: reduced protein intake, decreased physical activity, chronic disease. Assessment: grip strength, gait speed, muscle mass measurement. Treatment: protein supplementation, resistance exercise, vitamin D, hormonal therapy if deficient.

Synonyms:

Sarcopenic Obesity

The coexistence of excess adiposity with reduced skeletal-muscle mass, strength, or physical performance. It increases risks of disability, falls, metabolic disease, and poor surgical outcomes and requires assessment beyond body-mass index alone.

Synonyms:

Sarcoptes scabiei

A mite that causes scabies, a contagious skin infestation transmitted by prolonged skin-to-skin contact. The female mite burrows into the stratum corneum, laying eggs along the burrow, which appears as a greyish, serpiginous line. The life cycle from egg to adult takes approximately 10-14 days.

Synonyms:

SARS-CoV-2

A coronavirus belonging to the Coronaviridae family that causes COVID-19. SARS-CoV-2 has a positive-sense single-stranded RNA genome and a spike glycoprotein that mediates attachment to ACE2 receptors. The virus replicates in the cytoplasm using its own RNA-dependent RNA polymerase.

Synonyms:

Satiety

Feeling of fullness after eating. Affected by meal composition, volume, fiber, protein. Satiety hormones: CCK, PYY, GLP-1.

Synonyms:

Saturated Fat

Solid at room temperature. Sources: meat, dairy, coconut oil, palm oil. Controversial cardiovascular effects. Current guidelines limit intake.

Synonyms:

Saturation

Occupancy of available binding, metabolic, transport, or elimination capacity such that further increases in concentration or dose produce a nonlinear response. Saturable metabolism can cause disproportionate rises in plasma concentration and toxicity.

Synonyms:

Scabies

A highly contagious, intensely pruritic parasitic infestation of the skin caused by the mite *Sarcoptes scabiei* var. *hominis*. The hallmark symptom is severe, generalized pruritus that characteristically worsens at night, driven by a hypersensitivity reaction to the mite's proteins, eggs, and feces.

Synonyms:

Scaffold

Three-dimensional structure for tissue engineering. Porous, biodegradable. Cells populate scaffold.

Synonyms:

Scaling and Root Planing

Nonsurgical periodontal instrumentation that removes supra- and subgingival deposits and smooths contaminated root surfaces. It reduces inflammation and pocket depth in appropriate patients but does not regenerate lost periodontal attachment by itself.

Synonyms:

Scalp Psoriasis

Psoriasis affecting the scalp, causing sharply demarcated red plaques covered by silvery scale that may extend beyond the hairline. It can itch, crack, or bleed and is not contagious. Treatment may include medicated shampoos, topical corticosteroids, vitamin-D analogues, or systemic therapy for extensive disease.

Synonyms:

Scalpel

Surgical knife with interchangeable blades. Blade numbers indicate size and shape. #10: common for incisions. #11: puncture. #15: precise work.

Synonyms:

Scalpel Handle

Handle for holding scalpel blades. #3 handle common.

Synonyms:

Scaphoid

Largest proximal carpal row bone on the radial wrist side. Most commonly fractured carpal bone from falls on an outstretched hand. Unique distal blood supply makes waist fractures prone to proximal fragment avascular necrosis. Anatomical snuffbox tenderness is characteristic.

Synonyms:

Scaphoid Fractures

Scaphoid fractures: most common carpal fracture (young males, FOOSH). Classification: Herbert: A (incomplete), B (complete: B1 distal waist, B2 proximal waist, B3 proximal pole, B4 distal tubercle, B5 transverse). Vascularity: retrograde from distal

radius -> proximal pole at risk for AVN.

Synonyms:

Scapula

Flat triangular bone on the posterior thorax between ribs 2-7. Key features: acromion, coracoid process, glenoid cavity, spine, supraspinous/infraspinous fossae. Stabilized by 17 muscles and serves as rotator cuff attachment. Has 3 borders, 3 angles, and 2 surfaces. Fractures are uncommon, usually from high-energy trauma.

Synonyms:

Scar Management

Measures used to reduce symptoms and abnormal scar formation. Options include silicone products, pressure therapy, massage, corticosteroid injections, or other specialist treatments, depending on the scar and its cause.

Synonyms:

Scarlatina

Scarlet fever, an illness caused by toxin-producing group A Streptococcus and characterized by sore throat, fever, and a fine rough-textured rash.

Synonyms:

Scarlet Fever

A toxin-mediated illness caused by Group A Streptococcus producing erythrogenic toxin. Presents with fever, pharyngitis, and a characteristic diffuse, erythematous, sandpaper-textured rash that blanches with pressure. Circumoral pallor, Pastia lines (linear petechiae in skin folds), and strawberry tongue are classic findings.

Synonyms:

Scarring Alopecia

Permanent hair loss caused by destruction and fibrosis of the hair follicle. Causes include lichen planopilaris, discoid lupus, central centrifugal cicatricial alopecia, folliculitis decalvans, and severe infection; early diagnosis and biopsy can prevent progression.

Synonyms:

Scatter Correction

Correction for scattered photons. Dual energy window method.

Synonyms:

Scatter Events

Photons deflected from original path. Corrected by energy windowing and scatter correction algorithms.

Synonyms:

Scavenging System

The anesthesia gas scavenging system collects and removes waste anesthetic gases from the operating room environment to protect staff from chronic exposure. Active scavenging uses negative pressure from vacuum source; passive scavenging vents to exhaust through gravity.

Synonyms:

Schatzki Ring

Thin circumferential mucosal ring located at the squamocolumnar junction of the distal esophagus at the superior margin of a hiatal hernia. The ring is composed of mucosa and submucosa. May be asymptomatic or cause episodic dysphagia particularly to solid food and acute food bolus impaction.

Synonyms:

Schedule I

A United States controlled-substance category for drugs with high misuse potential and no accepted medical use under federal law.

Synonyms:

Schedule II

A United States controlled-substance category for drugs with accepted medical uses but high misuse potential.

Synonyms:

Schedule III

A United States controlled-substance category for drugs with lower misuse potential than Schedule II drugs.

Synonyms:

Schedule IV

A United States controlled-substance category for drugs with accepted medical uses and lower misuse potential than Schedule III drugs.

Synonyms:

Schedule V

A United States controlled-substance category for drugs with the lowest level of misuse potential among the federal schedules.

Synonyms:

Schilling Test

A historical test of vitamin B12 absorption, formerly used to investigate pernicious anaemia and intestinal malabsorption. It has largely been replaced by serum vitamin B12, methylmalonic acid, homocysteine, and intrinsic-factor antibody testing.

Synonyms:

Schistocytes

Fragmented, helmet-shaped, or triangular red blood cells produced by mechanical shearing as erythrocytes pass through obstructed or fibrin-laden microvessels.

Synonyms:

Schistosoma haematobium

A parasitic blood fluke that can cause urinary schistosomiasis, including hematuria and chronic injury of the urinary tract.

Synonyms:

Schistosomiasis

A parasitic disease, also called bilharzia, caused by blood flukes of the genus *Schistosoma*. Infection occurs when cercariae in contaminated freshwater penetrate the skin.

Synonyms: bilharzia, caused by blood flukes of the genus.

Schizencephaly

A rare brain malformation characterized by a full-thickness, gray matter-lined cleft extending from the pial surface to the lateral ventricle. Caused

by early focal neuronal migration abnormalities, often associated with prenatal vascular disruption or COL4A1 mutations. Closed-lip (Type I): the cleft walls are apposed.

Synonyms:

Schizoaffective Disorder

A disorder characterized by an uninterrupted period of illness during which there is a major mood episode concurrent with criterion A of schizophrenia (delusions, hallucinations, disorganized speech, grossly disorganized or catatonic behavior, or negative symptoms).

Synonyms:

Schizoid Personality Disorder

A pattern of detachment from social relationships with a restricted range of emotional expression.

Synonyms:

Schizophrenia

A severe chronic mental illness characterized by psychotic symptoms (hallucinations, delusions, disorganized thinking) and negative symptoms (avolition, alogia, anhedonia, blunted affect), with cognitive impairment and functional decline. Diagnosis: at least two core symptoms for ≥ 1 month with continuous signs for ≥ 6 months.

Synonyms:

Schizotypal Personality Disorder

A pattern of social and interpersonal deficits marked by acute discomfort with and reduced capacity for close relationships, cognitive or perceptual distortions, and eccentricities of behavior.

Synonyms:

Schnitzler Syndrome

A rare autoinflammatory syndrome characterized by chronic urticarial rash, intermittent fever, bone pain, arthralgia or arthritis, and elevated inflammatory markers, usually with a monoclonal IgM protein and less commonly IgG.

Synonyms:

School-Based Rehabilitation

Therapy and other support services provided in a school setting to help a child participate in education and daily school activities.

Synonyms:

Schwannoma

A benign peripheral nerve sheath tumor arising from Schwann cells. It presents as a solitary, slow-growing, painless nodule along a peripheral nerve course. It can be moved laterally but not longitudinally along the nerve. Vestibular schwannoma (acoustic neuroma) arises from CN VIII. Diagnosis is by MRI.

Synonyms:

Sciatic Nerve

Body's largest nerve (L4-S3), formed from the lumbosacral plexus, exiting via the greater sciatic foramen below the piriformis. Descends in the posterior thigh, dividing into tibial and common peroneal nerves at the popliteal fossa. Innervates hamstrings and provides lower leg/foot motor/sensory innervation via its branches.

Synonyms:

Sciatica

Pain radiating along the distribution of the sciatic nerve (L4-S3), from the lower back through the buttock and down the posterior thigh to the foot. Most commonly caused by lumbar disc herniation compressing the nerve root (L4-L5 or L5-S1). Other causes: spinal stenosis, spondylolisthesis, piriformis syndrome, and epidural abscess.

Synonyms:

Scimitar Syndrome

A congenital cardiopulmonary anomaly involving partial or total anomalous pulmonary venous return from the right lung to the inferior vena cava, often with right-lung hypoplasia and dextroposition of the heart. It may cause recurrent respiratory infection, pulmonary hypertension, or heart failure.

Synonyms:

Scintillation

The emission of light by a material after it absorbs ionizing radiation. Scintillation detectors use this light to measure radiation.

Synonyms:

Scintillation Crystal

Sodium iodide doped with thallium (NaI:Tl) crystal converts gamma rays to light photons. Coupled to photomultiplier tubes.

Synonyms:

Scissors

Cutting instruments. Types: Mayo (tissue), Metzenbaum (delicate), suture.

Synonyms:

Scissors (Surgical)

Cutting instruments used to divide tissue, sutures, dressings, or other materials during medical procedures.

Synonyms: Surgical

Scissors (Vascular)

A surgical instrument with two blades used to cut tissue, sutures, dressings, or other materials during vascular procedures.

Synonyms: Vascular

Sclera

Dense fibrous opaque outer eye coat providing structural integrity and extraocular muscle attachment. White, covering approximately five-sixths of the globe. Continuous with cornea anteriorly (limbus) and dura mater posteriorly through the optic nerve sheath. May appear yellowish in elderly or with jaundice (icterus).

Synonyms:

Scleral Buckling

A retinal-detachment repair procedure in which a silicone band or buckle is placed around the outside of the eye to support the retinal break and reduce traction.

Synonyms:

Scleritis

Painful, deep inflammation of the white outer coat of the eye. It may cause redness, light sensitivity, blurred vision, and tenderness and can be associated with autoimmune disease; vision changes or severe eye pain require urgent ophthalmic assessment.

Synonyms:

Scleroderma

An autoimmune connective-tissue disease that can cause fibrosis of the skin and internal organs. See Systemic Sclerosis.

Synonyms:

Scleromyxedema

A rare, chronic, progressive mucinosis characterised by generalised papular and sclerodermoid thickening of the skin with firm, waxy papules in a "peau d'orange" pattern, most prominently on the face, neck, and hands.

Synonyms:

Sclerosing sialadenitis

A chronic fibrosing inflammation of the salivary glands characterized by progressive glandular enlargement and firmness, sometimes associated with IgG4-related disease.

Synonyms:

Sclerosteosis

A rare inherited sclerosing bone dysplasia characterized by progressive thickening of the skull and long bones, tall stature or syndactyly in some forms, and possible cranial-nerve compression. Hearing loss, facial palsy, headache, and raised intracranial pressure may occur.

Synonyms:

Scoliosis

A lateral and rotational curvature of the spine, diagnosed by measuring the Cobb angle on standing radiographs. It may be idiopathic, congenital, or associated with neuromuscular disease.

Synonyms:

Scotoma

A focal area of diminished or absent vision within an otherwise intact visual field, classified by location and morphology.

Synonyms:

Screening

Testing people without symptoms to identify a disease or an increased risk of disease. The appropriate test, age range, interval, and follow-up depend on the condition, individual risk, and current guidance; screening benefits must be balanced against harms.

Synonyms:

Screening (Geriatric)

Detection of disease in asymptomatic elderly. Balance benefits vs. harms, life expectancy, preferences. Examples: bone density, abdominal aortic aneurysm, colorectal cancer (individualized), depression, falls.

Synonyms: Geriatric

Screening Guidelines

Recommendations describing who should be screened for a disease, which test to use, and when to begin or repeat testing.

Synonyms:

Screening Program

An organized public-health service that systematically invites a defined population to undergo testing for an asymptomatic condition, with quality-assured follow-up, diagnosis, treatment, and evaluation of benefits and harms.

Synonyms:

Screening Test

A test applied to people without symptoms or a known diagnosis to identify those at increased risk of a condition. A screening result usually requires a diagnostic or confirmatory evaluation before treatment is initiated.

Synonyms:

Screws

Threaded devices used to hold bone fragments together or attach implants to bone.

Synonyms:

Scrofula

Tuberculous lymphadenitis, most commonly affecting the cervical and submandibular lymph nodes, caused by *Mycobacterium tuberculosis* or atypical mycobacteria. It presents as chronic, painless, matted lymphadenopathy that may develop into cold abscesses with draining sinuses.

Synonyms:

Scrotal calcinosis

The deposition of calcium within the scrotal skin, presenting as multiple, firm, whitish, painless nodules on the scrotum, which may be solitary or numerous and may ulcerate. The exact aetiology is debated and may involve dystrophic calcification of pre-existing epidermal inclusion cysts, dermal cysts, or eccrine duct abnormalities.

Synonyms:

Scrotal Infection

Infection of the scrotal skin or underlying structures, which may cause redness, swelling, warmth, pain, or drainage. Rapidly worsening pain, fever, discoloration, or severe swelling is an emergency because serious soft-tissue infection must be excluded.

Synonyms:

Scrotal Pain

Pain in the scrotum caused by infection, trauma, hernia, fluid collections, varicocele, or testicular torsion. Sudden severe pain, nausea, a high-riding testis, or abnormal testicular position requires immediate assessment for torsion.

Synonyms:

Scrotum

Pouch of skin and superficial fascia containing the testes, epididymides, and lower spermatic cords. The scrotal wall has multiple layers reflecting the abdominal wall layers.

Synonyms:

Scurvy

A nutritional disease caused by a chronic deficiency of ascorbic acid (Vitamin C), which is essential for collagen synthesis. Vitamin C serves as a cofactor for prolyl and lysyl hydroxylases, which hydroxylate collagen fibers to allow stable cross-linking.

Synonyms:

Seasonal Affective Disorder

A specifier of recurrent major depressive episodes that occur at a specific time of year, most commonly winter (with remission in spring/summer). Symptoms: hypersomnia, hyperphagia with carbohydrate craving, weight gain, fatigue, and low energy.

Synonyms:

Sebaceous Gland

A small gland in the skin that secretes sebum (oil) into hair follicles to lubricate and waterproof the skin and hair.

Synonyms:

Seborrheic Dermatitis

A chronic inflammatory skin condition affecting sebum-rich areas: scalp, face (nasolabial folds, eyebrows), chest, and intertriginous areas. Presents with erythematous patches with greasy, yellowish scales. Dandruff is a mild form. More common and severe in Parkinson disease, HIV/AIDS, and Down syndrome.

Synonyms:

Seborrheic keratoses

Common, benign, epidermal skin tumors presenting as waxy, stuck-on, pigmented plaques with a rough, verrucous surface, typically appearing on the trunk and face of middle-aged and older adults. They are the most common benign skin neoplasm and are caused by keratinocyte proliferation.

Synonyms:

Seborrheic Keratosis

A benign epidermal tumor appearing as stuck-on,

waxy, hyperpigmented plaques with a verrucous surface. They are extremely common in older adults and increase in number with age. Seborrheic keratoses are not premalignant.

Synonyms:

Seborrhoea

A chronic inflammatory skin condition affecting sebum-rich areas: scalp, face (nasolabial folds, eyebrows), chest, and intertriginous areas. See Seborrheic Dermatitis.

Synonyms:

Seckel Syndrome

A rare recessive primordial dwarfism syndrome featuring severe proportionate growth restriction, microcephaly, characteristic facial features, and developmental or intellectual impairment. Skeletal, hematological, and other congenital abnormalities may occur.

Synonyms:

Second Malignancy

New cancer after initial cancer treatment. Risk from radiation, chemotherapy.

Synonyms:

Second Messenger Systems

Intracellular signaling molecules that relay extracellular signals (first messengers: hormones, neurotransmitters, growth factors) to cellular responses.

Synonyms:

Second Messengers

Intracellular signaling molecules generated in response to extracellular signals (first messengers like hormones or neurotransmitters). cAMP (cyclic adenosine monophosphate): produced from ATP by adenylyl cyclase, activated by Gs-protein coupled receptors, activates protein kinase A (PKA); degraded by phosphodiesterase.

Synonyms:

Second Opinion

An independent medical assessment by another qual-

ified clinician to help confirm or clarify a diagnosis, prognosis, or treatment plan.

Synonyms:

Second Stage of Labor

From full cervical dilatation (10 cm) to delivery of the baby. The mother feels the urge to push as the presenting part descends. Pushing: closed-glottis (Valsalva) or open-glottis. Duration: up to 3 hours in nulliparas with regional anesthesia (2 hours without), and 2 hours in multiparas (1 hour without).

Synonyms:

Second Trimester

The period from 13 to 27 weeks gestational age. Fetal growth accelerates, mother begins to feel quickening (fetal movement) between 16-20 weeks. Anatomy ultrasound at 18-22 weeks screens for structural anomalies. Maternal serum screening offered. Nausea typically resolves. Uterus becomes palpable above the symphysis pubis.

Synonyms:

Second-Degree AV Block

Intermittent failure of AV conduction. Mobitz Type I (Wenckebach): progressive PR prolongation then dropped QRS; usually benign (AV nodal, narrow QRS). Mobitz Type II: constant PR interval with sudden dropped QRS; more serious (infranodal, wide QRS), risk of progression to complete heart block and Stokes-Adams attacks.

Synonyms:

Second-Degree Burn

Partial-thickness burn involving the epidermis and dermis: superficial partial-thickness (blisters, moist, painful, pink) vs. deep partial-thickness (blanching, painful, may have thrombosed capillaries). Causes: thermal (scalds, flames), chemical, electrical.

Synonyms:

Second-Hand Smoke

Smoke inhaled from burning tobacco products or exhaled by a person who is smoking. It contains toxic

substances and increases health risks in exposed people.

Synonyms:

Secondary Attack Rate

The proportion of susceptible contacts who develop infection after exposure to a primary case within a defined period. It helps estimate transmissibility in households, schools, healthcare settings, and other close-contact groups.

Synonyms:

Secondary Hyperparathyroidism

Compensatory PTH increase in CKD from decreased phosphate excretion, low calcitriol, and hypocalcemia. Leads to renal osteodystrophy and vascular calcification. Managed with dietary phosphorus restriction, phosphate binders, active vitamin D, and calcimimetics. Refractory cases may require parathyroidectomy.

Synonyms:

Secondary Immune Response

The rapid, enhanced immune response on re-exposure to an antigen, mediated by memory B cells and memory T cells generated during the primary response. Features: shorter lag phase, higher and faster antibody titers (predominantly high-affinity IgG), and more effective cell-mediated responses.

Synonyms:

Secondary Immunodeficiency

Reduced immune function caused by an acquired condition or exposure rather than a primary genetic disorder. Causes include HIV infection, cancer, malnutrition, medicines, and chronic disease; the manifestations depend on which immune functions are impaired.

Synonyms:

Secondary Prevention

Early detection and treatment. Examples: screening (mammography, colonoscopy, blood pressure), self-examination.

Synonyms:

Secondary syphilis

The systemic dissemination stage of *Treponema pallidum* infection, occurring weeks to months after the primary chancre, characterised by a generalised maculopapular rash (including the palms and soles), mucous patches, condylomata lata, lymphadenopathy, and systemic symptoms such as fever and malaise.

Synonyms:

Secondary Tumor

A tumor formed when cancer cells spread from the original site to another part of the body.

Synonyms:

Secretin

A peptide hormone produced by S-cells in the duodenal and jejunal mucosa in response to acidic chyme (pH less than 4.5) entering the duodenum from the stomach.

Synonyms:

Secretion

Active movement of a substance from cells into a body fluid, lumen, or external environment. In toxicokinetics, renal tubular or biliary secretion can contribute to elimination of a toxin or metabolite.

Synonyms:

Secretory Diarrhea

Diarrhea caused by active secretion or reduced absorption of electrolytes and water by the intestine. It persists despite fasting and may result from infections, medications, bile-acid disorders, endocrine tumors, or inflammatory disease.

Synonyms:

Sedation Dentistry

Pharmacological techniques for anxiety management: nitrous oxide (laughing gas), oral sedation, IV sedation, general anesthesia. Indications: dental phobia, special needs, prolonged procedures. Monitoring required for deeper sedation.

Synonyms:

Sedation Levels

A continuum ranging from minimal sedation, in which normal responses to verbal commands are preserved, to moderate or deep sedation, in which responses and airway or breathing support may be reduced. The level can change and requires appropriate monitoring.

Synonyms:

Sedative

A medication that reduces central nervous system activity, producing calming effects, drowsiness, and sleep at higher doses. Sedatives are used for anxiety, procedural sedation, insomnia, and as adjuncts in anesthesia.

Synonyms:

Sedative-Hypnotic

CNS depressants. Benzodiazepines, barbiturates, Z-drugs. Overdose: respiratory depression, coma. Treatment: supportive, flumazenil (benzodiazepines only), airway management.

Synonyms:

Segmental Pressures

Blood pressure measurements at different leg levels. Localizes level of obstruction.

Synonyms:

Segmentation

A pattern of intestinal motility involving localized, rhythmic contractions of circular muscle that segment the intestinal contents, mixing them with digestive secretions and increasing contact with the absorptive mucosal surface. Unlike peristalsis, segmentation does not propel contents distally.

Synonyms:

Seizure

A transient occurrence of signs and/or symptoms due to abnormal, excessive, or synchronous neuronal activity in the brain. Provoked seizures have an identifiable acute cause (fever, electrolyte disturbance, drug toxicity, withdrawal). Unprovoked seizures occur without an acute trigger.

Synonyms:

Selective Estrogen Receptor Modulator

A class of medications that bind to estrogen receptors (ER-alpha and ER-beta) with tissue-specific agonist or antagonist activity, depending on the target tissue and differential co-regulator recruitment.

Synonyms:

Selective Mutism

Consistent failure to speak in specific social situations where speaking is expected despite speaking in other situations. The disturbance interferes with educational or occupational achievement or social communication. Must last for at least one month and is not attributable to lack of knowledge of or comfort with the spoken language.

Synonyms:

Selenium

Trace mineral, component of antioxidant enzymes. Deficiency: Keshan disease (cardiomyopathy), Kashin-Beck disease (osteoarthritis). Sources: Brazil nuts, seafood, meat.

Synonyms:

Selenium-75

Calibration source. Half-life 119 days. Used for uniformity correction.

Synonyms:

Self-Efficacy

Patient belief in ability to manage condition. Influences adherence, outcomes.

Synonyms:

Self-Experimentation

Research in which an investigator deliberately uses an intervention or procedure on themselves. It requires careful attention to consent, safety, and scientific validity.

Synonyms:

Self-Harm

Intentional self-inflicted injury without suicidal in-

tent, also termed non-suicidal self-injury; common methods include cutting, burning, and self-hitting. Prevalent in adolescents and in borderline personality disorder, depression, eating disorders, and trauma, serving affect regulation or self-punishment.

Synonyms:

Self-Management

Actions a person takes to monitor and manage a health condition, including treatment use, symptom monitoring, and lifestyle measures.

Synonyms:

Semen

The fluid ejaculated from the male reproductive tract, containing sperm (produced in the testes) suspended in seminal plasma (produced by the seminal vesicles, prostate, and bulbourethral glands). Semen provides nutrients (fructose, amino acids), protective agents (zinc, antioxidants), and a medium for sperm transport.

Synonyms:

Semen Analysis

Laboratory assessment of ejaculate volume, sperm concentration, total count, motility, morphology, vitality, and other characteristics. It is a key initial test in male-factor infertility and should usually be repeated because results vary biologically.

Synonyms:

Semicircular Canals

Three fluid-filled (endolymph) loops in each inner ear, oriented approximately orthogonally to detect angular (rotational) acceleration in three planes: horizontal (lateral), anterior (superior), and posterior. Each has an ampulla with a crista containing hair cells embedded in a gelatinous cupula.

Synonyms:

Seminal Vesicle

One of a paired set of male accessory reproductive glands behind the urinary bladder. Its fructose-rich secretion contributes substantially to semen and joins the vas deferens through the ejaculatory duct.

Synonyms:

Seminoma

A malignant germ-cell tumor of the testis, typically presenting as a painless testicular mass and highly sensitive to radiation and chemotherapy.

Synonyms:

Senna

A stimulant laxative containing anthraquinone glycosides (sennosides) that are activated by colonic bacteria to stimulate colonic motility and fluid secretion. Onset: 6-12 hours; used for constipation and bowel preparation. Common side effects: abdominal cramps, nausea; chronic use may cause melanosis coli and electrolyte disturbances.

Synonyms:

Sensitivity

The proportion of people who truly have a disease who obtain a positive test result. A highly sensitive test has few false-negative results and is useful when a negative result is intended to help rule out disease in an appropriate clinical setting.

Synonyms:

Sensorineural Hearing Loss

Hearing loss from pathology of the cochlea or auditory (eighth cranial) nerve, characterized on pure-tone audiometry by elevated bone conduction thresholds and no air-bone gap.

Synonyms:

Speech Audiometry

Hearing testing that measures detection or recognition of speech at different loudness levels. It commonly includes speech reception threshold and word-recognition testing, complementing pure-tone audiometry.

Synonyms: Speech testing; speech audiometric testing.

Sensorium

The state or level of consciousness and awareness of one's surroundings.

Synonyms:

Sensory Level

A sharply demarcated horizontal boundary below which sensation is altered on the trunk or limbs. A sensory level strongly suggests a spinal-cord lesion, although its localization requires correlation with motor, reflex, and autonomic findings.

Synonyms:

Sensory Nerves

Nerves that transmit sensory information from peripheral receptors to the central nervous system. Sensory (afferent) neurons have their cell bodies in the dorsal root ganglia (spinal nerves) or cranial nerve ganglia (cranial nerves).

Synonyms:

Sentinel Event

Unexpected occurrence involving death or serious physical/psychological injury. Requires root cause analysis.

Synonyms:

Sentinel Injury

A minor but potentially significant injury in a non-mobile infant, such as unexplained bruising, oral injury, or a fracture, that may precede more severe abuse. It warrants careful history, complete examination, safeguarding assessment, and documentation.

Synonyms:

Sentinel Lymph Node

First lymph node draining tumor site. Biopsy assesses nodal spread.

Synonyms:

Sentinel Lymph-Node Biopsy

Surgical removal and pathologic examination of the first draining lymph node or nodes from a primary skin cancer. It is used for selected melanomas and other tumors to assess regional metastatic risk and guide staging.

Synonyms:

Sentinel Surveillance

Ongoing collection of health data from selected reporting sites, providers, or populations chosen to represent trends rather than enumerate every event. It can provide early warning and monitor changes in disease activity.

Synonyms:

Separation Anxiety Disorder

Developmentally inappropriate and excessive fear or anxiety concerning separation from attachment figures. The individual may have recurrent excessive distress when anticipating or experiencing separation from home or major attachment figures.

Synonyms:

Separation of the iris

Disinsertion or dialysis of the iris root from its attachment at the ciliary body, typically caused by blunt ocular trauma. It appears as a peripheral iridodialysis visible on slit-lamp examination and may cause monocular double vision, glare, or secondary glaucoma if extensive.

Synonyms:

Sepsis

Life-threatening organ dysfunction caused by dysregulated host response to infection. Sepsis-3 definition: infection + SOFA score increase ≥ 2 . Septic shock: sepsis with vasopressor requirement and lactate >2 mmol/L.

Synonyms:

Sepsis Syndrome

The spectrum of the host's dysregulated response to infection: sepsis (infection + organ dysfunction, SOFA increase ≥ 2), septic shock (sepsis + hypotension requiring vasopressors with lactate >2 mmol/L despite adequate fluid), and severe organ dysfunction/multi-organ failure.

Synonyms:

Septal Hematoma

Accumulation of blood between the perichondrium and the septal cartilage of the nose, typically fol-

lowing nasal trauma (nasal fracture). Presents with nasal obstruction, pain, and a bluish, boggy swelling of the nasal septum.

Synonyms:

Septic Arthritis

Joint infection, usually bacterial (Staph, Strept, Gonorrhea). Emergency: fever, severe joint pain, swelling, inability to bear weight. Diagnosis: joint aspiration (WBC >50,000, positive culture). Treatment: antibiotics, joint drainage (arthroscopy/open).

Synonyms:

Septic Embolism

Septic embolism occurs when infected material, typically thrombi containing bacteria, embolizes through the bloodstream to distant sites, causing metastatic infection. The most common source is infective endocarditis, where infected vegetations on heart valves break off and lodge in peripheral vessels.

Synonyms:

Septic Shock

A life-threatening form of sepsis in which infection-related circulatory and cellular dysfunction causes persistent inadequate tissue perfusion, often requiring vasopressor support despite fluid resuscitation. It can cause multiorgan failure and requires urgent treatment.

Synonyms:

Septicaemia

An older term often used for sepsis, a life-threatening condition in which a dysregulated response to infection causes organ dysfunction.

Synonyms:

Septicemia

An older term sometimes used for microorganisms or their toxins in the bloodstream. Modern clinical usage generally favors bacteremia or sepsis, depending on the condition described.

Synonyms:

Septo-Optic Dysplasia

A congenital disorder characterized by variable combinations of optic-nerve hypoplasia, midline brain abnormalities, and pituitary hormone deficiencies. It may cause visual impairment, nystagmus, developmental differences, seizures, and growth or endocrine problems.

Synonyms:

Septoplasty

A surgical procedure to straighten a deviated nasal septum, relieving obstruction, improving sinus drainage, and correcting related epistaxis or sleep disturbance, most often through an endonasal approach. It reshapes rather than resects the cartilaginous and bony septum while preserving support to avoid saddle nose deformity.

Synonyms:

Sequelae

Conditions resulting from previous disease. Examples: post-polio syndrome, stroke sequelae.

Synonyms:

Sequential Therapy

Treatments given in sequence. Used when combination not suitable.

Synonyms:

Serodiagnostic

Relating to diagnosis by detecting antibodies or other markers in blood serum.

Synonyms:

Serology

The laboratory evaluation of serum for antibodies, antigens, or other immune markers. Results may indicate current infection, previous exposure, vaccination, autoimmune reactivity, or passive antibody transfer and must be interpreted with timing and clinical context.

Synonyms:

Seronegative Arthritis

Arthritis with negative rheumatoid factor and

anti-CCP. Includes spondyloarthropathies, psoriatic arthritis, reactive arthritis.

Synonyms:

Serotonin Syndrome

A potentially life-threatening condition caused by excessive serotonergic activity in the central and peripheral nervous systems, typically resulting from drug interactions or overdose involving serotonergic medications.

Synonyms:

Serotonin-Norepinephrine Reuptake Inhibitors

Antidepressants that block the reuptake of both serotonin and norepinephrine. They include venlafaxine, duloxetine, desvenlafaxine, and levomilnacipran. SNRIs are used for major depressive disorder, generalized anxiety disorder, diabetic neuropathy, fibromyalgia, and chronic pain.

Synonyms:

Serotonin-Norepinephrine-Dopamine Reuptake Inhibitors

A class of antidepressants that inhibit reuptake of serotonin, norepinephrine, and dopamine. The primary agent is bupropion, which also acts as a norepinephrine-dopamine reuptake inhibitor. It is used for depression, smoking cessation, and as augmentation. It lacks sexual side effects and weight gain associated with SSRIs.

Synonyms:

Serotype

A group within a species of microorganisms (or viruses) distinguished by antigenic differences, usually surface antigens (capsular polysaccharides, O/H antigens, viral surface proteins).

Synonyms:

Serpentine supravenuous hyperpigmentation

A dermatological finding characterized by dark, wavy, serpiginous hyperpigmentation along the course of superficial veins, most commonly on the

upper chest and neck. Associated with venous stasis, thrombophlebitis, and certain malignancies. The pigmentation results from hemosiderin deposition in the perivenous dermis.

Synonyms:

Serrated Pathway

Alternative molecular pathway to colorectal carcinogenesis accounting for fifteen to thirty percent of cases. It involves serrated polyps as precursors including sessile serrated lesions with dysplasia. Molecular features include CpG island methylator phenotype, BRAF mutations, and microsatellite instability from MLH1 silencing.

Synonyms:

Serratus Anterior Muscle

Fan-shaped muscle from ribs 1-8/9 to the medial scapular border. Innervated by long thoracic nerve (C5-C7). Protracts scapula, upwardly rotates glenoid for overhead elevation, stabilizes against thorax. Long thoracic nerve injury causes medial scapular winging, especially visible during wall push-ups. Commonly injured in breast surgery.

Synonyms:

Sertoli-cell tumor

A sex-cord stromal tumor that may produce androgens or estrogens and can cause endocrine manifestations.

Synonyms:

Serum Concentration

The concentration of a substance measured in the liquid component of clotted blood. Interpretation depends on sampling time, exposure history, distribution, metabolism, elimination, and the relationship between concentration and toxicity.

Synonyms:

Serum Osmolal Gap

The difference between measured serum osmolality and calculated osmolality. An increased gap suggests unmeasured osmoles, including toxic alcohols, but interpretation must consider timing, renal

function, lactate, ketones, and laboratory variation.

Synonyms:

Serum Protein Electrophoresis

Separation of serum proteins by electrophoresis into 5 fractions: albumin, alpha-1, alpha-2, beta, and gamma. Monoclonal gammopathy: M-spike in gamma region (multiple myeloma, MGUS, Waldenstrom macroglobulinemia). Immunofixation: identifies heavy chain (IgG, IgA, IgM, IgD, IgE) and light chain (kappa, lambda) isotype.

Synonyms:

Serum Sickness

Type III hypersensitivity reaction. Fever, rash, arthritis, proteinuria. Caused by drugs (penicillin, cephalosporins), antivenoms. Treatment: stop offending agent, antihistamines, corticosteroids.

Synonyms:

Sever Disease

Calcaneal apophysitis in children/adolescents. Heel pain, worse with activity. Treatment: rest, heel cups, stretching.

Synonyms:

Severe Acute Respiratory Syndrome

A severe respiratory illness caused by SARS coronavirus, characterized by fever, dry cough, dyspnea, and viral pneumonia that may progress to respiratory failure.

Synonyms:

Severe Combined Immunodeficiency

Severe combined immunodeficiency (SCID) represents a group of genetic disorders characterized by profoundly defective T cell development and function, with variable B and NK cell involvement, resulting in severe susceptibility to life-threatening infections in infancy.

Synonyms:

Sevoflurane

A volatile inhaled anesthetic with relatively low blood-gas solubility, permitting rapid changes in

anesthetic depth and recovery. It can cause dose-dependent cardiovascular and respiratory depression and is a recognized trigger of malignant hyperthermia in susceptible patients.

Synonyms:

Sexual Assault

A broad legal category of any non-consensual sexual contact or penetration, encompassing rape, indecent assault, and drug-facilitated assault. Examination documents general and anogenital injuries, collects biological and trace samples, and screens for drug-facilitated assault by extended-window testing.

Synonyms:

Sexual Dysfunction

Persistent difficulty in sexual activity causing distress. In women: low sexual desire (hypoactive), arousal disorder, orgasmic disorder (anorgasmia), and genito-pelvic pain/penetration disorder (dyspareunia, vaginismus). In men, it may involve erectile dysfunction, delayed or premature ejaculation, or reduced sexual desire. Causes include medical and psychological conditions, relationship factors, and adverse effects of substances or medicines.

Synonyms:

Sexual Intercourse (Coitus)

The insertion of a penis into a partner's body for sexual pleasure, reproduction, or both. Most commonly vaginal intercourse (penile-vaginal penetration) but may also include anal intercourse. Sexual intercourse is a key component of human pair bonding and reproduction.

Synonyms: Coitus

Sexual Masochism Disorder

A paraphilic disorder characterized by recurrent, intense sexual arousal from the act of being humiliated, beaten, bound, or otherwise made to suffer, lasting ≥ 6 months and causing distress or impairment or involving acting on these urges.

Synonyms:

Sexual Rehabilitation

Address sexual function after injury, illness. Counseling, devices, medications.

Synonyms:

Sexual Sadism Disorder

A paraphilic disorder characterized by recurrent, intense sexual arousal from the physical or psychological suffering of another person, lasting ≥ 6 months and causing distress or impairment or involving acting on these urges with a nonconsenting person.

Synonyms:

Sexually Transmitted Infection

STI: infection transmitted via sexual contact. Examples: syphilis, gonorrhea, chlamydia, HIV.

Synonyms:

SGLT2 Inhibitor

A drug that reduces sodium-glucose cotransport in the proximal renal tubule, increasing urinary glucose and sodium excretion.

Synonyms:

Shadowing Artifact

Ultrasound artifact from attenuating structures. Enhanced by harmonic imaging.

Synonyms:

Shaken Baby Syndrome

A form of abusive head trauma caused by violent shaking, typically in infants under 1 year. The triad: subdural hemorrhage, retinal hemorrhages, and encephalopathy. May present with irritability, lethargy, vomiting, seizures, and apnea. CT shows subdural hematoma; MRI shows diffuse axonal injury.

Synonyms:

Shared Decision-Making

A collaborative process in which clinicians and patients combine best available evidence with patient values, preferences, goals, and circumstances to choose among reasonable options.

Synonyms:

Sharp Force Trauma

Injury produced by an edged or pointed instrument that cuts or penetrates the skin, divided into incised wounds (longer than deep, clean margins) and stab wounds (deeper than wide). Wound length, depth, angle, hesitation marks, and defense injuries infer weapon type and manner.

Synonyms:

Sharps Container

Puncture-resistant container for used needles and sharp instruments. Red, labeled biohazard.

Synonyms:

Sharps Injury

A percutaneous or mucocutaneous injury caused by a needle or other sharp instrument that may expose a person to blood or body fluids. Immediate wound care, incident reporting, risk assessment, and pathogen-specific post-exposure management are required.

Synonyms:

Shave Biopsy

Removal of a raised skin lesion by horizontal slicing with a scalpel at the level of the dermis; used for exophytic lesions such as seborrheic keratoses and superficial basal cell carcinomas.

Synonyms:

Sheehan Syndrome

Postpartum pituitary necrosis resulting from severe hemorrhage and hypotension during delivery. The pituitary gland is enlarged during pregnancy and particularly vulnerable to ischemic injury from blood loss. Presentation varies from fatigue and failure to lactate to panhypopituitarism. Growth hormone and prolactin deficiency occur first.

Synonyms:

Sheehan Syndrome (Postpartum Pituitary Necrosis)

Ischemic necrosis of the anterior pituitary gland

due to severe postpartum hemorrhage (PPH) and hypotension. The pituitary enlarges during pregnancy and is vulnerable to ischemia from hypotensive episodes.

Synonyms: Postpartum Pituitary Necrosis

Shielding

Lead, tungsten, acrylic shielding for radiation protection.

Synonyms:

Shigellosis

Acute infectious colitis caused by *Shigella* species (*S. sonnei* most common in developed countries). Presents with fever, abdominal cramps, tenesmus, and frequent bloody, mucoid stools. Highly contagious with low infectious dose. Diagnosis: stool culture. Treatment: azithromycin, ciprofloxacin, or ceftriaxone (resistance patterns vary).

Synonyms:

Shingles

Herpes zoster: reactivation of varicella-zoster virus (VZV) from dorsal root ganglia, causing a painful, unilateral vesicular rash in a dermatomal distribution ('belt-like'), often preceded by burning pain. Risk increases with age and immunosuppression.

Synonyms:

Shirodkar Cerclage

A transvaginal cervical cerclage technique that involves dissection of the bladder and rectum to place the suture (Mersilene tape) as high as possible at the level of the internal os. Technically more difficult than McDonald cerclage with higher risk of hemorrhage and bladder injury.

Synonyms:

Shivering

Involuntary, rhythmic skeletal muscle contraction generating heat in response to cold exposure or fever, a key thermoregulatory response under hypothalamic (preoptic area) control. Shivering can increase heat production 3-5 fold.

Synonyms:

Shock

A state of inadequate tissue perfusion causing cellular dysfunction. Causes include blood loss, infection, pump failure, and severe loss of vascular tone.

Synonyms:

Shock Wave Lithotripsy

Non-invasive procedure using extracorporeal shock waves to fragment renal and ureteral stones. The patient is positioned over a water cushion coupling the shock wave generator to the body. Shock waves are focused on the stone under fluoroscopic or ultrasound guidance.

Synonyms:

Shone Complex

A group of congenital left-sided obstructive heart lesions, classically including supraventricular mitral ring, parachute mitral valve, subaortic stenosis, and coarctation of the aorta. The combination and severity vary and may lead to heart failure or systemic outflow obstruction.

Synonyms:

Short Bowel Syndrome

Clinical condition resulting from surgical resection or functional loss of a significant portion of the small intestine leading to inadequate absorption of nutrients.

Synonyms:

Shortness of Breath

An uncomfortable awareness of difficult or insufficient breathing. See Dyspnea.

Synonyms:

Shoulder Dislocation

Complete displacement of the upper arm bone from the shoulder socket, usually caused by a fall, collision, or forceful twisting. It causes severe pain, deformity, and inability to move the arm; urgent reduction and assessment for associated fractures or nerve and blood-vessel injury are required.

Synonyms:

Shoulder Dystocia

An obstetric emergency where the fetal head delivers but the anterior shoulder is impacted behind the maternal symphysis pubis. Defined as head-to-body delivery time exceeding 60 seconds or need for ancillary maneuvers. Risk factors include macrosomia, diabetes, prior shoulder dystocia, and operative vaginal delivery.

Synonyms:

Shoulder Impingement

Pain associated with movement of the shoulder, often involving the rotator-cuff tendons or subacromial tissues. Symptoms include pain with overhead activity and sometimes weakness; assessment and treatment are individualized and may include exercise-based rehabilitation.

Synonyms:

Shoulder Instability

Excessive or recurrent movement of the shoulder joint caused by injury, laxity, or altered joint anatomy. Associated lesions may include a Bankart tear, Hill-Sachs lesion, or injury to the joint capsule or ligaments.

Synonyms:

Shoulder Pain

Pain in or around the shoulder caused by injury, tendon or bursa disorders, arthritis, nerve disease, or referred pain. Sudden weakness, deformity, chest symptoms, fever, or pain after major trauma requires prompt evaluation.

Synonyms:

Shunt

Tube diverting fluid. Types: ventriculoperitoneal (CSF), ventriculoatrial, lumboperitoneal, ventriculopleural. Indications: hydrocephalus. Complications: obstruction, infection, overdrainage, migration. Valves regulate pressure.

Synonyms:

Shunt (Vascular)

A surgically created or implanted pathway that

redirects blood or another fluid from one vessel or body space to another.

Synonyms: Vascular

Shwachman Syndrome

An inherited multisystem disorder usually involving exocrine pancreatic insufficiency, bone-marrow dysfunction, and skeletal abnormalities. Children may have steatorrhea, poor growth, recurrent infections, neutropenia, anemia, or increased risk of myeloid malignancy.

Synonyms:

SIADH

Syndrome of Inappropriate Antidiuretic Hormone secretion characterized by hyponatremia (dilutional) with inappropriately concentrated urine (>100 mOsm/kg) and elevated urine sodium (>40 mEq/L). Euvolemic hyponatremia.

Synonyms:

SIADH (Syndrome of Inappropriate Antidiuretic Hormone Secretion)

Excessive vasopressin activity causing impaired free-water excretion, euvolemic hyponatremia, and inappropriately concentrated urine after exclusion of other causes. Treatment depends on severity and cause and may include fluid restriction or carefully monitored hypertonic saline for severe symptomatic cases.

Synonyms: Syndrome of Inappropriate Antidiuretic Hormone Secretion

Sialadenitis

Inflammation of salivary gland. Acute (bacterial) or chronic (recurrent). Treatment: antibiotics, hydration, gland massage, surgery if chronic.

Synonyms:

Sialography

Contrast imaging of salivary ducts. Evaluates obstruction, stricture, tumors. Rarely performed now.

Synonyms:

Sialolithiasis

Formation of a stone in a salivary gland or its duct, most often the submandibular gland. It may cause recurrent swelling and pain, especially during meals, and can lead to infection or obstruction.

Synonyms:

Sialorrhea

Excessive salivation. Neurological causes, medications, dental causes. Treatment: hydration, glycopyrrolate, botulinum toxin, surgery.

Synonyms:

Sialorrhoea

Excessive saliva production or inability to clear saliva, resulting in drooling. Causes include medicines, oral disease, and neurologic or swallowing disorders.

Synonyms:

Sialuria

A rare inherited disorder of sialic-acid metabolism caused by abnormal regulation of the GNE enzyme. Excess free sialic acid accumulates in cells and urine and may cause developmental delay, coarse facial features, hepatosplenomegaly, and variable intellectual disability.

Synonyms:

Sicca Syndrome

Dry eyes and dry mouth due to decreased tear and saliva production. Primary: Sjogren syndrome. Secondary: associated with RA, SLE, scleroderma, graft-versus-host disease, hepatitis C, sarcoidosis, HIV, medications (anticholinergics, antidepressants). Diagnosis: Schirmer test (<5 mm/5 min), rose bengal staining, salivary gland biopsy.

Synonyms:

Sick Sinus Syndrome

Sinus node dysfunction causing a spectrum of arrhythmias: sinus bradycardia, sinus arrest, sinoatrial block, and tachycardia-bradycardia syndrome. Most common in elderly patients. Presents with syncope, fatigue, palpitations, and exercise intolerance.

ance. Diagnosis: ECG, Holter monitor (pauses >3 seconds).

Synonyms:

Sickle Cell Anemia

The most severe form of sickle cell disease (HbSS), causing chronic hemolytic anemia and vaso-occlusive crises. Features: jaundice, splenomegaly (infancy), pain crises, acute chest syndrome, stroke, and increased infection risk from functional asplenia. Diagnosis: hemoglobin electrophoresis showing HbS.

Synonyms:

Sickle Cell Crisis

An acute clinical complication of sickle cell disease, most commonly a vaso-occlusive episode producing ischemic pain. Other acute crises include acute chest syndrome, splenic or hepatic sequestration, and aplastic crisis; treatment depends on the specific complication and severity.

Synonyms:

Sickle Cell Dactylitis

Painful swelling of the hands or feet caused by blockage of small blood vessels during a sickle-cell episode, especially in infants and young children. It may be an early sign of sickle-cell disease and requires appropriate clinical evaluation.

Synonyms:

Sickle Cell Disease

Autosomal recessive hemoglobinopathy (HbS). Glutamic acid → valine at position 6 of beta-globin. Homozygous (HbSS) most severe. Sickling under hypoxia causes vaso-occlusion, hemolysis. Symptoms: pain crises, acute chest syndrome, stroke, splenic sequestration, aplastic crisis (parvovirus B19).

Synonyms:

Sickle Cell Trait

An inherited carrier state in which a person has one hemoglobin S allele and one normal beta-globin allele, usually producing both hemoglobin A and hemoglobin S. Most people are asymptomatic, but complications can occur in severe physiologic conditions.

tions.

Synonyms:

Side Effect

An unintended pharmacological effect of a drug occurring at therapeutic doses, usually predictable from the drug's mechanism of action (a Type A reaction).

Synonyms:

Siderosis

Benign pneumoconiosis from iron dust, seen in welders. Causes small opacities on CXR but minimal impairment. Reversible with removal of exposure.

Synonyms:

SIDS

Sudden unexpected death of an apparently healthy infant during sleep that remains unexplained after investigation.

Synonyms:

Sievert (Sv)

The SI unit used for equivalent and effective dose, incorporating radiation type and, for effective dose, tissue sensitivity. It is used to estimate stochastic radiation risk rather than simply physical energy deposition.

Synonyms: Sv

Sigmoid Colon

S-shaped segment from descending colon to rectum in the left iliac fossa, approximately 40-50 cm, with complete mesentery (intraperitoneal, mobile). Most common diverticular disease site from narrow lumen and high pressure. Common volvulus site, particularly in elderly/institutionalized patients. Second most common colorectal cancer site.

Synonyms:

Sigmoid volvulus

Axial twisting of the sigmoid colon around its mesentery, the most common cause of colonic volvulus, typically occurring in elderly, institutionalized, or

neuropsychiatric patients with chronic constipation and a redundant sigmoid. Presents with acute large bowel obstruction, abdominal distension, and absent bowel sounds.

Synonyms:

Sign

Objective evidence of disease. Examples: rash, murmur, edema. Observed by examiner.

Synonyms:

Signal Transduction

The process by which an extracellular signal (hormone, neurotransmitter, growth factor, drug) binding to a cell-surface or intracellular receptor is converted into a specific intracellular response.

Synonyms:

Signal-to-Noise Ratio

Ratio of true counts to statistical noise. Improved by longer acquisition, higher activity.

Synonyms:

Signet Ring Cell Carcinoma

A poorly differentiated adenocarcinoma in which intracellular mucin displaces the nucleus to the periphery, most often of the stomach or colon; associated with an aggressive course and diffuse growth pattern.

Synonyms:

Silicone oil hyperoleon

Emulsification of silicone oil tamponade used in vitreoretinal surgery, where the oil breaks into tiny droplets that migrate into the anterior chamber or trabecular meshwork. It can cause elevated intraocular pressure, band keratopathy, and chronic inflammation requiring oil removal and anterior chamber washout.

Synonyms:

Silicosis

Fibrotic lung disease caused by inhalation of crystalline silica dust, typically in mining, quarrying, construction, or stone-cutting work. It causes pro-

gressive breathlessness and increases the risk of tuberculosis, chronic airflow limitation, and lung cancer.

Synonyms:

Silver Diamine Fluoride

Liquid that arrests caries and stains cavity black. Used in young children, special needs patients.

Synonyms:

Sinding-Larsen-Johansson Syndrome

Traction apophysitis of inferior patellar pole in adolescents. Similar to Osgood-Schlatter but at knee. Treatment: rest, activity modification.

Synonyms:

single nucleotide polymorphism

Single base pair variation occurring in >1% of population. Most common genetic variation. Used in GWAS, forensics, pharmacogenetics.

Synonyms:

Single Photon Emission Computed Tomography

Nuclear medicine imaging using gamma-emitting isotopes (technetium-99m most common). Rotating gamma camera acquires images. Applications: myocardial perfusion, bone scans, thyroid imaging, renal scans, brain perfusion. Lower resolution than PET but more widely available and cost-effective.

Synonyms:

Single Ventricle

A group of congenital heart defects where one functional ventricle supports both the systemic and pulmonary circulations. Includes tricuspid atresia, mitral atresia, double inlet left ventricle, hypoplastic left heart syndrome, and unbalanced AV canal.

Synonyms:

Single-Dose Toxicity

Harm caused by one exposure to a substance or medicine, assessed according to dose, route, timing, and the exposed person's characteristics.

Synonyms:

Sinoatrial Node

The heart's natural pacemaker, located at the junction of the superior vena cava and right atrium. It consists of specialized cells that spontaneously depolarize at a rate of 60-100 beats per minute, setting the normal sinus rhythm.

Synonyms:

Sinus Lift

Procedure to increase bone height in posterior maxilla. Subperiosteal or transalveolar approach. Graft material placed.

Synonyms:

Sinus Pain

Pressure or pain around the forehead, cheeks, nose, or eyes caused by sinus inflammation, infection, migraine, or other conditions. Severe headache, eye swelling, vision change, high fever, or neurologic symptoms requires urgent assessment.

Synonyms:

Sinus Rhomboidalis

A diamond-shaped depression in the floor of the fourth ventricle of the brain.

Synonyms:

Sinuses

Air-filled cavities within the skull bones lined by respiratory mucosa, connected to the nasal cavity via ostia.

Synonyms:

Sinusitis

Inflammation of the paranasal sinus mucosa. Acute sinusitis: viral (most common, resolves in <10 days) or bacterial (symptoms >10 days, double worsening, or severe: *Streptococcus pneumoniae*, *Haemophilus influenzae*, *Moraxella catarrhalis*). Chronic sinusitis: symptoms >12 weeks with radiographic evidence.

Synonyms:

Sinusitis and Sinus Problems

Inflammation or infection of the paranasal sinuses that may cause nasal congestion, discharge, facial

pressure, headache, or reduced smell. Symptoms may also arise from other nasal or facial conditions and require assessment when persistent or severe.

Synonyms:

Sinusoidal Fetal Heart Rate Pattern

A rare, ominous FHR pattern characterized by a smooth, sine-wave-like undulation with a fixed frequency (2-5 cycles/minute) and absent variability. Strongly associated with severe fetal anemia (Rh isoimmunization, fetomaternal hemorrhage, parvovirus B19), fetal hypoxia, and fetal acidosis.

Synonyms:

Sirenomelia

A rare congenital malformation in which the lower limbs are partially or completely fused. It is usually associated with severe abnormalities of the genitourinary, gastrointestinal, vascular, and spinal systems and is often fatal in the neonatal period.

Synonyms:

Sister Mary Joseph's nodule

A firm, hard nodule in the umbilicus resulting from metastatic malignancy, most commonly from intra-abdominal or pelvic cancers including gastric, ovarian, and colorectal carcinoma. It indicates advanced, disseminated disease with a poor prognosis. Diagnosis is by fine needle aspiration biopsy.

Synonyms:

Sitosterolemia

An autosomal-recessive disorder of plant-sterol transport caused by ABCG5 or ABCG8 variants. It can produce premature atherosclerosis, xanthomas, hemolytic anemia, macrothrombocytopenia, and elevated plasma plant sterols.

Synonyms:

Situs Inversus

A congenital condition in which the thoracic and abdominal organs are reversed or mirrored from their normal positions. Complete situs inversus (situs inversus totalis) involves all organs.

Synonyms:

Situs inversus totalis

A congenital condition in which the major visceral organs are mirrored from their normal positions, with the liver on the left, heart on the right, and other viscera similarly reversed.

Synonyms:

Sjogren Syndrome

Primary Sjogren syndrome (pSS) is a chronic autoimmune exocrinopathy characterized by lymphocytic infiltration of lacrimal and salivary glands causing dry eyes (keratoconjunctivitis sicca) and dry mouth (xerostomia), with female predominance (9:1) and peak onset 40-60. Secondary SS occurs with RA, SLE, SSc.

Synonyms:

Sjögren Syndrome

A systemic autoimmune disease characterized by lymphocytic destruction and dysfunction of lacrimal and salivary glands, producing dry eyes and dry mouth. It may involve multiple organs and increases the risk of salivary-gland lymphoma.

Synonyms:

Sjögren's syndrome

A chronic autoimmune disorder characterized by lymphocytic infiltration and destruction of exocrine glands, primarily the salivary and lacrimal glands, resulting in dry eyes (keratoconjunctivitis sicca) and dry mouth (xerostomia).

Synonyms:

Skeletal Muscle

Voluntary, striated muscle attached to bones by tendons or directly by connective tissue. Its contraction produces movement, maintains posture, and generates heat.

Synonyms:

Skeletal Muscle Relaxant

A medication that reduces muscle spasm, spasticity, and associated pain.

Synonyms:

Skeletal Survey

A series of radiographs obtained when child abuse is suspected. Includes AP and lateral views of the skull, chest (including oblique views), abdomen, spine, and bilateral upper and lower extremities. Identifies fractures of varying ages, which is highly suggestive of non-accidental trauma.

Synonyms:

Skeletonization

Final stage of postmortem decomposition where soft tissues, organs, and skin have completely decayed or been scavenged, leaving only clean osseous skeletal remains.

Synonyms:

Skilled Nursing Facility

Inpatient facility providing skilled nursing and therapy. For recovery after hospitalization.

Synonyms:

Skin

The largest organ of the body (approximately 1.5–2 m²), forming a protective barrier against physical injury, pathogens, UV radiation, and water loss.

Synonyms:

Skin Absorption

Movement of a substance through the skin into underlying tissues or the bloodstream. Absorption depends on the substance, skin condition, contact time, and exposed area.

Synonyms:

Skin Aging

Skin aging has intrinsic (chronological) and extrinsic (photoaging) components. Photoaging causes wrinkle formation, telangiectasias, lentigines, leather-like texture, and actinic keratoses. Intrinsic aging causes thinning, wrinkling, and delayed wound healing. Prevention includes sun protection (broad-spectrum SPF 30 or greater daily).

Synonyms:

Skin Aging and Appearance

Skin aging is a complex biological process influenced by both intrinsic factors, such as genetics and natural aging, and extrinsic factors, particularly ultraviolet radiation exposure.

Synonyms:

Skin Allergies and Contact Dermatitis

Inflammatory skin reactions triggered by exposure to allergens or irritants that come into direct contact with the skin.

Synonyms:

Skin Allergy Testing

Skin allergy testing includes prick testing (immediate hypersensitivity, IgE-mediated) and intradermal testing (more sensitive, used for drug and venom allergy). Prick testing introduces allergen extract into the epidermis; wheal and flare reaction at 15 minutes indicates sensitization. Intradermal testing injects dilute allergen into the dermis.

Synonyms:

Skin and Aging

Skin aging involves intrinsic and extrinsic changes. Intrinsic aging causes thinning, wrinkling, and fragility. Extrinsic (photo)aging causes wrinkles, telangiectasias, lentigines, and actinic keratoses. Collagen loss, elastin degradation, and decreased cell turnover contribute to aging skin.

Synonyms:

Skin and Environment

Environmental factors significantly affect skin health. Pollution causes oxidative stress, inflammation, and accelerated aging. Particulate matter penetrates skin, generating free radicals. Blue light from screens causes hyperpigmentation, particularly in darker skin tones. Indoor heating and air conditioning cause dryness.

Synonyms:

Skin Appendages

Skin structures include hair follicles, sebaceous glands, eccrine sweat glands, and apocrine sweat

glands. Hair follicles cycle through anagen (growth), catagen (transition), and telogen (resting) phases. Sebaceous glands produce sebum, an oily substance lubricating skin and hair.

Synonyms:

Skin Barrier Function

The skin barrier prevents water loss and protects against environmental insults. The stratum corneum acts as a physical barrier, while the acid mantle (pH 4 to 6) provides chemical defense. Lipids (ceramides, cholesterol, free fatty acids) in the intercellular space form a waterproof barrier.

Synonyms:

Skin Biopsy Methods

Skin biopsy methods vary by lesion characteristics. Punch biopsy (2 to 6 mm circular blade) provides full-thickness specimen for most diagnoses. Shave biopsy (razor or scalpel) removes superficial lesions; deep shave (saucerization) includes subcutaneous fat for suspected melanoma.

Synonyms:

Skin Biopsy Techniques

Skin biopsy is selected according to the suspected diagnosis and lesion depth. Punch biopsy samples full-thickness skin; shave biopsy samples superficial lesions; excisional biopsy removes an entire small lesion; and incisional biopsy samples part of a large lesion.

Synonyms:

Skin Cancer

Most common cancer. Types: basal cell, squamous cell, melanoma. Prevention: sun protection. Early detection critical.

Synonyms:

Skin Cancer Epidemiology

Skin cancers are common and include basal-cell carcinoma, squamous-cell carcinoma, and melanoma. Incidence and mortality vary by tumor type, geography, skin phenotype, ultraviolet exposure, immune status, and access to diagnosis and treatment.

Synonyms:

Skin Cancer Prevention

Prevention focuses on reducing ultraviolet exposure through shade, protective clothing, hats, sunglasses, and appropriately used broad-spectrum sunscreen. Avoiding tanning beds also reduces ultraviolet exposure.

Synonyms:

Skin Cancer Screening

Skin cancer screening uses the ABCDE criteria for melanoma, the ugly duckling sign, and total body skin examination. Dermoscopy (dermatoscopy) magnifies skin lesions revealing structures invisible to the naked eye, improving diagnostic accuracy. Skin self-examination teaches patients to monitor moles for changes.

Synonyms:

Skin Cancer Staging

Skin cancer staging guides treatment and prognosis. Melanoma: Breslow thickness (most important prognostic factor), ulceration, mitotic rate, sentinel lymph node status (AJCC 8th edition).

Synonyms:

Skin Cancer Surgery

Skin cancer surgical techniques maximize cure while minimizing morbidity. Wide local excision with appropriate margins (BCC: 4 mm, SCC: 4 to 6 mm, melanoma: based on Breslow thickness). Mohs micrographic surgery provides 99 percent cure rate for BCC and 97 percent for SCC with tissue preservation.

Synonyms:

Skin Flaps

Skin flaps transfer tissue with its blood supply. Rotation flaps rotate adjacent tissue into defect. Advancement flaps slide tissue forward. Transposition flaps move tissue across intervening skin. Random pattern flaps rely on dermal plexus; axial pattern flaps have named vascular pedicle.

Synonyms:

Skin Graft

Transfer of skin from a donor site to a recipient site to cover a wound. Split-thickness skin graft (STSG): epidermis + partial dermis (0.008-0.018 inches), harvested with dermatome, donor site heals spontaneously (2-3 weeks). Full-thickness skin graft (FTSG): epidermis + full dermis, donor site requires closure, better cosmetic outcome.

Synonyms:

Skin Immune System

The skin immune system (SALT: skin-associated lymphoid tissue) provides immunological surveillance. Langerhans cells (dendritic cells in epidermis) capture antigens and present them to T cells. Dermal dendritic cells, mast cells, and resident T cells form an innate and adaptive immune network.

Synonyms:

Skin Infection

Infection of the skin or underlying soft tissue, commonly caused by bacteria, fungi, or viruses. Redness, warmth, swelling, pain, drainage, or fever may occur; rapidly spreading redness, severe pain, blisters, or systemic illness requires prompt medical assessment.

Synonyms:

Skin Integrity

Localized damage to the skin and/or underlying soft tissue caused by prolonged pressure, shear, or friction, most commonly over bony prominences. See pressure injury.

Synonyms:

Skin Irritation

Inflammation or discomfort caused by direct contact with an irritant, often producing redness, burning, itching, dryness, or scaling.

Synonyms:

Skin Microbiome

The skin microbiome is the community of microorganisms (bacteria, fungi, viruses) residing on the skin. *Staphylococcus aureus* colonization is in-

creased in atopic dermatitis and psoriasis. *Cutibacterium acnes* plays a role in acne. Diversity is decreased in diseased skin.

Synonyms:

Skin of Color

Skin of color (Fitzpatrick IV to VI) has unique dermatologic considerations. It is more prone to hyperpigmentation disorders (post-inflammatory hyperpigmentation, melasma, acanthosis nigricans) and keloid formation. It is less prone to skin cancer but presents with more advanced disease when it occurs.

Synonyms:

Skin Pigmentation

Determined by melanin produced by melanocytes in the stratum basale. Eumelanin (brown-black) and pheomelanin (red-yellow) are the two types. Melanin production is stimulated by UV radiation through melanocyte-stimulating hormone (MSH). Fitzpatrick skin type classification (I to VI) describes pigmentation and sun response.

Synonyms:

Skin Tags

Benign fibroepithelial polyps occurring in intertriginous areas (neck, axillae, groin, under breasts). They are associated with obesity, insulin resistance, and pregnancy. Skin tags are asymptomatic but may become irritated or bleed. Treatment includes snipping, cryotherapy, electrocautery, and shave excision.

Synonyms:

Skull

Bony framework of the head with 22 bones: cranium (8: frontal, 2 parietal, 2 temporal, occipital, sphenoid, ethmoid) and facial (14). Joined by sutures: coronal, sagittal, lambdoid, squamous. The skull base has foramina for cranial nerves and vessels.

Synonyms:

Skull fracture

A break in one or more of the cranial bones from blunt force trauma, classified as linear, depressed,

basilar, or comminuted, with potential for intracranial injury and cerebrospinal fluid leak.

Synonyms:

SLAP Lesion

Superior labrum anterior to posterior tear. Associated with overhead activities, trauma. Treatment: rest, physical therapy, surgical repair if symptomatic.

Synonyms:

SLAP Tears

Tears of the superior glenoid labrum extending from anterior to posterior, sometimes involving the biceps tendon attachment. They may cause pain, clicking, or instability, especially with overhead activity.

Synonyms:

Sleep

A naturally recurring physiological state characterized by altered consciousness, reduced sensory responsiveness, and distinct brain wave patterns that is essential for physical restoration, memory consolidation, and metabolic regulation.

Synonyms:

Sleep (Geriatric)

Sleep patterns and sleep problems in older adults, including insomnia, sleep apnea, circadian changes, and medication-related disturbances.

Synonyms: Geriatric

Sleep Apnea

Repeated pauses or reductions in breathing during sleep. It may be obstructive, central, or mixed and can disturb sleep and oxygenation.

Synonyms:

Sleep Apnea (Dental)

Oral appliance for obstructive sleep apnea. Mandibular advancement device. Indications: mild to moderate OSA, CPAP intolerance.

Synonyms: Dental

Sleep Apnea (Obstructive Sleep Apnea -

OSA)

A sleep disorder characterized by repeated episodes of partial or complete upper airway obstruction during sleep (obstructive sleep apnea—OSA, most common) or cessation of respiratory drive (central sleep apnea—CSA), causing intermittent hypoxia, hypercapnia, and sleep fragmentation.

Synonyms: Obstructive Sleep Apnea - OSA

Sleep Bruxism

Repeated grinding or clenching of the teeth during sleep, which may cause tooth wear, jaw pain, or headaches.

Synonyms:

Sleep Hygiene

A set of behavioral and environmental practices designed to promote consistent, uninterrupted, and restorative sleep. Key elements include maintaining a regular sleep schedule, creating a cool, dark, and quiet sleep environment, avoiding caffeine and electronic screens before bedtime, and engaging in relaxing pre-sleep routines.

Synonyms:

Sleep Medications and Supplements

Pharmacological agents used to treat insomnia and other sleep disorders when behavioral interventions alone are insufficient.

Synonyms:

Sleep Paralysis

Temporary inability to move or speak when falling asleep or waking, while awareness is partly or fully preserved. Episodes usually last seconds to minutes and may include frightening hallucinations. Recurrent episodes can be associated with sleep deprivation, irregular sleep, narcolepsy, or other sleep disorders.

Synonyms:

Sleep Studies (Polysomnography)

Sleep tests, most commonly polysomnography, are diagnostic studies used to evaluate sleep architecture and identify sleep disorders. Polysomnography

records brain waves, eye movements, heart rate, breathing patterns, blood oxygen levels, and limb movements throughout the night in a controlled laboratory setting.

Synonyms: Polysomnography

Sleep-Related Hypoventilation

Inadequate ventilation during sleep causing elevated carbon dioxide, oxygen desaturation, or both. Causes include obesity, neuromuscular disease, chest-wall disorders, chronic lung disease, medications, and central respiratory-control abnormalities.

Synonyms:

Sleepwalking

A parasomnia involving complex behaviors or walking during partial arousal from non-REM sleep, usually with little or no memory afterward. It is more common in children and may be triggered by sleep deprivation, stress, fever, or other sleep disorders; injury prevention and evaluation of recurrent or dangerous episodes are important.

Synonyms:

Sleeve Gastrectomy

Removal of major stomach, leaving sleeve. Restrictive procedure. Lower malabsorption risk than bypass. Effective weight loss.

Synonyms:

Sliding Filament

The mechanism of muscle contraction in which actin filaments slide past myosin filaments, shortening the sarcomere without changing filament lengths. Myosin cross-bridges bind actin, undergo a power stroke using ATP hydrolysis, detach, and reattach to new actin sites in a cyclic manner.

Synonyms:

Slipped Capital Femoral Epiphysis

Displacement of the femoral head relative to the femoral neck through the growth plate (physis) in adolescents. Most common hip disorder in adolescents (10-16 years). Risk factors: obesity, male

sex, African American, and endocrine disorders (hypothyroidism, growth hormone deficiency).

Synonyms:

Slit Lamp Biomicroscopy

A fundamental ophthalmological examination technique that uses a high-intensity, adjustable slit beam of light combined with a binocular microscope to provide a magnified, stereoscopic view of the anterior segment and, with the use of auxiliary lenses, the posterior segment of the eye.

Synonyms:

Small Airway Disease

Disease affecting airways with diameter < 2 mm (bronchioles). It is the earliest site of damage in COPD and is often subclinical until advanced. It is characterized by narrowing, mucus plugging, and inflammation of small airways. PFTs may show air trapping (increased RV/TLC) before FEV1 decline.

Synonyms:

Small Bowel Follow-Through

Extended upper GI series tracking barium through small bowel.

Synonyms:

Small Bowel Obstruction

Partial or complete blockage of the small intestine. Common causes include adhesions, hernias, tumors, and inflammatory narrowing. Symptoms may include abdominal pain, vomiting, distension, and inability to pass stool or gas.

Synonyms:

Small Bowel Series

X-ray imaging of small intestine using barium. Evaluates Crohn disease, tumors, obstructions.

Synonyms:

Small Cell Carcinoma

A high-grade neuroendocrine carcinoma, most often of the lung, strongly associated with smoking. Highly responsive initially to chemotherapy and radiation but prone to rapid recurrence and early

brain metastases.

Synonyms:

Small Cell Lung Cancer

Aggressive lung cancer, strongly associated with smoking. Early metastasis, responds to chemotherapy.

Synonyms:

Small Fiber Neuropathy

Damage to small sensory and autonomic nerve fibers, often causing burning pain, tingling, altered temperature or pain sensation, abnormal sweating, or gastrointestinal and cardiovascular symptoms. Diabetes, autoimmune disease, vitamin deficiency, toxins, and inherited disorders may contribute; evaluation seeks an underlying cause.

Synonyms:

Small Intestinal Bacterial Overgrowth

An abnormal increase or change in bacteria within the small intestine, often causing bloating, abdominal pain, nausea, diarrhea, fullness, weight loss, or nutrient deficiency. Causes include impaired intestinal movement, structural problems, surgery, and some systemic diseases; persistent symptoms require medical evaluation.

Synonyms:

Small Intestine

Longest GI segment (approximately 6 meters) from pylorus to ileocecal valve. Primary nutrient digestion and absorption site. Three segments: duodenum (25 cm, chyme/bile/pancreatic enzymes), jejunum (2.5 m, prominent folds/villi for absorption), ileum (3.5 m, Peyer's patches for immunity).

Synonyms:

Small-bowel volvulus

Twisting of the small intestine around its mesentery, causing mechanical obstruction and potentially compromising mesenteric blood flow. It may be primary (idiopathic, more common in developing countries) or secondary to adhesions, malrotation, hernias, or intraluminal tumors.

Synonyms:

Smallpox

A severe contagious disease caused by variola virus. It historically caused fever followed by a characteristic widespread pustular rash; it was eradicated through vaccination, although variola virus is retained in authorized high-security laboratories.

Synonyms:

SMART Goals for Antibiotic Stewardship

Stewardship objectives that are specific, measurable, achievable, relevant, and time-limited. They define a clear antimicrobial-use or patient-outcome target and a way to monitor progress.

Synonyms:

SMILE

Small incision lenticule extraction, commonly known as SMILE, is a minimally invasive refractive surgical procedure that corrects myopia and myopic astigmatism by creating and removing a thin, disc-shaped piece of corneal stroma called a lenticule through a small incision, without creating a corneal flap.

Synonyms:

Smile Design

Planning smile based on facial features, gum display, tooth proportions. Digital smile design software available.

Synonyms:

Smith-Lemli-Opitz Syndrome

An autosomal recessive disorder of cholesterol metabolism caused by mutations in DHCR7, encoding 7-dehydrocholesterol reductase, the final enzyme in the cholesterol biosynthetic pathway.

Synonyms:

Smith-Magenis Syndrome

A genetic neurodevelopmental disorder, usually involving deletion of 17p11.2 or an RAI1 variant. It causes developmental delay, intellectual disability, distinctive facial features, sleep disturbance, behavioral dysregulation, and variable congenital abnor-

malities.

Synonyms:

Smoke Evacuator

A device that captures and filters airborne surgical plume generated by electrosurgery, laser use, or ultrasonic energy. Evacuation reduces exposure to particulate matter, toxic gases, and potentially infectious biologic material.

Synonyms:

Smoke Inhalation Injury

Pulmonary injury caused by inhalation of toxic products of combustion.

Synonyms:

Smoking Cessation

The process of stopping tobacco or nicotine use. It may involve counseling, behavioral support, medicines, or nicotine replacement.

Synonyms:

Smooth Muscle

Involuntary, non-striated muscle found in the walls of hollow organs and blood vessels. It produces slow, sustained contractions under autonomic, hormonal, and local control.

Synonyms:

Smothering

Mechanical obstruction of the external nose and mouth that prevents effective ventilation. It may be caused by a covering, compression, or an obstructing soft material; findings are often nonspecific and must be interpreted with the scene, history, and complete examination.

Synonyms:

Snapping Hip Syndrome

Hip pain/clicking from tendon snapping over bony prominence. Internal (iliopsoas), external (IT band), intra-articular (labral tear). Treatment: physical therapy, injection, surgery if refractory.

Synonyms:

Sneddon Syndrome

A non-inflammatory thrombotic vasculopathy characterized by livedo racemosa and recurrent ischemic cerebrovascular events. Headache, hypertension, cognitive impairment, and cardiac-valve abnormalities may occur; evaluation addresses vascular risk and autoimmune or thrombophilic causes.

Synonyms:

Snoring and Sleep Apnea

Snoring is the sound produced by vibrating soft tissues in the upper airway during sleep, often resulting from partial airway obstruction. Sleep apnea is a more serious condition characterized by repeated episodes of complete or partial airway collapse during sleep, leading to intermittent hypoxia, frequent arousal, and fragmented sleep.

Synonyms:

SNRIs

Serotonin-norepinephrine reuptake inhibitors are a class of antidepressant drugs that inhibit the reuptake of both serotonin and norepinephrine from the synaptic cleft, increasing both serotonergic and noradrenergic neurotransmission. Common SNRIs include venlafaxine, duloxetine, desvenlafaxine, and levomilnacipran.

Synonyms:

Social Anxiety Disorder

Marked fear or anxiety about one or more social situations in which the individual may be scrutinized by others. The individual fears acting in a way or showing anxiety symptoms that will be negatively evaluated.

Synonyms:

Social Isolation

Limited contact or interaction with other people. Persistent isolation may adversely affect mental and physical health.

Synonyms:

Sodium

Major extracellular cation. Fluid balance, nerve

function, muscle contraction. Recommended intake <2300 mg/day. Excess associated with hypertension. Sources: salt, processed foods.

Synonyms:

Sodium Bicarbonate Therapy

Alkalinizing agent for metabolic acidosis in CKD. Target serum bicarbonate greater than 22 mEq/L. Slows CKD progression and improves muscle wasting. Dose titrated to serum levels.

Synonyms:

Sodium Polystyrene Sulfonate

Potassium-binding resin for hyperkalemia. Risk: colonic necrosis, especially with sorbitol.

Synonyms:

Soft Markers for Aneuploidy

Sonographic findings in the second trimester that are common in normal fetuses but have a statistically higher prevalence in aneuploid fetuses (especially trisomy 21).

Synonyms:

Soft Tissue Injury

Damage to muscles, tendons, ligaments, fascia, skin, or other non-bony tissues, often caused by trauma or overuse.

Synonyms:

Soft Tissue Rheumatism

Pain conditions affecting muscles, tendons, ligaments, bursae. Examples: frozen shoulder, lateral epicondylitis, rotator cuff tendinopathy. Treatment: rest, physiotherapy, injections, surgery if refractory.

Synonyms:

Soft Tissue Sarcoma

A group of malignant tumors arising in muscle, fat, fibrous tissue, blood vessels, or other connective tissues. Treatment depends on the subtype, location, stage, and relationship to nearby structures.

Synonyms:

Soft Tissue Tumors

Lipoma: most common benign soft tissue tumor, subcutaneous, encapsulated. Liposarcoma: most common malignant STS in adults, deep, subtypes (well-differentiated/dedifferentiated, myxoid/round cell, pleomorphic). Synovial sarcoma: t(X;18), SS18-SSX, young adults, deep extremity, "triple sign" on MRI.

Synonyms:

Soft-tissue calcinosis

The deposition of insoluble calcium phosphate salts in soft tissues such as skin, subcutaneous tissue, muscles, and tendons, which may be metastatic (due to hypercalcaemia or hyperphosphataemia), dystrophic (in damaged or devitalised tissue), or idiopathic.

Synonyms:

Soil Contamination

Environmental toxicology. Heavy metals, pesticides, industrial waste. Remediation: excavation, bioremediation, containment.

Synonyms:

Solar Urticaria

A rare form of inducible urticaria triggered by ultraviolet or visible light, producing pruritic erythema and wheals within minutes on exposed skin. Symptoms usually improve after removal from the light source. Diagnosis may involve phototesting.

Synonyms:

Soleus Muscle

Broad flat deep posterior leg muscle from posterior tibia, fibula, and tendinous arch to the calcaneus via the Achilles tendon. Innervated by tibial nerve (S1-S2). Powerful ankle plantarflexor, the primary anti-gravity muscle for upright posture. One-joint muscle.

Synonyms:

Solitary Pulmonary Nodule

Single, well-circumscribed lesion < 3 cm surrounded by normal lung. Differential includes granuloma,

hamartoma, and carcinoma. PET-CT and tissue sampling help determine etiology.

Synonyms:

Solution

A homogeneous mixture in which a drug (solute) is dissolved in a liquid vehicle (solvent, usually water, saline, alcohol, or polyethylene glycol). Solutions provide rapid absorption (oral solutions, parenteral IV solutions), ease of swallowing, and flexible dosing; they require preservatives and have limited stability.

Synonyms:

Solvent Exposure

Contact with organic solvents by inhalation, ingestion, or skin absorption. Acute exposure may cause irritation or central nervous system effects; repeated exposure may damage organs.

Synonyms:

Somatic Mutation

Acquired genetic change in cancer cells. Not inherited.

Synonyms:

Somatic Symptom Disorder

Characterized by one or more somatic symptoms that are distressing or result in significant disruption of daily life, accompanied by excessive thoughts, feelings, or behaviors related to the somatic symptoms.

Synonyms:

Somatic Variant

A DNA variant acquired after conception in a non-germline cell lineage. It is not usually transmitted to offspring and may produce mosaic disease or contribute to cancer when it affects growth-control pathways.

Synonyms:

Somatostatin Analog

A class of synthetic peptides that mimic the actions of native somatostatin, a hormone that inhibits the secretion of growth hormone, thyroid-stimulating

hormone, insulin, glucagon, gastrin, and other GI hormones.

Synonyms:

Somatostatinoma

Rare pancreatic or duodenal tumor producing somatostatin causing diabetes, gallstones, steatorrhea, and hypochlorhydria from suppression of insulin, gallbladder contraction, pancreatic enzymes, and gastric acid respectively. Diagnosed by elevated somatostatin levels. Treatment is surgical resection for localized disease.

Synonyms:

Somatotropic pituitary adenoma

A benign neoplasm of the anterior pituitary arising from growth hormone-secreting cells, causing acromegaly in adults and gigantism in children if occurring before epiphyseal closure.

Synonyms:

Sonographer

A healthcare professional trained to perform ultrasound scans (sonography).

Synonyms:

Sore Throat

Pain, scratchiness, or irritation of the throat, most often caused by pharyngitis, typically viral but also bacterial, allergic, irritant, reflux, voice strain, traumatic, or neoplastic.

Synonyms:

Source Control

A procedure or intervention that eliminates, drains, debrides, or otherwise controls an anatomic focus of infection or contamination. Examples include drainage of an abscess, removal of infected tissue or device, and repair of a perforation.

Synonyms:

Soy Protein Intolerance

Adverse gastrointestinal reaction to soy proteins, most often seen in infants and young children. It may cause vomiting, diarrhoea, abdominal pain,

blood or mucus in the stool, feeding difficulty, or poor growth.

Synonyms:

Spasm

A sudden, involuntary, sustained or repetitive contraction of a muscle or group of muscles.

Synonyms:

Spasticity

A velocity-dependent increase in muscle tone caused by hyperexcitability of the stretch reflex after an upper motor-neuron lesion. It may impair movement, hygiene, positioning, comfort, gait, and function.

Synonyms:

Spasticity Management

Assessment and treatment of abnormal muscle stiffness and spasms. Measures may include stretching, therapy, positioning, medicines, injections, or surgery.

Synonyms:

Spatial Resolution

Ability to distinguish small objects. PET: 4-6 mm. SPECT: 8-12 mm.

Synonyms:

Special Care Baby Unit

A ward within a hospital that provides specialist care for newborn babies who need additional support but not intensive care.

Synonyms:

Special Stain

A histochemical stain that highlights a particular tissue component, organism, or deposited substance not adequately demonstrated by routine hematoxylin and eosin. Examples include periodic acid-Schiff, Ziehl-Neelsen, Congo red, and Gomori methenamine silver stains.

Synonyms:

Specific Absorbed Fraction

Fraction of emitted energy absorbed in target organ.

Synonyms:

Specific Activity

Radioactivity per unit mass of compound. High specific activity essential for receptor targeting (low receptor density).

Synonyms:

Specific Gravity

Ratio of urine density to water density reflecting solute concentration. Normal 1.005 to 1.030. Less precise than osmolality but faster to measure. Elevated in dehydration, glycosuria, proteinuria, and contrast. Decreased in diabetes insipidus and fluid overload.

Synonyms:

Specific Learning Disorder

A neurodevelopmental disorder causing persistent difficulty acquiring or using academic skills in reading, writing, or mathematics. The difficulties interfere with functioning and are not better explained by another condition or inadequate instruction.

Synonyms:

Specific Phobia

A disorder involving marked, persistent fear or anxiety about a particular object or situation. The fear is excessive relative to the actual danger, leads to avoidance or intense distress, and interferes with daily functioning.

Synonyms:

Specificity

The proportion of people who do not have a disease who obtain a negative test result. A highly specific test has few false-positive results and a positive result can provide strong evidence for disease when applied to the intended population.

Synonyms:

Specimen Adequacy

The degree to which a collected clinical specimen is

sufficient in quantity, correctly identified, properly transported, and representative of the site being tested. Inadequacy can cause invalid, misleading, or falsely negative results.

Synonyms:

Specimen Container

Container for collecting specimens. Types: urine cup, stool container, sputum cup, biohazard bag.

Synonyms:

Specimen Cup

Container for urine or stool samples.

Synonyms:

Specimen Transport Medium

A formulated medium that preserves the viability and diagnostic characteristics of microorganisms during transport from the collection site to the laboratory. The required medium, temperature, container, and transport time depend on the specimen and suspected pathogen.

Synonyms:

SPECT Scan (Single Photon Emission CT)

Nuclear medicine imaging using gamma-emitting radioisotopes (Tc-99m, Tl-201, I-123) with a rotating gamma camera to create 3D images.

Synonyms: Single Photon Emission CT

Spectral Analysis

Energy discrimination to reject scatter. Energy window typically 20% centered on photopeak.

Synonyms:

Speculum

Device for opening body passage for examination. Types: vaginal, nasal, ear, anal.

Synonyms:

Speech

Phonation and articulation. Teeth, tongue, lips, palate involved. Dental prostheses may affect speech

initially.

Synonyms:

Speech Delay

A delay in language development compared to peers: by 12 months—no single words; 18 months—<10-20 words/no word combinations by 24 months; or regression.

Synonyms:

Speech Discrimination

Speech discrimination testing, also known as word recognition scoring, measures the ability to understand speech at a comfortable listening level, and it is an important component of the audiometric evaluation that provides information about cochlear and neural function beyond what pure tone audiometry alone can reveal.

Synonyms: word recognition scoring, measures the.

Speech Therapy

Assessment and treatment of disorders affecting speech, language, voice, communication, or swallowing.

Synonyms:

Speech-Language Pathology Assessment

Evaluate communication, swallowing, cognition. Standardized tests, clinical observation.

Synonyms:

Sperm

The male gamete (reproductive cell), produced in the seminiferous tubules of the testis through spermatogenesis. Sperm consists of: head (contains the haploid nucleus and acrosome containing enzymes for egg penetration), midpiece (contains mitochondria for energy), and tail (flagellum for motility).

Synonyms:

Spermatocele

Benign, painless, fluid-filled cystic retention cavity arising from the epididymis (usually the head/caput), containing avascular fluid and non-

viable spermatozoa. Etiology: obstruction of an efferent ductule of the epididymis.

Synonyms:

Spermatogonium

A germ cell in the testis that divides and develops into primary spermatocytes.

Synonyms:

Spermarche

The onset of sperm production and the first ejaculation, marking an important stage of male puberty.

Synonyms:

Spermatorrhea

Involuntary discharge of semen, especially without orgasm.

Synonyms:

Sphenoid Bone

Butterfly-shaped bone at the skull base, with body (sphenoid sinuses), greater/lesser wings, and pterygoid processes. The sella turcica houses the pituitary gland.

Synonyms:

Sphenoid Sinusitis

Inflammation or infection of the sphenoid sinus, which lies deep behind the nasal cavity. It may cause deep headache, facial pain, or visual symptoms and can rarely spread to nearby nerves or the brain; persistent or severe symptoms require medical assessment.

Synonyms:

Sphenoidal Sinus

A paired air-filled sinus within the sphenoid bone at the base of the skull. It lies near important nerves and blood vessels, so inflammation or surgery in this area requires careful assessment.

Synonyms:

Spherocytes

Small, dark, sphere-shaped red blood cells lacking

central pallor. Formed when RBC membrane is lost without loss of volume, reducing the surface area-to-volume ratio.

Synonyms:

Sphygmomanometer

An instrument used to measure arterial blood pressure, consisting of an inflatable cuff and a pressure-measuring system. Manual devices use Korotkoff sounds; automated devices use an electronic sensor. Correct cuff size and technique are essential for reliable measurement.

Synonyms:

Spider angioma

A benign vascular lesion consisting of a central arteriole with radiating small vessels, resembling a spider, most commonly found on the face, neck, and upper trunk. They are associated with hyperestrogenic states including pregnancy, oral contraceptive use, and chronic liver disease, particularly cirrhosis.

Synonyms:

Spider bite

A cutaneous envenomation resulting from the bite of a spider, ranging from minor local reactions to severe systemic envenomation. The brown recluse spider may cause loxoscelism with necrotic skin lesions, while the black widow spider may cause latrodectism with muscle cramps, hypertension, and autonomic dysfunction.

Synonyms:

Spina Bifida

A neural tube defect: incomplete closure of the neural tube (days 22-28), causing spinal cord/meningeal malformation.

Synonyms:

Spina Bifida Meningocele

A form of spina bifida where the meninges (but not neural tissue) herniate through a vertebral defect, forming a CSF-filled sac. The spinal cord remains in its normal position and is not involved. Presents as a visible, fluid-filled, translucent sac on the back,

typically without neurologic deficits.

Synonyms:

Spina Bifida Myelomeningocele

The most severe form of spina bifida, where both the meninges and neural tissue (spinal cord and nerve roots) herniate through a vertebral defect. Presents as a visible, flat or sac-like lesion on the back with neurologic deficits below the level of the lesion (paralysis, sensory loss, bowel/bladder dysfunction).

Synonyms:

Spina Bifida Occulta

A usually mild form of spina bifida in which the vertebral arch does not fully close without herniation of the spinal cord or meninges. It is often asymptomatic but may be associated with a skin dimple, hair tuft, or other finding over the lower spine.

Synonyms:

Spinal Analgesia

Intrathecal administration of a local anesthetic and/or opioid primarily to provide analgesia, often with limited motor block. Intrathecal opioids can extend postoperative pain relief but may cause pruritus, urinary retention, respiratory depression, and other opioid effects.

Synonyms:

Spinal Anesthesia

Injection of local anesthetic into the lumbar subarachnoid space to produce temporary sensory, motor, and sympathetic blockade below the level of injection. Complications include hypotension, bradycardia, urinary retention, post-dural puncture headache, high or total spinal block, infection, and bleeding.

Synonyms:

Spinal Anesthesia for Cesarean Delivery

A neuraxial anesthetic technique used for elective and many emergency cesarean deliveries. A small dose of local anesthetic (hyperbaric bupivacaine 12-

15 mg) with opioid (fentanyl 15-25 mcg, morphine 0.15-0.25 mg) is injected into the subarachnoid space. Produces rapid surgical anesthesia (T4 sensory level for cesarean).

Synonyms:

Spinal Angiography

Contrast imaging of spinal vessels. Evaluates vascular malformations.

Synonyms:

Spinal Cord

The cylindrical bundle of nerve fibers extending from the medulla oblongata (at the foramen magnum) to the conus medullaris (L1-L2 in adults), surrounded by the vertebral column and meninges (dura mater, arachnoid mater, pia mater). The spinal cord is divided into 31 segments: 8 cervical, 12 thoracic, 5 lumbar, 5 sacral, and 1 coccygeal.

Synonyms:

Spinal Cord Compression

Oncologic emergency. Back pain, weakness, sensory loss, bowel/bladder dysfunction. MRI diagnostic. Treatment: steroids, radiation, surgery.

Synonyms:

Spinal Cord Injury

Spinal cord injury: ASIA impairment scale (A-E). Complete (ASIA A) vs incomplete.

Synonyms:

Spinal dysraphism

A group of congenital malformations resulting from incomplete closure of the neural tube during embryonic development, affecting the spinal cord and overlying vertebral structures. Includes open defects (myelomeningocele) and closed defects (spina bifida occulta, lipomyelomeningocele, dermal sinus).

Synonyms:

Spinal Epidural Abscess

A collection of pus in the spinal epidural space, usually caused by haematogenous or contiguous infection. It may present with severe local back pain,

fever, spinal tenderness, radicular pain, neurological deficit, or sphincter disturbance, although the classic triad is often incomplete.

Synonyms:

Spinal Fusion

Surgical union of two or more vertebrae using bone graft or bone graft substitutes with instrumentation (rods, screws, cages). Approaches: posterior (posterolateral fusion, transforaminal lumbar interbody fusion TLIF), anterior (anterior lumbar interbody fusion ALIF), and lateral (extreme lateral interbody fusion XLIF).

Synonyms:

Spinal Muscular Atrophy

An inherited disorder causing progressive loss of motor neurons and muscle weakness, often beginning in infancy or childhood but sometimes appearing in adulthood. Severity varies; breathing, swallowing, and mobility may be affected. Early diagnosis allows genetic counseling and disease-modifying care.

Synonyms:

Spinal Nerve

A mixed nerve formed by the union of dorsal and ventral roots as it exits the vertebral canal. There are 31 pairs, carrying sensory, motor, and autonomic fibers to and from the spinal cord.

Synonyms:

Spinal Precautions

Immobilization of spine in trauma patients to prevent neurological injury. Indications: mechanism (fall >3 feet, MVC, gunshot), altered mental status, focal neurological deficit, midline spinal tenderness. Technique: cervical collar, backboard, log roll. Clearance: NEXUS criteria or Canadian C-spine rule.

Synonyms:

Spinal Shock

A state of transient physiological areflexia and flaccid paralysis occurring immediately after acute spinal cord injury, below the level of the lesion.

Synonyms:

Spinal Stenosis

Narrowing of the spinal canal causing compression of the spinal cord or nerve roots. Lumbar stenosis (most common): neurogenic claudication (leg pain/weakness with walking, relieved by sitting/leaning forward), often bilateral.

Synonyms:

Spindle-cell sarcoma

A group of sarcomas characterized by elongated, spindle-shaped malignant cells. It includes entities like leiomyosarcoma, fibrosarcoma, and malignant peripheral nerve sheath tumor, with variable behavior.

Synonyms:

Spine

The vertebral column, consisting of stacked vertebrae that support the body and protect the spinal cord.

Synonyms:

Spine Disorders

The spine, or vertebral column, is a complex bony and soft-tissue structure that provides axial support, protects the spinal cord, and enables flexible movement of the trunk. It consists of 33 vertebrae divided into cervical, thoracic, lumbar, sacral, and coccygeal regions, separated by intervertebral discs that act as shock absorbers.

Synonyms:

Spinocerebellar Ataxias

A group of autosomal dominant neurodegenerative disorders characterized by progressive cerebellar ataxia, often with additional neurological features. Over forty different SCA types have been identified, with SCA1, SCA2, SCA3 (Machado-Joseph disease, the most common worldwide), SCA6, and SCA7 being the most prevalent.

Synonyms:

Spirochaete

A slender, spiral-shaped bacterium of the group Spirochaetes.

Synonyms:

Spirochete

A thin, coiled gram-negative bacterium with internal periplasmic flagella conferring corkscrew motility, requiring darkfield or special stains. Pathogenic genera include *Treponema* (syphilis), *Borrelia* (Lyme disease, relapsing fever), and *Leptospira* (leptospirosis), diagnosed mainly by serology and darkfield microscopy.

Synonyms:

Spirometry

Most common PFT measuring air volume and flow during forced breathing. Key measurements: FVC, FEV1, FEV1/FVC ratio. Used to diagnose and classify obstructive and restrictive diseases.

Synonyms:

Spirolactone

A nonselective aldosterone (mineralocorticoid) receptor antagonist and potassium-sparing diuretic. Used for heart failure with reduced ejection fraction (NYHA II-IV—reduces mortality, often with ACE/ARB + beta-blocker), resistant hypertension, primary hyperaldosteronism, ascites in cirrhosis, and acne/hirsutism in women (off-label).

Synonyms:

Spleen

Largest lymphoid organ in the left upper quadrant under ribs 9-11, approximately 12 cm long and 150-200 g. Red pulp filters blood (removing old/damaged RBCs and platelets); white pulp mounts immune responses (lymphoid follicles and periarteriolar lymphoid sheaths). Enclosed by a fibroelastic capsule with trabeculae.

Synonyms:

Spleen Hilum

Concave medial surface where the tortuous splenic artery (celiac trunk branch) enters and splenic vein

exits, with lymphatics and nerves. Artery divides into 5 segmental branches at the hilum (basis for partial splenectomy). Splenic vein joins the superior mesenteric vein forming the portal vein.

Synonyms:

Splenectomy

Indications: trauma (grade IV/V, hemodynamic instability), ITP (refractory), hereditary spherocytosis/elliptocytosis, thalassemia major, sickle cell (sequestration crisis), TTP (refractory), lymphoma staging (historical), hypersplenism, splenic cysts/tumors, Wandering spleen. Laparoscopic preferred.

Synonyms:

Splenic cyst

A fluid-filled lesion within the spleen, classified as true cysts with an epithelial lining, including congenital, epidermoid, and dermoid cysts, or pseudocysts without a lining, typically resulting from trauma, infection, or pancreatitis. Most are asymptomatic and discovered incidentally on imaging.

Synonyms:

Splenic Infarction

Splenic infarction occurs when the splenic artery or its branches are occluded, typically by emboli from the heart. The spleen has end-arterial supply with limited collateral circulation, making it vulnerable to infarction even with small vessel occlusion.

Synonyms:

Splenic Rupture

Traumatic or spontaneous splenic injury. CT diagnosis. May require splenectomy.

Synonyms:

Splenomegaly

Enlargement of the spleen beyond its normal size (12 cm, weight 150–200 g). Splenomegaly can be detected by percussion (Castell sign—dullness in the lowest intercostal space on inspiration) and palpation (normal spleen is not palpable; a palpable spleen indicates at least 2–3 times enlargement).

Synonyms:

Splice-Site Variant

A variant affecting the sequences required for accurate removal of introns and joining of exons during RNA processing. It may cause abnormal transcripts, exon skipping, intron retention, or reduced functional protein.

Synonyms:

Splint

Immobilizes injured body part. Types: aluminum, plastic, canvas, pneumatic.

Synonyms:

Splint (Dental)

Fixation of mobile teeth or fractured tooth. Wire and composite, orthodontic bracket splint.

Synonyms: Dental

Splinter Hemorrhages

Linear hemorrhages under the nail bed, oriented longitudinally. In infective endocarditis, they are caused by septic microemboli to the nail bed capillaries. They are a minor Duke criterion. Splinter hemorrhages can also result from trauma, psoriasis, and systemic vasculitis.

Synonyms:

Splitting

A psychological defense pattern in which a person or situation is viewed as entirely good or entirely bad, with difficulty integrating positive and negative qualities. It can occur in several mental-health conditions and is not diagnostic by itself.

Synonyms:

Spondyloarthritis

Group of inflammatory arthritis associated with HLA-B27. Includes ankylosing spondylitis, psoriatic arthritis, reactive arthritis, enteropathic arthritis. Features: axial involvement, enthesitis, dactylitis.

Synonyms:

Spondylolisthesis

Forward slippage of one vertebral body relative to the vertebra below it. Isthmic (Type II, most common in children/adolescents): defect in pars interarticularis (spondylolysis), often L5-S1. Degenerative (Type III, most common in adults): facet joint and disc degeneration, often L4-L5.

Synonyms:

Sponge (Vascular)

A sterile absorbent material used during vascular procedures to control minor bleeding or protect tissue.

Synonyms: Vascular

Spontaneous Bacterial Peritonitis

Infection of ascitic fluid without an identifiable intra-abdominal source representing a serious complication of cirrhosis with ascites. The pathogenesis involves impaired immune function, bacterial translocation from the intestinal lumen, and seeding of ascitic fluid which provides a favorable medium for bacterial growth.

Synonyms:

Spontaneous Breathing Trial

A period of unsupported breathing to assess a patient's readiness for extubation. The patient breathes through a T-piece or with minimal pressure support for 30–120 minutes. Successful SBT predicts successful extubation.

Synonyms:

Spontaneous Pneumothorax

Pneumothorax without trauma. Primary in healthy individuals; secondary with underlying lung disease. Treatment depends on size.

Synonyms:

Spore

A resistant reproductive or survival structure produced by some fungi and bacteria. Bacterial endospores can survive unfavorable environmental conditions and germinate when conditions become suitable. Their resistance has important implications

for infection control and sterilization.

Synonyms:

Sporotrichosis

A subcutaneous fungal infection caused by *Sporothrix schenckii*, a dimorphic fungus found in soil, moss, and plant matter (rose thorns, sphagnum moss).

Synonyms:

Sports Rehabilitation

Rehabilitation that restores safe movement and performance after a sports-related injury.

Synonyms:

Sprain

An injury to a ligament (connective tissue connecting bone to bone) caused by excessive stretching or tearing. Grading: Grade I (mild stretching, microscopic tears), Grade II (partial tear with laxity), Grade III (complete tear with instability).

Synonyms:

Sprengel Deformity

A congenital elevation of the scapula due to failure of the scapula to descend from its embryonic cervical position to its normal thoracic position during weeks 9-12 of gestation. The scapula is higher, smaller, and rotated inferiorly compared to the normal side. Range of motion is limited, especially in shoulder abduction.

Synonyms:

Spur-cell hemolytic anemia

A severe hemolytic anemia seen in advanced liver disease where acanthocytosis develops due to altered membrane cholesterol, causing premature red cell destruction in the spleen.

Synonyms:

Sputum

Mucus or phlegm produced in the lower airways and expelled by coughing. Its amount, color, odor, or blood content may provide clues to infection, inflammation, or bleeding, but appearance alone

does not establish a diagnosis.

Synonyms:

Squamous Cell Carcinoma

Cutaneous squamous cell carcinoma is a malignant keratinocyte tumor commonly arising on chronically sun-exposed skin or in areas of chronic inflammation or immunosuppression. It may present as a scaly, indurated, hyperkeratotic papule, plaque, or ulcer.

Synonyms:

Squint

A misalignment of the visual axes of the two eyes, where one eye is deviated inward (esotropia), outward (exotropia), upward (hypertropia), or downward (hypotropia) relative to the other, disrupting binocular vision and potentially leading to amblyopia in children. See Strabismus.

Synonyms:

SSRIs

Selective serotonin reuptake inhibitors are a class of antidepressant drugs that selectively inhibit the reuptake of serotonin from the synaptic cleft into the presynaptic neuron by blocking the serotonin transporter, increasing serotonergic neurotransmission.

Synonyms:

ST Segment

The isoelectric period between ventricular depolarization (QRS) and repolarization (T wave). It corresponds to the plateau phase of ventricular action potentials. ST segment elevation (>1 mm in limb leads or >2 mm in precordial leads) suggests acute myocardial infarction, pericarditis, or early repolarization.

Synonyms:

ST-Segment Elevation

Elevation of the ECG ST segment above the isoelectric baseline, reflecting abnormal ventricular repolarization. It may indicate acute coronary occlusion but can also occur in pericarditis, early repolarization, ventricular aneurysm, or other conditions;

interpretation requires clinical context and serial testing.

Synonyms:

St. John's Wort

Herbal supplement. CYP3A4 inducer, reduces efficacy of many drugs (oral contraceptives, warfarin, antiretrovirals).

Synonyms:

Stab Wound

A penetrating sharp-force injury in which wound track depth exceeds skin defect length, produced by a pointed or sharp-edged implement. The skin defect approximates blade width only when perpendicular to Langer's lines, and a single-edged blade produces one sharp and one blunt end.

Synonyms:

Stable Disease

Cancer neither growing nor shrinking significantly.

Synonyms:

Stage I

A cancer stage that generally indicates limited disease, although the exact definition and prognosis depend on the cancer type and staging system.

Synonyms:

Stage II

A cancer stage whose meaning depends on the cancer type and may indicate a larger primary tumor or limited local spread without distant metastasis.

Synonyms:

Stage III

A cancer stage that often indicates more extensive local or regional disease, with the precise criteria depending on the cancer type.

Synonyms:

Stage IV

A cancer stage that generally indicates spread to distant organs or sites. Prognosis and treatment

vary by cancer type and individual factors.

Synonyms:

Stages of Labor

Four stages describing the progression from uterine contractions to delivery of the placenta. First stage: onset of regular contractions to full cervical dilatation (10 cm). Second stage: full dilatation to delivery of the baby. Third stage: delivery of the baby to delivery of the placenta.

Synonyms:

Staghorn Calculus

A large renal stone that occupies the renal pelvis and extends into at least two calyces, creating a cast of the collecting system. Composition: struvite (magnesium ammonium phosphate), associated with urease-producing bacteria (*Proteus mirabilis*, *Klebsiella*, *Pseudomonas*) causing urinary tract infection.

Synonyms:

Staining

A laboratory technique applying dyes to microbial smears or tissue sections to visualise microorganisms and reveal structural characteristics. Major methods include Gram, acid-fast, Giemsa, and fluorescent stains, providing rapid presumptive identification from clinical specimens and guiding initial empiric therapy.

Synonyms:

Stainless Steel

Alloy for preformed crowns, orthodontic bands, instruments. Corrosion-resistant.

Synonyms:

Standard of Care

The conduct, skill, diligence, and judgment a reasonably prudent practitioner of the same specialty would exercise under similar circumstances; the benchmark for medical negligence. It is established through guidelines, peer practice, and expert testimony rather than fixed statute.

Synonyms:

Standard Precautions

Precautions for all patient care. Examples: hand hygiene, PPE, safe injection, respiratory hygiene.

Synonyms:

Standardized Uptake Value

Quantitative PET measure: tissue activity divided by injected dose per body weight. Normalizes for body size, injection dose. SUVmax: maximum pixel value in lesion. SUVmean: average lesion uptake. Background: blood pool, liver.

Synonyms:

Stapedectomy

A microsurgical procedure performed to treat otosclerosis, a condition characterized by abnormal bone remodeling in the otic capsule that fixes the stapes footplate in the oval window, preventing its normal vibratory movement and causing progressive conductive hearing loss.

Synonyms:

Stapes

The stapes, commonly known as the stirrup, is the smallest bone in the human body and the most medially positioned ossicle in the middle ear, articulating with the incus at the incudostapedial joint and transmitting sound vibrations to the inner ear through its footplate, which is attached to the oval window by the annular ligament.

Synonyms:

Staph Infection

Infections caused by *Staphylococcus aureus* (and coagulase-negative staphylococci), a gram-positive coccus in clusters.

Synonyms:

Staphylococcal Infection

An infection caused by *Staphylococcus aureus* or another *Staphylococcus* species. It may affect the skin, bone, joints, lungs, heart valves, blood, or other tissues. Diagnosis and antimicrobial treatment depend on the site, severity, and susceptibility of the organism.

Synonyms:

Staphylococcal Pneumonia

Severe pneumonia from *S. aureus*, often post-influenza. May cause necrotizing pneumonia, lung abscess, and empyema.

Synonyms:

Staphylococcal scalded skin

A toxin-mediated *Staphylococcus aureus* infection causing superficial separation and tenderness of the outer skin, usually in infants or young children. Widespread redness and fragile blisters may rupture to leave painful, moist areas resembling a scald burn and require prompt medical assessment.

Synonyms:

Staphylococcus aureus

A gram-positive, catalase-positive, coagulase-positive coccus that causes a wide range of infections including skin infections, pneumonia, endocarditis, and osteomyelitis. *S. aureus* produces numerous virulence factors including toxins, enzymes, and surface proteins. MRSA strains carry the *mecA* gene encoding PBP2a.

Synonyms:

Staple (Vascular)

A small metal or polymer device used to close tissue or connect vascular structures.

Synonyms: Vascular

Stargardt Disease

The most common inherited macular dystrophy, usually autosomal recessive and caused by ABCA4 gene mutations. Presents in childhood or adolescence with progressive central vision loss, retinal flecks, and bull's-eye maculopathy; no curative treatment exists.

Synonyms:

Starling Forces

Starling forces describe the balance of hydrostatic and oncotic pressures that govern fluid movement across capillary walls, determining the distribution

of fluid between the intravascular and extravascular compartments.

Synonyms:

Statin

An inhibitor of HMG-CoA reductase that lowers hepatic cholesterol synthesis and increases hepatic LDL-receptor expression. Statins reduce atherosclerotic cardiovascular events; adverse effects include muscle symptoms, rare severe myopathy, and liver-enzyme abnormalities.

Synonyms:

Statins in Diabetes

Use of HMG-CoA reductase inhibitors to reduce atherosclerotic cardiovascular risk in people with diabetes. The decision, intensity, and treatment target are individualized according to age, cardiovascular risk, kidney function, and other clinical factors.

Synonyms:

Station

The relationship of the fetal presenting part to the level of the ischial spines, measured in centimeters.

Synonyms:

Status Asthmaticus

A severe, life-threatening asthma exacerbation unresponsive to standard bronchodilator therapy. Characterized by severe airflow obstruction, hypoxemia, and hypercapnia. Treatment includes continuous nebulized albuterol, IV magnesium sulfate, systemic corticosteroids, and possibly intubation.

Synonyms:

Status Epilepticus

A seizure lasting at least 5 minutes or recurrent seizures without recovery to baseline consciousness between them, requiring urgent treatment. Ongoing convulsive or nonconvulsive status can cause neuronal injury, systemic complications, and death.

Synonyms:

Steady State

The condition where the rate of drug administration equals the rate of elimination, resulting in constant average plasma concentrations with repeated dosing. During regular dosing at fixed intervals, steady state is achieved after approximately 4 to 5 half-lives, regardless of the dosing frequency or dose size.

Synonyms:

Steal Syndrome

Ischemia of distal extremity due to blood flow diversion to bypass graft or AV fistula. Most common: upper extremity after AV fistula creation. Symptoms: hand pain, pallor, numbness, weakness. Treatment: banding, ligation, revision.

Synonyms:

Steatorrhea

The passage of excess fat in the stool, causing greasy, pale, foul-smelling, floating stools—a hallmark of fat malabsorption.

Synonyms:

Stem Cell Transplantation

Hematopoietic stem cell transplantation (HSCT) replaces diseased or ablated bone marrow with healthy donor or autologous stem cells.

Synonyms:

STEMI

ST-elevation myocardial infarction: transmural myocardial necrosis from acute total occlusion of a coronary artery, an emergency requiring immediate reperfusion. ECG: ST-segment elevation in contiguous leads (or new LBBB); troponin elevated.

Synonyms:

Stenosis

Narrowing of vessel lumen. Causes: atherosclerosis, thrombosis, dissection, external compression. Symptoms depend on location and severity. Treatment: medical, angioplasty, stenting, bypass.

Synonyms:

Stenosis of the left anterior descending

artery

Narrowing of the left anterior descending coronary artery, which can reduce blood flow to the front of the heart and cause ischemia.

Synonyms:

Stenotrophomonas maltophilia resistance

Resistance in *Stenotrophomonas maltophilia* results from intrinsic and acquired mechanisms that limit the activity of several antibiotics. Treatment should be guided by the site of infection, susceptibility testing, illness severity, and specialist advice.

Synonyms:

Stent

Tubular scaffold maintaining vessel/duct patency. Materials: metal (stainless steel, cobalt-chrome, nitinol), polymer. Types: bare-metal, drug-eluting. Applications: coronary, peripheral, biliary, ureteral, tracheal. Complications: restenosis, thrombosis, migration, fracture.

Synonyms:

Stent (Vascular)

A small mesh or tube placed inside a narrowed or blocked vessel to help keep it open.

Synonyms: Vascular

Stent Balloon (Vascular)

A balloon catheter used to expand a stent against the wall of a blood vessel.

Synonyms: Vascular

Stent Graft

A fabric-covered stent placed inside a blood vessel to reinforce the vessel wall or exclude an aneurysm from blood flow.

Synonyms:

Stent Placement

Image-guided deployment of stent. Vascular, biliary, ureteral, esophageal. Maintains patency.

Synonyms:

Stent-Graft (Vascular)

A fabric-covered vascular stent used to reinforce a vessel or exclude an aneurysm or leak.

Synonyms: Vascular

Stenting

Placement of mesh tube to keep vessel open. Drug-eluting stents reduce restenosis.

Synonyms:

Stepping Reflex

A primitive reflex present from birth to 2 months, elicited by holding the infant upright with feet touching a flat surface. The infant makes stepping-like movements as if walking. Disappears by 2 months as voluntary motor control develops. Reappears around 9-10 months as voluntary walking emerges.

Synonyms:

Stereotactic Biopsy

Biopsy using stereotactic guidance. Breast, brain, lung.

Synonyms:

Stereotactic Body Radiation Therapy

A highly precise form of external radiation delivering high-dose ablative treatment in few fractions, used for early-stage lung cancer and selected liver, pancreatic, spinal, and kidney tumors.

Synonyms:

Stereotactic Radiosurgery

Single high-dose radiation to small target. Used for brain metastases, AVMs, acoustic neuroma.

Synonyms:

Sterile Field

A designated area maintained free of viable microorganisms during an invasive procedure. Only sterile equipment and materials may contact the field or the sterile portions of instruments.

Synonyms:

Sterile Site

A body site or specimen type expected to contain no viable microorganisms in health, such as blood, cerebrospinal fluid, synovial fluid, or tissue from a closed space. Recovery of a pathogen from a sterile site is generally clinically significant, subject to contamination assessment.

Synonyms:

Sterilisation

A permanent method of contraception. Female sterilization (tubal occlusion): the fallopian tubes are blocked or cut to prevent the egg from reaching the uterus, performed by laparoscopy (clip or diathermy) or at the time of cesarean delivery.

Synonyms:

Sterilization

A process eliminating all microbial life including spores, achieving a sterility assurance level of at least 10^{-6} .

Synonyms:

Sternoclavicular Joint

A saddle-type synovial joint between the clavicle and manubrium of the sternum. It is the only bony connection between the upper limb and axial skeleton and permits movement of the shoulder girdle.

Synonyms:

Sternocleidomastoid Muscle

Strap-like anterior neck muscle from manubrium and medial clavicle to the mastoid process. Innervated by CN XI and C2-C3. Divides neck into anterior/posterior triangles. Unilaterally: laterally flexes to opposite side, rotates face to same side. Bilaterally: flexes neck, assists forced inspiration.

Synonyms:

Sternum

Flat bone in the anterior midline thorax, with manubrium, body, and xiphoid process. The sternal angle (of Louis) at the manubriosternal junction is a key landmark at the 2nd costal cartilage, T4-T5, and tracheal bifurcation. Common site for bone

marrow biopsy. Median sternotomy is the standard cardiac surgical approach.

Synonyms:

Stethoscope

Acoustic device for listening to internal body sounds. Components: chest piece (bell and diaphragm), tubing, earpieces. Bell: low-frequency sounds. Diaphragm: high-frequency sounds. Essential for cardiac, pulmonary, abdominal auscultation.

Synonyms:

Stevens-Johnson Syndrome

A severe, life-threatening mucocutaneous reaction characterized by widespread skin erythema, necrosis, and bullae formation with mucosal involvement (oral, ocular, genital). It is most commonly caused by drug reactions (sulfonamides, anticonvulsants, allopurinol, NSAIDs) and infections (*Mycoplasma pneumoniae*).

Synonyms:

Stickler Syndrome

An autosomal dominant connective tissue disorder caused by mutations in collagen genes (COL2A1 most common, also COL11A1, COL11A2, COL9A1).

Synonyms:

Stillbirth

Intrauterine fetal death (IUFD) at or after 20-24 weeks (definition varies by country); fetal death before viability (<20 weeks) is miscarriage.

Synonyms:

Stimulant Use Disorder

A problematic pattern of stimulant use (cocaine, amphetamines, methamphetamine, MDMA) leading to significant impairment. Stimulants increase dopamine and norepinephrine activity. Withdrawal is characterized by fatigue, depression, increased appetite, hypersomnia, psychomotor retardation, and vivid unpleasant dreams.

Synonyms:

Stippling (Tattooing)

Patterned dermal abrasions and punctate hemorrhages surrounding a firearm entrance wound, caused by unburned and partially burned gunpowder grains striking the skin at close range (15–75 cm).

Synonyms: Tattooing

Stochastic Effects

Random radiation effects with no threshold. Cancer, genetic effects. Probability increases with dose.

Synonyms:

Stoma Complications

Complications related to intestinal or urinary stomas.

Synonyms:

Stomach

J-shaped muscular organ in the left upper quadrant, connecting esophagus to duodenum. Regions: cardia, fundus, body, antrum, pylorus. Functions: food storage, mechanical churning, chemical digestion (pepsin, HCl), intrinsic factor secretion (B12 absorption). Mucosa has rugae (folds) allowing expansion.

Synonyms:

Stomach Cancer

Malignant cancer arising in the stomach, most often an adenocarcinoma. Risk factors include *Helicobacter pylori* infection, smoking, certain dietary exposures, chronic gastric inflammation, and inherited syndromes. Symptoms, stage, and tumor type guide treatment.

Synonyms:

Stomach Ulcer

An open sore in the lining of the stomach, commonly associated with *Helicobacter pylori* infection or medicines such as NSAIDs.

Synonyms:

Stomatitis

Inflammation of the oral mucosa, presenting as ery-

thema, ulceration, pain, and difficulty eating.

Synonyms:

STOPP/START

Screening Tool of Older Person's Prescriptions (STOPP) and Potential Older Person's Prescriptions (START). Identifies inappropriate prescribing.

Synonyms:

Storage Diseases

A group of inherited metabolic disorders characterized by accumulation of substrates within cells due to specific enzyme deficiencies. Lysosomal storage diseases result from defects in lysosomal hydrolytic enzymes, leading to accumulation of undigested macromolecules within lysosomes.

Synonyms:

Strabismus

A misalignment of the visual axes of the two eyes, where one eye is deviated inward (esotropia), outward (exotropia), upward (hypertropia), or downward (hypotropia) relative to the other, disrupting binocular vision and potentially leading to amblyopia in children.

Synonyms:

Strain

An injury to a muscle or tendon (connective tissue connecting muscle to bone) caused by excessive stretching, contraction, or overload. Grading: Grade I (mild stretching with few muscle fibers torn), Grade II (moderate partial tear), Grade III (complete muscle/tendon rupture).

Synonyms:

Strain Imaging

Echocardiographic or magnetic-resonance imaging that measures deformation of the myocardium during contraction and relaxation. It can detect abnormalities in myocardial function that may not be apparent from ejection fraction alone.

Synonyms:

Strangulation

Compression of the neck that impairs breathing or blood flow to and from the brain. It may cause voice changes, neck injury, loss of consciousness, or delayed complications and requires urgent medical assessment.

Synonyms:

Strength Testing

Manual muscle testing, dynamometry, isokinetic testing. Quantifies weakness, tracks progress.

Synonyms:

Strep Throat

Acute streptococcal pharyngitis caused by group A *Streptococcus* (*S. pyogenes*), most common in children 5-15 years. Features: sudden sore throat, fever, tonsillar exudate, palatal petechiae, anterior cervical lymphadenopathy, and headache/abdominal pain; cough, coryza, and oral ulcers suggest viral.

Synonyms:

Streptococcal cellulitis with lymphangitis

Streptococcal infection of the skin and subcutaneous tissue with inflammation of the draining lymphatic vessels.

Synonyms:

Streptococcal Infection

Infections caused by *Streptococcus pyogenes* (Group A Strep, GAS). Common presentations: pharyngitis (strep throat), scarlet fever (pharyngitis with erythematous rash), impetigo, cellulitis, and necrotizing fasciitis.

Synonyms:

Streptococcal pharyngitis

Sore throat caused by infection with group A *Streptococcus*, often accompanied by fever and swollen cervical lymph nodes.

Synonyms:

Streptococcus agalactiae

A gram-positive, beta-hemolytic streptococcus (Group B *Streptococcus*) that is a leading cause

of neonatal sepsis, meningitis, and pneumonia. The organism colonises the gastrointestinal and genital tracts. Transmission occurs during birth. Risk factors include prematurity, prolonged rupture of membranes, and maternal colonisation.

Synonyms:

Streptococcus pneumoniae

A gram-positive, encapsulated diplococcus that causes pneumonia, otitis media, sinusitis, meningitis, and sepsis.

Synonyms:

Streptococcus pyogenes

A gram-positive, beta-hemolytic streptococcus (Group A *Streptococcus*) that causes pharyngitis, skin infections, and post-infectious complications including rheumatic fever and glomerulonephritis. The organism produces streptolysins, erythrogenic toxin, and streptokinase.

Synonyms:

Streptokinase

A thrombolytic agent that forms a plasminogen activator complex, converting plasminogen to plasmin and lysing fibrin clots. Used for STEMI, massive pulmonary embolism, and deep vein thrombosis (largely replaced by tissue plasminogen activator, which is more fibrin-specific and less antigenic).

Synonyms:

Stress

A physiological and psychological response to perceived threats or demands that activates the sympathetic nervous system and the hypothalamic-pituitary-adrenal axis.

Synonyms:

Stress Cardiomyopathy

A temporary weakening of the heart muscle, often following intense emotional or physical stress, with symptoms that can resemble acute coronary syndrome.

Synonyms:

Stress Echocardiography

Echocardiography during exercise or pharmacological stress. Detects coronary artery disease by identifying wall motion abnormalities.

Synonyms:

Stress Fracture

A bone injury caused by repetitive submaximal loading that exceeds the rate of remodeling and repair. It often presents with gradually increasing, localized activity-related pain and may progress to a complete fracture if loading continues.

Synonyms:

Stress Shielding

Reduction in physiologic loading of adjacent bone caused by an implant that carries a disproportionate share of mechanical force. Chronic stress shielding may lead to bone resorption and compromise fixation.

Synonyms:

Stress Ulcer Prophylaxis

Prevention of stress-related mucosal disease in critically ill patients. Risk factors: mechanical ventilation >48 hours, coagulopathy, trauma, burns, sepsis. Agents: H₂ blockers, proton pump inhibitors. Duration: while risk factors present.

Synonyms:

Stress Urinary Incontinence

Involuntary leakage of urine, significantly affecting psychological, social, and physical well-being. See urinary incontinence.

Synonyms:

Stretch Reflex

A monosynaptic spinal reflex in which stretching a muscle (e.g., a tap on the patellar tendon) excites muscle spindles, generating an afferent signal (Ia fibers) that directly excites the alpha motor neurons of the same muscle, causing contraction and resistance to stretch.

Synonyms:

Striae Gravidarum

Stretch marks that develop during pregnancy, commonly on the abdomen, breasts, thighs, or buttocks. They may begin as red or purple lines and gradually fade to lighter bands.

Synonyms:

Stridor

A harsh, often high-pitched respiratory sound caused by turbulent airflow through a narrowed upper airway. Inspiratory stridor usually indicates supraglottic or glottic obstruction; biphasic or expiratory patterns help localize disease, but any severe or progressive stridor is an airway emergency.

Synonyms:

Stripping of Membranes (Membrane Sweep)

A procedure performed during a cervical exam where the examiner inserts a finger through the internal os and sweeps the membranes circumferentially, separating them from the lower uterine segment. Releases endogenous prostaglandins, promoting cervical ripening and potentially initiating labor.

Synonyms: Membrane Sweep

Stroke

A medical emergency caused by the interruption of blood flow to the brain, resulting in neuronal death and neurological deficits.

Synonyms:

Stroke Volume

The volume of blood ejected by the left ventricle with each heartbeat, normally 60-100 mL. It is determined by three factors: preload, afterload, and myocardial contractility. Stroke volume equals end-diastolic volume minus end-systolic volume. Reduced stroke volume occurs in heart failure, hypovolemia, and cardiogenic shock.

Synonyms:

Strongyloides stercoralis

A soil-transmitted nematode that can infect the

human intestine and cause strongyloidiasis.

Synonyms:

Strongyloidiasis

Infection with *Strongyloides stercoralis*, a unique helminth capable of autoinfection. Most infections asymptomatic or mild (abdominal pain, diarrhea, urticaria). Larvae migration causes larva currens (rapidly migrating serpiginous rash, perianal).

Synonyms:

Structured Reporting

Reporting using standardized templates. Improves consistency, completeness.

Synonyms:

Struvite Stones

Infection stones composed of magnesium ammonium phosphate. Form in alkaline urine with urease-producing organisms including *Proteus* and *Klebsiella*. Staghorn calculi fill renal pelvis almost exclusively from *Proteus*. Treatment requires complete stone removal with antibiotics and urinary acidification. High recurrence if infection persists.

Synonyms:

Stupor

A state of reduced consciousness in which the patient is unresponsive to most environmental stimuli but can be temporarily aroused by vigorous, repeated stimulation (painful stimuli, loud shouting).

Synonyms:

Sturge-Weber Syndrome

A neurocutaneous syndrome (phakomatosis) characterized by a facial capillary malformation (port-wine stain) in the V1 distribution of the trigeminal nerve (forehead and upper eyelid) and ipsilateral leptomeningeal angiomas (venous malformations of the pia mater). Caused by a somatic activating mutation in GNAQ.

Synonyms:

Stye

A common infection of the eyelid. External horde-

olum: acute bacterial infection of the Zeis or Moll glands at the eyelash follicle, typically caused by *Staphylococcus aureus*. Presents as a tender, red, well-localized swelling at the lid margin. Internal hordeolum: infection of the meibomian gland, larger and more painful than external.

Synonyms:

Subacute

Between acute and chronic. Examples: subacute thyroiditis.

Synonyms:

Subacute Rehabilitation

Less intensive than acute rehab. For patients needing continued therapy but not as intensive. Skilled nursing facility setting.

Synonyms:

Subacute Thyroiditis

Inflammatory condition of the thyroid most likely viral in etiology presenting with painful tender thyroid enlargement, fever, and malaise. Associated with elevated erythrocyte sedimentation rate and C-reactive protein.

Synonyms:

Subarachnoid

Situated beneath the arachnoid membrane surrounding the brain and spinal cord.

Synonyms:

Subarachnoid Hemorrhage

Bleeding into the subarachnoid space, the area between the arachnoid membrane and the pia mater surrounding the brain, most commonly caused by rupture of a cerebral (berry) aneurysm.

Synonyms:

Subclavian Artery

The artery supplying the upper limb, arising on the right from the brachiocephalic trunk and on the left directly from the aortic arch, passing over the first rib and becoming the axillary artery. Branches: vertebral, internal thoracic, thyrocervical trunk, cos-

tocervical trunk.

Synonyms:

Subclavian Vein

The continuation of the axillary vein beyond the lateral border of the first rib. It joins the internal jugular vein behind the sternoclavicular joint to form the brachiocephalic vein.

Synonyms:

Subclavian vein thrombosis

Formation of a blood clot in the subclavian vein, often associated with central venous catheterization, thoracic outlet syndrome, or Paget-Schroetter syndrome (effort-related thrombosis in young, active individuals). Presents with arm swelling, pain, and cyanosis.

Synonyms:

Subcorneal pustular dermatosis

A chronic relapsing skin disorder characterized by superficial sterile pustules beneath the stratum corneum, often on the trunk and flexural areas. It may be associated with IgA or other monoclonal gammopathies and can resemble pustular psoriasis.

Synonyms:

Subculture

The transfer of microorganisms from one culture to fresh culture medium, used to maintain pure cultures, isolate colonies, increase viability, prepare standardized inocula, and perform identification/susceptibility testing. On solid media, subculture aims to obtain isolated single colonies from a mixed or stock culture.

Synonyms:

Subcutaneous Emphysema

Air in the subcutaneous tissues, often from pneumothorax, pneumomediastinum, or chest trauma. It causes a characteristic crepitus on palpation. It is usually benign and resolves when the underlying air leak is treated. Severe cases may cause skin necrosis and compartment syndrome.

Synonyms:

Subcutaneous Tissue

Subcutaneous tissue (hypodermis, superficial fascia) lies beneath the dermis and connects skin to underlying structures. It contains adipose tissue (fat), blood vessels, nerves, and the superficial muscular aponeurotic system (SMAS). Subcutaneous fat provides insulation, cushioning, and energy storage.

Synonyms:

Subdural Hematoma

A collection of blood between the dura mater and the arachnoid mater, caused by tearing of bridging veins that traverse the subdural space.

Synonyms:

Subgaleal Hemorrhage

A potentially life-threatening accumulation of blood in the space beneath the scalp's epicranial aponeurosis. It can expand rapidly in a newborn, particularly after vacuum-assisted delivery, and requires urgent recognition and treatment.

Synonyms:

Sublingual epidermoid cyst

A benign cyst lined by stratified squamous epithelium beneath the tongue mucosa, presenting as a slow-growing midline swelling that may require surgical excision if symptomatic.

Synonyms:

Sublingual Gland

One of the paired major salivary glands, located beneath the tongue. It produces mainly mucous saliva that enters the mouth through several small ducts and helps lubricate the oral cavity.

Synonyms:

Submandibular Gland

One of the three paired major salivary glands, located in the submandibular triangle beneath the mandible. Mixed gland (predominantly serous) secreting saliva via Wharton's duct opening at the sublingual caruncle (floor of mouth). Saliva contains amylase, mucins, lysozyme, IgA.

Synonyms:

Subscapular Artery

An artery arising from the axillary artery that supplies the scapular region and adjacent muscles.

Synonyms:

Substance Abuse

An older, nonspecific term for harmful or problematic substance use. Current clinical language generally uses substance-use disorder.

Synonyms:

Substance Abuse Psychiatry

The subspecialty focused on the evaluation and treatment of substance use disorders and co-occurring psychiatric conditions. Dual diagnosis patients require integrated treatment addressing both disorders simultaneously.

Synonyms:

Substance Dependence

A state in which repeated substance use produces physiologic adaptation, so that reducing or stopping the substance may cause withdrawal. It is distinct from, but may occur with, substance-use disorder.

Synonyms:

Substance Intoxication

A reversible substance-specific syndrome caused by recent use that produces clinically significant behavioral or physiologic changes. Diagnosis requires assessing timing, dose or exposure, expected pharmacology, co-ingestants, and medical complications.

Synonyms:

Substance Use

The consumption of alcohol, drugs, or other chemical substances, which can lead to health, social, and psychological issues if used excessively.

Synonyms:

Substance Use Disorder

A problematic pattern of substance use leading to clinically significant impairment or distress, manifested by at least two of eleven criteria within a twelve-month period.

Synonyms:

Substance Use in Pregnancy

Use of alcohol, tobacco, cannabis, opioids, cocaine, or other substances during pregnancy. Effects depend on the substance, dose, timing, and other factors and may include maternal complications, impaired fetal growth, preterm birth, or neonatal withdrawal. Evaluation and treatment should be individualized.

Synonyms:

Substance Withdrawal

A substance-specific syndrome occurring after reduction or cessation of heavy or prolonged use. Withdrawal can range from discomfort to life-threatening complications such as seizures, delirium tremens, severe autonomic instability, or respiratory depression depending on the substance.

Synonyms:

Substernal goiter

Extension of thyroid tissue into the mediastinum, typically arising from the thyroid gland in the neck and growing downward through the thoracic inlet. It may cause compressive symptoms including dyspnea, dysphagia, and superior vena cava syndrome. Most are multinodular goiters. Diagnosis is by CT or MRI.

Synonyms:

Succenturial Lobe

An accessory lobe of the placenta, connected to the main placenta by blood vessels that traverse the membranes. If undetected after delivery, the succenturial lobe may be retained in the uterus, causing postpartum hemorrhage or infection. Diagnosis: careful inspection of the placenta and membranes after delivery.

Synonyms:

Succinate Dehydrogenase

Complex II of electron transport chain. Also TCA cycle enzyme. Produces FADH₂.

Synonyms:

Succinylcholine

A depolarizing neuromuscular-blocking drug that produces rapid, brief skeletal-muscle paralysis by activating nicotinic acetylcholine receptors at the neuromuscular junction. It can cause hyperkalemia, bradycardia, myalgia, masseter spasm, prolonged apnea in pseudocholinesterase deficiency, and malignant hyperthermia.

Synonyms:

Sucking Reflex

A primitive reflex present from birth, elicited by placing an object in the infant's mouth. The infant rhythmically sucks on the object. Coordinated sucking and swallowing typically develop by 34-36 weeks gestational age. Premature infants may lack coordinated suck-swallow, requiring gavage feeding.

Synonyms:

Sucrose Lysis Test

A historical screening test for paroxysmal nocturnal haemoglobinuria in which patient red blood cells are exposed to serum in a low-ionic-strength sucrose solution, allowing complement-mediated lysis to be detected.

Synonyms:

Suction (Vascular)

A suction device used during a vascular procedure to remove blood or other fluid from the operative field.

Synonyms: Vascular

Suction Device

Creates negative pressure for fluid removal. Components: canister, tubing, suction catheter. Used for airway clearance, surgical field, wound drainage.

Synonyms:

Suction Tip

The end attachment of a suction device used to remove blood, fluid, secretions, or debris. Common types include the Yankauer tip for oropharyngeal suction and surgical suction tips such as the Frink tip.

Synonyms:

Sudden Cardiac Death

Unexpected death from a cardiac cause, usually occurring rapidly after symptom onset or without witnessed symptoms. Causes include coronary disease, cardiomyopathy, inherited arrhythmia syndromes, and bradyarrhythmia; prevention depends on the underlying risk.

Synonyms:

Sudden Infant Death Syndrome

SIDS: the sudden, unexplained death of an infant <1 year (peak 2-4 months) that remains unexplained after a thorough investigation (autopsy, scene examination, and review of clinical history). Risk factors: prone sleep, bed-sharing, soft bedding, overheating, maternal smoking, prematurity/low birth weight, and co-sleeping.

Synonyms:

Sudden Sensorineural Hearing Loss

Rapid sensorineural hearing loss, conventionally at least 30 dB over three contiguous frequencies within 72 hours. It requires urgent audiologic and otologic assessment because early treatment may improve recovery in selected patients.

Synonyms:

Sudden Unexpected Infant Death

The sudden and unexpected death of an infant younger than 1 year, whether or not the cause is known before investigation. Sudden infant death syndrome is the unexplained subtype after complete scene, history, and autopsy evaluation.

Synonyms:

Suffocation

Death or injury from failure of oxygen to reach the lungs, a category of asphyxia distinct from strangulation. Subtypes include smothering (airway obstruction), choking or foreign-body obstruction, mechanical asphyxia (positional, chest compression), and entrapment in oxygen-deficient environments.

Synonyms:

Sugammadex

A selective relaxant binding agent that reverses aminosteroid neuromuscular blockers (rocuronium and vecuronium) by encapsulating them in a cyclodextrin molecule, forming a 1:1 complex that is renally excreted. Onset of action is within 2 to 3 minutes.

Synonyms:

Suicidal Ideation

Thoughts about killing oneself, ranging from passive (wish to be dead, wishes to fall asleep and not wake) to active (thoughts of killing oneself with varying degrees of intent, plan, and means). The C-SSRS grades severity from 1 (wish to be dead) to 5 (active suicidal ideation with specific plan and intent).

Synonyms:

Suicide

The intentional act of taking one's own life. Suicide is a major public health problem worldwide, causing 700,000 deaths annually.

Synonyms:

Suicide Risk Assessment

A clinical evaluation of suicidal thoughts, intent, plan, access to means, past attempts, self-harm, psychiatric and medical illness, substance use, protective factors, and immediate safety. It informs but does not replace ongoing clinical judgment and safety planning.

Synonyms:

Sulfa Drugs

A class of bacteriostatic antibiotics that competitively inhibit dihydropteroate synthase, an enzyme essential for folic acid synthesis in bacteria. See sulfonamides.

Synonyms:

Sulfasalazine

A DMARD combining sulfapyridine and 5-aminosalicylic acid, used in rheumatoid arthritis, psoriatic arthritis, and inflammatory bowel disease (ulcerative colitis). Slows disease progression in RA;

onset over 1-3 months.

Synonyms:

Sulfatide

A sulfated glycolipid found particularly in myelin and nervous tissue.

Synonyms:

Sulfonamide

A class of antibiotics (sulfamethoxazole, sulfadiazine, sulfasalazine) that inhibit bacterial dihydropteroate synthase, blocking folate synthesis—bacteriostatic. Often combined with trimethoprim (co-trimoxazole: TMP-SMX). Used for UTIs, PCP (pneumocystis pneumonia), toxoplasmosis, Nocardia, and MRSA.

Synonyms:

Sulfonylureas

Oral antidiabetic agents that stimulate insulin secretion from pancreatic beta cells by blocking ATP-sensitive potassium channels on the beta cell membrane. This causes membrane depolarization, opening of voltage-gated calcium channels, calcium influx, and exocytosis of insulin-containing granules.

Synonyms:

Sulfur Colloid Scan

Nuclear medicine imaging using Tc-99m sulfur colloid. Evaluates liver, spleen, bone marrow, lymph nodes.

Synonyms:

Sulphonamides

A class of antimicrobial agents containing the sulfonamide group (SO₂NH₂). Sulphonamides were the first effective systemic antibacterial agents (Prontosil, 1935—Gerhard Domagk). Mechanism: competitive inhibition of dihydropteroate synthase, blocking folate synthesis (para-aminobenzoic acid analogue)—bacteriostatic.

Synonyms:

Sun Protection (Photoprotection)

Sun protection involves measures taken to reduce exposure to ultraviolet radiation from the sun, which

is the primary environmental risk factor for skin cancer and photoaging.

Synonyms: Photoprotection

Sunburn

Acute erythema (and later edema, pain, blistering, peeling) of skin from excessive ultraviolet (UV) radiation (UVB predominantly), causing DNA damage and inflammatory response. Risk: repeated sunburn increases skin cancer risk (melanoma, basal/squamous cell carcinoma) and photoaging.

Synonyms:

Superantigen

A protein that bypasses antigen processing and non-specifically activates large T-cell populations by binding MHC class II and the T-cell receptor V region, triggering massive cytokine release. Staphylococcal TSST-1 and enterotoxins, and streptococcal pyrogenic exotoxins, cause toxic shock and scarlet fever.

Synonyms:

Superficial

Located near or on the surface of the body.

Synonyms:

Superficial Fascia

A layer of loose connective tissue beneath the dermis, also called subcutaneous tissue or the hypodermis.

Synonyms: subcutaneous tissue.

Superficial thrombophlebitis

Inflammation and clot formation in a superficial vein, causing a tender, firm, reddened cord along the vein.

Synonyms:

Superimposed Preeclampsia

Preeclampsia developing in a person who already has chronic hypertension. It may present with new or worsening proteinuria, thrombocytopenia, abnormal liver or kidney tests, neurologic symptoms, or other features of maternal organ dysfunction.

Synonyms:

Superinfection

A new infection that develops during or after treatment of a previous infection, often involving an antimicrobial-resistant organism or an organism not susceptible to the original therapy, such as *Clostridioides difficile* after antibiotic exposure.

Synonyms:

Superior

Positioned higher or closer to the head.

Synonyms:

Superior Mesenteric Artery

Second major abdominal aortic branch at L1, the midgut artery. Supplies distal duodenum through proximal two-thirds of transverse colon. Branches: inferior pancreaticoduodenal, jejunal, ileal, ileocolic, right colic, middle colic. Arises anterior to the pancreatic uncinate process, crosses the third duodenal part.

Synonyms:

Superior mesenteric artery syndrome

Compression of the duodenum between the aorta and the superior mesenteric artery, causing proximal duodenal obstruction. Presents with postprandial nausea, vomiting, and epigastric pain, often after significant weight loss that narrows the SMA-aortic angle. Treatment includes nutritional rehabilitation and surgical duodenal mobilization.

Synonyms:

Superior Semicircular Canal Dehiscence

A defect or marked thinning of the bony covering of the superior semicircular canal that can produce sound- or pressure-induced vertigo, autophony, and conductive-appearing hearing findings. Diagnosis combines characteristic symptoms, physiologic testing, and high-resolution temporal-bone CT.

Synonyms:

Superior Vena Cava

Formed by brachiocephalic vein junction at the first right costal cartilage, returning upper body deoxygenated blood to the right atrium. Approximately

7 cm, valveless. Related to right lung/pleura, right phrenic nerve, and azygos vein.

Synonyms:

Superior Vena Cava Syndrome

Obstruction of SVC by tumor. Facial swelling, dyspnea, dilated neck veins. Emergency: radiation, stenting.

Synonyms:

Superior vena caval obstruction

Compression or thrombosis of the superior vena cava impairing venous return from the head, neck, and upper extremities. Most commonly caused by malignancy (lung cancer, lymphoma) or indwelling central venous devices. Presents with facial swelling, plethora, distended neck veins, and upper extremity edema.

Synonyms:

Supernumerary rib

An extra rib beyond the typical twelve pairs, most commonly a cervical rib above the first thoracic rib, which may compress the brachial plexus or subclavian vessel causing thoracic outlet syndrome.

Synonyms:

Supernumerary Teeth

Extra teeth beyond normal complement. Most common: mesiodens between maxillary centrals. May cause impaction or malocclusion.

Synonyms:

Supervised Exercise Therapy

A structured, monitored exercise program used to improve walking ability and reduce claudication symptoms in people with peripheral artery disease. The exercise plan is adjusted to the person's symptoms and functional capacity.

Synonyms:

Supination

Rotation of the forearm so that the palm faces anteriorly in anatomical position, or upward when the elbow is flexed. The radius and ulna become

parallel.

Synonyms:

Supine Hypotensive Syndrome

Compression of the inferior vena cava by the gravid uterus when the pregnant woman lies flat on her back after 20 weeks gestation. Results in decreased venous return, reduced cardiac output, and maternal hypotension, dizziness, pallor, and syncope.

Synonyms:

Supplement Safety

Supplements not strictly regulated. Contamination, mislabeling risks. Consult healthcare provider before use.

Synonyms:

Supplemental Oxygen Therapy

Administration of oxygen at a concentration above that of room air to treat or prevent clinically important hypoxemia. Delivery method and oxygen target depend on the illness, baseline oxygenation, risk of carbon-dioxide retention, and monitoring results; excessive oxygen can also cause harm.

Synonyms:

Supplementation

Use of a vitamin, mineral, protein, fiber, or other nutrient preparation to correct a deficiency or meet a clinically identified increased requirement. The indication, dose, interactions, product quality, and risk of toxicity should be assessed before use.

Synonyms:

Supportive Care

Treatment that maintains essential body functions, relieves symptoms, prevents complications, and supports recovery while the underlying cause is treated.

Synonyms:

Suppository

A solid, single-dose dosage form designed to be inserted into a body orifice (rectum, vagina, or urethra) where it melts, softens, or dissolves, releasing the active pharmaceutical ingredient for local or

systemic effects.

Synonyms:

Supraglottic Airway Device

An airway device positioned above the glottis to maintain oxygenation and ventilation without passing through the vocal cords. It is used for selected anesthetized or unconscious patients and is not a definitive substitute for a cuffed tracheal tube when aspiration protection is required.

Synonyms:

Suprascapular Nerve

A branch of the brachial plexus that supplies the supraspinatus and infraspinatus muscles.

Synonyms:

Supraventricular Tachycardia

A rapid rhythm (150-250 bpm) originating above the ventricles, characterized by narrow QRS complexes. Most common forms are AV nodal reentrant tachycardia (AVNRT) and AV reentrant tachycardia (AVRT). Episodes are typically paroxysmal with sudden onset and offset. Vagal maneuvers and adenosine are diagnostic and therapeutic.

Synonyms:

Surfactant

A phospholipid-protein complex produced by type II pneumocytes that reduces alveolar surface tension, preventing atelectasis. Deficiency causes respiratory distress syndrome in premature infants. Exogenous surfactant (beractant, poractant alfa) administered via endotracheal tube.

Synonyms:

Surgery

Treatment in which an operation is performed to diagnose, remove, repair, reconstruct, or otherwise treat a disease or injury.

Synonyms:

Surgical Drain

A device placed to remove blood, pus, bile, urine, lymph, or other fluid from a surgical site or body

cavity. Indications, output characteristics, duration, and removal criteria should be documented because drains can also cause infection, bleeding, or tissue injury.

Synonyms:

Surgical Hemostasis

Control of bleeding during an operation using pressure, ligation, sutures, clips, electrosurgery, topical agents, vessel sealing, or other techniques. Effective hemostasis requires identification of the bleeding source and correction of coagulopathy when present.

Synonyms:

Surgical Instruments

Instruments for surgery. Categories: cutting (scalpel, scissors), grasping (forceps, clamps), retraction, hemostasis (hemostat, electrocautery).

Synonyms:

Surgical Margin

The edge of tissue removed during an excision or resection, assessed microscopically for residual disease. A negative margin has no tumor at the examined edge; a positive margin indicates tumor extends to the inked or designated margin.

Synonyms:

Surgical Repair

An operation that restores or reconstructs damaged tissue, an organ, or an anatomic function.

Synonyms:

Surgical Risk Stratification

Estimation of the likelihood of perioperative complications using patient factors, urgency, procedure risk, functional capacity, and disease-specific assessment. It informs optimization, monitoring level, shared decisions, and postoperative planning but cannot eliminate uncertainty.

Synonyms:

Surgical Safety Checklist

A structured checklist used at defined points before anesthesia, before incision, and before leaving

the operating room to verify patient identity, procedure, site, consent, equipment, specimens, and team communication.

Synonyms:

Surgical Site Infection

Infection involving the incision, organ, or operative space within the surveillance period after surgery. It may be superficial incisional, deep incisional, or organ-space and requires appropriate culture, antimicrobial therapy, drainage, debridement, or reoperation when indicated.

Synonyms:

Surgical Time-Out

A deliberate team pause immediately before incision to verify patient identity, procedure, site, consent, allergies, antibiotics, imaging, implants, equipment, and anticipated critical events. It is a core surgical-safety intervention.

Synonyms:

Surgical Wound Classification

Categorization of an operative wound as clean, clean-contaminated, contaminated, or dirty/infected according to the degree of microbial exposure and existing infection. The class helps estimate surgical-site infection risk and guide prophylaxis.

Synonyms:

Surrogate Decision-Maker

A person authorized to make healthcare decisions for someone who lacks decision-making capacity, guided by the person's known values and preferences.

Synonyms:

Surveillance

Systematic collection, analysis, interpretation of health data. Types: passive (reporting), active (proactive case finding), sentinel (selected sites).

Synonyms:

Surveillance Imaging

Repeat imaging to detect recurrence. Protocol varies by cancer type, stage, treatment.

Synonyms:

Survival

Length of life after diagnosis or event. In elderly, consider comorbidities, functional status, preferences. Life expectancy estimates based on age, sex, health status. Shared decision-making essential.

Synonyms:

Survival Rate

Percentage of patients surviving for specified time after diagnosis. 5-year survival commonly used.

Synonyms:

Survivorship

Care for cancer survivors. Addresses late effects, surveillance, quality of life.

Synonyms:

Survivorship Care Plan

Document summarizing treatment, follow-up, late effects. Provided to cancer survivors.

Synonyms:

Susac Syndrome

An autoimmune microangiopathy affecting the brain, retina, and inner ear. The characteristic triad is encephalopathy, branch retinal-artery occlusions, and sensorineural hearing loss, though all features may not be present initially.

Synonyms:

Susceptibility Testing

Laboratory tests determining the sensitivity of a bacterial isolate to antimicrobials to guide therapy. Methods: disk diffusion (Kirby-Bauer—zone sizes), broth dilution (MIC—minimum inhibitory concentration, MBC—minimum bactericidal concentration), E-test (gradient strips), and automated systems (VITEK).

Synonyms:

Suspected Cause

A condition or factor believed to explain a disease or symptom but not yet confirmed.

Synonyms:

Suspension

A pharmaceutical formulation in which fine solid drug particles are dispersed (not dissolved) in a liquid vehicle, often with suspending agents and stabilizers. Suspensions are used when a drug is poorly soluble, for oral (antibiotic suspensions, antacids), topical, ophthalmic, and parenteral (depot) administration.

Synonyms:

Suture

A thread or strand of material used to approximate tissues (bring wound edges together) and hold them in place until healing occurs.

Synonyms:

Suture (Perineal)

A thread or strand of material used to approximate tissues (bring wound edges together) and hold them in place until healing occurs. See Suture.

Synonyms: Perineal

Suture Anchor

A small implant that secures a tendon, ligament, or other soft tissue to bone. It may be made from metal, polymer, or bioabsorbable material and can fail through pullout, breakage, migration, or inflammatory reaction.

Synonyms:

SUV

Standardized uptake value, a semiquantitative measure of radiotracer concentration used mainly in PET imaging.

Synonyms:

SVC Syndrome

Obstruction of the superior vena cava causing facial swelling, plethora, and distended neck veins. Commonly from lung cancer (SCLC, squamous) and lymphoma. Oncologic emergency.

Synonyms:

Swallow Study

X-ray imaging of swallowing using barium. Evaluates dysphagia, aspiration, structural abnormalities.

Synonyms:

Swallowing

Difficulty swallowing, classified as oropharyngeal (difficulty initiating a swallow, choking, coughing, nasal regurgitation) or esophageal (sensation of food sticking retrosternally). See dysphagia.

Synonyms:

Swallowing Assessment

Clinical and, when indicated, instrumental evaluation of oral, pharyngeal, and esophageal swallowing to identify dysphagia, aspiration, and appropriate food or liquid consistency. Videofluoroscopic or endoscopic studies may be required when bedside assessment is insufficient.

Synonyms:

Swallowing Therapy

Assessment and treatment to improve the safety and efficiency of swallowing and reduce aspiration risk.

Synonyms:

Sweat Chloride Test

A test that measures chloride concentration in sweat after pilocarpine stimulation. It is an important diagnostic test for cystic fibrosis, but results must be interpreted with the clinical findings and, when needed, genetic or other testing. Some illnesses and technical factors can produce misleading results.

Synonyms:

Sweat Gland

A skin gland that produces sweat, which contributes mainly to temperature regulation and skin surface function.

Synonyms:

Sweating

The secretion of sweat by eccrine glands, the primary heat-loss mechanism in humans, controlled

by sympathetic cholinergic innervation (in contrast to the catecholaminergic sympathetic response elsewhere).

Synonyms:

Sweet Syndrome

An inflammatory skin disorder characterized by sudden fever and tender red or violaceous plaques or nodules containing many neutrophils. It may be associated with infection, medicines, inflammatory disease, or cancer.

Synonyms:

Sweet's syndrome

Acute febrile neutrophilic dermatosis, characterized by fever, neutrophilia, and painful, erythematous plaques or nodules on the skin, histologically showing dense neutrophilic infiltration of the dermis. It may be idiopathic, drug-induced, or associated with malignancy, particularly hematological cancers.

Synonyms:

Swine Flu

A contagious respiratory illness caused by influenza A or B viruses, characterized by sudden onset of fever, myalgia, headache, malaise, nonproductive cough, sore throat, and nasal congestion. See Influenza.

Synonyms:

Swollen Ankles and Swollen Feet

Enlargement of the ankles or feet caused by injury, venous insufficiency, lymphatic disease, medication, pregnancy, or systemic fluid retention from heart, kidney, or liver disease. Sudden one-sided swelling with pain, redness, warmth, or breathlessness may indicate thrombosis or infection and requires urgent assessment.

Synonyms:

Symblepharon

Adhesion of the palpebral conjunctiva (inner eyelid) to the bulbar conjunctiva or cornea, most commonly resulting from chemical burns, Stevens-Johnson syndrome, ocular cicatricial pemphigoid, or repeated

surgical intervention. It restricts eye movement and may require surgical lysis with amniotic membrane or mucous membrane grafting.

Synonyms:

Sympathetic Nervous System

The division of the autonomic nervous system responsible for the 'fight or flight' response, preparing the body for intense physical activity or stress. Sympathetic preganglionic neurons originate in the intermediolateral column of the spinal cord gray matter (T1–L2), making it the thoracolumbar system.

Synonyms:

Sympatholytic

An agent that blocks the sympathetic nervous system, used to treat hypertension, sympathetic overactivity, and catecholamine excess. Classes: beta-blockers (propranolol, metoprolol), alpha-blockers (prazosin, doxazosin, phenoxybenzamine), centrally acting agents (clonidine, methyldopa), and neuron blockers (reserpine, guanethidine).

Synonyms:

Symptom

Subjective experience of disease. Examples: pain, fatigue, nausea. Reported by patient.

Synonyms:

Synapse

The specialized junction between a neuron and another neuron (or effector cell—muscle, gland) where information is transmitted from one cell to another.

Synonyms:

Synaptic Plasticity

Activity-dependent change in the strength or structure of synaptic transmission. Long-term potentiation and long-term depression are important cellular mechanisms underlying learning, memory, adaptation, and some forms of chronic pain.

Synonyms:

Synaptic Transmission

The fundamental process by which neurons commu-

nicate with each other through specialized junctions called synapses.

Synonyms:

Syncope

A transient loss of consciousness caused by temporary global cerebral hypoperfusion. See Fainting.

Synonyms:

Syncope (Fainting)

A transient loss of consciousness caused by temporary global cerebral hypoperfusion. See Fainting.

Synonyms: Fainting

Syndactyly

A congenital connection of two or more adjacent digits by skin, and sometimes by bone or other tissues. It may occur alone or as part of a genetic syndrome; treatment depends on function, anatomy, and associated abnormalities.

Synonyms:

Syndrome

Group of symptoms and signs occurring together. Examples: metabolic syndrome, irritable bowel syndrome.

Synonyms:

Syndrome of inappropriate ADH secretion

Excessive antidiuretic hormone activity causing eu-volemic hyponatremia with inappropriately concentrated urine and elevated urinary sodium.

Synonyms:

Syndrome Surveillance

The public health monitoring of pre-diagnostic clinical indicators (symptoms, syndromes—fever, rash, GI illness, influenza-like illness) in real time to detect outbreaks, bioterrorism, or emerging infections earlier than laboratory confirmation.

Synonyms:

Syndromic Surveillance

Monitoring of symptoms, clinical encounters, laboratory requests, or other near-real-time signals before definitive diagnoses are available. It supports early detection of outbreaks and public-health threats but may have lower specificity.

Synonyms:

Synovial chondromatosis

A benign, metaplastic condition characterized by the formation of multiple cartilaginous loose bodies within joint synovium, bursae, or tendon sheaths. It presents with joint pain, swelling, locking, and restricted range of motion, most commonly affecting the knee, hip, and elbow.

Synonyms:

Synovial Fluid Analysis

Laboratory examination of aspirated joint fluid for appearance, viscosity, leukocyte count and differential, crystals under polarized light, Gram stain, and culture. It helps distinguish noninflammatory, inflammatory, crystal-associated, and septic arthritis.

Synonyms:

Synovial Sarcoma

A soft tissue sarcoma typically arising near joints of the extremities in young adults, characterized by the t(X;18) chromosomal translocation.

Synonyms:

Synovitis

Inflammation of the synovial membrane lining a joint, causing swelling, pain, warmth, and joint effusion. Causes: inflammatory arthritis (RA, psoriatic, gout, reactive, septic), autoimmune (SLE), and trauma/overuse.

Synonyms:

Synovium

The inner layer of the joint capsule in synovial joints, composed of synovial lining cells (type A macrophage-like, type B fibroblast-like) on a vascularized connective tissue base. Produces synovial fluid (hyaluronic acid, lubricin, proteinases) for lu-

brication and chondrocyte nutrition.

Synonyms:

Synovography

Contrast imaging of joint cavity. Evaluates synovial pathology.

Synonyms:

Synthesis Module

Automated system for radiopharmaceutical preparation. PET tracer synthesis: FDG, Florbetapir. Quality control: radiochemical purity, pH, sterility.

Synonyms:

Syphilis

A sexually transmitted infection caused by *Treponema pallidum*. It may progress through primary, secondary, latent, and tertiary stages, although the stages can overlap or be unrecognized. Diagnosis uses clinical assessment and serologic testing. Treatment depends on the stage and site of infection; penicillin is used in many cases.

Synonyms:

Syphilitic alopecia

Non-scarring hair loss occurring as a manifestation of secondary syphilis, presenting with diffuse thinning or patchy, moth-eaten alopecia of the scalp, eyebrows, or beard. It is thought to result from direct spirochaetal invasion of hair follicles during the spirochaetaemic phase.

Synonyms:

Syphilitic gumma

A destructive, granulomatous lesion occurring in tertiary syphilis, characterized by a center of necrotic tissue surrounded by plasma cells, lymphocytes, and fibroblasts. Gummas may affect any organ, most commonly the skin, bones, liver, and central nervous system. They present as painless, firm nodules that may ulcerate.

Synonyms:

Syringe

Cylindrical device for injecting or withdrawing fluids.

Components: barrel, plunger, luer lock. Various sizes: 1 mL to 60 mL.

Synonyms:

Syringomyelia

A condition characterized by the formation of a fluid-filled cyst (syrinx) within the spinal cord, which can expand and elongate over time, compressing and destroying the surrounding spinal cord tissue.

Synonyms:

Syrinx

A syrinx is a fluid-filled cavity within the spinal cord, typically containing cerebrospinal fluid or a similar fluid, that develops as a result of abnormal CSF flow dynamics within the spinal cord. Syringomyelia: a syrinx in the central spinal cord. Hydromyelia: dilation of the central canal.

Synonyms:

Systematic Review

Comprehensive summary of research on specific question. Uses explicit methods to minimize bias. Cochrane reviews example.

Synonyms:

Systemic Antifungals

Antifungal medicines taken orally or given intravenously for infections that are extensive, invasive, refractory, or unsuitable for topical treatment. Choice and duration depend on the organism, site, severity, drug interactions, organ function, and local resistance patterns.

Synonyms:

Systemic Effects

Whole-body effects of toxins. Cardiac, neurological, renal, hepatic, hematological.

Synonyms:

Systemic Inflammatory Response Syndrome

A systemic inflammatory response that may occur with infection, trauma, burns, pancreatitis, surgery, or other insults. It can involve abnormal tempera-

ture, heart rate, respiratory rate, or white-cell count. Modern sepsis assessment uses broader clinical criteria rather than SIRS alone.

Synonyms:

Systemic Juvenile Idiopathic Arthritis

A subtype of juvenile idiopathic arthritis with prominent systemic inflammation—daily spiking fevers, evanescent salmon-pink rash, arthritis, lymphadenopathy, hepatosplenomegaly, and elevated inflammatory markers (ferritin).

Synonyms:

Systemic Lupus Erythematosus

Multisystem autoimmune disease, more common in women. Features: malar rash, photosensitivity, oral ulcers, arthritis, serositis, renal disorder, neurologic disorder, hematologic disorder, immunologic disorder. Diagnosis: ANA positive plus clinical/immunologic criteria.

Synonyms:

Systemic Sclerosis

Systemic sclerosis, also known as scleroderma, is a chronic autoimmune disease characterized by progressive fibrosis of the skin and internal organs, vasculopathy, and immune dysfunction.

Synonyms: scleroderma, is a chronic autoimmune disease.

Systemic Therapy

Treatment that reaches the whole body, including chemotherapy, endocrine therapy, targeted therapy, and immunotherapy, as opposed to local therapies such as surgery and radiation.

Synonyms:

Systemic Vascular Resistance

The resistance to blood flow offered by the systemic circulation, determined mainly by arteriolar tone. It is calculated from the pressure gradient across the systemic circulation and cardiac output and is a major determinant of arterial pressure.

Synonyms:

Systolic Murmurs

Murmurs occurring between S1 and S2. Ejection systolic murmurs (crescendo-decrescendo) are caused by flow across semilunar valves (aortic stenosis, pulmonary stenosis) or increased flow across normal valves.

Synonyms:

Sézary Syndrome

The leukemic variant of cutaneous T-cell lymphoma, characterized by erythroderma, lymphadenopathy, pruritus, and circulating atypical lymphocytes (Sézary cells).

Synonyms:

Sclerosing Peritonitis

Thickening and scarring of the peritoneum that can restrict movement of the intestines.

Synonyms:

Scheuermann's Disease

A condition in adolescents that causes abnormal rounding of the upper back because of vertebral growth changes.

Synonyms:

Sjogren's Syndrome

An autoimmune disease that commonly causes dry eyes and dry mouth by damaging tear- and saliva-producing glands.

Synonyms:

Staghorn Calculi

Large branching kidney stones that fill part or all of the renal collecting system.

Synonyms:

Sunstroke

A life-threatening form of heat illness in which body temperature rises dangerously high and the nervous system is impaired.

Synonyms:

Systemic Mastocytosis

A disorder in which excessive mast cells accumulate in one or more organs and release inflammatory chemicals.

Synonyms:

Semi-Fowler Position

A semiupright position in which the head and upper body are elevated about 30 to 45 degrees.

Synonyms:

Sitting Position

An upright or semiupright position in which the patient's torso is elevated and the hips and knees are flexed; it is used for selected shoulder and neurosurgical procedures.

Synonyms:

Supine Position

A position in which the patient lies on the back with the face upward; it is the most commonly used surgical position.

Synonyms:

Sacral Dimple

A small indentation in the skin over the lower spine that is present at birth.

Synonyms:

Salmonella Infection

An intestinal infection caused by *Salmonella* bacteria, usually acquired through contaminated food or water.

Synonyms:

Schwannomatosis

A disorder in which multiple schwannomas, tumors of nerve-sheath cells, develop.

Synonyms:

Sclerosing Mesenteritis

A rare inflammatory and fibrotic disorder affecting the mesentery, the tissue supporting the intestines.

Synonyms:

Scorpion Sting

A venomous injury caused by a scorpion, producing local pain and sometimes systemic toxicity.

Synonyms:

Scrotal Masses

Abnormal lumps or swellings in the tissues of the scrotum.

Synonyms:

Sebaceous Carcinoma

An uncommon skin cancer arising from oil-producing sebaceous glands.

Synonyms:

Secondary Hypertension

High blood pressure caused by another medical condition or by a medication.

Synonyms:

Selective IgA Deficiency

An immune disorder characterized by very low or absent immunoglobulin A levels.

Synonyms:

Sex Headaches

Headaches triggered by sexual activity, including orgasm.

Synonyms:

Sexually Transmitted Diseases

Infections transmitted primarily through sexual contact; also called sexually transmitted infections.

Synonyms: sexually transmitted infections.

Sezary Syndrome

An uncommon form of cutaneous T-cell lymphoma involving widespread red skin and abnormal lymphocytes in the blood.

Synonyms:

Sinus Rhythm

The normal heart rhythm generated by electrical impulses from the sinoatrial node.

Synonyms:

Suppuration

Formation or discharge of pus during an inflammatory or infectious process.

Synonyms:

Surgical Drill

A powered instrument used to cut, shape, or bore bone during surgery.

Synonyms:

Surgical Stapler

A device that places metal or absorbable staples to close skin, tissue, or a hollow organ.

Synonyms:

Schwann Cells

Glial cells of the peripheral nervous system that form myelin around many axons and support the repair and maintenance of peripheral nerves.

Synonyms:

Scintigraphy

Nuclear medicine imaging in which a radiotracer is administered and its distribution is recorded to evaluate the structure or function of an organ.

Synonyms:

Senile Lentigines

Flat, sharply defined brown or tan spots caused by chronic ultraviolet exposure, commonly appearing on sun-exposed skin with age.

Synonyms:

Sensory Neuron

A nerve cell that carries information from sensory receptors toward the central nervous system.

Synonyms:

Sensory Receptors

Specialized cells or nerve endings that detect stimuli such as touch, temperature, pain, light, sound, or chemical changes.

Synonyms:

Sentinel Node Biopsy

Removal and examination of the first lymph node or nodes to which a tumor is likely to spread, used to assess regional metastasis.

Synonyms:

Septal Defect

An abnormal opening in the septum between the heart's chambers that permits blood to pass between the right and left sides of the heart.

Synonyms:

Seroconversion

The development of detectable antibodies in the blood after infection, vaccination, or another immune stimulus.

Synonyms:

Sella Turcica

A saddle-shaped depression in the sphenoid bone that houses the pituitary gland.

Synonyms:

Semilunar Valves

The aortic and pulmonary valves, which open during ventricular contraction and close during ventricular relaxation to prevent backflow into the ventricles.

Synonyms:

Single-Photon Emission Computed Tomography

A nuclear medicine imaging technique that detects gamma rays from an injected radiotracer to create cross-sectional images of organ function and blood flow.

Synonyms:

Simmonds Disease

An uncommon form of hypopituitarism caused by inadequate pituitary hormone production, often resulting in fatigue, weight loss, low blood pressure, and impaired endocrine function.

Synonyms:

Skin Turgor

The skin's ability to return to its normal position after being gently pinched. Reduced turgor may occur with dehydration, although it is less reliable in older adults.

Synonyms:

Slit-Lamp Biomicroscope

An instrument that provides a magnified, illuminated view of the eye, especially the cornea, anterior chamber, iris, lens, and conjunctiva.

Synonyms:

Snellen Chart

An eye chart used to measure distance visual acuity by testing the smallest line of letters a person can identify at a standard distance.

Synonyms:

Somatoform Disorders

A former term for disorders involving prominent physical symptoms or health concerns associated with significant psychological distress. Current classifications use more specific diagnoses, such as somatic symptom disorder.

Synonyms:

Somatotropin

Growth hormone, a pituitary hormone that promotes growth and influences protein, fat, and carbohydrate metabolism.

Synonyms:

Somnambulism

Sleepwalking; a parasomnia involving complex behaviors that arise during partial arousal from non-rapid-eye-movement sleep.

Synonyms:

Sound

A mechanical wave produced by vibration and transmitted through a medium. Hearing depends on its frequency, intensity, and processing by the auditory

system.

Synonyms:

Spermatic Cord

A bundle extending from the abdomen to the testis that contains the vas deferens, testicular vessels, lymphatic vessels, nerves, and associated connective tissue.

Synonyms:

Spermatozoa

Mature male reproductive cells, commonly called sperm, that carry genetic material and can fertilize an oocyte.

Synonyms: sperm, that carry genetic material and can fertilize an oocyte.

Spermatozoon

A single mature male reproductive cell, or sperm cell.

Synonyms:

Sphincter of Oddi

A muscular valve controlling the flow of bile and pancreatic secretions into the duodenum.

Synonyms:

Spinal Cavity

The posterior body cavity formed by the vertebral column that contains and protects the spinal cord.

Synonyms:

Spiral Organ

The organ of Corti, a sensory structure in the cochlea containing hair cells that convert sound vibrations into nerve signals.

Synonyms:

Spirogram

A graphical record of air volumes and flow during pulmonary function testing.

Synonyms:

Spirometer

An instrument that measures the volume and flow of air inhaled and exhaled during pulmonary function testing.

Synonyms:

Splenic Flexure

The bend of the colon where the transverse colon becomes the descending colon, near the spleen.

Synonyms:

Split-Thickness Skin Graft

A graft containing the epidermis and part of the dermis, used to cover wounds or burns and allowing the donor site to heal from remaining skin structures.

Synonyms:

Spondee

A two-syllable test word with equal emphasis on both syllables, used in speech audiometry.

Synonyms:

Spondylolysis

A stress fracture or defect in the pars interarticularis of a vertebral arch, most often in the lower lumbar spine.

Synonyms:

Spondylosis

Degenerative changes of the spine, including disc degeneration and bony overgrowth, commonly associated with aging.

Synonyms:

Staging

Assessment of the extent of cancer, including the size of the primary tumor, lymph-node involvement, and distant metastases.

Synonyms:

Stapedius

A small middle-ear muscle that helps limit movement of the stapes and may protect the inner ear from loud sounds.

Synonyms:

Stapling

Closure or joining of tissue with surgical staples.

Synonyms:

Stasis

Slowing or stopping of the normal flow of a body fluid, such as blood, lymph, or urine.

Synonyms:

Sterility

The inability to reproduce. In clinical use, the term may refer to infertility or to the absence of viable microorganisms, depending on context.

Synonyms:

Steroid Hormones

Lipid-soluble hormones derived from cholesterol, including cortisol, aldosterone, estrogen, progesterone, and testosterone.

Synonyms:

Stimulants

Substances that increase activity in the central nervous system, often causing greater alertness, attention, heart rate, or energy.

Synonyms:

Stress Incontinence

Involuntary leakage of urine during activities that increase intra-abdominal pressure, such as coughing, sneezing, lifting, or exercise.

Synonyms:

Stress Injuries

Tissue injuries caused by repeated loading or overuse without sufficient recovery. Examples include stress fractures, tendinopathy, and muscle strain.

Synonyms:

Stress Tests

Diagnostic tests that assess organ function under controlled physical, pharmacologic, or physiologic

stress, commonly evaluating the heart for inducible ischemia or abnormal rhythm.

Synonyms:

Striae Atrophicae

Linear bands of thin, wrinkled skin caused by stretching and disruption of dermal connective tissue; commonly called stretch marks.

Synonyms: stretch marks.

Student's Elbow

Olecranon bursitis, an inflammation of the bursa over the point of the elbow, often related to repeated pressure or trauma.

Synonyms:

Subacute Bacterial Endocarditis

A slowly progressive infection of the endocardium or heart valves, usually caused by less-virulent bacteria and often involving previously abnormal valves.

Synonyms:

Subcutaneous Layer

The layer of tissue beneath the dermis, composed mainly of fat and connective tissue. It insulates the body, stores energy, and contains larger vessels and nerves.

Synonyms:

Subluxation

A partial loss of normal contact between the articular surfaces of a joint.

Synonyms:

Surgical Fixation

Stabilization of a bone, joint, or other structure with devices such as plates, screws, rods, wires, or external frames.

Synonyms:

Swan-Ganz Catheter

A pulmonary artery catheter used to measure pressures in the right heart and pulmonary artery and, when indicated, estimate cardiac output and pul-

monary capillary wedge pressure.

Synonyms:

Sympathectomy

Surgical interruption or destruction of sympathetic nerves to reduce abnormal vasoconstriction, sweating, or pain in selected conditions.

Synonyms:

Symphysis

A cartilaginous joint in which two bones are united by fibrocartilage, such as the pubic symphysis.

Synonyms:

Symphysis Pubis

The fibrocartilaginous joint connecting the left and right pubic bones at the front of the pelvis.

Synonyms:

Synechia

An abnormal adhesion between adjacent tissues, especially between parts of the iris or between the iris and the lens or cornea.

Synonyms:

Synergist

A muscle that assists the prime mover during a movement or helps stabilize a joint.

Synonyms:

Synovial Fluid

A viscous fluid within a synovial joint that lubricates articular surfaces and helps nourish cartilage.

Synonyms:

Synovial Joint

A freely movable joint in which the articulating bones are separated by a fluid-filled joint cavity enclosed by a capsule.

Synonyms:

Systemic Circuit

The circulation that carries oxygenated blood from the left ventricle through the body and returns

deoxygenated blood to the right atrium.

Synonyms:

Systole

The phase of the cardiac cycle during which the ventricles contract and eject blood into the pulmonary artery and aorta.

Synonyms:

Suprapubic

Located above or immediately behind the pubic bone, especially in reference to the lower abdominal or urinary-bladder region.

Synonyms:

Salter-Harris Fracture

A fracture involving the growth plate of a child or adolescent. Types I through V describe progressively different patterns and risks to bone growth.

Synonyms:

Sternotomy

Surgical division of the sternum, usually along the midline, to provide access to the heart or mediastinal structures.

Synonyms:

Telangiectasia

A visible, permanent dilation of small superficial blood vessels, appearing as fine red lines or web-like marks on the skin or mucous membranes.

Synonyms:

Serrated Polyposis Syndrome

A disorder characterized by multiple serrated lesions or polyps in the colon and an increased risk of colorectal cancer, requiring colonoscopic surveillance and removal of significant lesions.

Synonyms:

Staphylococcal Scalded Skin Syndrome

A toxin-mediated skin disorder caused by *Staphylococcus aureus*, usually affecting infants or young children and producing widespread superficial blis-

tering and peeling of the skin.

Synonyms:

Stent Restenosis

Re-narrowing of a blood vessel within or adjacent to a previously placed stent, usually caused by tissue growth, recurrent atherosclerosis, or thrombosis.

Synonyms:

Sinus Tachycardia

A heart rhythm originating in the sinoatrial node with a rate faster than normal, commonly occurring as a physiologic response to exercise, fever, pain, dehydration, or stress.

Synonyms:

Status Migrainosus

A severe migraine attack that persists for more than 72 hours and may require urgent medical treatment, especially when dehydration, vomiting, or medication overuse is present.

Synonyms:

Subclinical Hypothyroidism

A condition with an elevated thyroid-stimulating hormone level and normal circulating free thyroid-hormone levels, often without symptoms or with only mild nonspecific symptoms.

Synonyms:

Syndrome of Inappropriate Antidiuretic Hormone

Excessive release or effect of antidiuretic hormone causing impaired free-water excretion, low serum sodium, and inappropriately concentrated urine in the absence of an appropriate physiologic stimulus.

Synonyms:

Sclerotherapy

A treatment in which an irritating or closing agent is injected into a blood vessel or body cavity to make it scar and seal, commonly used for varicose veins and selected vascular lesions.

Synonyms:

Septum

A wall or partition separating two spaces, such as the nasal septum between the nasal cavities or the cardiac septum between heart chambers.

Synonyms:

Serum

The clear, liquid part of blood that remains after clotting and contains water, electrolytes, proteins, hormones, antibodies, and other dissolved substances.

Synonyms:

Sleep Apnoea

Repeated pauses or reductions in breathing during sleep, most commonly because of upper-airway obstruction or less commonly inadequate respiratory drive.

Synonyms:

Snoring

A noisy vibration of tissues in the upper airway during sleep, sometimes associated with obstructive sleep apnoea.

Synonyms:

Smoking

Inhaling smoke from burning tobacco or other substances; it is a major cause of cardiovascular disease, chronic lung disease, cancer, and pregnancy complications.

Synonyms:

Steatorrhoea

Excess fat in the stool, producing pale, bulky, greasy, foul-smelling stools that may be difficult to flush and indicate fat malabsorption.

Synonyms:

Strangulated Hernia

A hernia in which the blood supply to the trapped tissue is cut off, causing ischaemia and possible tissue death; it is a surgical emergency.

Synonyms:

Subarachnoid Haemorrhage

Bleeding into the space between the arachnoid membrane and pia mater around the brain, classically causing a sudden severe thunderclap headache.

Synonyms:

Subdural Haematoma

Accumulation of blood between the dura mater and arachnoid membrane, usually caused by tearing of bridging veins after head injury and sometimes developing gradually.

Synonyms:

T

Sensory Processing Disorder

Difficulty detecting, interpreting, or responding to sensory input such as sound, touch, movement, light, or body position. It may affect behavior, learning, coordination, or daily activities and can occur with other neurodevelopmental conditions. Assessment and occupational-therapy strategies are individualized.

Synonyms:

Thyroid-Stimulating Hormone

A pituitary hormone that stimulates the thyroid to produce thyroid hormones. **Synonyms:** TSH

Thyroxine

The main thyroid hormone containing four iodine atoms. **Synonyms:** T4

TIA

A transient ischemic attack, a temporary episode of neurological dysfunction from reduced brain blood flow. **Synonyms:** Transient ischemic attack; mini-stroke

Ticlopidine

An antiplatelet medicine that reduces platelet aggregation and clot formation. **Synonyms:**

Tolerable Upper Intake Level

The highest usual daily nutrient intake unlikely to cause harm in nearly all healthy people. **Synonyms:** UL

Toll-Like Receptors

Innate-immune receptors that detect characteristic microbial or tissue-danger signals. **Synonyms:**

TLRs

Tonic

A substance or preparation traditionally believed to invigorate or strengthen the body. **Synonyms:**

Tonometry

Measurement of pressure inside the eye, commonly used to screen for glaucoma. **Synonyms:**

Tooth Decay

Destruction of tooth structure caused by acids produced by bacteria. **Synonyms:** Dental caries; cavities

Topical

Applied directly to a body surface, usually the skin or a mucous membrane. **Synonyms:**

Toxic

Poisonous or capable of causing injury to living tissue. **Synonyms:**

Toxic Nodular Goiter

An enlarged thyroid with nodules that produce excessive thyroid hormone. **Synonyms:**

Toxin

A poisonous substance produced by a living organism. **Synonyms:** Biological poison

tPA

Tissue plasminogen activator, a clot-dissolving enzyme or medicine. **Synonyms:** Tissue plasminogen activator

Trabecular Bone

Porous, lattice-like bone tissue found inside bones and near many joints. **Synonyms:** Spongy bone; cancellous bone

Trabecular Meshwork

A porous tissue in the eye through which aqueous humor drains. **Synonyms:**

Trabeculoplasty

Laser treatment that improves aqueous-humor drainage through the trabecular meshwork. **Synonyms:**

Trace Mineral

A mineral required by the body in very small amounts. **Synonyms:**

Trans Fatty Acid

An unsaturated fatty acid with trans configuration, often formed during industrial oil processing. **Synonyms:** Trans fat

Transcranial Doppler Scanning

Ultrasound measurement of blood flow through major arteries at the base of the brain. **Synonyms:** Transcranial Doppler; TCD

Transcutaneous Electrical Nerve Stimulation

Low-voltage electrical stimulation delivered through skin electrodes to reduce pain. **Synonyms:** TENS

Transferrin Saturation

The percentage of transferrin iron-binding sites occupied by iron. **Synonyms:** TSAT

Transfusion

Administration of donated blood or blood components into a person's circulation. **Synonyms:**

Transient Pain

Pain that is brief and resolves rather than persisting. **Synonyms:**

Transmural Infarction

A heart attack involving the full thickness of part of the heart wall. **Synonyms:**

Transplantation

Transfer of an organ, tissue, or cells from a donor to a recipient. **Synonyms:** Transplant

Transrectal Ultrasonography

Ultrasound imaging of the prostate or nearby structures using a rectal probe. **Synonyms:** TRUS

Transurethral Incision of the Prostate

An operation using small prostate incisions to relieve obstruction of urine flow. **Synonyms:** TUIP

Transurethral Microwave Thermotherapy

Heat treatment using microwaves to destroy prostate tissue obstructing urine flow. **Synonyms:** TUMT

Transurethral Needle Ablation

Treatment using radiofrequency heat delivered by needles to destroy obstructing prostate tissue. **Synonyms:** TUNA

Stasis Dermatitis

Inflammation of the lower-leg skin caused by chronic venous hypertension and edema. It may cause itching, redness, scaling, brown discoloration, weeping, or ulcers around the ankles. Management focuses on treating venous disease, compression when safe, skin care, and evaluation for infection or arterial insufficiency.

Synonyms:

T Wave

The electrocardiographic deflection representing ventricular repolarization. Its shape and direction vary by lead and clinical context. Abnormal T waves may occur with ischemia, electrolyte disorders, ventricular strain, or other conditions.

Synonyms:

T-Cell Lymphomas

Lymphomas arising from mature or immature T lymphocytes. They include several biologically distinct diseases that may involve lymph nodes, skin, blood, or other organs; behavior and treatment depend on the subtype.

Synonyms:

T-Cell Receptor

A clonally distributed receptor on T lymphocytes that recognizes a peptide antigen presented by a major histocompatibility complex molecule. TCR signaling requires accessory and co-stimulatory signals for effective T-cell activation.

Synonyms:

T-Cells (T-Lymphocytes)

A type of lymphocyte that matures in the thymus and is the central effector of cell-mediated immunity. T-cells express the T-cell receptor (TCR) on their surface, which recognises peptide antigens presented by major histocompatibility complex (MHC) molecules on antigen-presenting cells.

Synonyms: T-Lymphocytes

T3

Triiodothyronine, the most biologically active thyroid hormone, produced by deiodination of T4 in peripheral tissues (liver, kidney) and secreted by the thyroid. Regulates metabolism (BMR), protein/carbohydrate/lipid metabolism, growth, and development.

Synonyms:

T4

Thyroxine, the main hormone secreted by the thyroid gland (thyroxine, 80-90 percent of secretion), converted to the active T3 in tissues. Bound largely to thyroxine-binding globulin (TBG); free T4 is the active unbound fraction. Regulates metabolism, growth, and development.

Synonyms:

Tabes dorsalis

A late manifestation of syphilis involving degenera-

tion of sensory pathways in the spinal cord, causing loss of proprioception, sensory ataxia, and characteristic pain.

Synonyms:

Tablet

A solid dosage form of compressed drug plus excipients (binders, fillers, disintegrants, lubricants, coatings). Types: immediate-release, enteric-coated (resistant to gastric acid), sustained/controlled-release, sublingual, buccal, effervescent, chewable, and orally disintegrating.

Synonyms:

Tachyarrhythmia

An abnormally fast heart rhythm, which may arise from the atria, ventricles, or the heart's conduction system. Symptoms can include palpitations, dizziness, chest discomfort, shortness of breath, or fainting; fainting or severe symptoms require urgent assessment.

Synonyms:

Tachycardia

A faster-than-expected heart rate that may be a normal response or a sign of disease. See Fast Heart Rate.

Synonyms:

Tachyphylaxis

A rapid, acute decrease in response to a drug after repeated administration over a short period, distinct from tolerance which develops more gradually. Tachyphylaxis results from rapid depletion of neurotransmitter stores, receptor desensitization, or receptor downregulation.

Synonyms:

Tachypnea

Abnormally rapid respiratory rate (adult >20 breaths/min). Physiologic (exercise, anxiety) or pathologic: hypoxia, fever, sepsis, metabolic acidosis (Kussmaul), pulmonary embolism, pneumonia, heart failure, pain, and compensation for metabolic derangement.

Synonyms:

Tachypnoea

Abnormally rapid breathing, defined as a respiratory rate >20 breaths per minute in adults (age-dependent: >60 in neonates, >40 in 1–12 months, >30 in 1–5 years, >20 in >5 years). Tachypnoea is a non-specific sign of respiratory or metabolic distress.

Synonyms:

Tachysystole (Uterine Hyperstimulation)

More than 5 contractions in 10 minutes averaged over 30 minutes, or contractions lasting ≥ 2 minutes. Tachysystole with fetal heart rate changes (late decelerations, prolonged deceleration, loss of variability) is more concerning. Causes: oxytocin (most common), prostaglandins (misoprostol > dinoprostone), and cocaine.

Synonyms: Uterine Hyperstimulation

TACO

Transfusion-Associated Circulatory Overload, a complication of blood transfusion due to volume overload causing pulmonary edema. Risk factors: pre-existing cardiac or renal disease, extremes of age, large transfusion volume, rapid infusion rate.

Synonyms:

Tactile Fremitus

Vibrations transmitted through the lung to the chest wall, felt during palpation. It is increased in consolidation (pneumonia) due to better sound transmission through solid tissue. It is decreased in pleural effusion, pneumothorax, and atelectasis due to impaired transmission.

Synonyms:

Taeniasis (Tapeworm Infection)

Intestinal infection caused by adult *Taenia* tapeworms, usually acquired by eating undercooked meat containing larval cysts. *Taenia solium* and *Taenia saginata* are important species; *Taenia solium* eggs can also cause cysticercosis in tissues.

Synonyms: Tapeworm Infection

Takayasu Arteritis

A chronic granulomatous vasculitis primarily affecting the aorta and its major branches, most commonly diagnosed in women under 50 years of age, particularly in Asian populations.

Synonyms:

Takayasu Disease

A large-vessel vasculitis that primarily affects the aorta and its major branches. It may cause limb claudication, weak or unequal pulses, blood-pressure differences, bruits, fever, fatigue, or arterial narrowing and aneurysms. Imaging and inflammatory assessment guide immunosuppressive and vascular treatment.

Synonyms:

Takayasu's arteritis

A chronic granulomatous vasculitis of the aorta and its major branches, predominantly affecting young women of Asian descent. Causes arterial stenosis, occlusion, or aneurysm formation. Presents with limb claudication, absent pulses, bruit, hypertension, and constitutional symptoms. Treatment: corticosteroids and immunosuppressives.

Synonyms:

Takotsubo Cardiomyopathy

Transient left ventricular apical ballooning resembling a Japanese octopus trap (takotsubo), typically triggered by emotional or physical stress. ECG may show ST elevation mimicking STEMI. Coronary angiography shows no obstructive disease. Most patients recover normal ventricular function within weeks.

Synonyms:

Talcosis

Pneumoconiosis from talc dust inhalation or IV injection of crushed oral medications. Causes upper lobe nodular fibrosis. HRCT may show "galaxy sign" of calcified nodules.

Synonyms:

Talus

Second largest tarsal bone articulating with tibia/fibula proximally at the ankle. Approximately 60 percent of its surface is articular cartilage with no muscular attachments. Transmits entire body weight to the calcaneus. Talar neck fractures may disrupt blood supply causing avascular necrosis in up to 50 percent.

Synonyms:

Tangier Disease

An autosomal-recessive disorder of HDL metabolism caused by ABCA1 dysfunction. It produces very low HDL cholesterol, enlarged yellow-orange tonsils, hepatosplenomegaly, peripheral neuropathy, thrombocytopenia, and premature atherosclerosis in some patients.

Synonyms:

Tanner Staging

A scale for assessing sexual maturity during puberty. Stage 1: prepubertal. Stage 2: breast buds (girls), testicular enlargement (boys). Stage 3: breast enlargement, pubic hair. Stage 4: areolar development, more pubic hair. Stage 5: adult breasts and genitalia, adult hair pattern.

Synonyms:

Thelarche

The onset of breast development, usually the first visible sign of female puberty. It commonly begins between ages 8 and 13, with substantial normal variation.

Synonyms:

Tapeworm

A parasitic flatworm with a segmented body that may live in the intestine or form larval cysts in tissues. People acquire different species by eating infected meat or fish or by ingesting eggs from contaminated sources. Symptoms and complications depend on the species and site.

Synonyms:

Tapeworm Infection

Infection caused by parasitic tapeworms. *Taenia* species may live as adult worms in the intestine, while some tapeworm larvae can form cysts in tissues.

Synonyms:

Tardive Dyskinesia

Involuntary, repetitive, purposeless movements caused by prolonged use of antipsychotic medications, typically developing after months to years of exposure. Movements include choreoathetoid movements of the tongue, face, and extremities (lip smacking, tongue protrusion, grimacing, choreiform movements of limbs).

Synonyms:

Target-Controlled Infusion

A computerized infusion pump system that maintains a predetermined drug concentration in plasma or effect site using pharmacokinetic modeling. TCI systems use three-compartment pharmacokinetic models to calculate infusion rates that achieve and maintain target concentration.

Synonyms:

Targeted Temperature Management

Controlled therapeutic hypothermia for comatose survivors of cardiac arrest. Target: 32-36 degrees C for 24-72 hours followed by gradual rewarming. Mechanism: reduces metabolic demand, limits reperfusion injury, and reduces free radical generation. TTM2 trial showed 33 degrees C was not superior to 36 degrees C.

Synonyms:

Targeted Therapy

Drugs targeting specific molecular abnormalities in cancer. Examples: imatinib (BCR-ABL), trastuzumab (HER2), rituximab (CD20), tyrosine kinase inhibitors. Requires molecular testing.

Synonyms:

Tarlov Cyst

A cerebrospinal-fluid-filled perineural cyst, usually

located near the dorsal root ganglia in the sacral spine. Many are incidental, but larger or symptomatic cysts can cause sacral pain, radiculopathy, sensory change, bowel or bladder dysfunction, or sexual dysfunction.

Synonyms:

Tarsal Coalition

An abnormal connection between two bones in the rear or middle foot, usually present from birth. It can cause a stiff, painful flatfoot, recurrent ankle sprains, and limited foot motion, often becoming more noticeable during adolescence.

Synonyms:

Tarsal Tunnel Syndrome

Tibial nerve compression at ankle. Symptoms: burning pain, tingling in foot sole. Tinel sign at ankle. Treatment: orthotics, corticosteroid injection, surgical decompression.

Synonyms:

Tarsus

The collection of seven bones forming the posterior part of the foot, between the tibia/fibula and the metatarsals.

Synonyms:

Taste

The sensation produced by the interaction of chemical substances with taste receptor cells (TRCs) on the tongue, palate, pharynx, epiglottis, and upper esophagus. Taste is one of the five primary senses (gustation).

Synonyms:

Tau PET

Tracers: Flortaucipir, MK-6240. Detect tau tangles in neurodegenerative diseases.

Synonyms:

Taurodontism

Enlarged pulp chamber, short roots. Molars most affected. Associated with genetic conditions.

Synonyms:

Tay-Sachs Disease

Autosomal recessive lysosomal storage disorder (HEXA gene, hexosaminidase A). Accumulation of GM2 ganglioside in neurons. Ashkenazi Jewish prevalence higher. Symptoms: developmental regression, cherry-red spot on macula, seizures, paralysis, death by age 4. No cure. Carrier screening recommended.

Synonyms:

TCA Cycle

The tricarboxylic acid (Krebs) cycle occurs in the mitochondrial matrix, completing the oxidation of acetyl-CoA (from carbohydrates, fats, and proteins) to CO₂ while generating reducing equivalents (NADH, FADH₂) for the electron transport chain.

Synonyms:

TCAs

Tricyclic antidepressants are a class of drugs that inhibit the reuptake of serotonin and norepinephrine, similar to SNRIs, but also block histamine H₁ receptors, muscarinic acetylcholine receptors, and alpha-1 adrenergic receptors, producing numerous side effects.

Synonyms:

TCAs (Tricyclic Antidepressants)

Antidepressants that block reuptake of serotonin and norepinephrine, with additional anticholinergic, antihistaminic, and alpha-adrenergic blocking effects. Examples include amitriptyline, nortriptyline, imipramine, and desipramine. They are effective for depression, neuropathic pain, and migraine prophylaxis.

Synonyms: Tricyclic Antidepressants

Tdap Vaccination in Pregnancy

Administration of tetanus, diphtheria, and acellular pertussis (Tdap) vaccine during each pregnancy, optimally at 27-36 weeks. The goal: boost maternal antibodies to protect the newborn from pertussis (whooping cough) before the infant can be vaccinated at 2 months.

Synonyms:

Tdap Vaccine

Tetanus, Diphtheria, and acellular Pertussis booster given at 11-12 years and during each pregnancy (27-36 weeks gestation). Replaces one dose of Td. Important for pertussis protection, particularly for protecting newborns through maternal antibody transfer. Also given to adolescents and adults to maintain tetanus and diphtheria immunity.

Synonyms:

Technetium-99m

Most widely used radionuclide in nuclear medicine. Half-life: 6 hours. Emits 140 keV gamma rays. Produced from molybdenum-99/technetium-99m generator. Used with various ligands: MDP (bone), sestamibi (myocardium), DTPA (renal), nanocolloid (lymphatic), HMPAO (brain perfusion).

Synonyms:

Technique

The method, equipment, and protocol used to perform a medical examination, procedure, or imaging study.

Synonyms:

Tedizolid pharmacokinetics

The study of how tedizolid is absorbed, distributed, metabolized, and eliminated. Tedizolid is available orally and intravenously and has pharmacokinetic properties that support once-daily treatment; its clinical use depends on the infection and patient factors.

Synonyms:

Teenage Pregnancy

Pregnancy in adolescents (usually 10-19 years), associated with higher maternal and fetal risks: preterm birth, low birth weight, preeclampsia, anemia, and increased neonatal mortality; also socioeconomic and educational consequences. Causes: unprotected intercourse, lack of contraception/education, poverty, and peer/family factors.

Synonyms:

Teeth

Hard, mineralized structures in the mouth used for cutting, tearing, and grinding food.

Synonyms:

Teething

The eruption of primary (deciduous) teeth, usually starting around 6 months (range 3-12), with lower central incisors first; 20 teeth by 2-3 years.

Synonyms:

Tele radiology

Remote interpretation of imaging studies.

Synonyms:

Tele-Rehabilitation

Remote rehabilitation via technology. Video consultations, remote monitoring, home exercise programs. Increases access, especially rural.

Synonyms:

Telemedicine

Remote delivery of healthcare using technology. Examples: video visits, remote monitoring, store-and-forward. Increases access.

Synonyms:

Telogen Effluvium

Diffuse hair shedding caused by premature entry of hair follicles into the telogen (resting) phase. Triggers include severe illness, surgery, childbirth, rapid weight loss, emotional stress, medications (beta-blockers, retinoids, anticoagulants), and nutritional deficiencies (iron, zinc, vitamin D).

Synonyms:

Telomere

Protective DNA sequence at chromosome ends. Shortens with cell division. Associated with aging.

Synonyms:

Temperature

A measurement of body heat. The result varies with the measurement site, time, activity, age, and

illness.

Synonyms:

Temperature (Body Temperature)

The balance between heat production (metabolism, muscle activity) and heat loss (radiation, conduction, convection, evaporation). Normal core body temperature: 36.5–37.5°C (97.7–99.5°F), regulated by the hypothalamus (preoptic anterior hypothalamus—thermoregulatory center).

Synonyms: Body Temperature

Temple Syndrome

A genomic-imprinting disorder involving chromosome 14q32 that causes prenatal and postnatal growth restriction, hypotonia, developmental delay, feeding difficulty, short stature, and abnormal pubertal development.

Synonyms:

Temporal Arteritis

A vasculitic disorder affecting medium and large arteries, particularly the temporal artery, predominantly occurring in adults over 50 years of age.

Synonyms:

Temporal Bones

Paired bones forming the cranial floor and lateral wall, with squamous, petrous, mastoid, tympanic, and styloid parts. Contain the external auditory canal, middle and inner ear, and foramina: carotid canal (internal carotid), jugular foramen (CN IX-XI, IJV), and foramen lacerum.

Synonyms:

Temporal Lobe

One of the four major lobes of the cerebral hemisphere, located beneath the lateral fissure (Sylvian fissure) on the lateral surface of the brain, extending medially to the parahippocampal gyrus. The temporal lobe is involved in auditory processing, language comprehension, memory, and emotion.

Synonyms:

Temporal Lobe Epilepsy

The most common form of focal (partial) epilepsy, arising from the medial temporal lobe structures (hippocampus, amygdala, parahippocampal gyrus).

Synonyms:

Temporomandibular Joint

Synovial ginglymoarthrodial joint between mandibular condyle and temporal bone's mandibular fossa, separated by an articular disc. Only bilateral body joint, allowing hinge and sliding movements. Disc divides into superior/inferior compartments. Temporomandibular disorders cause pain, clicking, limited movement, common with bruxism.

Synonyms:

Temporomandibular Joint Disorder

Pain and dysfunction of TMJ and masticatory muscles. Symptoms: jaw pain, clicking, limited opening, headache, ear pain. Etiology: multifactorial (bruxism, stress, trauma, occlusion). Treatment: conservative (reassurance, self-care, splint, NSAIDs), physical therapy, rare surgery.

Synonyms:

Temporomandibular Joint Replacement

Total joint replacement for severe TMJ pathology. Indications: ankylosis, severe degenerative disease, failed previous surgery.

Synonyms:

Temporomandibular Joint Syndrome

Pain or dysfunction involving the jaw joint and chewing muscles, often causing jaw pain, clicking, restricted opening, headache, or tooth-related symptoms. Causes include clenching, trauma, arthritis, and stress-related muscle tension. Persistent locking, severe pain, or inability to eat requires dental or medical evaluation.

Synonyms:

Tendinitis

Inflammation of a tendon. Many painful tendon conditions are instead degenerative tendinopathy without substantial inflammation.

Synonyms:

Tendon

Dense regular connective tissue connecting muscle to bone, composed primarily of type I collagen fibers arranged in parallel bundles. Transmits muscle force to bone to produce movement. Poor vascularity (slower healing). Enclosed in tendon sheath (synovial) at friction points.

Synonyms:

Tendon Transfer

Surgical relocation of a functioning tendon to restore movement or balance when the original muscle-tendon unit is absent, paralyzed, or irreparable. Successful transfer requires an adequate donor, appropriate excursion, and a stable recipient joint.

Synonyms:

Tendonitis

Tendinopathy: inflammation or degeneration of a tendon from overuse, repetitive strain, or trauma, causing localized pain, swelling, and tenderness with activity. Common sites: rotator cuff (supraspinatus), lateral elbow (tennis elbow), medial elbow (golfer's elbow), Achilles, patellar (jumper's knee), biceps, and De Quervain.

Synonyms:

Tenecteplase

A modified tissue plasminogen activator (TNK-tPA) thrombolytic with longer half-life, higher fibrin specificity, and resistance to PAI-1. Used for acute ischemic stroke and STEMI. Given as a single IV bolus (weight-based), simplifying administration. Adverse effects: hemorrhage (intracranial—major concern), allergic reactions.

Synonyms:

Tenesmus

A sensation of incomplete defecation, characterized by a constant feeling of needing to pass stool accompanied by straining, pain, and cramping, despite little or no stool being passed. Tenesmus is a symptom, not a diagnosis.

Synonyms:

Tennis Elbow

Lateral epicondylitis, a tendinopathy of the common extensor tendon at the lateral epicondyle (extensor carpi radialis brevis). Caused by repetitive wrist extension and overuse, not limited to tennis. Presents with lateral elbow pain worsened by wrist extension and grip. Tenderness over the lateral epicondyle.

Synonyms:

Tenosynovitis

Inflammation of a tendon and its synovial sheath, causing pain, swelling, and crepitus along the tendon.

Synonyms:

Tension Headache

The most common headache type, characterized by bilateral, pressing/tightening head pain of mild-moderate intensity (like a band around the head), lasting 30 min to days, without nausea or vomiting; photophobia or phonophobia may be present but not both.

Synonyms:

Tension Pneumothorax

Life-threatening pneumothorax with mediastinal shift. Emergency needle decompression (2nd intercostal space, midclavicular line) followed by chest tube. Signs: respiratory distress, hypotension, tracheal deviation, distended neck veins, unilateral absent breath sounds.

Synonyms:

Teratogen

Substance causing birth defects. Examples: thalidomide, isotretinoin, alcohol, warfarin, valproate, ACE inhibitors. Prenatal exposure critical.

Synonyms:

Teratogenicity

The ability of a drug, chemical, or infectious agent to cause birth defects or developmental abnormalities when exposure occurs during pregnancy. The

risk of teratogenic effects depends on the timing of exposure, with the embryonic period from 3 to 8 weeks after fertilization being the most critical for organogenesis.

Synonyms:

Teratoma

A type of germ cell tumor composed of tissues derived from two or three germ layers (ectoderm, endoderm, mesoderm), reflecting pluripotent differentiation.

Synonyms:

Terbinafine

An allylamine antifungal agent that inhibits squalene epoxidase, an early enzyme in the ergosterol biosynthesis pathway, causing accumulation of squalene and depletion of ergosterol in the fungal cell membrane. The accumulation of squalene is fungicidal, while ergosterol depletion disrupts membrane function.

Synonyms:

Teriparatide for Osteoporosis

Recombinant human parathyroid hormone fragments one through thirty-four that stimulate osteoblast-mediated bone formation. Indicated for severe osteoporosis with fractures or very low T-scores and for patients who have failed or are intolerant to bisphosphonates. Daily subcutaneous injection for up to two years.

Synonyms:

Terminal Delirium

Delirium occurring near the end of life, often caused by advanced organ failure, medication effects, metabolic disturbance, infection, or reduced cerebral perfusion. Management prioritizes comfort, reversible contributors when consistent with goals, and support for the patient and family.

Synonyms:

Terminal Illness

An advanced disease that is expected to lead to death, although the timing and response to available

treatment may vary.

Synonyms:

Tertiary Prevention

Reducing complications from established disease. Examples: rehabilitation, chronic disease management, palliative care.

Synonyms:

Test Strips

Reagents for diagnostic testing. Types: urine dipstick, blood glucose, ketone.

Synonyms:

Testicular Cancer

Most common solid malignancy in young men 15-35 years. Types: germ cell tumors (seminoma, non-seminoma), sex cord-stromal tumors. Presentation: painless testicular mass, heaviness, ache. Diagnosis: scrotal ultrasound, tumor markers (AFP, beta-hCG, LDH).

Synonyms:

Testicular Disorders

Conditions affecting the testes or surrounding structures, including torsion, infection, inflammation, trauma, tumors, and hormonal disorders. Symptoms may include pain, swelling, a mass, infertility, or changes in sexual development and require appropriate evaluation.

Synonyms:

Testicular Microlithiasis

Multiple tiny calcifications within the testicular tissue seen on ultrasound. The finding alone does not establish cancer, and follow-up depends on other risk factors and clinical findings.

Synonyms:

Testicular Torsion

Surgical emergency caused by twisting of the spermatic cord around its longitudinal axis, cutting off venous return and leading to arterial occlusion, ischemia, and infarction of the testicle.

Synonyms:

Testicular Torsion Emergency

Rotation of the spermatic cord that compromises testicular blood flow, causing sudden unilateral scrotal pain, nausea, a high-riding testis, and an abnormal cremasteric reflex. Immediate surgical exploration and detorsion are required; imaging must not delay treatment when suspicion is high.

Synonyms:

Testis

The male reproductive gland that produces spermatozoa in seminiferous tubules and secretes testosterone from interstitial Leydig cells. It is normally located in the scrotum.

Synonyms:

Testis (Testicle)

The male gonad, a paired ovoid organ (4–5 cm × 2–3 cm, weight 15–20 g) located in the scrotum, responsible for sperm production (spermatogenesis) and testosterone secretion. Each testis is covered by the tunica vaginalis (peritoneal remnant) and tunica albuginea (dense fibrous capsule).

Synonyms: Testicle

Testosterone

The primary male sex hormone, an androgen produced mainly in the testicles that is essential for the development of male reproductive tissues, secondary sexual characteristics, and overall health.

Synonyms:

Tetanus

An acute neurological disease caused by tetanospasmin toxin from *Clostridium tetani*, introduced through wounds. Characterized by generalized rigidity and painful muscle spasms (trismus/lockjaw, risus sardonicus, opisthotonos). Autonomic instability can occur in severe cases. Diagnosis: clinical.

Synonyms:

Tetany

A clinical syndrome of neuromuscular hyperexcitability caused by hypocalcaemia (most common—total calcium <2.1 mmol/L, ionised calcium

<1.1 mmol/L), but also caused by hypomagnesaemia, hypokalaemia, and alkalosis (respiratory or metabolic).

Synonyms:

Tethered Cord Syndrome

A congenital or acquired condition where the spinal cord is abnormally attached (tethered) to surrounding tissues, restricting its normal upward movement within the spinal canal. Caused by a thickened filum terminale, lipomeningomyelocele, diastematomyelia, or previous myelomeningocele repair.

Synonyms:

Tetracycline Stain

Intrinsic discoloration from tetracycline antibiotics during tooth development. Gray or brown bands. Treatment: bleaching, veneers, crowns.

Synonyms:

Tetracyclines

A class of bacteriostatic antibiotics that bind reversibly to the 30S ribosomal subunit and block the attachment of aminoacyl-tRNA to the acceptor site, inhibiting protein synthesis. They include tetracycline, doxycycline, and minocycline.

Synonyms:

Tetralogy of Fallot

A congenital heart defect consisting of a ventricular septal defect, obstruction of blood flow from the right ventricle, an overriding aorta, and right-ventricular hypertrophy.

Synonyms:

Th1/Th2/Th17/Tfh/Treg Balance

CD4+ T helper subsets defined by master transcription factors and signature cytokines: Th1 (Tbet, IFN-gamma, IL-12, STAT4): intracellular pathogens, autoimmunity (RA, MS, type 1 diabetes). Th2 (GATA3, IL-4/5/13, IL-4/STAT6): helminths, allergy, asthma.

Synonyms:

Thalamus

Bilateral ovoid gray matter structure forming the third ventricle's lateral walls, the brain's relay station for nearly all sensory (except olfaction), motor, and limbic information to the cortex. Numerous nuclei: VPL (spinothalamic, dorsal column), VPM (trigeminal), LGN (visual), MGN (auditory), VL/VA (motor).

Synonyms:

thalassemia

A group of inherited hemoglobin disorders caused by reduced or absent synthesis of one or more globin chains, leading to microcytic hypochromic anemia.

Synonyms:

Thalassemia Major

Beta-thalassemia, an autosomal recessive hemoglobin disorder with absent or minimal beta-globin chain production. Presents in infancy with severe anemia, failure to thrive, hepatosplenomegaly, and skeletal deformities. Diagnosis by hemoglobin electrophoresis showing absent HbA and elevated HbF and HbA2.

Synonyms:

Thallium Scan

Nuclear medicine imaging using Tl-201. Myocardial perfusion, tumor detection. Largely replaced by Tc-99m agents.

Synonyms:

Thallium-201

SPECT radionuclide, half-life 73 hours. Used for myocardial perfusion imaging. Mechanism: K⁺ analog, taken up by Na⁺/K⁺ ATPase.

Synonyms:

Thanatology

The scientific study of death, dying, postmortem changes, and the psychological, social, and ethical aspects of bereavement. In forensic medicine, it also examines the circumstances and evidence surrounding death.

Synonyms:

Thanatophoric Dysplasia

A severe skeletal dysplasia, usually caused by an FGFR3 variant, with markedly shortened limbs, narrow thorax, macrocephaly, and characteristic skull and vertebral abnormalities. The severe thoracic restriction commonly causes neonatal respiratory failure.

Synonyms:

Theranostic Pair

Combined therapy and diagnostics using matched radiopharmaceutical pairs. See theranostics.

Synonyms:

Theranostics

Combined therapy and diagnostics using matched radiopharmaceutical pairs. Diagnostic isotope (e.g., Ga-68) identifies target, therapeutic isotope (e.g., Lu-177) delivers treatment. Examples: Ga-68/Lu-177 DOTATATE (neuroendocrine tumors), PSMA theranostics (prostate cancer).

Synonyms:

Therapeutic Alliance

The collaborative, trusting relationship between therapist and patient that is foundational to effective psychotherapy. It includes agreement on goals, tasks, and the bond between therapist and patient. It is the strongest predictor of psychotherapy outcome across all therapeutic modalities.

Synonyms:

Therapeutic Drug Monitoring

The clinical practice of measuring specific drug concentrations in blood or plasma to individualize drug dosing and ensure therapeutic effectiveness while minimizing toxicity. TDM is particularly important for drugs with narrow therapeutic indices, where small changes in concentration can lead to therapeutic failure or toxicity.

Synonyms:

Therapeutic Exercise

Exercise prescribed to improve function, reduce pain, prevent disability. Types: stretching, strengthening,

aerobic, balance, functional. Progression: low to high intensity.

Synonyms:

Therapeutic Hypothermia

Controlled cooling of the body temperature used in psychiatric practice for severe catatonia and neuroleptic malignant syndrome. In NMS, cooling is a key treatment alongside discontinuation of the offending agent and dantrolene administration.

Synonyms:

Therapeutic Index

The therapeutic index is a quantitative measure of the relative safety of a drug, defined as the ratio of the dose that produces toxicity in 50 percent of the population to the dose that produces the desired therapeutic effect in 50 percent of the population.

Synonyms:

Therapeutic Window

The range of plasma drug concentrations between the minimum effective concentration (producing a therapeutic effect) and the minimum toxic concentration (producing toxicity), in which efficacy is achieved with acceptable toxicity.

Synonyms:

Therapeutics

The branch of medicine concerned with the treatment of disease, encompassing all interventions used to prevent, manage, or cure illness.

Synonyms:

Therapy

Treatment intended to prevent, relieve, or cure disease or to improve function and quality of life.

Synonyms:

Therapy Monitoring

Repeated clinical assessment, laboratory testing, or imaging used to evaluate response, adverse effects, and ongoing need for treatment.

Synonyms:

Thermal Injury

Tissue damage caused by heat, flame, hot liquid, steam, or cold. Burn severity depends on depth, total body surface area, location, inhalation injury, associated trauma, and patient factors; assessment should include airway and circulatory complications.

Synonyms:

Thermal Injury (Burns)

Tissue damage caused by heat. Initial care includes stopping the exposure, removing loose constricting material, cooling briefly with clean water, covering the injury, and assessing depth and extent. Larger or deeper burns require specialized evaluation, fluid management, pain control, wound care, and tetanus assessment.

Synonyms: Burns

Thermal Therapy

Treatment using heat or cold to influence pain, swelling, muscle tension, or tissue temperature. Effects and safety depend on the condition and method used.

Synonyms:

Thermogenesis

Heat production from food digestion, muscle activity, brown fat. Diet-induced thermogenesis 10% of TDEE.

Synonyms:

Thermometer

Device measuring body temperature. Types: mercury (phased out), digital, tympanic, temporal artery, infrared. Normal oral: 36.5-37.5°C.

Synonyms:

Thermoneutral Zone

The range of ambient temperatures over which body temperature is maintained by basal metabolic heat production alone, without additional thermoregulatory responses such as shivering or sweating. In humans the zone is approximately 27-32 degrees C for a resting nude adult. Within the zone, vasomotor tone adjusts heat loss.

Synonyms:

Thermoplasty

A bronchoscopic procedure that uses radiofrequency energy to ablate smooth muscle in the airways, reducing bronchospasm. It is approved for severe, persistent asthma in adults not controlled with ICS/LABA. It reduces exacerbations and emergency department visits but does not improve lung function.

Synonyms:

Thermoregulation

The physiological maintenance of core body temperature near the set point (37 degrees C) via a balance of heat production and heat loss, controlled by the preoptic area of the hypothalamus.

Synonyms:

Thiamine

Vitamin B1, a water-soluble vitamin required for carbohydrate metabolism and nerve function. Severe deficiency can cause beriberi or Wernicke encephalopathy.

Synonyms:

Thiamine (Vitamin B1)

A water-soluble vitamin whose active coenzyme form, thiamine pyrophosphate, is required by pyruvate dehydrogenase, alpha-ketoglutarate dehydrogenase, transketolase, and branched-chain ketoacid dehydrogenase. Deficiency causes beriberi and Wernicke encephalopathy.

Synonyms: Vitamin B1

Thiazide Diuretics

Thiazide diuretics act on the distal convoluted tubule by inhibiting the sodium-chloride cotransporter, reducing sodium and chloride reabsorption and producing natriuresis and diuresis. They are less potent than loop diuretics but have a longer duration of action, typically 6 to 12 hours.

Synonyms:

Thiazolidinediones

Insulin sensitizers activating peroxisome proliferator-activated receptors primarily in adipose tissue and skeletal muscle. Agents include pioglitazone and rosiglitazone. Mechanisms include enhanced insulin-mediated glucose uptake, altered adipokine secretion, and reduced hepatic glucose output.

Synonyms:

Thiopental Sodium

An ultra-short-acting barbiturate, used for induction of general anesthesia (IV, onset 30–60 seconds, duration 5–10 minutes) and as a third-line agent for raised intracranial pressure (cerebroprotective effect: reduces cerebral metabolism, cerebral blood flow, and intracranial pressure).

Synonyms:

Third Stage of Labor

From delivery of the baby to delivery of the placenta. The placenta separates from the uterine wall and is expelled spontaneously or with gentle cord traction. Normal duration: 5-30 minutes.

Synonyms:

Third Trimester

The period from 28 weeks to delivery. Rapid fetal weight gain occurs, lungs mature with surfactant production. Fetal movements become regular and countable. Braxton Hicks contractions begin. Group B Streptococcus screening at 36 weeks. Fetal positioning assessed for delivery. Viability generally considered at 23-24 weeks.

Synonyms:

Third-Degree AV Block

Complete heart block with no conduction between atria and ventricles. Atria and ventricles beat independently (AV dissociation). Ventricular escape rhythm: junctional (40-60, narrow QRS) or ventricular (20-40, wide QRS).

Synonyms:

Third-Degree Burn

A full-thickness burn that destroys the epidermis

and dermis and may extend into subcutaneous tissue. The skin may appear white, brown, or charred and sensation may be reduced. Assessment includes burn depth, extent, inhalation injury, and associated trauma; deep or extensive burns require specialist treatment and may need grafting.

Synonyms:

Thoracentesis

Removal of pleural fluid via needle insertion through the chest wall. Performed for diagnosis and symptom relief. Ultrasound guidance improves safety.

Synonyms:

Thoracic Aortic Aneurysm

Aneurysm of thoracic aorta. Associated with hypertension, Marfan syndrome, bicuspid aortic valve.

Synonyms:

Thoracic Cage

The bony and cartilaginous framework formed by the thoracic vertebrae, ribs, costal cartilages, and sternum. It protects thoracic organs and assists respiratory movements.

Synonyms:

Thoracic Cavity

The chest cavity, enclosed by the ribs and chest muscles, containing the lungs, heart, esophagus, and trachea.

Synonyms:

Thoracic Duct

Body's largest lymphatic vessel, approximately 40 cm long, draining lymph from the entire body below the diaphragm and left side above it (approximately 75 percent of total lymph).

Synonyms:

Thoracic endometriosis

Endometrial tissue within the thoracic cavity causing catamenial pneumothorax, hemothorax, or lung nodules, recurring cyclically with menstruation and often requiring hormonal suppression.

Synonyms:

Thoracic Outlet Syndrome

Compression of neurovascular bundle at thoracic outlet. Types: neurogenic (most common), venous, arterial. Symptoms: neck/shoulder/arm pain, paresthesia, weakness, vascular symptoms. Diagnosis: clinical, imaging, nerve conduction. Treatment: physical therapy, surgical decompression.

Synonyms:

Thoracic Vertebrae

Have costal facets on bodies and transverse processes for rib articulation. Heart-shaped bodies, long downward spinous processes, coronally-oriented facets allowing rotation and lateral flexion but limiting flexion/extension. Small circular vertebral foramen.

Synonyms:

Thoracolumbar Spine Trauma

Injury to the thoracic or lumbar spine. Assessment includes fracture morphology, posterior ligamentous complex integrity, and neurologic status. Classification systems such as AO Spine and TLICS help guide management, which depends on stability and the clinical context.

Synonyms:

Thoracotomy

A surgical incision into the chest wall to access the thoracic cavity (pleural space, lungs, heart, great vessels, esophagus, diaphragm, mediastinum).

Synonyms:

Thought Blocking

An abrupt interruption in the train of thought before it is completed, as if the thought was removed or pushed out of the patient's mind. The patient may pause mid-sentence, appear confused, and report that the thought was "taken out" or "blocked." It is a formal thought disorder seen in schizophrenia.

Synonyms:

Threadworm (Enterobiasis)

An intestinal parasitic infection caused by *Enterobius vermicularis*, also called pinworm. Infection

spreads when eggs are swallowed, often after contact with contaminated hands, bedding, food, or surfaces.

Synonyms: Enterobiasis

Three-Dimensional Ultrasound

Ultrasound creating 3D images. Used in obstetrics, gynecology.

Synonyms:

Throat Cancer

Cancer arising in the pharynx or nearby structures of the throat. Persistent hoarseness, difficulty or pain with swallowing, a neck lump, unexplained weight loss, or persistent sore throat requires medical evaluation, especially in people who use tobacco or alcohol.

Synonyms:

Thrombectomy

A surgical or interventional radiology procedure to remove a blood clot (thrombus) from a blood vessel, restoring blood flow. Types: (1) Endovascular thrombectomy (mechanical thrombectomy)—for acute ischemic stroke due to large vessel occlusion (LVO—internal carotid artery, middle cerebral artery M1 segment).

Synonyms:

Thrombectomy (Vascular)

Removal of a blood clot from a blood vessel, using an open surgical or catheter-based procedure.

Synonyms: Vascular

Thromboangiitis Obliterans (Buerger Disease)

An inflammatory disease of small and medium blood vessels, strongly associated with tobacco use. It can cause pain, color changes, ulcers, or gangrene in the hands or feet. Complete tobacco cessation is essential; further treatment depends on ischemia, tissue loss, and other complications.

Synonyms: Buerger Disease

Thrombocytes

Small, anucleate, disc-shaped cell fragments (2–4 μm diameter) derived from megakaryocytes in the bone marrow, circulating at $150\text{--}400 \times 10^9/\text{L}$. See Platelets (Thrombocytes).

Synonyms:

Thrombocytopathy

A disorder of platelet function that impairs primary hemostasis despite a normal or near-normal platelet count. It may be inherited or acquired and can cause mucocutaneous bleeding, easy bruising, prolonged bleeding after procedures, or menorrhagia.

Synonyms:

Thrombocytopenia

A platelet count below the reference range, commonly below 150,000 per microliter. Bleeding risk depends on the count, its rate of change, platelet function, and other factors.

Synonyms:

Thrombocytosis

An elevated platelet count ($>450,000/\mu\text{L}$). Reactive (secondary): infection, inflammation, iron deficiency, malignancy, post-splenectomy, hemorrhage, exercise—usually mild, no thrombotic risk.

Synonyms:

Thromboelastography

A viscoelastic whole-blood assay that measures the initiation, formation, strength, and breakdown of a clot. It provides a functional overview of coagulation and fibrinolysis and may guide targeted blood-component therapy in major bleeding.

Synonyms:

Thromboembolism

Obstruction of a blood vessel by a clot that formed elsewhere and traveled through the circulation.

Synonyms:

Thrombolysis

The dissolution of a blood clot using a medicine such as a fibrinolytic agent. It is used only in selected

conditions because it can cause serious bleeding.

Synonyms:

Thrombolysis for PE

Systemic thrombolytics (alteplase) for massive PE with hemodynamic instability. Rapid clot dissolution but significant bleeding risk.

Synonyms:

Thrombolysis for Stroke

Thrombolysis with intravenous alteplase (tPA) is the primary acute treatment for ischemic stroke when administered within the time window of symptom onset. Alteplase is a recombinant tissue plasminogen activator that converts plasminogen to plasmin, which degrades fibrin in the thrombus, restoring blood flow to the ischemic brain.

Synonyms:

Thrombolytic

A drug that dissolves blood clots by activating plasminogen to plasmin, which degrades fibrin. Agents: alteplase (tPA), tenecteplase (TNK-tPA), reteplase, streptokinase, urokinase. Indications: acute ischemic stroke (within 4.5 hours), STEMI, massive pulmonary embolism, and acute limb ischemia.

Synonyms:

Thrombophilia

A tendency to develop venous thromboembolism (VTE) due to inherited or acquired hypercoagulable states. Inherited: factor V Leiden, prothrombin G20210A mutation, antithrombin deficiency, protein C deficiency, protein S deficiency.

Synonyms:

Thrombophilia Testing

Thrombophilia testing evaluates for inherited and acquired hypercoagulable states in patients with venous thromboembolism, recurrent pregnancy loss, or strong family history of VTE.

Synonyms:

Thrombophlebitis

Inflammation of a vein associated with a blood clot,

commonly affecting a superficial vein in the leg. It may cause a tender, red, firm cord under the skin. Deep-vein involvement can lead to pulmonary embolism and requires prompt medical assessment.

Synonyms:

Thrombopoiesis

The production of platelets from megakaryocytes in the bone marrow. It is regulated principally by thrombopoietin and involves megakaryocyte maturation, proplatelet formation, and release of circulating platelets.

Synonyms:

Thrombosed intracranial aneurysm

An intracranial arterial aneurysm that has undergone partial or complete thrombosis of its lumen, which may reduce rupture risk but can cause mass effect on adjacent brain structures. Presents with headache, cranial nerve palsies, or seizures depending on location. Diagnosis: CT, MRI, or conventional angiography.

Synonyms:

Thrombosis

The formation of a blood clot within the cardiovascular system during life, potentially obstructing blood flow and causing tissue ischemia or infarction. Arterial thrombi typically form on ruptured atherosclerotic plaques, are composed primarily of platelets and fibrin, and appear pale and grossly attached to the vessel wall.

Synonyms:

Thrombosis of the inferior vena cava

Formation of a blood clot within the inferior vena cava, which may occur in the setting of IVC filters, malignancy, hypercoagulable states, or extension from iliofemoral deep vein thrombosis. May cause bilateral lower extremity edema, abdominal pain, and hepatic or renal dysfunction. Requires anticoagulation and possible thrombectomy.

Synonyms:

Thrombotic Microangiopathy

Endothelial damage with platelet-rich microthrombi causing MAHA with schistocytes, thrombocytopenia, and organ ischemia. TTP from ADAMTS13 deficiency treated with plasmapheresis. HUS from Shiga toxin managed supportively. Atypical HUS from complement dysregulation responds to eculizumab.

Synonyms:

Thrombotic Thrombocytopenic Purpura

A life-threatening thrombotic microangiopathy usually caused by acquired or inherited deficiency of ADAMTS13, the enzyme that cleaves large von Willebrand factor multimers. It causes platelet consumption, red-cell fragmentation, and possible organ ischemia.

Synonyms:

Thrombotic vasculopathy

A spectrum of disorders characterized by thrombus formation within blood vessels of various sizes, often associated with antiphospholipid syndrome, disseminated intravascular coagulation, thrombotic thrombocytopenic purpura, or malignancy.

Synonyms:

Thrombus Organization

The process by which a thrombus is gradually replaced by granulation tissue and eventually fibrous scar tissue. The process begins when inflammatory cells, particularly macrophages, infiltrate the thrombus and begin digesting the fibrin and dead cells through fibrinolysis.

Synonyms:

Thrush

A common vaginal infection caused by the yeast *Candida albicans* (also called candidiasis, vaginal thrush, or candida vulvovaginitis). Symptoms: itching, soreness, white discharge (like cottage cheese), dyspareunia, and external dysuria. Risk factors: pregnancy, antibiotic use, diabetes, immunosuppression, and high estrogen states.

Synonyms: candidiasis, vaginal thrush, or candida

vulvovaginitis).

Thumb CMC Arthritis

Thumb carpometacarpal (CMC) arthritis: Eaton-Littler classification: I (normal), II (slight narrowing, osteophytes <2mm), III (narrowing, osteophytes >2mm, subluxation), IV (pantrapezial arthritis). Clinical: base of thumb pain, pinch weakness, thenar wasting, squaring (subluxation).

Synonyms:

Thymoma

A tumor of thymic epithelial cells, associated with myasthenia gravis, pure red cell aplasia, and hypogammaglobulinemia. Malignant behavior is determined by capsular invasion and stage.

Synonyms:

Thymus

Primary lymphoid organ in the anterior mediastinum, largest in childhood, involutes with age. Site of T-cell maturation (thymopoiesis): thymocytes undergo positive and negative selection to produce self-tolerant, MHC-restricted T cells. Epithelial cells produce thymic hormones (thymosin, thymopoietin).

Synonyms:

Thyroglobulin Surveillance

Thyroglobulin produced only by thyroid follicular cells serves as a tumor marker after total thyroidectomy for differentiated thyroid carcinoma. In patients who have undergone complete thyroidectomy and radioactive iodine ablation thyroglobulin should be undetectable.

Synonyms:

Thyroglossal Duct Cyst

Congenital midline neck mass resulting from persistence of the thyroglossal duct the embryological tract of thyroid descent. Most common congenital neck mass presenting in childhood. Located at or near the hyoid bone and moves with swallowing and tongue protrusion. Diagnosis is by ultrasound demonstrating a cystic midline neck mass.

Synonyms:

Thyroid Cancer

A malignant tumor of the thyroid. Major types include papillary, follicular, medullary, and anaplastic carcinoma, which differ in behavior and treatment.

Synonyms:

Thyroid Cancer Staging

American Joint Committee on Cancer TNM staging for differentiated thyroid carcinoma incorporates tumor size, extent of invasion, lymph node metastases, and distant metastases. Age is a critical prognostic factor with patients under fifty having more favorable outcomes. Stage I is any tumor without metastases in patients under fifty.

Synonyms:

Thyroid Cartilage

The largest cartilage of the larynx, formed by two plates that meet in front and create the laryngeal prominence. It protects the vocal folds and provides attachment for muscles and ligaments.

Synonyms:

Thyroid Disorders

Conditions affecting the thyroid gland, a butterfly-shaped endocrine organ in the neck that produces hormones regulating metabolism, growth, and development.

Synonyms:

Thyroid Eye Disease

Autoimmune inflammatory disorder of the orbital tissues associated with Graves disease characterized by expansion of extraocular muscles and orbital fat. Pathogenesis involves orbital fibroblasts expressing the TSH receptor targeted by the same thyroid-stimulating immunoglobulins affecting the thyroid.

Synonyms:

Thyroid Fine-Needle Aspiration

Image-guided sampling of thyroid-nodule cells for cytologic classification. Results are commonly reported using the Bethesda system and guide surveil-

lance, molecular testing, surgery, or other management.

Synonyms:

Thyroid Follicular Carcinoma

approximately 10 to 15 percent of thyroid cancers and is the second most common differentiated thyroid malignancy. Unlike papillary carcinoma, follicular carcinoma typically spreads hematogenously to distant sites including bone, lung, and liver, rather than to regional lymph nodes.

Synonyms:

Thyroid Function Tests

Laboratory assessment of the hypothalamic-pituitary-thyroid axis. TSH is the most sensitive screening test with elevated levels indicating primary hypothyroidism and suppressed levels indicating hyperthyroidism. Free T4 measures the biologically active unbound thyroxine.

Synonyms:

Thyroid Gland

An endocrine gland located in the anterior neck, consisting of two lobes (right and left) connected by an isthmus, lying anterior to the trachea between the cricoid cartilage and the suprasternal notch.

Synonyms:

Thyroid Hormone

T3 and T4. Increase basal metabolic rate. Required for normal development.

Synonyms:

Thyroid Nodule

A discrete lump within the thyroid gland that may be solid, cystic, benign, or malignant. Most are benign, but evaluation uses clinical assessment, thyroid testing, ultrasound, and biopsy when indicated.

Synonyms:

Thyroid Nodule Evaluation

Systematic approach to evaluation of thyroid nodules detected by physical examination or imaging. Thyroid ultrasound characterizes nodule features

including size, composition, echogenicity, margins, calcifications, and shape. TI-RADS classification stratifies malignancy risk and guides biopsy decisions.

Synonyms:

Thyroid Papillary Carcinoma

The most common differentiated thyroid cancer, arising from thyroid follicular cells. It often grows slowly and has a favorable prognosis, although outcome depends on tumor features, spread, age, and response to treatment.

Synonyms:

Thyroid Peroxidase Antibody

An autoantibody against thyroid peroxidase, an enzyme required for thyroid-hormone synthesis. It supports autoimmune thyroid disease, especially Hashimoto thyroiditis, but may be present in some euthyroid individuals.

Synonyms:

Thyroid Scan

Nuclear medicine imaging using I-123 or Tc-99m. Evaluates thyroid function and nodules. Hot nodules rarely malignant. Cold nodules require further evaluation.

Synonyms:

Thyroid Scintigraphy

Thyroid imaging using I-123, I-131, or Tc-99m pertechnetate. Assesses function, nodules, ectopic tissue. Hot nodules (functioning) rarely malignant; cold nodules require ultrasound/FNA.

Synonyms:

Thyroid Stimulating Hormone

TSH (thyrotropin): the anterior pituitary hormone that stimulates the thyroid to produce and release T4 and T3, controlled by TRH (hypothalamus) and negative feedback from thyroid hormones.

Synonyms:

Thyroid Storm

Life-threatening exacerbation of thyrotoxicosis pre-

senting with hyperpyrexia, tachycardia, heart failure, altered mental status, and multi-organ dysfunction. Precipitated by infection, surgery, trauma, or iodine load in patients with untreated hyperthyroidism. Mortality rates range from twenty to thirty percent.

Synonyms:

Thyroid Surgery

Operations that remove part or all of the thyroid gland. They may be performed for selected cancers, enlarging or compressive nodules, goiter, hyperthyroidism, or diagnostic uncertainty; the procedure depends on the disease and its extent.

Synonyms:

Thyroid Ultrasound

High-frequency sonographic imaging used to evaluate thyroid size, nodules, cysts, cervical lymph nodes, and structural features associated with malignancy. Suspicious nodules may require ultrasound-guided fine-needle aspiration.

Synonyms:

Thyroiditis

Inflammation of the thyroid gland with various etiologies. Hashimoto thyroiditis: autoimmune, most common cause of hypothyroidism in iodine-sufficient areas. Subacute (De Quervain) thyroiditis: post-viral, presents with painful thyroid and transient hyperthyroidism followed by hypothyroidism.

Synonyms:

Thyroiditis Classification

Inflammatory conditions of the thyroid classified by clinical presentation and etiology. Hashimoto thyroiditis is chronic autoimmune with hypothyroidism. Graves disease is autoimmune with hyperthyroidism. Subacute thyroiditis is painful and likely viral.

Synonyms:

Thyrotoxic Periodic Paralysis

Recurrent episodes of transient flaccid weakness associated with thyrotoxicosis, usually accompanied by hypokalemia caused by intracellular potassium

shift. Attacks often affect the proximal limbs and are triggered by rest after exercise or carbohydrate-rich meals.

Synonyms:

TI-RADS

The Thyroid Imaging Reporting and Data System is an ultrasound-based system that assigns a risk category to thyroid nodules using features such as composition, echogenicity, shape, margins, and calcification. It helps guide follow-up and biopsy decisions.

Synonyms:

Tibia

Larger leg bone, the main weight-bearer transmitting body weight from knee to ankle. Proximal: tibial plateau (medial/lateral condyles) and tibial tuberosity (patellar ligament insertion). Shaft: sharp subcutaneous anterior border. Distal: medial malleolus articulating with the talus at the ankle.

Synonyms:

Tibial Nerve

Sciatic division (L4-S3) continuing from posterior thigh through the popliteal fossa into the deep posterior leg, innervating gastrocnemius, soleus, tibialis posterior, flexor digitorum longus, and flexor hallucis longus. Passes behind the medial malleolus as the tarsal tunnel, dividing into medial/lateral plantar nerves for the foot.

Synonyms:

Tibial Shaft Fractures

Tibial shaft fractures: most common long bone fracture. AO/OTA: 42-A (simple), 42-B (wedge), 42-C (complex). Soft tissue critical: Gustilo for open.

Synonyms:

Tibialis Anterior Muscle

Superficial anterior leg muscle from lateral tibial condyle and shaft to medial cuneiform and first metatarsal base. Innervated by deep peroneal nerve (L4-L5). Primary dorsiflexor for foot clearance dur-

ing gait swing phase; inverts foot. Weakness causes foot drop with steppage gait.

Synonyms:

Tibialis Posterior Muscle

Deepest posterior leg muscle from posterior tibia, fibula, and interosseous membrane to navicular tuberosity, medial cuneiform, and sustentaculum tali. Innervated by tibial nerve (L4-L5). Plantarflexes and inverts foot; primary dynamic medial longitudinal arch stabilizer.

Synonyms:

Tic Douloureux

A chronic pain condition characterized by recurrent, sudden, severe, electric shock-like pain in the distribution of the trigeminal nerve (typically V2/V3). See Trigeminal Neuralgia.

Synonyms:

Tick Paralysis

Acute, progressive flaccid paralysis caused by neurotoxin released by an attached tick. Weakness usually begins in the legs and ascends; respiratory failure can occur and symptoms improve after prompt tick removal.

Synonyms:

Tickborne relapsing fever

A vector-borne illness caused by *Borrelia hermsii* and related species, transmitted by *Ornithodoros* ticks. It presents with recurrent episodes of fever, headache, myalgia, and arthralgia, separated by afebrile intervals. The relapsing pattern results from antigenic variation of the spirochete's surface lipoproteins.

Synonyms:

Tics

Sudden, rapid, recurrent, nonrhythmic stereotyped movements (motor tics) or vocalizations (vocal tics) that are usually brief and suppressible. Transient tics (most common in childhood) vs. chronic tic disorder; Tourette syndrome: multiple motor + at least one vocal tic for >1 year beginning before age

18.

Synonyms:

Tidal Volume

The volume of air inspired or expired during each normal breath, approximately 500 mL (6-8 mL/kg) in a resting adult. Tidal volume is measured by spirometry. Minute ventilation = tidal volume x respiratory rate (6 L/min). Only a portion reaches the alveoli (alveolar ventilation) after subtracting dead space (150 mL).

Synonyms:

Tilt Table Test

Evaluation of unexplained syncope by reproducing orthostatic stress. Patient is strapped to a motorized table tilted from supine to 60-80 degrees for 20-45 minutes. Positive: reproduction of symptoms with hypotension and/or bradycardia (vasovagal syncope, delayed orthostatic hypotension).

Synonyms:

Time in Range

Percentage of time that continuous glucose monitoring readings remain within the target glucose range of seventy to one hundred eighty milligrams per deciliter for most adults with diabetes. General target is greater than seventy percent corresponding to approximately seventeen hours per day.

Synonyms:

Time of Death

The moment or estimated time at which biological death occurred, a key medicolegal question. Estimated from postmortem changes: body cooling (algor mortis), rigor mortis, lividity (livor mortis), decomposition/putrefaction, insect colonization, and chemical changes (vitreous potassium, vitreous glucose, body temperature).

Synonyms:

Time-of-Flight PET

A PET acquisition and reconstruction technique that uses the measured arrival-time difference of coincident annihilation photons to improve local-

ization of the annihilation event. It can improve signal-to-noise performance, especially in larger patients.

Synonyms:

Timed Up-and-Go Test

A functional mobility test measuring the time required to stand from a chair, walk a short distance, turn, return, and sit. Prolonged performance suggests impaired mobility and increased fall risk but must be interpreted with gait, vision, cognition, and environment.

Synonyms:

Timothy Syndrome

A rare multisystem disorder caused by pathogenic variants in CACNA1C, characterized by marked QT prolongation and congenital heart disease with syndactyly. Developmental, neurological, immune, and facial features may also occur.

Synonyms:

Tin

Component of dental amalgam. Reduces strength, increases creep.

Synonyms:

Tincture

Alcohol extract of plant or chemical substance. Common concentration: 10-40% alcohol. Examples: tincture of iodine (antiseptic), tincture of benzoin (skin protector). Also used for liquid medications.

Synonyms:

Tinea

Dermatophytosis: superficial fungal infection of keratinized tissue (skin, hair, nails) by dermatophytes (Trichophyton, Microsporum, Epidermophyton).

Synonyms:

Tinea (Dermatophytosis)

Superficial fungal infection by dermatophytes. Tinea corporis (ringworm): annular, scaly, erythematous plaque with central clearing. Tinea pedis (athlete's foot): interdigital scaling, maceration, and

fissuring. Tinea cruris (jock itch): erythematous, pruritic rash in groin with raised border.

Synonyms: Dermatophytosis

Tinea barbae

Dermatophyte infection of the beard and mustache area, presenting with erythematous, scaly, follicular papulopustules or deep inflammatory nodules, often acquired from contact with infected animals or through grooming. It may be inflammatory (kerion-like) or superficial, and differential diagnosis includes bacterial folliculitis and acne.

Synonyms:

Tinea Capitis

A dermatophyte infection of the scalp and hair shafts, most common in children. It may cause scaling, alopecia, broken hairs, black dots, or an inflammatory kerion.

Synonyms:

Tinea circinata

An older term for tinea corporis (ringworm) of the body, presenting as annular, erythematous, scaly plaques with active, raised borders and central clearing. It is caused by dermatophyte fungi and may be acquired through direct contact with infected humans, animals, or fomites.

Synonyms:

Tinea Corporis

A dermatophyte infection of glabrous skin, presenting as annular, erythematous, scaly plaques with raised, active borders and central clearing. It is contagious through direct contact with infected persons, animals, or contaminated objects. Diagnosis is by KOH preparation showing branching septate hyphae.

Synonyms:

Tinea faciei

Dermatophyte infection of the facial skin, often presenting with erythematous, scaly, annular or ill-defined plaques that may mimic eczema or rosacea, leading to frequent misdiagnosis. It is commonly

caused by *Trichophyton* or *Microsporum* species and may be acquired from pets, other humans, or self-inoculation from other body sites.

Synonyms:

Tinea imbricata

A chronic dermatophyte infection caused by *Trichophyton concentricum*, endemic in the South Pacific and Southeast Asia, characterised by widespread, concentric, overlapping, polycyclic scaly rings producing a "wood-grain" pattern on the trunk and limbs.

Synonyms:

Tinea Incognito

A dermatophyte infection whose clinical appearance has been altered by inappropriate topical corticosteroid or immunosuppressive treatment. It may become less scaly and more extensive or atypical; fungal testing is often needed before directed therapy.

Synonyms:

Tinea nigra

A superficial fungal infection of the stratum corneum caused by *Hortaea werneckii*, presenting as a painless, brown to black, non-scaly macule or patch, most commonly on the palms or soles. It is acquired in tropical and subtropical regions and is often confused with acral melanoma.

Synonyms:

Tinea Pedis

A dermatophyte infection of the feet presenting in interdigital, moccasin, vesiculobullous, or ulcerative patterns. It may coexist with tinea unguium. Diagnosis is clinical or mycologic when uncertain; treatment uses topical antifungals for limited disease and oral therapy for extensive, refractory, or nail-associated infection.

Synonyms:

Tinea Versicolor

A superficial fungal infection caused by *Malassezia* species, presenting as hypo- or hyperpigmented mac-

ules with fine scale on the trunk and proximal extremities. It is more noticeable after sun exposure due to unaffected tanning of surrounding skin.

Synonyms:

Tinel Sign

Tapping over nerve produces tingling in distribution. Indicates nerve irritation/regeneration. Used for carpal tunnel, cubital tunnel, tarsal tunnel.

Synonyms:

Tinnitus

The perception of sound without an external acoustic source. See Ringing in the Ears.

Synonyms:

Tiotropium Bromide

A long-acting muscarinic antagonist (LAMA) bronchodilator used for maintenance therapy in COPD. Once-daily dosing provides sustained bronchodilation. It reduces exacerbations and improves lung function. It is often combined with a LABA for additive bronchodilation.

Synonyms:

TIPS (Transjugular Intrahepatic Portosystemic Shunt)

A radiologically placed shunt connecting the portal vein to a hepatic vein within the liver, creating a portosystemic shunt to reduce portal pressure. Indications: variceal bleeding (refractory or recurrent), refractory ascites, and hepatic hydrothorax.

Synonyms: Transjugular Intrahepatic Portosystemic Shunt

Tissue

A group of similar cells and their surrounding materials that work together to perform a specific function.

Synonyms:

Tissue Distribution

Reversible movement of a chemical from blood into tissues and organs. Distribution is influenced by perfusion, lipid solubility, protein binding, tissue

affinity, barriers, body composition, and time after exposure.

Synonyms:

Tissue Expander

Balloon implanted under skin/muscle, gradually filled with saline to expand tissue. Used for breast reconstruction, scalp reconstruction, burn coverage. Removed after expansion, replaced with permanent implant or flap.

Synonyms:

Tissue Fixation

Preservation of tissue morphology and molecular components by chemical or physical methods before processing. Neutral buffered formalin is commonly used for routine histopathology, while fixation choice affects antigen detection, nucleic-acid testing, and tissue architecture.

Synonyms:

Tissue plasminogen activator-associated angioedema

Angioedema occurring as a complication of tissue plasminogen activator therapy for acute ischemic stroke or myocardial infarction, affecting approximately 1 to 5 percent of patients. It typically involves the face, tongue, and upper airway and may be life-threatening.

Synonyms:

Titanium

Biocompatible metal for implants and frameworks. Osseointegration capability.

Synonyms:

Titer

A laboratory measure of the concentration of an antibody (or other substance) in serum, expressed as the highest dilution that still produces a detectable reaction (e.g., 1:128).

Synonyms:

TLC

Thin-layer chromatography for radiochemical purity.

Synonyms:

TNF Alpha

Tumor necrosis factor alpha is a potent pro-inflammatory cytokine produced primarily by activated macrophages, as well as by T cells, NK cells, mast cells, and endothelial cells. TNF-alpha exists as a 26-kilodalton transmembrane protein that is cleaved by the metalloprotease TACE to release a soluble 17-kilodalton active form.

Synonyms:

TNM Staging

A cancer-staging system describing the primary tumor, regional lymph nodes, and distant metastases to estimate disease extent and prognosis.

Synonyms:

Tobacco

A plant product containing nicotine and many toxic combustion or processing chemicals. Its use causes dependence and increases the risk of cancer, cardiovascular disease, and lung disease.

Synonyms:

Tocolysis

The use of medication to delay preterm birth for a limited time, often to allow corticosteroid treatment or transfer to a facility with appropriate neonatal care. The drug, gestational-age range, and contraindications depend on local guidance and the clinical situation.

Synonyms:

Tocolytic Therapy

Medications used to inhibit uterine contractions temporarily to prolong pregnancy, allowing time for corticosteroid administration and transport to a tertiary care center. Indications: preterm labor with intact membranes, 24-34 weeks.

Synonyms:

Tocolytics

Medications used to suppress preterm labor (contractions before 37 weeks gestation), to delay de-

livery for corticosteroid administration (fetal lung maturity) and in utero transport to a tertiary care center.

Synonyms:

Toe Pressure

Pressure in toe digits. Useful when ankle pressures non-compressible (diabetes, renal disease).

Synonyms:

Toe-Brachial Index

The ratio of systolic toe pressure to brachial systolic pressure. It can support diagnosis of peripheral arterial disease when ankle arteries are noncompressible because of medial arterial calcification.

Synonyms:

Tolbutamide

A first-generation sulfonylurea oral hypoglycaemic agent used in the management of type 2 diabetes. Mechanism: stimulates insulin secretion from pancreatic β -cells by binding to the sulfonylurea receptor (SUR1) on ATP-sensitive potassium (KATP) channels, causing membrane depolarisation, calcium influx, and exocytosis of insulin granules.

Synonyms:

Tolerance

A decreased response to a drug after repeated administration, requiring dose escalation to achieve the same effect. Unlike tachyphylaxis, tolerance develops over weeks to months of chronic use.

Synonyms:

Toll-Like Receptor

A class of single-pass membrane-spanning pattern recognition receptors (PRRs) expressed on innate immune cells (macrophages, dendritic cells). Recognize evolutionary conserved microbial structures (PAMPs).

Synonyms:

Tongue

A muscular organ in the mouth that aids in tasting, chewing, swallowing, and speech.

Synonyms:

Tongue Cleaning

Removal of tongue coating using scraper or brush.
Reduces bad breath.

Synonyms:

Tonic Neck Reflex

A primitive reflex present from birth to 6 months, also called fencer's pose. When the head is turned to one side, the arm on that side extends while the opposite arm flexes. Present in both directions. Asymmetry may indicate neurologic injury. Disappears as voluntary head control develops.

Synonyms: fencer's pose.

Tonic-clonic seizure

A generalized seizure with a tonic stiffening phase followed by rhythmic clonic jerking, impaired consciousness, and a postictal state.

Synonyms:

Tonsillar cancer

A malignancy arising from the palatine tonsils, most commonly squamous cell carcinoma associated with HPV infection. It often presents with throat pain, otalgia, and cervical lymphadenopathy.

Synonyms:

Tonsillectomy

Surgical removal of the palatine tonsils. It may be considered for recurrent or complicated tonsillitis, obstructive sleep apnea, or other selected conditions after assessment of potential benefits and risks.

Synonyms:

Tonsillitis

Inflammation of the tonsils, most commonly the palatine tonsils, which are lymphoid tissue structures located in the oropharynx between the palatoglossal and palatopharyngeal.

Synonyms:

Tonsils

Aggregated lymphoid tissue forming Waldeyer's ring

at the pharyngeal entrance. Pharyngeal tonsils (adenoids) in the nasopharynx, palatine tonsils at the oropharyngeal pillars, lingual tonsils at the tongue base, and tubal tonsils near the Eustachian tube orifices. They are the first line of defense against inhaled or ingested pathogens.

Synonyms:

Tooth

A mineralized organ composed primarily of enamel, dentin, cementum, and dental pulp. Teeth cut and grind food, contribute to speech and facial support, and are anchored in alveolar bone by the periodontal ligament.

Synonyms:

Tooth Eruption

Process by which tooth moves from intraosseous position to functional occlusion. Primary (deciduous) dentition: 20 teeth, eruption 6-30 months. Permanent dentition: 32 teeth (including third molars), eruption 6-21 years. Delayed eruption may indicate systemic conditions, local obstruction, or normal variant.

Synonyms:

Tooth Infection

Infection of the tooth, its pulp, or surrounding tissues, commonly caused by untreated decay, cracks, or gum disease. It may cause toothache, sensitivity, swelling, fever, or drainage. Facial swelling, difficulty swallowing or breathing, or spreading infection requires emergency assessment.

Synonyms:

Tooth Luxation

Traumatic displacement of a tooth without complete avulsion. Concussion and subluxation involve periodontal injury with little or no displacement, whereas extrusive, lateral, and intrusive luxation involve increasingly marked displacement and require prompt dental evaluation.

Synonyms:

Tooth Replantation

Replacement of an accidentally displaced or avulsed tooth into its socket, followed by stabilization and dental follow-up.

Synonyms:

Tooth Sensibility Testing

Clinical testing of a tooth's response to thermal, electric, or dentin stimulation. It assesses neural response rather than directly measuring pulp blood flow, so results must be interpreted with history, examination, and imaging.

Synonyms:

Tooth Sensitivity

Pain in response to thermal, sweet, acidic, or tactile stimulus. Caused by dentin exposure (recession, erosion, abrasion, abfraction). Management: desensitizing toothpaste, fluoride varnish, restorative coverage, gum graft for recession.

Synonyms:

Tooth Whiteness

Aesthetic concern driving bleaching. Natural shade varies. Over-bleaching causes sensitivity and translucency.

Synonyms:

Toothache

Common dental symptom indicating underlying pathology. Causes: dental caries, pulpitis (reversible or irreversible), periapical abscess, cracked tooth, periodontal disease, sinusitis (referred pain). Evaluation: history, clinical exam, radiographs. Management: treat underlying cause, analgesics, antibiotics if infection present.

Synonyms:

Tophaceous gout

Chronic tophaceous gout represents advanced gout with deposition of large, visible tophi consisting of monosodium urate crystals surrounded by granulomatous inflammation. Tophi typically develop after years of inadequately treated gout and occur on the ears, fingers, toes, and olecranon bursa.

Synonyms:

Tophus

Deposits of monosodium urate crystals in soft tissues, characteristic of chronic gout. Appear as subcutaneous nodules over joints, ears, olecranon, Achilles tendon. Can erode through skin, forming draining sinus tracts. Radiographically: punched-out erosions with overhanging edges.

Synonyms:

Topical Antibiotics

Antibiotics applied to the skin to treat selected superficial bacterial infections. The choice and duration depend on the organism, site, extent of infection, resistance patterns, and local guidance. Unnecessary or prolonged use can cause irritation and antimicrobial resistance.

Synonyms:

Topical Antifungals

Topical antifungals treat superficial fungal infections. Allylamines (terbinafine, naftifine) inhibit squalene epoxidase, fungicidal. Azoles (clotrimazole, miconazole, ketoconazole, econazole) inhibit ergosterol synthesis, fungistatic. Ciclopirox has broad-spectrum activity. Tolnaftate is effective against dermatophytes.

Synonyms:

Topical Calcineurin Inhibitors

Non-steroidal anti-inflammatory agents used for atopic dermatitis and facial eczema. They inhibit T-cell activation by blocking calcineurin, preventing cytokine production. Advantages over corticosteroids: no skin atrophy, safe for face and intertriginous areas. Side effects include transient burning and itching at application site.

Synonyms:

Topical Corticosteroid Potency

Topical corticosteroids are classified into seven potency groups. Group 1 (ultra-high): clobetasol propionate 0.05 percent. Group 2 (high): betamethasone dipropionate 0.05 percent. Group 3

to 4 (medium): triamcinolone acetonide 0.1 percent. Group 5 to 6 (low): hydrocortisone 1 percent. Group 7 (lowest): hydrocortisone 0.5 percent.

Synonyms:

Topical Retinoids

Vitamin A derivatives used for acne, photoaging, and hyperpigmentation. Tretinoin (all-trans retinoic acid) is the most studied. Adapalene is more stable and less irritating. Tazarotene is the most potent. Mechanism: normalizes follicular keratinization, increases cell turnover, and stimulates collagen production.

Synonyms:

TORCH Panel

Serologic screening for congenital infections: Toxoplasma, Rubella, CMV, Herpes simplex (and others: syphilis, parvovirus B19, VZV, Zika). IgM: indicates recent/active infection (maternal or fetal). IgG: past infection or passive immunity. Paired maternal and neonatal testing.

Synonyms:

Torsades de Pointes

A specific form of polymorphic ventricular tachycardia with QRS complexes that twist around the baseline, occurring in the setting of QT prolongation. It may degenerate to ventricular fibrillation.

Synonyms:

Torticollis

A condition in which the head is held tilted to one side because of neck-muscle spasm or contracture.

Synonyms:

Torticollis (Wryneck)

A condition in which the head is tilted to one side (ear toward the shoulder) and rotated to the opposite side (chin toward opposite shoulder), due to contraction or shortening of the sternocleidomastoid muscle.

Synonyms: Wryneck

Torus mandibularis

A bony outgrowth arising from the lingual surface of the mandible, typically bilateral and located in the premolar region above the mylohyoid ridge. It is a common, asymptomatic developmental anomaly, more prevalent in women and certain ethnic populations.

Synonyms:

Torus palatinus

A bony exostosis arising from the midline of the hard palate, typically presenting as a slow-growing, asymptomatic, hard, bony protuberance discovered incidentally. It is more common in women and certain ethnic groups.

Synonyms:

Total Anomalous Pulmonary Venous Return

A congenital heart defect in which the pulmonary veins drain into the systemic venous circulation instead of the left atrium. The clinical effects depend on the anatomic type, the degree of obstruction, and associated defects; affected newborns require specialist cardiac evaluation.

Synonyms:

Total Body Surface Area

The percentage of body surface involved by a burn or other extensive skin process. It is estimated using methods such as the rule of nines, Lund-Browder chart, or the patient's palm and is used to guide burn severity assessment and resuscitation.

Synonyms:

Total Breech Extraction

A maneuver where the operator grasps the fetal feet and delivers the entire baby in breech presentation. The most common indication is delivery of the second twin (malpresentation). Contraindicated for term singleton breech due to high risk of head entrapment, nuchal arms, and birth trauma.

Synonyms:

Total Daily Energy Expenditure

Total calories burned in 24 hours: BMR + thermic effect of food + physical activity. Estimation guides dietary recommendations. Activity factor multiplies BMR.

Synonyms:

Total Haemolytic Complement Test

A functional assay of the classical complement pathway, commonly reported as CH50.

Synonyms:

Total Hip Arthroplasty

Replacement of the hip joint with prosthetic components. Acetabular component: metal shell + polyethylene liner. Femoral component: metal stem + femoral head (cobalt-chrome or ceramic). Fixation: cemented (PMMA, for elderly, osteoporotic bone), cementless (porous-coated, for younger patients, biologic fixation), and hybrid.

Synonyms:

Total Intravenous Anesthesia

Total intravenous anesthesia (TIVA) uses intravenous agents exclusively for induction and maintenance of anesthesia, avoiding volatile inhalation agents. The most common TIVA regimen combines propofol infusion (50 to 200 mcg/kg/min) with remifentanyl infusion (0.1 to 0.5 mcg/kg/min).

Synonyms:

Total Iron Binding Capacity

TIBC: a measure of the maximum iron-binding capacity of transferrin in serum, reflecting total iron-transport capacity. Calculated from transferrin or measured directly.

Synonyms:

Total Knee Arthroplasty

Replacement of the knee joint with prosthetic components. Femoral component (cobalt-chrome), tibial component (titanium tray + polyethylene insert), and patellar component (polyethylene, optional). Fixation: cement (PMMA) most common in older adults; cementless in younger.

Synonyms:

Total Lesion Glycolysis

Product of metabolic tumor volume and mean SUV. Prognostic marker.

Synonyms:

Total Lung Capacity

The total volume of air in the lungs after maximal inspiration. It is measured by lung-volume testing, such as body plethysmography, and may be increased in hyperinflation or decreased in restrictive lung disease.

Synonyms:

Total Parenteral Nutrition

Intravenous administration of nutrients sufficient to meet essentially all nutritional requirements when the gastrointestinal tract cannot be used adequately.

Synonyms:

Tourette Disorder

A neurodevelopmental disorder characterized by multiple motor tics and one or more vocal tics lasting >1 year, with onset before age 18. Motor tics: eye blinking, head jerking, shoulder shrugging, facial grimacing. Vocal tics: throat clearing, sniffing, grunting, barking, coprolalia (obscene words, occurs in <10%).

Synonyms:

Tourette Syndrome

A neurodevelopmental disorder characterized by multiple motor tics and at least one vocal tic occurring over at least one year. Tics are sudden, rapid, recurrent, stereotyped movements or vocalizations. They are often preceded by premonitory urges. Tics typically worsen in adolescence and may improve in adulthood.

Synonyms:

Tourniquet

A device applied proximally to a limb to compress arterial inflow and control life-threatening extremity hemorrhage when direct pressure is inadequate or

impractical. Application time, bleeding control, distal perfusion, and the need for definitive hemorrhage management must be documented.

Synonyms:

Townes Syndrome

A congenital disorder caused by pathogenic variants in SALL1, classically involving anal atresia and characteristic thumb abnormalities. Renal, cardiac, hearing, foot, and genital anomalies are common and variable.

Synonyms:

Toxemia

An outdated term formerly used for preeclampsia. Preeclampsia is a pregnancy-associated disorder of hypertension with proteinuria or other maternal organ dysfunction, usually developing after 20 weeks of gestation.

Synonyms:

Toxic Dose

Dose causing toxicity. Varies by substance, individual, route, duration.

Synonyms:

Toxic Encephalopathy

Brain dysfunction caused by exposure to a toxic substance or medicine. Symptoms may include confusion, altered behavior, seizures, or reduced consciousness.

Synonyms:

Toxic Epidermal Necrolysis

A severe, potentially fatal mucocutaneous reaction, usually to a medication, causing extensive epidermal necrosis and skin detachment. It is on the severe end of the Stevens–Johnson syndrome and toxic epidermal necrolysis spectrum and requires urgent specialist care.

Synonyms:

Toxic Megacolon

Acute life-threatening dilation of the colon associated with systemic toxicity, representing one of the

most serious complications of inflammatory bowel disease, particularly ulcerative colitis. It can also occur in infectious colitis caused by *Clostridioides difficile* and cytomegalovirus.

Synonyms:

Toxic Shock Syndrome

An acute, life-threatening illness caused by bacterial exotoxins. Staphylococcal TSS: associated with tampon use, surgical wounds, and nasal packing; presents with fever, hypotension, diffuse rash, and multi-organ involvement. Streptococcal TSS: associated with invasive GAS infections. Diagnosis: CDC case definition.

Synonyms:

Toxicokinetics

The study of absorption, distribution, metabolism, and excretion of a toxic substance and its relationship to concentration over time. Toxicokinetics helps estimate exposure, timing, accumulation, and expected duration of toxicity.

Synonyms:

Toxicology

Study of poisons and their effects. Branches: clinical, forensic, environmental, occupational, regulatory.

Synonyms:

Toxicology Specimen Preservation

Collection, labeling, storage, and transport of biological specimens to preserve analytes and prevent contamination or degradation. Appropriate specimens may include peripheral blood, urine, vitreous humor, bile, liver, hair, or gastric contents depending on the suspected exposure and timing.

Synonyms:

Toxidrome

A recognizable pattern of signs and symptoms produced by a class of toxins. Important patterns include opioid, sympathomimetic, anticholinergic, cholinergic, sedative-hypnotic, and serotonin toxidromes; treatment combines supportive care, tar-

geted antidotes when available, and decontamination decisions.

Synonyms:

Toxocariasis

Infection by dog roundworm (*Toxocara canis*) or cat (*T. cati*), acquired by ingesting infective eggs from soil contaminated by animal feces (pica in children a risk).

Synonyms:

Toxoid vaccines

Vaccines that protect against harmful bacterial toxins. These vaccines contain toxins that have been detoxified and rendered inactive.

Synonyms:

Toxoplasma gondii

An obligate intracellular protozoan parasite that causes toxoplasmosis. The definitive host is the cat (family Felidae), which sheds environmentally resistant oocysts in feces.

Synonyms:

Toxoplasmosis

Infection caused by the intracellular protozoan *Toxoplasma gondii*. Definitive host: cats (shed oocysts in feces). Humans are intermediate hosts, infected via ingestion of undercooked meat (containing tissue cysts), cat feces, or transplacentally. Immunocompetent: usually asymptomatic or mild flu-like illness with lymphadenopathy.

Synonyms:

TPMT Polymorphism

Thiopurine S-methyltransferase is an enzyme that metabolizes thiopurine drugs including azathioprine, 6-mercaptopurine, and thioguanine, which are used in the treatment of leukemia, inflammatory bowel disease, and autoimmune conditions.

Synonyms:

Trabeculectomy

A conventional glaucoma filtration surgery that creates a new drainage pathway for aqueous humor

by removing a small piece of the trabecular meshwork and creating a partial-thickness scleral flap under which aqueous humor filters from the anterior chamber into the subconjunctival space, forming a filtering bleb.

Synonyms:

Trace Elements

Minerals needed in small amounts. Zinc, copper, manganese, selenium, chromium, molybdenum, iodine. Deficiency or toxicity possible.

Synonyms:

Tracer Principle

Administered in amounts too small to produce pharmacological effect. Dose optimized for imaging, not therapeutic.

Synonyms:

Trachea

The windpipe, a 10-12 cm fibrocartilaginous tube from the larynx (C6) to the carina (T4/T5) where it bifurcates into main bronchi. Sixteen to twenty C-shaped hyaline cartilage rings (open posteriorly, completed by trachealis muscle) maintain patency.

Synonyms:

Tracheal agenesis with bronchoesophageal fistula

Congenital malformation characterized by absent or severely hypoplastic trachea with an abnormal communication between the bronchus and esophagus, a rare and typically fatal condition presenting in neonates with respiratory distress, cyanosis, and inability to intubate.

Synonyms:

Tracheal Foreign Body

A foreign object lodged in the trachea, causing severe respiratory distress, stridor, and complete airway obstruction. It is a medical emergency requiring immediate bronchoscopic removal. In complete obstruction, emergency cricothyrotomy may be needed.

Synonyms:

Tracheal Stenosis

Narrowing of the trachea, often a complication of prolonged endotracheal intubation or tracheostomy. It presents with progressive dyspnea, stridor, and wheezing that may be mistaken for asthma. Diagnosis is by bronchoscopy or CT. Treatment is balloon dilation, stenting, or surgical resection.

Synonyms:

Tracheitis

Inflammation of the tracheal mucosa. Acute bacterial tracheitis: a rare but life-threatening cause of upper airway obstruction in children, typically presenting as a superinfection following viral croup (parainfluenza).

Synonyms:

Tracheobronchomalacia

Abnormal softening of the trachea and/or bronchi causing excessive airway collapse during breathing. It may be congenital or acquired. Symptoms include chronic cough, recurrent infections, and expiratory airflow obstruction. Diagnosis is by dynamic CT or bronchoscopy. Treatment includes CPAP, stenting, or surgical reconstruction.

Synonyms:

Tracheobronchomegaly

Abnormal enlargement of the trachea and main bronchi, usually associated with connective-tissue weakness. It may cause recurrent lower-respiratory infection, bronchiectasis, ineffective cough, dyspnea, and difficulty clearing airway secretions.

Synonyms:

Tracheoesophageal Fistula

An abnormal connection between the trachea and esophagus, often associated with esophageal atresia. Presents with recurrent aspiration, coughing with feedings, and cyanosis during meals. The H-type fistula may present later in infancy with chronic aspiration and failure to thrive. Diagnosis by esophagram or bronchoscopy.

Synonyms:

Tracheomalacia

Softening of the tracheal cartilage causing excessive collapse of the trachea during expiration. It may be congenital or acquired (prolonged intubation, relapsing polychondritis). Symptoms include expiratory stridor and difficulty clearing secretions. Diagnosis is by dynamic CT or bronchoscopy.

Synonyms:

Tracheostomy

Creation of a surgical opening from the anterior neck into the trachea with placement of a tube. Indications include prolonged airway support, upper-airway obstruction, and selected secretion-management needs; complications include bleeding, infection, obstruction, displacement, and tracheal injury.

Synonyms:

Tracheostomy Tube

A tube inserted through a tracheostomy opening to maintain access to the airway and permit breathing, suction, or mechanical ventilation.

Synonyms:

Tracheotomy

An operation that creates an opening through the neck into the trachea. The opening is called a tracheostomy.

Synonyms:

Trachoma

A chronic keratoconjunctivitis caused by *Chlamydia trachomatis* (serovars A-C), the leading infectious cause of blindness worldwide. Repeated infection causes conjunctival scarring, trichiasis (in-turned eyelashes), corneal abrasion, opacification, and blindness. Transmission: direct contact, flies, fomites.

Synonyms:

Traction

Pulling force on limb. Types: skin, skeletal. Used for fractures, deformities.

Synonyms:

Tractional retinal detachment

Separation of the neurosensory retina caused by contraction of fibrovascular membranes, commonly associated with proliferative diabetic retinopathy.

Synonyms:

Tractotomy

Surgical interruption of a nerve tract in the brain or spinal cord.

Synonyms:

Train-of-Four Monitoring

Train-of-four monitoring assesses neuromuscular blockade by delivering four supramaximal electrical stimuli at 2 Hz to a peripheral nerve, commonly the ulnar nerve at the wrist. The ratio of the fourth twitch height to the first twitch height estimates recovery from non-depolarizing blockade.

Synonyms:

Trained Immunity

Innate immune memory: epigenetic/metabolic reprogramming of monocytes/macrophages/NK cells after initial stimulus (BCG, beta-glucan, Candida, oxidized LDL) -> enhanced response to secondary challenge (heterologous protection).

Synonyms:

Trajectory

The path a projectile follows in flight and, in wound ballistics, the course it traverses through tissue from entrance to exit or rest. Internal trajectory is reconstructed from entrance and exit defects, the organ track, recovered fragments, and clothing damage; angles disclose shooter position and victim posture.

Synonyms:

TRALI

Transfusion-Related Acute Lung Injury, a life-threatening complication of blood transfusion characterized by acute hypoxemia and bilateral pulmonary edema within 6 hours of transfusion, without evidence of volume overload.

Synonyms:

Tram-Track Appearance

Histological finding on silver stain of MPGN representing GBM duplication. Results from mesangial cell interposition into capillary wall with new basement membrane formation. Creates double-contour pattern on Jones methenamine silver stain.

Synonyms:

Tranexamic Acid

An antifibrinolytic agent that inhibits lysine-binding sites on plasminogen and reduces clot breakdown. It is used in selected trauma, obstetric, cardiac, orthopedic, and bleeding indications according to current protocols. Dose and route depend on the indication and renal function.

Synonyms:

Tranquillisers

A class of drugs that have a calming or sedative effect, reducing anxiety, tension, and agitation. Historically classified as major tranquilisers (antipsychotics/neuroleptics—for psychosis) and minor tranquilisers (anxiolytics—for anxiety). The term is now less common in clinical practice.

Synonyms:

Trans Fat

A type of unsaturated fat with at least one trans double bond. Industrial trans fats are associated with increased cardiovascular risk and have been restricted in many jurisdictions.

Synonyms:

Transabdominal Scan

An ultrasound scan performed with the transducer placed on the maternal abdomen. A full bladder improves visualization of pelvic structures. Used in early pregnancy to confirm viability and gestational age, and throughout pregnancy to assess fetal growth, anatomy, amniotic fluid volume, and placental location.

Synonyms:

Transarterial Chemoembolization

A procedure in which chemotherapy and embolizing

particles are infused selectively into tumor-feeding hepatic arteries, combining regional chemotherapy with ischemic tumor necrosis; used for unresectable hepatocellular carcinoma.

Synonyms:

Transbronchial Biopsy

Bronchoscopic biopsy of lung parenchyma obtained through the bronchial wall. It is used to diagnose interstitial lung diseases (sarcoidosis, HP), reject lung transplant rejection, and sample peripheral lung lesions. It carries a higher risk of pneumothorax than endobronchial biopsy.

Synonyms:

Transcervical Foley Catheter for Cervical Ripening

A mechanical method for cervical ripening: a Foley catheter (16-30 Fr) is inserted through the cervix, the balloon is inflated with 30-60 mL of saline, and traction is applied (or the catheter is taped to the thigh with gentle tension). The balloon applies direct pressure to the internal os, stimulating endogenous prostaglandin release.

Synonyms:

Transcranial Doppler

Ultrasound measuring blood flow velocity in cerebral arteries. Used for vasospasm detection, stroke risk assessment.

Synonyms:

Transcription

Synthesis of RNA from DNA template by RNA polymerase. Eukaryotic: RNA Pol II transcribes mRNA, rRNA, snRNA; RNA Pol I transcribes rRNA; RNA Pol III transcribes tRNA, 5S rRNA. Steps: initiation (promoter recognition, transcription factors), elongation (5' to 3'), termination. Promoter elements: TATA box, CAAT box, GC box.

Synonyms:

Transcription Factor

Protein binding to specific DNA sequences, regulating transcription. Activators enhance transcription;

repressors inhibit. Examples: p53, NF-kB, steroid hormone receptors.

Synonyms:

Transdermal

A route of drug administration delivering drug through intact skin into the systemic circulation via a patch or gel, bypassing first-pass metabolism and providing steady plasma concentrations over hours to days. Examples: nitroglycerin, fentanyl, nicotine, estrogen, clonidine, rotigotine.

Synonyms:

Transfer Training

Teaching safe transfer techniques: bed to chair, chair to toilet, floor to standing. Use of transfer boards, lift equipment.

Synonyms:

Transferase

An enzyme that transfers a functional group from one molecule to another.

Synonyms:

Transference

A psychoanalytic concept in which feelings, attitudes, and expectations originally directed toward a significant figure from childhood are unconsciously redirected onto the therapist. In psychodynamic therapy, transference is a therapeutic tool for understanding the patient's relational patterns and resolving conflicts.

Synonyms:

Transferrin

An iron transport protein synthesized by the liver, carrying iron in plasma (2 iron-binding sites). In iron deficiency: transferrin is elevated with low ferritin, giving high TIBC and low transferrin saturation; in iron overload/inflammation/chronic disease: transferrin is low (acute phase).

Synonyms:

Transfusion Medicine

Blood components: PRBCs (leukoreduced, ir-

radiated for at-risk), FFP (coagulation factors), platelets (apheresis pooled, leukoreduced), cryoprecipitate (fibrinogen, vWF, factor VIII, XIII). ABO/Rh compatibility.

Synonyms:

Transfusion of Neonate

Administration of a blood product to a newborn for clinically significant anemia, bleeding, or another specific indication. The decision, product characteristics, volume, and rate depend on the infant's symptoms, laboratory results, gestational age, and local transfusion protocol.

Synonyms:

Transfusion Reaction

An adverse reaction to transfusion of blood products. Acute hemolytic transfusion reaction: ABO incompatibility, immediate fever/chills, hypotension, back pain, DIC, renal failure; management: STOP transfusion, maintain BP/urine output, supportive care.

Synonyms:

Transient Ischemic Attack

A transient ischemic attack (TIA) is a temporary episode of neurological dysfunction caused by focal brain, spinal cord, or retinal ischemia without acute infarction.

Synonyms:

Transient Tachypnea of the Newborn

Temporary rapid breathing after birth, usually caused by delayed clearance of fetal lung fluid. It is more common after caesarean birth and typically improves within one to three days with supportive care.

Synonyms:

Transition to Adulthood

Support for youth with disabilities transitioning to adult services.

Synonyms:

Transitional Care

Coordinated care provided when a person moves between healthcare settings or levels of care, such as from hospital to home.

Synonyms:

Translation

Decoding of mRNA sequence into polypeptide chain by ribosomes. Occurs in cytoplasm. tRNAs carry specific amino acids and recognize codons via anticodons. Steps: initiation, elongation, termination. Energy: GTP hydrolysis. Antibiotics targeting translation: tetracyclines (30S), chloramphenicol (50S), erythromycin (50S), streptomycin (30S).

Synonyms:

Translocation

Movement of chromosomal segment to non-homologous chromosome. Reciprocal: exchange between chromosomes. Robertsonian: fusion of two acrocentric chromosomes. Balanced: no genetic material lost; unbalanced: gain or loss.

Synonyms:

Transplacental

Passing through or occurring across the placenta.

Synonyms:

Transplant Immunology

Hyperacute rejection: preformed anti-donor antibodies (ABO, HLA) -> immediate graft failure (minutes-hours); prevented by crossmatch.

Synonyms:

Transplant Rejection

Immune-mediated destruction of a transplanted organ or tissue, classified by timing and mechanism. Hyperacute: preformed donor-specific antibodies, minutes to hours post-transplant, immediate graft thrombosis, irreversible; prevention by cross-matching.

Synonyms:

Transplant Surgery

Transplant surgery involves replacing a failing organ

with a healthy donor organ. Kidney transplant: living donors (laparoscopic nephrectomy, left kidney preferred) or deceased donors (standard criteria, expanded criteria, DCD).

Synonyms:

Transport

Regulations for shipping radioactive materials. Package types: excepted, A, B.

Synonyms:

Transposition of the Great Arteries

A congenital heart defect in which the aorta arises from the right ventricle and the pulmonary artery from the left ventricle. This creates parallel circulations, so survival after birth depends on adequate mixing through an associated opening or ductus until definitive treatment is provided.

Synonyms:

Transposons

Mobile genetic elements that can move between different locations within the bacterial genome or between the chromosome and plasmids. Transposons carry genes including antibiotic resistance genes and can facilitate the spread of resistance.

Synonyms:

Transudate

A transudate is a type of edema fluid with low protein content and few cells, resulting from imbalances in hydrostatic and oncotic pressures across capillary walls rather than from inflammation or increased vascular permeability.

Synonyms:

Transudative Pleural Effusion

From systemic factors altering hydrostatic/oncotic pressures. Most commonly from heart failure. Low protein, low LDH. Treatment addresses the underlying cause.

Synonyms:

Transurethral Resection of the Prostate

An endoscopic operation that removes obstructing

prostate tissue to improve urine flow in selected people with benign prostatic enlargement. Alternatives and indications depend on symptoms, prostate size, complications, and patient preference.

Synonyms:

Transverse Colon

Longest, most mobile colonic segment from hepatic to splenic flexure, approximately 45 cm, with complete mesentery (transverse mesocolon). Crosses anterior to duodenum, pancreas, and major vessels. Splenic flexure is the highest colon point and common gas trapping site. Most common diverticular disease site along with the sigmoid.

Synonyms:

Transverse Lie

A fetal lie where the long axis of the fetus is perpendicular to the long axis of the mother. The presenting part is a shoulder or arm. Occurs in approximately 1% of term pregnancies. Risk of cord prolapse and obstructed labor. Cesarean delivery required as vaginal delivery is not possible.

Synonyms:

Transverse Myelitis

An inflammatory disorder of the spinal cord causing acute or subacute motor, sensory, and autonomic dysfunction.

Synonyms:

Transverse Plane

A horizontal plane that divides the body or an organ into upper (superior) and lower (inferior) portions.

Synonyms:

Transversus Abdominis Muscle

Deepest flat abdominal muscle with horizontal fibers, from inguinal ligament, iliac crest, thoracolumbar fascia, and inner lower six costal cartilages. Innervated by T7-T12 and L1. Compresses abdomen without trunk movement, providing core stability and increased intra-abdominal pressure during coughing, lifting, Valsalva.

Synonyms:

Transvestic Disorder

A paraphilic disorder involving recurrent sexual arousal from cross-dressing that causes marked distress, impairment, or harm, or is acted on without consent. It is distinct from gender dysphoria, which concerns gender identity rather than sexual arousal.

Synonyms:

TRAP Sequence

Twin Reversed Arterial Perfusion sequence, a complication of monochorionic twin gestations where one twin (the pump twin) perfuses the other (the acardiac twin) via arterioarterial anastomoses.

Synonyms:

Trapezium

Saddle-shaped distal row carpal bone on the radial side, articulating with the first metacarpal at the CMC joint of the thumb. This saddle joint allows thumb opposition essential for grip and fine motor function. Basal joint arthritis is common in postmenopausal women, causing pinch grip pain and weakness.

Synonyms:

Trapezius Muscle

Large triangular muscle from occipital bone and C7-T12 spinous processes to clavicle, acromion, and scapular spine. Innervated by CN XI and C3-C4. Upper fibers elevate scapula, middle fibers retract, lower fibers depress. Essential for shoulder stability and scapulothoracic motion.

Synonyms:

Trapezoid

Smallest distal row carpal bone between trapezium and capitate, articulating with the second metacarpal. Wedge shape provides stability for the firmly fixed second metacarpal. Fractures rare (less than 1 percent of carpal fractures). Contributes to the radial column wrist stability.

Synonyms:

Trauma

Physical injury from external force. Primary survey:

ABCDE (Airway, Breathing, Circulation, Disability, Exposure). Secondary survey: head-to-toe examination, history (AMPLE), diagnostic tests. Injuries: fractures, dislocations, internal bleeding, organ damage. ATLS protocol guides management.

Synonyms:

Trauma (Vascular)

Injury to a blood vessel caused by blunt force, penetrating injury, fracture, medical procedures, or other mechanisms.

Synonyms: Vascular

Trauma Center

Hospital designated to provide comprehensive care for injured patients. Levels: Level I (complete care, research, prevention), Level II (similar but limited resources), Level III (stabilization, transfer), Level IV (advanced trauma life support, transfer). Transfer criteria: need for higher level of care, specific injuries.

Synonyms:

Trauma Surgery

Trauma surgery encompasses the acute care of injured patients, guided by ATLS (ABCDE) principles: Airway maintenance with cervical spine protection, Breathing and ventilation, Circulation with hemorrhage control, Disability/neurologic assessment, and Exposure/environmental control.

Synonyms:

Traumatic bleb

A filtering bleb formed after glaucoma filtration surgery (trabeculectomy) that develops complications from trauma, or a thin-walled, elevated bleb that leaks or is at risk of rupture. Traumatic bleb failure or overfiltering can lead to hypotony, choroidal detachment, and endophthalmitis risk.

Synonyms:

Traumatic Brain Injury

Disruption of brain function caused by an external mechanical force. Severity: mild (GCS 13-15, concussion), moderate (GCS 9-12), severe (GCS 3-8).

Primary injury: direct damage at moment of impact (contusion, diffuse axonal injury, intracranial hemorrhage).

Synonyms:

Traumatic spondylolisthesis of the axis (hangman's fracture)

A bilateral fracture of the pars interarticularis of the C2 vertebra (axis), typically caused by hyperextension of the head. Classically associated with judicial hanging but also occurs in motor vehicle accidents and falls. May present with neck pain, torticollis, or neurological deficits if the spinal cord is compressed.

Synonyms: hangman's fracture

Travel medicine

The branch of medicine dealing with health problems associated with international travel. Pre-travel consultation includes vaccinations, malaria prophylaxis, and travel advice. Common travel-related illnesses include traveller's diarrhea, malaria, and hepatitis A.

Synonyms:

Treacher Collins Syndrome

An autosomal dominant craniofacial disorder caused by mutations in TCOF1 (most common), POLR1C, or POLR1D genes, encoding ribosomal RNA transcription factors.

Synonyms:

Treat-to-Target Strategy

A management approach in which treatment is adjusted at regular intervals toward a predefined goal such as remission or low disease activity. It requires validated disease-activity measures, shared decisions, monitoring, and timely escalation or modification.

Synonyms:

Treatment

Medical intervention for disease. Includes pharmacological, surgical, lifestyle, supportive.

Synonyms:

Treatment-Resistant Depression

Depression that does not improve adequately after appropriate trials of standard treatments. It requires reassessment of diagnosis, adherence, comorbidity, and treatment options.

Synonyms:

Tremor

An involuntary, rhythmic oscillation of a body part. It may occur at rest, during posture, or during movement and can result from neurologic disease, medicines, metabolic disorders, or normal physiologic responses.

Synonyms:

Trephining (Trepanation)

A surgical procedure in which a hole is drilled or scraped into the skull (cranium), exposing the dura mater. Historically, trephining dates back to Neolithic times (10,000 BCE) and was performed for ritual, therapeutic (releasing 'evil spirits'), and post-traumatic indications.

Synonyms: Trepanation

Treponema pallidum

A spirochete that causes syphilis, a sexually transmitted infection. The organism is transmitted through sexual contact or transplacentally (congenital syphilis). Primary syphilis presents with a painless genital ulcer (chancre). Secondary syphilis presents with rash, mucous patches, and condylomata lata.

Synonyms:

Treponema pallidum infection

Infection with the bacterium *Treponema pallidum*, which causes syphilis and can affect the skin, nervous system, cardiovascular system, and other organs.

Synonyms:

Trepopnea

Dyspnea that occurs in one lateral decubitus position but not the other. It is typically worse when lying on the side of the affected lung. It may be caused by unilateral lung disease, pleural effusion,

or mediastinal mass.

Synonyms:

Triage

The rapid sorting of patients according to urgency, clinical risk, and expected resource needs so that those requiring immediate intervention are prioritized. Triage is dynamic and must be repeated when a patient's condition changes.

Synonyms:

Trial of Labor After Cesarean

An attempt to give birth vaginally after a previous cesarean delivery. Whether it is appropriate depends on the prior uterine incision, obstetric history, current pregnancy, facility resources, and the person's preferences. Counseling includes the possibility of successful VBAC, repeat cesarean delivery, and uterine rupture.

Synonyms:

Triceps Brachii Muscle

Three-headed posterior arm muscle. Long head from infraglenoid tubercle, lateral head from posterior humerus above radial groove, medial head below. All insert on the olecranon. Innervated by radial nerve (C7-C8). Primary elbow extensor; assists shoulder extension/adduction. Triceps reflex (C7) tests radial nerve/spinal cord integrity.

Synonyms:

Trichinosis

A parasitic infection caused by *Trichinella spiralis*, acquired by eating undercooked pork or wild game (bear, boar) containing encysted larvae. Larvae are released in the intestine (enteric phase: diarrhea, abdominal pain), then migrate to skeletal muscle (parenteral phase: myositis, periorbital edema, fever, eosinophilia).

Synonyms:

Trichobezoar

A gastrointestinal mass composed mainly of swallowed hair, usually located in the stomach.

Synonyms:

Trichomonas

A flagellated protozoan, *Trichomonas vaginalis*, that infects the urogenital tract and causes trichomoniasis. It is transmitted mainly through sexual contact and may cause discharge, irritation, or no symptoms.

Synonyms:

Trichomoniasis

A sexually transmitted infection caused by the protozoan *Trichomonas vaginalis*. Often asymptomatic in men; women present with vaginal discharge (frothy, yellow-green, malodorous), itching, dysuria, and inflammation. Associated with preterm birth and increased HIV acquisition risk. Diagnosis: wet mount microscopy, culture, NAAT.

Synonyms:

Trichothiodystrophy Syndrome

A group of inherited disorders characterized by brittle sulfur-deficient hair with a distinctive banded appearance, often accompanied by photosensitivity, ichthyosis, developmental delay, short stature, or recurrent infection.

Synonyms:

Trichotillomania

Recurrent pulling out of one's hair, resulting in hair loss. The individual has made repeated attempts to decrease or stop hair pulling. The hair pulling causes clinically significant distress or impairment. It is not attributable to another medical condition.

Synonyms:

Tricuspid Atresia

Absence of the tricuspid valve, resulting in no direct communication between the right atrium and right ventricle. Blood flow depends on an atrial septal defect and ventricular septal defect for mixing. Presents with cyanosis.

Synonyms:

Tricuspid Regurgitation

Incomplete closure of the tricuspid valve allowing blood to flow backward from the right ventricle to

the right atrium during systole. Causes include right ventricular dilation (from pulmonary hypertension or left heart failure), endocarditis, rheumatic disease, and carcinoid syndrome.

Synonyms:

Tricuspid Stenosis

Narrowing of the tricuspid valve opening, most commonly caused by rheumatic heart disease. It is often associated with mitral stenosis. Symptoms include fatigue, edema, and hepatic congestion. Murmur: low-pitched mid-diastolic rumble at the left lower sternal border that increases with inspiration.

Synonyms:

Tricuspid Valve

Right atrioventricular valve with anterior, posterior, and septal cusps supported by chordae tendineae and three papillary muscles. Largest cardiac valve. Most commonly affected in IV drug use-associated endocarditis. Tricuspid regurgitation from right ventricular dilation, endocarditis, or carcinoid. Stenosis is rare, mostly rheumatic.

Synonyms:

Tricyclic Antidepressant Overdose

Anticholinergic effects, cardiac toxicity (QRS prolongation, arrhythmias), seizures, hypotension. Treatment: sodium bicarbonate (QRS >100 ms), seizure control, supportive care.

Synonyms:

Tricyclic Antidepressants

Older antidepressants that non-selectively inhibit the reuptake of serotonin and norepinephrine. They include amitriptyline, nortriptyline, imipramine, clomipramine, and desipramine.

Synonyms:

Trigeminal Nerve

The fifth cranial nerve, providing most sensation from the face, scalp, mouth, and cornea. Its mandibular division also supplies the muscles of chewing.

Synonyms:

Trigeminal Neuralgia

A chronic pain condition characterized by recurrent, sudden, severe, electric shock-like pain in the distribution of the trigeminal nerve (typically V2/V3). Often triggered by light touch, chewing, or brushing teeth. Most cases are caused by vascular compression of the trigeminal nerve root.

Synonyms:

Trigger Finger

Trigger finger (stenosing tenosynovitis): A1 pulley thickening, flexor tendon nodule -> catching/locking. Clinical: triggering, palpable nodule at distal palmar crease, morning stiffness. Grades: I (pain only), II (catching, active extension), III (catching, passive extension), IV (locked flexed).

Synonyms:

Triglyceride

A blood lipid consisting of three fatty acids attached to glycerol. Persistently high levels increase the risk of pancreatitis and contribute to cardiovascular risk.

Synonyms:

Trimethoprim-sulfamethoxazole

A fixed-dose combination of trimethoprim and sulfamethoxazole that synergistically inhibits folate synthesis. TMP-SMX is indicated for urinary tract infections, Pneumocystis jirovecii pneumonia, and community-acquired pneumonia. The combination is bactericidal against many gram-positive and gram-negative organisms.

Synonyms:

Trimethylaminuria

A metabolic disorder in which impaired oxidation of trimethylamine causes a characteristic fish-like body odor in sweat, urine, and breath. It may be inherited or acquired and can cause substantial psychosocial distress despite limited physical illness.

Synonyms:

trinucleotide repeat

Expansion of three-nucleotide sequences causes diseases: Huntington (CAG), Fragile X (CGG), my-

otonic dystrophy (CTG), Friedreich ataxia (GAA). Anticipation common.

Synonyms:

Tripe palms

Diffuse, velvety, thickened hyperkeratosis of the palmar skin with a cerebriform, corrugated appearance resembling the lining of a cow's stomach (tripe), which is strongly associated with underlying malignancy, most commonly gastric adenocarcinoma. It may occur alone or in conjunction with acanthosis nigricans.

Synonyms:

Triple-Negative Breast Cancer

Breast cancer lacking ER, PR, HER2. Aggressive, limited treatment options.

Synonyms:

Triplets

A multiple pregnancy with three fetuses (trichorionic, dichorionic, or monochorionic combinations); commonly results from assisted reproductive technology. High-risk: preterm delivery (average 32-33 weeks), low birth weight, preeclampsia, gestational diabetes, growth restriction, and complications of monochorionicity (TTTS).

Synonyms:

Triploidy Syndrome

A chromosomal condition in which cells contain three complete haploid chromosome sets. It causes severe fetal growth restriction and multiple congenital anomalies and is usually incompatible with prolonged survival; partial or mosaic forms vary.

Synonyms:

Triptan

A class of medications used for acute migraine treatment, acting as 5-HT_{1B/1D} receptor agonists. 5-HT_{1B} receptors are located on cranial blood vessels; activation causes vasoconstriction of dilated meningeal arteries.

Synonyms:

Triquetrum

Pyramidal proximal row carpal bone on the ulnar side, articulating with lunate, hamate, pisiform, and TFCC. Second most commonly fractured carpal bone. Contributes to proximal carpal row and ulnar wrist stability. Pisiform articulates with its volar surface.

Synonyms:

Trisomy

Presence of three copies of a chromosome instead of two. Trisomy 21 (Down syndrome): intellectual disability, characteristic facies, heart defects. Trisomy 18 (Edwards): severe intellectual disability, multiple anomalies. Trisomy 13 (Patau): severe intellectual disability, holoprosencephaly, cleft lip/palate.

Synonyms:

Trisomy 21

Down syndrome: the most common chromosomal disorder, caused by an extra chromosome 21 (trisomy 21; 95 percent meiotic nondisjunction, mosaicism, translocation).

Synonyms:

Trophoderm

The outer cellular layer of a blastocyst that contributes to formation of the placenta.

Synonyms:

Tropical Sprue

Chronic diarrhea and malabsorption syndrome of uncertain etiology occurring predominantly in tropical and subtropical regions. The condition is characterized by villous atrophy of the small intestinal mucosa leading to malabsorption of nutrients including folate, iron, and vitamin B12.

Synonyms:

Troponin

Cardiac-specific troponin I and T, the preferred biomarkers for myocardial injury (MI). Highly sensitive and specific. Rise 2-4 hours after symptom onset, peak at 12-24 hours, remain elevated for 7-10 days. High-sensitivity troponin (hs-cTn) allows

earlier detection (1-2 hours).

Synonyms:

Trousseau Sign of Latent Tetany

A sensitive and specific clinical sign of hypocalcemia. Elicited by inflating a blood pressure cuff on the upper arm to a pressure greater than systemic systolic blood pressure for 3 minutes.

Synonyms:

Trousseau Syndrome

Recurrent or migratory venous thrombosis associated with active malignancy, particularly mucin-producing adenocarcinoma. It reflects tumor-associated activation of coagulation and is distinct from Trousseau sign of latent tetany.

Synonyms:

True Ribs

Ribs 1-7 articulating directly with the sternum via their own costal cartilages. Each has a head, neck, tubercle, and shaft. The first two are short and strongly curved for neck/shoulder muscle attachment. Costal cartilages provide thoracic cage elasticity for respiratory expansion.

Synonyms:

Truncus Arteriosus

A congenital heart defect where a single large vessel arises from both ventricles, receiving a mixed blood supply. Associated with a large ventricular septal defect and abnormal semilunar valve. Presents with cyanosis and heart failure early in life.

Synonyms:

Trypanosoma brucei

A protozoan parasite transmitted by tsetse flies that causes African trypanosomiasis, or sleeping sickness. The human-infecting subspecies differ in geographic distribution and typical disease course; infection can progress from fever and lymph-node enlargement to neurologic involvement.

Synonyms:

Trypanosomiasis

Two forms: African trypanosomiasis (sleeping sickness, transmitted by tsetse fly, caused by *Trypanosoma brucei gambiense* – chronic West African form, or *T. b. rhodesiense* – acute East African form) and American trypanosomiasis (Chagas disease, transmitted by triatomine bugs, caused by *Trypanosoma cruzi*).

Synonyms:

TSH-Receptor Antibody

An antibody that binds the thyrotropin receptor. Stimulating antibodies cause Graves disease, while blocking antibodies can cause hypothyroidism; measurement supports diagnosis and can help assess fetal or neonatal risk in pregnancy.

Synonyms:

Tubal Ligation

Surgical sterilization by occluding the fallopian tubes, preventing the ovum from reaching the uterus. Postpartum tubal ligation: after vaginal or cesarean delivery (Pomeroy technique, Parkland). Interval: laparoscopic (bands, clips, bipolar cautery) or mini-laparotomy (Hulka or Filshie clip).

Synonyms:

Tubal Pregnancy

An ectopic pregnancy implanted in a fallopian tube rather than in the uterine cavity. Risk factors include a previous ectopic pregnancy, tubal disease or surgery, pelvic inflammatory disease, smoking, and assisted reproduction. Symptoms may include abdominal pain, missed menstruation, and vaginal bleeding.

Synonyms:

Tuberculin Skin Test

Intradermal injection of purified protein derivative (PPD) to test for *Mycobacterium tuberculosis* infection. Read at 48-72 hours measuring induration (not erythema). Positive: greater than 5 mm in HIV or close contacts; greater than 10 mm in high-risk groups; greater than 15 mm in low-risk populations.

Synonyms:

Tuberculoid leprosy

The paucibacillary pole of the leprosy spectrum characterized by strong cell-mediated immunity to *Mycobacterium leprae*, resulting in well-formed granulomas and few or no organisms in tissue.

Synonyms:

Tuberculosis

A chronic infection caused by *Mycobacterium tuberculosis*, transmitted by airborne droplets; pulmonary TB is most common, extrapulmonary forms occur (lymph node, pleural, meningeal, miliary, skeletal, renal). Features: chronic cough (>3 weeks), hemoptysis, fever, night sweats, weight loss; Ghon complex, apical cavitation on imaging.

Synonyms:

Tuberculosis in Children

Infection with *Mycobacterium tuberculosis*, often from household contacts. Latent TB infection (LTBI) positive tuberculin skin test or interferon-gamma release assay with no symptoms or radiographic findings. Active TB presents with cough, fever, weight loss, and lymphadenopathy. Diagnosis by PPD, chest X-ray, and sputum culture.

Synonyms:

Tuberous sclerosis

An autosomal dominant neurocutaneous disorder caused by mutations in TSC1 (hamartin) or TSC2 (tuberin) genes, leading to benign tumor growth in multiple organs. Neurological manifestations include cortical tubers, subependymal nodules, subependymal giant cell astrocytomas (SEGAs), and epilepsy (often infantile spasms).

Synonyms:

Tuberous Sclerosis Complex

An autosomal dominant genetic disorder caused by mutations in TSC1 (hamartin) or TSC2 (tuberin) genes, leading to mTOR pathway activation. Features: cortical tubers, subependymal nodules, cardiac rhabdomyomas, angiomyolipomas, facial angiofibromas, and seizures (often infantile spasms).

Synonyms:

Tubography

Contrast imaging of fallopian tubes. Evaluates patency.

Synonyms:

Tubular Reabsorption

The process by which the renal tubules return filtered water and solutes from the tubular lumen to the blood, reclaiming 99 percent of the glomerular filtrate. Proximal tubule: reabsorbs 65 percent of sodium, most glucose, amino acids, water, bicarbonate, phosphate, and urate.

Synonyms:

Tubular Secretion

The transport of substances from the peritubular capillary blood into the tubular lumen, a second mechanism (besides filtration) by which the kidney eliminates waste and regulates ions.

Synonyms:

Tubuloglomerular Feedback

A feedback mechanism at the juxtaglomerular apparatus (JGA) that adjusts GFR based on tubular fluid NaCl concentration. The macula densa cells (specialized tubular epithelial cells in the thick ascending limb) sense NaCl concentration via the NKCC2 cotransporter.

Synonyms:

Tularemia

A zoonotic bacterial infection caused by *Francisella tularensis*, transmitted through tick bites, handling infected animals (rabbits, rodents), contaminated water, or aerosolization. Ulceroglandular (most common): ulcer at inoculation site + tender lymphadenopathy.

Synonyms:

Tumor

Abnormal mass of tissue, may be benign or malignant. Tumors classified by tissue of origin. Terminology: -oma usually benign, but exceptions (melanoma, lymphoma, seminoma are malignant).

Synonyms:

Tumor Board

A multidisciplinary conference of oncologists, surgeons, radiologists, and pathologists who review individual cancer cases to coordinate diagnosis and treatment planning.

Synonyms:

Tumor Burden

The total amount of cancer in the body, estimated from the number, size, and extent of tumor deposits; higher burden is generally associated with worse prognosis.

Synonyms:

Tumor Differentiation

The degree to which neoplastic cells morphologically and functionally resemble their normal counterparts of origin.

Synonyms:

Tumor Embolism

Tumor embolism occurs when malignant cells, tumor fragments, or tumor thrombi enter the venous circulation and travel to distant sites. The pulmonary vasculature is the most common site of embolization, as venous blood from most organs drains to the lungs through the pulmonary arteries.

Synonyms:

Tumor Grade

A histologic measure of how much tumor cells resemble normal tissue; low-grade (well-differentiated) tumors behave less aggressively than high-grade (poorly differentiated) tumors. Grading is a prognostic, not staging, feature.

Synonyms:

Tumor Grading

A description of a tumor based on how abnormal the cancer cells look under a microscope compared to normal cells; a lower grade indicates slower-growing cancer.

Synonyms:

Tumor Heterogeneity

The presence of genetically, epigenetically, or phenotypically distinct subpopulations within the same tumor or between primary and metastatic sites. Heterogeneity can influence prognosis, sampling, treatment response, and resistance.

Synonyms:

Tumor Lysis Syndrome

Metabolic emergency from rapid cell death. Hyperuricemia, hyperkalemia, hyperphosphatemia, hypocalcemia. Prevention: hydration, allopurinol, rasburicase.

Synonyms:

Tumor Marker

Substance produced by cancer or body in response to cancer. Used for diagnosis, monitoring, prognosis. Examples: PSA (prostate), CA-125 (ovarian), CEA (colon), AFP (liver), CA 19-9 (pancreas).

Synonyms:

Tumor Microenvironment

Surrounding tissue influencing tumor growth. Includes immune cells, blood vessels, fibroblasts, signaling molecules.

Synonyms:

Tumor Mutational Burden

The number of somatic mutations per unit of coding DNA in a tumor specimen. TMB may correlate with production of neoantigens and response to some immune checkpoint inhibitors, but interpretation requires a validated assay and disease-specific context.

Synonyms:

Tumor Necrosis Factor

A proinflammatory cytokine (TNF-alpha) produced mainly by macrophages, acting on TNFR1/TNFR2 receptors. Functions: activation of endothelium and leukocytes, fever, cachexia, apoptosis, and coordination of inflammation and the acute-phase response.

Synonyms:

Tumor Necrosis Factor Inhibitor

TNF inhibitor (biologic): monoclonal antibodies/fusion proteins blocking TNF-alpha—infliximab, adalimumab (monoclonals), etanercept (soluble receptor), certolizumab, golimumab. Used in rheumatoid arthritis (after methotrexate failure), ankylosing spondylitis, psoriatic arthritis, psoriasis, IBD (Crohn, UC).

Synonyms:

Tumor Staging

A system of describing the size of a cancer and how far it has spread throughout the body from its original location (e.g., using the TNM system).

Synonyms:

Tumor Suppressor

A gene or protein that helps limit cell growth, repair DNA damage, or promote removal of abnormal cells. Loss of its function can contribute to cancer.

Synonyms:

Tumor Suppressor Gene

Gene that prevents uncontrolled cell growth. Examples: TP53, RB1, BRCA1, BRCA2, APC. Loss of function contributes to cancer.

Synonyms:

Tumor-Suppressor Gene

A gene whose normal product restrains cell proliferation, promotes DNA repair, induces apoptosis, or maintains genomic stability. Loss or inactivation of both functional copies is common in the development of many cancers, although mechanisms vary by gene.

Synonyms:

Tungiasis

A skin infestation caused by the sand flea *Tunga* penetrans, producing an itchy or painful lesion, usually on the feet.

Synonyms:

Tunica Adventitia

The outer connective-tissue layer of a blood-vessel

wall. It contains collagen and elastic fibers that provide structural support, along with nerves and, in larger vessels, small vessels called vasa vasorum that supply the outer wall. It is relatively prominent in veins and helps anchor vessels to surrounding tissues.

Synonyms:

Tunica Media

The middle layer of a blood-vessel wall, located between the tunica intima and tunica adventitia. It consists primarily of smooth muscle and elastic fibers; its contraction or relaxation changes vascular diameter, regulating blood pressure and tissue perfusion. It is thickest in arteries and thinner in veins.

Synonyms:

Turbinates

Curved bony shelves on the lateral walls of the nasal cavity, covered by vascular mucosa. They increase surface area and help warm, humidify, and filter inhaled air.

Synonyms:

Turbinates Hypertrophy

Chronic enlargement of the nasal turbinates, most commonly the inferior turbinates, resulting in nasal airway obstruction, which can be caused by chronic inflammation from allergic rhinitis, non-allergic rhinitis, chronic sinusitis, hormonal changes, or vasomotor dysfunction.

Synonyms:

Turner Hypoplasia

Enamel defect on permanent tooth from infection of overlying primary tooth. Localized hypoplasia.

Synonyms:

Turner Syndrome

Chromosomal abnormality in females with complete or partial absence of one X chromosome most commonly with a karyotype of 45,X occurring in one in two thousand five hundred live female births.

Synonyms:

Twin-to-Twin Transfusion Syndrome

A complication of monochorionic twin pregnancy in which shared placental vessels cause unequal blood flow between the twins.

Synonyms:

Twin-Twin Transfusion Syndrome

A complication of monochorionic diamniotic twin pregnancies where placental vascular anastomoses (arteriovenous connections) cause unbalanced blood flow from one twin (the donor) to the other (the recipient). The donor twin becomes hypovolemic, anemic, and growth-restricted with oligohydramnios ("stuck twin").

Synonyms:

Tympanic Cavity

The air-filled space of the middle ear containing the malleus, incus, and stapes.

Synonyms:

Tympanic hyperectasis

Abnormal outward bulging or retraction of the tympanic membrane from chronic middle ear pressure changes, potentially causing conductive hearing loss and requiring tympanostomy tube placement.

Synonyms:

Tympanic membrane

The tympanic membrane (eardrum) is a thin, cone-shaped, translucent membrane at the medial end of the external auditory canal that separates the external ear from the middle ear and serves as the interface for sound transmission by converting acoustic energy into mechanical vibrations of the ossicular chain.

Synonyms:

Tympanometry

An objective, quantitative test that measures the compliance (mobility) of the tympanic membrane and the pressure within the middle ear as a function of air pressure in the external auditory canal, providing information about middle ear function that supplements otoscopic examination.

Synonyms:

Tympanosclerosis

Scarring and calcification of the tympanic membrane or middle-ear lining, often following recurrent infection or previous inflammation. It may be asymptomatic or cause conductive hearing loss when the ossicles are affected.

Synonyms: Tympanic-membrane sclerosis; myringosclerosis when limited to the tympanic membrane.

Tympanostomy Tubes

Small tubes inserted through the tympanic membrane to ventilate the middle ear and prevent fluid accumulation. Indicated for recurrent acute otitis media (3 episodes in 6 months or 4 in 12 months) or persistent otitis media with effusion greater than 3 months with hearing loss. Performed as outpatient procedure under general anesthesia.

Synonyms:

Type 1 Diabetes Mellitus

Type 1 diabetes is an autoimmune disease in which the immune system attacks and destroys the insulin-producing beta cells of the pancreas, resulting in absolute insulin deficiency.

Synonyms:

Type 2 Diabetes Mellitus

Type 2 diabetes is a chronic metabolic disorder characterized by insulin resistance and progressive pancreatic beta-cell dysfunction, leading to hyperglycemia.

Synonyms:

Type I Hypersensitivity

An immediate (anaphylactic) hypersensitivity reaction mediated by allergen-specific IgE bound to mast cells and basophils; re-exposure cross-links IgE, triggering degranulation and release of histamine and mediators within minutes. Manifestations: allergic rhinitis, asthma, urticaria, food allergy, and anaphylaxis.

Synonyms:

Type II Hypersensitivity

An antibody-mediated (cytotoxic) hypersensitivity reaction in which IgG or IgM binds to cell-surface or matrix antigens, causing cell destruction by complement activation (MAC), opsonization/phagocytosis, or antibody-dependent cellular cytotoxicity.

Synonyms:

Type III Hypersensitivity

An immune complex-mediated hypersensitivity reaction in which circulating antigen-antibody complexes deposit in tissues and vessels, activating complement and attracting neutrophils, causing inflammation and tissue damage. Local forms: Arthus reaction, serum sickness.

Synonyms:

Type III hypersensitivity reaction

Tissue injury caused by deposition of antigen-antibody complexes, activating complement and inflammation.

Synonyms:

Type IV Hypersensitivity

A delayed-type hypersensitivity (cell-mediated) reaction mediated by sensitized T cells (not antibody), occurring 24-72 hours after antigen exposure.

Synonyms:

Typhlitis

Inflammation of the cecum in immunocompromised patients particularly those with neutropenia from chemotherapy. Also known as neutropenic enterocolitis. Presents with right lower quadrant pain, fever, and diarrhea. Diagnosis is by CT showing cecal wall thickening.

Synonyms: neutropenic enterocolitis.

Typhoid

A systemic infection caused by *Salmonella enterica* serovar Typhi, usually acquired through contaminated food or water and characterized by prolonged fever and gastrointestinal or systemic symptoms.

Synonyms:

Typhoid Fever

A systemic infection caused by *Salmonella typhi*, acquired through contaminated food or water. Incubation 7-14 days. Presents with prolonged fever, headache, abdominal pain, rose spots, and relative bradycardia. Diagnosis: blood culture (first week), stool culture (second week), Widal test.

Synonyms:

Typhus

A group of acute febrile illnesses caused by *Rickettsia* species, transmitted by arthropod vectors. Three main forms: (1) Epidemic (louse-borne) typhus—*Rickettsia prowazekii*, transmitted by the human body louse (*Pediculus humanus corporis*). Associated with overcrowding, poverty, cold climate, and refugees ('war typhus').

Synonyms:

Typical Antipsychotics

Typical antipsychotics, also known as first-generation antipsychotics, primarily block dopamine D2 receptors in the mesolimbic pathway, reducing positive symptoms of schizophrenia including hallucinations, delusions, and disorganized thinking.

Synonyms: first-generation antipsychotics, primarily block.

Tyramine

A naturally occurring amine found in some aged or fermented foods. In people taking monoamine oxidase inhibitors, excessive tyramine can cause a dangerous rise in blood pressure.

Synonyms:

Tyrosine Kinase Inhibitor

A class of targeted cancer therapy drugs that inhibit tyrosine kinases, enzymes that phosphorylate tyrosine residues on proteins and activate signaling pathways involved in cell growth, proliferation, differentiation, and survival. Tyrosine kinase mutations or overexpression drive many cancers.

Synonyms:

Tyrosinemia

An inherited disorder of tyrosine metabolism that causes accumulation of tyrosine or its metabolites. Type I can cause severe liver and kidney disease and is associated with fumarylacetoacetate hydrolase deficiency.

Synonyms:

Tonic Seizures

Seizures that cause sustained stiffening of muscles, usually lasting seconds to minutes.

Synonyms:

Traumatic Shock

A life-threatening state in which severe injury causes inadequate blood flow and oxygen delivery to tissues.

Synonyms:

Trendelenburg Position

A supine position in which the head and upper body are lower than the feet.

Synonyms:

Teen Depression

A depressive disorder in an adolescent that causes persistent low mood or loss of interest and impairs daily functioning.

Synonyms:

Temporal Lobe Seizure

A seizure that begins in the temporal lobe of the brain and may cause altered awareness, unusual sensations, or repetitive movements.

Synonyms:

Tendinopathy

A disorder involving tendon pain and impaired tendon structure, usually related to overuse or degeneration.

Synonyms:

Thyrotoxicosis

A clinical state caused by excessive thyroid hormone

activity in the body.

Synonyms:

Tuberculin Test

A skin test that assesses whether the immune system has reacted to tuberculosis proteins.

Synonyms:

Towel Clamp

A clamp used to secure surgical drapes or hold them in position.

Synonyms:

Trocar

A pointed instrument used to create access through tissue, usually to place a cannula for minimally invasive surgery.

Synonyms:

Tactile Sense

The ability to perceive touch, pressure, vibration, texture, and related mechanical stimuli through receptors in the skin and deeper tissues.

Synonyms:

Target Tissue

A tissue containing receptors or other molecular targets on which a hormone, drug, toxin, or signaling molecule acts.

Synonyms:

Tarsorrhaphy

A procedure that partially or completely closes the eyelids to protect the cornea or reduce exposure in conditions such as severe dry eye or facial nerve palsy.

Synonyms:

Testes

The paired male reproductive glands that produce sperm and secrete testosterone.

Synonyms:

Thyroxine-Binding Globulin

The principal transport protein for thyroid hormones in the blood, binding most circulating thyroxine and triiodothyronine.

Synonyms:

Tissue Plasminogen Activator

An enzyme that converts plasminogen to plasmin, helping dissolve fibrin in blood clots. Recombinant forms are used as thrombolytic medicines in selected emergencies.

Synonyms:

Tomosynthesis

An imaging technique that acquires multiple low-dose X-ray projections and reconstructs thin section images, commonly used for three-dimensional breast imaging.

Synonyms:

Tonometer

An instrument used to measure intraocular pressure, an important part of glaucoma assessment.

Synonyms:

Tonus

The normal resting partial contraction of a muscle or the baseline tension of a tissue.

Synonyms:

Tussis

Cough; a forceful reflex expiration that helps clear secretions, irritants, or foreign material from the airways.

Synonyms:

Tenodesis

Surgical fixation of a tendon to bone or another tendon to restore function, stabilize a joint, or treat tendon imbalance.

Synonyms:

Tibial Fracture

A break in the tibia, the major weight-bearing bone

of the lower leg, often caused by high-energy trauma, twisting injury, or repetitive stress.

Synonyms:

Transaminitis

Elevation of blood levels of aminotransferase enzymes, usually alanine aminotransferase and aspartate aminotransferase, indicating possible liver-cell injury but not identifying its cause.

Synonyms:

Travelers' Diarrhea

Acute diarrhea occurring during or shortly after travel, usually caused by contaminated food or water and commonly involving bacterial, viral, or parasitic infection.

Synonyms:

Tubular Adenoma

A benign glandular polyp, most often in the colon, that can develop dysplastic changes and is considered a precursor lesion for some colorectal cancers.

Synonyms:

Tympanoplasty

Surgical repair or reconstruction of the tympanic membrane and, when necessary, the middle-ear ossicles to close a perforation or improve hearing.

Synonyms:

Tympanic Membrane Perforation

A tear or hole in the eardrum caused by infection, trauma, pressure changes, or instrumentation, potentially producing pain, drainage, or conductive hearing loss.

Synonyms:

Tachycardia-Induced Cardiomyopathy

Weakening and dilation of the heart muscle caused by a persistent or frequently recurring rapid heart rhythm, often improving when the arrhythmia is controlled.

Synonyms:

Toxic Metabolic Encephalopathy

Diffuse brain dysfunction caused by systemic metabolic or toxic disturbances, producing confusion, altered alertness, agitation, seizures, or coma.

Synonyms:

Tensile Strength

The ability of a tissue or material to resist being pulled apart; it is important in wound healing and the integrity of sutures, tendons, and other connective tissues.

Synonyms:

Teratogenesis

The process by which an exposure or genetic factor causes abnormal development of an embryo or fetus.

Synonyms:

Terminal Care

Care focused on comfort, symptom relief, dignity, and support for a person with an advanced illness who is approaching the end of life.

Synonyms:

Terry's Nails

A nail change in which most of the nail plate appears white with a narrow pink or brown distal band; it may be associated with liver disease, heart failure, diabetes, or ageing.

Synonyms:

Tertian Fever

A fever pattern in which attacks recur approximately every 48 hours, classically associated with *Plasmodium vivax* or *Plasmodium falciparum* malaria.

Synonyms:

Tetraplegia (Quadriplegia)

Paralysis or severe weakness affecting all four limbs and usually the trunk, commonly caused by cervical spinal-cord injury or disease.

Synonyms: Quadriplegia

Thalassaemia

An inherited disorder of haemoglobin production causing microcytic anaemia of variable severity; severe forms may require regular transfusions.

Synonyms:

Thirst

The conscious desire to drink, usually triggered by increased plasma osmolality, reduced circulating volume, or both.

Synonyms:

Thoracoscopy

A minimally invasive procedure using a camera inserted through the chest wall to examine or treat the pleura, lungs, or mediastinum.

Synonyms:

Threadworms (Pinworms)

Small intestinal worms, *Enterobius vermicularis*, whose females lay eggs around the anus and commonly cause nocturnal itching.

Synonyms: Pinworms

Thymus Gland

A lymphoid organ in the upper chest where T lymphocytes mature, especially active during childhood and gradually involuting after puberty.

Synonyms:

Transient Ischaemic Attack (TIA)

A brief episode of neurological dysfunction caused by temporary focal brain, spinal-cord, or retinal ischaemia without persistent tissue infarction.

Synonyms: TIA

Tick-Borne Encephalitis

A viral infection transmitted mainly by ticks that can cause fever, meningitis, encephalitis, or lasting neurological complications.

Synonyms:

Tiredness (Fatigue)

A subjective lack of energy or exhaustion that may

result from inadequate sleep, illness, psychological stress, anaemia, or many other causes.

Synonyms: Fatigue

Tongue-Tie (Ankyloglossia)

Restricted movement of the tongue caused by an unusually short or tight lingual frenulum, sometimes affecting feeding, speech, or oral hygiene.

Synonyms: Ankyloglossia

Tourette's Syndrome

A neurodevelopmental disorder involving persistent motor and vocal tics that begin in childhood and fluctuate in severity.

Synonyms:

Trimester

One of the three approximately three-month divisions of pregnancy: first, second, and third trimester.

Synonyms:

Tropical Diseases

Diseases occurring predominantly in tropical and subtropical regions, including malaria, dengue, schistosomiasis, leishmaniasis, and other parasitic or infectious diseases.

Synonyms:

Tumour (Neoplasm)

An abnormal mass of tissue produced by uncontrolled or inappropriate cell growth; it may be benign or malignant.

Synonyms: Neoplasm

Turner's Syndrome

A chromosomal condition affecting females, usually involving complete or partial absence of one X chromosome and commonly causing short stature, ovarian insufficiency, and characteristic physical features.

Synonyms:

Tzanck Smear

A microscopic examination of cells from the base of a skin blister or erosion, historically used to support diagnoses such as herpesvirus infection or pemphigus.

Synonyms:

Twin Pregnancy

A pregnancy involving two fetuses. Clinical risk depends on chorionicity and amnionicity, with increased risks including preterm birth, fetal growth problems, and hypertensive disorders.

Synonyms: Twin gestation; twin-bearing pregnancy.

U

U Wave

A small deflection following the T wave, best seen in precordial leads V2-V3. U waves are thought to represent repolarization of the Purkinje fibers or papillary muscles. Prominent U waves are associated with hypokalemia, bradycardia, and certain drugs (digitalis, quinidine).

Synonyms:

Unopposed Estrogen

Estrogen therapy given without a progestogen in a person with a uterus. **Synonyms:**

Unresolved Losses

Significant losses that have not been fully acknowledged or emotionally processed. **Synonyms:**

Unsaturated Fat

A dietary fat containing one or more carbon-carbon double bonds. **Synonyms:**

Upper Airway Resistance Syndrome

Increased effort to breathe through a narrowed upper airway, often causing sleep disruption and daytime sleepiness. **Synonyms:** UARS

Upper Esophageal Sphincter

A muscular valve at the top of the esophagus that opens during swallowing. **Synonyms:** UES

Urethral Hypermobility

Excessive movement of the urethra during increased abdominal pressure, contributing to stress incontinence. **Synonyms:**

Urinary Tract

The kidneys, ureters, bladder, and urethra, which produce, transport, store, and excrete urine. **Synonyms:**

Urologist

A physician specializing in urinary-tract disorders and the male reproductive system. **Synonyms:**

Uvulopalatopharyngoplasty

Surgery that removes or reshapes the uvula, tonsils, and soft-palate tissue to treat obstructive sleep apnea. **Synonyms:** UPPP

Ubiquinone

A lipid-soluble electron carrier in the mitochondrial membrane. See Coenzyme Q.

Synonyms:

Uhl Anomaly

A rare congenital absence or severe deficiency of right-ventricular myocardium, leaving a thin-walled right ventricle. It may cause right-sided heart failure, arrhythmia, cyanosis, or sudden deterioration in infancy or childhood.

Synonyms:

Ulcer

Full-thickness loss of epidermis extending into the dermis or deeper tissue, often healing with a scar. Causes include vascular disease, pressure, infection, neuropathy, inflammatory disease, trauma, and malignancy.

Synonyms:

Ulcer (Vascular)

A persistent break in the skin caused or maintained by inadequate blood flow, venous hypertension, neuropathy, or related vascular disease.

Synonyms: Vascular

Ulcerative Colitis

A chronic inflammatory disease of the colon and rectum, usually causing continuous mucosal inflammation that begins in the rectum and extends proximally. Symptoms may include bloody diarrhea, urgency, abdominal pain, and extraintestinal manifestations.

Synonyms:

Ulna

Medial forearm bone, longer than the radius. Proximal end: trochlear notch, olecranon, coronoid process. Shaft. Distal end: head, styloid process. The trochlear notch articulates with the trochlea forming the primary elbow hinge. Bears approximately 20 percent of wrist axial load.

Synonyms:

Ulnar

Relating to the ulna bone of the forearm or the ulnar side (medial side) of the hand. Ulnar nerve compression causes paresthesia in medial one and a half fingers.

Synonyms:

Ulnar Artery

The larger terminal branch of the brachial artery at the cubital fossa, running medially down the forearm to the wrist (palpable medial to the pisiform) and hand. Supplies the medial forearm and ulnar side of the hand; forms the superficial palmar arch. Provides the common interosseous artery.

Synonyms:

Ulnar Hypoplasia

Underdevelopment or partial absence of the ulna, usually presenting as a congenital forearm and hand anomaly. It may cause forearm shortening, radial deviation of the hand, limited elbow or wrist move-

ment, and associated digital or systemic abnormalities.

Synonyms:

Ulnar Nerve

From medial cord (C8-T1), passing behind the medial epicondyle (cubital tunnel), into the forearm innervating flexor carpi ulnaris and medial FDP half. In the hand innervates hypothenar muscles, interossei, medial two lumbricals, and adductor pollicis. Sensation to medial 1.5 digits.

Synonyms:

Ulnar Nerve Dysfunction

Impairment of the ulnar nerve, commonly caused by compression at the elbow (cubital tunnel) or wrist (Guyon canal). Symptoms include numbness or tingling in the little and ring fingers, weakened grip, and hand-muscle wasting; severe lesions may produce an ulnar claw.

Synonyms:

Ultrasonography

Imaging that uses high-frequency sound waves to produce pictures of tissues and organs.

Synonyms:

Ultrasound

Imaging using high-frequency sound waves (2-18 MHz). No ionizing radiation. Right upper quadrant (RUQ): gallbladder (gallstones, cholecystitis), liver (steatosis, cysts), kidneys, and pancreas. Pelvic: uterus, ovaries, adnexa. Renal: hydronephrosis, stones, cysts, tumors. Scrotal: testicular torsion, epididymitis, varicocele, hydrocele.

Synonyms:

Ultrasound Contrast

A substance administered during ultrasound to increase the visibility of blood flow or selected tissues.

Synonyms:

Ultrasound Therapy

Therapeutic ultrasound for tissue healing, pain, scar tissue.

Synonyms:

Ultrasound Transducer

A device that emits and receives high-frequency sound waves to generate diagnostic images or guide procedures. Linear, curvilinear, phased-array, and endocavitary transducers are selected according to depth and anatomic application.

Synonyms:

Umbilical Artery Doppler

Ultrasound assessment of blood flow in the umbilical arteries to evaluate placental resistance. Normal flow shows a pulsatility index decreasing throughout pregnancy with forward diastolic flow. Absent or reversed end-diastolic flow indicates severe placental dysfunction and is associated with increased perinatal morbidity and mortality.

Synonyms:

Umbilical Cord

The connection between the fetus and the placenta, containing two umbilical arteries (carrying deoxygenated blood from the fetus to the placenta) and one umbilical vein (carrying oxygenated blood from the placenta to the fetus). The vessels are embedded in Wharton jelly, a mucopolysaccharide matrix that prevents compression.

Synonyms:

Umbilical Cord Blood Gas

Analysis of arterial and venous cord blood collected after delivery. The umbilical artery best reflects fetal acid-base status, while the umbilical vein reflects placental blood. Results are interpreted using gestational age, delivery circumstances, pH, carbon dioxide, and base deficit or excess.

Synonyms:

Umbilical Cord Prolapse

Descent of the umbilical cord through the cervix alongside or past the presenting fetal part, occurring when the membranes rupture. Risk factors: malpresentation (transverse lie, breech), preterm/low birth weight, polyhydramnios, multiparity, and artificial

ROM with high presenting part.

Synonyms:

Umbilical Hernia

A hernia through the umbilical ring, common in infants (most umbilical hernias close spontaneously by age 4-5) and adults (risk factors: obesity, pregnancy, ascites, cirrhosis). Presents as a reducible bulge at the umbilicus, worse with increased intra-abdominal pressure. In adults: risk of incarceration and strangulation is higher.

Synonyms:

Umbilical Region

Central region around the umbilicus containing small intestine, transverse colon, and great vessels. The umbilicus is a landmark for assessing ascites, caput medusae in portal hypertension, and umbilical hernias. Percussion and auscultation here are essential components of the abdominal examination.

Synonyms:

Umbilication

Formation of a central depression or navel-like indentation in a lesion or structure.

Synonyms:

Umbilicus (Navel)

The scar on the anterior abdominal wall marking the site of attachment of the umbilical cord in fetal life, located at the level of the L3-L4 intervertebral disc, approximately midway between the xiphoid process and the pubic symphysis.

Synonyms: Navel

Uncompetitive Inhibition

A type of enzyme inhibition where the inhibitor binds only to the enzyme-substrate (ES) complex at a site distinct from the active site, forming an inactive ESI complex. The inhibitor cannot bind to the free enzyme.

Synonyms:

Unconsciousness

Loss of awareness and responsiveness, ranging from

brief fainting to prolonged coma.

Synonyms:

Underweight

BMI < 18.5 kg/m². Associated with osteoporosis, infertility, anemia, weakened immunity, surgical complications. Causes: hypermetabolism, malabsorption, eating disorders, malignancy, chronic infection.

Synonyms:

Undescended Testis

Failure of one or both testes to descend into the scrotum. Some descend during early infancy, but persistent cryptorchidism can impair fertility and increase the risk of torsion, hernia, or testicular cancer.

Synonyms:

Undescended Testis (Cryptorchidism)

Congenital failure of one or both testes to descend along the normal path into the scrotum. Persistent cases require evaluation because they may affect fertility and increase the risk of torsion, hernia, or testicular cancer.

Synonyms: Cryptorchidism

Undulant Fever

A zoonotic infectious disease caused by gram-negative coccobacilli of the genus *Brucella*, transmitted to humans through contact with infected animals (cattle, goats, pigs, sheep) or consumption of unpasteurized dairy products. See Brucellosis.

Synonyms:

Unguentum

A semisolid, greasy preparation intended for application to the skin or, when formulated for that purpose, to mucous membranes or the eyes.

Synonyms:

Uniparental Disomy

Inheritance of both copies of a chromosome or chromosome segment from one parent and none from the other. It can cause disease through abnormal

genomic imprinting, homozygosity for a recessive variant, or chromosomal dosage effects.

Synonyms:

Unresponsive Coma

A state of profound unresponsiveness in which the person cannot be awakened or follow commands.

Synonyms:

Unstable Angina

Myocardial ischemia at rest, new-onset severe angina, or a crescendo pattern (more frequent, longer, lower-threshold) without evidence of myocardial necrosis (normal troponin). Pathophysiology: acute plaque rupture with thrombosis causing transient severe coronary obstruction.

Synonyms:

Upper Airway Obstruction

Narrowing of the airway above the carina, causing inspiratory stridor, dyspnea, and characteristic changes on flow-volume loops (flattening of the inspiratory limb). Causes include tumors, stenosis, goiter, and vocal cord dysfunction. It is a medical emergency when severe.

Synonyms:

Upper Endoscopy

Upper endoscopy: flexible endoscopic examination of the esophagus, stomach, and duodenum. See Esophagogastroduodenoscopy (EGD).

Synonyms:

Upper Extremity Venous Doppler

An ultrasound examination of the arm and related veins that assesses compressibility and blood flow, commonly to evaluate suspected venous thrombosis.

Synonyms:

Upper Gastrointestinal Bleeding

Bleeding from esophagus, stomach, or duodenum. Causes: peptic ulcer, varices, Mallory-Weiss tear, gastritis. Presentation: hematemesis, melena, hematochezia. Management: ABCs, IV access, type and crossmatch, PPI infusion, endoscopy within 24

hours. Variceal bleeding: octreotide, antibiotics, band ligation.

Synonyms:

Upper GI Series

Fluoroscopic examination of the esophagus, stomach, and duodenum after oral barium contrast. Single-contrast: looks for gross abnormalities (obstruction, masses). Double-contrast (barium + gas): better mucosal detail for ulcers, erosions, and early malignancies.

Synonyms:

Upper Motor Neuron Syndrome

A pattern caused by injury to corticospinal pathways above the anterior horn cell or cranial motor nucleus. Findings may include weakness with spasticity, hyperreflexia, clonus, and an extensor plantar response, although acute lesions can initially produce flaccidity.

Synonyms:

Upright Labor Positions

Maternal positions during labor, such as walking, standing, squatting, kneeling, or sitting upright. They may improve comfort and mobility and can be used when safe and acceptable to the laboring person and clinical team.

Synonyms:

Uptake

Cellular accumulation of radiotracer. Depends on blood flow, membrane transport, metabolism, binding.

Synonyms:

Urachal Cyst

A cystic remnant of the embryonic urachus between the bladder and umbilicus. It may be asymptomatic or become infected, causing lower-abdominal pain, fever, umbilical discharge, or urinary symptoms.

Synonyms:

Urachal mucinous cystic tumor

A rare tumor arising from the urachal remnant be-

tween the bladder dome and umbilicus. It may be benign or malignant, with mucinous histology, and requires surgical excision.

Synonyms:

Uraemia

The clinical syndrome resulting from accumulation of urea and other nitrogenous waste products in the blood in advanced chronic kidney disease (CKD stage 4-5) and acute kidney injury.

Synonyms:

Urate-Lowering Therapy

Long-term treatment that reduces serum urate to dissolve monosodium urate deposits and prevent gout flares and structural damage. Xanthine oxidase inhibitors and uricosuric medicines are selected according to renal function, comorbidity, and treatment goals.

Synonyms:

Urea Cycle

A metabolic pathway occurring in both the mitochondria and cytoplasm of hepatocytes that converts toxic ammonia (NH₃), derived from amino acid catabolism, into nontoxic, water-soluble urea for excretion by the kidneys.

Synonyms:

Urea Cycle Disorder

A group of inherited disorders caused by deficiency of an enzyme or transporter in the urea cycle, leading to impaired ammonia clearance. Ornithine transcarbamylase deficiency is an X-linked form; presentation and severity vary by the gene and residual enzyme activity.

Synonyms:

Uremia

A clinical syndrome caused by advanced kidney failure and accumulation of waste products and other biologically active substances. Symptoms may include nausea, itching, fatigue, confusion, bleeding, or pericarditis; laboratory values and symptoms must be interpreted together.

Synonyms:

Uremic Encephalopathy

Neurological syndrome in severe renal failure. Confusion, asterixis, seizures, coma. Results from uremic toxin accumulation. Diagnosis is clinical in context of advanced renal failure. Emergent dialysis indicated with rapid neurological improvement typically.

Synonyms:

Uremic Frost

Urea crystallization on skin in severe untreated uremia. Rare finding indicating extremely advanced uremia. White crystalline deposits on skin. Indicates immediate need for dialysis. Extremely rare in developed countries due to early detection.

Synonyms:

Uremic Pericarditis

Pericardial inflammation in advanced uremia. Pleuritic chest pain, friction rub, diffuse ST elevation. Indicates need for emergent dialysis. Does not respond to anti-inflammatory therapy. Complications include tamponade. Emergent hemodialysis produces resolution within 2 to 3 weeks.

Synonyms:

Uremic Platelet Dysfunction

Impaired platelet adhesion and aggregation in uremia causing bleeding tendency. Easy bruising, epistaxis, GI bleeding. Improves with dialysis and desmopressin. Cryoprecipitate provides temporary benefit before procedures.

Synonyms:

Uremic stomatitis

Oral mucosal inflammation occurring in advanced kidney failure, presenting as white plaques, ulceration, or bleeding of the gums and tongue due to accumulation of uremic toxins.

Synonyms:

Ureter

The paired muscular tubes (25-30 cm) conveying

urine from the renal pelvis to the urinary bladder, crossing the pelvic brim at the pelvic inlet. Three anatomical narrowings (pelviureteric junction, pelvic brim, vesicoureteric junction) are common sites of ureteric stone impaction.

Synonyms:

Ureter Duplex

A congenital duplication of the ureter, complete or partial, draining one kidney. It may be asymptomatic or associated with vesicoureteral reflux, ureterocele, obstruction, recurrent urinary infection, or impaired renal drainage.

Synonyms:

Ureteral Obstruction

Blockage of urine flow causing proximal dilation and increased pressure. Acute causes renal colic with flank pain. Chronic leads to hydronephrosis and CKD. Emergent decompression with stent or nephrostomy for infected obstructed kidney. Diagnosis by CT or ultrasound showing hydronephrosis.

Synonyms:

Ureteral Perforation

A tear or hole in the ureter, sometimes caused by a stone, trauma, surgery, or an endoscopic procedure. Urine may leak into surrounding tissues, causing pain, infection, or inflammation; prompt imaging and urologic assessment are required.

Synonyms:

Ureteral Stent

Double-J stent maintaining ureteral patency. Indications: obstruction (stone, stricture, malignancy), post-ureteroscopy. Materials: silicone, polyurethane. Sizes: 4.7-7 Fr, lengths 24-30 cm. Complications: irritation, hematuria, encrustation, migration.

Synonyms:

Ureteral Stent (Double-J Stent)

A tube placed in the ureter from the renal pelvis to the bladder to maintain patency, with pigtail coils at both ends (hence double-J). Indications: ureteral

obstruction (stones, stricture, malignancy), after ureteroscopy (prevent post-op obstruction), and as a pre-treatment for complex ureteral stones.

Synonyms: Double-J Stent

Ureteral Stricture

Narrowing of the ureter caused by fibrosis, surgery, instrumentation, radiation, infection, malignancy, or congenital disease. It can produce upstream hydronephrosis, pain, infection, and declining renal function.

Synonyms:

Ureteritis

Inflammation of the ureter, usually related to infection, obstruction, stone passage, instrumentation, or adjacent inflammatory disease. It may cause flank or abdominal pain, urinary symptoms, hematuria, and fever.

Synonyms:

Ureterocele

A cystic dilatation of the distal ureter within the bladder wall or bladder lumen. It can obstruct urine flow and cause urinary infection, hydronephrosis, reflux, stone formation, or impaired renal function.

Synonyms:

Ureterolithiasis

The presence of kidney stones (calculi) within the ureter, causing ureteral obstruction and renal colic. Stones form from calcium oxalate/phosphate (most), uric acid, struvite (infection), and cystine.

Synonyms:

Ureteropelvic Junction Obstruction

Impaired drainage from the renal pelvis into the proximal ureter, caused by intrinsic narrowing, aberrant vessels, scarring, or functional peristaltic abnormality. It may cause hydronephrosis, flank pain, infection, stones, or loss of renal function.

Synonyms:

Ureteroscopy

Endoscopic procedure utilizing a thin, flexible or

semirigid ureteroscope passed through the urethra, bladder, and into the ureter or renal collecting system. Used primarily for the diagnostic evaluation and therapeutic management of ureteral and renal calculi, ureteral strictures, and upper tract urothelial carcinoma (UTUC).

Synonyms:

Urethra

The tube conveying urine from the bladder to the exterior. Male urethra (18-20 cm): prostatic, membranous, and spongy (penile) parts; carries urine and semen; longer and more tortuous than female. Female urethra (3-4 cm): short, straight, predisposing to ascending urinary tract infections.

Synonyms:

Urethracele

A herniation or prolapse of the urethra into the anterior vaginal wall, often occurring together with a cystocele (bladder prolapse). Urethracele is caused by weakening of the pubocervical fascia, often from childbirth, aging, or increased intra-abdominal pressure.

Synonyms:

Urethral Diverticulum

A periurethral outpouching that communicates with the urethral lumen, usually arising from infected or obstructed periurethral glands. It may cause dysuria, post-void dribbling, recurrent urinary infection, dyspareunia, or a palpable anterior-vaginal-wall mass.

Synonyms:

Urethral Infection

Infection involving the urethra, commonly caused by bacteria, including sexually transmitted organisms. Symptoms may include burning urination, discharge, frequency, or pelvic discomfort; testing and appropriate treatment help prevent complications and transmission.

Synonyms:

Urethral Meatus

External opening of urethra. Position abnormal in hypospadias, epispadias.

Synonyms:

Urethral Pressure Profile

Measurement of urethral closure pressure along urethra. Used in incontinence evaluation.

Synonyms:

Urethral Pressures

Measurements of pressure within or along the urethra used to assess urethral closure and urinary continence.

Synonyms:

Urethral Sling

Synthetic or fascial tape supporting urethra for stress incontinence. Mid-urethral sling (TVT, TOT) standard. Minimally invasive. Complications: erosion, urgency, retention.

Synonyms:

Urethral Stricture

Narrowing of the urethra caused by scar tissue. It may produce a weak urinary stream, spraying, straining, incomplete emptying, infections, or urinary retention and can result from injury, instrumentation, infection, or inflammatory disease.

Synonyms:

Urethritis

Inflammation of the urethra, most commonly caused by sexually transmitted infections (*Chlamydia trachomatis*, *Neisseria gonorrhoeae*) or non-infectious causes. Presents with dysuria, urethral discharge, and meatal itching. Diagnosis: urine nucleic acid amplification testing (NAAT).

Synonyms:

Urethrography

Contrast imaging of urethra. Evaluates urethral strictures, trauma, anomalies.

Synonyms:

Urge Urinary Incontinence

Involuntary leakage of urine, significantly affecting psychological, social, and physical well-being. See urinary incontinence.

Synonyms:

Urgency

A sudden, compelling desire to urinate that is difficult to defer—a lower urinary tract symptom. Causes: overactive bladder (detrusor overactivity, often idiopathic), urinary tract infection (urgency + dysuria), bladder outlet obstruction (BPH), neurogenic bladder, interstitial cystitis, and pelvic floor disorders.

Synonyms:

Uric Acid Nephropathy

Acute kidney injury from uric acid crystal precipitation in tubules. Occurs in tumor lysis syndrome and severe hyperuricemia. Prevent with hydration and rasburicase. Alkalinization of urine may be harmful as uric acid precipitates at alkaline pH unlike other stone types.

Synonyms:

Uric Acid Stones

Kidney stones composed primarily of uric acid. They form more readily in acidic urine and are associated with hyperuricemia, gout, high purine intake, or chronic diarrhea. Some can dissolve when urine is alkalinized.

Synonyms:

Urinal

Male bedside container.

Synonyms:

Urinalysis

Analysis of urine. Dipstick: specific gravity, pH, leukocyte esterase (WBCs), nitrite (bacteria), protein, glucose, ketones, bilirubin, urobilinogen, blood, and hemoglobin.

Synonyms:

Urinary Bladder

A hollow, distensible muscular organ located in the pelvic cavity posterior to the pubic symphysis, serving as a reservoir for urine.

Synonyms:

Urinary Incontinence

Involuntary leakage of urine, significantly affecting psychological, social, and physical well-being.

Synonyms:

Urinary Retention

Inability to completely empty the bladder, which can be acute (sudden, painful, inability to void) or chronic (gradual, often painless, with overflow incontinence). Causes: benign prostatic hyperplasia, urethral stricture, neurogenic bladder, medications (anticholinergics), and pelvic organ prolapse.

Synonyms:

Urinary Retraining

Scheduled voiding and behavioral techniques used to improve bladder control and reduce urgency or incontinence.

Synonyms:

Urinary Tract Infection

Infection of the urinary tract, classified as lower infection such as cystitis or urethritis, or upper infection such as pyelonephritis. Symptoms vary; dysuria, frequency, urgency, fever, flank pain, or nausea may occur. *Escherichia coli* is a common cause, but organisms vary by setting and patient factors.

Synonyms:

Urinary Tract Infection in Pregnancy

A urinary infection or asymptomatic bacterial growth occurring during pregnancy. Pregnancy increases the risk of upper urinary infection, so screening and treatment follow pregnancy-specific clinical guidance.

Synonyms:

Urinary Urgency

A sudden, difficult-to-delay need to urinate. It may occur with urinary infection, bladder irritation, overactive bladder, stones, neurologic disease, or other conditions. Urgency with fever, flank pain, blood in the urine, or inability to urinate requires medical assessment.

Synonyms:

Urination

The biological process of releasing urine from the bladder through the urethra out of the body; also known as micturition.

Synonyms: micturition.

Urine Albuminuria

Abnormal urinary loss of albumin resulting from increased glomerular permeability or impaired tubular reclamation. Persistent albuminuria is independently associated with CKD progression and cardiovascular risk, even when eGFR is preserved.

Synonyms:

Urine Analysis

Laboratory examination of urine for cells, blood, proteins, glucose, microorganisms, and other substances.

Synonyms:

Urine Drug Screen

Immunoassay-based screening for common drugs of abuse in urine. Detects: amphetamines, benzodiazepines, cocaine (benzoylecgonine), opiates (morphine, codeine, heroin), oxycodone, methadone, fentanyl, barbiturates, PCP, THC (cannabinoids), and alcohol. Pros: rapid (minutes at POC), inexpensive.

Synonyms:

Urine Formation

The process by which the kidney produces urine through three steps: glomerular filtration (formation of 180 L/day ultrafiltrate), tubular reabsorption (return of 99 percent of water and most solutes), and tubular secretion (active addition of waste and ions).

Synonyms:

Urine hCG (Pregnancy Test)

Rapid point-of-care test detecting human chorionic gonadotropin in urine. Sensitivity: detects as low as 25 mIU/mL. Positive as early as 12-14 days after conception (before missed period). Results in 3-5 minutes. False negative: dilute urine, very early pregnancy, ectopic pregnancy.

Synonyms: Pregnancy Test

Urine Osmolality

Concentration of urine relative to plasma normally 50 to 1200 mOsm/kg. High greater than 500 in prerenal states reflecting intact concentrating ability. Low less than 350 indicates impaired concentrating ability in diabetes insipidus, chronic kidney disease, and excessive fluid intake. More precise than specific gravity.

Synonyms:

Urine Sediment

Microscopic examination of centrifuged urine providing diagnostic information about renal pathology. Normal findings include few RBCs, WBCs, and hyaline casts.

Synonyms:

Urine Sodium

Concentration of sodium in urine measured in mEq/L. Low less than 20 in prerenal states reflecting avid tubular reabsorption. High greater than 40 in intrinsic renal disease, diuretic use, and salt-wasting nephropathies. Should be interpreted in context of volume status, medications, and concurrent therapies.

Synonyms:

Urine Toxicology

Laboratory analysis of urine for medicines, drugs, or their metabolites. Results require interpretation because detection does not always establish impairment or the timing of exposure.

Synonyms:

Urodynamic Testing

Suite of diagnostic procedures designed to evaluate the physiological function of the lower urinary tract (bladder and urethral sphincter) during filling, storage, and emptying phases.

Synonyms:

Urodynamics

A set of tests that assess the function of the lower urinary tract (bladder and urethra).

Synonyms:

Uroflow

Measurement of the rate and pattern of urine flow during voiding.

Synonyms:

Uroflowmetry

Measurement of urine-flow rate and pattern during voiding. Results depend on voided volume, age, sex, and testing conditions; a low or abnormal flow may reflect obstruction, weak bladder contraction, or inadequate effort and requires clinical correlation.

Synonyms:

Urolithiasis

Formation of stones in the urinary tract, including the kidneys, ureters, bladder, or urethra. Stone composition varies by population and may include calcium oxalate, calcium phosphate, uric acid, struvite, or cystine.

Synonyms:

Urologic Diagnostic Yield

The proportion of urologic diagnostic procedures or tests that provide a definitive and clinically useful result.

Synonyms:

Urology

Surgical and medical specialty concerned with the study, diagnosis, and management of diseases affecting the male and female urinary tract (kidneys, ureters, urinary bladder, urethra) and the male reproductive system (prostate, testes, epididymis,

seminal vesicles, penis).

Synonyms:

Urothelial Carcinoma

Urothelial carcinoma, previously called transitional cell carcinoma, is the most common malignancy of the urinary tract, arising from the urothelium that lines the renal pelvis, ureters, bladder, and proximal urethra.

Synonyms:

Urothelium

The specialized transitional epithelium lining the renal pelvis, ureters, bladder, and part of the urethra.

Synonyms:

Urticaria

A skin reaction causing transient, itchy raised welts that change location and usually resolve within 24 hours. It may occur with angioedema, which is deeper swelling often affecting the lips, eyelids, tongue, or extremities.

Synonyms:

Urticaria multiforme

A hypersensitivity reaction in children, often triggered by infections or medications, characterised by widespread, annular or polycyclic erythematous plaques with dusky, ecchymotic, or targetoid centres and pseudovesication, differing from true urticaria by the presence of dusky discolouration and prolonged lesion duration.

Synonyms:

Urticaria Pigmentosa

A cutaneous form of mastocytosis in which excessive mast cells accumulate in the skin, producing tan or brown macules or papules that may swell and itch when rubbed. Flushing, abdominal symptoms, or systemic involvement can occur.

Synonyms:

Usher Syndrome

An inherited disorder combining sensorineural hear-

ing loss with retinitis pigmentosa, the most common cause of combined deaf-blindness. Three types are distinguished by severity and age of onset; management requires coordinated audiological, ophthalmological, and genetic care.

Synonyms:

Usual Interstitial Pneumonia

The histopathological pattern in IPF with temporal heterogeneity, fibroblast foci, and honeycombing. HRCT shows basal-predominant, subpleural reticular opacities with traction bronchiectasis.

Synonyms:

Uterine Atony

Failure of the uterus to contract adequately after delivery, resulting in postpartum hemorrhage. The most common cause of PPH. Risk factors include prolonged labor, multiple gestation, macrosomia, oxytocin augmentation, and uterine fibroids. Diagnosis is clinical: boggy, soft uterus with excessive bleeding.

Synonyms:

Uterine Balloon Tamponade

A minimally invasive technique for managing postpartum hemorrhage due to uterine atony when uterotonics fail. A balloon (Bakri Postpartum Balloon, 500-1000 mL capacity) is inserted transvaginally into the uterine cavity and inflated with saline until bleeding stops. The balloon provides mechanical compression against the uterine wall.

Synonyms:

Uterine Cancer

Cancer arising in the uterus, most commonly from the endometrium. Abnormal vaginal bleeding, bleeding after menopause, pelvic pain, or unusual discharge requires evaluation; early diagnosis often permits effective treatment.

Synonyms:

Uterine Fibroid (Leiomyoma)

A benign tumor arising from the smooth muscle of the uterus. Fibroids may be submucosal, intramu-

ral, or subserosal and may cause heavy menstrual bleeding, pelvic pressure, pain, urinary symptoms, or reproductive problems.

Synonyms: Leiomyoma

Uterine Fibroids

Benign tumors of uterine smooth muscle, also called leiomyomas. They may cause heavy menstrual bleeding, pelvic pressure, pain, infertility, or no symptoms.

Synonyms: leiomyomas.

Uterine Hemorrhage

Heavy or abnormal bleeding from the uterus, occurring during pregnancy, after childbirth, or at other times. Causes include pregnancy complications, fibroids, hormonal disorders, and malignancy; severe bleeding with dizziness or weakness is an emergency.

Synonyms:

Uterine Inversion

A rare but life-threatening obstetric emergency where the uterus turns inside out, protruding through the cervix or vaginal introitus. Occurs in 1:2000-1:20,000 deliveries. Causes: fundal pressure, excessive cord traction (especially with fundal placenta), uterine atony, and fundal fibroids.

Synonyms:

Uterine perforation

A full-thickness breach of the uterine wall, most commonly occurring during instrumentation such as dilation and curettage or hysteroscopy, potentially causing hemorrhage and requiring surgical repair.

Synonyms:

Uterine Prolapse

Descent of the uterus toward or through the vaginal opening because the supporting pelvic floor and ligaments have weakened. Risk factors include childbirth, aging, obesity, and conditions that increase chronic pressure in the abdomen.

Synonyms:

Uterine Rupture

A full-thickness tear through the uterine wall, potentially life-threatening to both mother and fetus. Risk factors include prior caesarean section (especially classical incision), oxytocin augmentation, and operative vaginal delivery. Presents with sudden abdominal pain, loss of fetal heart rate, and maternal hemorrhage.

Synonyms:

Uterine Tachysystole

More than five uterine contractions in 10 minutes averaged over 30 minutes, whether or not accompanied by fetal heart-rate abnormalities. It can reduce uteroplacental perfusion, particularly when caused by oxytocin or prostaglandins.

Synonyms:

Uterotonic

A medication that stimulates uterine contraction, used for induction/augmentation of labor, prevention and treatment of postpartum hemorrhage, and medical termination of pregnancy.

Synonyms:

Uterus

Hollow muscular organ in the pelvis between the bladder and rectum, approximately 7.5 cm long in adult females, responsible for menstruation, implantation, and fetal development during pregnancy.

Synonyms:

UTI

Infection of the urinary tract, classified as lower (cystitis, urethritis) or upper (pyelonephritis). See Urinary Tract Infection.

Synonyms:

UV Light

Ultraviolet radiation, an invisible part of sunlight or artificial light that can affect the skin and eyes and may cause sunburn, aging, or skin cancer.

Synonyms:

Uvea

The vascular middle layer of the eye, consisting of the iris, ciliary body, and choroid. It helps regulate light entry, lens focus, and blood supply to the eye.

Synonyms:

Uveal melanoma

The most common primary intraocular malignancy in adults, arising from melanocytes within the uveal tract (choroid, ciliary body, or iris), presenting with visual symptoms, a pigmented intraocular mass, or incidental finding on examination.

Synonyms:

Uveitis

Inflammation inside the eye involving the uveal tract or adjacent tissues. It may cause pain, redness, light sensitivity, floaters, or reduced vision; causes include infection, autoimmune disease, and other inflammatory conditions.

Synonyms:

Uveoparotid fever

A manifestation of sarcoidosis characterized by the triad of bilateral parotid gland enlargement, anterior uveitis, and fever, sometimes associated with facial nerve palsy. It reflects granulomatous inflammation and is treated with systemic corticosteroids and potentially disease-modifying agents.

Synonyms:

Uvula

A small, fleshy flap of tissue that hangs from the back of the throat over the root of the tongue.

Synonyms:

Uvulitis

Inflammation and swelling of the uvula, often caused by infection, trauma, allergy, dehydration, or irritation. It may cause throat pain, difficulty swallowing, gagging, or a foreign-body sensation; marked swelling with breathing difficulty requires urgent assessment.

Synonyms:

Vibrio Infection

Infection caused by *Vibrio* bacteria, acquired through contaminated seafood or exposure of wounds to warm seawater. It may cause watery diarrhea, wound infection, or rapidly progressive sepsis, especially in people with liver disease or impaired immunity. Severe wound pain, blistering, fever, or shock requires emergency treatment.

Synonyms:

VOR Reflex

The vestibulo-ocular reflex stabilizes vision by producing eye movements opposite to head movement. Dysfunction can cause oscillopsia, vertigo, blurred vision, or imbalance and may result from inner-ear or brainstem disease. Vestibular and neurologic assessment can identify the cause.

Synonyms:

Ureteral Calculi

Stones that form in or pass through a ureter, the tube carrying urine from a kidney to the bladder.

Synonyms:

Urea

The principal nitrogen-containing waste product of protein metabolism, formed in the liver and excreted mainly by the kidneys.

Synonyms:

Urinary Frequency

The need to urinate more often than usual, which may result from infection, bladder irritation, increased urine production, or other urinary disorders.

Synonyms:

Urinary Lithiasis

The formation or presence of stones anywhere in the urinary tract, including the kidneys, ureters, bladder, or urethra.

Synonyms:

Urinary Stasis

Slowing or stopping of normal urine flow, which can promote urinary infection, stone formation, or

obstruction-related kidney injury.

Synonyms:

Urinometer

A hydrometer used to measure the specific gravity of urine.

Synonyms:

Urogenital Tract

The combined urinary and reproductive organs and passages, which develop from related embryologic structures.

Synonyms:

Uterine Fibroid Embolization

A minimally invasive procedure that blocks the arteries supplying uterine fibroids, causing them to shrink.

Synonyms:

Uterine Tube

A paired muscular tube that transports the oocyte from the ovary toward the uterus and is the usual site of fertilization.

Synonyms:

Ulnar Wrist Pain

Pain on the side of the wrist nearest the little finger, often involving the ulna or nearby tendons and ligaments.

Synonyms:

Undescended Testicle

A testicle that has not moved into the scrotum before birth.

Synonyms:

Undifferentiated Pleomorphic Sarcoma

An uncommon aggressive cancer of soft tissue or bone whose cells have no clearly identifiable line of differentiation.

Synonyms:

Urinary Catheter

A hollow, flexible tube inserted through the urethra into the bladder to drain urine; it may be used intermittently or left in place.

Synonyms:

Upper Respiratory Infection

An infection of the nose, sinuses, pharynx, or larynx, most often caused by a virus and producing symptoms such as congestion, sore throat, cough, or runny nose.

Synonyms:

Ulnar Nerve Entrapment

Compression or irritation of the ulnar nerve, commonly at the elbow or wrist, causing numbness or tingling in the ring and little fingers and sometimes weakness of the hand.

Synonyms:

Ulcerative Proctitis

Inflammation and ulceration limited to the lining of the rectum, often causing rectal bleeding, urgency, tenesmus, mucus, and diarrhea.

Synonyms:

Ulcerative Keratitis

An ulcerative infection or inflammatory defect of the cornea that can cause pain, redness, photophobia, and impaired vision and may threaten sight if untreated.

Synonyms:

Urticarial Vasculitis

Inflammation of small blood vessels associated with hive-like lesions that often last longer than ordinary urticaria and may burn, bruise, or leave residual discoloration.

Synonyms:

Ulnar Paradox

The clinical observation that a lesion of the ulnar nerve at the wrist may cause more clawing of the fingers than a lesion higher in the forearm, because the ulnar-innervated finger flexors remain intact.

Synonyms:

Uraemic Syndrome

The collection of symptoms and biochemical abnormalities caused by severe accumulation of uraemic waste products in advanced kidney failure.

Synonyms:

Urethral Syndrome

Urinary frequency, urgency, dysuria, or discomfort without a clear bacterial urinary-tract infection; causes may include irritation, pelvic-floor dysfunction, or inflammation.

Synonyms:

Urethroplasty

Surgical reconstruction or widening of the urethra, most commonly to treat a urethral stricture.

Synonyms:

Urethroscopy

Endoscopic examination of the urethra using a urethroscope, sometimes combined with treatment of a stricture or other lesion.

Synonyms:

Urinary Casts

Cylindrical structures formed in renal tubules and passed in urine; their type can help identify kidney disease, such as glomerular inflammation or tubular injury.

Synonyms:

Urobilinogen

A colourless product formed in the intestine from bilirubin and partly reabsorbed and excreted in urine; abnormal levels may provide clues to liver disease or haemolysis.

Synonyms:

Utricle

One of the otolith organs of the inner ear, detecting horizontal linear acceleration and head position relative to gravity.

Synonyms:

Uvulopalatopharyngoplasty (UPPP)

An operation that removes or reshapes selected tissues of the soft palate, uvula, and throat to enlarge the upper airway, sometimes used for obstructive sleep apnoea.

Synonyms: UPPP

V

Uveal Disease

A disorder affecting the uvea, the pigmented middle layer of the eye containing the iris, ciliary body, and choroid. Inflammation, infection, tumors, or vascular disease may cause pain, floaters, light sensitivity, or vision loss and require ophthalmic assessment.

Synonyms:

Vacuum Erection Devices

Pumps that draw blood into the penis to produce an erection. **Synonyms:** Vacuum erection pump

Variant Angina Pectoris

Chest pain caused by temporary coronary-artery spasm, often occurring at rest. **Synonyms:** Prinzmetal angina; vasospastic angina

Vascular

Relating to blood vessels. **Synonyms:**

Vascular Surgery

Surgery that repairs or reroutes blood vessels to improve circulation. **Synonyms:**

Vasoconstrictor

A substance that narrows blood vessels. **Synonyms:**

Vasodilator

A substance that widens blood vessels. **Synonyms:**

Vasospasm

Sudden involuntary narrowing caused by contraction of a blood vessel. **Synonyms:**

Venous

Relating to veins. **Synonyms:**

Venous Leak

Inadequate retention of blood in the penis during erection because blood escapes through veins. **Synonyms:** Veno-occlusive dysfunction

Ventricular Myocardium

Heart muscle forming the walls of the ventricles. **Synonyms:**

Ventricular Rupture

A tear in a ventricular wall, often a life-threatening complication of myocardial infarction. **Synonyms:**

Venules

Very small veins that collect blood from capillaries. **Synonyms:**

Vertebral Artery

An artery ascending through the neck that supplies blood to the brainstem and posterior brain. **Synonyms:**

Very Low-Calorie Diet

A medically supervised diet providing about 800 or fewer calories per day. **Synonyms:** VLCD

Very-Low-Density Lipoprotein

A lipoprotein that transports liver-produced triglycerides and can become LDL. **Synonyms:** VLDL

Vestibular System

Inner-ear and brain structures responsible for bal-

ance and spatial orientation. **Synonyms:**

Viral

Caused by or relating to a virus. **Synonyms:**

Virtues

Positive character qualities valued across cultures, such as courage, justice, and wisdom. **Synonyms:**

Virulent

Highly harmful, severe, or capable of causing serious disease. **Synonyms:**

Visualized Laser-Assisted Prostatectomy

Laser prostate surgery performed with direct visualization to remove obstructing tissue. **Synonyms:** VLAP

Vitamin D

A hormone-like nutrient important for calcium absorption and bone health. **Synonyms:**

VO2 Max

The maximum rate at which the body can use oxygen during intense exercise. **Synonyms:** Maximal oxygen consumption

Volatile Oils

Plant oils containing compounds that evaporate readily at room temperature. **Synonyms:** Essential oils

VSD

Ventricular septal defect, a hole in the wall separating the heart's ventricles. **Synonyms:** Ventricular septal defect

Vulnerable

A substance traditionally believed to promote wound healing. **Synonyms:**

Vaccination

Administration of a vaccine to stimulate immune response and provide protection against infectious disease. Types: live attenuated, inactivated, subunit,

mRNA, viral vector. Schedule varies by country. Herd immunity achieved when sufficient proportion immune.

Synonyms:

Vaccination Schedule

A time-based plan for administering vaccines according to age, previous doses, medical conditions, exposure risks, and public-health guidance. Schedules vary by country and are updated as recommendations change.

Synonyms:

Vaccine

A biological preparation that stimulates an immune response to a pathogen or its components. Vaccines are used mainly to prevent infection or reduce disease severity; a limited number are used in therapeutic settings.

Synonyms:

Vaccine Immunology

The study of how vaccines stimulate innate and adaptive immune responses. Vaccine types include live attenuated, inactivated, subunit, conjugate, toxoid, viral-vector, and nucleic-acid vaccines; their immune responses, precautions, and schedules vary.

Synonyms:

Vaccines and Immunizations

Biological preparations that stimulate the immune system to develop protection against specific infectious diseases. By exposing the body to harmless components of a pathogen, vaccines enable the immune system to generate memory B and T cells that can mount a rapid response upon future exposure.

Synonyms:

VACTERL Association

A pattern of congenital abnormalities involving vertebral, anal, cardiac, tracheoesophageal, renal, and limb development. The diagnosis is considered when several component abnormalities occur together and other syndromes have been excluded.

Synonyms:

Vacuum Delivery

Assisted vaginal delivery using a vacuum extractor (cup applied to the fetal scalp with negative pressure) to expedite delivery for prolonged second stage, fetal distress, or maternal indications.

Synonyms:

Vacuum-Assisted Delivery

Operative vaginal delivery using a vacuum extractor applied to the fetal scalp. Types: soft cup (Kiwi OmniCup, Mityvac, for outlet and low deliveries) and rigid cup (metal Kiwi, for posterior positions and midpelvic deliveries).

Synonyms:

Vagina

Muscular fibromembranous canal extending from the cervix to the vulva, approximately 7-9 cm long in adult females. Functions include receiving the penis during intercourse, serving as the birth canal, and channeling menstrual flow.

Synonyms:

Vaginal Atresia

Congenital absence or complete obstruction of the vaginal canal. It may cause absent menstrual flow, cyclic pelvic pain, or difficulty with sexual activity and requires specialist evaluation.

Synonyms:

Vaginal Birth After Cesarean

Vaginal delivery after a previous cesarean birth. The likelihood of success and the risk of uterine rupture depend on the prior uterine incision, number and indications of previous cesareans, medical and obstetric factors, and the resources available for emergency care.

Synonyms:

Vaginal Cancer

A rare gynecologic malignancy, most commonly squamous cell carcinoma linked to human papillomavirus. Treatment depends on stage and includes surgery, radiation, and chemotherapy.

Synonyms:

Vaginal Delivery (Spontaneous)

The spontaneous passage of the fetus through the birth canal without the use of operative instruments (vacuum or forceps). Typically occurs in the second stage of labor with maternal pushing.

Synonyms: Spontaneous

Vaginal Dryness

Reduced vaginal lubrication, commonly associated with menopause, breastfeeding, hormonal changes, medications, or irritation. It may cause discomfort, itching, painful intercourse, or minor bleeding.

Synonyms:

Vaginal Dryness and Atrophy (Genitourinary Syndrome of Menopause)

Vaginal dryness and atrophy, collectively termed genitourinary syndrome of menopause, result from declining estrogen levels that cause thinning, drying, and loss of elasticity of the vaginal tissues. Symptoms include vaginal dryness, irritation, burning, dyspareunia, and urinary symptoms such as frequency and recurrent infections.

Synonyms: Genitourinary Syndrome of Menopause

Vaginal Foreign Body

An object retained in the vagina, most often a tampon or other inserted material. It may cause discharge, odor, bleeding, pain, or infection and should be removed safely with examination when necessary.

Synonyms:

Vaginal Intercourse

The insertion of the penis into the vagina for sexual pleasure or reproduction. The most common form of sexual intercourse. Vaginal intercourse can lead to pregnancy if sperm are deposited in the vagina.

Synonyms:

Vaginal Itching

Itching or irritation of the vulva or vagina caused by candidiasis, bacterial vaginosis, sexually transmitted infections, dermatitis, hormonal changes, or other conditions. It may occur with discharge, odor,

soreness, or burning; recurrent or unexplained symptoms require examination and appropriate testing rather than self-diagnosis.

Synonyms:

Vaginal Microbiome

The community of microorganisms living in the vagina, commonly dominated by *Lactobacillus* species that help maintain an acidic environment. Changes in this community may contribute to bacterial vaginosis, candidiasis, or other symptoms.

Synonyms:

Vaginal Stenosis

Narrowing or shortening of the vaginal canal, which may result from surgery, radiation, scarring, inflammation, trauma, or congenital development. It can cause pain, difficult examination, or difficulty with penetration.

Synonyms:

Vaginal Trauma

Injury to the vaginal tissues caused by childbirth, sexual activity, foreign objects, procedures, or blunt or penetrating trauma. Bleeding, pain, swelling, or urinary symptoms require assessment; severe bleeding or suspected deep injury is urgent.

Synonyms:

Vaginal Hemorrhage

Heavy or clinically significant bleeding from the vagina. Causes include childbirth, pregnancy complications, trauma, infection, structural disease, hormonal disorders, and gynecologic malignancy; severe or pregnancy-related bleeding requires urgent evaluation.

Synonyms:

Vaginismus

Involuntary spasms of the vaginal muscles.

Synonyms:

Vaginitis

Inflammation of the vaginal mucosa, one of the most common gynecologic complaints.

Synonyms:

Vaginospasm

Involuntary contraction of the pelvic-floor muscles surrounding the vagina, causing pain or difficulty with vaginal penetration. It may be associated with fear of pain, prior trauma, pelvic-floor dysfunction, infection, hormonal factors, or other genitopelvic pain conditions.

Synonyms:

Vagus Nerve (Cranial Nerve X)

The tenth cranial nerve (CN X), the longest and most widely distributed cranial nerve in the body. It contains sensory, motor, and parasympathetic fibers, exiting the skull via the jugular foramen.

Synonyms: Cranial Nerve X

Vagus Nerve Stimulation

A neuromodulation treatment involving electrical stimulation of the left vagus nerve via an implanted device. It is FDA-approved for treatment-resistant depression and epilepsy. It requires surgical implantation and delivers intermittent stimulation. Improvement may take months to develop.

Synonyms:

Valgus/Varus Stress Test

Examination of a joint by applying inward or outward force to assess a collateral ligament. At the knee, valgus stress tests the medial collateral ligament and varus stress tests the lateral collateral ligament.

Synonyms:

Valinemia

A rare inherited disorder of branched-chain amino-acid metabolism causing elevated plasma valine. It may present with developmental delay, feeding difficulty, hypotonia, or neurological symptoms, although some individuals are minimally affected.

Synonyms:

Valley Fever

The common name for coccidioidomycosis, a fun-

gal infection caused by *Coccidioides* species and acquired by inhaling airborne spores from soil. It usually causes a mild respiratory illness but can disseminate to skin, bone, joints, or meninges, especially in people at higher risk.

Synonyms:

Valproate (Sodium Valproate)

Valproate is a broad-spectrum antiseizure medicine used for several generalized and focal seizure disorders and for selected mood disorders. Choice requires consideration of age, pregnancy potential, liver disease, interactions, and other safety risks.

Synonyms: Sodium Valproate

Valsalva's Manoeuvre

Forced expiratory effort against a closed airway (glottis closed or mouth and nose pinched shut), typically performed by bearing down as if straining during a bowel movement. The manoeuvre has four phases: Phase I (onset of straining): increased intrathoracic pressure compresses the aorta, causing a transient rise in blood pressure.

Synonyms:

Valvular Heart Disease

Valvular heart disease involves dysfunction of one or more heart valves, leading to stenosis, regurgitation, or a combination of both. The most common causes are degenerative calcification of aortic and mitral valves, rheumatic heart disease, infective endocarditis, and ischemic papillary muscle dysfunction.

Synonyms:

Vancomycin-resistant Enterococcus

Enterococcus bacteria that are resistant to vancomycin, usually because of altered cell-wall precursors. VRE can cause healthcare-associated urinary, bloodstream, wound, or other infections and may require susceptibility-guided treatment.

Synonyms:

Variable Decelerations

Abrupt decreases in fetal heart rate that vary in timing, shape, and duration, commonly caused by

umbilical-cord compression. Their significance depends on frequency, duration, associated baseline changes, variability, and the clinical setting.

Synonyms:

Variceal Hemorrhage

Life-threatening complication of portal hypertension involving rupture of dilated esophageal or gastric varices. The risk is determined by variceal size, red color signs, liver disease severity, and portal hypertension degree.

Synonyms:

Varicella

A primary infection with varicella-zoster virus that causes fever and a generalized itchy rash. See Chickenpox.

Synonyms:

Varicella Vaccine

A live attenuated vaccine that prevents or reduces the severity of chickenpox. The number and timing of doses depend on age, vaccination history, immune status, pregnancy, and local recommendations. It is generally avoided during pregnancy and in people with certain immune deficiencies.

Synonyms:

Varicella-zoster virus

A herpesvirus that causes chickenpox (varicella) and shingles (herpes zoster). VZV establishes latent infections in dorsal root ganglia and can reactivate decades later. Chickenpox is highly contagious and typically occurs in childhood. Reactivation as shingles causes painful dermatomal vesicular rash.

Synonyms:

Varicocele

Abnormal dilation and tortuosity of the pampiniform venous plexus within the spermatic cord, resulting from incompetent or absent venous valves.

Synonyms:

Varicose Ulcer

Impaired venous return from the lower extremities

due to venous valve incompetence or obstruction. See chronic venous insufficiency.

Synonyms:

Varicose Veins

Dilated, tortuous superficial veins, most commonly in the lower extremities. Caused by venous valve incompetence leading to venous reflux. Risk factors: family history, prolonged standing, obesity, pregnancy, and older age. Symptoms: leg heaviness, swelling, aching. Complications: skin changes, ulceration, thrombophlebitis.

Synonyms:

Variegate Porphyria

An inherited hepatic porphyria caused by reduced protoporphyrinogen oxidase activity. It can cause acute neurovisceral attacks with abdominal pain and neuropathy and/or photosensitive blistering skin disease.

Synonyms:

Variola

A highly contagious and deadly disease caused by variola virus, eradicated globally by 1980 through vaccination. See Smallpox.

Synonyms:

Vas Deferens

Muscular duct (approximately 45 cm long) transporting sperm from the epididymal tail to the ejaculatory duct. It ascends through the spermatic cord, passes through the inguinal canal, enters the pelvis, crosses over the ureter, and joins the seminal vesicle duct to form the ejaculatory duct (in the prostate).

Synonyms:

Vasa Previa

Fetal blood vessels traverse the membranes over or near the internal cervical os without protection from placental tissue or the umbilical cord. Rupture of membranes can cause rapid fetal exsanguination, so antenatal diagnosis and planned cesarean delivery are important.

Synonyms:

Vascular Access

A route into the bloodstream for treatment or monitoring. Hemodialysis access may be an arteriovenous fistula, arteriovenous graft, or central venous catheter; the choice depends on vascular anatomy, urgency, expected duration, and individual risks.

Synonyms:

Vascular Access for Hemodialysis

A surgically created or catheter-based route that permits high-flow blood removal and return during hemodialysis. Arteriovenous fistulae are generally preferred when feasible, followed by grafts; central venous catheters have higher infection and thrombosis risks.

Synonyms:

Vascular Dementia

Cognitive impairment caused by cerebrovascular disease, such as strokes or chronic small-vessel injury. Symptoms may develop suddenly or gradually and can include problems with attention, executive function, memory, or walking. Management addresses the underlying vascular risks and functional needs.

Synonyms:

Vascular Diagnostic Yield

The proportion of vascular diagnostic procedures or tests that provide a clinically useful result.

Synonyms:

Vascular Graft

Synthetic or biologic conduit for vascular reconstruction. PTFE, Dacron, saphenous vein.

Synonyms:

Vascular Graft Patency

Continued openness and functional blood flow through a vascular graft or bypass. Patency is monitored clinically and with duplex or other imaging because thrombosis, stenosis, infection, intimal hyperplasia, and anastomotic problems can cause failure.

Synonyms:

Vascular Imaging

Techniques for visualizing blood vessels: duplex ultrasound, CT angiography, MR angiography, conventional angiography.

Synonyms:

Vascular Malformation

Abnormal blood vessel development. Arteriovenous malformation, venous malformation, lymphatic malformation.

Synonyms:

Vascular Ring

A congenital abnormality of the aortic arch or its branches that encircles and may compress the trachea, esophagus, or both. Symptoms include stridor, wheezing, recurrent respiratory infection, dysphagia, feeding difficulty, or respiratory distress.

Synonyms:

Vascular Trauma

Injury to an artery or vein from blunt, penetrating, iatrogenic, or crush mechanisms. Assessment prioritizes hemorrhage control, distal perfusion, ischemia, expanding hematoma, bruit, thrill, and associated nerve or bone injury.

Synonyms:

Vascularity

The amount and distribution of blood vessels supplying a tissue or lesion.

Synonyms:

Vasculitis

Inflammation of blood vessels causing tissue ischemia and necrosis. Classification by vessel size. Large vessel: giant cell arteritis, Takayasu arteritis. Medium vessel: polyarteritis nodosa (PAN), Kawasaki disease.

Synonyms:

Vasculitis (Systemic)

Inflammation of blood vessels that may involve large, medium, or small vessels and impair blood flow or cause tissue injury. Examples include ANCA-

associated vasculitis and IgA vasculitis.

Synonyms: Systemic

Vasectomy

Minor surgical procedure for permanent male contraception involving surgical interruption, occlusion, or excision of a segment of both vasa deferentia, preventing spermatozoa from entering the ejaculate. Performed under local anesthesia using traditional incisional or no-scalpel vasectomy (NSV) techniques.

Synonyms:

Vasoconstriction

Narrowing of a blood vessel caused by contraction of its muscular wall.

Synonyms:

Vasodilation

The widening of blood vessels during inflammation, resulting in increased blood flow to the affected area. This process is mediated primarily by histamine released from mast cell granules acting on H1 receptors, nitric oxide produced by endothelial nitric oxide synthase, and prostaglandins particularly PGE2.

Synonyms:

Vasomotor Rhinitis

Nonallergic inflammation of the nasal lining causing congestion, runny nose, or sneezing, often triggered by odors, temperature changes, or irritants.

Synonyms:

Vasopressin (Antidiuretic Hormone, ADH)

A hormone that increases water reabsorption in the kidney and can constrict blood vessels. It is released from the posterior pituitary.

Synonyms: Antidiuretic Hormone, ADH

Vasopressors in Anesthesia

Medicines that increase vascular tone or cardiac output to support blood pressure during anesthesia or critical illness. The choice and dose depend on the cause of hypotension, heart rate, cardiac function,

and local protocol; monitoring is required.

Synonyms:

Vasovagal Syncope

Reflex syncope mediated by increased vagal tone and withdrawal of sympathetic activity, causing bradycardia and/or vasodilation resulting in transient cerebral hypoperfusion. Triggers: prolonged standing, heat, pain, emotional stress. Preceded by prodrome (lightheadedness, nausea, diaphoresis, visual tunneling).

Synonyms:

Vaughan Williams Classification

The Vaughan Williams classification categorizes antiarrhythmic drugs into four classes based on their primary mechanism of action.

Synonyms:

VEAL CHOP Mnemonic

A memory aid for interpreting fetal heart rate patterns. VEAL: Variable decelerations Cord compression, Early decelerations Head compression, Accelerations OK (fetal well-being), Late decelerations Placental insufficiency.

Synonyms:

Vector

A living carrier, commonly an arthropod, that transmits an infectious agent between hosts. Biological vectors support replication or development of the agent; mechanical vectors transfer it without such biologic change.

Synonyms:

Vector Control

Reduction of vector populations. Examples: insecticides, larvicides, environmental modification, personal protection.

Synonyms:

Vector-Borne Disease

Disease transmitted by vector (insect, tick). Examples: malaria, dengue, Lyme disease.

Synonyms:

Vector-borne diseases

Diseases transmitted by arthropod vectors including mosquitoes, ticks, fleas, and sandflies. Major vector-borne diseases include malaria, dengue, Zika, chikungunya, Lyme disease, and leishmaniasis. Prevention through vector control, personal protection, and chemoprophylaxis is essential.

Synonyms:

Vegan Diet

Excludes all animal products. Risk of deficiencies: vitamin B12, iron, calcium, vitamin D, omega-3, zinc, iodine. Requires planning or supplementation. Associated with lower BMI, reduced cardiovascular risk.

Synonyms:

Vegetarian Diet

Excludes meat, fish, poultry. Lacto-ovo includes dairy and eggs. Vegan excludes all animal products. Nutrient adequacy requires attention.

Synonyms:

Vegetation

A vegetation is a mass composed of platelets, fibrin, and microorganisms that forms on a heart valve or endocardial surface in the setting of infective endocarditis. The vegetation typically attaches to the valve leaflet on the low-pressure side and may progressively destroy the underlying valve tissue, causing valvular regurgitation.

Synonyms:

Vein

A blood vessel that carries deoxygenated blood toward the heart (except pulmonary veins, which carry oxygenated blood). Veins have thinner walls and larger lumens than arteries, with less smooth muscle and elastic tissue.

Synonyms:

Vein-graft aneurysms

Focal dilation of a venous bypass graft, most commonly a saphenous vein graft used in coronary artery bypass surgery. Rare but may cause graft

thrombosis, distal embolization, compression of adjacent structures, or rupture. Diagnosis: coronary angiography or CT angiography. Treatment: re-intervention or medical management.

Synonyms:

Vena Cava

The two largest systemic veins returning deoxygenated blood to the right atrium. Superior Vena Cava (SVC): formed by brachiocephalic veins, drains head, neck, upper limbs, thorax (no valves). Inferior Vena Cava (IVC): formed by common iliac veins at L5, drains abdomen, pelvis, lower limbs (receives hepatic, renal, gonadal, lumbar veins).

Synonyms:

Venereal Diseases

Sexually transmitted infections are infections passed from one person to another through sexual contact, including vaginal, anal, and oral sex. See Sexually Transmitted Infections (STIs).

Synonyms:

Venesection (Phlebotomy)

The controlled removal of blood from a vein for therapeutic or diagnostic purposes.

Synonyms: Phlebotomy

Venipuncture

Puncture of a vein to obtain blood specimens or administer IV therapy. Common sites: median cubital vein (most common), cephalic vein, basilic vein, and dorsal hand veins.

Synonyms:

Venography

Imaging of veins, usually after contrast material is administered, to assess venous anatomy, obstruction, thrombosis, or malformation.

Synonyms:

Venom

A biological poison produced by a microorganism, plant, or animal that damages host tissues at low concentrations. See toxin.

Synonyms:

Venomous Bite

A bite that injects venom from an animal such as a snake, spider, or arthropod. Effects range from local pain and swelling to bleeding, paralysis, or systemic toxicity.

Synonyms:

Venous Insufficiency

Impaired venous return from the lower extremities due to venous valve incompetence or obstruction. See chronic venous insufficiency.

Synonyms:

Venous Stasis Ulcer

A chronic leg wound caused by venous hypertension and chronic venous insufficiency. It often occurs near the ankle and may be accompanied by edema, varicose veins, skin darkening, and lipodermatosclerosis.

Synonyms:

Venous Thromboembolism in Pregnancy

Pregnancy increases the risk of VTE (DVT and PE) by 5-10 fold due to a hypercoagulable state (increased fibrinogen, factors VII-XII, vWF, decreased protein S, and venous stasis from the gravid uterus).

Synonyms:

Venous Thromboembolism Prophylaxis

Measures used to reduce perioperative deep-vein thrombosis and pulmonary embolism, including early mobilization, mechanical compression, and pharmacologic anticoagulation when bleeding risk permits.

Synonyms:

Venous Thrombosis

The formation of a blood clot (thrombus) within a vein, most commonly in the deep veins of the lower extremities (deep vein thrombosis, DVT).

Synonyms:

Venous Ulcer

A chronic wound caused by impaired venous drainage, usually occurring near the ankle in a limb with chronic venous insufficiency.

Synonyms:

Ventilation-Perfusion Scan

Lung imaging assessing ventilation and perfusion. Mismatch indicates pulmonary embolism. Alternative to CTPA in renal impairment or contrast allergy.

Synonyms:

Ventilation-Perfusion Mismatch

Unequal matching of air reaching the alveoli and blood reaching the pulmonary capillaries. Low or high regional ratios can impair oxygen exchange and occur in conditions such as COPD, pneumonia, or pulmonary embolism.

Synonyms:

Ventilation-Perfusion Ratio

The relationship between alveolar ventilation and pulmonary capillary perfusion. Regional mismatch is a major cause of impaired oxygenation; low V/Q produces venous admixture, while high V/Q reflects wasted ventilation.

Synonyms:

Ventilation/Perfusion Scan

Pulmonary embolism diagnosis. Ventilation: inhaled Tc-99m DTPA aerosol. Perfusion: injected Tc-99m MAA. Mismatch (perfusion defect with preserved ventilation) suggests PE. High single-photon emission computed tomography (SPECT) sensitivity.

Synonyms:

Ventilator

Mechanical device providing ventilatory support. Modes: assist-control, SIMV, CPAP, PRVC. Parameters: tidal volume, respiratory rate, FiO₂, PEEP.

Synonyms:

Ventilator-Associated Pneumonia

Pneumonia developing after at least 48 hours of mechanical ventilation. Diagnosis is based on clinical findings and respiratory evaluation; cultures may help identify the organism but are not interpreted in isolation.

Synonyms:

Ventilator-Induced Lung Injury

Lung injury caused or amplified by mechanical ventilation, including volutrauma, barotrauma, atelectrauma, and biotrauma. Lung-protective ventilation limits tidal volume and excessive airway pressures while maintaining appropriate oxygenation and carbon-dioxide targets.

Synonyms:

Ventral

Relating to the belly or front side of the body; synonym for anterior in human anatomy.

Synonyms:

Ventricle

One of the two lower, thicker-walled chambers of the heart that pump blood out of the heart. The right ventricle pumps deoxygenated blood into the pulmonary artery (low-pressure system); the left ventricle pumps oxygenated blood into the aorta (high-pressure system, generating systemic blood pressure).

Synonyms:

Ventricle (Brain)

The interconnected system of fluid-filled cavities within the brain producing and containing cerebrospinal fluid: two lateral ventricles (cerebrum), third ventricle (diencephalon), and fourth ventricle (pons/medulla, continuous with the central canal).

Synonyms: Brain

Ventricular Arrhythmia

An abnormal heart rhythm arising from the ventricles. It may cause palpitations, dizziness, fainting, chest discomfort, or sudden cardiac arrest; fainting or severe symptoms require emergency care.

Synonyms:

Ventricular Assist Device

A mechanical pump supporting circulation in advanced heart failure. Types include left-, right-, and biventricular devices. Uses may include temporary support, a bridge to transplantation, or long-term therapy; complications include bleeding, infection, stroke, and pump thrombosis.

Synonyms:

Ventricular Fibrillation

Chaotic electrical activity in ventricles, causing no cardiac output. Immediate defibrillation is treatment. Causes: coronary artery disease, cardiomyopathy, electrolyte disturbances, drug toxicity. Post-resuscitation care: targeted temperature management, coronary angiography, ICU admission.

Synonyms:

Ventricular Septal Defect

An opening in the wall between the ventricles that can allow blood to flow from the left ventricle to the right. The effects depend on the size and location of the defect and may range from no symptoms to heart failure or pulmonary vascular disease.

Synonyms:

Ventricular Tachycardia

A wide-complex tachycardia (QRS >0.12 s) originating from the ventricles, with a rate of 100-250 bpm. Monomorphic VT has uniform QRS complexes; polymorphic VT has varying QRS morphology. VT is life-threatening and may degenerate to ventricular fibrillation.

Synonyms:

Ventriculoatrial

Relating to or connecting a ventricle of the brain or heart with an atrium; often describing a cerebrospinal-fluid shunt to the right atrium.

Synonyms:

Ventriculography

Imaging ventricular function. Radionuclide ven-

triculography (MUGA scan) accurately measures ejection fraction. Cardiac MRI also accurate.

Synonyms:

Ventriculoperitoneal Shunt

A surgically implanted system that drains cerebrospinal fluid from a brain ventricle into the abdominal cavity, where the fluid can be absorbed.

Synonyms:

Venturi Mask

Precise FiO₂ delivery. Color-coded adapters.

Synonyms:

Venule

A small vessel that drains blood from capillary beds into veins. Postcapillary venules are important sites for leukocyte migration and inflammatory fluid exchange.

Synonyms:

Vernal conjunctivitis

A bilateral, recurrent, allergic conjunctivitis affecting children and young adults, typically occurring in spring and summer. It presents with intense ocular itching, tearing, photophobia, and mucous discharge. Palpable cobblestone papillae on the upper tarsal conjunctiva are characteristic. It is associated with atopy and elevated IgE.

Synonyms:

Vernal keratoconjunctivitis

A recurrent allergic inflammation of the conjunctiva and cornea, usually affecting children or adolescents and causing itching, redness, and light sensitivity.

Synonyms:

Verruca (Wart)

Benign epidermal hyperplasia caused by human papillomavirus (HPV). Common warts (verruca vulgaris): rough papules on hands/fingers. Plantar warts: painful lesions on soles, grow inward due to pressure. Flat warts (verruca plana): smooth, flat-topped papules on face, hands, legs. Filiform warts: finger-like projections, often on face.

Synonyms: Wart

Verruciform Xanthoma

A rare benign lesion characterized by a verrucous epithelial surface with lipid-laden macrophages in the underlying connective tissue. It most often occurs in oral or genital mucosa and may resemble a wart or malignant lesion clinically.

Synonyms:

Verrucous carcinoma

A low-grade, well-differentiated variant of squamous cell carcinoma with a warty, exophytic appearance. It is locally invasive but rarely metastasizes, commonly affecting the oral cavity, skin, or genitalia.

Synonyms:

Vertebra

The individual bone of the vertebral column (33 vertebrae: 7 cervical, 12 thoracic, 5 lumbar, 5 sacral fused, 4 coccygeal). Parts: vertebral body, vertebral arch (pedicles, laminae), spinous and transverse processes, articular processes/facets, and vertebral foramen (spinal canal).

Synonyms:

Vertebral Canal

The bony canal formed by the vertebrae that encloses and protects the spinal cord.

Synonyms:

Vertebral Column

33 vertebrae: 7 cervical, 12 thoracic, 5 lumbar, 5 fused sacral, 4 fused coccygeal. Protects the spinal cord, supports the head/trunk, provides muscle/rib attachment. Each typical vertebra has a body, vertebral arch, and 7 processes. Intervertebral discs (nucleus pulposus/annulus fibrosus) provide cushioning.

Synonyms:

Vertebrobasilar Insufficiency

A condition of reduced blood flow through the vertebral arteries or basilar artery to the posterior circulation of the brain, including the brainstem,

cerebellum, occipital lobes, and thalami.

Synonyms:

Vertebroplasty

Percutaneous injection of bone cement into fractured vertebra. Provides pain relief, stabilization.

Synonyms:

Vertical Talus

A congenital rigid flatfoot deformity in which the talus is positioned vertically and the midfoot is dorsiflexed. It may be isolated or associated with neuromuscular or genetic syndromes and usually requires early orthopedic assessment and treatment.

Synonyms:

Vertigo

A false sensation of rotational or linear movement of the self or the environment, and it is a symptom rather than a disease, requiring differentiation from dizziness, disequilibrium, and presyncope.

Synonyms:

Vesical

Relating to bladder. Vesical carcinoma, vesical diverticulum, vesical neck.

Synonyms:

Vesicovaginal Fistula

An abnormal connection between the bladder and vagina that causes continuous or frequent leakage of urine through the vagina. It may follow childbirth injury, pelvic surgery, radiation, or advanced infection and usually requires specialist repair.

Synonyms:

Vesicle

A small (<1 cm) fluid-filled blister within the epidermis, containing clear fluid (serum) or, if infected, pus. Causes: viral (herpes simplex, herpes zoster, varicella, hand-foot-mouth disease), dermatitis (contact, dyshidrotic eczema), autoimmune (pemphigus, bullous pemphigoid early), and friction burns.

Synonyms:

Vesicoureteral Reflux

Retrograde flow of urine from the bladder into the ureters and potentially the kidneys, most commonly due to incompetent ureterovesical valve. Predisposes to pyelonephritis and renal scarring. More common in children, presenting with recurrent febrile UTIs. Diagnosis: voiding cystourethrogram (VCUG). Grading I-V.

Synonyms:

Vestibular Migraine

Episodic vestibular symptoms associated with migraine biology, with or without simultaneous headache. Episodes may include vertigo, motion sensitivity, visual aura, or sound sensitivity; diagnosis is clinical after exclusion of other vestibular and neurologic causes.

Synonyms:

Vestibular Neuritis

Acute vestibular dysfunction due to inflammation of the vestibular nerve, typically viral in origin. Presents with acute onset of vertigo, nausea, vomiting, and nystagmus lasting days. Hearing is normal (unlike labyrinthitis). Diagnosis: clinical, HINTS exam (Head Impulse, Nystagmus, Test of Skew) to differentiate from central causes.

Synonyms:

Vestibular papillomatosis

A normal anatomical variant of the female vulva characterised by multiple, soft, finger-like or filiform papules on the labia minora and vestibule, often mistaken for genital warts (condylomata acuminata).

Synonyms:

Vestibular Rehabilitation

Exercise-based therapy that improves balance, gaze stability, and adaptation in people with vestibular disorders or dizziness.

Synonyms:

Vestibular Schwannoma

A benign, slow-growing tumor of the vestibular portion of the eighth cranial nerve. See Acoustic Neu-

roma.

Synonyms:

Vestibule

Central bony labyrinth between cochlea and semicircular canals, containing utricle (horizontal linear acceleration and head tilt detection) and saccule (vertical linear acceleration detection). Each has a macula with hair cells covered by gelatinous membrane embedded with otoconia (calcium carbonate crystals).

Synonyms:

VEXAS Syndrome

VEXAS (Vacuoles, E1 ubiquitin-activating enzyme, X-linked, Autoinflammatory, Somatic) syndrome is an adult-onset autoinflammatory disorder caused by somatic UBA1 mutations in hematopoietic stem cells, affecting men >50.

Synonyms:

Viagra (Sildenafil)

Sildenafil is a phosphodiesterase type 5 (PDE5) inhibitor used primarily for erectile dysfunction (ED) and pulmonary arterial hypertension (PAH, as Revatio).

Synonyms: Sildenafil

Vibrio cholerae

A gram-negative, curved rod that causes cholera, a severe diarrhoeal illness. The organism produces cholera toxin, which causes profuse watery diarrhea (rice-water stools). Transmission occurs through contaminated water and food. The infectious dose varies depending on stomach acidity.

Synonyms:

Vibrio vulnificus infections

Infections caused by *Vibrio vulnificus*, a gram-negative bacterium found in warm seawater and raw seafood. It can cause wound infection, bloodstream infection, or gastroenteritis, with particularly severe disease in people with chronic liver disease or other risk factors.

Synonyms:

Video Laryngoscope

An airway device with a camera near the blade tip that displays the laryngeal view on a monitor. It may improve visualization during tracheal intubation, particularly when direct laryngoscopy is difficult, but does not eliminate aspiration or airway-trauma risk.

Synonyms:

Video Laryngoscopy

Video laryngoscopy uses a camera-equipped blade to display an indirect view of the glottis on a screen.

Synonyms:

Videofluoroscopic Swallow Study

Real-time X-ray imaging of swallowing. Detailed assessment of oropharyngeal phase.

Synonyms:

Videostroboscopy

A diagnostic technique that uses synchronized stroboscopic light to create a slow-motion view of vocal-fold vibration. It assesses the mucosal wave, amplitude, symmetry, and glottic closure.

Synonyms:

Villous atrophy

Flattening and loss of the normal small-intestinal villi, reducing absorptive surface area and occurring in conditions such as coeliac disease.

Synonyms:

VIPoma

A rare pancreatic neuroendocrine tumor secreting vasoactive intestinal peptide (VIP), causing WDHA syndrome: watery diarrhea (large volume, 3-5 L/day), hypokalemia, and achlorhydria/acidosis. Most are malignant and located in the pancreatic tail. Diagnosis: elevated VIP levels, pancreatic tumor on imaging.

Synonyms:

Viral assembly

The process of packaging newly synthesised viral genomes and proteins into complete virions. As-

sembly typically occurs in the nucleus or cytoplasm, depending on the virus type. The process involves self-assembly of capsid proteins around the viral genome.

Synonyms:

Viral attachment

The initial step in viral infection where viral surface proteins bind to specific receptors on host cells. Attachment determines viral tropism and host range. The viral attachment protein is called the ligand, and the host cell receptor is typically a protein or glycan.

Synonyms:

Viral Conjunctivitis

The most common form of infectious conjunctivitis, caused predominantly by adenoviruses (serotypes 3, 4, 7, 8, 19, and 37), and it is highly contagious, spreading through direct contact with infected ocular secretions or contaminated surfaces.

Synonyms:

Viral culture

Growth of a virus in susceptible cell cultures to identify an infectious agent. It can be useful for selected viruses, but molecular and antigen-based tests are often faster or more sensitive; the appropriate method depends on the suspected infection and specimen.

Synonyms:

Viral cytopathic effects

Observable changes in host cells caused by viral infection. CPE include cell rounding, detachment, syncytia formation (fusion of infected cells), inclusion bodies, and cell lysis. CPE are used in viral diagnosis and can be observed by light microscopy.

Synonyms:

Viral entry

The process by which viruses cross the host cell membrane to deliver their genome into the cytoplasm. Entry occurs through membrane fusion (enveloped viruses) or endocytosis (enveloped and

non-enveloped viruses). For membrane fusion, viral fusion proteins mediate merger of the viral envelope with the host cell membrane.

Synonyms:

Viral gastroenteritis

Inflammation of the stomach or intestines caused by a virus. Common symptoms include watery diarrhea, vomiting, abdominal cramps, and fever. Diagnosis is usually clinical; stool testing is reserved for selected situations. Treatment focuses on fluid replacement and symptom control.

Synonyms:

Viral hepatitis

Inflammation of the liver caused by viral infections. The major hepatitis viruses include A, B, C, D, and E. Hepatitis A and E are transmitted through the fecal-oral route and cause acute, self-limited infections.

Synonyms:

Viral immune evasion

Mechanisms by which viruses evade host immune responses. Strategies include antigenic variation, inhibition of interferon signalling, downregulation of MHC molecules, and encoding viral homologues of cytokines. Understanding viral immune evasion is essential for developing effective vaccines and antiviral therapies.

Synonyms:

Viral Infections

Illnesses caused by viruses, which are intracellular pathogens that hijack host cellular machinery to replicate. They range from self-limited conditions such as the common cold and gastroenteritis to serious diseases including influenza, hepatitis, HIV, and COVID-19.

Synonyms:

Viral latency

A state in which viral genomes persist in host cells without producing infectious particles. Latent viruses can reactivate under certain conditions

including immunosuppression. Herpesviruses establish latent infections in specific cell types (HSV in neurons, EBV in B cells, CMV in myeloid cells).

Synonyms:

Viral latency mechanisms

The strategies by which viruses establish and maintain latent infections. Herpesviruses maintain their genomes as episomes in the nucleus. HIV integrates into the host genome as a provirus. Latent viruses express minimal proteins to avoid immune detection. Reactivation can be triggered by immunosuppression, stress, or other stimuli.

Synonyms:

Viral Load (HIV RNA)

The amount of HIV RNA in plasma, measured by a laboratory assay. It is used to assess viral replication and response to antiretroviral therapy. An undetectable result indicates that the amount is below the assay's reporting limit; testing intervals and treatment decisions follow current clinical guidance.

Synonyms: HIV RNA

Viral Meningitis

Inflammation of the meninges caused by viruses, usually Enteroviruses. Presents similarly to bacterial meningitis but generally less severe. CSF shows lymphocytic pleocytosis, normal glucose, and mildly elevated protein. Self-limited in most cases; supportive treatment.

Synonyms:

Viral pathogenesis

The mechanisms by which viruses cause disease. Pathogenesis involves attachment, entry, replication, and spread within the host. Viral damage can be direct (cytopathic effects) or indirect (immune-mediated). Direct effects include cell death, altered cell function, and cell transformation.

Synonyms:

Viral pneumonia

Infection and inflammation of the lungs caused by a virus, producing cough, fever, breathing difficulty,

or low oxygen in more severe cases.

Synonyms:

Viral release

The process by which newly assembled virions exit the host cell to infect other cells. Release occurs through budding (enveloped viruses) or cell lysis (non-enveloped viruses). Budding allows the virus to acquire an envelope from host cell membranes without killing the cell.

Synonyms:

Viral replication

The process of synthesising new viral genomes and proteins within host cells. The mechanism varies by virus type. DNA viruses typically replicate in the nucleus using host cell DNA polymerases (except poxviruses). RNA viruses typically replicate in the cytoplasm using viral RNA-dependent RNA polymerase.

Synonyms:

Viral replication cycle

The series of steps by which viruses reproduce within host cells.

Synonyms:

Viral structure

The basic components of viral particles (virions). Viruses consist of a nucleic acid genome (DNA or RNA) surrounded by a protein coat called a capsid. Some viruses have an outer lipid envelope derived from host cell membranes. The capsid is composed of structural units called capsomeres.

Synonyms:

Viral uncoating

The process by which the viral capsid is disassembled to release the viral genome into the host cell cytoplasm. Uncoating occurs after entry and before replication. The mechanism varies by virus type and can involve pH-dependent conformational changes, proteolytic cleavage, or disassembly of capsid proteins.

Synonyms:

Virchow's Triad

Virchow's triad describes three broad categories of factors that contribute to thrombosis: endothelial injury or dysfunction, stasis or turbulent blood flow, and hypercoagulability. Endothelial injury exposes subendothelial collagen and tissue factor, initiating platelet adhesion and the coagulation cascade.

Synonyms:

Viremia

The presence of virus in the bloodstream. Viremia may be transient or persistent and can enable dissemination to target organs; it may be detected by culture, antigen testing, or nucleic-acid amplification.

Synonyms:

Virilisation

The development of male secondary sexual characteristics in females, resulting from excessive androgen production or exposure.

Synonyms:

Virilism Foetal

Prenatal or neonatal masculinization of a genetically female fetus or infant due to excess androgen exposure. Causes include congenital adrenal hyperplasia, maternal androgen-producing disease, or placental and fetal steroidogenic disorders.

Synonyms:

Virology

The branch of microbiology concerned with viruses: structure, classification (DNA/RNA, enveloped/nonenveloped, Baltimore scheme), replication, pathogenesis, epidemiology, diagnosis, treatment, and prevention. Diagnostic methods: cell culture, antigen detection, nucleic acid amplification (PCR), and serology (IgM/IgG).

Synonyms:

Virtual Reality

Immersive technology for rehabilitation. Engaging, motivates exercise. Used for balance, coordination, cognitive training.

Synonyms:

Virulence

The relative capacity of a microorganism to cause disease or tissue injury in a host. It depends on microbial factors such as toxins, adhesins, invasiveness, and immune evasion, together with host susceptibility.

Synonyms:

Virulence Factor

A microbial product or characteristic that helps an organism colonize, evade host defenses, injure tissue, or otherwise cause disease. Examples include adhesins, toxins, capsules, enzymes, and mechanisms that alter immune recognition.

Synonyms:

Viscera

The internal organs of the body, particularly those within the thoracic and abdominal cavities. The thoracic viscera include the heart, lungs, esophagus, trachea, and thymus.

Synonyms:

Vision

The sensory ability to perceive light and interpret visual information processed by the eyes and brain, enabling recognition of shapes, colors, depth, and motion. Normal vision depends on the proper function of the cornea, lens, retina, and optic nerve, as well as intact neural pathways to the visual cortex.

Synonyms:

Vision and Hearing

The two primary sensory modalities through which humans perceive and interact with their environment. Age-related declines in both senses are common, with presbyopia and cataracts affecting vision and presbycusis affecting hearing, often beginning as early as the fourth decade of life.

Synonyms:

Vision Impairment

Reduced visual acuity or visual-field function that

affects daily activities. Causes include refractive error, cataract, glaucoma, retinal disease, optic-nerve injury, and neurologic disease. Evaluation and treatment depend on the cause; rehabilitation and visual aids may improve function.

Synonyms:

Vision Loss

A decrease in the ability to see that cannot be fully corrected with eyeglasses, contact lenses, or medical treatment. It ranges from partial impairment to complete blindness and can result from conditions such as macular degeneration, glaucoma, diabetic retinopathy, cataracts, and traumatic injury.

Synonyms:

Vision Problems

Changes in visual acuity, field, color, or clarity caused by refractive error, eye disease, neurologic disease, or systemic illness. Sudden vision loss is an emergency.

Synonyms:

Vision Screening

Screening for visual problems in children: newborn—red reflex examination (cataract, retinoblastoma); 3-5 years—visual acuity, strabismus screening (cover test, photostrengthening), and amblyopia risk factors.

Synonyms:

Visual Acuity

The resolving power of the eye, defined as the ability to distinguish two points as distinct, and the most common clinical measure of visual function.

Synonyms:

Visual Agnosia

Inability to recognize or identify visually presented objects, faces, or symbols despite adequate vision and attention. It results from dysfunction of higher-order visual association cortex and may follow stroke, trauma, neurodegenerative disease, or other brain injury.

Synonyms:

Visual Field Defect

Loss or alteration of a portion of the normally perceived visual field caused by dysfunction of the retina, optic nerve, chiasm, optic tract, radiations, or visual cortex. The pattern can help localize the lesion.

Synonyms:

Visual Field Perimetry

A systematic method of measuring the sensitivity of the retina across the entire visual field using standardized light stimuli, providing a quantitative map of visual function that can detect, characterize, and monitor visual field loss caused by diseases of the retina, optic nerve, and visual pathways.

Synonyms:

Visual Impairment

Reduced vision that cannot be fully corrected by ordinary glasses or contact lenses. Causes include refractive error, cataract, glaucoma, retinal disease, optic-nerve injury, and neurologic disease; new or sudden loss of vision requires urgent assessment.

Synonyms:

Vital Signs

Basic measurements of physiologic status, commonly including temperature, pulse, respiratory rate, blood pressure, and oxygen saturation. Values vary with age, activity, illness, and measurement conditions; trends and clinical context are important.

Synonyms:

Vital Tooth Bleaching

Whitening of natural teeth with peroxide gel. In-office or take-home trays. Effect temporary.

Synonyms:

Vitamin A deficiency

A nutritional disorder resulting from inadequate intake or absorption of retinol, causing xerophthalmia, night blindness, follicular hyperkeratosis, and impaired immunity. Severe deficiency leads to corneal ulceration and blindness, and is a leading cause of

preventable childhood blindness worldwide.

Synonyms:

Vitamin A: Retinal

Vitamin A (retinol) is a fat-soluble vitamin essential for vision, immune function, cell differentiation, and reproduction. In the eye, retinol is oxidized to retinal (retinaldehyde), which binds to opsin in the photoreceptor outer segments forming rhodopsin (in rods) and photopsins (in cones).

Synonyms:

Vitamin B Complex

A group of eight water-soluble vitamins that support energy metabolism, blood-cell production, nervous-system function, and other biochemical processes. The group includes vitamins B1 through B7 and B9, as well as vitamin B12.

Synonyms:

Vitamin B1 (Thiamine)

Water-soluble vitamin, coenzyme in carbohydrate metabolism. Deficiency: beriberi (wet, dry), Wernicke-Korsakoff. Risk: alcoholism, bariatric surgery, dialysis. Treatment: supplementation.

Synonyms: Thiamine

Vitamin B12 (Cobalamin)

Required for nerve function, red blood cell formation, DNA synthesis. Deficiency: megaloblastic anemia, neurological damage. Risk: vegans, elderly, pernicious anemia, metformin use, bariatric surgery. Requires intrinsic factor for absorption.

Synonyms: Cobalamin

Vitamin B12 Deficiency

Megaloblastic anemia, neurological symptoms. Pernicious anemia, vegan diet. Treated with B12 supplementation.

Synonyms:

Vitamin B12 Deficiency in Older Adults

Deficiency caused by inadequate intake, malabsorption, autoimmune intrinsic-factor deficiency, gastric surgery, or medications. It may cause megaloblastic

anemia, neuropathy, cognitive changes, gait impairment, and glossitis; neurologic injury can occur without anemia.

Synonyms:

Vitamin B12: Cobalamin

A water-soluble vitamin needed for red-blood-cell formation, DNA synthesis, and normal nerve function. Deficiency can cause megaloblastic anemia and neurologic abnormalities.

Synonyms:

Vitamin B1: Thiamine

A water-soluble vitamin that acts as a cofactor in carbohydrate and amino-acid metabolism and supports nerve function. Severe deficiency can cause beriberi or Wernicke-Korsakoff syndrome.

Synonyms:

Vitamin B2 (Riboflavin)

Precursor for FAD and FMN. Deficiency: cheilosis, glossitis, seborrheic dermatitis. Common with B-complex deficiency.

Synonyms: Riboflavin

Vitamin B3 (Niacin)

Precursor for NAD⁺ and NADP⁺. Deficiency: pellagra (diarrhea, dermatitis, dementia). Sources: meat, fish, poultry, grains.

Synonyms: Niacin

Vitamin B3: Niacin

A water-soluble vitamin that forms the coenzymes NAD and NADP, which participate in many oxidation-reduction and energy-producing reactions. Severe deficiency causes pellagra.

Synonyms:

Vitamin B5 (Pantothenic Acid)

Component of coenzyme A. Deficiency rare. Involved in fatty acid metabolism.

Synonyms: Pantothenic Acid

Vitamin B6 (Pyridoxine)

Coenzyme in amino acid metabolism. Deficiency: seizures, anemia, dermatitis. Risk: isoniazid therapy, alcoholism.

Synonyms: Pyridoxine

Vitamin B6: Pyridoxine

Pyridoxine (pyridoxal phosphate, PLP, the active form) is a water-soluble B vitamin essential as a cofactor for over 100 enzymatic reactions, particularly in amino acid metabolism.

Synonyms:

Vitamin B7 (Biotin)

Coenzyme for carboxylation reactions. Deficiency rare, may occur with raw egg consumption (avidin binds biotin).

Synonyms: Biotin

Vitamin B9 (Folate)

Essential for DNA synthesis, red blood cell formation. Deficiency: megaloblastic anemia, neural tube defects in pregnancy. Sources: leafy greens, legumes, fortified grains. Supplementation recommended before and during pregnancy.

Synonyms: Folate

Vitamin B9: Folate

Folate (folic acid, tetrahydrofolate/THF) is a water-soluble B vitamin essential for one-carbon transfer reactions in nucleotide synthesis (thymidylate synthesis for DNA, purine synthesis), amino acid metabolism (methionine synthesis from homocysteine), and methylation reactions.

Synonyms:

Vitamin C (Ascorbic Acid)

A water-soluble vitamin and a powerful antioxidant, essential for collagen synthesis (required for proline and lysine hydroxylation in collagen triple helix formation), carnitine synthesis, neurotransmitter synthesis (dopamine to norepinephrine), and iron absorption (reduces ferric to ferrous iron in the gut).

Synonyms: Ascorbic Acid

Vitamin D Deficiency

Inadequate vitamin-D status causing impaired calcium and phosphate homeostasis and, in severe cases, defective bone mineralization. It may result from low exposure or intake, malabsorption, liver or kidney disease, or altered metabolism.

Synonyms:

Vitamin D: Calcitriol

Vitamin D is a fat-soluble vitamin (actually a pro-hormone) essential for calcium and phosphorus homeostasis and bone health. Cholecalciferol (D3) is synthesized in the skin from 7-dehydrocholesterol by UVB radiation, or obtained from diet (ergocalciferol/D2 from plants, D3 from animal sources).

Synonyms:

Vitamin E: Tocopherol

Vitamin E (alpha-tocopherol) is a fat-soluble vitamin and the body's primary lipid-soluble antioxidant, protecting polyunsaturated fatty acids in cell membranes from lipid peroxidation by free radicals (reactive oxygen species). It donates a hydrogen atom to lipid peroxyl radicals, breaking the chain reaction of lipid peroxidation.

Synonyms:

Vitamin K Deficiency

Coagulopathy, bleeding. Newborns receive prophylaxis. Antibiotics can cause deficiency.

Synonyms:

Vitamin K Prophylaxis

Administration of vitamin K to a newborn soon after birth to prevent vitamin K deficiency bleeding. Newborns have limited vitamin K stores, so the recommended route and dose are chosen according to local guidance and the infant's clinical circumstances.

Synonyms:

Vitamin K: Phyloquinone

Vitamin K is a fat-soluble vitamin essential for the post-translational gamma-carboxylation of glutamate residues to gamma-carboxyglutamate (Gla) in

specific clotting factors (II, VII, IX, X, protein C, protein S) and anticoagulant proteins (protein C, protein S, protein Z).

Synonyms:

Vitamins

Organic micronutrients required in small amounts for metabolic function, cannot be synthesized in sufficient quantities. Fat-soluble (A, D, E, K) absorbed with lipids, stored in liver/fat. Water-soluble (B complex, C) not stored, excess excreted.

Synonyms:

Vitiligo

An acquired disorder of depigmentation characterized by well-demarcated pale or depigmented macules and patches caused by loss or dysfunction of epidermal melanocytes.

Synonyms:

Vitiligo and Pigmentation Disorders

Vitiligo is a chronic skin condition characterized by the loss of melanocytes, resulting in well-defined white patches on the skin and sometimes mucous membranes.

Synonyms:

Vitiligo Treatment

Management may include topical medicines, phototherapy, camouflage, or selected surgical procedures. Choice depends on the extent, location, activity, age, and effect on the person; treatment may restore or even out pigmentation but does not always stop progression.

Synonyms:

Vitreotomy

Surgical removal of the vitreous gel, typically via the pars plana approach, using a cutting probe under microscopic visualization. Indications include vitreous hemorrhage, complicated retinal detachment, macular holes, epiretinal membranes, intraocular foreign bodies, and endophthalmitis.

Synonyms:

Vitreous Body

The clear gel that fills the space between the lens and retina. It helps maintain the shape of the eye and transmits light to the retina.

Synonyms:

Vitreous Chemistry

Analysis of the fluid from the eye after death for substances such as electrolytes, glucose, urea, creatinine, and ethanol. It may support assessment of postmortem interval or metabolic disturbance but is not independently diagnostic of cause or time of death.

Synonyms:

Vitreous Hemorrhage

Bleeding into the vitreous cavity that causes sudden painless floaters, cobwebs, haze, or loss of vision. Common causes include proliferative diabetic retinopathy, retinal tear or detachment, trauma, and posterior vitreous separation.

Synonyms:

Vitreous Humor

The clear gel that fills the space between the lens and retina. It helps maintain the shape of the eye and transmits light to the retina.

Synonyms:

Vitriolage

The deliberate throwing or application of a corrosive chemical (vitriol—sulfuric acid, historically; now any strong acid/base) onto a person to disfigure, disable, or kill; a form of assault. Injuries: severe facial and body burns, scarring, blindness, respiratory injury from fumes, and psychological trauma.

Synonyms:

VLDL

Very low-density lipoprotein. Transports endogenous triglycerides.

Synonyms:

Vocal Cord Dysfunction

Episodic inappropriate narrowing or adduction of the vocal folds, often during inspiration, causing noisy breathing, throat tightness, or breathlessness. It can resemble asthma. Diagnosis is supported by laryngoscopy during symptoms, and treatment may include breathing or speech therapy and management of triggers.

Synonyms:

Vocal Cord Nodules

Benign, usually paired thickened areas of the vocal folds caused by repeated voice strain or overuse. They can cause hoarseness, vocal fatigue, and a rough or breathy voice.

Synonyms:

Vocal Cord Paralysis

Immobility of one or both vocal cords due to disruption of the recurrent laryngeal nerve (RLN). Unilateral vocal cord paralysis: hoarseness, breathy voice, aspiration, and ineffective cough.

Synonyms:

Vocal Cord Paresis

Partial paralysis or weakness of one or both vocal cords due to impaired function of the recurrent laryngeal nerve (RLN) or the vagus nerve. Unilateral paresis is more common and presents with hoarseness, breathy dysphonia, vocal fatigue, and sometimes aspiration.

Synonyms:

Vocal Cord Polyp

Vocal cord polyps are benign, unilateral, sessile or pedunculated lesions that arise from the vocal cord mucosa, typically as a result of a single traumatic vocal event such as shouting, screaming, or coughing, causing hemorrhage and edema in the superficial lamina propria (Reinke space).

Synonyms:

Vocal Cords

The vocal folds are two bands of tissue within the larynx that vibrate as air passes between them to

produce voice.

Synonyms:

Vocal Folds

Paired mucosal folds within the larynx that vibrate as air passes between them to produce sound. They also close to protect the airway and assist in raising intrathoracic pressure.

Synonyms:

Vocal Resonance

The transmission of vocal sounds to the chest wall, assessed by having the patient speak while auscultating. It is increased in consolidation and decreased in pleural effusion or pneumothorax. It correlates with bronchophony and whispered pectoriloquy.

Synonyms:

Vocal-Cord Dysfunction

Episodic inappropriate adduction of the vocal folds, especially during inspiration, causing throat tightness, noisy breathing, and apparent asthma-like attacks. Diagnosis is supported by laryngoscopy during symptoms; speech therapy and trigger management are central treatments.

Synonyms:

Voice and Speech

The products of complex coordinated activity of the respiratory, laryngeal, and articulatory systems.

Synonyms:

Voiding Cystourethrogram

Fluoroscopic imaging of the bladder and urethra during voiding, after filling the bladder with contrast via a catheter. Indications: evaluation of vesicoureteral reflux (VUR) in children with recurrent UTIs, posterior urethral valves in males, and post-surgical assessment of the bladder/urethra.

Synonyms:

Volatile Anesthetics

Halogenated inhaled anesthetic agents, including sevoflurane, desflurane, and isoflurane, that reversibly depress central nervous system function.

They provide dose-dependent hypnosis and immobility but may cause hypotension, respiratory depression, postoperative nausea, and malignant hyperthermia in susceptible individuals.

Synonyms:

Volkmann Contracture

Permanent flexion deformity of the wrist, hand, and fingers caused by ischemic fibrosis of forearm muscles, usually after compartment syndrome or severe vascular injury. It can produce pain, weakness, sensory deficits, and major loss of hand function.

Synonyms:

Volume of Distribution

A theoretical pharmacokinetic parameter that relates the total amount of drug in the body to the plasma concentration, calculated as V_d equals amount of drug in the body divided by plasma concentration. It represents the apparent volume into which a drug distributes and is not a true anatomical volume.

Synonyms:

Volutrauma

Lung injury caused by excessive mechanical stretch, usually from an inappropriately large tidal volume during ventilation. Risk is reduced by lung-protective ventilation tailored to the patient's predicted body weight, lung mechanics, and clinical condition.

Synonyms:

Volvulus

Twisting of a loop of intestine around its mesenteric attachment point causing luminal obstruction and compromise of the mesenteric blood supply which can rapidly progress to bowel ischemia.

Synonyms:

Vomiting

Reflex expulsion of gastric contents. Causes: GI, neurological, metabolic, toxic, psychological. Treatment: antiemetics, identify cause, prevent aspiration.

Synonyms:

Von Hippel-Lindau Disease

Autosomal dominant syndrome caused by mutations in the VHL tumor suppressor gene on chromosome three predisposing to hemangioblastomas of the central nervous system and retina, clear cell renal cell carcinoma, pheochromocytoma, pancreatic cysts and neuroendocrine tumors, and endolymphatic sac tumors.

Synonyms:

von Willebrand Disease

An inherited or acquired bleeding disorder caused by deficient or abnormal von Willebrand factor, which helps platelets adhere and carries factor VIII. It commonly causes nosebleeds, easy bruising, heavy menstrual bleeding, or prolonged bleeding after procedures.

Synonyms:

Voriconazole

A triazole antifungal agent used in the treatment of invasive aspergillosis, candidemia, and other serious fungal infections. Voriconazole inhibits the fungal cytochrome P450 enzyme lanosterol 14-alpha demethylase, preventing ergosterol synthesis and disrupting fungal cell membrane integrity.

Synonyms:

Voyeuristic Disorder

A paraphilic disorder involving recurrent, intense sexual arousal from observing an unsuspecting person who is naked, disrobing, or engaging in sexual activity. The individual has acted on these urges or they cause marked distress or interpersonal difficulty. Duration $\geq$ 6 months. Most common in males with onset in adolescence.

Synonyms:

VRE

Enterococcus bacteria that are resistant to vancomycin, often because of acquired changes in cell-wall precursors. VRE can cause urinary, bloodstream, wound, or other healthcare-associated in-

fections. Treatment requires susceptibility-guided selection of an effective antimicrobial and source control when needed.

Synonyms:

Vulva

The external female genital structures, including the mons pubis, labia majora, labia minora, clitoris, vestibule, and associated glands. It protects the openings of the urinary and reproductive tracts.

Synonyms:

Vulvar Cancer

A malignant tumor of the vulva, most often arising from squamous cells. Risk factors include human papillomavirus, chronic vulvar inflammation, smoking, immunosuppression, and age; other tumor types can occur.

Synonyms:

Vulvar vestibulitis

Pain and inflammation of the vulvar vestibule.

Synonyms:

Vulvitis

Inflammation of the vulva (external female genitalia), often presenting with pruritus, burning, irritation, erythema, edema, and discharge. Vulvitis is rarely isolated and is most commonly part of vulvovaginitis (inflammation of both vulva and vagina).

Synonyms:

Vulvodynia

Pain in the vulva that may or may not be brought on by touch or pressure.

Synonyms:

Vulvovaginal Candidiasis

Symptomatic infection of the vulva and vagina, usually caused by *Candida albicans*. Pruritus, soreness, erythema, and thick discharge are common; diagnosis is clinical with microscopy or culture when recurrent, severe, atypical, or treatment-resistant.

Synonyms:

Weber-Christian Disease

A historical term for idiopathic relapsing febrile lobular panniculitis, involving recurrent painful inflammation of subcutaneous fat with fever and nodules. The term is used inconsistently and other causes, including infection, autoimmune disease, and malignancy, must be excluded.

Synonyms:

Vagal Paraganglioma

A usually slow-growing tumor arising from paraganglion cells near the vagus nerve in the neck.

Synonyms:

Vaginal Agenesis

A condition in which the vagina is absent or incompletely developed.

Synonyms:

Vaginal Atrophy

Thinning, drying, and inflammation of vaginal tissues caused by reduced estrogen.

Synonyms:

Vaginal Fistula

An abnormal opening connecting the vagina to another organ, such as the bladder or rectum.

Synonyms:

Vertebral Tumor

A tumor arising in or near a vertebra of the spinal column.

Synonyms:

Valgus

An abnormal position in which a distal body segment angles away from the body's midline.

Synonyms:

Valsalva Maneuver

Forceful attempted exhalation against a closed airway, which increases pressure inside the chest and abdomen.

Synonyms:

Vagotomy

Surgical cutting of selected vagus-nerve branches, historically used to reduce stomach acid secretion.

Synonyms:

Vascular System

The network of arteries, veins, and capillaries that transports blood through the body.

Synonyms:

Verruca

A wart caused by infection with human papillomavirus.

Synonyms:

Vaginal Speculum

An instrument inserted into the vagina to separate its walls and permit examination of the vagina and cervix or collection of specimens.

Synonyms:

Valves

Flap-like structures that open and close to direct blood flow through the heart and veins and prevent backward flow.

Synonyms:

Vernix Caseosa

A white, greasy protective coating on the skin of a fetus or newborn, composed mainly of water, lipids, and shed skin cells.

Synonyms:

Vestibulocochlear Nerve

The eighth cranial nerve, carrying information for hearing and balance from the inner ear to the brain.

Synonyms:

Vibrios

Comma-shaped bacteria, usually Gram-negative, that include species capable of causing cholera and wound or gastrointestinal infections.

Synonyms:

Villi

Finger-like projections that increase the absorptive surface of the small-intestinal lining; similar structures occur in the placenta and other tissues.

Synonyms:

Vincent Disease

Acute necrotizing ulcerative gingivitis associated with fusospirochetal bacteria, causing painful bleeding gums, ulceration, and foul breath.

Synonyms:

Vision Receptors

Photoreceptors in the retina, mainly rods and cones, that convert light into neural signals.

Synonyms:

Vaginal Hematoma

A collection of blood within the vaginal wall or surrounding tissues, usually caused by childbirth, trauma, or surgery and potentially producing severe pain, swelling, or blood loss.

Synonyms:

Vertebral Compression Fracture

Collapse of a vertebral body, often caused by osteoporosis, trauma, or malignancy, producing back pain, loss of height, or progressive kyphosis.

Synonyms:

Veno-Occlusive Disease

Obstruction of small veins, particularly in the liver after certain chemotherapy or hematopoietic stem-cell transplantation, causing painful hepatomegaly, fluid retention, jaundice, and weight gain.

Synonyms:

Vaginal Intraepithelial Neoplasia

Precancerous abnormal growth of squamous cells in the vaginal epithelium, usually associated with human papillomavirus and graded according to the severity of dysplasia.

Synonyms:

Vitreous Detachment

Separation of the vitreous gel from the retina, usually related to aging and often causing new floaters or flashes. Sudden symptoms require assessment for retinal tears or detachment.

Synonyms:

Viral Exanthem

A widespread skin eruption caused by a viral infection, often accompanied by fever or other systemic symptoms.

Synonyms:

Vulvar Dermatitis

Inflammation and irritation of the vulvar skin caused by irritants, allergens, moisture, infection, or inflammatory skin disease, producing itching, burning, redness, or scaling.

Synonyms:

Valvuloplasty

A procedure used to widen or repair a narrowed or abnormal heart valve, by balloon catheter or open surgery depending on the valve and condition.

Synonyms:

Valvulotomy

Surgical incision of a stenosed heart valve to improve the opening through which blood flows.

Synonyms:

Varices

Abnormally dilated and tortuous veins, commonly occurring in the legs or in the oesophagus and stomach as a result of portal hypertension.

Synonyms:

Vasodilatation

Widening of blood vessels caused by relaxation of vascular smooth muscle, increasing blood flow and potentially lowering blood pressure.

Synonyms:

Vasomotor

Relating to the control of blood-vessel diameter by nerves, hormones, and local chemical factors.

Synonyms:

Vasopressor

An agent or physiological signal that raises blood pressure mainly by constricting blood vessels and sometimes by increasing cardiac activity.

Synonyms:

Venous Pressure

The pressure within the venous circulation, influenced by blood volume, venous tone, and the function of the right side of the heart.

Synonyms:

Ventilation

Movement of air into and out of the lungs; effective ventilation brings oxygen to the alveoli and removes carbon dioxide.

Synonyms:

Vesicoureteric Reflux

Backward flow of urine from the bladder into one or both ureters and sometimes the kidneys, increasing the risk of urinary infection and renal scarring.

Synonyms:

Visual Fields

The total area that can be seen while the eyes are fixed in one position; defects may indicate retinal, optic-nerve, or brain disease.

Synonyms:

Vital Capacity

The largest volume of air that can be exhaled after a maximal inhalation, equal to inspiratory reserve volume plus tidal volume plus expiratory reserve volume.

Synonyms:

Voice

Sound produced by vibration of the vocal folds as

air passes through the larynx, then shaped by the throat, mouth, and nose for speech.

Synonyms:

Vomiting of Pregnancy (Morning Sickness)

Nausea and vomiting occurring during pregnancy, usually in early pregnancy; severe persistent vomiting may be hyperemesis gravidarum.

Synonyms: Morning Sickness

Von Willebrand's Disease

An inherited or acquired bleeding disorder caused by deficient or dysfunctional von Willebrand factor, impairing platelet adhesion and sometimes factor VIII stability.

Synonyms:

Vulvectomy

Surgical removal of part or all of the vulva, performed for selected cancers, precancerous lesions, or severe persistent disease.

Synonyms:

Vulvovaginitis

Inflammation affecting both the vulva and vagina, commonly causing itching, soreness, redness, discharge, or pain and resulting from infection, irritation, or inflammatory disease.

Synonyms:

W

Waardenburg Syndrome

A group of inherited disorders characterized by sensorineural hearing loss and pigmentary abnormalities of the eyes, hair, or skin. Dystopia canthorum, limb abnormalities, or intestinal aganglionosis may occur in particular genetic forms.

Synonyms:

Wall Stress

Force exerted on a heart chamber wall by pressure inside the chamber. **Synonyms:**

Warfarin

An anticoagulant that reduces blood clot formation by inhibiting vitamin-K-dependent clotting factors. **Synonyms:**

Wart

A benign skin growth caused by infection with human papillomavirus. **Synonyms:** Verruca

Water Brash

A sudden increase in salty saliva associated with acid reflux. **Synonyms:**

Wernicke's Area

A brain region important for understanding spoken and written language. **Synonyms:** Wernicke area

White-Coat Hypertension

High blood pressure in a medical setting with normal readings outside it. **Synonyms:** White-coat effect

Will

A legal document specifying how a person's property

should be distributed after death. **Synonyms:** Last will and testament

Withdrawal

Physical or psychological symptoms that occur when an addictive substance is reduced or stopped. **Synonyms:** Withdrawal syndrome

Working Memory

The short-term holding and manipulation of information during a task. **Synonyms:**

WAGR Syndrome

A contiguous-gene deletion syndrome involving Wilms tumor predisposition, aniridia, genitourinary anomalies, and variable developmental delay. It usually involves chromosome 11p13 and requires tumor surveillance and multidisciplinary care.

Synonyms:

Waist Circumference

A measure of abdominal adiposity taken at a standardized site. Larger measurements are associated with increased cardiometabolic risk, but clinically used thresholds vary by sex, ancestry, and guideline; it complements, rather than replaces, body-mass index and other assessment.

Synonyms:

Waldenstrom Macroglobulinemia

A rare B-cell lymphoplasmacytic lymphoma characterized by bone marrow infiltration by lymphoplasmacytic cells and production of monoclonal IgM paraprotein. It accounts for less than 2 percent of hematologic malignancies and typically affects older adults (median age 63-65 years).

Synonyms:

Waldenstrom's macroglobulinemia

A lymphoplasmacytic cancer of the bone marrow that produces excess IgM and may cause anemia, enlarged lymph nodes, or hyperviscosity symptoms.

Synonyms:

Waldenström's macroglobulinemia

An indolent B-cell lymphoplasmacytic lymphoma characterized by the production of a monoclonal IgM paraprotein, causing hyperviscosity syndrome with visual disturbances, bleeding, and neurological symptoms. It typically affects elderly patients and involves the bone marrow, lymph nodes, spleen, and liver.

Synonyms:

Walker

Walking aid for stability. Types: standard, rollator (wheels), knee walkers.

Synonyms:

Wallerian Degeneration

The breakdown of the portion of a nerve fiber separated from its cell body after nerve injury.

Synonyms:

Walking Speed

The rate at which a person walks, often measured over a defined distance. It can provide information about mobility and function, but no single speed determines disability in every person.

Synonyms:

Wandering Spleen

Abnormal mobility of the spleen caused by laxity or absence of its supporting ligaments. It may be asymptomatic or cause abdominal pain, splenic enlargement, torsion, infarction, or acute abdomen.

Synonyms:

Warthin Tumor

A benign salivary-gland neoplasm composed of oncocytic epithelial and lymphoid tissue, usually arising

in the parotid gland. It is strongly associated with tobacco exposure, may be multifocal or bilateral, and is generally managed according to symptoms, diagnosis, and growth.

Synonyms:

Warts

Small, usually benign growths of the skin or mucous membranes caused by human papillomavirus infection.

Synonyms:

Warty Dyskeratoma

A benign follicular keratinizing tumor presenting as a solitary umbilicated papule or nodule, often on the head or neck. Histology shows a cup-shaped invagination filled with keratin and acantholytic dyskeratotic cells.

Synonyms:

Watchful Waiting

Planned observation without immediate active treatment, with clinical review and treatment if symptoms develop or the condition progresses. It may be used for selected cancers and other slowly progressive conditions.

Synonyms:

Water Birth (Underwater Delivery)

Delivery of a baby while the birthing person remains in a tub or pool of warm water. It may reduce perceived labor pain for some people, but evidence about delivery-related benefits and risks is limited. Eligibility, monitoring, and facility policies determine whether it is offered.

Synonyms: Underwater Delivery

Water Flosser

Device using water stream to clean between teeth. Adjunct to brushing and flossing.

Synonyms:

Water Intoxication

A potentially life-threatening dilutional hyponatremia caused by excessive water intake or retention

relative to the body's ability to excrete free water. Severe cases can cause headache, confusion, seizures, or coma.

Synonyms:

Water Soluble Toxins

Toxic substances that dissolve readily in water. Their elimination depends on the substance, kidney function, metabolism, protein binding, and other properties; some may be removed by dialysis.

Synonyms:

Water-Borne Disease

Disease transmitted via contaminated water. Examples: cholera, typhoid, hepatitis A.

Synonyms:

Water-Deprivation Test

A supervised dynamic test assessing the kidney's ability to concentrate urine when free-water intake is withheld, followed when appropriate by desmopressin. It helps distinguish central diabetes insipidus, nephrogenic diabetes insipidus, and primary polydipsia but requires careful monitoring for hypernatremia and dehydration.

Synonyms:

Watery Eyes

Excessive tearing caused by irritation, allergy, infection, dry-eye reflex tearing, or blockage of the tear-drainage system. Persistent unilateral tearing or pain requires ocular assessment.

Synonyms:

Waxy Casts

Broad refractile cylindrical structures with smooth appearance indicating severe chronic kidney disease. Form from degeneration of granular casts in dilated tubules. Broad diameter reflects formation in dilated collecting ducts. Relatively specific for advanced CKD with significant tubular atrophy.

Synonyms:

Weakness

Reduced muscle strength or ability to generate force,

which may be generalized or limited to one body region. Causes include nerve or muscle disease, stroke, spinal disorders, metabolic abnormalities, infection, and deconditioning; sudden one-sided weakness is an emergency.

Synonyms:

Wear Debris

Particles generated by mechanical abrasion or degradation of implant materials. Macrophage-mediated inflammation around debris can produce osteolysis, implant loosening, and failure of an arthroplasty.

Synonyms:

Weaver Syndrome

A congenital overgrowth and neurodevelopmental disorder associated with pathogenic variants in EZH2. It may cause prenatal overgrowth, advanced bone age, characteristic facial features, hypotonia, developmental delay, and variable intellectual disability.

Synonyms:

Weber Test

The Weber test is a screening test for lateralization of hearing that uses a vibrating tuning fork (typically 512 Hz) placed on the midline of the skull (vertex or forehead) to determine whether the sound is heard equally in both ears or louder in one ear, providing information about the type and side of hearing loss.

Synonyms:

Wedge resection

Surgical removal of a wedge-shaped piece of tissue, typically lung or breast. Used for diagnosis or treatment of localized lesions. Less extensive than lobectomy.

Synonyms:

Wegener's Granulomatosis

Wegener's granulomatosis, now called granulomatosis with polyangiitis, is a systemic vasculitis characterized by necrotizing granulomatous inflammation of the upper and lower respiratory tracts and pauci-

immune necrotizing glomerulonephritis.

Synonyms:

Weight Gain in Pregnancy

Recommended gestational weight gain according to the Institute of Medicine (IOM) guidelines, based on prepregnancy BMI. Underweight (BMI <18.5): 28-40 lbs (12.5-18 kg). Normal weight (BMI 18.5-24.9): 25-35 lbs (11.5-16 kg). Overweight (BMI 25-29.9): 15-25 lbs (7-11.5 kg). Obese (BMI ≥ 30): 11-20 lbs (5-9 kg).

Synonyms:

Weight Loss

The intentional reduction of body weight, typically through a combination of dietary modification, increased physical activity, and behavioral changes. Achieving sustainable weight loss requires creating a consistent calorie deficit while preserving lean muscle mass through adequate protein intake and strength training.

Synonyms:

Weight Loss and Management

Weight loss and management encompasses the ongoing process of achieving and maintaining a healthy body weight through sustainable lifestyle modifications.

Synonyms:

Weight Loss Medications

Pharmacologic agents approved for the treatment of obesity when used in conjunction with lifestyle modifications.

Synonyms:

Weil's Disease

A zoonotic bacterial infection caused by spirochaetes of the genus *Leptospira*, transmitted through contact with water or soil contaminated with the urine of infected animals (rodents, cattle, dogs). See *Leptospirosis*.

Synonyms:

Wen (Epidermoid Cyst)

A common benign cyst beneath the skin that is lined by squamous epithelium and contains keratin debris.

Synonyms: Epidermoid Cyst

Werner Syndrome

An autosomal-recessive progeroid disorder caused most often by pathogenic variants in the *WRN* gene. It typically presents after puberty with premature ageing, short stature, bilateral cataracts, scleroderma-like skin changes, thin limbs, diabetes, osteoporosis, vascular disease, and increased risk of malignancy.

Synonyms:

Wernicke's Encephalopathy

An acute neurologic disorder caused by thiamine deficiency, classically involving confusion, eye-movement abnormalities, and gait or coordination impairment. It requires prompt thiamine treatment.

Synonyms:

Wernicke-Korsakoff Syndrome

A neurologic disorder caused by thiamine deficiency, combining acute or previous Wernicke encephalopathy with persistent memory impairment and confabulation in some patients. Causes include alcohol-use disorder, malnutrition, and prolonged vomiting.

Synonyms:

West Nile Encephalitis

Inflammation of the brain caused by neuroinvasive West Nile virus, transmitted mainly by mosquitoes. It may cause fever, headache, confusion, tremor, weakness, seizures, or coma. There is no specific routine antiviral treatment; severe illness requires hospital-based supportive care.

Synonyms:

West Nile Virus

A mosquito-borne flavivirus that can cause asymptomatic infection, a febrile illness, or neuroinvasive disease such as meningitis, encephalitis, or acute flaccid paralysis. Risk of severe disease is higher

in older adults and people with certain medical conditions.

Synonyms:

West Syndrome

An infantile epileptic encephalopathy characterized by epileptic spasms, hypsarrhythmia on electroencephalography, and developmental regression or arrest. Causes include structural brain disease, genetic disorders, metabolic disease, or acquired brain injury.

Synonyms:

Westermarck Sign

A focal area of decreased pulmonary vascularity distal to an occluded pulmonary artery segment on a chest radiograph. It may occur with pulmonary embolism but is neither sensitive nor specific.

Synonyms:

Wharton Jelly

A gelatinous substance (mucopolysaccharide matrix) surrounding the umbilical cord vessels, composed primarily of hyaluronic acid and chondroitin sulfate. It protects the umbilical vessels from compression and kinking during fetal movement and uterine contractions.

Synonyms:

Wheal

Raised, itchy swelling of skin (urticaria/hives). Caused by mast cell degranulation and histamine release. Examples: insect bite, allergic reaction, dermatographism.

Synonyms:

Wheelchair

Mobility device for patients with walking difficulties. Types: manual, power. Components: seat, backrest, wheels, footrests, armrests. Assessment: seating evaluation, pressure relief, posture. Training: mobility, transfers, safety.

Synonyms:

Wheelchair Seating and Positioning

Assessment and configuration of a wheelchair, cushion, supports, and posture to optimize stability, propulsion, comfort, function, pressure distribution, and prevention of musculoskeletal deformity.

Synonyms:

Wheelchair Skills

Training for wheelchair users: propulsion, maneuvering, obstacles, slopes, stairs, transfers.

Synonyms:

Wheezing

A continuous, high-pitched, musical adventitious lung sound produced by turbulent airflow through narrowed or compressed lower airways during expiration (and occasionally inspiration). Pathophysiology: bronchospasm, mucosal edema, airway inflammation, or intraluminal secretions.

Synonyms:

Whiplash Injury

An acceleration-deceleration injury to the cervical spine, most commonly resulting from rear-end motor vehicle collisions. Mechanism: sudden hyperextension followed by hyperflexion of the neck causes stretching or tearing of cervical muscles, ligaments, facet joint capsules, and annulus fibrosus of intervertebral discs.

Synonyms:

Whipple Disease

A rare systemic bacterial infection caused by *Tropheryma whippeli*, affecting the small intestine and multiple organ systems. Presents with arthralgias (prodromal, years before GI symptoms), weight loss, chronic diarrhea, steatorrhea, and abdominal pain.

Synonyms:

Whipple Procedure

Pancreaticoduodenectomy for cancers of the pancreatic head, distal bile duct, or ampulla. Involves removal of the pancreatic head, duodenum, distal bile duct, and gallbladder with three anastomoses: hepaticojejunostomy, pancreaticojejunostomy, and

gastrojejunostomy. The pylorus-preserving variant maintains the entire stomach.

Synonyms:

Whipple Triad

A clinical framework supporting the diagnosis of symptomatic hypoglycemia: symptoms consistent with hypoglycemia, a documented low blood-glucose concentration, and improvement after the glucose level is raised. It is used when evaluating possible hypoglycemia, including suspected insulinoma.

Synonyms:

Whipworm (Trichuriasis)

Intestinal infection caused by the soil-transmitted helminth *Trichuris trichiura* (whipworm), endemic in tropical and subtropical regions with poor sanitation. Humans acquire infection by ingesting embryonated eggs from contaminated soil, food, or water.

Synonyms: Trichuriasis

Whispered Pectoriloquy

The ability to hear whispered words clearly through the stethoscope over consolidated lung tissue. It is a sign of pulmonary consolidation. Normally, whispered words are barely audible over the lung fields. It is one of the classic signs of pneumonia on physical examination.

Synonyms:

White Blood Cell Count

WBC count: the total number of leukocytes per unit volume (normal $4.0\text{--}11.0 \times 10^9/\text{L}$), part of the CBC with differential (neutrophils, lymphocytes, monocytes, eosinophils, basophils). Leukocytosis: infection (neutrophilia), inflammation, stress, steroids, leukemia (marked), corticosteroids.

Synonyms:

White Blood Cell Labeling

Nuclear medicine technique labeling WBCs with Tc-99m. Used for infection localization.

Synonyms:

White Cell

The cells of the immune system that defend the body against infection and foreign substances. Produced in the bone marrow from hematopoietic stem cells.

Synonyms:

White Cell Count

A laboratory measurement of the number of white blood cells (leukocytes) in a given volume of blood, part of the complete blood count (CBC). Normal range: 4,000-11,000 cells/ μL ($4\text{--}11 \times 10^9/\text{L}$). Differential white cell count measures the proportion of each leukocyte type: neutrophils, lymphocytes, monocytes, eosinophils, basophils.

Synonyms:

White Infarction

White infarction, also known as anemic infarction, occurs in solid organs with end-arterial circulation where collateral blood supply is limited, resulting in pale, well-demarcated areas of coagulative necrosis.

Synonyms: anemic infarction, occurs in solid organs with.

White Matter

Regions of the brain and spinal cord composed primarily of myelinated nerve fibers, responsible for transmitting signals between brain regions.

Synonyms:

Whites (Leucorrhoea)

A non-bloody, physiological or pathological vaginal discharge. Physiological leucorrhoea: normal, clear to whitish, odourless discharge that varies with the menstrual cycle (increased at ovulation, pre-menstrually, during pregnancy, sexual arousal, and with oral contraceptive use).

Synonyms: Leucorrhoea

Whole Exome Sequencing

Sequencing the protein-coding regions of the genome, which make up a small fraction of total DNA. It can identify variants associated with disease but does not detect all genetic causes; its yield depends on the disorder, test quality, and interpre-

tation.

Synonyms:

Whole Genome Sequencing

Determining complete DNA sequence of an individual's genome. Cost decreasing, clinical applications expanding. Identifies coding and non-coding variants.

Synonyms:

Whole-Body Scan

Acquisition of images covering entire body. Used for oncology staging, infection localization. PET/CT typically neck-to-mid-thigh or full body.

Synonyms:

Whole-Brain Radiation Therapy

Radiation directed at the entire brain, used for multiple brain metastases, leptomeningeal disease, and prophylactic cranial irradiation in small cell lung cancer and acute lymphoblastic leukemia.

Synonyms:

Whole-Genome Sequencing

Sequencing of nearly the complete nuclear genome, including coding and noncoding regions, together with mitochondrial DNA when covered by the assay. It can detect a broad range of variants but generates substantial interpretation and incidental-finding challenges.

Synonyms:

Whooping Cough

A highly contagious bacterial infection caused by *Bordetella pertussis*, producing characteristic paroxysmal cough with whooping inspiratory sound. See Pertussis.

Synonyms:

Williams Syndrome

A microdeletion syndrome involving the elastin gene on chromosome 7q11.23. Features: elfin facies, supravalvular aortic stenosis, hypercalcemia, intellectual disability with strong verbal skills, and overly friendly personality. Often associated with

connective tissue abnormalities.

Synonyms:

Wilms Tumor

A malignant embryonal tumor of the kidney in children. It may present as an abdominal mass, pain, hematuria, or an incidental finding and may be associated with syndromes such as WAGR or Beckwith-Wiedemann syndrome. Treatment and prognosis depend on stage and tumor biology.

Synonyms:

Wilms' tumor (Nephroblastoma)

An embryonal malignant tumor of the kidney that usually occurs in young children. It may be associated with congenital syndromes, and treatment and prognosis depend on tumor stage, histology, and molecular features.

Synonyms: Nephroblastoma

Wilson Disease

Autosomal recessive copper metabolism disorder (ATP7B gene). Copper accumulation in liver, brain, cornea. Kayser-Fleischer rings, hepatopathy, movement disorder, psychiatric symptoms. Treatment: chelation (penicillamine, trientine), zinc, liver transplant.

Synonyms:

Wilson's disease

An autosomal recessive disorder of copper metabolism caused by mutations in the ATP7B gene, leading to impaired biliary copper excretion and toxic copper accumulation in the liver, brain, cornea, and other organs.

Synonyms:

Windowing

Adjusting CT image brightness and contrast to optimize visualization of specific tissues. Bone window: wide window width, high level. Soft tissue window: narrow width, mid level. Lung window: wide width, low level.

Synonyms:

Windpipe

The windpipe, a 10-12 cm fibrocartilaginous tube from the larynx (C6) to the carina (T4/T5) where it bifurcates into main bronchi. See Trachea.

Synonyms:

Wireless Motility Capsule

Ingestible capsule that measures pH, pressure, and temperature throughout the gastrointestinal tract. Provides regional transit times through the stomach, small bowel, and colon in a single test. The pH sensor identifies transition points between segments based on characteristic pH changes.

Synonyms:

Wiskott-Aldrich Syndrome

X-linked recessive disorder (WAS gene mutation, encodes WASP protein, regulates actin polymerization in hematopoietic cells). Triad: microthrombocytopenia (small platelets, <70 fl), eczema, recurrent infections (encapsulated bacteria, viruses). Combined immunodeficiency with progressive T-cell lymphopenia.

Synonyms:

Withdrawal Reflex

A protective polysynaptic spinal reflex in which a painful stimulus causes flexion (withdrawal) of the stimulated limb, removing it from the source of injury, with reciprocal extension of the contralateral limb (crossed extensor reflex) to maintain posture.

Synonyms:

Withdrawal Symptoms

Physical or psychological symptoms that occur when a person stops or reduces a substance or medicine after the body has adapted to it. The symptoms depend on the substance, duration of use, and the person's health.

Synonyms:

Withdrawal Syndrome

A predictable set of signs and symptoms that occur when a drug is discontinued or the dose is reduced after chronic use, reflecting the physiological rebound

from drug adaptation.

Synonyms:

Wolff-Parkinson-White Syndrome

A pre-excitation syndrome caused by an accessory pathway (bundle of Kent) connecting atria and ventricles, bypassing the AV node. ECG shows short PR interval (<0.12 s), delta wave (slurred upstroke of QRS), and widened QRS.

Synonyms:

Wolfram Syndrome

Autosomal recessive disorder caused by mutations in the WFS1 gene encoding wolframin. Classic triad of diabetes mellitus, optic atrophy, and diabetes insipidus. Additional features include sensorineural deafness, neurodegeneration, and psychiatric illness. Onset of diabetes typically in the first decade.

Synonyms:

Wolman's Disease

A severe lysosomal acid-lipase deficiency presenting in infancy with hepatosplenomegaly, adrenal calcification, malabsorption, vomiting, diarrhea, and failure to thrive. It is a severe form of lysosomal acid-lipase deficiency and can be fatal early without treatment.

Synonyms:

Wood Lamp Examination

Inspection of skin under long-wave ultraviolet A light in a darkened room. It can accentuate pigimentary differences and produce characteristic fluorescence in selected infections, but findings are not independently diagnostic.

Synonyms:

Woods Corkscrew Maneuver

An internal rotation maneuver for shoulder dystocia where the operator inserts a hand and rotates the fetal shoulders 180 degrees by applying pressure to the posterior aspect of the anterior shoulder. This disimpacts the shoulder from behind the symphysis pubis. Can be repeated if the shoulder re-impacts in the new position.

Synonyms:

Woods Screw Maneuver

A rotational maneuver used during shoulder dystocia to rotate the fetal shoulders and assist delivery.

Synonyms:

Word Recognition Scoring

An audiologic test measuring how accurately a person repeats or identifies spoken words at a comfortable listening level.

Synonyms:

Word Salad

Severe disorganized speech consisting of a jumble of words and phrases that lack meaning or logical connection. It is a hallmark of formal thought disorder in schizophrenia and represents the most severe form of disorganized speech. It reflects profound disruption of language processing.

Synonyms:

Wound

An injury in which tissue is damaged by trauma, surgery, pressure, heat, chemicals, or other causes. Wounds may be open or closed and vary in depth, contamination, and effect on nearby structures.

Synonyms:

Wound Care

Management of traumatic wounds: irrigation, debridement, closure (sutures, staples, glue), dressing. Tetanus prophylaxis based on vaccination history and wound type. Antibiotics for contaminated wounds, animal/human bites, or signs of infection. Healing: primary, secondary, tertiary intention.

Synonyms:

Wound Complication

A problem that develops during healing, such as infection, separation of wound edges, bleeding, fluid collection, tissue death, or excessive scarring. Increasing pain, redness, swelling, drainage, fever, or wound opening should be assessed promptly.

Synonyms:

Wound Dehiscence

Separation of the layers of a surgical wound after closure, most commonly occurring within 3-14 days postoperatively.

Synonyms:

Wound Healing

Complex process of tissue repair. Phases: hemostasis, inflammation, proliferation, remodeling. Implant integration depends on healing.

Synonyms:

Wound Healing Phases

Wound healing involves overlapping stages of hemostasis, inflammation, tissue formation, epithelial coverage, and remodeling. The duration and result depend on the wound, blood supply, infection, nutrition, and overall health.

Synonyms:

Wound Infection

Infection of a wound by microorganisms, causing findings such as increasing pain, redness, warmth, swelling, pus, fever, or delayed healing.

Synonyms:

Wound VAC

Vacuum-assisted closure for wound healing. Foam dressing connected to vacuum pump. Removes exudate, reduces edema, promotes granulation. Used for complex wounds, surgical sites, pressure ulcers.

Synonyms:

Wrisberg Ganglion

A sensory ganglion associated with the intermediate nerve of the facial nerve.

Synonyms:

Wrist Drop

Inability to extend the wrist and fingers, usually caused by radial nerve dysfunction.

Synonyms:

Wrist Joint

Condylod joint between distal radius and articular disc proximally and scaphoid/lunate/triquetrum distally. Allows flexion, extension, radial/ulnar deviation, circumduction. The triangular fibrocartilage complex absorbs ulnar side load.

Synonyms:

Wrist Pain

Pain in or around the wrist, commonly caused by sprain, fracture, tendinitis, arthritis, or nerve compression such as carpal tunnel syndrome. Persistent pain, deformity, numbness, or weakness requires assessment.

Synonyms:

Wuchereria

A genus of filarial nematodes that includes *Wuchereria bancrofti*, a major cause of lymphatic filariasis. Infection is transmitted by mosquitoes and may cause lymphangitis, chronic lymphedema, hydrocele, and elephantiasis.

Synonyms:

Wheat Allergy

An immune reaction to proteins in wheat that may cause skin, digestive, or breathing symptoms.

Synonyms:

Whiplash

A neck injury caused by a rapid back-and-forth movement of the head.

Synonyms:

Whipple's Disease

A rare bacterial infection that can impair intestinal absorption and affect multiple organs.

Synonyms:

Wheeze

A high-pitched whistling sound produced by narrowed airways during breathing.

Synonyms:

Wright Stain

A blood-cell stain used to identify and classify cells in a blood smear.

Synonyms:

White Blood Cells

Leukocytes, immune cells that circulate in blood and protect the body against infection, foreign substances, and abnormal cells.

Synonyms:

Wolman Disease

A rare autosomal-recessive lysosomal storage disorder caused by lysosomal acid lipase deficiency, leading to accumulation of cholesteryl esters and triglycerides, adrenal calcification, hepatosplenomegaly, diarrhea, and severe early-onset disease.

Synonyms:

Wernicke Encephalopathy

An acute neurologic disorder caused by thiamine deficiency, classically producing confusion, impaired coordination, and abnormal eye movements. It is a medical emergency requiring prompt thiamine treatment.

Synonyms:

Wrist Fracture

A break in one or more bones near the wrist, most commonly the distal radius or ulna, usually caused by a fall, direct trauma, or weakened bone.

Synonyms:

Wrist Sprain

Stretching or tearing of one or more ligaments supporting the wrist, causing pain, swelling, bruising, and reduced movement after injury.

Synonyms:

Wet Macular Degeneration

The neovascular form of age-related macular degeneration in which abnormal blood vessels grow beneath or within the retina and leak fluid or blood, causing rapid central-vision loss.

Synonyms:

Wound Evisceration

Separation of a surgical wound with protrusion of internal organs or tissue through the opening. It is a surgical emergency requiring protection of the exposed tissue and urgent medical evaluation.

Synonyms:

Common Warts (Verruca Vulgaris)

Benign, rough-surfaced skin growths caused by infection with human papillomavirus (HPV), commonly affecting the hands and fingers.

Synonyms: Verruca Vulgaris

Plane Warts (Verruca Plana)

Small, smooth, relatively flat warts caused by HPV, often occurring in groups on the face, hands, or legs.

Synonyms: Verruca Plana

Digitate Warts (Verruca Digitata)

Filiform or finger-like warts, usually arising on the face or neck and caused by HPV infection.

Synonyms: Verruca Digitata

Plantar Warts (Verruca Plantaris)

Warts on the soles of the feet caused by HPV. Pressure may push them inward and produce pain during walking.

Synonyms: Verruca Plantaris

Mucosal Warts

HPV-associated warts arising on mucous membranes, including the oral, genital, or anorectal mucosa.

Synonyms:

Laryngeal Warts (Recurrent Respiratory Papillomatosis)

Benign papillomatous growths caused by HPV in the larynx or respiratory tract. They may cause hoarseness, stridor, or airway obstruction.

Synonyms: Recurrent Respiratory Papillomatosis

Wassermann Reaction

A historical complement-fixation blood test for

syphilis. It has largely been replaced by modern treponemal and nontreponemal serologic tests.

Synonyms:

Wasp Sting

A venomous insect sting that may cause localized pain, redness, and swelling; severe reactions can include anaphylaxis or, rarely, systemic envenomation.

Synonyms:

Water-Hammer Pulse (Corrigan Pulse)

A pulse with a rapid upstroke and collapse, classically associated with significant aortic regurgitation and other states of increased pulse pressure.

Synonyms: Corrigan Pulse

Weaning

Gradual reduction and eventual discontinuation of breastfeeding, bottle-feeding, or a medicine or other treatment, according to the relevant clinical context.

Synonyms:

Wenckebach Phenomenon (Mobitz Type I AV Block)

Progressive prolongation of the PR interval followed by a nonconducted atrial impulse and a dropped QRS complex. It reflects intermittent impairment of atrioventricular conduction.

Synonyms: Mobitz Type I AV Block

White Finger

Episodic pallor or whitening of the fingers caused by vasospasm, commonly associated with Raynaud phenomenon or hand-arm vibration syndrome.

Synonyms:

White Leg (Phlegmasia Alba Dolens)

Painful, marked swelling and pallor of a limb caused by extensive deep venous thrombosis, usually involving major venous outflow. It requires urgent assessment.

Synonyms: Phlegmasia Alba Dolens

Whitlow (Paronychia)

Acute or chronic infection and inflammation of the tissues around a fingernail or toenail, usually caused by bacteria, fungi, or repeated moisture and trauma.

Synonyms: Paronychia

Widal Reaction

An agglutination test historically used to detect antibodies associated with Salmonella Typhi and paratyphoid infection. Its diagnostic accuracy is limited, and results require clinical interpretation.

Synonyms:

Wisdom Tooth (Third Molar)

The last molar in each dental quadrant, usually erupting in late adolescence or early adulthood. Impaction may cause pain, infection, or damage to adjacent teeth.

Synonyms: Third Molar

Witch's Milk (Neonatal Galactorrhea)

A temporary milk-like breast secretion in a newborn caused by exposure to maternal hormones. It usually resolves without treatment; the breasts should not be squeezed.

Synonyms: Neonatal Galactorrhea

Wool-Sorter's Disease (Anthrax)

An occupational form of inhalational anthrax caused by inhalation of spores of *Bacillus anthracis*, historically associated with handling contaminated wool or animal products.

Synonyms: Anthrax

Word Blindness (Alexia)

An acquired neurological disorder in which a person loses or markedly impairs the ability to read despite adequate vision and previously acquired language skills.

Synonyms: Alexia

Word Deafness (Auditory Verbal Agnosia)

An acquired inability to understand spoken words despite adequate hearing, often caused by dysfunction

of auditory-language pathways.

Synonyms: Auditory Verbal Agnosia

Worm Infestation (Helminthiasis)

Infection by parasitic worms, including nematodes, cestodes, and trematodes. Manifestations depend on the species and the organs involved.

Synonyms: Helminthiasis

Writer's Cramp

A task-specific focal dystonia causing involuntary muscle contractions and abnormal postures during writing or closely related fine-motor activities.

Synonyms:

Wryneck (Torticollis)

Abnormal tilting or rotation of the head caused by involuntary contraction, shortening, or dysfunction of neck muscles. It may be congenital, acquired, painful, or neurological.

Synonyms: Torticollis

X

X Chromosome

One of the two human sex chromosomes, carrying genes involved in sex development and many non-sex-specific biological functions. Individuals typically have one or two X chromosomes, and dosage is partly regulated by X-chromosome inactivation.

Synonyms:

X-Inactivation

Process inactivating one X chromosome in female mammals, forming Barr body. Occurs early in development, random in most tissues. Ensures dosage compensation.

Synonyms:

X-Linked Agammaglobulinemia

An inherited immunodeficiency, usually caused by a pathogenic variant in the BTK gene, that prevents normal B-cell maturation. It causes very low immunoglobulin levels and recurrent bacterial or enteroviral infections, usually beginning in infancy or early childhood.

Synonyms:

X-Linked Inheritance

Transmission of a pathogenic variant on the X chromosome. Phenotypes differ by sex, X-inactivation, and variant mechanism; fathers do not transmit an X-linked variant to their sons.

Synonyms:

X-linked retinoschisis

An inherited vitreoretinal dystrophy caused by mutations in the RS1 gene, characterized by splitting of the retinal nerve fibre layer producing a spoke-wheel pattern of cystic spaces at the macula and

peripheral retinal schisis.

Synonyms:

X-ray

An imaging method that uses ionizing radiation to create pictures of internal body structures.

Synonyms:

X-Ray (Plain Radiography)

An imaging method that uses X-rays to create a two-dimensional projection of internal structures. It is used to assess bones, the chest, abdomen, teeth, and other selected body regions.

Synonyms: Plain Radiography

X-ray (Radiography)

Projectional imaging using ionizing radiation. Dense structures (bone, contrast) appear white; air appears black. Fast, inexpensive, widely available. Two-dimensional projection of three-dimensional structures. Mammography: specialized breast X-ray for screening.

Synonyms: Radiography

X-ray Attenuation

Reduction in the intensity of an X-ray beam as it passes through tissue or another material.

Synonyms:

X-ray Shield

Lead apron, thyroid shield for radiation protection during imaging.

Synonyms:

X-Rays (Röntgen Rays)

Electromagnetic radiation used in radiography and other imaging techniques to create images by measuring differences in tissue attenuation.

Synonyms: Röntgen Rays

Xanax

A brand name for alprazolam, a benzodiazepine that enhances GABA-A receptor activity and produces anxiolytic and sedative effects. It can cause impaired coordination, dependence, and respiratory depression, especially when combined with other sedatives.

Synonyms:

Xanthelasma

Xanthelasma palpebrarum are soft, yellow, lipid-filled papules or plaques on the medial canthus of the eyelids (upper more commonly than lower), the most common form of cutaneous xanthoma. They are composed of foam cells (lipid-laden macrophages) in the superficial dermis.

Synonyms:

Xanthine Oxidase Inhibitor

A class of medications that inhibit xanthine oxidase, the enzyme that catalyzes the final steps of purine metabolism: hypoxanthine to xanthine and xanthine to uric acid. By inhibiting this enzyme, XOIs reduce uric acid production and lower serum uric acid levels, used for management of chronic gout and tumor lysis syndrome.

Synonyms:

Xanthogranulomatous

Chronic destructive renal infection with replacement of parenchyma by lipid-laden macrophages. See xanthogranulomatous pyelonephritis.

Synonyms:

Xanthogranulomatous Pyelonephritis

A chronic destructive kidney infection in which renal tissue is replaced by lipid-laden macrophages. It is often associated with obstruction or stones and may require antibiotics, drainage, surgery, or

nephrectomy depending on the extent of damage.

Synonyms:

Xanthoma

Cutaneous deposits of lipids (cholesterol, triglycerides) in the dermis or tendons, presenting as yellow-orange papules, nodules, or plaques.

Synonyms:

Xanthomatosis

A disorder in which fatty deposits called xanthomas develop in the skin, tendons, or organs. It may be associated with inherited or acquired lipid disorders and can signal increased cardiovascular or organ-specific risk requiring medical evaluation.

Synonyms:

Xenobiotic

Foreign chemical substance in body. Drugs, pollutants, pesticides, industrial chemicals. Metabolized by liver enzymes.

Synonyms:

Xenograft

Tissue or a biological material transplanted between different species, often used as a temporary graft or tissue substitute.

Synonyms:

Xenograft (Heterograft)

A surgical graft taken from a donor of a different species (xenos = foreign, Greek). Xenografts are used as temporary biological dressings or as tissue replacements.

Synonyms: Heterograft

Xeroderma

Abnormally dry skin that may cause scaling, roughness, itching, or cracking. It can result from environmental exposure, skin disease, age, or medicines.

Synonyms:

Xeroderma Pigmentosum

A rare autosomal recessive disorder of nucleotide-

excision DNA repair that causes extreme sun sensitivity and a greatly increased risk of skin and eye damage and cancers. It is caused by pathogenic variants in genes involved in DNA repair.

Synonyms:

Xenophobia

An intense or persistent fear of unfamiliar people, cultures, or situations; when clinically significant, it may be considered a specific phobia.

Synonyms:

Xerophthalmia

Dryness of the conjunctiva and cornea, often caused by vitamin A deficiency. Severe disease can damage the cornea and impair vision.

Synonyms:

Xerosis

Abnormally dry skin, common in elderly patients and winter months. It results from decreased sebaceous and sweat gland activity, impaired skin barrier function, and environmental factors. Treatment includes regular emollient application (cream or ointment rather than lotion), gentle cleansing, and humidification.

Synonyms:

Xerostomia

The sensation of dry mouth caused by reduced or altered saliva production. It may result from medicines, dehydration, salivary-gland disease, radiation, or systemic illness and can impair speaking, swallowing, taste, and dental health.

Synonyms:

Xerostomia (Dry Mouth)

A subjective sensation of oral dryness caused by reduced or altered saliva production. It may result from medicines, dehydration, salivary-gland disease, radiation, or systemic illness and can contribute to difficulty speaking, swallowing, and dental decay.

Synonyms: Dry Mouth

Xylitol Toxicity

Poisoning caused by excessive xylitol exposure. It can cause marked hypoglycemia in dogs and may cause gastrointestinal symptoms in people.

Synonyms:

X-Linked Adrenoleukodystrophy

An inherited disorder of peroxisomal fatty-acid metabolism, usually affecting boys, that can cause progressive damage to the adrenal glands, nervous system, and myelin.

Synonyms:

X-Linked Ichthyosis

An inherited skin disorder caused by deficiency of steroid sulfatase, producing generalized dry, dark, plate-like scaling that often begins in infancy or early childhood.

Synonyms:

X-Linked Severe Combined Immunodeficiency

A severe inherited immune disorder, usually caused by defects affecting the interleukin-2 receptor gamma chain, resulting in profound T-cell dysfunction and vulnerability to serious infections.

Synonyms:

X-Linked Hypophosphatemia

An inherited disorder of phosphate regulation, commonly caused by excess fibroblast growth factor 23, leading to renal phosphate wasting, rickets or osteomalacia, bone pain, and growth abnormalities.

Synonyms:

XYY Syndrome

A sex-chromosome variation in which a male has an extra Y chromosome. Many affected individuals have few or no obvious symptoms, though some have tall stature, learning difficulties, or developmental differences.

Synonyms:

Y

Y Chromosome

The sex chromosome that typically carries the SRY gene and other genes involved in testicular development and male sex differentiation. It is present in most individuals with a typical 46,XY karyotype and is transmitted through the paternal line.

Synonyms:

Yohimbine

A plant-derived alkaloid that has been studied for erectile dysfunction and other uses. **Synonyms:**

YAG Capsulotomy

A laser procedure that creates an opening in an opaque posterior lens capsule after cataract surgery. It can improve vision when posterior capsule opacification is causing visual symptoms.

Synonyms:

Yaws

A chronic infectious disease caused by *Treponema pallidum pertenue* and transmitted mainly through skin-to-skin contact in children. It begins with a skin lesion and may progress to destructive lesions of skin, bone, and cartilage if untreated.

Synonyms:

Yaws (Frambesia)

A chronic, non-venereal treponematosis caused by *Treponema pallidum* subspecies *pertenue*, closely related to the syphilis spirochete (*T. pallidum pallidum*).

Synonyms: Frambesia

Yeast

Unicellular fungi that reproduce by budding (blastoconidia formation) or fission. The clinically most important yeasts are *Candida* species (*Candida albicans*, *C. glabrata*, *C. parapsilosis*, *C. tropicalis*, *C. krusei*, *C. auris*) and *Cryptococcus* species (*C. neoformans*, *C. gattii*).

Synonyms:

Yeast Infection

Vulvovaginal candidiasis: infection by *Candida albicans* (most common), causing vulvar and vaginal itching, burning, thick white 'cottage cheese' discharge, dyspareunia, and erythema; more common in pregnancy, diabetes, antibiotic use, and immunosuppression. Diagnosis: clinical; wet mount (budding yeast/hyphae), KOH, or culture.

Synonyms:

Yellow Fever

A mosquito-borne viral hemorrhagic fever caused by yellow fever virus (Flavivirus), endemic in tropical Africa and South America. Incubation 3-6 days. Presents with fever, myalgia, headache, and vomiting. A proportion of patients progress to toxic phase with jaundice, hemorrhagic fever, and multi-organ failure (hepatorenal).

Synonyms:

Yellow-nail syndrome

A rare triad of yellow, thickened, slow-growing nails, lymphedema, and chronic respiratory disease including bronchiectasis and pleural effusions. The nail changes result from impaired lymphatic drainage affecting nail growth. It typically affects middle-aged adults.

Synonyms:

Yersinia Enterocolitica

A gram-negative coccobacillus of the family Enterobacteriaceae, a common cause of enterocolitis and mesenteric lymphadenitis, especially in children and young adults in temperate climates.

Synonyms:

Yersinia Infection

Infection caused by Yersinia bacteria, commonly producing diarrhea, abdominal pain, fever, or vomiting. Some cases mimic appendicitis; severe illness, dehydration, bloody diarrhea, or persistent symptoms requires medical assessment.

Synonyms:

Yersinia pestis

A gram-negative rod that causes plague, a severe and potentially fatal infection. The organism is transmitted by flea bites or direct contact with infected animals. Bubonic plague presents with painful lymphadenopathy (buboes). Pneumonic plague involves the lungs and is transmitted by respiratory droplets.

Synonyms:

Yolk Sac

An extraembryonic structure that supports the early embryo before the placenta is fully functional. It contributes to early blood-cell formation and development of the primitive gut and is assessed on early pregnancy ultrasound.

Synonyms:

Yolk-sac tumor

A malignant germ-cell tumor that commonly occurs in children and produces alpha-fetoprotein.

Synonyms:

Yttrium-90

Beta emitter, half-life 64 hours. Used in radioembolization (Y-90 microspheres) for liver cancer. Bremsstrahlung imaging possible.

Synonyms:

Yips

Sudden involuntary movements or muscle spasms that interfere with a skilled task, often in athletes or musicians.

Synonyms:

Yergason Test

A shoulder examination maneuver used to assess the long head of the biceps tendon and transverse humeral ligament by resisted supination and external rotation.

Synonyms:

Yersiniosis

Infection caused by Yersinia bacteria, most often Y. enterocolitica or Y. pseudotuberculosis, producing diarrhea, abdominal pain, fever, or pseudoappendicitis.

Synonyms:

YAG Laser Capsulotomy

A laser procedure that creates an opening in a cloudy posterior lens capsule after cataract surgery, restoring the passage of light and improving vision.

Synonyms:

Z

Z-Plasty

Surgical technique for contracture release using Z-shaped incision. Lengthens tissue, changes scar orientation.

Synonyms:

Zonules

Fibrous ligaments that suspend the lens from the ciliary body. **Synonyms:** Zonular fibers

Zoonotic Disease

An infection that can naturally pass between animals and humans. **Synonyms:** Zoonosis

Zavanelli Maneuver

The final, rarely performed maneuver for an irreducible shoulder dystocia: the fetal head is replaced into the vagina (cephalic replacement) and the patient undergoes emergency cesarean delivery.

Synonyms:

Zellweger Syndrome

The severe end of the Zellweger spectrum of peroxisomal biogenesis disorders, usually caused by PEX-gene variants. It presents in neonates with hypotonia, seizures, feeding difficulty, distinctive facial features, liver dysfunction, neuronal migration defects, and profound developmental impairment.

Synonyms:

Zenker Diverticulum

Pulsion diverticulum at the junction of the thyropharyngeus and cricopharyngeus muscles in the proximal esophagus. It presents with dysphagia, regurgitation of undigested food, halitosis, and aspiration. Diagnosis is by barium swallow showing

the characteristic outpouching.

Synonyms:

Zenker's diverticulum

A pouch formed through the wall near the upper esophagus, causing difficulty swallowing, regurgitation, cough, or aspiration.

Synonyms:

Ziehl-Neelsen Stain

An acid-fast stain retaining carbol fuchsin in waxy mycolic-acid cell walls despite acid-alcohol decolorization, with methylene blue counterstain rendering acid-fast organisms red. Clinically important for *Mycobacterium tuberculosis*, *M. leprae*, *Nocardia*, and *Cryptosporidium* oocysts, it is a rapid initial sputum test for tuberculosis.

Synonyms:

Zieve's Syndrome

A triad of haemolytic anemia, hyperlipidaemia, and jaundice occurring in the setting of chronic alcohol use disorder and alcoholic liver disease (acute alcoholic steatohepatitis or alcoholic cirrhosis).

Synonyms:

Zika

Zika virus: a mosquito-borne (*Aedes*) flavivirus, also sexually transmitted. Usually asymptomatic or mild (fever, rash, conjunctivitis, arthralgia). Major concern: congenital Zika syndrome if acquired in pregnancy—microcephaly, brain abnormalities, eye defects; also Guillain-Barré syndrome.

Synonyms:

Zika virus

A positive-sense RNA virus belonging to the Flaviviridae family that causes mild febrile illness. Zika virus is transmitted by Aedes mosquitoes and can also be transmitted sexually. Infection during pregnancy can cause congenital Zika syndrome including microcephaly. Most infections are asymptomatic or mild.

Synonyms:

Zinc

An essential trace element that acts as a structural or catalytic component of numerous proteins and enzymes, including DNA-binding zinc-finger proteins. Deficiency may impair growth, wound healing, immunity, taste, and reproductive function.

Synonyms:

Zinc Deficiency

A nutritional or malabsorptive disorder causing impaired wound healing, dermatitis, alopecia, diarrhoea, taste disturbance, and increased infection risk. Causes include inadequate intake, malabsorption, chronic diarrhoea, excessive losses, and inherited zinc-transport disorders.

Synonyms:

Zinc Ointment (Zinc Oxide)

A topical preparation that forms a protective barrier on the skin. It is used for irritation, moisture-associated dermatitis, minor skin injury, and selected dermatologic conditions.

Synonyms: Zinc Oxide

Zirconia

Strong ceramic material for dental restorations. High flexural strength. Can be monolithic or layered with porcelain.

Synonyms:

Zollinger-Ellison Syndrome

A disorder caused by a gastrin-secreting tumor, or gastrinoma, leading to excessive gastric-acid production. It may cause recurrent or difficult-to-treat peptic ulcers, abdominal pain, diarrhea, and reflux;

tumors commonly arise in the duodenum or pancreas.

Synonyms:

Zooglea

A gelatinous mass of bacteria embedded in a polysaccharide matrix.

Synonyms:

Zoon Balanitis

A chronic benign inflammatory disorder of the glans penis, usually presenting as a sharply demarcated shiny orange-red or rust-colored patch in uncircumcised men.

Synonyms:

Zoonosis

An infectious disease naturally transmitted between vertebrate animals and humans; the plural is *zoonoses*. Transmission may occur through direct contact, animal products, food, water, or arthropod vectors. Examples include rabies, brucellosis, leptospirosis, Lyme disease, psittacosis, toxoplasmosis, and avian influenza.

Synonyms:

Zoster

A painful, vesicular rash caused by reactivation of latent varicella-zoster virus (VZV, human herpesvirus 3) in the dorsal root ganglia. See herpes zoster (shingles).

Synonyms:

Zygoma (Zygomatic Bone)

A paired, quadrangular facial bone forming the prominence of the cheek and part of the lateral wall and floor of the orbit. It articulates with the frontal, sphenoid, temporal, and maxillary bones and transmits forces from the face to the cranial skeleton.

Synonyms: Zygomatic Bone

Zygomycosis

An infection caused by fungi historically classified in the class Zygomycetes, including organisms now

placed among mucormycetes. It can produce rapidly invasive disease of the nose, sinuses, orbit, lungs, skin, or gastrointestinal tract, especially in immunocompromised patients.

Synonyms:

Zygote

The cell formed when a sperm and an oocyte fuse at fertilization. It is usually diploid and begins the developmental process that follows fertilization.

Synonyms:

Zymogen

An inactive enzyme precursor that is converted into an active enzyme, often by cleavage.

Synonyms:

Zymogen (Proenzyme)

An inactive precursor of an enzyme that requires proteolytic cleavage to become catalytically active.

Synonyms: Proenzyme

Zonule

Fibers that suspend the lens of the eye from the ciliary body and help change its shape for focusing.

Synonyms:

Zieve Syndrome

A reversible complication of heavy alcohol use characterized by acute alcohol-associated hepatitis, hemolytic anemia, and transient hyperlipidemia, often accompanied by abdominal pain, nausea, or jaundice.

Synonyms:

Zygomatic Fracture

A break in the cheekbone or zygomatic complex, usually caused by facial trauma and potentially associated with orbital injury, numbness, double vision, or difficulty opening the mouth.

Synonyms:

Zinc Toxicity

Harmful effects caused by excessive zinc exposure

or supplementation, which may produce nausea, vomiting, abdominal symptoms, copper deficiency, anemia, or impaired immune function.

Synonyms:

Bibliography and Sources

This is a selected bibliography of standard medical dictionaries and authoritative biomedical terminology resources used to guide terminology, spelling, synonyms, and general definitions in this dictionary. The source material is not mapped term-by-term, so this list should not be read as a claim that every entry was copied from every source. Clinical decisions should be based on current guidelines, specialist references, and primary literature.
